

# STATION NEWS

Vol. 46, No. 18.

May 8, 1946.

Geneva, N. Y.

## STAFF MEETING

The regular monthly Staff meeting is scheduled for next Monday, May 13th, when the results of the balloting for members of the standing committees will be announced and other business transacted.

## GOIN' FISHING

Professor Walter O. Gloyer has filed application for retirement, effective June 1st, following 34 years with the Station in the investigation of diseases of fruits and vegetables. Professor Gloyer was born in Milwaukee and received the A. B. and A. M. degrees from the University of Wisconsin. In 1910, he became Assistant Botanist at the Ohio Experiment Station at Wooster and joined the Staff of this Station in 1912. He is a member of the AAAS, the American Phytopathological Society, and the Wisconsin Academy of Science. He is the author of numerous bulletins and scientific papers on apple cankers and apple scab, and on diseases of asters, cabbage, and beans, as well as on studies of the hardshell character of seeds. Walter's immediate plans call for continued residence in Geneva, with some travel and especially some fishing trips in the near future. Anyone who will bring the sandwiches and row the boat will be welcome to go along on the fishing expeditions, he says. Good luck, good health, and good fishing, Walter!

## DR. DEY TO SPEAK

Doctor Dey will address the University Club of Geneva on the organization and purpose of the New York State School of Industrial and Labor Relations next Monday evening at the Hotel Seneca.

\*\*\*\*\*

## PRIVATE BINDING

Miss Jennings is prepared to handle orders for private binding at the time that material for the Station Library goes to the bindery next week.

\*\*\*\*\*

## GARDEN CLUBS

Representatives from Rochester garden clubs are visiting the Station today under the auspices of the Garden Center of that city.

\*\*\*\*\*

## QUICK FREEZING

Doctor Frank Lee is talking on quick freezing before a meeting sponsored by the Home Bureau in Seneca Falls High School this afternoon. Home freezing, DDT, and 2,4-D are about evenly matched as subjects of popular interest these days, and new information is in great demand.

\*\*\*\*\*

## NURSERY STOCKS

Mr. C. C. Feng, one of a group of Chinese teachers now at the College of Agriculture, is spending a couple of days here to gain information on problems involved in the management and production of nursery rootstocks and small fruits.

\*\*\*\*\*

## PROF. CURTIS HERE

Professor O. F. Curtis, Jr., arrived in Geneva last week and has entered upon his duties in connection with the rootstock investigations of the Pomology Division. Coming to Geneva from the USDA date laboratory at Indio, Calif., in the midst of the drouth of 1946, Professor Curtis and his family must feel that they have landed in another desert community.

## NEW PUBLICATIONS

The following bulletins have just been received from the printer and are now available upon request in the Bulletin Room:

Bulletin No. 717. The Quality of Flower and Vegetable Seeds on Sale in New York in 1945, by M. T. Munn.

Bulletin No. 718. Some Factors Causing Dark-colored Maple Sirup, by F. W. Hayward and C. S. Pederson.

Bulletin No. 719. The Storage of Maple Sirup, by F. W. Hayward.

Bulletin No. 720. Factors in the Preparation of Maple Cream, by F. W. Hayward.

## A GUEST TEA

The May meeting of Ceres Circle on Wednesday, May 15th, is to take the form of a guest tea and all members are urged to be present and to bring a guest. The affair will be held at the Director's residence, with Mrs. James D. Harlan and Mrs. George D. Oberle as hostesses.

\*\*\*\*\*

## CASEY-TYLER

The marriage of Miss Marjorie Ellen Casey, daughter of Mr. and Mrs. William Casey, and Leon C. Tyler last Saturday is of more than passing interest to readers of the NEWS. The bride is the daughter of the ever-popular oldtime fiddler known to most of us simply as "Casey" who, for many years, was in charge of the Station's dairy herd and whose sayings and stories are part of the "folklore" of the Experiment Station. The groom was employed at the Station before he entered the Army where he served four years. Upon his discharge last February, he returned to the Station and is now employed in the Division of Food Science and Technology in connection with the fruit concentrate investigations. Our congratulations and best wishes!
