Survey of Spanish America from the rise of pre-Columbian civilizations through the European conquest, the establishment and development of colonial societies, imperial rivalries in the New World, the background of the independence movements, and the achievement of political independence.

HIST 296 Modern Latin America @ (III)
Spring. 4 credits. R. Craib.
An introductory survey of Latin American history from the early nineteenth century to the present with particular emphasis on processes of nation-state formation and the development of capitalist economies. Prominent themes include neocolonialism; revolutionary movements and radicalism; ethnic, gender, and class relations; and the United States-Latin American relations.

HIST 418 Agrarian History (III)
Fall. 4 credits. R. Craib.
A comparative, interdisciplinary examination of agrarian life from a broad temporal and geographical perspective. Strong emphasis on recent historiography, methodology and theory. Major themes include rural rebellion, resistance, and crime; capitalist transformation of the countryside; agrarian custom and practice; and the way in which rural life has been romanticized, denigrated, and essentialized. Readings include works of history, fiction, literary theory, anthropology, and geography.

HIST 423 Chronicles of the Conquest of Latin America @ (III)
Spring. 4 credits. K. Graubart.
In this seminar we examine the writings of participants in the conquest and colonization of Latin America. Readings include writings by European conquistadors, Amerindian elites, and non-alphabetic materials from the early colonial period. In particular we investigate how the history of the conquest itself and of the societies that existed prior to this contact were produced by its participants, with special attention to questions of ethnicity, gender, and class.

HIST 438 History's Margins: Frontiers and Borders in Comparative Perspective (III)
Spring. 4 credits. R. Craib.
A comparative seminar on borders and frontiers. Primary emphasis is on the Mexican-U.S. border. Central themes include the historical transformation of frontiers into borders; colonialism and imperialism; and immigration and nation-state formation. Attention is also given to situating the revived interest in borders in relationship to contemporary economic, political, and social changes. Readings include works of fiction, literary theory, history, science studies, and postcolonial criticism.

[HIST 445 Prostitutes and Patriots: Urban Culture and the Construction of Citizenship in Latin America, 1880–1950 (also HIST 645) @ (III)
Fall. 4 credits. Prerequisites: HIST 295 and/or 296 suggested. Permission of instructor required. Enrollment limited to 15. Not offered 2001–2002. M. Roldan.
Unprecedented demographic and economic changes gave rise to debates by the late nineteenth century regarding the definition of citizenship and the limits of individual participation in Latin American societies. These debates centered on the city—the symbol of both "progress" and "disorder". Rising tensions were expressed through the trope of the "prostitute" (disease and loss of control) and the "patriot" (science, statesmanship, and order). The course examines changing notions of the private/public; the regulation of sexuality and gender; popular mobilization; and the construction of the nation.]

HIST 649 Seminar in Latin American History
Fall. 4 credits. M. Roldan.
A graduate-level seminar focusing on changing topics in Latin American history (politics, labor; race/ethnicity; violence; social movements, agrarian society, etc.). In addition to weekly meetings to discuss readings, students are expected to conduct original research culminating in a final 25- to 30-page paper.

African History

[HIST 255 Cultures and Controversies in Precolonial Africa @ # (III)
Fall. 4 credits. Not offered 2001–2002. S. Greene.
This course examines the history of Africa, focusing on a selected set of political communities whose pre-colonial histories help us to understand controversies raging today. Who were the ancient Egyptians? What "race" were they and is this important anyway? If so, why? What role did women and men, slaves and free, kings and commoners play in ancient Mali, the Swahili city-states in Rwanda, and what can this information tell us about these societies today? What role did the slave trade play in influencing the current economic position of Africa and race relations in the U. S. today? We explore these and other questions.]

HIST 256 Sophmore Seminar: Riot and Revolution in Nineteenth-Century Africa: The Birth of the Modern @ # (III)
Spring. 4 credits. S. Greene.
The beginning of the nineteenth century witnessed the rapid and often times forceful expansion of Islam in West Africa, the transformation of the Zulu from a small, inconsequential people to the largest and most powerful ethnic group in South Africa, and a major riot by enslaved peoples in east Africa. This course explores these revolutionary changes and upheavals as Africa remade itself to face the modern era. Lectures, readings and discussions focus on the causes and consequences of these events and their significance for understanding contemporary Africa.

[HIST 443 The European as Other @ (III)
Fall. 4 credits. Prerequisite: permission of instructor. Limit 15. Not offered 2001–2002. S. Greene.]

HIST 604 The Colonial Encounter @
Fall. 4 credits. Prerequisite: permission of instructor. S. Greene and T. Loos.
The course examines the way colonizer and colonized influenced the culture, history, and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself. We consider both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, the Netherlands) with the states they colonized in Africa and Asia. This linkage challenged, at different times and in different places, pre-existing understandings of self, country, and culture, and notions about the other.

Asian History

[HIST 190 Introduction to Asian Civilizations @ # (III)
Spring. 4 credits. Not offered 2001–2002. J. Piggott and staff.
An introduction to the distinctive cultures of China, India, Japan, and Southeast Asia that features an intensive examination of selected topics and periods of particular significance in the history of each.]

HIST 191 Introduction to Modern Asian History (also ASIAN 191) @ (III)
Fall. 4 credits. S. Cochran and T. Loos.
The history of Asia-Pacific from the nineteenth century to the present, focusing on relations of China, Japan, and Southeast Asia with each other and with the West.

[HIST 203 War and Diplomacy in Korea @ (III)
Spring. 4 credits. Not offered 2001–2002; next offered 2002–2003. B. Strauss.

Korea's challenging location between great powers, its long struggle between independence and outside control, and its tragic division, all make for a singular case study in the history of war and diplomacy. This course examines that history with particular focus on the Imjin War (1592–1598) and the Korean War (1950–1953). Topics include geopolitics, military tactics, and strategy on the Korean peninsula; Admiral Yi Sun-Shin as strategist and tactician; the effect of war on Korean society; and the pattern of Korean relations with China, Japan, Russia (and other northern Asian powers), and the United States.]

[HIST 207 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also ASIAN 206 and HIST 507) @ (III)

Spring. 4 credits. Letter grade only. Not offered 2001–2002. T. Loos.

Students read travel literature about Southeast Asia in the nineteenth and early twentieth centuries and travel accounts written by Southeast Asians living abroad. The seminar emphasizes themes of race, orientalism, transculturation, and authenticity. We critically assess the transformative potential of the Internet on (virtual) tourism. Graduate students should register for HIST 507 and are expected to participate in the HIST 207 seminar. Preference is given to students with Internet experience.]

HIST 218 Introduction to Korea (also ASIAN 218) @ (III)

Fall. 3 credits. Staff.

For description see ASIAN 218.

[HIST 230 Seminar in History and Memory: The Asia-Pacific War @ (III)

Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Not offered 2001–2002; next offered 2002–2003. J. V. Koschmann.

This seminar examines what is at stake when the fighting between Japan and its former enemies in the Pacific during World War II is remembered, memorialized, and (re)constructed as historical narrative by Japanese, Americans, and others. By exploring the legacies of such events and processes as the Rape of Nanking, live testing of biological and chemical warfare agents, sexual slavery, and incendiary bombings of Hiroshima and Nagasaki, the seminar offers an opportunity to reflect in a more general way on the politics of historical representation and memory.]

[HIST 243 Seminar: China and the West before Imperialism @ # (III)

Spring. 3 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2001–2002. C. Peterson.

What accounts for the first great passion for things Chinese in the West (from the sixteenth to the nineteenth centuries) followed by the hostility characteristic of imperialism? This seminar explores this question relying heavily on original sources to trace the China vogue in thought, literature, and art and comparing the Western image with the realities of China of that day.]

HIST 249 Peddlers, Pirates, and Prostitutes: Subaltern Histories of Southeast Asia, 1800–1900 (also HIST 648 and ASIA 249/648) @ # (III)

Spring. 4 credits. E. Tagliacozzo.

This course examines Southeast Asian history "from below" over the course of a single century, 1800–1900. Laboring histories, the history of piracy and prostitution, and the pasts of people usually considered "marginal" to the state are all discussed. How do we look for clues to these peoples' lives? Were there similarities in experience across disparate geographies? What did it mean to be an outlaw, "deviant," or poor in colonial Southeast Asia? This course attempts to answer these questions.

HIST 284 Southeast Asia in the World System: Capitalism and Incorporation, 1500–Present (also HIST 684 and ASIAN 284/684) @ # (III)

Fall. 4 credits. Graduate students should enroll in HIST 684. E. Tagliacozzo.

This course examines the history of Southeast Asia in conjunction with what theorists have called the emerging "World System." The expanding reach of capitalism is traced through the region's Early Modern "Age of Commerce"; through the age of great European merchant companies; through the coercive capitalism of the imperial age; and into our own times. Throughout, attention is paid to similar (or dissimilar) trends in the rest of global history, spanning Europe, Africa, Middle East, and the Americas. Open to students with an interest in Southeast Asian history, as well as the shaping forces of capitalism on the modern world.

HIST 289 The U.S.-Vietnam War (also ASIAN 298) @ (III)

Fall. 3 credits. K. Taylor.

This is a survey of events in Vietnam, the U.S., and elsewhere related to U.S. intervention in Vietnam from the 1940s to 1975. Readings include historical narratives, memoirs, and literature. Alternative ways of understanding this war in context of Vietnamese and American history are explored.

[HIST 293 History of China up to Modern Times @ # (III)

Fall. 4 credits. Not offered 2001–2002. C. A. Peterson.

A survey of the principal developments in the history of China from the earliest times to the eighteenth century that also undertakes a topical introduction to Chinese culture and civilization, in part by the use of visual materials.]

HIST 294 History of China in Modern Times (also ASIAN 294) @ (III)

Spring. 4 credits. S. Cochran.

A survey that concentrates on the rise of the last imperial dynasty in the seventeenth and eighteenth centuries, the upheavals resulting from domestic rebellions and foreign imperialism in the nineteenth century, and the twentieth-century efforts to achieve social mobilization, political unity, and commercial expansion.

HIST 297 Japan Before 1600 (also HIST 597 and ASIAN 297/597) @ # (III)

Fall. 4 credits. J. Piggott.

This course explores Japan before 1600 from a variety of perspectives. Analysis of primary sources, including literary and archaeological artifacts, is emphasized. HIST 297 is a good introduction to issues of premodern historical study and to the study of East Asia. (Graduate students or more advanced undergraduates who would like to do a research project should register for HIST 597).

[HIST 322 History of *Samurai* # @ (III)

Spring. 4 credits. Not offered 2001–2002. J. Piggott.

This course explores the role of the *samurai* at various epochal moments, and the effects *samurai*-centered governance has had on society and culture up to the early modern era. This is very much a hands-on course in which analysis and writing are emphasized. Recommended: HIST 297. Graduate students are welcome but they should register for HIST 522 after consultation with the instructor.]

[HIST 326 History of the *Samurai* II @ # (III)

Fall. 4 credits. Prerequisite: HIST 322. Not offered 2001–2002. J. Piggott.

We continue study of themes and issues introduced in HIST 322, wherein the origins of the *samurai* from eighth-century roots through the era of the first warrior government during early medieval times are traced. This course covers the *samurai* through 1600.]

[HIST 328 State, Society, and Culture in Modern Japan @ (III)

Spring. 4 credits. Not offered 2001–2002. J. V. Koschmann.

A survey of Japan from early-nineteenth century to the present, which attempts to connect the political, socio-economic, and imaginative realms of modern Japanese life so as to achieve a complex view of modern Japanese society. Pays particular attention to the changing situation of women and women's movements, Japan's relations with Asia and the United States, and problems of historical representation and consciousness. Readings include Japanese works in translation as well as secondary sources.]

HIST 360 Early Warfare, East and West # (III)

Fall. 4 credits. C. A. Peterson.

For description see Comparative History.

HIST 388 Vietnamese Histories (also HIST 688 and ASIAN 385/685) @ # (III)

Fall. 3 credits. K. Taylor.

For description see ASIAN 385.

[HIST 393 Images of Humanity in Medieval China (also ASIAN 393) @ # (III)

Fall. 4 credits. Permission required. Not offered 2001–2002. C. A. Peterson.]

HIST 395 Southeast Asia to the Eighteenth Century (also HIST 695) @ # (III)

Fall. 4 credits. D. Wyatt.

A survey of the earlier history of Southeast Asia, concentrating particularly on regional movements of economic, social, cultural, and political change and using, to the extent possible, readings in translated primary sources.

HIST 396 Southeast Asian History from the Eighteenth Century (also HIST 696 and ASIAN 396/696) @ (III)

Spring. 4 credits. S-U option. T. Loos and E. Tagliacozzo.

Surveys the modern history of Southeast Asia with special attention to colonialism, the Chinese diaspora, and socio-cultural institutions. Considers global transformations that

brought "the West" into people's lives in Southeast Asia. Focuses on the development of the modern nation-state, but also questions the narrative by incorporating groups that are typically excluded. Assigns primary texts in translation.

HIST 416 Undergraduate Seminar on Gender and Sexuality in Southeast Asia (also ASIAN 416 and WOMNS 416) @ (III)
Spring. 4 credits. Letter grade only. T. Loos.
Students consider the relationships among colonialism and gender and sexual identity formation in Southeast Asia. Using material from a wide range of fields including anthropology and literature, the course complicates a simplistic East/West and male/female binary.

[HIST 420 Japan in the Year 1000: *The Tale of Genji* in Historical Perspective @ # (III)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. J. Piggott.
The *Tale of Genji* is a classic of premodern Japanese literature that provides readers a broad view into Japan's courtly society at a time when many of the elements of Japan's classical tradition were taking form. Those interested in premodern Japan, Comparative Literature, and courtly societies will find the seminar of great interest. Previous study of premodern Japan is advised.]

[HIST 448 Family and Gender Relations in Premodern Japan # @ (III)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002; next offered 2002–2003. J. Piggott.
An inquiry into structures of family and gender relations in the classical and medieval periods. Themes will include kinship and family organization, state formation, and gender construction. Those interested in comparative perspectives are encouraged to enroll. Breadth reading, primary source materials, and comparative reading placing Japan in an East Asian context are emphasized. Previous study of premodern Japan and East Asia is recommended.]

HIST 451 Crime and Diaspora in Southeast Asian History, 1750–1950 (also HIST 650 and ASIAN 450/651) @ # (III)
Fall. 4 credits. E. Tagliacozzo.
During the last two centuries, the mass movement of people in Southeast Asia has increased to an unparalleled scale. This course examines the diasporas of various Asian peoples in this time frame, and asks how these movements have intersected with notions (and actions) of "criminality" in the region. Historical sources, period literature, and anthropological writings are used to analyze the growth of migration, smuggling syndicates, and "illicit" behavior in Southeast Asia. Open to students with an interest in Southeast Asian history and the region's links to the wider Asian orbit.

[HIST 466 Kings and Shoguns: the *Taiheiki* Age @ # III
Spring. 4 credits. Not offered 2001–2002; next offered 2002–2003. J. Piggott.
The turn of the fourteenth century witnessed epochal changes in Japan as structures of monarchy, court-*Bakufu* relations, landholding, judiciary, international relations, and popular culture were deeply affected by the failure of Go-Daigo Tenno's royal restoration. Core readings of the seminar include portions of the martial epic, the *Taiheiki*, and other materials from which insights into these transformations can be drawn. Previous study of Japanese history, especially HIST 322, is highly recommended.]

[HIST 476 Senior Seminar: Comparative Colonial Law and Society (also ASIAN 476) @ III
Fall. 4 credits. Letter grade only. Limited to 15 students. Not offered 2001–2002. T. Loos.
Students explore topics including: hybrid jurisprudence, notions of public and private, religious codes, family, and national identity that resulted from colonial policies. Most readings focus on law, society in colonial Southeast Asia. Readings may include theoretical material on law and society and historical material about jurisprudence in Europe that informed colonial categories of law in the colonies. Relevant comparative readings outside the scope of Southeast Asia are also included.]

[HIST 480 Senior Seminar: Gender Adjudicated (also WOMNS 480 and ASIAN 482) @ # III
Fall. 4 credits. Letter grade only. Limited to 15 students. Not offered 2001–2002. T. Loos.
Students explore the intersections among jurisprudence, religious codes, gender, family, and national identity in Southeast Asia from the colonial period to the present.]

[HIST 489 Seminar in Modern Japanese History @ III
Fall. 4 credits. Prerequisites: HIST 298 or equivalent knowledge of modern Japanese history. Not offered 2001–2002. J. V. Koschmann.]

HIST 490 Tales of the Heike (also ASIAN 490/690 and HIST 690) @ # III
Fall. 4 credits. Prerequisite: previous study of pre-1600 Japan or permission of instructor. Limited to 15 students. J. Piggott.
Medieval Japan was crisscrossed by an assortment of minstrel monks who sang the heroic exploits of fighting men—samurai—in the late twelfth century. The resulting *Tale of the Heike* (Heike Monogatari) was later compiled in its current form by the master chanter Kakuichi during the 14th century. It has been called "Japan's first national epic," because listening to it, enjoying it, and identifying with it brought people of all strata and regions together as nothing had done before. In this seminar we will investigate the *Tale of the Heike* from various historical and literary perspectives.

HIST 492 Undergraduate Seminar in Medieval Chinese History @ # III
Fall. 4 credits. Prerequisite: HIST 190, 293, 360, or permission of instructor. C. A. Peterson.
Topic for fall 2001: The Cultural, Social and Intellectual Life of the Medeival Chinese Literati.

HIST 493 Problems in Modern Chinese History (also HIST 693) @ III
Fall. 4 credits. Prerequisite: HIST 294 or permission of instructor. S. Cochran.
Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

[HIST 495 Kings and States: Asian Models @ # III
Spring. 4 credits. Prerequisite: previous coursework in East Asian history and permission of instructor. Not offered 2001–2002. J. Piggott.
The seminar explores kingship and state formation in comparative perspective. In addition to participating in discussions focused on core readings, seminar members undertake research projects targeting a society of their choice. Students interested in the history of preindustrial societies, political and cultural anthropology, political science, and religion will find the seminar of interest.]

HIST 499 Problems in Modern Chinese History (also HIST 694 and ASIAN 499/694) @ III
Spring. 4 credits. Prerequisite: HIST 294 or permission of instructor. S. Cochran.
This course gives each student an opportunity to select one research topic and work on it throughout the semester. Knowledge of Chinese is not required, but background in Chinese studies is needed.

HIST 507 Graduate Seminar: The Occidental Tourist
Spring. 4 credits. T. Loos.
For description see HIST 207.

[HIST 588 Proseminar in Modern Korean History
Spring. 4 credits. Prerequisite: a course on East Asian history or equivalent. Not offered 2001–2002. J. V. Koschmann.
Designed primarily for graduate students in East Asian Studies who specialize in Chinese and/or Japanese history but need, for comparative or other purposes, to develop a familiarity with the main problems and contours of modern Korean history. Readings are selected primarily from English-language works on Korea from the 1870s through the post–World War II era, including Japanese colonial policy and practice in Korea, the Korean War, and the postwar history of the Republic of Korea.]

HIST 597 Colloquium in Premodern Japanese History
Fall. 4 credits. For advanced undergraduates or graduates. J. Piggott.
This colloquium explores the premodern civilization of Japan from a variety of historical perspectives. Students must attend HIST 297 lectures and participate in a special weekly colloquium.

[HIST 598 Colloquium in Modern Japanese History
Spring. 4 credits. Not offered 2001–2002. J. V. Koschmann.
For graduate students only. Students attend lectures and do the reading for HIST 298, participate in a special weekly colloquium, and write a seminar paper.]

HIST 604 The Colonial Encounter
Fall. 4 credits. S. Greene and T. Loos.
This course examines the way colonizer and colonized influenced the culture, history, and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself. We consider both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, and the Netherlands) with the states they colonized in Africa and Asia. We discuss how this linkage challenged, at different times and in different places, pre-existing understandings of self, country, culture and notions about the other.

[HIST 609 Modern Japan Studies: The Formation of the Field in History and Literature (also ASIAN 609)
Fall. 4 credits. Not offered 2001–2002.
J. V. Koschmann and N. Sakai.
The course provides both a historical introduction to and critical analysis of the constitution of modern Japan studies as a "field" of postwar academic inquiry. While reading texts particularly influential in the early and contemporary formation of the field, we consider such questions as the domestic and international contexts in which Japanese studies has been institutionalized and maintained, and the relationship between "Japan" as object of area studies discourse, and "Japan" as represented in American journalism, popular culture, and politics. Interdisciplinary and team-taught, the course aims to introduce students to a range of methodologies and approaches developed in historical and critical works, problematizing assumptions in each case. Possibilities for cross-disciplinary research (along lines recently undertaken in areas such as feminist criticism and cultural studies, for example), are also explored.]

HIST 650 Crime and Diaspora in Southeast Asian History
Fall. 4 credits. E. Tagliacozzo.
For description, see HIST 451.

HIST 684 Southeast Asia in the World System: Capitalism and Incorporation, 1500-The Present
Fall. 4 credits. E. Tagliacozzo.
For description, please see HIST 284.

HIST 688 Vietnamese Histories (also HIST 388 and ASIAN 385/685
Fall. 3 credits. K. Taylor.
For description, see ASIAN 385.

HIST 690 Tales of the Heike (also ASIAN 490/690 and HIST 490)
Fall. 4 credits. Limited to 15 students.
J. Piggott.

[HIST 691 Chinese Historiography and Source Materials
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
C. Peterson.]

HIST 693 Problems in Modern Chinese History (also HIST 493)
Fall. 4 credits. Prerequisite: HIST 294 or permission of instructor. S. Cochran.
Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

HIST 694 Problems in Modern Chinese History (also HIST 499 and ASIAN 499/694)
Spring. 4 credits. Prerequisite: HIST 294 or permission of instructor. S. Cochran.
For description, see HIST 499.

HIST 695 Early Southeast Asia: Graduate Proseminar
4 credits. D. Wyatt.
Introduction to the history of Southeast Asia for graduate students.

HIST 696 Modern Southeast Asia: Graduate Proseminar (also HIST 396 and ASIAN 396/696)
Spring. 4 credits. T. Loos and E. Tagliacozzo.
Introduction to the modern history of Southeast Asia for graduate students. Students are expected to attend the lectures and complete the readings for HIST 396, and they will separately as a group to further explore selected topics.

[HIST 791 Seminar in Medieval Chinese History
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
C. A. Peterson.]

[HIST 792 Seminar in Medieval Chinese History
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
C. A. Peterson.]

[HIST 795 Seminar in Modern Southeast Asian History
Fall. 4 credits. Permission of the instructor. Not offered 2001–2002.]

[HIST 796 Seminar in Southeast Asian History
Spring. 4 credits. Prerequisite: reading knowledge of relevant languages. Not offered 2001–2002. Staff.]

[HIST 797 Readings in Modern Japanese Thought
Spring. 4 credits. Prerequisite: reading knowledge of Japanese and permission of instructor. Not offered 2001–2002.
J. V. Koschmann.]

[HIST 798 Seminar in Japanese Thought
Fall. 4 credits. Prerequisite: reading knowedge of Japanese and permission of instructor. Not offered 2001–2002.
J. V. Koschmann.]

Near Eastern History

HIST 253 Introduction to Islamic Civilization I (also NES 255, RELST 255) @ # III
Spring. 3 credits. D. Powers.
For description, see NES 255.

[HIST 254 Islamic History: 600–1258 (also NES 257 and RELST 257) @ # (III)
Fall. 3 credits. Not offered 2001–2002.
D. Powers.
For description, see NES 257.]

HIST 288 Imagining the Modern Middle East (also NES 294, JWST 294, GOV'T 358) @ (III)
Fall. 4 credits. S. Alatout.
For description, see NES 294.

HIST 299 Introduction to Christian History (also NES 295, JWST 295, RELST 295) # (III or IV)
Spring. 3 credits. K. Haines-Eitzen.
This course offers an introduction to the history of Christianity from the apostle Paul through the seventeenth century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We explore the origins of Christianity in the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the various controversies that occupied the church throughout its history. This course draws upon primary literary sources (from biblical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.

[HIST 317 Islamic History: The Age of Ibn Khaldun (also NES 356) @ # (III)
Spring. 4 credits. Prerequisite: NES 257 or equivalent. Not offered 2001–2002.
D. Powers.
For description, see NES 356.]

[HIST 372 Law, Society and Culture in the Middle East, 1200–1500 (also HIST 652, NES 351/651, RELST 350) @ # (III)
Fall. 4 credits. Enrollment is limited to 25 students. Not offered 2001–2002.
D. Powers.
For description, see NES 351.]

[HIST 461 Seminar in Islamic History 600–750 (also HIST 671, NES 451 and 650, and RELST 451) @ # (III)
Spring. 4 credits. Enrollment is limited to 25 students. Not offered 2001–2002.
D. Powers.
For description, see NES 451.]

[HIST 652 Introduction to Islamic Law (also HIST 372, NES 351/651, RELST 350)
Fall. 4 credits. Enrollment is limited to 25 students. Not offered 2001–2002.
D. Powers.
For description, see NES 351.]

[HIST 671 Seminar in Islamic History (also HIST 461, NES 451, and 650, and RELST 451)
Spring. 4 credits. Not offered 2001–2002.
D. Powers.
For description, see NES 451.]

Ancient European History

HIST 151 Introduction to Western Civilization # (III)
Summer and fall. 4 credits. R. Graubart.
A survey of European history from Antiquity to the Renaissance and Reformation. Important themes include the influence of ancient culture on medieval society, the development of and conflict between secular and ecclesiastical governments, European encounters with the non-Europeans, the culture and role of minority groups within European society, and the roles of women.

[HIST 228 War and Peace in Greece and Rome # (III)
Fall. 4 credits. No prerequisites. Open to freshmen. Not offered 2001–2002.
B. Strauss.
In ancient Greece and Rome, government did little besides wage war and raise taxes; culture focused on war, warriors gloried in battle, and civilians tried to get out of the way. This course surveys the impact of war and the rarity of peace in the ancient world. Topics include: Why war?; the face of battle; leadership; strategy, operations, and tactics; women and war; intelligence and information gathering; diplomacy and peace-making; militarism; war and slavery; and the archaeology of warfare. Readings in translation include selections from Homer, Herodotus, Thucydides, Xenophon, Caesar, Livy, Tacitus, Josephus, and Ammianus Marcellinus.]

HIST 232 Sophomore Seminar: Eyewitness to War in the Ancient World (also CLASS 234) # (III)
Spring. 4 credits. B. Strauss.
A study of ancient soldier-historians who participated in the campaigns about which they later wrote. Topics include historicity,

autobiography, propaganda, and prose style. Readings include selections from Thucydides, Xenophon, Julius Caesar, Josephus, Ammianus Marcellinus, as well as, for comparative purposes, modern soldier-historians.

HIST 265 Ancient Greece from Homer to Alexander the Great (also CLASS 265) # (III)
Fall. 4 credits. Open to freshmen. Not offered 2001–2002. B. Strauss.
A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy, and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture.

[HIST 268 A History of Rome from Republic to Principate (also CLASS 268) # (III)
Summer and spring. 4 credits. Open to freshmen. Not offered 2001–2002. J. Ginsburg.
A survey of Rome and its empire. This course explores the formation of Rome's Mediterranean empire and its political, social, and economic consequences; the constitutional and social struggles of the late Republic; the transition from Republic to Principate; society and state under the Caesars; the nature and limits of governing a world empire; and the interaction of pagans, Christians, and Jews in the Roman world.]

HIST 435 Modern Classics in the Historiography of Ancient Greece (also CLASS 435) (III)
Fall. 4 credits. Prerequisite: an introductory course in ancient Greek history or civilization or permission of the instructor. B. Strauss.
This upper-level seminar is an introduction to some of the main themes, directions and controversies in modern research on ancient Greece. We read selections from the leading works of scholarship on ancient Greece from the nineteenth and twentieth century, including such authors as Grote, Burckhardt, Cornford, Glotz, Momigliano, M. I. Finley, Ste. Croix, Vernant, Vidal-Naquet, and the current crop of scholars.

[HIST 450 The Peloponnesian War (also HIST 630 and CLASS 450/632) # (III)
Fall. 4 credits. Prerequisites: HIST 265, CLASS 211 or 217, or permission of instructor. Not offered 2001–2002. B. Strauss.
Famous as the subject matter of one of the most important books ever written about war—Thucydides' history—the Peloponnesian War (431–404 B.C.) remains today the focus of study by historians, classicists, and political scientists. This course looks at the results of intensive and ongoing study by ancient historians and considers areas of future research. Topics include strategy, operations, and tactics; battle on land and sea; alliance politics; war and psychology; if the Peloponnesian War was really a historic turning point; war and ethics; Thucydides as a historian; and sources other than Thucydides. Graduate students should enroll in HIST 630.]

[HIST 452 The Tragedy of Classical Athens, 462–404 B.C. # (III)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. B. Strauss.
Course covers the nature of Athenian democracy, society, and culture in the "golden age" of Athens. The course examines the influence of Athenian political life on the great tragedians of the age and the influence of tragedy on the Athenians' conception of their character and history. Readings are from Herodotus, Thucydides, Aeschylus, Sophocles, Euripides, Aristophanes, Plato, Aristotle, and Plutarch.]

[HIST 453 Crisis of the Greek City-State, 415–336 B.C. # (III)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. B. Strauss.
Course covers the fortunes of the city-state and citizen in an age of uncertainty. The focus is on Athens with some attention paid to the wider Greek world. Topics include the nature of Athenian politics, Athenian society, cultural change and war between the city-states, crisis as a historical concept, and anthropology and ancient Greece. Readings in translation include Thucydides, Sophocles, Euripides, Aristophanes, Plato, Aristotle, Demosthenes, and Xenophon.]

[HIST 463 Gender and Politics in the Roman World (also CLASS 463 and WOMNS 464) # (III or IV)
Spring. 4 credits. Prerequisite: HIST 268, CLASS 212, or permission of the instructor. Not offered 2001–2002. J. Ginsburg.
This course examines the relationship between gender and politics in the late Roman Republic and early Empire. Among the questions we address are: Was politics the exclusive domain of men in Roman society (as is generally assumed)? Does a broader definition of politics, and an understanding of the various forms political activity in ancient Rome might take, allow a place for women in Roman political life? What role does gender have in Roman political discourse and ideology? Why do issues such as family, marriage, and sexuality become subjects of political debate and legislation?]

[HIST 469 Equality and Inequality in Ancient Greece (also CLASS 469) # (III or IV)
Fall. 4 credits. Prerequisite: HIST 265, CLASS 211 or 217, or written permission of the instructor. Not offered 2001–2002; next offered 2002–2003. B. Strauss.
We examine equality and inequality in Archaic and Classical Greek city-states ca. 650–400 B.C., with an eye toward politics, society and economics, culture, and gender relations. The course focuses on concepts and institutions such as ancient democracy, tyranny, oligarchy, "middling" ideology, and slavery, as well as theories of equality. All readings in English.]

HIST 473 Roman Society and Politics under the Julio-Claudians (also CLASS 480) # (III or IV)
Spring. 4 credits. Prerequisite: CLASS 212, HIST 268, or permission of instructor. J. Ginsburg.
For description, see CLASS 480.

[HIST 630 Topics in Ancient History (also CLASS 632)
Fall. 4 credits. Not offered 2001–2002. B. Strauss.]

Medieval, Renaissance, and Early Modern European History

HIST 151 Introduction to Western Civilization # (III)
Fall and summer. 4 credits. K. Graubart.
For description, see Ancient European History.

HIST 152 Introduction to Western Civilization # (III)
Summer and spring. 4 credits. R. Weil and P. Holquist.
For description, see Modern European History.

[HIST 204 Seminar: Age of Atlantic Revolution # (III)
Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2001–2002. R. Weil.
"All the Atlantic Mountains shook," wrote the poet William Blake of the revolutions which toppled regimes across Europe and the Americas at the end of the eighteenth century. This course explores the ideas, outcomes, and connections among events in America, France, Haiti, and Britain, through literary and philosophical texts: Wordsworth, Rousseau, Jefferson, Paine, Burke, Godwin, Tocqueville, and even Jane Austen.]

[HIST 211 Specters, Demons, and the Dead in European Society, 1200–1800 # (III)
Spring. 4 credits. Not offered 2001–2002; next offered 2002–2003. S. Pohl.
Premodern Europeans believed that they could interact with supernatural apparitions in a variety of ways. The dead could return to admonish the living, demons might possess men and women, houses could be haunted by specters and poltergeists. What can we learn from a study of these beliefs about the ways in which Europeans regarded sin, punishment, the afterlife, and the role of the devil in their lives? What was the impact of the Reformation or the scientific revolution on these beliefs?]

[HIST 234 Seminar: Gender in Early Modern Europe (also WOMNS 234) # (III)
Spring. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2001–2002; next offered 2002–2003. R. Weil.
Course serves as an inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?]

[HIST 257 English History from Anglo-Saxon Times to 1485 # (III)
Fall. 4 credits. Not offered 2001–2002; next offered 2002–2003. P. Hyams.
A survey of the government, social organization, and cultural and religious experience of the English people. Particular stress is laid on land settlement, the unification of the realm, the emergence of state institutions such as Parliament, and changes in economic organization (manors, towns, and commerce). The approach is comparative within a context

of contemporary European developments. The course offers students who wish to work on their writing skills an opportunity to do so, especially in the second paper.]

[HIST 259 The Crusades # @ (III)
Fall. 4 credits. Not offered 2001–2002. P. Hyams.
A lecture course examining the Crusading Movement and the States it produced from the eleventh century to the fall of the mainland Kingdom of Jerusalem in 1292. The historical themes this generates are almost unlimited. The course treats the Christianity and Chivalry of the Medieval West, the confrontation of this culture with those of the Mediterranean and Islam, and what is perhaps the cradle of Western Colonialism. The very concept of "Crusade" itself is problematic today and will continue to cast its shadow on U.S. dealings with the Middle East. The readings allow students to choose from a very wide range of paper topics, and enjoy an excellent introduction to every aspect of the long-gone world of the Middle Ages.]

HIST 262 The Middle Ages: Introduction and Sampler (also RELST 265) # (III)
Spring. 4 credits. P. Hyams.
As a single-semester introduction to the period, this survey aims to convey what was significant in that area of the "West" that was to become Europe, between the end of the Roman Empire in the West and the Renaissance, from 395 to 1400. It takes a critical look at a formative period of Western Civilization. The course is organized into modules, the first of which surveys in five weeks the main public developments in Political and Church History over the period. Other modules focus in some depth on select aspects, such as technology, music, material resources, and religions, to other choice samples from the best of medieval culture. Emphasis is on students finding their own ways to win credit.

HIST 263 The Earlier Middle Ages (also RELST 263) # (III)
Fall. 4 credits. J. J. John.
A survey of medieval civilization from ca. 300 to ca. 1100 dealing with religious, intellectual, political, and economic developments in Western Europe.

[HIST 264 The High Middle Ages # (III)
Fall. 4 credits. Not offered 2001–2002. P. Hyams.
A survey of medieval civilization 1100–1400, dealing with political, economic, religious, and intellectual developments in Western Europe. Special attention is paid to the interaction of different kinds of history and to the historian's understanding of literature and its use as a primary source. Lectures and class discussions.]

[HIST 275 Authority and Resistance in Europe, 1400–1600 # (III)
Spring. 4 credits. Not offered 2001–2002. S. Pohl.
A lecture course examining the political, cultural, and social transformations during the Reformation era through an exploration of aspects of state formation and ecclesiastical order, social and religious protest, and deviant behavior. Specific topics covered include the Protestant Reformations and the emergence of confessional churches, law and crime, the peasant rebellions and the early modern witch hunts.]

[HIST 305 Britain, 1660–1815 # (III)
Fall. 4 credits. Not offered 2001–2002. R. Weil.
Course covers the British Isles from the Restoration of Charles II through the Napoleonic wars. We consider the domestic effects of war and Empire; luxury, commerce, and the public sphere; continuing conflicts over religious toleration, popular politics, and the relation of England to Ireland and Scotland. Readings include works by John Locke, Jonathan Swift, Adam Smith, Thomas Paine, Edmund Burke, and Jane Austen.]

HIST 310 Life, Literature, and Power in Medieval England (also ENGL 314) # (III or IV)
Fall. 4 credits. No prerequisites. P. Hyams and A. Galloway.
This course explores key issues and key texts from the English literature of the period 1100–1500. It aims to survey and introduce the Age of Middle English—its history, its language, and its literature—to majors in English and History and others who seek something more than a bare acquaintance with the *Canterbury Tales* and Wars of the Roses. The instructors, coming from two different disciplines, expect to educate themselves as well as the class on the contributions that history and literature can each make to the understanding of the other. Lectures are designed to provide context for the class's central feature: close reading of texts, some in the original Middle English, some in translation of Middle English, French, and Latin, ranging from literary masterpieces to chronicle narratives, from dream visions to social satire.

HIST 349 Early Modern England # (III)
Fall. 4 credits. R. Weil.
This course explores the crises of political, religious, and epistemological authority that plagued England in the sixteenth and seventeenth centuries. We examine the political and cultural impact of the Protestant Reformation, the nature of Tudor despotism and Stuart absolutism, the construction of a rhetoric of political dissent around issues of sexuality and corruption, competing understandings of the social order and social control, the Puritan Revolution, and the invention of liberalism. Emphasis is on close reading of contemporary sources, from autobiography and drama to political theory.

[HIST 350 The Italian Renaissance (also ITALL 221) # (III or IV)
Spring. 4 credits. Not offered 2001–2002. J. Najemy.
An exploration of intellectual, cultural, religious, and political developments in Italy from the political thought of Dante and Marsilius in the age of the communes, through the several stages of Humanism from Petrarch to Alberti to Pico, down to the crisis of Italian liberty in the generation of Machiavelli, Guicciardini, and Castiglione. The course seeks to problematize the notion of a "Renaissance" in the period's ambivalent attitudes toward history, politics, learning, culture, gender, language, and the role of intellectuals in politics and society. Emphasis is placed on the close reading of primary sources and on issues of interpretation.]

HIST 351 Machiavelli (also ITALL 351) # (III or IV)
Fall. 4 credits. J. Najemy.
This course presents Machiavelli in a variety of historical and interpretive contexts: European and Italian politics in the early sixteenth century; the decline of the Florentine republic and the rise of the Medicean principate; Machiavelli's own career in government and his, and the republic's, crisis in 1512–13; the intellectual traditions of Renaissance humanism, political thought, and the revival of antiquity; vernacular literary currents and popular culture; and the political figures, writers, and theorists with whom Machiavelli associated and corresponded. Emphasis is placed on a close reading of the major works (including the letters, *The Prince*, the *Discourses*, *Mandragola*, and selections from *The Art of War* and the *Florentine Histories*, all in translation) and a critical examination, in the light of that reading, of some major modern interpretations of Machiavelli.

[HIST 364 The Culture of the Renaissance II (also COM L 362, ENGL 325, RELST 362, MUSIC 390) # (III or IV)
Spring. 4 credits. Open to freshmen with permission. Not offered 2001–2002. C. Kaske, W. Kennedy.
For description, see COM L 362.]

[HIST 365 Medieval Culture, 400–1150 (also RELST 365) # (III)
Fall. 4 credits. Prerequisite: HIST 263 or permission of instructor. Not offered 2001–2002. J. J. John.
Intellectual and cultural developments in the age of monasticism, from St. Augustine and St. Benedict to St. Anselm and St. Bernard of Clairvaux.]

[HIST 366 Medieval Culture, 1100–1300 (also RELST 366) # (III)
Fall. 4 credits. Prerequisite: HIST 264 or permission of instructor. Not offered 2001–2002. J. J. John.
The origin and development of the universities is studied as background for a consideration of the scholastic mentality and its influence on the art, literature, philosophy, science, script, and theology of the period. Readings from Abelard, Hugh of St. Victor, Bonaventure, Thomas Aquinas, Dante, and others.]

[HIST 368 Marriage and Sexuality in Medieval Europe (also RELST 368, WOMNS 368) # (III)
Spring. 4 credits. No formal prerequisite, though some prior knowledge of medieval European history is desirable. Not offered 2001–2002; next offered 2002–2003. P. Hyams.
Few topics generate heat so readily as gender relations and sexuality. Behind the current controversies lie decisions made in the first Christian centuries, and firmed up in the course of the Middle Ages; these still affect all of us, believers and unbelievers alike. This course studies Western attempts to deal with the problem of sexuality up to about 1500. The class first clarifies the church's normative rules of law and theology. Armed with this framework, we then turn to more specific topics, including homosexuality, prostitution, rape/abduction, and sexuality in medieval literature. The goal is to be able to compare the ideal model with the reality, and thus to assess the product the medieval church passed on to Western culture and to ourselves.]

HIST 369 The History of Florence in the Time of the Republic, 1250–1530 (also ITALL 369) # (III or IV)
Spring. 4 credits. J. Najemy.

Florentine politics and society from the communal period through the age of Dante, the rise and decline of the guild republic, the age of civic humanism, and the rise of the Medici, to the crisis of the republic in the time of Machiavelli. Social classes and conflicts, the elite families, economic structures, the working classes, guilds, family history, women, and political and historical ideas are considered in the context of the emergence and transformation of republican government.

HIST 404 The Soul in Medieval Culture (also S HUM 401) (III)

Fall. 4 credits. R. Ziomkowski.

This course covers the medieval reception of mythological themes in Plato's philosophy, particularly the world-soul and the transmigration of souls, as these appear in the *Timaeus* (the only dialogue of Plato known in the Latin West throughout the Middle Ages). In focusing on the nature of the soul, we study the tension between the theology and philosophy concerning a doctrine of central importance to medieval Christian culture, as well as one that the ancient world had developed to a high degree of sophistication. We look at texts written during the first thirteen centuries of the Christian era, with particular emphasis on the twelfth century. The course is conducted as intellectual history, inasmuch as we study the reception of Plato's *Timaeus* across time and across a range of literary genres (dialogues, theological treatises, cosmological compendia, poetry), with particular attention to works of Menippean satire such as Boethius' *Consolation of Philosophy*, Bernardus Silvestris' *Cosmographia*, and Alan of Lille's *Plaint of Nature*. Theoretical perspectives are drawn from works of literary criticism, particularly from Mikhail Bakhtin's theories of Menippean satire. All texts are read in translation, although the ability to read Latin can broaden students' research options.

[HIST 408 Feudalism and Chivalry: Secular Culture in Medieval France, 1000–1300 # (III)

Fall. 4 credits. No prerequisites; HIST 262, 263 or 264 suggested. Not offered 2001–2002. P. Hyams.

An upper-level seminar on the main currents of noble lay culture in France, which led European fashions in love, warfare, entertainment, and environment through most of the period. There is heavy emphasis on contemporary sources (in English), including lively and complete readings from epic literature (the Song of Roland), lives, and chronicles.]

[HIST 409 Seminar on Work in Europe and America # (III)

Fall. 4 credits. Not offered 2001–2002. S. Kaplan.

For description, see Comparative History.]

[HIST 427 Power and Society in Early Medieval Europe and Japan @ # (III)

Spring. 4 credits. Prerequisite: a course in medieval European or Japanese historical studies, or permission of instructor. Not offered 2001–2002. P. Hyams and J. Piggott.

This seminar focuses on structures, processes, and practices of society in early medieval Europe and Japan. It provides a forum for discussion of the ways in which, in some very different societies, Europeans and Japanese handled power. We are also interested in comparing historiographical methodologies employed and issues considered by historians of these societies.]

[HIST 436 Conflict Resolution in Medieval Europe # (III)

Spring. 4 credits. Not offered 2001–2002; next offered 2002–2003. P. Hyams.

This seminar concentrates on a time (late ninth to thirteenth centuries) when much of Europe lacked formal systems of justice, and so handled questions of social control quite largely by extra-legal means. Its subject is in one sense political history upside-down, as viewed by individuals rather than their rulers. We examine ways in which anthropology and some recent approaches to law can assist: the readings are partly anthropology, partly translated medieval accounts of actual conflicts, with samples of recent interpretation. The topics covered should be of interest to law students and majors in anthropology and other modern social sciences.]

[HIST 444 Seminar: Witchcraft, Magic, and the Occult in Europe, 1400–1700 # (III)

Spring. 4 credits. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 2001–2002. S. Pohl.

A study of attitudes toward magic, witchcraft, astrology, specters, and demons in late medieval and early modern Europe and what they reveal to us about religious beliefs, concepts of community, and gender relations. Special attention is given to the role the Christian Church claimed in defining the occult: which aspects it legitimated and which it condemned. Other topics include the influence of humanism, the Reformation, and the Scientific Revolution on attitudes toward the occult. We also undertake an analysis of the historiographical model which opposes "elite" to "popular" ideas. The course emphasizes close analyses of primary works, including literary and visual sources.]

[HIST 446 Law, Crime and Society in Europe, 1400–1700 # (III)

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002; next offered 2002–2003. S. Pohl.

This comparative study focuses on Germany, England, France, and Italy and concentrates mainly on the social and legal treatment of crimes of violence. Throughout the course, we consider the differences and similarities between English common law and continental legal systems. Major issues covered include the role of criminal justice, the fate of customary methods of conflict resolution in a time of increasing legal centralization, and the relationship between cultural and legal change. We approach these issues by examining, among other things, the development of criminal procedure, the role of lawyers, contested notions of criminal responsibility, and the self-presentation of defendants. The course emphasizes close readings of primary works, including trial documents and literary sources.]

HIST 447 Crusaders and Chroniclers # @ (III)

Fall. 4 credits. P. Hyams.

An intensive reading seminar offering a natural progression from HIST 259 The Crusades. It examines contemporary accounts of the crusading movement in English translation. The twin goals are to follow select themes of crusading history to a deeper level than is possible in HIST 259 and to study medieval historiography through whole chronicles and other primary sources.

[HIST 464 Murder, Warfare, and the State: Violence in Europe, 1300–1800 # (III)

Fall. 4 credits. Permission of instructor. Not offered 2001–2002. S. Pohl.

An inquiry into forms of and attitudes toward violence in late medieval and early modern Europe. Questions to be explored include: How violent was premodern Europe compared to modern Europe? How did the various cultural legitimations of violence change over time? We examine these questions by analyzing forms of interpersonal violence as well as violence orchestrated by the state, such as warfare and capital punishment.]

HIST 468 Love and Sex in the Italian Renaissance (also ITALL 468) # (III or IV)

Spring. 4 credits. J. Najemy.

An exploration of the representation of love, sex, and eros in Italian Renaissance literature and the attempts by secular governments and the Church to manage, discipline, and punish sexual transgression. Primary texts include Boccaccio's *Decameron*, fifteenth-century *novelle*, plays by Machiavelli (*Mandragola*, *Clizia*) and Bibbiena (*Calandria*), and Aretino's *Dialogues*. Secondary readings include studies of sexual crime, love across social boundaries, prostitution, homosexuality, and lesbianism.

HIST 471 Knowledge and Politics in Seventeenth Century England (also S&TS 473) # (III)

Spring. 4 credits. Limited to 15 students. P. Dear and R. Weil.

England in the 17th century was a revolutionary ferment of political, religious, and philosophical conflict. This course examines the conflicts and arguments, and the means explored for their apparent resolution. These affected ideas of God and worship, the meanings of gender, conceptions of the natural world and its scientific appropriation, and the legitimacy and proper form of political power. The course focuses on the close study of primary source readings by many of the principal players in all these areas, including Francis Bacon, Thomas Hobbes, the Duchess of Newcastle, and John Locke.

[HIST 472 Politics and Culture in Eighteenth-Century England # (III)

Spring. 4 credits. Not offered 2001–2002; next offered 2002–2003. R. Weil.

Between 1660 and 1800 England experienced imperial and economic expansion, the Enlightenment, and the threat of Revolution abroad and at home. How in this context did people interpret and imagine the nature of the social order, political authority, and the family? We consider the changing and fiercely contested notions of property, politeness, crime and punishment, sexuality, Empire, slavery, and the market.]

[HIST 479 Patronage and the Medici # (III)

Spring. 4 credits. Not offered 2001–2002. J. Najemy.

Between the early fifteenth and sixteenth centuries, the Medici family of Florence rose from the ranks of the city's merchant bankers to become virtual rulers of the republic, cardinals and popes in Rome, and eventually hereditary grand dukes of Tuscany. Much of the family's power and fame derived from two kinds of patronage: the social and political

patronage that established their political influence; and the artistic and cultural patronage central to the fashioning of their image and the realization of their princely ambitions. This seminar explores the connections between the two kinds of patronage with a focus on works of art and architecture and recent historical and art historical scholarship.

[HIST 481 The English Revolution # (III)
Fall. 4 credits. Not offered 2001–2002. R. Weil.
Between 1640 and 1660, England experienced two decades of civil war and revolution and embarked on a fascinating series of attempts to reorganize political and religious life. Women and the lower classes emerged as actors on the political stage, radical religious sects flourished, and the nature of authority was questioned in both the family and the state. This course explores the political, cultural, religious, and social dimensions of the English Revolution, using mostly primary sources.]

[HIST 496 Theorizing the Public Sphere (also COM L 496 and GERST 496) (III or IV)
Fall. 4 credits. Not offered 2001–2002. P. Hohendahl.
For description, see GERST 496.]

HIST 651 Old English Literature in Its Historical Context (also ENGL 710) #
Spring. 4 credits. P. Hyams, T. D. Hill.
This graduate course, cross-listed with ENGL 710, might equally be known as "Anglo-Saxon England: History and Literary Context." It studies the written sources for major questions of Anglo-Saxon history in their literary and cultural context. It concentrates on important texts extant in both Latin and Old English. Comparison can illuminate the resources and intentions of writers, compilers, and copyists, the literary and linguistic culture of England, and the ways in which historians might most fruitfully study such texts. Bede's *Ecclesiastical History* and *Battle of Maldon,* Aelfric's *Collequies*, selections from the Anglo-Saxon chronicle, *Beowulf*, laws, homilies, and wisdom literature are all likely to come under scrutiny. One goal is to reclaim for European religious history a corpus of material that historians neglect because it is in Old English.

[HIST 653 England—Britain—Europe in the Middle Ages #
Spring. 4 credits. Not offered 2001–2002. P. Hyams.
This graduate seminar tentatively explores the coming move from the study of medieval English history to that of the British Isles and its inhabitants within the wider context of Europe and Western Christendom. Readings are mostly representative original sources. The precise texts and topics studied depend on the interests (and especially future teaching plans) of participants, but certainly allow for a critical examination of existing literature on the general and cultural history of England, Scotland, Ireland, and Wales.]

HIST 663 Graduate Seminar in Renaissance History
Fall. 4 credits. J. Najemy.
Topic for 2001: The Medicean principate.

[HIST 664–665 Seminar in Latin Paleography
664, fall; 665, spring. 4 credits each term. Hours TBA. Not offered 2001–2002. J. J. John.]

[HIST 666 Seminar in Medieval History
Fall. 4 credits. Not offered 2001–2002. J. J. John.]

[HIST 669 Politics, Power, and Culture in Early Modern England
Fall. 4 credits. Not offered 2001–2002. R. Weil.
An inquiry into how the ruling class ruled, and what that meant to and for everyone else. Topics include: the invention of the "state", the relationship of central and local power; clientage and corruption; the construction of categories of "public" and "private;" representations of monarchy, hegemony, and resistance; court culture, and the social interpretations of the English Revolution and their critics. Focus is on historiography and methodology, with some engagement with primary sources.]

Modern European History

HIST 152 Introduction to Western Civilization (1600 to the End of World War II) # III
Spring. 4 credits. P. Holquist and R. Weil.
This course offers a comparative perspective on the development of modern states, societies, and cultures in Europe and North America. Topics include: religious and scientific revolutions in early modern Europe: European expansion and conquest; Enlightenment and revolution; liberalism, capitalism, and communism; the politics of race, slavery, and the new imperialism; the World Wars and the Holocaust; the Cold War; and the modern and the post-modern in European and American culture.

HIST 215 Balkan Cultures and History # (III)
Spring. 4 credits. J. Weiss and W. Browne.
Cultural and linguistic factors interacted with political events to form present-day Slovenia, Croatia, Bosnia-Herzegovina, Serbia, Montenegro, Romania, Bulgaria, Macedonia, Albania, and Greece. The course traces these relationships from the end of the medieval period to the present.

[HIST 220 The French Experience: An Introduction (also FRLIT 224) (III or IV)
Fall. 3 credits. Not offered 2001–2002; next offered 2002–2003. S. Kaplan and M. Greenberg.
An examination of French society, culture, and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals, and cinemas? Looking attentively at texts, images, and contexts from selected moments in the seventeenth, eighteenth, nineteenth, and twentieth centuries, we attempt to unravel some of the defining enigmas of the French experience. Two lectures/week in English and one section (one section conducted in English, one in French). Readings available both in French and English translation.]

HIST 235 Antisemitism and Crisis Modernity (also JWST 254) (III)
Spring. 4 credits. V. Caron.
This course examines the role of antisemitism in nineteenth and twentieth century European ideological, political, and socioeconomic developments. Attention is paid to the way in which antisemitism illuminates the underside of European history, allowing us to see how anti-Jewish intolerance and prejudice became embedded in the worldviews of significant sectors of the European populations, culminating in the Holocaust. Topics include: the Christian roots of antisemitism and the extent to which modern antisemitism marks a break with the medieval past; the politicization of antisemitism by both Left and Right; the role of antisemitism in socioeconomic conflicts linked to the rise of capitalism; Jewish responses to antisemitism; antisemitism in the Nazi and Fascist revolutions; and contemporary interpretations of antisemitism.

[HIST 267 History of Zionism and the Birth of Israel (also JWST 290, NES 290) @ (III)
Spring. 4 credits. Not offered 2001–2002; next offered 2002–2003. V. Caron.
This course examines the history of Zionism as an ideology and political movement from its origins in the nineteenth century to the present. Attention is paid to situating Zionism within the context of modern Jewish, European, and Middle Eastern History. Topics include: the ideological foundations of Zionism; the role of Theodor Herzl and the rise of political Zionism; the Balfour Declaration; the development of the Yishuv; Zionism as a cultural identity for Diaspora Jewry; the British mandate; the Arab-Zionist encounter; Zionist responses to the Holocaust; and Zionism and contemporary Israeli society.]

[HIST 283 Europe in the Technological Age (III)
Spring. 4 credits. Not offered 2001–2002; next offered 2002–2003. J. Weiss.
An introduction to politics, culture, and technology in contemporary Europe. In the sections on politics a survey of party systems and their interactions with social movements is followed by examinations of post-Communist constitution and political structures, the New Germany, and the European Union. The section on European culture pays special attention to the European press and electronic media as shapers and reflectors of cultural values. A section on the struggle over the control of the past deals with tensions and conflicts in European national memories. In the section on Nationalism and ethnicity, political and cultural approaches are combined in consideration of the wars in former Yugoslavia as well as less violent conflicts between nationalists and members of ethnic minorities elsewhere in Europe. The section on technology deals with the design of products and processes as a cultural phenomenon, making cross-national comparisons of some of the social, cultural, and institutional influences on engineering performance.]

[HIST 285 From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1492–1789 (also NES 245, JWST 253) # (III)
Fall. 4 credits. Not offered 2001–2002; next offered 2002–2003. V. Caron.
This course examines the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. We examine the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics include the impact of

the Spanish Expulsion of 1492; religious, intellectual, and socioeconomic dimensions of the Marrano dispersion, including Lurianic Kabbalah and the messianic movement of Shabbetai Zevi; the establishment of Jewish communities in the West; the end of the "Golden Age" of Polish Jewry and the rise of Hasidism; the changing economic and political role of Jews in the seventeenth and eighteenth centuries; and the impact of the Enlightenment.]

HIST 290 Twentieth-Century Russia and the Soviet Union (III)
Fall. 4 credits. P. Holquist.
An introductory lecture course spanning the lifetime of the USSR (1917–1991), but covering the last years of the Russian Empire and the first years of the post-communist present as well. Geographically, it focuses on the Russian heartland and the non-Russian areas of the Soviet Union. The course explores the roots and consequences of the Russian Revolution; the nature and evolution of Leninism, Stalinism, and Soviet communism; the entrenchment of reform of the post-Stalinist system; and the legacy of communism for the region's new regimes. Students are introduced to a wide variety of historical materials, including documents, essays, memoirs, literature, and film.

HIST 291 Modern European Jewish History, 1789–1948 (also JWST 252) (III)
Fall. 4 credits. V. Caron.
Jewish life in Europe experienced a profound transformation as a result of the process of Jewish emancipation which began at the end of the eighteenth century. While emancipation offered Jews unprecedented social, economic, and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course examines the ways in which Jewish and non-Jewish society responded to these new developments from the eighteenth century Enlightenment to the post-World War II era. Topics include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation; the development of modern antisemitism; the rise of Zionism and the creation of the state of Israel; the modernization of Eastern European Jewry; the impact of mass immigration; and the Nazi era.

HIST 355 The Old Regime: France in the Seventeenth and Eighteenth Centuries # (III)
Fall. 4 credits. S. Kaplan.
A systematic examination of the social structure, economic life, political organization, and collective mentalities of a society that eclipsed all others in its time and then, brutally and irreversibly, began to age. France, in European perspective, from the wars of religion through the age of Voltaire.

[HIST 356 The Era of the French Revolution and Napoleon # (III)
Spring. 4 credits. Not offered 2001–2002. S. Kaplan.
A study of the failure of the traditional system, its dismantling and replacement in France, and the international consequences. Focus is on the meaning of the revolutionary experience, the tension between the desires to destroy and to create, and the implications of the Revolution for the modern world.]

[HIST 357 Survey of German History, 1648–1890 # (III)
Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 2001–2002; next offered fall 2002. I. Hull.
An examination of the social, political, intellectual, and diplomatic history of the German states from the devastation of the Thirty Years' War, through absolutism, the bourgeois revolutions of 1848, the struggle for unification, to the beginning of the modern industrial state.]

[HIST 358 Survey of German History, 1890 to the Present (III)
Spring. 4 credits. Open to freshmen with permission of instructor. Not offered 2001–2002; next offered spring 2003. I. Hull.
An examination of the "German problem," that is the political, cultural, economic, and other causes of modern Germany's extreme violence and volatility from 1890 through 1945, and of the consequences thereof on the divided Germany of 1945 to 1989 and on the new German state since 1989.]

[HIST 362 European Cultural History, 1750–1870 (also COM L 352) # (III or IV)
Fall. 4 credits. Not offered 2001–2002. M. Steinberg.
The course focuses on the making of middle-class culture, society, and imagination from the Enlightenment through the French Second Empire. There are three units with national and thematic foci: Germany in the period of Enlightenment, emancipation, and the burgeoning of national consciousness; questions of law, property, gender, and sexuality in early nineteenth-century England; modernism and urbanism in Second Empire France. Primary readings (including novels, paintings, and operas) are considered along with contemporary historical and theoretical readings.]

HIST 363 European Cultural History, 1870–1945 (also COM L 353) (III or IV)
Spring. 4 credits. M. Steinberg.
This course focuses on problems of modernity, identity, and ideology in comparative European contexts. We address the politics and culture of German nationalism, French urbanism and religious revival, the cultural origins of psychoanalysis, technological culture (including film), and the cultural origins and dynamics of fascism. As in 362, primary materials (including Wagner, Nietzsche, George Eliot, Freud, Benjamin, and Alfred Hitchcock) are considered along with recent theoretical work.

[HIST 370 History of the Holocaust (also JWST 353) (III)
Spring. 4 credits. Each student must enroll in a section. Not offered 2001–2002; next offered 2002–2003. V. Caron.
This course analyzes the meaning of the Holocaust from three vantage points: European history; Jewish history; and that of those states and religious institutions that shared responsibility by having stood by in silence. Topics include: the evolution of modern anti-Semitism; the role of anti-Semitism in the Nazi ideology and program; the bureaucratization of death; Jewish life in ghettos and concentration camps; the fate of Jews in occupied Europe and the question collaboration; Jewish political behavior under duress; the responses of the Western allies and the Churches; and contemporary interpretations of the Holocaust and the meaning of evil.]

HIST 371 World War II in Europe (III)
Fall. 4 credits. J. Weiss.
The Second World War remains the single most important set of events shaping the contemporary world. The course deals with both the events of World War II as they shaped European and world history and the way those events were remembered and commemorated in postwar years. Lectures, screenings, and readings examine: the role of wartime political leaders and military commanders; the experience of war and occupation for soldiers and civilians, including Resistance movements and collaborators; Nazi genocide; intellectual and cultural changes during the war, including the impact on literature and philosophy; strategic questions about the origins and conduct of the war; the concluding phases involving the Nuremberg Trials, the Yalta and Potsdam conferences, and the launching of the Cold War; and the representation of the war in subsequent films, literature, and political culture.

[HIST 379 The First World War: Causes, Conduct, Consequences (III)
Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 2001–2002. P. Holquist and I. Hull.
This course examines the long-term and immediate political, social, and cultural causes of World War I, its catastrophic prosecution, and its revolutionary consequences. Recurring themes are: the building of nation-states, the diplomatic and military systems of the nineteenth and twentieth centuries, mass mobilization, the development of mass violence, and the emergence of millenarian visions of the future.]

[HIST 380 Social History of Western Technology # (III)
Spring. 4 credits. Not offered 2001–2002. J. Weiss.
For description, see History of Science.]

HIST 383 Europe, 1900–1945 (III)
Spring. 4 credits. J. Weiss.
An investigation of the major developments in European politics between 1900 and the end of the Second World War. Emphasis is on the rise and fall of democratic political systems and their alternatives. Topics include the reorientation of liberalism and socialism, the transforming effects of war and depression, the dynamics and diplomacy of fascism, the European response to the economic and ideological influence of America and the Soviet Union, the changes in Eastern Europe during the interwar years, and the interaction between politics and social structure.

[HIST 384 Europe, 1945–1968 (III)
Fall. 4 credits. Not offered 2001–2002. J. Weiss.
A political and social history of Europe between the fall of fascism and the political crises of 1968. Emphasis is on the comparative study of the elaboration of democratic institutions and ideologies. Topics include the origins and course of the Cold War in Western and Eastern Europe, Gaullism and Christian Democracy, the emergence of welfare states, liberal-democratic and Communist culture, the end of colonial empires in the West, opposition movements in Eastern Europe, and the general upheaval of 1968.]

[HIST 385 Europe in the Twentieth Century: 1968–1990 (III)
Spring. 4 credits. Not offered 2001–2002. J. Weiss.
The major political developments in Europe between the upheavals of 1968 and the collapse of Communist regimes. Topics include the effects of economic turndown in 1973–1974; the response to terrorism; regionalist movements; new ethnic minorities and their opponents; Socialist governments in southern Europe; the arrival of democracy in Spain, Portugal, and Greece; new dynamics in the European Community; the rise of Thatcherism; the war scare of the 1980s; and the final phase of the Cold War.]

HIST 405 Jewish Culture and Modernity (also SOC HUM 408, JWST 408, GERST 420) (III or IV)
Fall. 4 credits. Limited to 15 students. M. Steinberg.
With emphasis on Germany but with materials drawn also from England, France, and the United States, this seminar will analyze the intersections and mutual production of modern Jewish culture and general structures and discourses of modernity. It takes up the category of "Jewish culture" as distinct from "Judaism." The focus is less on a religious tradition than on a cultural and historical identification whose sacred/secular boundaries are fluid and contestable. Thus, the boundaries between sacred and secular become a central debate both within Jewish culture and its multiple, mutual refractions with the non-Jewish world, which may itself be constituted in terms of modern nationalities, as Christian, secular, or anti-Semitic.

[HIST 406 The People in the French Revolution # (III)
Fall. 4 credits. Not offered 2001–2002. S. Kaplan.
The French Revolution was nothing if not a mass event. Mass action played a critical part in shaping its course. The "re-invention" of France affected the population down to each village and demanded decisions from virtually every adult. This course focuses on the people as actors: their collective memory, their ideologies, their repertoire of intervention, the formation of a popular political culture. It examines the encounters between the people (in their multiple incarnations) and the revolutionary elites who sought to articulate and appropriate the Revolution. A major theme is the tension between the ambitions to achieve liberty and equality.]

[HIST 409 Seminar on Work in Europe and America # (III)
Fall. 4 credits. Not offered 2001–2002. S. L. Kaplan.
For description, see Comparative History.]

HIST 410 Russia in the Age of Revolution and Total War (III)
Spring. 4 credits. P. Holquist.
This seminar examines the years of 1905–1945, a period of unparalleled violence and transformation in Russian history, encompassing several revolutions, two world wars and one civil war. Out of Russia's "second time of troubles" (1905–1921), a Soviet state emerged propagating an alternative model for politics and society, a model of society that would be explicitly challenged in the cataclysmic confrontation between the Soviet Union and Nazi Germany. This course examines the links between revolution, total war, and the emergence of the welfare state in Russia and situate the revolutionary Soviet experience in its European and global context. Students read both historical treatments and analyze documents in translation. Knowledge of foreign languages is not required but some background in European history is desirable.

HIST 413 Gender and the Law in German Culture (also GERST 416) (III or IV)
Spring. 4 credits. T. Matysik.
This course examines the cultural space of law in modern German history. It pays particular attention to law and legal reform in relation to gendered notions of citizenry, subjectivity, and sexuality. The course takes as its hypothesis the idea that the prevalence in modern German thought of the concern with the "law" as the moral regulation of normative behavior is closely connected to the transformation of actual laws and legal codes in German history. In order to assess the terrain between such actual laws and their cultural effects, we examine a combination of literary, social-theoretical, and historiographical readings that address the problem of law. In this way we acquire, first, a general overview of German legal history together with a language with which to speak about a variety of legal theoretical traditions. We also explore perceptions of, responses to, and critiques of the historical role of law in German culture.

HIST 417 History of Jews in Modern France (also JWST 446, FRLIT 413) (III or IV)
Fall. 4 credits. Prerequisite: permission of instructor. V. Caron.
This course explores the integration of Jews into French society from the French Revolution to the present. Topics include: the debate over Jewish emancipation during the Enlightenment, the French Revolution, and the Napoleonic era; the processes of religious and social assimilation; the rise of anti-Semitism and the Dreyfus Affair; Jewish responses to anti-Semitism; the immigrant challenge and refugee crisis of the 1930s; the Vichy era and Jewish resistance during World War II; and the reconstruction of the French Jewish community since 1945.

[HIST 435 Collective Action and Politics in Modern Europe (III)
Not offered 2001–2002. S. Kaplan, S. Tarrow.
For description, see GOVT 435.]

[HIST 441 Seminar in the European Enlightenment # (III)
4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. Semester TBA. I. Hull.]

HIST 456 Seminar in European Cultural History
Spring. 4 credits. M. Steinberg.
Topic for 2001–2002: TBA.

[HIST 457 Seminar in European Fascism (III)
4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. Semester TBA. I. Hull.]

[HIST 460 Opera, History, Politics, Gender (also WOMNS 454, COM L 459, S HUM 459, ITAL 456, MUSIC 474) (III or IV)
Spring. 4 credits. Not offered 2001–2002. M. Steinberg and S. Stewart.
The will to social order and the desire to transgress it: this basic conflict in modern culture was negotiated in many places, but nowhere more dramatically than in the world of opera. Body and mind; the visceral and the mannered; authority and subversion: these themes are integral to operatic works and culture. This seminar examines the works and contexts of Mozart, Beethoven, Wagner, Verdi, and Puccini alongside issues of German and Italian nationbuilding, liberalism, the continuities of patriarchy, and patterns of cultural identity and cultural difference in modern Europe. We analyze opera videos in class, and if possible we arrange an excursion to the Metropolitan Opera in New York City. No technical competence is required, but the seminar should be most interesting to those seeking an upper-level course in cultural history and/or cultural studies.]

[HIST 462 Popular Culture in European History (III)
Fall. 4 credits. Not offered 2001–2002; next offered 2002–2003. S. L. Kaplan.
An examination of the origins, practices, and meanings of popular culture throughout Europe from the Middle Ages to the era of the French Revolution. After considering the various ways in which "culture" and "popular" can be construed, the seminar focuses on the specific manifestations of popular culture, its various languages and gestures, and its complex relations with the dominant/elite cultures.]

HIST 467 Seminar in Modern European Political History (III)
Fall. 4 credits. Permission of instructor required. J. Weiss.

HIST 474 Topics in Modern European Intellectual and Cultural History (also COM L 474) (III or IV)
Fall. 4 credits. Prerequisite: permission of the instructor. D. LaCapra.
Topic for 2001–2002: History and Memory. Drawing on various sources—historical, biographical, testimonial, critical, literary, and cinematic—the course investigates the role of memory in representing the past and shaping the future.

HIST 477 Seminar on the Politics of the Enlightenment # (III)
Fall. 4 credits. S. Kaplan.
An inquiry into the historical origins of European (especially French) political, social, and economic thought, beginning in the 1680s, at the zenith of Louis XIV's absolutism, and culminating in the French Revolution a century later. Emphasis is on the relation of criticism and theory to actual social, economic, religious, and political conditions. An effort is made to assess the impact of enlightened thought on the eighteenth-century world and to weigh its implications for modern political discourse. Readings in translation from such authors as Bayle, Montesquieu, Voltaire, Rousseau, Diderot, and others as well as from modern scholarly and polemical literature.

[HIST 478 Stalinism as Civilization (III)
Fall. 4 credits. Not offered 2001–2002; next offered 2002–2003. P. Holquist.
The collapse of the Soviet Union provides an opportunity to reconsider the entire Stalinist experience, both on the basis of newly accessible documents and from fresh perspectives. This course approaches Stalinism as an entire system, examining the links between high politics, foreign relations, culture, and everyday political strategies. Readings include historical studies as well as newly available primary materials. Knowledge of Russian not required.]

[HIST 482 The Aesthetic and Cultural Theory of the Frankfurt School (also GERST 495) (III or IV)
Fall. 4 credits. Not offered 2001–2002. P. Hohnedahl.]

[HIST 488 Seminar in Late Nineteenth-Century European Imperialism (III)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. I. Hull.
This seminar examines the theories of the "second wave" of European imperialism, and then compares the imperial experiences of Great Britain, France, and Germany. It focuses on the imperialist powers, and on the (often unintended) consequences of their colonial involvement on them. Of special concern are the transformation of nationalism into imperialism, and the effects on the European powers themselves of their experiences of applied racism and the commission of mass violence in their colonies.]

HIST 491 Context of Irish Diaspora (also S HUM 421) (III)
Spring. 4 credits. Limited to 15 students. G. Peatling.
For description see S HUM 421.

[HIST 605 Graduate Seminar in European Cultural and Intellectual History
Fall. 4 credits. Not offered 2001–2002. M. Steinberg.
The topic is "Cultural History, Cultural Memory, Cultural Analysis." We will focus on the epistemological claims and metaphors of cultural historical practice, in particular those of memory and cultural analysis. What are the stakes, advantages, and problems of identifying history with memory or cultural analysis? Readings include works of Freud, Warburg, Benjamin, Yerushalmi, Mieke Bal, and other contemporary sources.]

[HIST 635 The Gates to Modernity: From Karlsbad to the 1848 Revolution (also GERST 635)
4 credits. Anchor course. Not offered 2001–2002. P. Hohendahl.
For description, see GERST 635.]

[HIST 661 Graduate Seminar in Twentieth-Century German History
4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. Semester TBA. I. Hull.]

HIST 672 Seminar in European Intellectual History
Fall. 4 credits. D. LaCapra.

HIST 673 Seminar in European Intellectual History
Spring. 4 credits. D. LaCapra.

[HIST 674 Graduate Seminar in German History, 1770–1918
Fall. 4 credits. Not offered 2001–2002. Semester TBA. I. Hull.]

[HIST 675 After the Divide: German Critical Theory of the Seventies and Eighties (also COM L 675 and GERST 675)
Fall. 4 credits. Not offered 2001–2002. P. Hohendahl.
For description, see GERST 675.]

[HIST 678 Seminar in Modern European Social History
Spring. 4 credits. Permission of instructor required. Not offered 2001–2002. J. Weiss.]

HIST 750 European History Colloquium
Fall and spring. 4 credits, each term. Dear, Weil (fall); Steinberg, Caron (spring).
A research colloquium designed for European history graduate students. The colloquium offers a forum for students to present papers and to discuss the work of visiting scholars.

Honors and Research Courses

Note: HIST 301–302 are not regular courses for which students may sign up at will. They are personal arrangements between an instructor and a particular student. Students must first gain the consent of a particular instructor to work with them.

HIST 301 Supervised Reading
Fall or spring. 2 credits. Open only to juniors and seniors. Prerequisite: permission of instructor. Staff.

HIST 302 Supervised Research
Fall or spring. 3 or 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 400 Honors Proseminar
Fall and spring. 4 credits. Limited to 15 students. For prospective honors candidates in history. Prerequisite: permission of a member of the Honors Committee is required to register. Weil (fall); Norton (spring).
An exploration of major approaches to historical inquiry, analysis, and presentation. Ways of thinking about history along with research methods and organization of the results are considered by reading and discussing a variety of historical works. Substantive readings are drawn from several time periods and diverse geographical areas. There is one short paper during the semester, and a longer final paper which explores the work of a major historian or school of historical writing.

HIST 401 Honors Guidance
Fall or spring. 4 credits. Prerequisites: HIST 400 and permission of instructor. Staff.

HIST 402 Honors Research
Fall or spring. 4 credits. Prerequisites: HIST 400 and permission of instructor. Staff.

HIST 703–704 Supervised Reading
703, fall; 704, spring. 4 credits each term. Limited to graduate students. Prerequisite: permission of instructor. Staff.

HIST 709 Introduction to the Graduate Study of History
Fall. 4 credits. Required of all first-year graduate students. P. Holquist and D. Usner.
The course is designed to introduce entering graduate students to crucial issues and problems in historical methodology that cut across various areas of specialization.

HISTORY OF ART

J. E. Bernstock, R. G. Calkins, C. Lazzaro, K. McGowan, L. L. Meixner, A. Pan, A. Ramage

The Department of the History of Art provides a broad range of introductory and advanced courses in Western art (European and North American) and non-Western art (East and Southeast Asian, African), from antiquity to the present.

The Major

Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, modern (Europe and North America), Southeast Asia, China, Japan, and Africa. Additionally, majors practice a range of art historical methods and interpretive strategies, including connoisseurship, dendrochronology, feminism, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is strongly encouraged.

Requirements for the Major

Prospective majors should consult the director of undergraduate studies. Students wishing to declare a major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. These courses should reflect the diversity of the departmental offerings. One must be at the 200 level, and one—but not both—must emphasize material either predominantly before 1800 or outside Europe/North America. These two courses are prerequisites for the major and a grade of C or above is required for admission; courses must be taken for a letter grade. These courses do count toward the total 44 credits. The major in the history of art requires 44 credits, 30 at the 300 level or above. The core requirements are: proseminar; one 400-level area seminar; two courses in art outside Europe/North America; and three courses in art predating 1800 (ancient, medieval, or Renaissance/Baroque). Majors must choose at least two courses from different categories. In addition to the 44 credits, majors are required to take two courses, approved by their advisers, in areas related to the history of art.

Honors

To become a candidate for the degree of Bachelor of Arts with honors in the history of art, a student must have a cumulative average of B+ for all courses taken in the department and in all arts and sciences courses. Application to write an honors thesis should be made to the director of undergraduate studies during the second term of the junior year. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student's transcript. In the senior year the honors candidate will include in his/her course load, History of Art 600 and 601. These courses address the research and writing of the senior thesis under the direction of the student's project adviser.

Course Numbering System

100–level courses are freshman writing seminars.

200–level courses are introductions to the major subdivisions of Western art and art outside the West.

300–level courses are intermediary courses addressing more specialized topics or epochs.

400–level courses are seminars primarily for advanced undergraduates and graduate students.

500–level courses are seminars primarily for graduate students.

First-Year Writing Seminars

For First-Year Writing Seminar offerings in the History of Art, consult the John S. Knight Institute brochure for times, instructors, and descriptions. These courses may be used as freshman electives but not to satisfy the distribution requirement.

Courses

ART H 200 Art, Archaeology, and Analysis (also ARCH 285, MS&E 285, ENGRI 185, GEOL 200, PHYS 200) (I or IV)
Spring. 3 credits. Staff.
For description see GEOL 200.

ART H 202 Survey of European Art: Renaissance to Modern # (IV)
Summer only. 3 credits. Staff.
The major traditions and movements in western European art from the Renaissance to the modern period. Painting, sculpture, and architecture with an emphasis on painting.

ART H 220 Introduction to Art History: The Classical World (also CLASS 220) # (IV)
Spring. 4 credits. Each student must enroll in a section. A. Ramage.
An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of Constantine the Great.

[ART H 221 Minoan-Mycenaean Art and Archaeology (also CLASS 221 and ARKEO 221) # (IV)
Spring. 3 credits. Not offered 2001–2002. J. Coleman.
For description, see CLASS 221.]

[ART H 224 Archaeology in Action I (also CLASS 232 and ARKEO 232) # (IV)
3 credits. Prerequisite: permission of instructor. Not offered 2001–2002. P. I. Kuniholm.]

[ART H 225 Archaeology in Action II (also CLASS 233 and ARKEO 233) # (IV)
3 credits. Prerequisite: permission of instructor. Not offered 2001–2002. P. I. Kuniholm.
Objects from the Classical, Hellenistic, and Roman periods are "dug" out of Cornell basements, identified, cleaned, restored, catalogued, and photographed and are considered in their appropriate historic, artistic, and cultural contexts.]

ART H 230 Introduction to Art History: Monuments of Medieval Art (also RELST 230) # (IV)
Spring. 4 credits. Each student must enroll in a section. R. G. Calkins.
An introduction to the approaches to art history through a study of selected works of art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

ART H 245 Introduction to Art History: Renaissance and Baroque Art # (IV)
Fall. 4 credits. Each student must enroll in a section. C. Lazzaro.
A survey of major works of European painting, sculpture, and architecture from 1400 to 1700. The focus is on preeminent artists, workshop methods, style, meaning, patronage, and the function of art in a range of social contexts. The course also covers the methods of art history currently practiced in Renaissance and Baroque studies. Weekly section meetings are required.

ART H 260 Introduction to Art History: The Modern Era (IV)
Fall. 4 credits. Not open to students who have taken ART H 261. Each student must enroll in a section. J. E. Bernstock.
A discussion of the most important developments in art from 1780 to the present in a socio-political, historical context. The emphasis is on such major movements and artists such as Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (Van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol). Different critical approaches are examined.

[ART H 261 Introduction to Art History: Modern Art (IV)
3 credits. Not offered 2001–2002. Staff.
An introduction to early modern art as it developed between the French Revolution and World War I. Both European and American movements are examined, including Romanticism, Impressionism, and Cubism. Units are organized around central figures such as Mary Cassatt, Edgar Degas, Thomas Eakins, and Vincent van Gogh. Lectures are supplemented with discussions of methods of inquiry, including social history and feminism, fundamental to interpreting works of art.]

[ART H 270 Mapping America (also AM ST 270) # (IV)
4 credits. Each student must enroll in a section. Not offered 2001–2002. L. Meixner.
An introduction to American art from colonial mercantilism through the Great Depression. Through a variety of sources including maps, paintings, street festivals, political cartoons, photographs, and advertisements, we explore the social and economic factors that shaped American identities. Emphasis is on the representation of race, class, and ethnicity.]

ART H 280 Introduction to Art History: Approaches to Asian Art @ # (IV)
Fall. 3 credits. K. McGowan.
Arranged according to selective focus and emphasis rather than broad chronological survey, this course introduces students to the varied responses of the Asian artist in diverse social, geographical, and historical contexts. Indian miniature paintings, Japanese prints, high-fired ceramics from Thailand and Vietnam, Indonesian textiles and jewelry, Javanese shadow-puppet theater, and Balinese ritual and performance traditions are explored. A number of class sessions meet in the Herbert F. Johnson Museum of Art.

ART H 309 Dendrochronology of the Aegean (also CLASS 309 and ARKEO 309) # (IV)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm.
Participation in a research project of dating modern and ancient tree-ring samples from the Aegean and Mediterranean. Supervised reading and laboratory work. A possibility exists for summer fieldwork in the Aegean.

[ART H 319 Art in the Daily Life of Greece and Rome (also CLASS 319) # (IV)
Spring. 4 credits. Not offered 2001–2002. A. Ramage.
Classical art is well reflected in the small items of daily life that are neglected frequently in the standard histories. This course looks at the making and decorating of household items in Greece and Rome in a variety of materials from clay to metal. The links between the commissions of the state and the tastes of the people are examined through their material culture.]

[ART H 320 The Archaeology of Classical Greece (also CLASS 320) # (IV)
4 credits. Not offered 2001–2002. A. Ramage.]

[ART H 321 Mycenae and Homer (also CLASS 321 and ARKEO 321) # (IV)
4 credits. Not offered 2001–2002. J. Coleman.
For description, see CLASS 321.]

[ART H 322 Arts of the Roman Empire (also CLASS 350) # (IV)
Spring. 4 credits. Next offered spring 2003. A. Ramage.
The visual arts in the service of the first world state. The course starts with the architecture, painting, and sculpture of the Etruscan and Republican period but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered, along with the official presentations of the emperors.]

[ART H 323 Painting in the Greek and Roman World (also CLASS 323) # (IV)
4 credits. Not offered 2001–2002. A. Ramage.]

[ART H 325 Greek Vase Painting (also CLASS 325) # (IV)
Fall. 4 credits. Not offered 2001–2002. A. Ramage.
A stylistic and iconographical approach to an art in which the Greeks excelled. The course is arranged chronologically from the early (eleventh century B.C.), anonymous beginnings to the "personal" hands of identifiable masters of the fifth and fourth centuries B.C. Styles of cities other than Athens are stressed.]

[ART H 326 Greek Cities and Towns (also CLASS 326) # (IV)
4 credits. Prerequisite: CLASS/ART H 220 or permission of instructor. Not offered 2001–2002. J. Coleman.]

[ART H 327 Greek and Roman Coins (also CLASS 327) # (IV)
4 credits. Not offered 2001–2002. A. Ramage.
The varied issues of Greek cities and the Roman state are examined. Coins are considered as art objects as well as economic and historical documents. The changes in design, value, and metals from the origins of coinage to the late Roman period are studied. Lectures, student presentations, and work with the actual examples.]

[ART H 328 Greeks and Barbarians (also CLASS 322) # (IV)
Fall. 4 credits. Not offered 2001–2002.
J. Coleman.
For description, see CLASS 322.]

[ART H 329 Greek Sculpture (also CLASS 329) # (IV)
4 credits. Not offered 2001–2002.
J. Coleman.
For description, see CLASS 329.]

ART H 332 Medieval Architecture (also ARCH 382, RELST 332) # (IV)
Fall. 4 credits. R. G. Calkins.
A survey of medieval architecture from the Early Christian period to the Late Gothic (A.D. 300–1500). Considerable emphasis is placed on the development of structural systems and on the form, function, and meaning of important medieval buildings.

[ART H 333 Early Medieval Art and Architecture # (IV)
4 credits. Not offered 2001–2002.
R. G. Calkins.
Sculpture, painting, and architecture in the period from the late antique through the Carolingian era (A.D. 300–900). The evolution of the early Byzantine tradition is also considered.]

[ART H 335 Gothic Art and Architecture (also RELST 335) # (IV)
4 credits. Not offered 2001–2002.
R. G. Calkins.]

[ART H 336 Prelude to the Italian Renaissance (also RELST 336) # (IV)
4 credits. Not offered 2001–2002.
R. G. Calkins.
An examination of Italian art, beginning with twelfth-century Sicily, and with emphasis on thirteenth- and fourteenth-century sculpture, painting, and to a lesser extent, architecture, which includes the works of Duccio, Giotto, the Pisani, and Lorenzetti as the prelude to the Italian Renaissance.]

ART H 337 The Medieval Illuminated Book (also RELST 337) # (IV)
Fall. 4 credits. R. G. Calkins.
A study of selected major examples of medieval illuminated manuscripts from between A. D. 300 and 1500. Facsimiles of major manuscripts such as the Lindisfarne Gospels, the Book of Kells, and the Hours of Mary of Burgundy are examined. Students write a research paper on a manuscript of their choice. Two lectures, plus a session each week in the Rare Book Room.

ART H 338 Modern Western Drama, Modern Western Theater: Theory and Practice (also COM L 335 and THETR 335) (IV)
Fall. 4 credits. R. Schneider.
A study of drama and the culture contexts of its performances from the mid-nineteenth century to the mid-twentieth century in Europe and America. We move from symbolism and naturalism through to constructivism, expressionism, Dadaism, futurism, surrealism and on the Brecht, Artaud and a few of their more contemporary descendants. Students engage in performance projects as well as text analysis.

[ART H 341 Flemish Painting (also RELST 342) # (IV)
4 credits. Not offered 2001–2002.
R. G. Calkins.
An examination of Flemish painting in the fifteenth century, with emphasis on the works of Robert Campin, Jan van Eyck, Roger van der Weyden, Hugo van der Goes, Hans Memling, and ending with Jerome Bosch. Issues of the social, economic, and devotional context are discussed as they pertain to the particular development of Northern Realism and Symbolism during this century.]

[ART H 343 Italian Renaissance of the Fifteenth Century # (IV)
4 credits. Not offered 2001–2002.
C. Lazzaro.
This course examines the artistic production of the fifteenth century in its social and cultural context. The new style, which was developed in Florence in the early century and spread to other city-states in Italy, is examined in the context of the new educated class, the increased wealth of the mercantile, urban class, and the new role of family in society.]

ART H 344 Italian Renaissance of the Sixteenth Century: Leonardo, Michelangelo, and Raphael # (IV)
Spring. 4 credits. C. Lazzaro.
This course focuses on the three great artists of the late fifteenth and sixteenth centuries, Leonardo, Michelangelo, and Raphael. It examines each as a thinker as well as an artist, through their own writings together with their works of painting, sculpture, and architecture. It also analyses the contemporary constructions of the artist as genius and as courtier in the biographies and other writings about them.

[ART H 345 Rome, Florence, and Venice in the Sixteenth Century # (IV)
4 credits. Not offered 2001–2002.
C. Lazzaro.
This course examines the distinctive cultural identities of Rome, Florence, and Venice, and how art, architecture, and urban planning served to create the myths and self-images of these cities, their rulers, and society. Topics include the centers of power, relationship of church and state, and private patronage and collections.]

[ART H 348 Renaissance Art In Northern Europe: The Sixteenth Century # (IV)
4 credits. Not offered 2001–2002. Staff.
This course examines the painting, graphic arts, and sculpture of Northern Europe in the sixteenth century. Principal emphasis is on art produced in the Netherlands and Germany. Topics considered include patronage and audience in different regions of Northern Europe, the importance of fifteenth-century traditions, the impact of Italian art, and the development of specifically northern forms of artistic expression in religious and secular art, including landscape, portraiture, and genre painting. Among the themes we explore are constructions of gender and representations of women in Northern Renaissance art, attitudes to peasants and the urban lower classes, the impact of the Protestant Reformation and iconoclasm, and the development of the art market in the North. Artists considered include Bosch, Bruegel, Dürer, and Grünewald.]

[ART H 351 The Culture of the Renaissance II (also COM L 362, HIST 364, MUSIC 390, RELST 362, ENGL 325) # (III or IV)
4 credits. Not offered 2001–2002.
W. J. Kennedy, C. Kaske.
For description, see COM L 362.]

ART H 360 Painting Nineteenth-Century America (also AM ST 360) # (IV)
Spring. 4 credits. L. L. Meixner.
This course is an interdisciplinary view of art and life in nineteenth-century America from the colonial era through the Gilded Age. We will consider definitions of democratic culture through topical units including the following: New England portraiture and commodity culture; the art museum in the new republic; genre painting in the Jacksonian era; Hudson River landscape and railroad expansion; photography and the rising middle class; images of African Americans and Reconstruction; images of Native Americans, Manifest Destiny, and the frontier myth; cosmopolitain taste and robber barons in the Gilded Age. Alongside key paintings, we look at print culture including daguerreotypes, postcards, political prints, photographs, and advertisments. Major artists include: John S. Copley, George Caleb Bingham, Winslow Homer, Thomas Eakins, Mary Cassat, and John Singer Sargent. We address their relationship to major writers including Walt Whitman, Henry James, Stephen Crane, and Edith Wharton.

ART H 362 Impressionism in Society (also WOMNS 361) (IV)
Fall. 4 credits. L. L. Meixner.
This course discusses French Impressionist art as products of nineteenth-century public life. By relating Impressionism to state culture, including Universal Expositions, we trace subversive themes such as criminality, cafe and brothel societies, clandestine prostitution, and class-regulated leisure. We consider images of Parisian spectacle and commodity culture (Manet, Cassat, Degas, Toulouse-Lautrec) as well as French landscapes (Monet, Van Gogh, Pissarro). Special topics include artists' relationships to novelists (Zola), poets, and the avant garde theatre as well as the construction of the artist and courtesan in Puccini's "La Boheme" and Verdi's "La Traviata." Images include postcards, playbills, medical photographs, and posters. Organizing our historical units is the theme of power and vision, with attention to the female gaze, voyeurism, surveillance, and scopophilia.

[ART H 365 U.S. Art From FDR to Reagan (also AM ST 355) (IV)
Fall. 4 credits. Not offered 2001–2002.
J. E. Bernstock.
Course covers major artists and movements in the United States since 1940, beginning with Jackson Pollock and Abstract Expressionism, and continuing through recent developments in art. Attention is devoted to the critical reception that artists have received and to artists' statements themselves.]

[ART H 370 Visual Culture and Social Theory (also GOVT 375 and COM L 368) (III or IV)
4 credits. Not offered 2001–2002.
S. Buck-Morss.
For description, see GOVT 375.]

ART H 371 Architectural History of Washington, D.C. # (IV)
Fall or spring. Variable credit. Only for students in the Cornell-in-Washington program. Only for non-architects. P. Scott.
A historical and critical survey of the architecture of Washington. Attention is given to the periods, styles, architects, and clients—public and private—of the notable buildings and to the urbanscape of the nation's capital.

The vocabulary of architectural analysis and criticism is taught. Field trips required.

ART H 377 African American Art (also AS&RC 304) (IV)
Spring. 3 credits. S. Hassan.
For description, see AS&RC 304.

ART H 378 Art in African Culture and Society (also AS&RC 310) @ (IV)
Fall. 3 credits. S. Hassan.
For description, see AS&RC 310.

ART H 380 Introduction to the Arts of China (also ARKEO 380 and ASIAN 383) @ # (IV)
Spring. 4 credits. A. Pan.
This course offers a survey of the art and culture of China, from the Neolithic period to the twentieth century. We begin with an inquiry into the meaning of national boundaries and the controversy of the Han Chinese people, which helps us identify the scope of Chinese culture. Pre-dynastic (or prehistoric) Chinese culture is presented through both legends about the origins of the Chinese, and scientifically excavated artifacts. Art of the dynastic and modern periods is presented in light of contemporaneous social, political, geographical, philosophical and religious contexts. Students work directly with objects in the Herbert F. Johnson Museum of Art.

[ART H 384 Introduction to the Arts of Japan @ # (IV)
Spring. 4 credits. Not offered 2001–2002. A. Pan.
As an island nation east of the Asian continent, Japan developed a unique culture that reflects both continental and indigenous characteristics. This course examines pre-and post-contact with continental culture and the process of artistic acculturation and assimilation in successive periods of Japanese art history.]

[ART H 385 Representation and Meaning in Chinese Painting (also ASIAN 384) @ # (IV)
4 credits. Not offered 2001–2002. A. Pan.
Using major monuments of art, this course introduces various genres of Chinese painting through socio-political and religious history. The focus is on understanding the aesthetic criteria, artistic movements, stylistic transformations, and agendas of different social classes. Weekly sections will meet at the Herbert F. Johnson Museum so that students can gain first-hand experience examining and handling Chinese paintings.]

ART H 395 The House and the World: Architecture of Asia (also ASIAN 394) @ # (IV)
Spring. 4 credits. K. McGowan.
In many Asian societies, houses are regarded as having a life force or a vitality of their own. This course examines the role of the house as a living organism in Asia, a symbol of the cosmos encapsulated. Houses also function in many societies as storehouses for material and immaterial wealth; artifacts such as textiles, jewelry, sculptures, and masks function within the house as ancestral heirlooms, conveying their own currents of life force, the power from which serving to blend with the vitality of the house. This accumulation of energy can be conferred on the inhabitants, or it may exist as a quiet reservoir of power, distinct from its occupants. The indigenous architectural traditions of India, Vietnam, Thailand, Indonesia, and the Philippines are examined. By studying the inhabited spaces of others, divining their technologies of construction and their applied symbologies, students are provided with powerful tools for examining the visual skills and sensibilities of other cultures. "The House and the World" serves as the metaphor for these discoveries.

[ART H 396 The Arts of Southeast Asia @ # (IV)
4 credits. Not offered 2001–2002.
K. McGowan.
The arts of Southeast Asia are studied in their social context, since art plays a role in most of the salient occasions in life in traditional societies. Special emphasis is devoted to developments in Indonesia, Thailand, and Cambodia. Among topics covered are the shadow puppet theater of Java, textiles, architecture, sculpture, and Bali's performance tradition.]

Seminars

Courses at the 400 and 500 level are open to juniors and seniors, majors, and graduate students. All seminars involve the writing and presentation of research papers. Enrollment is limited to 15 students, and *permission of the instructor is required*. Students may repeat courses that cover a different topic each semester.

ART H 400 Proseminar for Art History Majors: The History and Practice of Art History (IV)
Fall. 4 credits. Prerequisite: History of Art majors only. Enrollment is limited.
K. McGowan.
Works of art have always engendered political, social, and cultural meanings. This seminar presents an introduction to the methods which art historians have engaged in studying the objects and ideas which constitute the historiography of their discipline. Challenged and enlarged by cultural debates over issues of class, ethnicity, nationality, sexual orientation, and gender, the field of art history is expanding to incorporate problems of assessing quality of intention and reception along with authorship, of artistic production in place of artistic creation, and of Western-oriented attitudes to race in reference to orientalism and colonialism. Readings focus on historically situating methods used to situate art historically, and on the implications of their cross-cultural application. Papers encourage students to put methods into practice, realizing in the process that subject matter is not an isolated choice to which methods are applied, but something which profoundly affects the approach which the researcher brings to the writing of art history.

ART H 400 Proseminar
Fall. 4 credits. Prerequisite: History of Art majors only. Enrollment is limited.
K. McGowan.
Works of art have always engendered political, social, and cultural meanings. This seminar presents an introduction to the methods which art historians have engaged in studying the objects and ideas which constitute the historiography of their discipline. ART H 401 Independent Study
Fall or spring. 2–4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member.
Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

ART H 402 Independent Study
Fall or spring. 2–4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member.
Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

[ART H 403 Ritual, Play, Spectacle, Act: Performing Culture (also THETR 403 and 603) (IV)
Fall. 4 credits. Not offered 2001–2002.
R. Schneider.
For description, see THETR 403.]

ART H 407 The Museum and the Object (IV)
Fall. 4 credits. Prerequisite: permission of instructor. All classes meet in the Johnson Art Museum Study Gallery. L. L. Meixner.
This seminar gives advanced Art History majors the opportunity to work directly with original objects from collections in the Herbert F. Johnson Museum. The course focuses on art and connoisseurship by questioning the ways quality is determined in works of art. Topics include methods of attribution, fakes and forgeries, technique and media, restoration and conservation, art education and theories of perception. Session leaders include the curatorial staff of the art museum.

[ART H 423 Ceramics (also CLASS 423 and ARKEO 423) # (IV)
4 credits. Not offered 2001–2002.
A. Ramage.
Bronze Age, Greek, and Roman pottery specimens from Near-Eastern and Mediterranean sites are studied to provide direct experience of one of the basic prerequisites of archaeological excavation—the identification and dating of pottery types. Reports, delivered in class, concern ancient ceramic materials or particular types and periods of ceramics. Practical experience in making and decorating pottery is encouraged.]

[ART H 424 Sardis and the Cities of Asia Minor (also ARKEO 432 and CLASS 432) # (IV)
4 credits. Not offered 2001–2002.
A. Ramage.]

[ART H 425 Seminar on the Bronze Age Architecture of Asia Minor (also CLASS 430 and ARKEO 425) # (IV)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002.
P. I. Kuniholm.
The course covers major architectural building programs from Neolithic Catal Hüyük, Beycesultan, to the final phases of Troy and Hittite Bogazköy. The art and archaeology of these civilizations is taken into account when relevant. Reading knowledge of German useful.]

ART H 427 Seminar on Roman Art and Archaeology (also CLASS 435 and ARKEO 435) # (IV)
Spring. 4 credits. Not open to freshmen or sophomores without permission of instructor. A. Ramage.
Topic for spring 2002: The Afterlife of Roman and Classical Art.

[ART H 430 America in the Camera's Eye (also HIST 430 and AM ST 430.2) (III or IV)
Fall. 4 credits. Not offered 2001–2002. R. L. Moore.
For description, see HIST 430.]

ART H 434 The Rise of Classical Greece (also ARKEO 434 and CLASS 434) # (IV)
Spring. 4 credits. Recommended: CLASS 220 or ART H 220, CLASS 221 or ART H 221, or permission of instructor. P. I. Kuniholm.
The art and archaeology of the Greek dark ages. Topics include: site reports, pottery, metalworking, the introduction of the alphabet, the beginnings of coinage, and links with Anatolia and the Near East.

[ART H 446 Renaissance Patronage and the Medici (also HIST 479) # (III)
Spring. 4 credits. Not offered 2001–2002. Staff.
Between the early fifteenth and later sixteenth centuries, the Medici family of Florence rose from the ranks of the city's merchant bankers to become virtual rulers of the republic, cardinals and popes in Rome, and, eventually, heredity grand dukes of Tuscany. Much of the family's power and fame derived from two kinds of patronage: the social and political patronage that first established their faction and party and then enabled them to maintain control; and the artistic and cultural patronage that was central both to the fashioning of the family's image and to the realization of its princely ambitions. This interdisciplinary seminar explores the connections between the two types of patronage employed so effectively by the Medici. We focus on primary source materials, on works of art and architecture, and on recent historical and art historical scholarship concerned with the Medici and with patronage in Renaissance Italy.]

ART H 447 Aesthetic Theory: End of Art (also GERST 656 and COM L 656)
Fall. 4 credits. Permission of Instructor. P. Gilgen.
For description, see GERST 656.

[ART H 448 Studies in Sixteenth-Century European Art # (IV)
4 credits. Not offered 2001–2002. C. Lazzaro.
Topic: Constructing the Self in the Sixteenth Century. This seminar examines portraits, self-portraits, autobiographies, and biographies, as well as treatises on etiquette and behavior. In this society, "civility," the mark of class and education, was conveyed through bearing, gesture, manners, and speech, as well as social organization and artistic interests, all of which are evident in both visual and verbal representations of individuals.]

ART H 450 Women in Italian Renaissance Art (also WOMNS 451) # (IV)
Spring. 4 credits. Prerequisite: permission of instructor. C. Lazzaro.
This seminar examines representations of the Madonna and Child from the fourteenth and fifteenth centuries, the narrative scenes painted on chests and other domestic furniture, biblical and historical heroines such as Judith and Lucretia, portraits of patrician women and courtesans, and violence to women in a political context. It investigates the contemporary ideas about motherhood, beauty, sexuality, social presentation, and gender roles in society that inform these representations. We discuss the existing critical frameworks for interpreting them in feminst art history and theory (particularly in Renaissance studies). We are concerned especially with how visual images are encoded with meaning, what kind of relationship can be established with their historical context, and how they convey social constructs as ideology.

[ART H 451 Prints of the Fifteenth through the Seventeenth Century # (IV)
4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. C. Lazzaro.
This seminar has several aims: to introduce students to prints—the techniques, styles, and issues of connoisseurship—and to the major printmakers of the period, including Marcantonio Raimondi, Dürer, and Rembrandt; to give students first-hand experience with works of art in the Herbert F. Johnson Museum; and to consider the social and cultural issues raised in the medium of prints and through their unique visual language. These issues include the social hierarchies of class and gender (including witches), moral concerns and religious devotion, the construction and transmission of notions of antiquity and classicism, and the representation of the urban and rural environment. Students give brief presentations on prints in the collection and longer ones of their own research projects on these and related topics.]

ART H 461 Art and Social Histories (also COM L 461) # (IV)
Spring. 4 credits. Prerequisite: permission of instructor. Auditing is not permitted. L. L. Meixner.
Topic for spring 2002: Landscape as Ideology. This seminar considers images of land as cosmos, empire, fantasy, memory, and marvel. We approach our focal issue—land and capital—via Old and New World encounters, the political picturesque, rural enclosure, the Grand Tour and the tourist sublime, colonial and post-colonial spaces, the "greening of capitalism," the feminization of nature, and the transparency of utopia. In addition to art historical texts, our readings include the diaries of artist-explorers, discovery and conquest narratives, nature writing, and ecocriticism. Darwin, Thoreau, S. J. Gould, and Greenblatt number among our authors. Crossing boundaries, we discuss illuminated manuscripts, early modern pastorals (Europe and England), the symbolic frontier (U.S.A. and Russia), the topographic body and HGP, earthart, national parks, the Land of Oz and Eurodisney.

[ART H 462 Topics in Early Modernism (IV)
4 credits. Prerequisite: permission of instructor. Auditing is not permitted. Not open to freshmen or sophomores. Not offered 2001–2002. L. L. Meixner.
Early Modernism in America. Using the Armory Show (1913) as its center, this interdisciplinary seminar examines the varied expressions of American modernism prior to World War II. Against the backdrop of post-World War I social politics and the Jazz Age, we examine: the machine aesthetic and kinetic poetry, icons such as the Brooklyn Bridge, O'Keefe, Stieglitz, and the rise of photography at "291," American Dada, the Harlem Renaissance, and the introduction of homoerotic imagery. Aside from major artists, key figures include Gertrude Stein, Dos Passos, Hart Crane, and Ernest Hemmingway.]

[ART H 463 Studies in Modern Art (IV)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. J. E. Bernstock.
An Analysis of Abstract Art in Europe (1910–1920). Various reasons have been cited for the emergence of abstract art in Europe between 1910 and 1920. This seminar considers the historical context, the philosophical literature, and the developments in art criticism that had a bearing on the evolution of abstract art in the Netherlands, Germany, and Russia.]

[ART H 464 Studies in Modern Art (IV)
Spring. 4 credits. Prerequisite: ART H 365 and permission of instructor. Auditing is not permitted. Not offered 2001–2002. J. E. Bernstock.
Subjectivism in Art of the 1980s. This seminar examines the tendency toward a subjective form of art in the United States and in Germany during the 1980s, and the reasons for its international impact. The political and economic circumstances in the two countries as well as related art criticism are studied.]

ART H 466 Women Artists (also WOMNS 404) (IV)
4 credits. Prerequisite: permission of instructor. J. E. Bernstock.
This seminar studies the work of women artists from antiquity to the present. We consider the works of the most prominent women artists from each period in relation to the changing roles of women in society. The artists covered include Jennifer Bartlett, Artemisia Gentileschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Käthe Kollwitz, Georgia O'Keeffe, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger. Different critical approaches to feminist art are discussed.

[ART H 476 Seminar in American Art (IV)
4 credits. Not offered 2001–2002. L. L. Meixner.]

ART H 478 African Cinema (also AS&RC 435) @ (IV)
Fall. 4 credits. S. Hassan.
For description, see AS&RC 435.

[ART H 481 Art of the Tang Dynasty (618–907) (also ASIAN 479) @ # (IV)
Spring. 4 credits. Prerequisite: ART H 383 or a course in Chinese history or Chinese literature and permission of instructor required. Not offered 2001–2002. A. Pan.
This seminar explores art and culture of the Tang dynasty, China's "golden age," by focusing on new discoveries and museum objects representing court, secular, and Buddhist art. We examine how imperial taste, patronage, and aesthetics influenced painting, calligraphy, gold and silver wares, ceramics, and important architectural and cave-temple sites.]

[ART H 483 Arts of the Song Dynasty (960–1279) @ # (IV)
4 credits. Not offered 2001–2002. A. Pan.
This seminar surveys arts of the Song dynasty, a period of introversion and high refinement. Through readings, class discussions, and visits to the Herbert F. Johnson Museum of Art, students gain knowledge of painting (landscape, figure, horse, flower-and-bird, literati traditions, and theories), calligraphy, Song antiquarianism, imperial patronage, religious art (painting, sculpture, and temples), and ceramics.]

[ART H 490 Art and Collecting: East and West (also ASIAN 491) @ # (IV)
Spring. 4 credits. Not offered 2001–2002. K. McGowan.
This course examines the social life of things, focusing in particular on the collection as an organizing metaphor for cross-cultural exploration. By examining biographies of objects, and the extent of their influence, it is possible to observe the transformation of gifts or heirlooms into commodities and vice versa as constellations of cultures appropriate objects and ideas across vast distances, East and West. India, Europe, China, America, Japan, and Mainland and Island Southeast Asia are examined at different points historically where dynamic convergences occur in the traffic of culture.]

[ART H 520 Seminar in Classical Archaeology (also CLASS 630 and ARKEO 520)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. J. Coleman.
For description, see CLASS 630.]

ART H 531 Problems in Medieval Art and Architecture (also RELST 531)
Spring. 4 credits. Prerequisite: permission of instructor. R. G. Calkins.
Topic for spring 2002: Archaeology of the Book. A detailed investigation of the methods and procedures of examining medieval illuminated manuscripts. Emphasis is on understanding the handwritten book as a functioning object: its production, decoration, use, and reception. Students conduct research on a facsimile of a medieval manuscript amongst those housed in the Rare and Manuscript Collections in Kroch Library. Discussions, reports on readings, and presentations of research paper in class.

ART H 540 Seminar in Renaissance Art
4 credits. Prerequisite: permission of instructor. C. Lazzaro.
Topic for fall 2001: Nature, Cultural Landscape, and Gardens in Early Modern Italy. This seminar examines cultural understandings of nature, the paired concepts of nature and culture, and the representations of nature in gardens. We consider the "second nature"—human interventions in the natural world, and the resulting "cultural landscape"—in both the actuality and painted representations of the countryside. The cultural significance of plants and plant foods and of animals, the revived literary genre of the pastoral, and collections of nature are all examined. Reflecting on the flourishing gardens from the sixteenth century we discuss how these cultural concepts of nature are manifested in garden design, planting and ornamentation.

[ART H 549 Problems in Interpretation in Italian Renaissance Art
4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. C. Lazzaro.
This seminar examines assumptions about meaning and how meaning is produced in Renaissance art. Various interpretative strategies are examined, among them iconographic, semiotic, feminist, and psychoanalytic, within a specifically Renaissance literary, intellectual, and social context. Texts by Panofsky and critical discussions of them, Baxandall, Bryson, and others are read and discussed with reference to particular works of art. The seminar is intended primarily for graduate students in all areas of the history of art and those in other disciplines with an interest in the Italian Renaissance. Senior History of Art majors with background in the Italian Renaissance are also welcome.]

ART H 571 African Aesthetics (also AS&RC 503)
Spring. 4 credits. S. Hassan.
For description, see AS&RC 503.

ART H 580 Problems in Asian Art (also ASIAN 602 and RELST 580)
Spring. 4 credits. Prerequisite: permission of instructor. K. McGowan.
Topic for 2002: Water: Art and Politics in Southeast Asia. This seminar focuses on the significance of water—economic, religious, political, social—and its role in the art and architecture of Mainland and Island Southeast Asia. While India and China can be seen to provide aquatic themes and patterns for transformation, the emphasis in this course is on local ingenuity, how technologies of water use and control at ancient sites in Southeast Asia can be seen to shape vivid visual symbologies, past and present.

ART H 591–592 Supervised Reading
591, fall; 592, spring. 4 credits. May be repeated for credit. Limited to graduate students.

ART H 600 Honors Work
Fall or spring. 8 credits. Intended for senior art history majors who have been admitted to the honors program.
Basic methods of art historical research are discussed and individual readings assigned, leading to the selection of an appropriate thesis topic.

ART H 601 Honors Work
Fall or spring. 8 credits. Prerequisite: ART H 600.
The student under faculty direction prepares a senior thesis.

LINGUISTICS

A. Cohn, chair (203D Morrill Hall); D. Zec, director of graduate studies (219 Morrill Hall); W. Harbert, director of undergraduate studies (210 Morrill Hall); D. Abusch, J. Bowers, W. Browne, C. Collins, M. Diesing, S. Hertz, S. McConnell-Ginet, A. Miller-Ockhuizen, A. Nussbaum, M. Rooth, C. Rosen, M. Suñer, M. Weiss, J. Whitman, J. Wolff.

Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences, and much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics and linguistic colleagues in other departments span most of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning; historical linguistics, the study of language change over time; and sociolinguistics, the study of language's role in social and cultural interactions.

Studying linguistics is not a matter of studying many languages. Linguistics is a theoretical discipline with ties to such areas as cognitive psychology, philosophy, logic, computer science, and anthropology. Nonetheless,

knowing particular languages (e.g., Spanish or Japanese) in some depth can enhance understanding of the general properties of human language. Not surprisingly, then, many students of linguistics owe their initial interest to a period of exposure to a foreign language, and those who come to linguistics by some other route find their knowledge about languages enriched and are often stimulated to embark on further foreign language study.

Students interested in learning more about linguistics and its relationship to other disciplines in the humanities and social sciences are encouraged to take Linguistics 101, a general overview, which is a prerequisite for most other courses in the field, or one of the first-year writing seminars offered in linguistics (on topics such as metaphor and the science of language). Linguistics 101 and other introductory courses fulfill the social science distribution requirement. Most 100- and 200-level courses have no prerequisites and cover various topics in linguistics (e.g., LING 170, Introduction to Cognitive Science; LING 285, Linguistic Theory and Poetic Structure) or focus on the linguistics of a particular geographic region or historical development of particular languages (e.g., LING 217, History of the English Language; LING 239, The Celtic Languages). Some of these courses also fulfill the breadth requirements.

Talks and discussions about linguistics are offered through the Undergraduate Linguistics Forum and the Linguistics Colloquium (sponsored by the department and the Cornell Linguistic Circle). These meetings are open to the university public and anyone wishing to learn more about linguistics is most welcome to attend.

The Major

For questions regarding the linguistics major, contact Professor Wayne Harbert (210 Morrill Hall, 255–8441, weh2@cornell.edu).

The prerequisite for a major in linguistics is the completion of LING 101 and either LING 201 or 203. The major has its own language requirement, which should be completed as early as possible: qualification in two languages other than English, one of which must be either non-European or non-Indo-European. With approval of the department's director of undergraduate studies, this requirement may be waived (i.e., reduced to the normal arts college language requirement) for students taking the cognitive studies concentration or a double major.

The other standard requirements for the linguistics major are as follows:

1) LING 201 (Introduction to Phonetics and Phonology) or LING 203 (Introduction to Syntax and Semantics), whichever one was not taken as a prerequisite to the major
2) LING 314 (Historical)
3) Three of the following five courses, one of which must be either Phonology I or Syntax I:

   LING 301 (Phonology I)

   LING 303 (Syntax I)

   LING 309 (Morphology)

   LING 319 (Phonetics I)

   LING 421 (Semantics I)

4) A course at or beyond the 300 level in the structure of English or some other language, or a typological or comparative structure course such as Linguistics 401 or Field Methods (LING 300)
5) One additional linguistics course for at least four credit hours, which may be a course with significant linguistic content in a related field.

Some substitutions to these standard requirements are possible after consultation with your adviser and approval by the DUS.

Honors

Applications for honors should be made during the junior year or by the start of fall term of the senior year. For further information, please contact the DUS. Candidates for admission must have a 3.0 (B) average overall and should have a 3.2 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors will complete an honors thesis and take a final oral examination in defense of it. The thesis is usually written during the senior year but may be started in the second term of the junior year when the student's program so warrants. The oral examination will be conducted by the honors committee, consisting of the thesis adviser and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. LING 493 and 494 may be taken in conjunction with thesis research and writing but are not required.

First-Year Writing Seminars

For descriptions, consult the John S. Knight brochure for times, instructors, and descriptions.

Courses

LING 101 Introduction to Linguistics (III)
Fall or spring. 4 credits each term. Fall, J. Whitman; spring, M. Diesing.
An introductory course designed to provide an overview of the science of language, especially its theoretical underpinnings, methodology, and major findings. The course focuses on the basic analytic methods of several subfields of linguistics including phonetics, phonology, morphology, syntax, semantics, language variation, language change, and psycholinguistics.

LING 109 English Words: Histories and Mysteries (also CLASS 109) #
Fall. 3 credits. M. Weiss.
Where do the words we use come from? This course examines the history and structure of the English vocabulary from its distant Indo-European roots to the latest in technical jargon and slang. Topics to be discussed include formal and semantic change, taboo and euphemism, borrowing, new words from old, "learned" English loans from Greek and Latin, slang, and society.

LING 131–132 Elementary Sanskrit (also CLASS 131–132 and SANSK 131–132)
For description, see SANSK 131–132.

LING 170 Introduction to Cognitive Science (also COGST 101, COM S 101, PHIL 102, and PSYCH 102)
For description, see COGST 101.

LING 201 Introduction to Phonetics and Phonology (III)
Spring. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. A. Cohn.
An introduction to the study of human speech sounds and how they pattern in languages. The first part of the course focuses on phonetics: the production, acoustics, and perception of speech, with attention to both the common and the less common sounds of the world's languages. The second part of the course focuses on phonology: how human speech sounds pattern within and across languages, with an emphasis on the rules that govern these patterns and their possible representation.

LING 203 Introduction to Syntax and Semantics (III)
Fall. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. M. Diesing.
This course focuses on language as a system of knowledge that enables native speakers to create and interpret the structures of their language. Part of the course considers issues of syntactic structure, such as the order of constituents, the hierarchical organization of grammars, and syntactic universals. The other part of the course focuses on meaning and interpretation, addressing such issues as the role of context, how information is structured, and how it is encoded in the syntax.

[LING 212 Language and Culture (III)
Spring. 3 credits. Not offered 2001–2002; next offered 2002–2003. J. Whitman.
We often assume that there is a close relationship between differences in language and cultural variation. This course focuses on that relationship, beginning with an examination of the linguistic relativity hypothesis, which posits a link between basic properties of languages and crosscultural differences in world view. We also examine potential cultural determinants of variation in language: pronouns and honorific systems, systems of ritual and taboo in language, and the impact of narrative organization on grammar. Special attention is paid to 'extreme' forms of language: invented languages from Esperanto to Klingon; glossolalia and trance languages; language games and secret languages.]

[LING 215/715 Psychology of Language (also PSYCH 215) (III)
Not offered 2001–2002.
For description, see PSYCH 215.]

[LING 216 Mathematical Linguistics (II)
Spring. 4 credits. Not offered 2001–2002. Staff.
The course is an introduction to the mathematical concepts and techniques most frequently used in theoretical linguistics.]

LING 217 History of the English Language (also ENGL 217) # (III or IV)
Fall. 4 credits. W. Harbert.
This course explores the development of the English language from its Indo-European beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old English, Middle English, Standard English, dialects, and World Englishes.

[LING 230 Introduction to Southeast Asian Languages and Linguistics @ (III)
Not offered 2001–2002.]

[LING 236 Introduction to Gaelic
Spring. 3 credits. Not offered 2001–2002. W. Harbert.
This course is an introduction to the history, structure, and current status of the Scottish Gaelic language, oriented around elementary Gaelic texts.]

[LING 237 The Germanic Languages (III)
Fall. 4 credits. Not offered 2001–2002. W. Harbert, M. Diesing.
This course surveys the history, structure, and use of the modern Germanic languages (English, German, Dutch, Afrikaans, Swedish, Danish, Icelandic, Norwegian, Faroese, and Yiddish).]

LING 238 Introduction to Welsh
Fall. 3 credits. W. Harbert.
This course surveys the history, structure, cultural, and political situation of the Welsh language. It includes several sessions of elementary language instruction and a brief introduction to Welsh literature.

[LING 239/539 The Celtic Languages (III)
Fall. 4 credits. Graduate students register under LING 539. Not offered 2001–2002. W. Harbert.
This course surveys the history, structure, and political and social situation of the Celtic languages (Welsh, Scottish Gaelic, Irish Gaelic, Breton, Cornish, and Manx). The course includes a few days of introductory language instruction in some of these languages.]

[LING 241 Yiddish Linguistics (also JWST 271) (III)
Fall. 3 credits variable. Not offered 2001–2002; next offered 2002–2003. M. Diesing.
This course covers a wide variety of topics relating to the Yiddish language and Yiddish culture, including the structure of Yiddish, the history of the Yiddish language, Yiddish in America (the Yiddish revival, the role of the Yiddish press, etc.), Yiddish as a minority/dying language, and the influence of Yiddish on present-day American English. No previous knowledge of Yiddish required.]

[LING 242 Diversity in American English (III)
Spring. 3 credits. Not offered 2001–2002; next offered 2002–2003. C. Collins.
This course is a basic introduction to the regional dialects of English spoken in the United States. It is linguistically oriented, introducing the relevant aspects of phonetics, phonology, morphology, and syntax where appropriate. There is an emphasis on the students discovering what features characterize their own dialects (if they speak American English). The class is also of use as an introduction to American English dialects for nonnative speakers of English.]

[LING 244 Language and Gender (also WOMNS 244) (III)
Spring. 4 credits. For nonmajors or majors. Not offered 2001–2002. S. McConnell-Ginet.
This course explores connections between language (use) and gender/sex systems, addressing such questions as the following: How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women's and men's roles affect their language use, their relation to language change? What is meant by sexist language? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and general women's studies and feminist theory.]

[LING 246/546 Minority Languages and Linguistics (III)
Not offered 2001–2002.]

[LING 251–252 Intermediate Sanskrit (also CLASS 251–252 and SANSK 251–252) @ #
Satisfies language proficiency. Not offered 2001–2002.
For description, see SANSK 251–252.]

[LING 264 Language, Mind, and Brain (also COGST 264) (III)
Spring. 4 credits. For nonmajors or majors. Prerequisite: a basic course in linguistics and/or psychology is desirable. Not offered 2001–2002. J. Bowers.
An introductory course that emphasizes the formal structure of natural language and its biological basis. The following topics are covered: the formal representation of linguistic knowledge, principles and parameters of universal grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language and cognition. This course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics that concentrates on the formal principles that govern linguistic knowledge, along with some discussion of their biological realization and their use in perception and production.]

[LING 270 Truth and Interpretation (also COGST 270 and PHIL 270) (III)
Not offered 2001–2002.
For description, see PHIL 270.]

[LING 285/585 Linguistic Theory and Poetic Structure (also ENGL 296/585) (III or IV)
Spring. 4 credits. Graduate students register under LING 585. Not offered 2001–2002. J. Bowers.
Poems are among the most highly structured linguistic objects that human beings produce. While some of the devices used in poetry are arbitrary and purely conventional, most are natural extensions of structural properties inherent in natural language itself. The aim of this course is to reveal the ways poetry is structured at every level, from rhyme to metaphor, and to show how certain results of modern linguistics can usefully be applied to the analysis and interpretation of poetry. After introducing some of the basic concepts of modern phonology, syntax, and semantics, it is shown how literary notions such as rhyme, meter, enjambment, and metaphor can be formally defined in linguistic terms. These results are then applied to the analysis of particular poems and shown to yield novel and interesting insights into both their structure and interpretation.]

LING 300 Field Methods (III)
Spring. 4 credits. Prerequisites: LING 201 and 203 or permission of instructor. C. Collins, J. Wolff.
Elicitation, recording, and analysis of data from a native speaker of a non-Western language not generally known to students.

LING 301–302 Phonology I, II (III)
301, fall; 302, spring. 4 credits each term. Prerequisites: for LING 301, LING 201 or equivalent; for LING 302, LING 301 or permission of instructor. Fall, A. Cohn; spring, D. Zec.
301 provides a basic introduction to phonological theory. The first half of the course focuses on basic principles of phonology, patterns of sounds, and their representations. In the second half, the nature of syllable structure and feature representations are explored. 302 provides further refinement of the issues investigated in 301, focusing in particular on metrical theory, Lexical Phonology, autosegmental phonology, and Prosodic Morphology.

LING 303–304 Syntax I, II (III)
303, fall; 304, spring. 4 credits each term. Prerequisites: for LING 303, LING 203; for LING 304, LING 303 or permission of instructor. Fall, C. Collins, J. Whitman; spring, M. Diesing.
303 is an introduction to syntactic theory, with emphasis on the classical theory of transformational grammar. 304 is an advanced course, surveying current syntactic models and dealing with such issues as the nature of syntactic representation, levels of representation, principles of universal grammar, and the relation of syntax and semantics.

[LING 308 Readings in Celtic Languages
Fall or spring, depending on demand. 2 credits. Prerequisite: permission of instructor. Not offered 2001–2002. W. Harbert.
Reading/discussion groups in Welsh or Scottish Gaelic.]

LING 309 Morphology (III)
Fall. 4 credits. Prerequisite: LING 101 or equivalent or permission of instructor. D. Zec.
This course addresses the basic issues in the study of words and their structures. It provides an introduction to different types of morphological structures with examples from a wide range of languages. Special emphasis is given to current theoretical approaches to morphological theory.

LING 311 The Structure of English: Demystifying English Grammar (also ENGL 313) (III or IV)
Fall. 4 credits. M. Suñer.
Do you suffer from grammatical insecurity? In foreign language classrooms, do you find yourself at a loss because you don't know how grammatical terminology applies to English? This course makes English grammar accessible and comprehensible to native speakers who want to understand how the language they use so easily works. In addition to standard grammatical notions, the course considers dialectal variation, matters of style, how sentence structure conveys viewpoint, and other discourse phenomena.

LING 314 Introduction to Historical Linguistics # (III)
Spring. 4 credits. Prerequisite: LING 201 or permission of instructor. M. Weiss.
A survey of the basic mechanisms of linguistic change, with examples from a variety of languages.

LING 315–316 Old Norse
315, fall; 316, spring. 4 credits each term. E. Johannsson.
Old Norse is a collective term for the earliest North Germanic literary languages: Old

Icelandic, Old Norwegian, Old Danish, and Old Swedish. The richly documented Old Icelandic is the center of attention, and the purpose is twofold: the students gain knowledge of an ancient North Germanic language, important from a linguistic point of view, and gain access to the medieval Icelandic (and Scandinavian) literature. 315: The structure of Old Norse (Old Icelandic), phonology, and morphology, with reading of selections from the Prose-Edda, a thirteenth-century narrative based on the Eddaic poetry. 316: Extensive reading of Old Norse texts, among them selections from some of the major Icelandic family sagas: Njals saga, Grettis saga, and Egils saga, as well as the whole Hrafnkels saga.

LING 319 Phonetics I (III)
Fall. 4 credits. Prerequisite: LING 201 or permission of instructor. A. Miller-Ockhuizen.

This course provides a basic introduction to the study of phonetics. Topics covered include anatomy and physiology of the speech production apparatus, transcription and production of some of the world's sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, and stress and intonation.

LING 320 Phonetics II (III)
Spring. 4 credits. Prerequisite: LING 319. A. Miller-Ockhuizen.

This course is a continuation of Phonetics I and provides a more detailed survey of some areas in acoustic and articulatory phonetics. Topics include feature theory, vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, coarticulation, theories of speech production, and prosody. In addition, a number of "hands-on" projects are part of the course.

LING 321–[322] History of the Romance Languages (also ROMS 321) (III)
Fall; [322, spring]. 4 credits each term. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. C. Rosen.

321: Course covers: popular Latin; Pan-Romance trends in phonology, morphology, syntax, and the lexicon; regional divergence; non-Latin influences; and medieval diglossia and emergence of Romance standards. [322: French, Italian, and Spanish from 850 to 1250 A.D. Analysis of texts. Overview of other languages to the present day. Elements of dialectology.]

LING 323 Comparative Romance Syntax (also ROM S 323) (III)
Spring. 4 credits. Prerequisites: LING 101, or equivalent and qualification in any romance language. Offered alternate years. C. Rosen.

Concise survey of romance syntax, covering the salient constructions in six languages with equal attention to their historical evolution and their current state. Grammatical innovation and divergence in a typological perspective.

LING 325 Pragmatics (also PHIL 334) (III or IV)
Fall. 4 credits. Prerequisite: LING 201 or PHIL 231 or permission of instructor. D. Abusch.

An introduction to aspects of linguistic meaning which have to do with context and with the use of language. Topics include context change semantics and pragmatics, presupposition and accommodation, conversational implicature, speech acts, and the pragmatics of definite descriptions and quantifiers.

LING 332 Philosophy of Language (also PHIL 332) (IV)
For description, see PHIL 332.

[LING 333 Problems in Semantics (also PHIL 333 and COGST 333) (III or IV)
Spring. 4 credits. Prerequisite: logic or semantics course or permission of instructor. Not offered 2001–2002. S. McConnell-Ginet, Z. Gendler Szabó.

This course looks at problems in the semantic analysis of natural languages, critically examining work in linguistics and philosophy on particular topics of current interest. The focus is on quantification. Languages offer a variety of resources for expressing generalizations: some, every, no, many, and other quantifying expressions that appear inside noun phrases; always, never, occasionally, and other adverbial quantifying expressions not associated with particular nominals; constructional resources of various kinds (e.g., English free relatives like *whatever she cooks*). How different are these resources and what might they imply about basic cognitive and linguistic capacities?]

[LING 347 Topics in the History of English (III)
Spring. 4 credits. Prerequisite: LING 217, 314, a course in Old or Middle English, or permission of instructor. Not offered 2001–2002. W. Harbert.

The course will treat specific topics in the linguistic history of the English language, selected on the basis of the particular interests of the students and the instructor. The topic area for 2000–2001 was morphological and syntactic change during the Early Middle English period—a period crucial to the development of the distinctive syntactic properties of Modern English.]

[LING 355 Languages in Contact (III)
Fall. 4 credits. Prerequisite: LING 101. Not offered 2001–2002. J. Wolff.

A principal cause of language change is contact with another language—that is, when some speakers of the community speak another or several other languages. This course examines issues of how languages and also dialects in contact influence each other: what kind of changes they undergo and the social factors which determine the kind, direction, and degree of change. We study issues of multilingualism and its social correlates, code switching, issues of language mixture (pidginization and creolization, language intertwining), language maintenance and language death. Finally, we look at how issues of language in contact shape our understanding of traditional historical linguistics—that is, where languages that are now spoken in the world came from and how they came to be the way they are.]

LING 366 Spanish in the United States (also SPANR 366 and LSP 366) (III)
Fall. 4 credits. Prerequisite: some knowledge of Spanish. M. Suñer.

Examination of major Spanish dialects in the United States from a linguistic perspective. Contrast with the standard language. Borrowing, interference, and code switching. Syntactic, morphological, and phonological characteristics.

LING 390 Independent Study in Linguistics
Fall or spring. 1–4 credits variable. Prerequisite: LING 101 or permission of instructor. Staff.

Independent study of linguistics topics not covered in regular curriculum for undergrads.

LING 401 Language Typology (III)
Spring. 4 credits. Prerequisite: LING 101 or equivalent. C. Rosen.

Study of a basic question of contemporary linguistics: in what ways do languages differ, and in what ways are they all alike? Efforts to formalize universals of syntax and to characterize the total repertory of constructions available to natural languages. Common morphological devices and their syntactic correlates. Emphasis is on systems of case, agreement, and voice.

[LING 403 Applied Linguistics and Second Language Learning (III)
Fall. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, anthropology, communication, cognitive studies, education, or literary analysis; or permission of instructor. Not offered 2001–2002; next offered 2002–2003. Staff.

This course is an introduction to the field of applied linguistics with focus on different domains of language research as they come to bear on the matter of second language learning. Thus, topics include developmental and experimental psychology of language, textual and discourse analysis, literacy, cognitive consequences of bilingualism, corpora and language teaching, and contact between first and second language communities.]

[LING 404 Linguistic Structure of Japanese (also ASIAN 412) (III)
Fall. 4 credits. Prerequisites: JAPAN 102 or permission of instructor and LING 101 or equivalent introductory course in linguistics. Offered alternate years. Not offered 2001–2002; next offered 2002–2003. Y. Shirai.

Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.]

LING 405 Sociolinguistics (III)
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. J. Wolff.

The principal work of linguistics is to describe, analyze, and understand the regularities of language systems. How, then, are we to deal with irregularities and variability when they are observed in language? This course introduces and discusses the most significant issues in the study of language variation, and it examines some of the methodologies that have been developed to study variation in language use. We consider the observable interactions between linguistic variables and social factors (e.g., age, sex, ethnicity) and review the main generalizations about these factors that sociolinguistics has arrived at in the last three decades. Some of the problems associated with the quantification and measurement of nonlinguistic variables are discussed and we evaluate the various ways researchers have dealt with these problems.

[LING 406 Ethnolinguistics (III)
Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 2001–2002; next offered 2002–2003. J. Wolff.

This course is an introduction to the study of pidgin and creole languages and the issues surrounding them both in and beyond linguistics. Topics covered include: genesis of pidgins and creoles; classification of pidgins and creoles; creoles and language universals; creoles and sociolinguistic variation; a module on Saramaccan Creole English; educational and language planning issues; sociohistorical issues; Black English.]

[LING 407 Grammatical Structure of Spanish I (also SPANR 407) (III)
Spring. 4 credits. Prerequisite: proficiency in Spanish or permission of instructor. Not offered 2001–2002; next offered 2002–2003. M. Suñer.
This course seeks to equip the advanced student or the future language professional with practical insights into problem areas for foreign language learners with the aid of linguistic descriptions. The intent is to narrow the gap known to exist between the knowledge that a native speaker has and the incomplete one that a foreign language learner possesses.]

[LING 408 Grammatical Structure of Spanish II (also SPANR 408) (III)
Spring. 4 credits. Prerequisites: LING 101 and proficiency in Spanish or permission of instructor. Offered alternate years. Not offered 2001–2002; next offered 2003–2004. M. Suñer.
Survey of Spanish morpho-syntax using contemporary theoretical models to highlight hidden patterns and generalizations. Topics may vary according to students' interests, but may include major clause types, word order possibilities, negation, agreement, and null categories.]

[LING 409 Structure of Italian (III)
Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 2001–2002; next offered 2002–2003. C. Rosen.
Survey of Italian syntax, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modals, clitics, reflexive constructions, agreement, impersonal constructions, causatives.]

[LING 410 History of the Italian Language (III)
Spring. 4 credits. Prerequisites: LING 321 and either ITAL 201, 203, or equivalent. Offered alternate years. Not offered 2001–2002; next offered 2002–2003. C. Rosen.
Overview of Italian and its dialects from the earliest texts to the present day. Emergence of the standard language. External history and sociolinguistic circumstances.]

LING 411 History of the Japanese Language (also ASIAN 411) @ (III)
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. J. Whitman.
An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

[LING 413 Topics in Historical Linguistics
Fall. 4 credits. Prerequisite: LING 314 or permission of instructor. Not offered 2001–2002. W. Harbert, C. Rosen.
Examines a selection of recent research illustrating a variety of productive and innovative approaches to problems in historical linguistics. Readings center on phonological and morphological evolution in the Romance and Germanic families. Students carry out guided research projects.]

LING 414 Second Language Acquisition I (also ASIAN 414) (III)
Spring. 4 credits. Prerequisite: permission of instructor. Y. Shirai.
A survey of the quantitative and qualitative research literature on the acquisition of second and additional languages among the adult population. Research carried out in both experimental and natural settings is considered. Topics include: learner errors and errors analysis; contrastive analysis hypothesis; developmental and variability patterns in the acquisition of syntax, phonology and morphology, including the potential effects of typological and formal universals; pragmatics and discourse; the lexicon, social and cognitive factors in acquisition, communication, and learning strategies; theories of second language acquisition.

[LING 415 Second Language Acquisition II (also ASIAN 417) (III)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002; next offered 2002–2003. Y. Shirai.
This course examines various issues in second language acquisition research that is particularly relevant to foreign language teaching and learning. Topics covered include: the role of input (listening/reading) vs. output (speaking/writing); implicit vs. explicit learning; negative vs. positive evidence (including the role of error correction); affective factors (motivation, anxiety); individual differences; teachability hypothesis and syllabus construction; the structure of second language proficiency.]

[LING 416 Structure of the Arabic Language (also NES 416) @ (III)
Not offered 2001–2002.
For description, see NES 416.]

[LING 417–418 History of the Russian Language (also RUSSA 401–402) (III)
417, fall; 418, spring. 4 credits each term. Prerequisites: for LING 417, permission of instructor; for LING 418, LING 417 or equivalent. Offered alternate years. Not offered 2001–2002; next offered 2003–2004. W. Browne.
Phonological, morphological, and syntactic developments from Old Russian to modern Russian.]

[LING 420 Approaches to Discourse (also ASIAN 419 and COM L 421) (III or IV)
Not offered 2001–2002.]

LING 421–422 Semantics I, II (III)
421, spring; 422, fall. 4 credits each term. Prerequisites: for LING 421, LING 203; for LING 422, LING 421 or permission of instructor. D. Abusch.
421: An introduction to semantics of natural language. The course starts from basic foundational questions concerning the nature of meaning and the empirical domain of semantic theory. Truth-conditional and logical theories and their application to the investigation of the structure of natural languages are extensively explored (with some comparisons with other approaches). Through the study of quantification, scope, anaphora, modalities, presuppositions, and the like, one tries to gain insight into general characteristics of the cognitive apparatus that is at the basis of our capacity for understanding sentences.

422: Guides students into current work in semantic theory. The first half of the course is an introduction to Montague-style semantics, whose influence on current research is quite extensive. The second half of the course focuses on selected topics that have grown out of (and sometimes against) classical Montague semantics. Such topics are usually drawn from the following: generalized quantifiers and anaphora, type-shifting, problems of tense and aspect, the linguistic relevance of algebraic approaches to properties, propositions, events and thematic roles, and discourse representation theory.

LING 424 Computational Linguistics (also COGST 424 and COM S 424) (III)
Spring. 4 credits. Prerequisite: LING 203 or permission of instructor; COM S 114 is also recommended. M. Rooth.
Steady progress in formalisms, algorithms, linguistic knowledge, and computer technology is bringing computational mastery of the syntax, morphology, and phonology of natural languages within reach. The course introduces methods for "doing a language" computationally, with an emphasis on approaches which combine linguistic knowledge with powerful computational formalisms. Topics: computational grammars, parsing, representation of syntactic analyses; finite state morphology; weighted grammars; feature constraint formalisms for syntax; treebank and other markup methodology; robust low-level syntax and semantics; and experimental-modeling methodology using large data samples.

[LING 425 Corpora and Applied Linguistics (also ASIAN 425) (III)
Not offered 2001–2002.]

[LING 427 Structure of Hungarian (III)
Fall. 4 credits. Prerequisite: LING 101 or equivalent. Offered alternate years. Not offered 2001–2002; next offered 2003–2004. W. Browne.
Survey of phonology, morphology, and syntax of this non-Indo-European language. Topics to be stressed include vowel harmony, consonant assimilation; definite and indefinite conjugations, possessives, verb prefixes, causatives; and focus, word order, clause types, movement, intonation.]

[LING 429 Structure of the Chinese Language (also ASIAN 429) (III)
Not offered 2001–2002.]

LING 430 Structure of Korean (also ASIAN 430) (III)
Spring. 4 credits. Offered alternate years. J. Whitman.
Intensive examination of the syntax and phonology of a non-Indo-European language with the objective of testing principles of current linguistic theory. No previous knowledge of Korean required.

[LING 431 Structure of an African Language (III)
Spring. 4 credits. Prerequisite: LING 101 or permission of the instructor. Offered alternate years. Not offered 2001–2002; next offered 2002–2003. C. Collins.
A survey of the grammar of an African language in light of current linguistic theory.]

LING 433 The Lesser-Known Romance Languages (also ROM S 433)
Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance language. C. Rosen.
The course surveys three or four Romance languages or dialects, examining their sound systems, grammars, and historical evolution from Latin. Includes some native speaker demonstrations. Readings represent both the modern languages and their earliest attested stages. Topics for fall 2001: Catalan, Romanian, a Northern Italian dialect, and a Rheto-Romance language.

LING 436 Language Development (also COGST 436, HD 436, and PSYCH 436) (III)
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 633/LING 700/PSYCH 600, a supplemental graduate seminar. Prerequisite: at least 1 course in developmental psychology, cognitive psychology, cognitive development, biology, neurobiology, or linguistics. B. Lust.
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/LING 450/PSYCH 437).

[LING 437 Celtic Linguistic Structures (III)
Spring. 4 credits. Prerequisite: LING 303. Not offered 2001–2002; next offered 2002–2003. W. Harbert.
This course treats selected topics in the syntax and morphosyntax of the modern Celtic languages.]

LING 441 Introduction to Germanic Linguistics (also GERST 441) (III)
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. W. Harbert.
Survey of major issues in historical Germanic linguistics.

[LING 443–444 Linguistic Structure of Russian (also RUSSA 403–404) (III)
443, fall; 444, spring. 4 credits each term. Prerequisites: for LING 443, LING 101 and permission of instructor; for LING 444, LING 443 or equivalent. Offered alternate years; next offered 2003–2004. W. Browne.
A synchronic analysis of the structure of modern Russian. LING 443 deals primarily with phonology and its relation to syntax and 444 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.]

LING 450 Lab Course: Language Development (also COGST 450 and PSYCH 437)
Spring. 2 credits. Prerequisite: COGST/HD/LING/PSYCH 436. B. Lust.
This laboratory course provides undergraduates with an introduction to hands-on research experience in the Cognitive Studies research labs and meets once a week in group format. It includes several structured modules dealing with topics covered in the survey course, COGST/HD/LING/PSYCH 436, Language Development. They include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis is placed on developing research methods in order to test hypotheses.

[LING 451 Greek Comparative Grammar (also CLASS 421) (III)
Fall. 4 credits. Prerequisite: thorough familiarity with classical Greek morphology. Not offered 2001–2002; next offered 2003–2004. A. Nussbaum.
The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.]

LING 452 Latin Comparative Grammar (also CLASS 422) (III)
Fall. 4 credits. Prerequisite: thorough familiarity with classical Latin morphology. A. Nussbaum.
The prehistory and evolution of the sounds and forms of classical Latin as reconstructed by comparison with the other Indo-European languages.

[LING 454 Italic Dialects (also CLASS 424) (III)
Fall. 4 credits. Prerequisite: thorough familiarity with classical Latin morphology. Not offered 2001–2002; next offered 2002–2003. A. Nussbaum.
The phonology and morphology of Faliscan, Oscan, and Umbrian studied through the reading of epigraphical texts. Attention to the relations of these languages to Latin and the question of proto-Italic.]

[LING 455 Greek Dialects (also CLASS 425) (III)
Fall. 4 credits. Prerequisite: basic familiarity with classical Greek morphology. Not offered 2001–2002; next offered 2003–2004. A. Nussbaum.
A survey of the dialects of ancient Greek through the reading and analysis of representative epigraphical and literary texts.]

LING 456 Archaic Latin (also CLASS 426) (III)
Spring. 4 credits. Prerequisite: reading knowledge of Latin. A. Nussbaum.
Reading of epigraphic and literary preclassical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy, the rudiments of Latin historical grammar, and aspects of the development of the literary language.

[LING 457 Homeric Philology (also CLASS 427) (III)
Spring. 4 credits. Prerequisite: ability to read Homeric Greek. Not offered 2001–2002; next offered 2002–2003. A. Nussbaum.
The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a Kunstsprache: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.]

[LING 459 Mycenaean Greek (also CLASS 429) (III)
4 credits. Prerequisite: thorough familiarity with classical Greek morphology. Not offered 2001–2002; next offered 2003–2004. A. Nussbaum.
An introduction to the epigraphy, language, and content of the Linear B tablets with special attention to their implications for Greek historical grammar and dialectology.]

[LING 460 Sanskrit Comparative Grammar (III or IV)
Spring. 4 credits. Prerequisite: reasonable familiarity with classical Sanskrit morphology. Not offered 2001–2002; next offered 2003–2004. A. Nussbaum.
A survey of the historical phonology and morphology of Sanskrit in relation to the Indo-Iranian and Indo-European comparative evidence.]

LING 474 Introduction to Natural Language Processing (also COGST 474 and COMS 474) (III)
For description, see COMS 474.

LING 493 Honors Thesis Research
Fall. 4 credits. Staff.
May be taken before or after LING 494, or may be taken independently.

LING 494 Honors Thesis Research
Spring. 4 credits. Staff.
May be taken as a continuation of, or before, LING 493.

[LING 601 Topics in Phonological Theory
Fall. 4 credits variable. Prerequisites: LING 301 and 1 higher-level course in phonology. Not offered 2001–2002. D. Zec.
Selected topics in current phonological theory.]

[LING 602 Topics in Morphology
Fall. 4 credits. Prerequisites: LING 301 or 303 or permission of instructor. Not offered 2001–2002. D. Zec.
Selected topics in current morphological theory.]

LING 604 Research Workshop
Fall. 2 credits. S-U grade only. Required of third-year linguistics graduate students. A. Cohn.
This course provides a forum for presentation and discussion of ongoing research, and development of professional skills. Participants must enroll in a concurrent independent study with a special committee member, or a relevant workshop.

[LING 606 Historical Syntax
Fall. 4 credits. Prerequisite: LING 303. Not offered 2001–2002. C. Rosen.
A course on change in language structure, beginning with an overview of widely attested types of syntactic change and proceeding to an introduction of current theoretical treatments. Topics covered include grammaticalization, word order change, and

the interplay between morphological and syntactic change. Assumes a basic background in syntax.]

[LING 608 Discourse Analysis (also COM L 618)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. H. Tao.
Linguistic theory applied to relationships beyond the sentence.]

[LING 609 SLA and the Asian Languages (also ASIAN 610)
Fall. 4 credits. Prerequisite: LING 414–415 or permission of instructor. Not offered 2001–2002. Y. Shirai.
This course surveys the literature on the acquisition of Asian languages both in first and second language. We mainly focus on Japanese, Korean, Chinese (Mandarin/Cantonese), but other languages (Thai, Malay, Vietnamese, Burmese, Tagalog, etc.) may be dealt with, depending on faculty/student interest.]

LING 616 Topics in Syntactic Theory
Fall. 4 credits variable. Prerequisite: LING 304 or permission of instructor. M. Diesing.
An examination of recent developments in syntactic theory, including "minimalist" approaches to phrase structure, derivations/representations and the nature of economy conditions, and parametric differences.

[LING 617–618 Hittite
617, fall; 618, spring. 4 credits each term. Prerequisites: for LING 617, permission of instructor; for LING 618, LING 617 or permission of instructor. Not offered 2001–2002. Staff.
An introduction to the cuneiform writing system and the grammar of Hittite, followed by the reading of selected texts.]

[LING 619 Rigveda
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. C. Minkowski.
Reading and linguistic analysis of selected Vedic hymns.]

LING 620 Comparative Grammar of Anatolian (also NES 623)
Spring. 4 credits. Prerequisite: LING 617. M. Weiss.
Introduction to the historical phonology and morphology of the Anatolian languages. Knowledge of Hittite and Luvian recommended but not required.

[LING 621 Avestan and Old Persian (also NES 621)
Fall. 4 credits. Prerequisite: a basic knowledge of Sanskrit forms and morphology syntax. Not offered 2001–2002. M. Weiss.
Linguistically-oriented readings of Old Persian and Avestan.]

[LING 623–624 Old Irish I, II
623, fall; 624, spring. 4 credits each term. Prerequisite for LING 624: LING 623 or permission of instructor. Not offered 2001–2002. Staff.
An introduction to "classical" Old Irish for students with no previous experience with the language.]

[LING 625 Middle Welsh
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. W. Harbert.
Students develop a reading knowledge of Middle Welsh through translating selections from prose and poetry. Emphasis is on the prose tales, including the Mabinogi. No familiarity with Welsh is assumed.]

[LING 627 Advanced Old Irish]

LING 629 Old Avestan (also NES 622)
Fall. 4 credits. Prerequisite: LING 621. M. Weiss.
Linguistically and philologically oriented reading of the Gathas of Zarathustra and the Yasna Haptanhaiti. Some knowledge of Sanskrit required.

[LING 631 Comparative Indo-European Linguistics
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. Staff.
An introduction to the comparative grammar of the Indo-European languages.]

LING 633 Language Acquisition Seminar (also COGST 633 and HD 633)
Fall. 1–4 credits. Prerequisite: LING 436 or equivalent or permission of instructor. B. Lust.
This seminar reviews and critiques current theoretical and experimental studies of first-language acquisition, with a concentration on insights gained by cross-linguistic study of this area. Attention is also given to the development of research proposals.

[LING 635–636 Indo-European Workshop
635, fall; 636, spring. 4 credits each term. Prerequisite: permission of instructor. Not offered 2001–2002. M. Weiss.
An assortment of subjects intended for students with previous training in Indo-European linguistics: problems in the reconstruction of Proto Indo-European, topics in the historical grammars of the various IE languages, reading and historical linguistic analysis of texts, and grammatical sketches of "minor" IE languages.]

[LING 643 Topics in Historical Germanic Phonology
Spring. 4 credits. Prerequisite: LING 441. Not offered 2001–2002. W. Harbert.
The development of the sound system from Proto-Germanic to its daughter languages.]

[LING 644 Topics in Historical Germanic Syntax
Fall. 4 credits. Prerequisite: LING 441. Not offered 2001–2002. W. Harbert.
A diachronic and comparative investigation of syntactic processes in the older Germanic languages.]

[LING 645 Gothic
Spring. 4 credits. Prerequisite: LING 101. Offered alternate years. Not offered 2001–2002. W. Harbert.
Linguistic structure of Gothic, with extensive readings of Gothic texts.]

[LING 646 Old High German, Old Saxon (also GERST 658)
Spring. 4 credits. Prerequisite: LING 101. Offered alternate years. Not offered 2001–2002. W. Harbert.
This course combines a survey of the linguistic history and structure of Old High German and Old Saxon with extensive readings from the major documents in which they are recorded. Reading knowledge of Modern German is highly recommended.]

[LING 648 Speech Synthesis by Rule
Spring. 4 credits. Prerequisite: LING 301, 319, or permission of instructor. Offered alternate years. Not offered 2001–2002; next offered 2002–2003. S. Hertz.
Investigates the nature of the acoustic structure of speech synthesis, using speech as a tool for exploring this structure. A particular acoustic model is proposed, developed, and motivated by considering the relationship between phonological and acoustic structure, speech timing, phonetic universals, coarticulation, and speech perception. The primary tool for investigation will be the Delta System, a powerful software system for investigating phonology and phonetics through speech synthesis. The course is meant for graduate students and advanced undergraduate students in linguistics, but may also be of interest to students in psychology/psycholinguistics, computer science, and cognitive studies.]

[LING 649 Structure of Old English
Spring. 4 credits. Prerequisite: LING 441. Offered alternate years. Not offered 2001–2002. W. Harbert.
Linguistic overview of Old English, with emphasis on phonology and syntax.]

[LING 653–654 Seminar in Southeast Asian Linguistics
653, fall; 654, spring. 4 credits each term. Prerequisite: LING 303 or permission of instructor. LING 653 is not a prerequisite for 654. Not offered 2001–2002. J. Wolff.
Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.]

[LING 655–656 Seminar in Austronesian Linguistics
655, fall; 656, spring. 4 credits each term. Prerequisites: for LING 655, LING 101 and permission of instructor; for LING 656, LING 655. Not offered 2001–2002. J. Wolff.
Descriptive and comparative studies of Malayo-Polynesian languages.]

[LING 659 Seminar in Vedic Philology (also ASIAN 659 and CLASS 659)
Not offered 2001–2002.
For description, see ASIAN 659.]

LING 661 Old Church Slavonic (also RUSSA 601)
Fall. 4 credits. Prerequisite: students must know a Slavic or Indo-European language. This course is prerequisite to LING 662 and LING 671. Offered alternate years. W. Browne.
Grammar and reading of basic texts.

LING 662 Old Russian Texts (also RUSSA 602)
Spring. 4 credits. Prerequisite: LING 661. Offered alternate years. W. Browne.
Grammatical analysis and close reading of Old Russian texts.

LING 671–[672] Comparative Slavic Linguistics (also RUSSA 651–652)
671, fall; [672, spring]. 4 credits each term. Prerequisites: for LING 672, LING 661 taken previously or simultaneously or permission of instructor. Offered alternate years. W. Browne.
Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.

LING 700 Seminar
Fall or spring, according to demand. Credit to be arranged.
Seminars are offered according to faculty interest and student demand. Topics in recent years have included subject and topic, Montague grammar, speech synthesis, lexicography, classical and autonomous phonology, Japanese sociolinguistics, relational grammar, semantics and semiotics, and others.

LING 701–702 Directed Research
701, fall; 702, spring. 1–4 credits. Hours to be arranged. Staff.

[LING 773–774 Proseminar In Cognitive Studies I, II (also COGST 773–774, COM S 773–774, PHIL 773–774, PSYCH 773–774)
Fall: R grade; spring: S-U only. 4 credits. Not offered 2001–2002. Staff.
This year-long seminar is intended to provide graduate students with an interdisciplinary introduction to the study of knowledge, its representation, acquisition, and use.]

MATHEMATICS

Bramble, R. Farrell, G. R. Livesay, L. E. Payne, A. Rosenberg, M. Sweedler)

Mathematics is the language of modern science; basic training in the discipline is essential for those who want to understand, as well as for those who want to take part in, the important scientific developments of our time. Acquaintance with mathematics is also extremely useful for students in the social sciences and valuable for anyone interested in the full range of human culture and the ways of knowing the universe in which we live.

The Department of Mathematics faculty has strong groups specializing in algebra, number theory, combinatorics, real and complex analysis, Lie groups, topology and geometry, logic, probability and statistics, mathematical physics, and applied mathematics. Related departments at Cornell have specialists in computer science, operations research, linear programming, and game theory, and courses in these topics can be integrated readily into the mathematics major.

The department offers a rich variety of undergraduate courses, and many of its beginning graduate courses are suitable for advanced undergraduates as well. Under some conditions, a student may carry out an independent reading and research project for college credit under the supervision of a faculty member.

Members of the department are available to discuss with students the appropriate course for their levels of ability and interest, and students are urged to avail themselves of this help.

Students who want to take any of the courses numbered 300 or above are invited to confer, before registering, with the instructor concerned. The level of a course is indicated by the first digit of the course number: roughly, 1, 2, indicate underclass courses; 3, 4, upperclass courses; 5, professional level and mathematics education courses; 6, 7, graduate courses. The subject matter of courses is often indicated by the second digit: 0, general; 1, 2, analysis; 3, 4, algebra and combinatorics; 5, 6, topology and geometry; 7, probability and statistics; 8, logic; 9, other.

Midterm grades, when required, will be S or U only, except in special circumstances. In courses with numbers below 700, students will receive letter grades, with the exception of nonmathematics majors who have requested an S-U grade.

Advanced Placement

Secondary school students are strongly urged to take one of the two advanced placement examinations of the College Entrance Examination Board in their senior year. Freshmen who have had some calculus but who have not taken an advanced placement examination should take the placement examination in mathematics offered at Cornell just before the beginning of classes in the fall. It is most important that anyone with any knowledge of calculus carefully read "Advanced Placement," p. 6, 7.

The Major

The mathematics major adapts to a number of purposes. It can emphasize the theoretical or the applied. It can be appropriate for professionals and nonprofessionals alike, and can be broad or narrow. It can also be combined easily with serious study in another subject in the physical, biological, or social sciences by means of a double major and/or concentration. For example, a double major in mathematics and computer science is facilitated by the concentration in computer science (requirement 4, option b) described below. This concentration permits a student to use certain computer science courses to satisfy the requirements of both majors. Questions concerning the major should be brought to a departmental representative.

Prerequisites

The traditional prerequisites are MATH 221–222, 223–224, or 293–294. A unit on infinite series is required. Such a unit is offered in MATH 112, 122 and 192. Normally students will be admitted to the major only when they have grades of B– or better in all 200-level mathematics courses taken. Alternative prerequisites are MATH 213 and 231, normally with grades of B+ or better.

Requirements

There are five requirements for the major:

1. COM S 100. Students are urged to take this course before the end of their sophomore year.
2. Two courses in algebra. Eligible courses are MATH 336 or 436, 431 or 433, 332 or 432 or 434.
3. Two courses in analysis. Eligible courses are MATH 311, 321, 411 or 413, 414, 418, 420, 422, 423, 424, 425, 427, 428. (MATH 411 has been discontinued and replaced by MATH 311. Students may not receive credit for MATH 311 if they have received credit for MATH 411. MATH 423 will not be offered again.)
4. Further high-level mathematical courses. Any one of (a), (b), (c), (d), (e) below is sufficient. The five alternatives below do not exhaust the possibilities. A mathematics major interested in a concentration in a subject different from those below may develop a suitable individual program in consultation with his/her major adviser.

   (a) Four additional Mathematics courses numbered 300 or above

   (b) **Concentration in Computer Science:** Five additional courses from (i) and (ii) below, of which at least one is from (i) and three are from (ii)

      (i) Mathematics courses numbered 300 or above

      (ii) Computer Science courses numbered 300 or above

   (c) **Concentration in Operations Research:** Five additional courses from (iii) and (iv) below, of which at least one is from (iii) and three are from (iv)

      (iii) Mathematics courses numbered 300 or above

      (iv) Courses in Operations Research and Industrial Engineering in which the primary focus involves mathematical techniques. Undergraduate courses include OR&IE 320–462 excluding OR&IE 350, 414, and 416. Many Operations Research graduate courses are also allowed. Students should consult with their advisers.

   (d) **Concentration in Economics:** Five additional courses from (v), (vi), and (vii) below, as follows: one course from (v), three courses from (vi), and a fifth course from any of (v), (vi), or (vii). However, Mathematics 472 and Economics 319 cannot **both** be used to satisfy these requirements.

      (v) Mathematics courses numbered 300 or above

      (vi) Economics courses with significant mathematical content. Eligible courses are ECON 318, 319, 320, 416, 419, 450 (also ARME 450), 467, 609, 610, 613, 614, 619, 620, 717, 756.

      (vii) Courses in Operations Research with significant mathematical content and dealing with material of interest in economics; e.g., OR&IE 320, 321, 432, 435, and the sequence 475–476. However, the student may, with the adviser's approval, select an OR&IE course that satisfies the basic

intent of the requirement but is not in this list.

(e) **Concentration in Mathematical Physics:** Five additional courses from (viii) and (ix) below, of which at least one is from (viii) and three are from (ix).

(viii) Mathematics courses at the highest undergraduate level in analysis, geometry, algebra and combinatorics, probability and statistics, and mathematical logic. Eligible courses are MATH 401, 411 or 413, 414, 420, 418 or 422, 423, 424, 425, 427, 428, 431 or 433, 432 or 434, 436, 441, 442, 451, 452, 453, 454, 455, 471, 472, 474, 481, 482, 483, 486. (MATH 411 and 423 will not be offered again.)

(ix) Physics courses that make significant use of advanced mathematics. Eligible courses are PHYS 316, 317, 318, 327, 341, 443, 444, 454, 455, 480.

5. One course dealing with mathematical models. Any course from outside mathematics with serious mathematical content and dealing with scientific matters. *This course cannot be used to satisfy any of the other requirements for the major.* Serious mathematical content includes, but is not limited to, extensive use of calculus or linear algebra. Even if the Physics concentration has been selected, PHYS 116, 208, 213, or 217 may be used to satisfy the modeling requirement, but no other 100-level Physics course, nor PHYS 207 or 209 may be used. COM S 211 satisfies the modeling requirement provided the Computer Science concentration has **not** been selected. Any course from another department that would satisfy one of the concentrations requirements may be used to fulfill the modeling requirement, provided the course is not also used to fulfill the concentration requirement. Some courses in biology, chemistry and other fields can fulfill the modeling requirement. Students should consult with their advisers.

A course may be counted toward the mathematics major only if a grade of C– or better is received for that course.

Major advisers can alter these requirements upon request from an advisee, provided the intent of the requirements is met.

Honors Program

The Department of Mathematics awards honors (cum laude) and high honors (magna cum laude and summa cum laude) to graduating mathematics majors who have demonstrated outstanding ability in the major program.

The awards are determined by the Mathematics Major Committee in the latter part of the semester prior to graduation. Normally, one requirement for honors is participation in the Honors Seminar (Math 401) for one semester, or independent study at a high performance level. The committee will also be looking for excellent performance in mathematics courses, particularly in challenging courses at the 400 level or beyond. Students interested in honors should consult their major advisers concerning suitable courses.

To be considered for high honors, a student usually will be expected to write a Senior Thesis and present it orally. This project is carried out during the senior year under the supervision of a member of the Mathematics Department faculty. Students interested in high honors should consult their major advisers and the chair of the department's Mathematics Major Committee during the second semester of their junior year.

Teacher Education in Mathematics

Students at Cornell may pursue teaching credentials in biology, chemistry, earth science, general science, mathematics, and physics. TEAMS (Teacher Education in Agriculture, Mathematics, and Science) is a university program jointly conducted by the departments of Education and Mathematics. Most TEAMS students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates. Students completing the graduate program will earn the master's degree required for permanent certification in New York and most other states.

Mathematics students in TEAMS must complete all the requirements for a mathematics major (or its equivalent) including MATH 403, 408, 451, 507, and a probability/statistics course. There are a number of education courses required including EDUC 402, 403, 601, 602, 644 plus 2–3 additional courses. Some of the required courses will be taken in the graduate fifth year.

For more information, contact the TEAMS Student Support Specialist at 255–9255 or Avery Solomon (Mathematics, aps5@cornell.edu), or David Henderson (Mathematics, dwh2@cornell.edu).

Studying Mathematics Outside the Major

The College of Arts and Sciences and the Department of Mathematics offer no minor in mathematics; however, some other scientific departments in the college offer, within their own majors, concentrations in mathematics and mathematics-related fields. A student interested in such a concentration should consult the Director of Undergraduate Studies of his/her major department.

The Engineering College offers a minor in applied mathematics that is open to any undergraduate in that college. The minor is sponsored jointly by the Department of Mathematics and the Department of Theoretical and Applied Mechanics, and is administered by the latter department. Engineering students interested in this minor should contact Professor Richard Rand of the Department of Theoretical and Applied Mechanics (255–7145; rhr2@cornell.edu). Information about the minor is also available at www.math.cornell.edu.

The Mathematics Department welcomes into its upper-level courses students from all colleges, schools, and departments at Cornell. In particular, undergraduates who wish to pursue serious study of mathematics, whether within or to complement their own major fields, are encouraged to consult with the department. The department's Director of Undergraduate Studies and other faculty can provide assistance in selecting appropriate areas of study and individual courses.

Distribution Requirement

The mathematics courses that can be used to satisfy the Group II (Quantitative and Formal Reasoning) part of the Arts College distribution requirements are indicated by the symbol "(II)" next to the title of the course.

Basic Sequences

Precalculus

Description	*Courses*
1) Algebra and trigonometry to prepare students for calculus	MATH 109* or EDUC 005*
2) Algebra, analytic geometry, elements of calculus	EDUC 115**

*MATH 109 and EDUC 005 do not carry credit for graduation.

**Students who want a second semester of mathematics after EDUC 115 may take MATH 105 or, if they need more calculus, MATH 106 or 111.

Calculus

Description	*Mathematics Courses*
1) Standard three-semester sequence for students who do not expect to take advanced courses in mathematics	111–112–213
2) Calculus for engineers (also taken by some physical science majors)	190/191–192–293–294

3) Prospective mathematics majors and others who expect to take advanced courses in mathematics: many sequences are possible. For example, 111–112–221–222; or 121–122–221–222; or 121–122–223–224; or the engineering sequence 190/191–192–293–294; or a mix of the above. There is no specifically "approved" basic sequence for mathematics majors. Students should consult with their advisers for each individual case.

MATH 190 or 191 may be substituted for 111 in sequences 1 and 3. Sequences 2 and 3 are two-year sequences that include some linear algebra.

Students who take sequence 1 may learn some linear algebra by taking Mathematics 231. A student whose performance in 112 is excellent may switch to sequence 3 and take 221.

Special-Purpose Sequences

Description	*Mathematics Courses*
1) Finite mathematics and calculus for life and social science majors	105–106
2) Other possible finite mathematics and calculus sequence	105–111
3) Calculus and statistics sequences	106–171 111–171

Students who want to take two semesters of calculus are advised to take the first two

semesters of one of the three calculus sequences. Students with excellent performance in MATH 106 may follow that course with MATH 112 or 122. The courses in each of the calculus and statistics sequences may be taken in either order, since no calculus background is required for MATH 171. Each of the sequences listed here satisfies the mathematics requirement for most medical schools.

Switching between calculus sequences is often difficult, especially at the 200 level. Students should not attempt such a switch without consulting the Director of Undergraduate Studies.

Courses with Overlapping Content

Because the department offers many courses with overlapping content, students must choose their courses carefully to ensure that they will receive credit for each course they take. Listed below are groups of courses with similar content. Students will receive credit for only one of the courses in each group.

106, 111, 121, 190, 191
112, 122, 192
213, 222, 224, 293
221, 223, 231, 294
311 and 411
332 and 432
336 and 436
411 and 413
431 and 433
432 and 434

Fees

In some courses there may be a small fee for computer lab use or for photocopying materials to be handed out to students.

Summer Courses

A list of mathematics courses usually offered every summer can be found in the School of Continuing Education and Summer Sessions section of this catalog. Students interested in taking summer courses in mathematics should consult the Mathematics Department (255–4013). A tentative summer listing may be available as early as October.

Undergraduate Course Offerings

Please visit www.math.cornell.edu for further information and up-to-the-minute corrections.

Foundation courses: 105, 106, 109, 111, 112, 121, 122, 190, 191, 192, 213, 221, 222, 223, 224, 231, 293, 294

Mathematics Education: 408, 451

History of Mathematics: 403

General and Liberal Arts Courses: 103, 171, 401, 402, 408

Analysis: 311, 411, 413, 414, 418

Algebra and Number Theory: 332, 336, 431, 432, 433, 434, 436

Combinatorics: 441, 442

Geometry and Topology: 356, 451, 452, 453, 454, 455

Probability and Statistics: 171, 471, 472

Mathematical Logic: 281, 384, 481, 482, 483, 486

Applied Analysis and Differential Equations: 321, 420, 422, 423, 424, 425, 427, 428

MATH 103 Mathematical Explorations (II)
Fall, spring. 3 credits. This course may be used to satisfy the distribution requirement in mathematics.
This course is for students who wish to experience how mathematical ideas naturally evolve. The homework consists of the students actively investigating mathematical ideas. The course emphasizes ideas and imagination as opposed to techniques and calculations. Topics vary depending on the instructor and are announced (www.math.cornell.edu) several weeks before the semester begins. Some assessment is done through writing assignments.

MATH 105 Finite Mathematics for the Life and Social Sciences (II)
Fall. 3 credits. Prerequisite: 3 years of high school mathematics, including trigonometry and logarithms.
Course topics include: mathematical modeling, sets, functions, and graphing; transformations to linearize data (including use of log and semi-log paper); probability (with some applications to genetics); and matrices, systems of linear equations, and Markov chains. Examples from biology and the social sciences are used.

MATH 106 Calculus for the Life and Social Sciences (II)
Spring. 3 credits. Prerequisite: readiness for calculus, such as can be obtained from 3 years of high school mathematics (including trigonometry and logarithms) or any of the following Cornell courses: MATH 105, MATH 109, or EDUC 115. MATH 111, rather than 106, is recommended for those planning to take 112.*
Course serves as an introduction to differential and integral calculus, partial derivatives, elementary differential equations. Examples from biology and the social sciences are used.

MATH 109 Precalculus Mathematics
Summer. 3 transcript credits only; cannot be used toward graduation.
This course is designed to prepare students for MATH 111. Algebra, trigonometry, logarithms, and exponentials are reviewed.

MATH 111–112 Calculus
Calculus is the study of functions and processes from the point of view of how they are changing. What can we know of a function from the rate at which it changes? What is the cumulative effect of infinitely many infinitesimal changes? MATH 111 and 112 aim to provide, to students with little or no prior exposure to calculus, the knowledge that calculus is *useful,* in that its applications to the physical, biological, and social sciences have shaped our world, and *beautiful,* in that it represents a breathtaking attempt of the human mind to capture the infinitely large and the infinitely small. These courses seek to provide basic understanding, technical skills, and sample applications in various fields for the very broad range of students who take them. Topics are studied (as appropriate) by analytic, numerical, and graphical methods. These courses sometimes offer one or more sections with small-group projects. (See the Supplement to the Course and Room Roster.)

*See the list of courses with overlapping content at the end of the introduction.

MATH 111 Calculus (II)
Fall, spring. 4 credits. Prerequisite: MATH 109 or 3 years of high school mathematics, including trigonometry and logarithms.*
Course topics include: functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic, and exponential functions; applications of differentiation, including graphing, max-min problems, tangent line approximation, implicit differentiation, and applications to the sciences; the mean value theorem; and antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus, substitution in integration, the area under a curve. Graphing calculators are used, and their pitfalls are discussed, as applicable to the above topics.

MATH 111 can serve as a one-semester introduction to calculus or as part of a two-semester sequence in which it is followed by MATH 112 or 122.

MATH 112 Calculus (II)
Fall, spring. 4 credits. Prerequisite: MATH 111 with a grade of C or better or excellent performance in MATH 106. Those who do well in MATH 111 and expect to major in mathematics or a strongly mathematics-related field should take 122 instead of 112.*
Course focus is on integration: applications, including volumes and arc length; techniques of integration, approximate integration with error estimates, improper integrals, differential equations (separation of variables, initial conditions, systems, some applications). Also covered are infinite sequences and series: definition and tests for convergence, power series, Taylor series with remainder, and parametric equations.

MATH 121 Honors Calculus (II)
Fall. 4 credits. Prerequisite: 3 years of high school mathematics with average grade of A- or better, or permission of the department.*
This is a first-semester course in calculus intended for students who have been quite successful in their previous mathematics courses. The syllabus for the course is quite similar to that of MATH 111; however, the approach is more theoretical and the material is covered in greater depth.

MATH 122 Honors Calculus (II)
Fall, spring. 4 credits. Prerequisite: 1 semester of calculus with a high performance or permission of the department. Students planning to continue with MATH 213 are advised to take 112 instead of this course.*
Topics covered include: differentiation and integration of elementary transcendental functions, techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems. The approach is more theoretical than in MATH 112.

MATH 171 Statistical Theory and Application in the Real World (II)
Fall, spring. 4 credits. Prerequisite: high school mathematics.
This introductory statistics course discusses techniques for analyzing data occurring in the real world and the mathematical and philosophical justification for these tech-

*See the list of courses with overlapping content at the end of the introduction.

niques. Topics include: population and sample distributions, central limit theorem, statistical theories of point estimation, confidence intervals, testing hypotheses, the linear model, and the least squares estimator. The course concludes with a discussion of tests and estimates for regression and analysis of variance (if time permits). The computer is used to demonstrate some aspects of the theory, such as sampling distributions and the Central Limit Theorem. In the lab portion of the course, students learn and use computer-based methods for implementing the statistical methodology presented in the lectures. (No previous familiarity with computers is presumed.)

MATH 190 Calculus for Engineers (II)
Fall. 4 credits. Prerequisite: 3 years of high school mathematics, including trigonometry and logarithms.*
Course topics include: plane analytic geometry, differential and integral calculus, and applications. This course is restricted to engineering students who have had no previous successful experience with calculus. Students who have had such experience but wish a first-semester calculus course should take MATH 191.

MATH 191 Calculus for Engineers (II)
Fall, spring. 4 credits. Prerequisite: 3 years of high school mathematics including trigonometry and logarithms, plus some knowledge of calculus.*
Course topics include: plane analytic geometry, differential and integral calculus, and applications. MATH 191 covers essentially the same topics as 190, but is designed for students with some previous successful experience with calculus.

MATH 192 Calculus for Engineers (II)
Fall, spring. 4 credits. Prerequisite: MATH 190 or 191.*
Course topics include: polar coordinates, infinite series, and power series. Also covered are: vectors and calculus of functions of several variables through double and triple integrals.

MATH 213 Calculus (II)
Fall, spring. 4 credits. Prerequisite: MATH 112, 122, or 192.*
Course topics include: vectors and vector-valued functions; multivariable and vector calculus including multiple and line integrals; first- and second-order differential equations with applications; systems of differential equations; and elementary partial differential equations. This course is designed for students who wish to master the basic techniques of calculus, but whose major will not require a substantial amount of mathematics. The course may emphasize different topics in the syllabus in different semesters.

MATH 221 Linear Algebra and Calculus (II)
Fall, spring. 4 credits. Prerequisite: 2 semesters of calculus with high performance or permission of the department.*
Course covers linear algebra and differential equations. Topics include: vector algebra, linear transformations, matrices, and linear differential equations, as well as an introduction to proving theorems. This course is especially recommended for students who plan to major in mathematics or in a strongly related field.

*See the list of courses with overlapping content at the end of the introduction.

MATH 222 Calculus (II)
Fall, spring. 4 credits. Prerequisite: MATH 221.*
Course topics include: multivariable and vector differential and integral calculus, including multiple, line, and surface integrals. This course is especially recommended for students who plan to major in mathematics or in a strongly related field.

MATH 223 Honors Linear Algebra and Calculus (II)
Fall. 4 credits. Prerequisite: 2 semesters of calculus with a grade of A– or better, or permission of instructor.*
Course topics include: vectors, matrices, and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems; quadratic forms, extrema, and manifolds; multiple and iterated integrals. MATH 223–224 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses.

MATH 224 Honors Linear Algebra and Calculus (II)
Spring. 4 credits. Prerequisite: MATH 223.*
Course topics include: vector fields; line integrals; differential forms and exterior derivative; work, flux, and density forms; integration of forms over parametrized domains; and Green's, Stoke's, and divergence theorems.

MATH 231 Linear Algebra (II)
Spring. 3 credits. Prerequisite: MATH 111 or equivalent.*
Course topics include: vectors, matrices, and linear transformations, affine and Euclidean spaces, transformation of matrices, and eigenvalues.

MATH 281 Deductive Logic (also PHIL 331) (II)
Fall. 4 credits.
For description, see PHIL 331.

MATH 293 Engineering Mathematics (II)
Fall, spring. 4 credits. Prerequisite: MATH 192.*
Course topics include: vector fields and vector calculus; complex numbers; introduction to ordinary and partial differential equations; and Fourier series and boundary value problems. May include computer use in problem solving.

MATH 294 Engineering Mathematics (II)
Fall, spring. 4 credits. Prerequisite: MATH 192.*
Course topics include: matrix theory and linear algebra, inner product spaces; and systems of linear ordinary differential equations. May include computer use in solving problems.

MATH 311 Introduction to Analysis (II)
Spring. 4 credits. Prerequisites: MATH 221–222 or 293–294.
Provides a transition from calculus to real analysis. Topics include: rigorous treatment of fundamental concepts in calculus: including limits and convergence of sequences and series, compact sets; continuity, uniform continuity and differentiability of functions. Emphasis will be placed upon understanding and constructing mathematical proofs.

*See the list of courses with overlapping content at the end of the introduction.

MATH 321 Manifolds and Differential Forms (II)
Fall. 4 credits. Prerequisites: multivariable calculus and linear algebra as taught in MATH 221–222 or 293–294.
Topics for this course include: differential forms, exterior derivative, implicit function theorem, manifolds, orientation, boundaries, integration of forms, generalized Stokes' theorem, Hodge star operator, Laplace operator, basics of de Rham cohomology. We reexamine the integral theorems of vector calculus (Green, Gauss, and Stokes) in the light of the exterior differential calculus and apply differential forms to problems in partial differential equations, fluid mechanics and electromagnetism.

MATH 332 Algebra and Number Theory (II)
Fall. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.*
Course covers various topics from number theory and modern algebra, usually including most of the following: Primes and factorization, Diophantine equations, congruences, quadratic reciprocity, continued fractions, rings and fields, finite groups, and an introduction to the arithmetic of the Gaussian integers and quadratic fields. Motivation and examples for the concepts of abstract algebra are derived primarily from number theory and geometry.

MATH 336 Applicable Algebra (II)
Spring. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.*
An introduction to the concepts and methods of abstract algebra and number theory that are of interest in applications. Covers: basic theory of groups, rings and fields and their applications to such areas as public-key cryptography, error-correcting codes, parallel computing, and experimental designs. Also covers: elementary number theory, Euclidean algorithm, prime factorization, congruences, theorems of Fermat and Euler, elementary group theory, Chinese remainder theorem, factorization in the ring of polynomials, and classification of finite fields. Applications include the RSA cryptosystem and use of finite fields to construct error-correcting codes and Latin squares.

MATH 356 Groups and Geometry (II)
Spring. 4 credits. Prerequisite: MATH 221, 223, 231 or 294.
Groups were introduced in the nineteenth century as the set of symmetries of an algebraic or geometric object, and this viewpoint is a central one in modern Mathematics. This course studies the geometry of the planes and of patterns in the plane in terms of the group of symmetries ("isometries") of the plane. Prior knowledge of groups is not a prerequisite. One aim is to give students experience in modern algebra and geometry (including the geometry of complex numbers) and a sense of the unity of mathematics before they take the 400-level courses Special care is given to initiate the student into the writing of proofs and the language of mathematics. Topics include: symmetries; groups of transformations; subgroups and cosets; homomorphisms and isomorphisms; orbits and fixed points; Frieze groups, wallpaper groups ("2-dimensional crystallographic groups"); and the associated tesselations of the Euclidean plane.

*See the list of courses with overlapping content at the end of the introduction.

MATH 384 Foundations of Mathematics (also PHIL 434) (II)
Fall. 4 credits. Prerequisite: 1 course in logic or permission of instructor.
For description, see PHIL 434.

MATH 401 Honors Seminar: Topics in Modern Mathematics (II)
Spring. 4 credits. Prerequisite: 2 courses in mathematics numbered 300 or higher or permission of instructor.
This course is a participatory seminar primarily aimed at introducing senior and junior mathematics majors to some of the challenging problems and areas of modern mathematics. The seminar helps students develop research and expository skills in mathematics, which is important for careers in any field that makes significant use of the mathematical sciences (i.e., pure or applied mathematics, physical or biological sciences, business and industry, medicine). The content varies from year to year.

MATH 402 Smorgasbord Seminar
Fall. 1 credit. Prerequisite: 2 courses in mathematics numbered 300 or higher. S-U only. Recommended for mathematics majors. A student may only receive credit for this course once.
A lecture series by members of the Mathematics Department about current research topics, to give students a little taste of many different areas in mathematics. This course is valuable for students looking for a topic for a senior thesis and for students thinking about graduate work in the mathematical sciences.

MATH 403 History of Mathematics # (II)
Spring. 4 credits. Prerequisite: 2 courses in mathematics above 300, or permission of instructor.
Survey of the development of mathematics from antiquity to the present, with an emphasis on the achievements, problems, and mathematical viewpoints of each historical period and the evolution of such basic concepts as number, geometry, construction, and proof. Readings from original sources in translation. Students are required to give oral and written reports.

[MATH 408 Mathematics in Perspective (II)
Spring. 4 credits. Prerequisite: consent of instructor. Not offered 2001–2002.
The purpose of this course is for students to step back and form an overview of the mathematics they have learned. The course is intended for junior and senior mathematics majors and other undergraduates with strong backgrounds in mathematics.]

[MATH 411 Introduction to Analysis (II)
4 credits. Prerequisite: MATH 221–222, 223–224 or 293–294. Students who need measure theory and Lebesgue integration for advanced probability courses should take MATH 413–414 or audit the first few weeks of MATH 621. Undergraduates who plan to attend graduate school in mathematics should take 413–414.* Will not be offered again.
An introduction to the theory of functions of real variables, stressing concepts and a logical development of the subject rather than applications. Topics include: Euclidean spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, and the Riemann integral. Students who wish to continue study of theoretical analysis upon completion of MATH 411 may take, for example, MATH 418.]

MATH 413–414 Honors Introduction to Analysis (II)
413, fall; 414, spring. 4 credits each. Prerequisite for 413: a high level of performance in MATH 221–222, 223–224 or 293–294. Prerequisite for MATH 414: MATH 413.*
This sequence, designed for honors students, provides an introduction to the theory of functions of real variables, stressing a rigorous logical development of the subject rather than applications. Topics include: metric spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, Fourier series, Riemann and Lebesgue integrals, calculus in several variables, and differential forms.

MATH 418 Introduction to the Theory of Functions of One Complex Variable (II)
Spring. 4 credits. Prerequisite: MATH 223–224, 311, 411 or 413 or permission of instructor.
A theoretical and rigorous introduction to complex variable theory. Topics include: complex numbers, differential and integral calculus for functions of a complex variable including Cauchy's theorem and the calculus of residues, elements of conformal mapping. Students interested in the applications of complex analysis should consider MATH 422.

MATH 420 Differential Equations and Dynamical Systems (II)
Fall, spring. 4 credits. Prerequisite: high level of performance in MATH 293–294, 221–222, 223–224, or permission of instructor.
Course covers ordinary differential equations in one and higher dimensions: qualitative, analytic, and numerical methods. Emphasis is on differential equations as models and the implications of the theory for the behavior of the system being modeled and includes an introduction to bifurcations.

MATH 422 Applied Complex Analysis (II)
Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, 293–294, or 213 and 231.
Course covers complex variables, Fourier transforms, Laplace transforms and applications to partial differential equations. Additional topics may include an introduction to generalized functions.

[MATH 423 Applicable Analysis III (II)
4 credits. Will not be offered again.]

MATH 424 Wavelets and Fourier Series (II)
Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, 293–294, or permission of instructor.
Both Fourier series and wavelets provide methods to represent or approximate general functions in terms of simple building blocks. Such representations have important consequences, both for pure mathematics and for applications. Fourier series use *natural* sinusoidal building blocks and may be used to help solve differential equations. Wavelets use *artificial* building blocks that have the advantage of localization in space. A full understanding of both topics requires a background involving Lebesgue integration theory and functional analysis. This course presents as much as possible on both topics without such formidable prerequisites. The emphasis is on clear statements of results and key ideas of proofs, working out examples, and applications. Related topics that may be included in the course: Fourier transforms, Heisenberg uncertainty principle, Shannon sampling theorem, and Poisson summation formula.

[MATH 425 Numerical Solutions of Differential Equations (II)
Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, or 293–294 and one course numbered 300 or higher in mathematics, or permission of instructor. Generally offered every two years. Not offered 2001–2002.
Course covers methods and basic theory for the numerical solution of ordinary and partial differential equations. Topics include: linear multistep methods, Runge-Kutta methods, and the problem of stiffness for ordinary differential equations. Also covers: finite difference methods and Galerkin finite element methods for partial differential equations. Homework involves use of a computer.]

MATH 427 Introduction to Ordinary Differential Equations (II)
Spring. 4 credits. Prerequisite: MATH 221–222, 223–224, or 293–294 or permission of instructor.
Covers the basic existence, uniqueness, and stability theory together with methods of solution and methods of approximation. Topics include: singular points, series solutions, Sturm-Liouville theory, transform methods, approximation methods, and application to physical problems.

MATH 428 Introduction to Partial Differential Equations (II)
Fall. 4 credits. Prerequisite: MATH 221–222, 223–224, or 293–294 or permission of instructor.
Topics selected from first-order quasilinear equations, classification of second-order equations, with emphasis on maximum principles, existence, uniqueness, stability, Fourier series methods, approximation methods.

MATH 431–432 Introduction to Algebra (II)
431, fall; 432, spring. 4 credits each. Prerequisite: MATH 221, 223, 231, or 294. Prerequisite for MATH 432: MATH 431 or 433, or permission of instructor. Undergraduates who plan to attend graduate school in mathematics should take 433–434.*
431: An introduction to linear algebra, including: the study of vector spaces, linear transformations, matrices, and systems of linear equations; quadratic forms and inner product spaces; canonical forms for various classes of matrices and linear transformations; and determinants. 432: An introduction to various topics in abstract algebra, including: groups, rings, fields, factorization of polynomials and integers, congruences, and the structure of finitely generated modules over Euclidean domains with application to canonical forms of matrices.

*See the list of courses with overlapping content at the end of the introduction.

MATH 433–434 Honors Introduction to Algebra (II)
433, fall; 434, spring. 4 credits each. Prerequisite: a high level of performance in MATH 221, 223, 231, or 294. Prerequisite for MATH 434: MATH 433 or permission of instructor.*
Honors version of MATH 431–432. MATH 433–434 is more theoretical and rigorous than 431–432 and includes additional material such as multilinear and exterior algebra.

[MATH 436 Applications of Abstract Algebra (II)
Spring. 4 credits. Prerequisites: Linear algebra (MATH 221, 223, 231, or 294 or higher). Familiarity with elementary algebra or number theory such as MATH 332 would also be helpful.* Not offered 2001–2002.
The course is intended for students who would like to learn modern algebra and its applications outside of mathematics. There is at least as much emphasis on applications as the relevant modern algebra. Frequently the applications involve or were made possible by the advent of computers. Students who already know the modern algebra covered in the course may still find the applications of interest. Specific topics are chosen by the instructor. The algebra typically includes items drawn from: elementary number theory, polynomials and ring theory, monoids and group theory, real closed fields, algebraic combinatorics, Groebner bases, algebraic geometry, and field theory. The applications and related topics typically include items drawn from: complexity theory, coding theory, encryption, discrete and fast Fourier transform, primality testing, factoring integers and polynomials, root counting and isolation, solving systems of polynomial equations, formal language theory, and automata.

MATH 336 and 436 may overlap in choice of material. Where they overlap, the coverage in MATH 436 is of greater depth appropriate to a 400-level course. Students cannot get credit for both MATH 336 and MATH 436.]

MATH 441 Introduction to Combinatorics (II)
Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Generally offered every two years.
Course covers enumerative combinatorics: permutation enumeration, Stirling and Bell numbers, generating functions, exponential formula, Lagrange inversion, recurrences, basic asymptotic methods, rational generating functions. Also covers basic graph theory: trees and Cayley's theorem, chromatic polynomial, eigenvalues and their application. Also considers matching theory: equivalences, marriage theorem, flow problems, totally unimodular matrices. Also considers Polya theory: action of a group on a set, Burnside lemma, DeBruijn's method, applications to graphical enumeration and algorithms.

[MATH 442 Introduction to Combinatorics (II)
Spring. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. Generally offered every two years. Not offered 2001–2002.
Course topics include: Sieves and Mobius Inversion: inclusion/exclusion and its application to enumeration and number theory; partially ordered sets, abstract Mobius inversion, rudiments of lattice theory; matroids and combinatorial geometry: rank function, circuits, bases, application to graph theory and geometry; combinatorial design: Fisher's inequality, Latin squares, Hadamard matrices, Wilson's theorem on t-designs, application to statistical design; nonconstructive methods: Ramsey's theorem, Lovasz's local lemma, random graphs, application to coding theory; and extremal set theory: Sperner's lemma, Kruskal-Katona and Erdös-Ko-Rado theorems.]

MATH 451 Euclidean and Spherical Geometry (II)
Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor.
Covers topics from Euclidean and spherical (non-Euclidean) geometry. A nonlecture, seminar-style course organized around student participation.

MATH 452 Classical Geometries (II)
Spring. 4 credits. Prerequisite: MATH 221, 223, 231, or 294, or permission of instructor.
This is an introduction to hyperbolic, spherical, and projective geometry—the classical geometries that developed as Euclidean geometry was better understood. For example, the historical problem of the independence of Euclid's fifth postulate is understood when the existence of the hyperbolic plane is realized. Straightedge (and compass) constructions and stereographic projection in Euclidean geometry can be understood within the structure of projective geometry. Topics in hyperbolic geometry include: models of the hyperbolic plane and relations to spherical geometry. Topics in projective geometry include: homogeneous coordinates and the classical theorems about conics and configurations of points and lines. Optional topics include: principles of perspective drawing, finite projective planes, orthogonal Latin squares, and the cross ratio.

MATH 453 Introduction to Topology (II)
Fall. 4 credits. Prerequisite: MATH 411 or 413, or permission of instructor.
Course covers basic point set topology, connectedness, compactness, metric spaces, fundamental group. Application of these concepts to surfaces such as the torus, the Klein bottle, and the Moebius band.

MATH 454 Introduction to Differential Geometry (II)
Spring. 4 credits. Prerequisites: MATH 221–222, 223–224, or 293–294, plus at least one mathematics course numbered 300 or above. MATH 453 is not a prerequisite.
Course covers differential geometry of curves and surfaces. Also covers curvature, geodesics, and differential forms. Serves as an introduction to n-dimensional Riemannian manifolds. This material provides some background for the study of general relativity; connections with the latter are indicated.

MATH 455 Applicable Geometry (II)
Fall. 4 credits. Prerequisite: a good introduction to linear algebra (such as in MATH 221, 223, 231, or 294) or permission of the instructor. It is not assumed that students know what any of the words in the following description mean. Generally offered every two years.
An introduction to the theory of n-dimensional convex polytopes and polyhedra and some of its applications, with an in-depth treatment of the case of 3-dimensions. We discuss both combinatorial properties (such as face counts) as well as metric properties (such as rigidity). Covers theorems of Euler, Cauchy, and Steinitz, Voronoi diagrams and triangulations, convex hulls, cyclic polytopes, shellability and the upper-bound theorem. We relate these ideas to applications in tiling, linear inequalities and linear programming, structural rigidity, computational geometry, hyperplane arrangements and zonotopes.

MATH 471 Basic Probability (II)
Fall. 4 credits. Prerequisite: MATH 221, 223, 231, or 294. May be used as a terminal course in basic probability.
Topics include: combinations, important probability laws, expectations, moments, moment-generating functions, limit theorems. Emphasis is on diverse applications and on development of use in statistical applications. See also the description of MATH 671.

MATH 472 Statistics (II)
Spring. 4 credits. Prerequisites: MATH 471 and knowledge of linear algebra such as taught in MATH 221. Some knowledge of multivariable calculus helpful but not necessary.
Classical and recently developed statistical procedures are discussed in a framework that emphasizes the basic principles of statistical inference and the rationale underlying the choice of these procedures in various settings. These settings include problems of estimation, hypothesis testing, and large sample theory.

[MATH 481 Mathematical Logic (also PHIL 431) (II)
Spring. 4 credits. Generally offered every two years. Not offered 2001–2002.
Course covers: propositional and predicate logic; classical proof procedures; completeness and compactness; decidability and undecidability; the Godel incompleteness theorem; and elements of set theory.]

[MATH 482 Topics in Logic (also PHIL 432) (II)
Spring. 4 credits. Prerequisite: 1 logic course from the Mathematics Department at the 200 level or higher, 1 logic course from the Philosophy Department at the 300 level or higher, or permission of the instructor. Not offered 2001–2002.
For description, see PHIL 432.]

MATH 483 Intensional Logic (also PHIL 436) (II)
Spring. 4 credits. Prerequisite: 1 logic course at the 200 level or higher from the Philosophy Department or the Mathematics Department, or permission of instructor.
For description, see PHIL 436.

MATH 486 Applied Logic (also COM S 486) (II)
Spring. 4 credits. Prerequisites: MATH 221–222, 223–224, or 293–294; COM S 280 or equivalent (such as MATH 332, 336, 432, 434, 436, or 481); and some additional course in mathematics or theoretical computer science.
Course covers: propositional and predicate logic; compactness and completeness by tableaux, natural deduction, and resolution. Other possible topics include: equational logic; Herbrand Universes and unification; rewrite rules and equational logic, Knuth-Bendix method and the congruence-closure algorithm and lambda-calculus reduction strategies; topics in Prolog, LISP, ML, or Nuprl; and applications to expert systems and program verification.

*See the list of courses with overlapping content at the end of the introduction.

MATH 490 Supervised Reading and Research
Fall, spring. 1–6 credits.
Supervised reading and research by arrangement with individual professors. Not for material currently available in regularly scheduled courses.

Professional Level and Mathematics Education Courses

MATH 500 College Teaching
Fall, weeks 1–6. 1 credit.
Among the topics covered: basic topics about teaching, such as how to plan recitations, how to prepare lesson plans for lectures, exam design and grading, syllabus planning. Also discussed: the structure of colleges and universities, jobs and tenure, professionalism, alternative teaching strategies.

[MATH 503 History of Modern Mathematics
Spring. 4 credits. Prerequisites: undergraduate algebra and analysis. Generally offered every two years. Not offered 2001–2002.
Topics in the history of modern mathematics at the level of F. Klein's *Evolution of Mathematics in the 19th Century*, J. Dieudonne's *Abrege D'Histoire Des Mathematiques 1700–1900*, and G. Birkhoff's *Source Book of Classical Analysis*.]

MATH 505 Educational Issues in Undergraduate Mathematics
Spring. 4 credits. Prerequisite: graduate standing or permission of the instructor. Generally offered every two years.
This course examines various educational issues in undergraduate mathematics and the relationship of these issues to the mathematics itself. The precise choice of topics varies, but the intent is that a balance of different views be presented and discussed. There are extensive readings in the course and occasional guest lectures. Possible topics include: nature of proof and how and when to teach it, calculus "reform," teaching mathematics to school teachers, using writing, using history, alternative assessments, alternatives to lecturing, equity issues, effective uses of technology, what is mathematical understanding and how do we recognize it, what should every mathematics major know, and research in undergraduate mathematics.

MATH 507 Teaching Secondary Mathematics: Theory and Practices
Spring. 4 credits.
This course provides direct experience of new approaches, curricula and standards in mathematics education. Discussion of articles, activities for the secondary classroom and videotape of classroom teaching is tied to in-class exploration of math problems. Experience in the computer lab, examining software environments and their use in the mathematics classroom is included. Participants are expected to write short papers, share ideas in class and present their opinions on issues.

MATH 508 Mathematics for Secondary School Teachers
Fall, spring. 1–6 credits. Prerequisite: secondary school mathematics teacher, or permission of instructor. May not be taught every semester.
An examination of the principles underlying the content of the secondary school mathematics curriculum, including connections with the history of mathematics and current mathematics research.

Graduate Courses

Many of our graduate courses are topics courses for which descriptions are not included here; however, during each pre-enrollment period a schedule of graduate courses to be offered the following semester is posted at www.math.cornell.edu/Courses. This schedule includes course descriptions that are often more detailed than those included here, as well as a means for interested students to participate in the process of selecting meeting times.

MATH 611–612 Real and Complex Analysis
611, fall; 612, spring. 4 credits each.
611 covers: measure and integration and functional analysis. 612 covers: complex analysis, Fourier analysis, and distribution theory.

MATH 613–[614] Topics in Analysis
613, fall; 614, spring. 4 credits each. 614 Not offered 2001–2002.

MATH 615–[616] Mathematical Methods in Physics
615, fall; 616, spring. 4 credits each. Intended for graduate students in physics or related fields who have had a strong advanced calculus course and at least 2 years of general physics. A knowledge of the elements of finite dimensional vector space theory, complex variables, separation of variables in partial differential equations, and Fourier series is assumed. Undergraduates are admitted only with permission of instructor. MATH 615 is a prerequisite for 616. MATH 616 not offered 2001–2002.
Topics are designed to give a working knowledge of the principal mathematical methods used in advanced physics. 615 covers: Hilbert space, generalized functions, Fourier transform, Sturm-Liouville problem in ODE, Green's functions, and asymptotic expansions. 616 covers: Linear operators. Also covers: differential operators and integral operators, the equations and eigenvalue problems connected with them and the special functions arising from them; elements of group theory; and the rotation group and its representations.

MATH 617 Dynamical Systems
Fall. 4 credits. Generally offered every two years.
Topics include: existence and uniqueness theorems for ODEs; Poincaré-Bendixon theorem and global properties of two dimensional flows; limit sets, nonwandering sets, chain recurrence, pseudo-orbits and structural stability; linearization at equilibrium points: stable manifold theorem and the Hartman-Grobman theorem; and generic properties: transversality theorem and the Kupka-Smale theorem. Examples include: expanding maps and Anosov diffeomorphisms; hyperbolicity: the horseshoe and the Birkhoff-Smale theorem on transversal homoclinic orbits; rotation numbers; Herman's theorem; and characterization of structurally stable systems.

[MATH 618 Smooth Ergodic Theory
Spring. 4 credits. Generally offered every two years. Not offered 2001–2002.
Topics include: invariant measures; entropy; Hausdorff dimension and related concepts; hyperbolic invariant sets: stable manifolds, Markov partitions and symbolic dynamics; equilibrium measures of hyperbolic attractors; ergodic theorems; Pesin theory: stable manifolds of nonhyperbolic systems; Liapunov exponents; and relations between entropy, exponents, and dimensions.]

MATH 619–620 Partial Differential Equations
619, fall; 620, spring. 4 credits each. Generally offered every two years.
Course covers basic theory of partial differential equations.

MATH 621 Measure Theory and Lebesgue Integration
Fall. 4 credits.
Course covers measure theory, integration, and Lp spaces.

[MATH 622 Applied Functional Analysis
Spring. 4 credits. Not offered every year.
Course covers basic theory of Hilbert and Banach spaces and operations on them. Applications.]

[MATH 628 Complex Dynamical Systems
Fall. 4 credits. Prerequisite: MATH 418. Not offered every year. Next offered 2002–2003.
Various topics in the dynamics of analytic mappings in one complex variable, such as: Julia and Fatou sets, the Mandelbrot set, Mañe-Sad-Sullivan's theorem on structural stability. Also covers: local theory, including repulsive cycles and the Yoccoz inequality, parabolic points and Ecalle-Voronin invarients, Siegel disks and Yoccoz's proof of the Siegel Brjuno theorem; quasi-conformal mappings and surgery: Sullivan's theorem on non-wandering domains, polynomial-like mappings and renormalization, Shishikura's constructin of Hermann rings; puzzles, tableaux and local connectivity problems; and Thurston's topological characterization of rational functions, the spider algorithm, and mating of polynomials.]

MATH 631–[632]–634 Algebra
631, fall; 632, spring; 634, spring. 4 credits each. 632 and 634 offered in alternate years. 632 not offered 2001–2002.
631 covers: finite groups, field extensions, Galois theory, rings and algebras, and tensor and exterior algebra. 632 covers: Wedderburn structure theorem, Brauer group, and group cohomology. 634 covers: Dedekind domains, primary decomposition, Hilbert basis theorem, and local rings.

[MATH 649 Lie Algebras
Fall. 4 credits. Generally offered every two years. Not offered 2001–2002.
Topics include: nilpotent, solvable and reductive Lie algebras; enveloping algebras; root systems; Coxeter groups; and classification of simple algebras.]

MATH 650 Lie Groups
Spring. 4 credits. Generally offered every two years.
Course topics include: topological groups, Lie groups; relation between Lie groups and Lie algebras; exponential map, homogeneous manifolds; and invariant differential operators.

MATH 651 Introductory Algebraic Topology
Spring. 4 credits.
Course covers fundamental group and covering spaces, and homology theories for complexes and spaces.

MATH 652 Differentiable Manifolds I
Fall. 4 credits. Prerequisites: advanced calculus, linear algebra (MATH 431), point-set topology (MATH 453).
This is an introduction to differential geometry and differential topology at the level of a beginning graduate student. Topics include: smooth manifolds, embeddings, tangent bundles, tensors, vector bundles, vector fields, and Frobenius' theorem. Further topics chosen by instructor from other major areas such as fibre bundles, Lie groups, connections, curvature, geodesics, Riemannian manifolds, differential forms, and de Rham cohomology.

[MATH 653 Differentiable Manifolds II
Spring. Prerequisites: MATH 652 or equivalent. Generally offered every 3–4 years. Not offered 2001–2002.
Advanced topics from differential geometry and differential topology selected by instructor. Examples of eligible topics include: transversality, cobordism, Morse theory, classification of vector bundles and principal bundles, characteristic classes, microlocal analysis, conformal geometry, geometric analysis and partial differential equations, and Atiyah-Singer index theorem.]

MATH 661 Geometric Topology
Fall. 4 credits.
An introduction to some of the more geometric aspects of topology and its connections with group theory. Possible topics include: surface theory, 3-manifolds, knot theory, geometric and combinatorial group theory, hyperbolic groups, and hyperbolic manifolds.

MATH 662 Riemannian Geometry
Spring. 4 credits. Generally offered every two years.
Course topics include: linear connections, Riemannian metrics and parallel translation; covariant differentiation and curvature tensors; the exponential map, the Gauss Lemma and completeness of the metric; isometries and space forms, Jacobi fields and the theorem of Cartan-Hadamard; the first and second variation formulas; the index form of Morse and the theorem of Bonnet-Myers; the Rauch, Hessian, and Laplacian comparison theorems; the Morse index theorem; the conjugate and cut loci; and submanifolds and the Second Fundamental form.

MATH 671–672 Probability Theory
671, fall; 672, spring. 4 credits each. Prerequisite: a knowledge of Lebesgue integration theory, at least on the real line. Students can learn this material by taking parts of MATH 413–414 or 621. Prerequisite for MATH 672: MATH 671.
Course topics include: properties and examples of probability spaces; sample space, random variables, and distribution functions; expectation and moments; independence, Borel-Cantelli lemma, zero-one law; convergence of random variables, probability measures, and characteristic functions; law of large numbers; selected limit theorems for sums of independent random variables; Markov chains, recurrent events; ergodic and renewal theorems; Martingale theory; and Brownian motion and processes with independent increments.

MATH 674 Introduction to Mathematical Statistics
Spring. 4 credits. Prerequisites: MATH 671 and OR&IE 670 or permission of instructor.
Topics include: an introduction to the theory of point estimation, hypothesis testing and confidence intervals, consistency, efficiency, sufficiency, and the method of maximum likelihood. Basic concepts of decision theory are discussed; asymptotic methods are introduced and developed in detail. The course is coordinated with OR&IE 670 to form the second part of a one-year course in mathematical statistics.

MATH 681 Logic
Spring. 4 credits.
Course covers basic topics in mathematical logic, including propositional and predicate calculus; formal number theory and recursive functions; completeness and incompleteness theorems. Other topics as time permits.

MATH 711–[712] Seminar in Analysis
711, fall; 712, spring. 4 credits each. 712 not offered 2001–2002.

[MATH 713 Functional Analysis
Spring. 4 credits. Not offered 2001–2002.
Course covers: topological vector spaces, Banach and Hilbert spaces, and Banach algebras. Additional topics selected by instructor.]

MATH 715 Fourier Analysis
Fall. 4 credits. Generally offered every two years.

MATH 717 Applied Dynamical Systems (also T&AM 776)
Spring. 4 credits. Suggested prerequisite: T&AM 675, MATH 617, or equivalent. Generally offered every two years.
Course topics include: review of planar (single-degree-of-freedom) systems; local and global analysis; structural stability and bifurcations in planar systems; center manifolds and normal forms; the averaging theorem and perturbation methods; Melnikov's method; discrete dynamical systems, maps and difference equations, homoclinic and heteroclinic motions, the Smale Horseshoe and other complex invariant sets; global bifurcations, strange attractors, and chaos in free and forced oscillator equations; and applications to problems in solid and fluid mechanics.

[MATH 722 Topics in Complex Analysis
Spring. 4 credits. Not offered every year.
Selections of advanced topics from complex analysis, such as Riemann surfaces, complex dynamics, and conformal and quasiconformal mapping. Course content varies.]

[MATH 728 Seminar in Partial Differential Equations
Fall. 4 credits. Generally offered every two years. Not offered 2001–2002.]

MATH 731–732 Seminar in Algebra
731, fall; 732, spring. 4 credits each.

MATH 735 Topics in Algebra
Fall. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 737 Algebraic Number Theory
Fall. 4 credits.

MATH 739 Topics in Algebra
Spring. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 740 Homological Algebra
Spring. 4 credits.

MATH 751–752 Seminar in Topology
751, fall; 752, spring. 4 credits each.

MATH 753 Algebraic Topology
Fall. 4 credits.
The continuation of 651. The standard topics covered in this course most years are cohomology, cup products, Poincaré duality, and homotopy groups. Other possible topics include fiber bundles, fibrations, vector bundles, and characteristic classes. The course may sometimes be taught from a differential forms viewpoint.

[MATH 754 Topics in Algebraic Topology
Spring. 4 credits. Prerequisite: MATH 753. Generally offered every 3–4 years. Not offered 2001–2002.
A selection of more advanced topics from algebraic topology, such as spectral sequences, K-theory, Bott periodicity, cobordism, or stable homotopy theory.]

MATH 757–758 Topics in Topology
757, fall; 758, spring. 4 credits each.
Selection of advanced topics from modern algebraic, differential, and geometric topology. Course content varies.

MATH 761–762 Seminar in Geometry
761, fall; 762, spring. 4 credits each. Either 761 or 762 generally offered every year.

MATH 767 Algebraic Geometry
Spring. 4 credits.

MATH 771–772 Seminar in Probability and Statistics
771, fall; 772, spring. 4 credits each.

[MATH 774 Asymptotic Statistics
Fall. 4 credits. Prerequisites: probability theory (MATH 671–672 or equivalent, containing stochastic processes) and statistics (MATH 472 or MATH 674). Not offered 2001–2002.
Introduction to asymptotic statistical decision theory and to empirical stochastic processes. Course covers: the notion of experiment, reduction by sufficiency, equivalence classes, the Le Cam delta distance, local asymptotic normality and minimaxity, optimal rates of convergence, white noise models, the Pinsker bound, and Gaussian approximation of nonparametric experiments. Includes topics in empirical processes include coupling theorems, some probability metrics, entropy conditions, functional limit theorems, and Hungarian constructions.]

MATH 777–778 Stochastic Processes
777, fall; 778, spring. 4 credits each.

MATH 781–782 Seminar in Logic
781, fall; 782, spring. 4 credits each.

MATH 783 Model Theory
Spring. 4 credits. Generally offered every two years.
An introduction to model theory at the level of the books by Hodges or Chang and Keisler.

MATH 784 Recursion Theory
Fall. 4 credits.
Course covers: theory of effectively computable functions; classification of recursively enumerable sets; degrees of recursive unsolvability; applications to logic; hierarchies; recursive functions of ordinals and higher type objects; generalized recursion theory.

[MATH 787 Set Theory
Spring. 4 credits. Generally offered every two years. Not offered 2001–2002.
A first course in axiomatic set theory at the level of the book by Kunen.]

MATH 788 Topics in Applied Logic
Fall. 4 credits.
This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automatic theorem proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), nonstandard analysis. Students are expected to be familiar with the standard results in graduate level mathematical logic.

MATH 790 Supervised Reading and Research
Fall, spring. 1–6 credits.

MATH 901–902 Oliver Club Seminar

MATH 903–904 Olivetti Club Seminar

MATH 905–906 Occasional Seminar on Undergraduate Education

MATH 907–908 Educational Issues in Undergraduate Mathematics

MATH 911–912 Seminar in Analysis

MATH 913–914 Seminar in Dynamics and Geometry

MATH 949–950 Seminar in Lie Groups

MATH 951–952 Topics in Topology and Geometry

MATH 967–968 Seminar in Combinatorial and Algebraic Geometry

MEDIEVAL STUDIES

See "Special Programs and Interdisciplinary Studies."

MUSIC

M. Scatterday, chair; S. Tucker, director of undergraduate studies (233 Lincoln Hall, 255–3423); D. Rosen, director of graduate studies (126 Lincoln Hall, 255–4974); M. Bilson, X. Bjerken, D. Borden, D. Conn, L. Coral, R. Harris-Warrick, M. Hatch, H. Hoffman, J. Hsu, J. Kellock, P. Merrill, J. Peraino, S. Pond, A. Richards, R. Riley, B. Robison, R. Sierra, S. Stucky, K. Tan, J. Webster, D. Yearsley, N. Zaslaw

Emeritus: K. Husa, S. Monosoff, R. Palmer, T. Sokol, M. Stith.

Department office: 255–4097.

Department web site: www.arts.cornell.edu/music/

Musical Performance and Concerts

Musical performance is an integral part of Cornell's cultural life and an essential part of its undergraduate academic programs in music. The department encourages music making through its offerings in individual instruction and through musical organizations and ensembles that are directed and trained by members of the faculty. Students from all colleges and departments of the university join with music majors in all of these ensembles:

Vocal ensembles
- Cornell Chamber Singers
- Cornell Chorale
- Cornell University Chorus
- Cornell University Glee Club
- Sage Chapel Choir

Instrumental ensembles
- Chamber Music Ensembles
- Cornell Chamber Orchestra
- Cornell Experimental Lab Ensemble
- Cornell Gamelan
- Cornell Jazz Ensembles
- Cornell Symphony Orchestra
- Cornell University Chamber Winds
- Cornell University Symphonic Band
- Cornell University Wind Ensemble
- Cornell University Wind Symphony

Information about requirements, rehearsal hours, and conditions for academic credit can be found in the following listings for the Department of Music. Announcements of auditions are posted during registration each fall term and, where appropriate, each spring term as well.

The university is also home to many student-run musical organizations, including the Big Red Marching Band and Big Red Pep Band, the Cornell Savoyards, and several a cappella groups. Information about these groups, too, is available through the Department of Music office, 101 Lincoln Hall (255–4097).

The Department of Music and the Faculty Committee on Music sponsor more than 100 formal and informal concerts each year by Cornell's ensembles, faculty, and students and by distinguished visiting artists. The great majority of concerts are free and open to the public. Lectures and concerts are listed on the web (www.arts.cornell.edu./music/). Additional information is available through the events office (255–4760).

Nonmajors

In addition to its performing, instructional, and concert activities, the department offers numerous courses for nonmajors, many of which carry no prerequisites and presuppose no previous formal training in music. Consult the following course listings, and for further information consult the department office, 101 Lincoln Hall (255–4097), or the director of undergraduate studies (255–3423).

The Major

The major carries the study of music to an advanced level through the integration of performance, music theory, and music history. It is designed to accommodate both students who are oriented toward eventual graduate or professional work in music and those who wish to take a more general approach, often in conjunction with a major in another department.

Students contemplating a major in music should arrange for placement examinations and advising in the department as early as possible, usually during the freshman orientation period. Information is available from the director of undergraduate studies. Prerequisites for admission to the major are completion of MUSIC 152 and 154, at the latest by the end of the sophomore year (the freshman year is preferable), with an overall grade of B- or better in each course. In consultation with the director of undergraduate studies, students are expected to have chosen an adviser from among the department faculty before acceptance into the major; admission to the major is decided by the faculty as a whole. Students majoring in music then design their course of study with their adviser.

Music majors must complete the Core Curriculum plus at least two electives. The Core Curriculum serves as the basis for focus in specific areas, such as composition, performance, jazz studies, vernacular music, Western art music, and Asian music. Students may, however, choose electives that reflect a more broadly-based study. Those intending to pursue graduate study or professional work in music are advised to take further courses in addition to the two required electives.

The Core Curriculum is comprised of:

1) in music theory: MUSIC 251, 252, 253, 254
2) in music history: MUSIC 207, 208, 300, 400
3) in performance: four semesters of participation in a musical organization or ensemble sponsored by the department of music (MUSIC 331 through 346 and 421 through 448)

Electives: at least two from the following:

1) in music theory: MUSIC 451–457
2) in music history: All courses above and including MUSIC 374
3) in performance: MUSIC 321, 322, 323, 324

Honors. The honors program in music is intended to provide special distinction for the department's ablest undergraduate majors. Qualified students are invited to become candidates by the faculty early in the second semester of their junior year. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. In their senior year, candidates enroll in MUSIC 401–402 with the chair of the honors committee as instructor. Candidates are encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities, culminating in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. A comprehensive examination administered by the candidate's committee is held not later than May 1. The level of honors conferred is based primarily on the candidate's performance in the honors program, and secondarily on the candidate's overall record in departmental courses and activities.

Distribution Requirement

College of Arts and Sciences students may apply either one or two Music Department courses toward the distribution requirement in Group 4 (humanities and the arts). Neither freshman seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least three credits, and it may not be in musical performance (MUSIC 321–322, 323–324) or in organizations and ensembles (MUSIC 331 through 346 and 421 through 448).

If two music courses are counted for distribution, they must total at least six credits, and at least one of the courses must be academic, not performance-oriented. The second "course," however, may comprise **either** up to four credits earned in perfor-

mance (MUSIC 321–322, 323–324) **or** up to four credits earned in organizations and ensembles (MUSIC 331 through 346 and 421 through 448), but not both.

Facilities

Music Library. The Sidney Cox Library of Music and Dance in Lincoln Hall has an excellent collection of standard research tools. Its holdings consist of approximately 127,000 books, periodicals, and scores and 50,000 sound and video recordings. Particularly noteworthy are the collections of opera from all periods; twentieth-century scores and recordings; a large microfilm collection of Renaissance sources, both theoretical and musical; and a collection of eighteenth-century chamber music. In addition, the Department of Rare Books, in the Kroch Library, houses a collection of early printed books on music and musical manuscripts.

Concert Halls. The Department of Music sponsors more than 100 concerts annually. Cornell's principal concert halls are Bailey Hall Auditorium (about 2,000), Alice Statler Auditorium (about 900), Sage Chapel (about 800) and Barnes Hall Auditorium (about 280).

Rehearsal Spaces. The orchestras and bands rehearse in Lincoln Hall, Bailey Hall, Barnes Hall, and Barton Hall; the Jazz Ensembles, Gamelan, and Chamber Ensembles rehearse in Lincoln Hall; and the choral ensembles are primarily quartered in Sage Chapel. Practice studios in Lincoln Hall are available for individual practice by pianists, vocalists, and instumentalists.

Thirty-five grand pianos and 22 upright or studio pianos are housed in Cornell's offices, classrooms, and rehearsal spaces. In addition, our Center for Keyboard Studies includes two concert grand pianos (Steinway and Mason & Hamlin), two eighteenth-century fortepiano replicas (copies of Johann Andreas Stein and Anton Walter), an original Broadwood grand piano from 1827, an 1824 Conrad Graf fortepiano replica, one Dowd and one Hubbard harpsichord, and a Challis clavichord.

Two chapels on campus house three distinctive organs that are available to qualified individuals for lessons and practice. These instruments include: a small Italian organ (1746); a two-manual mechanical action instrument (1972); and a three-manual symphonic organ (1941).

Digital/Electronic Equipment. A Macintosh Master studio is available for graduate student use (hours TBA) and occasional independent study use. The software used is Digital Performer, Finale, Peak, and eMagic editor/librarians. The instruments include a Yamaha KX88 MIDI Controller keyboard, a Yamaha TX802 FM synthesizer, an E-Mu Proteus XR, a Casio FZ 10M sampler and various other synthesizers. In addition, there are four MIDI work stations with additional instruments, including a Korg M1 synthesizer and an Akai S900 sampler.

Introductory Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

MUSIC 100 Elements of Musical Notation
Fall or spring, weeks 2–5. 1 credit. Prerequisite: concurrent enrollment in any 3-credit course in music and permission of instructor. D. Conn.
This four-week course, given at the beginning of each term, fulfills the requirement of basic pitch and rhythm and reading skills needed for some introductory courses and 200-level courses with prerequisites. The material covered in this course is no longer part of MUSIC 105.

MUSIC 101 Popular Music in America: A Historical Survey (also AM ST 105) # (IV)
Spring. 3 credits. 1-hour disc TBA. S. Pond.
A survey of the history and diverse streams of popular music in America. Elementary vocabulary and techniques for describing, analyzing, and evaluating music. Covers the relationships between mainstream musics, tributaries, and side-streams, and between folk, art, and popular music.

MUSIC 103 Intro to World Music I: Africa and the Americas (also LSP 100) @ (IV)
Spring. 3 credits. 1-hour disc TBA. No previous training in music required. S. Pond.
Exploration of folk, popular, and traditional musical genres of the Western Hemisphere, particularly the African diaspora. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

MUSIC 104 Intro to World Music II: Asia @ (IV)
Fall. 3 credits. 1-hour disc to be arranged. No previous training in music required. M. Hatch.
Exploration of folk, popular, and traditional musical genres from South, Southeast, and East Asia. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

MUSIC 105 Introduction to Music Theory (IV)
Fall, spring, or summer. 3 credits. Plus 2 hours TBA. Experience in reading music is recommended. D. Conn.
An elementary, self-contained introduction to music theory emphasizing fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads; basic concepts of tonality; extensive listening to music in various styles; analysis of representative works of Bach, Mozart, Haydn, and Beethoven.

[MUSIC 107 Hildegard to Handel # (IV)
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. Not offered 2001–2002. N. Zaslaw.
The music of Western Europe from the Middle Ages through the Baroque period. Starting from Gregorian chant and the monophonic works of Hildegard von Bingen, this course surveys composers and repertoires such as the troubadors, the Notre Dame School, Renaissance sacred polyphony, madrigals, the dance suite, concertos, cantatas, and ends in the early eighteenth century with works by Vivaldi, Bach, and Handel.]

MUSIC 108 Mozart to Minimalism (IV)
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. N. Zaslaw.
A survey of Western art music in many genres from the second half of the eighteenth century to the present. Composers whose music is studied include Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Berlioz, Chopin, Wagner, Verdi, Liszt, Brahms, Mahler, Debussy, Strauss, Stravinsky, Bartók, Ives, Webern, Messiaen, Copland, Bernstein, Carter, Stucky, and Sierra.

Music Theory

Students contemplating the music major are strongly advised to take MUSIC 151, 152, 153, and 154 in the freshman year; in any case MUSIC 152 and 154 must be completed no later than the end of the sophomore year.

MUSIC 151 Tonal Theory I (IV)
Fall. 3 credits. Prerequisites: admission by departmental placement exam and concurrent enrollment in or previous credit for MUSIC 153, or equivalent. Intended for students expecting to major in music and other qualified students. B. Robison.
Detailed study of the fundamental elements of tonal music: rhythm, scales, intervals, triads; melodic principles and 2-part counterpoint; diatonic harmony and 4-part voice leading in root position and first inversion; and analysis of phrase and period structure.

MUSIC 152 Tonal Theory II (IV)
Spring. 3 credits. Prerequisites: MUSIC 151 and 153 or equivalent, and concurrent enrollment in or previous credit for MUSIC 154. Intended for students expecting to major in music and other qualified students. A grade of B- or better in MUSIC 152 is required for admission to the music major. B. Robison.
Continued study of voice leading and harmonic progression, including diatonic modulation; analysis of binary and ternary forms.

MUSIC 153 Musicianship I
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 151. Intended for students expecting to major in music and other qualified students. 3 hrs. TBA. B. Robison.
Sight singing: diatonic melodies in treble, alto, and bass clefs. Keyboard: scales, triads, seventh chords, short diatonic chord progressions. Dictation: intervals, rhythms; short diatonic melodies; short diatonic chorale phrases. Score reading: 2 parts using treble, alto, and bass clefs. Musical terms: tempo markings and rhythmic terminology.

MUSIC 154 Musicianship II
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 152. Intended for students expecting to major in music and other qualified students. A grade of B- or better in MUSIC 154, and failure in none of the individual musicianship components of the course, are required for admission to the music major. 3 hrs. TBA. B. Robison.
Sight singing: longer melodies in 3 clefs, including diatonic modulation. Keyboard: diatonic chord progressions and sequences. Dictation: intervals, rhythms; longer melodies; chorale phrases with diatonic modulation. Score reading: 3 parts using treble, alto, and bass clefs. Musical terms: nuance and expression marks.

[MUSIC 239 Introduction to Improvisational Theory
Spring. 2 credits. Prerequisite: permission of instructor. Intended for performers in "jazz" and related styles. Not offered 2001–2002. Staff.
Covers tonal, modal, and blues harmonic resources, and the formal structures in which they are embodied. Development of improvisational skills and creation of spontaneous compositions.]

MUSIC 251 Tonal Theory III (IV)
Fall. 3 credits. Prerequisites: MUSIC 152 and 154 or equivalent, and concurrent enrollment in MUSIC 253. J. Webster.
Continuation of diatonic and introduction to chromatic harmony; species counterpoint; composition in small forms.

MUSIC 252 Tonal Theory IV (IV)
Spring. 3 credits. Prerequisites: MUSIC 251 and 253 or equivalent, and concurrent enrollment in MUSIC 254. K. Tan.
Study of and composition in larger forms, including sonata form; systematic study of chromatic harmony, voice-leading, and modulation; composition in chromatic style.

MUSIC 253 Musicianship III
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 251. 2 hours TBA. J. Webster.
Sight singing: melodies with chromaticism in treble, alto, tenor, and bass clefs. Keyboard: diatonic modulation, chromatic chords. Dictation: melodies with modulation; chorale phrases with secondary dominants and other chromatic chords. Score reading: 4 parts using treble, alto, tenor, and bass clefs. Musical terms: orchestral ranges, terms, clefs, and transpositions.

MUSIC 254 Musicianship IV
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 252. 2 hours TBA. K. Tan.
Sight singing: melodies in 4 clefs, including modality and chromatic modulation. Keyboard: chromatic sequences, chromatic modulations, improvised modulations employing diatonic pivot chords. Dictation: intervals, rhythms, short melodies, and short, diatonic chorale phrases. Score reading: 4 parts, including transposing instruments. Musical terms: other terms in French, German, and Italian.

MUSIC 351 Materials of Twentieth-Century Music (IV)
Fall. 3 credits. Prerequisite: MUSIC 252 and 254 or equivalent, and concurrent enrollment in MUSIC 353. S. Stucky.
Introduction to some techniques of twentieth-century music including extended tonality, modes, twelve-tone technique, set theory, and new approaches to form and rhythm. Analysis of representative works by Debussy, Bartók, Webern, Hindemith, Schoenberg, Stravinsky, and others.

MUSIC 353 Musicianship V
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for MUSIC 351. 2 hours TBA. S. Stucky.
Sight singing: advanced chromatic, twelve-tone, and atonal melodies in 4 clefs. Keyboard: continued chromatic harmony; improvised chromatic modulations. Dictation: continued chromatic harmony; atonal sets and melodies; 2-part counterpoint. Score reading: 4 clefs, transpositions. Music terms: twentieth-century terms.

[MUSIC 451 Counterpoint
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2001–2002. S. Stucky.
Composition in the polyphonic vocal style of the late Renaissance.]

[MUSIC 452 Topics in Music Analysis
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2001–2002. J. Webster.
A survey of important analytical approaches to tonal music, including thematic-motivic relations, phrase-rhythm, large-scale paragraph construction, structural-tonal voice-leading, and relations among the movements in a multimovement work.]

[MUSIC 453 Introduction to Improvisational Theory
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2001–2002. Staff.
Study and performance of tonal, modal, and blues harmonic resources; introduction to the formal structures in which these resources are embodied. Includes ear training, work at the keyboard, composing short pieces, and analyzing selected representative works of popular music and African-American art music from 1940 to 1970.]

MUSIC 454 Composition (IV)
Fall. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. R. Sierra.
Study of music composition through the use of traditional forms such as variation and sonata. The student is required to write original pieces for solo and chamber ensembles.

MUSIC 455 Conducting (IV)
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. S. Tucker.
Covers fundamentals of score reading, score analysis, rehearsal procedures and conducting technique; instrumental and choral contexts.

[MUSIC 456 Orchestration
Spring. 4 credits. Prerequisite: MUSIC 251 or permission of instructor. Not offered 2001–2002. R. Sierra.
Orchestration based on nineteenth- and twentieth-century models.]

Music in History and Culture

[MUSIC 221 History of Rock Music (also AM ST 223) (IV)
Spring. 3 credits. No previous training in music required. Not offered 2001–2002. J. Peraino.
This course examines the development and cultural significance of rock music from its origins in blues, gospel, and Tin Pan Alley up to present-day genres of alternative rock and hip hop.]

MUSIC 222 A Survey of Jazz (also AM ST 222) (IV)
Fall. 3 credits. Enrollment limited. S. Pond.
This course addresses jazz from two perspectives: the various sounds of jazz, as well as the historical streams—musical and cultural—which have contributed to its development. The historical focus locates jazz as an expression of culture. We investigate how jazz affects and is affected by notions of ethnicity, class, nationalism, gender, art, and genre. We examine what has changed over time and try to understand why. Throughout we focus our inquiry through listening to recordings, studying writings about music by musicians and nonmusicians, learning to listen with new ears, experiencing jazz hands-on, and collaborating to add to the body of literature on jazz.

MUSIC 245 Gamelan in Indonesian History and Cultures @ (IV)
Fall or spring. 3 credits. Permission of instructor. No previous knowledge of musical notation or performance experience necessary. M. Hatch, fall; staff, spring.
An introduction to Indonesia through its art. Elementary techniques of performance on the Javanese *gamelan*; a general introduction to Indonesian history and cultures, and the socio-cultural contexts for the arts there. Several short papers and one longer research report are required.

MUSIC 261 Bach and Handel # (IV)
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. D. Yearsley.
Bach's music, product of a provincial life, and Handel's music, product of a cosmopolitan life, are compared. Genres studied include works for keyboard instruments, chamber music, concertos, cantatas, operas, oratorios, anthems, and esoterica.

MUSIC 262 Haydn and Mozart # (IV)
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. J. Webster.
Music for courts, theaters, churches, concerts, dancing, marching, public and private ceremonies, and domestic use by two extraordinarily different musical personalities who were friends, is explored in its historical and socio-cultural contexts.

[MUSIC 263 Beethoven # (IV)
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 2001–2002. J. Webster.
A survey of Beethoven's life, works, and influence. While the primary focus is his musical style and its development, the course also covers social-cultural factors and the psychology and reception of genius.]

[MUSIC 264 Musical Romantics # (IV)
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 2001–2002. D. Rosen.
This survey of music from 1815 to 1900 is divided into five segments focusing on five composers (Schubert, Berlioz, Verdi, Wagner, and Mahler) and two or three segments on broader topics, such as musical nationalism in Russia, fin de siècle Vienna, the art song, and the history of the piano and its music.]

MUSIC 274 Opera # (IV)
Fall. 3 credits. D. Rosen.
An introduction to major works of the operatic repertory, with discussion of texts and theatrical performances as well as music. Video recordings are an integral part of the course; trips to live performances are scheduled where possible.

[MUSIC 275 Choral Sounds # (IV)
Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in MUSIC 100. Not offered 2001–2002. R. Harris-Warrick.
This course examines representative works composed for group singing, primarily from the Western choral tradition, but also including folk and popular styles, from the

Middle Ages to the twentieth century. Class includes discussion of performance practices as well as historical and stylistic issues, and is integrated with local concert offerings.]

MUSIC 276 The Orchestra and Its Music # (IV)
Spring. 3 credits. Prerequisite: any 3-credit music course or permission of instructor. N. Zaslaw.
The music of, and the social structures supporting, large instrumental ensembles in the Western world, including: Italian court festivals of the sixteenth century, string bands of the seventeenth century, Lully's ascendency at Paris and Versailles, and music of Purcell, Corelli, Vivaldi, Bach, Handel, Haydn, Mozart, Beethoven, Schubert, Schumann, Mendelssohn, Berlioz, Liszt, Wagner, Brahms, Tchaikovsky, Bruckner, Mahler, Strauss, Stravinsky, Schoenberg, Webern, Bartók, Shostakovich, Messiaen, Copland, Carter, Tower, Stucky, Sierra, and others.

[MUSIC 277 The Piano and Its Music (IV)
Fall or spring. 3 credits. Prerequisite: 1 semester of music theory (MUSIC 105, an equivalent course, or equivalent experience) or permission of the instructors. Not offered 2001–2002. D. Rosen and M. Bilson.
Representative masterpieces of the piano repertoire from J. S. Bach to the present, placed in the context of the instruments for which they were written and the social structures mediating their production. Thus three different historical approaches are interwoven: (1) the history of music written for the piano and its predecessors, the harpsichord and clavichord; (2) the development of the piano from these predecessors, through Mozart's Stein piano, the pianos of Beethoven, Chopin, Liszt, and Brahms, up to today's Steinway; and (3) the social history of the piano.]

MUSIC 372 Mind and Memory (also ENGL 301, S HUM 301, and THETR 301) (IV)
Spring. 4 credits. J. Morgenroth.
See THETR 301 for description.

Music History Courses for Majors and Qualified NonMajors

MUSIC 207 Survey of Western Music I # (IV)
Fall. 3 credits. Prerequisite: MUSIC 151/153, concurrent enrollment in 151/153, or permission of instructor. J. Peraino.
A survey of Western music and its social contexts from the beginning of notation (circa 900) to 1700. Topics include sacred chant, secular song, polyphony, madrigals, early opera, and the development of independent instrumental music. The course emphasizes listening and comprehension of genres and styles, and is intended for music majors and qualified non-majors.

MUSIC 208 Survey of Western Music II # (IV)
Spring. 3 credits. Prerequisite: MUSIC 152/154, concurrent enrollment in 152/154, or permission of instructor. N. Zaslaw.
A survey of Western music and its social contexts from 1700 to the present. Topics include the decline of church music, the rise of public concerts and opera, the evolution of domestic music-making, and the influence of electronic media upon acoustical traditions. The course, which emphasizes listening and comprehension of genres and styles, is intended for music majors and qualified non-majors.

[MUSIC 300 Proseminar in Musicology (IV)
4 credits. Not offered 2001–2002. Staff.
Introduction to methods in musicology, including historiography, criticism, approaches to vernacular and non-western musics, and gender studies.]

[MUSIC 374 Opera and Culture (also GERST 374 and ITALA 374) (IV)
Spring. 4 credits. Prerequisite: any 3-credit music course or proficiency in German or Italian. Not offered 2001–2002. A. Groos.
See GERST 374 for description.]

[MUSIC 381 Music in Western Europe to 1700 # (IV)
Fall. 4 credits. Prerquisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. J. Peraino.
Western European music from the Middle Ages to the early Baroque, including Gregorian chant, secular monophony, the development of polyphony, the birth of opera, and the rise of independent instrumental music.]

MUSIC 382 Music of the Eighteenth Century # (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. J. Webster.
Music in Western and Central Europe and North America from Bach, Handel, and Vivaldi to Haydn and Mozart, including comic and serious opera, church music, concert music, and social music.

[MUSIC 383 Music of the Nineteenth Century # (IV)
Fall. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. D. Rosen.
A chronological survey of nineteenth-century music from Beethoven through Puccini including reference to its cultural and historical context.]

[MUSIC 384 Music of the Twentieth Century (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. S. Stucky.
Covers movements, schools, and styles in "classical" music from the turn of the century to the present. Includes extensive listening and reading assignments for historical breadth; detailed attention to representative works for analytical depth.]

MUSIC 386 Topics in Popular Music and Jazz (IV)
Fall. 4 credits. Prerequisite: MUSIC 152/154. S. Pond.
Topic: Post-Bebop Jazz to 1965. This course examines a cluster of jazz developments in the aftermath of the Bebop Revolution, from the late 1940s to the mid-1960s, from historical, cultural, and analytical viewpoints. A special focus is the complex of styles known as Hard Bop. The course also discusses the negotiation in jazz of Western European- and African-based aesthetics, key personalities of the time, compositional and improvisational developments, the music industry, and cultural politics of this rich period of jazz history. Throughout, we are attentive to the myriad musical streams that grew out of this time, and assess the historical importance this period has assumed in retrospect.

[MUSIC 388 Historical Performance Practicum # (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. M. Bilson.
The study of eighteenth- and nineteenth-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.]

[MUSIC 390 Culture of Renaissance II (also COM L 362, ENGL 325, HIST 364 ART H 351) # (III or IV)
Spring. 4 credits. Plus discussion section. Not offered 2001–2002. W. Kennedy and C. Kaske.
See COM L 362 for description.]

MUSIC 398–399 Independent Study in Music History
398, fall; 399, spring. 4 credits. Prerequisite: MUSIC 152 and permission of instructor. Staff.
Advanced study of various topics in music history. Students enrolling in MUSIC 398–399 participate in, but do not register for, an approved 200-level music history course and, in addition, pursue independent research and writing projects.

[MUSIC 400 Senior Seminar
4 credits. Not offered 2001–2002. Staff.]

MUSIC 410 Music and Monstrous Imaginings # (IV)
Fall. 4 credits. A. Richards.
This seminar explores the limits of the imaginary in the eighteenth- and nineteenth-century culture, from theories of fantasy, unreason, and "monstrous imagining" to freak shows, virtuosi, and illusionists. Focusing on visual, literary, and musical phantasmagoria, we investigate the performance of the uncanny (Paganini and devilish technical feats, Mesmer and the glass harmonica), the gendered imagination and artistic creation (pregnancy and invention), technologies of death and its representation (the guillotine and wax museum, magic lantern shows and automata). Novels by Radcliffe, Lewis, Shelley; instrumental music by C. P. E. Bach, Beethoven, Mendelssohn, Berlioz; opera by Mozart, Weber, Meyerbeer; critical texts from Addison and Steele to Freud and Foucault.

MUSIC 474 Opera, History, Politics, Gender (also HIST 460, WOMNS 454, COM L 459, S HUM 459, ITALA 456) (III or IV)
Spring. 4 credits. M. Steinberg and S. Stewart.
See HIST 460 for description.

[MUSIC 489 African American Music Innovators (also AS&RC 489)
Fall. 4 credits. Permission of instructor. Not offered 2001–2002.]

MUSIC 490 American Musical Theatre (also ENGL 454) (IV)
Spring. 4 credits. S. McMillin.
See ENGL 454 for description.

[MUSIC 492 Music and Queer Identity (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. J. Peraino.
Throughout history music has been associated with "otherness" in Western cultures.

Appropriately, lesbian and gay individuals and communities have turned to music as a means of expressing and negotiating their "queer" identity within status-quo culture. This course examines how and why music encodes "queerness" by focusing on various musical genres (such as opera, disco, women's music, country) and composer/musicians (such as Franz Schubert, Judy Garland, David Bowie) that have become significant for various lesbian and gay communities. The course also examines the reasons behind the general popularity of queer-coded but "straight-identified" performers such as Elvis Presley, Prince, and Michael Jackson.]

[MUSIC 493 Women and Music (also WOMNS 496) (IV)
Spring. 4 credits. Prerequisite: MUSIC 152 or permission of instructor. Not offered 2001–2002. J. Peraino.
This course introduces the students to a critical examination of women's participation in Western European and American musical traditions. The course focuses on the various subject positions and critical perspectives that women hold in examples of music and writings about music. Of primary importance are the concepts of "objective" vs. "subjective" approaches to the topic of the week. Topics include approaches to history and criticism, women composers, women performers, women as objects, women's music, drag and androgyny, and women as listeners. Students are asked to keep a journal of their reactions to the readings, listening assignments, and class discussions, and to write "objective" and "subjective" formal papers.]

[MUSIC 494 Love, Sex, and Song in Medieval France (also WOMNS 403) (IV)
Spring. 4 credits. Not offered 2001–2002. J. Peraino.
This course explores the cult of courtly love and its inextricable relationship with singing. We focus on secular music and poetry and relevant narratives of Southern and Northern France from the twelfth and thirteenth centuries, and consider issues such as constructions of gender and gender relations, music and sexuality in the Middle Ages, medieval misogyny, women's voices in courtly love lyric, the relationship of words and music, performance context, and reconstruction.]

Independent Study

MUSIC 301–302 Independent Study in Music
301, fall; 302, spring. Credit TBA. Prerequisite: departmental approval. Presupposes experience in the proposed area of study. Staff.

Honors Program

MUSIC 401–402 Honors in Music
401, fall; 402, spring. 4 credits each term. Limited to honors candidates in their senior year. Staff.

Digital Music and New Media

MUSIC 120 Learning Music through Digital Technology (IV)
Fall or spring. 3 credits. Enrollment limited. Prerequisite: permission of instructor. D. Borden.
This course uses selected commercially available technological resources to produce live music. The student is expected to master the Macintosh computer, several music software programs, and several synthesizers using MIDI. The ability to read music is helpful but not necessary. There are no papers to write; homework is presented in three classroom concerts. The final is a live presentation of the student's final project in a concert open to the public.

[MUSIC 220 Learning Counterpoint through Digital Technology
Spring. 3 credits. Enrollment limited. Prerequisite: MUSIC 152 and permission of instructor. Not offered 2001–2002. D. Borden.
This course is a study of traditional contrapuntal techniques from the fourteenth century to the present, with emphasis on invention and fugue. Synthesizers, samplers, MIDI, and music software are covered. There are three classroom concerts, some analysis and a final public concert.]

MUSIC 320 Scoring the Moving Image Using Digital Technology (IV)
Spring. 4 credits. Prerequisite: MUSIC 120 with a grade of B or higher. D. Borden.
Students learn sound design and music composition using MIDI and Digital Audio to enhance images in motion. The course is at least partially collaborative, involving students taking courses in computer animation, film, and dance. In addition, to learn techniques involving synchronizing sound to image, film clips from various sources are used as practice exercises. The final project is a public showing of film computer animation and/or dance performance using the sounds and music provided by the students in this course.

MUSIC 391 Media Arts Studio I (also THETR 391, ART 391, ARCH 391) (IV)
Fall. 3 credits. Permission of instructor.
See THETR 391 for description.

MUSIC 392 Media Arts Studio II (also THETR 392, ART 392, ARCH 392) (IV)
Spring. 3 credits. Permission of instructor.
See THETR 392 for description.

[MUSIC 420 Introduction to MIDI Techniques
Spring. 4 credits. Permission of instructor. Not offered 2001–2002. D. Borden.
This course is an introduction to MIDI for students who are already at an advanced level in music composition. Three composition projects are completed in collaboration with film, dance, and computer animation students.]

Musical Performance

Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, violin, viola, cello, and some brass and woodwind instruments *to those students advanced enough to do college-level work in these instruments*. Lessons are available by audition only. They may be taken either without credit or, through MUSIC 321–322, with credit. Other instruments may sometimes be studied for credit outside Cornell, but also by audition only (see MUSIC 321h–322h).

Lessons for beginners. The Music Department can recommend outside teachers for those who wish to begin studying voice or an instrument. No credit is available for beginning instruction.

Auditions. Auditions are held at the beginning of each term for lessons for advanced students. Contact the Department of Music office (101 Lincoln Hall) for information.

Fees. The fee for a one-half hour lesson weekly, *without credit*, is $150 per term. For a one-hour lesson (or two half-hour lessons) weekly, *without credit*, the fee is $300. The fee in MUSIC 321–322 for a one-hour lesson (or two half-hour lessons) *for credit* is $225 per term. All fees are nonrefundable once lessons begin, *even if the course is subsequently dropped.*

Scholarships. Music majors receive a scholarship equal to the lesson fee listed above. Members of department-sponsored organizations and ensembles may, with the permission of the director of the organization, receive a scholarship of up to $100 of the Cornell fee for the type of lessons chosen during the term. These scholarships are intended only for lessons in the student's primary performing medium. Scholarship forms, available in the Music Department office, are to be returned to the office *within the first three weeks of classes.*

Practice rooms. Practice-room fees for a room with a **grand piano** are $75 per term for up to 10 hours weekly, with a charge of $10 for each additional hour. A $25 cash deposit must be made for a key to the grand piano practice rooms, $20 of which is refunded upon return of the key. Fees for a room with either an **upright piano** or **drum set** are $60 per term for up to 10 hours weekly, with a charge of $8 for each additional hour, and fees for a room **without a piano** are $25 per term for up to 10 hours weekly. The fee for use of the **pipe organs** is $60 per term for up to 10 hours weekly. All fees are non-refundable and are not prorated.

Earning credit. For every four credits earned in MUSIC 321–322, the student must have earned, or currently be earning, at least three credits in another music course (excluding freshman seminars, MUSIC 321–322, 323–324, 331–343, or 421 through 448). These three credits must be earned prior to, or simultaneously with the first two credits in 321–322; they cannot be applied retroactively. Transfer credit for appropriate music courses already taken elsewhere may be used to satisfy this requirement with the approval of the department chair.

Lessons taken outside Cornell. Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of Music 321h–322h and contact the Music Department office.

MUSIC 321–322 Individual Instruction in Voice, Organ, Harpsichord, Piano, Strings, Woodwinds, and Brass
Prerequisite: advanced students may register only after a successful audition with the instructor, usually scheduled during the first week of classes, and will receive credit only as described under "Earning credit". Students may register for this course in successive years.
Students, at the sole discretion of the instructor, earn two credits each term for a one-hour lesson (or two half-hour lessons) weekly accompanied by an appropriate practice schedule.

MUSIC 321a–322a Individual Instruction in Voice
321a, fall; 322a, spring. 2 credits each term. Prerequisite: successful audition. Limited enrollment. Attendance at weekly studio class required for *all* credit students. J. Kellock.

MUSIC 321b–322b Individual Instruction in Organ
321b, fall; 322b, spring. 2 credits each term. Prerequisite: successful audition. A. Richards.

MUSIC 321c–322c Individual Instruction in Piano
321c fall; 322c, spring. 2 credits each term. Prerequisite: successful audition. X. Bjerken.

MUSIC 321d–322d Individual Instruction in Harpsichord
321d, fall; 322d, spring. 2 credits each term. Prerequisite: successful audition. A. Richards.

MUSIC 321e–322e Individual Instruction in Violin or Viola
321e, fall; 322e, spring. 2 credits each term. Prerequisite: successful audition. K. Tan.

MUSIC 321f–322f Individual Instruction in Cello
321f, fall; 322f, spring. 2 credits each term. Prerequisite: successful audition. H. Hoffman.

MUSIC 321g–322g Individual Instruction in Brass
321g, fall; 322g, spring. 2 credits each term. Prerequisite: successful audition. M. Scatterday.

MUSIC 321h–322h Individual Instruction Outside Cornell
321h, fall; 322h, spring. 2 credits each term. Prerequisite: successful audition. Coordinator: D. Conn.
All the standard orchestral and band instruments, keyboard instruments, guitar and voice may, under certain conditions, be studied for credit with outside teachers. This course is available primarily for the study of instruments not taught at Cornell and when there is limited enrollment in MUSIC 321–322. Prior approval and audition by a member of the faculty in the department is required, and credit may be earned only as described under "Earning credit," above. Additionally, a departmental petition must be completed by the end of the third week of classes. For information and a list of approved teachers, consult the department office, 101 Lincoln Hall.

MUSIC 321i–322i Individual Instruction in Woodwinds
321i, fall; 322i, spring. 2 credits each term. Prerequisite: successful audition. D. Conn.

MUSIC 323–324 Advanced Individual Instruction
323, fall; 324, spring. 4 credits each term. Open only to juniors and seniors majoring in music with a concentration in performance and to graduate students. Majors whose lessons must be taken outside Cornell may apply to the department for financial assistance toward the cost of lessons; $225 per semester is normally awarded to such students.

Musical Organizations and Ensembles

Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admission is by audition only (usually at the beginning of each semester), except that the Sage Chapel Choir and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than eight credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit.

MUSIC 331–332 Sage Chapel Choir
331, fall or summer; 332, spring. 1 credit. No audition for admission. R. Riley.
Open to all students and members of the university. Varied and demanding repertoire. The Sage Chapel Choir sings regularly in the Sunday Service of Worship which is broadcast on 870 WHCU-AM radio, and on special occasions throughout the year.

MUSIC 333–334 Cornell Chorus
333, fall; 334, spring. 1 credit. Prerequisite: permission of instructor. W 5:15–7:15 P.M. plus 2 hours TBA. S. Tucker.
A treble-voice chorus specializing in music for women's voices and in mixed-voice repertory.

MUSIC 335–336 Cornell University Glee Club
335, fall; 336, spring. 1 credit. Prerequisite: permission of instructor. W 7:30–9:30 P.M., plus 2 hours TBA. S. Tucker.
A male-voice chorus specializing in music for men's voices and in mixed-voice repertory.

MUSIC 337 Wind Symphony
Fall. 1 credit. Prerequisite: permission of instructor. M W 4:45–6:30. M. Scatterday and D. Conn.

MUSIC 338 Symphonic Band
Spring. 1 credit. Prerequisite: permission of instructor. M W 4:45–6:30. D. Conn.

MUSIC 339–340 Cornell Jazz Ensembles
339, fall; 340 spring. 1 credit. Prerequisite: permission of instructor. W 6–8 P.M. P. Merrill.

MUSIC 342 Wind Ensemble
Spring. 1 credit. Prerequisite: permission of instructor. M 7:30–9:30 and R 4:45–6:30. M. Scatterday.

MUSIC 343–344 Cornell Symphony Orchestra
343, fall; 344, spring. 1 credit. Prerequisite: permission of instructor. W 7:30–10:00 P.M. J. Hsu.

[MUSIC 345–346 Introduction to the Gamelan @
345 fall; 346 spring. 1 credit. Enrollment limited. Prerequisite: permission of instructor. Not offered 2001–2002.
Concentrated instruction for beginning students in elementary techniques of performance on the Indonesian *gamelan*. MUSIC 245 is a three-credit course that complements the instruction in *gamelan* by an introduction to Indonesian history and cultures.]

MUSIC 421–422 Cornell Chamber Orchestra
421, fall; 422 spring. 1 credit. Prerequisite: permission of instructor. T 5–6:30 P.M. M. Scatterday.
Study and performance of the chamber symphonies of Haydn, Mozart, and their contemporaries.

MUSIC 437–438 Chamber Winds
437, fall; 438, spring. 1 credit each term. Prerequisites: enrollment in Symphonic Band, Wind Symphony or Wind Ensemble in the same semester as this course AND permission of instructor only. M. Scatterday and D. Conn.
A flexible instrumentation ensemble performing original woodwind, brass, and percussion music from Gabrieli brass choirs and Mozart serenades through more contemporary works such as Stravinsky's Octet and new music premiers. The ensemble performs in wind symphony, symphonic band, and wind ensemble concerts in addition to several chamber concerts throughout the year.

MUSIC 439–440 Experimental Lab Ensemble
439, fall; 440, spring. 1 credit each term. Permission of instructor. W 8:30–10:30 P.M. P. Merrill.

MUSIC 441–442 Chamber Music Ensemble
441, fall; 442, spring. 1 credit. Prerequisite: permission of instructor. K. Tan.
Study and perform chamber music works from duos to octets for pianists, string, and wind players.

MUSIC 443–444 Chorale
443, fall; 444, spring. 1 credit each term. Prerequisite: permission of instructor. F 4:30–6:15 P.M. J. Day-O'Connell.
Study and performance of selected choral music for mixed voices.

MUSIC 445–446 Cornell Gamelan Ensemble
445, fall; 446, spring. 1 credit each term. Enrollment limited. Prerequisite: permission of instructor. M. Hatch, fall; staff, spring.
Advanced performance on the Javanese *gamelan*. Tape recordings of *gamelan* and elementary number notation are provided. Some instruction by Indonesian musicians is offered in most years.

MUSIC 447–448 Chamber Singers
447, fall; 448, spring. 1 credit each term. Prerequisite: permission of instructor. Plus 2 hours TBA. Y. Haber.
A mixed-voice chamber choir specializing in Renaissance and twentieth-century music.

Graduate Courses

Open to qualified undergraduates with permission of instructor.

MUSIC 601 Introduction to Bibliography and Research
Fall. 4 credits. M 1:25–4. L. Coral.
This course explores the nature of the discipline and introduces the many types of bibliographic tools, both printed and electronic, needed to pursue research in music.

[MUSIC 602 Analytical Technique
Spring. 4 credits. Not offered 2001–2002. J. Webster.
A critical survey of various analyical methods in current use. Frequent analytical assignments and class presentations.]

[MUSIC 603 Editorial Practice
Spring. 4 credits. Not offered 2001–2002.]

MUSIC 604 Ethnomusicology: Areas of Study and Methods of Analysis
Fall. 4 credits. Open to graduate students in anthropology, linguistics, psychology, sociology, and other cognate fields with permission of instructor. M. Hatch.
Major aspects of research into musical cultures of the world. Problems, theories, and methods, especially those affecting analytical terminology, transcription and analysis of sound events, and fieldwork.

MUSIC 622 Historical Performance Practicum
Spring. 4 credits. M. Bilson.
The study of eighteenth- and nineteenth-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.

[MUSIC 653 Topics in Tonal Theory and Analysis
Spring. 4 credits. Not offered 2001–2002. J. Webster.]

[MUSIC 654 Topics in Post-Tonal Theory and Analysis
Spring. 4 credits. Not offered 2001–2002.]

MUSIC 657–658 Composition
657, fall; 658, spring. 4 credits each term. F 1:25–4:00 P.M. plus 1 hour TBA. R. Sierra, S. Stucky.

[MUSIC 674 German Opera (also GERST 672)
Spring. 4 credits. Not offered 2001–2002. A. Groos.
See German Studies for description.]

[MUSIC 677 Mozart: His Life, Works, and Times (also GERST 757)
Spring. 4 credits. Not offered 2001–2002. N. Zaslaw.]

[MUSIC 680 Topics in Ethnomusicology
Spring. 4 credits. Not offered 2001–2002. S. Pond.]

MUSIC 681 Seminar in Medieval Music
Fall. 4 credits. J. Peraino.
Topic: Medieval Music and Notation.

[MUSIC 683 Music and Postmodern Critical Theory
Fall. 4 credits. Not offered 2001–2002. J. Peraino.
This course surveys the many critical theories that have been included under the umbrella of "postmodernism," and that have fueled the debate between "old" and "new" styles of musicology. Readings focus on structuralism and poststructuralism, feminist literary criticism, queer theory, and postmodern and postcolonialism, and their application in musicology and ethnomusicology. A broad spectrum of music is examined along with the readings.]

[MUSIC 684 Seminar in Renaissance Music
Fall. 4 credits. Not offered 2001–2002. R. Harris-Warrick.]

MUSIC 686 Seminar in Baroque Music
Spring. 4 credits. D. Yearsley.
Topic: Bach's Clavier-Übung Series and Keyboard Practice in the Mid-18th Century.
This course examines not only the sources, reception, and influence of Bach's published keyboard works (beginning with the Six Partitas of 1731 and culminating with the Goldberg Variations of 1741/2), but also investigates the social contexts, pedagogical approaches, and moral values embodied in these seminal collections.

MUSIC 688 Seminar in Classical Music
Fall. 4 credits. J. Webster.
Topic: Haydn.

[MUSIC 689 Seminar in Music of the Romantic Era
Spring. 4 credits. Not offered 2001–2002. D. Rosen.]

MUSIC 690 Seminar in Music of the Twentieth Century
Spring. 4 credits. R. Sierra.
Topic: Ligeti.

MUSIC 691–692 Historical Performance
691, fall; 692, spring. 4 credits each term. Prerequisite: permission of instructor. Hours TBA. M. Bilson.
Lessons on the major instrument with supplementary study and research on related subjects.

[MUSIC 693 Seminar in Performance Practice
Spring. 4 credits. Not offered 2001–2002. N. Zaslaw.
String bands, orchestral discipline, and orchestral repertories in Paris and Versailles in the seventeenth century and their dissemination in Western Europe. Special emphasis on the music and prefaces of Georg Muffat.]

MUSIC 697–698 Independent Study and Research
697, fall; 698, spring. Credit TBA. Staff.

[MUSIC 785–786 History of Music Theory
785, fall; 786, spring. 4 credits each term. Not offered 2001–2002.]

MUSIC 787 History and Criticism
Spring. 4 credits. A. Richards.

[MUSIC 789 Liturgical Chant in the West
Spring. 4 credits. Not offered 2001–2002.]

MUSIC 901–902 Thesis Research
901, fall; 902, spring. Up to 6 credits each term, TBA. Offered for S-U only.
Limited to doctoral students in music who have passed the Admission-to-Candidacy Exam.

NEAR EASTERN STUDIES

R. Brann, (chair) and director of Graduate Studies (fall); S. Alatout, K. Haines-Eitzen (director of Undergraduate Studies), G. Kadish, D. I. Owen, (director of the Program of Jewish Studies); D. Powers, G. Rendsburg, N. Scharf, M. Segol, S. Shoer, D. Starr, S. Toorawa, director of graduate studies (spring), M. Younes, J. Zorn
Joint faculty: M. Bernal (Emeritus)

The Department

The Department of Near Eastern Studies (360 Rockefeller Hall, 255–6275) offers courses in Near Eastern civilization including archaeology, history, religions, languages, and literatures. These course offerings treat the Near East from the dawn of history to the present and emphasize methods of historical, cultural, and literary analysis. Students are encouraged to take an interdisciplinary approach to the religions and cultures of the region and their articulation during antique, late antique, medieval, and modern times.

Distribution Requirements

Any two Near Eastern Studies history or archaeology courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the social sciences/history. Any two Near Eastern Studies civilization or literature courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the humanities. NES 197 or NES 251 plus any other Near Eastern studies course will constitute a sequence to fulfill the distribution requirement in either social sciences/history or humanities, depending on the second course used in combination with 197 or 251. All 200- or 300-level language courses may fulfill the humanities requirement.

The Major

The precise sequence and combination of courses chosen to fulfill the major is selected in consultation with the student's adviser. All majors must satisfy the following requirements (no course may be used to satisfy two requirements; S-U options not permitted):

A. Qualification in two Near Eastern languages or proficiency in one.

B. Nine three- or four-credit NES courses, which must include the following:

1. NES 197 or 251.

2. Two 200-level NES survey courses, one whose chronological parameters fall within the period 3000 B.C.E to 600 C.E., and one whose chronological parameters fall within the period 600 C.E. to the present. The following are examples (a complete list can be obtained in the department office):

3000 B.C.E to 600 C.E.

NES 223, Introduction to the Hebrew Bible

NES 261, Ancient Seafaring

NES 229, Introduction to the New Testament

NES 295, Introduction to Christian History

600 C.E. to the present

NES 234, Arabs and Jews: Cultures in Confluence and Conflict: The Pre-Modern Period

NES 235, Arabs and Jews: The Modern Period

NES 250, Muhammad and Mystics in the Literatures of the Islamic World

NES 258, Islamic History 1258–1914

NES 294, Modern History of the Near East

3. At least two NES courses at the 300 level or above (one of which may be NES 301, 302, 311, or 312).

Prospective majors should discuss their plans with the director of undergraduate studies before formally enrolling in the department. To qualify as a major, a cumulative grade average of C or better is required.

Honors. Candidates for the degree of Bachelor of Arts with honors in Near Eastern Studies must fulfill the requirements of the appropriate major study and enroll in the honors course, NES 499, in the fall and spring semesters of their senior year. For admission to the honors program, candidates must have a cumulative average of B+ or better and have demonstrated superior performance overall in Near Eastern Studies courses. After consulting their major adviser, candidates should submit an outline of their proposed honors work to the department **during the second semester of their junior year**.

Study abroad. Near Eastern Studies majors may choose to study in the Near East during their junior year. There are various academic programs in the countries of the Near East that are recognized by the Department of Near Eastern Studies and that allow for the transfer of credit. Archaeological field work on Cornell-sponsored projects in the Near East may also qualify for course credit.

First-Year Writing Seminars

For descriptions, consult the John S. Knight Institute brochure for times, instructors, and descriptions.

Language Courses

NES 101–102 Elementary Modern Hebrew I and II (also JWST 105–106)
101, fall; 102, spring. 6 credits each term. *NES 102 satisfies the language qualification.* Prerequisite for NES 102: 101 or permission of instructor. Enrollment limited to 17 students in each section. S. Shoer.
Intended for beginners. This course provides a thorough grounding in reading, writing, grammar, oral comprehension, and speaking. Students who complete the course are able to function in basic situations in a Hebrew-speaking environment.

NES 105–106 Elementary Hindi-Urdu (also HINDI 101–102)
Fall, spring. 6 credits each term. M. Farooqi.
For description, see HINDI 101–102.

NES 107 Introduction to Urdu Script (also HINDI 125)
Spring. 1 credit. M. Farooqi.
For description, see HINDI 125.

NES 111–112 Elementary Arabic I and II
111, fall; 112, spring. Enrollment limited to 17 in each session. 6 credits each term. *NES 112 satisfies the language qualification.* NES 111 is prerequisite for 112, or permission of instructor. M. Younes.
The course provides a thorough grounding in all language skills: listening, speaking, reading, and writing. It starts with spoken Arabic and gradually integrates Modern Standard Arabic in the form of listening and reading texts. Emphasis is on learning the language through using it in meaningful contexts. Students who successfully completes the two-semester sequence are able to: (1) understand and actively participate in simple conversations involving basic practical and social situations (introductions, greetings, school, home and family, work, simple instructions, etc.); (2) read Arabic material of limited complexity and variety (simple narrative and descriptive texts, directions, etc.); (3) write notes and short letters describing an event or a personal experience. An important objective of the course is to familiarize students with basic facts about the geography, history, and culture of the Arab world.

[NES 123–124 Elementary Biblical Hebrew I & II (also JWST 123–124, RELST 123–124)
123, fall; 124, spring. 3 credits each term. *NES 124 satisfies the language qualification.* Enrollment limited to 17 students. Not offered 2001–2002. Staff.
The course is intended to develop basic proficiency in reading the Hebrew Bible. The first semester emphasizes introductory grammar and vocabulary. The second semester focuses on reading selected passages in the Hebrew Bible, with further development of vocabulary and grammar.]

NES 133–134 Qur'anic and Classical Arabic
133, fall; 134, spring. 4 credits each semester. M. Younes.
This course is designed for students who are interested in reading the language of the Qur'an and *Hadiths* (Sayings of the Prophet) with accuracy and understanding. Authentic texts in the form of chapters from the Qur'an and *Hadiths* are presented and analyzed, and basic grammatical structures are discussed, explained, and practiced systematically. Interested students are encouraged to memorize excerpts from the texts. At the end of the two-semester sequence, the successful student has mastered a working vocabulary of over 1,000 words, correct pronunciation, and the most commonly used grammatical structures. In addition, the course provides the student with a firm foundation on which to build an advanced study of Classical Arabic.

NES 201–202 Intermediate Modern Hebrew I and II (also JWST 201–202) @
201, fall; 202, spring. Enrollment limited to 15 students in each section. 4 credits each term. *NES 201 provides language proficiency.* Prerequisites for NES 201, 102 or permission of instructor; for NES 202, 201 or permission of instructor. N. Scharf.
A sequel to NES 101–102. Continued development of reading, writing, grammar, oral comprehension, and speaking skills. The course introduces Hebrew literature and Israeli culture through the use of texts and audio-visual materials.

NES 211–212 Intermediate Arabic I and II @
211, fall; 212, spring. Enrollment limited to 15 students in each section. 4 credits each term. *NES 211 provides language proficiency.* Prerequisites: for NES 211, one year of Arabic or permission of instructor; for NES 212, 211 or permission of instructor. M. Younes.
A sequel to NES 111–112. Continued development of the four language skills through extensive use of graded materials on a wide variety of topics. Increasing attention is given to developing native-like pronunciation and grammatical accuracy, but the main focus is on developing communication skills. The student who successfully completes 212 is able to: (1) understand and express himself or herself in Arabic in situations beyond the basic needs; (2) read and comprehend written Arabic of average difficulty; (3) write a letter, a summary of a report, or a reading selection. An appreciation of Arabic literature and culture is sought through the use of authentic materials.

NES 301–302 Advanced Modern Hebrew I and II (also JWST 301–302) @ (IV)
301, fall; 302, spring. Limited to 15 students. 4 credits each term. Prerequisite for NES 301: 202 or equivalent, with permission of instructor. Prerequisite for NES 302: 301 or equivalent, with permission of instructor. This sequence may be used to fulfill the humanities distribution requirement in literature. N. Scharf.
Advanced study of Hebrew through the analysis of literary texts and expository prose. This course employs a double perspective: language is viewed through literature and literature through language. Students develop composition skills by studying language structures, idioms, and various registers of style.

NES 311 Advanced Arabic I @ (IV)
Fall. 4 credits. Prerequisite: NES 212 or permission of instructor. Limited to 15 students. D. Starr.
Students are introduced to authentic, unedited Arabic language materials ranging from poems, short stories, and plays to newspaper articles dealing with social, political, and cultural issues. Emphasis is on developing fluency in oral expression through discussions of issues presented in the reading selections. A primary objective of the course is the development of writing skills through free composition exercises in topics of interest to individual students.

NES 312 Advanced Arabic II @ (IV)
Spring. 4 credits. Limited to 15 students. Prerequisite: NES 311, or permission of instructor. S. Toorawa.
This course is a continuation of NES 311 using similar but more challenging materials. There is more focus on the writing skills, the development of native-like pronunciation, and accurate use of grammatical structures than in NES 311. Each student is required to make an oral presentation in Arabic on a topic of his/her choice and submit a written version of the presentation.

NES 313 Classical Arabic Texts (also RELST 313) # @ (IV)
Fall. 4 credits. Prerequisite: NES 212 or equivalent. D. Powers.
This course will introduce students to different genres of literary Arabic. We read, translate and discuss selected texts written in classical

and modern standard Arabic. Review of morphology and grammar.

[NES 330–331 Hieroglyphic Egyptian I and II @ # (IV)
330 fall; 331 spring. 4 credits. Not offered 2001–2002. Staff.]

[NES 333–334 Elementary Akkadian I & II (also NES 633–634) @ # (IV)
333, fall; 334, spring. 4 credits each term. Prerequisite for NES 334: 333 or permission of instructor. Prerequisite for NES 634: 633 or permission of instuctor. Not offered 2001–2002. D. I. Owen.
An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide a background for study of the language. Knowledge of another Semitic language is helpful but not essential.]

[NES 337–338 Ugaritic I & II (also NES 637–638) @ # (IV)
337, fall; 338, spring. 4 credits. Prerequisite: knowledge of another Semitic language (preferably Hebrew). Not offered 2001–2002. G. Rendsburg.
Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.]

[NES 416 Structure of the Arabic Language (also LING 416)
Spring. 4 credits. Prerequisite: NES 112 or one year of Arabic. Not offered 2001–2002. M. Younes.]

NES 420 Readings in the Hebrew Bible (also JWST 420, RELST 420) @ # (IV)
Fall. 4 credits. Prerequisite: 1 year of biblical or modern Hebrew. Course may be repeated for credit. R. Brann.
An advanced course in reading selected portions of the Hebrew Bible. Emphasis is placed on the philological method, with attention to literary, historical, and comparative concerns.

[NES 433 Introductory Sumerian I (also NES 631) @ # (IV)
Fall. 4 credits each semester. Prerequisite: permission of instructor. Not offered 2001–2002. D. I. Owen.
This course consists of an introduction to the Sumerian cuneiform script and grammar of the third millennium B.C.E. Readings in selected Sumerian economic, legal, and historical inscriptions, a basic introduction to Sumerian grammar and script, linguistic connections, and a survey and discussion of Sumerian civilization and culture. Students who have taken or plan to take Akkadian, Hebrew, or Hittite linguistics or are otherwise interested in the history of language should consider this course.]

[NES 434 Introductory Sumerian II (also NES 632) @ # (IV)
Spring. 4 credits each semester. *Satisfies language qualification.* Prerequisite: NES 433/631. Not offered 2001–2002. D. I. Owen.
Continued study of Sumerian grammar and syntax; further readings in selected Sumerian economic, legal, and historical inscriptions of the late third millennium B.C.E.; additional discussion of Sumerian civilization and culture.]

[NES 435 Aramaic I @ # (IV)
Fall. 4 credits. Prerequisite: knowledge of Hebrew. Enrollment limited to 15 students. Not offered 2001–2002. G. Rendsburg.
A panoply of Aramaic materials is read during the course, including selections from ancient Aramaic inscriptions, the biblical books of Ezra and Daniel, Qumran texts, and the Targumim. Explanations of grammar, syntax, and vocabulary are based on the linguistic data which occur in the readings.]

NES 622 Old Avestan (also LING 629)
Fall and spring. 4 credits. Prerequisite: LING 621. M. Weiss.
For description, see LING 629.

NES 623 Comparative Grammar of Anatolian
Spring. 4 credits. M. Weiss.
For description, see LING 620.

[NES 631 Introductory Sumerian I (also NES 433)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. D. I. Owen.
For description, see NES 433 under Near Eastern Languages.]

[NES 632 Introductory Sumerian II (also NES 434)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. D. I. Owen.
For description, see NES 434 under Near Eastern Languages.]

[NES 633–634 Elementary Akkadian I and II (also NES 333–334)
633, fall; 634, spring. 4 credits each term. Prerequisite for NES 634: 633 or permission of instructor. Not offered 2001–2002. D. I. Owen.
An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide the background for the study of the language. Knowledge of another Semitic language helpful but not essential.]

[NES 637–638 Ugaritic I & II (also NES 337–338)
637, fall; 638, spring. 4 credits. Prerequisite: knowledge of another Semitic language (preferably Hebrew). Not offered 2001–2002. G. Rendsburg.
Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.]

Archaeology

[NES 261 Ancient Seafaring (also ARKEO 275, JWST 261) @ # (III)
Fall. 3 credits. Enrollment limited to 80 Students. Not offered 2001–2002. D. I. Owen.
A survey of the history and development of archaeology under the sea. Considers the role of nautical technology and seafaring among the maritime peoples of the ancient Mediterranean world—Canaanites, Minoans, Mycenaeans, Phoenicians, Hebrews, Greeks, and Romans—as well as the riverine cultures of Mesopotamia and Egypt. Evidence for maritime trade, economics, exploration and colonization, and the role of the sea in religion and mythology is examined.]

NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, and RELST 264) @ # (III)
Spring. 3 credits. Enrollment limited to 50 students. J. Zorn.
A survey of the principal archaeological developments in Canaan/Israel from the Neolithic period (ca 9000 B.C.E.) to the Babylonian Exile (586 B.C.E.). Includes an introduction to archaeological methodology used in the reconstruction of ancient cultures, as well as the basic bibliography of the field. Emphasis is placed on the use of archaeological data for understanding major problems in Israelite history and archaeology: such as the dating of the cultural milieu of the patriarchs, the dating and geographical setting of the Exodus and the Israelite conquest, and the origin and history of the Philistines. Special lectures are devoted to topics such as: warfare, cult, food production and storage, writing, and water systems. Recommended for students planning to participate in excavations in Israel.

NES 268 Ancient Egyptian Civilization (also JWST 268, ARKEO 268) @ # (III or IV)
Spring. 3 credits. G. Kadish.
The course surveys the history and culture of pharaonic Egypt from its prehistoric origins down to the conquest by Alexander the Great. Within a chronological framework, the following themes and topics are considered: the development of the Egyptian state (monarchy, administration, ideology); social organization (class, gender and family, slavery); economic factors; empire and international relations; science and technology; and such cultural factors as religion, literature, writing, art and architecture. There is considerable use of ancient texts in translation and slides. This is basically a lecture course, but there is opportunity for questions and clarifications.

NES 360 The Origins of Mesopotamian Civilization (also JWST 360, ARKEO 360) @ # (III or IV)
Fall. 4 Credits. D. I. Owen.
An introduction to the language, literature, history, culture and archaeology of Syro-Mesopotamia in the fourth and third millennia B.C.E. The course focuses on Sumerian civilization from its emergence in the archaeological record in the fourth millennium until its disappearance around 2000 B.C.E. In addition, it emphasizes the parallel development of the Semitic peoples in Syria (Eblaites) and upper Mesopotamia (Akkadians). A special feature of the course will be a basic introduction to the Sumerian language

utilizing original cuneiform tablets in the collection of the Department of Near Eastern Studies.

NES 361 Sumerian Language and Culture (also JWST 361, ARKEO 361) @ # (IV)
Spring. 4 credits. D. I. Owen.
A continuation of NES 360, the course focuses on a more intense introduction to Sumerian language and grammar with additional readings in literature in translation. Particular emphasis is placed on the reading and interpretation of original texts from the Cornell collection and their use in the reconstruction of Mesopotamian history and culture in the third millennium.

[NES 366 The History and Archaeology of the Ancient Near East (also ARKEO 366, JWST 366) @ # (III or IV)
Fall. 4 credits. Prerequisite: ARKEO 100 or permission of instructor. Not offered 2001–2002. D. I. Owen.
A survey of the history and archaeology of the major civilizations of the Near East from the Persian Gulf to Syria and Anatolia. The course covers the time span from the prehistoric period to the Persian conquest. Sumerian, Babylonian, Eblaite, Elamite, West Semitic, Assyrian, and Persian cultures are discussed with particular emphasis on indigenous development and cross-cultural contacts.]

Civilization

[NES 197 Introduction to Near Eastern Civilization (also JWST 197 and RELST 197) @ # (IV)
Fall. 3 credits each term. Not offered 2001–2002. D. I. Owen.]

[NES 244 Introduction to Ancient Judaism (also JWST 244 and RELST 244) @ # (III or IV)
Spring. 3 credits. Not offered 2001–2002. G. Rendsburg.
This course focuses on the development of Judaism as a religion and as a civilization in antiquity. Particular emphasis is placed on theological development culminating in monotheism, the role of the covenant, law and society, sacrifice and prayer as modes of worship, and similar topics. Jewish civilization is placed within the context of ancient civilizations (Canaan, Egypt, Babylon, Persia, Greece, Rome). Texts studied include selections from the Bible, the Apocrypha, the Dead Sea Scrolls, Josephus, and the Mishnah. All readings are in English translation.]

NES 246 Jewish Mysticism (Also RELST 246, JWST 246) @ # (IV)
Fall. 3 credits. M. Segol.
This course introduces students to the body of Jewish Mystical literature—the Kaballah. In this course we study the Kaballah as a literary canon, reading, considering, and analyzing a selection of the core works from the five major periods of Jewish mystical thought. While we survey mystical traditions from the Talmudic period through modernity, the central focus is on the rich medieval stream known as kabbalah. Among the issues explored are: the nature of mystical experience; images of God, world, and Person; sexual and gender symbolism (images of the male and female); constructions of body, mind, and spirit; the problem of evil; problems presence and absence; mysticism, language, and silence; mysticism and community; meditative and ecstatic practices (ranging from visualization to chant, letter combination to modulated breathing); kabbalistic myth and ritual innovation; and kabbalistic interpretations of history. Readings consist of selections from primary sources coupled with complementary selections from Jewish history, comparative religion, and other relevant disciplines. The course is taught in English, and all works are studied in translation.

[NES 251 Judaism, Christianity, and Islam (also JWST 251, RELST 251) @ # (IV)
Fall. 3 credits. Not offered 2001–2002. R. Brann and K. Haines-Eitzen.]

NES 255 Introduction to Islamic Civilization (also HIST 253, RELST 255) @ # (III or IV)
Fall. 3 credits. D. Powers.
We consider the major themes of Islamic civilization as they developed from the lifetime of Muhammad until the twentieth century. While the readings provide the student with the chronology of Islamic History, lectures are devoted to an analysis of thematic units, such as art and architecture, science and cities. The class meets three times weekly, and the classroom format is that of a lecture/discussion in which students are encouraged to participate actively. Lectures are accompanied by slide presentations, when appropriate.

[NES 281 Gender and Society in the Muslim Middle East (also RELST 281, WOMNS 281) @ (III)
Spring. 3 credits. Not offered 2001–2002. Staff.]

[NES 291 Arab Society and Culture (III)
Fall. 3 credits. Enrollment limited to 25 students. Not offered 2001–2002. M. Younes.
The focus of this course is Arab society in the twentieth century. We start with a definition of the term "Arab" and address the issue of whether there is one or several Arab nations. This is followed by a detailed examination of the following topics: the role of religion, history, and language in shaping modern Arab society; Arab identity and the development of Arab nationalism; the Arab-Israeli conflict; the conflict between secular and religious movements; the political systems of the different Arab countries; ethnic and religious groups; the distribution of resources (the super-rich and the destitute) and resulting conflicts; education; and finally the family and the status of women. No prior knowledge of Arabic is required.]

NES 339 Islamic Spain: Culture and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339/699, NES 639) @ # (IV)
Fall. 4 credits. R. Brann.
This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political, and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusi Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.

[NES 351 Law, Society, and Culture in the Middle East, 1200–1500 (also NES 651, RELST 350, HIST 372/652) @ # (III)
Fall. 4 credits. Enrollment limited to 25 students. Not offered 2001–2002. D. Powers.
After surveying the historical development of Islamic Law, the seminar focuses on the structure and function of the Islamic legal system in the thirteenth, fourteenth, and fifteenth centuries, using legal documents, judicial opinions, and court cases (all in English translation) to elicit major themes and issues; (e.g., the Marital regime, women and property, social hierarchies, law, and the public sphere).]

NES 357 Islamic Law and Society (also RELST 356) @ # (III)
Spring. 4 credits. D. Powers.
The *Shari'ah*, or sacred law of Islam, embodies the totality of God's commands that regulate the life of every Muslim in all its aspects. The *Shari'ah* comprises on an equal basis ordinances regarding worship and ritual as well as political and, in Western terms, strictly legal rules. This course examines the relationship between the *Shari'ah* and the major social, economic, and political institutions of Islamic society. Topics discussed include the status of women, slaves, and non-Muslims; attitudes toward the economy and the arts; the significance of *jihad* (holy war); the nature of the Muslim city; and the relationship between the religious establishment and the government. Attention is given to the function of the *Shari'ah* in the modern world, with special reference to the problems and challenges of legal reform.

[NES 363 Society and Law in the Ancient Near East (also JWST 363) @ # (III)
Fall. 4 credits. Not offered 2001–2002. Staff.]

[NES 371 A Mediterranean Society, and Its Culture: The Jews and Judaism under Classical Islam (also JWST 371, RELST 371, COM L 371) @ # (IV)
Spring. 4 credits. Not offered 2001–2002. R. Brann.
The Jewish encounter with Islamic civilization (tenth through thirteenth centuries) reshaped the conditions of Jewish existence in Mediterranean lands and redefined the culture and world-view of rabbinic Judaism. The seminar studies these transformations by learning how to read travelers accounts and documentary materials (personal correspondence, court records, economic and communal registers) preserved in the so-called "Cairo Genizah." We also examine selected texts produced by and for the benefit of Jewish literary and religious intellectuals, such as Saadiah Gaon, Solomon ibn Gabirol, Judah Halevi, and Moses Maimonides.]

[NES 464 The Herodotean Moment (also GOVT 454, HIST 454) # (III)
Spring. 4 credits. Not offered 2001–2002. M. Bernal.]

[NES 639 Islamic Spain: Culture and Society (also NES 339, JWST 339, COM L 334, RELST 334, SPAN L 339/699)
Fall. 4 credits. Not offered 2001–2002. R. Brann.
This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political, and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusi Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.]

[NES 651 Law, Society and Culture in the Middle East, 1200–1500 (also NES 351, RELST 350, HIST 372/652)
Fall. 4 credits. Limited to 25 students. Not offered 2001–2002. Staff.
For description, see NES 351.]

[NES 696 Conceptualizing Cultural Contact (also GERST 696, COM L 696)
Spring. 4 credits. Not offered 2001–2002. Staff.]

History

[NES 239 Cultural History of the Jews of Spain (also JWST 239, COM L 239, RELST 239, SPAN L 239) # (IV)
Spring. 3 credits. Not offered 2001–2002. Staff.
A survey of the cultural history of the Jews in Spain from the late Visigothic period until the converso crisis of the fourteenth and fifteenth centuries and the Expulsion, focusing on the interaction of Jewish with Muslim and Christian cultures and the stable yet evolving sense of a "Sefardi" identity. The course establishes historical and literary-critical frames for reading primary sources in translation, including secular and synagogal poetry, philosophy and kabbalah, biblical hermeneutics, historiography, polemics, and other genres.]

[NES 261 Ancient Seafaring (also JWST 261, ARKEO 275) @ # III
Fall. 3 credits. Not offered 2001–2002. D. I. Owen.]

NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, RELST 264) @ # III
Spring. 3 credits. Enrollment limited to 50 students. J. Zorn.
For description, see NES 263 under Near Eastern Archaeology.

[NES 266 Jerusalem through the Ages (also JWST 266, ARKEO 266, RELST 266) @ # (III)
Fall. 3 credits. Not offered 2001–2002. J. Zorn.]

[NES 290 History of Zionism and the Birth of Israel (also JWST 290, HIST 267) @ (III)
Spring. 3 credits. Not offered 2001–2002. Staff.]

NES 294 Imagining the Modern Middle East (also JWST 294, GOVT 358, HIST 288) @ (III)
Fall. 4 credits. Fulfills the college distribution requirement in history or the social sciences. S. Alatout.
This course traces the emergence of contemporary Middle East back to the political, social, and cultural encounters between "East" and "West". Readings bring together works in the history and politics of the Middle East as well as political theory. Themes include modernization; modern colonial encounters; nationalist responses; the postcolonial state; and Islamic, feminist, and sexual critiques of the postcolonial state.

[NES 295 Introduction to Christian History (also JWST 295, RELST 295, HIST 299) # (III or IV)
Spring. 3 credits. Not offered 2001–2002. K. Haines-Eitzen.
This course offers an introduction of Christianity from the apostle Paul through the seventeenth century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We explore the origins of Christianity within Judaism in the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the vairous controversies that occupied the church throughout its history. The course draws on primary literary sources (from biblical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.]

NES 321 Heresy and Orthodoxy in Early Christianity (also RELST 321) # (IV)
Spring. 4 credits. Limited to 17 students. K. Haines-Eitzen.
In this course we explore the varieties of Christian thought and practice from the first through the fourth centuries. In its earliest centuries, Christianity consisted of a diverse range of movements, each of which was considered "heretical" by its opponents, one of which came to dominate all the others and so earned for itself the designation "orthodoxy." The "heresies" we study include Adoptionism, Marcionism, Gnosticism, Montanism, Arianism, and Donatism. Consideration is also given to the ways in which charges of "heresy" intersected with competing views about women in the early Church, the relationship between Judaism and Christianity, the construction of authority, and the content, function, and sacredness of early Christian books.

[NES 351 Law, Society, and Culture in the Middle East, 1200–1500 (also NES 651, RELST 350, HIST 372/652) @ # (III)
Fall. 4 credits. Enrollment limited to 25 students. Not offered 2001–2002. D. Powers.
After surveying the historical development of Islamic Law, the seminar focuses on the structure and function of the Islamic legal system in the thirteenth, fourteenth, and fifteenth centuries, using legal documents, judicial opinions, and court cases (all in English translation) to elicit major themes and issues; (e.g., the Marital regime, women and property, social hierarchies, law, and the public sphere).]

[NES 356 Islamic History: The Age of Ibn Khaldun (also HIST 317) @ # (III)
Spring. 4 credits. Enrollment limited to 15 students. Prerequisite: NES 257 or equivalent. Not offered 2001–2002. D. Powers.]

[NES 366 The History and Archaeology of the Ancient Near East (also ARKEO 366, JWST 366) @ # (III or IV)
Fall. 4 credits. Prerequisite: ARKEO 100 or permission of instructor. Not offered 2001–2002. D. I. Owen.
For description, see Near Eastern Archaeology.]

[NES 393 Religion and Politics in the Middle East (also RELST 393) @ (III)
Fall. 4 credits. Enrollment limited to 25 students. Not offered 2001–2002.]

[NES 395 International Relations of the Middle East (also GOVT 392) @ (III)
Fall. 4 credits. Not offered 2001–2002.]

[NES 397 Arab Israeli Conflict (also JWST 397) (III)
Spring. 4 credits. Enrollment limited to 50 students. Prerequisite: NES 294 or permission of instructor. Not offered 2001–2002. Staff.]

NES 418 Seminar in Islamic History: 600–750 (also HIST 460, NES 618, RELST 418) @ # (III)
Spring. 4 credits. Knowledge of Arabic is desirable, but not required. D. Powers.
An examination of Islamic history from 600-750, with special attention to interpretive issues relating to the career of the Prophet Muhammad; the Arab conquests, the emergence of the Caliphate, conversion to Islam, and the Abbasid revolution. Students read primary sources in English translation, especially *The History of Tabari*.

[NES 651 Law, Society, and Culture in the Middle East, 1200–1500 (also NES 351, RELST 350, HIST 372/652)
Fall. 4 credits. Enrollment limited to 25 students. Not offered 2001–2002. D. Powers.
For description, see NES 351.]

Literature

[NES 223 Introduction to the Hebrew Bible I (also JWST 223, RELST 223) @ # (IV)
Fall. 3 credits. Not offered 2001–2002. G. Rendsburg.
This is the first course of a two-semester sequence. The main goal is to introduce students to the literature of the Hebrew Bible, which is accomplished by concentrating on the Torah and the historical material in Joshua through Samuel, that is, the material which covers the period from Israel's origins through King David. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, mythology, and law.]

[NES 224 Introduction to the Hebrew Bible II (also JWST 224, RELST 224) @ # (IV)
Fall. 3 credits. Not offered 2001–2002. G. Rendsburg.

This is the second of a two-semester sequence, but one does not need to take NES 223 in order to take this course. The main goal is to introduce students to the literature of the Hebrew Bible. This is accomplished by concentrating on the historical material in Kings, the books of the Prophets, and the book of Job, that is, the material which covers the period from King Solomon through the end of the biblical era. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, and mythology. (Note: students who have taken NES 227, Introduction to the Prophets are ineligible to take this course; NES 224 is intended to replace NES 227). Students interested in a one-credit option, reading the texts covered in class in the original Hebrew, should also enroll in NES 325.]

[NES 227 The Bible and the Literature of the Ancient Near East (also JWST 227 and RELST 227) @ # (IV)

Spring. 3 credits. Not offered 2001–2002. J. Zorn.

The Hebrew Scriptures are a composite work containing a wide array of literary forms: historical works, prophetic texts, wisdom literature, and so on. These works themselves were compiled form an even wider assortment of text types: cosmologies, folk tales, love songs, palace records, treaties, letters, and more. These texts were not written in a cultural vacuum but find a home in the literary work of Israel's neighbors, including the Mesopotamians, Egyptians, Hittites, and others. This course examines the different literary genres found in the Hebrew Scriptures in comparison with similar material from the ancient Near East. The intent is to clarify the interpretation, dating, and purpose of the biblical material.]

[NES 229 Introduction to the New Testament (also RELST 229 and JWST 229) @ # (IV)

Fall. 3 credits. Not offered 2001–2002. K. Haines-Eitzen.

This course provides a literary and historical introduction to the earliest Christian writings, most of which eventually came to be included in the New Testament. Through the lens of the gospel narratives and earliest Christian letters, especially those of Paul, the course explores the rich diversity of the early Christian movement, from its Jewish roots in first century Palestine through its development and spread to Asia Minor and beyond. Careful consideration is given to the political, economic, social, cultural, and religious circumstances that gave rise to the Jesus movement, as well as those that facilitated the emergence of various manifestations of early Christian beliefs and practices. (Students who have had at least one year of Greek and would like to participate in a one-credit, New Testament Greek reading weekly seminar should also enroll in NES 329).]

NES 235 Jews and Arabs in Conflict: The Modern Period (also JWST 235) @ (III)

Spring. 3 credits. D. Starr.

This course traces the history and representations of Arab-Jewish relations from the late 19th Century to the present. The majority of class time is devoted to discussing literary works and films by Jews from Arab countries, Israelis from a variety of backgrounds, Palestinians including Palestinians in Israel, under Israeli occupation, and in the diaspora and Arabs representing a variety of other nationalities. Primary source documents and critical studies provide the historical, cultural, and political frameworks for our discussions. Topics covered include: Zionism, Arab nationalism, minority relations, establishment of the State of Israel, Palestinian dispersion, Arab-Israeli wars, terrorism, peace negotiations, establishment of the Palestinian Authority, post-Zionism, and normalization.

[NES 236 Israel: Literature and Society (also JWST 236, COM L 246) @ (IV)

Fall. 3 credits. Not offered 2001–2002. Staff.]

NES 239 Cultural History of the Jews of Spain (also JWST 239, COM L 239, RELST 239, SPAN L 239) # (IV)

Spring. 3 credits. M. Segol.

For description, see NES 239 under Near Eastern History.

[NES 250 Muhammad and Mystics in the Literatures of the Islamic World (also RELST 254, COM L 250) @ (IV)

Spring. 3 credits. Not offered 2001–2002. S. Toorawa.

The life of the Prophet Muhammad and the teachings of Muslim mystics (sufis) have provided material and inspiration for numerous writers of the Islamic world. We use our readings, in English translation, of works in Arabic, Malay, Panjabi, Persian, Swahili, Turkish, and Urdu, to help us interrogate the ways in which Muhammad, mystics, and mysticism have shaped religion, literature, and society.]

NES 256 Introduction to the Q'uran (also COM L 256, RELST 213 and JWST 256) @ # (IV)

Spring. 3 credits. S. Toorawa.

In 7th century Arabia, a merchant by the name of Muhammad shared with his followers the Book of God as revealed to him through the archangel Gabriel. That book is now a source of spiritual guidance and law for over a billion people the world over. In this course, a literary, historical and religious introduction to the Quran, we explore: the circumstances of the Quran's revelation; its written compilation; its narrative structure; its major themes; its connections to and departures from the Hebrew Bible and the New Testament; Quranic commentary; translation and the problems associated with it; the impact of the Quran on political and religious thought; and the influence of the Quran on literature.

[NES 299 Hebrew Bible and Arabic Qur'an in Comparative Perspective (also RELST 299, COM L 299, JWST 299) @ # (IV)

Spring. 3 credits. Not offered 2001–2002. R. Brann.

This course examines (in translation) the Hebrew Bible and Arabic Qur'an as foundational documents of their respective religious traditions and as the texts by which their corresponding religious communities came to constitute and define themselves. The approach in this course is comparative, analyzing literary aspects of the parallel narrative traditions on Creation, the Noah story, Abraham/Ibrahim and his sons, the Joseph/Yusuf cycle, as well as postbiblical and Islamic elaborations of the Solomon/Sheba material. The class also discusses the concepts of revelation, prophethood, community, and notions of history, eschatology, and apocalypse set forth in the Hebrew Bible and Arabic Qur'an. The problematic nature of revealed scripture in monotheistic religion and the limited relevance of the idea of "influence" in the Near Eastern context is also studied.]

NES 313 Classical Arabic Texts (also RELST 313) @ # (IV)

Fall. 4 credits. Prerequisite: NES 212 or equivalent. D. Powers.

[NES 319 Crime and Conflict in the Modern Arabic Novel (also COM L 319) @ (IV)

Fall. 4 credits. Not offered 2001–2002. S. Toorawa.

In this course we read seven modern Arabic novels in translation in which the themes of crime and conflict are uppermost, including Nobel Laureate Naguib Mahfouz's *The Thief and the Dogs*, Nawal El Saadawi's *Woman at Point Zero*, and Rachid El Daif's *Dear Mister Kawabata*. We complement the readings with three films.]

[NES 320 Women in the Hebrew Bible (also JWST 320, WOMNS 322) @ # (IV)

Spring. 3 credits. Not offered 2001–2002. G. Rendsburg.

This course features stories about women in the Hebrew Bible. Through literary readings of these texts we attempt to understand the portrayal of women (characteristics and roles assigned by male writers); the social reality represented; and the role of narrative in the promotion of ideologies. All texts in English translation. Hebrew texts optional.

There is a one-credit option for students who wish to meet 1 hour/week to read the texts in the Hebrew original (NES 326).]

[NES 323 Reinventing Biblical Narrative (also JWST 323, RELST 323) @ # (IV)

Spring. 4 credits. Not offered 2001–2002. K. Haines-Eitzen.

Narratives, particularly sacred narratives, are not static or fixed but rather infinitely flexible and malleable. Subject to multiple retellings—elaborations, modifications, and deletions—narratives take on lives of their own even after they come to be written down. What happens to sacred stories when they are heard and read by different communities of interpreters? This is the broad question at the heart of this course, which explores the diverse interpretations of biblical narratives—especially the stories and characters in the book of Genesis—found Jewish and Christian literature from the second century B.C.E. through the third century C.E. Writers like the Hellenistic Jewish philosopher Philo and the Jewish historian Josephus, bodies of literature like Jewish and Christian pseudepigrapha and apocrypha, the New Testament, gnostic literature, early rabbinic literature, and patristic writers are sources we investigate in this class.]

[NES 325 Introduction to the Hebrew Bible—Seminar (also JWST 325, RELST 318)

Fall. 1 credit. Not offered 2001–2002. G. Rendsburg.

This is a one-credit option for students who wish to meet one day each week to read the texts covered in class in the original Hebrew. Must be concurrently enrolled in NES 223 or NES 224.]

[NES 326 Women in the Hebrew Bible—Seminar (also JWST 326, WOMNS 326)
Spring. 1 credit. Not offered 2001–2002. G. Rendsburg.
This is a one-credit option for students who wish to meet one hour each week to read the texts in the Hebrew original. Must be concurrently enrolled in NES 320.]

[NES 328 Gnosticism and Early Christianity (also JWST 328, RELST 330) @ # (IV)
Spring. 4 credits. Not offered 2001–2002. K. Haines-Eitzen.
An in-depth exploration of early Christian Gnosticism—its literatures, beliefs, and practices. Early Christian Gnosticism came to be considered heretical by early proto-orthodox Church Fathers. In this course, however, we do not simply read the condemnations written by the opponents of gnostic thought; rather, we focus our attention on reading (in English translation) substantial portions of the texts written by the Gnostics themselves and found at Nag Hammadi, Egypt, in 1945. We explore gnostic ideas about the world, creation, salvation, God, humanity, and the human body, while also attending to issues of gender, asceticism, and scriptural interpretation as they intersect with gnostic thought. To set gnostic literature within a socio-historical context, we discuss other relevant ancient texts and scholarly theories about the Jewish and Hellenistic roots of early Christian Gnosticism.]

[NES 329 Intro to the New Testament—Seminar (also JWST 329, RELST 329)
Fall. 1 credit. Prerequisite: concurrent enrollment (or past enrollment) in NES 229 and 1 year of ancient Greek. Not offered 2001–2002. K. Haines-Eitzen.
A weekly seminar that may be taken in addition to NES 229. The seminar provides an opportunity to read portions of the New Testament and other early Christian writings in Greek. We work on grammatical and textual issues as well as other problems related to translations.]

NES 339 Islamic Spain: Culture and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339/699) @ # (IV)
Fall. 4 credits. R. Brann.
For description, see NES Civilization.

NES 394 Gender, Sexuality, and the Body in Early Christianity (also RELST 394, WOMNS 394, JWST 394) # (IV)
Spring. 4 credits. K. Haines-Eitzen.
Beliefs about gender, sexuality, and the human body were remarkably interwoven with political, religious, and cultural disputes in early Christianity. In this course we explore the construction and representation of gender, sexuality, and the body in various forms of Christianity from the first century through the fourth. Asceticism and celibacy, veiling and unveiling, cross-dressing and Gnostic androgyny, marriage and childbirth, and homosexuality are among the topics considered, and our sources range from the New Testament, early Christian apocrypha, martyrologies, and patristic writings to Greek medical texts, Jewish midrash, Roman inscriptions, and Egyptian erotic and magical spells. Current interdisciplinary and theoretical studies on gender, ideology, sexuality, and power aid us in developing our analytical approaches to the ancient materials.

NES 400 Seminar in Advanced Hebrew (also JWST 400) @
Fall. 4 credits. Prerequisite: NES 302/JWST 302 or permission of instructor. Enrollment limited to 15 students. The course may be repeated for credit with permission of instructor. N. Scharf.
Continuation of work done in NES/JWST 302, with less emphasis on the study of grammar. We will read and discuss texts of cultural relevance, using articles published in Israeli newspapers and works by authors in each of the three principal genres: poetry, theater, and novels.

NES 401 Topics in Modern Hebrew Literature
Spring. 4 credits. D. Starr.
For description, see department.

NES 409 Seasons of Migration (also JWST 409, RELST 409) @ # (IV)
Fall. 4 credits. S. Toorawa.
For description, see S HUM 409.

NES 420 Readings in the Hebrew Bible (also JWST 420 and RELST 420) @ # (IV)
Fall. 4 credits. Prerequisite: 1 year of biblical or modern Hebrew. Course may be repeated for credit. R. Brann.
An advanced course in reading selected portions of the Hebrew Bible. Emphasis is placed on the philological method, with attention to literary, historical, and comparative concerns.

[NES 421 Readings in Biblical Hebrew Poetry (also JWST 421, RELST 421) @ # (IV)
Fall. 4 credits. Prerequisite for NES 421: 1 year of Biblical or Modern Hebrew. Course may be repeated for credit. Not offered 2001–2002. G. Rendsburg.
Advanced course in reading selected poems of the Hebrew Bible. Chapters studied include various Psalms, parts of the Book of Job, various prophetic speeches, and early compositions such as Genesis 49 and Judges 5. Emphasis is placed on the philological method, with attention to literary, historical, and comparative concerns as well.]

[NES 639 Islamic Spain: Culture and Society (also NES 339, JWST 339, COM L 334, RELST 334, SPAN L 339/699)
Fall. 4 credits. Not offered 2001–2002. R. Brann.
This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political, and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusi Jewish subcultural adaptations of Andalusi Arabo-Islamic culture.]

NES 491–492 Independent Study, Undergraduate Level
Fall and spring. Variable credit. Prerequisite: permission of instructor. Staff.

NES 499 Independent Study, Honors
Fall and spring. Variable credit. Prerequisite: permission of instructor. Staff.

NES 691–692 Independent Study: Graduate Level
Fall and spring. Variable credit. Prerequisite: permission of instructor. Staff.

The Program of Jewish Studies

The Program of Jewish Studies encompasses a broad spectrum of disciplines that includes civilization, history, language, literature, philology, archaeology and religion. The program offers students the opportunity to take a wide variety of courses in Jewish Studies whose subjects are not represented in the Department of Near Eastern Studies. Students interested in planning a program in Jewish Studies should consult with the director, Professor David I. Owen, 360 Rockefeller Hall. For complete listings and descriptions, see Program of Jewish Studies under "Special Programs and Interdisciplinary Studies."

JWST 105–106 Elementary Modern Hebrew I and II (also NES 101–102)
105, fall; 106, spring. 6 credits each term. Enrollment limited to 15 students. *JWST 106 satisfies language qualification.* S. Shoer.

JWST 201–202 Intermediate Modern Hebrew I and II (also NES 201–202) @
201, fall; 202, spring. 4 credits. Enrollment limited to 15 students. *JWST 201 satisfies language qualification.* N. Scharf.

JWST 235 Jews and Arabs in Conflict: The Modern Period (also NES 235) @ (III)
Spring. 3 credits. D. Starr.
For description, see NES 235.

JWST 239 Cultural History of the Jews of Spain (also NES 239, COM L 239, RELST 239, SPAN L 239) # (IV)
Spring. 3 credits. M. Segol.
For description, see NES 239.

JWST 246 Jewish Mysticism (also RELST 246 and NES 246) @ # (IV)
Fall. 3 credits. M. Segol.
For description, see NES 246.

JWST 256 Introduction to the Q'uran (also RELST 256 and NES 256) @ # (IV)
Spring. 3 credits. S. Toorawa.
For description, see NES 256.

JWST 263 Introduction to Biblical History and Archaeology (also NES 263, ARKEO 263, RELST 264) @ # (III)
Spring. 3 credits. J. Zorn.
For description, see NES 263.

JWST 268 Ancient Egyptian Civilization (also NES 268, ARKEO 268) @ # (III or IV)
Spring. 3 credits. G. Kadish.
For description, see NES 268.

JWST 301–302 Advanced Modern Hebrew I and II (also NES 301–302) @ (IV)
301; fall, 302, spring. 4 credits. N. Scharf.
For description, see NES 301–302.

JWST 339 Islamic Spain: Culture and Society (also RELST 334, SPANL 339, COM L 334, and NES 339) @ # (IV)
Fall. 4 credits. R. Brann.
For description, see NES 339.

JWST 360 Origins of Mesopotamian Civilization (also NES 360 and ARKEO 360) @ # (III or IV)
Fall. 4 credits. D. I. Owen.
For description, see NES 360.

JWST 361 Sumerian Language and Culture (also NES 361 and ARKEO 361) @ # (IV)
Spring. 4 credits. D. I. Owen.
For description, see NES 361.

JWST 400 Seminar in Advanced Hebrew (also NES 400) @
Fall. 4 credits. *Satisfies language proficiency.* N. Scharf.
For description, see NES 400.

JWST 420 Readings in the Hebrew Bible (also NES 420, RELST 420) (IV)
Fall. 4 credits. R. Brann.
For description, see NES 420.

JWST 458 Imagining the Holocaust (also JWST 658, ENGL 458/658, GERST 457/657) (IV)
Spring. 4 credits. D. Schwarz.
For description, see ENGL 458.

JWST 474 Topics in Modern Europe: Intellectual and Cultural History (also HIST 474 and COM L 474) (III or IV)
Fall. 4 credits. D. LaCapra.
For description, see HIST 474.

JWST 491–492 Independent Study—Undergraduate
Fall and spring. Variable to 6 credits. Staff.

JWST 499 Independent Study—Honors
Fall and spring. Variable to 4 credits. Staff.

JWST 658 Imagining the Holocaust (also JWST 458, ENGL 458/658)
Spring. 4 credits. D. Schwarz.
For description, see ENGL 458/658.

PHILOSOPHY

Gail Fine (Chair), R. N. Boyd, W. Bracken, M. Fara, G. Fine (on leave spring 2002), D. Graff, B. Hellie, H. Hodes (on leave spring 2002), T. Irwin (on leave 2001–2002), K. Jones, S. MacDonald, R. W. Miller, F. Neuhouser (on leave spring 2002), S. Shoemaker, H. Shue, N. Sturgeon, Z. Szabó and J. Whiting (on leave fall 2001).

Emeritus: C. A. Ginet.

The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of thought while developing analytical skills that are valuable in practical as well as academic affairs. It affords the excitement and satisfaction that come from understanding and working toward solutions of intellectual problems. The curriculum includes offerings in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 100s or 200s is suitable for beginning study in the field. Sections of Philosophy 100 are part of the freshman writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (seventeen students at most) they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take Philosophy 101, but many students with special interests may find that the best introduction to philosophy is a 200-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to first year students.

The Major

Students expecting to major in philosophy should begin their study of it in their freshman or sophomore year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student's work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses are required for the major. They must include at least one course in ancient philosophy (Philosophy 210 or 211, or a course with a large component on Plato or Aristotle), at least one course in classical modern metaphysics and epistemology from Descartes through Kant (e.g., Philosophy 212 or a course on the empiricists, the rationalists, or Kant), and a minimum of three courses numbered above 300. Students admitted to the major (after fall 1996) are required to take a minimum of six philosophy courses numbered above 200, and may not count more than one section of Philosophy 100 toward the major. A course in formal logic (e.g., PHIL 231), while not required, is especially recommended for majors or prospective majors. Courses numbered 191–199 do not count toward the major.

Philosophy majors must also complete at least eight credits of course work in related subjects approved by their major advisers. Occasionally majors may serve as teaching or research aides, working with faculty members familiar with their work.

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B- or better for all work in the College of Arts and Sciences and an average of B+ or better for all work in philosophy. In either or both terms of the senior year a candidate for honors enrolls in PHIL 490 and undertakes research leading to the writing of an honors essay by the end of the final term. *Honors students normally need to take PHIL 490 both terms of their senior year in order to write a satisfactory honors essay.* PHIL 490 does *not* count toward the eight philosophy courses required for the major. Prospective candidates should apply at the philosophy department office, 218 Goldwin Smith Hall.

Fees

In some courses there may be a small fee for photocopying materials to be handed out to students.

Introductory Courses

These courses have no prerequisites; all are open to freshmen.

Freshman Writing Seminars in Philosophy
Fall and spring. 3 credits. Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

PHIL 101 Introduction to Philosophy (IV)
Fall. 3 credits. M W F 9:05–9:55. N. Sturgeon. Spring. T R 11:40–12:55. B. Hellie.
Fall: This course deals with a number of the central problems of philosophy, such as the existence of God, our knowledge of the external world, the mind-body problem, free will and the foundations of morality.

Spring: We talk about some big questions that make the mind boggle: why is there something rather than nothing? Is there at least one god? Is there a meaning to life, and if so what is it? Do we have free will? Students should not expect to be given conclusive answers to these questions. They should, however, expect to deal with abstractions on a regular basis, and to get used to chopping things up and organizing them in a precise way; otherwise things get out of control pretty quickly.

[PHIL 131 Logic, Evidence and Argument
Fall. 3 credits. Not offered 2001–2002.]

PHIL 142 Appropriation and Alienation (IV)
Spring. 3 credits. Intended for freshmen and sophomores. M W F 9:05–9:55. T. J. Berry.
This course investigates an important issue in political philosophy: the justification of property rights. We start the course by

watching a film, *The Field*, in which two different conceptions of what justifies ownership come into conflict. Should things belong to those who make them? Or shouldn't labor be the primary justification of property rights? We spend the first half of the course investigating how the philosopher John Locke handles this issue in his classic defense of private property. In the second half, we consider Karl Marx's classic objections to Locke's defense of private property.

[PHIL 145 Contemporary Moral Issues (IV)
Not offered 2001–2002.]

PHIL 181 Introduction to the Philosophy of Science (IV)
Spring. 3 credits. T R 1:25–2:40. N. Sethi.
This course is an introductory survey of contemporary philosophy of science. We attempt to answer such central questions as: What reasons do scientists have for accepting current scientific theories? How can scientists test theories about unobservable entities? Is science a search for truth? Do scientists discover or construct facts about nature? Are scientific claims immune to cultural, social, and subjective influences? The last part of the course focuses on the moral issues that scientific and technological developments force us to face.

PHIL 191 Introduction to Cognitive Science (also COGST 101 and PSYCH 102) (III)
Fall. T R 11:40–12:55. M. Spivey.
This course surveys the study of how the mind/brain works. We examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part of the course focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence. Does not count toward the Philosophy major or toward the Humanities Distribution Requirement in Philosophy.

PHIL 193 Inequality, Diversity, and Justice (also CRP 293, GOVT 293, SOC 293) (III or IV)
Fall. 4 credits. No prerequisites. Intended primarily for freshmen and sophomores. M W F 2:30–3:20. The class will meet as a whole, for a lecture, F, 8/31; thereafter, lectures will be given M W, disc secs will be F. R. Miller.
An interdisciplinary discussion of the nature and moral significance of social inequality, diversity and poverty and of the search for just responses to them. How unequal are economic opportunities in the United States today? How many people are in genuine poverty? What are the typical causes of poverty? To what extent, if any, does justice require government action to reduce current economic inequalities? Does race have special significance as a source of inequality? Does gender? Is affirmative action justified, as a response to such inequalities? How does membership in an ethnic group shape people's lives, and how should it? How should governments deal with religious diversity and other differences in ultimate values (which give rise, for example, to radically different attitudes toward abortion, school prayer, and sexuality)? Do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of social causes, and legal reasoning interact in the search for answers to these questions. To provide these resources, the course is taught by leading faculty researchers in philosophy, political theory, the social sciences, and law.

PHIL 194 Global Thinking (also GOVT 294) @ (III or IV)
Fall. 4 credits. No prerequisites. Intended for freshmen and sophomores, plus required disc. T R 1:25–2:40. H. Shue.
The analysis taught is global in two independent respects: international subjects and interdisciplinary methods. We examine in depth questions raised by one of the most important and most difficult issues facing international society: when, if ever, should other nations unilaterally or multilaterally intervene militarily into ethnic conflicts like those in Rwanda 1994, from which UN forces were withdrawn just before 800,000 were massacred, and Kosovo 1999, into which NATO intervened but only with airpower and without Security Council authorization). These recent cases raise fundamental questions about global governance in the 21st century. To what extent is the system of sovereign nation-states inherited from 17th century Europe still either desirable or unavoidable? Does every ethnic group have a right to self-determination? When, if ever, is the use of military force for purposes other than self-defense justified? To stop genocide? Should trials for war crimes routinely be held after military conflicts by the proposed International Criminal Court? Such moral issues are explored in the light of the political dynamics of foreign intervention and the evolving international legal regime, setting ethics in the context of politics and law.

[PHIL 210 Ancient Thought # (IV)
4 credits. Not offered 2001–2002.]

PHIL 211 Ancient Philosophy (also CLASS 231) # (IV)
Fall. 4 credits. No prerequisites. T R 11:40–12:55. C. Brittain.
This course explores the origin and development of Western philosophy in Ancient Greece and Rome. We explore some of the central ideas of the Pre-Socratics, Socrates, Plato, Aristotle, and the Hellenistic philosophers (Epicureans, Stoics, and Skeptics). Questions considered include: What are the nature and limits of knowledge? How reliable is perception? What are the basic entities in the universe: atoms, Platonic Forms, or Aristotelian substances? Is moral knowledge possible? What is the nature of happiness and what sort of life will make people happy? Do human beings have free will?

PHIL 212 Modern Philosophy # (IV)
Spring. 4 credits. M W F 1:25–2:15. S. Shoemaker.
A survey of major philosophical problems in metaphysics and the theory of knowledge in seventeenth and eighteenth century European philosophy. Readings from Descartes, Spinoza, Leibniz, Locke, Berkeley, Hume, and Kant.

PHIL 213 Existentialism (IV)
Fall. 4 credits. M W F 12:20–1:10. B. Bracken.
This course provides an introduction to the major themes of existentialism in philosophy and literature, as exemplified in central texts from Kierkegaard, Nietzsche, Camus, Sartre, and Beauvoir. Topics discussed include: the relationship between freedom and responsibility; the idea that a self is something one "becomes"; the role of evaluation and commitment in becoming a self; the Sartrian doctrine that evaluations and commitments are ultimately based on "absurd" or "groundless" individual choices; the possibility of an ethics of authenticity and the relationship of the latter to what we normally think of as ethics; bad faith and self-deception; the role that relations to others play in the achievement of selfhood; and the relationship between the form and content in existentialist writings.

[PHIL 214 Philosophical Issues in Christian Thought # (IV)
4 credits. Not offered 2001–2002.]

[PHIL 219 Marx # (IV)
Not offered 2001–2002.]

PHIL 231 Introduction to Deductive Logic (II)
Fall and spring. 4 credits. No prerequisites. M W F 11:15–12:05. Fall, D. Graff; spring, Z. Szabó.
The course covers the basics of propositional and first-order logic with a special emphasis on the problem of translating English sentences into the formal language of these logics. We use a textbook accompanied by a software package (Barwise and Etchemendy, *Logic, Proof and Language*), which makes it easier to learn the skills necessary for doing formal proofs.

PHIL 241 Ethics (by petition for breadth requirement) (IV)
Spring. 4 credits. M W F 10:10–11:00. N. Sturgeon.
An introduction to the philosophical evaluation of moral theories and moral arguments. Topics include: ethical relativism, ethical egoism, ethical skepticism, utilitarianism and duty-based theories; some application to controversial contemporary issues.

[PHIL 242 Social and Political Philosophy (also GOVT 260) (III or IV)
Not offered 2001–2002.]

[PHIL 243 Aesthetics (IV)
4 credits. Not offered 2001–2002.]

[PHIL 244 Philosophy and Literature (IV)
4 credits. Not offered 2001–2002.]

PHIL 245 Ethics and Health Care (IV)
Fall. 4 credits. M W F 10:10–11:00. T. J. Berry.
This course is an introduction to the ethical issues associated with contemporary medicine. No previous study of philosophy is presupposed. The course has two lectures and one discussion section per week. Topics to be covered include: the professional-patient relationship (including informed consent, medical confidentiality, medical paternalism, and trust); contemporary problems such as abortion and euthanasia—beginning from these practical moral problems we investigate concepts such as illness, death, autonomy, quality of life and personhood; and health care in a just society. We consider competing conceptions of justice and arguments for entitlement to health care. Does justice require that all have access to basic health care? Does it require that all have access to approximately the same level of health care? What are the implications for access to health care

resources by the requirement that we not discriminate on the basis of race or gender? In the course of investigating these topics, there questions emerge about what ethics is, and whether or not ethical judgments can be objective. Thus, in addition to learning how to arrive at and defend ethical positions, we reflect on the techniques and methods we use.

PHIL 246 Ethics and the Environment (also S&TS 206) (IV)
Spring. 4 credits. Open to all undergraduates; permission of instructor required for freshmen. T R 10:10–11:25. N. Sethi.
The aim of this course is to acquaint students with moral issues that arise in the context of the environment and environmental policy. Our concerns about the environment bring to our attention the importance of economic, epistemological, legal, political, and social issues in assessing our moral obligations to other humans and the natural world. Our attempt then is to explore how different factors come into play in defining our responsibilities to the environment and to examine the grounds for our environmental policy decisions.

PHIL 247 Ethics and Public Life (IV)
4 credits. Fall. T R 10:10–11:25. M. Moody-Adams.
What kind of public life is worth having? This course examines the efforts of philosophers, social theorists, theologians, and others to understand the ethical dimensions of our lives as citizens of complex social and political communities. We consider several questions of pressing concern. To what moral standards should we hold those, such as politicians and journalists, whose professions involve service to the public? What moral obligations do citizens themselves have to those with whom they share a public life? What does morality tell us about how to draw the line between "public" and "private," for the purposes of public policy? Is it ever morally permissible (or even required) to opt out of demands that underwrite a stable public life—in civil disobedience, for instance, or in conscientious objection to some public policy?

PHIL 249 Feminism and Philosophy (also WOMNS 249) (IV)
Spring. 4 credits. M W 2:55–4:10.
J. Whiting.
An introduction using a variety of texts (philosophical, historical, literary, legal, and political) to feminist thought. Special attention is paid to sexual difference and the social construction of gender, and to how we frame various issues (e.g., whether pornography is primarily an issue about freedom of expression or about equal protection).

PHIL 261 Knowledge and Reality (IV)
Fall. 4 credits. T R 1:25–2:40. M. Fara.
This course provides an introduction to some central philosophical questions about the nature of the universe and our knowledge of it. Questions addressed include: What is the relation between mind and matter? What reason do we have to believe in the predictions of science? How do you know you're not dreaming right now? What is the nature of human freedom? Don't expect the course to answer these questions once and for all. Instead, expect to learn how to go about thinking about them, and how to distinguish a good philosophical argument from a bad one.

PHIL 262 Philosophy of Mind (IV)
Fall. 4 credits. M W 2:55–4:10. B. Hellie.
There are a couple of central problems in philosophy of mind: What is consciousness? How does something in the skull get to be "about" something not in the skull? We try to make some headway on these issues. We also talk about such questions as whether we think in language, in pictures, in both, or in neither; whether we have any innate mental abilities and if so how many; and the nature of the self.

PHIL 263 Religion and Reason (IV)
Spring. 4 credits. M W F 11:15–12:05.
S. MacDonald.
What must (or could) God be like, and what reasons do we have for thinking that a being of that sort actually exists? What difference would (or could) the existence of God make to our lives? This course examines the idea, common to several major world religions, that God must be an absolutely perfect being. What attributes must a perfect being have? Must it have a mind, be a person, care for human beings? Is the concept of a perfect being coherent? Is the existence of a perfect being compatible with the presence of evil in the world and the existence of human freedom? Does human morality depend in any important way on the nature or will of a perfect being? Is a perfect being among the things that actually inhabit our universe? The course approaches these questions with the tools and methods of philosophical reason and through readings drawn from both classic texts and contemporary philosophical discussion.

[PHIL 270 Truth and Interpretation (also LING 270/COGST 270) (III or IV)
4 credits. Not offered 2001–2002.]

PHIL 286 Science and Human Nature (also S&TS 286) (IV)
Spring. 4 credits. T R 10:10–11:25. R. Boyd.
Topic for 2001–2002: Darwin, Social Darwinism, and Human Sociobiology. An examination of attempts in the biological and social sciences to offer scientific theories of human nature and human potential and to apply such theories to explain important social and psychological phenomena.

Intermediate or Advanced Courses

Some of these courses have prerequisites.

PHIL 309 Plato (also CLASS 339) # (IV)
Fall. 4 credits. Prerequisites: at least one previous course in philosophy at the 200 level or above; or the permission of the instructor. T R 2:55–4:10. G. Fine.
We consider many of Plato's major dialogues, focusing on questions in metaphysics and epistemology, though some attention is also paid to his ethical and political theories, especially in the Republic. Among the topics considered are the following: the theory of Forms; Socrates' disavowal of knowledge; dialectic and recollection; the nature of knowledge and how to acquire it; the nature of the soul and moral motivation; justice and happiness.

PHIL 310 Aristotle # (IV)
Spring. 4 credits. T R 11:40–12:55.
B. Morison.
This course is an introduction to several major aspects of Aristotle's Logic, Metaphysics, Physics, Biology, and Ethics. Topics covered include: argument and reason, science and knowledge, cause and effect, time and space, body and soul, good and bad, life and death, though not necessarily in that order.

[PHIL 311 The Rationalists # (IV)
Not offered 2001–2002.]

[PHIL 312 Modern Empiricism # (IV)
Not offered 2001–2002.]

[PHIL 313 Twentieth-Century Continental Philosophy (IV)
Spring. 4 credits. Not offered 2001–2002.]

[PHIL 314 Ancient Philosophy: The World of Theory and the World of Ordinary Life # (IV)
4 credits. Not offered 2001–2002.]

PHIL 315 Medieval Philosophy # (IV)
Spring. 4 credits. M W F 1:25–2:15.
S. MacDonald.
A survey of some main themes and major figures in medieval philosophy. Emphasis is on the close reading and analysis of representative texts, but some attention is given to the general historical development of philosophical themes and traditions during the thousand years separating late antiquity and the Renaissance. Readings (in English translation) may include Augustine, Boethius, Anselm, Abelard, Aquinas, Scotus, and Ockham and address topics in metaphysics, epistemology, ethics, and philosophical theology.

PHIL 316 Kant # (IV)
Fall. 4 credits. T R 10:10–11:25.
F. Neuhouser.
An introduction to Kant's main metaphysical and epistemological doctrines as presented in the *Critique of Pure Reason*, including: the nature of space and time, the justification of scientific knowledge, the nature of human reason and self-consciousness. Special attention is paid to Kant's critique of traditional metaphysics and his attempt to establish a new metaphysics, grounded in practical reason, that establishes the existence of God, human freedom, and morality.

[PHIL 317 Hegel # (IV)
4 credits. Not offered 2001–2002.]

[PHIL 318 Origins of Twentieth-Century Philosophy (IV)
Not offered 2001–2002.]

PHIL 319 Post-War Analytic Philosophy (IV)
Spring. 4 credits. T R 2:55–4:10. B. Hellie.
Three central research topics in postwar analytic theory have concerned the nature of modality, the nature of meaning, and the links between modality and meaning. We start with Carnap's attempt to reduce the former to the latter. Then we move onto Quine's technical critique of this program. The two leading post-Quinean approaches to modality are that of Saul Kripke, which attempts to rehabilitate the metaphysical perspective on modality Carnap was trying to avoid; and that of David Lewis, which attempts to rehabilitate the Carnapian program against Quine's criticism. Quine also famously criticized the notion of meaning. Davidson attempted to save theorizing about meaning from this criticism by theorizing about meaning without appeal to meanings. We examine neo-Davidsonian approaches to meaning and challenges to them from the Kaplanites and the conceptual role theorists. If time permits we also address the degree to which language is conventional.

PHIL 320 17th Century Women Philosophers (also WOMNS 319) # (IV)
Spring. 4 credits. M 7:30–9:25. L. Shapiro.
We look at the writings of such women thinkers as Lucrezia Marinella, Marie de Gournay, Anna Maria van Schurman, Elizabeth of Bohemia, Margaret Cavendish, Anne Conway, Mary Astell, and Damaris Masham, attending to their philosophical positions—on causation, free will, virtue, the nature of substance, and the nature of women—and consider the ways in which they are in conversation with other more familiar philosophers of the 17c (including Montaigne (16c), Descartes, Leibniz and Locke (18c). Historiographical issues of how some philosophers and philosophical questions become canonical and others disappear from view lurk in the background.

PHIL 331 Deductive Logic (also MATH 281) (II)
Fall. 4 credits. Prerequisite: PHIL 231 or equivalent or permission of instructor.
M W F 2:30–3:20. H. Hodes.
Course topics include: review of derivations and truth-in-a-model; function-constants and identity; truth in non-fully-distinguished models; very basic set-theory; sets as the only mathematical objects; mathematical induction; soundness; and completeness.

PHIL 332 Philosophy of Language (IV)
Fall. 4 credits. T R 11:40–12:55. Z. Szabó.
This course is an introduction to contemporary philosophy of language. About two thirds of the course is spent reading and discussing some of the classic work done between 1879 and 1905, and between 1967 and 1977, by philosophers such as Frege, Russell, Grice, Davidson, Kripke, and Kaplan. These papers are essential reference points in contemporary debates not only in philosophy of language but in analytic philosophy in general. The rest of the course focuses on a specific topic: the interpretation of modal expressions, such as *necessarily*, *possibly*, *ought*, *can*, etc.

[PHIL 333 Problems in Semantics (also LING 333 and COGST 333) (III or IV)
Not offered 2001–2002.]

PHIL 334 Pragmatics (also LING 325) (III or IV)
Fall. 4 credits. Prerequisite: LING 201 or PHIL 231 or permission of instructor.
T 2:30–5:00. D. Abusch.
An introduction to aspects of linguistic meaning which have to do with context and with the use of language. Topics include context change semantics and pragmatics, presupposition and accommodation, conversational implicature, speech acts, and the pragmatics of definite descriptions and quantifiers.

[PHIL 341 Ethical Theory (IV)
Not offered 2001–2002.]

[PHIL 343 Resistance and Responsibility (also LAW 676) (IV)
4 credits. Not offered 2001–2002.]

[PHIL 344 History of Ethics: Ancient and Medieval # (IV)
4 credits. Not offered 2001–2002.]

[PHIL 345 History of Ethics: Modern # (IV)
4 credits. Not offered 2001–2002.]

PHIL 346 Modern Political Philosophy (also GOVT 462) (III or IV)
Fall. 4 credits. T R 2:55–4:10. R. Miller.
A study of the leading contemporary theories of justice, including the work of Rawls, Nozick, Gauthier, and Scanlon. We discuss rival views of the moral significance of economic inequality, the kinds of freedom that governments ought to protect, the kinds of values and convictions that are a proper basis for laws (as opposed to being private matters), the tension between unequal political influence and democratic rights, and the roles of community, virtue, and group-loyalty in political justification. We are largely concerned with the conceptions of freedom, equality, obligation, and community underlying competing theories. We also consider implications for specific political controversies, e.g., over abortion, welfare programs, and pornography.

PHIL 361 Epistemology (IV)
Fall. 4 credits. T R 1:25–2:40. D. Graff.
This course is a survey of some contemporary philosophical issues and debates in the study of knowledge. Our investigations include: (i) the possibility of knowledge, whether there is merit to the skeptical idea that we don't know much about anything, since for all we know, we're brains in vats, with all our experiences being wired in directly by benevolent scientists; (ii) the analysis of knowledge, whether knowledge is true justified belief or something else (and what is it anyway for a belief to be justified?); and (iii) the various means by which we acquire knowledge (if we do), such as through reason, perception, and the testimony of others.

[PHIL 362 Philosophy of Mind (IV)
Not offered 2001–2002.]

[PHIL 363 Topics in the Philosophy of Religion (IV)
4 credits. Not offered 2001–2002.]

PHIL 364 Metaphysics (IV)
Spring. 4 credits. T R 1:25–2:40. M. Fara.
This course focuses on problems surrounding the idea that we have "free will", that we are free to act in whatever way we choose. Are we free in this way? If we are, how does that fit with the idea that we inhabit a causally ordered universe? If we have free will, what (if anything) might that tell us about the relation between the past and the future? And what is the connection between having free will and being morally responsible for our actions? In exploring these and related questions, we look at a wide variety of work in metaphysics and philosophy of mind.

[PHIL 368 Global Climate and Global Justice (also GOVT 368) (III or IV)
4 credits. Not offered 2001–2002.]

[PHIL 369 Limiting War (also GOVT 469) (III or IV)
4 credits. Not offered 2001–2002.]

PHIL 381 Philosophy of Science: Knowledge and Objectivity (also S&TS 381) (IV)
Fall. 4 credits. W 7:30–10:00. R. Boyd.
An examination of central epistemological and metaphysical issues raised by scientific theorizing: the nature of evidence; scientific objectivity; the nature of theories, models, and paradigms; and the character of scientific revolutions.

[PHIL 382 Philosophy and Psychology (IV)
4 credits. Not offered 2001–2002.]

[PHIL 383 Choice, Chance, and Reason (IV)
4 credits. Not offered 2001–2002.]

[PHIL 384 Philosophy of Physics (IV)
4 credits. Not offered 2001–2002.]

[PHIL 387 Philosophy of Mathematics (IV)
4 credits. Not offered 2001–2002.]

[PHIL 389 Philosophy of Science: Evidence and Explanation (IV)
4 credits. Not offered 2001–2002.]

PHIL 390 Informal Study
Fall or spring. Credit TBA.
To be taken only in exceptional circumstances. Must be arranged by the student with his or her adviser and the faculty member who has agreed to direct the study.

Advanced Courses and Seminars

These courses are offered primarily for majors and graduate students.

[PHIL 395 Majors Seminar
4 credits. Not offered 2001–2002.]

[PHIL 409 German Philosophical Texts (IV)
Not offered 2001–2002.]

PHIL 410 Latin Philosophical Texts # (IV)
Fall and spring. Variable credit. Prerequisites: knowledge of Latin and permission of instructor. Hours TBA. S. MacDonald.
Reading of philosophical texts in the original Latin.

PHIL 411 Greek Philosophical Texts (also CLASS 311) # (IV)
Fall and spring. Variable credit. Prerequisites: knowledge of Greek and permission of instructor. Hours TBA. Staff.
Reading of philosophical texts in the original Greek.

[PHIL 412 Medieval Philosophy # (IV)
Not offered 2001–2002.]

[PHIL 413 Topics in Ancient Philosophy (also S HUM 402 and 403) # (IV)
Not offered 2001–2002.]

[PHIL 414 German Philosophy after Kant (IV)
Not offered 2001–2002.]

[PHIL 415 Special Topics in the History of Philosophy (IV)
Not offered 2001–2002.]

PHIL 416 Modern Philosophy # (IV)
Fall. 4 credits. M 12:20–2:15. L. Shapiro.
We consider the theories of the passions or emotions of several philosophers of the Early Modern period, including Descartes, Spinoza, and Hume. Of particular concern are accounts of the representationality of the passions, the way these accounts put pressure on or resolve tensions in theories of mind and human nature, and the place of the passions in accounts of moral psychology.

[PHIL 431 Mathematical Logic (also MATH 481) (II)
Not offered 2001–2002.]

[PHIL 432 Topics in Logic (also MATH 482) (II)
Not offered 2001–2002.]

[PHIL 433 Philosophy of Logic
4 credits. Not offered 2001–2002.]

PHIL 434 The Foundations of Mathematics (also MATH 384) (II)
Fall. 4 credits. M W F 1:25–2:15. H. Hodes. Set-theory is the standard theoretical basis for mathematics (though there are competitors). Primarily this is a course on set-theory, based on H. Enderton's text *Elements of Set Theory*. After some presentation of the foundational "crisis" in Mathematics of the late 19th century, and related developments in philosophy, we'll cover the usual the ZF axioms, the axiom of Choice, Ordinal and Cardinal arithmetics, construction of standard models of the usual number systems. Time permitting we may cover: large cardinals; determinacy; type-theory; or the untyped lambda calculus as a foundation.

PHIL 436 Intensional Logic (II)
Spring. 4 credits. T R 10:10–11:25. D. Graff. In this course we investigate various logics of necessity and possibility. We study formal proof procedures as well as possible worlds semantics. We also prove various "meta" results, including completeness theorems. The techniques learned in this part of the course are then applied to the study of conditionals and tense operators. Further topics may include counterpart theory, the logic of epistemological operators, and the method of supervaluations as it applies to the semantics of vague predicates and also positive and comparative adjectives.

[PHIL 437 Topics in the Philosophy of Language (IV)
4 credits. Not offered 2001–2002.]

PHIL 441 Contemporary Ethical Theory (IV)
Fall. 4 credits. M W F 11:15–12:05. N. Sturgeon.
Topic for fall: Moral Realism and its Critics.

[PHIL 442 Ethics and the Philosophy of Mind (IV)
4 credits. Not offered 2001–2002.]

[PHIL 443 Aesthetic Theory (IV)
4 credits. Not offered 2001–2002.]

[PHIL 444 Contemporary Legal Theory (also LAW 710) (IV)
4 credits. Not offered 2001–2002.]

[PHIL 446 Topics in Social and Political Philosophy (also GOVT 474) (III or IV)
Not offered 2001–2002.]

PHIL 447 Contemporary Political Philosophy (also GOVT 465) (III or IV)
Spring. 4 credits. M W 2:55–4:10. R. Miller. Topic for 2002: Reconceiving Liberalism. While traditional liberal political goals of civil liberty, political equality, and fair economic opportunity retain a central place in current political philosophy, there are sharply contrasting views of the basis, nature, and implications of these aspirations. Should the individualism of traditional liberalism be rejected in favor of a fundamental commitment to community, grounding goals of equality? Should the goal of neutrality among ways of life be replaced by a political commitment to facilitate liberal virtues of autonomy? Should basic political choices be derived from a purely political conception of mutually respectful citizenship? From a general conception of what people owe to each other? For what reasons and to what extent should inequalities of wealth and income be opposed? Is it consistent for liberal egalitarians not to give away much of their income to the poor, if they are well-off, or not to support world-wide equality? Our discussions of such questions will include Raz, *The Morality of Freedom*; Sandel, *Democracy's Discontent*, work by Rawls, Scanlon, Dworkin, Gerald Cohen, and Elizabeth Anderson; and relevant judicial disputes over the nature of the liberty and equality protected by the U.S. Constitution.

PHIL 460 Epistemology (IV)
Fall. 4 credits. M 7:30–10:00. B. Hellie. We talk about Tim Williamson's recent book *Knowledge and its Limits*, which is interesting in that it focuses on applying the concept of knowledge rather than eliminating it. We also do related texts and other issues in epistemology, such as contextualism.

[PHIL 461 Feminist Epistemology (also WOMNS 461) (IV)
4 credits. Not offered 2001–2002.]

[PHIL 462 Philosophy of Mind (IV)
4 credits. Not offered 2001–2002.]

[PHIL 481 Problems in the Philosophy of Science (IV)
Not offered 2001–2002.]

[PHIL 484 Philosophy of Physics (IV)
Not offered 2001–2002.]

PHIL 490 Special Studies in Philosophy (IV)
Fall and spring. 4 credits. Open only to honors students in their senior year. See Honors description at the beginning of Philosophy section.

PHIL 611 Ancient Philosophy (also CLASS 671)
Fall. 4 credits. R 4:30–6:30. D. Sedley.
Spring. W 4:30–6:30. B. Morison.
Fall: Topic: The Pre-Socratics—the philosophical positions and arguments of the major fifth-century BC Pre-Socratic thinkers, from Heraclitus to Democritus.

Spring: Topic: A systematic study of a short introduction to logic and scientific reasoning written in the second century CE by Galen, the second greatest medical doctor in antiquity (after Hippocrates) and a philosopher in his own right. The work is of interest not only for its exposition of Aristotelian and Stoic Logic, but also for a mysterious third type of reasoning which Galen introduces, namely 'relational' reasoning.

[PHIL 612 Medieval Philosophy
Not offered 2001–2002.]

[PHIL 613 Modern Philosophers
4 credits. Not offered 2001–2002.]

[PHIL 619 History of Philosophy
4 credits. Not offered 2001–2002.]

PHIL 633 Philosophy of Language
Spring. 4 credits. R 4:30–6:30. D. Graff. The topic of the seminar is vagueness and the sorites paradox. The vagueness of a predicate like 'tall woman' is metaphorically characterized by saying that there is a "fuzzy boundary" between the women it applies to and those it doesn't. The sorites paradox of antiquity (also known as "the paradox of the heap") arises from thoughts such as, "If I'm tall before I go to bed then even if I shrink 1mm overnight, I'll still be tall when I wake up," which, though attractive, apparently lead to absurdity. We will question what the fuzziness that's characteristic of vagueness amounts to; what is the relation between vagueness and perception; how are we to resolve the sorites paradox; does vagueness require us to abandon Bivalence and the Law of Excluded Middle; can the epistemological and metaphysical problems arising from vagueness be adequately handled by some such revision to classical logic or semantics.

[PHIL 641 Ethics and Value Theory
Not offered 2001–2002.]

PHIL 642 Morality, Self, and Psychopathology
Spring. 4 credits. T 4:30–6:30. J. Whiting. Philosophical accounts of personal identity typically aspire to a kind of universality; each account tends to represent itself as *the* (presumably uniquely) correct account implying the falsity of its various rivals (e.g., psychological continuity theories implying the falsity of bodily continuity theories and vice versa). But to the extent that we are dealing with *selves*—i.e., partially reflexive entities—it seems possible that different self-*conceptions* might yield different sorts of *selves*, some more and some less bodily (or psychological) than others. We will examine this sort of "contingency of selfhood" both cross-culturally (looking at non-Western conceptions of self and at the Buddhist ideal of self-dissolution) and psychopathologically (looking at pathological configurations of self such as those involved in autism, schizophrenia, multiple-personality-disorder, and eating disorders), treating the study of psychopathology as akin to ethnography. The idea is to see whether forms of selfhood that we take for granted and perhaps even view as inescapable are in fact contingent and optional. We can then ask what sorts of selfhood it is *valuable* to cultivate. This raises the difficult question of the point(s) of view from which we are to make such assessments.

[PHIL 661 Theory of Knowledge
4 credits. Not offered 2001–2002.]

PHIL 662 Philosophy of Mind
Fall. 4 credits. W 4:30–6:30. Z. Szabó. The course focuses on the nature of concepts. What concepts are and what role they play in psychological explanations is once again intensely debated in the philosophy of mind. We start with Frege and with opinions in the secondary literature regarding the proper understanding of his notion of sense. For Frege, the sense of an expression played a triple role: it is that which a competent speaker of a language grasps in understanding a linguistic expression, it determines the referent of that expression, and it serves as its referent in opaque contexts. It is more or less uncontroversial today that nothing could play all three of these roles. The question is, which of the three aspects of a Fregean theory we should preserve in a theory of concepts, and how we should allocate the other explanatory tasks in an overall view of cognition. In this course we focus on attempts to come up with a systematic view due to Burge, Fodor, and Peacocke. We inevitably touch related issues, such as the semantics of empty names, propositional attitudes, intensional transitive verbs, the status of conceptual truth, and the transparency of content.

[PHIL 663 Philosophy of Religion
4 credits. Not offered 2001–2002.]

PHIL 664 Metaphysics
Fall. 4 credits. T 4:30–6:30. S. Shoemaker. Topic: Color and color experience.

PHIL 665 Metaphysics
Spring. 4 credits. M 4:30–6:30. M. Fara. It is frequently taken for granted in many areas of philosophy that we understand the notion of a disposition. In this seminar, by looking at some issues in the metaphysics of dispositions, we see just how problematic that notion is. Among the questions we consider are: What, in general, does it take for something to have a disposition? How do we distinguish dispositions from other kinds of properties? What is the relation between dispositions and their "categorical bases"? Are dispositions "reducible," and what does this mean? Do dispositions cause their manifestations? Are dispositions intrinsic properties of their bearers? In addressing these questions, we touch on a wide range of topics in metaphysics, including causation, causal explanation, laws of nature, and the intrinsic/extrinsic distinction.

PHIL 681 Philosophy of Science
Spring. 4 credits. W 7:30–10:00. R. Boyd. Topic: Topics in the philosophy of science.

[PHIL 682 Philosophy of Social Science
4 credits. Not offered 2001–2002.]

PHIL 700 Informal Study
Fall or spring. Credit TBA.
To be taken by graduate students only in exceptional circumstances and by arrangement made by the student with his or her Special Committee and the faculty member who has agreed to direct the study.

[PHIL 773 Proseminar in Cognitive Studies (also COGST 773, LING 773, and COM S 773)
Fall. 2 credits. R grade. Not offered 2001–2002.
For description, see COGST 773.]

[PHIL 774 Proseminar in Cognitive Studies (also LING 774 and COGST 774)
Not offered 2001–2002.
For description, see COGST 774.]

PHYSICS

G. P. Lepage, chair (109 Clark Hall, 255–6016); J. T. Rogers, director of undergraduate studies (101 Clark Hall, 255–8158); J. P. Alexander, V. Ambegaokar, P. C. Argyres, T. A. Arias, N. W. Ashcroft, K. Berkelman, E. Bodenschatz, P. Brouwer, D. G. Cassel, P. Drell, G. F. Dugan, V. Elser, D. B. Fitchen, E. E. Flanagan, C. P. Franck, R. S. Galik, L. K. Gibbons, B. Gittelman, B. Greene, S. M. Gruner, L. N. Hand, D. L. Hartill, C. L. Henley, W. Ho, A. LeClair, D. M. Lee, P. L. McEuen, N. D. Mermin, N. Mistry, M. Neubert, H. Padamsee, J. M. Parpia, J. R. Patterson, R. O. Pohl, D. C. Ralph, J. D. Reppy, R. C. Richardson, D. L. Rubin, J. P. Sethna, A. J. Sievers, E. Siggia, P. C. Stein, R. M. Talman, S. A. Teukolsky, R. Thorne, H. Tye, M. D. Wang, T-M. Yan

The Department of Physics offers a full range of university-level work in physics, from general education courses for nonscientists to doctoral-level independent research. Major research facilities are operated by two component organizations, the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory of Nuclear Studies (LNS). LASSP carries out extensive research efforts in condensed-matter physics and in low-temperature physics. LNS operates a major high-energy particle physics research facility at Wilson Laboratory, the Cornell electron-positron storage ring (CESR). Theoretical work is carried out in many fields of physics, including astrophysics. There is a full schedule of weekly research-oriented seminars and colloquia. Students will find many opportunities for research participation and summer employment.

Introductory physics sequences are: 101–102, 207–208, and 112–213–214, or its honors version 116–217–218. In addition, there is a group of general-education courses, PHYS 200–206, 209, 210. PHYS 101–102, a self-paced autotutorial course, is designed for students who do not intend to take further physics courses and who do not have preparation in calculus. PHYS 112 and 207 both require calculus (MATH 190 or 191 or 111), and additional mathematics is required for subsequent courses in the sequence. PHYS 101–102 or 207–208 may be taken as terminal physics sequences. The three-term sequence 112–213–214 or its honors version, 116–217–218, is recommended for engineers and physics majors. PHYS 214 and 218 are placing an increasing emphasis on use of the computer for homework, laboratory exercises, and projects; some knowledge about computing, perhaps at the level of COM S 99 or 100, is desirable.

Courses beyond the introductory level that might be of interest to nonmajors include. PHYS 316 (Modern Physics I); PHYS 330 (Modern Experimental Optics); and PHYS 360 (Electronic Circuits).

Advanced placement and credit are offered as outlined in "Advanced Placement of Freshmen." or students may consult the director of undergraduate studies, as should students requesting transfer credit for physics courses taken at another college.

The Major

The major program is constructed to accommodate students who wish to prepare for professional or graduate work in physics as well as those who wish to complete their major program in the field of physics but have other post-graduation goals.

Students who wish to major in physics are advised to start the physics sequence in the first term of their freshman year. (Note that students who have had contact with introductory calculus may take PHYS 112 with co-registration in MATH 190 or 191.) The major program can still be completed with a second-term start, but flexibility in future course scheduling is reduced.

Prospective majors are urged to make an early appointment at the physics office for advice in program planning. Acceptance into the major program is normally granted upon completion of a year of physics and mathematics courses at Cornell with all course grades at the B-level or higher. The department office will give advice in the matter of selecting a major faculty adviser. Details of the major course program are worked out in consultation between the student and major adviser.

Physics Core

Common to all major programs is a requirement to complete a core of physics courses. In addition to the three-term introductory sequence (PHYS 112–213–214 or PHYS 116–217–218), the core includes five upper-level courses—(a) the two-course sequence in modern physics (PHYS 316–317), (b) at least three semester hours of laboratory work selected from PHYS 310, 330, 360, 410, Astronomy 410, (c) an intermediate course in classical mechanics, and (d) an intermediate course in electromagnetism.

Typical Physics Course Sequences (other sequences are also possible)

Semester	No AP math or physics	1 year AP calculus and good HS physics	Outside concentrators	Outside concentrators (alternate)
1st – Fall	112	116	112	
2nd – Spring	213	217	213	112
3rd – Fall	214	218	214	213
4th – Spring	316, 3x0	316, 3x0	3x0	214
5th – Fall	317, 327, 3x0	317, 327, 3x0	316	3x0, 316
6th – Spring	314/318, 443	318, 443	314	314, 3x0
7th – Fall	341, 410	341, 410	317, 323	317, 323
8th – Spring	Elective(s)	Elective(s)		

- For majors with concentrations outside physics, there will be wide variation in individual programs, arranged to best match the field of concentration.
- Crossovers between the two sequences 112–113–214 and 116–217–218 are possible, although the combinations 112–217–218 and 112–213–218 are difficult. PHYS 207 may be substituted for PHYS 112. Students taking 217 after 112 must coregister for 216.
- Students taking the honors sequence 116–217–218 are strongly encouraged to start with PHYS 116. Exceptionally well-prepared students may be able to begin work at Cornell with PHYS 217. Such students should come to the department office for advice in planning a course program.
- Physics electives for the major include 360, 444, 454, 455, 480, 490, 525, 553, 561, 572, the senior seminars 481–489, ASTRO 332 or 431–432, and A&EP 434.
- **One** semester of intermediate laboratory, listed here as 3x0, is required.
- Well-prepared sophomores wishing to take PHYS 318 should consult the instructor before registering.

Accompanying these physics courses should be work in mathematics through at least MATH 222 or 294. Students following the professional/graduate school channel are expected to complete at least one additional year of applicable mathematics (A&EP 321–322 or MATH 321/420–422).

In *addition* to the core, each physics major must complete 15 semester hours of credit in an area of concentration which has been agreed on by the student and major faculty adviser.

Concentration within Physics

A student who wishes to pursue professional or graduate work in physics or a closely related field should follow a concentration within the field of physics. For those students with a strong secondary school preparation, the sequence PHYS 116–217–218 is encouraged. Students are strongly encouraged to start the sequence with PHYS 116, even if they qualify for advanced placement credit for PHYS 112. Core courses in mechanics and electromagnetism will normally be PHYS 318 and PHYS 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course PHYS 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who may follow the different sequences is the amount and level of pre-college work in calculus and in physics. Changes in these typical patterns will be common, as agreed on between student and major faculty adviser. Research work is encouraged of all majors. If this work is done as an independent project, PHYS 490, up to eight credits can be applied to the concentration.

Concentration outside Physics

The concentration will reflect the student's interest in some area related to physics. The array of courses that comprise the concentration must have internal coherence. The array will normally be worked out in conference with the major faculty adviser and must be approved by the adviser. Of the required 15 hours credit beyond the core, at least eight credits must be in courses numbered above 300. Students have chosen to concentrate in such topics as chemical physics, astrophysics, natural sciences, history and philosophy of science, computer science, meteorology, or econometrics. A combined biology-chemistry concentration is appropriate for pre-medical students or those who wish to prepare for work in biophysics. Students interested in a career in the teaching of science should consider the Teacher Education in Science and Mathematics (TESM) Program, which is administered by the Departments of Education and Mathematics and is described in detail in the College of Arts and Sciences section of this catalog. A concentration in "science education" would then typically include EDUC 402 and 403, both part of TESM, and two or more courses designed to broaden the student's background in general science and mathematics.

For students with concentrations outside physics, the core requirements in mechanics and electromagnetism can be appropriately met with PHYS 314 and PHYS 323, respectively.

Students with an astronomy concentration who might continue in that field in graduate school should use ASTRO 410, 431, 432 as part of the concentration; they are encouraged to use PHYS 318 and 327 to satisfy the core requirements in mechanics and electromagnetism.

Honors

A student may be granted honors in physics upon the recommendation of the Physics Advisers Committee of the physics faculty. There is no particular course structure or thesis requirement for honors.

Double Majors

Double majors including physics are possible and not at all uncommon. It should be noted, however, that any course used to satisfy a requirement of another major may be used in satisfaction of physics major requirements only if the student's concentration is *within* physics.

Courses with Overlapping Content

Because the department offers several courses with overlapping content, students should select courses carefully to meet the needs of their academic programs and to ensure credit for each course they take. Listed below are groups of courses with largely similar content. In general, students may receive credit for only one of the courses in each group.

PHYS 101, 112, 116, 207
PHYS 102, 208, 213, 217
PHYS 214, 218
PHYS 314, 318
PHYS 323, 327
PHYS 116, 216

Course Prerequisites

Prerequisites are specified in physics course descriptions to illustrate the materials that students should have mastered. Students who wish to plan programs different from those suggested by the prerequisite ordering are urged to discuss their preparation and background with a physics adviser or with the instructor in the course. In many cases an appropriate individual program can be worked out without exact adherence to the stated prerequisites.

Courses

Listed days and times are not definite but are unlikely to change. Days and times are not listed for 600-level courses.

PHYS 101 General Physics I (I)
Fall, summer 4-week or 8-week session. 4 credits. General introductory physics for nonphysics majors. Prerequisites: 3 years of high school mathematics, including some trigonometry. A student without high school physics should allow extra time for PHYS 101. Includes less mathematical analysis than PHYS 207, but more than PHYS 200–206, 209, 210. Enrollment may be limited. Fall introductory lec. R Aug. 24 or M Aug. 28, 7:30 P.M. D. Fitchen.

PHYS 101 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit. Most instruction occurs in the learning center using video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 101: kinematics, forces and dynamics, momentum, energy, fluid mechanics, waves and sound, thermal physics, kinetic theory, and thermodynamics. At the level of *Physics 5th edition* by Cutnell and Johnson.

PHYS 102 General Physics II (I)
Spring, summer 4-week or 8-week session. 4 credits. Prerequisite for PHYS 102: PHYS 101 or 112 or 207. Includes less mathematical analysis than PHYS 208, but more than PHYS 200–206, 209, 210. Enrollment may be limited. Spring introductory lec, M Jan. 24, 7:30 P.M. Staff.

PHYS 101–102 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit each term. Most instruction occurs in the learning center using video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 102: electricity and magnetism, optics, relativity, atomic, quantum, and nuclear physics. At the level of *Physics 5th edition* by Cutnell and Johnson.

PHYS 103 General Physics (I)
Summer. 4 credits. Prerequisite: 3 years of high school mathematics, including some trigonometry. A student without high school physics should allow extra time for PHYS 103. PHYS 103 is a more traditional version of PHYS 101. PHYS 103 is not appropriate for students majoring in physics or engineering; it is primarily for students majoring in the life sciences. Lectures and discussions: M-F 10:00–11:15; laboratories M W 2:00–5:00.

Basic principles treated quantitatively but without calculus. Topics include: kinematics; forces and fields; momentum, angular momentum, and energy; thermal physics and fluid mechanics; sound waves. Text at the level of *Physics, 5th edition,* by Cutnell and Johnson.

PHYS 112 Physics I: Mechanics (I)
Fall, spring, summer 6-week session. 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisite: coregistration in MATH 192 (or 194 or 112), or substantial previous contact with introductory calculus combined with coregistration in MATH 111 or 191. Lec, M W F 10:10–11:00 or 12:20–1:10. Two rec. and one lab/cooperative learning session each week. Evening exams. Fall, A. LeClair; spring, staff.

Course covers the mechanics of particles with focus on: kinematics, dynamics, conservation laws, central force fields, periodic motion. Mechanics of many-particle systems: center of mass, rotational mechanics of a rigid body, and static equilibrium. At the level of *University Physics, Vol. 1,* by Young and Freedman.

PHYS 116 Physics I: Mechanics and Special Relativity (I)

Fall, spring. 4 credits. More analytic than PHYS 112, intended for students who will be comfortable with a deeper, somewhat more abstract approach. Intended mainly but not exclusively for prospective physics majors or applied and engineering physics majors. Prerequisites: a good secondary school physics course, familiarity with basic calculus, and enjoyment of puzzle-solving. Corrective transfers between PHYS 116 and PHYS 112 (in either direction) are encouraged during the first several weeks of instruction. Lec M W F 10:10–11:00.

A more rigorous version of PHYS 112, covering similar topics at the level of *An Introduction to Mechanics*, by Kleppner and Kolenkow.

PHYS 117 Concepts of Modern Physics

Fall. 1 credit. S-U only. Enrollment may be limited. Coregistration in PHYS 112 or 116 or 213 or 217 is required. For freshmen who plan to major in physics, applied and engineering physics, or astronomy. Lec, W 1:25–2:15 P.M. A. Sadoff.

This course is intended for freshmen who plan to major in physics or a closely related field (i.e., applied and engineering physics or astronomy) and would like to learn about the concepts of modern physics early in their physics education. Possible topics of discussion are methodology, symmetry and conservation laws, quantum theory, the unification of forces and matter, and big-bang cosmology.

PHYS 190 Supplemental Introductory Laboratory

Fall, spring. 1 credit. Times by arrangement with instructor. S-U only. Enrollment limited to students who have **all** of the following; (1) 3 transfer credits for introductory physics lecture material; (2) a degree requirement of the laboratory component of that introductory course; (3) approval of the director of undergraduate studies; and (4) permission of the lecturer of that course at Cornell. Enrollment limited.

A PHYS 190 Permission Form must be filed in 121 Clark Hall with the physics department course coordinator. Students perform the laboratory component of one of the introductory courses (PHYS 112, 213, 214) to complement the lecture-related course credit acquired elsewhere. Those wishing to take the equivalent of one of these introductory courses at another institution should receive prior approval from the director of undergraduate studies.

PHYS 200 Art, Archaeology, and Analysis (also GEOL 200, ENGRI 185, MS&E 285, ARKEO 285, and ART 372) (I or IV)

For description, see EAS 200.

PHYS 201 Why the Sky Is Blue: Aspects of the Physical World (I)

Fall. 3 credits. Lec, T R 2:55–4:10, rec, W 9:05–9:55 or 2:30–3:20 or 3:35–4:25. A. Sadoff.

This is a descriptive physics course aimed specifically at the nonscience student. There is an emphasis on the ideas of modern physics where the approach is both historical and thematic. The methodology of science and the nature of evidence is emphasized. An overriding theme is the character of physical laws as shown through the great principles of symmetry and conservation. While there are a few computational problems assigned, the purpose is to help students to understand the concepts rather than to master problem-solving techniques. At the level of *Physics Concepts and Connections* by Hobson.

PHYS 202 The World According to Physics—The Way Things Work (I)

Summer-3 week session. 3 credits. Prerequisite: 3 years of high school mathematics, including some trigonometry. M-F 10:00–12:00; laboratories 2 afternoons per week TBA. R. Lieberman.

Intended to provide students majoring in fields outside the sciences with an appreciation for the familiar physical world surrounding them. Which falls faster, a pound of gold or a pound of feathers? What trajectory does a launched rocket follow? Why are the curves on highways banked? What actually keeps a satellite circling the earth—why doesn't it just fall down or fly away? Can you build a ship that runs off the heat found in the ocean? With an emphasis on problem solving, the course helps the student develop skills transferable to other areas. Topics include: Newton's basic laws of motion, trajectories, satellites, space travel, and the concepts of energy.

PHYS 203 Physics of the Heavens and the Earth—A Synthesis (I)

Spring. 3 credits. Prerequisite: none; uses high school algebra and geometry. For nonscience majors. Lec T R 2:55–4:10; sec W 2:30–3:20 or 3:35–4:25. H. Padamsee.

This course shows how the unification of apparently distinct areas of physics leads to an explosion in the growth of our knowledge and understanding. The material is divided into three parts: the physics of motion on earth and motion in the heavens, showing how the two evolved separately, from the ideas of the ancient Greeks to the dynamics and telescopic discoveries of Galileo; the final melding of these two topics with Newton's Universal Gravitation; and an exploration of this "new" physics and its impact. There is an emphasis throughout on "how do we know the laws?" These are the stories of breakthrough discoveries and brilliant insights made by fascinating people, offering a humanistic perspective.

PHYS 205 Reasoning about Luck (I or II)

Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but uses high school algebra. Lec, M W 2:55–4:10; rec, T 2:30–3:20.

An attempt to explain how natural scientists can cope rationally with randomness. The first part of the course deals with the basic ideas of probability theory and explains why it is that in large systems likely events can become overwhelmingly likely. If we apply these ideas to gases consisting of very large numbers of molecules, an explanation of the true nature of heat follows. In this way, students are given a deep understanding of the second law of thermodynamics.

Probability enters into quantum mechanics in a more basic and somewhat mysterious way. We will spend the latter part of the course giving simple examples of the difference between classical and quantum probability. In particular, we discuss what is meant by an "entangled state" and how we know there are no hidden variables. At the level of *Reasoning About Luck: Probability and Its Uses in Physics* by Ambegaokar.

PHYS 206 Physics in the News (I)

Spring. 3 credits. Prerequisite: high school algebra. Intended for non-science majors. Does not serve as a prerequisite for further science courses. Lec T R 1:25–2:40. One rec. each week. N. Mistry.

"Physics in the News" examines the physics concepts behind the everyday news headlines. Typical topics include space exploration, global warming, medical imaging, magnetic levitation trains and electric cars, asteroid impacts, and other interesting headlines that may occur during the semester. This course is intended for non-science majors and is mainly descriptive. Our tools for understanding these topics are some of the most basic principles of physics, illustrated using algebra at the high school level. Detailed lecture notes are provided on the web. Readings are from the scientific press at the level of Scientific American and the text by Hobson listed below. Students are encouraged to explore the social and environmental aspects of some of the more debatable topics through articles and webpages. At the level of, Physics, Concepts and Connections, 2nd edition, by Art Hobson.

PHYS 207 Fundamentals of Physics I (I)

Fall. 4 credits. Prerequisites: high school physics plus MATH 111 or 191, or substantial previous contact with introductory calculus, combined with coregistration in a math course approved by instructor. Lec, M W F 9:05–9:55 or 11:15–12:05; two rec. and one lab each week. Evening exams. R. Thorne.

PHYS 207–208 is a two-semester introduction to physics, intended for students majoring in an analytically oriented biological science, a physical science, or mathematics with emphasis on applications and on quantitative tools generally applicable to the sciences.

Course covers: mechanics, conservation laws, waves, and topics from thermal physics, fluids, acoustics, and properties of matter. At the level of *Fundamentals of Physics*, Vol. I, 5th edition, by Halliday, Resnick, and Walker.

PHYS 208 Fundamentals of Physics II (I)

Spring. 4 credits. Prerequisites for PHYS 208: PHYS 207 or 112 or 101 and at least coregistration in MATH 112 or 192. PHYS 207–208 is a two-semester introduction to physics with emphasis on tools generally applicable in the sciences, intended for students majoring in a physical science, mathematics, or an analytically oriented biological science. Lec, M W F 9:05–9:55 or 11:15–12:05; two rec. and one lab each week. Evening exams. Staff.

Course covers electricity and magnetism, and topics from physical and geometrical optics, quantum and nuclear physics. At the level of *Fundamentals of Physics*, Vol II, 5th edition, by Halliday, Resnick, and Walker.

PHYS 209 Relativity and Chaos (I or II)

Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but uses high school algebra. Lec, T R 1:25–2:40; rec, M 2:30–3:20 or M 3:35–4:25.

We examine two revolutionary fields of classical physics, one venerable and one

relatively recent: the special theory of relativity is developed, with a view to understanding how certain simple but apparently contradictory facts about light lead to extraordinary insights into the nature of time; and the newer subject of "chaos" is explored, with a view to seeing how extremely simple rules can lead to behavior of breathtaking complexity.

PHYS 213 Physics II: Heat/ Electromagnetism (I)

Fall, spring, (summer 6-week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: PHYS 112 and coregistration in the continuation of the mathematics sequence required for PHYS 112. Lec, T R 9:05–9:55 or 11:15–12:05, two rec. each week and six 2-hour labs. Evening exams. Fall, J. Rogers; spring, staff.

Course topics include: temperature, heat, thermal energy, electrostatics, behavior of matter in electric fields, DC circuits, magnetic fields, Faraday's law, Maxwell's equations, and electromagnetic oscillations. At the level of *University Physics/Vol. 1&2,* by Young and Freedman. Laboratory covers electrical measurements, circuits, and some aspects of heat transfer.

PHYS 214 Physics III: Optics, Waves, and Particles (I)

Fall, spring, (summer, 6 week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: PHYS 213 and completion of a course in differential equations. Two rec. each week and one 3-hour lab alternate weeks. Evening exams. Lec, T R 9:05–9:55 or 11:15–12:05. Fall, T. Arias; spring, staff.

Physics of wave phenomena, electromagnetic waves, interference and diffraction effects, wave properties of particles and introduction to quantum physics. Course includes computer use in solving problems and labs. At the level of *University Physics, Vol. 1&2,* by Young and Freedman.

PHYS 216 Introduction to Special Relativity

Fall, spring, based on preregistration. 1 credit. S-U only. Enrollment may be limited. Course is completed within first 4 to 6 weeks of term. Coregistration in this course is a requirement for registration in PHYS 217, unless the student has taken a relativity course at the level of PHYS 116 or ASTRO 106. Prerequisites: PHYS 112 or PHYS 207 or permission of instructor. Lec, T R 8:00–8:50. Fall, J. Rogers; spring, staff.

Introduction to Einstein's Theory of Special Relativity including: Galilean and Lorentz transformations, the concept of simultaneity, time dilation and Lorentz contraction, the relativistic transformations of velocity, momentum and energy, and relativistic invariance in the laws of physics. At the level of *An Introduction to Mechanics* by Kleppner and Kolenkow.

PHYS 217 Physics II: Electricity and Magnetism (also A&EP 217) (I)

Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 112 or 116 and in mathematics and who desire a more analytic treatment than that of PHYS 213. Prospective physics majors are encouraged to select PHYS 217. Prerequisites: approval of student's adviser and permission from the instructor. A placement quiz may be given early in the semester, permitting those students who find PHYS 217 too abstract or analytical to transfer into PHYS 213, which they can do without difficulty at that time. Vector calculus is taught in this course, but previous contact, especially with the operations *grad*, *div*, and *curl*, is helpful. It is assumed the student has seen Special Relativity at the level of PHYS 116 or is currently enrolled in PHYS 216. It is also assumed that the student has covered the material of MATH 192 and is coregistered in MATH 293 or the equivalent. Lec, M W F 10:10–11:00. Fall, A. Sievers; spring, R. Buhrman.

At the level of *Electricity and Magnetism*, by Purcell (Vol. 2, Berkeley Physics Series).

PHYS 218 Physics III: Waves and Thermodynamics (I)

Fall, spring. 4 credits. Enrollment may be limited. Intended for students who have done very well in PHYS 116 and 217 and in mathematics, and who desire a more analytic treatment than that of PHYS 214. Prospective physics majors are encouraged to select PHYS 218. Prerequisites: PHYS 217 (with a grade of B or higher) and completion of a course in differential equations or permission of instructor. A placement quiz may be given early in the semester so that students who find PHYS 218 too demanding can transfer into PHYS 214. Lec, M W F 11:15–12:05. Fall, N. Ashcroft; spring, staff.

Topics covered in recent years have included oscillators, mechanical waves, electromagnetic waves, physical and geometrical optics, and the first and second laws of thermodynamics. Evening exams may be scheduled. At the level of *Physics of Waves* by Elmore and Heald.

PHYS 310 Intermediate Experimental Physics (I)

Spring. 3 credits. Enrollment may be limited. Prerequisite: PHYS 208 or 213. Labs T R 1:25–4:25.

Students select from a variety of experiments. An individual, independent approach is encouraged. Facilities of the PHYS 410 lab are available for some experiments.

PHYS 314 Intermediate Mechanics (I)

Spring. 4 credits. Prerequisites: PHYS 208 or 214 (or equivalent) and MATH 294 (or equivalent); Intended for physics majors with concentration outside of physics or astronomy; PHYS 318 covers similar material at a more analytical level. Lec. M W F 10:10–11:00, rec. F 1:25–2:15. C. Franck.

Likely topics include: Lagrangian mechanics; Newtonian mechanics based on a variational principle; conservation laws from symmetries; two-body orbits due to a central force; analysis of scattering experiments; small amplitude oscillating systems including normal modeanalysis; parametrically driven systems; rigid body motion; motion in non-inertial reference frames; and nonlinear behavior including bistability and chaos. Students not only become more familiar with analytic methods for solving problems in mechanics but also gain experience with computer tools. At the level of *Classical Dynamics* by Marion and Thorton.

PHYS 316 Modern Physics I (I)

Fall, spring. 3 credits. Prerequisites: PHYS 214 or 218 and coregistration in at least MATH 294 or equivalent. It is assumed that majors registering in PHYS 316 will continue with PHYS 317. Lec, M W F 9:05–9:55; rec, R 3:35–4:25. S. Teukolsky.

Course topics include: breakdown of classical concepts in microphysics; light quanta and matter waves; Schrödinger equation and solutions in 1 and 3 dimensions; and the hydrogen atom, exclusion principle, and spin and magnetic moments. At the level of *An Introduction to Quantum Physics* by French and Taylor.

PHYS 317 Modern Physics II (I)

Fall. 3 credits. Prerequisite: PHYS 316. Lec, M W F 9:05–9:55, rec, T 2:30–3:20. G. Dugan.

Course topics include: an investigation of quantum phenomena; atomic physics; classical and quantum statistical mechanics; molecules; solid state physics; nuclear physics and radioactivity; and elementary particle physics. At the level of *Modern Physics* by Serway.

PHYS 318 Analytical Mechanics (I)

Spring. 4 credits. Prerequisites: PHYS 116 or permission of instructor; A&EP 321 or MATH 420. Intended for junior physics majors concentrating in physics or astronomy. PHYS 314 covers similar material at a less demanding level. Lec, M W F 10:10–11:00; rec, F 2:30–3:20. M. Neubert.

Newtonian mechanics of particles and systems of particles, including rigid bodies; oscillating systems; gravitation and planetary motion; moving coordinate systems; Euler's equations; Lagrange and Hamilton formulations; normal modes and small vibrations; introduction to chaos. At the level of *Classical Mechanics* by Goldstein, *Classical Dynamics* by Marion and Thorton, and *Analytical Mechanics* by Hand and Finch. Supplementary reading is assigned.

PHYS 323 Intermediate Electricity and Magnetism (I)

Fall. 4 credits. Prerequisites: PHYS 208 or 213/214 (or equivalent) and MATH 293/ 294 (or equivalent); coregistration in A&EP 321 or MATH 420 recommended. Intended for physics majors with a concentration outside of physics or astronomy; PHYS 327 covers similar material at a more analytical level. Lec, M W F 11:15–12:05, rec, F 2:30–3:20. R. Talman.

Course topics include: electro/magnetostatics, boundary value problems, dielectric and magnetic media, Maxwell's Equations, electromagnetic waves, and sources of electromagnetic radiation. At the level of *Introduction to Electrodynamics* by Griffiths.

PHYS 327 Advanced Electricity and Magnetism (I)

Fall. 4 credits. Prerequisites: PHYS 217/218 or permission of instructor; coregistration in A&EP 321 or MATH 420. Intended for physics majors concentrating in physics or astronomy. PHYS 323 covers similar material at a less demanding level. N.B.: PHYS 327 assumes knowledge of the material at the level of PHYS 217, and makes extensive use of Fourier transforms. Lec, M W F 11:15–12:05, rec, F 2:30–3:20. L. Gibbons.

Course covers: electro/magneto-statics, vector and scalar potentials, Laplace's Equation and boundary value problems, multipoles; radiation-solutions to Maxwell's Equations,

energy-momentum of radiation; electrodynamics in media; and special relativity-transformations, four vectors, particle kinematics and dynamics, relativistic electrodynamics. At the level of *Classical Electromagnetic Radiation*, by Heald and Marion.

PHYS 330 Modern Experimental Optics (also A&EP 330) (I)

Fall. 4 credits. Enrollment limited. Prerequisite: PHYS 214 or equivalent. Lec, W 12:20–1:10; Lab, M T 1:25–4:25. M. Wang.

A practical laboratory course in basic and modern optics. The six projects cover a wide range of topics from geometrical optics to classical wave properties such as interference, diffraction, and polarization. Each experimental setup is equipped with standard, off-the-shelf optics and opto-mechanical components to provide the students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. Students are also introduced to digital imaging and image processing techniques. At the level of *Optics* by Hecht.

PHYS 341 Thermodynamics and Statistical Physics (I)

Fall. 4 credits. Prerequisites: PHYS 214, 316, and MATH 294. Lec, M W F 10:10–11:00, rec, R 2:30–3:20. V. Ambegaokar.

Course covers: statistical physics, developing both thermodynamics and statistical mechanics simultaneously. Also covers concepts of temperature, laws of thermodynamics, entropy, thermodynamic relations, and free energy. Applications to phase equilibrium, multicomponent systems, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems, and introduction to treatment of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics with applications. Elementary transport theory. At the level of *Fundamentals of Statistical and Thermal Physics*, by Reif, or *Introduction to Statistical Mechanics* by Betts.

PHYS 360 Electronic Circuits (also A&EP 363) (I)

Fall, spring. 4 credits. S-U grade option available by permission of the instructor for students who do not require this course for their major. Prerequisites: undergraduate course in electricity and magnetism (e.g., PHYS 208, 213, or 217) or permission of the instructor. No previous electronics experience is assumed, although the course moves quickly through introductory topics such as basic dc circuits. Fall term usually has a smaller enrollment. Lec, M 2:30–4:25. Labs T R or W F 1:25–4:25; evening labs M W 7:30–10:30 spring. Fall, E. Kirkland; spring R. Thorne.

Practical electronics as encountered in a scientific or engineering research/development environment. Analyze, design, build, and test circuits using discrete components and integrated circuits. Analog circuits: resistors, capacitors, filters, operational amplifiers, feedback amplifiers, oscillators, comparators, passive and active filters, diodes and transistor switches and amplifiers. Digital circuits: combinational and sequential logic (gates, flip-flops, registers, counters, timers), analog to digital (ADC) and digital to analog (DAC) conversion, signal averaging, computer architecture and interfacing. Additional topics may include analog and digital signal processing, light wave communications, transducers, and noise reduction techniques. At the level of *Art of Electronics* by Horowitz and Hill.

PHYS 400 Informal Advanced Laboratory

Fall, spring; (summer, 6 week session). Variable to 3 credits. (3 credits *NOT* variable in summer.) Prerequisites: 2 years of physics or permission of instructor. Lab T W 1:25–4:25. Fall, L. Hand; spring, D. Hartill.

Experiments of widely varying difficulty in one or more areas, as listed under PHYS 410, may be done to fill the student's special requirements.

PHYS 410 Advanced Experimental Physics

Fall, spring. 4 credits. Limited to seniors except by special permission. Prerequisites: PHYS 214 (or 310 or 360) plus 318 and 327, or permission of instructor. Lec, M 2:30–3:20, lab T W 1:25–4:25. Fall, L. Hand; spring, D. Hartill.

Selected topics in experimental concepts and techniques. About 60 different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, and nuclear physics. The student performs three to six diverse experiments, depending on difficulty, selected to meet individual needs and interests. Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

PHYS 443 Introductory Quantum Mechanics (I)

Spring. 4 credits. Prerequisites: PHYS 327 or 323; and PHYS 316 and A&EP 321 or MATH 420; coregistration in PHYS 314 or 318; or permission of instructor. Lec, M W F 9:05–9:55, rec, R 3:35–4:25. S. Teukolsky.

This course provides an introduction to concepts and techniques of quantum mechanics, at the level of *An Introduction to Quantum Mechanics*, by Griffiths.

PHYS 444 Nuclear and High-Energy Particle Physics (I)

Spring. 4 credits. Prerequisite: PHYS 443 or permission of instructor. Lec, M W F 9:05–9:55, rec, F 2:30–3:20. J. Rogers.

The course begins with a phenomenological description of atomic nuclei made of neutrons and protons. This includes what is measured and how one may use nuclear interactions as a source of energy. The study of proton-nuclear interactions led to the discovery of many new particles. The course then goes into the behavior of high-energy particles and radiation; elementary particles; basic properties of accelerators and detectors; general symmetries and conservation laws. At the level of *Concepts of Particle Physics*, by Gottfried and Weisskopf or *Modern Elementary Particle Physics* by Kane.

PHYS 451 Classical Mechanics, Nonlinear Dynamics, and Chaos (also PHYS 551) (I)

Spring. 3 credits. Only students with a strong performance in PHYS 318 or the equivalent will be admitted to the course. Biweekly two-hour seminar to be scheduled. Lec, T R 10:10–11:25. Next offered spring 2002. L. Hand.

This course provides an introduction to advanced topics in modern classical mechanics: methods of formulating both discrete and continuum Hamiltonian dynamics, classical field theory, canonical transformations, action-angle variables, the Hamilton-Jacobi equation, connection between classical and quantum mechanics, solvable, integrable, and nonintegrable systems, and KAM tori. Includes analytic techniques in nonlinear dynamics with examples chosen from a variety of systems of physical interest, phase-locking and fractional order resonances, and classification of bifurcations. Also covers dissipative and Hamiltonian chaos: logistic and standard maps, renormalization, KAM theorem, and quantum chaos. Some fluid dynamics and Sturm-Liouville theory included as time permits. The first part of the course is at the level of *Theoretical Mechanics of Particles and Continua*, by Fetter and Walecka; the second part is at the level of *Regular and Chaotic Dynamics*, 2nd edition, by Lichtenberg and Lieberman.

PHYS 454 Introductory Solid-State Physics (also A&EP 450) (I)

Fall. 4 credits. Prerequisite: PHYS 443, A&EP 361, or CHEM 793 is highly desirable but not required. Lec, M W F 9:05–9:55. Computer lab: W or R 2:30–4:25. F. Wise.

An introduction to modern solid-state physics, including crystal structure, lattice vibrations, electron theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, superconductivity, and defects. At the level of *Introduction to Solid State Physics*, by Kittel, and *Solid State Physics*, by Ashcroft and Mermin.

PHYS 455 Geometrical Concepts in Physics (I)

Spring. 4 credits. Prerequisite: PHYS 323 or equivalent and at least coregistration in PHYS 318 or permission of instructor. Usually offered every other spring. Lec, T R 10:10–11:25. R. Talman.

Geometrical methods are an essential tool in modern theoretical physics and also provide deep insights into classical physics. This course introduces basic concepts from differential geometry, emphasizing calculational methods and illustrating their utility by drawing examples from mechanics, electrodynamics, and crystal diffraction. Tensors, differential forms, covariant and Lie derivatives, Lie algebra of vector fields, and gauge invariance are developed and employed. At the level of *Geometric Mechanics* by Talman.

[PHYS 456 Introduction to Accelerator Physics and Technology (also PHYS 656) (I)

Fall. 3 credits. Prerequisites: Intermediate E&M (PHYS 323 or 327) and Classical Mechanics (PHYS 314 or 318). Lec, T R 10:10–11:25. Not offered 2001–2002. G. Dugan.

Fundamental physical principles of particle accelerators and enabling technologies, with a focus on circular high energy colliders, such as the Cornell Electron Storage Ring (CESR). Includes beam optical design, the single-particle dynamics of transverse and longitudinal motion, the role of synchrotron radiation, nonlinear and coupled motion, and collective effects. The physics of some of the required technologies (radio frequency cavity systems, vacuum systems, and magnets) will be covered in seminars conducted by experts. At the level of *Introduction to the Physics of High Energy Accelerators* by Edwards and Syphers.]

[PHYS 457 The Storage Ring as a Source of Synchrotron Radiation (also PHYS 657) (I)

Spring. 3 credits. Prerequisites: intermediate level mechanics (PHYS 314 or 327) and E&M (PHYS 323 or 327) or permission of instructor. Previous completion of PHYS 456/656 is not required. Lec, T R 11:40–12:55. Not offered 2001–2002. S. Gruner and R. Talman.

This course covers physics of synchrotron radiation with a focus on characteristics of radiation from dipole magnets, electron beam properties that influence radiation characteristics, issues of flux, brightness, emittance, brilliance, beam stability, and beam lifetime. Regular lectures alternate with visitor lectures on specialized topics on radiation from insertion devices (i.e., wigglers and undulators,) x-ray optics, coupling to beams, and coherence in x-ray beams. There is special emphasis on understanding the requirements of experimental x-ray applications and hands-on opportunities for doing synchrotron radiation experiments. Course notes are made available on a web site.]

PHYS 480 Computational Physics (also PHYS 680 and ASTRO 690) (I)

Spring. 3 credits. S-U grades only. The course assumes familiarity with the standard mathematical methods for the physical sciences and engineering, differential equations and linear algebra in particular and with computer programming (e.g., Fortan or C). Lec, T R 8:40–9:55. T. Arias.

This course covers numerical methods for ordinary and partial differential equations, linear algebra and eigenvalue problems, nonlinear equations, and fast Fourier transforms from the hands-on perspective of how they are used in modern computational research in the era of open software and the web. The computer assignments which teach the material are designed also to achieve a larger goal: In the end, each student has developed his or her own working ab initio computer program for calculating the properties of molecules and materials with the methods which won Walter Kohn and John Pople the Nobel prize in Chemistry in 1998.

PHYS 481 Quantum Information Processing (also PHYS 681 and COM S 483)

Spring. 2 credits. S-U only. Lec, T R 1:25–2:15. N. David Mermin.

A technology firmly grounded on fundamental principles of quantum physics can spectacularly alter both the nature of computation and the means available for the transmission of information. Though implementation may be extremely difficult to achieve, the theory of quantum computation offers striking new perspectives on computation and information, as well as on the quantum theory itself. Topics include an introduction to the relevant principles of quantum physics, quantum cryptography, quantum bit commitment, teleportation, Shor's factoring algorithm, Grover's search algorithm, quantum circuits, and quantum error correction. The subject is developed in a manner suitable both for physicists, unfamiliar with computational complexity theory, and computer scientists and mathematicians, unfamiliar with the principles of quantum mechanics. Familiarity with the theory of vector spaces over the complex numbers is assumed.

PHYS 487 Selected Topics in Accelerator Technology (also PHYS 687)

Fall. 2 credits. S-U only. Prerequisites: intermediate E&M (PHYS 323 or 327). Lec, T R 11:40–12:55. Staff.

Fundamentals of accelerator technology. This course consists of a series of topical seminars covering the principal elements of accelerator technology. Each seminar consists of two to four lectures. The topics covered include magnet technology (normal, superconducting, and permanent), particle sources (both electrons and ions), rf technology (normal and superconducting), power conversion, vacuum technology (both warm and cold vacuum systems), feedback systems, general instrumentation and control systems, cryogenics systems, and survey and alignment.

PHYS 488 Introduction to Accelerator Physics and Technology (also PHYS 688) (I)

Fall. 3 credits. Prerequisites: Intermediate E&M (PHYS 323 or PHYS 327) and Classical Mechanics (PHYS 314 or PHYS 318). Lec, T R 10:10–11:25. A. G. Dugan.

Course covers fundamental physical principles of particle accelerators and enabling technologies, with a focus on circular high energy colliders, such as the Cornell Electron Storage Ring (CESR). Includes beam optical design, the single-particle dynamics of transverse and longitudinal motion, collective motion, the role of synchrotron radiation, and the interactions of colliding beams. The physics of some of the required technologies, such as radiofrequency cavity systems, vacuum systems, and magnets, is covered in seminars conducted by experts. At the level of *Introduction to the Physics of High Energy Accelerators* by Edwards and Syphers.

PHYS 490 Independent Study in Physics

Fall or spring. Variable to 4 credits. Students can apply a maximum of eight PHYS 490 credits to the physics major. Prerequisite: permission required of professor who will direct proposed work. A copy of the Request for Independent Study form must be filed with physics department course coordinator, 121 Clark Hall. Individual project work (reading or laboratory) in any branch of physics.

PHYS 500 Informal Graduate Laboratory

Fall, spring; summer. Variable to 2 credits. By permission of instructor. Experiments of widely varying difficulty in one or more areas, as listed under PHYS 510, may be done to fill student's special requirements.

PHYS 510 Advanced Experimental Physics

Fall, spring, summer. 3 credits. Lab, T W 1:25–4:25. An optional lecture associated with PHYS 410, M 2:30–4:25 is available. Fall, L. Hand; spring, D. Hartill.

About 60 different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, and nuclear physics. Students perform four to eight experiments selected to meet individual needs. Independent work is stressed. Lectures include techniques used in experiments in the advanced laboratory and on current research topics.

PHYS 520 Projects in Experimental Physics

Fall, spring, summer. Variable to 3 credits. To be supervised by faculty member. Students must advise department course coordinator of faculty member responsible for their project. Prerequisite: PHYS 510.

Projects of modern topical interest that involve some independent development work by student. Opportunity for more initiative in experimental work than is possible in PHYS 510.

PHYS 525 Physics of Black Holes, White Dwarfs, and Neutron Stars (also ASTRO 511)

Spring. 4 credits. No astronomy or general relativity prerequisites. D. Lai.

This course covers the formation of compact objects: neutrino and gravitational radiation from supernova collapse and neutron stars; equilibrium configurations, equations of state, stability criteria, and mass limits; the influence of rotation and magnetic fields, pulsar phenomena, mass flow in binary systems; spherical and disk accretion; high-temperature radiation processes, compact X-ray sources; Gamma-Ray bursts; and high energy processes near supermassive blackholes, Quasars, and active galactic nuclei. Emphasis is on the application of fundamental physical principles to compact objects. Topics in diverse areas of physics are discussed including: solid-state physics, nuclear physics, relativity, fluid dynamics, and high-energy physics.

PHYS 551 Classical Mechanics, Nonlinear Dynamics, and Chaos (also PHYS 451)

Spring. 3 credits.

For description, see PHYS 451.

PHYS 553–554 General Relativity (also ASTRO 509–510)

553, fall; 554, spring. 4 credits. Prerequisite: knowledge of special relativity at the level of Classical Mechanics, by Goldstein. Lec, T R 1:25–2:40. E. Flanagan.

PHYS 553 is a systematic introduction to Einstein's theory, with emphasis on modern coordinate-free methods of computation. Topics include review of special relativity, modern differential geometry, foundations of general relativity, laws of physics in the presence of a gravitational field, and experimental tests of gravitation theories. At the level of *Gravitation*, by Misner, Thorne, and Wheeler. PHYS 554 is a continuation of 553 that emphasizes applications to astrophysics and cosmology. Topics include relativistic stars; gravitational collapse and black holes, gravitational waves, and cosmology.

PHYS 561 Classical Electrodynamics

Fall. 3 credits. T-M. Yan.

Course covers Maxwell's equations, electromagnetic potentials, electrodynamics of continuous media (selected topics), special relativity, and radiation theory. At the level of *Classical Electrodynamics*, by Jackson.

PHYS 562 Statistical Physics

Spring. 4 credits. Primarily for graduate students. Prerequisites: a good knowledge of quantum mechanics (at the level of Merzbacher), classical mechanics (at the level of Marion), and statistical mechanics (at the level of Reif). Lec, M W F 9:05–9:55. N. Ashcroft.

Course covers macroscopic or thermodynamic concepts including the laws of thermodynamics, thermodynamic functions, thermodynamic stability, and the thermodynamics of phase

equilibria. Other topics include: microscopic concepts including 1-, 2-, and N- particle quantum states; the micro-canonical, canonical and grand-canonical distributions; Bose-Einstein, Fermi-Dirac, and Boltzmann statistics; the density-matrix; and the microscopic-macroscopic connection. Applications include spin systems—the Ising and related models; strongly correlated fluids, and lattice-gases, including distribution and correlation functions, thermodynamic perturbation theory and introduction to critical phenomena and the renormalization group; dense Fermi- and Bose- systems; linear response of quantal and classical systems; transport properties; and the Boltzmann equation. At the level of *Statistical Mechanics* (2nd edition) by Pathria and *Statistical Mechanics of Phase Transition* by Yeomans.

PHYS 572 Quantum Mechanics (I)
Fall. 4 credits. Lec, M W F 11:15–12:05. P. Drell.
Course covers the general principles of quantum mechanics, formulated in the language of Dirac. Covers systems with few degrees of freedom: hydrogen atom, including fine and hyperfine structure; the deuteron; and atomic transitions. Theory of angular momentum, symmetries, perturbations and collisions are developed to analyze phenomena displayed by these systems. At the level of *Modern Quantum Mechanics* by Sakurai. A knowledge of the subject at the level of PHYS 443 is assumed, but the course is self-contained.

PHYS 574 Quantum Mechanics (II)
Spring. 4 credits. Lec, M W F 11:15–12:05. E. Flanagan.
Course covers systems with many degrees of freedom. Topics include: quantization of the electromagnetic field; interaction of light with matter; many electron atoms; second quantization for fermions; quantum liquids; scattering of complex systems; and an introduction to the Dirac equation. A knowledge of the concepts and techniques covered in PHYS 561 and 572 is assumed.

PHYS 599 Cosmology (also ASTRO 599)
For description, see ASTRO 599.

PHYS 635 Solid State Physics (I)
Fall. 3 credits. Prerequisites: a good undergraduate solid-state physics course, such as PHYS 454, as well as familiarity with graduate-level quantum mechanics. D. Ralph.
A survey of the physics of solids: crystal structures, x-ray diffraction, phonons, and electrons. Selected topics from semiconductors, magnetism, superconductivity, disordered materials, dielectric properties, and mesoscopic physics. At the level of *Solid State Physics* by Ashcroft and Mermin.

PHYS 636 Solid-State Physics (II)
Spring. 3 credits. Prerequisite: PHYS 635. P. Brouwer.
A continuation of PHYS 635. Topics covered include: Fermi Liquid Theory, magnetism, superconductivity, broken symmetries, elementary excitations, and other topics in quantum condensed matter physics not covered in *Solid State Physics* by Ashcroft and Mermin. These topics include: topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory, disordered systems, Anderson localization, and other metal insulator transitions.

PHYS 645 High-Energy Particle Physics
Fall. 3 credits. B. Gittelman.
Course serves as an introduction to physics of baryons, mesons, and leptons. Topics include: strong, electromagnetic, and weak interactions; relevance of symmetry laws to particle physics; and an introduction to the quark model. At the level of *The Experimental Foundations of Particle Physics*, by Cahn and Goldhaber.

PHYS 646 High-Energy Particle Physics
Spring. 3 credits. Staff.
This course covers: topics of current interest, such as high-energy electron and neutrino interactions, electron positron annihilation, and high-energy hadronic reactions. Lectures and reading material are at the level of *Introduction to High Energy Physics*, by Perkins and *Elementary Particle Physics* by Griffiths.

Note: **Only S-U grades are given in courses numbered 650 or above.**

PHYS 651 Relativistic Quantum Field Theory (I)
Fall. 3 credits. S-U grades only. M. Neubert.
Topics covered include consequences of causality and Lorentz invariance, field quantization, perturbation theory, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and weak interactions.

PHYS 652 Relativistic Quantum Field Theory (II)
Spring. 3 credits. S-U grades only. H. Tye.
This course is a continuation of PHYS 651 and introduces more advanced methods and concepts in quantum field theory. Topics include functional integral methods, quantization of non-abelian gauge theories, the renormalization group, and spontaneous symmetry breaking. Topics in cosmology, supersymmetry or superstring may be introduced. Applications to the electroweak theory and quantum chromodynamics are emphasized. At the level of *An Introduction to Quantum Field Theory* by Peskin and Schroeder.

PHYS 653 Statistical Physics
Fall. 3 credits. Normally taken by graduate students in their second or later years. Prerequisites: competence in the basic principles of quantum mechanics, statistical physics at the level of PHYS 562, and thermodynamics. S-U grades only. A. C. Henley.
Survey of topics in modern statistical physics including: Dynamical statistical physics (kinetic theory, Boltzmann equation, hydrodynamics); theory of simple fluids; scaling theories and the renormalization group; phase transitions in disordered systems; and pattern formation in nonlinear systems, percolation theory.

PHYS 654 Theory of Many-Particle Systems
Spring. 3 credits. Prerequisites: PHYS 562, 574, 635, 636, and 653 or permission of instructor. S-U grades only. Staff.
Equilibrium and transport properties of microscopic systems of many particles studied at zero and finite temperatures. Formalisms such as thermodynamic Green's functions are introduced and applied to such topics as normal and superconducting Fermi systems, superfluidity, magnetism, insulating crystals.

[PHYS 656 Introduction to Accelerator Physics and Technology (also PHYS 456)
Not offered 2001–2002.
See PHYS 456 for description.]

[PHYS 657 The Storage Ring as a Source of Synchrotron Radiation (also PHYS 457)
Not offered 2001–2002.
See PHYS 457 for description.]

[PHYS 661 Advanced Topics in High Energy Particle Theory
Fall. 3 credits. Prerequisites: PHYS 652. S-U grades only. Not offered 2001–2002.
This course presents advanced topics of current research interest. Subject matter varies from year to year. Some likely topics are two-dimensional conformal field theory with applications to string theory and condensed matter physics, applications of the electroweak theory, lattice gauge theory, mathematical methods (e.g. group theory), perturbative quantum chromodynamics, anomalies and geometry, supersymmetry, current algebra, heavy quark physics, heavy quark symmetry, and phenomenological issues beyond the standard model.]

PHYS 667 Theory of Stellar Structure and Evolution (also ASTRO 560)
For description, see ASTRO 560.

[PHYS 670 Instrumentation Seminar
Spring. 2 credits. S-U grades only. Not offered 2001–2002. J. Alexander.
Course covers conception, design, and performance of innovative instrumentation in condensed matter and elementary particle physics.]

PHYS 680 Computational Physics (also PHYS 480 and ASTRO 690)
For description, see PHYS 480.

PHYS 681–689 Special Topics
Offerings are announced each term. Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

PHYS 681 Quantum Information Processing (also PHYS 481 and COM S 453)
See PHYS 481 for description.

PHYS 687 Selected Topics in Accelerator Technology (also PHYS 487)
See PHYS 487 for description.

PHYS 688 Introduction to Accelerator Physics and Technology (also PHYS 488)
Fall. 3 credits. Staff TBA.
For description, see PHYS 488.

PHYS 690 Independent Study in Physics
Fall or spring. Variable to 4 credits. Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only. Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

PSYCHOLOGY

D. J. Bem, S. L. Bem, U. Bronfenbrenner, M. Christiansen, J. E. Cutting, R. B. Darlington, T. J. DeVoogd, D. A. Dunning, S. Edelman, D. J. Field, B. L. Finlay, E. J. Gibson, T. D. Gilovich, B. P. Halpern, A. M. Isen, S. J. Johnson, R. E. Johnston, C. L. Krumhansl, W. W. Lambert, D. A. Levitsky, J. B. Maas, U. Neisser, M. Owren, H. S. Porte, D. T. Regan, E. A. Regan, H. Segal, M. Spivey, B. J. Strupp

The major areas of psychology represented in the department are perceptual and cognitive psychology, biopsychology, and personality and social psychology. These areas are very broadly defined, and the courses are quite diverse. Biopsychology includes such things as animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. Perceptual and cognitive psychology includes such courses as cognition, perception, memory, and psycholinguistics. Personality and social psychology is represented by courses in social psychology and personality (such as Psychology and Law, Judgment and Decision Making, and Social Construction of Gender), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department also emphasizes the statistical and logical analysis of psychological data and problems.

The Major

Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C+ or better. Provisional admission requires two such courses. To apply to the major and receive an adviser, a major application form may be obtained from the department office (211 Uris Hall) and should be completed and taken to one of the faculty members whose name is listed on the form.

Requirements for the major are:

1) a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisers, a range of courses that covers the basic processes in psychology (laboratory and/or field experience is recommended); and
2) demonstration of proficiency in statistics before the beginning of the senior year. (See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:

1) **Perceptual and cognitive psychology**
2) **Biopsychology**
3) **Social, personality, and abnormal psychology**

The following classification of Department of Psychology offerings is intended to help students and their advisers choose courses that will ensure that such breadth is achieved.

1) **Perceptual and cognitive psychology:** PSYCH 205, 209, 214, 215, 292, 305, 311, 316, 342, 412, 413, 414, 415, 416, 417, 418, 419, 436, 492.
2) **Biopsychology:** PSYCH 223, 307, 322, 324, 326, 332, 361, 396, 420, 422, 424, 425, 429, 431, 440, 492.
3) **Social, personality, and abnormal psychology:** PSYCH 128, 265, 275, 277, 280, 281, 325, 327, 328, 402, 404, 450, 481, 489, 491.
4) **Other courses:** PSYCH 101, 199, 347, 350, 410, 440, 441, 470, 471, 472, 473, 475, 478, 479. The major adviser determines to which group, if any, these courses may be applied.

With the permission of the adviser, courses in other departments may be accepted toward the major requirements.

Fieldwork, independent study, and teaching. The department requires students to observe the following limits on fieldwork, independent study, and teaching.

1) Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.
2) An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

Statistics requirement. Proficiency in statistics can be demonstrated in any one of the several ways listed below.

1) Passing PSYCH 350.
2) Passing an approved course or course sequence in statistics in some other department at Cornell. The approved list of courses and sequences may change. It has usually included SOC 301 and ILR 210 and 211. Requests that a particular course be added to this list may be made to Professor Gilovich.
3) Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or sequence must be equivalent to at least six semester credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.
4) Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives notice at least one week before. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

Concentration in biopsychology. Psychology majors interested in psychology as a biological science can elect to specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology; the physical sciences, including at least introductory chemistry; and mathematics. Students will design with their advisers an integrated program in biopsychology built around courses on physiological, chemical, anatomical, and ecological determinants of human and nonhuman behavior offered by the Department of Psychology. Additional courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major after consultation between the student and his or her biopsychology adviser.

Concentration in personality and social psychology. Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their department, including statistics. To ensure a solid interdisciplinary grounding, students in the concentration will be permitted to include some major courses in sociology and related fields. Advisers will assist students in the selection of a coherent set of courses from social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced and graduate seminars, with the permission of the instructor.

Undergraduate honors program. The honors program is designed for those exceptionally able students who wish to pursue an intensive and independent program of research in psychology. Successful participation in this program serves as evidence of the student's facility in the two most important skills of an academic psychologist: the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to engage in creative research activity. All qualified students planning on a graduate education in psychology or other academic fields should consider the honors program seriously. The program offers most students the closest contact and consultation with faculty that they will receive during their time at Cornell.

The core of the honors program is a research project that the student carries out in close collaboration with a faculty member in the field of psychology. It is assumed that most students will do so while enrolled in PSYCH 470 (Undergraduate Research in Psychology). A written report of the research is to be given to the chair of the honors committee (currently Professor Owren) toward the end of the last semester of the student's senior year. An oral defense of the thesis is then given before a committee of three faculty members, and the student presents his or her work in a public forum. Final honors standing (summa cum laude, magna cum laude, cum laude) is indicated on the student's diploma. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year.

A student may formally apply to the honors program at any time during the senior year provided that she or he is actively engaged in independent research. However, students

must do so by the second week of November. Applications should be given to Professor Owren and should be made directly by the student.

Distribution Requirement

The distribution requirement in the social sciences is satisfied by any two courses in psychology with the exception of PSYCH 223, 307, 322, 324, 326, 332, 350, 361, 396, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492.

Note: The Department of Psychology has listed all days and times for each course that we offer. If there should be changes in the days, times, or semester that a course is offered, we will post the necessary changes throughout the department and in the supplements of the Course and Time and Course and Room Rosters. Changes are also available on the web site, comp9.psych.cornell.edu.

Courses

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry (III)

Fall. 3 credits. Students who would like to take a discussion seminar should also enroll in PSYCH 103. M W F 10:10. J. B. Maas.

The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made about human behavior.

PSYCH 102 Introduction to Cognitive Science (also COGST 101, COMS 101, LING 170, PHIL 191) (III)

Fall. 3 or 4 credits (the four-credit option involves a writing section instead of taking exams). T R 11:40–12:55. M. Spivey.

This course surveys the study of how the mind/brain works. We examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part of the course focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

PSYCH 103 Introductory Psychology Seminars

Fall. 1 credit. Limited to 300 students. Prerequisite: concurrent enrollment in PSYCH 101. Hours TBA. 12 different time options. J. B. Maas and staff.

A weekly seminar that may be taken in addition to PSYCH 101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a term paper related to the seminar topic. Choice of seminar topics and meeting times are available at the second lecture of PSYCH 101.

PSYCH 111 Brain Mind and Behavior (also BIONB 111 and COGST 111) (I)

Spring. 3 credits. Letter grades only. No prerequisites. Intended for freshman and sophomores in the humanities and social sciences; seniors by permission only. Not recommended for psychology majors; biology majors may not use the course for credit toward the major. M W F 9:05. E. Adkins Regan and R. Hoy.

Understanding how the brain creates complex human behavior and mental life is a great scientific frontier of the next century. This course enables students with little scientific background from any college or major to appreciate the excitement. What are the interesting and important questions? How are researchers trying to answer them? What are they discovering? Why did the brain evolve this remarkable capacity?

PSYCH 201 Cognitive Science in Context Laboratory (also COGST 201 and COM S 201) (III)

Spring. 4 credits. Prerequisite: PSYCH 102/COG ST 101/COM S 101/LING 170/PHIL 191, Introduction to Cognitive Science. Knowledge of programming languages is not assumed. Limited to 24 students. Disc and demos, M W 11:15–12:05; lab, M W 1:25–3:25, plus additional hours to be arranged. Uris Hall 259. D. Field and staff.

A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results, supplementation of laboratory topics, and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned investigations and student-developed experiments. Use of digital computers as well as the Internet, electronic mail, and web sites are integral components of the course.

The focus is on human-computer interactions that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings. Students are expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings fully prepared to perform the laboratory exercises. Laboratory facilities are available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data is facilitated.

PSYCH 205 Perception (III)

Spring. 3 credits. Open to first-year students. Graduate students, see PSYCH 605. T R 11:40–12:55. J. E. Cutting.

One of four introductory courses in cognitive psychology. Basic perceptual concepts and phenomena are discussed with emphasis on stimulus variables and sensory mechanisms. All sensory modalities are considered. Visual and auditory perception are discussed in detail.

PSYCH 209 Developmental Psychology (III)

Spring. 4 credits. Graduate students, see PSYCH 709. M W 2:55–4:10. S. Johnson.

One of four introductory courses in cognition and perception. A comprehensive introduction to current thinking and research in developmental psychology that approaches problems primarily from a cognitive perspective. The course focuses on the development of perception, action, cognition, language and social understanding in infancy and early childhood.

PSYCH 214 Issues in Cognitive Psychology (also COGST 214) (III)

Fall. 3 or 4 credits (the 4-credit option involves some participation in COGST/PSYCH 501). Sophomore standing required. Limited to 150 students. Graduated students, see PSYCH 614. M W F 11:15. S. Edelman.

A broad overview of problems arising in the study of cognition and of the information-processing, or computational, approaches to solving these problems, in natural and artificial cognitive systems. Theoretical and experimental challenges posed by the understanding of perception, attention and consciousness, memory, thinking, and language will be discussed and analyzed. Participants acquire conceptual tools essential for following the current debates on the nature of mind and its relationship to the brain.

[PSYCH 216 Cognitive Psychology Lab

Fall. 1 credit. Limited to 16 students. Prerequisite: concurrent enrollment in PSYCH 214. Hours TBA. Not offered 2001–2002. Staff.

If you've ever wondered how humans manage to represent their visual world, why telephone numbers are seven digits long, why imagery works as a mnemonic device, why certain things are better remembered than others, whether bilinguals are disadvantaged relative to monolinguals, how children acquire knowledge of the world, or how people make decisions—this laboratory is for you! A weekly lab meeting that encourages students to discover the scientist in themselves through the study of cognition. Much of cognitive research takes place in the laboratory and this course allows students to become familiar with the "how-to" of such research. Students are given six to eight basic experiments to explore and tinker with. They are encouraged to pose "what if" questions and eventually test them. The course promotes independent thinking, problem solving in an experimental setting, proposing and testing of one's own hypotheses, relating laboratory cognition to the real world, and communication of scientific ideas through informal and formal writing and oral assignments. Be prepared for an interactive learning experience.]

PSYCH 223 Introduction to Biopsychology (I:supplementary list)

Fall. 3 credits. M W F 10:10. No prerequisites. Can be used to satisfy the psychology major breadth requirement and as an alternative prerequisite for upper-level biopsychology courses. M. J. Owren.

An introduction to psychology from a biological perspective, including both evolutionary and physiological approaches to behavior. Topics include the structure and function of the nervous system, genetic and biochemical models of behavior, hormones and behavior, biological bases of learning, cognition, communication, and language, and the evolution of social organization.

Introductory courses in social and personality psychology. Each of the following four courses (265, 275, 277, 280) provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and none have any prerequisites. Students may take any one of the courses or any combination of them (including all four). Courses may be taken in any order or simultaneously.

PSYCH 265 Psychology and Law (III)
Fall. 3 credits. M W F 1:25. D. A. Dunning.
This course examines the implications of psychological theory and methods for law and the criminal justice system. We concentrate on psychological research on legal topics (e.g., confession, eyewitness testimony, jury decision making, homicide, aggression, the prison system), social issues (e.g., death penalty, affirmative action), and on psychologists as participants in the legal system (e.g., assessing insanity and dangerousness and for expert testimony).

PSYCH 275 Introduction to Personality Psychology (also HD 260) (III)
Spring. 3 credits. Recommended: introductory course in psychology or human development. T R 1:25–2:40. D. Bem.
This course is designed as an introduction to theory and research in the area of personality psychology, with special emphasis on personality development. It covers the major influences including genetic, environmental, and gene-environment interactions, and involves in-depth study of the major theories. The assumptions and models of human behavior that form the basis of each theoretical orientation are examined and compared, and the relevant empirical evidence reviewed and evaluated. In addition, basic psychometric concepts and the methods for measuring and assessing personality are covered, as will the major related debates and controversies.

[PSYCH 277 Social Construction of Gender (also WOMNS 277) (III)
Fall. 3 credits. Limited to 180 students. T R 2:55–4:10. Not offered 2001–2002. S. L. Bem.
PSYCH/WOMNS 277 is an interdisciplinary course that addresses two broad questions: How an individual's gender and sexuality constructed? And how are hidden assumptions or "lenses" embedded in our social institutions, cultural discourses, and individual psyches perpetuate male power and oppress women and sexual minorities? Three lenses in particular are emphasized: androcentrism, gender polarization, and biological essentialism. A fundamental assumption of the course is that social science has worried too much about difference per se and too little about how even our most neutral-looking institutions invisibly transform difference into disadvantage. Although some attention is given to biological perspectives, the course emphasizes the cultural and psychological processes whereby the historically contingent comes to appear as the natural. Among some of the many topics discussed are the importance of looking at biology in context, the parental "instinct," androcentrism in law, sexual orientation cross-culturally, egalitarian relationships, gender-liberated child-rearing, and homophobia.]

PSYCH 280 Introduction to Social Psychology (III)
Spring. 3 credits. T R 1:25–2:40. D. T. Regan.
An introduction to research and theory in social psychology. Topics include social influence, persuasion, and attitude change; social interaction and group phenomena; altruism and aggression; stereotyping and prejudice; and everyday reasoning and judgment.

[PSYCH 281 Foundations of Clinical Practice (also HD 281) (III)
Fall. 3 credits. Limited to 60 students (30 PSYCH/30 HD). No prerequisites. Not offered 2001–2002. Staff.
This course provides an introduction to the theoretical and practical aspects of some basic elements of counseling. Students develop an understanding of the most current research on the elements of counseling and basic theoretical foundations underlying different approaches. Students are expected to acquire and demonstrate elementary helping skills. Through role-play, observation of videos, and in-class demonstrations, students learn such skills as attending and active listening; they also develop a capacity to recognize internal conflicts and cognitive distortions as well as the similarities between intra-psychic and interpersonal processes. Other topics include issues of transference and counter transference, the multi-axial dimensions of the DSMIV, defensive strategies as they appear in the DSMIV and ethical considerations and practice. While this course provides an introduction to the applied aspects of psychology, it does not prepare students to provide treatment of any sort.]

PSYCH 282 Community Outreach (also HD 282)
Fall and spring. 2 credits. Prerequisites: PSYCH 101 or HD 115. Students may not concurrently register with PSYCH 327 or PSYCH 328. T 10:10–11:25. H. Segal.
This course provides students with information and perspectives essential to volunteer field work with human and social service programs in the community. To gain a practical understanding of what mental health professionals do in the workplace, students examine problems that emerge in fieldwork settings which raise ethical, methodological, theoretical, and practical issues in the observation or treatment of clients or patients. Although students are not required to volunteer at a local agency, the instructor will assist students in finding sites that may provide appropriate learning opportunities. A paper, relating current research to issues relevant to community mental health, is due at the end of the course.

PSYCH 292 Intelligence (III)
Spring. 4 credits. Prerequisites: one 200-level course in psychology. M W TBA. Section meetings on Friday. U. Neisser.
A scientific overview of the controversial issues that surround intelligence tests and what they measure. Topics include the history of testing, correlates of test scores, alternative approaches to mental ability, genetic and environmental contributions to diversity in intelligence, effects of schooling, worldwide IQ gains, cultural factors, and group differences.

PSYCH 305 Visual Perception (III)
Fall. 4 credits. Limited to 25 students. Prerequisite: PSYCH 205 or permission of instructor. M W F 11:15. J. E. Cutting.
A detailed examination of pictures and their comparison to the real world. Linear perspective in Renaissance art, photography, cinema, and video are discussed in light of contemporary research in perception and cognition.

[PSYCH 307 Chemosensory Perception (III)
Fall. 3 or 4 credits; the optional (or fourth) credit is for an independent research project. Graduate students, see PSYCH 607. Not offered 2001–2002. T R 9:05. B. P. Halpern.
An examination of basic theory, data, and processes for perception of the chemosensory environment. Includes a very brief (about two weeks) lecture survey of the anatomy and physiology of human taste and olfaction, the remainder of the course uses the Socratic method, in which the instructor asks questions of the students, to cover topics such as chemosensory psychophysics, saliva, chemosensory bases for the tastes of foods, taste-smell interactions, chemosensory function in neonates and in the aged, temporal aspects of tasting, sweetness, effects of pollution of the chemosensory environment, and interactions between body state and chemosensory stimuli. At the level of *Smell and Taste in Health and Disease,* edited by T.V. Getchell et al., *Sensory Science Theory and Applications in Foods*, edited by H. T. Lawless and B. Klein; *Sensory Analysis of Foods*, 2nd edition, edited by J. R. Piggott.]

[PSYCH 311 Introduction to Human Memory (III)
Spring. 3 credits. Limited to 40 students. Some familiarity with statistical methods and experimental design and with the study of cognition is desirable. Graduate students, see PSYCH 611. T R 11:40–12:55. Not offered 2001–2002. Staff.
This course offers an overview of experimental findings and theoretical issues in the study of human memory. Coverage includes topics such as the nature of memory, various memory systems, coding and retrieval processes, practice and habit acquisition, organization for learning and memory, interference and forgetting, models of memory, and memory dysfunction and its relation to normal memory.]

PSYCH 313 Problematic Behavior in Adolescence (also HD 313) (III)
Fall. 3 credits. Prerequisite: HD 115 or PSYCH 101; HD 216 recommended. M W 2:55–4:10. J. Haugaard.
This course explores several problematic behaviors of adolescence, including depression, drug abuse, eating disorders, and delinquency. Various psychological, sociological, and biological explanations for the behaviors are presented. Appropriate research is reviewed; treatment and prevention strategies are explored. An optional discussion section is available to students who would like an opportunity to discuss readings and lectures in greater depth.

PSYCH 316 Auditory Perception (III)
Fall. 3 or 4 credits; the 4-credit option involves a laboratory project or paper. Prerequisite: PSYCH 205, 209, 214 (other psychology, linguistics, or biology courses could serve as prerequisite with permis-

sion of the instructor). Limited to 30 students. Graduate students, see PSYCH 716. M W 2:55–4:10. C. L. Krumhansl.
A course that covers the major topics in auditory perception including: physics of sound; structure and function of the auditory system; perception of loudness, pitch, and spatial location, with applications to speech production and perception; and music and environmental sounds.

[PSYCH 322 Hormones and Behavior (also BIONB 322) (I)
Fall. 3 credits. Two lectures plus a section in which students read and discuss original papers in the field, give an oral presentation, and write a term paper. Limited to juniors and seniors. Prerequisites: any one of the following: (a) PSYCH 223, (b) BIONB 221, (c) BIONB 222, or (d) one year of introductory biology plus a course in psychology. Letter grade only. Graduate students see PSYCH 722. M W F 11:15. Not offered 2001–2002. E. Adkins Regan.
The major focuses of the course are comparative and evolutionary approaches to the study of the relationship between reproductive hormones and sexual behavior in vertebrates, including humans. Also included are hormonal contributions to parental behavior, aggression, stress, learning and memory, and biological rhythms.]

PSYCH 324 Biopsychology Laboratory (also BIONB 324) (I)
Fall. 4 credits. Limited to 20 juniors and seniors. Prerequisites: PSYCH 223 or BIONB 221 or 222, and permission of instructor. T R 1:25–4:25. T. J. DeVoogd.
Experiments designed to provide experience in animal behavior (including learning) and its neural and hormonal mechanisms. A variety of techniques, species, and behavior patterns are included.

PSYCH 325 Adult Psychopathology (also HD 370) (III)
Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: any one course in Psychology or Human Development. M W 2:55–4:10. S. Bem.
A research-based introduction to the biological, psychological, and social (including cultural and historical) aspects of adult psychopathology. The major mental illnesses are covered, including (among others) schizophrenia, mood disorders, anxiety disorders, and personality disorders. Childhood disorders are not covered.

PSYCH 326 Evolution of Human Behavior (I:supplementary list)
Spring. 4 credits. Prerequisite: PSYCH 223, or an introductory biology course, or an introductory anthropology course. Graduate students, see PSYCH 626. T R 2:55–4:10. R. E. Johnston.
A broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics covered vary but include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior and organization, cooperation and altruism, sexual behavior, mating and marriage systems, aggression, and warfare.

PSYCH 327 Field Practicum I (also HD 327) (III)
Fall only. 3 credits. Prerequisites: PSYCH 325 or HD 370 (or taken concurrently), and permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: $25 each semester. Enrolled students must commit to taking PSYCH 328 in the spring semester. No S-U option. M W 8:40–9:50. H. Segal.
This course is composed of three components which form an intensive undergraduate field practicum. First, students spend three to six hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff. Second, Cornell faculty provide additional weekly educational supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class.

PSYCH 328 Field Practicum II (also HD 328) (III)
Spring. 3 credits. Prerequisites: PSYCH 327 taken the previous term, PSYCH 325 or HD 370 (or taken concurrently), permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: $25 each semester. M W 8:40–9:50. H. Segal.
This course continues the field practicum experience from PSYCH 327. Students spend three to six hours a week at local mental health agencies, schools, or skilled nursing facilities working directly with children, adolescents, or adults; supervision is provided by host agency staff.

PSYCH 332 Biopsychology of Learning and Memory (also BIONB 328) (I)
Spring. 3 credits. Prerequisites: 1 year of biology and either a biopsychology class or BIONB 222. Limited to 60 students. Graduate students, see PSYCH 632. M W F 11:15. T. J. DeVoogd.
This course surveys the approaches that have been or are currently being used in order to understand the biological bases for learning and memory. Topics include invertebrate, "simple system" approaches, imprinting, avian song learning, hippocampal and cerebellar function, and human pathology. Many of the readings are from primary literature.

PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also COGST 342) (III)
Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: PSYCH 101 or permission of instructor. PSYCH 205 strongly recommended. Graduate students, see PSYCH 642. T R 11:40–12:55. D. J. Field.
Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics covered include: "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

PSYCH 347 Psychology of Visual Communications (III)
Spring. 3 credits. Limited to 15 students. Prerequisites: PSYCH 101 and permission of instructor. R 10:10–12:05. J. B. Maas.
An exploration of theories of education, communication, perception, attitude, and behavior change as they relate to the effectiveness of visually based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages.

PSYCH 350 Statistics and Research Design (II)
Fall. 4 credits. Limited to 120 students. M W F 9:05–9:55. T. D. Gilovich.
Acquaints the student with the elements of statistical description (measures of average, variation, correlation, etc.) and, more important, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.

PSYCH 361 Biopsychology of Normal and Abnormal Behavior (also NS 361)
Fall. 3 credits. Limited to 50 students in psychology and 50 students in nutritional sciences. Prerequisites: an introductory biology course and an introductory psychology course, or permission of instructor. S-U grades optional. Juniors and seniors only. M W F 9:05–9:55. B. J. Strupp.
A critical evaluation of factors thought to underlie normal and abnormal behavior and/or cognitive functioning. Psychological, biological, and societal influences are integrated. Topics include: the psychobiology of learning and memory; nutritional influences on behavior/cognition (e.g., sugar, food additives, choline); cognitive dysfunction (e.g., amnesia, Alzheimer's disease); developmental exposure to environmental toxins and drugs of abuse; and psychiatric disorders (depression, eating disorders).

PSYCH 396 Introduction to Sensory Systems (also BIONB 396) (I)
Spring. 4 credits. Limited to 25 students. Prerequisites: an introductory course in biology or biopsychology, plus a second course in behavior, biopsychology, cognitive science, neuroscience, or perception. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. Offered alternate years. Class meetings, M W F 10:10. B. P. Halpern.
This course covers both those characteristics of sensory systems that are common across living organisms and those sensory properties that represent adaptations of animals to particular habitats, environments, or niches. The principles and limitations of major methods used to examine sensory systems are considered. Emphasis is on somesthetic, visual, and auditory systems. This course will be taught using the Socratic method, in which the instructor asks questions of the students. Students are assigned original literature in the form of printed or electronic journal articles or reviews and are expected to come to each class having read, thought about, and prepared to discuss the assigned readings and other assigned information resources. A course packet of reproduced articles, textbooks, a course web site, and Internet sites are used. Students submit brief analyses of, and comments and questions on, all assignments by email to the course's

electronic mailing list a day before each class meeting. The mailing list distributes submissions to all members of the class and to the instructor. In addition to these brief tri-weekly written exercises, a web site or a term paper on a topic germane to the course is required. All examinations are in take-home format. At the level of *From Sound to Synapse* by C. D. Geisler; *The Retina*, by J. E. Dowling. courseinfo.cit.cornell.edu/courses/psych_nbb_396/.

[PSYCH 401 Theoretical Approaches to Psychopathology and Treatment (III)
Fall. 3 credits. Limited to 20 students. Prerequisites: PSYCH 281 or 325. TBA. Not offered 2001–2002. Staff.
This course is designed to provide students with an overview of theoretical approaches to psychopathology and psychotherapy. It also aims to develop students' capacities to think in theoretical terms about psychological practice. We examine the theoretical and pragmatic features of major contemporary models of psychotherapy and explore the conceptual traditions on which they draw. Observation of the work of children and adolescents, audio-visual demonstrations, case presentations and discussions are included to advance students' understanding of the application of theory to practice. At the end of the course, students should be prepared to take a particular case and discuss the theoretical, practice, and research issues it raises, including intervention strategies. This course is not intended to provide students simply with an understanding of methods. It is organized around theory, research, and practice relevant to the treatment of several of the Disorders of Infancy and Childhood as well as specific disorders of Adults on Axis I and Axis II of DSM IV. Special attention is given to the work of: Daniel Stern, M.D. and Otto Kernberg, M.D.—Psychoanalytic revisionists; Lorna Benjamin, Ph.D.—Interpersonal Theory; Aaron Beck, M.D.—Cognitive Theory; and Marsha Linehan, Ph.D.—Behavioral and Cognitive-Behavioral Treatment]

[PSYCH 402 Current Research on Psychopathology: Depression (III)
Spring. 4 credits. Limited to 20 students. Prerequisite: PSYCH 325 or HD 370 and permission of the instructor. M 1:25–4:25. Not offered 2001–2002. Staff.
Current research and theory on the nature and etiology of depression. Approaches from various perspectives (biological, psychological, socio-cultural) are considered. Minimal attention given to psychotherapy and symptomatology.]

[PSYCH 404 Psychopathology and the Family (III)
Spring. 4 credits. Limited to 20 students. Prerequisite: PSYCH 325 or HD 370 and permission of the instructor. M 1:25–4:25. Not offered 2001–2002. Staff.
This course explores familial influences on the development of abnormal behavior. It examines how psychological, biological, and cultural factors in a family might contribute to such disorders as anorexia nervosa, depression, psychopathy, and psychosomatic illnesses. Emphasis is placed on early childhood experiences in the family and their impact on the development of later psychopathology. The course also discusses how the evolution of family structures in more recent times (e.g., the rise in day care and divorce) influences the individual. Family therapy approaches and techniques are also examined.]

PSYCH 410 Undergraduate Seminar in Psychology
Fall or spring. 2 credits. Nonmajors may be admitted, but psychology majors are given priority. Hours TBA. Staff.
Information on specific sections for each term, including instructor, prerequisites, and time and place, may be obtained from the Department of Psychology office, 211 Uris Hall.

[PSYCH 412 Laboratory in Cognition and Perception (III)
Spring. 4 credits. Limited to 15 students. Prerequisite: statistics and 1 course in cognition or perception is recommended. Graduate students, see PSYCH 612. Not offered 2001–2002. M W 2:55–4:10. D. J. Field.
A laboratory course is designed to introduce students to experimental methods in perception and cognitive psychology. Students take part in a number of classic experiments and develop at least one independent project. Computers are available and used in many of the experiments although computer literacy is not required. Projects are selected from the areas of visual perception, pattern recognition, memory, and concept learning.]

[PSYCH 413 Information Processing: Conscious and Nonconscious (III)
Spring. 4 credits. Prerequisites: at least 1 course in human experimental and permission of instructor; PSYCH 350 or equivalent will be useful for evaluating empirical articles. R 10:10–12:35. Not offered 2001–2002. Staff.
In the past decade, a not-so-quiet revolution has been taking place in the field of cognition regarding the problem of conscious mental computation. Data have come from patients with striking neuropsychological syndromes, i.e., the phenomenon of "blindsight" and the "amnesic" syndrome. This signature of independent mental computations has also been amply demonstrated in normal individuals in laboratory settings. We critically evaluate the theoretical worth and empirical justification of the distinction between "conscious" and "nonconscious" mental computations in normal and patient populations. Weekly readings are from, but not limited to, topics such as visual processes, face recognition, explicit and implicit memory, language processing and social cognition. Students are required to: lead and partake in advanced level discussions of classic and current papers; submit weekly summaries of the assigned readings; and write a term paper on a topic of their interest. Students should be prepared to read extensively.]

PSYCH 414 Comparative Cognition (also COGST 414) (III)
Spring. 3 credits. Prerequisites: PSYCH 205, 209, 214, or permission of instructor. Graduate students, see PSYCH 714. T R 2:55–4:10. M. J. Owren.
This course examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include: whether nonhumans behave intentionally; whether they show concept and category learning, memory, and abstract thinking similar to that of humans; the role of social cognition in the evolution of intelligence; and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" play a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates is a specific focus throughout. The course is a mix of lecture and discussion, emphasizing the latter as much as possible.

[PSYCH 415 Concepts, Categories, and Word Meanings (III)
Fall. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. Graduate students, see PSYCH 615. M 1:25–4:25. Not offered 2001–2002. Staff.
A consideration of what types of categories are psychologically important, how they are represented and used through concepts, and how concept structure and semantic structure are interrelated. Different models of concept structure and categorization processes are evaluated, as are models of conceptual change and concept acquisition. Other topics include: relations between concepts and broader knowledge representation systems such as scripts, mental models, and intuitive theories; relative roles of associative information and beliefs in concept structure; categorization in other species; neuropsychological studies of categorization; comparisons of categorization systems across cultures; and comparisons of concept structures across different types of categories.]

PSYCH 416 Modeling Perception and Cognition (also COGST 416) (III)
Spring. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. Graduate students, see PSYCH 616. M W F. M. Spivey.
This course offers a survey of several computational approaches to understanding perception and cognition. We explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis is placed on how complex sensory information gets represented in these models, as well as how it gets processed. This course covers computational accounts of language processing, language acquisition, visual perception, and visual development, among other topics. Students complete a final project that applies a computational model to some perceptual/cognitive phenomena.

PSYCH 417 The Origins of Thought and Knowledge (III)
Fall. 4 credits. Prerequisite: permission of instructor. Graduate students, see PSYCH 717. M W 2:55–4:10. S. Johnson.
An in-depth analysis of current theories concerning the growth of thought and knowledge in infancy and early childhood. This course addresses the following questions: How do infants come to understand the objects and events they experience? What are the best methods for assessing development of perception, cognition, and language? How do developing perceptual, cognitive, and language skills constrain object perception? What are the applications of research on early perceptual and cognitive development to such fields as robotics and artificial intelligence?

[PSYCH 418 Psychology of Music (III)
Spring. 3 or 4 credits, depending on whether student elects to do an independent project. The course is intended for upper-level students in music, psychology, engineering, computer science, linguistics, physics, anthropology, biology, and related disciplines. Some music background is desirable but no specific musical skills (e.g. reading music) are required. Graduate students, see PSYCH 618. M W 2:55–4:10. Not offered 2001–2002. C. L. Krumhansl.
A course that covers the major topics in the psychology of music treated from a scientific perspective. It reviews recent developments in the cognitive science of music, beginning with music acoustics and synthesis, and extending to music and its emotional and social effects.]

[PSYCH 419 Neural Networks Laboratory
Spring. 4 credits. Prerequisites: at least 1 course in biology or biological psychology, 1 year of calculus, and permission of instructor. Limited to 15 students. Graduate students, see PSYCH 619. T R 2:55–4:10. Not offered 2001–2002. D. J. Field.
The course takes a hands-on approach to understanding the limitations and successful applications of neural networks to problems in cognitive and biological psychology. A variety of neural network architectures are discussed and explored using computer simulations. Applications of networks to perceptual recognition and representation are emphasized. We consider the class of problems that different networks can solve and consider the accuracy with which they model real nervous systems. Students complete weekly lab reports and develop one independent project demonstrating the application of a neural network to a problem discussed in the course.]

[PSYCH 422 Developmental Biopsychology
Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as PSYCH 223 or BIONB 221). Graduate students, see PSYCH 622. M W F 9:05–9:55. Not offered 2001–2002. B. L. Finlay.
We discuss the relationship of the development and evolution of the brain to the development of behavior. Topics include: how neurons are generated, finding targets, and establishing connections; the emergence of reflexive and complex behavior; how experience affects the developing brain; evolutionary perspectives on the development of perception, memory, and communication systems; and abnormal development.]

PSYCH 424 Neuroethology (also BIONB 424) (I)
Spring. 4 credits. Prerequisites: BIONB 221 or 222 or BIOG 101–102 and permission of instructor. S-U grades optional. M W F 11:15; disc, 1 hour each week TBA. C. D. Hopkins.
Neuroethologists take a comparative and evolutionary approach to study the nervous system. They ask, how do brains of animals compare and how did they come about through the process of evolution? How are neural circuits adapted to species-typical behavior? What is the hope and interest in the study of a large diversity of animals, compared to a specialized look at just a few mammalian species? Can we hope to understand how animals with specialized behaviors have specialized nervous systems? What is the sensory world of a real animal and how does it vary from species to species? These and other questions drive this introductory survey of neuroethology: exituc senses; amazing motor programs; surprising integration.

PSYCH 425 Cognitive Neuroscience
Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as PSYCH 223 or BIONB 221). Graduate students, see PSYCH 625. M W F 9:05–9:55. B. L. Finlay.
We study the relation between structure and function in the central nervous system. The importance of evolutionary and mechanistic approaches for understanding the human behavior and cognition is stressed. The course focuses on issues in cognitive neuroscience including: mechanisms of perception, particularly vision, and the neuropsychology of everyday acts involving complex cognitive skills such as recognition of individuals, navigation in the world, language, memory, social interaction and consciousness.

[PSYCH 429 Olfaction and Taste: Structure and Function (also BIONB 429) (I)
Fall. 3 or 4 credits (4-credit option requires a term paper or research project. The research project can, but does not need to, study nonhuman vertebrates). Preference given to junior and senior psychology and biology majors and graduate students. Prerequisite: one 300-level course in biopsychology or equivalent. Graduate students, see PSYCH 629. T R 9:05. Not offered 2001–2002. B. P. Halpern.
The structural and functional characteristics of olfaction and taste are explored by reading and discussing current literature in these areas. Structure is examined at the light levels of electron microscopes as well as at the molecular level. Function is primarily neurophysiological and biochemical aspects. The emphasis is on vertebrates, especially air-breathing vertebrates in the case of olfaction, but there is some coverage of invertebrate forms. At the level of *Smell and Taste in Health and Disease*, edited by T. V. Getchell, R. L. Doty, L. M. Bartoshuk, and J. B. Snow; *The Neurobiology of Taste and Smell*, edited by T. E. Finger and W. L. Silver.]

[PSYCH 431 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421) (I)
Fall. 3 or 4 credits. The 4-credit option involves a term paper or creation of a relevant web site. Limited to 25 students. Prerequisites: an introductory course in biology or psychology, plus a second course in perception, neurobiology, cognitive science, or biopsychology. T R 10:10–11:25. Not offered 2001–2002. B. P. Halpern.
A literature-based examination of post-maturation changes in the perceptual, structural, and physiological characteristics of somesthetic, visual, auditory, and chemosensory systems. Emphasis is on human data, with nonhuman information included when especially relevant. Quality of Life issues are included. Current developments in human sensory prosthetic devices, and in regeneration or replacement of receptor structures or organs are examined. Brief written statements by e-mail of questions and problems related to each set of assigned readings are required in advance of each class meeting and are automatically distributed to all members of the class. This course is taught using the Socratic Method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with the subject matter of the course. Readings are from the Course Info site, courseinfo.cit.cornell.edu/courses/psych431_nbb421/, from Internet sites, from a course packet, and from materials on reserve. Students are expected to come to each class having already done and thought about the assigned readings, and to take an active part in every class. All examinations are take-home.]

PSYCH 435 Olfaction, Pheromones, and Behavior (III)
Fall. 4 credits. Prerequisites: an introduction course in biology and one in neurobiology and behavior or biopsychology or a 300-level course in biopsychology or permission of instructor. R. Johnston.
This course covers chemical signals, olfaction, and behavior in vertebrates (including humans), as well as the neurobiology of olfaction and odor-mediated behaviors. Behavioral topics may vary from year to year but include evaluation of and advertisement for mates, aggression and territorial behavior, parental-young interactions, social recognition (species, sex, individual, kin reproductive state, status), memory for odors, odor and endocrine interactions, imprinting, and homing and navigation. Basic aspects of the structure and function of the olfactory system and also covered, including the molecular biology of chemo-reception, olfactory coding, and higher-order processing in the central nervous system. The format includes lectures, discussions, and student presentations.

PSYCH 436 Language Development (also COGST 436, HD 436, and LING 436) (III)
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll under HD 633/LING 700/PSYCH 600, a supplemental graduate seminar. Prerequisite: at least 1 course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U grades optional. T R 2:55–4:10. B. Lust.
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental linguistic issues of "Universal Grammar" and the biological foundations for acquisition are discussed, as are the issues of relations between language and thought. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available. (See COGST 450/LING 450 and PSYCH 437.)

PSYCH 437 Lab Course: Language Development (also COGST 450, HD 437, and LING 450) (in conjunction with COGST/HD/LING 436, Language Development)
Spring. 2 credits. R 1:25. B. Lust.
This laboratory course is an optional supplement to the survey course, Language Development (HD/COGST/PSYCH/LING 436). The lab course provides students with a

hands-on introduction to scientific research, including design and methods, in the area of first language acquisition.

PSYCH 440 The Brain and Sleep
Fall. 4 credits. Prerequisites: at least PSYCH 223 or BIONB 221. An additional course in biology, biopsychology or neurobiology is recommended. S-U grades optional. Graduate students, see PSYCH 640. M W 2:55–4:10. H. S. Porte.
Taking a comparative evolutionary perspective, this course examines the neural events that instigate, maintain, and disturb the states and rhythms of sleep in various species. Emphasizing human data where possible, special topics include sleep deprivation and the biological functions of sleep; sleep's putative role in learning and memory; biologically interesting deviations from normal sleep; and the cognitive neuroscience of sleep.

PSYCH 441 Laboratory in Sleep Research
Spring. 4 credits. Prerequisites: PSYCH 440 or comparable preparation, and permission of the instructor during preregistration. Laboratory fee: $50. Graduate students, see PSYCH 641. W 7:30–10:30 P.M. H. S. Porte.
Emphasizing the neurobiology of sleep state, the course introduces students to the laboratory study of human sleep and its psychological correlates. Serving as both experimenter and subject, each student learns the physical rationale and techniques of electroencephalography and other bioelectric measures of behavioral state. Using computerized data analysis, students complete weekly laboratory reports and a collaborative term project. Sleep recordings are done during the day or evening when possible. In addition, overnight recording sessions are required.

PSYCH 450 The Lenses of Gender (also WOMNS 450) (III)
Fall. 4 credits. Limited to 15 juniors, seniors, and graduate students. Prerequisites: (1) junior, senior or graduate standing, with preference given to psychology majors and women's studies majors; (2) a prior course related to psychopathology (preferably PSYCH 325/HD 370); and (3) a prior course related to gender and/or sexuality. Permission of instructor required through an application process during the preceding spring semester. Graduate students, see PSYCH 650/WOMNS 650. Letter grade only. W 2:30–4:25. S. L. Bem.
This advanced undergraduate/graduate seminar takes up several interrelated topics at the intersection of clinical psychology and gender/sexuality. Possible topics include, among others, trauma, personality disorders, and psychiatry's troubled history in the domain of gender/sexuality. Course requirements generally include weekly informal written commentaries on the readings, a final essay examination, and your choice of either a term paper or a class presentation.

PSYCH 460 Human Neuroanatomy (also BIONB 420, sec 02) (I or III)
Spring. 3 or 4 credits (4 credits with one discussion/lab per week in which students dissect sheep brains, read original research papers and write a term paper). Prerequisites: PSYCH 223, or BIONB 222, or permission of the instructor. Permission required for 4-credit option. Limited to juniors, seniors and graduate students. S-U grades and auditing not permitted. Lecs, M W F 1:25; discussion section to be arranged. S. Newman.
Neuroanatomy is the substrate for the functional organization of the human nervous system. This course introduces the brain nuclei and major connecting pathways of functional neural systems: sensory, motor, and integrative. Our understanding of the functions of these systems is based in part on their dysfunction, on the symptoms of neurological and psychiatric diseases that damage or inactivate selected pathways. This course highlights neuroanatomical pathways and networks that are known, or hypothesized, to be dysfunctional in a variety of nervous system disorders.

PSYCH 465 Topics in High-Level Vision (also COGST 465 and COM S 392) (III)
Spring. 4 credits. Graduate students see PSYCH 665. S. Edelman.
High-level vision is a field of study concerned with functions such as visual object recognition and categorization, scene understanding, and reasoning about visual structure. It is an essentially cross-disciplinary endeavor, drawing on concepts and methods from neuroanatomy and neurophysiology, cognitive psychology, applied mathematics, computer science, and philosophy. The course concentrates on a critical examination of a collection of research publications, linked by a common thread, from the diverse perspectives offered by the different disciplines. Students write bi-weekly commentaries on the assigned papers and a term paper integrating the material covered in class.

PSYCH 470 Undergraduate Research in Psychology
Fall or spring. 1–4 credits. S-U grades optional. Written permission from the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours TBA. Staff.
Practice in planning, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 471 Advanced Undergraduate Research in Psychology
Fall or spring. 1–4 credits. S-U grades optional. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours TBA. Staff.
Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research. One, and preferably two, semesters of PSYCH 470 is required. The research should be more independent and/or involve more demanding technical skills than that carried out in PSYCH 470.

PSYCH 472 Multiple Regression
Spring, weeks 1–7. 2 credits. Prerequisite: 1 solid semester of introductory statistics. Analysis of variance is helpful but not required. M W F 10:10. R. B. Darlington.
Course covers uses and pitfalls of multiple regression in causal analysis, path analysis, and prediction. Emphasis is on analyzing data collected under uncontrolled conditions. Includes colinearity, indicator variables, sets, adjusted and shrunken R^2, suppressors, hierarchical analysis, overcontrol, and experimental design. Students may use the Mystat, Minitab, SPSS, or Systat statistics packages.

PSYCH 473 General Linear Model
Spring, weeks 8–14. 2 credits. Prerequisite: PSYCH 472 or equivalent. M W F 10:10. R. B. Darlington.
Course topics include multicategorical variables, corrections for multiple tests, diagnostic methods, nonlinear relationships, interaction, main and simple effects, and basic power analysis. Student may use Mystat, Minitab, SPSS or Systat.

PSYCH 475 Multivariate Analysis of Psychological Data
Fall. 2 credits. Prerequisite: PSYCH 473 or permission of instructor. R 10:10–12:05. R. B. Darlington.
Students vote on topics to cover, choosing among time series, cluster analysis, multidimensional scaling, component analysis, factor analysis, MANOVA, canonical correlation, repeated measures, logistic regression, log-linear models, ANOVA with empty cells, meta-analysis, and other topics. First class sketches all these topics before vote.

[PSYCH 480 The Cornell Westchester/NY Hosp. Field Placements (III)
Full year. 7 credits. Spring through summer and fall. Prerequisites: PSYCH 325 or PSYCH 281 (for PSYCH), Biology or Chemistry with lab (pre-med). Sophomores or juniors only. Not offered 2001–2002. Staff.
The Cornell-Westchester/Payne Whitney field placement program makes available eight-week research/clinical internships for Cornell-Ithaca undergraduates who are pre-professional in psychology, neurobiology, psychiatry, or medicine. Each student is matched with a MD./Ph.D. mentor at the Cornell-Westchester or Payne Whitney hospital. Students work on one rotation throughout the summer and assist the researcher with his/her work. Students' work includes, but is not limited to, reading, reporting, observing, writing literature reviews, learning grant-writing, assisting in the conducting of experiments, and planning their own experiments.

Most placements involve a clinical component as well. *Under the supervision of the mentor*, students work in therapy groups with patients, participate in testing, and assist in psychological rehabilitative activities. The patient populations with whom students work are diverse with regard to age and diagnosis as well as race, culture, ethnicity, and national background.]

PSYCH 481 Advanced Social Psychology (III)
Fall. 4 credits. Limited to 20 students, by application. Senior psychology majors have priority. Graduate students, see PSYCH 681. T R 10:10–11:25. D. T. Regan.
Selected topics in social psychology are examined in depth with an emphasis on the relationship between experimental research and the development of theory. Readings are mostly primary sources. Among the theoretical approaches to social behavior we may discuss are social comparison theory, cognitive dissonance, attribution processes and social

judgment, dramaturgy and impression management, and evolutionary perspectives.

PSYCH 489 Seminar: Beliefs, Attitudes, and Ideologies (also PSYCH 689/ WOMNS 488/688) (III)
Fall. 4 credits. Prerequisites: admission is by application during the spring pre-registration period for the fall semester. Seniors and graduate students are given priority. M 2:30–4:25. D. J. Bem.
This course in cultural analysis examines the properties of beliefs and attitudes, how they are formed and changed, the psychological functions they serve, and how they get organized into ideologies. Several specific issues involved in America's "culture wars" are examined, such as abortion, gender, sexual orientation, and affirmative action. Other topics include the culture of childhood, deaf culture, and the ideologies of science. Participants write weekly commentaries on the readings and a term paper examining a particular ideology.

[PSYCH 491 Research Methods in Psychology
Spring. 4 credits. Enrollment limited to 15 students. Recommended: permission of instructor, PSYCH 350, experience in upper-division psychology courses, or graduate standing. Graduate students, see PSYCH 691. T R 10:10–11:25. Not offered 2001–2002. D. A. Dunning.
An intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course focuses on designing and conducting experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. Beyond learning methods of "correct" and rigorous experimentation, we also discuss what makes a research study actually interesting. The course in addition, covers test construction, survey methods, and "quasi experiments." Students concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.]

[PSYCH 492 Sensory Function (also BIONB 492) (I)
Spring. 4 credits. Limited to 25 students. Prerequisite: a 300-level course in biopsychology, or BIONB 222 or BIOAP 311, or equivalent. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. Graduate students, see PSYCH 692. Offered alternate years. M W F 10:10. Not offered 2001–2002.
B. P. Halpern and H. C. Howland.
In general, this course has covered classical topics in sensory function such as vision, hearing, touch, and balance, as well as some more modern topics like sensory processing, location of stimulus sources in space, the development of sensory system, and nonclassical topics such as electroreception and internal chemoreceptors.]

Advanced Courses and Seminars

Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each term is determined by the needs of the students.

A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Uris Hall). The following courses may be offered either term and carry four credits unless otherwise indicated.

PSYCH 501 Cognition (also COGST 501)
Fall. 4 credits. Concurrent or prior registration in COGST 101/COM S 101/ LING 170/PSYCH 102, Introduction to Cognitive Science, is required. Co-meets with PSYCH 614, Issues in Cognitive Psychology. S. Edelman.
This course introduces graduate students interested in cognition (especially those who plan to pursue the Cognitive Studies minor) to the central issues in computational cognitive psychology. It consists of a series of advanced-level discussions of selected examples from the material covered in COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102 and COGST 214/PSYCH 214/614 (perception, attention and consciousness, memory, thinking, and language). The course focuses on the development of skills required for critical evaluation of research in cognitive sciences, backed by an in-depth understanding of the relevant concepts and theories.

PSYCH 510–511 Perception

PSYCH 512–514 Visual Perception

PSYCH 518 Topics in Psycholinguistics

PSYCH 519–520 Cognition

PSYCH 521 Psychobiology (Developmental Seminar)

PSYCH 522 Topics in Perception and Cognition

PSYCH 523 Hormones and Behavior

PSYCH 527 Topics in Biopsychology

PSYCH 530 Representation of Structure in Vision and Language (also COGST 530 and LING 530)
Spring. 4 credits. Graduate seminar. Prerequisites: a course each in cognitive psychology, linguistics, computer science, or permission of instructor. Enrollment limited to 13 graduate students.
S. Edelman.
The seminar concentrates on the nature of the representation of visual objects and scenes in the brain and compare it with the structural framework that serves as the main explanatory tool in current theories of language processing. Data and ideas are drawn from visual psychophysics, neurophysiology, psycholinguistics, computational vision and linguistics, and philosophy. Students present published research papers and preprints, which are then discussed and critiqued.

PSYCH 531 Topics in Cognitive Studies (also COGST 531 and LING 531)
Spring. 4 credits. M 4:15–6:15. Staff.
This seminar series takes advantage of the wide range of expertise and research interests of the faculty members of the Cognitive Studies Program. Every time it is offered, the seminar concentrates on a cluster of issues that span disciplines from Neurobiology and Behavior, through Psychology and Linguistics, to Computer Science and Philosophy. Each meeting consists of a short background presentation, followed by a seminar-style discussion of a chosen issue, exemplified by a current research publication. Students will submit weekly essays discussing the assigned publications, and a term paper integrating the various topics covered.

PSYCH 535 Evolutionary Perspectives on Behavior

PSYCH 541 Statistics in Current Psychological Research

PSYCH 550 Special Topics in Cognitive Science

PSYCH 580 Experimental Social Psychology

PSYCH 600 General Research Seminar
Fall or spring. No credit.

[PSYCH 601 Computational Models of Language
Spring. 4 credits. Prerequisites: consent of instructor. R 10:10–12:05. Not offered 2001–2002. M. Spivey.
This seminar involves in-depth discussion of a range of computational approaches to language representation, processing, and acquisition. We cover pharse-structure grammars, context-free grammars, connectionist models, statistical natural language processing, and dynamical systems, to name just a few. There is also some hands-on experience writing models in a computer lab using the MATLAB programming environment.]

PSYCH 605 Perception (also PSYCH 205)
Spring. 4 credits. Non-arts graduate students only. T R 11:40–12:55.
J. E. Cutting.

[PSYCH 607 Chemosensory Perception (also PSYCH 307)
Fall. 4 credits. T R 9:05. Not offered 2001–2002. B. P. Halpern.]

[PSYCH 611 Introduction to Human Memory (also PSYCH 311)
Spring. 4 credits. T R 11:40–12:55. Not offered 2001–2002. Staff.]

[PSYCH 612 Laboratory in Cognition and Perception (also PSYCH 412)
Spring. 4 credits. M W 2:55–4:10. Not offered 2001–2002. D. J. Field.]

PSYCH 613 Obesity and the Regulation of Body Weight (also NS 315)
Spring. 3 credits. Limited to 30 students. Prerequisites: 1 course in psychology and 1 course in nutrition. Undergraduate students may register with permission of instructor. S-U grades optional. Offered alternate years. T R 1:25–3:20.
D. A. Levitsky.
This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

PSYCH 614 Issues in Cognitive Psychology (also PSYCH 214)
Fall. 4 credits. M W F 10:10. S. Edelman.

[PSYCH 615 Concepts, Categories, and Word Meaning (also PSYCH 415)
Fall. 4 credits. M 1:25–4:25. Not offered 2001–2002. Staff.]

PSYCH 616 Modeling Perception and Cognition (also PSYCH 416 and COGST 416)
Spring. 4 credits.

[PSYCH 618 Psychology of Music (also PSYCH 418)
Spring. 4 credits. M W 2:55–4:10. Not offered 2001–2002. C. Krumhansl.]

[PSYCH 619 Neural Networks Laboratory (also PSYCH 419)
Spring. 4 credits. T R 2:55–4:10. Not offered 2001–2002. D. J. Field.]

[PSYCH 622 Developmental Biopsychology (also PSYCH 422)
Fall. 4 credits. M W F 9:05–9:55. Not offered 2001–2002. B. L. Finlay.]

PSYCH 625 Cognitive Neuroscience (also PSYCH 425)
Fall. 4 credits. M W F 9:05–9:55. B. L. Finlay.

PSYCH 626 Evolution of Human Behavior (also PSYCH 326)
Fall. 4 credits. T R 2:55–4:10. R. E. Johnston.

[PSYCH 629 Olfaction and Taste: Structure and Function (also PSYCH 429 and BIONB 429)
Spring. 4 credits. T R 9:05. Not offered 2001–2002. B. P. Halpern.]

[PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and BIONB 421)
Fall. 4 credits. T R 10:10–11:25. Not offered 2001–2002. B. P. Halpern.]

PSYCH 632 Biopsychology of Learning and Memory (also PSYCH 332 and BIONB 328)
Spring. 4 credits. M W F 11:15. T. J. DeVoogd.

PSYCH 640 The Brain and Sleep (also PSYCH 440)
Fall. 4 credits. M W 2:55–4:10. H. S. Porte.

PSYCH 641 Laboratory in Sleep Research (also PSYCH 441)
Spring. 4 credits. W 7:30–10:30. H. S. Porte.

PSYCH 642 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH 342 and COGST 342)
T R 11:40–12:55. D. J. Field.

PSYCH 650 The Lenses of Gender (also PSYCH 450 and WOMNS 450 and 650)
Fall. 4 credits. F 2:30–4:25. S. L. Bem.

PSYCH 665 Topics in High-Level Vision (also PSYCH 465, COGST 465, and COM S 392)
Spring. 4 credits. S. Edelman.

PSYCH 681 Advanced Social Psychology (also PSYCH 481)
Fall. 4 credits. T R 10:10–11:25. D. T. Regan.

PSYCH 689 Seminar: Beliefs, Attitudes, and Ideologies (also PSYCH 489)
Fall. 4 credits. M 2:30–4:25. D. J. Bem.

[PSYCH 691 Research Methods in Psychology (also PSYCH 491)
Spring. 4 credits. T R 10:10–11:25. Not offered 2001–2002. D. A. Dunning.]

PSYCH 692 Sensory Function (also PSYCH 492 and BIONB 492)
Spring. 4 credits. M W F 10:10. B. P. Halpern and H. C. Howland.

[PSYCH 696 Introduction to Sensory Systems (also PSYCH 396 and BIONB 396)
Spring. 4 credits. M W F 10:10. Not offered spring 2002. B. P. Halpern.]

PSYCH 700 Research in Biopsychology

PSYCH 709 Developmental Psychology (also PSYCH 209)
Spring. 4 credits. M W 2:55–4:10. S. Johnson.

PSYCH 710 Research in Human Experimental Psychology

PSYCH 713 Information Processing: Conscious and Nonconscious (also PSYCH 413)
Spring. 4 credits. R 10:10–12:35. Staff.

PSYCH 714 Comparative Cognition (also PSYCH 414 and COGST 414)
Spring. 4 credits. T R 11:40–12:55. M. J. Owren.

PSYCH 716 Auditory Perception (also PSYCH 316)
Fall. 4 credits. M W 2:55–4:10. C. L. Krumhansl.

PSYCH 717 The Origins of Thought and Knowledge (also PSYCH 417)
Fall. 4 credits. M W 2:55–4:10. S. Johnson.

PSYCH 720 Research in Social Psychology and Personality

PSYCH 722 Hormones and Behavior (also PSYCH 322 and BIONB 322)
Fall. 4 credits. M W F 11:15–12:05. E. A. Regan.

[PSYCH 773–774 Proseminar in Cognitive Studies I and II (also COGST 773/774, PHIL 773/774, LING 773/774, and COMS 773/774)
Fall: R grade. Spring: S-U only. 4 credits. Not offered 2001–2002.
The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar consists of a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that make up the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty members from the field introduce the theoretical and methodological issues that underlie the field and its relation to Cognitive Studies; in addition, they introduce various labs in which active research is being conducted in their field at Cornell.

The proseminar includes suggestions from faculty in each field for further advanced interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It concludes (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice.

Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade is assigned in the fall semester, and a S-U grade only is assigned in the spring semester.]

PSYCH 775 Proseminar in Social Psychology (I)
Fall. 2 credits. Limited to 10 graduate students in social psychology. Prerequisite: permission of instructors. Hours TBA. D. A. Dunning, T. D. Gilovich, and D. T. Regan.
This is the first term of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasizes social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, and emotional experience, etc., are covered.

PSYCH 776 Proseminar in Social Psychology (II)
Spring. 2 credits. Limited to 10 graduate students in social psychology. Prerequisite: permission of instructors. Hours TBA. D. A. Dunning, T. D. Gilovich, and D. T. Regan.
This is the second half of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course emphasizes social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, and emotional experience are covered.

PSYCH 900 Doctoral Thesis Research in Biopsychology

PSYCH 910 Doctoral Thesis Research in Human Experimental Psychology

PSYCH 920 Doctoral Thesis Research in Social Psychology and Personality

Summer Session Courses

The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses are offered in a particular summer. Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry

PSYCH 102 Introduction to Cognitive Science

PSYCH 128 Introduction to Psychology: Personality and Social Behavior

PSYCH 199 Sports Psychology

PSYCH 223 Introduction to Biopsychology

PSYCH 280 Introduction to Social Psychology

PSYCH 350 Statistics and Research Design

QUECHUA

See Romance Studies.

RELIGIOUS STUDIES MAJOR

See "Special Programs and Interdisciplinary Studies."

ROMANCE STUDIES

The Department of Romance Studies (Mitchell Greenberg, chair) offers courses in the following areas: French, Italian, and Spanish literature; French, Italian, Portuguese, Quechua, and Spanish language; Francophone, Italian, and Hispanic culture; and linguistics and semiotics. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

French

J. Béreaud (director of undergraduate studies), A. Berger, N. Furman, A. Grandjean-Levy, M. Greenberg (chair), R. Klein, P. Lewis, S. LoBello, K. Long, T. McNulty, J. Ngaté, D. Posner (visiting), K. Proux, D. Rubenstein (visiting), C. Sparfel, S. Tun, M. C. Vallois, C. Waldron. Emeriti: A. Colby-Hall, D. I. Grossvogel, A. Seznec. Adjunct Associate Professor: S. Tarrow

The Major

The major in French is divided into two options: French Area Studies and French literature. While prospective majors should try to plan their programs as far ahead as possible, especially if they intend to study abroad, no student will be refused admission merely because of a late start. In view of the ongoing curriculum changes that will be implemented in 2001–2002, please see Professor Jacques Béreaud, jb73@cornell.edu, the Director of Undergraduate Studies, in 308 Morrill Hall. This consultation is especially important for finding out what sequence of courses will follow the current choice of courses.

Students interested in majoring in French liniguistics should contact the Department of Linguistics.

Honors. The honors program encourages well-qualified students majoring in French linguistics to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not practically possible in the case of course papers.

No special seminars or courses are required of honors students, but they have regular meetings with faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in FRROM 429–430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

The Literature Option

The major in French, Literature Option, is designed to give students proficiency in the oral and written language, to acquaint them with French literature and culture, and to develop skills in literary analysis.

Admission

To be admitted to the major, students should have completed FRLIT 201, 220, or 221 plus 222 and FRROM 219 (formerly 213) or its equivalent by the end of their sophomore year.

For completion of the major, a student must:

1) acquire a sound degree of competence in French language. This competence is demonstrated by the successful completion of FRROM 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).
2) take six courses in French literature or civilization at the 300 level or above. These courses, selected in consultation with the student's major adviser, will include at least two pre-19th-century courses and at least one 400-level course.
3) take two connected courses in one of the following related areas: literature, linguistics, comparative literature, history, history of art, visual studies, music, government, or another relevant discipline with a significant French component. Students who are double majors are exempted from this last requirement.

The French Area Studies Option

Admission

To be admitted to the major, students should have completed FRLIT 201, 220, 221, or 224 plus 219 (formerly 213) or its equivalent by the end of their sophomore year.

For completion of the major, a student must:

1) acquire a sound degree of competence in the French language. This competence is demonstrated by the successful completion of FRROM 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).
2) take two courses in Romance Studies (literature or civilization) at the 300 level or above.
3) take six courses at the 300 level or above in no more than three areas of interest such as—but not limited to—Africana studies, anthropology, comparative literature, French literature, economics, government, history, history of art, linguistics, music, theater arts, women's studies, and visual studies. Each area must be represented by at least two courses, and each course must have a significant French component. At least one of these six courses should be at the 400 level.

Administration of French Area Studies

Students are admitted to the major by the director of undergraduate studies in the French section of the Department of Romance Studies but are guided by their individual advisers. A copy of each student's program is given to the director of undergraduate studies for approval and safe-keeping.

Study Abroad in France

French majors or other interested students may study in France for one or two semesters during their junior year. Opting for one of several study-abroad plans recognized by the Departments of Romance Studies and Linguistics facilitates the transfer of credit. Information about these plans is available from the director of undergraduate studies.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of FRROM 219 (formerly 213) or its equivalent in advanced credit or placement by the Cornell CASE examination. The taking of FRROM 301 and/or 312 is, however, strongly recommended.

Students interested in studying in France are encouraged to consider the special benefits offered by EDUCO, the program in Paris cosponsored by Cornell and by Emory-Duke University. EDUCO offers advanced students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program spend the year or semester as fully matriculated students at the University of Paris VII and other institutions of higher learning in Paris, including the Institut d'Etudes Politiques (Sciences Po), selecting courses in many fields from the regular university course offerings. Students begin the academic year with an intensive three-week orientation in French history, society and daily life. While it is possible to enroll in the EDUCO Program for one semester, admission will be given first to students planning to study abroad for the full academic year.

EDUCO maintains a center in Paris with appropriate support staff. The resident director, chosen annually from the Cornell and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the courses. The center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as informal gatherings.

Honors. The honors program encourages well-qualified students majoring in French literature and culture to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers.

To be eligible for Honors, students must have a general grade point average of at least 3.00 and a grade point average of at least 3.5 in their French major.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 429–430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The senior essay is to be made available for reading by the jury on or before April 15. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

Language

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance of the first scheduled class session. Further, a student who fails to attend the first three days of class will be automatically dropped from the course in order to accommodate those on the waiting lists.

All French language courses are offered by the Department of Romance Studies and French linguistics courses are offered by the Department of Linguistics.

Note: *Students placed in the 200-level courses have the option of taking language and/or literature courses; see listings under "Literature" for descriptions of the literature courses, some of which may be taken concurrently with FRROM 206, 209, or 219 or H ADM 266.*

FRROM 112 Elementary French: Review and Continuation
Fall. 4 credits. Prerequisite: LPF score 37–44. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. S. Tun and staff.
This course is designed for students who have taken some French and who have a placement score of 37–44 or SAT II 410–480. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken FRROM 121 may enroll for this course. As part of the final exam, students take the LPF and, according to their score, may place into FRROM 123 (score below 56) or receive qualification (56 or above), and placement into the 200-level courses.

FRROM 121–122 Elementary French
121, fall; 122, spring. 4 credits each term. Prerequisite: FRROM 122, FRROM 121. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. C. Sparfel and staff.
This course is intended for students with no experience in French. (To be eligible for FRROM 121, students who have previously studied two or more years of French must have an LPF score lower than 37 or SAT II lower than 370).

The goal of FRROM 121–122 is to provide a thorough grounding in the language and insights into French language and francophone cultures so that students can function in basic situations in a French-speaking culture. Small classes provide intensive, context-specific practice in speaking, reading, writing, and listening comprehension.

FRROM 123 Continuing French
Fall or spring. 4 credits. ***Provides language qualification.*** Prerequisite: LPF score 45–55 or SAT II 490–590. Satisfactory completion of FRROM 123 fulfills the qualification portion of the language requirement. Recommended courses after FRROM 123: FRROM 206 or 209. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: C. Waldron and staff; spring: S. Tun and C. Waldron.
FRROM 123 is an all-skills course designed to improve pronunciation, oral communication, and reading ability; to establish a groundwork for correct writing; and to provide a substantial grammar review. The approach in the course encourages the student to see the language within the context of its culture.

FRROM 206 Intermediate Reading and Writing (formerly FRROM 200)
Fall or spring. 3 credits. ***Provides language proficiency.*** Prerequisite: qualification in French (FRROM 123, LPF score 56–64, or SAT II 600–680). Satisfactory completion of FRROM 206 fulfills the proficiency portion of the language requirement. Conducted in French. Recommended courses after FRROM 206: FRROM 219 (formerly FRROM 213), FRROM 220 or FRROM 221. FRROM 219 (formerly FRROM 213) may be taken concurrently with FRROM 220. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: S. LoBello; spring: C. Sparfel.
This language course is designed for students who want to focus on their reading and writing skills. Emphasis is placed on grammar review and expansion, vocabulary development, and appreciation of different styles of language. Diverse text types are used, including a contemporary novel and student-selected material.

FRROM 209 Intermediate Composition and Conversation I (formerly FRROM 203)
Fall, spring, or summer. 3 credits. ***Provides language proficiency.*** Prerequisite: qualification in French (FRROM 123, LPF score 56–64, or SAT II 600–680). Satisfactory completion of FRROM 209 (formerly FRROM 203) fulfills the proficiency portion of the language requirement. Recommended courses after FRROM 209: FRROM 219 (formerly FRROM 213), FRROM 220 or FRROM 221. FRROM 219 (formerly FRROM 213) may be taken concurrently with either FRROM 220 or FRROM 221. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. A. Grandjean-Levy, K. Proux and staff; summer: staff.
Listening comprehension and speaking activities are aimed at improving oral communication. Includes compositions, and cultural and literary readings. This course gives students the opportunity to strengthen their knowledge of grammar for increased mastery.

FRROM 219 Intermediate Composition and Conversation II (formerly FRROM 213)
Fall or spring. 3 credits. Prerequisite: proficiency in French (FRROM 206 or 209), or permission of instructor, or placement by Cornell Advanced Standing Examination (CASE). For admission to the Cornell Abroad Program, students are required to take either this course, or have completed an equivalent level of study. Taught in French. Recommended courses after FRROM 219: FRROM 220, 221, 301, or 305 (220 or 221 may be taken concurrently with 301 or 305). Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: A. Grandjean-Levy, S. LoBello, and K. Proux; spring: S. LoBello and K. Proux.
Emphasis is on improving grammatical accuracy and on enriching vocabulary in oral and written expression of French. Varied types of reading including newspaper articles, short videos, films, and presentations by students, provide the basis for writing assignments and class discussions. Themes and emphases may vary from section to section.

FRROM 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times arranged with instructor.

FRROM 301 Advanced French (I)
Fall or spring. 4 credits. Prerequisite: FRROM 219 (formerly FRROM 213), or Q++ on the Cornell Advanced Standing Examination (CASE). Recommended courses after FRROM 301: FRROM 312. FRROM 220, or FRROM 221 may be taken concurrently with 301. Fall: J. Béreaud and staff; spring: S. LoBello and staff.
Class discussions based on reading contemporary texts: half short stories, half articles on current events taken from French magazines or newspapers. All texts are chosen for thematic or cultural interest and linguistic quality. Special attention is given to accuracy in French through grammar review and weekly papers (essays or translations). Each student gives one or more oral presentations in class. Course required of French majors.

FRROM 305 French through Film
Fall or spring. 4 credits. Prerequisite: FRROM 219 (formerly FRROM 203), or Q++ on the Cornell Advanced Standing Examination (CASE). Recommended courses after FRROM 305: FRROM 301, 312 (with the permission of the instructor), 220, or 221. FRROM 220 or 221 may also be taken concurrently with FRROM 305. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. C. Waldron.
Analysis of French contemporary films and related readings. Used as a means of studying the language. Particular emphasis is on the culture and historical context as it relates to French contemporary society. Additionally, guest speakers provide enrichment on selected topics.

FRROM 312 Advanced French (II)
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRROM 301 or with permission of instructor, or placement by the Cornell Advanced Standing Examination (CASE). Fall: M. C. Vallois and staff; spring: N. Furman.
Continuation of work done in FRROM 301. The objective of FRROM 301 is to teach students to speak and write correct French; in FRROM 312 students are expected to have a richer, more idiomatic and hopefully elegant command of the language.

Formal study of grammar is discontinued, and more attention is devoted to the examination of the stylistics and rhetorical characteristics of texts and to oral presentations by students. Weekly papers as in FRROM 301.

FRROM 313 French in the News
Spring. 4 credits. Prerequisite: FRROM 301, or FRROM 305, or placement by the Cornell Advanced Standing Examination (CASE). A. Grandjean-Levy.
Studying French televised news broadcasts and other media, places students at the heart of today's France. Flexible approach allows students to perfect their language skills.

FRROM 630 French for Reading—Graduate Students
Spring only. 3 credits. Limited to graduate students. C. Sparfel and staff.

Designed for those with little or no background in French, this course's primary aim is to develop skill in reading French. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. Some flexibility in selecting texts according to fields of interest is offered.

Literature

FRLIT 201 Introduction to Techniques of Reading French Literature

Fall. 3 credits. *Provides language proficiency.* Prerequisites: qualification in French (SAT II score of 600–680, LPF score of 56–64, or French 123). Students with an SAT II score of 640 or an LPF score of 60 or more, should take French 221. Recommended courses after FRLIT 201: French 219, 220, or 221, or permission of instructor. Conducted in French. M. C. Vallois and staff.

FRLIT 201 is designed for students interested in improving their written and oral skills in French and also their literary proficiency. Texts have been chosen both for their literary merit and their manageable linguistic difficulty. Close scrutiny of the works and active class discussions will sharpen students' critical and analytical abilities. The reading list may include authors such as Baudelaire, Hugo, Ionesco, Camus, Rimbaud, Sartre, and Duras.

FRLIT 220 French and Francophone Culture @ (IV)

Spring. 3 credits. Prerequisite: SAT II score of 640 and above, or LPF score of 60 or FRROM 206 (formerly FRROM 200) or 209 (formerly FRROM 203). Conducted in French. M-C. Vallois and staff.

This course serves as an introduction to French Area Studies. It provides an overview of Francophone culture and society from 1945 to the present. Readings include a selection of articles dealing with issues of current concern in France; works by French and Maghrebi or African writers; poetry or drama; two films are also discussed.

FRLIT 221 Modern French Literature # (IV)

Fall or spring. 3 credits. Prerequisites: SAT II score of 640 and above, or LPF score of 60, or FRLIT 206 (formerly FRROM 200) or 209 (formerly FRROM 203). Conducted in French. Fall: M. C. Vallois and staff; spring: J. Bëreaud, T. McNulty and staff.

This course, divided into small sections, is intended as an introduction to French literature of the modern period. Texts are chosen because of their centrality to the traditional literary canon and with an eye to experimentation. The course considers literary genres (poetry, drama, the novel) as solicitations to read texts differently, at different speeds, with diverse claims on our attention. One test may include French script. The course is designed to satisfy a general interest in modern French literature as well as to prepare students to pursue a French major in literature. Readings include works by Baudelaire, Mallarmé, Beckett, Camus, Proust, Duras, and Assia Djebar.

FRLIT 222 Early Modern French Literature # (IV)

Spring. 3 credits. Prerequisite: FRLIT 220, 221, or permission of the instructor. Conducted in French. M. C. Vallois.

Study of the classic literature of seventeenth-century France (Corneille, Racine, Molière, Mme de Lafayette, La Fontaine) and of eighteenth-century Enlightenment literature (Voltaire, Rousseau, Diderot, Beaumarchais). Special attention is paid to the ways in which these various works represent or deal with the shift from an aristocratic cultural code of values to modern bourgeois ideology and aesthetics. The course also invites reflection on the status and centrality of female characters in classical and neo-classical French literature. Theater being central to this period, the course gives special attention to major plays of the classical period. It traces the evolution from the classical tragic heroine to more modern (but no less problematic) representations of women.

FRLIT 224 The French Experience (also ANTHR 224) (III or IV)

Fall. 3 credits. Conducted in English. Readings available both in French and in English translation. A. Berger and J. Siegel.

We look ethnographically and through literature at tastes and at class as they function and are discussed in France. We examine speech in its practice and as it is reflected upon; and we look at views from France, from America, and other countries. As we emphasize differences, the French experience emerges.

Note: Prerequisite for all 300-level courses in French literature: FRLIT 220, 221 or the equivalent.

FRLIT 320 Civilization II: Contemporary France (IV)

Fall. 4 credits. Prerequisite: FRROM 219 (formerly FRROM 213) or equivalent. Conducted in French. J. Bëreaud.

Detailed, analytical study of contemporary French society, its structure and its culture. In the second part of the course, students select a topic for in-depth, personal research leading to the writing of a term paper. Short oral presentations are encouraged. A variety of resources are used: texts, magazine and television excerpts, internet items. A few films are shown to illustrate some aspects of French life.

FRLIT 324 Imagining America: French Travel Writing from de Tocqueville to Baudrillard (IV)

Fall. 4 credits. D. Rubenstein.

This course addresses nineteenth and twentieth-century French travel writing about America from Alexis de Tocqueville's landmark work. De la Démocratie en Amérique to Jean Baudrillard's polemical Amérique. We will be concerned with the question of what America, as both "utopian" ideal and as a living example, represents for the French philosophical voyager. For example, what role does national fantasy play in the encounters revealed in Julia Kristeva's excursion to American universities in Les Samourais or in Simone de Beauvior's guided (by Richard Wright) tour as recounted in her diary L'Amérique au jour le jour. We will also discuss Francois-René de Chateaubriand's René as a literary limit case of inter-cultural exchange. The course will be conducted in English, and non-French majors will be able to read the books in English translation.

FRLIT 326 May '68 and Its Consequences (IV)

Spring. 4 credits. Conducted in French. J. Bëreaud.

The course first studies the students' revolt of May 1968 in France, placing it in its national and international political and ideological context. It then traces the changes brought about by the spirit of May '68 in some areas of French society, especially youth and education. Finally, it leads to a reflection on current ideologies and the change from modernism to post-modernism.

FRLIT 330 Francophone African Literature @ (IV)

Spring. 4 credits. Conducted in French. D. Posner.

Introduction to the works of representative poets, dramatists, novelists, and short story writers from sub-Saharan Africa and Madagascar. L. S. Senghor, C. Laye, F. Oyono, J. J. Rabëarivelo, S. Labou Tansi, and the Afro-Caribbean Aimé Césaire are among the writers whose works are read. The focus is on the twentieth century and the nature of these writers' relationships with both the West and with Africa.

FRLIT 333 Contemporary French Thought (IV)

Spring. 4 credits. Conducted in French. D. Rubenstein.

This course will survey the major contemporary post structuralist, psychoanalytic, and deconstructive theorists in French thought today: Lacan, Foucault, Derrida, Barthes, Bourdieu, Baudrillard and Wittig. Particular emphasis will be on the contribution of these theorists to the analysis of sexuality and pedogogy.

FRLIT 334 The Novel as Masterwork (also FRLIT 684) # (IV)

Spring. 4 credits. Conducted in French. Prerequisite: FRLIT 221 or permission of the instructor. N. Furman.

This course traces the evolution of the nineteenth-century French novel. Readings include novels by Stendhal, Balzac, Flaubert, and Zola.

FRLIT 335 Romance to Revolution: The French Novel before 1789 # (IV)

Spring. 4 credits. Prerequisite: FRLIT 221 or permission of instructor. Conducted in French. M. C. Vallois.

In addition to considering formal questions relating to the development of the novel in French, this course examines problems such as the appearance of narrative and historical consciousness, the representation of women, and the relation between literature and society. Texts read include major such works as Tristan and Iseult, Perrault's Contes, Mme de LaFayette, Prévost, Rousseau, Diderot, Laclos, and Sade.

FRLIT 370 Perspectives on the Age of Enlightenment: "Enlightened" Literatures # (IV)

Fall. 4 credits. M. C. Vallois.

Through a reading of various works of the French 18th century (by Montesquieu, Voltaire, Diderot, Rousseau, and Sade), we study the emergence of new literary discourses and practices aiming at a "secularization" of the literary field, in conjunction with the ideological and epistemological changes which took place under the name of Enlightenment.

FRLIT 386 Jewelry, Perfume, and Cigarettes in French Literature (IV)

Fall. 4 credits. R. Klein.

This course considers representations of adornment and other useless artifacts in French literature. Readings include works by Mérimée, Diderot, Baudelaire, Gautier, Colette, Mauriac, and Patrick Süsskind.

FRLIT 393 The 20th Century Novel (IV)
Spring. 4 credits. Prerequisite: FRLIT 221 or permission of the instructor. T. McNulty.
This course examines some of the major experiments with the novel form in twentieth century France (including surrealism, automatic writing, the *nouveau roman*, and *écriture féminine*), considering how authors adapt the form and structure of the novel to address such concerns as memory and forgetting, the creative agency of the unconscious, gender and sexuality, exile and displacement, technology and mass reproduction. Authors studied include Gide, Proust, Breton, Roussel, Malraux, Duras, Robbe-Grillet, and Sarraute.

FRLIT 406 Biblical Diaspora's in France (also S HUM 406 and COM L 488) (IV)
Fall. 4 credits. T. McNulty.
This course examines the use of the concept of "diaspora" in contemporary French thought. We focus our attention on a group of authors whose uses and adaptations of the concept of "diaspora" are heavily indebted to theologies such as Judaism and mysticism. Can we locate in modern philosophy the "diaspora" of a certain kind of theological thought? What is its relationship to the philosophical discourse in which it takes up residence? The first part of the course considers the problems of estrangement, nomadism, and diaspora in the Bible, examining how the Hebrew patriarchs, Jewish prophets, and Christian apostles use these themes to define their position with regard to God and their different attitudes toward the law, the word, and the book. We then explore how these themes are developed in works by Blanchot, Buber, Deleuze, Derrida, Levinas, Lyotard, Scholem and Rosenzweig. Students may read all works in the original languages or in translation.

FRLIT 413 History of Jews in Modern France (also HIST 417 and JWST 446) (III or IV)
Fall. 4 credits. Prerequisite: permission of instructor. V. Caron.
For description, see HIST 417.

FRLIT 419–420 Special Topics in French Literature
419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff.
Guided independent study of special topics.

FRLIT 429–430 Honors Work in French
429, fall; 430, spring. 8 credits year-long course, R grade fall semester, letter grade spring semester, with permission of the adviser. Open to juniors and seniors. Consult the director of the honors program. M. C. Vallois and staff.

FRLIT 448 Medieval Literature # (IV)
Spring. 4 credits. Prerequisite: FRLIT 221 or permission of the instructor. Conducted in English. A. Colby-Hall.
FRLIT 448 deals with the romance and the lyric. Facility in reading Old French and appreciation of these two major genres are the primary goals of this course.

FRLIT 455 Rabelais (also FRLIT 655) # (IV)
Spring. 4 credits. Conducted in French. D. Posner.
Rabelais's novels, and their explorations of the limits of linguistic expression, are studied in the context of the popular culture of the Late Middle Ages and Early Renaissance, of the dawn of religious conflict in France, of the querelle des femmes (the intellectual debate over the status of women), and of early modern science. We also observe how Rabelais's texts situate themselves in problematic relation to the institutions of Church and State.

FRLIT 471 Translation for the Theatre (also THETR 423/623 and FRLIT 671) (IV)
Spring. 4 credits. Prerequisites: proficiency in language other than English; coursework in dramatic literature, directing, or playwriting. Conducted in English. J. E. Gainor.
For description, see THETR 423.

FRLIT 480 Nineteenth-Century French Women Writers (also WOMNS 478 and FRLIT 680) # (IV)
Fall. 4 credits. Conducted in French. A. Berger.
While situating the works read within their specific historical and literary context, this course attempts to address the following questions: How does the inscription of literature as a Public Institution within a phallocentric cultural order affect women authors' status and writing strategies? To what extent and at what levels does being a woman inform or shape the text produced? And, in what ways is literary writing concerned with sexual difference? Writers include Mme. de Staël, George Sand, Flora Tristan, Rachilde and others.

FRLIT 488 Baudelaire in Context (also FRLIT 688, COML 480/680) # (IV)
Spring. 4 credits. Prerequisite: one 300-level course in French literature or permission of instructor. Conducted in French. J. Culler.
A study of *Les Fleurs du mal* in the context of various nineteenth-and twentieth-century discourses: The Romantic lyric (Hugo, Lamartine, Desbordes-Valmore), Romantic Satanism, debates about prostitution, and twentieth-century accounts of Baudelaire as the founder of modern poetry or the poet of the city.

FRLIT 607–608 Proseminar
607, fall; 608, spring. 2 credits each term. M. Greenberg.
The pro-seminar is the place for sustained exchanges between graduate students, faculty, and visiting lecturers. Activities include reading and discussion of seminal texts, chapters from dissertations and works in-progress, and articles and essays from visiting lecturers.

FRLIT 639–640 Special Topics in French Literature
639, fall; 640, spring. 2–4 credits each term. Staff.
Guided independent study for graduate students.

FRLIT 655 Rabelais (also FRLIT 455)
Spring. 4 credits. Conducted in French. D. Posner.
For description, see FRLIT 455.

FRLIT 671 Translation for the Theatre (also THETR 423/623 and FRLIT 471)
Spring. 4 credits. Conducted in English. J. E. Gainor.
For description, see THETR 423.

FRLIT 680 Nineteenth-Century French Women Writers (also WOMNS 478 and FRLIT 480)
Fall. 4 credits. Conducted in French. A. Berger.
For description, see FRLIT 480.

FRLIT 684 The Novel as Masterwork (also FRLIT 334)
Spring. 4 credits. Conducted in French. N. Furman.
For description, see FRLIT 334

Italian

Faculty: M. Migiel (director of undergraduate studies), T. Alkire, K. Battig von Wittelsbach, T. Campbell, F. Cervesi-McCobb, S. Stewart-Steinberg, P. Swenson. Emeriti: A. Grossvogel

The Major

Students who wish to major in Italian should consult Professor Marilyn Migiel, mm55@cornell.edu, the Director of Undergraduate Studies, in Morrill Hall 311. She will assign the student a major adviser; the general plan and the details of the student's course of study will be worked out in consultation with the adviser. Italian majors are encouraged to take courses in related subjects such as history, art history, music, philosophy, anthropology, classics, linguistics, and other modern languages and literatures. While a major often occupies only the junior and senior years, it is wise for students to seek faculty advice about the major as early as possible.

Students who elect to major in Italian ordinarily should have completed ITALL 216 or 217 by the end of their sophomore year. Exemptions can be made on the basis of an examination. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature, to acquaint themselves with the outlines of Italian literary history, and to develop some skill in literary analysis. To this end, students are expected to complete successfully 32 credits of Italian literature courses at the 300 level or higher, with papers written in Italian or English. Required courses for the Major are ITALL 303, 304, and a course on Dante. ITALA 402, History of the Italian Language, and 403, Linguistic Structure of Italian, may be counted toward the 32 credits required for the major (an introductory linguistics course is a prerequisite for ITALA 402 and 403).

Students majoring in Italian are also expected to acquire competence in the handling of the language. That competence may be demonstrated by passing an oral and written examination to be arranged by the adviser.

Italian majors are also required to complete successfully two courses in related fields (for example, Italian history, Italian art history, literary theory).

Italian majors may study in Italy, generally during their junior year, under any of those study-abroad plans organized by American universities that allow the transfer of grades and credit.

To be eligible, students must have completed the first two years of their curriculum requirements and be in good academic standing.

Language

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance of the first scheduled class session. Further, a student who fails to attend the first three days of class will be automatically dropped from the course in order to accommodate those on the waiting lists.

ITALA 121–122 Elementary Italian
121, fall; 122, spring. 4 credits each term. Prerequisite: for ITALA 122, ITALA 121 or equivalent. Intended for beginners or students placed by examination. At the end of ITALA 122, students who score 56 or higher on the LPI attain qualification and may enter the 200-level sequence; otherwise ITALA 123 is required for qualification. Evening prelims. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: P. Swenson, F. Cervesi-McCobb, S. Stewart-Steinberg, and staff; spring: P. Swenson, T. Alkire, F. Cervesa-McCobb, S. Stewart-Steinberg and staff.
A thorough grounding in all the language skills: listening, speaking, reading, and writing. Language practice in small groups. Lectures cover grammar and cultural information.

ITALA 123 Continuing Italian
Fall or spring. 4 credits. ***Provides language qualification.*** Limited to students who have previously studied Italian and have an LPI score of 45–55 or an SAT II score of 460–580. Satisfactory completion of ITALA 123 fulfills the qualification portion of the language requirement. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. T. Alkire.
ITALA 123 is an all-skills course designed to improve speaking and reading ability, to establish a groundwork for correct writing, and to provide a substantial grammar review.

ITALA 209 Intermediate Composition and Conversation I (formerly ITALA 203)
Fall or spring. 3 credits. ***Provides language proficiency.*** Prerequisite: qualification in Italian. Students wishing to major in Italian are strongly encouraged to enroll concurrently in ITALL 214, 215, 216, or 217. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: K. Bättig von Wittelsbach or T. Alkire; spring: K. Bättig von Wittelsbach.
Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

ITALA 219 Intermediate Composition and Conversation II (formerly ITALA 204)
Spring. 3 credits. Prerequisite: ITALA 209 (formerly ITALA 203) or equivalent. Students wishing to major in Italian are strongly encouraged to enroll concurrently in ITALL 214, 215, 216, or 217. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. K. Bättig von Wittelsbach.
Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

Note: *Students placed in 200-level courses also have the option of taking courses in introductory literature, cultural studies, and cinema; see separate listings under ITALL 214, 215, 216 and 217 for descriptions of these courses.*

ITALA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times arranged with instructor.

Literature

ITALL 214 World News, Italian Views (IV)
Fall. 4 credits. Course limited to 18 students. Prerequisite: ITALA 209 (formerly ITALA 203) or permission of instructor. Conducted in Italian. M. Migiel.
In this seminar, we read, discuss, and write about a variety of global and transnational issues that get debated in the Italian media. Our approach to these cultural issues is grounded in rhetorical and discourse analysis. Students are required to read articles from Italian and English (both U. S. and British) sources. Students who read other languages (e.g. French, Spanish, etc.) are encouraged to offer points of comparison. Topics include: current events; international politics; developments in science and technology; economic and business ventures; literary bestsellers; movies; sports.

ITALL 215 The Cinematic Eye of Italy (IV)
Spring. 4 credits. Conducted in Italian. Prerequisite: ITALA 209 (formerly ITALA 203) or permission of the instructor. S. Stewart-Steinberg.
In this sophomore seminar, film is used to explore some of the most important issues in modern Italian cultural history, such as: Italy as a relatively new nation-state; fascism; regionalism; the Southern question; Catholicism; terrorism; the new consumerism of the 80's and 90's; and Italy's recent evolution into a multicultural society. Films viewed include those from the fascist era and the neorealist period, as well as later reformulation and critiques of these early works. There are also readings designed to introduce students to Italian film criticism and to key debates about contemporary Italian culture.

ITALL 216–217 Introduction to Italian Literature (IV)
Fall: 216; spring: 217. 3 credits. Prerequisite: permission of instructor. ITALL 216 is not prerequisite to ITALL 217. Conducted in Italian. Fall, F. Cervesi-McCobb; spring, T. Campbell.
In this course, students develop their language skills in Italian by reading, discussing, and writing about short works of fiction (twentieth-century short stories in ITALL 216; twentieth-century prose works in ITALL 217).

Italian Culture Courses

The sequence of ITALL 220, 221, 222, 223, and 224 is intended to give students a broad overview of the principal issues in Italian culture. The approach is interdisciplinary, drawing on materials from at least three of the following cultural domains: literature, politics, economics, history, art, film, music, religion, science, psychology, philosophy, anthropology.
ITALL 220–224 are conducted in English. Students who are proficient in Italian have the option of enrolling concurrently in the one-credit Italian Practicum, ITALL 300.

ITALL 220 Medieval Italy # (IV)
Spring. 4 credits. Prerequisite: permission of instructor. Conducted in English. M. Migiel.
Introduction to 13th-and 14th-century Italy, with particular attention to the cultural, socio-economic, and political forms that provided the basis for the Italian Renaissance. Units of study are devoted to: changing notions of the individual, politics, and morality; the impact of the new mercantile economy and culture; gender relations; the family; mysticism and popular religious movements; relation to non-Western cultures; the rise of Italian literature in the vernacular; and the impact of the Black Death (1348).

ITALL 224 Contemporary Italy (IV)
Fall. 4 credits. Prerequisite: permission of instructor. Conducted in English. T. Campbell.
Intended as an Italian cultural studies primer. We examine Italy from the period immediately following World War II to the present day. Topics for study include: neorealism; representations of the South; memory and the Shoah; terrorism and the 'Years of Lead'; 'Bribecity' and the advent of the Second Republic; and contemporary painting, particularly the 'Transvitalism' movement. Speculations are entertained on how recent Italian history raises broader questions about national history making and political memory, especially when compared with the French and German cases.

ITALL 300 Italian Practicum
Fall or spring. 1 credit. Conducted in Italian. Fall: T. Campbell and M. Migiel; spring: C. Campbell, M. Migiel and S. Stewart-Steinberg.
Students enrolled in an Italian literature or culture course that is conducted in English (e.g., ITALL 220, 224, 351, 369, 390, 396, 427, 456, and 457) may opt to take this one-credit Practicum in Italian, provided that they have already attained proficiency in the language. Students in the Practicum spend one class hour per week discussing selected issues or texts in Italian; they also complete an appropriate amount of written work in Italian.

ITALL 351 Machiavelli (also HIST 351) # (III or IV)
Fall. 4 credits. Conducted in English. J. Najemy.
For description, see HIST 351.

ITALL 369 History of Florence (also HIST 369) # (III or IV)
Spring. 4 credits. Conducted in English. J. Najemy.
For description, see HIST 369.

ITALL 389 Modern Italian Novel (IV)
Fall. 4 credits. Prerequisite: permission of instructor. Students who have taken ITALL 389 previously are permitted to re-take the course for credit, provided that the readings are different. Conducted in Italian. P. Swenson.
In this course we read novels by twentieth-century and contemporary novelists such as Ginzburg, Loy, Bassani, and P. Levi, and, in particular, we consider how the post-war modern novel explores the issues of history, time, memory and the relationship of the individual to the family, political engagement, and ethical responsibility.

ITALL 390 Fascist Bodies, Fascist Films (also ITALL 690) (IV)
Fall. 4 credits. Conducted in English.
T. Campbell.
We examine the depiction of fascism in films by Benigni, Bertolucci, Canevari, Cavani, de Sica, Pasolini, and Visconti.

ITALL 396 Italian Feminisms (also ITALL 696) (IV)
Spring. 4 credits. Conducted in Italian.
M. Migiel.
An introduction to the central issues in Italian feminist activity from the 1970s to the present. In addition to introducing students to the work of Italian feminist writers (principal among them Dacia Maraini) and the work of Italian feminist philosophers (Luisa Muraro, Adriana Cavarero, and other members of the group Diotima), the seminar also explores the Italian political debates about issues that affect women (including abortion, divorce, harassment, and violence against women).

ITALL 419–420 Special Topics in Italian Literature
419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor.
T. Campbell and M. Migiel.
Guided independent study of specific topics.

ITALL 427 Dante: The Divine Comedy (also ITALL 627) # (IV)
Spring. 4 credits. Conducted in English.
W. Wetherbee.
A close reading of selected cantos from the three sections of Dante's *Divine Comedy*. Readings and class discussion are in English, but there is an opportunity for students with some Italian to read portions of the poem in the original.

ITALL 429–430 Honors in Italian Literature
429, fall; 430, spring. 8 credits year-long course. R, fall; letter grade, spring. Limited to seniors. Prerequisite: permission of instructor. M. Migiel.

ITALL 456 Opera, History, Politics, and Gender (also HIST 456, WOMNS 454, COML 459, S HUM 459, MUSIC 474) (III or IV)
Spring. 4 credits. Conducted in English.
M. Steinberg and S. Stewart-Steinberg.
For description, see HIST 456.

ITALL 457 Italian Renaissance Epic (also ITALL 657) # (IV)
Fall. 4 credits. Conducted in English.
M. Migiel.
This seminar focuses on the great Italian Renaissance epics—Ludovico Ariosto's *Orlando furioso* (1532) and Torquato Tasso's *Gerusalemme Liberata* (1581). We study how these poems used the situation of a war against non-Christian others in order to address questions that remain important to us today: Who am I? To what extent is my identity determined by the things I possess? By my (gendered) body? By the attributes others recognize in me? What place do love and desire have in the world of honor and moral excellence? How respectful should we be of difference, particularly if we aim to establish a unified community? What values do we wish to espouse and transmit to future generations? And finally: What role does writing have in this cultural operation?

ITALL 465 The Modern Post-Postmodernism in Italy (also ITALL 665) (IV)
Spring. 4 credits. Conducted in Italian.
T. Campbell.
Against the backdrop of recent, far-reaching changes in technology, we examine the movement that has come to be known as post modernism. The following issues are taken up in the context of mainly, though not exclusively, Italian literature: conceptions of temporality; the mass media; simulacra and dystopia; post-hermeneutics; and urban landscapes. Works by Calvino, Eco, Jameson, Kluge, Primo Levi, Lyotard, Manganelli, Pynchon, Tabucchi, and Vattimo are read.

ITALL 468 Love and Sex in the Italian Renaissance (also HIST 468) # (III or IV)
Spring. 4 credits. Conducted in English.
J. Najemy.
For description, see HIST 468.

ITALL 627 Dante: The Divine Comedy (also ITALL 427)
Spring. 4 credits. Conducted in English.
W. Wetherbee.
For description, see ITALL 427.

ITALL 639–640 Special Topics in Italian Literature
639, fall; 640, spring. 4 credits each term.
T. Campbell and M. Migiel.

ITALL 665 The Modern Post-Postmodernism in Italy
Spring. 4 credits. Conducted in Italian.
T. Campbell.
For description, see ITALL 465.

ITALL 657 Italian Renaissance Epic (also ITALL 457)
Fall. 4 credits. Conducted in English.
M. Migiel.
For description, see ITALL 457.

ITALL 690 Fascist Bodies, Fascist Films (also ITALL 390)
Fall. 4 credits. Conducted in English.
T. Campbell.
For description, see ITALL 390.

ITALL 696 Italian Feminisms (also ITALL 396)
4 credits. Conducted in Italian. M. Migiel.
For description, see ITALL 396.

Portuguese

Faculty: J. Oliveira

PORT 121–122 Elementary Portuguese
121, fall; 122, spring. 4 credits each term. Intended for beginners. Students may attain qualification upon completion of 122 by achieving a satisfactory score on a special examination. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. J. Oliveira.
A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

PORT 209@–219 Intermediate Composition and Conversation (formerly PORT 203–204)
209, fall; 219, spring. 3 credits each term. *PORT 209 provides language proficiency.* Prerequisites: for PORT 209, PORT 122 or permission of instructor; for PORT 219, PORT 209 or permission of instructor. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. J. Oliveira.
Conversational grammar review with special attention to pronunciation and the development of accurate and idiomatic oral expression. Includes readings in contemporary Portuguese and Brazilian prose and writing practice.

PORT 319 Readings in Luso-Brazilian Literature @ # (IV)
Fall or spring. 4 credits. Prerequisite: PORT 219 (formerly PORT 204) and permission of instructor. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U.
J. Oliveira.
This course takes a broad approach to selective writings of representative Luso-Brazilian authors from the nineteenth century to the present: Machado de Assis, Eca de Queriroz, Aluisio de Azevedo, Graciliano Ramos, Fernando Pesoa, Jorge Amado, and others.

Quechua

Faculty: L. Morató-Peña.

QUECH 121–122 Elementary Quechua (formerly QUECH 131–132)
121, fall; 122, spring. 4 credits each term. Prerequisite: qualification in Spanish. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. L. Morató-Peña.
A beginning conversation course in the Cuzco dialect of Quechua.

QUECH 136 Quechua Writing Lab
Spring. 1 credit. Prerequisite: concurrent enrollment in QUECH 122 or instructor's approval. Letter grade only.
L. Morató-Peña.
Computer-assisted drill and writing instruction in elementary Quechua.

QUECH 209–219 Continuing Quechua
209, fall; 219, spring. 3 credits each term. Prerequisites: for QUECH 209: QUECH 122 or equivalent; for QUECH 219: QUECH 209 or equivalent. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. L. Morató-Peña.
An intermediate conversation and reading course. Study of the Huarochiri manuscript.

QUECH 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor.
L. Morató-Peña.
Taught on a specialized basis to address particular student needs. Times arranged with instructor.

Romance Studies

ROM S 321 History of the Romance Languages (also LING 321) (III)
Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance Language. C. Rosen.
Course topics include: popular Latin; pan-Romance trends in phonology, morphology, syntax, and the lexicon; regional divergence; non-Latin influences; Medieval diglossia; and emergence of Romance standards.

ROM S 322 History of the Romance Languages (also LING 322) (III)
Spring. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance Language. C. Rosen.
Covers the history of French, Italian, and Spanish from 850 to 1250 A. D. Includes

analysis of texts and an overview of other languages to present day. Considers elements of dialectology.

ROM S 433 The Lesser-Known Romance Languages (also LING 433) (III)
Fall. 4 credits. Prerequisite: LING 101 or equivalent and qualification in any romance language. C. Rosen.
The course surveys three or four Romance languages or dialects, examining their sound systems, grammars, and historical evolution from Latin. Includes some native speaker demonstrations. Readings represent both the modern languages and their earliest attested stages. Topic for fall 2001: Catalan, Romanian, a Northern Italian dialect, and a Rheto-Romance language.

Spanish

S. Amigo-Silvestre, C. Morón Arroyo, L. Carrillo, D. Castillo, E. Dozier (associate chair of language), M. A. Garcés, M. García-Calderón (visiting), Z. Iguina, C. Lawless, N. Maldonado-Méndez, L. Morató-Peña, J. E. Paz-Soldán, J. Piedra, M. K. Redmond, J. R. Resina, M. Rice, J. Routier-Pucci, E. Sánchez-Blake, A. Stratakos-Tió, M. Stycos, F. Unzueta (visiting), M. Valdez (visiting)
Emeritus: J. W. Kronik.

The Major

The Spanish major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in literary and linguistic analysis. Satisfactory completion of the major should enable students to meet language and literature requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, and to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake preprofessional training for graduate study in law or medicine. Students interested in a Spanish major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult Professor Ciriaco Arroyo, cma6@cornell.edu, the Director of Undergraduate Studies, in Morrill Hall 306, who will admit them to the major, and assign them an adviser from the Spanish faculty. Spanish majors will then work out a plan of study in consultation with their advisers. Spanish majors have great flexibility in devising their programs of study and areas of concentration. Previous training and interests as well as vocational goals will be taken into account when the student's program of courses is determined.

Students interested in majoring in Spanish linguistics should contact the Department of Linguistics.

All tracks include the following core:

SPANL 218 and SPANR 219 (or equivalent) are prerequisite to entering the major in Spanish. All majors will normally include the following core courses in their programs:

1. SPANR 311 and 312.
2. SPANL 316, 318, and 319 (not necessarily in that order)

Spanish Literature Option

The Spanish Literature Option normally includes at least 20 credits of Spanish literature beyond the core courses. Literature majors are strongly urged to include in their programs courses in all the major periods of Hispanic literature.

Spanish Language Option

A combination of literature and linguistics.

Area Studies Option (Spanish, Latin American, or U.S. Latino Studies)

At least 20 credits of courses at the 300 level and above in any of these focus areas beyond the core, all courses to be approved through consultation with the major adviser. Courses should reflect interdisciplinary interests in the area and may include up to three other academic fields of interest. For example, a student interested in Latin American studies may want to include courses on such topics as Latin American history, government, rural sociology, and economics. Students who want to specialize in U.S. Latino issues may want to include such topics as sociology of Latinos, Latino history, and Latino medical issues in addition to further studies in literature. Students planning on spending a year or semester in Seville (but not exclusively such students) frequently plan their coursework to emphasize Spanish history, art, political economy, and other related field courses, such as courses on Islam and Moorish Spain.

Students are encouraged to enrich the major program by including a variety of courses from related fields or by combining Spanish with related fields such as History, Philosophy, Sociology, Anthropology, Art, Music, Classics, English, Comparative Literature, and other foreign languages and literatures. The interdepartmental programs in Latin American Studies and Latino Studies sponsor relevant courses in a variety of areas.

The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

Study Abroad in Spain. Cornell, the University of Michigan, and the University of Pennsylvania cosponsor an academic year in Spain program. Students enrolled in this program spend the first month before the fall semester begins in an orientation session at the University of Seville, where they take coursework in Spanish language and culture and take advantage of special lectures and field trips in Andalucia. The College of Arts and Sciences awards three credits for orientation. Once the semester begins, students enroll in regular classes the University of Seville and at the program's center facility. Center courses are designed for the program and include a seminar offered by the resident director, from the faculty of either Cornell, Michigan, or Pennsylvania. Other center courses typically include history of art, history of the Mediterranean region, a literature course, and Spanish composition and syntax. In Seville, students live in private homes and a rich array of cultural activities and excursions are organized every semester.

Applicants are expected to have at least completed SPANR 219 prior to departure. Students are strongly encouraged to study abroad for the entire year rather than one semester. Students interested in the study abroad program should visit Cornell Abroad in 474 Uris and take a look at the Cornell Abroad web site: www.einaudi.cornell.edu/cuabroad.

Study Abroad in Bolivia: The Summer program in Cochabamba, Bolivia is sponsored by the Latin American Studies Program and accepts both undergraduate and graduate students. Students live with Bolivian families and normally take two courses with Cornell faculty who participate in this program. In addition to course work in Bolivian culture, politics, and social movements, the program features the opportunity to do intensive study in Quechua, the native language spoken by many Bolivians, as well as Spanish, and to participate in research and internships with grass-roots communities, government offices, and businesses.

Honors. Honors in Spanish may be achieved by superior students who want to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty to supervise their work and direct the writing of their honors essay (see SPANL 429–430).

Language

Enrollment in a language course is conditional upon the student's eligibility for the particular level and on attendance of the first scheduled class session. Further, a student who fails to attend the first three days of class will be automatically dropped from the course in order to accommodate those on the waiting lists.

All Spanish language courses are offered by the Department of Romance Studies, and Spanish linguistics courses are offered by the Department of Linguistics.

SPANR 112 Elementary Spanish: Review and Continuation
Fall. 4 credits. Prerequisite: LPS score 37–44. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. M. Rice and staff.
This course is designed for students who have taken some Spanish and who have a placement score of 37–44 or SAT II 370–450. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken SPANR 121 may enroll for this course. As part of the final exam, students take the LPS and, according to their score, may place into SPANR 123 (score below 56) or receive qualification (56 or above), and placement into the 200-level courses.

SPANR 121–122 Elementary Spanish
121, fall and summer; 122, spring. 4 credits each term. Prerequisite: for SPANR 122, SPANR 121. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: M. K. Redmond, S. Amigo-Silvestre and staff; spring: M. K. Redmond and staff.
This course is intended for students with no experience in Spanish. (Students who have previously studied 2 or more years of Spanish are not eligible for 121 unless they have an LPS score lower than 37 or SAT II lower than 370.) The course provides a thorough grounding in all language skills. Language practice in small groups. Lectures cover grammar, reading, and cultural information. Evening prelims.

SPANR 123 Continuing Spanish
Fall, spring, or summer. 4 credits. ***Provides language qualification.*** Prerequisite: SPANR 112, SPANR 122, or an LPS score 45–55 or SAT II 460–580. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: N. Maldonado-Méndez, C. Lawless, L. Morató-Peña and staff; spring: N. Maldonado-Méndez, L. Morató-Peña, E. Sánchez-Blake, and staff; summer: staff.
An all-skills course which requires daily preparation before class and active student participation in class. Includes researching cultural topics of the student's choice, oral presentations, grammar review, audio tapes, video, journal and essay writing, speaking in small groups, and authentic readings. Satisfactory completion of SPANR 123 fulfills the qualification portion of the language requirement. After this course, the student may take 207 (formerly 213) or 209 (formerly 203).

SPANR 200 Spanish for English/Spanish Bilinguals (also LSP 202)
Fall or spring. 3 credits. ***Provides language proficiency.*** Prerequisite: LPS score 56 or higher, SAT II 590 or higher, CASE placement, or permission of instructor. N. Maldonado-Méndez.
A course designed to expand bilingual students' knowledge of Spanish by providing them with ample opportunities to develop and improve each of the basic language skills. Not available to students who have taken SPANR 207 or 209.

SPANR 207 Intermediate Spanish for the Medical and Health Professions
Fall or spring. 3 credits. ***Provides language proficiency.*** Prerequisite: qualification in Spanish (SPANR 123, LPS score 56–64, or SAT II 590–680) or permission of instructor. Students who have taken SPANR 209 or 200 should speak to the instructor. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. A. Stratakos-Tió.
Conversational grammar review, with dialogues, debates, compositions, and readings on health-related themes. Special attention is given to relevant cultural differences.

SPANR 209 Intermediate Composition and Conversation I
Fall or spring. 3 credits. ***Provides language proficiency.*** Prerequisite: SPANR 123, LPS score 56–64, or SAT II 590–680. Not available to students who have taken SPANR 207. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: J. Routier-Pucci, Z. Iguina, and staff; spring: J. Routier-Pucci, S. Amigo-Silvestre and staff.
Conversational grammar review with special attention to the development of accurate and idiomatic oral and written expression. Includes composition-writing, the reading of Spanish and Spanish American short stories and poetry, and the viewing of several films.

SPANR 219 Intermediate Composition and Conversation II
Fall or spring. 3 credits. Prerequisite: SPANR 207 or 209, or CASE Q+, or permission of instructor. This course, or its equivalent, is required for admission to the Cornell Abroad program. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Fall: E. Dozier, S. Amigo-Silvestre and staff: spring: E. Dozier, Z. Iguina, and C. Lawless.
An advanced-intermediate course designed for students who want to go beyond the basic language requirement, and further broaden their knowledge of the language and related cultures, as well as improve their comprehension and communication skills. This course guides students to take greater command of their own language learning process to optimize their continued progress. Includes a strategic focus on specific problems in listening, and reading comprehension, and in accurate writing and speaking.

SPANR 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Times arranged with instructor. Staff.
Taught on a specialized basis to address particular student needs.

SPANR 310 Advanced Conversation and Pronunciation
Spring. 3 credits. Prerequisite: SPANR 219 or equivalent. Letter grades assigned unless student receives exceptional permission from the course coordinator for S-U. Z. Iguina.
A conversation course with intensive oral practice obtained through the production of video programs. Study of the fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. Weekly pronunciation labs.

SPANR 311 Advanced Composition and Conversation I
Fall or spring. 4 credits. Prerequisite: SPANR 218 or 219 or CASE Q++ or equivalent. Fall: M. Stycos and staff; spring: staff.
Advanced language skills, developed through reading, grammar review, and intensive practice in speaking, writing, and translation. Analysis of present-day Spanish usage in a wide variety of oral and written texts.

SPANR 312 Advanced Composition and Conversation II
Fall or spring. 4 credits. Prerequisite: SPANR 311 or permission of instructor. Fall: M. Stycos; spring: staff.
Readings and class discussion focus on the stylistic analysis of modern texts. Increased emphasis, through weekly essays, on students' development of an effective Spanish prose style.

SPANR 366 Spanish in the United States (also LING 366 and LSP 366)
Fall. 4 credits. Prerequisite: some knowledge of Spanish. M. Suñer.
Examination of major Spanish dialects in the United States from a linguistic perspective. Topics include: contrast with the standard language; borrowing, interference, and code switching; syntactic, morphological, and phonological characteristics; and sex-related phenomena.

SPANR 630 Spanish for Reading
Spring. 3 credits. Limited to graduate students. J. Routier-Pucci.
Designed for those with little or no background in Spanish and little exposure to written Spanish, this course primarily aims to develop skill in reading Spanish. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. The types of texts covered depend on the interests of the students in the course.

Literature

SPANL 218 Introduction to Hispanic Literature @ (IV)
Fall or spring. 3 credits. Prerequisite: SPANR 200, or 207, or 209 or CASE Q+, or permission of coordinator. The course is divided into small sections and is taught mainly in Spanish. The literature course that normally follows SPANL 218 is either 316 or 318.) C. Lawless and staff.
An intermediate course designed to improve reading, writing, speaking, and comprehension skills in Spanish through the reading and discussion of contemporary literary works of various genres (narrative prose, drama, poetry) from Spain and Spanish America. Emphasis is placed on the development of fluency in reading and of critical and analytical abilities. The cultural, sociological, and aesthetic implications of texts by authors such as Borges, Cortázar, Fuentes, García Márquez, García Lorca, and Cela are considered.

SPANL 246 Contemporary Narratives by Latina Writers (also LSP 246 and WOMNS 246) (IV)
Fall. 3 credits. Conducted in English. L. Carrillo.
This course offers a survey of narratives, including novels, short fiction, essays, political/feminist manifestoes and memoirs by representative Latina writers of various Latino ethnic groups in the United States and the Americas including, Chicana, Chilean, Cuban, Dominican, and Puerto Rican, among others. We investigate the parallel development of a Latina perspective on personal, social and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960's through to contemporary feminist activism and women of color movements. We investigate these works as artistic attempts to deal with issues of culture, language and bilingualism, family, gender, sexuality, and domesticity among others. We account for regional distinctions and contributions. Readings include works by Julia Alvarez, Elena Castedo, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Ana Lydia Vega, and others.

SPANL 301 Hispanic Theater Production
Fall or spring. 1–2 credits. E. Sánchez-Blake.
Students involved in Hispanic Theater Production develop a specific dramatic text for full-scale production. The course involves selection of an appropriate text, close analysis of the literary aspects of the play, and group evaluation of its representational value and effectiveness. All students signing up for the course are involved in some aspect of production of the play, and write a final paper as a course requirement. Credit is variable depending upon the student's role in play production: a minimum of 50 hours of work is required for one credit; a maximum of two credits will be awarded for 100 hours or more of work.

SPANL 316 Readings in Modern Spanish Literature (IV)
Fall or spring. 4 credits. Conducted in Spanish. Prerequisite: SPANR 218, 219 or CASE Q++, or permission of instructor. Fall: C. Arroyo and M. Stycos; spring:

J. Resina and C. Lawless. Readings and discussion of representative texts from Spain from the Romantic period to the present. Bécquer, Galdós, Unamuno, García Lorca, Cela, and others.

SPANL 318 Readings in Modern Spanish American Literature (IV)

Fall or spring. 4 credits. Conducted in Spanish. Prerequisite: SPANR 218, 219, or CASE Q++, or permission of instructor. Fall: M. García-Calderón and E. Sánchez-Blake; spring, E. Sánchez-Blake and J. Paz-Soldán.

Readings and discussion of representative texts of the nineteenth and twentieth centuries from various regions of Spanish America. Among the authors considered are Darío, Borges, Cortázar, García Márquez, and Valenzuela.

Note: The prerequisite for the following courses, unless otherwise indicated, is SPANL 316 and 318 or permission of instructor.

SPANL 319 Renaissance Hispanisms # (IV)

Fall or spring. 4 credits. Conducted in Spanish. Prerequisite: SPANL 316 and SPANL 318. SPANR 312 is recommended. Fall, M. A. Garcés; spring, C. Arroyo.

In Spain, the cultural revolution known as the Renaissance produced a glittering array of artistic works—both in literature and the arts—which gave rise to the term Golden Age. There was a "darker side" to the Renaissance, however, which juxtaposed the conquest of America with the establishment of the Inquisition and the expulsion of the Jews. The tale of these relations of exclusion and fascination with the *other* is recapitulated by the literature of the period. Readings may be drawn from Columbus, Cabeza de Vaca, *Lazarillo de Tormes*, Garcilaso de la Vega, San Juan de la Cruz, Cervantes, Maria de Zayas, Quevedo, Lope de Vega, and Calderón, among others.

SPANL 320 Perspectives on Latin America (also LSP 301) @ (IV)

Spring. 3 credits. Conducted in English. M. García-Calderón.

This interdisciplinary, co-taught course is offered every spring through the Latin American Program. It is highly recommended for Latin American Studies Concentrators. Topics will vary by semester, but readings always focus on current research in various disciplines and regions of Latin America. The range of issues addressed include the economic, social, cultural, and political trends and transitions in the area. In the weekly meetings, instructors and guest lecturers facilitate student discussions. Students taking the course are required to participate in all class discussions and write one research paper in their chosen focus area.

SPANL 339 Islamic Spain: Culture and Society (also NES 339, JWST 339, COML 334, RELST 334, and SPANL 699) @ # (IV)

Fall. 3 credits. R. Brann.

For description, see NES 339.

SPANL 346 Hispanic Caribbean Culture and Literature @ (IV)

Fall. 4 credits. Conducted in Spanish. M. García-Calderón.

An introduction to the history, culture and literature of the Hispanic Caribbean, with major emphasis on Cuba, Puerto Rico, and the Dominican Republic. Analysis of the cultural and social peculiarities of the Caribbean area. Includes discourses of national identity and the emergence of alternative subjectivities in the literatures of the region. Topics include: racial, generic and sexual otherness; hybridity and translocality in the context of contemporary globalization; and postmodernity in the region. Authors such as Martí, Hostos, Ortíz, Guillén, Palés Matos, Carpentier, Lezama Lima, Piéra, Arenas, Sánchez, Ferré, Valdés, Estévez, Vergés, Veloz Maggiolo, Hernández, Díaz, Ramos Otero, Rodríguez Juliá, Vega, García Ramis, and Santos-Febres are included. Supplemental theoretical readings to include such authors as Ortiz, Cornejo Polar, Benítez Rojo, García Canclini, Ramos, Sommer, Bhadha, Butler.

SPANL 374 Caribbean Popular Culture (IV)

Spring. 4 credits. Conducted in Spanish. M. García-Calderón.

Is the category of "popular" taken for granted? What do we in fact mean when we describe a particular clothing style, film, television show, or music video as "popular"? Can works of art be "popular", or is this expression reserved for objects, practices, and images associated with the common and everyday? Do distinctions persist between high and low culture, or is every aspect of culture commercial? These questions spark the major tensions of this course. We investigate the concept of the popular historically as well as critically through the cultural representations of the Hispanic Caribbean. Our exploration into these cultural representations seeks to interrogate how popular culture has been studied, theorized, and defined within academic discourses to help locate the function of the popular within contemporary culture. Readings include theoretical texts by Benjamin, Adorno, Eco, Bennet, García Canclini, Martín Barbero, and others. Primary texts by Cabrera Infante, Ferré, Lugo Filippi, Vega Montero, Paz, Rodríguez Juliá, Sánchez, Vergés, Padura, Ramos Otero, and Valdés are discussed.

SPANL 399 Spanish Film (IV)

Fall. 4 credits. Conducted in Spanish. Prerequisite: SPANL 218 or 311 or permission of instructor. Screenings to be announced. J. R. Resina.

Examines the evolution of Spanish cinema since Franco's death in 1975, both from a historical and a cinematic perspective. The focus is on documentary, fictional and allegorical reconstruction of the past, and on the images of the new democratic society which illustrate a postmodern aesthetic. Selected films include works by directors who started their careers under the dictatorship (Saura, Erice, Borau) and by members of the younger generation, such as Almodóvar.

SPANL 403 After Immigration (also HUM S 403 and LSP 403) (IV)

Spring. 4 credits. D. Castillo.

Beginning with a close reading of Michael Jones-Correa's seminal study of Latinos in New York, *Between Two Nations*, we focus class discussion on recent Latin American immigration to the United States through two complementary perspectives and meditations on the immigrant experience: that of the individuals who have arrived in the US, and that of individuals who have chosen to remain in the countries of origin. The class covers films like *Nueva Yol* and *Jardin de Edén*, Latin American authors like Carlos Fuentes, Ana Lydia Vega, and Ariel Dorfman, and US Latinos like Julia Alvarez, Francisco Goldman, and Cristina Garcia. Students are encouraged to do individually-tailored research projects that may include autobiographical or ethnographic elements as well as literary analysis and theoretical inquiries.

SPANL 419–420 Special Topics in Hispanic Literature

419, fall; 420, spring. 2–4 credits each term. Prerequisite: permission of instructor. Staff.

Guided independent study of specific topics. For undergraduates interested in special problems not covered in courses.

SPANL 425 Prehispanic Mexico in Twentieth Century Mexican Literature (IV)

Spring. 4 credits. M. Valdes.

This course will examine the extensive research on prehispanic Mexico carried out by Miguel León Portilla and others in the last forty years and consider its incorporation into the work of Octavio Paz, Carlos Pellicer, Carlos Fuentes, Juan Rulfo and José Emilo Pacheco.

SPANL 429–430 Honors Work in Hispanic Literature

429, fall; 430, spring. 8 credits. Year-long course, R grade fall semester, letter grade spring semester. Limited to seniors with a superior academic record. Prerequisite: permission of instructor. C. Arroyo and staff.

SPANL 440 Medieval Spanish Literature # (IV)

Fall. 4 credits. Conducted in Spanish. C. Arroyo.

Readings from *Mío Cid* to *Celestina*. Emphasis is on concepts (learned vs. popular, topos vs. personalism, pro-anti-feminism, courtly love) in European perspective. Considers cultural distance and "assimilation" through reading.

SPANL 447 The Spanish American Novel: Origins and Transformations (IV)

Fall. 4 credits. F. Unzueta.

This course presents a (critical) survey of the first 150 years of Spanish American novels (c 1820–1950), exploring its origins and multiple transformations. It considers different theories of the novel, the major literary movements of the era (Neoclassicism, Romanticism, Realism, modernismo, the novela de la tierra and the New Novel), and documents containing a Spanish American poetics of the novel. Some other critical problems addressed are: genre theory, periodization and literary histories, the constitution of subjects, and the incorporation of history and "reality" in the novel.

SPANL 484 Nationalism and Literature (also COML 484) (IV)

Spring. 4 credits. Conducted in English. Prerequisite: demonstrated reading ability in Spanish. J. R. Resina.

What are nations? How did they form in history? What is their role in the present? How do they affect the cultural field and the formation of literary canons? What is the difference between the nation-state and stateless nations? How do they relate and sometimes clash, in the cultural arena? These and related questions are the focus of this course, in which theoretical readings are supplemented by literary texts, primarily but not exclusively from the Spanish literary tradition.

SPANL 639–640 Special Topics in Hispanic Literature
639, fall; 640, spring. 2–4 credits each term. Staff.

SPANL 645 The Concept of Self in the Nineteenth- and Twentieth-century Spanish Novel
Spring. 4 credits. M. Valdes.
This course examines the development in Spain of a dialectic approach to self-identity and communal identity beginning with the Catalan intellectual Santiago Ramon y Cajal and including the most important thinkers of the early twentieth century especially Miguel de Unamuno and Jose Ortega y Gasset. The Spanish perspective on the self will be outlined in response to Paul Ricoeur's seminal book "Oneself as Another" in order to set up the hermeneutic framework form commentary on major Spanish narrative texts of the late nineteenth century and early twentieth century including works of Leopoldo Alas, Benito Peerez Galdós, Emilia Pardo Bazán, José Martinez Ruíz and Miguel de Unamuno.

SPANL 651 Spanish Golden Age Drama
Fall. 4 credits. Conducted in Spanish. M. A. Garcés.
This seminar explores the rise and reign of Spain's remarkable national theater in the sixteenth and seventeenth centuries, from the birth of the drama to the emergence of the *comedia*, which produced truly popular great art, to the highly intellectual and artfully crafted drama of Calderón. Summarizing the most recent theoretical approaches to Golden Age Spanish theater, such as genre and performance studies, reception theory, feminist and psychoanalytic analyses, among others, we study the Spanish *corrales* and their audiences, *comedia* texts, captivity plays, and dramatic productions on the New World in works by Cervantes, Lope de Vega, Tirso de Molina, Ruiz de Alarcón, María de Zayas, and Calderón.

SPANL 653 Don Quijote: And the Theory of Reading a Classic
Spring. 4 credits. C. Arroyo.
Explanation of the text; plot and characterization: Cervantes' originality and the literary theory of his time: Castelvetro, Pinciano, etc. Basic questions on the culture of the period such as Cervantes' Erasmianism and other texts; Don Quijote in the development of the European novel, and the critical reception of the text (Calderon, Fielding, etc.). Finally, the question of value: the idea of a literary masterpiece in the aesthetic and humanistic sense.

SPANL 670 Constituting National Subjects
Fall. 4 credits. F. Unzueta.
This course explores the constitution of "national subjects" in a range of 19th-Century Spanish American discourses, including novels, autobiographies, essays, and cuadros de costumbres. It will trace some of the transformations of hombres de bien into abstract citizens and a range of socially differentiated national subjects. We will seek theoretical articulations of the notion of the "subject," and study how subjects insert themselves in, or resist, dominant discourses, ideologies and hegemonic projects.

SPANL 698 The Latin American "Boom"
Spring. 4 credits. Conducted in Spanish. J. Paz-Soldán.
This course examines the writers of the "Boom", paying close attention to their experimentation with narrative form and their bold ambition to write "la novela total". We read essays and novels by Garcia Marquez, Vargas Llosa, Cortazar, Cabrera Infante, and Fuentes. Due to the length of the novels, expect intensive reading.

RUSSIAN

N. Pollak, chair (226F Morrill Hall); P. Carden, director of undergraduate studies [literature], (226B Morrill Hall); S. Paperno, director of Russian Language Program (226E Morrill Hall); 255–8350; E. W. Browne, L. Paperno, S. Paperno, S. Senderovich, G. Shapiro, V. Tsimberov

The Russian Major

Russian majors study Russian language, literature, and linguistics, and emphasize their specific interests. It is desirable, although not necessary, for prospective majors to complete RUSSA 121–122, 201–202, and 203–204 as freshmen and sophomores, since these courses are prerequisites to most of the junior and senior courses that count toward the major. Students may be admitted to the major upon satisfactory completion of RUSSA 122 or the equivalent. Students who elect to major in Russian should consult Professor Carden as soon as possible. For a major in Russian, students are required to complete (1) RUSSA 301–302 or 303–304 or the equivalent, and (2) 18 credits from 300- and 400-level literature and linguistics courses, of which 12 credits must be in literature in the original Russian.

Certain courses may, with the permission of the instructor, be taken for one additional hour's credit. Such courses involve a one-hour section each week with work in the Russian language. Students may count two one-hour credits towards the 12 hours of Russian literature in the original language required for the major.

Study Abroad

Cornell is an affiliated institution with the Council on International Educational Exchange program for Russian language study at St. Petersburg State University. Cornell students also frequently attend the American Council of Teachers of Russian program in Moscow and other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from W. Browne, in the Department of Linguistics.

Honors. Students taking honors in Russian undertake individual reading and research and write an honors essay. Students planning to take honors should consult Professor Carden in their junior year.

Fees. Depending on the course, a small fee may be charged for photocopied texts for course work.

[Freshman writing seminar requirement. The following course satisfies the freshman writing seminar requirement: Russian 104. Not offered 2001–2002.]

Russian Language

For details on all Russian language courses, see: http://russian.dmll.cornell.edu.

RUSSA 103–104 Conversation Practice
103, fall; 104, spring. 2 credits each term. Must enroll in one section of 103 and one section of 121 in the fall; and one section of 104 and one section of 122 in the spring. L. Paperno.
A highly interactive conversation class. Multimedia materials on our web site must be used on computers in the language lab or on the students' own computers.

RUSSA 121–122 Elementary Russian through Film
121, fall or summer; 122, spring or summer. 4 credits each term. May be taken alone and qualification will be achieved with satisfactory completion of 121–122–123; or may be taken concurrently with 103–104 and qualification will be achieved at completion of 122–104. L. Paperno, S. Paperno, V. Tsimberov.
A thorough grounding is given in all the language skills: listening, speaking, reading, and writing. Course materials include clips from original Russian films and TV programs.

RUSSA 123 Continuing Russian
Fall. 4 credits. ***Provides language qualification***. Limited to students who have previously studied Russian or been placed by department. Satisfactory completion of RUSSA 123 fulfills the qualification portion of the language requirements. L. Paperno, S. Paperno, V. Tsimberov.
A course designed to prepare students for study at the 200 level. Authentic Russian materials are used: TV, books, etc.

RUSSA 203–204 Intermediate Composition and Conversation
203, fall or summer; 204, spring or summer. 3 credits each term. ***Provides language proficiency***. Prerequisites: for RUSSA 203, qualification in Russian (RUSSA 123 or placement by department); for RUSSA 204, RUSSA 203 or equivalent. L. Paperno, S. Paperno, V. Tsimberov.
Guided conversation, composition, reading, pronunciation, and grammar review, emphasizing the development of accurate and idiomatic expression in the language. Course materials include CD-ROMS with clips from an original Russian feature film and work with Russian web sites.

RUSSA 205–206 Reading Russian Press
205, fall; 206, spring. 2 credits each term. ***RUSSA 206 provides language proficiency***. Prerequisite: qualification in Russian (RUSSA 123 or placement by department). Both semesters must be taken in order to satisfy the proficiency level for the language requirement. This course cannot be used to satisfy the humanities requirement. S. Paperno.
In this course students read unabridged articles on a variety of topics from current Russian periodicals and web pages.

Note: Students placed in the 200-level courses also have the option of taking courses in introductory literature; see separate listings under RUSSL 201 and 202 for descriptions of these courses, any of which may be taken concurrently with the 203–204 and 205–206 language courses described above.

RUSSA 300 Directed Individual Studies
Fall or spring. 1 credit. Prerequisite: permission of instructor. Times arranged with instructor. Staff.

Taught on a specialized basis to address particular student needs usually related to a project or interests not addressed in other Russian courses.

RUSSA 303–304 Advanced Composition and Conversation
303, fall; 304, spring. 4 credits each term. Prerequisites: for RUSSA 303, RUSSA 204 or equivalent; for RUSSA 304, RUSSA 303 or equivalent. L. Paperno, S. Paperno, V. Tsimberov.
Course involves writing, reading, and conversation. Involves viewing and reading authentic language materials such as current Russian films (feature and documentary), newspapers, TV programs, and Russian web sites.

RUSSA 305–306 Directed Study in Writing and Grammar
305, fall; 306, spring. 2 credits each term. Prerequisite: placement by the department. Staff.
This course is intended for students with special needs (e.g., children of Russian immigrants who speak Russian at home but have not learned to read or write grammatically correct Russian) that cannot be met by any other Russian course.

RUSSA 309–310 Advanced Reading
309, fall; 310, spring. 4 credits each term. Prerequisites: for RUSSA 309, RUSSA 204; for RUSSA 310, RUSSA 309 or equivalent. L. Paperno, S. Paperno, V. Tsimberov.
The purpose of the course is to teach advanced reading skills. The weekly reading assignment is 20–40 pages of unabridged Russian prose, fiction or non-fiction. The discussion of the reading is conducted entirely in Russian and is centered around the content of the assigned selection. When possible, a special section for native speakers of Russian is taught, with larger reading assignments—up to 130 pages per week. This course can *not* be used to satisfy the Humanities requirement.

[RUSSA 401–402 History of the Russian Language (also LING 417–418) (III)
401, fall; 402, spring. 4 credits each term. Prerequisites: for RUSSA 401, permission of instructor; for RUSSA 402, RUSSA 401 or equivalent. Offered alternate years. Not offered 2001–2002. W. Browne.
Course considers phonological, morphological, and syntactic developments from old Russian to modern Russian.]

[RUSSA 403–404 Linguistic Structure of Russian (also LING 443–444) (III)
403, fall; 404, spring. 4 credits each term. Prerequisites: for RUSSA 403, LING 101 and permission of instructor, for RUSSA 404, RUSSA 403 or equivalent. Offered alternate years. Not offered 2001–2002. W. Browne.
A synchronic analysis of the structure of modern Russian. RUSSA 403 deals primarily with phonology and 404 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.]

RUSSA 413–414 Advanced Conversation and Stylistics
413, fall; 414, spring. 2 credits each term. Prerequisites: for RUSSA 413, RUSSA 303–304 or the equivalent, for RUSSA 414, RUSSA 413 or equivalent. V. Tsimberov.
Discussion of authentic unabridged Russian texts and films (feature or documentary) in a variety of nonliterary styles and genres.

RUSSA 601 Old Church Slavonic (also LING 661)
Fall. 4 credits. Prerequisite: students should know a Slavic or classical Indo-European language. This course is prerequisite to RUSSA 602 and 651. Offered alternate years. W. Browne.
Grammar and reading of basic texts.

RUSSA 602 Old Russian Texts (also LING 662)
Spring. 4 credits. Prerequisite: RUSSA 601. Offered alternate years. W. Browne.
Grammatical analysis and close reading of Old Russian texts.

RUSSA 633–634 Russian for Russian Specialists
633, fall; 634, spring. 1–4 credits variable. Prerequisite: 4 years of college Russian. For graduate and advanced undergraduate students. L. Paperno, S. Paperno.
The course is designed for students who specialize in an area of Russian studies requiring fine active control of the language. Fine points of syntax, usage, and style are discussed.

RUSSA 651–[652] Comparative Slavic Linguistics (also LING 671–672)
651, fall; [652, spring]. 4 credits each term. Prerequisites: for RUSSA 651, RUSSA 601 taken previously or simultaneously or permission of instructor, for RUSSA 652, RUSSA 651 or permission of instructor. Offered alternate years. W. Browne.
Covers sounds and forms of the Slavic languages and of prehistoric common Slavic. Also covers main historical developments leading to the modern languages.

[RUSSA 700 Seminar in Slavic Linguistics
Offered according to demand. Variable credit. Not offered 2001–2002. Staff.
Topics chosen according to the interests of staff and students.]

Russian Literature

A variety of courses are offered in Russian Literature; some course readings are in English translation, others are in the original Russian, others use both. The connection between Russian history, society, and literature is particularly close, so instruction and discussion in class often include a variety of topics, such as culture and intellectual history, as well as literature. Several courses are interdisciplinary, cosponsored with the departments of History, Economics, Government, Comparative Literature, and others.

First-Year Writing Seminars: consult the John S. Knight Institute brochure for times, instructors, and descriptions.

RUSSL 201–202 Readings in Russian Literature (IV)
201, fall; 202, spring. 3 credits each term. Prerequisite: qualification in Russian. Open to freshmen. 201 is prerequisite to 202. Separate sections for native and nonnative speakers of Russian, each co-taught by language and literature faculty. For the native speaker section, proficiency in Russian is required. Proficiency is achieved by completing RUSSA 203 or passing a placement test that is always given a few days before the beginning of the semester and is usually announced on the web site (russian.dmll.cornell.edu) as well as in other ways. For the nonnative speaker section, qualification in Russian is required, and proficiency is achieved by successfully completing RUSSL 201 or 202. N. Pollak.
These courses, the first that students take after qualification in Russian, serve as an introduction to Russian literature in the original language. Readings in prose and verse may include works by Pushkin, Lermontov, Tiutchev, Fet, Tolstoy, Chekhov, and others.

[RUSSL 207 Themes from Russian Culture # (IV)
Spring. 3 credits. Not offered 2001–2002; next offered 2002–2003. G. Shapiro.
This course is based on lectures, discussions, and audio-visual presentations (slides, tapes, films). Included within its scope are various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought from its very beginning through the eighteenth century. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country which plays a major role in the world today. Russian culture is presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.]

[RUSSL 208 Themes from Russian Culture II (IV)
Spring. 3 credits. Not offered 2001–2002. G. Shapiro.
This course is based on lectures, discussions, and audiovisual presentations (slides, tapes, films). Included are various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought over the last 200 years. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country that plays a major role in the world today. Russian culture is presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.]

[RUSSL 279 The Russian Connection, 1830–1867 (also COM L 279) # (IV)
Fall. 3 credits. Not offered 2001–2002. P. Carden.
As Russian prose began to find its voice, it responded with enthusiasm to the European prose tradition. One line of development in the Russian novel began with Rousseau's division between the needs of individual growth, nourished by solitude and introspection, and the demands of society. Tolstoy's *War and Peace* can be read as a summary and a testing of the novelistic tradition that grew out of the work of Rousseau, in both European and Russian literature. We follow the line that leads to Tolstoy's multifaceted inquity, beginning with two short novels that set the tone for the introspective novel in the two traditions, Constant's *Adolphe* and Lermontov's *Hero of Our Time*. Looking at relevant excerpts from a range of European prose writers, Rousseau, Musset, Goethe, Stendhal, Thackeray among others, we think about the possibilities and limitations of the introspective novel as a form, especially as manifested in one of the monuments of the genre, *War and Peace*.]

[RUSSL 280 The Russian Connection, 1870–1960 (also COM L 280) (IV)
Spring. 3 credits. Not offered 2001–2002. P. Carden.

The European novel of introspection developed a second line of inquiry, in some respects counter to the tradition that grew out of the writings of Rousseau. Diderot's "Rameau's Nephew" may be taken as emblematic of a novel that goes beyond the search for self-understanding to focus on alientation, resentment, and rebellion. Dostoevsky was the inheritor of this line in the European prose tradition. His works, in particular *Notes from Underground* and *The Idiot*, are the focal point of our discussion. We follow up the tradition as Dostoevsky's influence returns the line to Europe in the works of writers like Camus and Sarraute.]

RUSSL 331 Introduction to Russian Poetry # (IV)
Fall. 4 credits. Prerequisites: RUSSL 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. S. Senderovich.
A survey of Russian poetry with primary emphasis on the analysis of individual poems by major poets.

[RUSSL 332 Russian Drama and Theatre (also THETR 322, COM L 322) # (IV)
Spring. 4 credits. Not offered 2001–2002; next offered 2002–2003. S. Senderovich.
Covers selected topics. Includes discussion of a number of the most representative Russian plays of the nineteenth and twentieth centuries in chronological order. Offers introductions to the historical period, cultural atmosphere, literary trends, and crucial moments in the history of the Russian theater. Among the works studied are Gogol's *Inspector General,* Ostrovsky's *The Storm*, and Chekhov's *The Cherry Orchard*. All readings are in English translation. Additional assignments in critical literature are made for graduate students.]

[RUSSL 333 Twentieth-Century Russian Poetry (IV)
Spring. 4 credits. Not offered 2001–2002. N. Pollak.
Course involves close readings of lyrics by major twentieth-century poets. All readings are in Russian. Geared towards undergraduates.]

RUSSL 334 The Russian Short Story (IV)
Spring. 4 credits. Prerequisites: RUSSL 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. P. Carden.
A survey of two centuries of Russian story telling. Emphasis is on the analysis of individual stories by major writers, on narrative structure, and on related landmarks of Russian literary criticism.

[RUSSL 335 Gogol # (IV)
Fall. 4 credits. Not offered 2001–2002. G. Shapiro.
Selected works of Gogol are read closely and viewed in relation to his life and to the literature of his time. Readings are in English translation.]

[RUSSL 337 Films of Russian Literary Masterpieces (also COM L 338) (IV)
Fall. 4 credits. Not offered 2001–2002; next offered 2002–2003. S. Senderovich.
War and Peace and *Dr. Zhivago* are well-known American films relating to Russian literature of the nineteenth and twentieth centuries. Russian literature has been a matter of great interest both in the West and East. A clear cut practice of cultural translation is presented by film versions of Russian literary masterpieces. We perform a comparative analysis of these films, which provides an excellent opportunity for discussing problems of translation between various media and of cultural translation.]

[RUSSL 350 Education and the Philosophical Fantasies (also COM L 350) # (IV)
Fall. 4 credits. Not offered 2001–2002; next offered 2002–2003. P. Carden.
A major philosophical tradition has conceived of education as encompassing the whole of our lives. What we should do or be is seen as the result of every choice we make. The whole of our human context is understood as a school in which we form ourselves. This all-encompassing vision of education has been embodied in the works of the great philosopher-fantasists who use the forms of fiction to explore fundamental issues of education. In this course we examine several key philosophical fantasies, among them Plato's *Republic*, Rousseau's *Emile*, and Tolstoy's *War and Peace*. Our aim is to understand how the discourse on education became a central part of our Western tradition.]

RUSSL 367 The Russian Novel (also COM L 367) # (IV)
Fall. 4 credits. Special discussion section for students who read Russian. N. Pollak.
The rise of the Russian novel in the nineteenth century. Works by Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy and Chekhov.

[RUSSL 368 Russian Literature from 1917 to the Present (IV)
Spring. 4 credits. Also open to graduate students. No prerequisites. There will be a special section for students who read Russian. Not offered 2001–2002. Staff.
Readings are done in English translation. Course works as a survey of Russian literature focusing on the most important writers. Among the themes explored are Russian Modernism, social command, socialist realism, the Thaw, dissident and emigre literature, and post-modernism. Writers include Blok, Mayakovsky, Babel, Olesha, Platonov, Pasternak, Nabokov, Solzhenitsyn, the two Erofeevs, and contemporary women poets and short story writers.]

RUSSL 369 Dostoevsky (also COM L 332) # (IV)
Spring. 4 credits. P. Carden.
This course involoves close reading of novels and short works by Fyodor Dostoevsky. Doestoevsky's fiction is in contentious dialogue with the literature and philosophy of the preceding century and opens out to the literature and philosophy of the following century. This critique of European culture, his searching examination of the interior life, and his bold experiments with narrative make his work seminal in world fiction. In this course we read *Notes From Underground, Crime And Punishment, The Idiot,* and *Brothers Karamazov.*

RUSSL 373 Chekhov in the Context of Contemporary European Literature and Art (also COM L 375) # (IV)
Spring. 4 credits. S. Senderovich.
Reading and discussion of Anton Chekhov's short stories in the context of the European art of the short story and painting of that era. The course is designed for nonspecialists as well as literature majors. All reading is in English translation.

[RUSSL 385 Reading Nabokov (also COM L 385 and ENGL 379) (IV)
Fall. 4 credits. Not offered 2001–2002. G. Shapiro.
This course offers an exciting trip into the intricate world of Nabokovian fiction. After establishing himself in Europe as a distinguished Russian writer, Nabokov, at the outbreak of WWII, came to the United States where he reestablished himself, this time as an American writer of world renown. In our analysis of the Nabokovian artistic universe, we focus on his Russian corpus of works, from *Mary* (1926) to *The Enchanter* (writ. 1939), all in English translation, and examine the two widely read novels that he wrote in Ithaca while teaching literature at Cornell—*Lolita* (1955) and *Pnin* (1957).]

RUSSL 393 Honors Essay Tutorial
Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year. Credit for the first semester will be awarded upon completion of second semester. For information, please see Director of Undergraduate Studies.

RUSSL 409 Russian Stylistics
Fall. 4 credits. Also open to graduate students. Prerequisite: 3 years of Russian. S. Senderovich.
This course goes a few steps beyond normative grammar. Provides an introduction to the subtleties of idiomatic Russian on the levels of morphology, syntax, vocabulary, and phraseology. Also provides an introduction to the genres of live colloquial and written language. Students develop writing skills through short assignments and their analyses. Introduces first notions of literary stylistics and their practical application.

[RUSSL 415 Post-Symbolist Russian Poetry (IV)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002; next offered 2003–2004. N. Pollak.
We examine works by three poets in the first quarter of this century: Innokentij Annenskij, the Symbolist whom the Acmeists considered their mentor; Osip Mandelstam, a founding Acmeist; and Boris Pasternak, associated, at least for a time, with the Futurists. Through close readings of their verse and also critical prose and manifestoes, we attempt to determine some of the general features that link poets of such diverse orientations in the years following the crisis of Symbolism. We also outline the features that distinguish them as representative of their respective movements.]

[RUSSL 425 Vladimir Nabokov vs. Jean-Paul Sartre (also COM L 445) (IV)
Spring. 4 credits. Not offered 2001–2002; next offered 2003–2004. S. Senderovich.
Jean-Paul Sartre reviewed Nabokov's *Despair* in 1938. Ten years later Nabokov returned the favor in his review of the English translation of Sartre's *La Nausée*. The apparent tension between the two celebrated men of European letters of the twentieth century allows us to look at the works of both through the eyes of the other, to go into the problems of Existentialist philosophy, into Nabokov's brand of it, and into responses to Sartre in Nabokov's works. The latter gives an excellent yet unexplored approach to the poetic world

of Vladimir Nabokov. Nabokov's major response to Sartre occurred in the novel *Pnin* written in Ithaca and largely about Cornell.]

[RUSSL 427 Russian Formalism (also COM L 427) (IV)
Fall. 4 credits. Not offered 2001–2002. N. Pollak.]

[RUSSL 430 Practice in Translation (IV)
Spring. 4 credits. Prerequisites: proficiency in Russian or approval of instructors. Not offered 2001–2002; next offered 2002–2003. W. Browne and S. Senderovich.
A practical workshop in translation: documents, scholarly papers, literary works (prose and poetry). Translation mostly from Russian to English, partly from English to Russian. Attention is paid to problems and development of skills.]

[RUSSL 431 Contemporary Russian Prose (IV)
Spring. 4 credits. Prerequisites: RUSSL 301–302 or 303–304, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. Graduate students may audit the course. Not offered 2001–2002. Staff.]

RUSSL 432 Pushkin # (IV)
Spring. 4 credits. Prerequisites: RUSSL 202 or equivalent, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. S. Senderovich.
Reading in the original language and discussion of selected works by Pushkin: lyrics, narrative poems, and *Eugene Onegin*.

[RUSSL 441 Bakhtin as Reader (also RUSSL 641, COM L 641) (IV)
Spring. 4 credits. Open to undergraduates with permission of instructor. Not offered 2001–2002. P. Carden.]

[RUSSL 460 Short Works of Tolstoy and Dostoevsky # (IV)
Spring. 4 credits. Not offered 2001–2002. Staff.
Readings in Russian and in translation. Open to graduate students.]

RUSSL 491 Reading Course: Russian Literature in the Original Language
Fall or spring. 1 credit each term.
Prerequisite: permission of instructor. Staff.
This course is to be taken in conjunction with any Russian literature course at the advanced level. Students receive one credit for reading and discussing works in Russian in addition to their normal course work.

RUSSL 492 Supervised Reading in Russian Literature
Fall or spring. 1–4 credits each term. Prerequisite: permission of instructor. Independent study. Students must find an adviser and submit a plan before signing up. Staff.

[RUSSL 499 The Avant-Garde in Russian Literature and the Arts (IV)
Open to any student who has completed a second-year course in Russian, or who has equivalent reading skills in Russian. May be used in satisfaction of the 12 hours of reading required for the Russian major. Not offered 2001–2002. P. Carden.
The first decade of the twentieth century was perhaps the richest period ever in Russian literature and the arts. It began with the brilliant experimentation in poetry and prose of Andrei Bely, Blok, Remizov, and others. It continued with the breakthroughs in painting and sculpture of Malevich, Goncharova, Tatlin, etc. In the second decade the rambunctious Futurists take over in literature and establish a compact with theater and the visual arts in which all the art forms break down the barriers to produce a new kind of art. During this period Russian artists in every medium were on the cutting edge of the European art scene. After the Revolution Russian artists and writers of the avant-garde continued their dominance for a time, now including the developing medium of film.

In this course we read representative Russian texts by the major authors of the period and we also investigate developments in the theater and visual arts.]

Graduate Seminars

RUSSL 611 Supervised Reading and Research
Fall or spring. 2–4 credits. Prerequisite: permission of the department. Staff.

SCIENCE & TECHNOLOGY STUDIES

T. J. Pinch, chair; R. N. Boyd, P. R. Dear, M. A. Dennis, S. H. Hilgartner, R. Kline, B. V. Lewenstein, M. Lynch, H. Mialet, A. G. Power, J. V. Reppy, M. W. Rossiter. Emeritus: W. R. Lynn, L. P. Williams. Adjunct faculty: J. J. Brumberg, R. W. Miller, H. Shue, Z. Warhaft

In today's world, issues at the intersection of the technical and the social arise continually in all aspects of life. Whether one looks at the role of computers in society, the history of evolutionary theory, the challenges of environmental controversies, the ethical dilemmas of biomedicine, or the military applications of scientific research, science and technology profoundly affect our lives—often in ways that we scarcely understand or only dimly perceive. The field of science and technology studies uses tools from the history, philosophy, sociology, and politics of science and technology to examine science and technology in their social and cultural context and to explore their political and policy implications. Systematic, integrated study of the origins and impacts of science and technology provides an understanding of the interactions among science, technology, and society and yields invaluable insights into the nature of the modern world.

The Science & Technology Studies Major

The major in Science & Technology Studies offers students wishing to pursue careers in such fields as law, public policy, health care, journalism, or management an opportunity to develop a full appreciation of the place of science and technology in society. The curriculum provides a strong foundation in the historical, social, political, and ethical aspects of science and technology and prepares students to participate effectively in policy debates and decision making. S&TS courses are organized into three areas: history, philosophy, and social studies of science and technology.

Themes of the Major

Students in the S&TS major develop a program individually tailored to their particular interests. To give their coursework a coherent focus, students select a theme that draws together a group of related courses. Possible themes include:

1. *Science, Technology, and Public Policy.* Many of the most important policy issues of our time involve science and technology. This theme offers students an opportunity to gain a deep appreciation of the problems this situation raises in democratic societies. Through courses that survey the place of science in American politics and courses that focus on such substantive issues as national technology policy or the politics of genetic engineering, this theme explores the tensions between expertise and democracy, the uses of scientific knowledge in making and legitimating policy, social movements that question technology and science, and contemporary debates over economics, innovation, and technology policy.
2. *Technology, Culture, and Society.* Students interested in this theme may examine the connections between technology and society by studying the manifold ways in which social groups (scientists, engineers, inventors, corporations, government agencies, and consumers) interact to construct technological artifacts and systems, and how the use of these artifacts and systems is related to social and cultural change. Areas of particular interest are: computers and society, the military and technological change, gender and technology, genomics and society, and telecommunication policy.
3. *Environment, Science, and Society.* By focusing on the relationship between scientific knowledge and political power, this theme offers unique insights into the making and implementation of environmental policy. Courses are available on such topics as American environmental politics, international environmental policy, science and the law, the history of agricultural science, and environmental communication. Students explore the causes and consequences of environmental controversies, the nature of risk and uncertainty in environmental issues, the roles of experts and the public in environmental decisions, and the challenges of global environmental policy.
4. *History and Philosophy of Science and Technology.* This theme provides students an appreciation of science and technology in historical perspective and an understanding of the philosophical problems posed by scientific knowledge. Courses available range from broad surveys to intensive studies of focused subjects. Students in this theme address such topics as the emergence of modern science; gender and science; the goal of achieving valid knowledge and the philosophical and institutional problems that this entails; the issues for history and philosophy of science raised by the new sociology of scientific knowledge; the relationship between knowledge, technology, and ethics; and the impact of major institutions—such as religion, medicine, the military, and the modern consumer economy—on the development of the sciences.

Beyond the four themes described above, S&TS majors may also create their own themes, carefully tailored to their particular interests. Examples might include "Computers, Innovation, and Society" or "Science, Technology, and Globalization."

Admission to the Major

Students intending to major in Science & Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes (1) a one-page statement explaining the student's intellectual interests and why the major is consistent with the student's academic interests and goals; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling S&TS requirements; and (4) an up-to-date transcript of work completed at Cornell University (and elsewhere, if applicable).

Acceptance into the major requires completion of the following prerequisites:

(a) two introductory courses in history, philosophy, sociology, government, anthropology, or other courses listed in the social sciences/history (Group III) requirement of the College of Arts & Sciences;

(b) the physical or biological science (Group I) requirement of the College of Arts & Sciences;

(c) mathematics or computer science courses in fulfillment of the Arts College Group II distribution requirement. These courses cannot be used to fulfill the core or other course requirements for the major and must be taken for a letter grade. Sophomores in the process of completing these prerequisites may be admitted to the major on a *provisional* basis. Further information and application materials are available at 275 Clark Hall (255–6047).

Requirements

S&TS majors must complete the following requirements:

Note: All courses used to fulfill major requirements must be taken for a letter grade.

1. Core courses: one course in each of the following groups (a-c).
   (a) History of Science and Technology: S&TS 233 (Agriculture, History, and Society), S&TS 250 (Technology in Society), S&TS 281 (Science in Western Civilization), S&TS 282 (Science in Western Civilization), or S&TS 283 (The Sciences in the Twentieth Century); and
   (b) Philosophy of Science: S&TS 381 (Philosophy of Science: Knowledge and Objectivity), or S&TS 201 (What is Science? An Introduction to Social Studies of Science and Technology); and
   (c) Social Studies of Science and Technology: S&TS 390 (Science in the American Polity: 1800–1960), S&TS 391 (Science in the American Polity: 1960–now), or S&TS 442 (Sociology of Science).
2. Additional Science and Technology Studies courses: At least 21 credit hours of additional courses in Science and Technology Studies, subject to the following restrictions:
   (a) Breadth requirement: at least one course beyond the core courses in each of the three areas of concentration (history, philosophy, and social studies of science and technology);
   (b) Depth requirement: at least two courses in one area beyond the core courses and intended for advanced undergraduates or graduate students.
3. Science Requirement: in addition to the science requirement of the College of Arts and Sciences, Science and Technology Studies majors are required to take an additional two semesters of a natural science or engineering (including computer science). Mathematics sufficient to follow the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student's major adviser and should be related to the theme selected by the student.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected to do independent study and research, with faculty guidance, on issues in science and technology studies. Students who participate in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of the second semester of their junior year. To qualify for the S&TS honors program, students must have an overall Cornell cumulative grade point average of at least 3.00 and a 3.30 cumulative grade point average in courses taken for the major. Additionally, the student must have formulated a research topic, and have found a project supervisor and a second faculty member willing to serve as the advisers. More information on the honors program is available from the S&TS undergraduate office at 275 Clark Hall (255–6047).

The Biology & Society Major

The Department of Science & Technology Studies also offers the Biology & Society major, which includes faculty from throughout the university. The Biology & Society major is designed for students who wish to combine the study of biology with exposure to perspectives from the social sciences and humanities. In addition to providing a foundation in biology, biology and society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology & Society major is offered to students enrolled in the College of Arts and Sciences, the College of Human Ecology, and the College of Agriculture and Life Sciences. The major is coordinated for students in all colleges through the Biology & Society Office. Students can get information, specific course requirements, and application procedures for the major from the office in 275 Clark Hall, 255–6047.

A full description of the Biology & Society major can be found in the Courses of Study section entitled Special Programs and Interdisciplinary Studies.

The Concentration in Science & Technology Studies

T. J. Pinch, chair; R. N. Boyd, P. R. Dear, M. A. Dennis, S. H. Hilgartner, R. Kline, B. V. Lewenstein, M. Lynch, H. Mialet, A. G. Power, J. V. Reppy, M. W. Rossiter. Emeritus: W. R. Lynn, J. P. Williams. Adjunct faculty: J. J. Brumberg, R. W. Miller, H. Shue, Z. Warhaft

The concentration (or minor) in Science & Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The concentration is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from multiple disciplinary perspectives.

The S&TS concentration permits students to develop an individualized program of study closely related to their major field. For example, students might use the S&TS concentration to focus on such topics as computers and society; gender and technology; science and law; biotechnology; science and politics; and environmental policy. By choosing courses in S&TS that fit their particular goals, students can tailor the concentration to provide breadth and depth in areas of special interest.

S&TS courses are organized into three areas: history, philosophy, and social studies of science and technology. To satisfy the requirements for the S&TS concentration, students must complete with a letter grade a minimum of four courses selected from the course offerings listed for the major. At least one course should be chosen from the list of core courses. The remaining three courses should be chosen in consultation with an S&TS faculty adviser and must be drawn from at least two of the three areas. Interested students may obtain further information about courses by contacting the S&TS undergraduate office, 275 Clark Hall (255–6042).

Course Offerings

Introductory Course
History
Philosophy
Social Studies of Science
Independent Study

Introductory Course

S&TS 101 Science and Technology in the Public Arena (III)
Fall. 3 credits. J. Reppy.
An introduction to public policy issues arising from developments in science and technology. We study such topics as the politics of expertise, the effect of technical change on workers, and the management of risk. The emphasis is on understanding the way issues are framed and policy produced. We analyze selected cases, such as DNA fingerprinting, encryption on the internet, gendered design in automobiles, outbreaks of rare diseases, and nuclear waste disposal.

History

[S&TS 233 Agriculture, History, and Society: From Squanto to Biotechnology (III)
Fall. 3 credits. Not offered 2001–2002. M. W. Rossiter.
This course surveys the major themes in the development of agriculture and agribusiness in the United States in the nineteenth and twentieth centuries. These include particular individuals (such as Liberty Hyde Bailey, Luther Burbank, G. W. Carver, Henry A. Wallace, and Norman Borlaug), the rise of government support and institutions (including U.S.D.A. and Cornell), noteworthy events (the Dust Bowl, World War II, and the environmental movement), and the achievements of the recent Green and "Gene" Revolutions.]

S&TS 250 Technology in Society (also ECE 250 and HIST 250) (III)
Fall. 3 credits. R. R. Kline.
For description, see ENGRG 250.

S&TS 281 Science in Western Civilization (also HIST 281) # (III)
Fall. 4 credits. P. R. Dear.
For description, see HIST 281.

S&TS 282 Science in Western Civilization (also HIST 282) # (III)
Spring. 4 credits. P. R. Dear.
For description, see HIST 282.

[S&TS 283 The Sciences in the Twentieth-Century (also HIST 280) (III)
Spring. 4 credits. Not offered 2001–2002. M. Dennis.
Science emerged as a powerful source of social, economic, and political power during the twentieth century. Through an examination of the development of the sciences—physical and biomedical—during the twentieth century students learn about the reciprocal relations between science and society. Topics covered may include: the rise and development of quantum mechanics; the emergence of Big Science; the history of the sciences in totalitarian nations, especially the former Soviet Union, Nazi Germany, and Communist China; the evolutionary synthesis; the rise and fall of molecular biology; the multiple forms of eugenics; the transformation of the social sciences; the role of new technologies in scientific change, especially computer and communication technology; the growth of science as a profession; and the development of science in non-western cultures.]

S&TS 287 Evolution (also BIOEE 207 and HIST 287) (I or III)
Fall. 4 credits. W. Provine.
For description, see BIOEE 207.

S&TS 292 Inventing an Information Society (also ECE 298 and ENGR 298 and HIST 292) (III)
Spring. 3 credits. R. R. Kline.
For description, see ENGRG 298.

S&TS 355 Computers: From Babbage to Gates (III)
Fall. 4 credits. M. Dennis.
Computers have not always been the ubiquitous beige boxes gracing our desktops: in Victorian London, Charles Babbage attempted to build his analytical engine using brass gears and steel rods; and during World War II the Allied governments used sophisticated electro-mechanical and electronic "brains" to break Axis codes. Machines that once occupied entire rooms now travel in knapsacks. How did this technology, once considered esoteric and useful to only technical specialists, colonize industry, academia, the military, the federal government, and the home? Using primary historical materials, including novels, films, archival documents, and other texts we follow computers from Babbage's Victorian dream of an analytical engine to the visions of contemporary moguls like Bill Gates whose goal is "information at your fingertips." We explore not only how computer technology affects society, but how culture and politics enable and sustain the development of the machine. This is a course in the history and sociology of computers; a background in computer science is not required. (No technical knowledge of computer use is presumed or required.)

[S&TS 433 International History of Science (III)
Spring. 4 credits. Not offered 2001–2002. M. W. Rossiter.
A survey of the major scientific events and institutions in several foreign nations, including developing countries. The course covers the period 1660 to the present and gives some attention to who in each country becomes a scientist, who rises to the top, and who emigrates. Weekly readings and a research paper.]

S&TS 444 Historical Issues of Gender and Science (also WOMNS 444) (III)
Spring. 4 credits. Open to sophomores. M. W. Rossiter.
One-semester survey of women's role in science and engineering from antiquity to the 1980s, with special emphasis on the United States in the twentieth century. Readings include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, we shall have attained a broad view of the problems that have faced women entering science and those that still remain.

S&TS 447 Seminar in the History of Biology (also B&SOC 447, HIST 415, and BIOEE 467) (I or III)
Fall and summer. 4 credits. Limited to 18 students. S-U grades optional. W. B. Provine.
For description, see BIOEE 467.

S&TS 473 Knowledge and Politics in Seventeenth Century England (also HIST 471) (III)
Spring. 4 credits. Limited to 15 students. P. Dear and R. Weil.
England in the 17th century was a revolutionary ferment of political, religious, and philosophical conflict. This course examines the conflicts and arguments, and the means explored for their apparent resolution. These affected ideas of God and worship, the meanings of gender, conceptions of the natural world and its scientific appropriation, and the legitimacy and proper form of political power. The course focuses on the close study of primary source readings by many of the principal players in all these areas, including Francis Bacon, Thomas Hobbes, the Duchess of Newcastle, and John Locke.

[S&TS 487 Seminar in the History of the Environment (III)
Spring. 4 credits. Next offered spring 2003. M. W. Rossiter.
This course is a one-semester survey of the general topic of the history of the environmental sciences, broadly defined, but mostly in the United States. Depending on the interests of the students, its topics may include clean water, clean air, the great outdoors, environmental disasters, and wildlife.]

S&TS 525 Seminar in the History of Technology (also HIST 525)
Spring. 4 credits. R. R. Kline.
An exploration of the history of technology in Europe and the United States from the eighteenth century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technological utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field are considered in selecting the topics for the seminar.

[S&TS 616 Enlightened Science (also HIST 616)
Fall. 4 credits. Limited to graduate students. Not offered 2001–2002. P. R. Dear and M. Dennis.
For description, see HIST 616.]

[S&TS 644 Topics in the History of Women in Science (also WOMNS 644)
Spring. 4 credits. Not offered 2001–2002. M. W. Rossiter.
This is a one-semester graduate seminar on selected topics in the history of women and gender in science and technology, covering mostly the U.S. in the 20th century but broadly defined to include earlier periods and other countries. It seeks to acquaint advanced students with some of the best recent literature on this topic and to identify and explore possible new topics. Weekly readings and a research paper.]

[S&TS 680 Seminar in Historiographical Approaches to Sciences (also HIST 680)
Fall. 4 credits. Not offered 2001–2002. P. R. Dear.
For description, see HIST 680.]

[S&TS 682 Topics in the Scientific Revolution (also HIST 682)
Fall. 4 credits. Not offered 2001–2002. P. R. Dear.
For description, see HIST 682.]

[S&TS 777 Science, Technology, and the Cold War
Fall. 4 credits. Permission of instructor required for undergraduate students. Next offered fall 2002. M. Dennis.
This graduate seminar examines the historical transformation wrought in the organization and practice of the physical, biomedical, and environmental sciences since 1945. How did military and federal patronage affect the development of the sciences, the organization of the postwar university, and the armed services? Students read contemporary historical materials as well as primary texts to understand the development of particular institutions, technologies, and individuals. In addition to participation in the weekly discussion, each student prepares a research paper for presentation to the seminar.]

Philosophy

S&TS 201 What is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210) (III)
Spring. 3 credits. T. Pinch.
For description, see listing in Social Studies of Science.

S&TS 205 Ethical Issues in Health and Medicine (also B&SOC 205) (IV)
Fall. 4 credits. E. Toon.
For description, see B&SOC 205.

Spring. 4 credits. N. Sethi.
For description, see B&SOC 206.

S&TS 286 Science and Human Nature (also PHIL 286) (IV)
Spring. 4 credits. R. N. Boyd.
For description, see PHIL 286.

S&TS 381 Philosophy of Science: Knowledge and Objectivity (also PHIL 381) (IV)
Fall. 4 credits. R. N. Boyd.
For description, see PHIL 381.

[S&TS 681 Philosophy of Science (also PHIL 681)
Spring. 4 credits. Not offered 2001–2002. R. N. Boyd.
For description, see PHIL 681.]

Social Studies of Science

S&TS 201 What is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210) (III)
Spring. 3 credits. T. Pinch.
This course allows both science and nonscience majors to reflect a little on the nature of science and technology as activities. Why is science so successful? Has it always been that way? How different is science from other activities? How does a new invention come about?

In order to understand better what science is we look at what it is not. We also look at episodes of mainstream science along side science from science fiction. Throughout, we look at the infrastructure of science and technology—the bits that scientists, engineers, and their textbooks take for granted. No particular science or arts requirements are needed for this course. The materials are chosen so as to be understandable by all. We will use a variety of media, including still images, video, and computer simulations.

S&TS 285 Communication in the Life Sciences (also COMM 285) (III)
Spring. 3 credits. Staff.
For description, see COMM 285.

S&TS 311 Sociology of Medicine (III)
Spring. 4 credits. E. Toon.
This course provides an introduction to the ways in which medical practice, biomedical technology, and the medical profession are embedded in society and shaped by social phenomena. Accountability to patients and the public, and struggles over the control of medical practice in a world where medicine is connnected to gender, class, race, and personal autonomy are important overarching themes. We examine the structure of the medical profession; medical training and professional socialization; the social organization of the hospital; and doctor-patient interactions. The course also explores how biomedical knowledge and technology get produced, assessed, and introduced into clinical practice. Topics may include the intensive care unit, the training of surgeons, the regulation of pharmaceuticals, AIDS and breast cancer activism, genetic testing, and priority setting in biomedical science.

S&TS 324 Environment and Society (also R SOC 324 and SOC 324) (III)
Spring. 3 credits. L. Glenna.
For description, see R SOC 324.

[S&TS 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also GOVT 305, AM ST 350) (III)

Spring. 4 credits. Not offered 2001–2002. M. Dennis.

This course explicates the development of atomic weapons from early twentieth-century ruminations about super bombs in science fiction through the Manhattan Project, the postwar development of thermonuclear weapons and civil defense, and more recent plans for strategic defense. Our focus expands to cover the lives of researchers at such institutions as Los Alamos during and after World War II as well as discussions of national politics. Other topics include the Nazi effort to develop an atomic bomb, the role of technical espionage during and after World War II, and the problems posed by the classification of technical knowledge. We seek to understand how the bomb became part of American culture through the use of literature and film, as well as readings in primary historical documents and secondary analyses. In addition to class meetings, there is also a required screening session. Films generally last less than two hours, but some are longer. Viewing the movies is an essential part of the course.]

S&TS 352 Science Writing for the Mass Media (also COMM 352) (III)

Fall. 3 credits. B. Lewenstein.

For description, see COMM 352.

S&TS 353 Knowledge and Society (also SOC 353) (III)

Spring. 3 credits. C. Leuenberger.

For description, see SOC 353.

[S&TS 360 Ethical Issues in Engineering (also ENGR 360) (III)

Spring. 3 credits. Not offered 2001–2002. R. Kline.

For description, see ENGR 360.]

[S&TS 390 Science in the American Polity, 1800–1960 (also GOVT 308, AM ST 388) (III)

Fall. 4 credits. Not offered 2001–2002. M. Dennis.

How did America become a leading nation in scientific and technical research? This course charts the development of American science from its origins in gentlemanly societies in the early nineteenth century through the development of large-scale federally funded research or Big Science. Particular attention is paid to the importance of government patronage in creating new social and intellectual spaces for research; the importance of medicine and the biomedical disciplines for the development of university-based research; the origins and expansion of research in corporations; and the role of war in the political economy of American science.]

S&TS 391 Science in the American Polity, 1960–Now (also GOVT 309, AM ST 389) (III)

Fall. 4 credits. M. Dennis.

This course reviews the changing political relations between science, technology, and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for the course. Topics addressed include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

S&TS 400 Components and Systems: Engineering in a Social Context (also M&AE 400) (III)

Spring. 3 credits. Z. Warhaft.

For description, see M&AE 400.

S&TS 401 Biology and Society: The Social Construction of Life (also B&SOC 301) (III)

Fall. 4 credits. E. Toon.

For description, see B&SOC 301.

S&TS 406 Biotechnology and Law (also B&SOC 406) (III)

Spring. 4 credits. L. Palmer.

Biotechnology, with myriad applications in areas such as medicine and agriculture, is creating many challenges for basic social institutions. This course explores the use and potential abuse of biotechnology in areas such as genetic screening and counseling, reproductive technologies, intentional release of genetically engineered organisms, patents, and ownership of human tissue. Particular attention will be given to evolving legal and management strategies for regulating the applications of biotechnology. Readings are from science, medicine, law, and public policy. Several short written asignments as well as a research paper are required.

[S&TS 407 Law, Science, and Public Values (also GOVT 407 and B&SOC 407) (III)

Spring. 4 credits. Not offered 2001–2002. M. Lynch.

This course examines problems that arise at the interface of law and science. These problems include the regulation of novel technology, the role of technical expertise in public decision making, and the control over scientific research. The first part of the course covers basic perspectives in science and technology studies (S&TS) and how they relate to legal decisions and processes. The second part of the course covers a series of examples and legal cases on the role of expert judgments in legal and legislative settings, intellectual property considerations in science and medicine, and legal and political oversight of scientific research. The final part of the course examines social processes and practices in legal institutions, and relates these to specific cases of scientific and technological controversy. Lectures and assignments are designed to acquaint students with relevant ideas about the relationship between legal, political, and scientific institutions, and to encourage independent thought and research about specific problems covered in the course.]

S&TS 409 From the Phonograph to Techno (also SOC 409) (III)

Fall. 4 credits. Limited to 15. Permission of the instructor. T. Pinch.

In this seminar, we treat music and sound and the ways they are produced and consumed as socio-cultural phenomena. We specifically investigate the way that music and sounds are related to technology and how such technologies and sounds have been shaped by and have shaped the wider society and culture of which they are a part. We look at the history of sound technologies like the phonograph, the electronic music synthesizer, samplers, and the Sony walkman. Our perspective is drawn from social and cultural studies of science and technology. Students are encouraged to carry out a small original research project on their own favorite sound technology.

S&TS 411 Knowledge, Technology, and Property (III)

Spring. 4 credits. Prerequisites: at least 1 course in science and technology studies. S. Hilgartner.

Should the human genome be treated as private property or a public resource? How should copyright be managed in the digital environment of the Internet? Is music "sampling" high-tech theft or artistic expression? Does bioprospecting represent an enlightened strategy for preserving biodiversity or a post-colonial means for transferring resources from the developing world to the North? Debate about the nature and scope of intellectual property is an increasingly salient feature of contemporary politics. This course examines the ownership of knowledge and technology, exploring fundamental tensions that intellectual property systems express and incompletely reconcile. Perspectives from science and technology studies, sociology, law, and economics inform the course. Case studies explore the construction of property in contexts ranging from the early history of copyright to the ownership of life forms, airwaves, algorithms, artistic content, electronic databases, and the personal identities of celebrities.

[S&TS 427 Politics of Environmental Protection in America (also GOVT 427) (III)

Fall. 4 credits. Not offered 2001–2002. Staff.

An introduction to the distinctive feature of environmental protection in America, focusing particularly on the role of law, science, and citizen activism in public policymaking. Readings from law, political science, and policy analysis examine the changing role of expert agencies, courts, public interest groups, Congress, and the states in environmental politics since the late 1960s. Case studies of specific environmental controversies (nuclear power, siting, pesticides, endangered species) are used to explore dominant public conceptions of risk and safety, regulatory costs and benefits, and the goals and instruments of environmental policy.]

[S&TS 438 Minds, Machines, and Intelligence (also COGST 438) (III)

Spring. 4 credits. Not offered 2001–2002. H. Mialet.

Do machines think? Do they have minds? Are they intelligent? What can humans do that machines cannot do and vice versa? How do humans use machines and how do machines use humans? In this course we focus on how philosophers such as Turing, Searle, and Dreyfus have dealt with these questions. At the same time, however, we are also concerned with trying to rework the themes raised by these thinkers. We do this with an eye toward the work of social scientists who have studied how people and machines interact in specific contexts, as for example, in a plane's cockpit or on the Internet. Topics may also include virtual surgery, speech recognition, and expert systems in medicine.]

S&TS 442 The Sociology of Science (also CRP 442, B&SOC 342, and SOC 442) (III)

Fall. 4 credits. T. Pinch.

A view of science less as an autonomous activity than as a social institution. We discuss such issues as controversies in science,

analysis of scientific text, gender, and the social shaping of scientific knowledge.

[S&TS 453 Reflections on Scientific Personae: Visibility and Invisibility of the Body (III)
Spring. 4 credits. Not offered 2001–2002. H. Mialet.
Who produces science? Rational, deliberative minds or brilliant, intuitive iconoclasts? Individuals or groups? Geniuses or ordinary practitioners? Human beings or assemblages of instruments? This course explores the question of where scientific intelligence resides. The mythical figure of the lone genius stands in sharp contrast to recent work in the social history and sociology of science that analyzes how scientific knowledge is produced in collectivities that weave together humans and nonhumans. We examine the process through which scientific competencies emerge from, and are incorporated into, "collective bodies" (e.g., Callon and Latour's "actor-networks," or Haraway's "cyborgs"). The tensions between the human and the nonhuman and the individual and the collective run throughout the course and inform our analysis of the place, the role, and the representation of the body—or bodies—of the scientist.]

[S&TS 466 Public Communication of Science and Technology (III)
Fall. 4 credits. Limited to 15. Not offered 2001–2002. B. Lewenstein.
For description, see COMM 466.]

[S&TS 467 Innovation: Theory and Policy (III)
Fall. 4 credits. Open to upper-level undergraduates and interested graduate students. Prerequisite: ECON 102 or permission of the instructor. Not offered 2001–2002. J. Reppy.
In this course we study the innovation process (that is, the introduction of new technology into practice) through the critical analysis of selected theories of innovation and supporting empirical evidence. Economic theories are contrasted to the insights found in science and technology studies. The focus is on the context of interests and ideology in which the various theories have been framed and their differing implications for technology policy. Authors covered include Schumpeter, Solow, Scherer, Nelson and Winter, and Bijker and Pinch.]

[S&TS 469 Food, Agriculture, and Society (also B&SOC 469, and BIOEE 469) (I)
Spring. 3 credits. Not offered 2001–2002. A. Power.
For description, see BIOEE 469.]

S&TS 483 The Military and New Technology (III)
Fall. 4 credits. J. Reppy.
For description, see GOVT 483.

[S&TS 490 The Integrity of Scientific Practice (III)
Fall. 4 credits. Next offered fall 2002. S. Hilgartner.
Recent scandals over scientific fraud, debates about financial conflicts of interest, disputes about the use of human and animal subjects, and tensions over ownership of data have raised concern about integrity in science. In addition, changes in the American research system—from the emergence of new university-industry relationships to the growth of electronic communication—pose new questions about who owns and controls research. This course addresses practices that present problems of integrity in research (e.g., fraud, secrecy, commercialization). It also examines how scientific practices affect the structural integrity of science as an institution. Through these complementary concepts of integrity, the course explores the connections between the conduct of science and its cultural authority.]

S&TS 492 Politics and the Public Health (III)
Spring. 4 credits. E. Toon.
Who is responsible for the public's health? Both now and in the past, the answer to that question has been a source of bitter debate. In the past three centuries, public health has become a contested mix of aims, advocates, and practices: it is simultaneously a field of scientific activity, a vehicle for social reform, and a site of political controversy. This course examines the history of American public health, with an eye to understanding how public health has been defined and how responsibility for the public's health has been apportioned. Course readings and discussions focus on the evolution of this balance of science, reform, and politics in the United States, but include some material on public health in other national and cultural contexts.

[S&TS 493 Economics Meets Science Studies (III)
Spring. 4 credits. Not offered 2001–2002. J. Reppy.
This course covers a variety of possible interactions between the disciplines of economics and science and technology studies. Economists (at least some economists) are interested in science and technology as important components in economic growth, while scholars in science studies often appeal to economic motives and institutions to explain behavior in the production of scientific and technological knowledge. We explore ways in which economics can provide new questions and theoretical approaches for science and technology studies. From another perspective, economics, as the most "scientific" of the social sciences, is itself a subject for study. Internal critiques by economists are compared to external analyses in the science studies literature. Readings include works on the epistemology and us of economic analysis in the science studies literature.]

[S&TS 532 Inside Technology: The Social Construction of Technology (also SOC 532)
Spring. 4 credits. Next offered spring 2003. T. J. Pinch.
Rather than analyze the social impact of technology on society, in this course we investigate how society gets inside technology. In other words, is it possible that the very design of technologies embody assumptions about the nature of society? And, if so, are alternative technologies possible which embody different assumptions about society? Do engineers have implicit theories about society? Is technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments are illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.]

[S&TS 625 Visualization and Discourse in Science
Fall. 4 credits. Not offered 2001–2002. M. Lynch.
This seminar covers two interrelated areas of science and technology studies: visualization and discourse. Visualization refers to the practices and technologies through which scientists and designers develop images, graphs, models, and other representations. Discourse refers, broadly, to practical uses of language. In the context of this course, discourse and visualization are treated as important aspects of the production of scientific data and technological artifacts. The course focuses mainly on historical and ethnographic studies that pay close attention to the material practices and linguistic repertoires through which scientific and technological innovations are made visible, palpable, and intersubjectively accountable.]

[S&TS 631 Qualitative Research Methods for Studying Science (also SOC 631)
Fall. 4 credits. Not offered 2001–2002. P. R. Dear.
Much has been learned about the nature of science by sociologists and anthropologists donning lab coats and studying scientists in action. In this course we look at the methods used in this new wave of science studies. We examine what can be learned by interviewing scientists, from videos, and from detailed examinations of scientific texts. Students gain hands-on experience by conducting a mini-project in which they investigate some aspect of scientific culture.]

S&TS 645 Genetics: Politics and Society in Comparative Perspective (also GOVT 634)
Spring. 4 credits. Limited to seniors and graduate students. S. Hilgartner.
Contemporary genetics and biotechnology are highly controversial, creating high hopes for some and deep anxieties for others. This course traces the conflicts and power struggles over genetic engineering, using it as a case to examine some crucial issues in the relationships among science, technology, and politics. In particular, the course focuses on three themes—the politics of property, the politics of identity, and the politics of risk—as they pertain to genetics. Topics may include the social shaping of biological research; eugenics and genetics; genetics and medicine; the regulation of risks; the growth of commercial biotechnology; university-industry relationships; Green parties and social movements; North-South issues and biotechnology; the Human Genome Project; intellectual property and patenting genes; and the debate over human cloning.

[S&TS 664 Constructionism in Social Science
Spring. 4 credits. Next offered spring 2003. M. Lynch.
Constructionist approaches have become commonplace in many fields of social and cultural study. The very words 'social construction' often provoke heated arguments, but exactly what these words mean or imply is seldom made clear. This course examines philosophical arguments, counterarguments, and empirical case studies associated with constructionism. The main focus is on constructionist approaches in the sociology of knowledge and science and technology studies, but other variants in sociology, psychology, and the humanities are also discussed. The aim is to develop a critical understanding of the arguments, narratives, and concepts that inform and identify these approaches.]

[S&TS 700 Special Topic 1: Science Studies and the Politics of Science
Fall. 4 credits. Prerequisites: S&TS 711 or permission of the instructor. Not offered 2001–2002.
Theoretical developments in science and technology studies have called attention to the contingent and socially embedded character of both knowledge claims and technological systems. Drawing on literature from several disciplines, this seminar explores the consequences of these findings for social and political studies of science. Issues and problems considered include trust and skepticism, political and legal agency, reflexive institutions, relativism and social action, science and norms, and the co-production of knowledge and social order.]

S&TS 700 Special Topic 2: Technology Transfer Issues
Spring. 4 credits. J. Reppy.
The goal of this course is to develop a coherent analytical framework for analyzing technology transfer, using insights from economics, sociology, history, and science and technology studies and to employ that framework to evaluate current policy issues. We study the process of technology transfer in different contexts, ranging from intra-firm and intra-industry to technology transfer between civil and military sectors, and between industrialized countries and LDCs. The readings will include a mix of theoretical writings and case studies.

S&TS 700 Special Topic 3: Issues in the Social and Cultural History of Technology (also HIST 700)
Fall. 4 credits. R. Kline.
This seminar focuses on different issues in the social and cultural history of technology. Students discuss readings in the first half of the course, then give presentations on their research papers. The topic for fall 2001 is Gender and Technology. We critique how scholars have examined this issue in the past decade.

S&TS 711 Introduction to Science and Technology Studies (also HIST 711)
Fall. 4 credits. P. R. Dear.
This introductory course provides students with a foundation in the field of science and technology studies. Using classic works as well as contemporary exemplars, seminar participants chart the terrain of this new field. Topics for discussion include, but are not limited to: historiography of science and technology and their relation to social studies of science and technology; laboratory studies; intellectual properties; science and the state; the role of instruments; fieldwork; politics and technical knowledge; philosophy of science; sociological studies of science and technology; and popularization.

Independent Study

S&TS 399 Undergraduate Independent Study
Fall or spring. 1–4 credits. No more than 8 hours total of independent study (not including honors) can count toward the S&TS major.
More information and applications are available in 275 Clark Hall.

S&TS 498–499 Honors Project I & II
Fall and spring. 3–5 credits each term. Open only to Science & Technology Studies students in their senior year by permission of the department. Applications and information available in 275 Clark Hall.
Students who are admitted to the honors program are required to complete two semesters of honors project research, and to write an honors thesis. The project must include substantial research and the completed work should be of wider scope and greater originality than is normal for an upper-level course.

Students may take three to five credits per semester up to a maximum of eight credits in S&TS 498 & 499, Honors Projects I & II. Students should note that these courses are to be taken in addition to those courses that meet the regular major requirements. S&TS 498 includes the fall Honors Seminar. The student and the project supervisor must reach clear agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of S&TS 498, Honors Project I, a letter grade is assigned and the advisers, in consultation with the Director of Undergraduate Studies, evaluate whether or not the student should continue working on an honors project. S&TS students who do continue in the honors program for the second semester receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

S&TS 699 Graduate Independent Study
Fall or spring. 2–4 credits.
Applications andd information are available in 275 Clark Hall.

SINHALA (SINHALESE)

See Department of Asian Studies.

SOCIOLOGY

P. Becker, M. Brinton, S. Caldwell, M. Clarkberg, R. Grannis, D. Grusky, D. Heckathorn, E. Lawler, C. Leuenberger, M. Macy, P. Moen, S. Morgan, V. Nee, T. Pinch, D. Strang, S. Szelényi, S. Tarrow, K. Weeden, E. Wethington

Emeritus: D. Hayes, B. C. Rosen, R. M. Williams, Jr.

Sociology is the study of human social organization, institutions, and groups. The Department of Sociology offers courses in a number of key areas, including: comparative sociology, culture, economy and society, family and the life course, political behavior and public policy, organizations, rational choice, social inequality, social psychology and group processes, social and political movements, and social networks. A particular emphasis of the department is the linkage of sociological theory to issues of public concern such as ethnic conflict, drugs, poverty, and gender and race segregation. Interests of faculty members range from the study of interaction in small groups to the study of economic and social change in a number of different countries. The department offers the opportunity for students to develop fundamental theoretical insight and understanding as well as advanced research skills in quantitative and qualitative methods. Graduates of the department take up careers in university, government, and business settings, and enter professions such as law, management, urban policy, and others that seek men and women who demonstrate a disciplined understanding of society and complex social issues.

Sociology Courses for Nonmajors

Sociology provides students with particularly effective ways to understand the complexities of modern life. For many students, the undergraduate years are a last opportunity to gain the insights these fields have to offer. The Department of Sociology is continuing to design an array of beginning and advanced courses that convey a broad understanding of the methods and insights of sociological analysis—courses that will be of particular interest to undergraduates who may not major in sociology. First- and second-year students should note that the introductory courses (101, 103, 105, 108, 115, and 165) focus on the sociological analysis of major issues of public life, and that a wide selection of general education courses is available at the 200 level. Advanced undergraduates who are majors in other fields should also see, in particular, descriptions of the 300- and 400-level courses, for which there are no prerequisites other than junior or senior status.

Related Courses in Other Departments

Students interested in sociology should consult the course lists of the other social science departments in the College of Arts and Sciences (including Anthropology, Economics, Government, and Psychology) and of the following departments in other colleges: Organizational Behavior (College of Industrial and Labor Relations), Human Development (College of Human Ecology), and Rural Sociology (College of Agriculture and Life Sciences).

The Sociology Major

The Department of Sociology is one of the social science departments at Cornell with the highest national ranking. Faculty members are internationally recognized for their scholarly work, and have received numerous awards, research fellowships, and research grants.

The sixteen or so professors who are currently in the department are dedicated to scholarly inquiry that is both methodologically rigorous and theoretically innovative. The breadth of their substantive interests and the variety of their methodological styles are well demonstrated in the different fields that are represented within the department. These include: comparative societal analysis, culture, deviance and social control, education, economic sociology, family, gender, inequality, social networks, organizations, political sociology, public policy, race and ethnic relations, religion, science and technology, social movements, and social psychology.

Career Opportunities for Graduates

An undergraduate degree in sociology is one of the most popular degrees with employers. After engineering and computer science, sociology is the most able to place graduates into jobs immediately after completing their Bachelor's Degree. This is not altogether surprising, since sociology can lead to a rewarding career in any of the following fields:

- **government:** urban/regional planning, affirmative action, foreign service, human rights management, personnel management
- **research:** social research, consumer research, data analysis, market research, survey research, census analysis, systems analysis
- **criminal justice:** corrections, criminology assistance, police work, rehabilitation counseling, criminal investigation, parole management
- **teaching:** public health education, school admissions, college placement
- **community affairs:** occupational counseling, career counseling, public health administration, hospital administration, public administration, social assistance advocacy, fund-raising, community organizing, social work
- **business:** advertising, sales, project management, sales representation, market analysis, real estate management, journalism, public relations, insurance, human resource management, production management, labor relations, quality control management

A large number of our majors also go onto graduate school and obtain advanced (i.e., Master's and Ph.D.) degrees in such varied fields as sociology, political science, philosophy, economics, and psychology. Many also complete professional degrees in education, law, social work, and business administration.

Requirements for the Major

In addition to the academic requirements established by the College of Arts and Sciences, you must also fulfill requirements towards a specified major. There are 10 courses required in the sociology major. All courses towards the major must be taken for a letter grade and students must maintain at least a 2.0 grade point average while enrolled in the major. The 10 courses required for the major are divided into the following categories:

- Sociology 101
- one additional introductory-level course in sociology (at the 100- or 200-level)
- two research methods courses (SOC 301 *and* 303)
- one advanced-level sociology course (400-level or higher)
- five additional (i.e., elective) courses in sociology

Declaring the Sociology Major

If you are a student in the College of Arts and Sciences and wish to declare a major in sociology, it is in your best interest to do so as soon as possible. If you are *not* currently in the College of Arts and Sciences, you need to be admitted to A&S *before* you can declare. In order to declare the sociology major, you need to take the following steps:

- Obtain a **campus copy** of your transcript from Day Hall and bring it to the department office (311 Uris Hall).
- Make an appointment for advising with the Undergraduate Coordinator, Heather Gowe, or visit her during her office hours (in 311 Uris Hall). During your meeting with her, you will fill out a major declaration form.
- Leave this form and your transcript with the Undergraduate Coordinator. Your declaration will be reviewed by the Director of Undergraduate Studies, Szonja Szelényi, and sent on to the College of Arts and Sciences for official notification that you have declared a major. Please allow two weeks for your declaration to be approved and entered into the campus computer.

A student file will be set up to maintain your records in the department. Once you are officially recognized as a major in sociology, the Sociology Department will receive a copy of your transcript at the end of each semester, which will be kept in your student file at 311 Uris Hall. Your records will be maintained until five years after you graduate.

Academic Advising in Sociology

As a student at Cornell, you are ultimately responsible for the policies, procedures, and requirements regarding your degree as stated in the current *Courses of Study*. After reading this document, you may find that you are still confused or unclear about some of the requirements, and you may have questions and concerns that pertain to your individual situation. Several sources of academic assistance and advice are available to you.

College Adviser: As a sociology major, you are a student in the College of Arts and Sciences. For assistance and advice, College Advisers are available to you by appointment in the Office of Undergraduate Admissions and Academic Advising (Goldwin Smith Hall). It is recommended that you consult with a College Adviser sometime before your last semester to discuss the completion of College requirements, graduation, and residency requirements.

Undergraduate Program Coordinator: The Undergraduate Program Coordinator (Heather Gowe) in the Sociology Department is located in Room 311, Uris Hall. She is available to provide assistance with the following:

- the process of declaring the sociology major.
- forms relating to transferring courses from other universities and/or other departments.
- other administrative matters or concerns (e.g., forms, adding and dropping courses).

Director of Undergraduate Studies: The Director of Undergraduate Studies (Szonja Szelényi) is located in Room 346, Uris Hall. She is there to:

- provide information about departmental curricula and the requirements for the major.
- meet with applicants to the major.
- review applications for sociology majors and accept students into the program.
- assist students in finding an advisor in the sociology department.
- screen sociology classes taken outside Cornell for acceptance as Cornell credit.
- serve as the backup for faculty advisers who are absent during advising periods.

Faculty Advising: Once you are a declared sociology major, you will be assigned a faculty advisor within the Sociology Department. When you declare sociology as a major, you will be asked to name your preference for an adviser; however, if you are not sufficiently familiar with the program, the Director of Undergraduate Studies can assist you in selecting a faculty member to work with you. Faculty advisers are there to:

- discuss your education, career goals, and graduate school opportunities.
- meet with you to talk about courses and plan your program of study within the department.
- go over your academic program each semester and provide you with your Personal Identification Number (PIN) so that you can register for courses via the campus computer.

Sociology Peer Advisers: There are approximately 10 advanced sociology majors who serve as peer advisers in the department. These advisers change from year to year, but a complete list of their names and email addresses is available to you from the Undergraduate Program Coordinator in the sociology office (Room 311, Uris Hall). Peer advisers do not provide you with academic counseling; they are there to help you adjust to life in the major, as well as to let you know about the department's many support services and activities.

Research Opportunities

Qualified sociology majors are invited to participate with faculty members in conducting research. Such projects are usually initiated in one of two ways: the student may offer to assist the faculty member in an ongoing project, or the student may request that the faculty member supervise the execution of a project conceived by the student. In either case, the student should enroll in SOC 491 (Independent Study). Interested students may direct inquiries to any faculty member.

The Sociology Honors Program

Honors in sociology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. In addition to the regular requirements of the major, candidates for honors must maintain a cumulative grade point average of at least a B+ in all sociology classes, complete at least 2 credits of SOC 491 (in the junior year), complete SOC 495 and SOC 496 (in the senior year), and write an honors thesis.

Students are awarded either honors (*cum laude*), high honors (*magna cum laude*), or highest honors (*summa cum laude*) in the program based on the honors advisers' evaluation of the level and the quality of the work completed towards the honors degree.

The honors distinction will be noted on the student's official transcript and it will also be indicated on the student's diploma.

Admission to the Honors Program

To qualify for entrance into the honors program, students must have at least a B grade point average overall and a B+ grade point average in the major. In addition, they must secure the consent of a faculty member in the Sociology Department who will guide their honors thesis.

Students who wish to be considered for honors should apply to the Director of Undergraduate Studies no later than the second term of their junior year. Honors program application forms are available in 311 Uris Hall. The application must include a copy of the student's undergraduate transcript, a brief description of the proposed research project, and the endorsement of a faculty member in the Sociology Department.

The Honors Thesis

During the senior year, each candidate for honors in sociology enrolls in a year-long tutorial (SOC 495 and SOC 496) with the faculty member who has agreed to serve as the student's thesis adviser. During the first term of their senior year, students determine the focus of their honors thesis, and submit a 10- to 15-page overview (or, alternatively, a preliminary draft) of the thesis to their adviser. During the second term, they complete their honors thesis and submit final copies to the department.

The text of the honors thesis may not exceed 60 pages except by permission of the honors adviser. Two copies of the honors thesis are due to the Undergraduate Program Coordinator (311 Uris Hall) during the third or fourth week of April. One of these copies will go to the student's thesis adviser and the other will remain on file in the department.

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

Business and Organizational Studies Concentration

Majors who wish to prepare for postgraduate study in professional schools (business, management, or law) or a career in business or nonprofit organizations may elect to acquire a concentration in Business and Organizational Studies in sociology. This program provides Cornell students with training in economic sociology, organizational studies, and comparative societal analysis, all of which are useful areas of expertise in a world increasingly shaped by economic and social forces of a truly global dimension. In order to complete a concentration in Business and Organizational Studies, students must meet the following requirements:

- complete **both** of the required core courses in the concentration: SOC 105 and SOC 215, **and**
- complete **four** additional courses from the following list: SOC 217, 220, 222, 311, 315, 325, 326/526, 358/558, 370/570, 373, and 427.

Students completing the concentration receive a letter of recommendation from the chair based on their cumulative academic record in the concentration. Please contact Heather Gowe (Undergraduate Program Coordinator), or Szonja Szelényi (Director of Undergraduate Studies) for additional information on the Business and Organizational Studies concentration.

Introductory Courses

SOC 101 Introduction to Sociology (III)
4 credits. Fall, M. Macy; spring, S. Szelenyi.
This course introduces the discipline of sociology through a survey of core topics, theoretical approaches, and research methodologies. The first part of the course presents a general introduction to micro and macro sociology and to four major theoretical perspectives: functionalism, conflict, interaction, and exchange. We then apply these perspectives to a series of basic topics. The course conveys an appreciation for sociology as a field of study, as well as a better understanding of the society in which we live and its relation to other cultures. Students hopefully gain deeper insight into how they came to be who they are—the social origins of personality, values, and beliefs, including one's sense of reality and conception of human nature. The course also provides opportunities for hands-on experience in testing sociological theories. No prior theoretical or methodological background is required or presumed.

[SOC 103 Self and Society (also R SOC 103) (III)
3 credits. Not offered 2001–2002. M. Macy.
The course is an introduction to micro-sociology, focusing on social processes within small groups, including the family. Emphasis is on leadership, conformity, social influence, cooperation and competition, distributive justice, and micro analyses of interaction.]

SOC 105 Introduction to Economic Sociology (also R SOC 105) (III)
Fall. 4 credits. C. Leuenberger.
Modern social thought arose out of attempts to explain the relationship between economic development and the social transformations that gave rise to the contemporary world. Classical theorists from Karl Marx and Max Weber to Karl Polanyi focused their writings on emergent capitalist economies and societies. Contemporary social theorists likewise have sought to understand the interaction between capitalism and the social forces reacting against and emerging from modern economic development. From exchange and rational choice theories to network analysis and institutional theory, a central theme in contemporary social thought has been the relationship between the economy and society, economic action and social structure, and rationality and fundamental social processes. This course provides an introduction to social thought and research seeking to understand and explain the relationship between economy and society in the modern era.

SOC 108 Introduction to Social Inequality (III)
Fall. 4 credits. M. Brinton.
This course examines the nature and processes of social and economic inequality in industrial societies. The principal focus is on the contemporary United States, with some comparisons to other industrial societies with different educational and class structures. We examine how social and economic institutions encourage or discourage the use of ascription (i.e. inherited or unchangeable traits) vs. achievement as the basis of rewarding individuals, and we consider how individuals make choices as they face different decision points in their schooling and work. Throughout the course we focus on the varied mechanisms of stratification that sort people into schools and workplaces, and we also consider how to judge the "fairness" of these mechanisms. The readings include theoretical and empirical materials on stratification along race, class, and gender lines, and several book-length ethnographies of workplaces or urban settings.

[SOC 115 Utopia in Theory and Practice (III)
3 credits. Not offered 2001–2002. D. Strang.
People have always sought to imagine and realize a better society, with both inspiring and disastrous results. In this course we discuss the literary utopias of Moore, Morris, and Bellamy, and the dystopias of Huxley, Orwell, and Zamiatin. We also examine real social experiments, including nineteenth-century intentional communities, twentieth-century socialisms and religious cults, and modern ecological, political, and millennial movements. Throughout, the emphasis is on two sociological questions: What kinds of social relationships appear as ideal? How can we tell societies that might work from those that cannot?]

[SOC 165 Gangs (III)
4 credits. Not offered 2001–2002.
R. Grannis.
Gangs have existed for centuries and can be found in many if not most countries of the world. In many neighborhoods in the United States, the majority of young nonwhite males have been identified as gang members. State and local politicians routinely identify gang crime as the most important social issue of our time. Despite this, few people can adequately define what it means to be a gang or a gang member. This course reviews classic gang research and theory, surveys a wide variety of recent gang studies, addresses a series of special topics in gang research, and considers the role of the media in guiding our understanding of gangs.]

General Education Courses

[SOC 200 Social Problems (also R SOC 200) (III)
3 credits. Not offered 2001–2002.
T. Hirschl.
For course description, see R SOC 200.]

[SOC 201 Religion and Family in the U.S. (also R SOC 202 and RELST 203) (III)
3 credits. Not offered 2001–2002.
P. Becker.
This course examines how two fundamental social institutions—religion and the family—are interlinked in American society. As recently as the 1950s, religious institutions were organized around the needs of one dominant family form, the male-breadwinner family with a stay-at-home mother. But since the 1950s, that family form is no longer statistically dominant or culturally normative. How have religious institutions adapted to new family forms? How do religious beliefs influence behavior within families, for example, the raising of children? How do

religious groups foster ideals of family life or influence our beliefs about what are "good" families? How do people's family experiences and family values influence their participation in organized religion? What models of family life are religious groups organized around? We begin to answer these questions by drawing on readings that explore the religion-family link in a variety of religious, ethnic, and social class contexts within the contemporary United States.]

SOC 202 Population Dynamics (also R SOC 201) (III)
Spring. 3 credits. P. Eloundou-Enyeque.
For course description, see R SOC 201.

SOC 203 Work and Family (also WOMNS 203) (III)
Spring. 4 credits. Staff.
Family life is often portrayed in the popular media as a haven away from the harsh realities of public life, suggesting that work and family constitute separate and distinct spheres. By contrast, many sociologists point out the links between work and family, and how these links have different consequences for men and women. This course highlights the responses of individuals, employers, and governments, both in the United States and internationally, to the dilemmas posed by the interface between work and family.

[SOC 204 Race and Ethnic Relations (III)
4 credits. Prerequisite: SOC 101, SOC 103, or R SOC 101. Not offered 2001–2002. Staff.
This course focuses on race and ethnic relations in contemporary perspective. It examines the social and behavioral implications of attributions of race and ethnicity in small group interaction, the world of work, and the larger society. Topics covered include: inequalities in income and employment, affirmative action, ethnic political mobilization, patterns of marriage, and family formation.]

SOC 206 International Development (also R SOC 205) (III)
Spring. 3 credits. Staff.
For course description, see R SOC 205.

SOC 207 Problems in Contemporary Society (III)
Fall. 4 credits. D. Heckathorn.
This course examines contemporary social problems, with a focus on their sources in the organization of society. Modern societies are based on three fundamental types of institutions—social norms, hierarchies, and markets. Each is subject to distinctive types of failures resulting in problems that include poverty, prejudice and discrimination, intolerance and hate, alcohol and drug abuse, physical and mental illness, crime and delinquency, and urban problems. In analyzing these problems we emphasize the institutions through which they are created and perpetuated, and the form of institutional change required to address them.

[SOC 208 Social Inequality (III)
4 credits. Not offered 2001–2002. Staff.
This course reviews contemporary approaches to understanding social inequality and the processes by which it comes to be seen as legitimate, natural, or desirable. We address questions of the following kind: What are the major forms of stratification in human history? Are inequality and poverty inevitable? How many social classes are there in advanced industrial societies? Is there a "ruling class?" Are lifestyles, attitudes, and personalities shaped fundamentally by class membership? Can individuals born into poverty readily escape their class origins and move upward in the class structure? Are social contacts and "luck" important forces in matching individuals to jobs and class positions? What types of social processes serve to maintain and alter racial, ethnic, and gender discrimination in labor markets? Is there an "underclass?" These and other questions are addressed in light of classical and contemporary theory and research.]

SOC 215 Organizations: An Introduction (III)
Spring. 4 credits. D. Strang.
Organizations provide the context for much of our everyday life, and are important not only in their own right but for their impact on our individual and collective choices. This course introduces the sociological study of organizations, from project teams to multinational corporations. Main issues include socialization and group processes within work settings; management from the perspective of the manager and the managed; the organization as a site of inequality and mobility; organizational decision-making; efforts to modify organizations by reforming bureaucracy and hierarchy; and comparisons across nations.

SOC 217 The Sociology of Markets (III)
Spring. 4 credits. M. Brinton.
The exchange of goods and services is a central topic in economics, but it has many social dimensions as well. This course examines how economic exchange is affected by the social and cultural contexts within which it occurs. Central themes of the course include: How do patterns of market exchange emerge? What types of social institutions are necessary to make economic exchange predictable and safe? Why do some services cost money in capitalist societies and others do not? How is "market value" determined? We explore these themes through reading studies that compare markets across time as well as across contemporary societies such as the U.S., Japan, China, and Russia.

SOC 219 Segregation (III)
Spring. 4 credits. R. Grannis.
Over seven decades ago, Robert Park noted that "Physical distances frequently are the indices of social distances." As we near the beginning of a new millennium, very little has changed. Segregation may have disappeared from our public discourse, but it is a very present reality in our cities. This course surveys residential segregation by asking some very basic questions: What does it mean to be segregated? How has segregation been different in different times and places? What are the consequences of segregation? Why does segregation occur? How can illegal segregation persist? What can be done about segregation?

SOC 220 Culture and Conflict in Organizations (III)
Spring. 4 credits. P. Becker.
How do the organizations we belong to shape us? What is organizational identity and how does it come about? How do cultural beliefs shape organizations? What kinds of organizations strike us as legitimate and effective, and why? Organizations may be goal-directed problem solvers, but they're also locations for storing and transmitting social facts, like the hierarchical relations among groups, and powerful ideas, including moral codes. Organizations may seem to evolve naturally, but are often shaped by internal conflicts or powerful outsiders. The first part of this course examines theories of organizational culture and power; the second part consists of case studies of organizations, businesses, religious denominations, little league teams, and social movement organizations.

SOC 221 Inequality and Social Science (III)
Spring. 4 credits. Enrollment limited to 20 students. K. Weeden.
What are the promises and limitations of social science as a tool for understanding the sources and consequences of social inequality? This course introduces the underlying logic of social scientific research in the context of contemporary debates about social inequality: e.g., educational testing and tracking, race-based affirmative action, and the roles of intelligence and parental resources in affecting who gets ahead. Its goals are to encourage students to be critical consumers of social scientific data, evidence, and discourse and to develop their own rigorous, informed explanations of social phenomena.

SOC 246 Drugs and Society (III)
Fall. 4 credits. D. Heckathorn.
The course focuses on drug use and abuse as a social rather than as a medical or psychopathological phenomenon. Specifically, the course deals with the history of drug use and regulatory attempts in the United States and around the world; the relationship between drug use and racism/class conflict; pharmacology and use patterns related to specific drugs; perspectives on the etiology of drug use/abuse; AIDS prevention and harm reduction interventions; drug-using subcultures; drug policy, drug legislation, and drug enforcement; and the promotion and condemnation of drug activities in the mass media.

[SOC 250 Religion and Public Life (also RELST 249) (III)
3 credits. Not offered 2001–2002.
P. Becker.
This course explores how religion provides a basis for moral critique, political mobilization, and social identity in a modern society. The first part introduces basic issues—definitions of religion, the sociological approach to the study of religion, and religion and modernity. In the main body of the course, we read studies of specific religious groups and organizations in the contemporary United States, examining such questions as: How does religion provide a basis for gender identity and gender norms? What do religious groups and discourses contribute to public debate on issues ranging from economic justice to abortion? How do religious leaders mobilize citizens for social action in their communities?]

SOC 251 Families and the Life Course (also HD 251) (III)
Spring. 3 credits. E. Wethington.
For course description, see HD 250.

SOC 265 Latinos in the U.S. (also LSP 201 and R SOC 265) (III)
Spring. 3 credits (4-credit option available). H. Velez.
This course is an exploration and analysis of the Hispanic experience in the United States. It examines the sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are

suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

Methods and Statistics Courses

SOC 293 Inequality, Diversity, and Justice (also CRP 293, GOVT 293, PHIL 193, SOC 293) (III or IV)
Fall. 4 credits. No prerequisites: intended for freshmen and sophomores. R. Miller, V. Nee.
An interdisciplinary discussion of the nature and moral significance of social inequality, diversity, and poverty and of the search for just responses to them. How unequal are economic opportunities? What are the causes of poverty? To what extent is greater equality a demand of justice? Are traditional welfare programs an appropriate response to poverty? What special significance have race and gender as sources of inequality? Do they merit special remedies such as affirmative action? How should governments deal with religious diversity and other differences in ultimate values? For example, should abortion statutes be neutral toward rival views of the importance of potential human life? What are the causes of worldwide inequality? To what extent do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of social causes, and legal reasoning interact in the search for answers to these questions. To provide these resources, the course is taught by leading faculty researchers in philosophy, political theory, the social sciences, and law.

SOC 301 Evaluating Statistical Evidence (II)
Fall. 4 credits. S. Szelényi.
A first course in statistical evidence in the social sciences, with emphasis on statistical inference and multiple regression models. Theory is supplemented with numerous applications.

SOC 303 Design and Measurement (III)
Spring. 4 credits. Prerequisite: at least one course in sociology. S. Caldwell.
This course covers the foundations of sociological analysis; issues arising from using humans as data sources; the quality of our primary data; methods of data collection; research designs in wide use and their limitations; and pragmatic considerations in doing research on humans, organizations, communities, and nations.

SOC 304 Social Networks and Social Processes (III)
Fall. 4 credits. D. Strang.
How do groups self-segregate? What leads fashions to rise and fall? How do rumors spread? How do communities form and police themselves on the Internet? This course examines these kinds of issues through the study of fundamental social processes such as exchange, diffusion, and group formation. We focus on models that can be explored through computer simulation and improved through observation.

Intermediate Courses

[SOC 309 The Sociology of Marriage (also SOC 509) (III)
4 credits. Not offered 2001–2002. Staff.
Contemporary debate on the nature of the family in the United States often assumes a simplistic decay of the "traditional marriage." This course unpacks the myths and facts that undergird this model. We overview the historical patterns of marriage in the United States, examine data on contemporary union formation and dissolution and the consequences, and explore various theoretical models of marriage and its decline.]

[SOC 311 Group Solidarity (III)
4 credits. Not offered 2001–2002. M. Macy.
What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.]

SOC 316 Gender Inequality (III)
Fall. 4 credits. S. Szelényi.
This course offers a comprehensive overview of historical and contemporary patterns of gender stratification. The first few weeks are devoted to the examination of different ideas (biological, functionalist, feminist) about gender inequality. The remainder of the course involves both theoretical analyses and empirical investigations of four substantive areas: the historical development of gender stratification, the nature of gender inequality in contemporary societies, cross-national comparison of gender inequality, and strategies for social change. Specific topics include: division of labor between men and women; relationship between social class and gender; dynamics of occupational sex segregation; gender differences in social mobility, socialization, and educational attainment; and racial and cross-national variations in gender inequality. Each section includes examination of key theoretical debates and a survey of recent feminist research that is relevant to those debates.

SOC 323 Social Networks (also SOC 523) (III)
Spring. 4 credits. R. Grannis.
A critical survey of theories and techniques of structural analysis in sociology, centering on the usefulness of social network analysis in providing integration of studies at different levels of generality. Applications in the areas of the sociology of organizations, community studies, social stratification, and dependence relations among nations. Emphasis on the mutual relevance of theories and operational research procedures.

SOC 324 Environment and Society (also S&TS 324 and R SOC 324) (III)
Spring. 3 credits. L. Glenna.
For course description, see R SOC 324.

[SOC 325 Socialist Societies (III)
3 credits. Not offered 2001–2002.
S. Szelényi.
This course begins by surveying the idea of socialism from the Romantic tradition of William Morris to the scientific theory of Karl Marx and the unique doctrine of Mao Tsetung. These visions are contrasted to the realities of actually existing socialist societies—especially those of Eastern Europe. Some of the themes examined include: the problems of centrally managed economies, the extent and dynamics of social inequalities, dissent and opposition under socialism, and strategies for economic reform. The course concludes by evaluating a number of alternative views on the nature of these societies and by discussing their post-communist transformation.]

SOC 326 Social Policy (also SOC 526) (III)
Fall. 4 credits. S. Caldwell.
The dramatic growth of the policy research sector as an institutional and intellectual force signals the changing relationship of social science to social policy in the United States. With an eye on that relationship, this course examines the development of social policy in selected areas, among them welfare, poverty, housing, crime, and health. The policy research sector itself—people, values, and institutions—is also surveyed.

[SOC 333 Primate Societies (III)
3 credits. Not offered 2001–2002.
R. Grannis.
All primates (including humans) share a common social and cultural, as well as biological, heritage which was bequeathed to us by our common ancestors. This shared inheritance is even more pronounced between humans and their closest nonhuman relatives, chimpanzees and gorillas. This course surveys the social behaviors and cultural forms of our primate cousins with a special focus on baboons, chimpanzees, and gorillas. We begin by reviewing the diversity of primates and their societies. We then look at primate socioecology including demography, hunting and gathering, and kinship. Next, we examine the politics, economics, communication, and culture of some of our more closely related primate cousins. In addition to sharing a common past, all primates (except for some recent humans) are hunter-gatherers with similar biological capacities and needs who have solved similar socioecological problems. We end the course by considering the implications of these findings for our lives as human primates.]

SOC 340 Health, Behavior, and Health Policy (III)
Spring. 4 credits. S. Caldwell.
This course examines the social contexts of physical and mental health, illness and medical care; its purpose is to explore the contributions of social science to health promotion and health policy. Topic areas include: the social context of health, disease and illness; the social organization of health services; use of health services; effectiveness of health service use; health promotion and disease prevention; and national health care policies.

SOC 341 Modern European Society and Politics (also GOVT 341) (III)
Spring. 4 credits. S. Tarrow.
For course description, see GOVT 341.

SOC 352 The Sociology of Contemporary Culture (III)
Spring. 4 credits. C. Leuenberger.
This course introduces the rapidly expanding field at the intersection of sociology and cultural studies. It provides an introduction to theoretical debates in cultural studies and to sociological studies of popular culture. We discuss the emergence of the tourist industry, the significance of consumption in modern life, narratives in popular films, the culture of music and art, the use of rhetoric in social life, cultural analyses of science, and the social construction of self, bodies, and identities.

[SOC 353 Knowledge and Society (III)
3 credits. Not offered 2001–2002.
C. Leuenberger.
This course focuses on the historical evolution of the sociology of knowledge as a theoretical paradigm and an empirical research field. We examine the phenomenological origins of the sociology of knowledge and many of its central texts. We study how it has been applied to such areas as personhood, interaction, religion, identity, and the emotions. We also consider epistemological questions that arise, and cover various theoretical and empirical approaches which have been influenced by the sociology of knowledge such as ethnomethodology, conversation analysis, and the sociology of science and technology.]

SOC 357 Schooling and Society (III)
Spring. 4 credits. S. Morgan.
After an examination of alternative theories of the development and changing function of educational institutions in society, this course examines explanations for why individuals obtain educational training, how an individual's family background and race affect his or her trajectory through the educational system, and how and why society confers advantages on educated individuals. Following a review of recent empirical research on effective schools, the course concludes with an examination of current policy debates in the United States, focusing primarily on school choice, vouchers, and financial aid for a college education.

[SOC 370 Careers (also SOC 570) (III)
4 credits. Not offered 2001–2002. Staff.
By examining various career paths, we will consider the implications of career as a continuous process or as a sequence of positions. We will explore the differences and similarities among different career paths and lay out the patterns and structures of career formation from a sociological point of view. We will also discuss the settings in which career development takes place, giving some comparative attention to ways of organizing careers in other societies.]

SOC 371 Comparative Social Stratification (also R SOC 370) (III)
Fall. 3 credits. S. Feldman.
For course description, see R SOC 370.

[SOC 375 Classical Theory (III)
3 credits. Not offered 2001–2002.
S. Szelényi.
The course introduces students to major macro-sociological paradigms and encourages them to participate in "cross-paradigm" debates. The three main theorists of sociology (i.e., Marx, Durkheim, and Weber) are compared with respect to their approaches to the social sciences, their views on human history, their conceptions of capitalist society, and their ideas on social change. The assigned readings focus on the original writings of these theorists, while the lectures provide the requisite socio-historical context.]

[SOC 380 Gender, Ideology, and Culture (also WOMNS 380) (III)
4 credits. Not offered 2001–2002.
P. Becker.
This course explores representations of women in popular culture, including images, narratives, and religious practices. We examine the relationship between popular culture and ideology, and look at how women "read" popular culture. The aim of the course is to enable students to think critically and analyze the effects of ideological representations of difference on personal identity construction, status, and power relationships. Readings are drawn mostly from the sociology of culture and cultural studies; most texts deal with popular culture and gender in the ninteenth- and twentieth-century United States.]

[SOC 393 Sociology of War and Peace (III)
4 credits. Not offered 2001–2002.
R. M. Williams, Jr.
Every human group, community, or society presents many examples of altruism, helping, cooperation, agreement, and social harmony. Each grouping or society also manifests numerous examples of competition, rivalry, opposition, disagreement, conflict, and violence. Both conflict and cooperation are permanent and common aspects of the human condition. Collective conflicts, especially wars and revolutions, are frequent and dramatic events. But "peace" and "war" are equally active social processes, not passive happenings. This course describes various commonly accepted but erroneous notions of the causes and consequences of war and deterrence. It deals with the major theories concerning the sources of war in international and intranational social systems. The last half of the course analyzes the modes, techniques, and outcomes of efforts to restrict, regulate, and resolve international conflicts.]

Advanced Courses

The following courses are intended for advanced undergraduates with substantial preparation, as well as for graduate students in sociology and related disciplines. The normal prerequisite for all 400-level courses is one introductory course plus 301 (or an equivalent statistics course). Students who are not sure whether their background is sufficient for a particular course should consult the professor.

[SOC 404 Economy and Family—Interrelationships over the Life Course (also SOC 504) (III)
4 credits. Not offered 2001–2002.
M. Clarkberg.
While sociologists have often argued that the modern family has shed most of its "productive" functions, economic models have never been more central in the study of the family. This course explores the emerging dialogue between economists and family scholars along two related dimensions. First, we examine the reciprocal relationship between the structure of the economy (including income, careers, and workplace characteristics and policies) and family structure and outcomes. Second, we weigh the contribution of economic or "rational actor" models to the study of family behaviors. These related economic processes are used to examine marriage and divorce, time use and the division of labor within families, population growth, and the dynamics of health and aging.]

SOC 408 Qualitative Methods (also SOC 508) (III)
Fall. 4 credits. P. Becker.
This course is designed to introduce students to qualitative research. We focus on interviewing, document review, and participant observation, although we also talk about validity, reliability, ethics, and research-involvement, issues that are applicable to qualitative research more broadly. Each student designs and carries out a semester-length research project, keeps a field journal, and completes a final research report.

SOC 419 Segregation (III)
Spring. 4 credits. R. Grannis.
For course description, see SOC 219.

[SOC 427 The Professions: Organization and Control (also ILROB 427) (III)
Fall. 3 credits. Prerequisite: permision of the instructor. Not offered 2001–2002.
P. Tolbert.
For course description, see ILROB 427.]

SOC 429 Culture and Agency (also SOC 529) (III)
Fall. 4 credits. P. Becker.
This course looks at the development of sociological theory on questions of culture and agency. Starting with various reflection or materialist approaches to culture that decenter agency, we then follow the development of theories that explicitly link culture to actors and events in an attempt to account for both social reproduction and social change. The readings cover a broad time span and a variety of intellectual approaches, including critical theory and cultural studies, but center on the sociology of culture.

SOC 437 Social Demography (also R SOC 438) (III)
Fall. 3 credits. D. Gurak.
For course description, see R SOC 438.

[SOC 438 Immigration and Ethnic Identity (III)
4 credits. Not offered 2001–2002. V. Nee.
Immigration has been a central process in the peopling of American society. The early immigration to the United States involved primarily the migration and settlement of European national groups. Since 1965, the mix of immigration has shifted to include an increasing diversity of ethnic groups, especially from Latin America and Asia. As American society moves into an era of increasing ethnic diversity, issues of ethnic boundaries and identities become increasingly complex and problematic. This course seeks to examine the causes of international migration, the dynamics of immigrant incorporation into American society, and the making of new ethnic groups and identities.]

SOC 457 Health and Social Behavior (also HD 457) (III)
Fall. 3 credits. Prerequisites: HD 250, SOC 101, R SOC 101, or SOC 251 **and** a course in statistics. Letter grades only.
E. Wethington.
For course description, see HD 457.

[SOC 480/580 Identity and Interest in Collective Action (III)
4 credits. Not offered 2001–2002. M. Macy.

This seminar examines the problem of collective action from alternative theoretical perspectives: one centered on shared *interests*, the other on common *identities*. The former claims that groups are held together because the members are interdependent and thus benefit from cooperating in a common endeavor. Others argue that effective mobilization may depend on affective ties among participants who share a salient demarcation. We explore this debate, and its possible resolution, through an examination of formal theoretical studies (especially computer simulation) as well as empirical research using experimentation and comparative case analysis. Key concepts addressed include social dilemmas (and game-theoretic analysis), the free-rider problem, rational choice theory, formal and informal social control, social identity theory, and the role of networks and institutions as mechanisms for reconciling the tension between individual self-interest and collective obligations.]

SOC 491 Independent Study
Fall or spring. 1–4 credits. This is for undergraduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure the agreement of a faculty member to serve as supervisor for the project throughout the term. Graduate students should enroll in 891–892.

SOC 495 Honors Research
Fall or spring. 4 credits. Limited to sociology majors in their senior year. Prerequisite: permission of instructor.

SOC 496 Honors Thesis: Senior Year
Fall or spring. 4 credits. Prerequisite: Sociology 495.

Graduate Core Courses

These courses are primarily for graduate students in sociology but may be taken by other graduate students with permission of the instructor.

SOC 501 Basic Problems in Sociology I
Fall. 4 credits. V. Nee.
Analysis of theory shaping current sociological research. Examination of several central problems in sociological inquiry provides an occasion for understanding tensions and continuities between classical and contemporary approaches, for indicating the prospects for unifying microsociological and macrosociological orientations, and for developing a critical appreciation of efforts to integrate theory and research.

SOC 502 Basic Problems in Sociology II
Spring. 4 credits. D. Heckathorn.
Continuation of SOC 501. Emphasis is on the logical analysis of theoretical perspectives, theories, and theoretical research programs shaping current sociological research. The course includes an introduction to basic concepts used in the logical analysis of theories and examines their application to specific theories and theoretical research programs. Theoretical perspectives include functionalism, social exchange, and interactionism.

SOC 505 Research Methods I: The Logic of Social Inference
Fall. 4 credits. Prerequisite: a first course in statistics and probability. M. Clarkberg.
This course is an introduction to techniques of social inference. We cover research methods, sources of evidence, model design, and questions of empirical validity.

SOC 506 Research Methods II
Spring. 4 credits. S. Morgan.
This is a course on advanced linear regression analysis in theory and practice. After a review of classical bivariate regression and elementary matrix algebra, the course progresses under the credible assumption that the most important fundamentals of data analysis techniques can be taught in the context of simple multivariate linear models. Accordingly, the course provides a relatively formal treatment of the identification and estimation of single equation OLS and GLS regression models, instrumental variable models, traditional path models, and multiple indicator models. Interspersed with this material, the course addresses complications of regression modeling for the practicing researcher including: missing data problems, measurement error, regression diagnostics, weighting, and inference for surveys. The course concludes with a brief introduction to nonlinear regression, counterfactual models of causality, Bayesian inference, and hierarchical models.

Graduate Seminars

These seminars are primarily for graduate students but may be taken by qualified advanced undergraduates who have permission of the instructor. The seminars offered in each term are determined in part by the interests of students, but it is unlikely that any seminar will be offered more frequently than every other year. The list below indicates seminars that are likely to be offered, but others may be added and some may be deleted. Students should check with the department before each term.

[SOC 504 Economy and Family (also SOC 404)
4 credits. Not offered 2001–2002. M. Clarkberg.
For course description, see SOC 404.]

SOC 508 Qualitative Methods (also SOC 408)
Fall. 4 credits. P. Becker.
For course description, see SOC 408.

[SOC 509 The Sociology of Marriage (also SOC 309)
4 credits. Not offered 2001–2002. Staff.
For course description, see SOC 309.]

SOC 510 Seminar on Comparative Societal Analysis
Spring. 3 credits. Open to advanced graduate students throughout the social sciences, with permission of instructor. M. Brinton.
This seminar is intended for advanced graduate students interested in comparative methods and research in the social sciences. It is offered in conjunction with the Comparative Societal Analysis program in the Einaudi Center for International Studies. Students enrolled for credit write critiques of papers presented at the seminar by faculty members and other graduate students, and work on their own project. Some weeks are devoted to collective reading and analysis of background work. Students may enroll for more than one semester.

SOC 518 Social Inequality: Contemporary Theories, Debates, and Models
Fall. 4 credits. D. Grusky.
This course serves as an introduction to contemporary theories, debates, and models regarding the structure of social classes, the determinants of social mobility, the sources and causes of racial, ethnic, and gender-based inequality, and the putative rise of postmodern forms of stratification. The twofold objective is to both review contemporary theorizing and to identify areas in which new theories, hypotheses, and research agendas might be fruitfully developed.

SOC 519 Workshop on Social Inequality
Spring. 4 credits. K. Weeden.
This workshop provides a forum for students, faculty, and guest speakers to present and discuss their current research projects related to social inequality.

SOC 523 Social Networks (also SOC 323)
Spring. 4 credits. R. Grannis.
For course description, see SOC 323.

SOC 526 Social Policy (also SOC 326)
Fall. 4 credits. S. Caldwell.
For course description, see SOC 326.

[SOC 527 Artificial Social Life
4 credits. Not offered 2001–2002. M. Macy.
This seminar is an introduction to computer simulation. The course surveys the history of social simulation and introduces students to complexity theory, game theory, and evolutionary models of social change. The remainder of the course (nine weeks) teaches students to program in Delphi and gives them simulation programs to modify as a class project.]

SOC 529 Culture and Agency (also SOC 429)
Fall. 4 credits. P. Becker.
For course description, see SOC 429.

[SOC 531 Group Conflict and the Nation-State
4 credits. Not offered 2001–2002. D. Strang.
The growth of nationalism and the conflict over which groups control the state form a central dynamic in the global political order. Such conflicts appear particularly virulent today, when internal aggression and ethnic cleansing are a larger threat than inter-state war. We examine nationalism, group conflict, and the process of group formation. Questions include: Why and when do groups struggle for national independence? What leads some multiethnic societies to be stable and others not? How are high levels of conflict over ethnic/religious makeup of the state related to the expanding reach of the global market? And in what ways are national issues comparable with group formation and conflict in other settings, such as neighborhoods or academic disciplines?]

SOC 546 Economic Sociology
Spring. 4 credits. M. Brinton.
This course introduces the field of economic sociology and covers major topics addressed by sociologists studying the intersection of economy and society. We begin with classic statements on economic sociology and then

move to the invigoration of the field in recent years, reading works that have been instrumental in this invigoration. Consideration is given to the several variants of "institutionalism" that have informed the sociological study of markets, organizations, and economic exchange.

SOC 570 Theories of the Family and the Life Course
Spring. 4 credits. M. Clarkberg.
This course provides an analysis of the theoretical approaches informing sociological understandings of the family and the human life course. Approaches include power and exchange models, interactionism, the new home economics, and life course approaches. Emphasis is on understanding the conflict and congruence between existing theoretical frameworks, and on translating theoretical issues into empirical research questions.

[SOC 575 Seminar in Institutions and Rationality
2 credits. Not offered 2001–2002. V. Nee.
This year-long seminar examines the theoretical logic and assumptions of the new institutionalism in sociology and other social sciences. Understanding the part played by informal constraints of social norms and networks and by formal institutional arrangements (i.e., contracts, property rights, laws, regulations, and the state) encompass the domain of study. The seminar focuses on comparative analysis and case studies illuminating and explaining the part played by institutions in structuring the economic and social transactions of society and specifying the causal mechanisms shaping path dependent institutional change.]

[SOC 580 Simulating Social Dilemmas (also SOC 480)
4 credits. Not offered 2001–2002. M. Macy.
For course description, see SOC 480.]

[SOC 583 Transitions to Market Economies in China and Eastern Europe
4 credits. Not offered 2001–2002. V. Nee.
This course examines the problems and prospects of transitions to markets in China and Eastern Europe. It introduces concepts for understanding the transformation of state socialist economies and analyzes important social and economic developments since 1988. Topics include privatization, joint ventures, new capital markets, entrepreneurship, and labor relations in these changing economies.]

SOC 590 Special Topics: Research Methods
Fall. 4 credits. M. Macy, D. Strang.
This course covers special topics in the analysis of quantitative and qualitative data. The topics covered vary from year to year, but are typically chosen from such possibilities as: networks, social simulation, Bayesian methods, game theory, qualitative research methods, and laboratory experimentation. In fall 2001 the course will include a one-half semester module on event history analysis, and a one-half semester module on social simulation.

SOC 591 Special Seminars in Sociology
Fall and spring. 2–4 credits.
These graduate seminars are offered irregularly. Topics, credit, and instructors vary from semester to semester. Students should look at the sociology department bulletin board at the beginning of each semester for current offerings.

SOC 606–607 Sociology Colloquium
Fall and spring. No credit. Required of all sociology graduate students.
A series of talks representative of current research interests in sociology, given by distinguished visitors and faculty members.

SOC 608 Proseminar in Sociology
Fall. 1 credit. Enrollment restricted to first-semester sociology graduate students.
Discussion of the current state of sociology and of the research interests of members of the graduate field; taught by all members of the field.

SOC 660 Social Movements
Fall. 4 credits. S. Tarrow.
For course description, see GOVT 660.

SOC 680 Workshop on Transnational Contention (also GOVT 681)
Fall. 4 credits. S. Tarrow.
For course description, see GOVT 681.

SOC 691 Independent Study
Fall or spring. 2–4 credits. Prerequisite: graduate status and permission of a faculty member willing to supervise the project. Staff.
For graduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure the agreement of a faculty member to serve as supervisor for the project throughout the term.

[SOC 725 Analysis of Published Research in Organizational Behavior (also ILROB 725)
3 credits. Not offered 2001–2002. P. Tolbert.
For course description, see ILR 725.]

SOC 891–892 Graduate Research
891, fall; 892, spring. Up to 4 credits each term. Prerequisite: graduate status and permission of a faculty member willing to supervise the project.

SOC 895–896 Thesis Research
895, fall; 896, spring. Up to 6 credits each term. Prerequisite: permission of thesis supervisor.

THEATRE, FILM & DANCE

D. Bathrick, chair; R. Archer, S. Brookhouse, J. Chu, S. Cole, D. Feldshuh, A. Fogelsanger, (director of the undergraduate program in dance); D. Fredericksen, (director of the undergraduate program in film); J. E. Gainor, (director of graduate studies); K. Goetz, D. Hall, E. Intemann, J. Kovar, B. Levitt (on leave fall 2001 and spring 2002), P. Lillard, B. Milles, J. Morgenroth, M. Rivchin, R. Schneider, J. Self, B. Suber, A. Van Dyke, (director of undergraduate studies); A. Villarejo

Through its courses and production laboratories, the department provides students with a wide range of opportunities in theatre, film, and dance. It offers a theatre arts major with concentration in theatre or film and a major in dance. Majors in these three areas educate students in accordance with the general liberal arts ethic of the college. The programs in dance and film and the advanced undergraduate theatre program give some measure of professional preparation in those arts as well. The department encourages academic and studio participation by students from all disciplines. In the coming year the Department will be changing over to separate major status in the areas of theatre and film, which up to now have been listed as concentrations within the Theatre Arts Major. (Dance has always had separate major status.) As part of the change-over process, this year's catalogue lists for the first time all the course and curricular information for each of the majors in three separate sections.

Theatre Arts Major

Theatre Studies

The theatre concentration offers studies in the history of theatre, dramatic theory and criticism, playwriting, acting, directing, design/technology, and stage management. Students interested in the Theatre Arts major should consult with Alison Van Dyke (Director of Undergraduate Studies, Theatre, Film & Dance).

Course requirements for theatre concentration:		**Credits**
1)	**THETR 240** and **THETR 241** (two-semester introduction to theatre)	8
	THETR 250 Introduction to Theatre Design and Technology	4
	THETR 280 Introduction to Acting	3
2)	Four laboratory courses distributed as follows:	**Credits**
	THETR 151 Production Lab I	1–3
	THETR 153, THETR 253, or **THETR 353** Stage Management Lab I, II, or III	1–3
	THETR 155 Rehearsal and Performance or **THETR 151** in a different area	1–3
	THETR 251 or **THETR 351** Production Lab II or III	1–4
3)	Four courses in the area of **Theatre Studies** (see Theatre Studies section of	

theatre courses) chosen in the following manner:

one course must be at 300 level

one course must be at 400 level

two additional courses at the 300 or above level

one of the four courses must be pre–twentieth century.

4) Three courses (at least 9 credits) in other Theatre courses chosen in consultation with the faculty adviser. Course taken to qualify for admission to the Advanced Undergraduate Theatre Program (described below) may also be used to fulfill this requirement.

5) Courses in which a student receives a grade below "C" cannot be used to fulfill the requirements for a Theatre Arts major.

Honors

The Theatre Arts honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be part of the honors program the student must maintain a GPA of 3.5 in classes for the theatre major and an average of 3.0 in all courses. Students must consult with their advisers in the spring of their junior year in order to enroll in the honors programs.

The Advanced Undergraduate Theatre Program

The department offers advanced study in directing, playwriting, design/technology, and stage management to students who qualify on the basis of outstanding achievement in course work. Admission to the AUTP is by invitation of the area faculty supervisor and the completion of a recommended "track" of courses or equivalent experience. (For recommended courses of study please see listing of courses at end of departmental listings.) Approval process will include a portfolio review and/or interview. The program provides students with intensive study in theatre as well as the opportunity to collaborate with professional faculty and guest artists.

Independent Study, Internships and Honors

THETR 300 Independent Study
Fall, spring, or summer. 1–4 credits.
Independent study in theatre, film or dance allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 Schwartz Center.

THETR 485 Undergraduate Internship
Fall, spring, or summer. 1–3 credits.
To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *prior* to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

THETR 495 Honors Research Tutorial
Fall, spring. 4 credits. Limited to Honors students in Theatre, Film and Dance.
This course is the first of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

THETR 496 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance.
This course is the second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

First-Year Writing Seminars

Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

General Survey Courses

THETR 230 Creating Theatre (IV)
Spring. 3 credits. Limited to 25 students. D. Hall and faculty.
An introduction to theatrical production for the nonmajor. Students develop a new critical perspective of the performing arts by examining the creation of theatre onstage and backstage through lectures, demonstrations, discussions with various faculty and staff at the Center for Theatre Arts, and by attending department productions. Some writing is required.

THETR 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also ENGL 301 and MUSIC 372) (IV)
Spring. 4 credits. Limited to 40 students.
For description, see ENGL 301.

[THETR 430 Introduction to Theatre Management
Fall. 4 credits. Limited to 15 students. Not offered 2001–2002. J. E. Gainor.
This class is designed to introduce students to the profession of theatre management. The class will be a project-oriented study of components of the field, such as marketing, fundraising, contracts, organizational structures, personnel management, accounting, and box office.]

Theatre Studies Courses

[THETR 223 The Comic Theater (also COM L 223 and CLASS 223) # (IV)
Spring. 3 credits. Not offered 2001–2002. J. Rusten.
For description, see CLASS 223.]

THETR 240 Introduction to World Theatre I @ # (IV)
Fall. 4 credits. R. Schneider.
A survey of the roots of theatrical representation around the world from ritual practice to classical Greek and Roman theatre as well as Indian, Chinese, Japanese, African, and native performance. A charting of major developments in the theatre—playwriting, acting, staging, architecture—through the seventeenth century.

THETR 241 Introduction to World Theatre II # (IV)
Spring. 4 credits. Prerequisite: THETR 240. R. Schneider.
A survey of the major developments and innovations in world theatre since 1642, exploring the evolution of naturalism, the birth of the director, as well as the emergence of the avant-garde in the West and its supposed demise today. This course examines the impact of colonialism on theatre practices around the world.

[THETR 320 Queer Theatre (also ENGL 352 and WOMNS 320) (IV)
Spring. 4 credits. Limited to 20 students. Not offered 2001–2002. J. E. Gainor.
What is Queer Theatre and did it exist before the politicization of Queer Identity? Starting with the Renaissance in England, we examine dramatic, critical, historical, and other writing as we pose questions about spectatorship, visibility and professionalism. Evening film screenings are required.]

[THETR 322 Russian Drama and Theatre (also RUSSL 332) (IV)
Spring. 4 credits. Not offered 2001–2002. S. Senderovich.
See RUSSL 322 for description.]

[THETR 332 Medieval and Renaissance Theatre (also COM L 332) (IV)
Spring. 4 credits. Prerequisites: THETR 240 or permission of instructor. Not offered 2001–2002. J. E. Gainor.
Besides the discussion of representative plays from these periods, this class may focus on questions such as the staging of medieval drama, the relation between the church and the community, and the ways in which historians and critics have interpreted the Renaissance, especially in light of class, race, and gender on stage as well as in the audience.]

[THETR 333 European Drama 1660–1900: Moliere to Ibsen (also ENGL 335 and COM L 336) (IV)
Spring. 4 credits. Not offered 2001–2002. R. Parker.
See ENGL 335 for description.]

THETR 335 Modern Western Drama, Modern Western Theater: Theory and Practice (also COM L 335 and ART H 338) (IV)
Fall. 4 credits. R. Schneider.
A study of drama and the cultural contexts of its performance from the mid-nineteenth century to the mid-twentieth century in Europe and America. We move from symbolism and naturalism through to constructivism, expressionism, dadaism, futurism, surrealism and on to Brecht and Artaud and a few of their more contemporary descendants. Students engage in performance projects as well as text analysis.

THETR 336 American Drama and Theatre (also ENGL 336 and AM ST 334) (IV)
Fall. 4 credits. Limited to 25 students. Prerequisite: permission of instructor. J. E. Gainor.
A survey of American theatre from 1900–1960. Emphasis is placed on the relationship among theatre, culture, and history.

THETR 337 Contemporary American Theatre (also ENGL 337) (IV)
Spring. 4 credits. Limited to 20 students. J. E. Gainor.

A survey of American drama and theatre post-1960. Particular emphasis will be placed on plays by women and dramatists of color. We explore questions of identity and theatrical responses to contemporary American culture.

THETR 339 The Avant-Garde: Dead or Alive? (IV)
Spring. 4 credits. Limited to 15 students. R. Schneider.
This class will explore experimental performance today, with concentration on the performative bases of the European and American Avant-Garde in art and in theater. We engage in the debate about whether the avant garde is "dead" or not, based on contemporary examples. We also explore whether or not there was/is an "avant-garde" in other parts of the world—Africa, Japan, India, and so on. We begin by studying the historical avant-garde, but move quickly to the "neo-avant-garde" and to theories and practices of theatrical postmodernism and performative installation art. Students make performative/art work as well as engage in text analysis.

[THETR 345 The Tragic Theater (also CLASS 345 and COM L 344) (IV)
Spring. 4 credits. Limited to 40 students. Not offered 2001–2002. F. Ahl.
See CLASS 345 for description.]

[THETR 372 English Drama to 1700 (also ENGL 372) # (IV)
Fall. 4 credits. Not offered 2001–2002. S. McMillin.
See ENGL 372 for description.]

[THETR 373 English Drama from 1700 to the Present (also ENGL 373) (IV)
Spring. 4 credits. Not offered 2001–2002. S. McMillin.
See ENGL 373 for description.]

[THETR 403 Ritual, Play, Spectacle, Act: Performing Culture (also THETR 603) (IV)
Fall. 4 credits. Not offered 2001–2002. R. Schneider.
Taking a broad spectrum approach to performance, this course includes anthropological texts on ritual and play, sociological texts on performances in everyday life, literary studies texts on "performatives" in speech and writing, folklore studies on parades and reenactments, psychological and philosophical studies on the role of performance in the formation of identity, as well as standard texts of the theater. We consider the distinctions between play, ritual, spectacle, festival, theater, and the "visual" arts. We explore the differences between spectating and witnessing and examine studies on audience behavior. At the base of our inquiry is the broad issue of the role of representational practices within culture and among cultures. If, as Barbara Meyerhoff has written, we understand ourselves by showing ourselves to ourselves, what role does "showing" have in construction of the selves we seek to understand? Why is postmodern culture often called the "society of the spectacle" (Debord)? If, as Aristotle claimed, we are mimetic creatures at base, which comes first—representation or reality? Looking closely at the notion of "live" art, we weigh theorists who claim that performance is ephemeral and disappearing against those who claim that performance, such as oral history, is resilient and enduring. Students have the opportunity to do fieldwork, create performative works, and engage in scholarly study.]

[THETR 405 Operatic Contacts (also S HUM 405, GERST 404, COM L 408) (IV)
Fall. 4 credits. Permission of instructor. Limited to 15 students. Not offered 2001–2002. A. Groos.
See Society for the Humanities for complete description.]

[THETR 420 Brecht, Artaud, Mueller, Wilson (also GERST 430 and COM L 430) (IV)
Fall. 4 credits. Not offered 2001–2002. D. Bathrick.
See GERST 430 for description.]

THETR 423/623 Translation for the Theatre (also COM L 446/646) (IV)
Spring. 4 credits. Prerequisites: proficiency in language other then English; coursework in dramatic literature, directing, or playwriting. J. E. Gainor.
What is involved in the process of translation for the theatre and what makes a translation effective on stage? What should factor into our selection or creation process for theatrical translations? Using a case-study format for the first half of the term, we examine important dramatic texts in their English translations to consider such issues as humor, colloquial language, political and cultural allusion, poetics, and the use of "literal translation". Dramatists considered may include Aristophanes, Moliere, Chekov, and others. We begin with an overview of translation theory and then move into specifically theatrical concerns, especially from directing, playwriting, and dramaturgical perspectives. The second half of the term functions as a writing workshop; each student selects a script and, bearing in mind our theoretical and practical discussions, works towards developing a playable translation as a final project.

[THETR 424 Elizabethan and Jacobean Drama (also ENGL 425) (IV)
Fall. 4 credits. Limited to 15 students. Not offered 2001–2002. B. Adams.
See ENGL 425 for a complete description.]

[THETR 425 Introduction to Dramaturgy and Dramatic Criticism (IV)
4 credits. Prerequisite: THETR 240 and 241, or their equivalents. Limited to 15 students. Not offered 2001–2002. J. E. Gainor.
What is dramaturg? What does a dramaturg do? We examine this position in the theatre in both historical and practical modes. The class is primarily a practicum, involving dramaturgical work on departmental productions, participation with student playwrights on new script development, and practice in the writing of dramatic criticism.]

[THETR 429 Seminar in Theatre History: The Provincetown Players and Greenwich Village Culture, 1915–1922 (also AM ST 430.3 Honors Program; ENGL 426) (IV)
Fall. 4 credits. Not offered 2001–2002. J. E. Gainor.
This seminar explores a number of artistic, political, and social movements emanating from Greenwich Village in the 'teens and 'twenties, and explore their impact on the evolution of American drama. The Provincetown Players, the theatre company that first showcased O'Neill, Glaspell, Millay, and other important American writers, is the focus of our analysis. The seminar is designed as a case study in the critical practice of cultural studies.]

THETR 431 Theory of the Theatre and Drama (also COM L 433) # (IV)
Fall. 4 credits. Prerequisite: some theatre history and dramatic literature work at the 300 level or permission of instructor. D. Bathrick.
A survey of dramatic theory and theories of theatrical representation from Aristotle to the present.

[THETR 433 Dramaturgy: Play and Period (also ENGL 435) (IV)
Fall. 4 credits. Not offered 2001–2002. J. E. Gainor.]

[THETR 435 Special Topics: The Victorian and Edwardian Theatre (also ENGL 422) (IV)
Fall. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. Not offered 2001–2002. J. E. Gainor.
An in-depth exploration of theatre and drama in England from the mid-nineteenth through early twentieth centuries. Topics include melodrama, the social problem play, the popular stage, the conditions of theatrical production, and the impact of European theatre. Representative authors include Robertson, Pinero, Shaw, Wilde, Robins, Galsworthy, and St. John.]

[THETR 436 The Female Dramatic Tradition (also WOMNS 433) (IV)
Spring. 4 credits. Not offered 2001–2002. J. E. Gainor.
Is there a "female dramaturgy?" What is the female tradition in the theatre? The course explores these questions through an investigation of texts by women dramatists, including Hrotsvitha, Aphra Behn, and Caryl Churchill, as well as theory by such critics as Sue Ellen Case and Jill Dolan.]

[THETR 438 East and West German Drama (also GERST 438 and THETR 648) (IV)
4 credits. Not offered 2001–2002. D. Bathrick.
Course covers major historical and textual developments in German theatre from the end of World War II to the present. Leading dramatists from West and East Germany, Switzerland, and Austria (Brecht, Frisch, Durrenmatt, Weiss, Hochhuth, Muller, Braun, Kroetz, Handke, and others) are treated in the light of the political events and aesthetic-dramaturgical traditions from which they emerge and with which they are taking issue.]

[THETR 439 Theatre of Commodities: Advertising, TV, and Performance (also WOMNS 441/641)
Spring. 3 credits. Not offered 2001–2002. R. Schneider and A. Villarejo.
This course explores the employment of bodies and objects as representational emblems of value and desire in late capitalism. We analyze the ways in which desire circulates through print advertising, television, and the avant-garde. We examine sociocultural constructions of the relationship between screen bodies and live bodies, especially as involves advertising and audience. We explore conceptual and culturally inscribed spaces between notions of desire, fulfillment, deferral, and value coding. Throughout, feminist analyses of gender construction and deployment in the realms of the market, popular culture, and "high" art frame our inquiry. Finally we ask questions about the problematic of interventionary tactics in art and popular culture relative to consumption and commodity aesthetics. The

course draws on Williamson, Marx, Benjamin, Freud, Irigaray, de Certeau, Baudrillard, Dienst, Goldman, McClintock, Bordieu, Friedan, Haug, Lee, Fiske, Goffman, Lears, Murray, Taylor, and others as well as numerous print advertisements, television texts, and performance artworks.]

THETR 445 Text Analysis for Production: How to Get from the Text onto the Stage (IV)
Fall. 4 credits. Prerequisite: THETR 240 or THETR 281 or THETR 250 or THETR 398, and permission of instructor. Limited to 15 students. S. Cole.
This course examines the play as the central, essential source for production decisions made by the actor, the director, the designer, and the dramaturg. Students "present" their conclusions about the performance of studied texts through project work as either an actor, director, designer, or dramaturg, as well as through two to three papers.

[THETR 454 American Musical Theatre (also ENGL 454) (IV)
Spring. 4 credits. Prerequisite: ENGL 272 or THETR 240 and 241 and ability to read music at the level of MUSIC 105. Not offered 2001–2002. S. McMillin.
See ENGL 454 for description.]

[THETR 459 Contemporary British Drama (also ENGL 459) (IV)
Fall. 4 credits. Limited to 15 students. Not offered 2001–2002. S. McMillin.
See ENGL 459 for a complete description.]

THETR 461 Asian American and Popular Culture (also AAS 461, AM ST 461, ENGL 461) (IV)
Fall. 4 credits. S. Dave.
For description, see AAS 461.

[THETR 470 The Japanese Noh Theater and Modern Dramatists (also ASIAN 470 and COM L 470) @ (IV)
Fall. 4 credits. Alternates with THETR 471. Not offered 2001–2002. K. Brazell.
For description, see ASIAN 470.]

[THETR 471 Japanese Theatre (also ASIAN 471) @ # (IV)
Fall. 4 credits. Not offered 2001–2002. K. Brazell.
For description, see ASIAN 471.]

[THETR 483 Seminar in Comparative Twentieth-Century Anglophone Drama (also ENGL 483) (IV)
Fall. 4 credits. Some knowledge of classical and avant-garde theories of drama and theatre would be useful, but is not a prerequisite. T 2:30–4:25. Not offered 2001–2002. B. Jeyifo.
The course explores twentieth-century Anglophone drama in diverse areas of the English-speaking world. Through works of Irish, African, Caribbean, and U.S. playwrights like Friel, Soyinka, Fugard, Walcott, and Shange, the seminar is organized around two principal issues: the use of folk, ritual, vernacular, and carnivalesque performance idioms to transform the received genre of Western literary drama and themes of empire, colony, and postcolony in the making of the modern world.]

THETR 600 Proseminar in Theatre Studies
Spring. 4 credits. Limited to Theatre Arts graduate students.
An introduction to the theory and methods involved in the study of the theatre. Attention focuses on pedogogy and the profession in Part I. Part II explores current scholarly trends.

[THETR 637 Seminar in Dramatic Theory (also COM L 638)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. R. Schneider.
Topic varies each semester.]

[THETR 648 East and West German Drama: Post-1945 (also THETR 438 and GERST 438)
3 credits. Not offered 2001–2002. D. Bathrick.]

[THETR 660 Visual Ideology (also COM L 660 and GERST 660)
Spring. 4 credits. Not offered 2001–2002. G. Waite.
For description, see GERST 660.]

[THETR 679 Bertolt Brecht in Context (also GERST 679 and COM L 679)
4 credits. Requirements: seminar paper that will form the basis for an oral presentation for class discussion. Not offered 2001–2002. D. Bathrick.
See GERST 679 for description.]

[THETR 703 Theorizing Film (also ENGL 703 and FRLIT 695)
Fall. 4 credits. Not offered 2001–2002. T. Murray.
See ENGL 703 for description.]

Acting

THETR 155 Rehearsal and Performance
Fall or spring. 1–2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which credit is earned. Limited to students who are assigned roles after tryouts at the department's scheduled auditions. Students should add this course only after they have been assigned roles. S-U grades only.
The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

THETR 205 Rehearsal Workshop
Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production; and by permission. Staff.
This course enables students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the class depends on the needs of a particular production (history, choreography, textwork, dramaturgy, etc).

THETR 280 Introduction to Acting (IV)
Fall or spring. 3 credits. Each section is limited to 16 students. Preregistration and registration only through roster in the department office, 225 Schwartz Center. Staff.
An introduction to the actor's technique and performance skills, exploring the elements necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus is on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

THETR 281 Acting I (IV)
Fall or spring. 3 credits. Each section limited to 14 students. Prerequisites: THETR 280 and audition. Registration only through roster in department office, 225 Schwartz Center. 281 is restricted to sophmores and above. B. Milles.
Practical exploration of the actor's craft through improvisation and exercises in physical and psychological action. Scene study using the plays of Williams, Inge, and Miller.

THETR 282 Standard American Stage Speech (IV)
Fall. 3 credits. Prerequisites: THETR 280 and permission of instructor. Limited to 10 students. A. Van Dyke.
An introduction to Standard American Stage Speech. We study various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet (IPA) as a way to designate the vowel, diphthong, and consonant sounds of spoken English. The goal of this course is to learn speech for use in performing Shakespeare, Shaw, Checkov, Moliere, etc.

THETR 283 Voice and Speech for Performance (IV)
Fall. 3 credits. Limited to 12 students. Primarily for department majors. Prerequisite: permission of instructor. T. Huffman.
Registration only through department roster in 225 Schwartz Center. Development of the speaking voice with additional emphasis on dramatic interpretation.

THETR 284 Speech and Dialects for Performance (IV)
Spring. 3 credits. Limited to 10 students. Primarily for department majors or advance undergraduate training program candidates. Prerequisites: THETR 281 and permission of instructor. A. Van Dyke.
Development of speech and dialects in dramatic text.

THETR 287 Summer Acting Workshop
Summer. 3 credits. Limited to 16 students in a section. B. Levitt and staff.
An introduction to the processes of acting. Practice in training techniques, rehearsal procedures, and methodology.

THETR 380 Acting II (IV)
Fall. 3 credits. Prerequisite: THETR 281 and audition. Limited to 12 students. S. Cole.
A continuation of Acting I. Special consideration is given to a physical approach to characterization using the plays of Chekhov and Ibsen.

THETR 381 Acting III: Advanced Scene Study (IV)
Spring. 3 credits. Prerequisite: THETR 380 and audition. Limited to 10 students. Staff.
This course focuses on advanced problems in language and period style (movement, bows, curtsies, and period dances). Monologues and scenes are drawn from Shakespeare and Moliere.

THETR 385 Advanced Studies in Acting Techniques (IV)
Spring. 3 credits. Prerequisites: THETR 281, audition, and permission of instructor. Limited to 10 students. Topic varies each semester. May be repeated for credit. B. Milles.

[THETR 387 Movement for the Actor
Fall. 3 credits. Prerequisites: THETR 281 and permission of instructor. Limited to 10 students. Not offered 2001–2002. Staff.

Physical skills for the actor are developed through work with LeCoq-based Neutral Mask corporeal mime, and physical acting techniques.]

[THETR 415 The History of Acting (IV)
Spring. 3 credits. Limited to 10 students. Prerequisites: THETR 380 and permission of instructor. Not offered 2001–2002. S. Cole.
A study of the art of acting in its historical and cultural context from the Greeks to the early twentieth century, with an emphasis on an analytical understanding of acting methodology in relation to social context. Lectures and film showings, with student papers and presentations required.]

Directing

THETR 177 Student Laboratory Theatre Company
Spring. 1–2 credits.
The Student Laboratory Theatre Company is a group of student-actors who earn credit by acting in three scenes directed by students taking THETR 498. Students enrolling in SLTC for credit will earn 1 credit for 2 projects and 2 credits for 3 projects. SLTC also meets with directors once a week.

THETR 398 Fundamentals of Directing I (IV)
Fall. 3 credits. Limited to 9 students. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Students should see instructor one year in advance to sign up for course. D. Feldshuh.
Focused, practical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student's awareness of why and how certain stage events communicate effectively to an audience. Each student directs a number of exercises as well as a short scene.

THETR 498 Fundamentals of Directing II (IV)
Spring. 4 credits. Enrollment strictly limited. Prerequisite: THETR 280 and 398, and permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Recommended: THETR 250 and 281. D. Feldshuh.
This course builds on the staging techniques learned in Fundamentals of Directing I. In this course each student directs a series of projects and public presentations focusing on specific directorial challenges.

THETR 499 Practicum In Directing
Fall or spring. 1–4 credits. Prerequisites: THETR 240, 250, 280, 398, 498, and permission of instructor. D. Feldshuh.
This course allows the student who has completed the appropriate prerequisites the opportunity to direct a full presentation of theatre in conjunction with a faculty mentor. It may also involve an internship with a prominent director on campus or the opportunity to assistant direct a faculty or guest director.

Playwriting

THETR 348 Playwriting (IV)
Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. B. Milles.
Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals, and write. The semester culminates in the completion of a 20- to 30-minute one-act play.

[THETR 349 Advanced Playwriting (IV)
Spring. 4 credits. Prerequisite: THETR 348 or permission of instructor. Not offered 2001–2002. Staff.
A continuation of THETR 348, emphasizing advanced techniques and culminating in the completion of a full-length play.]

[THETR 497 Seminar in Playwriting
1–4 credits. Prerequisite: THETR 348 and 349 and permission of instructor. Not offered 2001–2002. Staff.
This class is an extension of THETR 348 and 349. Students formulate a process for developing a full-length play, which they develop over the course of the semester. The class meetings are made up of discussions about the students' process and creative tactics, and reading of material generated by the playwrights.]

Design, Technology, and Stage Management

Design

THETR 250 Fundamentals of Theatre Design and Technology (IV)
Fall and spring. 4 credits. Not open to first-term freshmen. Limited to 12 students. Registration only through department roster in 225 Schwartz Center. A minimum of one credit of Production Lab (THETR 151 or 251) is strongly recommended concurrently. K. Goetz, R. Archer, E. Intemann.
An introduction to design and technology in the theatre. Lectures, discussion, and project work introduce the principles of designing scenery, costumes, lighting and sound, and the technical process of realizing designs on stage. Students are required to purchase materials, which the instructors will specify (approximate cost, $40).

[THETR 263 CAD Studio for the Theatre
Spring. 3 credits. Limited to 8 students. Prerequisite: permission of instructor. Not offered 2001–2002. K. Goetz and selected theatre production faculty and staff.
Students use commercially available 3-D modeling and rendering software to explore the process of designing scenery and lighting for the live theatre. Vectorworks and Photoshop are the primary applications used. Former theatre experience is helpful but not essential.]

[THETR 319 Music, Dance, and Light (IV)
Fall. 3 credits. Attendance at dance concerts and music concerts is required. Not offered 2001–2002. E. Intemann and A. Fogelsanger.
Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.]

THETR 343 Costume History: From Fig Leaf to Vanity (IV)
Fall. 3 credits. Limited to 20 students. S. Bernstein.
Costume History offers an overview of the history of clothing from the first signs of clothing to the early twentieth century. It investigates personal, social, religious, political, and regional reasons for why and how clothing evolved.

THETR 362 Lighting Design Studio I: Lighting in the Performing Arts (IV)
Fall. 4 credits. Prerequisite: THETR 250 or permission of instructor. Limited to 6 students. E. Intemann.
The theory and practice of lighting design as a medium for artistic expression. This course explores the aesthetic and mechanical aspects of light and their application in the theatre. Artistic style and viewpoint are also covered.

THETR 364 Scenic Design Studio (IV)
Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 250 and 340 or permission of instructor. Students are required to purchase materials which the instructor will specify (approximate cost: $50.00). K. Goetz.
An exploration of the process of designing scenery for the live theatre. Projects employ various media to explore dramatic use of architecture, the scenic space, and elements of interior design. Experience in theatre production and graphic skills is helpful but not essential.

THETR 366 Costume Design Studio (IV)
Spring. 3 credits. Students are required to purchase materials which the instructor will specify (approximate cost: $50). Limited to 10 students. S. Bernstein.
Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style. May be repeated for credit.

THETR 368 Sound Design Studio (IV)
Fall. 3 credits. Limited enrollment to 6 students. Prerequisite: THETR 250 or 252 or permission of instructor. Students are required to purchase supplies (approximate cost $20). W. Cross.
The use of sound as a medium of design for the theatre; research and creation of the theatrical sound score, digital recording and basic audio engineering techniques with projects in post production studio engineering and live recording. Emphasis is on producing viable sound designs for live theatre events.

THETR 369 Digital Audio Studio (IV)
Spring. 3 credits. Prerequisite: THETR 368. Limited to 6 students. By permission of instructor only. W. Cross.
A project oriented course focusing on current techniques in digital audio recording, editing and processing for theatre, and video production. Students explore Digidesign's Pro Tools multitrack environment, MOTU's Digital Performer including basic MIDI operation and methods of synching audio to video. Some experience with audio recording, music, or video production is helpful but not necessary.

THETR 462 Lighting Design Studio II (IV)
Spring. 4 credits. Prerequisite: THETR 362 or permission of instructor. Limited to 6 students. E. Intemann.
This course concentrates on designing lighting for different genres in various venues, developing the lighting designer as a versatile artist. Personal style and artistic commitment are stressed.

THETR 464 Scene Design Studio II (IV)
Spring. 3 credits. Prerequisite: THETR 364 or permission of instructor. Students are required to purchase materials which the instructor will specify (approximate cost $50). K. Goetz.
Projects and activities are tailored to the creative and developmental needs of the individual student with emphasis on developing professional standards and practices that would prepare the student for a major design assignment.

Technology

THETR 252 Technical Production Studio I
Fall. 3 credits. Limited to 6 students. D. Hall and F. Sellers.
Stage Lighting and Sound Technology: the practical aspects of lighting and sound technology including equipment setup, engineering, electrics, organization, recording techniques, and production paperwork are explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of 50 hours for the semester.

THETR 256 Technical Production Studio II
Spring. 3 credits. Limited to 6 students. Students are required to purchase materials, which the instructor will specify (approximate cost $50.). Prerequisite: THETR 250 or permission of instructor. Additional hands-on time in prop and paint shops required, to be discussed. A. Mansfield.
Scene Painting: introduction to the basic techniques of painting scenery, including but not limited to the layout and painting of bricks, marble, stone, and wood grain for the theatre. Individual projects in scene painting and participation on paint crew for productions are included. **Stage Properties**: introduction to the processes of propmaking, including furniture construction and upholstery techniques, use of shop tools and materials, period research, and painting and finishing.

THETR 340 Theatrical Drafting and Technical Drawing Studio
Fall. 3 credits. Limited to 6 students. Prerequisite: THETR 250 or permission of instructor. S. Brookhouse.
Implementation of the fundamentals of drafting and technical drawing. Introduction of the concept of an individual style in the approach to drafting for the theatre. Involves a series of projects to familiarize students with the convention and process of visualization and drafting.

THETR 352 Themed Entertainment: The Technical Perspective
Fall. 3 credits. Limited to 12 students. R. Archer.
Exploration into the integration of art and science in today's theme parks and interactive entertainment attractions. Papers, projects, and discussions deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation. Focus is on the specialized entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

THETR 354 Stagecraft Studio
Fall. 3 credits. A minimum of 1 credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. R. Archer.
An exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

THETR 356 Costume Construction Studio
Spring. 3 credits. A minimum of 1 credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. Lab fee of $25 to be paid in class. R. MacPike.
A project/lecture/discussion class in costume research, patterning, cutting, construction, and fitting.

THETR 360 Costumes: Special Projects
Fall. 3 credits. R. MacPike.
This course is designed for students who have completed a basic construction class (in THETR, TXA, or other) and are interested in acquiring skills beyond the basic techniques. The objectives are two-fold: (1) to introduce students to areas of costuming that are not taught presently, such as millinery, corsetry, wig-styling, and underpinning-skills, that will make a costume student more marketable after graduation; and (2) to give students the opportunity (and satisfaction) of seeing their work on stage in an actual theatre production at Cornell. Areas of focus for each semester are determined by particular production needs. For example, when we produce a period play like *Amadeus*, where hats and wigs are needed, the students research, explore, and construct them. If we were to produce a Commedia play, students would explore masks (history and construction). Along with the pieces constructed, students are asked to research and record their findings.

Stage Management

THETR 153 Stage Management Production Laboratory I
Fall and spring. 1–2 credits. May be repeated for credit. Before registering, students must attend an orientation meeting in the Kiplinger Theatre at the Schwartz Center at 7:30 P.M. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.
Practical experience in theatrical production as assistant stage manager for a dance theatre concert or as a stage manager for readings, Black Box lab productions, or S.L.T.C. under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 253 Stage Management Laboratory II
Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend an orientation meeting in the Kiplinger Theatre at the Schwartz Center at 7:30 P.M. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.
Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 353 Stage Management Laboratory III
Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend an orientation meeting in the Kiplinger Theatre at the Schwartz Center at 7:30 P.M. on the first Tuesday of classes. Prerequisite: permission of the instructor. P. Lillard.
Practical experience in theatrical production as stage manager for a dance theatre concert or an AUTP production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 370 Stage Management Studio
Fall. 2 credits. Prerequisite: THETR 250 or 280 or permission of instructor. P. Lillard.
Introduction to the concepts and techniques of stage management as they relate to specific areas of production. Development of relevant communication skills and an understanding of the production process as experienced by a working stage manager or assistant stage manager. THETR 153, 253, and 353 complement this course.

THETR 453 Stage Management Laboratory IV
Fall and spring. 1–5 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.
Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager.

Production Laboratories

THETR 151 Production Laboratory I
Fall and spring. 1–3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 P.M. in the Kiplinger Theatre at the Schwartz Center. P. Lillard, S. Brookhouse, F. Sellers.
This course provides practical experiences in theatrical production. Students can work on scenery, costumes, properties, lighting, or stage crew. No prerequisites or experience required.

THETR 251 Production Laboratory II
Fall and spring. 1–3 credits. Prerequisite: permission of instructor. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 P.M. in the Kiplinger Theatre at the Schwartz Center. P. Lillard, S. Brookhouse, D. Hall, F. Sellers.
Practical experience in theatrical production, as a light board operator, sound board operator, sound technician, head dresser or scenery/props special project.

THETR 351 Production Laboratory III
Fall and spring. 1–3 credits. May be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Intemann, F. Sellers.

Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager, or assistant to a faculty or guest director or designer.

THETR 451 Production Laboratory IV
Fall and spring. 1–4 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Intemann.
Practical experience in theatrical production, in the position of designer, shop manager, technical director or sound engineer.

Independent Study, Internships and Honors

THETR 300 Independent Study
Summer, fall, or spring. 1–4 credits.
Independent Study in the theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 Schwartz Center.

THETR 485 Undergraduate Internship
Fall, spring, or summer. 1–3 credits.
To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *prior* to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

THETR 495 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance.
This course is the first of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

THETR 496 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance.
This course is the second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

Film

D. Bathrick, D. Fredericksen (director of the undergraduate program in film), M. Rivchin, A. Villarejo

The study of film began in this department in the 1930s and continues to be based here. In the intervening years, however, it has also spread into a significant number of other departments in the College: Africana studies, anthropology, Asian studies, comparative literature, English, German studies, history, psychology, romance studies, and women's studies. This proliferation of courses has been accompanied by a comparable proliferation of perspectives and faculty concerns, e.g., the relationship of national cinemas to national literatures and specific cultures, film's relationships to myth and ideology, the use of film as historical evidence, film's efficacy as a rhetorical medium, and film's contribution to perennial issues in aesthetics, the history of the arts, and studies in cognition. The foundational courses in film production and in the history, theory, and criticism of film as an art are centered in this department.

This richness of courses and perspectives is matched by the ways in which students may make film the focus of their undergraduate studies. The three ways currently being used are as follows: (1) majoring in film within the Department of Theatre, Film & Dance; (2) constructing an individually tailored Independent Major in film (including the possibility of placing film in tandem with another medium or discipline); and (3) focusing on film as a College Scholar. Students interested in options 2 or 3 should consult Don Fredericksen (Theatre, Film & Dance) and Lynne Abel (director, College Scholar and Independent Major programs). Students interested in the first option should consult Don Fredericksen (director of the undergraduate program in film). In addition, students should be aware that the College has recently approved a five-course concentration in visual studies, which can be taken independently of, or in conjunction with, a major in film. Students interested in the visual studies concentration should contact Brett deBary, Asian Studies, its director.

Film Major Requirements

The department's film major requires a total of 50 credits in film and related courses. Students should note that a number of film courses—including two required "core" courses: (THETR 375 and 376)—are offered in alternating years. This means that *students cannot fulfill the requirements for the major in less than two years*, and that they should plan accordingly, in consultation with their major adviser. In particular, students must plan to be in residence at Cornell during both their junior and senior year **fall** semesters in order to take THETR 375 and 376.Within the "core" required courses, THETR 274, Introduction to Film Analysis, should be taken during the sophomore year.

Majors wishing to use the production courses in a substantial manner must plan carefully and work within certain limits. These courses are: THETR 277, 377, 383, 477, 478, 493. *Enrollment in each of these courses is limited by the nature of the work and by facilities.* Enrollment in THETR 477, 478, and 493 depends on the quality of previous work in THETR 277, 377, and/or 383; enrollment is not guaranteed. Majors *without* a strong interest in production can complete the production requirement with one course: THETR 277. Majors *with* a strong interest in production should begin instead with THETR 377, after they have taken THETR 274 in their sophomore year. The total credits in production courses cannot exceed 20 hours; this limit is strictly enforced.

1. A core of *four* film courses:

   THETR 274 Introduction to Film Analysis (offered every fall semester) 4

   [THETR 375 History and Theory of Commercial Narrative Film (offered alternate fall semesters; not offered 2001–2002)] 4

   THETR 376 History and Theory of Documentary and Experimental Film (offered alternate fall semesters; offered 2001–2002) 4

   [THETR 277 Video Production I (offered alternate spring semesters, and some summers; next offered spring 2003)] 3

   OR

   THETR 377 Fundamentals of 16mm Filmmaking (offered three semesters in every four; offered fall 2001 and 2002, and spring 2002) 4

2. *One* of the following theatre courses:

   THETR 250 Fundamentals of Theatre Design/Technology 4

   THETR 280 Introduction to Acting 3

   THETR 398 Directing I (prerequisite: permission) 3

3. *Four* courses (15–16 credits) in film offered by Theatre, Film & Dance as below, or by other departments (with consent of adviser):

   [THETR 264 Interpreting Hitchcock (Not offered 2001–2002)] 4

   [THETR 277 Video Production I (next offered spring 2003)] 3

   THETR 291 Filming Other Cultures (offered spring 2002) 3

   [THETR 341 French Film (offered alternate years, not offered 2001–2002)] 4

   THETR 369 Fast Talking Dames (offered fall 2001) 4

   [THETR 378 Soviet Film of 20s and French Film of 60s (offered occasionally; not offered spring 2001–2002)] 4

   THETR 379 Modern Documentary Film (offered alternate spring semesters; offered spring 2002) 4

   THETR 383 Screenwriting (offered every spring semester) 4

   [THETR 386 Third Cinema (offered alternate years; not offered 2001–2002)] 4

   THETR 391 Media Arts Studio I (tentatively scheduled for fall semester 2001) 3

   [THETR 392 Media Arts Studio II (not offered spring 2002)] 3

   [THETR 395 Video: Art, Theory, Politics (offered alternate years; not offered 2001–2002)] 4

   [THETR 396 German Film (offered occasionally; not offered 2001–2002)] 4

   AS&RC 435 African Cinema (offered fall 2001) 4

   [THETR 450 Rescreening the Holocaust (offered occasionally; not offered 2001–2002)] 4

   [THETR 455 History of Modern Polish Cinema (offered alternate spring semesters; next offered spring semester 2003)] 4

   [THETR 473 Film and Spiritual Questions (offered alternate spring semesters; offered spring 2003)] 4

THETR 474 Jung, Film, and the Process of Self-Knowledge (offered alternate spring semesters; offered spring 2002) 4

THETR 475 Seminar in the Cinema I (offered every fall semester; topic varies; may be repeated for credit; topic for fall 2001: Narrative Techniques in the New Hollywood 4

[THETR 476 Seminar in the Cinema II (offered occasionally; not offered spring 2002)] 4

[THETR 477 Intermediate Film and Video Projects: Documentary and Experimental Workshop (offered alternate years; not offered 2001–2002)] 4

THETR 478 Intermediate Film and Video Projects: Narrative Workshop (offered alternate years; offered fall 2001) 4

THETR 493 Advanced Film and Video Projects (offered spring 2002) 4

THETR 653 Myth Onto Film (offered spring 2002) 4

4. 15 credits of related coursework inside or outside the Department of Theatre, Film & Dance (as approved by your major adviser). The courses chosen to fulfill this requirement should reinforce your particular interest in film, and will not necessarily be film courses per se. For example, a student interested in the psychology of film, or in ethnographic film, or in film vis-a-vis intellectual or social history, will be encouraged to choose "related course work" in those areas.

5. *With a grade of less than C, a course cannot be used toward the major.*

6. Course work in production cannot exceed 20 credit hours.

Honors

Students who have maintained a GPA of 3.5 in their film major courses, and an average of 3.0 in all courses, may elect to work for honors in film during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in film. Honors projects are possible in filmmaking, screen writing, and film analysis.

The Advanced Undergraduate Filmmaking Program

The department offers advanced study in filmmaking to students who qualify on the basis of outstanding achievement in film studies and film production courses. Acceptance to the AUFP and admission to the advanced film production course (THETR 493) will be determined by a committee of film faculty in December of each year, based on applications from students who have a proposal (script or treatment) for a film or video project. Up to four such students will also be selected to receive the Melville Shavelson Award to help fund their advanced film projects.

Film Study Abroad

The College of Arts and Sciences, through this department and in consort with a number of other American colleges and universities, offers up to a full year of study at the Paris Center for Critical Studies. The center's program is theoretical, critical, and historical. It is most useful to students whose major interest is in the academic study of film and serves as an intensive supplement to Cornell's film courses. Fluency in French is required. THETR 274 and 375 are prerequisites. Inquiries should be addressed to Professor Fredericksen, Cornell's liaison with the center.

Film majors may also complement their Cornell film studies with work in the Intermediate and Advanced Film and Television Programs of the British American Film in London. Direct inquires to Professor Fredericksen.

[THETR 264 Interpreting Hitchcock (also ENGL 263) (IV)
Fall. 4 credits. Limited to 20 students. Not offered 2001–2002. L. Bogel.
See ENGL 263 for complete description.]

THETR 274 Introduction to Film Analysis: Meaning and Value (also THETR 674) (IV)
Fall. 4 credits. Limited to 40 students. Graduate students should enroll in THETR 674. D. Fredericksen.
An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Prospective film majors should enroll in their sophomore year.

[THETR 277 Video Production I
Spring. 3 credits. Offered alternate years and occasionally in summer. Limited to 12 students. Permission of instructor. Open to sophomores, juniors, and seniors. Next offered spring 2003. M. Rivchin.
A hands-on, beginning video production course using Super-VHS cameras and editing equipment. Students learn camera, lighting, sound recording, editing, and digital effects through a series of technical exercises. Students develop two short, original video projects to be shown publicly at the end of the semester. A $100 equipment maintenance fee per student is collected in class. Cost for videotape approximately $50–100.]

THETR 291 Filming Other Cultures (also THETR 691 and ANTHR 291/691) @ (IV)
Spring. 4 credits. Limited to 20 students, with preference given to those who have taken either ANTHR 102 or THETR 274. Fee for screening and maintenance, $35. R. Ascher.
For description, see ANTHR 291.

THETR 329 Political Theory and Cinema (also GERST 330, COM L 330 and GOVT 370) (III or IV)
Fall. 4 credits. G. Waite.
For description, see GERST 330.

[THETR 341 French Film (also FRLIT 336) (IV)
Spring. 4 credits. Offered alternate years; not offered 2001–2002. T. Murray.
For description, see FRLIT 336.]

THETR 369 Fast-Talking Dames: Hollywood Comedy (also ENGL 369) (IV)
Fall. 4 credits. L. Bogel.
See ENGL 369 for complete description.

[THETR 375 History and Theory of the Commercial Narrative Film (IV)
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite for film majors THETR 274. Offered alternate years; next offered fall 2002. A. Villarejo.
Consideration of the broad patterns of narration in the history of the commercial narrative film. Emphases are placed on the early articulation of a cinematic means of narration, realism as an artistic style, the nature and functions of popular film, and the modes of modernist and post-modernist "art cinema" narration.]

THETR 376 History and Theory of Documentary and Experimental Film (IV)
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 274 is strongly recommended, but not required. Offered altenate years; offered fall 2001. A. Villarejo.
Covers first the history and theory of documentary film up to the end of World War II. Second we cover the history and theory of the experimental and personal film forms in Europe and the United States.

THETR 377 Fundamentals of 16mm Filmmaking (IV)
Fall 2001 and spring 2002. 4 credits. Limited to 12 students. Intended for juniors and seniors (who may need to sign up a year or more in advance) with priority given to film majors. Prerequisite: THETR 274 (or higher-level film studies course) and permission of instructor. Equipment fee, $100 (paid in class). The average cost to each student for materials and processing is $400. M. Rivchin.
A hands-on course in the basics of 16mm filmmaking techniques, requiring no prior production experience, emphasizing creative development of filmic ideas through critical discussion. Students may explore narrative, experimental, documentary, animation, and abstract genres, producing short exercises and a final sound film project (8–12 minutes) to be screened publicly.

[THETR 378 Soviet Film of the 1920s and French Film of the 1960s (IV)
Spring. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 375 is strongly recommended, but not required. Offered occasionally; not offered 2001–2002. D. Fredericksen.
An intensive treatment of two distinct periods of radical innovation in film theory and history. Emphasis is on the animated relationship between theory and filmmaking during these two decades. Major figures include Eisenstein, Pudovkin, Vertov, Kuleshov, Dovzhenko, and Room, in the Soviet 1920s; Godard, Truffaut, Resnais, Rohmer, Tati, Rouch, Bresson, and Bazin in the French 1960s.]

THETR 379 Modern Documentary Film (IV)
Spring. 4 credits. Prerequisite: THETR 376 is strongly recommended but not required. Fee for screening expenses, $10 (paid in class). Offered alternate spring semesters; offered spring 2002. D. Fredericksen.
An intensive consideration of canonical documentary films from 1945 to the present. Emphases are on the documentary film as an artistic form with a distinct history and set of theoretical questions, as a sociopolitical force, as an ethnographic medium within and

without a filmmaker's culture, and as a televised medium of persuasion and expression.

THETR 383 Screenwriting (IV)
Spring. 3 credits. Prerequisites: THETR 274 and 377, or permission of instructor. Limited to 12 students. Staff.
Exercises in various genres of screenwriting. Note: this class is an intensive writing course that demands a great deal of outside work.

[THETR 386 Third Cinema (IV)
Spring. 4 credits. Prerequisite: previous course in film history or analysis helpful, though not mandatory. Offered alternate years. Not offered 2001–2002; next offered spring 2003. A. Villarejo.
This course explores postcolonial film and video through the rubric of "third cinema." We investigate the diverse historical, national, political, and generic commitments of films from Africa, South Asia, Latin America, the United States and the United Kingdom (Sembene, Ray, Brocka, etc.). Readings in film and postcolonial theory guide our critical analyses of the films.]

THETR 391 Media Arts Studio I (also ART 391, ARCH 459, MUSIC 391) (IV)
Fall (tentative). 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum THETR 377 or 277, or dance studio courses. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin, THETR; M. Lyons, ART; J. Zissovici, ARCH; D. Borden, MUSIC.
A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, by creating virtual and performative events.

[THETR 392 Media Arts Studio II (also ART 392, ARCH 392, MUSIC 392) (IV)
Spring (tentative). 3 credits. Preference given to those who completed Media Arts Studio I. See THETR 391 for prerequisites. $50 equipment fee (paid in class). Offered occasionally; not offered 2001–2002. Participating faculty include: M. Rivchin, THETR; M. Lyons, ART; J. Zissovici, ARCH; D. Borden, MUSIC.
A continuation of Media Arts Studio I. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, by creating virtual and performative events.]

[THETR 395 Video: Art, Theory, Politics (also ENGL 395) (IV)
Fall. 4 credits. Offered alternate years; not offered 2001–2002. T. Murray.
For description, see ENGL 395.]

[THETR 396 German Film (also COM L 396 and GERST 396) (IV)
Spring. 4 credits. Requirements: participation in class discussion, one paper, midterm, and final. Offered occasionally; not offered 2001–2002. D. Bathrick.
This course explores German film from the Weimar and Nazi periods to the present in relation to the cultural and sociopolitical context of which it was a part. Readings and lectures are devoted to formal and cultural developments historically as well as interpretive analysis of selected individual films.]

[THETR 450 Rescreening the Holocaust (also COM L 453 and GERST 449) (IV)
Spring. 4 credits. Offered alternate years; not offered 2001–2002. D. Bathrick.
Rescreening the Holocaust offers a survey of the major films dealing with the Holocaust beginning with *Night and Fog* (1955) and including such films as *Holocaust, Schindler's List, Shoah, Life is Beautiful, Sophie's Choice, Jacob the Liar, The Diary of Anne Frank, Kapo, My Mothers Courage*, and others. The course focuses on major issues of debate around the possibilities and limits of representing the Holocaust cinematically as well as questions more specifically concerning commercialization, fictionalization, trivialization, documentation, visualization, and narrativization in the making and distributing of films about this event. What are the concerns that have arisen over the years concerning the dangers of aestheticizing the Holocaust in works of literature and the visual arts? Is it possible to employ a comedic narrative to deal with such a topic, and, if so, what are the benefits or potential problems of such an approach? Is the very treatment of such a topic within the framework of the Hollywood entertainment industry itself a violation of respect for those who perished? The title of the course suggests a methodological approach which emphasizes the notion that screenings of the Holocaust are at the same time often re-screenings, to the extent that they are built on, presuppose, or even explicitly cite or take issue with earlier cinematic renderings.]

[THETR 455 History of Modern Polish Film (IV)
Spring. 4 credits. Prerequisite: some previous film analysis coursework. Offered alternate years; next offered spring 2003. D. Fredericksen.
Analysis of Polish film from 1945 to the present, within the context of Poland's post-war history. Topics include the period of socialist realism, the so-called "Polish School" (1956–1962), the cinema of moral anxiety, Solidarity cinema, and the Polish documentary tradition. Key directors to be considered include Ford, Wadja, Munk, Polanski, Skolimowski, Zanussi, Falk, Piwowski, Bugajski, Krzystek, Kijowski, Zaorski, Kieslowski, and Lozinski. Some attention is given to the development of Polish film theory. The extra-filmic context is set by such works as Norman Davies *Heart of Europe*, Czeslaw Milosz' *The Captive Mind*, and Eva Hoffman's *Exit into History*.]

[THETR 473 Film and Spiritual Questions (also RELST 473 and College Scholar Seminar) (IV)
Spring. 4 credits. Limited to 20 students. Offered alternate spring semesters; next offered spring 2003. D. Fredericksen.
The use of film as a medium for the expression of spiritual questions has a long and rich history, although little attention is given to this fact in contemporary film studies. This seminar examines films and writings by filmmakers who are so inclined, including Baillie, Gardner, Bergman, Dreyer, Bresson, Godard, Scorsese, Brakhage, Belson, Whitney, Rouquier, Newby, Kubrick, and Bae Yong-Kyun. Special attention is given to the work of Andrey Tarkovsky, the Russian film director and theorist. Readings include Tarkovsky's *Sculpting in Time*, Grof's *The Cosmic Game*, Eliade's *The Sacred and the Profane*, Edinger's *The Christian Archetype*, Schrader's *Transcendental Style in Film*, and Warren and Locke's *Women and the Sacred in Film*.

THETR 474 Jung, Film, and the Process of Self-Knowledge (also College Scholar Seminar) (IV)
Spring. 4 credits. Limited to 20 students. Offered alternate spring semesters. D. Fredericksen.
"Know thyself" is one of the oldest and most enduring imperatives of the human spirit, and the *raison d'etre* for liberal studies. This seminar traces in some detail the Jungian approach to this imperative and then tests its critical capacities with respect to films by Fellini (*8 1/2*), Bergman (*Persona*), and Roeg (*Walkabout*). Readings include Jung's *Memories, Dreams, Reflections*, *Two Essays in Analytical Psychology, Archetypes and the Collective Unconscious,* and Murray Stein's *In Midlife*.

THETR 475 Seminar in the Cinema I (IV)
Fall. 4 credits. Limited to 20 students. Prerequisite: THETR 264 or 274 or 375 or permission of instructor. D. Fredericksen.
Topic for fall 2001: Narrative Techniques in the New Hollywood. An intensive study of the "modern classicism" of Hollywood narrative filmmaking, to include *Tootsie, Desperately Seeking Susan, Amadeus, The Hunt for Red October, Parenthood, Alien, Back to the Future, The Silence of the Lambs, Groundhog Day,* and *Hannah and Her Sisters*. Readings will include Thompson's *Storytelling in the New Hollywood*, Bordwell's *Narration in the Fiction Film*, and Prince's *Hollywood Under the Electronic Rainbow, 1980–1989*.

[THETR 476 Seminar in the Cinema II
Spring. 4 credits. Limited to 20 students. Offered occasionally; not offered 2001–2002. Staff.]

[THETR 477 Intermediate Film and Video Projects: Documentary and Experimental Workshop (IV)
Fall. 4 credits. Limited to 8 students. Prerequisites: THETR 377 or 277 as minimum production; preference given to those who have taken THETR 376 (History and Theory of Documentary and Experimental Film), 379 (Modern Documentary Film), 386 (Third Cinema), or 291/691 (Filming Other Cultures); and permission of instructor based on project proposals. Equipment fee: $100 (paid in class). Film projects costs: $300–1,000; video $100–200. Not offered 2001–2002. M. Rivchin.
An intensive course in 16mm filmmaking and digital video in which each student develops a significant documentary or experimental project both critically and creatively. Readings, discussions, and exercises are designed to increase the student's knowledge and practice of: cinematography, lighting, sync-sound filming, and editing techniques; working with labs and sound houses; digital video camera; and both analog and nonlinear (AVID) digital editing.]

THETR 478 Intermediate Film and Video Projects: Narrative and Experimental Workshop (IV)

Fall. 4 credits. Limited to 8 students. Prerequisites: THETR 377 or 277 as minimum production; and THETR 383 (Screenwriting) or 398 (Directing I), and permission of instructor based on proposals. Equipment fee: $100 (paid in class). Film projects costs: $500–1,500; video $100–200. M. Rivchin.

An intensive course in 16mm filmmaking and digital video in which each student develops a significant, original narrative script project which he or she then directs, shoots in crews, and edits. Student may opt for narrative documentary or experimental work as well. Readings, discussions, and exercises are designed to increase the student's knowledge and practice of: directing (one exercise is in coordination with Directing II class); cinematography, lighting, sync-sound filming, and editing techniques; working with labs and sound houses; digital video camera; and nonlinear (AVID) editing.

THETR 493 Advanced Film and Video Projects (IV)

Spring. 4 credits. Limited to 6–8 students. Prerequisite: minimum THETR 377 or 277, preference to those who have taken 477 or 478; recommended: 383 (Screenwriting) and 398 (Directing I). Equipment fee: $100. Project costs: $500–2000, unless group project is funded by the Melville Shavelson fund. M. Rivchin.

This is a third-level film production course in which the entire class produces, directs, and edits a larger sync-sound film project from a prize-winning student screenplay. After a pre-production period including script analysis and directing practice through scene work, students are either selected as or rotate as directors, cinematographers, and sound recordists. They prepare auditions, casting and production management and scheduling. Students may shoot in sync-sound 16mm film or video, working on a specific budget, and will co-edit the film, learning the Avid for digital editing, sound mixing, and so on. The final project is screened publicly at the end of the semester.

THETR 653 Myth Onto Film

Spring. 4 credits. R. Ascher.

For description, see ANTHRO 653.

THETR 674 Introduction to Film Analysis: Meaning and Value

Fall. 4 credits. Limited to 10 graduate students. D. Fredericksen.

An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Graduate students who intend to teach film at the undergraduate level are especially welcome. In addition to full participation in the work of THETR 274, graduate students will read and discuss in tutorials Dudley Andrew's *The Major Film Theories* and Francesco Casetti's *Theories of Film 1945–1995*.

THETR 691 Filming Other Cultures (also THETR 291 and ANTHR 291/691)

Spring. 4 credits. Fee for film screening and maintenance, $35. R. Ascher.

THETR 691 meets simultaneously with THETR 291/ANTRO 291/691. For topics and issues addressed, please see the description under ANTHR 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog's *Where the Green Ants Dream*, and, in consultation with the instructor, review films related to their special interests and major field of study.

[THETR 699 German Film Theory (also GERST 699 and COM L 699)

Fall. 4 credits. Offered every fourth year. Not offered 2001–2002. D. Bathrick.

This course critically examines major German film theories from the Weimar period to the present. Works by Balazs, Arnheim, Kracauer, Benjamin, Adorno, Horkheimer, Kluge, Syberberg, Koch, Elsaesser, and others are discussed in relation to the context in which they emerge as well as current debates in film theory.]

Dance

Faculty: J. Chu, A. Fogelsanger (director of undergraduate program in dance), J. Kovar, J. Morgenroth, J. Self, B. Suber.

PLEASE NOTE: Courses offered in fall 2001 will still carry the designator THETR; courses offered in spring 2002 will carry the new designator DANCE.

The dance program offers courses in dance technique, improvisation, composition, performance, anatomical analysis of movement, dance technology, and the history, theory, and criticism of dance. Technique courses include introductory dance technique, modern dance at three levels, and ballet at three levels. Other dance forms, such as Japanese Noh, Indian dance, and Javanese dance, are offered on a rotating basis. Courses in African and ballroom dance, taken through the Physical Education program, supplement these offerings. Technique courses develop strength, flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with clarity of rhythm, body design, and expression. The more advanced courses require the ability to perform complex phrases in various styles. Students may earn up to eight academic credits (one each semester) in technique courses. Students may also satisfy the physical education requirement by taking dance technique courses in the dance program. Students taking technique for academic credit must also register through their own colleges. Students who wish to enroll in nonintroductory level dance technique courses must attend a placement class. Placement classes are offered at the beginning of each semester. The schedule for all dance technique courses and placement classes is available in the main office of the Sheila W. and Richard J. Schwartz Center for the Performing Arts.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance courses is by permission. Students may receive one academic credit (S-U grades only) when performing in student-faculty concerts by registering for THETR 155 (fall 2001) or DANCE 155 (spring 2002).

The Dance Major

Note: All courses designated DANCE below will still carry the THETR designator during the fall 2001 semester.

To be admitted to the major, students must have completed two technique courses in modern dance or ballet at level II or above, DANCE 210 (Beginning Dance Composition), and one semester DANCE 212 (Music Resources I), concurrently with DANCE 210. It is recommended that students take DANCE 201 (Dance Improvisation), the optional THETR 250 (Fundamentals of Theatre Design and Technology), and the optional music course before the junior year. The following requirements are expected of the major.

Prerequisites for the Major:

DANCE 210 Beginning Dance Composition (offered every semester)	3
DANCE 212 Music Resources I (offered every semester) concurrently with DANCE 210	1
Two technique courses in modern dance or ballet at level II or above	2
TOTAL	6

Requirements for the Major:	**Credits**
Two semesters each of ballet and modern dance (in addition to the prerequisite)	4
One academic or studio course in non-western form	0–4
DANCE 155 Rehearsal and Performance	1
DANCE 201 Dance Improvisation (offered every spring semester)	1
DANCE 233 Explorations in Movement and Performance (offered every fall semester)	1
Two courses from the following approved list selected in consultation with the student's advisor:	6–8
One of **MUSIC 103** Into to World Music I: Africa and the Americas, **MUSIC 104** Intro to World Music II: Asia, **MUSIC 105** Introduction to Music Theory (or substitute at the appropriate level), **MUSIC 107** Hildegard to Handel, **MUSIC 108** Mozart to Minimalism;	
THETR 250 Fundamentals of Design and Technology;	
DANCE 258 Techno Soma Kinesics (offered every spring semester);	
[DANCE 319 Music, Dance & Light (offered alternate fall semesters, not offered 2001–2002)];	
[DANCE 413 Film and Performance (offered occasionally; not offered 2001–2002)].	
DANCE 310–311 Intermediate Dance Composition (offered every semester)	6
DANCE 312 The Moving Body (offered every fourth or fifth semester; offered fall 2001)	3
DANCE 314–315 Western Dance History (offered alternate years; offered 2001–2002)	8
DANCE 323 Music Resources II (offered every spring semester)	2
[DANCE 418 Seminar in Dance Studies or other 400-level academic dance course (offered alternate years; not offered 2001–2002)]	4
DANCE 491 Senior Project (year-long course offered every year)	6
Total	42–48

Students will be expected to perform in at least two concerts and to present at least two of their own dances, in addition to the senior project.

Honors

Students who have maintained a GPA of 3.5 in classes for the dance major and an average of 3.0 in all courses may elect to work for honors in dance during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in dance.

Courses

Note: All courses designated DANCE below which are offered in Fall 2001 will still carry the THETR designator. The DANCE designation becomes effective in Spring 2002.

Movement Technique

The courses DANCE 122, 125, 231, 232, 233, 303, 304, 306, 307, 308, 309, and 316 are co-listed in the Department of Physical Education (PE) and the Dance major (DANCE) of the Department of Theatre, Film & Dance. Students may register for these courses either through PE in order to satisfy the university's physical education requirement *or* through DANCE for 0 or 1 academic credit, *with a limit of 1 credit per semester and 8 credits total.* Students may not get DANCE and PE credit simultaneously for the same course.

The technique course co-requisite for DANCE 210, 310, 311, 410, and 411 may be fulfilled by DANCE 122, 231, 232, 233, 303, 304, 306, 308, 309, and 316. Students who wish to enroll in a non-introductory level technique course (DANCE 231, 232, 303, 304, 306, 308, 309, and 316) must attend a placement class; pre-enrollment is not allowed. A placement class is held at the beginning of each semester; please contact the department registrar for more information.

Note: All DANCE listings were formerly listed as THETR under the same numbers.

DANCE 122 Dance Technique I (also PE 160)
Fall and spring. 0 to 1 credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Chu and J. Self; spring: J. Chu and J. Kovar.
Entry level class. Covers the fundamentals of elementary dance training. Movement sequences focusing on rhythm, placement, and vitality of performance through an anatomically sound dance technique.

[DANCE 125 Introduction to Tap Dancing (also PE 170)
Fall. 0 to 1 credit. Satisfies the PE requirement if taken as PE. Not offered 2001–2002.
This introduction to tap dancing is designed for beginners who have no previous experience with the genre. We begin with basic heel, toe, and ball work before progressing logically to the shuffle, the flap, and their concomitant variations. As one of our goals in tap dancing is to realize (just a few of) the body's percussive possibilities, uninhibited ankles and a sense of rhythm are strongly recommended.]

DANCE 155 Rehearsal and Performance
Fall and/or spring. 1–2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which the credit is earned; requests for retroactive credit will not be honored. Limited to students who are cast in faculty-choreographed dances. Students may add this course only after they have been assigned roles. S-U grades only.
Course includes the study, development, and performance of roles in departmental dance productions.

DANCE 231 Dance Technique II/ Ballet (also PE 161)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Beginning Ballet technique intended for students with some dance training. Includes all basic barre and centre work focusing on presence and presentation.

DANCE 232 Dance Technique II/Modern (also PE 162)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Kovar; spring, J. Morgenroth.
Beginning Modern technique intended for students with some dance training. Material covered includes specific spinal and center work with attention to rhythm, design, and movement expression.

DANCE 233 Explorations in Movement and Performance (also PE 168)
Fall. 0 or 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
A physically demanding exploration into various movement realms. Specific subjects covered are genderized movement, erotic power, spiritual power, ritual, and performance. Techniques include extensive use of breath, animal movement, improvisation, and group games. This course requires an eagerness to investigate the nature of performance and explore unfamiliar territory in movement.

DANCE 303 Dance Technique Workshop (also PE 167)
Fall. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
This class goes beyond the conventional modern dance class and looks into the very nature of technical training for dancers by studying and investigating a variety of movement forms including yoga, improvisation, classical, and modern western dance.

DANCE 304 Dance Technique III/Ballet (also PE 163)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Intermediate Ballet technique. Work is done on strengthening the body through a movement technique emphasizing presence and musicality based on harmonic muscular control.

DANCE 306 Dance Technique III/Modern (also PE 164)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Morgenroth; spring, J. Chu.
Intermediate modern technique focusing on rhythm, placement, and phrasing for students who are prepared to refine the skills of dancing. Students are challenged by complex phrases and musicality.

DANCE 307 Asian Dance and Dance Drama (also PE 427)
Sec. 01. Indian Dance. 0, 1, or 3 credits. Satisfies the PE requirement if taken as PE. Fall, D. Bor.
This course is designed to give the student a practical working knowledge of Indian classical dance, specifically in the indigenous style of Orissa known as Odissi. The technique strengthens the body and develops grace, rhythmic expression, and dexterity that can benefit all forms of dance.

[Sec. 02. Japanese Noh Theatre. Not offered 2001–2002.]

[Sec. 03. Indonesian Dance Theatre. Not offered 2001–2002.]

DANCE 308 Dance Technique IV/Modern (also Physical Education 166)
Fall. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Chu.
Advanced and pre-professional Modern technique. A continuation of and supplement to DANCE 306.

DANCE 309 Dance Technique IV/Ballet (also PE 165)
Fall. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Advanced and pre-professional Ballet technique. A continuation of and supplement to DANCE 304.

DANCE 316 Dance Technique IV/Western Classical (also PE 172)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
This course is new in the sense that it blends contemporary modern technical forms and "borrowed" traditional ballet forms into a hybridized mix of "contemporary western classical" technique, emphasizing speed in the feet and legs, flexibility in the trunk and upper body, and the ability to quickly change and reverse directions. Includes extensive use of the barre.

[DANCE 317 Asian Dance II
0, 1, or 3 credits. Prerequisite: DANCE 307 or previous training in Odissi Classical Dance. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Not offered 2001–2002.
The continuation of DANCE 307, Odissi Classical Dance. Emphasis is mainly on choreography as well as continuing to refine and perfect the basic movements learned in the preliminary course. Meets twice weekly for movement classes; an extra class will be arranged to learn the art of makeup.]

Dance Composition

DANCE 201 Dance Improvisation
Spring. 1 credit. Limited to 12 students. Attendance at dance concerts is required. J. Morgenroth.
When the body knows when, where, and how to move without prior direction, we call that improvisation. This course coaxes inspiration, seeking to make it reliable and to keep it surprising. It offers the possibility of "training" one's movement instincts to respond relevantly and with spontaneity. Solo and group forms are covered. Live musical accompaniment.

DANCE 210 Beginning Dance Composition (IV)
Fall and spring. 3 credits. Concurrent enrollment in DANCE 212 and a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Self.
Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through class improvisations. Informal showing at end of semester.

DANCE 211 Dance Movement Workshop (IV)
Summer. 3 credits. Limited to 15 students. For students with varied levels of training, including those with no experience. J. Kovar.
Students explore new ways of moving and creating dances and prepare short studies each week based on material covered in class. Modern dance technique, improvisation, and composition are covered. Students observe and discuss the main concerns of contemporary performance from the artist's/performer's perspective. Viewings of films, videotapes, and live performances.

DANCE 212 Music Resources I
Fall and spring. 1 credit. MUSIC 105 is recommended as a prerequisite but not required. Attendance at dance concerts and music concerts is required. A. Fogelsanger.
Intended to expand choreographers' music vocabulary and skills through a survey of contemporary music for dance, the study of music and dance collaborations, and rhythm studies. Includes discussing and writing about concerts, recordings, and videotapes. May include rehearsing and performing music or dance. Concentrates especially on the related ideas of counterpoint, polyphony, and simultaneity with regard to music, dance, the two considered together, and other arts singly and in combination. This is a co-requisite for THETR 210/DANCE 210 but other students are welcome.

DANCE 310 Intermediate Dance Composition I (IV)
Fall and spring. 3 credits. Prerequisite: DANCE 210. Concurrent enrollment in a technique class at the appropriate level is required. Fall, B. Suber; spring, J. Self.
Intermediate choreographic projects are critiqued in progress by faculty and peers. Consideration of design problems in costuming and lighting.

DANCE 311 Intermediate Dance Composition II (IV)
Fall and spring. 3 credits. Prerequisite: DANCE 310 and DANCE 323, though DANCE 323 may be taken concurrently. Attendance at dance concerts is required. Concurrent enrollment in a dance technique class at the appropriate level is required. Fall, B. Suber; spring, J. Self.
A continuation of DANCE 310.

DANCE 323 Music Resources II
Spring. 2 credits. Prerequisite: DANCE 212. MUSIC 105 is strongly recommended as a prerequisite but not required. Attendance at dance concerts and music concerts is required. DANCE 212 and DANCE 323 together count as a course for purposes of graduation. A. Fogelsanger.
Intended to expand choreographers' conceptions of music and its uses for dance, including serving as a source for ideas of choreographic organization. A continuation of DANCE 212 in its survey of contemporary music for dance and the study of music and dance collaborations, but also includes examples from film and the plastic arts. Reading topics include criticism and aesthetics of dance, music, and the arts in general. Includes discussion of and writing about concerts, recordings, and videotapes. May include rehearsing and performing music or dance. Concentrates especially on minimalism and polystylism in music, dance, the two considered together, and other arts singly and in combination.

DANCE 410 Advanced Dance Composition I (IV)
Fall and spring. 3 credits. Prerequisite: DANCE 311. Concurrent enrollment in a technique class at the appropriate level is required. Attendance at dance concerts is required. Fall, B. Suber; spring, J. Self.
Students work on advanced choreographic problems, to be presented in performance. Work in progress is critiqued by faculty on a regular basis.

DANCE 411 Advanced Dance Composition II (IV)
Fall and spring. 3 credits. Prerequisite: DANCE 410. Concurrent enrollment in a technique class at the appropriate level. Attendance at dance concerts is required. Fall, B. Suber; spring, J. Self.
A continuation of DANCE 410.

DANCE 491 Senior Project in Dance
Fall and spring. 6 credits per semester. Prerequisite: DANCE 311. This course is limited to senior dance majors only.
Students who take this course create a project in choreography and performance, dance, film or video, dance pedagogy, or other appropriate area agreed on with a member of the dance faculty. In addition, there is a 1–15 page paper which expands their work into a theoretical or historical context.

History, Criticism, and Theory

DANCE 312 The Moving Body: Form and Function (IV)
Fall. 3 credits. J. Morgenroth.
This course examines the bodily systems involved in human movement with particular attention to dance movement. Readings in texts on human anatomy, physiology and kinesiology. We will emphasize the relationships between bodily form and function. Includes guest lectures by experts in anatomy and health areas. Practical analyses of human movement. Demonstration of dissection.

DANCE 314 Western Dance History I: Classical Ballet History as a Reflection of Western Ideology # (IV)
Fall. 4 credits. Attendance at dance concerts is required. B. Suber.
A critical survey of the history of classical ballet defining elements of classicism and determining why ballet is defined as classical. Through texts, videotapes, and live performance, the class explores how ballet has perpetuated or confronted social issues of race, class, gender, sexuality, the body, and abuse.

DANCE 315 Western Dance History II: History of Modern Dance (IV)
Spring. 4 credits. Attendance at dance concerts is required. J. Chu.
This class studies the course of modern dance in the twentieth-century United States. We examine each generation of dancers, starting with Isadora Duncan and ending with performers emerging today. Issues of gender, cultural identity, elitism, and democracy are discussed.

[DANCE 418 Seminar in Dance Studies (IV)
Spring. 4 credits. Not offered 2001–2002.]

DANCE 490 Senior Paper in Dance
Fall and spring. 4 credits. Prerequisite: DANCE 418, senior standing. Attendance at dance concerts is required.
Under faculty direction, the students write a senior paper in dance history, criticism, or theory.

Interdisciplinary Courses

DANCE 258 Techno Soma Kinesics I: Technology and the Moving Body (IV)
Spring. 4 credits. Prerequisite: DANCE 201 or DANCE 210 (or equivalent) or permission of instructor; no freshmen. Limited to 5 students. B. Suber.
Expanding on the specific aesthetic of formal concert dance, this studio class explores new forms of performance dealing with the moving body. Computer programs such as human form animation software (Life Forms and Poser), digital sound production (Protools and Digital Performer), digital imaging (Photoshop and Premiere), as well as traditional lighting, set, and costume design and construction, and sound recording and design techniques, are all utilized to create experimental and/or conceptual multimedia performance/installation work. Theoretical texts on the body and technology are also used.

DANCE 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also ENGL 301, MUSIC 372, S HUM 301, THETR 301) (IV)
Spring. 4 credits.
For description, see ENGL 301.

[DANCE 319 Music, Dance, and Light (also THETR 319) (IV)
Fall. 3 credits. Attendance at dance concerts and music concerts is required. Not offered 2001–2002. E. Intemann, A. Fogelsanger.
Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video

recordings, and performances. Some classes are devoted to creating sound, movement, and lighting.]

DANCE 358 Techno Soma Kinesics II: The Moving Body and Technology (IV)
Spring. 4 credits. Prerequisite: DANCE 258 (or equivalent), or permission of instructor. Limited to 5 students. B. Suber.
Reflecting the aesthetic of formal concert dance, and expanding on the work accomplished in DANCE 258, students work with more complex elements of multimedia interactive software to create more extensive projects in the field of dance and technology. As opposed to the smaller experimental projects accomplished in DANCE 258, DANCE 358 students are expected to complete substantial projects in interactive multimedia gallery installation/performance work as well as interactive multimedia CD ROM's and web projects, all focused on the moving body.

DANCE 391 Media Arts Studio I (also ART 391, ARCH 391, MUSIC 391) (IV)
Fall. 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum THETR 377 or 277, or DANCE 258. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin, THETR; S. Taft and M. Lyons, ART; J. Zissovici, ARCH; D. Borden, MUSIC.
A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of using arts spaces on campus, including virtual and performative events.

[DANCE 392 Media Arts Studio II (also ART 392, ARCH 392, THETR 392, MUSIC 392) (IV)
Spring. 3 credits. Preference given to those who completed Media Arts Studio I. See DANCE 391 for prerequisites. $50 equipment fee (paid in class). Not offered 2001–2002.
A continuation of Media Arts Studio I. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film, and video. Group projects and discussions also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, including virtual and performative events.]

Independent Study, Internships and Honors

DANCE 300 Independent Study
Summer, fall, or spring. 1–4 credits.
Independent Study in the dance allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 CTA.

DANCE 485 Undergraduate Internship
Fall, spring, or summer. 1–3 credits.
To be eligible to enroll and receive credit for an internship, students must be majors in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice *prior* to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

DANCE 495 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors students in Dance.
This course is the first of a two-semester sequence (the second is DANCE 496) for seniors engaged in an honors project.

DANCE 496 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors students in Dance.
This course is the second of a two-semester sequence (the first is DANCE 495) for students engaged in an honors project.

Tracks toward admission into the advanced undergraduate theatre program

Design, Technology, and Stage Management

Recommended for individuals interested in a **Design**, **Technology**, or **Stage Management** track:
THETR 250 Fundamentals of Theatre Design and Technology
THETR 151 and 251 Production Lab I and II (at least one credit of each)

Recommended for Scenic Design emphasis:
THETR 340 Theatrical Drafting and Technical Drawing Studio
THETR 351 Production Lab III (as Design Assistant)
THETR 354 Stagecraft Studio
THETR 364 Scene Design Studio

Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)

Recommended for costume design or costume shop management emphasis:
THETR 351 Production Lab III (as Design Assistant)
THETR 356 Costume Construction Studio
THETR 366 Costume Design Studio I

Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)

Recommended for Lighting Design or costume shop management emphasis:
THETR 252 Technical Production Studio I
THETR 351 Production Lab III (as Student Electrician)
THETR 351 Production Lab III (as Design Assistant)
THETR 362 Lighting Design Studio I

Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)

Recommended for Sound Design emphasis:
THETR 251 Production Lab II (as Student Sound Technician)
THETR 252 Technical Production Studio I
THETR 351 Production Lab III (as Design Assistant)
THETR 368 Sound Design Studio

Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)

Recommended for Technical Direction emphasis:
THETR 252 Technical Production Studio I
THETR 256 Technical Production Studio II
THETR 340 Theatrical Drafting and Technical Drawing Studio
THETR 351 Production Lab III (as Assistant Technical Director)
THETR 354 Stagecraft Studio

Upon admission to the program:
THETR 451 Production Lab IV (at least 1 credit)

Recommended for Stage Management emphasis:
THETR 253 or **353** Stage Management Lab II or III—two assignments
THETR 280 Introduction to Acting
THETR 370 Stage Management Studio
THETR 398 Fundamentals of Directing I

Upon admission to the program:
THETR 453 Stage Management Lab IV

Directing

Recommended for individuals interested in a directing track:
THETR 151 and **THETR 251** Production Lab I and II (at least 2 combined credits)
THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 398 Directing I
THETR 498 Directing II

Playwriting

Recommended for individuals interested in a playwriting track:
THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 348 Playwriting
THETR 349 Advanced Playwriting
Students in the advanced undergraduate theatre program may also elect to take THETR 485 (Undergraduate Internship) in addition to or in place of one production assignment.

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES

Africana Studies and Research Center

J. Turner, director (255–5218); A. Adams, N. Assié-Lumumba, A. Bekerie, L. Edmondson, R. Harris, S. Hassan, A. Mazrui, A. Nanji, D. Ohadike. Offices: 310 Triphammer Road, 255–4625 or 255–4626.

The Africana Studies and Research Center is concerned with the examination of the history, culture, intellectual development, and social organization of Black people and cultures in the Americas, Africa, and the Caribbean. Its program is structured from an interdisciplinary and comparative perspective and presents a variety of subjects in focal areas of history, literature, social sciences, and African languages. African languages such as Swahili is consistently offered, fall and spring semesters and taught during summer/winter session.

The center offers a unique and specialized program of study that leads to an undergraduate degree through the College of Arts and Sciences and a graduate degree, the Master of Professional Studies (African and African-American), through the university's Graduate School.

A student may major in Africana Studies; however, another attractive alternative is the center's joint major program. This program enables the student to complete a major in any of the other disciplines represented in the college while at the same time fulfilling requirements for a major in Africana Studies. This requires only a few more credits than is usually the case when one completes a single major course of study. Courses offered by the center are open to both majors and nonmajors and may be used to meet a number of college distribution requirements, including historical/temporal breadth (#) and geographical breadth (@) requirements, such as freshman writing seminars, language (Swahili), expressive arts, humanities, social sciences, and history.

The center also brings distinguished visitors to the campus, sponsors a colloquium series, and houses its own library.

The Africana Major

The undergraduate major offers interdisciplinary study of the fundamental dimensions of the African-American and African experiences. Because of the comprehensive nature of the program, it is to students' advantage to declare themselves Africana majors as early as possible. The following are prerequisites for admission to the major.

Students should submit:

1) a statement of why they want to be an Africana Studies major;
2) a tentative outline of the area of study they are considering (African or African-American) for the undergraduate concentration; and
3) a full transcript of courses taken and grades received.

The center's undergraduate faculty representative will review the applications and notify students within two weeks of the status of their request.

After acceptance as a major in the Africana Center, a student must maintain a C+ cumulative average in the center's courses while completing the major program. The Africana major must complete 36 credits in courses offered by the center, to include the following four core courses: AS&RC 205, 231, 290, and 422. Beyond the core courses, the student must take eight credits of center courses numbered 200 or above and 15 credits numbered 300 or above. The program of an undergraduate major may have a specifically Afro-American focus or a specifically African focus.

Joint Majors

The center encourages joint majors in the College of Arts and Sciences and in other colleges. Joint majors are individualized programs that must be worked out between the departments concerned. The center's undergraduate faculty representative, Professor Bekerie, will assist students in the design and coordination of joint major programs. However, in any joint major program, the center will require at least 16 credits be taken in Africana studies courses, including AS&RC 290.

Double Majors

In the case of double majors (as distinct from joint majors) students undertake to carry the full load of stipulated requirements for a major in each of the two departments they have selected.

Certificate in African Studies

In conjunction with the Institute for African Development, the Africana Studies and Research Center administers an undergraduate Certificate in African Studies program. The certificate is offered as a minor concentration available to students in all of the undergraduate colleges at Cornell. Many of the courses in the program might be used to fulfill other course distribution requirements. By pursuing this certificate, students acquire an interdisciplinary understanding of Africa. After developing a foundation of knowledge on the culture, society, and development of Africa in the core course "Africa: The Continent and Its People," students pursue 15 credit hours in a humanities or development studies track or a combination of the two, including an additional core course, either "African Civilizations and Cultures" or "Contemporary African Development Issues." The requirements for the cetificate are a minimum of 18 credit hours, including the core courses. Students interested in the certificate program must contact Professor Bekerie (the center's undergraduate faculty representative) who will register them in the program and assign them a faculty adviser from their own college. The faculty adviser will be responsible for determining completion of the certificate requirements.

Honors. The honors program offers students the opportunity to complete a library research thesis, a field project in conjunction with a report on the field experience, or a project or experiment designed by the student. The requirements for admission to the honors program for all students—regular majors, joint majors, and double majors—are a B- cumulative average in all courses and a B+ cumulative average in the center's courses. Each student accepted into the honors program will have an honors faculty committee consisting of the student's adviser and one additional faculty member, which is responsible for final evaluation of the student's work. The honors committee must approve the thesis or project before May 1 of the student's junior year. The completed thesis or project should be filed with the student's faculty committee by May 10 of the senior year.

Language Requirement

Courses in Swahili may be used to satisfy the College of Arts and Sciences language requirement. In Swahili, successful completion of AS&RC 131, 132, 133, and 134 provides qualification, and the addition of 202 provides proficiency. AS&RC majors are not required to take an African language, but the center recommends the study of Swahili to complete the language requirement.

AS&RC 131 Swahili
Fall. 4 credits. Laboratory time TBA. A. Nanji.
Beginner's Swahili. Part 1—Grammar for speaking, reading, and writing. Requires no knowledge of language. Swahili is spoken in the East and Central parts of Africa.

AS&RC 132 Swahili
Spring. 4 credits. Prerequisite: Swahili 131. A. Nanji.
Continued study of the basic grammatical formation of the language and the introduction of reading material ranging from songs to short stories. A great many drills are used in this course to help develop the student's comprehension of the language. Swahili tapes are utilized during all of these sequences.

AS&RC 133 Swahili
Fall. 4 credits. Prerequisites: Swahili 131 and 132. Language laboratory time TBA. A. Nanji.
Advanced study in reading and composition.

AS&RC 134 Swahili
Spring. 4 credits. ***Provides language qualification.*** Prerequisite: Swahili 133. A. Nanji.
In this course more emphasis is placed on the development of reading ability and the acquisition of writing skills. Students are expected to read and comprehend selected Swahili stories and write compositions on chosen topics. Ample consideration is given to oral practice in the classroom.

AS&RC 171 Black Families and the Socialization of Black Children
Fall. 3 credits. Staff.
This course provides an examination of the evolution of the Black family from its roots in Africa, the evolution of family forms, the impact of social policy, and a consideration of the literature stressing family and child well-being. Among the major topics considered are

male/female relationships, childbearing and parental roles, the extended family, and economic and health issues. The component of the course focusing on youth primarily covers child and adolescent development.

AS&RC 172 The Education of Black Americans: Historical and Contemporary Issues (III)
Spring. 3 credits. Faculty.
This course is devoted to the history of educating Black Americans. Considerable attention is given to contemporary issues. The major topics of focus include an examination of the debates concerning the type of the education needed, public and private schooling efforts, the Africana Studies movement, community control issues, busing, affirmative action, resegregation debates and new initiatives in education including vouchers and charter schools.

AS&RC 191 Africa: The Continent and Its People @ (III)
Fall. 3 credits. L. Edmondson.
An introductory interdisciplinary course focusing on Africa's geographical, ecological, and demographic characteristics; indigenous institutions and values; the triple cultural heritage of Africanity, Islam, and Western civilization; main historical developments and transitions; and contemporary political, economic, social, and cultural change. Africa's ties with the United States (from trans-Atlantic slavery to the present), its impact on the emerging world order, and its contribution to world civilization are also explored.

AS&RC 202 Swahili Literature @
Fall. 4 credits. Prerequisite: Swahili 134.
A. Nanji.
Students gain mastery over spoken Swahili and are introduced to the predominant Swahili literary forms.

AS&RC 204 History and Politics of Racialisation: A Comparative Study (III)
Spring. 4 credits. A. Bekerie.
The primary focus of this course is on the historical and contemporary significance of racialisation in the United States and South Africa with regard to societal development and inter-relations. It includes an analysis of the historical development of racialised barriers as an instrument of power and privilege. The ways with which racialisation is used as an instrument of ideology to social status, cultural hierarchy and economic positions are also examined. Particular emphasis is given to the development and perpetuation of scientific racism in both places. The apparent success against Jim Crow form of racism in the United States and apartheid in South Africa appears to transform racism into subtle and 'scientific' sphere. This transformation and its continued impact in perpetuating social inequality are further analyzed.

AS&RC 205 African Cultures and Civilizations # @ (III)
Spring. 3 credits. D. Ohadike.
This course is concerned with the peoples of Africa and the development of African cultures and civilizations from the earliest times to the present day. It focuses on the near modern civilizations of Africa south of the Sahara, and the ancient civilizations of Egypt and the Nile Valley, together with their contributions to the development of the major world civilizations. The course also deals with the socio-political organization of African societies, their kinship systems, cross-cutting ties, rites of passage, gender relations, and arts (including music, dance, folklore, architecture, sculpture, painting, and body decoration).

AS&RC 210 Major Works of Black World Writing (IV)
Fall. 3 credits. A. Adams.
This course surveys classic texts by African American, Caribbean, and African writers. The focus is on literary texts by authors such as Langston Hughes, Toni Morrison, James Baldwin, Maryse Conde, and Chinua Achebe, with a view toward analyzing common experiences, references, themes, and literary strategies across the Black world. The works of fiction, poetry, and drama that constitute the central material of the course are supplemented by essays and biographies from other authors who have influenced the creative vision and the movement of the peoples of Africa and the Diaspora, e.g., W. E. B. DuBois and Marcus Garvey, Nelson and Winnie Mandela.

AS&RC 231 African-American Social and Political Thought (III)
Spring. 3 credits. J. Turner.
This is an introductory course that reviews and analyzes the major theoretical and ideological formulations developed and espoused by African-Americans in the struggle for liberation. We focus specifically on the political philosophy and historical significance of Malcolm X, and the work and movement of Marcus Garvey, as the prime movers of nationalism and pan-Africanism among Black people in this century. Such themes as slave resistance, nationalism, Pan-Africanism, emigration, anti-imperialism, socialism and internal colonialism, and the political and social views of Black women are discussed. Black political thought is viewed in its development as responses to concrete conditions of oppression and expression.

AS&RC 271 Introduction to African Development (also CRP and GOVT 271) @ (III)
For description, see CRP 271.

[AS&RC 280 Race, Power, and Privilege in the United States (formerly Racism in American Society) (III)
Fall. 3 credits. Not offered 2001–2002.
D. Barr and J. Turner.
This course is a topical treatment of the history and theory of racism in the United States. The course begins with an examination of basic concepts and theories of racism. From there we examine the history of racial groups in America—African Americans, Native Americans, Asian Americans, and the Hispanic groups. Particular attention is paid to the political economy of racism and the sociological and the psychological aspects of race relations in America, with specific reference to the differences and intersections of race, class, gender, and ethnicity.]

[AS&RC 283 History of Resistance Movements in Africa and the Diaspora @ (III)
Fall. 3 credits. Not offered fall 2001.
D. Ohadike.
This course deals with the history of resistance and liberation movements in Africa, Brazil, the Caribbean, and the United States. It is concerned with the dialectical relationships between European domination and Black resistance. It examines the methods, strength, and complexity of Black resistance and liberation, together with the rise of revolutionary classes in Africa and the Diaspora. It draws attention to the importance of unity and organization in resistance and then shows similarities, connections, and continuities in Black resistance. Finally, it demonstrates that African background helped shape the nature of struggles for independence and civil liberties in the Caribbean, Brazil, and the United States.]

AS&RC 290 The Sociology of the African-American Experience (III)
Fall. 3 credits. J. Turner.
This is an introductory course to the field of Africana Studies. It assumes a historical/sociological approach to the examination of the African-American experience. The course surveys the African beginnings of human kind and the classical role of Black people in world civilization and the making of early culture. The course treats issues in the humanities, social sciences, and history. The course is required for all undergraduate students majoring at the Africana Center.

AS&RC 304 African American Art (IV)
Spring. 3 credits. S. Hassan.
This course investigates the different forms of African-American visual artistic traditions in relation to their historical origins and socio-cultural context from the early days of slavery to the present time. The course starts with an overview of African art and the experiences of the Middle Passage and slavery in relation to African-American traditions in the decorative arts including: pottery, architecture, ironwork, quiltmaking, and basketry. This is followed by a fine art survey starting with the eighteenth and nineteenth centuries, continuing through the early twentieth-century Harlem Renaissance up to the present. Certain issues related to African-American arts and creativity such as "improvisation," "Black Aesthetic," and "Pan Africanism" are also explored. Slides, films, and film strips are used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

[AS&RC 310 Art in African Culture and Society @ (IV)
Fall. 3 credits. Not offered fall 2001.
S. Hassan.
This course is a survey of the visual art and material cultural traditions of sub-Saharan Africa. It aims at investigating the different forms of visual artistic traditions in relation to their historical and sociocultural context. The symbolism and complexity of traditional African art are explored through the analysis of myth, ritual, and cosmology. In-depth analysis of particular African societies is used to examine the relationship of the arts to indigenous concepts of time, space, color, form, and sociopolitical order. New and contemporary art forms associated with major socioeconomic changes and processes of assimilation and acculturation are also explored. These include tourist art, popular art, and elite art.]

AS&RC 311 Government and Politics in Africa @ (III)
Fall. 3 credits. A. Mazrui.
This course deals with power and political participation in Africa. Topics include: the colonial background and its political consequences; the pre-colonial continuities in the post-colonial politics; ethnicity and allegiance in the African polity; and the monarchical tendency in African political culture. Discussion covers a spectrum of

topics from the warrior tradition to the military coup in the post-colonial era; from the elder tradition to presidential gerontocracy; from the sage tradition to intellectual meritocracy. Other major topics include class *versus* ethnicity in African politics; the one-party *versus* the multiparty state; socio-cultural *versus* socio-economic ideologies; the gender question in African politics; the soldier and the state; and the African political experience in a global context.

AS&RC 352 Pan-Africanism and International Politics (III)
Spring. 3 credits. L. Edmondson.
Pan-Africanism addresses the shared experiences and aspirations of African people around the world, focused on a search for greater linkages and unifying measures. Informed by an exploration of the racial factor in international relations, this course examines Pan-African theories, ideologies, and movements, past and present, in their political, socio-economic, and cultural manifestations, focusing mainly on the African continent, the Caribbean, and Black America.

[AS&RC 362 Global Perspectives on Gender
Spring. 4 credits. Not offered 2001–2002. N. Assié-Lumumba.
The course examines how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class is taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty member directing the course, the class considers such issues as cross-cultural perspectives on gender; the history of work and family life in different societies; the gendered division of labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; and the role of the state in constructing an engendered economy and polity.]

AS&RC 380 African History: Earliest Times to 1800 # @ (III)
Fall. 3 credits. A. Bekerie.
As the second largest continent with vast and varying geographical and sociocultural conditions combined with recently established fact as an original home of human species, Africa provides rich and diverse oral and written early history. The course covers some of the major historical signposts from the origins of human species to 1800. Among the topics for discussion are: Historical Perspectives and Sources, The Nile River Cultural Complex, Berber, Carthage and Maghreb of North Africa, Upper Guinea and Western Sudan of West Africa, Cities of the East African Coast, and Great Zimbabwe and other sites of Southern Africa.

[AS&RC 381 African History, 1800–Present @ (III)
Spring. 3 credits. Not offered spring 2002. D. Ohadike.
This is a survey of African history in the nineteenth and twentieth centuries. It deals with African revolutions in the nineteenth century; the ending of the slave trade and the politics of the abolition; European scramble and partition of Africa; resistance to European colonial conquest; African societies in the colonial period; the politics of decolonization; Neo-colonialism; the rise and decline of military regimes; African debt crisis; and conflict and reconciliation in Africa.]

AS&RC 404 Afrocentricity: Paradigm and Critical Readings (III)
Fall. 4 credits. A. Bekerie.
What is Afrocentricity? It is a theoretical framework designed to study and interpret the histories and cultures of peoples of Africa and African descent by locating them at the center of their experiences. In other words, it is a method of knowing the life experiences of African peoples from the inside out. The course examines—through the writings of Asante, Keto, Clarke, Jean, Myers, Amin, Mazrui, Gates, Appiah, Richards, Schlesinger, and T'hiongo—the conception and depth of the paradigm, its relevance in the production and utilization of knowledge, particularly emancipatory knowledge, the history of the paradigm, and the debate it generates among a wide range of thinkers and scholars.

AS&RC 410 African American Politics (III)
Spring. 4 credits. J. Turner.
The central thesis of African American politics has been its movements for political change and democratic access and human rights. This development since the seventeenth century is a complex political legacy. This course conducts a close study of African American political practice and theoretical analysis of the American political system. Implications of the political systems for prospects and limitations to participation by Black people are analyzed. Critical historical stages in the process of Black politics are examined. The development of electoral offices in federal and statewide politics, and the significant urban political power bases giving rise to African American mayoralty politics in critical industrial centers, as well as rural hamlets, center the course. Presidential politics—the Jesse Jackson campaigns—and new political formations including Black Republicans/conservatives constitute the emphasis on contemporary events. The course reviews the development of the literature in African American politics.

AS&RC 420 Public Policy and the African-American Urban Community (III)
Spring. 4 credits. J. Turner.
The socioeconomic conditions of the African-American urban community are the central focus of the course. Community development models are explored in relationship to the social needs of the African-American population. The changing configuration of internal organization of the African American community nationally is examined.

AS&RC 422 African Literature @ (IV)
Spring. 4 credits. A. Adams.
With such great focus, both inside and outside Africa, on issues of Africa's "development," what place does "literature" take? Is African literature influencing or influenced by the mundane realities of daily living faced by African people? Or does African literature concern itself with philosophical ideas and ideals that transcend those realities to embrace the general human condition? Or, does it do both? The texts that we read in this course are approached in terms of these issues of "African development" and "the universal human experience."

AS&RC 435 African Cinema (also S HUM 435) @ (IV)
Fall. 4 credits. S. Hassan.
This course offers an overview of African cinema and filmmaking. It surveys historically the evolution of African cinema from its early days to the present. Through screening of selected African films, different trends within African cinema are explored, such as "Return to the Sources" and the rediscovery of the pre-colonial past; the "Social Realist" narrative and critique of post-independence Africa; reconstructing the story of colonialism from the perspective of the colonized; and the entertainment genre. Techniques, styles, and aesthetics of African cinema are also discussed. The course offers a unique opportunity of looking at African culture and society, and at issues of social change, gender, class, tradition, and modernization through African eyes.

AS&RC 451 Politics and Social Change in the Caribbean @
Fall. 4 credits. L. Edmondson.
A study of the historical, geostrategic, political, economic, and social (including racial and cultural) forces affecting the domestic and international experiences of Caribbean societies. Special attention is given to conflicting definitions and perceptions of the Caribbean; contending theories of Caribbean social structure and models of development; the continuing salience of struggles for change and transformation; prospects of regional integration; and Caribbean challenges to the global system, especially with regard to the region's relations with the United States and the region's position in the Third World in the context of the North-South cleavage.

AS&RC 455 Caribbean Literature @ (IV)
Fall. 4 credits. A. Adams.
This course examines the prose literature of the Caribbean islands. Through the reading of several novels and short stories from the various languages and cultural strains that comprise the Caribbean societies, students study the points of commonality and the diversity within this body of literature. The recurrence of certain historical, social, and cultural issues that have formed the multi-ethnic Caribbean peoples are analyzed in their varying manifestations across the linguistic and other boundaries to uncover the underlying shared experience.

AS&RC 459 Education in Africa and the Diaspora @ (III)
Fall. 4 credits. N. Assié-Lumumba.
This course deals with educational innovations geared to promoting equal opportunity based on gender, race, and class in Africa and the African diaspora. After an introduction on the concepts of education and innovations and the states of innovation as planned change, the course focuses on concrete historical and contemporary cases of educational innovations. The case studies in the United States include the creation and expansion of historically black institutions such as Lincoln University, Spelman College, Tuskegee Institute (now Tuskegee University), and other schools in the South, and the Westside Preparatory School in Chicago. The African cases studied include African languages for instruction with a focus on a Nigerian case, Ujamaa and education for self-reliance in Tanzania, and the case of Cote d'Ivoire which adopted television as a medium of instruction.

AS&RC 468–469 Honors Thesis
Hours TBA. 468, fall; 469, spring. Africana Center faculty.
For senior Africana Studies majors working on honors theses, with selected reading, research projects, etc., under the supervision of a

member of the Africana Studies and Research Center faculty. Permission of the AS&RC director of undergraduate studies is required.

AS&RC 475 Black Leaders and Movements in African-American History (III)
Fall. 4 credits. R. Harris.
The course analyzes the personalities, ideas, and activities central to the struggle for African-American liberation from the eighteenth century to the present. It examines theories of leadership and the structure of protest movements with the goal of understanding current leadership needs and trends among African Americans.

[AS&RC 478 Family and Society in Africa @ (III)
Fall. 4 credits. Not offered fall 2001.
N. Assié-Lumumba.
The family as a social institution is structured according to socio-economic, historical, political, and cultural specificities. This is the frame in which the family in Africa and the African diaspora must be analyzed. The topics discussed in this course include the concepts of nuclear and extended family, the place and role of different age groups and generations in the family, marriage and its related issues, parenthood, childrearing, gender roles, class differences, and "family planning." This course also deals with the impact of westernization, urbanization, and modern economy on the structure of the family in Africa as well as the legacy of African family values in the African diaspora with a focus on the African-American case.]

AS&RC 479 Women and Gender Issues in Africa @ (III)
Spring. 4 credits. N. Assié-Lumumba.
There are two contrasting views of the status and role of women in Africa. One view portrays African women as dominated and exploited by men. According to another view women have a favorable social position in Africa: indigenous ideologies consider women to be the foundation of society, they are economically active and independent and they have an identity independent of men. In this seminar we discuss the status and role of women in Africa historically as well as in the contemporary period. Among the topics covered are: women in non-westernized/pre-colonial societies; the impact of colonial policies on the status of women; gender and access to schooling, participation in the economy and politics; women and the law; women and health issues; gender issues in southern Africa; womanism and feminism; the United Nations Decade of Women; and the four World Conferences on Women (Mexico 1975, Copenhagen 1986, Nairobi 1985, and Beijing 1995).

[AS&RC 483 History of African Political Thought @ # (III)
Fall. 4 credits. Not offered fall 2001.
D. Ohadike.
The purpose of this course is to provide students with a thorough knowledge of the history of African political thought and ideologies, from ancient times to the present. The course is divided into two broad sections. The first section looks at the history of African political thought and institutions in ancient and near modern times and explains the functioning of African communalism. It then goes on to show how western political thought in the nineteenth and early twentieth centuries instigated the revival of such ideas as Uhuru, Negritude, and African Humanism. The second section examines the history of anti-colonial political thought. It explains why the colonial intelligentsia and radical African nationalists developed such political ideologies as African socialism, Lumumbism, and Nkrumaism. The course also looks at socio-political thought in African literature, and explores the contributions of African religious thought (like Kimbanguism and Tokoism) to the development of African political culture. Among the works of the major African political thinkers to be studied are those of Casely Hayford, Leopold Sédar Senghor, Simon Kimbangu, Amilcar Cabral, Frantz Fanon, Kwame Nkrumah, Patrice Lumumba, Nnamdi Azikiwe, Julius Nyerere, Jomo Kenyatta, Nelson Mandela, and Steve Biko.]

AS&RC 484 Politics and Social Change in Southern Africa @ (III)
Spring. 4 credits. L. Edmondson.
This course focuses on the legacies of apartheid and the challenges of transformation toward a post-apartheid society in South Africa. Topical emphases include: the rise and decline of apartheid; the historical continuity of Black resistance against racism; women under, against, and after apartheid; South Africa's relations with its neighbors; geo-political, economic, and racial dimensions of the American connection; politics of negotiation and transition to majority rule; prospects for stability, democracy, and equality; and South Africa's new role in the African continental and global arenas. Instructor's lectures are supplemented by films and class discussions.

AS&RC 498–499 Independent Study
498, fall; 499, spring. Hours TBA. Africana Center faculty.
For students working on special topics, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty.

AS&RC 501 Global Africa: Comparative Black Experience
Spring. 4 credits. A. Mazrui.
This seminar addresses two diasporas in the Black experience. The *diaspora of enslavement* concerns slaves and descendants of slaves in both the Western and Eastern Diaspora. The *diaspora of colonization* concerns demographic dispersal as a result of colonialism. The majority of African- Americans are part of the Diaspora of Enslavement. Recent Algerian immigrants into France are part of the Diaspora of Colonization. Jamaicans and Trinidadians in Britain are part of a *double diaspora*—products of both enslavement and colonialism. The course addresses these areas of Black comparison: Comparative Slavery—A Triple Heritage; Race and Race Mixture in Four Traditions; Comparative Emancipation from Slavery; Comparative Liberation from Colonialism; Comparative Struggle for Civil Rights; The Gender Question in Global Africa; and Comparative Quest for Global Equality.

[AS&RC 502 Education and Development in Africa
Spring. 4 credits. Not offered spring 2002.
N. Assié-Lumumba.
In the 1950s and 1960s, the human capital theory that emphasizes the importance of formal education for achievement of full productive potential of individuals and countries enjoyed a renewed popularity. African countries promoted educational expansion with the expectation that it would lead to socio-economic development. The initial euphoria, however was followed by skepticism and then disillusion. Education began to be perceived even as a hindrance to development. This course examines the relationship between formal education and individual and national development. In this seminar, different paradigms of development including modernization and dependency theories and Third World Forum are presented with an emphasis on the perceived and actual roles of education in individual and national development.]

[AS&RC 503 African Aesthetics
Fall. 4 credits. Not offered fall 2001.
S. Hassan.
The goal of this course is to investigate in depth the principles of aesthetics and philosophy of African visual arts. The course offers a critical survey of the different writings and the growing body of research on this relatively new area of inquiry. The objectives of the course are to review how African aesthetics have been studied to date, to provide a critical analysis of the different approaches to the subject and related issues, and to suggest future directions of research. In-depth analysis of particular African societies is used to examine the relationship of arts and aesthetics to indigenous concept of time, space, color, form, and sociopolitical order. In addition, issues related to African aesthetics and arts such as style, gender, class, and social change are also explored.]

AS&RC 504 Political Change in Africa
Fall. 4 credits. A. Mazrui.
The study of Africa can be approached dialectically (focusing on the tension between opposing forces) or thematically (focusing on themes as chapters of experience). This course borrows from both those approaches. In their class assignments and examinations students are free to use either approach. The first approach explores the dialetic between continuity and change; tradition and modernity; dependency and liberation; foreign and indigenous influences; anarchy and order; political decay and political development; democracy and authoritarianism; and socialism and capitalism. The thematic approach examines African Nationalism; race consciousness and Pan-Africanism; political parties and interest groups; executive power; ethnicity in politics; class-formation; civil-military relations; economic and cultural dependency; sub-regional and continental Pan-Africanism; crisis of the African state; and Africa in World Politics.

[AS&RC 510 Historiography and Sources: The Development of African-American History
Spring. 4 credits. Prerequisite: upperclass or graduate standing or permission of instructor. Not offered 2001–2002.
R. Harris.
The course studies the way Black historians in particular have explained the African-American past. It examines the development of writing African-American history during the twentieth century, and seeks to determine the principles for interpreting African-American history. Participants are acquainted with the methodologies and sources central to understanding the African-American experience.]

AS&RC 530 Womanist Writing in Africa and the Caribbean
Spring. 4 credits. A. Adams.
Theoretical essays on the nature, relevance, and articulation of feminist thought from African and Caribbean writers complement literary texts. Gender issues, as manifested both at home and in emigrant situations abroad are examined in texts by such writers as Sistren, Conde, Dangarembga, Aidoo, Warner-Vieyra, Ba, Emecheta, Kincaid, and W. Mandela. (Francophone works may be read in the original by individuals who so desire.)

AS&RC 598–599 Independent Study
598, fall; 599, spring. Variable credit. For graduate students.

AS&RC 601–602 Africana Studies Graduate Seminar
601, fall; 602, spring. 4 credits. Africana Studies faculty.
This course, which is conducted as a seminar, is designed for first-year AS&RC graduate students. It id coordinated and supervised by one professor but team-taught by three or four faculty members per semester. Each participating faculty member is responsible for a topical *segment* of the course related to her/his areas of specialization or an area of interest pertaining to theory and methodology of Africana Studies.

AS&RC 698–699 Thesis
698, fall; 699, spring. Limited to Africana Studies and Research Center graduate students.

Agriculture, Food, and Society Concentration

A. G. Power, coordinator; G. Altschuler, M. J. Esman, C. C. Geisler, A. Gillespie, B. Ginsberg, D. J. Greenwood, S. L. Kaplan, D. R. Lee, T. J. Lowi, T. A. Lyson, P. L. Marcus, P. McMichael, V. Nee, D. I. Owen, D. Pimentel, N. T. Uphoff, D. Usner. Office: 275 Clark Hall, 255–6042.

Agriculture, Food, and Society is an interdisciplinary concentration that is designed to introduce students to the study of agricultural and food issues from diverse perspectives within the liberal arts. The Agriculture, Food, and Society concentration seeks to make available to students a coherent program of study in which the role of agriculture in modern or prehistorical-historical and developed or developing societies can be understood in biological, social, scientific, and humanistic perspectives. The concentration draws on courses in several colleges—in particular, the Colleges of Arts and Sciences, Agriculture and Life Sciences, and Human Ecology.

The concentration is administered by a committee, the members of which are drawn from the faculty associated with the concentration. The members of this committee include faculty from each of the major colleges from which courses in the concentration are drawn. The work of the committee is supported administratively through the Biology and Society Major. The office of the Biology and Society Major (275 Clark Hall) also provides a central location for students to receive information about relevant course offerings, upcoming seminars and presentations, faculty interests, and so on.

Basic Requirements

The requirements for the Agriculture, Food, and Society concentration are designed to ensure a broad background in the biological, socioeconomic, and humanistic dimensions of agricultural and food issues. These requirements include foundation courses in biology; the Senior Seminar B&SOC/BIO G/S&TS 469, Food, Agriculture, and Society; plus a minimum of five electives totaling 15 credits drawn from the courses offerings.

Students enrolling in the Agriculture, Food, and Society concentration should take the following foundation courses in biology to prepare themselves for course work in agricultural science: a two-semester introductory biology sequence selected from Biological Sciences 109/110, 105/106, or 101–104. (Advanced placement in biology with a score of 4 or 5, or Biological Sciences 107/108, offered during the eight-week Cornell summer session, also satisfies the biological sciences requirement). These courses may be used to meet group 1 (physical or biological sciences) distribution sequence requirements in the College of Arts and Sciences.

It is recommended (but not required) that students in the Agriculture, Food, and Society concentration elect one or more freshman writing seminars with agriculturally related content to meet basic college requirements for graduation. The electives for the concentration, from which a minimum of five courses and 15 credits must be taken, are organized into three groups: agricultural and nutritional science, humanities, and social science/history. Students must select one agricultural and nutritional science course, one humanities course, and three social science or history courses. A maximum of six of the 15 credits may be earned in 100-level courses.

In addition, students are required to take the senior seminar, B&SOC/BIO G/S&TS 469, Food, Agriculture and Society. Adjustments to these and other requirement of the concentration may be made with the approval of the student's Agriculture, Food, and Society faculty adviser.

American Studies

N. Salvatore, acting director; G. Altschuler, P. Becker, R. Bensel, S. Blumin, T. Borstelmann, M. P. Brady, J. Brumberg, J. E. Gainor, M. C. Garcia, M. Kammen, I. Kramnick, T. J. Lowi, B. Maxwell, D. E. McCall, L. L. Meixner, R. L. Moore, M. B. Norton, R. Polenberg, S. Pond, J. Porte, J. Rabkin, S. Samuels, M. E. Sanders, V. Santiago-Irizarry, M. Seltzer, M. Shefter, J. H. Silbey, H. Spillers, D. Usner, M. Washington, S. Wong.

Affiliated faculty: J. E. Bernstock, H. Gottfried, M. Hatch, L. Herrin, J. Jennings, P. McClelland, J. Peraino, P. Sawyer, M. Woods.

The Major

The major in American Studies, appropriate for a wide array of future professions, began as a program of coordinated study in the history, literature, and politics of the United States. These remain the core elements, but American Studies aims to be inclusive in its subject matter. Given the nation's diverse population and cultures, the program wants its majors to examine American experience in broad terms, drawing on the materials and methods of a variety of disciplines.

The prerequisites are two courses from the following: AM ST 101, AM ST 102, AM ST 109, AM ST 110, ENGL 240, ENGL 262, ENGL 265, ENGL 275, GOVT 111, HIST 101, HIST 102, HIST 260, HIST 261. Students normally complete the prerequisite courses by the end of their sophomore year, but they may sign up for the major while enrolled in one of the courses. Students with a score of 5 on the AP exam in American history may use that credit to satisfy HIST 102.

Students who contemplate becoming an American Studies major are encouraged to speak with the program director as early as possible to arrange for a major adviser.

In consultation with their advisers, American Studies majors elect, in addition to the prerequisites, nine courses above the 100 level chosen from the American Studies course list (these courses are usually crosslisted with another department). Their work must include courses in all of the three large periods into which the nation's development can be divided (colonial, nineteenth century, and twentieth century). Students must take no fewer than four courses before 1900. At least one of these courses must be in the period before 1800. Each student must also take one of AM ST 430 seminars or, an appropriate substitute seminar at the 400 level. (AM ST 500/501 taught in Washington, DC, does not fulfill the seminar requirement.) Students are given considerable freedom in creating a balanced program, but no more than five courses may be in any one department.

Beyond the basic core requirements for the major, two courses of work in the history or literature of a culture outside the United States are required. Students who study abroad for one semester usually satisfy this requirement.

Students may find courses relevant to American experience that they wish to take but that are not on the American Studies course list. With their adviser's approval, students may count two such courses towards fulfilling the major.

Honors

Candidates for honors must maintain an average of B+ in courses pertinent to the major and have taken at least one course in which they wrote a research paper. Normally, at the end of the junior year students who wish to write a senior honors essay must approach a member of the American Studies Program faculty and discuss their ideas for a project. With approval from the faculty member students may then register in the fall of their senior year for AM ST 493, the honors essay tutorial. At the end of the fall semester, honors candidates will meet with their adviser and a second member of the American Studies faculty to discuss their progress. If satisfactory, honors students will complete their honors essays in the spring by enrolling in AM ST 494.

Prerequisite Courses (see also under appropriate departments)

[AM ST 101 Introduction to American Studies: History and Literature, the Nineteenth Century # (III)
4 credits. Not offered 2001–2002; next offered 2002–2003. G. Altschuler and D. McCall.

In this interdisciplinary course we analyze American values and behavior as the intersection of culture, politics, literature, and society. We do so by examining eight "great" or classic texts written between 1776–1900. The historical context of these texts is explored in lecture and they are treated as literature and historical/cultural documents. Texts include: *Common Sense* by Thomas Paine; *The Blithedale Romance* by Nathaniel Hawthorne; The Lincoln-Douglas Debates; Henry James' *The Bostonians*; Mark Twain's *Huckleberry Finn*; and William Dean Howells' *The Rise of Silas Lapham*.]

[AM ST 102 Introduction American Studies: History and Literature, the Twentieth Century (III)
4 credits. Not offered 2001–2002; next offered 2002–2003. G. Altschuler and D. McCall.
In this interdisciplinary course we analyze American values and behavior as the intersection of culture, politics, literature, and society. We do so by examining eight "great" or classic texts written between 1900 and the present. Texts include: Ernest Hemingway's *A Farewell to Arms*; F. Scott Fitzgerald's *The Great Gatsby*; William Faulkner's *Sound and the Fury*; Richard Wright's *Black Boy*; John Updike's *Rabbit Run*; and Philip Roth's *American Pastoral*. AM ST 101 is not a prerequisite of AM ST 102.]

AM ST 109 Introduction to American Studies: New Approaches to Understanding American Diversity, the Nineteenth Century # (III or IV)
Fall. 4 credits. N. Salvatore.
This course examines the first century-and-one-half of American national life and asks a series of interrelated questions about the changing meaning of national identity during this time. What did it mean to become an American, a process often urged on new immigrants, in light of the values and perceptions immigrants brought with them? What did democracy, a core element of becoming that American, mean if one were African or Native American? Irish or German? Jewish or Chinese? In what ways did racial and ethnic perceptions help structure political and cultural life during this period; and how does understanding the diverse historical reactions to these perceptions aid us in understanding the complexity of American life? This is an interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues.

[AM ST 110 Introduction to American Studies: New Approaches to Understanding American Diversity, the Twentieth Century (also LSP 110) (III or IV)
Spring. 4 credits. Not offered 2001–2002. M. C. Garcia.
This course examines American national life in the twentieth century and asks questions about the changing meaning of national identity. What does it mean to be an American in the twentieth century? What does it mean to assimilate: Can one assimilate structurally and yet maintain a distinct cultural identity? In what ways do racial and ethnic perceptions structure political, economic, and cultural life? This is an interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues.]

American Studies 430 Seminars

Section One: The Politics of the American Civil War (also GOVT 408)
Spring. 4 credits. Prerequisite: permission of instructor. R. Bensel.
The Civil War, along with the founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American Political development. Arising out of intense ideological, cultural, and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention is paid to: the political economy and culture of plantation slavery in the antebellum South; the apparent inevitability of collision between the slave and free states and their respective societies; the military, political, and economic strategies that determined, on both sides, the course and duration of the war; the limits and possibilities of reform of southern society during Reconstruction; and the impact of the Civil War on the subsequent development of the United States.

Section Two: The Four Seasons Motif in American Culture (also S HUM 405 and HIST 455)
Fall. 4 credits. Prerequisite: permission of instructor. M. Kammen.
The focus of this seminar is one of the most ubiquitous and pervasive motifs in all of the arts (painting, literature, and music) in the northern hemisphere, both West and East: **The Four Seasons**. We view works of art and films, read fiction, non-fiction, and poetry, and listen to music. Although we must devote serious attentions to the Old World origins, dispersion, and local permutations of this motif, more than half of the seminar is given over to American manifestations and writings about the seasons, with particular attention to changes over time as well as geographical variations.

Section Three: Literature as History: The Americas (also ENGL 430)
Fall. 4 credits. Prerequisite: permission of instructor. B. Maxwell.
Beginning with William Carlos Williams's *In the American Grain* (1925), this course considers modernist innovations in the telling of history by literary means. Responding to what they felt as the "deadness" of conventional historiography, writers such as Williams, Charles Reznikoff, John Sanford, Muriel Rukeyser, Melvin Tolson, and Paul Metcalf produced imaginative American histories that made a new world of historical narration, and in the process found new objects of historical attention. One of these was the plural, transnational America of the hemispheric Americas. This reconfiguration anticipated and in some cases shaped recent revisionist critiques of the European presence on American soil (Eduardo Galeano, Leslie Marmon Silko, David Stannard, Ward Churchill, Noam Chomsky, Ana Castillo); accordingly students read examples, some polemical, of that later work.

Section Four: Detroit: Nowhere to Run, Nowhere to Hide
Spring. 4 credits. Prerequisite: permission of instructor. N. Salvatore.
Detroit has been a national symbol of urban decay for many decades. The devastating violence in 1967 created as well a widespread national belief that this largely African-American population could not successfully adapt to contemporary urban life. Yet those images conflict with others of even longer standing, of Detroit, Motown, as a source of national culture; of progressive, interracial unionism; of a strong black religious community; and of the city as an incubator of diverse movements supporting black nationalism, civil rights, and black entrepreneurship. Taking our lead from one of Martha and the Vandellas' great hits, we explore these multiple images and the even more complex realities of this city during the post-1945 era. We do so, moreover, in an interdisciplinary fashion that seeks to understand images of Detroit in the context of national events.

Anthropology, Sociology, and Economics

[AM ST 150 Introduction to American Religion (also SOC 150 and RELST 150) (III)
3 credits. Not offered 2001–2002. P. Becker.
For description, see SOC 150.]

[AM ST 203 Religion and Family in the U.S. (also SOC 201, R SOC 202, RELST 203) (III)
3 credits. Not offered 2001–2002. P. Becker.
For description, see SOC 201.]

[AM ST 221 Anthropological Representation: Ethnographies of Latino Culture (also ANTHR 221 and LSP 221) (III)
Spring. 3 credits. Not offered 2001–2002. V. Santiago-Irizarry.
For description, see ANTHRO 221.]

AM ST 307 Equality and Dominance: Historical Ethnography of the United States before 1900 (also ANTHR 301) # (III)
Spring. 4 credits. D. Doukas.
For description, see ANTHR 301.

AM ST 323 American Economic History (also ECON 323) # (III)
Spring. 4 credits. P. McClelland.
For description, see ECON 323.

AM ST 377 The United States (also ANTHR 377 and LSP 377) (III)
Fall. 4 credits. V. Santiago-Irizarry.
For description, see ANTHRO 377.

[AM ST 380 Gender, Ideology, and Culture (also SOC 380 and WOMNS 380) (III)
Not offered 2001–2002. 4 credits. P. Becker.

AM ST 266 Asian American Women and Literature (also AAS 266, ENGL 266) (IV)
Fall. 4 credits. S. Dave.
For description, see AAS 266.

AM ST 268 The Culture of the 1960s (also ENGL 268) (IV)
Spring. 4 credits. P. Sawyer.
This course argues that the 1960s helps define the 1990s, but that as we look back, the 1990s helps define the 1960s. Were the sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an empassioned critique that changed American society? What can the experiences of young "boomers" contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, war, the counterculture, the New Left, and the woman's movement. Texts include *The Autobiography of Malcolm X, The Electric Kool-Aid Acid Test, Dispatches*, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, manifestoes, and memoirs. The term paper explores students' special interests.

[AM ST 275 The American Literary Tradition (also ENGL 275) (IV)
Fall. 4 credits. Not offered 2001–2002. H. Spillers.
The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.]

[AM ST 276 Literature in the Cold War Culture (also ENGL 276) (IV)
Not offered 2001–2002. B. Maxwell.

Spring. 4 credits. 428 and consent of instructor are required for 429. T. Lowi.
For description, see GOVT 429.

History

AM ST 103 Introduction to American History (also HIST 101) # (III)
Fall. 4 credits. M. B. Norton.
A survey of American history from the beginning through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization, the American Revolution, the early republic, antebellum reform movements, and the coming of the Civil War.

AM ST 104 Introduction to American History (also HIST 102) (III)
Spring. 4 credits. Staff.
An introductory survey of the development of the United States since the Civil War.

AM ST 124 Democracy and its Discontents: Political Traditions in the United States (also HIST 124) (III)
Summer. 3 credits. N. Salvatore.
An examination of democracy and its critics. The course explores the evolution of democracy in America, focusing on some of the dramatic and important episodes in American history. It considers the struggles over the emancipation of slaves in the nineteenth century and expanded rights for women and working people in the twentieth century, free-speech issues, the civil-rights movement, religious-based critiques of American culture, and conservative critiques of American liberalism. The course serves as an investigation of the ways in which political expression takes forms in modern American culture. In addition to lectures, the course features several afternoon programs. These programs include guest lecturers and hands-on instruction in how to use the modern electronic research library.

[AM ST 201 Popular Culture in the United States, 1900–1945 (III or IV)
Fall. 4 credits. Not offered 2001–2002. G. Altschuler.
American Studies 201 deals with American popular culture in the period between 1900 and the end of World War II. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines, and music, we try to better understand the ways in which popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and the less powerful, seek to "control" images and themes. Topics for 201 include: the Western; Cultural Heroes and the Cult of Individualism in the 1920s; The Hays Code and the Black Sox scandal; Mae West and the "New Women", Advertising in an Age of Consumption; Gangsters and G-Men; and Jackie Robinson and the American Dilemma.]

[AM ST 202 Popular Culture in the United States, 1945–Present (III or IV)
Spring. 4 credits. Not offered 2001–2002. G. Altschuler.
American Studies 202 treats the period from 1945 to the present. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines, and music, we try to better understand the ways in which popular culture shapes and/or reflects American values. The course also depicts popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and less powerful, seek to "control" images and themes. Topics for 202 include: The "Honeymooners" and 1950s Television, soap operas; "Gross-out" movies;'Elvis; The Beatles, and Guns 'n Roses; Gothic Romances; and People Magazine and USA Today.]

[AM ST 204 Comparative Migration in the Americas (also HIST 202) (III)
Spring. 4 credits. Not offered 2001–2002. M. C. Garcia.
For description, see HIST 202.]

AM ST 208 Seminar: Era-Franklin D. Roosevelt (also HIST 208) (III)
Fall. 4 credits. R. Polenberg.
For description, see HIST 208.

[AM ST 210 Civil Rights and Civil Wrongs: The Search for Racial Justice in America, 1945–1970 (III)
Fall. 4 credits. Not offered 2001–2002. N. Salvatore.
In this seminar we read a variety of texts that underscore the fierce struggle to define the meaning of civil rights in American society during this era. We explore this from multiple perspectives through readings of historical, legal, political, theological, and literary readings.]

[AM ST 320 Understanding Work in America, 1800–1990 (also HIST 315) (III)
4 credits. Not offered 2001–2002; next offered 2003–2004. N. Salvatore.
This course examines both the experience and the perception of work in American life in the century framed by two fundamental formations: the emergence of a system of industrial capitalism largely nationalistic in its orientation and the development of a more international economic system in more recent times. Among the topics considered are the effects of technological change, its impact on the experience of work across numerous occupational categories, and the changing perceptions of work as reflected in contemporary cultural expression, literature, and commentary across the century.]

[AM ST 321 Colonial North America to 1763 (also HIST 321) # (III)
4 credits. Not offered 2001–2002. M. B. Norton.
For description, see HIST 321.]

AM ST 322 Age of the American Revolution, 1763–1815 (also HIST 325) # (III)
Spring. 4 credits. M. B. Norton.
For description, see HIST 325.

[AM ST 324 Varieties of American Dissent, 1880–1990 (also HIST 324) (III)
4 credits. Not offered 2001–2002; next offered 2002–2003. N. Salvatore.
The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course explores the varieties of economic, political, and cultural dissent in American between 1880 and 1990, and examines how understanding dissent in its specific historical context illuminates major aspects of American life and culture.]

[AM ST 327 American Frontier History before 1850 (also HIST 327) # (III)
4 credits. Not offered 2001–2002. D. Usner.

AM ST 360 Painting and Everyday Life in Nineteenth-Century America (also ART H 360) # (IV)
Spring. 4 credits. L. L. Meixner.
For description, see ART H 360.

AM ST 390 American Architecture and Building I (also ARCH 390)
Fall. 3 credits. Prerequisites: ARCH 181–182 or permission of instructor. M. Woods.
For description, see ARCH 390.

[AM ST 391 American Architecture and Building II (also ARCH 391)
3 credits. Prerequisites: ARCH 181–182 or permission of instructor. Not offered 2001–2002. M. Woods.]

[AM ST 397 Special Topics in the History of Architecture and Urbanism (also ARCH 398)
3 credits. Prerequisites: ARCH 181–182 or permission of instructor. Not offered 2001–2002. M. Woods.
For description, see ARCH 398.]

[AM ST 462 Topics in Early Modernism (also ART H 462) (IV)
4 credits. Not offered 2001–2002. L. L. Meixner.
For description, see ART H 462.]

Honors

Please see description of major for information about registration in these courses.

AM ST 493–494 Honors Essay Tutorial
493, fall; 494, spring. Up to 4 credits each semester. See R. L. Moore for appropriate advisers.

Center for Applied Mathematics

The Center for Applied Mathematics administers a broadly based interdepartmental graduate program that provides opportunities for study and research over a wide range of the mathematical sciences. This program is based on a solid foundation in analysis, algebra, and methods of applied mathematics. The remainder of the graduate student's program is designed by the student and his or her Special Committee. For detailed information on opportunities for graduate study in applied mathematics, students should contact the Director of Graduate Studies of the Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall.

There is no special undergraduate degree program in applied mathematics. Undergraduate students interested in an application-oriented program in mathematics may select an appropriate program in the Department of Mathematics, the Department of Computer Science, or some department of the College of Engineering.

A listing of selected graduate courses in applied mathematics can be found in the description of the center in "Interdisciplinary Centers, Programs, and Studies."

Archaeology Program

S. Baugher (landscape architecture), R. G. Calkins (history of art), K. M. Clinton (classics), J. E. Coleman (classics), D. Evett (Language House Program), R. T. Farrell (English), K. L. Gleason (landscape architecture), J. S. Henderson (anthropology), K. A. R. Kennedy (ecology and systematics), P. I. Kuniholm (history of art), director of undergraduate studies, D. I. Owen (Near Eastern studies), Joan R. Piggott (history), A. Ramage (history of art), N. Russell (anthopology), B. S. Strauss (history), Michael A. Tomlan (city and regional planning), T. P. Volman (anthropology), Jeffrey R. Zorn (near eastern studies).

Archaeology is an interdisciplinary field at Cornell, which is one of the few universities in the United States to offer a separate archaeology major. Program faculty members, affiliated with several departments, coordinate course offerings and help students identify opportunities for fieldwork, graduate study, and professional positions.

The Major

Prospective majors must complete Archaeology 100 or one of the basic courses as defined below before they will be admitted to the major. This initial course will not be counted toward the major requirements.

Because the major draws on the teaching and research interests of faculty from many departments to present a broad view of the archaeological process, interested students should discuss their course of study with a participating faculty member as early as possible. In some areas of specialization, intensive language training should be coordinated with other studies as early as the freshman year.

Once admitted to the major, students must take at least 32 additional credits from the courses listed below, or from related fields selected in consultation with a major adviser of their choosing. The courses chosen should provide exposure to a broad range of cultures known through archaeology and the methods of uncovering and interpreting them. Sixteen of the credit hours should be at the 300 level or above. At least two courses must be taken from each of the following categories: B. Anthropological Archaeology; C. Classical, Near Eastern, and Medieval Archaeology; and D. Methodology and Technology.

Either ARKEO 481 or ARKEO 482 (Honors Thesis, fall and spring) can count toward the major, but not both. In addition to ARKEO 481 or 482, only four credits of ARKEO 300 (Individual Study) or other supervised study can count towards the major.

Courses basic to the discipline of archaeology are marked with the word "Basic" after the number of credit hours. It is recommended that majors who are planning to pursue graduate studies in archaeology take at least two of the basic courses in each category. Further courses in languages and geology are also recommended.

Honors. Honors in archaeology are awarded on the basis of the quality of an honors essay and the student's overall academic record. Prospective honors students should have at least a 3.5 grade point average in the major and a 3.0 grade point overall. They should consult with the director of undergraduate studies before the beginning of the senior year. The honors essay is normally prepared over two semesters in consultation with a faculty adviser during the senior year; students may enroll in Archaeology 481 (fall) or Archaeology 482 (spring) for this purpose.

Fieldwork. Every student should gain some practical experience in archaeological fieldwork on a project authorized by his or her adviser. This requirement may be waived in exceptional circumstances. The Jacob and Hedwig Hirsch bequest provides support for a limited number of students to work at excavations sponsored by Cornell and other approved institutions.

The Concentration

Students in Cornell schools and colleges other than Arts and Sciences may elect a concentration in archaeology. To concentrate in archaeology, the student must complete five courses, all with a grade of C or better. The five courses must consist of either (1) Archaeology 100 and four other courses from categories B–D (described above), at least three of which must be basic courses, or (2) five courses from categories B–D, at least four of which must be basic courses. Concentrators are encouraged to gain some fieldwork experience. They are eligible for Hirsch Scholarships in support of fieldwork on the same basis as majors.

First-Year Writing Seminars

For course descriptions, see the first-year writing seminar brochure.

A. Introductory Courses and Independent Study Courses

ARKEO 100 Introduction to Archaeology (also ANTHR 100) # @ (III or IV)
Fall. 3 credits. Basic. J. Henderson.
A broad introduction to archaeology: the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate the varied methods and interpretive frameworks archaeologists use to reconstruct them. This course can serve as a platform for both Archaeology and Anthropology undergraduate majors.

ARKEO 201 Lost Tribes and Sunken Continents (also ANTHR 201) @ #
Summer only. 3 credits. D. Evett.
An examination of popular theories about past highlights, differences among them, and the kinds of explanations offered by archaeologists. Emphasis is on the ways archaeologists interpet the past. Case studies include Atlantis, Stonehenge, Egyptian and Mexican pyramids, and the history of contacts between the Old World and the Americas.

ARKEO 300 Individual Study in Archaeology and Related Fields
Fall and spring. Credit TBA. Prerequisite: ARKEO 100 or permission of instructor.
Students pursue topics of particular interest with the guidance of a faculty member.

ARKEO 481–482 Honors Thesis
481, fall; 482, spring. 4 (V) credits. S-U only. Prerequisite: admission to Honors Program.
The student, under faculty direction, prepares a senior thesis.

ARKEO 600 Special Topics in Archaeology
Fall and spring. 4 (V) credits.
Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

ARKEO 681–682 Master's Thesis
681, fall; 682, spring. 4 (V) credits. S-U only. Limited to students admitted to Master's Program in Archaeology.
Students, working individually with faculty member(s), prepare a Master's Thesis in Archaeology.

B. Anthropological Archaeology

[ARKEO 202 Interpretive Archaeology (also ANTHR 202) (III)
Fall. 3 credits. Basic. Limited to 50 students. Not offered 2001–2002. T. P. Volman.
For description, see ANTHR 202.]

[ARKEO 203 Early People: The Archaeological and Fossil Record (also ANTHR 203) # (III)
Spring. 3 credits. Basic. Not offered 2001–2002. T. P. Volman.]

[ARKEO 204 Ancient Civilizations (also ANTHR 204) @ # (III)
Fall. 3 (4) V credits. Basic. Not offered 2001–2002. J. S. Henderson.]

[ARKEO 215 Stone Age Art (also ANTHR 215) # (III)
Fall. 3 credits. Not offered 2001–2002. T. P. Volman.
For description, see ANTHR 215.]

ARKEO 255 Great Empires of the Andes (also ANTHR 255) @ # (III)
Summer only. 3 credits. M. Malpass.
The Andes region of South America, stretching from northern Colombia to Tierra del Fuego, saw the rise and fall of some of the world's most spectacular societies, from the Moche of the north Peruvian coast to the Incas. Not only were the cultures of this area highly developed, but many of the technologies—metallurgy, textiles, ceramics, and stonemasonry, to name just four—were unusually sophisticated. The Andean region saw the indigenous domestication of plants and animals as well as the rise of state-level societies. This course introduces students to the cultural developments of this fascinating area, from the earliest times to the fall of the Incas in AD 1543.

[ARKEO 317 Stone Age Archaeology (also ANTHR 317) (III)
Fall. 4 credits. Not offered 2001–2002. T. P. Volman.
For description, see ANTHR 317.]

[ARKEO 355 Ancient Mexico and Central America (also ANTHR 355) @ # (III)
Spring. 4 credits. Basic. Not offered 2001–2002. J. Henderson.
For description, see ANTHR 355.]

[ARKEO 409 Approaches to Archaeology (also ARKEO 609 and ANTHR 409/609) (III)
Fall. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 2001–2002. N. Russell.
For description, see ANTHR 409.]

[ARKEO 459 Archaeology of the Household (also ARKEO 659 and ANTHR 459/659) (III)
Fall. 4 credits. Not offered 2001–2002. J. Henderson and N. Russell.
For description, see ANTHR 459.]

[ARKEO 466 Humans and Animals (also ARKEO 666 and ANTHR 466/666) # (III)
Fall. 4 credits. Not offered 2001–2002. N. Russell.
For description, see ANTHR 466.]

[ARKEO 469 Gender and Age in Archaeology (also ARKEO 669 and ANTHR 469/669) # (III)
Spring. 4 credits. Not offered 2001–2002. N. Russell.
For description, see ANTHR 469.]

[ARKEO 493 Seminar in Archaeology (also ANTHR 493)
Fall. 4 credits. Not offered 2001–2002.]

[ARKEO 494 Seminar in Archaeology: The Archaeology of Human Origins (also ANTHR 494)
Fall. 4 credits. Not offered 2001–2002. T. P. Volman.
For description, see ANTHR 494.]

[ARKEO 609 Approaches to Archaeology (also ARKEO 409 and ANTHR 409/609)
Fall. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 2001–2002. N. Russell.
For description, see ANTHR 409.]

[ARKEO 659 Archaeology of the Household (also ARKEO 459 and ANTHR 459/659)
Fall. 4 credits. Not offered 2001–2002. J. Henderson and N. Russell.
For description, see ANTHR 459.]

[ARKEO 666 Humans and Animals (also ARKEO 466 and ANTHR 466/666)
Fall. 4 credits. Not offered 2001–2002. N. Russell.
For description, see ANTHR 466.]

ARKEO 667 Contemporary Archaeological Theory (also ANTHR 667)
Spring. 4 credits. Prerequisite: undergraduates by permission of instructor. Limited to 14 students. N. Russell.
For description, see ANTHR 667.

[ARKEO 669 Gender and Age in Archaeology (also ARKEO 469 and ANTHR 469/669)
Spring. 4 credits. Not offered 2001–2002. N. Russell.
For description, see ANTHR 469.]

[ANTHR 456 Mesoamerican Religion, Science, and History
Fall. 4 credits. Not offered 2001–2002.]

[LA 260 Preindustrial Cities and Towns of North America (also CRP 260)
Fall. 3 credits. Not offered 2001–2002. S. Baugher.
For description, see LA 260.]

C. Classical, Near Eastern, and Medieval Archaeology

[ARKEO 221 Minoan-Mycenaean Art and Archaeology (also CLASS 221 and ART H 221) # (IV)
3 credits. Basic. Not offered 2001–2002. J. Coleman.
For description, see CLASS 221.]

[ARKEO 233 Archaeology in Action II (also ART H 225 and CLASS 233) # (IV)
Spring. 3 credits. Prerequisite: permission of instructor. Not offered 2001–2002. P. I. Kuniholm.
For description, see ART H 225.]

[ARKEO 240 Old World Prehistory (also ANTHR 240) # (III)
Fall. 3 credits. Not offered 2001–2002. N. Russell.
For description, see ANTHR 240.]

ARKEO 263 Introduction to Biblical History and Archaeology (also NES 263, JWST 263, and RELST 264) @ # (III)
Spring. 3 credits. J. Zorn.
For description, see NES 263.

ARKEO 268 Ancient Egyptian Civilization (also NES 268 and JWST 268) @ # (III or IV)
Spring. 3 credits. G. Kadish.
For description, see NES 268.

[ARKEO 275 Ancient Seafaring (also JWST 261 and NES 261) @ # (III)
3 credits. Not offered 2001–2002. D. I. Owen.
For description, see NES 261.]

[ARKEO 321 Mycenae and Homer (also CLASS 321 and ART H 321) # (IV)
Fall. 4 credits. Prerequisite: at least 1 previous course in Archaeology, Classics, or History of Art. Not offered 2001–2002. J. Coleman.
Study of the relationship between the Mycenaean period of Greece (known primarily from archaeology) and the Homeric *Iliad* and *Odyssey*. Topics include Mycenaean architecture, burial customs, kinship, and military activities; the reasons for the collapse of the Bronze Age palatial economies; the archaeological evidence for society in the "Dark Ages" that followed; the writing systems of Mycenaean Greece (Linear B) and the Iron Age (the Semitic/Greek alphabet); and the nature of the Homeric poems and their value as historical sources.]

ARKEO 360–61 Origins of Mesopotamian Civilization (also NES 360–361) @ # (III or IV)
360, fall; 361, spring. 4 credits. D. Owen.
For description, see NES 360–61.

[ARKEO 366 The History and Archaeology of the Ancient Near East (also JWST 366 and NES 366) @ # (III or IV)
Fall. 4 credits. Not offered 2001–2002. D. I. Owen.
For description, see NES 366.]

[ARKEO 380 Introduction to the Arts of China (also ART H 380) @ # (IV)
Fall. 4 credits. Not offered 2001–2002. A. Pan.
For description, see ART H 380.]

[ARKEO 417 Early Medieval Archaeology and Literature (also ARKEO 617, ENGL 417 and 617) # (IV)
Fall. 4 credits. Prerequisite: permission of instructor. Enrollment limited to 15 students. This course may be used as one of the three pre-1800 courses required of English majors. Not offered 2001–2002. R. T. Farrell.
For description, see ENGL 417.]

[ARKEO 425 Seminar on the Bronze Age Architecture of Asia Minor (also ART H 425 and CLASS 430) # (IV)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. P. I. Kuniholm.]

[ARKEO 432 Sardis and the Cities of Asia Minor (ART H 424 and CLASS 432) # (IV)
4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. A. Ramage.]

ARKEO 434 The Rise of Classical Greece (also ART H 434 and CLASS 434) # (IV)
4 credits. Recommended: CLASS 220 or 221 or ART H 220 or 221, or permission of instructor. P. I. Kuniholm.
For description, see ART H 434.

ARKEO 435 Seminar on Roman Art and Archaeology (also CLASS 435 and ART H 427) # (IV)
Spring. 4 credits. Prerequisite: permission of instructor. A. Ramage.
For description, see ART H 427.

[ARKEO 520 Seminar in Classical Archaeology (also ART H 520 and CLASS 630)
Fall. 4 credits. Not offered 2001–2002. J. E. Coleman.
For description, see CLASS 630.]

[ARKEO 617 Early Medieval Archaeology and Literature (also ARKEO 417, ENGL 417 and 617)
Fall. 4 credits. Not offered 2001–2002. R. T. Farrell.
For description, see ENGL 417.]

[ARKEO 629 The Prehistoric Aegean (also CLASS 629)
4 credits. For graduate students and advanced undergraduates with permission of instructor. Not offered 2001–2002. J. E. Coleman.
For description, see CLASS 629.]

CLASS 220 Introduction to Art History: The Classical World (also ART H 220)
Fall. 4 credits. J. Rife.
For description, see CLASS 220.

CLASS 319 Art in the Daily Life of Greece and Rome (also ART H 319)
Spring. 4 credits. A. Ramage.
For description, see ART H 319.

[CLASS 322 Greeks and Barbarians (also ART H 328)
Fall. 4 credits. Prerequisite: Classics 220 or 221, or permission of instructor. Not offered 2001–2002. J. Coleman.
For description, see CLASS 322.]

[CLASS 329 Greek Sculpture (also ART H 329)
4 credits. Not offered 2001–2002. J. E. Coleman.
For description, see CLASS 329.]

CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also RELST 333)
Fall. 4 credits. A previous course in Classics (civilization or language) or RELST 101 is recommended. K. Clinton.
For description, see CLASS 333.

[ART H 322 Arts of the Roman Empire (also CLASS 350)
Fall. 4 credits. Not offered 2001–2002. A. Ramage.
For description, see ART H 322.]

[ART H 325 Greek Vase Painting (also CLASS 325)
Fall 4 credits. Not offered 2001–2002. A. Ramage.
For description, see ART H 325.]

[ART H 327 Greek and Roman Coins (also CLASS 327)
4 credits. Not offered 2001–2002. A. Ramage.
For description, see ART H 327.]

LA 292 Creating a Second Nature
Spring. 3 credits. Prerequisites: none. ANTHR 100, ARKEO 100, or CLASS/ART H 220 recommended. Offered alternate years; next offered spring 2002. K. Gleason.
For description, see LA 292.

LA 545 The Parks and Fora of Imperial Rome
Spring. 3 credits. Prerequisites: advanced standing in a design field, classics or history of art, or by permission of the instructor. K. Gleason.
For description, see LA 545.

D. Methodology and Technology

[ARKEO 256 Practical Archaeology (also CLASS 256) (IV)
Spring. 3 credits. Not offered 2001–2002. J. Coleman.
For description, see CLASS 256.]

ARKEO 262 Laboratory in Landscape Archaeology (also LA 262)
Fall. 3 credits. S. Baugher.
For description, see LA 262.

ARKEO 285 Art, Archaeology, and Analysis (also ART 372, ENGR 185, EAS 200, MS&E 285, ART H 200, NS&E 285, and PHYS 200) (I or IV)
Spring. 3 credits. Does not meet liberal studies distribution requirements. Staff.
For description, see EAS 200.

ARKEO 309 Dendrochronology of the Aegean (also ART H 309 and CLASS 309) # (III or IV)
Fall and spring. 4 credits. Limited to 10 students. Letter only. Prerequisite: permission of instructor. P. I. Kuniholm.
For description, see ART H 309.

[ARKEO 370 Environmental Archaeology (also ARKEO 670 and ANTHR 370 and 670) (III)
Spring. 4 credits. Prerequisite: 2 previous courses in archaeology or permission of instructor. Not offered 2001–2002. T. P. Volman.
For description, see ANTHR 370.]

[ARKEO 405 Archaeological Research Design (also ARKEO 605 and ANTHRO 405/605) (III)
Spring. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 2001–2002. J. S. Henderson, T. P. Volman.
For description, see ANTHR 405.]

[ARKEO 423 Ceramics (also ART H 423 and CLASS 423) # (IV)
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 2001–2002. A. Ramage.
For description, see ART H 423.]

[ARKEO 458 Archaeological Analysis (also ARKEO 658 and ANTHR 458/658) (III)
Spring. 4 credits. Prerequisite: 1 course in archaeology or permission of instructor. Enrollment limited to 15 students. Not offered 2001–2002. J. S. Henderson.
For description, see ANTHR 458.]

[ARKEO 463 Zooarchaeological Method (also ANTHR 463) (III)
Fall. 5 credits. Not offered 2001–2002. N. Russell.
For description, see ANTHR 463.]

[ARKEO 464 Zooarchaeological Interpretation (also ANTHR 464) (III)
Spring. 4 credits. Not offered spring 2001. N. Russell.
For description, see ANTHR 464.]

[ARKEO 467 Origins of Agriculture (also ANTHR 467) # (III)
Spring. 4 credits. Not offered 2001–2002.]

ARKEO 601 Graduate Colloquium in Archaeology
4 credits. Open to graduate students and advanced undergraduates by permission of instructor. Staff.
Faculty members of the Program in Archaeology and invited speakers present summaries of the different aspects of archaeological analysis. Topics may include: lithics, ceramic typology, petrographic and neutron activation analysis, dendrochronology and other chronological techniques, settlement patterns, inscriptions, human and animal bones.

[ARKEO 605 Archaeological Research Design (also ARKEO 405 and ANTHR 405/605)
Spring. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 2001–2002. J. S. Henderson, T. P. Volman.
For description, see ANTHR 405.]

[ARKEO 670 Environmental Archaeology (also ARKEO 370 and ANTHR 370 and 670)
Spring. 4 credits. Prerequisite: 2 previous courses in archaeology or permission of instructor. Not offered 2001–2002. T. P. Volman.
For description, see ANTHR 370.]

[ANTHR 474 Laboratory and Field Methods in Human Biology (also BIOES 474)
5 credits. Prerequisite: 1 year of introductory biology, Anthropology 101, or permission of instructor. Next offered 2002–2003. K. A. R. Kennedy.]

BIOES 371 Human Paleontology (also ANTHR 371)
Fall. 4 credits. Prerequisite: one year of introductory biology, ANTHR 101, or permission of instructor. K. A. R. Kennedy.
For description, see BIOES 371.

[BIO ES 671 Paleoanthropology of South Asia (also ANTHR 671 and ASIAN 620)
Fall. 3 credits. Not offered 2001–2002. K. A. R. Kennedy.
For description, see BIO ES 671.]

[BIO ES 673 Human Evolution: Concepts, History, and Theory (also ANTHR 673)
Fall. 3 credits. Prerequisite: one year of introductory biology or ANTHR 101 or permission of instructor. Not offered 2001–2002. K. A. R. Kennedy.
For description, see BIOES 673.]

LA 261 Urban Archaeology (also CRP 261)
Fall. 3 credits. S. Baugher.
For description, see LA 261.

LA 569 Archaeology in Preservation Planning and Design (also CRP 569)
Spring. 3 credits. Offered alternate years. S. Baugher.
For description, see LA 569.

Asian American Studies Program

The Asian American Studies Program is a university-wide academic program housed administratively within the College of Arts and Sciences. Its aim is to promote teaching, research, and educational activities related to Asian Americans and to serve as a resource to the campus and regional communities. The program's undergraduate courses, offered within the program and cross-listed with departments in various colleges, meet distribution requirements and count toward a concentration in Asian American Studies. The program does not offer a graduate course of study, but students can undertake graduate work in Asian American Studies within selected disciplines of the university.

Undergraduate Concentration

The program's undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Asians in America. The course of study stresses developments within the United States, but also underscores the transnational and comparative contexts of Asian America and the field's connections with African American, American Indian, Latino, and Women's Studies. Students must work with a faculty adviser from among the program's affiliated faculty and must complete at least 15 units of credits as follows: (a) AAS 110 and two additional courses in Asian American Studies; (b) one course in Africana, American Indian, Latino Studies, or Women's Studies*; and (c) one course in East Asian, South Asian, or Southeast Asian Studies.* (*These courses must be approved by the student's faculty adviser, and they should address issues of race, gender, or the histories and cultures of Asian peoples.) Students must file an application for the concentration with the Asian American Studies Program.

Resource Center

The program's Asian American Studies Resource Center provides meeting space for the more than 35 undergraduate student organizations of the Cornell Asian Pacific Student Union and the graduate student Asian Pacific American Graduate Association. It also holds a modest print collection of books, periodicals, and newspapers; a current news clip file; a comprehensive data base of publications on Asian Americans since 1977; and a sizable collection of videotapes on the Asian American experience.

Research

The program encourages faculty and student research on Asian Americans by sponsoring guest lectures, conferences, film festivals, readings, and exhibits. It also funds research projects and student travel to conferences and research sites. The Asian American Studies Workshop is the program's principal research initiative, engaging Cornell's faculty and students with invited faculty from other universities in a year-long intensive study of selected themes.

Affiliated Faculty

T. Chaloemtiarana (Southeast Asia Program), B. de Bary (Asian studies), S. Han (sociology), V. P. Kayastha (Kroch Library), J. V. Koschmann (history), L. C. Lee (human development), V. Munasinghe (anthropology), V. Nee (sociology), R. E. Ripple (education), N. Sakai (Asian studies), S. Samuels (English), A. M. Smith (government), K. W. Taylor (Asian studies), Wai-Kwong Wong (Gannett Health Center), S. Wong, director (English), D. Yeh (vice president student/academic services)

Courses

AAS 110 Introduction to Asian American Studies (III or IV)
Spring. 3 credits. This course can be used to satisfy either a social science or humanities distribution requirement. S. Davé.
An interdisciplinary, cross-cultural introduction to Asian American Studies focusing on contemporary issues. Major themes include: identity and stereotypes, gender, family, community, education, migration and labor, and anti-Asianism. Coverage is given to both Hawaii and the U.S. mainland, and to Asian Indians, Chinese, Filipinos, Hawaiians, Japanese, Koreans, and Southeast Asians.

[AAS 213 Asian American History (III)
Spring or fall. 4 credits. Not offered 2001–2002.
For description, see HIST 213.]

AAS 262 Asian American Literature (IV)
Spring. 4 credits. S. Wong.
For description, see ENGL 262.

AAS 266 Asian American Women and Literature (also AM ST 266, ENGL 266 and WOMNS 266) (IV)
Fall. 4 credits. S. Davé.
This course explores the intersection of ethnicity, race, class, gender, and sexuality in the lives and literature of Asian American women. We discuss and analyze the historical, and contemporary social, political, and economic forces that have shaped women's lives and how they are reflected in literature. Our goal in the course is to explore and discover the diversity of voices in Asian American women's experiences and the similarities and commonalities of their social histories.

AAS 303 Asians in the Americas: A Comparative Perspective (also ANTHR 303) (III)
Fall. 4 credits. A. Subramanian.
The common perception of ethnicity is that this is a "natural" and an inevitable consequence of cultural difference. "Asians" overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the "Asians"? On what basis can we label Asians an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course examines the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

[AAS 412 Undergraduate Seminar in Asian American History (also HIST 412) (III)
Spring. 4 credits. Not offered 2001–2002.
For description, see HIST 412. A reading and research seminar that covers various topics in Asian American history.]

[AAS 438 Immigration and Ethnic Identity (III)
Spring. 4 credits. Not offered 2001–2002.
For description, see SOC 438.]

AAS 461 Asian Americans and Popular Culture (also AM ST 461, ENGL 461, and THETR 461) (IV)
Fall. 4 credits. S. Davé.
This course examines how Asian Americans are represented and represent themselves in American forms of popular culture such as literature, television, film, and print media. We explore the cultural contexts of the term "Asian American" that define its visibility and marketability in contemporary times. Some questions we address include: Is there an Asian American aesthetic, and, if so, how is it characterized? What are the consequences of the consumption of ethnic products by a mainstream audience? What are the ramifications of mass marketing for Asian American writers, producers, and artists?

[AAS 478 Self and Nation in Asian-American Literature (also ENGL 478) (IV)
4 credits. Not offered 2001–2002.
A study of the ways in which Asian American writers have constructed discourses of self and nation. Topics include nationalism, feminism, identity politics, and theories of minority discourse. In our reading of selected works of prose, poetry, and drama by Chinese American, Filipino American, Japanese American, and Korean American writers, we ask questions about the relation of these works to the moment of their production and reception, and the manner in which these textual representations engage with shifting cultural and political struggles. Writers under discussion may include: Carlos Bulosan, Theresa Hak Kyung Cha, Frank Chin, Jessica Hagedorn, and David Henry Hwang, Maxine Hong Kingston, Joy Kogawa, and David Mura.]

AAS 485 South Asian Formations and Asian American Studies (also ENGL 485) (IV)
Spring. 4 credits. S. Davé.
This course examines and discusses the emergence and recent explosion of South Asian American literature and research in

relation to the field of Asian American Studies. We read some of the recent literature published such as Jhumpa Lahiri's Pulitzer prizewinning *Interpreter of Maladies* as well as examining the historical and political nature of the community of South Asians in the U.S. Course topics include mass media, literature, gender and sexuality, history, theoretical essays, and a session attendance at the South Asian Studies Conference in Madison in October. We use both a comparative approach to other ethnic communities within the Asian Pacific American community and we explore the complexity of issues within the South Asian American community. Course covers a variety of works by authors such as Chandra Mohanty, Bharati Mukherjee, Yen Espiritu, Biju Matthew, Vijay Prasad, Sonia Shah, and Urvashi Vaid.

[AAS 492 Twentieth-Century Women Writers of Color

Spring. 4 credits. Not offered 2001–2002. This course explores a range of writing—novels, stories, poems, essays—by American women writers of color in the twentieth century. We look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region, and class. Readings may include works by Joy Harjo, Leslie Marmon Silko, Sandra Cisneros, Gloria Anzaldua, Theresa Hak Kyung Cha, Sigrid Nunez, Jamaica Kincaid, Maxine Hong Kingston, and Gwendolyn Brooks.]

AAS 495 Independent Study

Fall or spring. 1–4 credits.
Topic and credit hours to be mutually arranged between faculty and student. Independent Study Forms must be approved by Asian American Studies Program Office.

Biology & Society Major

J. V. Reppy, director of undergraduate studies, colleges of Arts and Sciences and Agriculture and Life Sciences; N. Breen, advising coordinator, College of Human Ecology; D. Gurak, advising coordinator, College of Agriculture and Life Sciences; E. Adkins-Regan, D. Bates, B. Bedford, R. Boyd, T. Brenna, R. Calvo, R. Canfield, S. Ceci, B. Chabot, C. C. Chu, P. Dear, M. Dennis, R. Depue, C. Eberhard, G. W. Evans, G. W. Feigenson, J. Ford, J. Fortune, C. Geisler, C. Greene, H. Greene, J. Haas, A. Hedge, S. Hilgartner, R. Howarth, H. C. Howland, K. A. R. Kennedy, R. Kline, B. Knuth, A. Lemley, D. Levitsky, B. Lewenstein, B. A. Lewis, M. Lynch, H. Mialet, A. Netravali, N. Noy, S. K. Obendorf, L. Palmer, A. Parrot, M. Pfeffer, T. Pinch, A. G. Power, W. Provine, S. Robertson, E. Rodriquez, M. Rossiter, P. Schwartz, J. Shanahan, M. Small, J. M. Stycos, V. Utermohlen, E. Wethington. Emeritus: U. Bronfenbrenner, J. Fessenden MacDonald, J. Mueller, D. Pimentel

The Biology & Society major is suited for students who wish to combine training in biology with exposure to perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing a foundation in biology, Biology & Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology & Society major, which involves faculty from throughout the university, is offered by the Department of Science & Technology Studies. Students in the College of Arts and Sciences, the College of Human Ecology, and the College of Agriculture and Life Sciences are eligible for the major. The major is coordinated for students in all colleges through the Biology & Society Office. Students can get information, specific course requirements, and application procedures for the major from the Biology & Society office in 275 Clark Hall, 255–6047.

Because the major is multidisciplinary, students must attain a basic understanding of the several disciplines it comprises. The curriculum includes courses in ethics; mathematics; statistics; history, philosophy, and social studies of science and biology; and basic biology (e.g., genetics and development; biochemistry and molecular-cell biology; ecology; evolutionary biology), as well as integrative courses offered through Biology & Society. In addition, majors are required to take a core course and must develop a theme: an intellectually coherent grouping of courses representative of their special interest in biology and society. Recommended themes in the Biology & Society major include biology, behavior, and society; biology and human population; biology and public policy; environment and society; food agriculture and society; and health and society. Students may also develop their own individually tailored themes (which in recent years have included topics such as biotechnology and society and agriculture, environment, and society). In consultation with their faculty adviser, students select courses that meet the foundation and core course requirements so as to build a coherent theme. Sample curricula for the recommended themes and for several student-developed themes are available in the Biology & Society Office.

There are student advisers and faculty available (according to posted office hours or by appointment) in the Biology & Society Offices, 275 Clark Hall or 278 Clark Hall, to answer questions and to provide assistance.

Admission to the Major

All students should have completed a year of college-level biology before submitting an application during their sophomore year. Juniors are considered on a case-by-case basis. Upper-division applicants should realize the difficulties of completing the major requirements in fewer than two years. Freshmen admitted to the Colleges of Agriculture and Life Sciences and Human Ecology as Biology & Society majors are considered to have been admitted to the major on a provisional basis, contingent on successful completion of the course sequence in introductory biology. The application includes (1) a one-page statement explaining the student's intellectual interests in the Biology & Society major and why the major is consistent with the student's academic goals and interests; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling Biology & Society requirements, including courses taken and those the student plans to take; and (4) a transcript of work completed at Cornell University and elsewhere, if applicable, current as of the date of application.

Acceptance into the major requires completion of the course sequence in introductory biology. Sophomores in the process of completing this prerequisite may be admitted to the major on a *provisional* basis. It is the student's responsibility to assure that final acceptance is granted upon satisfactory completion of the introductory biology sequence. Although only introductory biological science is a prerequisite for acceptance, students will find it useful to have completed some of the other requirements (listed below) by the end of their sophomore year, preferably by the end of the first semester. Students who are considering the major may also find it beneficial to take "S&TS 201, What is Science?" in their freshman or sophomore year. Human Ecology students should also consult the current Human Ecology Guide and meet with the college advising coordinator, Nancy Breen, 287A Martha Van Rensselaer Hall, 255–1928.

Major Requirements

No single course may satisfy more than one major requirement.

1) **Basic courses**

   A. BIO S 101–104 or 105–106 or 107–108 (prerequisite for admission to Biology and Society).

   B. College calculus (one course):* MATH 106, 111, 112 or any higher level calculus.

   Recommended but not required: General chemistry (one year sequence) (prerequisite to biochemistry and other chemistry courses): CHEM 103–104, 207–208, or 215–216.

2) **Foundation Courses** (should be completed by end of junior year).

   These courses must be above the 100-level, at least three credit hours, and taken for a letter grade.

   A. Ethics: one course; B&SOC 205 (also S&TS 205) or B&SOC 206 (also S&TS 206).**

   B. Social sciences/humanities foundation: two courses; one from any two of the following subject areas: History of Science; Philosophy of Science; Sociology of Science; Politics of Science; and Science Communication.**

   C. Biology foundation (breadth requirement): three courses; one each from three of the following subject areas: Ecology (BIO ES 261); Evolutionary Biology (BIO ES 278); Biochemistry, Molecular and Cell Biology (BIO BM or NS 320, 330 or 331 or 333); Microbiology (BIO MI 290); Genetics and Development (BIO GD 281 or 282 or Plant Breeding 225); Neurobiology and Behavior (BIO NB 221 or 222); Botany (BIO PL 241); and Anatomy and Physiology (BIO AP 311 or NS 341 but **NOT** BIO AP 212).

   D. Biology foundation (Depth requirement): one biology course for which one of the above (2C) is a prerequisite.

   E. Statistics: one course selected from MATH 171, ILR 210, BTRY 215, AG EC 310, EDUC 353, SOC 301, PSYCH 350, ECON 319, OR&IE 370, BTRY 601, CRP 320, PAM 210.

3) **Core Course**: (one course).** Should be completed by end of junior year.

   B&SOC 301 Biology and Society: The Social Construction of Life (also S&TS 401); or PHIL 286: Science and Human Nature (also S&TS 286).

4) **Theme** (five courses that correspond to the theme selected by the student). These courses must be above the 100-level, at least three credit hours, and taken for a letter grade. Choose these courses as follows:

   A. Natural Science Issues/Biology Elective (two courses). Select from the list of B&SOC approved Natural Science Issues courses or choose course(s) with introductory biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTOM, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VTMED.

   B. Humanities/social sciences electives** (two courses). Courses from the list of Senior Seminars may be used as theme electives if not used to meet another requirement.

   C. Senior Seminar** (One course taken senior year). Courses change yearly.

* Students may petition to take a second statistics course (an advanced course, in sequence with the statistics course taken in the foundation) in place of the calculus requirement.

** Among the courses taken to meet the social sciences and humanities requirements (2.A, 2.B, 3, and 4.C), a minimum of two social science courses and two humanities courses must be chosen. History of science and philosophy of science courses may be counted toward the humanities requirement for the major.

Independent Study

Projects under the direction of a Biology & Society faculty member are encouraged as part of the program of study in the student's theme area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1–4 credits in B&SOC 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology & Society Office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented undergraduate students whose major is Biology & Society (B&SOC). Students who enroll in the honors program are expected, with faculty guidance, to do independent study and research dealing with issues in biology and society. Students participating in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career.

Biology & Society majors are considered for entry into the honors program at the end of the second semester of the junior year. Application forms for the honors program are available in the Biology & Society Office, 275 Clark Hall. The honors program is available to Biology & Society majors from the College of Arts and Sciences. Biology & Society majors in the Colleges of Human Ecology and Agriculture and Life Sciences must be selected by an honors committee within their college. To qualify for the Biology & Society honors program, students must have an overall Cornell cumulative grade-point average of at least 3.3, have formulated a research topic, and have found a project supervisor (with a Cornell appointment) and a Biology & Society faculty member willing to serve as their advisers. Applications will be reviewed by a committee headed by the director of undergraduate studies, who will notify students directly of the outcome. Students will be permitted to register for the honors program only by permission of the department. Students must enroll for two semesters and may take three to five credits per semester up to a maximum of eight credits in B&SOC 498 and 499, Honors Project I and II. More information on the honors program is available in the Biology & Society Office, 275 Clark Hall (255–6047).

I. First-Year Writing Seminars

Consult the John S. Knight Institute brochure for times, instructors, and descriptions.

II. Foundation Courses

*A. **Ethics*** (one course)

B&SOC 205 Ethical Issues in Health and Medicine (also S&TS 205) (IV)
Fall. 4 credits. Limited to 150 students. Open to sophomores, juniors, and seniors. Prerequisites: none. E. Toon.
In today's rapidly changing world of health and medicine, complex ethical issues arise in many contexts—from the private, interpersonal interactions between doctor and patient to the broad, mass-mediated controversies that make medicine into headline news. This course examines ethical problems and policy issues that arise in contemporary medicine, health care, and biomedical research. Tools for ethical analysis are applied to a variety of cases and fundamental questions in bioethics. Perspectives from social science, history, and law also inform the course. We explore ethical questions that arise in a number of substantive contexts, including the doctor-patient relationship, medical decision making near the end of life, human experimentation, genetics and reproductive technology, public health, and the allocation of scarce resources.

B&SOC 206 Ethics and the Environment (also S&TS 206 and PHIL 246) (IV)
Spring. 4 credits. Limited to 60 students. Open to all undergraduates; permission of instructor required for freshmen. N. Sethi.
The aim of this course is to acquaint students with moral issues that arise in the context of the environment and environmental policy. Our concerns about the environment bring to our attention the importance of economic, epistemological, legal, political and social issues in assessing our moral obligations to other humans and the natural world. Our attempt is then to explore how different factors come into play in defining our responsibilities to the environment and to examine the grounds for our environmental policy decisions. A background in basic ecology *or* environmental issues *or* ethics is helpful.

*B. **Social Sciences/Humanities Foundation*** (two courses, one from any two areas)

1. History of Science

[S&TS 233 Agriculture, History, and Society: From Squanto to Biotechnology
Fall. 3 credits. Not offered 2001–2002. M. Rossiter.
For description, see S&TS 233.]

S&TS 282 Science in Western Civilization (also HIST 282)
Spring. 4 credits. P. R. Dear.
For description, see HIST 282.

[S&TS 283 The Sciences in the Twentieth Century (also HIST 280)
Spring. 4 credits. Not offered 2001–2002. M. Dennis.
For description, see S&TS 283.]

S&TS 287 Evolution (also BIOEE 207 and HIST 287)
Fall or summer. 3 credits. May not be taken for credit after BIOEE 278. W. B. Provine.
For description, see BIOEE 207.

S&TS 355 Computers: From Babbage to Gates
Fall. 4 credits. M. Dennis.
For description, see S&TS 355.

[S&TS 390 Science in the American Polity: 1800–1960 (also GOVT 308, AM ST 388)
Fall. 4 credits. Not offered 2001–2002. M. Dennis.
For description, see S&TS 390.]

[S&TS 433 Comparative History of Science
Spring. 4 credits. Not offered 2001–2002. M. Rossiter.
For description, see S&TS 433.]

S&TS 444 Historical Issues of Gender and Science (also WOMNS 444)
Spring. 4 credits. M. Rossiter.
For description, see S&TS 444.

2. Philosophy of Science

S&TS 201 What is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210)
Spring. 3 credits. T. Pinch.
For description, see S&TS 201.

S&TS 286 Science and Human Nature (also PHIL 286)
Spring. 4 credits. May be used to meet the philosophy of science requirement *if not* used to meet the core course requirement. R. Boyd.
For description, see PHIL 286.

S&TS 381 Philosophy of Science: Knowledge and Objectivity (also PHIL 381)
Fall. 4 credits. R. Boyd.
For description, see PHIL 381.

3. Sociology of Science

B&SOC 301 Biology and Society: The Social Construction of Life (also S&TS 401) (III)
Fall. 4 credits. May be used to meet the sociology of science requirement if not used to meet the core course requirement. E. Toon.
See Core Courses for description.

B&SOC 342 Sociology of Science (also S&TS 442, SOC 442, and CRP 442) (III)
Fall. 4 credits. T. Pinch.
For description, see S&TS 442.

R SOC 208 Technology and Society
Fall. 3 credits. C. Geisler.
For description, see R SOC 208.

S&TS 201 What Is Science? An Introduction to the Social Studies of Science and Technology (also SOC 210)
Spring. 3 credits. T. Pinch.
For description, see S&TS 201.

S&TS 311 The Sociology of Medicine
Spring. 4 credits. E. Toon.
For description, see S&TS 311.

S&TS 411 Knowledge, Technology, and Property
Spring. 4 credits. S. Hilgartner.
For description, see S&TS 411.

[SOC 434 The Sociology of Reproduction (also WOMNS 435)
Spring. 4 credits. Not offered 2001–2002. Staff.
For description, see SOC 434.]

4. Politics of Science

B&SOC 406 Biotechnology and Law (also S&TS 406) (III)
Spring. 4 credits. L. Palmer.
For description, see S&TS 406.

[B&SOC 407 Law, Science, and Public Values (also GOVT 407 and S&TS 407) (III)
Spring. 4 credits. Not offered 2001–2002. M. Lynch.
For description, see S&TS 407.]

CRP 380 Environmental Politics
Fall. 4 credits. R. Booth.
For description, see CRP 380.

S&TS 324 Environment & Society (also R SOC 324 and SOC 324)
Spring. 3 credits. L. Glenna.
For description, see R SOC 324.

S&TS 391 Science in the American Polity: 1960–Now (also GOVT 309, AM ST 389)
Fall. 4 credits. M. Dennis.
For description, see S&TS 391.

[S&TS 427 Politics of Environmental Protection in America (also GOVT 427)
Fall. 4 credits. Not offered 2001–2002.
For description, see S&TS 427.]

5. Science Communication

COMM 260 Scientific Writing for Public Information
Fall or spring. 3 credits. Limited to 25 non-freshman or graduate students per section. L. Cowdery.
For description and prerequisites, see COMM 260.

[COMM 421 Communication and the Environment
Spring. 3 credits. May be used in Foundation only if **not** taken as senior seminar. Not offered 2001–2002. J. Shanahan.
For description, see COMM 421.]

S&TS 285 Communication in the Life Sciences (also COMM 285)
Spring. 3 credits. B. Lewenstein.
For description, see COMM 285.

S&TS 352 Science Writing for the Mass Media (also COMM 352)
Fall. 3 credits. B. Lewenstein.
For description and prerequisites, see COMM 352.

[S&TS 466 Communication of Science and Technology (also COMM 466)
Fall. 3 credits. Limited to 15 students. May be used in Foundation only if **not** taken as senior seminar. Not offered 2001–2002. B. Lewenstein.
For description and prerequisites, see COMM 466.]

*C. **Biology foundation*** (breadth requirement): Three courses: one from three of the following subject areas:

1. Biochemistry, Molecular and Cell Biology

BIOBM 330 Principles of Biochemistry, Individual Instruction
Fall or spring. 4 credits. Blankenship, Hinkle, staff.
For description and prerequisites, see BIOBM 330.

BIOBM 331 Principles of Biochemistry: Proteins and Metabolism
Fall. 3 credits. May not be taken for credit after BIOBM 330 or 333. G. Feigenson.
For description and prerequisites, see BIOBM 331.

BIOBM 333 Principles of Biochemistry, Lectures
Summer. 4 credits. H. T. Nivison.
For description and prerequisites, see BIOBM 333.

NS 262 The Cell and the External World
Spring. 3 credits. N. Noy.
For description and prerequisites, see NS 262.

NS 320 Introduction to Human Biochemistry
Fall. 4 credits. W. Arion and P. Stover.
For description and prerequisites, see NS 320.

2. Ecology

BIOEE 261 Ecology and the Environment
Fall or summer. 4 credits. Not open to freshmen. N. G. Hairston.
For description and prerequisites, see BIOES 261.

3. Genetics and Development

BIOGD 281 Genetics
Fall, spring, or summer. 5 credits. Not open to freshmen fall semester. Limited to 200 students. P. Bruns.
For description and prerequisites, see BIOGD 281.

BIOGD 282 Human Genetics
Spring. 2 or 3 credits (2 cr. if taken after BIOGD 281). Limited to 25 per discussion group. M. Goldberg.
For description and prerequisites, see BIOGD 282.

4. Evolutionary Biology

BIOEE 278 Evolutionary Biology
Fall or spring. 3 or 4 credits. M. Geber.
For description, see BIOES 278.

5. Microbiology

BIOMI 290 General Microbiology Lectures
Fall, spring, or summer. 2 or 3 credits. S. Merkel, Winans, Helmann.
For description and prerequisites, see BIOMI 290.

6. Neurobiology and Behavior

BIONB 221 Neurobiology and Behavior I: Introduction to Behavior
Fall. 3, 4, or 5 credits. P. W. Sherman.
For description and prerequisites, see BIONB 221.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology
Spring. 3 or 4 credits. A. Bass.
For description and prerequisites, see BIONB 222.

7. Botany

BIOPL 241 Introductory Botany
Fall. 3 credits. K. J. Niklas.
For description, see BIOPL 241.

8. Physiology and Anatomy

BIOAP 311 Introductory Animal Physiology, Lectures (also VET MED 346)
Fall. 3 credits. E. Loew or staff.
For description and prerequisites, see BIOAP 311.

NS 341 Human Anatomy and Physiology
Spring. 4 credits. Permission only. Must preregister for lab in 309 MVR during CoursEnroll. V. Utermohlen.
For description and prerequisites, see NS 341.

*D. **Biology foundation*** (depth requirement): one course for which one of the above breadth requirement courses (2C) is a prerequisite.

*E. **Statistics*** (one course)

AEM 210 Introductory Statistics
Fall. 4 credits. C. VanEs.
For description and prerequisites, see ARME 210.

BTRY 261 Statistical Methods I
Fall. 4 credits. R. Lloyd.
For description and prerequisites, see BTRY 201.

CRP 223 Introduction to Statistical Reasoning for Urban and Regional Analysis
Fall. 3 credits. J. Lobo.
For description, see CRP 223.

ECON 319 Introduction to Statistics and Probability
Fall. 4 credits. Y. Hong.
For description and prerequisites, see ECON 319.

ILRST 210 Statistics: Statistical Reasoning
Fall, spring. 3 credits. Staff.
For description, see ILRST 210.

MATH 171 Statistical Theory and Application in the Real World
Fall, spring. 4 credits. Staff.
For description, see MATH 171.

PAM 210 Introduction to Statistics
Spring. 4 credits. K. Joyner.
For description, see PAM 210.

PSYCH 350 Statistics and Research Design
Fall. 4 credits. T. Gilovich.
For description, see PSYCH 350.

SOC 301 Evaluating Statistical Evidence (also R SOC 302)
Fall. 4 credits. Staff.
For description, see SOC 301.

III. Core Courses

B&SOC 301 Biology and Society: The Social Construction of Life (also S&TS 401) (III)
Fall. 4 credits. Prerequisite: 2 semesters of social science or humanities and 1 year of introductory biology or permission of instructor. Limited to 75 students. E. Toon.
Critical thinking about the diverse influences shaping the life sciences. Topics include evolution and natural selection, heredity and genetic determinism, biotechnology, and reproductive interventions. We interpret episodes, past and present, in biology in light of scientists' historical location, economic and political interests, use of language, and ideas about causality and responsibility. Readings, class activities, and written assignments are designed so that students develop interpretive skills and explore their own intellectual and practical responses to controversies in biology and society.

S&TS 286 Science and Human Nature (also PHIL 286)
Spring. 4 credits. R. Boyd and N. Sturgeon.
For description, see PHIL 286.

IV. Themes

A. ***Natural Science Issues/Biology Elective*** (two courses). Select from the following list of B&SOC approved Natural Science Issues courses or choose course(s) with intro biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTOM, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VET MED.

[B&SOC 214 Biological Basis of Sex Differences (also BIOAP 214 and WOMNS 214) (I)
Fall. 3 credits. Next offered spring 2003. J. Fortune.
For description, see BIOAP 214.]

[B&SOC 347 Human Growth and Development: Biological and Behavioral Interactions (also HD 347 and NS 347)
Spring. 3 credits. Offered alternate years. J. D. Haas and S. Robertson.
For description and prerequisites, see HD 347.]

[BIOEE 275 Human Biology and Evolution (also ANTHR 275 and NS 275)
Fall. 3 credits. Not offered 2001–2002. K. A. R. Kennedy and J. D. Haas.
For description, see BIOES 275.]

[BIOEE 474 Laboratory and Field Methods in Human Biology (also ANTHR 474)
Spring. 5 credits. Not offered 2001–2002. K. A. R. Kennedy.
For description, see BIOEE 474.]

[BIOEE 673 Human Evolution: Concepts, History, and Theory (also ANTHR 673)
Fall. 3 credits. Offered alternate years. Not offered fall 2001. K. A. R. Kennedy.
For description, see BIOEE 673.]

BIOPL 247 Ethnobiology
Fall. 3 credits. D. M. Bates.
For description, see BIOPL 247.

HD 266 Emotional Functions of the Brain
Fall. 3 credits. R. Depue.
For description, see HD 266.

HD 344 Infant Behavior and Development
Fall. 3 credits. Not open to freshmen. S. Robertson.
For description and prerequisites, see HD 344.

HD 370 Adult Experimental Psychopathology
Spring. 3 credits. Limited to sophomores, juniors, and seniors. S. Bem.
For description, see HD 370.

HD 436 Language Development (also LING 436, PSYCH 436, and COGST 436)
Spring. 4 credits. B. Lust.
For description, see HD 436.

NS 222 Maternal and Child Nutrition
Fall. 3 credits. Limited to 20. C. Garza.
For description and prerequisites, see NS 222.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits. M. Stipanuk.
For description and prerequisites, see NS 331.

NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361)
Fall. 3 credits. Limited to juniors and seniors only. B. J. Strupp.
For description and prerequisites, see NS 361.

NS 452 Molecular Epidemiology and Dietary Markers of Chronic Disease
Spring. 3 credits. P. Cassano.
For description and prerequisites, see NS 452.

NS 475 Molecular Nutrition and Development
Spring. 3 credits. P. Stover and D. Noden.
For description and prerequisites, see NS 475.

NTRES 201 Environmental Conservation
Spring. 3 credits. T. Fahey.
For description, see NTRES 201.

PSYCH 326 Evolution of Human Behavior
Spring. 4 credits. R. Johnston.
For description and prerequisites, see PSYCH 326.

Examples of biology electives

AN SCI 300 Animal Reproduction and Development
Spring. 3 credits.
For description, see AN SCI 300.

HD 366 Psychobiology of Temperament and Personality
Spring. 3 credits. P. Depue.
For description, see HD 366.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits.
For description, see NS 331.

B. ***Humanities/Social Science elective*** (two courses)

Courses listed earlier as social science/humanities foundation courses (2B) are particularly appropriate as social science/humanities electives. However, a single course cannot be used to meet both requirements. Examples of recommended social science or humanities electives are listed below. A more complete list is available in 275 Clark Hall.

Examples of social science electives

AEM 464 Economics of Agricultural Development
Spring. 3 credits. R. Christy.
For description, see ARME 464.

[ANTHRO 211 Nature and Culture
Spring. 3 credits. Not offered 2001–2002.
For description, see ANTHR 211.]

CRP 380 Environmental Politics
Fall. 4 credits. R. S. Booth.
For description, see CRP 380.

HD 251 Social Gerontology
Spring. 3 credits. D. Dempster-McLain.
For description, see HD 251.

NS 245 Social Science Perspectives on Food and Nutrition
Fall. 3 credits. J. Sobal.
For description, see NS 245.

NS 450 Public Health Nutrition
Spring. 3 credits. D. Pelletier.
For description, see NS 450.

NTRES 400 International Environmental Issues
Spring. 4 credits. R. McNeil.
For description, see NTRES 400.

PAM 303 Ecology and Epidemiology of Health
Spring. 3 credits. E. Rodriguez.
For description, see PAM 303.

[PAM 380 Human Sexuality
Spring. 3 credits. Not offered 2001–2002. A. Parrot.
For description, see PAM 380.]

PAM 435 U.S. Health Care System
Fall. 3 credits. R. Battistella.
For description, see PAM 435.

R SOC 205 Rural Sociology and International Development (also SOC 206)
Spring. 3 credits. C. Geisler.
For description, see R SOC 205.

R SOC 220 Sociology of Health and Ethnic Minorities (also LSP 220)
Fall. 3 credits. P. Parra.
For description, see R SOC 220.

[R SOC 490 Society and Survival
Fall. 3 credits. Not offered 2001–2002.
For description, see R SOC 490.]

S&TS 324 Environment and Society (also R SOC 324 and SOC 324)
Spring. 3 credits. L. Glenna.
For description, see R SOC 324.

SOC 340 Health, Behavior, and Policy
Spring. 4 credits. S. Caldwell.
For description, see SOC 340.

Examples of humanities electives

NTRES 407 Religion, Ethics, and the Environment
Fall. 4 credits. R. Baer.
For description, see NTRES 407.

PHIL 241 Ethics (by petition for breadth requirement)
Spring. 4 credits. N. Sturgeon.
For description, see PHIL 241.

[PHIL 368 Global Climate and Global Justice (also GOVT 468)
Fall. 4 credits. Not offered 2001–2002.
For description, see PHIL 368.]

S&TS 681 Philosophy of Science (also PHIL 681)
Spring. 4 credits. R. Boyd.
For description, see PHIL 681.

C. Senior Seminars: Representative seminars listed below. Complete list available in 275 Clark Hall.

B&SOC 406 Biotechnology and the Law (also S&TS 406) (III)
Spring. 4 credits. L. Palmer.
For description, see S&TS 406.

[B&SOC 427 Politics of Environmental Protection in America (also S&TS 427 and GOVT 427) (III)
Fall. 4 credits. Not offered 2001–2002. S. Yearley.
For description, see S&TS 427.]

B&SOC 447 Seminar in the History of Biology (also BIOEE 467, HIST 415, and S&TS 447) (I or III)
Fall and summer (6-week session). 4 credits. W. Provine.
For description, see BIOEE 467.

B&SOC 461 Environmental Policy (also BIOEE 661 and ALS 661) (I)
Fall and spring. 3 credits each term. Limited to 12 students. D. Pimentel.
For description, see BIOEE 661.

[B&SOC 469 Food, Agriculture, and Society (also BIOEE 469 and S&TS 469) (I)
Spring. 3 credits. Not offered 2001–2002.
For description, see BIOEE 469.]

COMM 421 Communication and the Environment
Spring. 3 credits. J. Shanahan.
For description, see COMM 421.

HD 366 Psychobiology of Temperament and Personality
Fall. 3 credits. R. A. Depue.
For description and prerequisites, see HD 366.

HD 418 Psychology of Aging
Fall. 3 credits. S. Cornelius.
For description, see HD 418.

HD 419 Midlife Development
Spring. 3 credits. S. Cornelius.
For description, see HD 419.

HD 464 Sexual Minorities and Human Development (also WOMNS 467)
Spring. 3 credits. R. Savin-Williams.
For description, see HD 464.

[HD 610 Processes in Human Development
Fall. 3 credits. Not offered 2001–2002. N. Bronfenbrenner.
For description and prerequisites, see HD 610.]

HD 660 Social Development
Spring. 3 credits. Permission of instructor required for undergraduates. C. Raver.
For description, see HD 660.

NTRES 411 Seminar in Environmental Ethics
Fall. 3 credits. R. Baer.
For description, see NTRES 411.

PAM 575 Housing and Long Term Care for the Elderly
Fall. 3 credits. P. Chi.
For description, see PAM 575.

[PAM 652 Health Care Services: Consumer and Ethical Perspectives
Fall. 3–4 credits. Not offered 2001–2002. A. Parrot.
If using this course as a senior seminar, B&SOC majors must take it for four credits.
For description, see PAM 652.]

PAM 656 Managed Health Delivery Systems: Primary-Ambulatory Care
Spring. 3 credits. For undergraduate seniors only by permission of instructor. J. Kuder.
For description, see PAM 656.

PAM 659 Epidemiology, Clinical Medicine, and Management Interface Issues
Spring. 3 credits. E. Rodriguez.
For description, see PAM 659.

[R SOC 410 Population and Environment
Spring. 3 credits. Not offered 2001–2002.
For description, see R SOC 410.]

R SOC 438 Social Demography (also SOC 437)
Fall. 3 credits. D. Gurak.
For description, see R SOC 438.

R SOC 495 Population, Development, and Environment in Sub-Saharan Africa
Fall. 4 credits. P. Eloundou-Enyegue.
For description, see R SOC 495.

S&TS 411 Knowledge, Technology, and Property
Spring. 4 credits. S. Hilgartner.
For description and prerequisites, see S&TS 411.

[S&TS 438 Minds, Machines, and Intelligence (also COG ST 438)
Spring. 4 credits. Not offered 2001–2002. H. Mialet.
For description, see S&TS 438.]

[S&TS 466 Public Communication of Science and Technology (also COMM 466)
Fall. 3 credits. Offered even fall semesters. Not offered fall 2001. B. Lewenstein.
For description and prerequisites, see COMM 466.]

[S&TS 490 Integrity of Scientific Practice
Fall. 4 credits. Not offered 2001–2002. S. Hilgartner.
For description, see S&TS 490.]

S&TS 492 Politics and the Public Health
Spring. 4 credits. E. Toon.
For description, see S&TS 492.

S&TS 645 Genetic Engineering: Politics and Society in Comparative Perspective (also GOVT 634)
Spring. 4 credits. S. Hilgartner.
For description, see S&TS 645.

V. Other Courses

B&SOC 375 Independent Study
Fall or spring. 1–4 credits. Prerequisite: must have written permission of faculty supervisor and Biology & Society major.
Projects under the direction of a Biology & Society faculty member are encouraged as part of the program of study within the student's concentration area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1–4 credits in B&SOC 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Students may elect to do an independent study project as an alternative to, or in advance of, an honors project. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology & Society Office, 275 Clark Hall. *Independent study credits may not be used in completion of the major requirements.*

B&SOC 400 Undergraduate Seminar
Fall or spring. Variable credit. May be repeated for credit.
From time to time different seminars on topics of interest to undergraduates are offered. Topics and instructors are listed in the Biology & Society supplement issued at the beginning of each semester.

B&SOC 498/499 Honors Project I & II
Fall and spring. 3–5 credits each term. Open only to Biology & Society students in their senior year by permission of the department. Please apply in 275 Clark Hall.
Students who are admitted to the honors program are required to complete two semesters of honors project research and to write an honors thesis. The project must include substantial research and the completed work should be of wider scope and greater originality than is normal for an upper-level course.

Students may take three to five credits per semester up to a maximum of eight credits in B&SOC 498 & 499, Honors Projects I & II. Students should note that these courses are to be taken in addition to those courses that meet the regular major requirements. S&TS 498 includes the fall Honors Seminar. The student and the project supervisor must reach clear agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of B&SOC 498, Honors Project I, a letter grade will be assigned and the advisers, in consultation with the Director of Undergraduate Studies, will evaluate whether or not the student should continue working on an honors project. Biology & Society students who do continue in the

honors program for the second semester will receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

Applications and information are available in the Biology & Society Office, 275 Clark Hall.

Cognitive Studies Program

S. Edelman (psychology), R. Hoy (neurobiology and behavior), **J. Halpern (computer science), on leave**, co-directors.
G. Gay (communication); C. Cardie, R. Constable, J. Halpern, D. Huttenlocher, L. Lee, B. Selman, R. Zabih (computer science); A. Hedge (design and environmental analysis); K. Basu, L. Blume, D. Easley (economics); J. Dunn, R. Ripple, D. Schrader (education); S. Wicker (electrical engineering); R. Canfield, S. Ceci, B. Koslowski, B. Lust, S. Robertson, E. Wethington, W. Williams (human development); K. O'Connor, J. Russo (Johnson Graduate School of Management); J. Bowers, A. Cohn, M. Diesing, J. Gair, W. Harbert, S. McConnell-Ginet, C. Rosen, M. Rooth, Y. Shirai, J. Whitman, D. Zec (linguistics); A. Nerode, R. Shore (mathematics); R. Harris-Warrick, H. Howland, R. Hoy, H. K. Reeve (neurobiology and behavior); R. Boyd, C. Ginet, H. Hodes, S. Shoemaker, Z. Szabó, (philosophy); J. Cutting, R. Darlington, T. DeVoogd, D. Dunning, S. Edelman, D. Field, B. Finlay, T. Gilovich, B. Halpern, A. Isen, S. Johnson, R. Johnston, C. Krumhansl, U. Neisser, M. Owren, E. Adkins Regan, M. Spivey (psychology); M. Macy (sociology). G. Babbes, B. Hellie, S. Hertz (associate members).

Cognitive studies is comprised of a number of disciplines that are linked by a major concern with fundamental capacities of the mind, such as perception, memory, reasoning, language, the organization of motor action, and their neural correlates. In the College of Arts and Sciences these disciplines are represented in the departments of Computer Science, Economics, Linguistics, Mathematics, Neurobiology and Behavior, Philosophy, Psychology, and Sociology. Elsewhere in the university they are represented in the Departments of Design and Environmental Analysis and Human Development (College of Human Ecology), the Departments of Communication and Education (College of Agriculture and Life Sciences), and the Johnson Graduate School of Management.

The issues addressed in cognitive studies arise at several levels. At the broadest level are problems of characterizing such basic notions as "mind," "knowledge," "information," and "meaning." At a more specific level are questions regarding the abstract operating principles of individual components of the mind, such as those underlying visual perception, language ability, and understanding of concepts. These principles concern the organization and behavior of the components and how they are biologically represented in the brain. At the most specific level are questions about the properties of the elementary computational structures and processes that constitute these components.

Important insights into issues of these kinds have been achieved in recent years as a result of the various cognitive studies disciplines converging in their theoretical and methodological approaches. It is this convergence, in fact, that warrants grouping the disciplines together under the single term "cognitive studies." Even greater progress can be expected in the future as a consequence of increasing cooperation among the disciplines.

Undergraduate Concentration

An interdisciplinary undergraduate concentration in Cognitive Studies is available to Cornell University undergraduates in the College of Arts and Sciences. Students from other colleges who seek such a concentration should discuss such possibilities with the Cognitive Studies office, which will provide information and contacts concerning such concentrations.

The undergraduate concentration in Cognitive Studies is designed to enable students to engage in a structured program directly related to the scientific study of cognition and the mind. The concentration provides a framework for the design of structured, supervised programs of study in this growing interdisciplinary field. Such programs of study serve as complements to coursework in a single discipline as represented by an individual department. It is considered crucial that students gain a strong background in their major, independent of their work in the concentration. Independent majors and college scholars may also apply. Colleges vary in their procedures for formal recognition of this concentration (contact the Cognitive Studies office for details). The Cognitive Studies Program faculty have designed five structured "tracks" that offer students different ways of satisfying the concentration. In addition, students are always able to construct their own programs of study subject to approval by their concentration adviser. The courses listed under each track are program suggestions. The student should consult with his/her Cognitive Studies adviser to develop a more customized curriculum. In some cases, students may want to combine or cross tracks.

In general, it is expected that students in the concentration will take COGST 101, a lab course such as COGST 201, and three courses at the 300 or 400 level in at least two departments. Even though only five courses are required to complete the concentration, we expect that students interested in cognitive studies will often end up taking more, and we encourage them to do an independent research project (COGST 470) and a research workshop such as COGST 471.

The five typical tracks are as follows. The first track involves a particular approach to the study of cognition. The other four tracks are structured around specific content domains and consist of sets of suggested course clusters. Please note that many of these courses have substantial prerequisites.

1. Cognitive Studies in Context: The Workplace, the Classroom, and Everyday Life

   Foundational issues in cognitive science are intimately relevant to real world settings. The Cognitive Studies in Context track offers students the opportunity to learn and independently explore how theory and research on the mind can help us better understand how we use information in much of our daily activities, whether it be the workplace, the classroom, or any other aspect of everyday life. Students will come to better understand the cognitive ergonomics of such diverse settings as an aircraft cockpit, a quality control station on an assembly line, or an anesthesia station in a surgical suite. They will come to better understand the perceptual constraints that help tailor the nature of visual communication systems, or the linguistic constraints that help tailor text-based communication. They will come to see how the functional architecture of human memory guides the presentation and use of information in a wide array of settings. They will also learn how design constraints on computer hardware and software interact with human capacities and biases.

   COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

   In addition, three more upper-level approved courses in Cognitive Studies areas will normally be expected.

2. Perception and Cognition

   This track focuses on psychological, computational, and neurobiological approaches to the interface between perception and cognition. Students will develop a grasp of the continuum between sensory impressions and complex thought.

   COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
   COGST 342/PSYCH 342, Human Perception: Applications to Computer Graphics, Art, and Visual Display
   COGST 416/PSYCH 416, Modeling Perception and Cognition
   COGST 450/HD 437/LING 450/PSYCH 437, Lab Course: Language Development
   BIONB 326, The Visual System
   PSYCH 305, Visual Perception
   PSYCH 316, Auditory Perception
   PSYCH 412, Laboratory in Cognition and Perception
   PSYCH 418, Psychology of Music
   PSYCH 419, Neural Networks Laboratory

3. Language and Cognition

   This track focuses on the representation, processing, and acquisition and learning of language, as well as its role in cognition and culture. Students will acquire skills and knowledge in formal and applied linguistic theory, psycholinguistic experimentation, and computational modeling techniques.

   COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
   COGST 270/LING 270/PHIL 270, Truth and Interpretation
   COGST 416/PSYCH 416, Modeling Perception and Cognition
   COGST 436/HD 436/LING 436/PSYCH 436, Language Development

COGST 450/HD 437/LING 450/PSYCH 437, Lab Course: Language Development
COM S 411, Programming Languages and Logics
LING 203, Introduction to Syntax and Semantics
LING 301–302, Phonology I & II
LING 303–304, Syntax I & II
LING 309, Morphology
LING 319–320, Phonetics I & II
LING 325, Pragmatics
LING 403, Introduction to Applied Linguistics
LING 421–422, Semantics I & II
PHIL 332, Philosophy of Language
PSYCH 415, Concepts, Categories, and Word Meanings

4. Cognition and Information Processing

This track focuses on how the mind (or a computer) can encode, represent, and store information. Students will develop an understanding of concepts, categories, memory, and the nature of information itself.

COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
COGST 414/PSYCH 414, Comparative Cognition
COGST 416/PSYCH 416, Modeling Perception and Cognition
COGST 450/HD 437/LING 450/PSYCH 437, Lab Course: Language Development
COM S 211, Computers and Programming
COM S 212, Structure and Interpretation of Computer Programs
COM S 472, Foundations of Artificial Intelligence
COM S 473, Practicum in Artificial Intelligence
PHIL 262, Philosophy of Mind
PHIL 362, Philosophy of Mind
PSYCH 311, Introduction to Human Memory
PSYCH 412, Laboratory in Cognition and Perception
PSYCH 413, Information Processing: Conscious and Nonconscious
PSYCH 415, Concepts, Categories, and Word Meanings
PSYCH 417, The Origins of Thought and Knowledge

5. Cognitive Neuroscience

This track focuses on neurobiological and computational approaches to understanding how perception and cognition emerge in the human brain. Students will acquire knowledge of what neural structures subserve what perceptual/cognitive processes, and how they interact.

COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
COGST 416/PSYCH 416, Modeling Perception and Cognition
COM S 401, Programming Languages and Software Engineering
PSYCH 332/BIONB 328, Biopsychology of Learning and Memory
PSYCH 396/BIONB 396, Introduction to Sensory Systems
PSYCH 419, Neural Networks Laboratory
PSYCH 425, Cognitive Neuroscience
PSYCH 440, The Brain and Sleep

A Cognitive Studies undergraduate laboratory and computer facility is available for all students in a Cognitive Studies concentration. This facility will help link resources from different laboratories across the Cornell campus as well as providing a central location for developing and conducting experimental research in cognitive studies.

Students who complete the concentration requirements will have their concentration in Cognitive Studies officially represented on their transcript. In addition, students who have made very substantial progress towards completing the requirements for the concentration will be eligible for enrollment in the graduate courses in Cognitive Studies during their senior year.

Concentration Application Procedures. Initial inquiries concerning the undergraduate concentration should be made to the Cognitive Studies Program coordinator, Linda LeVan, cogst@cornell.edu, 255–6431, who will provide application materials and set up a meeting with a relevant member of the Undergraduate Concentration Committee. This Committee will assist the student with selection of a concentration adviser with expertise in the student's main area of interest.

To formally initiate the concentration in Cognitive Studies, a student must gain approval for a selection of courses from a concentration adviser (one of the program faculty). The courses selected must form a coherent cluster that makes sense to both the adviser and the student. To be admitted to the concentration, the student must submit this plan of study to the Cognitive Studies undergraduate faculty committee for final approval.

In addition to assisting in and approving the student's selection of courses, the concentration adviser serves as a general source of information about the field of cognitive studies, relevant resources around the university, and job and graduate school opportunities. Often, the adviser can help the student develop independent research experience.

Independent Research. The concentration encourages each student to be involved in independent research that bears on research issues in cognitive studies, if possible. COGST 470 is available for this purpose. It is recommended that students report on their research activities in an annual undergraduate forum. The Undergraduate Concentration Committee is committed to helping students find an appropriate research placement when needed.

The Committee for Undergraduate Concentration in Cognitive Studies consists of: Bart Selman, computer science, 5–5643, 4144 Upson Hall, selman@cs.cornell.edu; Draga Zec, linguistics, 5–0728, 217 Morrill Hall, DZ17@cornell.edu; Zoltán Szabó, philosophy, 5–6824, 218 Goldwin Smith, ZS15@cornell.edu; Michael Owren, psychology, 5–3835, 224 Uris Hall, MJO9@cornell.edu. The current Director of Undergraduate Studies is Draga Zec.

Graduate Minor

For information, consult the program office (282 Uris Hall, 255–6431, cogst@cornell.edu) or the directors of graduate studies, Shimon Edelman and Ron Hoy, 255–6365 or 254–4318; se37@cornell.edu or rrh3@cornell.edu.

Courses

Cognitive Studies

COGST 101 Introduction to Cognitive Science (also COM S 101, LING 170, PHIL 191, and PSYCH 102) (III)
Fall. 3 or 4 credits (the 4-credit option involves a writing section instead of taking exams). M. Spivey.
This course surveys the study of how the mind/brain works. We examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course introduces the roles played by these disciplines in cognitive science. The second part of the course focuses on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

COGST 111 Brain, Mind, and Behavior (also BIONB 111 and PSYCH 111) (I)
Spring. 3 credits. Letter grade only. Intended for freshman and sophomores in the humanities and social sciences; seniors by permission only. Not recommended for psychology majors; biology majors may not use the course for credit toward the major. R. Hoy and E. Adkins Regan.
Understanding how the brain creates complex human behavior and mental life is a great scientific frontier of the next century. This course enables students with little scientific background from any college or major to appreciate the excitement. What are the interesting and important questions? How are researchers trying to answer them? What are they discovering? Why did the brain evolve this remarkable capacity?

COGST 201 Cognitive Science in Context Laboratory (also COM S 201 and PSYCH 201) (III)
Spring. 4 credits. Prerequisite: "Introduction to Cognitive Science" COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102. Knowledge of programming languages is not assumed. Limited to 24 students. D. Field and staff.
A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results, supplementation of laboratory topics, and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned investigations and student-developed experiments. Use of digital computers as well as the Internet, e-mail, and web sites are integral components of the course.

The focus is on human-computer interactions that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings. Students are

expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings fully prepared to perform the laboratory exercises. Laboratory facilities are available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data will be facilitated.

COGST 214 Issues in Cognitive Psychology (also PSYCH 214 and 614) (III)

Fall. 3 or 4 credits. The 4-credit option involves some participation in COGST/PSYCH 501. Sophomore standing required. Limited to 150 students. S. Edelman.

The course serves as a broad overview of problems arising in the study of cognition and of the information-processing, or computational, approaches to solving these problems, in natural and artificial cognitive systems. Theoretical and experimental challenges posed by the understanding of perception, attention and consciousness, memory, thinking, and language are discussed and analyzed. Participants acquire conceptual tools essential for following the current debates on the nature of mind and its relationship to the brain.

[COGST 264 Language, Mind, and Brain (also LING 264) (III)

Spring. 4 credits. Not offered 2001–2002. J. Bowers.

An introductory course that emphasizes the formal structure of natural language in the Minimalist framework. The following topics are covered: the formal representation of linguistic knowledge, principles, and parameters of Universal Grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language and cognition. The course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics that concentrates on the formal principles that govern linguistic knowledge, along with some discussion of their biological realization and their use in perception and production.]

[COGST 270 Truth and Interpretation (also LING 270 and PHIL 270) (III or IV)

Spring. 4 credits. Not offered 2001–2002.]

[COGST 333 Problems in Semantics—Quantification in Natural Language (also LING 333 and PHIL 333) (III or IV)

Spring. 4 credits. Prerequisites: a previous course in formal semantics (e.g., LING 421) or logic (e.g., PHIL 231) or permission of instructor. Not offered 2001–2002. S. McConnell-Ginet and Z. G. Szabó.

This course looks at problems in the semantic analysis of natural languages, critically examining work in linguistics and philosophy on particular topics of current interest. The focus is on quantification. Languages offer a variety of resources for expressing generalizations: *some, every, no, many,* and other quantifying expressions that appear inside noun phrases; *always, never, occasionally,* and other adverbial quantifying expressions not associated with particular nominals; constructional resources of various kinds (e.g., English free relatives like *whatever she cooks*). How different are these resources and what might they imply about basic cognitive and linguistic capacities?]

COGST 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also PSYCH 342 and 642) (III)

Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: PSYCH 101 or permission of instructor. PSYCH 205 strongly recommended. D. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course considers a number of applied aspects of human perception with an emphasis on the display of visual information. Topics covered include: "three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

COGST 414 Comparative Cognition (also PSYCH 414 and 714) (III)

Spring. 3 credits. Prerequisites: PSYCH 205, 209, 214, or permission of instructor. M. Owren.

This course examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include whether nonhumans behave intentionally; whether they show concept and category learning, memory, and abstract thinking similar to that of humans; the role of social cognition in the evolution of intelligence; and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" plays a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates is a specific focus throughout. The course is a mix of lecture and discussion, emphasizing the latter as much as possible.

COGST 416 Modeling Perception and Cognition (also PSYCH 416 and 616) (III)

Spring. 4 credits. Prerequisites: PSYCH 205, 209, 214, or 215, or permission of instructor. M. Spivey.

This course offers a survey of several computational approaches to understanding perception and cognition. We explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis is placed on how complex sensory information gets represented in these models, as well as how it gets processed. This course covers computational accounts of language processing, language acquisition, visual perception, and visual development, among other topics. Students complete a final project that applies a computational model to some perceptual/cognitive phenomena.

COGST 424 Computational Linguistics (also COM S 424 and LING 424) (III)

Spring. 4 credits. Prerequisite: LING 203. Labs involve work in the Unix environment; COM S 114 is recommended. M. Rooth.

Steady progress in formalisms, algorithms, linguistic knowledge, and computer technology is bringing computational mastery of the syntax, morphology, and phonology of natural languages within reach. The course introduces methods for "doing a language" computationally, with an emphasis on approaches which combine linguistic knowledge with powerful computational formalisms. Topics include: computational grammars, parsing, representation of syntactic analyses; finite state morphology; weighted grammars; feature constraint formalisms for syntax; treebank and other markup methodology; robust low-level syntax and semantics; and experimental-modeling methodology using large data samples.

COGST 436 Language Development (also HD 436, LING 436, and PSYCH 436) (III)

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 633, LING 700, or PSYCH 600, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U grades optional. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental linguistic issues of "Universal Grammar" and the biological foundations for acquisition are discussed, as are the issues of relations between language and thought. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/HD 437/LING 450/PSYCH 437).

COGST 438 Minds, Machines, and Intelligence (also S&TS 438) (III)

Spring. 4 credits. H. Mialet.

Do machines think? Do they have minds? Are they intelligent? What can humans do that machines can't do and vice versa? How do humans use machines and how do machines use humans? In this course we focus on how philosophers such as Turing, Searle, Dreyfus etc. have dealt with these questions. At the same time, however, we are also concerned with trying to rethink the themes raised by these thinkers in light of social scientists who have studied how people and machines interact in specific (local) contexts, as for example, in a plane's cockpit or on the Internet. Topics may also include virtual surgery, speech recognition, and expert systems in medicine.

COGST 450 Lab Course: Language Development (also HD 437, LING 450, and PSYCH 437)

Spring. 2 credits. In conjunction with COGST/HD/LING/PSYCH 436, Language Development. B. Lust.

This laboratory course is an optional supplement to the survey course, Language Development (COGST/HD/LING/PSYCH 436). The lab course provides students with a hands-on introduction to scientific research, including design and methods, in the area of first language acquisition.

COGST 465 Topics in High-Level Vision (also COM S 392 and PSYCH 465) (III)

Spring. 4 credits. S. Edelman.

High-level vision is a field of study concerned with functions such as visual object recognition and categorization, scene understanding, and reasoning about visual structure. It is an essentially cross-disciplinary endeavor, drawing on concepts and methods from neuroanatomy and neurophysiology, cognitive psychology, applied mathematics, computer science, and philosophy. The course concentrates on a critical examination of a collection of research publications, linked by a common thread, from the diverse perspectives offered by the different disciplines. Students write bi-weekly commentaries on the assigned papers, and a term paper integrating the material covered in class.

COGST 470 Undergraduate Research in Cognitive Studies
Fall or spring. 1–4 credits. S-U grades optional. Prerequisite: permission of major adviser; written permission of Cognitive Studies faculty member who will supervise the research and assign the grade. Hours TBA. Cognitive Studies faculty.
Experience in planning, conducting, and reporting independent laboratory, field, and/or library research in an interdisciplinary area relevant to cognitive studies.

COGST 471 Cognitive Studies Research Workshop
Fall or spring. Credits variable. Prerequisites: student must be enrolled in an independent research course (either in Cognitive Studies, e.g., COGST 470, or in a related department), or in honors thesis research in one of the departments relevant to Cognitive Studies. Staff. (Interdisciplinary faculty from Cognitive Studies Program).
This course provides a research workshop in which undergraduate students who are engaged in research in a particular area relevant to cognitive science can meet across disciplines to learn and practice the essentials of research, using interdisciplinary approaches. In this workshop, students critique and discuss the existing literature in a field of inquiry, individual students present their research designs, methods, and results from their independent research studies, debate the interpretation of their research results, and participate in the generation of new research hypotheses and designs, in a peer group of other undergraduate students involved in related research.

COGST 474 Introduction to Natural Language Processing (also COM S 474 and LING 474) (III)
Spring. 4 credits. M. Rooth.
The course presents formalisms, algorithms, and methodology for manipulating natural languages computationally. It emphasizes parts of natural language (syntax and morphology, but not semantics) where algorithms and scientific understanding make it possible for us to create and implement approximately complete accounts of linguistic phenomena and also manipulate large samples of language use (a million or a billion words). Most of the methods are not only useful for engineering applications but also advance our scientific understanding of human languages.

Computer Science

COM S 101 Introduction to Cognitive Science (also COGST 101, LING 170, PHIL 191, and PSYCH 102)
Fall. 3 or 4 credits. M. Spivey.

COM S 201 Cognitive Science in Context Laboratory (also COGST 201 and PSYCH 201)
Spring. 4 credits. D. Field and staff.

COM S 211 Computers and Programming
Fall, spring, or summer. 3 credits.

COM S 312 Structure and Interpretation of Computer Programs
Fall or spring. 4 credits.

COM S 381 Introduction to Theory of Computing
Fall or summer. 4 credits.

COM S 392 Topics in High-Level Vision (also COGST 465 and PSYCH 465)
Fall. 4 credits. S. Edelman.

COM S 411 Programming Languages and Logics
Fall. 4 credits. Not offered every year.

COM S 424 Computational Linguistics (also COGST 424 and LING 424)
Spring. 4 credits. M. Rooth.

COM S 472 Foundations of Artificial Intelligence
Fall. 3 credits.

COM S 473 Practicum in Artificial Intelligence
Fall. 2 credits.

COM S 474 Introduction to Natural Language Processing (also COGST 474 and LING 474)
Spring. 4 credits. M. Rooth.

COM S 478 Machine Learning
Spring. 3 credits.

COM S 481 Introduction to Theory of Computing
Fall. 4 credits.

COM S 486 Applied Logic (also MATH 486)
Spring. 4 credits.

Education (College of Agriculture and Life Sciences)

[EDUC 210 Psychology of Learning and Memory
Fall. 3 credits. Not offered 2001–2002. J. Dunn.]

EDUC 212 Psychological Foundations of Education
Spring. 2–3 credits. J. Dunn.

EDUC 311 Educational Psychology
Fall. 3 credits. D. Schrader.

Human Development (College of Human Ecology)

HD 115 Human Development
Fall or summer. 3 credits.

HD 266 Emotional Functions of the Brain
Fall. 3 credits.

HD 334 The Growth of the Mind
Spring. 4 credits. B. Lust.

HD 344 Infant Behavior and Development
Fall. 3 credits. S. Robertson.

HD 347 Human Growth and Development: Biological and Behavioral Interactions (also B&SOC 347 and NS 347)
Spring. 3 credits. S. Robertson and J. Haas.

HD 362 Human Bonding
Fall. 3 credits.

HD 436 Language Development (also COGST 436, LING 436, and PSYCH 436)
Spring. 4 credits. B. Lust.

HD 437 Lab Course: Language Development (also COGST 450, LING 450, and PSYCH 437)
Spring. 2 credits. In conjunction with COGST/HD/LING/PSYCH 436, Language Development. B. Lust.

HD 438 Thinking and Reasoning
Fall. 3 credits. B. Koslowski.

HD 439 Cognitive Development: Infancy through Adolescence
Spring. 3 credits. B. Koslowski.

Linguistics

LING 101 Introduction to Linguistics
Fall or spring. 4 credits. Fall, J. Whitman; spring, M. Diesing.

LING 170 Introduction to Cognitive Science (also COGST 101, COM S 101, PHIL 191, and PSYCH 102)
Fall. 3 or 4 credits. M. Spivey.

LING 201 Introduction to Phonetics and Phonology
Spring. 4 credits. A. Cohn.

LING 203 Introduction to Syntax and Semantics
Fall. 4 credits. M. Diesing.

[LING 264 Language, Mind, and Brain (also COGST 264)
Spring. 4 credits. Not offered 2001–2002. J. Bowers.]

[LING 270 Truth and Interpretation (also COGST 270 and PHIL 270)
Spring. 4 credits. Not offered 2001–2002.]

LING 301–302 Phonology I, II
Fall and spring. 4 credits each term. Fall, A. Cohn; spring, D. Zec.

LING 303–304 Syntax I, II
Fall and spring. 4 credits each term. Fall, C. Collins/J. Whitman; spring, M. Diesing.

LING 309 Morphology
Fall. 4 credits. D. Zec.

LING 319 Phonetics I
Fall. 4 credits

LING 320 Phonetics II
Spring. 4 credits.

LING 325 Pragmatics
Fall. 4 credits. S. McConnell-Ginet.

[LING 333 Problems in Semantics—Quantification in Natural Language (also COGST 333 and PHIL 333)
Spring. 4 credits. Not offered 2001–2002. S. McConnell-Ginet and Z. Szabó.]

LING 401 Language Typology
Spring. 4 credits. C. Rosen.

LING 414 Second Language Acquisition I (also ASIAN 414)
Spring. 4 credits. Y. Shirai.

LING 415 Second Language Acquisition II (also ASIAN 417)
Spring. 4 credits. Y. Shirai.

LING 421 Semantics I
Spring. 4 credits.

LING 422 Semantics II
Fall. 4 credits.

LING 424 Computational Linguistics (also COGST 424 and COM S 424)
Spring. 4 credits. M. Rooth.

[LING 425 Corpra and Applied Linguistics (also ASIAN 425)
Fall. 4 credits. Not offered 2001–2002.]

LING 436 Language Development (also COGST 436, HD 436, and PSYCH 436)
Spring. 4 credits. B. Lust.

LING 450 Lab Course: Language Development (also COGST 450, HD 437, and PSYCH 437)
Spring. 2 credits. In conjunction with COGST/HD/LING/PSYCH 436, Language Development. B. Lust.

LING 474 Introduction to Natural Language Processing (also COGST 474 and COM S 474)
Spring. 4 credits. M. Rooth.

Mathematics

MATH 281 Deductive Logic (also PHIL 331)
Fall. 4 credits. H. Hodes.

MATH 384 Foundations of Mathematics (also PHIL 434)
Fall. 4 credits. H. Hodes.

MATH 481 Mathematical Logic (also PHIL 431)
Spring. 4 credits.

MATH 482 Topics in Logic (also PHIL 432)
Spring. 4 credits. H. Hodes.

MATH 483 Intensional Logic (also PHIL 436)
Spring. 4 credits.

MATH 486 Applied Logic (also COM S 486)
Spring. 4 credits.

Neurobiology and Behavior

BIONB 111 Brain, Mind, and Behavior (also COGST 111 and PSYCH 111)
Spring. 3 credits. R. Hoy and E. Adkins Regan.

BIONB 221 Neurobiology and Behavior I: Introduction to Behavior
Fall. 3 or 4 credits.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology
Spring. 3 or 4 credits.

BIONB 326 The Visual System
Spring. 4 credits. H. Howland.

BIONB 328 Biopsychology of Learning and Memory (also PSYCH 332)
Spring. 3 credits. T. DeVoogd.

BIONB 392 Drugs and the Brain
Spring. 4 credits. R. Harris-Warrick.

BIONB 396 Introduction to Sensory Systems (also PSYCH 396)
Spring. 3 or 4 credits. B. Halpern.

[BIONB 421 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and 631)
Fall. 3 or 4 credits. Not offered 2001–2002. B. Halpern.]

BIONB 424 Neuroethology (also PSYCH 424)
Spring. 4 credits.

[BIONB 426 Animal Communication
Spring. 4 credits. Not offered 2001–2002.]

[BIONB 492 Sensory Function (also PSYCH 492)
Spring. 3 or 4 credits. Not offered 2001–2002. B. Halpern and H. Howland.]

[BIONB 496 Bioacoustic Signals in Animals and Man
Spring. 3 credits. Not offered 2001–2002.]

Philosophy

PHIL 191 Introduction to Cognitive Science (also COGST 101, COM S 101, LING 170, and PSYCH 102)
Fall. 3 or 4 credits. M. Spivey.

PHIL 231 Introduction to Deductive Logic
Fall. 4 credits.

PHIL 261 Knowledge and Reality
Fall. 4 credits.

PHIL 262 Philosophy of Mind
Fall. 4 credits. B. Hellie.

[PHIL 270 Truth and Interpretation (also COGST 270 and LING 270)
Spring. 4 credits. Not offered 2001–2002.]

PSYCH 414 Comparative Cognition (also COGST 414 and PSYCH 714)
Spring. 3 credits. M. Owren.

[PSYCH 415 Concepts, Categories, and Word Meanings (also PSYCH 615)
Fall. 4 credits. Not offered 2001–2002.]

PSYCH 416 Modeling Perception and Cognition (also COGST 416 and PSYCH 616)
Spring. 4 credits. M. Spivey.

PSYCH 417 The Origins of Thought and Knowledge (also PSYCH 717)
Fall. 4 credits. S. Johnson.

[PSYCH 418 Psychology of Music (also PSYCH 618)
Spring. 3 or 4 credits. Not offered 2001–2002. C. Krumhansl.]

PSYCH 424 Neuroethology (also BIONB 424)
Spring. 4 credits.

PSYCH 425 Cognitive Neuroscience (also PSYCH 625)
Fall. 4 credits. B. Finlay.

[PSYCH 431 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421 and PSYCH 631)
Fall. 3 or 4 credits. Not offered 2001–2002. B. Halpern.]

PSYCH 436 Language Development (also COGST 436, HD 436, and LING 436)
Spring. 4 credits. B. Lust.

PSYCH 437 Lab Course: Language Development (also COGST 450, HD 437, and LING 450)
Spring. 2 credits. In conjunction with COGST/HD/LING/PSYCH 436, Language Development. B. Lust.

PSYCH 465 Topics in High-Level Vision (also COGST 465 and COM S 392)
Fall. 4 credits. S. Edelman.

PSYCH 491 Research Methods in Psychology (also PSYCH 691)
Spring. 4 credits. D. Dunning.

[PSYCH 492 Sensory Function (also BIONB 492 and PSYCH 692)
Spring. 4 credits. Not offered 2001–2002. B. Halpern and H. Howland.]

Sociology

[SOC 480 Identity and Interest in Collective Action (also SOC 580)
Fall. 4 credits. Not offered 2001–2002. M. Macy.]

Graduate Courses and Seminars

The following courses and seminars are generally for graduate students only. However, some may be appropriate for advanced undergraduates. The director of the concentration must approve an undergraduate's use of any of these for satisfying the concentration requirements.

COGST 501 Cognition (also PSYCH 501)
Fall. 4 credits. Concurrent or prior registration in COGST 101 (also COM S 101, LING 170, PHIL 191, and PSYCH 102) Introduction to Cognitive Science, is required. Co-meets with PSYCH 614, Issues in Cognitive Psychology. S. Edelman.
This course introduces graduate students interested in cognition (especially those who plan to pursue the Cognitive Studies minor) to the central issues in computational cognitive psychology. It consists of a series of advanced-level discussions of selected examples from the material covered in COGST 101 (also COM S 101, LING 170, PHIL 191, and PSYCH 102) and COGST 214 (also PSYCH 214/614). The material from those courses includes perception, attention and consciousness, memory, thinking, and language. The course focuses on the development of skills required for critical evaluation of research in cognitive sciences, backed by an in-depth understanding of the relevant concepts and theories.

COGST 530 Representation of Structure in Vision and Language (also LING 530 and PSYCH 530)
Spring. 4 credits. Graduate seminar. Enrollment limited to 13 graduate students. Prerequisites: a course each in cognitive psychology, linguistics, and computer science, or permission of instructor. S. Edelman.
The seminar concentrates on the nature of the representation of visual objects and scenes in the brain and compares it with the structural framework that serves as the main explanatory tool in current theories of language processing. Data and ideas are drawn from visual psychophysics, neurophysiology, psycholinguistics, computational vision and linguistics, and philosophy. Students present published research papers and preprints, which are then discussed and critiqued.

COGST 531 Topics in Cognitive Studies (also LING 531 and PSYCH 531)
Spring. 4 credits. Cognitive Studies Program staff.
This seminar series takes advantage of the wide range of expertise and research interests of the faculty members of the Cognitive Studies Program. Every time it is offered, the seminar concentrates on a cluster of issues that span disciplines from Neurobiology and Behavior, through Psychology and Linguistics, to Computer Science and Philosophy. Each meeting consists of a short background presentation, followed by a seminar-style discussion of a chosen issue, exemplified by a current research publication. Students submit weekly essays discussing the assigned publications, and a term paper integrating the various topics covered.

COGST 633 Language Acquisition Seminar (also LING 633)
Fall. 4 credits. Prerequisite: COGST/HD/LING/PSYCH 436 or equivalent, or permission of instructor. B. Lust.

[COGST 773–774 Proseminar in Cognitive Studies I and II (also COM S 773/774, LING 773/774, PHIL 773/774, and PSYCH 773/774)
Fall: R grade; spring: S-U only. 4 credits. Not offered 2001–2002.
The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar provides a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that comprise the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty from the field introduce theoretical and methodological issues that underlie the field and its relation to Cognitive Studies; in addition, they introduce various labs in which active research is being conducted in their field at Cornell, and current issues of interdisciplinary interest.

The proseminar includes suggestions from faculty in each field for further advanced interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It concludes (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice.

Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade is assigned in the fall semester, and an S-U grade only will be assigned in the spring semester.]

COM S 664 Machine Vision
Spring. 4 credits.

COM S 671 Introduction to Automated Reasoning
Fall. 4 credits.

COM S 672 Advanced Artificial Intelligence
Spring. 4 credits. Prerequisite: COM S 472.

COM S 674 Natural Language Processing
Spring. 4 credits. Prerequisite: COM S 472.

[COM S 676 Reasoning about Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered 2001–2002. J. Y. Halpern.]

[COM S 677 Reasoning about Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered 2001–2002. J. Y. Halpern.]

COM S 772 Seminar in Artificial Intelligence
Fall and spring. 2 credits. B. Selman.

COM S 775 Seminar in Natural Language Understanding
Fall and spring. 2 credits.

EDUC 611 Educational Psychology
Fall. 3 credits. Undergraduates admitted with permission from instructor. R. Ripple.

EDUC 614 Gender, Context, and Epistemological Development (also WOMNS 624)
Fall. 3 credits. D. Schrader.

EDUC 714 Moral Development and Education
Spring. 3 credits. D. Schrader.

HD 600/700 Graduate Seminars

LING 530 Representation of Structure in Vision and Language (also COGST 530 and PSYCH 530)
Spring. 4 credits. S. Edelman.

LING 531 Topics in Cognitive Studies (also COST 531 and PSYCH 531)
Spring. 4 credits. Cognitive Studies Program staff.

LING 609 Second Language Acquisition and the Asian Languages (also ASIAN 610)
Fall. 4 credits. Prerequisite: LING 414–415. Y. Shirai.

LING 633 Language Acquisition Seminar (also COGST 633)
Fall. 4 credits. Prerequisite: COGST/HD/LING/PSYCH 436 or equivalent. B. Lust.

LING 700 Graduate Seminars

MATH 681 Logic
Spring. 4 credits.

MATH 781–782 Seminar in Logic
Fall and spring. 4 credits each.

MATH 788 Topics in Applied Logic
Fall. 4 credits.

NBA 663 Managerial Decision Making
Fall. 3 credits. J. Russo.

PHIL 633 Philosophy of Language—Propositions and Events
Spring. 4 credits.

PHIL 662 Philosophy of Mind
Fall. 4 credits. Z. Szabó.

PHIL 700 Graduate Seminars

PSYCH 501 Cognition (also COGST 501)
Fall. 4 credits. Concurrent or prior registration in COGST 101/COM S 101/LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science, is required. Co-meets with PSYCH 614, Issues in Cognitive Psychology. S. Edelman.

PSYCH 521 Psychobiology (Developmental Seminar)
Fall and spring. 4 credits each. B. Finlay.

PSYCH 530 Representation of Structure in Vision and Language (also COGST 530 and LING 530)
Spring. 4 credits. S. Edelman.

PSYCH 531 Topics in Cognitive Studies (also COGST and LING 531)
Spring. 4 credits. Cognitive Studies Program staff.

PSYCH 550 Special Topics in Cognitive Science
Spring. 4 credits. M. Spivey.

[PSYCH 601 Computational Models of Language
Spring. 4 credits. Prerequisite: consent of instructor. Not offered 2001–2002. M. Spivey.]

PSYCH 614 Issues in Cognitive Psychology (also COGST 214 and PSYCH 214)
Fall. 4 credits. Co-meets with COGST/PSYCH 501, Cognition. S. Edelman.

PSYCH 616 Modeling Perception and Cognition (also COGST 416 and PSYCH 416)
Spring. 4 credits. M. Spivey.

PSYCH 618 Psychology of Music (also PSYCH 418)
Spring. 4 credits. C. Krumhansl.

[PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421 and PSYCH 431)
Fall. 3 or 4 credits. Not offered 2001–2002. B. Halpern.]

PSYCH 691 Research Methods in Psychology (also PSYCH 491)
Spring. 4 credits. D. Dunning.

PSYCH 714 Comparative Cognition (also COGST 414 and PSYCH 414)
Spring. 3 credits. M. Owren.

PSYCH 716 Auditory Perception (also PSYCH 316)
Fall. 4 credits. C. Krumhansl.

College Scholar Program

L. Abel, director, 172 Goldwin Smith Hall, 255–3386.

K. Gabard, director, 55 Goldwin Hall, 255–5792.

The College Scholar Program is described in the introductory section of Arts and Sciences.

COLLS 397 Independent Study
Fall or spring. 1–4 credits. Prerequisite: permission of program office.

COLLS 499 Honors Research
Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

East Asia Program

140 Uris Hall

J. Whitman, director; D. Boucher, K. W. Brazell, M. Brinton, R. Bullock, A. Carlson, P. Chi, S. G. Cochran, B. de Bary, G. Fields, E. M. Gunn, T. Huhn, S. Hoare, P. J. Katzenstein, J. V. Koschmann, F. Kotas, J. M. Law, L. C. Lee, T. P. Lyons, R. McNeal, V. Nee, A. Pan, C. A. Peterson, J. R. Piggott, N. Sakai, P. S. Sangren, M. Shin, Y. Shirai, V. B. Shue, J. J. Suh, R. J. Sukle, K. W. Taylor, H. Wan, D. X. Warner, Emeritus: R. Barker, K. Biggerstaff, E. H. Jorden, J. McCoy, T. L. Mei, R. J. Smith, M. W. Young

The East Asian Program draws together faculty from departments and fields throughout the university who participate in a program of research and teaching on the civilizations and cultures of East Asia. Courses are offered through departments in the humanities and social sciences, as well as in the fields of business, city and regional planning, international and comparative labor relations, and rural sociology. The Department of Asian Studies offers language courses in Mandarin, Cantonese, Korean, and Japanese, in addition to the Full-year Asian Language Concentration (FALCON) in Japanese and Mandarin. Undergraduates major in the Department of Asian Studies and concentrate on the language and culture of one East Asian country, while graduate students may work toward an M.A. in East Asian studies, a dual M.B.A./M.A. degree or an M.A./Ph.D. Degree in a discipline such as agricultural economics, anthropology, city and regional planning, government, history, history of art, linguistics, literature, rural sociology, or sociology. Graduate students concentrating on East Asia may apply for a variety of fellowships and travel grants offered by the East Asia Program. The formal program of study is enriched by numerous events and extracurricular activities, including films, workshops, art exhibits, lectures, symposia, and cultural and artistic performances on East Asia. With a half million holdings in Chinese, Japanese, Korean, and western languages, the Wason Collection in Kroch Library is a major national resource for research on East Asia. A 5,000 piece collection representing the full range of Chinese, Japanese, and Korean art may be seen at the George and Mary Rockwell Galleries in the Herbert F. Johnson Museum of Art.

First-Year Writing Seminars

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, see the John S. Knight Institute for Writing in the Disciplines section, and consult the John S. Knight Institute brochure, available from college registrars in August for the fall term and on the web in late October for the spring term.

Human Biology Program

J. Haas (nutritional sciences), director, 127 Savage Hall, 255–8001; B. Finlay (psychology), J. Fortune (physiology/women's studies), E. Frongillo (nutritional sciences), R. Johnston (psychology), K. A. R. Kennedy (ecology and systematics/anthropology), D. Levitsky (nutritional sciences), P. W. Nathanielsz (physiology), D. L. Pelletier (nutritional sciences), W. Provine (ecology and systematics/history), R. Robertshaw (physiology), S. Robertson (human development), R. Savin-Williams (human development), M. Small (anthropology)

Human biology integrates the methods and theories of many disciplines, such as biological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology into a comprehensive study of biological diversity in *Homo sapiens*. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The curriculum of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology curriculum is of particular relevance to undergraduate students in premedical and predentistry programs, biological anthropology, nutrition, human development, ecology and evolutionary biology, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students with a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics relating to human evolution and biological diversity. Human biology is not a major but a curriculum of study that provides majors in various departments with a program for selecting elective courses that deal with the biology of the human species. Students in their junior year may develop a program of study in human biology while majoring in a number of different departmental fields.

Basic Requirements

The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and physical diversity of the human species. Adjustments may be made in these requirements, depending on the student's academic background and affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (BIO S 101–103 plus 102–104 or 105–106 or BIO S 107–108 offered during the eight-week Cornell Summer Session); one year of general chemistry (CHEM 207–208 or 215–216); one year of college mathematics (MATH 111–112 or 105–106 or 111–105); one course in genetics (BIO S 281 or 282); one course in biochemistry (BIO S 330, 331, 332, or 333 or NS 320). It is recommended that students planning graduate study in biological anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty adviser in human biology for help in selecting appropriate courses.

Elective courses should be taken that will enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may also fulfill requirements for the major. Courses should be selected that also provide sufficient exposure to the integration of basic anatomical and physiological sciences with the behavior of individuals and groups within the context of evolutionary theory and ecology. The courses listed below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty adviser representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisers in his or her department who is listed as faculty in human biology to be their principal adviser, or he or she may have an adviser in the department of the major and seek the advice of a human biology faculty adviser in matters pertaining to satisfaction of the requirements. In certain cases a faculty adviser may represent both the major and the curriculum of study in human biology.

Courses

Human Anatomy and Physiology

BIO AP 214 Biological Basis of Sex Differences (also B&SOC 214 and WOMNS 214)
Fall. 3 credits.

BIO AP 311 Introductory Animal Physiology, Lectures (also VET BMS 346)
Fall. 4 credits.

BIO AP 319 Animal Physiology Experimentation
Fall. 4 credits.

BIO AP 458 Mammalian Physiology
Spring. 3 credits.

BIO EE 274 The Vertebrates: Structure, Function, and Evolution
Spring. 4 credits.

BIO EE 474 Laboratory and Field Methods in Human Biology (also ANTHR 474)
Spring. 5 credits.

NS 115 Nutrition and Health: Concepts and Controversies
Fall. 3 credits.

NS 222 Maternal and Child Nutrition
Spring. 3 credits.

NS 315 Obesity and the Regulation of Body Weight
Fall. 3 credits.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits.

NS 341 Human Anatomy and Physiology Lab
Spring. 4 credits.

NS 361 Biology of Normal and Abnormal Behavior (also PSYCH 361)
Fall. 3 credits.

NS 441 Nutrition and Disease
Fall. 4 credits.

PSYCH 322 Hormones and Behavior (also BIONB 322)
Spring. 3 or 4 credits.

PSYCH 425 Cognitive Neuroscience
Fall. 3 or 4 credits.

VETMI 431 Medical Parasitology
Fall. 2 credits.

Human Behavior

ANTHR 390 Primate Behavior and Ecology
Spring. 4 credits.

ANTHR 490 Primates and Evolution
Spring. 4 credits.

B&SOC 301 Biology and Society I: The Social Construction of Life (also S&TS 401)
Fall. 4 credits.

BIO NB 421 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and 631)
Fall. 3 or 4 credits.

BIO NB 427 Animal Social Behavior
Fall. 4 credits.

HD 344 Infant Behavior and Development
Fall. 3 credits.

PAM 380 Human Sexuality
Spring. 3 credits.

NS 245 Social Science Perspectives of Food and Nutrition
Fall. 3 credits.

NS 347 Human Growth and Development: Biological and Behavioral Interactions (also HD 347 and B&SOC 347)
Spring. 3 credits.

NS 361 Biology of Normal and Abnormal Behavior
Fall. 3 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

PSYCH 425 Cognitive Neuroscience
Fall. 3 or 4 credits.

R SOC 408 Human Fertility in Developing Nations
Spring. 3 credits.

R SOC 438 Social Demography
Fall. 3 credits.

Human Evolution and Ecology

ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind
Fall. 3 credits.

ANTHR 203 Early People: The Archaeological and Fossil Record (also ARKEO 203)
Spring. 3 credits.

ANTHR 390 Primate Behavior and Ecology
Spring. 4 credits.

ANTHR 391 The Evolution of the Human Life Cycle
Spring. 3 credits.

ANTHR 490 Primates and Evolution
Spring. 4 credits.

BIO EE 261 Ecology and the Environment
Fall or summer. 4 credits.

BIO EE 272 Functional Ecology of Vertebrates
Spring. 4 credits.

BIO EE 275 Human Biology and Evolution (also ANTHR 275 and NS 275)
Fall. 3 credits.

BIO EE 278 Evolutionary Biology
Fall or spring. 3 or 4 credits.

BIO EE 371 Human Paleontology (also ANTHR 371)
Fall. 4 credits.

BIO EE 461 Population and Evolutionary Ecology
Spring. 4 credits.

BIO EE 464 Macroevolution
Spring. 4 credits.

BIO EE 471 Mammalogy
Fall. 4 credits.

BIO EE 673 Human Evolution: Concepts, History, and Theory (also ANTHR 673)
Fall. 3 credits.

BIO G 207 Evolution (also HIST 287, and S&TS 287)
Fall or summer. 3 credits.

BIO GD 481 Population Genetics
Fall. 4 credits.

BIO GD 482 Human Genetics and Society
Fall. 3 credits.

BIO GD 484 Molecular Evolution
Spring. 3 credits.

B&SOC 447 Seminar in the History of Biology (also HIST 415)
Fall. 4 credits.

NS 306 Nutritional Problems of Developing Nations
Fall. 3 credits.

NS 451 Epidemiology and Health of Human Communities
Fall. 3 credits.

PAM 303 Ecology and Epidemiology of Health
Spring. 3 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

R SOC 201 Population Dynamics
Spring. 3 credits.

VET MI 431 Medical Parasitology
Fall. 2 credits.

VET PMP 664 Introduction to Epidemiology (enroll in VET CS 664)
Fall. 3 credits.

Independent Major Program

L. Abel, director, 172 Goldwin Smith Hall, 255–3386.

The Independent Major Program is described in the introductory section of Arts and Sciences.

IM 351 Independent Study
Fall or spring. 1–4 credits. Prerequisite: permission of the program office.

IM 499 Honors Research
Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

International Relations Concentration

Office: 156 Uris Hall, 254-5004, www.einaudi.cornell.edu/about/irc.asp

Faculty Advisory Board T. Bestor (Anthropology); M. Cook (ILR); Matthew Evangelista (Government); S.Feldman (Rural Sociology); D. Lee (ARME); D. Lelyveld (Executive Director, Einaudi Center for International Studies); J. Reppy (S & TS); H. Shue (Ethics and Public Policy); B. Strauss (History); B. Szekely (Associate Director, Cornell Abroad)

Objective

The International Relations Concentration is an interdisciplinary program for undergraduate students enrolled in any of the seven Cornell undergraduate colleges. The International Relations Concentration provides a structured yet flexible program for undergraduates to take advantage of the vast resources available at the university for studying the politics, economics, history, languages, and cultures of the countries and regions of the world.

Graduates of the program have gone on to pursue further education in fields such as political science and anthropology and to successful careers in international law, economics, agriculture, trade, finance, and government service, among others. They have gone on to work in international and nongovernmental organizations, in cross-cultural affairs, in journalism, and in education.

The International Relations Concentration is not a major or a department, but rather a program offering a selection of courses reaching across colleges and departments. Students pursue the International Relations Concentration in addition to their regular degree. International Relations Concentrators have majored in fields ranging from anthropology, city and regional planning, communications, government, and history to natural resources, industrial and labor relations, and computer science. International coursework and language study add a global and cross-cultural dimension to those majors. Some students even design an independent major in some aspect of international relations or comparative social or cultural studies. Spending a semester or year of study abroad can contribute to meeting the course requirements of the IR Concentration, including the language requirement.

Course Requirements

These requirements are designed to expose students to a broad range of perspectives in international relations while allowing them to tailor their course selections to specific interests. Courses throughout the university are grouped into four subject areas including:

1) International Economics and Development;
2) World Politics and Foreign Policy;
3) Transnational Processes and Policies;
4) Cultural Studies.

Within these four subject areas, courses are also identified as "core" or "elective". Starting with the Class of 2003 and for current students who have not been enrolled in the program by the end of spring 1999, students must complete altogether eight courses from the four groups according to one of two strategies. Option A emphasizes the politics and economics of international relations. Option B puts greater stress on culture. In choosing either option, students should ensure that they acquire familiarity with more than one geographic region or country. All courses used to fulfill the concentration requirements must be taken for a letter grade. Courses can count both toward a major and the International Relations Concentration.

Option A:—One core course from Groups 1, 2, 3, and 4—One elective from Groups 1, 2, 3, and 4

Option B:—One core course from Groups 1, 2, 3, and 4—One elective from either Group 1 or Group 2—One elective from Group 3 and 4, and one additional elective from either Group 3 and Group 4

Prior to pre-registration a course list for the following semester (as well as lists for the current and previous semesters) can be obtained from the administrative coordinator, Hyeok Yong Kwon, hyk1@cornell.edu, 156 Uris Hall, as well as from the website. Students should take note that these lists are not necessarily complete. Other courses throughout the university can qualify for the International Relations Concentration by arrangement.

Course List for Fall 2001

(For course list for spring 2002, contact IRC program in fall of 2001. Courses with the brackets are core courses for each group but not offered in fall 2001.)

Group 1: International Economics and Development

Core:

ECON 361	International Trade Theory (prerequisites: ECON 101, 102, 313)
[AEM 230/ ECON 230	International Trade and Finance (ECON 101 required; ECON 102 recommended and may be taken concurrently)]
[ECON 263/ AEM 430	International Trade Policy (ECON 101, 102, 314 required)]

Electives:

AEM 432	Markets or Governments?
AEM 433/ CRP 412	Development, Privatization and New Public Management
CRP 474	Third World Urbanization
CRP 477	Issues in African Development
ECON 371	Economic Development
ECON 425	Economic History of Latin America
ECON 450/ AEM 450	Resource Economics
ECON 471	Economy of the Former USSR and Central Europe
ECON 472	Comparative Economic System: East and West
ECON 475	Economic Problems of India
GOVT 400	America and the World Economy
GOVT 433	Politics of Economic Liberalization in the Developing World
ILRHR 360	Human Resource Economics and Public Policy
GOVT 330/ ILRIC 333/533	Europe, the US, and Japan in the Global Economy

Group 2: World Politics and Foreign Policy

Core:

GOVT 181	Introduction to International Relations

Electives:

AS&RC 311	Government and Politics in Africa
AS&RC 451	Political and Social Change in Caribbean

GOVT 326	Crafting Democratic Constitutional Choices
GOVT 332	Modern European Politics
GOVT 343	Politics of European Union
GOVT 347	Government and Politics of China
GOVT 384	Contemporary International Conflict
GOVT 390	International Relations and Film Theory
GOVT 391	Chinese Foreign Policy
GOVT 490	International Institutions
HIST 214/ AM ST 214	American Foreign Policy
HIST 284	Southeast Asia and the World System
HIST 289	The US-Vietnam War
HIST 290	20th Century Russia and Soviet Union
HIST 295	Colonial Latin America
HIST 371	WWII in Europe
HIST 414	Motivations of US Foreign Policy (permission of the instructor, limited to 15 students)
HIST 467	Modern European History (Topic: International Humanitarian Movements in the 20th Century: limited to 12 students)

Group 3: Transnational Processes and Policies

Core:

GOVT 294/ PHIL 294	Global Thinking
GOVT 393	Introduction to Peace Studies

Electives:

ANTHR 422	Anthropology and the Environment (limited to 15 students)
ANTHR 480	Anthropology and Globalization
AEM 494	Ethical Issues in Food and Agriculture
B&SOC 461	Environmental Policy
CRP 380	Environmental Politics
CRP 451	Environmental Law
CRP 453	Environmental Aspects of International Planning (open to advanced undergraduates) COMM 424 Communication in the Developing Nations (open to juniors and seniors)
GOVT 343	Politics of European Integration
HIST 250/ ECE 250/ S&TS 250	Technology in Society
HIST 467	Modern European History (Topic: International Humanitarian Movements in the 20th Century: limited to 12 students)
ILRHR 469	Immigration and the American Labor Force
INTAG 300	Perspectives in International Agricultural and Rural Development
INTAG 402	Agriculture in Developing Nations I (open to upper class undergraduates)
PAM 383	Social Welfare as Social Institute
R SOC 261	Sociology of Sustainable Development
R SOC 325/ AIS 325	Indigenous Globalization
SOC 437/ R SOC 438	Social Demography
S & TS 411	Knowledge, Technology, and Property

Group 4: Cultural Studies

Core:

ANTHR 200	Cultural Diversity and Contemporary Issues
[ANTHR 102	Introduction to Anthropology: The Comparison of Cultures]

Electives:

ANTHR 224	The French Experience
ANTHR 230/ AIS 230	Cultures of North America
ANTHR 336	Change and Continuity in Pacific
ANTHR 345	Japanese Society
ANTHR 362	Democratizing Society
ANTHR 381	Anthropology and Religion
ANTHR 422	Anthropology and the Environment (limited to 15 students)
ARKEO 360/ NES 360/ JWST 360	Origins of Mesopotamian Civilization
ART H 220/ CLASS 220	Introduction to Art History: Classical World
ART H 280	Approaches to Asian Art
ART H 362/ WOMNS 361	Impressionism in Society
ART H 378/ AS&RC 310	Art in African Culture and Society
ART H 478/ AS&RC 435	African Cinema
AS&RS 404	Afrocentricity
ASIAN 211	Introduction to Japan
ASIAN 215	Introduction to South Asian Civilization
ASIAN 312	Intellectuals: Early Modern Korea
ASIAN 351/ RELST 351	Indian Religious World
ASIAN 415/ COM L 418	Virtual Orientalism
COM L 330/ GERST 330/ THETR 329	Political Theory and Cinema
COM L 334/ NES 339/ RELST 334	Islamic Spain: Culture and Society
COM L 404/ ENGL 404	Nazis and the Literary Imagination
COM L 474/ HIST 474	Topics in Modern European Intellectual and Cultural History
ENGL 251/ WOMNS 251	20th Century Women Novelists
FRLIT 320	French Civilization II
FRLIT 370	Perspectives on Enlightenment
FRLIT 386	Perfume, Jewerly, Cigarretts
HIST 151	Introduction to Western Civilization
HIST 191	Introduction to Modern Asian History
HIST 206	Modern Mexico
HIST 213/ AAS 213	Asian American History
HIST 224	Art and Politics—20th Century Latin American History
HIST 253/ NES 255/ RELST 255	Introduction to Islamic Civilization
HIST 263/ RELST 263	The Earlier Middle Ages
HIST 265/ CLASS 265	Ancient Greece From Homer-Alexander
HIST 281	Science in History
HIST 284/ ASIAN 284	South East Asia and the World System
HIST 291	Modern Jewish History, 1789-1948
HIST 295	Colonial Latin America
HIST 297	Japan before 1600
HIST 310/ ENGL 314	Life, Literature, Power: Late Medieval England
HIST 349	Early Modern England
HIST 355	The Old Regime: France in the 17th and 18th Century
HIST 360	Early Warfare: East and West
HIST 395	South East Asia to the 18th Century
HIST 404/ S HUM 401	The Soul in Medieval Culture
HIST 405/ S HUM 408/ GERST 420	Jewish Culture and Modernity
HIST 435/ CLASS 445	Modern Classic History of Ancient Greece (limited to 15 students)
HIST 447	Crusaders and Chroniclers (limited to 15 students)
HIST 451/ ASIAN 450	Crime and Diaspora in South East Asian History (limited to 15 students)
HIST 474/ COM L 474/ JWST 474	Topics in Modern European Intellectuals and History (limited to 15 students)
HIST 477	Politics of Enlightenment
HIST 490	Tales of the Heike
HIST 492	Medieval Chinese History
HIST 493/ ASIAN 493	Problems in Modern Chinese History
ITALL 224	Contemporary Italy
ITALL 390	Fascist Bodies, Fascist Films

SOC 429	Culture and Agency
S&TS 287/ BIO G 207/ HIST 287	Evolution
SPANL 346	Hispanic Caribbean Culture and Literature
THETR 240	Introduction to World Theatre I
THETR 274	Introduction to Film Analysis

Language Requirement

IR Concentrators are expected to complete additional language study beyond the College of Arts and Sciences degree requirement. This study can be accomplished in one of two ways: 1) two years of one foreign language (proficiency plus one course) 2) two languages at proficiency.

Study Abroad

IR Concentrators are strongly encouraged to study abroad to bring a practical dimension to their expertise in international issues. Those who choose this option will find the requirements for the concentration highly compatible with courses taken abroad. Students are encouraged to contact the Administrative Coordinator prior to departure.

Completion

Transcripts will reflect successful completion of the requirements for the concentration. In addition, students will receive a special certificate and a letter of confirmation signed by the director of the international relations concentration.

Enrollment

To obtain course lists, to enroll and for all further information, please contact: *Administrative Coordinator: Hyeok Yong Kwon, the Mario Einaudi Center for International Studies, 156 Uris Hall, hyk1@cornell.edu, Tel: 254–5004.

Center for International Studies

See Interdisciplinary Centers, Programs, and Studies.

Program of Jewish Studies

D. I. Owen, director (Ancient Near Eastern and Biblical History and Archaeology), L. Adelson (German-Jewish Literature and Culture), G. Altschuler (American-Jewish History and Culture), D. Bathrick (Holocaust Film Studies), R. Brann (Judeo-Arabic Studies), V. Caron (Modern French and European-Jewish History), M. Diesing (Yiddish Language and Linguistics), N. Furman (French Holocaust Literature), K. Haines-Eitzen (New Testament and Early Christianity), R. Hoffmann (Holocaust Studies), P. Hyams (Medieval Jewish History), D. LaCapra (Holocaust Studies), M. Migiel (Italian Literature), R. Polenberg (American-Jewish History), J. Porte (American-Jewish Writers), D. S. Powers (Arabic and Islamic Studies), G. Rendsburg (Biblical and Semitic Studies), E. Rosenberg (Holocaust Studies), N. Scharf (Hebrew Language), D. Schwarz (Anglo-Jewish Literature), G. Shapiro (Russian-Jewish Literature), S. Shoer (Hebrew Language), D. Starr (Modern Hebrew and Arabic Literature), M. Steinberg (German-Jewish History and Culture), Y. Szekely (Judaica Bibliography), S. Toorawa (Minorities in Islamic Hands), J. Zorn (Biblical Archaeology)

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976.

The program has grown out of the conviction that Judaic civilization merits its own comprehensive and thorough treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the areas of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges.

The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, whose interests are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies, with particular emphasis on the interrelationship between Judaism, Christianity, and Islam.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the Hebrew Bible; medieval and modern Hebrew literature; ancient, medieval, and modern European and Middle Eastern Jewish history; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

Courses Offered

JWST 105–106 Elementary Modern Hebrew I and II (also NES 101–102)
105 fall; 106 spring. 6 credits. S. Shoer.
For description, see NES 101–102.

JWST 163 Things the Prophets Never Told You: Archaeology and the Religion of Ancient Israel (also NES 163)
Fall. 3 credits. J. Zorn.
For description, see NES 163.

JWST 201–202 Intermediate Modern Hebrew I and II (also NES 201–202)
201, fall; 202@, spring. 4 credits. N. Scharf.

JWST 694 Joyce's Ulysses and the Modern Tradition (also ENGL 670)

John S. Knight Institute for Writing in the Disciplines

The director of the John S. Knight Institute is Jonathan Monroe, associate dean of the College of Arts and Sciences, professor in the Department of Comparative Literature, and George Elliott Reed Professor of Writing and Rhetoric. Katherine Gottschalk, senior lecturer in the Department of English, is the Walter C. Teagle Director of First-Year Writing Seminars. The Institute's offices are in 159 Goldwin Smith Hall, 255–4061.

M. Gilliland (Writing Workshop), K. Hjortshoj (Writing in the Majors), S. Donatelli (Sophomore Writing Seminars), B. LeGendre (Writing Workshop), J. Martin (Writing Workshop), J. Pierpont (Writing Workshop), E. Shapiro, (Writing Workshop).

The John S. Knight Institute helps to coordinate the teaching of writing for undergraduates in six of the university's schools and colleges (the School of Industrial and Labor Relations and the colleges of Agriculture and Life Sciences; Architecture, Art, and Planning; Arts and Sciences; Engineering; and Human Ecology). The program administers writing seminars for first-year and upperclass students, tutorial writing classes, and seminars in the teaching of writing. More than thirty academic departments and programs participate in the program.

First-Year Writing Seminars

For first-year students the Institute offers the first-year writing seminars—more than 125 different courses in the humanities, social sciences, expressive arts, and sciences. Through introductory work in a particular field of study, seminars help students write good English expository prose—prose that, at its best, is characterized by clarity, coherence, intellectual force, and stylistic control. All seminars pursue this common aim through small classes, with a maximum of 17 students, and adherence to a program-wide set of guidelines:

- Seminars require at least six—and at most 12—formal essays on new topics. (While these assignments should total about 30 pages, some of the 30-page total may include major drafts which receive commentary from the instructor and are later significantly revised.) Assignments form a logical sequence.
- At least three of the 6–12 required essays are developed through several stages of revised drafts under the instructor's guidance. Guidance may include, in addition to written commentary on drafts, individual conferences, in-class group work, peer commentary, reading responses, journals, and so on.
- Ample classroom time is spent on work directly related to writing.
- Reading assignments in the course subject are kept under 75 pages per week to permit regular, concentrated work on writing.
- All students meet in at least two individual conferences with the instructor.

Offerings change from semester to semester. Each term's first-year writing seminars are described in a brochure available from college registrars in the fall and on the web in the spring.

To ensure that students will enjoy the benefits of small writing classes, first-year writing seminars are limited to no more than 17 students. Instead of pre-enrolling in their writing courses, students request placement in one of five writing seminars by filling out ballots available from their college registrars in the fall and on the web in the spring. Over 90 percent receive one of their top three choices. Students may change their writing seminars each semester at the First-Year Writing Seminar Exchange. Changes can also be made at special First-Year Writing Seminar add/drop

sessions held during the first two weeks of each semester.

The colleges and the school served by the Institute accept first-year writing seminars in fulfillment of their individual graduation requirements in categories referred to variously as "first-year writing," "oral and written expression," and the like. The Institute does not decide whether students may graduate: it makes courses available. Individual colleges and schools administer their own graduation requirements.

Currently, most undergraduate students are required to take two first-year writing seminars. Architecture majors, however, need only one. Hotel students fulfill their requirement through H ADM 165, which should be taken with H ADM 265 during the first two semesters at Cornell. Agriculture and Life Sciences students can take first-year writing seminars or choose from among a variety of other courses to fulfill their requirement.

All students who score "4" or "5" on the Princeton Advanced Placement Examination in English receive three credits. Such credits are awarded automatically; no application to the John S. Knight Institute or the Department of English is necessary. How these credits may be applied to first-year writing or other distribution requirements depends on the student's college and score. All students who score "5," except Architecture majors, may apply their three credits towards the writing requirements of their college. Of students who score "4," only Agriculture and Life Sciences students and Industrial and Labor Relations students may apply their three credits toward the writing requirements of their college. Students should always consult their college registrars to be certain that they understand their writing requirements.

Students who have already taken a first-year writing seminar, or who score "4" or "5" on the Princeton AP exam, or "700" or better on the English Composition or CEEB tests, may enroll, space permitting, in the following upper-level first-year writing seminars: ENGL 270, 271, or 272.

Although there are no exemptions from college writing requirements, some students may fulfill all or part of their college's writing requirement through transfer credits or writing-course substitutions.

For work done at other institutions to be accepted as equivalent to first-year writing seminars, students should demonstrate that they have done a reasonably equivalent amount of writing in a formal course. (It is not sufficient to write, for example, one 30-page term paper.) Students in the College of Engineering and the College of Arts and Sciences must file an "application for transfer evaluation" to request writing credit for such courses; students in other colleges should consult their college registrars.

In unusual circumstances, upper-level students may petition to use a Cornell writing course other than a first-year writing seminar to satisfy part of their writing requirement. The John S. Knight Institute must approve all such petitions in advance.

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, consult the John S. Knight Institute brochure, available from college registrars in August for the fall term and on the web in late October for the spring term.

English 288–289: Expository Writing

English 288–289, "Expository Writing," helps students write with more confidence and skill in all disciplines. Open to Cornell sophomores, juniors, and seniors, ENGL 288–289 courses explore themes shaped by a genre or use of expository writing, by the common concerns of several disciplines, or by an interdisciplinary topic intimately related to the written medium. Although English department instructors make up roughly half the staff, the Knight Institute's involvement enables the course to extend and diversify its offerings in separately defined, 16-member sections that appeal to the varied interests and needs of students in many areas of study. Students may choose among a variety of sections focusing on such themes as "Minding the Body," "The Essay: Personal to Public," "Issues, Audiences, and Ourselves," "Reading the News, Understanding the Media," and "Myths of the City." All staff are selected because their special interests and their training and experience in First-Year Writing Seminars promise original course design and superior performance.

Sophomore Writing Seminars

In the spring of 2002 the Knight Institute will launch the first set of courses in its Sophomore Seminars initiative, a distinctive new tier of electives sponsored by the Institute that will involve a wide range of disciplines across the Arts College and the University. Building on the introductory exposure to discipline-specific approaches to writing gained by students in their two required First-Year Writing Seminars, Sophomore Seminars will offer students the opportunity to benefit from early mentoring experiences in small, faculty-taught classes that will help them prepare for the more advanced, increasingly specialized work in which they will be engaged in their chosen fields as juniors and seniors. With a limited enrollment of 15 students per class, each Sophomore Seminar is intended to serve as a gateway course to a particular major within an expressly interdisciplinary context. The first five Sophomore Seminars will be offered in spring 2002. Additional seminars will be offered each year, with a total of 30 seminars annually by 2006.

Writing in the Majors

Spanning the humanities, social sciences, and sciences, the Knight Institute's upper-level, Writing in the Majors courses do not satisfy formal writing requirements, and faculty participation is entirely voluntary. While all Writing in the Majors courses include extensive writing, usually with guided revision, they also emphasize other forms of active, interactive learning essential to scholarship and careers in the disciplines. Writing in the Majors initiatives have included individual and collaborative research projects, collaborative writing, oral presentations, group oral exams, field studies, authentic student-designed laboratory experiments, debates, analytical and critical reading exercises, topical symposia, conversation groups, student-led discussions, poster sessions, and many kinds of informal writing, including on-line exchanges. Varying radically in design and size, from enrollments of fewer than 10 students to more than 300, Writing in the Majors courses over the past twelve years have involved collaboration with 100 faculty members and more than 140 graduate teaching assistants to enrich learning in 63 upper-level courses offered in 22 departments.

Teaching Writing

Each summer and fall, the Institute offers instruction in the teaching of writing to new staff members in the first-year writing seminars and other interested instructors. Teaching Writing, offered in the summer or fall, is primarily a course for graduate students. The program also sponsors a summer apprenticeship program for a limited number of graduate students, and a summer seminar for faculty members interested in the teaching of writing.

WRIT 700 Teaching Writing

Summer and fall. 1 credit. S-U grade only. Teaching Writing introduces new instructors of Cornell's First-Year Writing Seminars to the challenges of teaching writing in courses that both introduce students to particular fields of study and develop the sophisticated writing skills students will need throughout their undergraduate careers and beyond. An overview of methodologies involved in the teaching of writing within a disciplinary context is provided by readings representing a range of pedagogical theories and practices, seminar discussions, and presentations of faculty, visiting scholars in the field, and experienced TAs. Participants in the course prepare written assignments designed to prepare them for the actual work of their First-Year Writing Seminars. In addition, written critiques and explanatory rationales of those assignments provide an opportunity for reflection on the methods chosen and on the principles underlying them.

Writing Workshop

The John S. Knight Institute offers "An Introduction to Writing in the University" for first-year students (or transfer students needing writing credit) through the Writing Workshop. This course is designed for students who have had little training in composition or who have serious difficulty with writing assignments.

WRIT 137 and 138 are graded S-U only, and students receiving a grade of S are granted credit toward their college writing requirements. Students who think this course might be appropriate, including non-native speakers of English scoring less than 600 on the Test of English as a Foreign Language (TOEFL), should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The Workshop also offers a Walk-In Service (see below) to help students work on writing assignments. The director is Joe Martin, senior lecturer in the Writing Workshop. The Workshop offices are in 174 Rockefeller Hall, 255–6349.

The Walk-In Service

Through the Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Walk-In Service has tutors available during the academic year in 174 Rockefeller and north- and west-campus residential areas. The director is Mary Gilliland. For information contact the Writing Workshop, 174 Rockefeller Hall, 255–6349.

WRIT 137–138, 134 An Introduction to Writing in the University

137, fall; 138, spring; 134, summer. 3 credits each term. Each section limited to 12 students in the fall and spring, 6 students in the summer. S-U grades only. Prerequisite: permission of instructor.

This writing seminar is designed for students who need more focused attention to master the expectations of academic writing. The course emphasizes the analytic and argumentative writing and critical reading essential for university-level work. With small classes and weekly student/teacher conferences, each section is shaped to respond to the needs of students in that particular class.

WRIT 139–239 Special Topics in Writing

Fall, spring. 139, undergraduate students only; 239, graduate students only. 3 credits. S-U grades only. Cannot fulfill any writing or distribution requirements. Prerequisite: permission of instructor.

These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work. Instruction is in weekly tutorials. Interested students should come to 174 Rockefeller for more information.

Latin American Studies

190 Uris Hall

B. J. Isbell, director; M. J. Dudley, associate director; L. Benería, R. Blake, D. Block, D. Castillo, C. Castillo-Chávez, M. L. Cook, D. Cruz de Jesus, T. Davis, E. Dozier, B. Deutsch-Lynch, G. Fields, M. A. Garcés, M.C. García, W. Goldsmith, J. Haas, J.-P. Habicht, J. Henderson, Z. Iguina, S. Jackson, T. Jordan, J. Kronik, S. Kyle, D. R. Lee, L. Morató, J. Oliveira, K. O'Neill, J. E. Paz-Soldán, G. Pelto, J. Piedra, A. Power, E. Rodríguez, M. Roldan, J. Routier-Pucci, D. Sanjur, V. Santiago, H. Schamis, R. Sierra, M. Stycos, M. J. Stycos, M. Suñer, D. Thurston, T. Turner, H. Vélez.

The Latin American Studies Program encourages and coordinates faculty and student interests in Latin America. A variety of special lectures, films, and seminars supplement the regular course offerings. Graduate students may pursue a minor in Latin American Studies, while majoring in the field of their choice.

Undergraduate Concentration

Undergraduate students may fulfill a Latin American Studies Concentration by completing a minimum of 15 credits in Latin American Studies courses combined with language proficiency in Quechua, Spanish, or Portuguese. Latin American courses are offered in the College of Agriculture and Life Sciences; the College of Architecture, Art, and Planning; the College of Arts and Sciences; the College of Human Ecology; the School of Hotel Administration; and the School of Industrial and Labor Relations.

For further information and a current course listing, students should contact the program office at 255–3345, or visit 190 Uris Hall.

Latin American Studies Core Courses

It is strongly recommended that undergraduate concentrators take the interdisciplinary core course, SPANL 320/LASP 301 Perspectives on Latin America.

Particular attention is drawn to the following courses that students have taken in the past to complete requirements for the undergraduate concentration or the graduate minor. Other courses may be substituted with the approval of the adviser.

ANTHR

204	Ancient Civilizations
333	Ethnology of the Andean Region
355	Archaeology of Mexico and Central America

Latino Studies Program

434 Rockefeller Hall

The Latino Studies Program is an interdisciplinary academic program that focuses on the contributions, concerns, and welfare of those persons of Latino origin who reside in the United States. It includes support for historical, linguistic, literary, social, economic, and political studies of this diverse group of Americans. To this end the program objectives are (1) to expand the available course curriculum by providing both undergraduate and graduate courses pertaining to Latino subject matters; (2) to enlarge the size of the Latino faculty at Cornell through permanent appointments visiting scholars, and post-doctoral fellowships; and (3) to enhance the academic environment on campus through support of such activities as lectures, conferences, seminars, exhibits, and research activities.

Undergraduate Concentration

The Latino Studies Program offers an undergraduate concentration in Latino Studies which consists of an interdisciplinary course of study primarily in history, sociology, anthropology, literature and language. To complete the concentration, students must take at least five courses (minimum total of 15 credits) in Latino Studies, including "Latinos in the United States" (LSP 201/SOC 265) offered each spring semester. Students are required to include at least two courses at the 300 or 400 levels. Students who are interested in the concentration must meet with the LSP adviser, senior lecturer Loretta Carrillo, and file an application with the Latino Studies Program office by the beginning of their junior year. A maximum of one independent study, which requires the approval of the LSP adviser, will be accepted to fulfill the requirements of the concentration. The FWS does not count towards fulfilling concentration requirements.

Graduate Minor

Students wishing to complete a graduate minor in Latino Studies need to formally register with the Latino Studies Program office, take an upper level seminar (400/600) tentatively entitled "Introduction to Latino Studies: History and Methodologies," and work intensively with a faculty member outside of their major field. Over the course of their study they will be expected to take two other Latino Studies graduate or advanced undergraduate courses outside of their major field. In lieu of available courses, the student and his or her minor field adviser may design a special project that culminates in a paper given at a conference or presented for publication. Each special project requires the approval of the director of graduate studies for the minor field. In addition, graduate students will participate in the annual Latino Studies Colloquium. Upon completion of the minor, students receive a Certificate from the program. Students wishing to pursue the Graduate Minor Field in Latino Studies must file an application at the Latino Studies Program, 434 Rockefeller Hall.

Library

The Latino Studies Program Resource Center in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The Resource Center maintains print and media material pertinent to U.S. Latino issues and also provides a meeting space for more than 25 Latino student organizations.

Courses

LSP 100 Introduction to World Music: Africa and the Americas (also MUSIC 103)
Spring. 3 credits. 1 hour discussion to be arranged. S. Pond.
Exploration of folk, popular, and traditional genres of the Western Hemisphere, particularly the African diaspora. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

[LSP 110 Introduction to American Studies: New Approaches to Understanding American Diversity: The Twentieth Century (also AM ST 110 And HIST 111)
4 credits. Not offered 2001–2002. M. C. Garcia.
This course examines American national life in the twentieth century and asks questions about the changing meaning of national identity. What does it mean to be an American in the twentieth century? What does it mean to assimilate? Can on assimilate structurally and yet maintain a distinct cultural identity? In what ways do racial and ethnic perceptions structure political, economic, and cultural life? This is a team-taught interdisciplinary course in which students analyze historical, literary, and cultural evidence in exploring these and other issues.]

LSP 201 Latinos in the United States (also SOC 265 and RSOC 265)
Spring. 4 credits variable. T-R 2:55–4:10. H. Velez.
Exploration and analysis of the Hispanic experience in the United States. An examina-

tion of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

LSP 202 Spanish for English/Spanish Bilinguals (also SPANR 200)
Fall and spring. 3 credits. T R 11:40–12:55. N. Maldonado-Mendez.
A course designed to expand bilingual student's knowledge of Spanish providing them with ample opportunities to develop and improve each of the basic language skills.

[LSP 203 Comparative Migration to the Americas (also HIST 202 and AM ST 204)
4 credits. Not offered 2001–2002.
M. C. Garcia.
This seminar examines migration both within and to the Americas in the nineteenth and twentieth centuries. Topics discussed include the reasons for population movements; immigration policies; social, economic, and political accommodation; nativist and restictionist responses; and women and migration, remittances, and transnationalism. Among the immigrant-receiving nations studied are Argentina, Brazil, Canada, Cuba, Mexico, and the United States.]

LSP 219 Mexican Immigration to the United States (also HIST 219, AM ST 219, LASP 215)
Fall. 4 credits. T-R 1:25–2:40. J. Cárdenas.
This seminar course explores the historical and contemporary conditions and expressions of Mexican immigrants in the twentieth-century. We discuss issues such as: the history of the Southwest; historical ideologies and theories of immigration and national identity; socio-economic conditions; cultural displays of identity; the politics of Mexican immigration and activism; adaptation and resistance of Mexican immigrants and their children to "mainstream" culture; economic and social policies and their effects upon the Mexican immigrant communities; and trans-national identities and globalization.

LSP 220 Sociology of Health and Ethnic Minorities (also R SOC 220)
Fall. 3 credits. T-R 10:10–11:25. P. Parra.
Discusses the health status of minorities in the United States. Specifically, we explore intragroup diversity such as migration, economic status, and the influence of culture and the environment on health status and access to health care. Although special attention is given to Latino populations, discussion encompasses other minorities who face similar problems.

[LSP 221 Anthropological Representation: Ethnographies on Latino Culture (also AM ST 221, ANTHRO 221)
3 credits. Not offered 2001–2002.
V. Santiago-Irizarry.
Representation is basic to anthropology. In translating cultures, anthropologists produce authoritative representations of and about other people's lives. In this course, we examine with a critical eye, the production of representations about U.S. Latino cultures, as they are embodied in anthropological texts. Issues explored include the relation between the ethnographer and the people he or she is studying, the contexts in which ethnographic texts are produced, and the way they may position different cultural groups within the larger national context.]

[LSP 240 Survey in U.S. Latino Literature (also ENGL 240)
4 credits. Not offered 2001–2002.
M. P. Brady.]

LSP 246 Contemporary Narratives by Latina Writers (also SPANL 246, WOMNS 246)
Fall. 3 credits. T-TH 1:25–2:40. L. Carrillo.
This course offers a survey of narratives by representative Latina writers of various Latino ethnic groups in the United States including Chicana, Chilean, Cuban, Dominican, and Puerto Rican. We investigate the parallel development of a Latina perspective on personal, social and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We investigate these works as artistic attempts to deal with such issues as culture, language and bilingualism, family, gender, sexuality, and domesticity. We account for regional distinctions and contributions. Readings include works by Julia Alvarez, Gloria Anzaldúa, Elena Castedo, Ana Castillo, Denise Chávez, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Nora Glickman, Nicholasa Mohr, Cherríe Moraga, Archy Obejas, Esmeralda Santiago, Ana Lydia Vega, and Helena María Viramontes.

[LSP 260 Introduction to U.S. Latino History, Part I (also HIST 260, AM ST 259)
4 credits. Not offered 2001–2002.
M. C. Garcia.]

LSP 261 Introduction to U.S. Latino History, Part II (also HIST/AM ST 261)
Spring. 4 credits. T R 1:25–2:40.
M. C. Garcia.
This course, part II of a two-semester sequence, introduces students to the history of Latinos in the United States. In LSP/HIST/AM ST 261 we focus on Puerto Ricans, Cubans, and the Dominicans in the United States. (LSP/HIST 260; AM ST 259 focuses on Mexican Americans/Chicanos and Central Americans). Among the topics addressed are: historical immigration patterns and reasons for migration; the social and political events that shaped the evolution of these communities; the role of cultural identity, race, class, and gender in shaping experience; and the intersection of U.S. foreign policy and immigration policy.

[LSP 300 Latina Activism Feminist Theory
4 credits. Not offered 2001–2002.
This course examines the ways in which Latinas have participated as actors and subjects in various twentieth-century social and political struggles. Using different moments of participation as a point of departure, students then interrogate the feminist theories that have emerged in relation to these struggles. Through analyzing both the struggles and the attendants theories, the class maps out how "Latina" as a salient, ever-changing political, social, and cultural category is still being constructed and, thus, provides us a window onto the interplay between theory and history.]

[LSP 306 Latino Politics in the United States (also GOVT 306)
Not offered 2001–2002.]

LSP 319 Minority Politics in the United States (also GOVT 319)
Spring. 4 credits. T R 1:25–2:40.
M. Jones-Correa.
In 1965 the landscape of American politics changed dramatically with the passage of the Voting Rights Act. That same year, Congress passed the Immigration Reform Act, which though little heralded at the time, arguably has had equally profound effects. This course provides a general survey of minority politics in the United States, focusing on the effects of these two key pieces of legislation. The course highlights the relationships between immigrants and minorities, electoral politics and protest politics, and between cooperation and competition within and among minority groups. The purpose of the course is not only to pinpoint the similarities and differences in the agendas and strategies adopted by minority groups, but to indicate the interaction between "minority" politics and American politics as a whole.

LSP 366 Spanish in the United States (also LING 366 and SPANR 366)
Fall. 4 credits. Prerequisite: some knowledge of Spanish. T-R 10:10–11:25.
M. Suner.
This course provides an examination of major Spanish dialects in the United States from a linguistic perspective. Contrast is made to the standard language. Topics include borrowing, interference, and code switching. Special emphasis is on syntactic, morphological, and phonological characteristics.

LSP 377 The United States (also ANTHR/AM ST 377)
Fall. 4 credits. T R 11:40–12:55.
V. Santiago-Irizarry.
The anthropological inquiry into one's culture is never a neutral exercise. This course explores issues in the cultural construction of the United States as a "pluralistic" society. We look at the ideological context for the production of a cultural profile predicated upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality and the way these are applied in practice. The course readings include historic documents and accounts, popular writings, and recent ethnographies on the United States.

[LSP 396 U.S. Latino Prose Fiction (also SPANL 396)
4 credits. Conducted in Spanish. Not offered 2001–2002. D. Castillo.]

[LSP 400 Border Cultures
4 credits. Not offered 2001–2002.
This course centers "the border" as a physical, spatial, and cultural entity, taking as its starting point the belief that it is "not just a place on the map," as Adrienne Rich has suggested, but also "a place in history." In examining this "place," we focus on exploring the border as a site of transformative possibilities, one which opens up, complicates, and makes visible certain social tensions and intercultural exchanges. Throughout the semester we investigate several different aspects and moments of this exchange, beginning with a set of theoretical and conceptual readings that outline the themes guiding our approach to "the border." Primary emphasis is given to works that examine these issues in historical time and space.]

LSP 403 After Immigration (also S HUM 403, SPAN L 403)
Spring. 4 credits. R 2:30–4:25. D. Castillo.
Beginning with a close reading of Michael Jones-Correa's seminal study of Latinos in New York, *Between Two Nations*, we focus class discussion on recent Latin American immigration to the United States through two complementary perspectives and mediations on the immigrant experience: that of the individuals who have arrived in the U.S., and that of individuals who have chosen to remain in the countries of origin. The class studies films like *Neuwa Yol* and *Jardin de Edén*, Latin American authors like Carlos Fuentes, Ana Lydia Vega, and Ariel Dorfman, and U.S. Latinos like Julia Alvarez, Francisco Goldman, and Cristina Garcia. Students are encouraged to do individually-tailored research projects that may include autobiographical or ethnographic elements as well as literary analysis and theoretical inquiries.

[LSP 406 The Immigrant City: 1900–2000 (also S HUM 406, AM ST 406, HIST 412)
4 credits. Not offered 2001–2002.
M. C. Garcia.]

LSP 420/421 Independent Study
Fall and spring. 2–4 credits. Permission of instructor.
Guided independent study.

[LSP 462 Between Aztlan and Queens: Latina Culture in the Making of Space (also ENGL 462)
4 credits. Not offered 2001–2002.
M. P. Brady.
How do cultural practices like music and film produce space? What do freeways, zoning laws, advertising codes, and hiking trails have to do with literature? How have changing urban demographics and immigration shaped, even "Latinoized," cities, and how have these changes been reflected or restricted in Latino cultural production? How does paying attention to space change our reading practices? This interdisciplinary course examines these questions and explore how place and space shape Latina cultures and how Latina cultures shape place and space. We draw from scholarship in fields such as urban planning, law, architecture, geography, anthropology, literature, and history. Students should plan to do extensive reading, write two to three papers, and produce a substantial research paper.]

LSP 610 Political Identity: Race, Ethnicity, and Nationalism (also GOVT 610)
Fall. 4 credits. W 10:10–12:05.
M. Jones-Correa.
The social sciences generally treat ethnicity, nationalism and race as descriptive categories or variables, while avoiding actually defining these categories, or thinking about how they should be used. How should we go about describing ethnicity, nationalism, and race? Should we treat them as primordial or as social constructions? Much of the recent literature suggests the latter. If constructed, by whom are they constructed (or by what)? What constrains/structures these constructions? What purposes do these constructions serve? Whom do they serve? Are some constructions better representations of identity than others, and what does this mean? How should we go about applying these categories in political analysis?

[LSP 660 Latino Languages, Ideology, and Practice (also ANTHR 660)
4 credits. Not offered 2001–2002.
V. Santiago-Irizarry.
Cultural identity and citizenship in the United States have often been organized around linguistic difference and the issues this raises in an English-dominant society. Drawing from anthropological theories on language, this course looks at the place of language as a signifying practice in the United States by focusing on the experience of Latino communities. Topics explored include linguistic diversity and change, accomodation and resistance, language maintenance and shift, linguistic ideologies, the production of language hierarchies, and institutional applications of language.]

Law and Society

M. Fineman, co-director, 208 Myron Taylor Hall, 255–2622, fineman@law.mail.cornell.edu; Mary Katzenstein, co-director, M105 McGraw Hall, 255–8965, mfk2@cornell.edu, R. Breiger (sociology), C. Carmichael (comparative literature), D. A. Dunning (psychology), G. Hay (economics), P. Hyams (history), R. Lieberwitz (ILR), R. Miller (philosophy), M. B. Norton (history), R. Polenberg (history), D. Powers (Near Eastern studies), J. Rabkin (government), V. Santiago-Irizarry (anthropology), H. Shue (ethics and public life)

The Law and Society Program offers an interdisciplinary concentration for undergraduates who are interested in the law from the perspectives of the social sciences and the humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology. Students who wish to graduate with a concentration in law and society should consult the director of the program or one of the advisers listed above to plan a coherent program of study. Admission to the concentration has to be approved by the director of the program. Such a program should ordinarily include at least four courses from the following list. At least two of the courses should fall outside the student's major. Particular attention is drawn to GOVT 313 and PSYCH 265, which past students have often taken. Other courses may be substituted with the approval of the adviser. The Law and Society Program is an activity of the Program on Ethics and Public Life. Inquiries can be directed to: the EPL Administrative Assistant, 240 Goldwin Smith Hall, 255–8515, epl@cornell.edu.

Lesbian, Bisexual, and Gay Studies

B. Anderson, D. Bem, S. Bem, A. Berger, J. Borneman, M. P. Brady, B. Correll, J. Culler, I. DeVault, N. Furman, J. E. Gainor, I. V. Hull, M. Jacobus, K. Jones, M. Katzenstein, T. Loos, K. March, S. McConnell-Ginet, K. McCullough, T. Murray, M. B. Norton, J. Peraino, J. Piedra, R. Savin-Williams, R. Schneider, A. M. Smith, A. Villarejo, R. Weil

The field of Lesbian, Bisexual, and Gay Studies is devoted to the interdisciplinary study of the social construction of sexuality. LBG Studies is founded on the premise that the social organization of sexuality is best studied from the perspectives offered by those positions that have been excluded from established cultural norms.

In addition to offering a graduate minor, the field of LBG Studies now offers an undergraduate concentration, which is administered under the auspices of the Women's Studies Program and which consists of four courses from the list below. Although most of the courses in LBG Studies (including those on men) generally fall under the aegis of the Women's Studies Program and are hence crosslisted with it, not all of the courses in Women's Studies are sufficiently focused enough on the social construction of sexuality per se to be part of the LBG Studies concentration. In order to qualify for the concentration, courses must devote a significant portion of their time to sexuality and to questioning the cultural and historical institution of exclusive heterosexuality. Students selecting their four courses from the LBG Studies subset must identify their concentration as either LBG Studies or Women's Studies; they cannot double-count their credits and thereby use the same courses for both concentrations.

Students interested in the LBG Studies concentration should contact the Lesbian, Bisexual, and Gay Studies Office in 379 Uris Hall.

Courses

ANTHR 200 Cultural Diversity and Contemporary Issues
Fall. 3 credits. J. Borneman.
For description, see ANTHR 200.

Wetherbee (emerita: A. M. Colby-Hall)

Undergraduate Study in Medieval Studies

The "middle" in "Middle Ages" comes from its position between late antiquity and the early modern period, a conception created for European and Western conditions. Our concentration, however, is more properly inclusive and treats a time span from roughly the fifth century into the sixteenth and ranges from Western Europe and the Mediterranean to China and Japan. To discover the vibrant state of medieval studies today, one need only look at the extraordinary range of scholarly, but accessible, web sites that have sprung up all over the Internet. Cornell possesses a wealth of faculty and library resources to introduce students to every corner of the field. While this concentration provides strong interdisciplinary breadth to majors in classics, any of the modern languages, history, music, philosophy, etc., and is excellent preparation for graduate study in a medieval field, it could complement a science major as well. Many students feel bound to choose their majors with an eye to future careers and earning potential. The program provides encouragement, guidance, and an avenue for intelligent enjoyment of an important part of all our pasts.

This concentration offers something different and extra. Coursework in Medieval Studies enhances the student's enjoyment and understanding of the artistic and material relics of the Middle Ages: Gregorian chant, manuscripts and stained glass windows, Gothic cathedrals, Crusader castles, and picturesque towns cramped within ancient walls. The student will discover the serious realities involved in, and shaped by, Arthurian tales of brave knights and fair ladies, dungeons, dragons, and other marvels. Students can analyze and appreciate the horrors of the Black Death, triumphs in courtly love and pitched battle, swords and scimitars, caliphs and popes, fear of demons and djinns, and the reassuring presence of angels.

The period saw many of the foundational choices that have, for good and ill, made the world what it is today. Many of our current challenges in the fields of law, human rights, attitudes toward power, authority, gender relations, and sexual mores are derived from the ways in which society was formulated a millennium ago. The Medieval Studies Program houses a vital undergraduate association, Quodlibet, that arranges frequent lectures on medieval topics and Readings of prose and poetry in many medieval languages.

Undergraduates who wish to undertake an independent major or concentration in Medieval Studies should consult the director of the program, 259 Goldwin Smith Hall, 255–8545, medievalst@cornell.edu.

The Undergraduate Concentration in Medieval Studies shall consist of five medieval courses (at the 200 level or above) in at least two different disciplines, of which up to two may also count towards the major, and one must come from our list of approved "core courses."

Medieval Languages

Medieval texts (like all others) become most lively and informative when read in the original, and Cornell fortunately offers many courses for students interested in acquiring the relevant skills: Classical Arabic, Medieval Hebrew, Medieval Latin, Classical Chinese, Historical Sino-Japanese (Kambun) 700–1300 and Historical Sino-Japanese 1300–1600, Old English, Middle English, Gothic, Old Saxon, Old High German, Middle High German, Old Norse-Icelandic, Old Irish, Middle Welsh, Old Occitan (Provençal), Old French, Medieval Spanish, Medieval Italian, Old Russian, and Old Church Slavonic.

Some medieval languages require study of a modern language (e.g., French for Old Occitan and Old French) or a classical language (Classical Latin for Medieval Latin) as background. Students interested in a concentration in Medieval Studies should begin the study of a medieval language as early as possible, so that they may be able to study texts in the original before they graduate. Students are advised to consult the sponsoring departments for information about the prerequisites for various medieval languages.

Graduate Study

The Medieval Studies Program offers both an interdisciplinary and a literary comparative Ph.D. in Medieval Studies. Disciplinary fields of concentration offered within the Field of Medieval Studies are: Medieval Archaeology, Medieval History, Medieval History of Art, Medieval Literature, Medieval Music, Medieval Philology and Linguistics, and Medieval Philosophy. Information about the graduate program in Medieval Studies is contained in the catalog of the Graduate School, in a brochure on Medieval Studies available from the field coordinator, and at "Cornucopia," the program's web site, www.arts.cornell.edu/medieval.

Medieval Studies Courses: Graduate and Undergraduate

Courses in various aspects of Medieval Studies are offered every year in several cooperating departments, including Asian Studies, Classics, Comparative Literature, English, German Studies, History, History of Art, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian Literature, and by the Society for the Humanities. The current year's offerings are:

***ART H 230 Monuments of Medieval Art (also RELST 230)**
Spring. 4 credits. R. G. Calkins.

***ART H 332 Medieval Architecture (also ARCH 382, RELST 332)**
Fall. 4 credits. R. G. Calkins.

***ART H 337 The Medieval Illuminated Book (also RELST 337)**
Fall. 4 credits. R. G. Calkins.

***ART H 531 Problems in Medieval Art and Architecture (also RELST 531)**
Spring. 4 credits. R. G. Calkins.

CHLIT 213 Classical Chinese
Fall. 3 credits. R. McNeal.

CHLIT 307 Readings in Classical Chinese Literature
Fall. 4 credits. D. Warner.

CLASS 331 Goths, Vandals, Franks, and Romans
Fall. 4 credits. D. R. Shanzer.

CLASS 363 Intensive Medieval Latin
Summer. 4 credits. D. R. Shanzer.

CLASS 403 Independent Study—Sanskrit
Fall. Variable credit. C. Minkowski.

ENGL 274 Scottish Literature and Culture
Fall. 3 or 4 credits. H. Shaw and T. Hill.

ENGL 308 Icelandic Family Saga
Fall. 4 credits. T. Hill.

ENGL 311/611 Old English
Fall. 4 credits. R. Farrell.

ENGL 312/612 Beowulf
Spring. 4 credits. T. Hill.

ENGL 319/619 Chaucer
Fall. 4 credits. R. Farrell.

ENGL 321 Spenser and Malory
Spring. 4 credits. C. Kaske.

ENGL 417/617 Early Medieval Archaeology and Literature
Spring. 4 credits. R. Farrell.

ENGL 424/624 Spenser
Fall. 4 credits. C. Kaske.

ENGL 710 Advanced Old English
Spring. 4 credits. T. Hill.

***HIST 262 The Middle Ages: Introduction and Sampler (also RELST 265)**
Spring. 4 credits. P. Hyams.

***HIST 297/597 Japan before 1600 (also ASIAN 297/597)**
Fall. 4 credits. J. Piggott.

***HIST 310 Life, Literature and Power in Late Medieval England (also ENGL 314)**
Fall. 4 credits. P. Hyams and A. Galloway.

HIST 351 Machiavelli (also ITALL 351)
Fall. 4 credits. J. Najemy.

***HIST 360 Early Warfare, East and West**
Fall. 4 credits. C. A. Peterson.

HIST 369 The History of Florence in the Time of the Republic, 1250-1530 (also ITALL 369)
Spring. 4 credits. J. Najemy.

***HIST 447 Crusaders and Chroniclers**
Fall. 4 credits. P. Hyams.

***HIST 468 Love and Sex in the Italian Renaissance**
Spring. 4 credits. J. Najemy.

HIST 490/690 Tales of the Heike (also ASIAN 490/690)
Fall. 4 credits. J. Piggott.

***HIST 492 Undergraduate Seminar: Medieval Chinese History**
Fall. 4 credits. C. A. Peterson.

***HIST 651 Old English Literature in its Historical Context**
Spring. 4 credits. P. Hyams.

HIST 663 Graduate Seminar in Renaissance History
Fall. 4 credits. J. Najemy.

ITALL 220 Medieval Italy
Spring. 3 credits. M. Migiel.

ITALL 427 Dante's Divine Comedy (also ENGL 607)
Spring. 4 credits. W. Wetherbee.

ITALL 437/637 Italian Renaissance Epic
Fall. 4 credits. M. Migiel.

LING 217 History of the English Language (also ENGL 217)
Fall. 4 credits. W. Harbert.

LING 315–316 Old Norse
315, fall; 316, spring. 4 credits each term. E. Johannsson.

LING 441 Introduction to German Linguistics (also GERST 441)
Fall. 4 credits. W. Harbert.

LING 661 Old Church Slavonic (also RUSSA 601)
Fall. 4 credits. E. W. Browne.

LING 662 Old Russian Texts (also RUSSA 602)
Spring. 4 credits. E. W. Browne.

LING 671 Comparative Slavic Linguistics (also RUSSA 651)
Fall. 4 credits. E. W. Browne.

MUSIC 681 Seminar in Medieval Music: Medieval Music and Notation
Fall. 4 credits. J. Peraino.

***NES 255 Introduction to Islamic Civilization (also HIST 253, RELST 255)**
Fall. 3 credits. D. Powers.

NES 313 Classical Arabic Texts (also RELST 313)
Fall. 4 credits. D. Powers.

***NES 339 Islamic Spain: Culture and Society (also COM L 334, JWST 339, RELST 334, SPANL 339)**
Fall. 4 credits. R. Brann.

***PHIL 315 Medieval Philosophy**
Spring. 4 credits. S. MacDonald.

PHIL 410 Latin Philosophical Texts
Fall and spring. Variable credit. S. MacDonald.

SANSK 131 Elementary Sanskrit (also CLASS 131, LING 131)
Fall. 4 credits. C. Minkowski.

***S HUM 401 The Soul in Medieval Culture**
Fall. 4 credits. R. Ziomkowski.

***SPANL 440 Medieval Spanish Literature**
Fall. 4 credits. C. Arroyo.

Modern European Studies Concentration

Susan Tarrow, coordinator

Students from any college may choose an undergraduate concentration in Modern European Studies to complement any major in any college. The purpose of the concentration is to provide a coherent structure for students with an interest in interdisciplinary study in the field of European studies.

The concentration has three tracks: European politics, economics, and society; modern European history; and European culture. The requirements for the concentration are:

1) Competence in at least one modern European language, Romance, Germanic, or Slavic (i.e., completion of a 300-level course or equivalent with a grade of at least B-, or demonstration of an advanced level of competence in an oral proficiency interview test where available).

2) Completion of two interdisciplinary core courses:

   GOVT 341/SOC 341: Modern European Society and Politics
   Spring 2002. 4 credits. S. G. Tarrow.

   COM L 353/HIST 363: European Cultural History 1870–1945
   Spring 2002. 4 credits. M. Steinberg.

Under certain conditions, students may be permitted to substitute other courses for those listed above.

3) Completion of one course in modern (post-1789) European history.

4) Two additional courses in any of the three areas, which may include a senior seminar (400 level).

   a) Courses in European and comparative politics, anthropology, sociology, women's studies, and related courses in the School of Hotel Administration, the College of Agriculture and Life Sciences, and the School of Industrial and Labor Relations.

   b) Courses in modern European history (post-1789).

   c) Courses in (post-1789) English and European literatures, comparative literature, semiotics, fine arts, architecture, music, philosophy, film and theatre arts, and women's studies.

Only two courses may be used to satisfy requirements for both the major and the concentration. Courses satisfying the breadth and distribution requirements in the College of Arts and Sciences, however, *may* be applied to the concentration. Students interested in completing a research project under the European Summer Research Program may apply for The Wood Fellowship in their junior year. All concentrators are encouraged to participate in the Language House Program, and to spend a semester or more in a program of study in Europe. Courses taken abroad may be applied to the concentration if they are approved for Cornell credit.

Undergraduates in the College of Arts and Sciences can major in European Studies through the Independent Major or College Scholar programs.

Departmental advisers include: D. Greenwood (anthropology); C. Otto (architecture); L. Abel (College Scholars, Independent Majors); S. Christopherson (CRP); G. Fields (economics); D. Schwarz (English); A. Schwarz (German studies); J. Pontusson (government); J. Weiss (history); C. Rosen (linguistics); M. Suñer (linguistics); N. Zaslaw (music); S. Tarrow (romance studies); G. Shapiro (Russian literature); S. G. Tarrow (sociology); D. Bathrick (theatre, film, dance)

For a list of relevant courses and seminars, and any further information, contact Susan Tarrow, coordinator of the Modern European Studies Concentration, at the Institute for European Studies, 120 Uris Hall (telephone 255–7592, e-mail SRT2@cornell.edu).

Religious Studies

J. M. Law, director; B. Adams, C. M. Arroyo, P. Becker, D. Boucher, R. Brann, R. G. Calkins, C. M. Carmichael, K. Clinton, J. Fajans, D. Fredericksen, D. Gold, S. Greene, K. Haines-Eitzen, J. S. Henderson, T. D. Hill, D. Holmberg, P. R. Hyams, J. J. John, C. V. Kaske, W. J. Kennedy, S. MacDonald, D. Mankin, K. S. March, C. Minkowski, R. L. Moore, D. I. Owen, J. R. Piggott, D. S. Powers, G. Rendsburg, J. S. Rusten, P. S. Sangren, D. R. Shanzer, S. Toorawa, M. Washington

The Religious Studies Program, an academic unit providing a major in the scholarly study of religion through the College of Arts and Sciences, offers a wide variety of courses. In addition to courses addressing with various approaches to and topics in the study of religion, we have integrated curricula within our program for in-depth studies of Judaism, Christianity, the Hindu tradition, and Buddhism. We also offer an increasing number of courses on Islam.

The Religious Studies Program is designed to meet the needs of three classes of students: (1) students planning to pursue advanced degrees in the academic study of religion or allied disciplines or subdisciplines (history of religions, religion and literature, religion and psychology, ethics, theology, area studies, etc.); (2) students seeking courses on topics relating to religion to fulfill distribution requirements; and (3) those students desiring a more systematic exposure to the academic study of religion as a significant component of their liberal arts experience. To all students, our program offers an excellent opportunity to develop a deeper understanding and appreciation of the complex ways in which religious traditions, with their individual, communal, and doctrinal dimensions inform human thought and behavior. The courses offered through our program are built on the established scholarly tradition of the study of religion as an academic, as opposed to confessional, pursuit. Religious traditions are explored in all of their complexity through comparative, contextual (in specific historical or cultural contexts), and thematic studies.

The program also hosts lecture series, conferences, symposia, and periodic social gatherings for faculty and students throughout the academic year to foster a sense of intellectual community among our students and faculty.

The Major in Religious Studies

Signing into the major: To sign into the major in Religious Studies, a student must have completed at least one course in Religious Studies prior to scheduling an appointment with the program director. Here is the process:

1) Schedule an appointment with Professor Jane-Marie Law, Director of Religious Studies; please contact her by e-mail: jml16@cornell.edu.

2) In addition to a copy of your current Cornell transcript (the informal one you regularly receive is acceptable), please bring to your meeting with Professor Law all of these forms, which are available in the Religious Studies office:

   a) a completed Religious Studies Major Application Form (available in Rockefeller 182)

   b) a proposed "Course of Study," which will be used as a guide in your conversation with the director and revised for formal submission to the program upon your entrance as a major

   c) a College of Arts & Sciences Adviser/Major form which will be signed by the director and your adviser.

Advising in the Religious Studies Program: Upon entering the major in Religious Studies, a student is assigned a faculty adviser whose area of expertise most closely matches the proposed interest of the student. An up-to-date approved adviser list is available in the Religious Studies office. Please note that not all faculty who cross-list courses with RELST can serve as an RELST adviser. Working closely with one's RELST adviser when selecting courses is an important component of this program, enabling students to fulfill the requirements for the major while creating an integrated and coherent course of study out of our large number of multidisciplinary course offerings.

To graduate as a major in Religious Studies, a student must (1) complete with letter grades the program's three core courses, RELST 250, Intro to Asian Religions; RELST 251, Intro to Judaism, Christianity, and Islam, and RELST 449, History and Methods of the Academic Study of Religion. (These three core courses can not be waived); and (2) complete with letter grades seven additional courses approved for the major, at least four of them at the 300 level or above. The following specifications of this second requirement are designed to promote breadth (2a) and depth (2b) of study.

(2a) At least four of a major's seven additional courses are to be selected to ensure some familiarity with two (or more in special cases) different religious traditions or phenomena. These courses may be at the introductory or advanced levels, though depth work at the 300 level or above is advised. For example, "Introduction to Asian Religions" (RELST 250) might lead a student to take "Japanese Religions" (RELST 355), and then combine these with two courses on Judaism, "Introduction to Ancient Judaism" (RELST 244) and "Cultural History of Jews of Spain" (RELST 239).

(2b) At least two of these seven additional courses are to be selected to ensure depth of coverage in one religion or one group of closely related religious traditions or phenomena. In the first illustrative case described above, the student might combine "The Religious Traditions of India" with "Tantric Traditions" (RELST 347) or "Indian Devotional Poetry" (RELST 348) to acquire a measure of specialist strength in the religions of India. Alternatively, that student might combine "Introduction to Asian Religions" with one or more courses dealing with Buddhism, such as "Chinese Buddhism" (RELST 357) or "Tibetan Buddhism" (RELST 400), to develop an appropriate depth along a different dimension. No more than one of the courses chosen to meet requirement 2a may be used to satisfy requirement 2b. Routinely, survey courses (which in our program are offered at the 200 level) should be combined with geographically specific offerings at the 300 and 400 level to satisfy this aspect of the requirements.

To engage in the kind of focused study envisioned under 2b, a student will be expected to attain proficiency in a language other than English to gain access to relevant sources, primary or secondary. For example, a knowledge of Greek or Latin might be required for the study of Christianity (as well as Greek or Roman religions); of Hebrew or Aramaic for Judaism; of Arabic for Islam; of Sanskrit or Hindi for Hinduism; or of Sanskrit, Pali, Chinese, or Japanese for Buddhism. In certain cases, nonclassical European languages can be used to fulfill this requirement. Religious phenomena like shamanism or totemism, though less firmly rooted in literary traditions, have generated substantial bodies of important scholarship in French and German, and an undergraduate major concentrating in this area of Religious Studies should be equipped to make independent use of such material. Customarily, courses used to satisfy this foreign language proficiency requirement may not be applied to the course requirements described under 2a and 2b. Choice of language to fulfill this requirement is determined by the student in consultation with his or her adviser and is decided at the time the student enters the major.

Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences; a comprehensive up-to-date list of these courses is maintained at the office of the Religious Studies Program, 182 Rockefeller Hall.

Graduating with Honors in Religious Studies:

GENERAL INFORMATION

1. **Eligibility.** 3.0 cumulative average and 3.5 average inside the major with no grade in the major below B-. Program Director notifies eligible candidates during the spring semester of the junior year, or prior to commencement of final year.

2. **Honors Courses.** Candidates must sign into RELST 495 (Senior Honors Essay) for up to eight credits (two courses) for two semesters with variable credit. This two-semester sequence is recommended but not required. After the first term, an R in the transcript indicates that this course (usually for 8 credits) is a yearlong course. When the project is completed at the end of the second semester, the grade recorded counts for all eight credits. (The eight-credit limit is the result of the conviction/belief that earning more than eight credits for a single "piece" of your undergraduate education is unwise.)

   You submit your honors proposal (with and according to the program's instruction/cover sheet) to the Religious Studies administrator before the end of the spring term of your junior year, or not later than Sept. 15 of the final year. She/he then approves your signing into the honors courses.

3. **Honors Committee—three faculty members.** While you are required to have three faculty members on your committee at the time of the submission of the final draft, we only require that two of them be identified when you submit your proposal. In the event the adviser is on leave, the program will assign a committee member from the list of approved RELST advisers. The three members should be:

   a. The professor who has agreed to work closely with you over the year and to be the supervisor/grader of your project is chair of the committee.

   b. Your Religious Studies major adviser (not optional)

   c. Another knowledgeable faculty member

   Sometimes your adviser is the supervisor/chair. If that is the case, you need two additional knowledgeable professors for your committee of three.

Courses Approved for the Major Sponsored by Religious Studies

[RELST 123–124 Elementary Biblical Hebrew I and II (also NES 123–124, JWST 123–124)

123, fall; 124, spring. 3 credits. Enrollment limited to 17 students. Not offered 2001–2002. Staff.

For description, see NES 123–124.]

[RELST 131 Elementary Pali (also Pali 131–132)
Fall. 3 credits. Not offered 2001–2002. Staff.]

[RELST 150 Introduction to American Religion (also SOC 150)
Fall. 3 credits. Not offered 2001–2002. P. Becker.]

[RELST 197 Introduction to Near Eastern Civilization (also NES 197, JWST 197)
Fall. 3 credits. Not offered 2001–2002. D. Owen.]

[RELST 203 Religion and Family in the U.S. (also SOC 201, R SOC 202)
Fall. 3 credits. Not offered 2001–2002. P. Becker.]

RELST 220 Buddhism in America (also ASIAN 220)
Winter. 3 credits. J. M. Law.
See ASIAN 220 for description.

[RELST 223 Introduction to the Hebrew Bible I (also NES 223, JWST 223)
Fall. 3 credits. Not offered 2001–2002. G. Rendsburg.
For description, see NES 223.]

[RELST 224 Introduction to the Hebrew Bible II (also NES 224, JWST 224)
Fall. 3 credits. Not offered 2001–2002. G. Rendsburg.
For description, see NES 224.]

[RELST 227 The Bible and the Literature of the Ancient Near East (also NES 227 and RELST 227)
Spring. 3 credits. Not offered 2001–2002. J. Zorn.
See NES 227 for description.]

[RELST 229 Introduction to the New Testament (also NES 229, JWST 229)
Fall. 3 credits. Not offered 2001–2002. K. Haines-Eitzen.
For description, see NES 229.]

RELST 230 Monuments of Medieval Art (also ART H 230)
Spring. 4 credits. R. G. Calkins.
For description, see ART H 230.

[RELST 237 Greek Religion and Mystery Cults (also CLASS 237)
Spring. 3 credits. Not offered 2001–2002. K. Clinton.
For description, see CLASS 237.]

RELST 239 Cultural History of Jews of Spain (also NES 239, JWST 239, SPAN L 239)
Spring. 3 credits. Staff.
For description, see NES 239.

[RELST 244 Introduction to Ancient Judaism (also NES 244, JWST 244) @ #
Spring. 3 credits. Not offered 2001–2002. G. Rendsburg.
For description, see NES 244.]

RELST 246 Jewish Mysticism (also NES 246, JWST 246)
Fall. 3 credits. M. Segol.
See NES 246 for description.

Spring. 3 credits. J. M. Law.
For description, see ASIAN 250.

[RELST 251 Judaism, Christianity, and Islam (also JWST 251, NES 251)
Fall. 3 credits. Not offered 2001–2002. R. Brann and K. Haines-Eitzen.
For description, see NES 251.]

[RELST 253 Black Religious Traditions from Slavery to Freedom (also HIST 251, AM ST 251)
Fall. 4 credits. Not offered 2001–2002. M. Washington.]

[RELST 254 Muhammad and Mysticism in the Literatures of the Muslim World (also NES 250)
Spring. 3 credits. Not offered 2001–2002. S. Toorawa.
For description, see NES 250.]

RELST 255 Introduction to Islamic Civilization I (also NES 255, HIST 253)
Fall. 3 credits. D. Powers.
For description, see NES 255.

RELST 256 Introduction to the Q'uran (also NES 256, JWST 256)
Spring. 3 credits. S. Toorawa.
See NES 256 for description.

RELST 262 Religion and Reason (also PHIL 263)
Spring. 4 credits. S. MacDonald.
For description, see PHIL 263.

RELST 263 The Earlier Middle Ages (also HIST 263)
Fall. 4 credits. J. J. John.
For description, see HIST 263.

RELST 264 Introduction to Biblical History and Archaeology (also NES 263, JWST 263, ARKEO 263)
Spring. 3 credits. J. Zorn.
For description, see NES 263.

RELST 265 The Middle Ages: An Introduction (also HIST 262)
Spring. 4 credits. P. Hyams.

RELST 277 Meditation in Indian Culture (also ASIAN 277)
Spring. 3 credits. D. Gold.
For description, see ASIAN 277.

[RELST 290 Buddhism: A Survey (also ASIAN 299)
Fall. 4 credits. Not offered 2001–2002. D. Boucher.
For description, see ASIAN 299.]

[RELST 295 Introduction to Christian History (also NES 295, JWST 295, HIST 299)
Spring. 3 credits. Not offered 2001–2002. K. Haines-Eitzen.
For description, see NES 295.]

[RELST 299 The Hebrew Bible and the Arabic Qur'an in Comparative Perspective (also NES 299, COM L 299, JWST 299)
Spring. 3 credits. Not offered 2001–2002. R. Brann.
For description, see NES 299.]

RELST 306 Zen Buddhism (also ASIAN 306)
Spring. 4 credits. J. M. Law.
See ASIAN 306 for description.

RELST 313 Classical Arabic Texts (also NES 313)
Fall. 4 credits. D. Powers.
For description, see NES 313.

[RELST 315 Medieval Philosophy (also PHIL 315)
Spring. 4 credits. Not offered 2001–2002. S. MacDonald.
For description, see PHIL 315.]

[RELST 318 Introduction to the Hebrew Bible—Seminar
Fall. 1 credit. Not offered 2001–2002. G. Rendsburg.
For description, see NES 325.]

RELST 319 Spenser and Malory (also ENGL 321)
Spring. 4 credits. C. Kaske.
For description, see ENGL 321.

RELST 320 Myth, Ritual, and Symbol (also ANTHR 320)
Spring. 3 or 4 credits. D. Holmberg.
For description, see ANTHR 320.

RELST 321 Heresy and Orthodoxy in Early Christianity (also NES 321)
Spring. 4 credits. K. Haines-Eitzen.
For description, see NES 321.

[RELST 322 Magic, Myth, Science, and Religion (also ANTHR 322)
Fall. 4 credits. Not offered 2001–2002.]

[RELST 323 Reinventing Biblical Narrative Apocrypha and Pseudepigrapha (JWST 323, NES 323)
Spring. 4 credits. Not offered 2001–2002. K. Haines-Eitzen.
For description, see NES 323.]

RELST 326 Christianity and Judaism (also COM L 326)
Spring. 4 credits. C. M. Carmichael.
For description, see COM L 326.

RELST 328 Literature of the Old Testament (also COM L 328)
Fall. 4 credits. C. Carmichael.
For description, see COM L 328.

[RELST 329 Introduction to the New Testament Seminar (also NES 329, JWST 329)
Fall. 1 credit. Prerequisite: concurrent enrollment in RELST 229 and one year of ancient Greek. Not offered 2001–2002. K. Haines-Eitzen.
For description, see NES 329.]

[RELST 330 Gnosticism and Early Christianity (also NES 328, JWST 328)
Spring. 4 credits. Not offered 2001–2002. K. Haines-Eitzen.
For description, see NES 328.]

RELST 332 Medieval Architecture (also ART H 332, ARCH 382)
Fall. 4 credits. R. G. Calkins.

RELST 333 Greek and Roman Mystery Cults and Early Christianity (also CLASS 333)
Fall. 4 credits. K. Clinton.

RELST 334 Islamic Spain: Culture and Society (also NES 339/639, JWST 339, COM L 334, SPAN L 339/639)
Fall. 4 credits. R. Brann.
For description, see NES 339.

[RELST 336 Prelude to the Italian Renaissance (also ART H 336)
Fall. 4 credits. Not offered 2001–2002. R. G. Calkins.
For description, see ART H 336.]

RELST 337 The Medieval Illuminated Book (also ART H 337)
Fall. 4 credits. R. G. Calkins.

[RELST 339 Power, Piety, and Medieval Art (also ART H 330)
Fall. 4 credits. Not offered 2001–2002. L. Jones.
For description, see ART H 330.]

[RELST 340 Byzantine Theocracy: Fourth to Eighth Century (also CLASS 335)
Fall. 3 credits. Not offered 2001–2002. S. Wessel.
For description, see CLASS 335.]

[RELST 345 Intellectual and Cultural Life of Nineteenth Century Americans (also HIST 345, AM ST 345)
Spring. 4 credits. Not offered 2001–2002. R. L. Moore.
For description, see HIST 345.]

[RELST 347 Tantric Traditions (also ASIAN 347)
Fall. 4 credits. Not offered 2001–2002. D. Gold.
For description, see ASIAN 347.]

[RELST 348 Indian Devotional Poetry (also ASIAN 348)
Fall. 4 credits. Not offered 2001–2002. D. Gold.
For description, see ASIAN 348.]

[RELST 350 Law, Society, and Culture (also NES 351/651, HIST 372/652)
Fall. 4 credits. Not offered 2001–2002. D. Powers.]

RELST 351 The Religious Traditions of India (also ASIAN 351)
Fall. 4 credits. D. Gold.

[RELST 354 Indian Buddhism (also ASIAN 354)
Fall. 4 credits. Not offered 2001–2002. C. Minkowski.]

[RELST 355 Japanese Religions: A Study of Practice (also ASIAN 355)
Fall. 4 credits. Not offered 2001–2002. J. M. Law.]

RELST 356 Islamic Law and Society (also NES 357)
Spring. 4 credits. D. Powers.
For description, see NES 357.

[RELST 359 Japanese Buddhism (also ASIAN 359)
Spring. 4 credits. Not offered 2001–2002. J. M. Law.]

[RELST 362 The Culture of the Renaissance II (also COM L 362, ENGL 325, HIST 364, ART H 351, MUSIC 390)
Fall. 4 credits. Not offered 2001–2002. W. J. Kennedy.
For description, see COM L 362.]

[RELST 366 Medieval Culture, 1100–1300 (also HIST 366)
Fall. 4 credits. Not offered 2001–2002. J. J. John.
For description, see HIST 366.]

[RELST 368 Marriage and Sexuality in Medieval Europe (also HIST 368, WOMNS 368)
Spring. 4 credits. Not offered 2001–2002. P. Hyams.
For description, see HIST 368.]

[RELST 371 A Mediterranean Society and Its Culture: The Jews under Classical Islam (also COM L 371, NES 371, JWST 371)
Spring. 4 credits. Not offered 2001–2002. R. Brann.
For description, see NES 371.]

RELST 381 Anthropology and Religion (also ANTHR 381)
Spring. 4 credits. A. Willford.
See ANTHR 381 for description.

[RELST 393 Religion and Politics in the Middle East (also NES 393)
Fall. 4 credits. Not offered 2001–2002.]

RELST 394 Gender, Sexuality, and the Body in Early Christianity (also NES 394, WOMNS 394)
Spring. 3 credits. K. Haines-Eitzen.

[RELST 395 Classical Indian Philosophical Systems (also ASIAN 395, CLASS 395)
Fall. 4 credits. Not offered 2001–2002. C. Minkowski.]

[RELST 400 Tibetan Buddhism (also ASIAN 400)
Fall. 4 credits. Enrollment limited to 20 students and instructor consent. Not offered 2001–2002. J. M. Law.
For description, see ASIAN 400.]

RELST 401 The Soul in Medieval Culture (also S HUM 401, HIST 404)
Fall. 4 credits. R. Ziomkowski.
For description, see S HUM 401.

[RELST 407 Religion and Human Rights (also ASIAN 407)
Spring and summer. 4 credits. Not offered 2001–2002. J. M. Law.
For description, see ASIAN 407.]

RELST 409 Seasons of Migration (also JWST 409, NES 409, S HUM 409)
Fall. 4 credits. S. Toorawa.
See S HUM 409 for description.

RELST 410 Latin Philosophical Texts (also PHIL 410)
Fall and spring. Variable credit. Prerequisite: knowledge of Latin and permission of instructor. S. MacDonald.
For description, see PHIL 410.

RELST 420 Readings in the Hebrew Bible (also NES 420, JWST 420)
Fall. 4 credits. R. Brann.
For description, see NES 420.

[RELST 421 Readings in Biblical Hebrew Poetry (also NES 421, JWST 421)
Fall. 4 credits. Prerequisite: one year of Biblical or Modern Hebrew. Not offered 2001–2002. G. Rendsburg.
For description, see NES 421.]

RELST 427 Biblical Seminar (also COM L 428)
Fall. 4 credits. C. Carmichael.
For description, see COM L 428.

RELST 429 Adam's Rib and other Divine Signs: Reading Biblical Narrative (also ENGL 429)
Spring. 4 credits. L. Donaldson.
See ENGL 429 for description.

[RELST 442 Religion and Politics in American History (also HIST 442)
Fall. 4 credits. Not offered 2001–2002. R. L. Moore.]

[RELST 443 Religion and Ritual in Chinese Society and Culture (also ANTHR 443)
Fall. 4 credits. Not offered 2001–2002. S. Sangren.]

RELST 449 History and Methods of the Academic Study of Religion (also ASIAN 449)
Spring. 4 credits. Required of Religious Studies majors. D. Gold.
For description, see ASIAN 449.

RELST 460 Indian Meditation Texts (also ASIAN 460)
Fall. 4 credits. D. Gold.
For description, see ASIAN 460.

RELST 490–491 Directed Study
490, fall; 491, spring. 2–4 credits each term. For majors in Religious Studies; permission of director required. Staff.

RELST 495 Senior Honors Essay
Fall and spring. Variable up to 8 credits. Required for honors in Religious Studies. Staff.

RELST 531 Problems in Medieval Art and Architecture (also ART H 531)
Spring. 4 credits. R. G. Calkins.
For description, see ART H 531.

Additional courses offered by cooperating departments may also be approved through petition for the major in Religious Studies. For details see the program director, Jane Marie Law, 125 Rockefeller Hall or e-mail her at jml16@cornell.edu.

Science of Earth Systems

The full faculty of the Department of Earth and Atmospheric Sciences (see page 448) plus the following: W. Brutsaert (civil and environmental engineering); P. Gierasch (astronomy); M. Kelley (electrical engineering); J.-Y. Parlange (agricultural and biological engineering); J. Yavitt (natural resources).

The Science of Earth Systems (SES) is the study of the interactions among the atmosphere, oceans, biosphere, and solid Earth; these dynamic interactions control the global environment. The interdisciplinary, basic science approach of SES incorporates major components of geology, ocean and atmospheric sciences, terrestrial hydrology, biogeochemistry, and ecology into an integrated study of Earth as a complex system. Earth system science presents one of the outstanding intellectual challenges in modern science and is the primary foundation for the future management of our home planet.

The Major

The major in Science of Earth Systems emphasizes a rigorous, objective study of the Earth and its systems with broad preparation in basic sciences and mathematics, followed by the choice of an area of concentration for study in greater depth. The Science of Earth Systems program seeks to train students in a strong set of fundamental skills that will allow them to approach with quantitative rigor a wide range of questions about the Earth and its environment, and to adapt those skills rapidly to new areas of inquiry as they arise. The major in Science of Earth Systems is by nature interdisciplinary, and involves faculty from the College of Arts and Sciences, the College of Engineering, and the College of Agriculture and Life Sciences. In the College

of Arts and Sciences the program is administered by the Department of Earth and Atmospheric Sciences in collaboration with the Departments of Astronomy, and Ecology and Evolutionary Biology.

The SES curriculum begins with a series of courses designed to provide preparation in fundamental science and mathematics necessary for a rigorous study of Earth Systems. This preparation is followed by three SES core courses providing breadth and integration. An additional set of four intermediate to advanced courses is selected to provide depth and a degree of specialization.

Students in the College of Arts and Sciences choosing to pursue the Science of Earth Systems major are required to take the following courses: PHYS 207–208 (or 112–213), CHEM 207–208, BIOSCI 101/103–102/104 (or 109–110), and MATH 111–112 (or 121–122, or 190/191–192). Three additional 3–4 credit hour courses in mathematics, physics, chemistry, or biology are required; these additional courses must require one or more of the basic courses listed above as a prerequisite. One of the courses must be either EAS 201 or BIOES 261. Both EAS 201 and BIOES 261 can be chosen. Mathematics at the level of MATH 221 or 293 is strongly recommended for all SES students, and those choosing areas of concentration in Atmospheric Sciences, Environmental Geophysics, or Hydrology should take MATH 222 or 294.

The three required SES core courses include the following:

EAS 331/ASTRO 331 Climate Dynamics

EAS 302 Evolution of the Earth System

EAS 321/NTRES 321 Introduction to Biogeochemistry

Four additional 3–4 credit classes selected from 300- and 400-level courses, approved for an SES concentration, are required. These courses will ordinarily be organized around one of the SES areas of specialization. Areas of specialization include, but are not limited to, the following: Climate Dynamics, Ocean Science, Environmental Geology, Environmental Biophysics, Biogeochemistry, Soil Science, Ecological Systems, Hydrological Science.

Further information and applications contact Kerry H. Cook, khc6@cornell.edu. Also see the SES web site at **www.eas.cornell.edu** for up-to-date information. Administrative offices are located at 2122 Snee Hall.

Society for the Humanities

Dominick LaCapra. Director

Fellows for 2001–2002

Avtar Brah (University of London)

Ross Brann (Cornell University)

Debra Castillo (Cornell University)

Vitaly Chernetsky (Columbia University)

Elizabeth Deloughrey (Cornell University)

Francois Jullien (Université Paris 7)

Michael Kammen (Cornell University)

Tracy McNulty (Cornell University)

Viranjini Munasinghe (Cornell University)

John Noyes (University of Cape Town)

Zita Nunes (University of Maryland)

Julia Offen (Calgary Institute for the Humanities)

Gary Peatling (University of Wales, Aberystwyth)

Sandhya Shukla (Columbia University)

Michael Steinberg (Cornell University)

Shawkat Toorawa (Cornell University)

Robert Ziomkowski (Pontifical Institute of Mediaeval Studies)

The Society annually awards fellowships for research in the humanities. The Fellows offer, in line with their research, informal seminars intended to be exploratory or interdisciplinary. These seminars are open to graduate students, suitably qualified undergraduates, and interested auditors. Students who want credit for a seminar should formally register in their own college. Persons other than those officially enrolled may attend as visitors with permission of the Fellow. The theme for 2001–2002 is "Diaspora and the Critical Imagination".

S HUM 401 The Soul in Medieval Culture (also HIST 404 and RELST 401)
Fall. 4 credits. Limited to 15 students. R 12:20–2:15. R. Ziomkowski.
This course studies the medieval reception of mythological themes in Plato's philosophy, particularly the world-soul and the transmigration of souls, as these appear in the *Timaeus* (the only dialogue of Plato known in the Latin West throughout the Middle Ages). In focusing on the nature of the soul, we study the tension between theology and philosophy concerning a doctrine of central importance to medieval Christian culture, as well as one that the ancient world had developed to a high degree of sophistication. We look at texts written during the first thirteen centuries of the Christian era, with particular emphasis on the twelfth century. The course is conducted as intellectual history, inasmuch as we study the reception of Plato's *Timaeus* across time and across a range of literary genres (dialogues, theological treatises, cosmological compendia, poetry), with particular attention to works of Menippean satire such as Boethius' *Consolation of Philosophy*, Bernardus Silvestris' *Cosmographia*, and Alan of Lille's *Plaint of Nature*. Theoretical perspectives are drawn from works of literary criticism, particularly from Mikhail Bakhtin's theories of Menippean satire. All texts are read in translation, although the ability to read Latin may broaden one's research options.

S HUM 402 Democracy and the City (also ASIAN 428)
Fall. 4 credits. Limited to 15 students. M 2:30–4:25. F. Jullien.
Approaching the subject as a philosopher and a sinologist, we deal primarily with Greece and Ancient China. In adopting this dual approach, the seminar illustrates the difference between their ways of thinking and leads to an examination of what constitutes the essence of the city in the West and of the strong link between the city, the form of democracy, and the ideal of liberty. It concludes with a consideration of the contemporary obliteration of the city-as instanced in today's East Asian megalopolises-and, in light of this, poses the question of the future of democracy itself.

S HUM 403 After Immigration (also LSP 403 and SPANL 403)
Spring. 4 credits. Limited to 15 students. R 2:30–4:25. D. Castillo.
Beginning with a close reading of Michael Jones-Correa's seminal study of Latinos in New York, *Between Two Nations*, we focus class discussion on recent Latin American immigration to the United States through two complementary perspectives and meditations on the immigrant experience: that of the individuals who have arrived in the US, and that of individuals who have chosen to remain in the countries of origin. The class studies films like *Nueva Yol* and *Jardin de Edén*, Latin American authors like Carlos Fuentes, Ana Lydia Vega, and Ariel Dorfman, and US Latinos like Julia Alvarez, Francisco Goldman, and Cristina Garcia. Students are encouraged to do individually-tailored research projects that may include autobiographical or ethnographic elements as well as literary analysis and theoretical inquiries.

S HUM 404 Displacement, Desire, Identity (also RUSSL 403)
Fall. 4 credits. Limited to 15 students. T 12:20–2:15. V. Chernetsky.
This seminar focuses on the ways in which authors whose backgrounds tie them to a part of the world that served as a source of several major waves of diasporic displacement over the past century—East Central Europe and the former Russian/Soviet empire—reflected on displacement and the diasporic experience. In particular we focus on their impact on the construction and performance of identities and on manifestations of desire. We explore these experiences from the mass emigration from the Russian and Austro-Hungarian empires in the years preceding their collapse and the concomitant revolutions and civil wars, to the continuous waves of refugees and displaced persons as a result of the revolutions, civil wars, the two world wars, and most recently the collapse of the "communist" regimes and the implosion of Yugoslavia. We consider how these experiences impacted the construction and performance of such aspects of identity as nationhood, age, gender, and sexuality. Readings include selections from the fiction, diaries, essays, and poetry by Joseph Conrad, Vladimir Nabokov, Witold Gombrowicz, Yuri Andrukhovych, Dubravka Ugresic, and others. The seminar endeavors to bring this discourse into a dialogic contact with its counterparts in contemporary postcolonial studies and feminist scholarship.

S HUM 405 The Four Seasons Motif in American Culture (also HIST 455 and AM ST 430.2)
Fall. 4 credits. Limited to 15 students. Permission of instructor. M 2:30–4:25. M. Kammen.
The focus of this seminar is one of the most ubiquitous and pervasive motifs in all of the arts (painting, literature, and music) in the Northern Hemisphere, both West and East: The Four Seasons. We view works of art and films, read fiction, non-fiction, and poetry, and listen to music. Although we must devote serious attentions to the Old World origins, dispersion, and local permutations of this motif, more than half of the seminar is given over to American manifestations and writings about the seasons, with particular attention to changes over time as well as geographical variations.

S HUM 406 Biblical Diasporas in France (also COM L 488 and FRLIT 406)
Fall. 4 credits. Limited to 15 students. F 12:20–2:15. T. McNulty.
This course examines the use of the concept of "diaspora" in contemporary French thought, considering how such notions as deterritorialization, homelessness, the uncanny, and the "ungrounding" of identity. We focus our attention on a group of authors whose uses and adaptations of the concept of "diaspora" are heavily indebted to theologies such as Judaism and mysticism. Can we locate in modern philosophy the "diaspora" of a certain kind of theological thought? What is its relationship to the philosophical discourse in which it takes up residence? The first part of the course considers the problems of estrangement, nomadism, and diaspora in the Bible, examining how the Hebrew patriarchs, Jewish prophets, and Christian apostles use these themes to define their position with regard to God and their different attitudes toward the law, the word, and the book. We then explore how these themes are developed in works by Blanchot, Buber, Deleuze, Derrida, Lévinas, Lyotard, Scholem and Rosenzweig. Students may read all works in the original languages or in translation.

S HUM 408 Jewish Culture and Modernity (also HIST 405, JWST 408, GERST 420)
Fall. 4 credits. Limited to 15 students. M 2:30–4:25. M. Steinberg.
With an emphasis on Germany but with materials drawn also from England, France, and the United States, this seminar analyzes the intersections and mutual production of modern Jewish culture and general structures and discourses of modernity. It takes up the category of "Jewish culture" as distinct from "Judaism," as the focus is less on a religious tradition than on a cultural and historical identification whose sacred/secular boundaries are fluid and contestable. Thus, the boundaries between the sacred and the secular become a central debate both within Jewish culture and its multiple, mutual refractions with the non-Jewish world, which may itself be constituted in terms of modern nationalities, as Christian, secular, or anti-Semitic.

S HUM 409 Seasons of Migration (also NES 409, RELST 409, and COM L 499)
Fall. 4 credits. Limited to 15 students. R 2:30–4:25. S. Toorawa.
Muslim Literature and Film of the Diasporic Imagination. How and where does—indeed, can—one write the story of a diaspora of the Muslim creative and critical imagination? How do contemporary diasporic Muslim writers and filmmakers operate with(in) memory, with the impossible longing to belong, with the loss of 'home' (when 'home' is where they already are…?) Guided by the critical work of Ahmed, Erickson, Hawley, Rushdie, and Subramani, we read the works of Sohaila Abdulali, Zulfikar Ghose, Abdulrazak Gurnah, Aamer Hussein, Farida Karodia, Adib Khan, Waqas Ahmad Khwaja, Hanif Kureishi, Yasmin Ladha, and others; and watch *Bhaji on the Beach*, *Masala*, *My Beautiful Launderette*, *Surviving Sabu*, and other films made in Britain and North America. We critique, evaluate, and enjoy these works through the lens of the diasporic condition, by paying special attention to the effects of displacement and its impact on articulations of faith, history, identity, memory, mythologies, nation(alism), subjugation, the postmodern, and the (post)postcolonial. We try to understand how the 'expatriate' Muslim writes herself, her world, and her condition.

S HUM 410 The Transoceanic Imagination (also ENGL 401/601)
Fall. 4 credits. Limited to 15 students. T 2:30–4:25. E. Deloughrey.
This course focuses on diasporan literatures of "crossing the water" and examines the historical, political and social factors that shape the inscriptions of these journeys. Since the etymological root of "diaspora" derives from the scattering of male "seed," we examine the gendering of dispersal narratives of Atlantic and Pacific travellers including seamen, pirates, missionaries, slaves and sailors in order to interrogate the relationship of primarily male shipboard communities to nationalism, gender, sexuality, diaspora and resistance. We pay particular attention to the material and gendered divisions between public and private both on the ship and in relation to its various ports. We cover diverse travel itineraries in our efforts to understand the relationship between travellers and place and to examine the consequences of destabilizing territorial, ethnic, and national identities. Readings may include works by Mary Seacole, Édouard Glissant, Antonio Benítez-Rojo, J. S. Kanwal, Albert Wendt, and Derek Walcott.

S HUM 411 Performing Community
Fall. 4 credits. Limited to 15 students. W 2:30–4:25. J. Offen.
This seminar explores imaginations, performances, and experiences of "community" in the European/American Circus world and other cultural performances. We examine collective identities (gender, ethnicity, race, nationality, class, sexuality, community, and others) and inequalities as they are expressed and negotiated through public culture and discourse. We consider critical social theories, representations in popular culture, and ethnographic explorations. Requirements include active participation, critical short essays, and a final creative project.

S HUM 415 Creolization, Syncretism, Hybridity (also ANTHR 415)
Spring. 4 credits. Limited to 15 students. T 10:10–12:05. V. Munasinghe.
The concepts Creolization, Hybridity, and Syncretism all convey a state of 'mixture.' This course explores theories and empirical case studies of processes of racial, cultural and religious mixture from an inter-disciplinary perspective. The course explores the interconnections among concepts denoting 'mixture' that have diverse originary points. The overarching line of inquiry is to explore the genealogies of the three concepts as a necessary precursor to understanding how these terminologies may, in concert, illuminate different aspects of the dynamic structuring processes of mixture in different historical and ethnographic settings. More specifically this course asks how ideologies of mixture articulate with nationalist and ethnic ideologies. Do sites of mixture afford possibilities for alternative nationalist imaginings that undermine the homogenizing logic of nation-building? Do ideologies of mixture necessarily deny the existence of essentialisms, and if so what are the political implications for peoples embodying 'mixture' in this historical moment when identity politics in multi-cultural nation states presume essentialist identities? Why are some diasporic groups represented as suitable for mixture but not others? And what are the socio/political/economic consequences of such representations? These are some of the questions this course addresses through an examination of not only specific empirical case studies but also interdisciplinary theorizations of the three concepts. The aim of this course is to critically engage various theorizations of 'mixture' both in relation to one another and in relation to specific empirical situations in order to conceptualize processes of mixture that build on but also go beyond the insights generated by these three concepts.

S HUM 418 Racial Democracy in the Americas (also ENGL 418/613 and COM L 432)
Spring. 4 credits. Limited to 15 students. T 12:20–2:15. Z. Nunes.
This course addresses democracy and its capacity for representing various racial positions in the Americas. We discuss national and transnational identities defined according to concepts of mixture and to a politics of democracy and inclusion including: anthropophagism, mestizaje, créolité, transculturation, multiculturalism and hybridity. Readings are drawn from literary and theoretical texts.

S HUM 419 Modern Nomads (also GERST 419)
Spring. 4 credits. Limited to 15 students. T 12:20–2:15. J. Noyes.
Nomadism has always been an issue that reminded sedentary cultures of their opposite, their outside, their failure to control the world in its entirity. And yet, sedentary and nomadic cultures have always enjoyed an ambivalent relationship, and this in turn marks the fictions of modernity in decisive ways. This is particularly evident in German culture, where issues of imperialism and territoriality were constantly displaced from the political to the cultural arena. Fictional and critical texts play a key role in this process, since they stake out the imaginary dimensions of subjectivity in relation to culture and territory. In this seminar we will examine how, in the wake of Enlightenment, German cultures of modernity attempted to negotiate the ambivalence of nomadic mobility. We analyse key fictional and critical texts chosen from moments in German history when mobility and territoriality were particularly important in the public imagination.

S HUM 420 Cross-culturality in the Caribbean (also ANTHR 410)
Spring. 4 credits. Limited to 15 students. W 2:30–4:25. S. Shukla.
This seminar takes as its inspiration the literary and sociopolitical imaginary of Guyanese writer Wilson Harris, described as "cross-culturality." Here, the model of diversity being elaborated is rather different from the multiculturalism we are familiar with, in the United States (or Britain or Canada, for that matter), where cultures are seen to function as discrete parts of the whole. Cross-culturality presumes that individual ethnic or racial cultures are partial and reinvent themselves through dialogues with other cultures. Perhaps this broad and flexible conception can only emerge from the Caribbean, a hyper-theorized space of hybridity. But is this because the constitutive ideas, of race, nation, and migration, are different in West Indian countries from those that operate in the North American context? Can they be traced historically, in relation to political develop-

ments, of colonialism, postcolonialism and regionalism? And what happens to these concepts when they move across the border of the nation-state?

S HUM 421 Contexts of Irish Diaspora
Spring. 4 credits. Limited to 15 students. T 10:10–12:05. G. Peatling.
The aim of this seminar is to encourage examination of the uses of the concept of "diaspora" through a critical contextualisation. This is attempted principally in relation to Irish diaspora communities in the United Kingdom and the United States, but comparative perspectives and observations are encouraged.

S HUM 423 Culture, Identity, and Diaspora
Spring. 4 credits. Limited to 15 students. R 12:20–2:15. A. Brah.
This seminar explores theoretical and substantive issues raised by the debates surrounding identity, difference, and diaspora. It examines the use of these concepts in the work on 'intersectionality' of racism, class, ethnicity, gender, and sexuality. The course draws upon material from Britain, continental Europe, and North America, with a significant focus on feminist work. We address questions of difference, diversity and differentiation; identification and subjectivity; and, those of solidarity and social transformation. How do questions of 'national' belonging differ in Europe as compared with settler societies such as that of the United States? What effects has 'differential racialisation' of groups such as African, South Asian, Irish, and Jewish descent groups in Britain and the United States had on questions of identity, inequity and inequality? What impact have diasporas made on transforming our sense of 'local' and 'global' relations?

S HUM 459 Opera, History, Politics, Gender (also WOMNS 454, COM L 459, HIST 460, MUSIC 474, ITALL 456)
Spring. 4 credits. M. Steinberg and S. Stewart.
See HIST 460 for full course description.

South Asia Program

C. Minkowski, director; A. Basu, K. Basu, D. Bor, D. Boucher, L. Derry, M. Farooqi, S. Feldman, D. Gold, M. Hatch, D. Henderson, R. Herring, D. Holmberg, R. Kanbur, M. Katzenstein, V. Kayastha, K. A. R. Kennedy, S. Kuruvilla, M. Latham, B. Lust, B. MacDougall, M. Majumdar, K. March, K. McGowan, S. Mohanty, V. Munasinghe, A. Nussbaum, S. Oja, P. Olpadwala, B. Perlus, T. Poleman, C. Salomon, N. Sethi, D. Sisler, S. Subramanian, J. Toorawa, N. Uphoff, M. Walter, M. Weiss, A. Wilford.

The South Asia Program coordinates research, teaching, and special campus events relating to Bangladesh, India, Pakistan, Nepal, and Sri Lanka. The program faculty include members from a variety of disciplines, including agricultural economics, agricultural engineering, anthropology, architecture, art, city and regional planning, comparative religion, ecology and systematics, economics, English, geology, government, history, history of art, human ecology, industrial and labor relations, international agriculture, linguistics, literature, and rural sociology. Undergraduates with a special interest in the region may major in Asian Studies with a South Asia concentration, or complete a South Asia concentration with any other major. Graduate students may pursue the M.A. degree in Asian Studies with a concentration in South Asia.

Languages offered are Bengali, Hindi, Nepali, Sinhala, and Sanskrit. Foreign Language and Area Studies scholarships are available to graduate students who are U.S. citizens or permanent residents. Cornell is a member of the American Institutes of Bangladesh, Indian, Pakistan, and Sri Lankan studies. For details on the major, see the Department of Asian Studies listing in this volume. For courses available in South Asian studies, or for further information on research opportunities, direct questions to the South Asia Program Office, 170 Uris Hall.

Southeast Asia Program

T. Chaloemtiarana, director; B. R. Anderson, I. Axis, W. B. Bailey, A. C. Cohn, P. Gellert, M. F. Hatch, S. Kuruvilla, T. Loos, K. M. McGowan, A. Riedy, J. T. Siegel, E. Tagliacozzo, K. W. Taylor, L. Williams, J. U. Wolff, D. K. Wyatt, Emeritus: R. Baker, R. B. Jones, G. McT. Kahin, S. J. O'Connor, Lecturers: N. Jagacinski, T. Tranviet, S. Tun

Southeast Asia studies at Cornell is included within the framework of the Department of Asian Studies. Seventeen core faculty members in the colleges of Arts and Sciences, Business and the Johnson Graduate School of Management, the School of Industrial and Labor Relations, and Agriculture and Life Sciences participate in an interdisciplinary program of teaching and research on the history, culture, and societies of the region stretching from Burma through the Philippines. Courses are offered in such fields as anthropology, Asian studies, economics, finance, government, history, history of art, labor relations, linguistics, music, and rural sociology. Instruction is also offered in a wide variety of Southeast Asian languages; Burmese, Cambodian (Khmer), Cebuano (Bisayan), Indonesian, Javanese, Tagalog, Thai, and Vietnamese, for which Foreign Language Area Studies Fellowships are available to U.S. citizens. In addition, faculty from other disciplines also provide area instruction on Southeast Asia. The formal program of study is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar, art exhibits at the Johnson Museum, and concerts of the Gamelan Ensemble. The George McT. Kahin Center for Advanced Research on Southeast Asia is also the site for public lectures as well as publication and outreach activities related to this area. The John M. Echols Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on this region in America.

Undergraduates may major in Asian studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asia studies with any other major by completing 18 credits of course work. Graduate students may work toward an M.A. degree in Southeast Asian studies or pursue a Master of Professional Studies in another school with a concentration in Southeast Asian studies. Ph.D. students specializing in Southeast Asia receive a doctorate in a discipline such as history, history of art, anthropology, government, music, economics, or city and regional planning.

For courses available in Southeast Asian studies and details on the major, see the Department of Asian Studies listing in this volume. Additional information is available on the Internet at: www.einaudi.cornell.edu/southeastasia. Inquiries for further information should be directed to the program office, 180 Uris Hall, (607) 255-2378 or SEAP@cornell.edu.

Statistical Science Department

The university-wide Department of Statistical Science coordinates undergraduate and graduate study in statistics and probability. A list of suitable courses can be found in the section, "Interdisciplinary Centers, Programs, and Studies," in the front of this catalog.

Visual Studies Concentration

Visual Studies is a concentration that provides students with an interdisciplinary approach to visual art, media (including digital works), performance, and perception. Faculty from departments throughout the college offer courses toward the concentration, drawing on such various disciplines as the history of art, film, literary studies, psychology, theatre, and others. Requirements for the concentration include selection of one from two possible core courses (the two core courses may be offered in tandem or on an alternating basis depending on the availability of staff), which introduce students to critical thinking about visual studies as well as close textual analysis in social and historical contexts. Responsibility for teaching the core course will rotate among faculty affiliated with the concentration, and the course will, as much as possible, entail interdepartmental collaboration in the form of team-teaching or visiting lectures. In addition to the core course, students must choose four Cornell courses from among the different categories of courses offered in the concentration. One of the four courses must include a significant component of practical work (such courses are listed under the category "Theory/Practice"). No more than two courses from the concentration may be double- counted toward a student's major. All courses must be taken for a letter grade.

Students interested in pursuing the concentration should discuss it with their advisers, and then contact the director of the concentration. The director will register students in the concentration and assign each student an adviser selected from among the concentration's affiliated faculty. Advisers should forward a copy of each advisee's transcript to the director, indicating courses completed for the concentration.

Director and Affiliated Faculty

Director, Brett de Bary, Asian Studies and Comparative Literature

Affiliated Faculty:

Robert Ascher, Anthropology

David Bathrick, Theatre, Film, and Dance

Robert Bertoia, Art

Susan Buck-Morss, Government

Robert G. Calkins, History of Art

James Cutting, Psychology
David Field, Psychology
Donald Fredericksen, Theatre, Film, and Dance
Werner Goehner, Architecture
Jacqueline Goldsby, English
Salah Hassan, Africana Studies
Ellis Hanson, English
Marcia Lyons, Art
Laura Meixner, History of Art
Kaja McGowan, History of Art
Timothy Murray, English
Marilyn Rivchin, Theatre, Film, and Dance
Rebecca Schneider, Theatre, Film, and Dance
Michael Steinberg, History
Amy Villarejo, Theatre, Film, and Dance
Geoff Waite, German Studies

Visual Studies Concentration Course List

1. Core Course for 2000–2001

VISST 200 Introduction to Visual Studies (IV)
Spring. 4 credits. Requirements: two objective midterm exams; occasional listserve postings; two five page papers. T. Murray.
Introduction to Visual Studies will provide a broad introduction of modes of vision and the historical impact of visual images, visual structures, and visual space on culture, communication, and politics. The question of "how we see" will be discussed in terms of (1) procedures of sight (from optical machines to the psychology of vision and the philosophy of aesthetics); (2) spaces of vision (from landscapes to maps to cities); (3) objects of vision (from sacred sites to illuminated books to digital art); and (4) performances of vision (race, sexualities, ethnicities, cultures). Of importance to the course will be the practical and conceptual relation of twentieth-century visual technologies (photography, cinema, video, and computing) to their historical corollaries in the arts.

The course will draw on the visual traditions of both Western and non-Western societies and study texts that have defined the premises and analytic vocabularies of the visual. Through viewings, screenings, collaborative writing, and art projects, students will develop the critical skills necessary to appreciate how the approaches that define visual studies complicate traditional models of defining and analyzing art objects. Guest lecturers will occasionally address the class.

2. New Media

ANTHR 291/691 Filming Other Cultures (also THETR 291/691)
Spring. R. Ascher.

[ASIAN 313 Japanese and Asian Film
Not offered 2001–2002. B. de Bary.]

ASIAN 415 Virtual Orientalisms (also COM L 418)
Spring. B. de Bary.

AS&RC 435 African Cinema
Fall. S. Hassan.

ENGL 369 Fast-Talking Dames and Sad Ladies (also WOMNS 369 and THETR 367)
Fall. L. Bogel.

[ENGL 660 Cinematic Desire (also THETR 661)
Not offered 2001–2002. E. Hanson.]

[FRLIT 336 French Film
Spring. Not offered 2001–2002. T. Murray.]

[GERST 396 German Film
Not offered 2001–2002. D. Bathrick.]

[GERST 449 Re-Screening the Holocaust (also THETR 450, COM L 453)
Spring. Not offered 2001–2002. D. Bathrick.]

SPANL 399 Spanish Film
Fall. J. R. Resina.

THETR 274 Introduction to Film Analysis: Meaning and Value
Fall. D. Fredericksen.

[THETR 378 Soviet Film of the 1920s and French Film of the 1960s
Spring. Not offered 2001–2002. D. Fredericksen.]

THETR 376 History and Theory of Documentary and Experimental Film
Fall. A. Villarejo.

[THETR 386 Third Cinema
Not offered 2001–2002. A. Villarejo.]

[THETR 269 Interpreting Hitchcock (also THETR 264)
Fall. Not offered 2001–2002. L. Bogel.]

THETR 369 Fast-Talking Dames and Sad Ladies (also WOMNS 369 and THETR 367)
L. Bogel.

[THETR 395/ENGL 395 Video: Art, Theory, Politics
Fall. Not offered 2001–2002. T. Murray.]

WOMNS 405 Domestic Television
Spring. A. Villarejo.

3. Interdisciplinary, Intermedia Studies

[AM ST/HIST/ART H 430 America in the Camera's Eye
Fall. Not offered 2001–2002. L. Moore.]

[ART H 337 Medieval Illuminated Book
Not offered 2001–2002. R. Calkins.]

[ART H 531 Archaeology of the Book: Narrative in Medieval Illustrated Books
Spring. Not offered 2001–2002. R. Calkins.]

[ART H 580 Problems in Asian Art: The Subtle Body
Not offered 2001–2002. K. McGowan.]

EAS 200 Art, Archaeology, and Analysis (also GEOL 200, ARKEO 285, PHYS 200, ART H 200)
Spring. R. Kay.

MUSIC 410 Music and Monstrous Imaginings
Fall. A. Richards.

4. Perception, Cognitive Studies

BIONB 396 Introduction to Sensory Systems
Spring. B. Halpern.

[MATH 451 Geometry of Plane and Sphere
Spring. Not offered 2001–2002. D. Henderson.]

PSYCH 305 Visual Perception
Fall. J. Cutting.

PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display
Fall. D. Fields.

PSYCH 347 Psychology of Visual Communications
Spring. J. Maas.

[PSYCH/BIONB 492 Sensory Function
Spring. Not offered 2001–2002. B. Halpern.]

THETR 475 Seminar in the Cinema: Cognitive Film Theory
Fall. D. Fredricksen.
Topic for fall 2001: Narrative Technique in the New Hollywood.

5. Theory and Visuality

[ANTHR 453 Visual Anthropology
Not offered 2001–2002. R. Ascher.]

[ARCH 338/638 Postmodern Critical Texts
Not offered 2001–2002. W. Goehner.]

[ASIAN 388 Theorizing Race and Gender in East Asian Visual and Verbal Texts
Not offered 2001–2002. N. Sakai.]

[AS&RC 503 African Aesthetics (also, ART H 571)
Spring. Not offered 2001–2002. S. Hassan.]

[COM L 330 Political Theory and Cinema (also GERST 330)
Not offered 2001–2002. G. Waite.]

[COM L 367 Visual Culture and Social Theory (also, GOVT 376, ART H 370)
Fall. Not offered 2001–2002. S. Buck-Morss.]

[COM L 699 German Film Theory
Not offered 2001–2002. D. Bathrick.]

GERST 345/656 Aesthetic Theory: The End of Art (also COM L 656)
Fall. P. Gilgen.

[WOMNS 465 Feminist Theory/Lesbian Theory (also, GERST 465)
Not offered 2001–2002. A. Villarejo.]

6. Performance and Visuality

[ASIAN 410 Chinese Performing Arts
Fall. Not offered 2001–2002. E. Gunn.]

[ASIAN 471 Japanese Theater (also THETR 471)
Fall. Not offered 2001–2002. K. Brazell.]

[AS&RC African American Performance Genres and Traditions
Not offered 2001–2002. Staff.]

[THETR 319 Music, Dance, and Light
Fall. Not offered 2001–2002. E. Intemann, A. Fogelsanger.]

THETR 339 The Avant-Garde: Dead or Alive?
Spring. R. Schneider.

[THETR 403 Ritual, Play, Spectacle, Act: Performing Culture
Fall. Not offered 2001–2002. B. Schneider.]

THETR 445 Text Analysis for Production: How to Get From the Text onto the Stage
Fall. S. Cole.

7. Visuality and Society

ART H 360 Painting and Everyday Life in Nineteenth-Century America (also AM ST 360)
Spring. L. L. Meixner.

ART H 362 Impressionism in Society (also WOMNS 361)
Fall. L. Meixner.

[ART H 385 Representation and Meaning in Chinese Painting (also ASIAN 384)
Not offered 2001–2002. A.-Y. Pan.]

[ART H 395 The House and the World: Architecture of Asia (also ASIAN 394)
Spring. Not offered 2001–2002. K. McGowan.]

ART H 450 Representations of Women in the Italian Renaissance (also WOMNS 451)
Spring. C. Lazzaro.

[ART H 451 Prints and Visual Culture in Early Modern Europe
Not offered 2001–2002. C. Lazzaro.]

ART H 461 Art and Social Histories
Spring. L. Meixner.
Topic for spring 2002: Landscape as Ideology.

[ART H 462 Topics in Early Modernism
Not offered 2001–2002. L. Meixner.]

[ART H 481 Art of the T'ang Dynasty (also ASIAN 481)
Spring. Not offered 2001–2002. A.-Y. Pan.]

[ART H 490 Art and Collecting: East and West (also ASIAN 491)
Spring. Not offered 2001–2002. K. McGowan.]

[AS&RC 310 Art in African Culture and Society (also ART H 378)
Fall. Not offered 2001–2002. S. Hassan.]

[HIST 362 European Cultural History 1750–1870 (also COM L 352)
Fall. Not offered 2001–2002. M. Steinberg.]

HIST 363 European Cultural History 1870–1945 (also COM L 353)
Spring. M. Steinberg.

8. Theory/Practice

[ART 372 Art Show: Web Art
Fall and spring. Not offered 2001–2002. M. Lyons.]

[COGST 201 Cognitive Studies in Context Laboratory (also COM S 201 and PSYCH 201)
Fall, B. Halpern; spring, D. Field. Not offered 2001–2002.]

[COM S 417 Interactive Computer Graphics (also ARCH 374)
Spring. (Includes Practicum listed below; mostly oriented toward the visual arts.) Not offered 2001–2002. Staff.]

[COM S 418 Practicum in Computer Graphics
Spring. Not offered 2001–2002. Staff.]

DANCE 210 Beginning Dance Composition
Spring. J. Self.

DANCE 258 Techno Soma Kinesics I: Technology and the Moving Body
Spring. B. Suber.

DANCE 358 Techno Soma Kinesics II: the Moving Body and Technology
Spring. B. Suber.

[DANCE 418 Seminar in History of Dance: Digital Dance/Cyber Dance
Not offered 2001–2002. B. Suber.]

ENGL 164 Critical Surfing: Art and Culture on the World Wide Web
Fall. T. Murray.
Freshman Writing Seminar.

ENGL 434 Electronic Art and Culture
Fall. T. Murray.

MUSIC 104 Introduction to World Music: Asia
Spring. A. Warde.

MUSIC 245 Introducing Indonesia through Its Arts, Section III
Fall and spring. M. Hatch.

THETR 314 Western Dance History I
Fall. B. Suber.

THETR 310/311 Dance Composition (also THETR 410/411)
Fall. B. Suber.

THETR 335 Modern Western Drama, Modern Western Theater: Theory and Practice
Fall. R. Schneider.

THETR 339 Theories and Techniques of Twentieth-Century Performance (also, WOMNS 441)
Spring. B. Schneider.

THETR 362 Lighting Design Studio I
Fall. E. Intemann.

THETR/MUSIC/ART 391 Media Studio I and II (also listed as ARCH 459)
Fall. M. Rivchin, D. Borden, M. Lyons, J. Zissovic.

THETR 398 Fundamentals of Directing
Fall. D. Feldshuh.

[THETR 439 Theater of Commodities
Not offered 2001–2002. B. Schneider.]

THETR 462 Lighting Design Studio II
Spring. E. Inemann.

[THETR 477 Intermediate Film and Video Projects, Documentary and Experimental Workshop
Fall. Not offered 2001–2002. M. Rivchin.]

THETR 478 Intermediate Film and Video Projects: Narrative and Experimental Workshop
Fall. M. Rivchin.

THETR 493 Advanced Film and Video Projects
Spring. M. Rivchin.

Women's Studies Program

M. Smith, M. C. Vallois, A. Villerajo, M. Washington, R. Weil, B. Wejnert, J. Whithing, L. Williams, M. Woods.

Introduction to the Program

Women's Studies is an interdisciplinary program that seeks to deepen understanding of women's lives, culture, and history, in all their complex multiplicities. Transformative as well as additive, women's studies challenges us to re-examine much of what we think we already know by providing an intellectual—and critical—feminist framework through which to view the many interconnections among gender, knowledge, and power. Thus, central to the curriculum in women's studies are such overarching notions as these:

(a) that definitions of gender—including those that privilege exclusive heterosexuality—are not natural or universal but are instead social constructions that vary across time and place, serve political ends, and have ideological underpinnings;

(b) that systems of gender inequality interact with other social inequalities, including those of class, race, ethnicity, sexual preference, and Western vs. non-Western cultures; and

(c) that even the most current knowledge derived from the humanities, social sciences, and natural sciences is not as impartial, objective, or neutral as has traditionally been thought but instead emerges out of particular historical and political contexts.

Although all Women's Studies courses except writing seminars count toward the major, they do not all satisfy distribution requirements or count toward the total hours required in Arts and Sciences; if a course is not cross-listed with another Arts and Sciences department, be sure to check with college offices about whether it will satisfy distribution or our requirements for Arts and Sciences.

Program Offerings

The Women's Studies Program offers an undergraduate major, an undergraduate concentration, and a graduate minor. Undergraduate students in the College of Arts and Sciences who want to major in women's studies can apply directly to the program. Undergraduate students in other colleges at Cornell will need to work out special arrangements and should speak to the Director of Undergraduate Studies (DUS) in Women's Studies.

The Undergraduate Major

The questions posed by feminist inquiry cannot be answered from within any single discipline or even from a simple combination of two or more disciplines. For that reason, the women's studies major provides students with a basic groundwork in the interdisciplinary field of women's studies and then requires each student to construct an advanced and individually tailored program of study on a topic, in a discipline, or in a combination of disciplines of special interest to the student alone.

Rather than specifying a particular sequence of required courses for each and every student, the women's studies major gives students a starting point in women's studies, an active advisory structure to help them shape a curriculum, and an ongoing impetus to reflection about their entire program of undergraduate study.

In designing their major, students should keep in mind that there are comparatively few graduate programs offering a degree in women's studies itself. Accordingly, undergraduates wishing to major in women's studies should talk at length with their faculty adviser about how to design a program of study that will best qualify them for entry into either a job or a postgraduate degree program when they leave Cornell. Undergraduates who might want to do graduate study within a discipline will need to develop a certain level of disciplinary specialization at the undergraduate level. This can be done either by supplementing the women's studies major with a carefully selected cluster of courses in that discipline or by pursuing a double major. Students wishing to apply their interest in Women's Studies to other professional arenas may similarly select focused coursework in their fields or consider supplementing their studies through internships or other work experiences.

Requirements for a Women's Studies Major

1. Prerequisite courses: before applying to the major, the student must complete any two Women's Studies courses with a grade of B- or better. Suggested entry-level courses for 2001–2002 include: any class at the 200 level, especially 210 and 211. These courses would count both as prerequisites and as part of the women's studies major. First-Year writing seminars, in contrast, would count as prerequisite courses but not as part of the major.
2. Required course work:
   a. A minimum of 36 credits in women's studies is required for the major. No course in which the student has earned less than a C- can count toward these 36 credits. Although there is no single women's studies course that is required of all students, every major must complete a program of study that is both graduated in difficulty and interdisciplinary in scope—a program, in other words, that reflects both the breadth and the depth of women's studies scholarship. This program of study should be developed in consultation with the director of undergraduate studies and must include advanced work at the 300 level or above.
   b. Students may count up to three courses outside women's studies toward the major **if** those courses are approved by the director of undergraduate studies as constituting a meaningful component of the student's women's studies curriculum. To facilitate the coordination of a women's studies major with other majors in the college, students may also count toward the major up to three women's studies courses that are simultaneously being counted toward a second major.
3. The Honors Program: to graduate with honors, the major in women's studies must complete a senior thesis under the supervision of a women's studies faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative grade point average of 3.0 in all coursework and a 3.3 average in all courses applying to their women's studies major. Students interested in the Honors Program should consult the Director of Undergraduate Studies (DUS) late in the spring semester of their junior year or very early in the fall semester of their senior year. For more information about the Honors Program, see WOMNS 400 and the "Guidelines For a Senior Honors Thesis" available in the Women's Studies Program office.

The Women's Studies Concentration

Undergraduate students in any college at Cornell can concentrate in Women's Studies in conjunction with a major defined elsewhere in the university. The concentration consists of four courses in Women's Studies completed with a grade of C- or above, no more than two of which can come from a single discipline and none of which should overlap with the major. In rare cases, the DUS may allow one class from within a student's major to count toward the requirements for the concentration. Students should not assume the waiver will be granted, and they must petition the DUS with this request before the beginning of their final semester of study. Freshman writing seminars cannot be included within the four required courses. Students wishing to concentrate in Women's Studies should see the DUS.

The LBG Concentration

Women's Studies serves as home to the Lesbian, Bisexual, and Gay Studies Program, which offers an undergraduate concentration as well as a graduate minor. The LBG undergraduate concentration consists of four courses. The Women's Studies courses that may be used to fulfill the LBG concentration are 210, 244, 262, 277, 285, 321, 353, 355, 376, 377, 413, 415, 427, 433, 450/650, 441/641, 465, 467, 468, 493, 621, 626, 654, 656 and 661. For a complete listing of all courses that will fulfill this concentration please see the LBG Studies portion of this catalog.

I. First-Year Writing Seminars

WOMNS 106 FWS: Women and Writing (also ENGL 105)
Fall and spring. 3 credits. Staff.
For description, see ENGL 105.

WOMNS 114 FWS: Has Breasts, Does Write: Women Writing Women (also THETR 113)
Fall. 3 credits. M. Gualtieri.
For description, see THETR 113.

[WOMNS 178 FWS: Desire (also ENGL 178 and THETR 178)
3 credits. Not offered 2001–2002.
E. Hanson.]

II. Courses

WOMNS 206 Gender and Society (also R SOC 206)
Spring. 3 credits. B. Wejnert.
For description, see R SOC 206.

[WOMNS 210 Introduction to Feminist Theory
4 credits. Not offered 2001–2002.
A. Villarejo.
This course introduces students to critical approaches in feminist scholarship to the cultural, socioeconomic, and political situation(s) of women. Particular attention is paid to the conceptual challenges and dangers posed by attempts to study women without taking account of relations between race, class, and gender in ideological and social formations. Readings draw on work in various disciplines and include literary texts and visual images.]

WOMNS 211 Introduction to Women's Studies (III or IV)
Fall. 3 credits. K. McCollough.
Introduction to Women's Studies is a multidisciplinary approach to understanding the experiences, historical conditions, and concerns of women, both in the present and the past. As the academic manifestation of feminism, women's studies offers a range of perspectives (from liberal to radical) but focuses, in general, on understanding the sources of women's oppression in order to eliminate these sources.

WOMNS 212 African American Women: Twentieth Century (also HIST 212 and AM ST 212)
Spring. 4 credits. M. Washington.
For description, see HIST 212.

[WOMNS 214 Biological Basis of Sex Differences (also BIOAP 214 and B&SOC 214)
3 credits. Not offered 2001–2002.
J. Fortune.]

[WOMNS 234/434 Gender in Early Modern Europe (also HIST 234/434)
4 credits. Not offered 2001–2002. R. Weil.]

[WOMNS 243 Inside-Out: The American Everyday Interior (also DEA 243)
3 credits. Not offered 2001–2002.
J. Jennings.]

[WOMNS 244 Language and Gender Relations (also LING 244)
4 credits. Not offered 2001–2002; next offered fall 2002. S. McConnell-Ginet.]

WOMNS 246 Contemporary Narratives by Latina Writers (also SPANL 246 and LSP 246)
Fall. 3 credits. L. Carrillo.
For description, see SPANL 246.

WOMNS 249 Feminism and Philosophy (also PHIL 249)
Spring. 4 credits. J. Whiting.
For description, see PHIL 249.

WOMNS 251 Twentieth-Century Women Novelists (also ENGL 251)
Spring. 4 credits. S. Samuels.
For description, see ENGL 251.

WOMNS 253 Gender and the Life Course (also HD 253)
Fall. 3 credits. P. Palmieri.
For description, see HD 253.

[WOMNS 273 Women in American Society, Past and Present (also HIST 273)
4 credits. Not offered 2001–2002.
M. B. Norton.]

[WOMNS 277 Social Construction of Gender (also PSYCH 277)
3 credits. Not offered 2001–2002. S. Bem.]

[WOMNS 279 Queer Fiction (also ENGL 278)
4 credits. Not offered 2001–2002.
E. Hanson.]

[WOMNS 280 Lesbian Novel (also ENGL 279)
4 credits. Not offered 2001–2002.
K. McCullough.]

[WOMNS 281 Gender and Society in the Muslim Middle East (also NES 281 and RELST 281)
3 credits. Not offered 2001–2002.
M. Bloom.]

[WOMNS 285 Introduction to Sexual Minorities (also HD 284)
3 credits. Not offered 2001–2002.
R. Savin-Williams.]

[WOMNS 300 Latina Activism and Feminist Theory (also LSP 300)
4 credits. Not offered 2001–2002.
D. Cohen.]

WOMNS 307 African-American Women in Slavery and Freedom (also HIST 303 and AS&RC 307)
Spring. 4 credits. M. Washington.
For description, see HIST 303.

WOMNS 309/509 The Sociology of Marriage (also SOC 309/509)
Fall. 3 credits. M. Clarkberg.
For description, see SOC 309/509.

[WOMNS 314/514 Gender and Work (also SOC 314/514)
4 credits. Not offered 2001–2002.
M. Brinton.]

WOMNS 316 Gender Inequality (also SOC 316)
Fall. 3 credits. S. Szeleyi.
For description, see SOC 316.

WOMNS 319 Seventeenth Century European Women Philosophers (also PHIL 320)
Spring. L. Schapiro.
For description, see PHIL 320.

[WOMNS 320 Queer Theater (also THETR 320)
4 credits. Not offered 2001–2002.
J. E. Gainor.]

WOMNS 321/631 Sex and Gender in Cross-Cultural Perspective (also ANTHR 321/621)
Fall. 4 credits. D. Doukas.
For description, see ANTHR 321/621.

[WOMNS 322 Women in the Hebrew Bible (also NES 320 and JWST 320)
3 credits. Not offered 2001–2002.
G. Rendsburg.]

[WOMNS 326 Women in the Hebrew Bible-Seminar (also NES 326 and JWST 326)

WOMNS 400 Senior Honors Thesis
Fall and spring. 2–8 credits. For Women's Studies seniors only. Permission of Women's Studies faculty member required. Student must carry a GPA of 3.0 in all subjects and a 3.3 in Women's Studies. Staff.
Both the form of theses, and the nature and extent of contact between student and adviser, will depend on mutual agreement between the two. In one common scenario, the student will write an essay of approximately 50 pages in length, drafted and revised in a series of carefully planned stages over the course of two semesters, with an outline expected on approximately Sept. 15 and a draft of the first chapter on approximately November 15. An "R" grade will be assigned at the end of the fall semester and a letter grade on completion of the project at the end of the spring semester.

Fall. 4 credits. J. Bernstock.
For descreiption, see ART H 466.

WOMNS 405/605 Domestic Television
Spring. 4 credits. A. Villarejo.
This course is a seminar on television as technology and cultural form, focusing on the "domestic" as a synonym for gendered value-coding, an axis of the international division of labor (and questions of television's dissemination and circulation), and a site for historical exploration. The course balances readings in television and cultural theory (Spigel, Dienst, Merck, Williams, Feuer, Modleski, Mellencamp, Shattuc, Spivak, and others) with close analysis of television as information, entertainment, furniture, technology, text, genre, flow, channel, and circuit of production of the commodity audience. Students may enroll in either undergraduate or graduate level with graduate students submitting a longer paper and doing supplementary readings.

[WOMNS 465 Feminist Theory/Lesbian Theory (also COM L 465 and GERST 465)
4 credits. Not offered 2001–2002. A. Villarejo.
This seminar explores developments in feminist theory, primarily in the United States from the 1950s through the mid-1990s. We also trace the changing status of "lesbianism" in feminist theories over that same time period and examine its status in current constructions of "queer theory." What happens to the relationship between feminist theory and lesbian thought when "queer theory" emerges? The purpose of the course is to encourage critical, historically informed readings of what could be considered canonical texts and crucial junctures in Second Wave feminist thought, many of which remain unfamiliar even to Women's Studies students.]

WOMNS 499 Directed Study
Fall and spring. Variable credit. Prerequisites: 1 course in women's studies and permission of a faculty member of the Women's Studies Program Board. Staff.

[WOMNS 600 Special Topics in Feminist Theory: An Interdisciplinary Graduate Course in Women's Studies
4 credits. This course is open to graduate students and undergraduate seniors who have obtained permission of instructor. Not offered 2001–2002. Staff.
The purpose of this course is to expose graduate students to interdisciplinary approaches in Women's Studies and feminist theory to a variety of topics or questions. While many of our graduate courses train students in highly specialized areas of feminist theory, this course aims to teach students how to find common intellectual ground around a single topic from interdisciplinary perspectives without sacrificing the complexity of any disciplinary approach. The course is designed for graduate minors in Women's Studies and students with a specialized interest in feminist theory. Although it is not required, the course is strongly recommended for students obtaining a graduate minor in Women's Studies.]

[WOMNS 608 African-American Women (also HIST 608)
4 credits. Not offered 2001–2002. M. Washington.]

[WOMNS 610 Sexuality and the Politics of Representation
4 credits. Not offered 2001–2002. A. Villarejo.
The seminar explores contexts for critical work on sexuality and film/video. Beginning with the texts of Foucault, Freud, Lacan, Jacqueline Rose, and Jeffrey Weeks, the course examines the uses and abuses of psychoanalytic theory, as well as the regulation of sexuality in the past century. "Sexuality" is not, however, a simple abstraction, and its coherence is put to the test through the dual lenses of Marxism and poststructuralism throughout the second half of the course, with readings from Gramsci, Deleuze and Guattari, Lyotard, and others. Films include *Blonde Venus*, *Trash*, *The Night Porter*, *Ali: Fear Eats the Soul*, *Written on the Wind*, and others.]

Diesing, Molly, Ph.D., U. of Massachusetts at Amherst. Assoc. Prof., Linguistics
DiSalvo, Francis J. Jr., Ph.D., Stanford U. John A. Newman Professor of Physical Science, Chemistry and Chemical Biology
Donaldson, Laura, Ph.D., Emory U. Assoc. Prof., English
Dotson, Arch T., Ph.D., Harvard U. Prof., Government
Dotson, Esther G., Ph.D., New York U. Prof. Emeritus, History of Art
Drell, Persis, Ph.D., U. of California at Berkeley. Prof., Physics/LNS¶
Dugan, Gerald F., Ph.D., Columbia U. Prof., Physics/LNS¶
Dunning, David, Ph.D., Stanford U. Prof., Psychology
Durrett, Richard T., Ph.D, Stanford U. Prof., Mathematics
Dynkin, Eugene B., Dr. of Sci., Moscow U. (USSR). Abram R. Bullis Professor of Mathematics, Mathematics
Ealick, Steven, Ph.D., U. of Oklahoma. Prof., Chemistry and Chemical Biology
Earle, Clifford J., Ph.D., Harvard U. Prof., Mathematics
Easley, David, Ph.D., Northwestern U. Henry Scarborough Prof. of Social Sciences
Eddy, Donald D., Ph.D., U. of Chicago. Prof. Emeritus, English
Edelman, Shimon, Ph.D., Weizmann Institute of Science (Israel). Prof., Psychology
Edmondson, Locksley G., Ph.D., Queens U. (Canada). Prof., Africana Studies and Research Center
Ehrenberg, Ronald, Ph.D., Northwestern U. Prof., Industrial and Labor Relations/ Economics
Eikenberry, Stephen S., Ph.D., Harvard U. Asst. Prof., Astronomy/CRSR†
Elber, Ron, Ph.D., Hebrew U. Professor, Computer Science
Elias, Robert, Ph.D., U of Pennsylvania. Goldwin Smith Professor of English Literature and American Studies, Emeritus, English
Elser, Veit, Ph.D., U. of California at Berkeley. Physics/LASSP*
Escobar, Jose F., Ph.D., U. of California at Berkeley. Prof., Mathematics
Esman, Milton J., Ph.D., Princeton U. John S. Knight Professor of International Studies, Emeritus, Government
Evangelista, Matthew, Ph.D., Cornell U. Prof., Government
Ezergailis, Inta M., Ph.D., Cornell U. Prof. Emerita, German Studies
Ezra, Gregory S., Ph.D., Oxford U. (England). Prof., Chemistry and Chemical Biology
Fajans, Jane, Ph.D., Stanford U. Assoc. Prof., Anthropology
Fan, K-Y Daisy, Ph.D, Cornell U. Asst. Prof., Computer Science
Farrell, Robert T., Ph.D., Fordham U. Prof., English/Medieval Studies/Archaeology
Farrell, Roger H., Ph.D., U. of Illinois. Prof. Emeritus, Mathematics
Fay, Robert C., Ph.D., U. of Illinois. Prof., Chemistry and Chemical Biology
Feldshuh, David, Ph.D., U. of Minnesota. Prof., Theatre, Film and Dance
Field, David J., Ph.D., U. of Pennsylvania. Assoc. Prof., Psychology
Fine, Gail J., Ph.D., Harvard U. Prof., Philosophy/Classics
Finlay, Barbara L., Ph.D., Massachusetts Inst. of Technology. Prof., Psychology
Fitchen, Douglas B., Ph.D., U. of Illinois. Prof., Physics/LASSP*
Flanagan, Éanna É., Ph.D., California Inst. of Technology. Asst. Prof., Physics/Astronomy/LNS¶
Fortune, Joanne E., Ph.D., Cornell U. Assoc. Prof., Physiology/Women's Studies
Franck, Carl P., Ph.D., Princeton U. Assoc. Prof., Physics/LASSP*
Frank, Robert H., Ph.D., U. of California at Berkeley. Goldwin Smith Professor of Economics/Ethics and Public Policy
Fredericksen, Donald L., Ph.D., U. of Iowa. Assoc. Prof., Theatre, Film and Dance
Freed, Jack H., Ph.D., Columbia U. Prof., Chemistry and Chemical Biology
Fried, Debra, Ph.D., Yale U. Assoc. Prof., English
Furman, Nelly, Ph.D., Columbia U. Prof., Romance Studies
Gainor, Ellen J., Ph.D., Princeton U. Prof., Theatre, Film and Dance
Gair, James W., Ph.D., Cornell U. Prof. Emeritus, Linguistics
Galik, Richard S., Ph.D., Cornell U. Prof., Physics/LNS¶
Galloway, Andrew, Ph.D., U. of California at Berkeley. Assoc. Prof., English
Ganem, Bruce, Ph.D., Columbia U. Franz and Elisabeth Roessler Professor of Chemistry and Chemical Biology
Garcés, Maria Antonia, Ph.D., Johns Hopkins U. Assoc. Prof., Romance Studies
Garcia, Maria Cristina, Ph.D., U. of Texas at Austin. Assoc. Prof., History/Latino Studies
Gehrke, Johannes, Ph.D., U. of Wisconsin at Madison. Asst. Prof., Computer Science
Gibbons, Lawrence K., Ph.D., U. of Chicago. Asst. Prof., Physics/LNS¶
Gibson, Eleanor J., Ph.D, Yale U. Susan Linn Sage Professor of Psychology Emeritus, Psychology
Gierasch, Peter J., Ph.D., Harvard U. Prof., Astronomy/CRSR†

Gilbert, Roger S., Ph.D., Yale U. Assoc. Prof., English
Gilgen, Peter, Ph.D., Stanford U. Asst. Prof., German Studies
Gilovich, Thomas, Ph.D., Stanford U. Prof., Psychology
Ginet, Carl A., Ph.D., Cornell U. Prof. Emeritus, Philosophy
Ginsburg, Judith R., Ph.D., U. of California at Berkeley. Assoc. Prof., Classics
Giovanelli, Riccardo, Ph.D., Indiana U. Prof., Astronomy/NAIC‡
Gittelman, Bernard, Ph.D., Massachusetts Inst. of Technology. Prof., Physics/LNS¶
Goetz, Kent, M.F.A., U. of Wisconsin at Madison. Asst. Prof., Theatre, Film and Dance
Gold, Daniel, Ph.D., U. of Chicago Divinity School. Prof., Asian Studies
Gold, Thomas, Ph.D., Cambridge U. (England). John L. Wetherill Professor of Astronomy Emeritus/CRSR†
Goldsmith, Paul F., Ph.D., U. of California at Berkeley. James A. Weeks Professor of Physical Sciences, Astronomy/NAIC‡
Gottfried, Kurt, Ph.D., Massachusetts Inst. of Technology. Prof. Emeritus, Physics/LNS¶
Graff, Delia, Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Philosophy
Graubart, Karen, Ph.D., U. of Massachusetts at Amherst. Asst. Prof., History
Grannis, Rick, Ph.D., U. of California. Asst. Prof., Sociology
Greenberg, Donald P., Ph.D., Cornell U. Prof., Computer Science
Greenberg, Mitchell, Ph.D., U. of California at Berkeley. Prof., Romance Studies
Greene, Charles H., Ph.D., U. of Washington. Assoc. Prof., Earth and Atmospheric Sciences/CFE
Greene, Sandra E., Ph.D., Northwestern U. Prof., History
Greenwood, Davydd J., Ph.D., U. of Pittsburgh. Goldwin Smith Professor of Anthropology
Greisen, Kenneth I., Ph.D., Cornell U. Prof. Emeritus, Physics
Grimes, Joseph E., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
Groos, Arthur, Ph.D., Cornell U. Prof., German Studies
Gross, Leonard, Ph.D., U. of Chicago. Prof., Mathematics
Grossvogel, Anita V., Ph.D., Cornell U. Assoc. Prof. Emerita, Romance Studies
Grossvogel, David I., Ph.D., Columbia U. Prof. Emeritus, Goldwin Smith Professor of Comparative Literature and Romance Studies
Gruner, Sol M., Ph.D., Princeton U. Prof., Physics/LASSP*
Grusky, David, Ph.D., U. of Wisconsin. Prof., Sociology
Guckenheimer, John, Ph.D., U. of California at Berkeley. Prof., Mathematics
Gunn, Edward M., Jr., Ph.D., Columbia U. Prof., Asian Studies
Hagfors, Tor, Ph.D., U. of Oslo (Norway). Prof. Emeritus, Astronomy/Engineering/NAIC‡
Haines-Eitzen, Kim, Ph.D., U. of North Carolina. Asst. Prof., Near Eastern Studies/Religious Studies
Halpern, Bruce P., Ph.D., Brown U. Susan Linn Sage Professor of Psychology, Psychology/Biological Sciences
Halpern, Joseph Y., Ph.D., Harvard U. Prof., Computer Science
Hammes, Gordon G., Ph.D., U. of Wisconsin. Horace White Prof. Emeritus, Chemistry and Biochemistry
Hand, Louis N., Ph.D., Stanford U. Prof., Physics/LNS¶
Hanson, Ellis, Ph.D., Princeton U. Assoc. Prof., English
Harbert, Wayne E., Ph.D., U. of Illinois. Prof., Linguistics
Harris, Robert L., Ph.D., Northwestern U. Assoc. Prof., Africana Studies and Research Center
Harris-Warrick, Rebecca, D.M.A., Stanford U. Assoc. Prof., Music
Hartill, Donald L., Ph.D., California Inst. of Technology. Prof., Physics/LNS¶
Hartman, Paul L., Ph.D., Cornell U. Prof. Emeritus, Physics/Applied and Engineering Physics/LASSP*
Hartmanis, Juris, Ph.D., California Inst. of Technology. Walter R. Read Professor of Engineering, Computer Science
Harwit, Martin O., Ph.D, Massachusetts Inst. of Technology. Prof. Emeritus, Astronomy/CRSR†
Hassan, Salah, Ph.D., U. of Pennsylvania. Assoc. Prof., Africana Studies and Research Center/History of Art
Hatch, Martin, Ph.D., Cornell U. Assoc. Prof., Music
Hatcher, Allen, Ph.D., Stanford U. Prof., Mathematics
Hay, George A., Ph.D., Northwestern U. Prof., Economics/Edward Cornell Prof. of Law
Hayes, Donald P., Ph.D., U. of Washington. Prof. Emeritus, Sociology
Haynes, Martha P., Ph.D., Indiana U. Prof., Astronomy/NAIC‡
Heckathorn, Douglas D., Ph.D., U. of Kansas. Prof., Sociology
Henderson, David W., Ph.D., U. of Wisconsin. Prof., Mathematics
Henderson, John S., Ph.D., Yale U. Prof., Anthropology
Henley, Christopher L., Ph.D., Harvard U. Assoc. Prof., Physics/LASSP*
Herrin, W. Lamar, Ph.D., U. of Cincinnati. Prof., English
Herring, Ronald, Ph.D., U. of Wisconsin at Madison. Prof., Government
Herter, Terry L., Ph.D., U. of Rochester. Prof., Astronomy/CRSR†
Hester, Karlton, Ph.D., City U. of New York. Asst. Prof., African Studies and Research Center
Hildebrand, George H., Ph.D., Cornell U. Maxwell M. Upson Professor of Economics and Industrial Relations Emeritus, Economics/Industrial and Labor Relations
Hilgartner, Stephen, Ph.D., Cornell U. Asst. Prof., Science and Technology Studies
Hill, Thomas D., Ph.D., Cornell U. Prof., English/Medieval Studies
Hines, Melissa A., Ph.D., Stanford U. Assoc. Prof., Chemistry and Chemical Biology
Hirschmann, Nancy, Ph.D., Johns Hopkins U. Assoc. Prof., Government
Hite, Molly, Ph.D., U. of Washington. Prof., English
Hodes, Harold, Ph.D., Harvard U. Assoc. Prof., Philosophy
Hoffmann, Roald, Ph.D., Harvard U. Frank H. T. Rhodes Professor of Humane Letters, Chemistry and Chemical Biology
Hohendahl, Peter U., Ph.D., Hamburg U. (Germany). Jacob Gould Schurman Professor of German Literature, German Studies/Comparative Literature
Holcomb, Donald F., Ph.D., U. of Illinois. Prof. Emeritus, Physics/LASSP*
Holdheim, W. Wolfgang, Ph.D., Yale U. Frederic J. Whiton Professor of Liberal Studies, Emeritus, Comparative Literature/Romance Studies
Holmberg, David H., Ph.D., Cornell U. Prof., Anthropology/Women's Studies
Holquist, Peter, Ph.D., Columbia U. Asst. Prof., History
Hong, Yongmiao, Ph.D., U. of California at San Diego. Assoc. Prof., Economics
Hopcroft, John E., Ph.D., Stanford U. Joseph C. Ford Professor of Computer Science
Houck, James R., Ph.D., Cornell U. Kenneth A. Wallace Professor of Astronomy/CRSR†
Houston, Paul L., Ph.D., Massachusetts Inst. of Technology. Peter J. W. Debye Professor of Chemistry and Chemical Biology
Hsu, John T. H., D. Music, New England Conservatory of Music. Old Dominion Foundation Professor of Humanities and Music, Music
Hubbard, John H., Doctorat d'Etat, U. de Paris (France). Prof., Mathematics
Hughes, Robert E., Ph.D., Cornell U. Prof. Emeritus, Chemistry and Chemical Biology
Hull, Isabel V., Ph.D., Yale U. Prof., History
Husa, Karel, Diploma, Paris Conservatory (France). Kappa Alpha Professor of Music, Emeritus
Huttenlocher, Daniel P., Ph.D., Massachusetts Inst. of Technology. Assoc. Prof., Computer Science
Hwang, J. T. Gene, Ph.D., Purdue U. Prof., Mathematics
Hyams, Paul R., D. Phil., Oxford U. (England). Assoc. Prof., History
Irwin, Terence H., Ph.D., Princeton U. Susan Linn Sage Professor of Philosophy, Philosophy/Classics
Isacks, Bryan L., Ph.D., Columbia U. William and Katherine Snee Professor of Earth and Atmospheric Sciences/INSTOC #
Isard, Walter, Ph.D., Harvard U. Prof. Emeritus, Economics
Isbell, Billie J., Ph.D., U. of Illinois. Assoc. Prof., Anthropology
Isen, Alice M., Ph.D., Stanford U. Prof., Johnson Graduate School of Management/Psychology
Janowitz, Phyllis, M.F.A., U. of Massachusetts. Prof., English
Jeyifo, Biodun, Ph.D, New York U. Prof., English
John, James J., Ph.D., U. of Notre Dame. Professor of Paleography and Medieval History, History
Johnson, Scott, Ph.D., Arizona State. Prof., Psychology
Johnston, Robert E., Ph.D., Rockefeller U. Prof., Psychology
Jones, Karen, Ph.D., Cornell U. Asst. Prof., Philosophy
Jones, Robert B. Jr., Ph.D., U. of California at Berkeley. Prof. Emeritus, Modern Languages and Linguistics
Jones-Correa, Michael, Ph.D., Princeton U. Assoc. Prof., Government
Jordan, Teresa E., Ph.D., Stanford U. Prof., Earth and Atmospheric Sciences/INSTOC#
Jorden, Eleanor H., Ph.D., Yale U. Mary Donlon Alger Professor of Linguistics Emerita, Modern Languages and Linguistics
Kahn, Alfred E., Ph.D., Yale U. Robert Julius Thorne Professor of Political Economy Emeritus, Economics
Kahn, Peter J., Ph.D., Princeton U. Prof., Mathematics
Kammen, Michael G., Ph.D., Harvard U. Newton C. Farr Professor of American History and Culture, History
Kanbur, Ravi, Ph.D., Oxford U. (England) T.H. Lee Prof. of World Affairs, Economics
Kaplan, Steven L., Ph.D., Yale U. Goldwin Smith Professor of History
Karig, Daniel E., Ph.D., U. of California at San Diego. Prof. Emeritus, Earth and Atmospheric Sciences
Kaske, Carol V., Ph.D., Johns Hopkins U. Prof., English
Katzenstein, Mary F., Ph.D., Massachusetts Inst. of Technology. Prof., Government
Katzenstein, Peter J., Ph.D., Harvard U. Walter S. Carpenter, Jr., Professor of International Studies, Government
Kay, Robert W., Ph.D., Columbia U. Prof., Earth and Atmospheric Sciences/INSTOC#

Kay, Suzanne Mahlburg, Ph.D., Brown U. Assoc. Prof., Earth and Atmospheric Sciences/INSTOC#
Kelley, E. Wood, Ph.D., Indiana U. Assoc. Prof., Government
Kelley, Michael C., Ph.D., U. of California at Berkeley. Prof., Earth and Atmospheric Sciences
Kellock, Judith, M. M., Boston U. Assoc. Prof., Music
Kennedy, William J., Ph.D., Yale U. Prof., Comparative Literature
Kesten, Harry, Ph.D., Cornell U. Prof., Mathematics
Kiefer, Nicholas M., Ph.D., Princeton U. Ta-Chung Liu Prof. of Economics
Kinoshita, Toichiro, Ph.D., Tokyo U. (Japan). Goldwin Smith Professor of Physics Emeritus/LNS¶
Kirkwood, Gordon M., Ph.D., Johns Hopkins U. Frederick J. Whiton Professor of Classics Emeritus
Kirshner, Jonathan, Ph.D., Princeton U. Assoc. Prof., Goverment
Klein, Richard J., Ph.D., Yale U. Prof., Romance Studies
Kleinberg, Jonathan, Ph.D., Massachusetts Inst. of Technology. Assoc. Prof., Computer Science
Kline, Ronald, Ph.D., U. of Wisconsin. Assoc. Prof., Science and Technology Studies
Koschmann, J. Victor, Ph.D., U. of Chicago. Prof., History
Kozen, Dexter, Ph.D., Cornell U. Joseph N. Pew Professor of Engineering/Computer Science
Kramnick, Isaac, Ph.D., Harvard U. Richard J. Schwarz Professor of Government
Kronik, John W., Ph.D., U. of Wisconsin. Prof. Emeritus, Romance Studies
Krumhansl, Carol L., Ph.D., Stanford U. Prof., Psychology
Krumhansl, James A., Ph.D., Cornell U. Horace White Professor of Physics Emeritus/LASSP*
Kufner, Herbert L., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
Kuniholm, Peter I., Ph.D., U. of Pennsylvania. Prof., Dendrochronology
LaCapra, Dominick C., Ph.D., Harvard U. Bryce and Edith M. Bowman Professor in Humanistic Studies, History
LaFeber, Walter F., Ph.D., U. of Wisconsin. Marie Underhill Noll Professor of American History, History
Lai, Dong, Ph.D., Cornell U. Asst. Prof., Astronomy/CRSR†
Lambert, Bernd, Ph.D., U. of California at Berkeley. Prof., Anthropology
Lambert, William W., Ph.D., Harvard U. Prof. Emeritus, Psychology/Sociology/Anthropology
Law, Jane Marie, Ph.D., U. of Chicago. Assoc. Prof., Asian Studies/H. Stanley Krusen Professor of World Religions
Lawler, Edward J., Ph.D., U. of Wisconsin. Prof. Sociology/Industrial and Labor Relations
Lawler, Gregory F., Ph.D., Princeton U. Prof., Mathematics
Lawler, Margaret, M. A., San Jose State Coll. Assoc. Prof. Emerita, Theatre Arts
Lazzaro, Claudia, Ph.D., Princeton U. Prof., History of Art
Leavitt, Thomas W., Ph.D., Harvard U. Prof. Emeritus, History of Art
LeClair, André R., Ph.D., Harvard U. Assoc. Prof., Physics/LNS¶
Lee, David M., Ph.D., Yale U. James Gilbert White Distinguished Professor in the Physical Sciences, Physics/LASSP*
Lee, Lee C., Ph.D., Ohio State U. Assoc. Prof. Human Development and Family Studies/ Asian American Studies Program
Lee, Lillian, Ph.D., Harvard U. Asst. Prof., Computer Science
Lee, Stephen, Ph.D., U. of Chicago. Prof., Chemistry and Chemical Biology
Leed, Richard L., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
Lepage, G. Peter, Ph.D., Stanford U. Prof., Physics/LNS¶
Levitsky, David A., Ph.D., Rutgers U. Prof., Nutritional Sciences/Psychology
Levitt, Bruce, Ph.D., U. of Michigan. Prof., Theatre, Film and Dance
Lewis, Philip E., Ph.D, Yale U. Prof., Romance Studies
Littauer, Raphael M., Ph.D., Cambridge U. (England). Prof. Emeritus, Physics/LNS¶
Livesay, G. Roger, Ph.D., U. of Illinois. Prof. Emeritus, Mathematics
Long, Kathleen P., Ph.D., Yale U. Assoc. Prof., Romance Studies
Loos, Tamara L., Ph.D., Cornell U. Asst. Prof., History
Loring, Roger F., Ph.D., Stanford U. Assoc. Prof., Chemistry and Chemical Biology
Lovelace, Richard V. E., Ph.D., Cornell U. Prof., A&EP/Astronomy/CRSR†
Lowi, Theodore J., Ph.D., Yale U. John L. Senior Professor of American Institutions, Government
Lurie, Alison, A. B., Radcliffe Coll. Frederic J. Whiton Professor of American Literature, English
Lynch, Michael, Ph.D. UC Irvine. Prof., Science and Technology Studies
Lyons, Thomas, Ph.D., Cornell U. Prof., Economics
Maas, James B., Ph.D., Cornell U. Prof., Psychology
Macy, Michael W., Ph.D., Harvard U. Prof., Sociology
Majumdar, Mukul K., Ph.D., U. of California at Berkeley. H. T. Warshow and Robert Irving Warshow Professor of Economics
Mankin, David P., Ph.D., U. of Virginia. Assoc. Prof., Classics
March, Kathryn S., Ph.D., Cornell U. Assoc. Prof., Anthropology/Women's Studies
Marcus, Phillip L., Ph.D., Harvard U. Prof. Emeritus, English
Marohn, John, Ph.D., California Institute of Technology. Asst. Prof., Chemistry and Chemical Biology
Martin, Biddy, Ph.D., U. of Wisconsin at Madison. Prof., German Studies/Women's Studies
Masson, Robert T., Ph.D., U. of California at Berkeley. Prof., Economics
Mazrui, Ali A., Ph.D., Oxford U. (England). Senior Scholar, Africana Research and Studies Center and A. D. White Professor-at-Large Emeritus
McCall, Dan E., Ph.D., Columbia U. Prof., English
McClane, Kenneth A., M.F.A., Cornell U. W.E.B. DuBois Professor of Literature, English
McClelland, Peter D., Ph.D., Harvard U. Prof., Economics
McConkey, James R., Ph.D., State U. of Iowa. Prof. Emeritus, English
McConnell-Ginet, Sally, Ph.D., U. of Rochester. Prof., Linguistics
McCoy, William John Jr., Ph.D., Cornell U. Prof. Emeritus, Modern Languages and Linguistics
McCoy, Maureen, M.F.A., U. of Iowa. Assoc. Prof., English
McDaniel, Boyce D., Ph.D., Cornell U. Floyd R. Newman Professor of Nuclear Studies Emeritus, Physics/LNS¶
McDermott, Rose, Ph.D., Stanford U. Asst. Prof., Government
McEuen, Paul L., Ph.D. Yale U. Prof., Physics, Physics/LASSP
McGowan, Kaja, Ph.D., Cornell U. Asst. Prof., History of Art
MacDonald, Scott, Ph.D., Cornell U. Prof., Philosophy
McGinnis, Robert, Ph.D., Northwestern U. Prof. Emeritus, Sociology
McLafferty, Fred W., Ph.D., Cornell U. Peter J. W. Debye Emeritus Professor of Chemistry and Chemical Biology
McMillin, H. Scott, Ph.D., Stanford U. Prof., English
McMurry, John E., Ph.D., Columbia U. Prof., Chemistry and Chemical Biology
McNeal, Robin, Ph.D., U. of Washington. Asst. Prof., Asian Studies
McNulty, Tracy, Ph.D., U. of California at Irvine. Asst. Prof., Romance Studies
McQuade, D. Tyler, Ph.D., U. of Wisconsin. Asst. Prof., Chemistry and Chemical Biology
Mebane, Walter, Ph.D., Yale U. Assoc. Prof., Government
Mei, Tsu-Lin, Ph.D., Yale U. Hu Shih Prof. Emeritus of Chinese Literature and Philology, Asian Studies
Meinwald, Jerrold, Ph.D., Harvard U. Goldwin Smith Professor of Chemistry and Chemical Biology
Meixner, Laura L., Ph.D., Ohio State U. Assoc. Prof., History of Art
Melas, Natalie A., Ph.D., U. of California at Berkeley. Assoc. Prof., Comparative Literature
Mermin, Dorothy M., Ph.D., Harvard U. Goldwin Smith Professor of English
Mermin, N. David, Ph.D., Harvard U. Horace White Professor of Physics, Physics/LASSP*
Messing, Gordon M., Ph.D., Harvard U. Prof. Emeritus, Classics
Mialet, Helene, Ph.D., U. of Paris. Asst. Prof., Science and Technology Studies
Migiel, Marilyn, Ph.D., Yale U. Assoc. Prof., Romance Studies
Miller, Richard W., Ph.D., Harvard U. Prof., Philosophy/Science and Technology Studies
Milles, Beth F., M.A., Harvard U. Asst. Prof., Theatre, Film and Dance
Minkowski, Christopher, Ph.D., Harvard U. Assoc. Prof., Asian Studies
Mitra, Tapan, Ph.D., U. of Rochester. Prof., Economics
Moen, Phyllis, Ph.D, U. of Minnesota. Prof., Human Ecology/Sociology
Mohanty, Satya P., Ph.D., U. of Illinois. Assoc. Prof., English
Monosoff-Pancaldo, Sonya, Artists Diploma, Juilliard School of Music. Prof. Emeritus, Music
Monroe, Jonathan B., Ph.D., U. of Oregon. Prof., Comparative Literature
Moody-Adams, Michele, Ph.D., Harvard U. Wyn and William Y. Hutchinson Prof. of Ethics and Public Life/Prof., Philosophy
Moore, R. Laurence, Ph.D., Yale U. Howard A. Newman Professor in American Studies, History
Morgan, Robert R., M.F.A., U. of North Carolina. Kappa Alpha Prof. of English
Morgan, Stephen L., Ph.D., Harvard U. Asst. Prof., Sociology
Morgenroth, Joyce, M.A., Johns Hopkins U. Assoc. Prof., Theatre, Film and Dance
Morley, Michael D., Ph.D., U. of Chicago. Prof., Mathematics
Morrisett, Greg, Ph.D., Carnegie Mellon U. Assoc. Prof., Computer Science
Morrison, George H., Ph.D, Princeton U. Prof. Emeritus, Chemistry and Chemical Biology
Munasinghe, Viranjini P., Ph.D., Johns Hopkins U. Assoc. Prof., Anthropology/ Asian American Studies
Murray, Timothy, Ph.D., Johns Hopkins U. Prof., English
Myers, Andrew, Ph.D., Massachusetts Institute of Technology. Asst. Prof., Computer Science

Najemy, John M., Ph.D., Harvard U. Prof., History
Nee, Victor, Ph.D., Harvard U. Goldwin Smith Professor of Sociology
Neisser, Ulric, Ph.D., Harvard U. Prof., Psychology
Nelson, Frederick E., Ph.D., U. of Michigan. Assoc. Prof., Geological Sciences
Nerode, Anil, Ph.D., U. of Chicago. Goldwin Smith Professor of Mathematics
Neubert, Matthias, Ph.D., Ruprecht-Karls-U. of Heidelberg. Prof., Physics/LNS¶
Neuhouser, Frederick, Ph.D., Columbia U. Assoc. Prof., Philosophy
Ngaté, Jonathan, Ph.D., U. of Washington. Assoc. Prof., Romance Studies
Nicholson, Philip, Ph.D., California Inst. of Technology. Prof., Astronomy/CRSR†
Norton, Mary Beth, Ph.D., Harvard U. Mary Donlon Alger Professor of American History, History
Nussbaum, Alan, Ph.D., Harvard U. Prof., Classics/Linguistics
Nussbaum, Michael, Dr. Sci., Academy of Sciences Berlin (Germany). Prof., Mathematics
O'Connor, Stanley J., Ph.D., Cornell U. Prof. Emeritus, History of Art
O'Donoghue, Ted, Ph.D., U. of California at Berkeley. Asst. Prof., Economics
O'Neill, Kathleen, Ph.D., Harvard U. Asst. Prof., Government
Ohadike, Don, Ph.D., U. of Jos (Nigeria). Assoc. Prof., Africana Studies and Research Center
Oliver, Jack E., Ph.D., Columbia U. Irving Porter Church Professor Emeritus of Engineering/Earth and Atmospheric Sciences/INSTOC#
Orear, Jay, Ph.D., U. of Chicago. Prof. Emeritus, Physics/LNS¶
Ortigueira, Salvador, Ph.D., U. Carlos III (Madrid) Asst. Prof.. Economics
Owen, David I., Ph.D., Brandeis U. Bernard and Jane Schapiro Professor of Ancient Near Eastern and Judaic Studies, Near Eastern Studies
Owren, Michael J., Ph.D., Indiana U. Asst. Prof., Psychology
Palmer, Robert M., M.M., Eastman School of Music. Given Foundation Professor of Music Composition Emeritus, Music
Pan, An-yi, Ph.D., U. of Kansas. Asst. Prof., History of Art
Park, Kichool, Ph.D., U. of California at Los Angeles. Asst. Prof., Economics
Parker, A. Reeve, Ph.D., Harvard U. Prof., English
Parpia, Jeevak M., Ph.D., Cornell U. Prof., Physics/LASSP*
Parrish, Stephen M., Ph.D., Harvard U. Goldwin Smith Professor of English Emeritus
Patterson, J. Ritchie, Ph.D., U. of Chicago. Assoc. Prof., Physics/LNS¶
Payne, Lawrence E., Ph.D., Iowa State U. Prof. Emeritus, Mathematics
Paz-Soldán, José E., Ph.D., U. of California at Berkeley. Asst. Prof., Romance Studies
Peeva, Irena, Ph.D., Brandeis U. Asst. Prof., Mathematics
Pelliccia, Hayden, Ph.D., Yale U. Assoc. Prof., Classics
Peraino, Judith A., Ph.D., U. of California at Berkeley. Asst. Prof., Music
Peterson, Charles A., Ph.D., U. of Washington. Prof., History
Piedra, José, Ph.D., Yale U. Assoc. Prof., Romance Studies
Piggott, Joan R., Ph.D., Stanford University. Assoc. Prof., History
Pinch, Trevor J., Ph.D., U. of Bath (England). Prof., Science and Technology Studies
Pingali, Keshav K., Ph.D., Massachusetts Inst. of Technology. Assoc. Prof., Computer Science
Pintner, Walter M., Ph.D., Harvard U. Prof. Emeritus, History
Plane, Robert A., Ph.D., U. of Chicago. Prof. Emeritus, Chemistry
Platek, Richard, Ph.D., Stanford U. Assoc. Prof., Mathematics
Pohl, Robert O., Doktor, U. Erlangen (Germany). Prof. Emeritus, Physics/LASSP*
Pohl, Susanne, Ph.D., U. of Michigan. Asst. Prof., History
Polenberg, Richard, Ph.D., Columbia U. Goldwin Smith Professor of American History, History
Pollak, Nancy, Ph.D., Yale U. Assoc. Prof., Russian Literature
Pond, Steven, Ph.D., U. of California at Berkeley. Asst. Prof., Music
Pontusson, Jonas, Ph.D., U. of California at Berkeley. Assoc. Prof., Government
Porte, Joel, Ph.D., Harvard U. Ernest I. White Professor of American Studies and Humane Letters, English
Possen, Uri M., Ph.D., Yale U. Prof., Economics
Power, Alison G., Ph.D., U. of Washington. Prof., Science and Technology Studies/ Ecology and Systematics
Powers, David S., Ph.D., Princeton U. Prof., Near Eastern Studies
Provine, William B., Ph.D., U. of Chicago. Prof., History/Biological Sciences
Pucci, Pietro, Ph.D., U. of Pisa (Italy). Goldwin Smith Professor of Classics
Rabkin, Jeremy A., Ph.D., Harvard U. Assoc. Prof., Government
Radzinowicz, Mary A., Ph.D., Columbia U. Jacob Gould Schurman Professor of English Emerita
Ralph, Daniel C., Ph.D., Cornell U. Assoc. Prof., Physics/LASSP*
Ramage, Andrew, Ph.D., Harvard U. Prof., History of Art
Ramakrishna, Ravi, Ph.D., Princeton U. Asst. Prof., Mathematics
Rawlings III, Hunter R., Ph.D., Princeton U. Prof., Classics
Razin, Assaf, Ph.D., U. of Chicago. Friedman Professor of International Economics
Regan, Dennis T., Ph.D., Stanford U. Assoc. Prof., Psychology
Regan, Elizabeth Adkins, Ph.D., U. of Pennsylvania. Prof., Psychology/Biological Sciences
Rendsburg, Gary, Ph.D., New York U. Paul and Berthe Hendrix Memorial Professor of Jewish Studies, Near Eastern Studies
Reppy, John D., Ph.D., Yale U. John L. Wetherill Professor of Physics Emeritus, Physics/LASSP*
Reppy, Judith, Ph.D. Cornell U. Prof., Science and Technology Studies
Resina, Joan Ramon, Ph.D., U. of California at Berkeley. Prof., Romance Studies
Rhodes, Frank H. T., Ph.D. , U. of Birmingham (England). Prof., Earth and Atmospheric Sciences
Richards, Annette, Ph.D., Stanford U. Assoc. Prof., Music
Richardson, Robert C., Ph.D., Duke U. F. R. Newman Professor of Physics/LASSP*
Rife, Joseph L., Ph.D., U. of Michigan. Townsend Asst. Prof., Classics
Riha, Susan J., Ph.D., Washington State U. Prof., Earth and Atmospheric Sciences
Rogers, Joseph T., Ph.D., U. of Rochester. Assoc. Prof., Physics/LNS¶
Roldan, Mary J., Ph.D., Harvard U. Assoc. Prof., History
Rooth, Mats, Ph.D., U. of Massachusetts at Amherst. Prof., Linguistics
Rosen, Bernard C., Ph.D., Cornell U. Prof. Emeritus, Sociology
Rosen, Carol G., Ph.D., Harvard U. Prof., Linguistics
Rosen, David, Ph.D., U. of California at Berkeley. Prof., Music
Rosenberg, Alex, Ph.D., U. of Chicago. Prof. Emeritus, Mathematics
Rosenberg, Edgar, Ph.D., Stanford U. Prof., English/Comparative Literature
Rossiter, Margaret, Ph.D., Yale U. Marie Underhill Noll Professor of the History of Science, Science and Technology Studies
Rothaus, Oscar S., Ph.D., Princeton U. Prof., Mathematics
Rubin, David L., Ph.D., U. of Michigan. Boyce D. McDaniel Prof. of Physics, Physics/LNS¶
Rush, Myron, Ph.D., U. of Chicago. Prof., Government
Russell, Nerissa, Ph.D., U. of California at Berkeley. Asst. Prof., Anthopology

J. Robert Cooke, dean of the university faculty
Walter I. Cohen, vice provost
Cutberto Garza, vice provost
Robert L., Harris, Jr., vice provost
Robert C. Richardson, vice provost
Mary J. Sansalone, vice provost
John Silcox, vice provost

It is the policy of Cornell University actively to support equality of educational and employment opportunity. No person shall be denied admission to any educational program or activity or be denied employment on the basis of any legally prohibited discrimination involving, but not limited to, such factors as race, color, creed, religion, national or ethnic origin, sex, sexual orientation, age, or handicap. The university is committed to the maintenance of affirmative action programs that will assure the continuation of such equality of opportunity. Sexual harassment is an act of discrimination and, as such, will not be tolerated. Inquiries concerning the application of Title IX can be referred to the director of the Office of Workforce Diversity, Equity and Life Quality, Cornell University, 160 Day Hall, Ithaca, NY 14853-2801 (telephone: 607 255-3976; TDD: 607 255-7066).

Requests for information about services for Cornell faculty and staff members, applicants for employment, and visitors with disabilities who have special needs, as well as related questions or requests for special assistance, can be directed to the Office of Workforce Diversity, Equity and Life Quality, Cornell University, 160 Day Hall, Ithaca, NY 14853-2801 (telephone: 607 255-3976; TDD: 607 255-7066). Students with disabilities should contact Student Disability Services, Center for Learning and Teaching, Cornell University, 420 Computing and Communications Center, Ithaca, NY 14853-2601 (telephone: 607 254-4545; TDD: 607 255-7665).

For Cornell University directory information or general information, call 607 255-2000 or 607 254-INFO. The web page for 2001–2002 Courses of Study has been made available at cuinfo.cornell.edu/Academic/Courses/.

To obtain a copy of this catalog, please follow these guidelines:

If you are a prospective undergraduate student and don't have web access, please contact the Undergraduate Admissions Office, Cornell University, 410 Thurston Ave., Ithaca, NY 14850-2488, 607 255-5241.

If you are a prospective graduate student, please consult the listing of the course catalog on the web (see above for address).

If you are a currently enrolled student, please contact your college registrar.

All others please contact the Office of the University Registrar, Cornell University, B07 Day Hall, Ithaca, NY 14853-2801, 607 255-4232, e-mail: dsy1@cornell.edu
