

POSTPONED UNTIL TOMORROW

The Ceres Circle meeting which was to have been held this afternoon has been postponed until tomorrow, Thursday, October 19, at 3:00 o'clock at the Director's residence. It will be the annual business meeting with election of officers, following which will be a program of games and other entertainment.

WELL ATTENDED

About fifty persons were on hand for a basket lunch last Saturday on the occasion of the annual meeting of the New York State Goat Breeders Association, with 71 registered before the day was over. Francis Gott of Pittsford, representing the Genesee Valley Association, was reelected president. Nine members of the Association from Long Island were in attendance in addition to members from Pennsylvania and Canada. Among other items of business brought before the Association was a proposition to de-bleat goats, but this was tabled.

JOE MOORE HEARD FROM

The October number of Better Fruit, published in Portland, Oregon, in commenting on a visit by the Washington State Horticultural Society to the Washington State College experimental farm at Wenatchee, makes the following comment, "Its chief interest (the experimental farm, that is) for apple growers is in the spray research work being conducted by Dr. Joe Moore. Moore, who came to Washington State from the East, launched a thorough testing program for different spray mixtures this year and the industry is keenly interested in his results." The Wenatchee experimental farm is described as one of the largest experimental farms in the country and the largest single research laboratory devoted exclusively to apples. Joe was formerly a member of the Entomology Division.

WALT REED HERE

Dr. Walter Reed, also a former member of the Entomology Division, spent the past week at the Station in a study of spray materials with Dr. Jim Hamilton. Walt goes from here to Florida to resume research work for the California Spray-Chemical Corporation during the winter months.

ALSO HEADING SOUTH

Mr. Stewart has returned to Geneva from his camp in the Adirondacks and will spend the next two or three weeks making preparations for his annual trek a la trailer into Florida which he expects to begin early in November, accompanied by May.

GOING TO WEST VIRGINIA

Following the meetings of the American Public Health Association which he is attending in Pittsburgh, Dr. Trossler expects to go to Martinsburg and Inwood, W. Va., to visit apple by-products plants and to confer with the West Virginia Extension Service on the making of apple juice.

IN NEW YORK CITY

The Director left last night for New York City where he will participate in a conference of experiment station directors from the Northeastern states.

MR. HOLLAND

Mr. Robert F. Holland, formerly an instructor in the Department of Dairy Industry at Cornell, has been appointed an Associate in Research in the Dairy Division and has begun work here on pasteurization standards as applied to high temperature pasteurization of milk.

A TRIPLE

Cupid made three direct hits in the Station ranks this past week with the announcement of the engagements of Elfredia Covert, Marion Cass and Dorothy Dotterer, all of the Bacteriology Division—but then the bacteriologists always do things in a big way. Matching up the lucky man with the charming lady we have Dominic DeFelice of the Chemistry Division with Miss Covert, Walter Davis of the Plant Pathology Division and Miss Cass, and Professor Edward Joho of the music department at Allegheny College with Miss Dotterer. Orchids to the ladies and congratulations to the gentlemen!

PLANNING CHRYSANTHEMUM SHOW

The annual fall showing of chrysanthemums in the Station greenhouses will soon be under way. The display, which draws thousands of visitors to the Station from a wide territory, will include hardy or garden types of chrysanthemums, the small-flowering types, and the large exhibition types which are the pride of the show. Mr. Jahn already has the houses attractively arranged, using exotics and other plants to enhance the beauty of the main display.

MRS. WYNNE'S DEATH

We regret to note the death of Mrs. Elizabeth Wynne last Saturday morning, following a very brief illness, at the home of her daughter, Mrs. W. T. Tapley. Burial was in Waukegan, Illinois, Mrs. Wynne's former home. We extend our sincere sympathy to the Tapleys.

THE FIRST DANCE

Soft music and dim lights will be in order at 8:45 o'clock next Saturday evening in Jordan Hall when the Shufflers will hold their first dance of the season. The affair is to be informal.

CORN PRODUCTS

Dr. Seulkke, head of the research department of the A. E. Staley Corporation of Decatur, Illinois, makers of corn products, visited the Dairy Division last week.

RECUPERATING

Miss Alice King is recovering rapidly from an appendicitis operation performed in the Geneva General Hospital last Saturday afternoon. Alice was stricken Saturday morning while making preparations to come home from Wells College for the week-end.

MRS. SHERWOOD RETIRED

Mrs. H. L. Sherwood who has been in charge of the mailing room at the College of Agriculture for the past twenty years retired on October 14 and has gone to live on a farm near Cayutaville. The NEWS takes this opportunity to express the appreciation of the Station in Mrs. Sherwood's always cordial and efficient cooperation in the almost daily exchange of requests for publications between the College mailing room and the mailing room here at the Station.

IT COULDN'T HAPPEN HERE--OR COULD IT?

The following Associated Press dispatch bears a Marion, Ohio, date line:

An excited farmer at nearby Morral telephoned Sheriff Fred P. Miller that a man had been crawling about his field "for four hours" and had virtually picked a plot bare. Hurriedly investigating, Miller learned that the man was an experiment station worker determining distribution of grasses in Ohio.
