

# *Data Archiving and Networked Services*

# DANS

iPRES conference October 8-10  
2006, Cornell University

René van Horik  
([rene.van.horik@dans.knaw.nl](mailto:rene.van.horik@dans.knaw.nl))

*DANS is een initiatief van KNAW en NWO*

## *Data Archiving & Networked Services*

- DANS is the Dutch national organisation responsible for storing and providing access to research data from the humanities and social sciences

- DANS is a joint initiative of the Royal Netherlands Academy of Arts and Sciences (KNAW) and the Netherlands Organisation for Scientific Research (NWO)

## Goals DANS

- Take away barriers
  - Permanent access to research data
- Data Archiving
  - Make it easy for depositing new data
  - Fast access tot existing data
- Networked Services
  - Networks of cooperation
  - Linking of relevant data
  - TOPical Programs (TOP)
- Development of research infrastructure (also on international level via ESFRI)

## Outline of the presentation

- Organization of DANS
- Quality issues concerning digital research data
- Topical Programs (TOP)
- DANS and digital preservation

## Organisation

- Staff:  $\pm$  15 fte + project resources
- DANS is a network of people and data
  - Cooperation with: researchers, KB, National Archive, faculties, research schools, government bodies, etc.
- Demand-driven
- Trusted digital repository of a number of digital research collections
- Own development team (e.g. development of "EASY")

## Self archiving is “EASY”

- EASY: *Electronic Archiving SYstem*
- Developed by DANS (Open Source)
- Based on functions described in OAIS model
- Aim: central website for depositing, finding and assessing research data
- In cooperation with
  - Data experts (DANS)
  - Research (e.g. Archeology)
  - Local Data Centers (e.g. VROM)

Deposit dataset - required elements

<input type="button" value="Save draft"/> <input type="button" value="Submit now"/> <input type="button" value="Fill in more"/>	
<input type="button" value="Leave procedure"/>	

# Finding research-data

- Search
  - *Easy!*
  - Extended (time, location etc.)

A screenshot of the DANS search interface. It features a dark green header with the word 'Search' in white. Below the header is a light green search area. At the top of this area is a text input field labeled 'Search for' and a 'Search' button with a magnifying glass icon. Below the input field is a section titled 'In discipline(s):' with two checked checkboxes: 'Humanities' and 'Social sciences'. Below this is another checked checkbox labeled 'My datasets'. At the bottom of the search area is a checked checkbox labeled 'Incoming'. A note at the very bottom states: 'Note: only the metadata of the datasets are searched.'

- Message to new datasets
- Keep track of usage

# Directly accessible

## Search

Search for   

☐ Within search results

In discipline(s):

- ☒ Humanities
- ☒ Social sciences

## Results

Searched for "amsterdam", found 4 results.

Title ▲	Creator	Discipline	Created	Submitted
Data on budget and food of 527 households in the Netherlands, 1934-1938	Velden, H.F. van der	History	1987-1988	2006-05-31
Open het dorp 1962	Baschwitz instituut, universiteit van Amsterdam	Sociology	1962	2006-05-31
Straftoemeting van 800 kleine strafzaken 1953-1954	Ch.J. Enschede, Universiteit van Amsterdam	Law	1963	2006-05-31
The housing market in Amsterdam, 1550-1850	Lesger, C.M.	History	2000	2006-05-31

## Data quality issues

Research data must be findable, accessible, usable, reliable and referable

"data seal of approval"

- DANS recommendations concerning:
- the quality of research data
- the quality of the usage of the research data
- the quality of the data storage facility
- *(Based on NESTOR memorandum)*

## Quality of research data

- Scientific value → determined by peer-review process
- Data format
- Documentation

## Quality of the usage of the research data

- Open Access (if possible)
- Codes of conduct, concerning
  - privacy
  - scientific practice (original, based on own work)
- Licenses of usage

## Quality of the data storage facility

- = “Trusted digital repository”
- Organisational issues
- Technical issues
- Examples:
  - eDepot of National Library (KB)
  - “Big-GRID” of Nikhef (The National Institute for Nuclear Physics and High Energy Physics)
  - DANS data archive

## Topical programmes (TOP)

(Implementation of demand-driven approach of DANS)

- Goal: improvement of data infrastructure in a particular discipline or a particular theme
- Initiated by or in cooperation with researchers
- Make databases of national and/or international significance better accessible, and/or enrich them with other databases or by adding data from other databases
- May involve data programs that have been concluded or are still up and running; they may also involve new initiative, or foresight studies

## DANS and digital preservation I

- Raising awareness on importance of digital preservation for researchers and funding bodies (e.g. via quarterly *eDATA*, see: [www.edata.nl](http://www.edata.nl))
- Establishment and maintenance of trusted digital repositories
- Development of tools and methods, e.g.
  - Persistent identifiers for research data
  - How to quote research data?
  - Stimulate and facilitate re-use of data
  - Preservation metadata for research data
  - Preferred formats for research data

## DANS and digital preservation II

- Support the “emancipation” of databases (recognition of data collector / “citation impact factor”)
- Involvement in projects on digital preservation (e.g. EU Driver project)
- Co-founders of *National Coalition on Digital Preservation*

## Questions?
