Custom
Solutions

How can we give customized
feedback on a survey?

27421

Class of 1937

Wish list:

- Provide a way to analyze results in the aggregate.
- Appear uncomplicated and attractive.
- Have a “not-for-grade” feel.
- Allow multiple assessments in different areas.
- Work with existing authentication methods, rather than requiring a separate user name or password.
- Provide context (a paragraph of text) rather than just links.
- Give each staff member a way to return to their custom content without retaking the assessment.

Solution

PIM Online Bootcamp - Social Networking

Upon completion of the online bootcamp, links to additional resources will be sent to you on the areas for which you want more information.

Your username (**mkocher@umn.edu**) will be recorded when you submit this form. Not **mkocher**?

* Required

In a consultation, a graduate student mentions that she is interested in keeping up in their field using Twitter. Do you know where to find resources to help her get started in finding prominent tweeters in her subject area? *

- ☐ I know where to find lists of academics on Twitter
- ☐ Tell me more

A faculty member is wondering how social media can help with research. Do you know where to find some examples or case studies to help him? *

- ☐ I am familiar with several uses of social media for research
- ☐ Tell me more

A professor is using Twitter as an instruction tool in a course and wants to make sure her students think about privacy and managing their online presence beforehand. Do you know where she can find a guide on this? *

- ☐ I am comfortable explaining the issues surrounding this, or know of appropriate resources to suggest
- ☐ Tell me more
