1977-78

Important Notice

The baccalaureate degree programs described in this catalog will be discontinued in June, 1979. No applicants will be admitted to the program for college graduates after September, 1977 and no applicants will be admitted to the program for registered nurses after September, 1978.

Cornell University Announcements

Volume 69 of the Cornell University Announcements consists of sixteen catalogs, of which this is number 9 dated August 11, 1977. Publication dates: sixteen times a year (five times in August; twice in June and October; once in January, March, April, May, July, September, and December). Publisher: Cornell University, Sheldon Court, 420 College Avenue, Ithaca, New York 14853. Second-class postage paid at Ithaca, New York.

Academic Calendar

1977-78

Orientation, Class of 1979, begins 9:00 a.m.	Wednesday, August 31
Registration, new students and students not preregistered	Thursday, September 1
Orientation, Class of 1979, ends 5:00 p.m.	Friday, September 2
Labor Day holiday	Monday, September 5
Fall term instruction begins, all classes, 8:00 a.m.	Tuesday, September 6
School holiday	Monday, October 10
Progress grades due, all classes, 12:00 noon	Friday, November 4
Preregistration for intersession and spring semester, continuing students	November 14-18
Thanksgiving recess: Instruction suspended, 1:00 p.m. Instruction resumed, 7:30 a.m.	Wednesday, November 23 Monday, November 28
Fall term instruction ends, all classes, 5:00 p.m.	Friday, December 16
Final examinations and clinical evaluation begin, 9:00 a.m.	Monday, December 19
Final examinations and clinical evaluation end, 5:00 p.m.	Wednesday, December 21 Wednesday, December 21
Christmas recess begins, 5:00 p.m.	Monday, January 9
Intersession begins, 9:00 a.m.	Friday, January 27
Intersession ends, 5:00 p.m.	Friday, January 27
Orientation, new students, 1:00 p.m.	Friday, January 27
Registration, new students and students not preregistered, 3:00 p.m.	Monday, January 27
Spring term instruction begins, all classes, 8:00 a.m.	Monday, January 30

School holiday	Monday, February 20
Spring recess:	
Instruction suspended, 5:00 p.m.	Friday, March 17
Instruction resumed, 7:30 a.m.	Monday, March 27
Midsemester grades due, 5:00 p.m.	Thursday, April 6
Preregistration for summer session and fall semester, continuing students	April 17-21
Spring term instruction ends, all classes, 5:00 p.m.	Friday, May 12
Final examinations and clinical evaluation begin, 1:00 p.m.	Monday, May 15
Final examinations and clinical evaluation end, 5:00 p.m.	Thursday, May 18
Grades due, Class of 1978, 5:00 p.m.	Thursday, May 18
Convocation and Commencement	Wednesday, May 24
Grades due, Class of 1979, 5:00 p.m.	Friday, May 26

The dates shown in the Academic Calendar are subject to change at any time by official action of Cornell University.

In enacting this calendar, the University has scheduled classes on religious holidays. It is the intent of the University that students missing classes due to the observance of religious holidays be given ample opportunity to make up work.

Cornell University-New York Hospital School of Nursing

History of the School

The Cornell University-New York Hospital School of Nursing was established as a school in Cornell University in 1942, on the sixty-fifth anniversary of the founding of The New York Hospital School of Nursing. One of the earliest nursing schools in the country, the School is part of The New York Hospital-Cornell Medical Center, which includes also the Cornell University Medical College and the various buildings of The New York Hospital extending from Sixty-eighth to Seventy-second streets on the East River.

The Center is a joint undertaking of the Society of the New York Hospital and Cornell University, and is committed to a fourfold purpose including: (1) care of the sick, providing the same wisdom and skill to rich and poor; (2) education of doctors and nurses, research workers, technicians, and others who will work in the field of medical science; (3) research to extend the boundaries of knowledge in the health fields; and (4) the promotion of public health through the development of preventive medicine.

The New York Hospital is the second-oldest voluntary hospital in this country—its royal charter having been granted in 1771 in the reign of King George III. The first patients were soldiers wounded in the Revolutionary War. At that time, the Hospital was located on the lower end of Manhattan, the only part of the city then settled. On early maps the location was designated simply as "the Hospital."

Cornell University, with its campus in Ithaca, New York, received its charter in 1865. Three circumstances contributed to the founding of the University in the eventful years that marked the close of the Civil War. In the first place, Ezra Cornell, a citizen of Ithaca, had come into a large fortune from his holdings in the newly formed Western Union Telegraph Company and had devoted much thought to the good that might be done by giving his wealth to education. A second circumstance was the fact that the state of New York had received a substantial land grant, under the Morrill Act of 1862, for the support of colleges teaching agriculture and the mechanical arts. The third circumstance was that Mr. Cornell had as a colleague in the state legislature of 1864-65, a young senator named Andrew D. White, later to become the

first president of the University, who had the vision of preserving the state's land grant intact for a single great institution which should teach not only agriculture and the mechanical arts but the humanities and the sciences as well. The Medical College, the School of Nursing, and the Graduate School of Medical Sciences are the divisions of the University which are located in New York City.

The Hospital had been operating for over one hundred years before a school for the training of nurses was opened. Early steps had been taken, however, to improve the care given to patients. In 1799 Dr. Valentine Seamen, a scholar and prominent physician, had organized a series of lectures, combined with a course of practical instruction in the wards, for the women whom the Hospital had engaged as "watchers" and "nurses." Although the theoretical content was meager and the practical instruction not systematically planned, these classes focused attention on the fact that women who had some preparation for their work gave better care than those without instruction. When, in 1873, the first training school in this country on the Nightingale pattern was opened in Bellevue Hospital, the Governors of the Society of the New York Hospital contributed to its support. Four years later, in 1877, when the Hospital moved to new buildings, The New York Hospital Training School for Nurses was opened in quarters which were considered to have all the modern improvements of the times. The School moved to the present location when the Medical Center was opened in 1932.

Since 1946 all students admitted to the Undergraduate Division have been candidates for the degree of Bachelor of Science in Nursing. In 1968, noting a shift in the educational background of individuals seeking admission to the School, a separate program for college graduates was started. As of the fall of 1975, all students admitted to the generic baccalaureate program must have the minimum of a bachelor's degree in another discipline prior to admission.

In the fall of 1974, the School began to admit small groups of registered nurses to an upper-division major in nursing leading to the degree of Bachelor of Science in Nursing.

The Division of Continuing Education was organized as an educational unit of the School of Nursing in

8 Undergraduate Program

1971. Although it is a nondegree-granting division of the School, it has the same status within the structure as the organizational unit for undergraduate programs leading to a degree.

The Cornell University-New York Hospital School of Nursing Alumni Association, originally the Alumnae Association of The New York Hospital School of Nursing, was organized in 1893. It was one of the ten alumnae associations that helped to bring about the national professional organization of nurses, now known as the American Nurses' Association. In 1945 the Alumni Association became a part of the Cornell University Alumni Association.

Accreditation

The School is accredited by the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing as a generic college program leading to a baccalaureate degree.

The School is registered by the State Education Department, Division of Professional Education of the University of the State of New York. Cornell University is accredited by the Middle States Regional Accreditation Association.

Undergraduate Program

The Curricula

The School of Nursing offers an undergraduate program for college graduates and one for registered nurses leading to the degree of Bachelor of Science in Nursing. In order to be eligible for the degree from Cornell, the last thirty credits must be taken in one of these programs. Each student entering the School is expected to complete the entire program for which he or she is enrolled. To meet the objectives of each program, students will have clinical experience in a variety of hospital and community settings.

The faculty reserves the right to make changes in the curriculum that it believes are in keeping with the changing needs of society or in the best interests of the student and the School.

Goals of the University

The University's basic objective is to produce men and women of intellect and to equip them to use their abilities wisely. Cornell is not solely a place for memorizing data or mastering a vocation. It is, instead, a route to intellectual maturity, a means for developing the ideas, insights, and values which form a permanent capacity for intellectual thought and action. Cornell students are prepared to use knowledge well for themselves and society. The diversity of Cornell contributes breadth and perspective to strong and specialized programs of study.

Philosophy of the School of Nursing

Education

Education is a process that helps individuals to

develop their potential so that they may function productively within existing and changing social systems. This is a dynamic process involving the active participation of students and teachers. The school provides the environment in which students can test their abilities and evaluate their progress.

The major purposes of the general education courses preceding the nursing major are: to instill knowledge; to cultivate intellectual skills; and to nurture the traits of personality and character basic to a reasoned and responsible life. Because of the foundation provided by these courses, it is anticipated that students will be prepared to better understand themselves, their social and physical environment, and the role of the professional nurse in society.

Nursing

The School of Nursing provides the professional education for leadership positions in nursing practice in a comprehensive health care system. Professional nurses practice interdependently with other health care professionals in a variety of health care settings. These nurses assume responsibility for promotion of individual and professional standards of nursing practice. They recognize the need to assume an advocacy role on behalf of their clients and to speak on community and professional issues that are within their field of competence. As professional people they recognize the need to continue to develop personal and professional competence through the formal and informal educational structures that are best suited to their needs and abilities.

Objectives of the Professional Program

The nursing program aims to produce graduates who will:

1. Use cognitive skills of assessment, decision making, and evaluation in diagnostic, health maintenance, preventive, restorative, and therapeutic measures.
2. Understand the interaction of the internal system of man with his external system in a health-illness continuum.
3. Apply principles of group process in the delivery of health care.
4. Function interdependently with other health professionals in the management of health care.
5. Demonstrate characteristics for continuing professional development in nursing.
6. Promote standards of nursing practice through assessment of existing practice.
7. Understand the effect of formal and informal structures and the functions of health care delivery systems in relation to nursing practice.
8. Contribute to constructive change in nursing practice.
9. Accept individual responsibility and accountability for nursing practice.
10. Utilize practice as a means of gathering data for refining and extending nursing theory and practice.

Program of Study

• Organization of Curriculum for the College Graduate

The development of the curriculum reflects two components: a structural framework, which provides the skeleton for the curriculum, and a conceptual framework, which provides a unifying theme for organizing theoretical content for nursing and cognate courses, as well as for understanding the process of nursing.

Structural Framework

The *structural* framework of the curriculum rests on three major assumptions:

1. The upper division of a baccalaureate program in nursing provides the specialized theoretical knowledge upon which professional nursing practice rests.
2. A clinical experience core provides the opportunity to develop proficiency in exercise of clinical judgment and skills essential to professional nursing practice.
3. Baccalaureate programs prepare nurses who can assume roles (practice) as interdependent practitioners in a variety of health care settings.

The curriculum, a sixty-credit upper-division nursing major, consists of nursing and cognate courses and a clinical experience core. The upper-division courses in biological and psychosocial sciences focus on the level and type of information that is essential to provide theoretical understanding of the biological and psychosocial functions that reflect the adapting human organism. Upper-division courses in nursing provide an additional knowledge base essential for nursing theory and practice.

Throughout the curriculum, there is an emphasis on the scientific mode of inquiry. Professional practitioners of nursing require more than the mastery of a particular body of professional information or a cluster of technical skills. They need intellectual leverage for continued learning, for modifying practice, and for understanding the social forces that facilitate or impede their ability to function effectively in their personal and professional life.

Since nursing is an applied science, the ability in a given situation to exercise clinical judgment and skill is critical. The clinical experience core provides the opportunity to develop proficiency in the coordination of knowledge and skills essential for nursing practice. The focus is on nursing functions; on assessment and problem-related intervention through health counseling, health education, preventive, restorative, and therapeutic measures.

Each clinical nursing course is planned so that, within the course and within the sequence of courses, understanding of and skill in the nursing process develop as a continuum. The programs are planned so that the student moves from the less complex situation to those that test his or her ability to provide leadership in the delivery of nursing care services; to function in a collegial relationship with other members of the

health team; and to appreciate the emerging roles of professional nurses.

In the first semester, the focus of the nursing major is on introducing the profession of nursing, the nursing process, the acquisition of skills in communication, and selected basic nursing skills. The student then progresses to the study of concepts of psychosocial needs and problems, and the physiological alterations of body processes of adult patients with representative acute medical-surgical health problems. At the end of the first semester the student has the option to register for either community health nursing or parent-child nursing. This option exists as long as space remains in the chosen course at the time of registration.

The content of the parent-child course considers the needs of the mother, father, and child within the family group. It deals with theory and practice requisite to the health needs of women and children, relating this theory and practice to social trends and family influences. Normal growth and development are integrated throughout the course and experiences are provided for the promotion and maintenance of optimal health to families in a variety of settings.

In community health, the focus is on aspects of prevention and intervention in selected health problems, including mental health. The common denominator used in teaching is the epidemiological approach. Experience is provided for the students to observe and participate in the dynamics of group process.

Before registering for the final nursing course, all students must complete a course in assessment of health status. The nursing course of the final semester focuses on caring for patients with multiple and complex nursing needs; having responsibility for nursing care of groups of patients; and participating in the leadership activities related to nursing care. The clinical experience of this semester may be in either a hospital or community agency. With guidance the student participates in selecting the agency for his or her final experience.

Pharmacology, nutrition, and diet therapy are included within the structure of all of the nursing courses of the curriculum.

The biological science and professionally related courses are offered concurrently with the nursing courses. Courses in the biological sciences correlate the sequential development of basic concepts and theories with the requirements of the various clinical courses. The student selects the sequence of the remaining professionally related courses.

Conceptual Framework

Content and process are two dimensions central to the development of the conceptual framework. They are complementary components which are viewed in the context of a dynamic relationship. The approach to the selection of content for the curriculum is through the delineation of essential concepts. Essential concepts are derived from general systems theory and the basic sciences. This approach provides a structure within which nursing knowledge can be synthesized. Likewise, this approach allows students and faculty

the opportunity to test general propositions (inferences) for validity and reliability within the context of selected phenomena in the practice setting. The premise is that although a concept may remain a constant element within the curriculum, the theoretical basis for the concept is constantly being altered through additional empirical evidence in nursing practice or through advances in science and technology. Delineation of these essential concepts also provides a structure within which nursing practice can be analyzed.

Organization of the Curriculum for the Registered Nurse

The organization of the curriculum of the baccalaureate degree program for registered nurses (graduates of hospital diploma and associate degree programs) is similar to the program for college graduates and likewise reflects two components: a structural framework, which provides the skeleton for the curriculum, and a conceptual framework, which provides a unifying theme for organizing theoretical content for nursing and cognate courses, as well as for understanding the process of nursing.

Structural Framework

Candidates who have successfully completed the prerequisite admission requirements of sixty credits of general education courses, successful achievement in the New York State College Proficiency Examination, and successful achievement on the Cornell University-New York Hospital School of Nursing Clinical Proficiency Examination are considered for admission to the program. The assumptions for the structural framework of the curriculum are similar to those of the curriculum for college graduates.

The curriculum is a thirty-credit, upper-division nursing major consisting of nursing and cognate courses and a clinical experience core. In the instance of graduate nurse students, the assumptions reflect validation of previous education and experience in nursing. The upper-division courses in biological and psychosocial sciences focus on the level and type of information that is essential to provide theoretical understanding of the biological and psychosocial functions that reflect the adapting human organism.

Conceptual Framework

In this curriculum, the clinical nursing core, or the study of the practice of nursing, will focus on the process of nursing as a system-oriented process in the three domains of primary, acute, and long-term care. The clinical experience core provides the structure for preparation of interdependent practitioners. Associated seminars serve as a mode for extending the scope of knowledge and experience and for developing professional peer communication and decision-making skills.

Program of Study for College Graduates

College graduates must earn a minimum of sixty-two credits in the School of Nursing to be eligible for the

degree in nursing. In general, students registered for full-time study are advised to carry 15 to 16 credits per semester.

The following 62 credits are required for the degree.

Nursing Courses

<i>Clinical Nursing Courses</i>	<i>Credits</i>
Nursing 156	10
Nursing 157	10
Nursing 256	10

A minimum enrollment of ten students is required for each course in the School to be offered.

A student may also elect Guided Study, Independent Study and/or a Clinical Nursing Practicum with the approval of the appropriate committee.

Program of Study for Registered Nurses

Registered nurses must earn thirty credits in the School of Nursing after completing the prerequisites for admission to the degree program. In general, registered nurses are part-time students and so are advised to select their courses carefully before registering each semester.

The following 30 credits are required for the degree.

Admission

General Requirements

The number of qualified applicants exceeds the number of students that can be admitted to the programs of the nursing major each year. Applicants selected will be those who, in competition with others seeking admission at the same time, have demonstrated by their qualifications that they are well fitted for the nursing profession.

Evaluation of the candidate's ability to profit from the instruction at the School of Nursing is based on secondary school and college records, the recommendations of school authorities, and the results of standardized achievement tests. Evidence of the candidate's ability to make effective use of free time and capacity for leadership and concern for others is given due consideration. Evaluations are also made on the basis of extracurricular activities, references, and an interview. Interviews are granted only to those applicants meeting certain minimum admission standards. A favorable disposition on a student's application cannot be made unless the student attends a personal interview at the School of Nursing. An extensive medical report is required because of the nature of the professional program.

College graduates already enrolled in the nursing major of another college or university may request the evaluation of their college records for possible transfer to the School at Cornell.

It is the policy of Cornell University actively to support equality of educational opportunity. No student shall be denied admission to the University or be discriminated against otherwise because of race, color, creed, religion, national or ethnic origin, or sex.

Specific Requirements for the Baccalaureate Degree Program for Registered Nurses

Registered nurses who are employed by The New York Hospital-Cornell Medical Center or an affiliating agency or have earned a certificate from the Division of Continuing Education of the School of Nursing may be considered for admission to this program of the nursing major. Each applicant must complete a minimum of sixty semester hours of general education courses at any university, college, or junior college accredited by one of the regional associations of colleges and secondary schools. Applicants are allowed to transfer up to fifteen credits of general education courses from the New York State College Proficiency Subject Examinations (CPE) and/or the College Level Examination Program Subject Examinations (CLEP).

Upon completion of forty-five semester hours of credits, including the required courses in the natural and social sciences, applicants may register for selected courses in the professional major as non-matriculated students while concurrently completing the sixty-credit requirement.

Applicants to this program are required to take the NLN Pre-Nursing and Guidance Examination, The University of the State of New York College Proficiency Examinations, Baccalaureate Level, in Adult Nursing, Psychiatric-Mental Health Nursing, and Maternal-Child Nursing, and the Cornell University-New York Hospital School of Nursing Clinical Proficiency Examination. The NLN Pre-Nursing and Guidance Examination and the New York State College Proficiency Examinations in Nursing must have been taken no more than five years prior to the individual's anticipated year of enrollment. These results must be received at the School by the deadline for filing the formal application for admission in order to be available for review by the Admissions Office.

Thirty credits by examination will be granted for satisfactory performance in the New York State College Proficiency Examinations and the Cornell University-New York Hospital School of Nursing Clinical Proficiency Examination.

The following distribution of general education courses is required for admission:

Communications, 6 credits: composition, public speaking, or speech.

Humanities, 20-30 credits: art, language, literature, music, philosophy, religion. No credit will be granted for studio humanities courses, such as painting, ceramics, voice, etc.

Natural science and mathematics, 12 credits: general biology or an acceptable substitute (4 credits) and general chemistry (4 credits) are required. Transfer credit will not be granted for science courses with an ecological or sociological approach or for a "D" grade in the natural sciences. Any applicant who completed a general biology course before 1964 may be required to take a challenge examination in biology or take a biology course before admission to fulfill the general biology requirement.

Social science and history, 12-22 credits: sociology (3 credits required), psychology (3 credits required),

14 Grades and Academic Standing

political science, anthropology, economics, history, geography. Transfer credit will not be granted for a "D" grade in the required sociology and psychology courses.

Individuals who plan to submit proficiency examination results in any of the four required subject areas of biology, chemistry, psychology, and sociology must have taken the examinations no more than five years prior to the anticipated year of enrollment.

Specific Requirements for the College Graduate

Persons who hold or are to be awarded a baccalaureate degree by an accredited senior college or university may be considered for admission to this program of the nursing major. Applicants will be required to take the Graduate Record Examination.

The following distribution of courses is required for admission to the Program for College Graduates.

Humanities, 10 credits.

Social science, 10 credits: sociology (3 credits required), psychology (3 credits required). Transfer credit will not be granted for a "D" grade in the required sociology and psychology courses.

Natural science and mathematics, 8 credits: general biology or an acceptable substitute (4 credits) and general chemistry (4 credits) are required. Transfer credit will not be granted for science courses with an ecological or sociological approach or for a "D" grade in the natural sciences. Any applicant who completed a general biology course before 1964 may be required to take a challenge examination in biology or take a biology course before admission to fulfill the general biology requirement.

Those college graduates who have not yet completed the required science or social science courses may fulfill any or all of these requirements by taking a New York State College Proficiency Subject Examination (CPE) or a College Level Examination Program Subject Examination (CLEP) in biology, chemistry, psychology, or sociology.

Individuals who plan to submit proficiency examination results in any of these subjects must have taken the examinations no more than five years prior to the anticipated year of enrollment.

Applications

Prospective students should write the Office of Admissions, Cornell University-New York Hospital School of Nursing, 515 East 71 Street, New York, New York 10021, for forms to be used in making application for admission.

Important Dates

For College Graduates

The following information and dates apply for applicants to the Program for College Graduates. Requests for applications may be made any time after May 1, 1977, for admission in September 1978. Admissions applications are due by October 1, 1977, for early review and by January 1, 1978, for regular

review. Applications will be released and accepted after January 1, if places remain to be filled.

Early review decisions are announced by January 1. Though all qualified applicants who have completed their applications by October 1 will be interviewed in the fall, only those meeting the criteria for early review will receive their admissions decision by January 1.

Decisions made by regular review are announced in March and April. Applications submitted after January 1 will be acted upon as they are completed. Those applicants who do not qualify for the program will be notified once their application has been reviewed.

Each applicant accepted by regular review must advise the School of his or her decision regarding admission within two weeks of acceptance. Upon acceptance, early review applicants will be advised of the date their decision is due.

For Registered Nurses

The following information and dates apply for registered nurse applicants. A preliminary application may be filed at any time. (No fee is required.) This entitles the applicant to advisement relative to planning a program of study to meet the general education requirements. The formal application for admission should be filed by applicants who have earned at least forty-five of the required sixty general education credits.

The application and all accompanying forms must be received by April 1 for the fall semester and October 1 for the spring semester. Applicants will be notified about their admission status by July 1 for the fall semester and January 1 for the spring semester.

For All Applicants

The Financial Assistance Application must be filed by March 1. Decisions are announced May 1. Offers must be accepted within three weeks of receipt.

Visits to the School

Members of the staff are available to meet with prospective applicants to discuss the School's admission requirements, application procedures, and the appropriateness of the applicant's general education in satisfying the requirements for admission. Appointments for these visits are required. Prospective applicants are asked to call the Admissions Office to schedule an appointment.

An informational visit does not take the place of the required interview, which is scheduled after application materials have been submitted and reviewed.

Grades and Academic Standing

The Academic Standards Committee, composed of faculty representing the programs of the curriculum and the dean or her representative, meets at least four times each year to review the academic records of students in the School. The committee is responsible for reviewing the records of students whose cumulative average does not meet minimal standards, whose

cumulative average has dropped seriously since the previous semester, or students whose performance in the major nursing course is below the acceptable level of achievement.

The committee recommends to the faculty the candidates for the degree of Bachelor of Science in Nursing. The committee acts on the records of those students who qualify for the Dean's List and those who are to be considered for graduation with distinction.

The grading system is based on a 4.0 scale as follows: 4.0-3.5 (100-90% = A), excellent to very good; 3.4-2.5 (89-80% = B), good; 2.4-1.5 (79-70% = C), satisfactory; 1.4-0.5 (69-60% = D), below acceptable level; 0.4-0.0 (below 60% = F), failing.

S and U Grades: Final grades of S (satisfactory) and U (unsatisfactory) are reported for most clinical laboratory courses and for a limited number of other courses. A grade of S in clinical laboratory courses is equivalent to 2.0 or higher; a grade of U means failing. For other courses, a grade of S is equivalent to 1.5 or higher and a grade of U to 1.4 or lower. The specified course credit will be given for grades of S; no credit will be given for grades of U. S and U grades have no numerical value and are not used in computing grade point averages.

Incomplete Grades: An incomplete (INC) is a temporary grade. It is given only when students are unable to complete all the requirements for a course because of illness and/or prolonged absence due to circumstances beyond their control.

Students who receive an incomplete in a course are required to complete the course work within one year after the grade is recorded or the grade will be changed to a U. If the incomplete is in a course that is prerequisite to another course, the student must complete the required work before registering for the subsequent course.

The faculty may grant approval for a student to repeat a course and/or a full semester if, for acceptable reasons, the student's achievement was below the School's expected level. In such instances, the first grade(s) will not appear on the official records. Notations to this effect will be entered on the back of the transcript but will under no circumstances be disclosed.

Notice of Grades: Grades are issued directly to the students at the end of each semester. Parents and guardians may be notified when a student is asked to withdraw from the School.

Exemption of Courses: Because most college graduates who enroll in the School of Nursing have earned a number of college credits in psychology, all students who accept a place in the entering class are required to take an exemption examination for the course Social Science 109, Life-span Growth and Development, Part I before they enter the school. The CLEP test "Human Growth and Development Subject Examination" is used as the exemption examination.

College graduates who wish to obtain credit by examination for the Biological Science 133 course may also take an exemption examination. The American College Testing Program's proficiency examination in anatomy and physiology and the New York State College Proficiency Examination subject examination

in anatomy and physiology are used as the exemption examinations.

Detailed information concerning these examinations and registration materials are forwarded to all students once they have accepted a place in the class. Upon successful completion of either exemption examination, the student's transcript will show the course and credits earned by examination. Students who are successful on an exemption examination but who feel they want the course content must register for the course and fulfill all requirements. It is not possible to audit these courses. There will be no tuition refund for those who exempt.

Auditing Courses: Students who wish to audit a course by regular attendance with the privilege of participating in class discussions and obtaining all course materials may do so by making formal application to the Office of Records. Courses with limited enrollment, laboratory courses (clinical and science), and seminar courses will not be open to auditors. An audited course will not appear on a student's record.

Changes in Programs of Study: Students may change their registration for elective courses during the one week change-of-program period at the beginning of each semester. A Change of Program Request form signed by the student's adviser must be filed in the Office of Records by the second Tuesday of the fall semester and the second Monday of the spring semester. Students will be notified of the action on their request by the Office of Records. Requests to add courses will be honored within the enrollment limitations of the course.

Academic Standing

In order to be in good standing for a semester, a student must: (1) attain a grade of 2.0 or better in nursing theory, 1.5 or better in related courses, and S in clinical laboratory courses; and (2) have a minimal cumulative average (M.C.A.) for the semester as follows: first semester, 1.6; second semester, 1.76; third semester, 1.82; and fourth semester, 1.83.

Students whose grades or averages fall below these levels at midsemester and/or end of semester will be placed on academic warning by the Office of the Dean. A student may remain on academic warning for only one semester. If the conditions of the warning have not been removed by the end of the next semester, the student will be required to withdraw from the School of Nursing.

Students who have met all of the admission requirements are classified as *matriculants*. Students who have not yet met all the admission requirements are considered *nonmatriculants*. Nonmatriculant students will be notified when they have achieved matriculant status by the director of admissions.

Dean's List

Students who attain a semester average of 3.50 without any grades below 1.5 or U grades and have completed all of the required course work by the end of the semester are eligible for the Dean's List. Only students who are enrolled as full-time students and have achieved matriculant status are eligible for the

Dean's List. The Dean's List will be posted by the Office of Records.

Dismissal

The faculty of the School of Nursing reserves the privilege of retaining only those students who in their judgment demonstrate satisfactory progress towards the degree, meeting the requirements of scholarship, mental and physical health, and personal attributes considered suitable for professional nursing practice. Students whose suitability for nursing is questioned may be asked to withdraw from the School.

Withdrawal

A student may withdraw from the School at any time. The designation of withdrawal in good standing will be recorded if the student's academic and personal performance is in accord with the standards of the School and the financial record has been cleared. A student who plans to withdraw must notify the Office of Records and discuss the reason for leaving with the dean.

Degree Requirements

The degree of Bachelor of Science in Nursing is conferred by Cornell University upon recommendation of the faculty of the School of Nursing. In order to qualify for the degree, the candidate must have attained the required cumulative average for the total program and have completed satisfactorily all theory and clinical laboratory courses outlined in this *Announcement* and/or required by decision of the faculty.

Registered nurses must complete thirty required credits in the School of Nursing to be eligible for the degree. College graduates must complete a minimum of sixty-two required credits in the School of Nursing to be eligible for the degree.

Bachelor of Science with Distinction

Effective with the Class of 1978, candidates for the degree of Bachelor of Science in Nursing with distinction must fall within the top 15 percent of the graduating class. To be eligible for this honor, a student may not have been on academic warning for any reason while at the School of Nursing and must have adhered to professional and ethical standards of behavior. In addition, the registered nurse students must have achieved a grade of "B" on all required New York State College Proficiency Examinations in nursing to be eligible for consideration.

Sigma Theta Tau

In 1968 the School received a charter for the Alpha Upsilon chapter of Sigma Theta Tau, the National Honor Society of Nursing. The purposes of the society are to recognize the achievement of scholarship of superior quality, to promote the development of leadership qualities, and to encourage creative work while fostering high professional ideals. It is hoped that the commitment of the individual to the ideals and pur-

poses of professional nursing will be strengthened by participation in the honor society.

Students who have completed at least one-half of the nursing major, and have a minimum grade point average of 3.0, are considered for induction into Alpha Upsilon chapter. In addition to demonstrated superior scholastic achievement, a candidate also must give evidence of professional leadership potential.

Eligibility for State Registration

Graduates of the generic program are eligible for admission to the licensing examination in all states. Since states require a nurse to be licensed in order to practice nursing, each graduate is expected to take the first licensing examination that is administered following completion of the program. Students should carefully consider the licensure rules of the state in which they plan to practice and the licensure requirements of their employer when deciding where to take the examination. Satisfactory performance on the licensing examination results in state registration of the license and the designation of Registered Nurse.

Expenses

The costs of attending the School of Nursing fall into two general categories. The first category includes certain fixed charges for tuition, fees, and charges for services provided by the School. The second category includes living costs and items of personal expense. To help students prepare their individual budgets an estimated budget is published. Although expenses, excluding fixed fees, vary for the individual student, the estimated budget reflects the usual expenses for single, full-time students living in University housing.

Estimated expenses for the academic year include:

<i>Item</i>	<i>Amount</i>
*Tuition	\$3000
Books and supplies (first year)	300
" " (second year)	200
Uniform supplies (first year)	200
Special course fees	70
Transportation (clinical experience)	150
Housing	1050
Food and maintenance	1300
**Health insurance	220
Incidental expenses	1000

* Tuition: A semester of full-time study consists of 12-18 credit hours of course work. This may be any combination of required, elective, or audited courses. The full tuition will be charged and there will be no prorated refund for courses dropped or exempted; nor will there be an additional charge for electives added within this number of credit hours.

** Health insurance: Each student is required to be enrolled in a health insurance plan. An associated hospital plan is available to all students in the Medical Center. Students will be exempt from enrollment in the Center plan if they give evidence of carrying comparable health insurance and sign a waiver to that

effect at the time of admission and every semester thereafter while registered in the School. Students enrolled in the plan available at the Medical Center will be billed each semester. These charges will appear as a separate item on the bill and will reflect the current insurance rates. Questions concerning waivers or billing should be discussed with the assistant to the dean on S 10.

A semester of part-time study consists of eleven or fewer credit hours of course work. This may be any combination of required and elective courses. The maximum number of credits to be taken by an individual registered for part-time study will be by advisement. Tuition of \$100 per credit hour will be charged.

Fees

Application Fee. (For applicants registered in a general education program.) A fee of \$20 must accompany the application for first admission.

Transfer Fee. (For applicants registered in a baccalaureate nursing program.) A fee of \$25 is charged to evaluate the record of a student already registered in a baccalaureate nursing program who wishes to apply for transfer to the School.

Reinstatement Fee. (For students previously registered in the School.) A fee of \$10 will be charged to evaluate the record of a former student seeking to reregister in the School.

Acceptance Fee. A nonrefundable deposit of \$50 is required of every student upon acceptance for admission to the University; when the student first registers, it is used to cover matriculation costs. The deposit does not apply to the first semester's tuition and fees.

Late Registration Fee. A fee of \$5 is charged to each late registrant. First-semester registration closes at 5 p.m. on September 2, 1977. Second-semester registration closes at 5 p.m. on Friday, January 27, 1978.

Special Fees

Fee for Auditing a Course. There will be no charge for full-time students. Part-time students will be

charged \$45 for the privilege of receiving the course outline, the bibliography, and attending selected classes.

Course Fees

Certain nonrefundable fees are charged during the semester in which a student is registered for the designated course. (See course fee schedule on this page.) This fee covers the use of school equipment and supplies necessary for meeting the objectives of the course. In certain instances there will be an additional charge for items lost or damaged.

Payment of Bills

Bills for fixed charges are distributed approximately two weeks prior to each semester. The bill is due and payable the first day of each semester, unless special arrangements have been made with the School. The amount, time, and manner of payment of tuition, fees, or other charges may be changed at any time without notice. Students who have questions regarding their bills or the payment of grants or loans should see the assistant to the dean on S 10.

Provision is made for the payment of bills during the registration period at the beginning of each semester. Financial assistance awarded by the School, except loans, will be applied directly to the fixed charges. No reimbursement of assistance offered as a grant is anticipated unless the student voluntarily leaves the School during the course of a semester. In this case, a proportionate amount of the grant, not to exceed one-half, is to be reimbursed.

In order for a student to remain in good standing, receive an honorable withdrawal from the School, or participate in the commencement exercises, all bills must be paid and satisfactory arrangements made for the future repayment of loans. Any student who registers for a semester and then withdraws before the semester bill is paid must make a satisfactory settlement of tuition and fees due before the withdrawal form can be signed.

A student completes arrangements for a loan authorized by the School by signing a note and receiving the check during the registration period. The proceeds of a loan must be applied to the balance due on School charges. They may not be claimed as a credit on the bill.

Course Fee Schedule

<i>Course</i>	<i>Nonrefundable fee</i>	<i>Additional charges for loss or damage</i>
N 156	\$25	none
N 157	\$ 5	Denver developmental kits
N 256	\$ 5	Sphygmomanometer and cuff
		supplies in public health bag
N 257	Charges depend on selection of final clinical experience	Charges depend on selection of final clinical experience
N 360	\$10	Assessment bag and any part of contents
N 365 or N 366	\$ 5	none
N 367	\$ 5	none
Epidemiology	\$ 8	none

New York State tuition assistance awards may not be claimed as an exemption from the tuition bill since the state prepares individual checks, that are payable to the student, and sends them to the School for distribution. Checks for these awards will not be available at the time tuition and fees are due. When an extension of time for payment of part or all of the tuition and fees is granted, based on a New York State award, it is with the understanding that should the state for any reason fail to prepare a check for the amount of the award, the student is personally responsible for the amount due.

Refunds

Part of the tuition will be refunded to students who officially withdraw during the first half of the semester. The refund will be based on a deduction of 10 percent a week on all charges as of the first day of the semester. No refund will be made after the midsemester.

Financial Assistance

In general, students plan to meet the cost of their education through self-help (loans and employment). To the extent that is possible, parents and spouse are expected to contribute to the cost of a student's education.

The Cornell University-New York Hospital School of Nursing participates in the College Scholarship Service (CSS) of the College Entrance Examination Board. Participants in CSS subscribe to the principle that the amount of financial assistance granted a student should be based upon financial need. The CSS assists colleges and universities and other agencies in determining the student's need for financial assistance. Each entering student who seeks financial assistance is required to submit a copy of the Financial Aid Form to the College Scholarship Service by March 1, designating Cornell University-New York Hospital School of Nursing as one of the recipients. The Financial Aid Form should be obtained from the School of Nursing.

Financial assistance is offered to matriculated students, usually as a combination of scholarship or grant and loan. The scholarships and grants administered by the School are described below. These are assigned on the basis of need rather than academic rating.

Loans may be available from a fund established jointly by the School and the federal government. No more than \$2,500 may be borrowed by a student during an academic year. The amount of the loan awarded to an eligible student is dependent upon the total amount of federal funding made available to the School. To be eligible for either a grant or a loan, a student must intend to be matriculated and enrolled at least half-time and demonstrate the need for financial assistance. In addition, the student must be a citizen or national of the United States, or have immigration status and personal plans to justify the conclusion that he or she intends to become a permanent resident of the United States.

Application for Financial Assistance

Entering students who will need financial assistance should return the Financial Assistance Application with their application forms by March 1. These will be forwarded to the chairperson of the Financial Assistance Committee. The Financial Aid Form should be filed through the College Scholarship Service by March 1 of the year the applicant anticipates admission to the School of Nursing.

Students enrolled in the School who expect to register for the next academic year and who anticipate the need for financial assistance, should complete their applications by March 1. Students receiving financial assistance may arrange an interview with the chairperson of the committee during the fall semester to review their awards. All students, whether receiving financial assistance or not, whose financial situations change during an academic year, should feel free to discuss their problems with the chairperson of the committee.

Financial Assistance Administered by the School

Vivian B. Allen Scholarship Fund. Established as an endowed fund by gifts from the Vivian B. Allen Foundation, Inc., income from which is used to provide scholarship aid annually for one or more students in need of financial assistance.

Allstate Foundation Grant. A grant is made available to the School each year to assist a student throughout the program.

Juliette E. Blohme Scholarship Fund. Established as an endowed fund by Dr. and Mrs. George H. Van Emburgh as a memorial to Juliette E. Blohme of the class of 1922 through a gift of \$6,000, the interest on which may be used in whole or in part each year.

Fund of the Committee for Scholarships. A fund, established and maintained by a committee of women interested in the School of Nursing, to assist students who need financial help in order to prepare for nursing. Awards from the fund are made to entering students and to students enrolled in the School.

Davison/Foreman Foundation Grant. Grants from this foundation are allocated in the spring semester for the education of women working for a college degree. The awards are made to students enrolled in the School.

Samuel J. Moritz Scholarship Fund. Established in 1960 as a memorial to Samuel J. Moritz, and made possible by a gift from Edward Moritz and LeRoy Moses, executors of his estate. The income provides scholarship aid annually to one or more students in need of financial assistance.

Cleta and Henry Offerman Scholarship. An endowed fund established in 1976 by a bequest from the Estate of Henry Offerman. The income from the fund is to be awarded to worthy students with professional potential who maintain satisfactory scholastic

grades and who require financial assistance to complete the course in nursing.

Helena Rubinstein Foundation, Inc. Grant. Grants from this foundation are made available to the School and administered to students who have demonstrated need for financial assistance.

The Louis and Rachel Rudin Foundation Scholarship. Established in 1973 pursuant to the provisions of the will of Edward Rudin to provide for tuition and support of worthy students who would otherwise not be able to pursue careers as nurses. Scholarships are awarded to citizens of the United States without regard to age, sex, creed, or race.

Tudor Foundation Student Loan Fund. A loan fund established by the foundation and administered by the School to assist students in need of aid who hold scholarships or grants to defray the cost of tuition and who need further financial assistance to enable them to attend the School. Loans from the fund are not to exceed \$1,000 to any one student in any one school year.

The Christian C. Yegen Scholarship Fund. Established in the spring of 1965 as a memorial to Mr. Christian C. Yegen, father of an alumna of the Cornell University-New York Hospital School of Nursing.

Financial Assistance Administered by Outside Sources

New York State Regents Scholarships, Grants, and Loans

The following assistance is available for residents of New York State.

Tuition Assistance Program. Grants up to \$1,400 yearly depending on need and tuition paid, with a minimum yearly grant of \$100. For those students who demonstrate a capacity to pursue a degree and plan to attend college, and to those who are presently in college and maintain satisfactory academic performance.

For more information on these awards, write to the New York State Higher Education Services Corporation, Tower Buildings, Empire State Plaza, Albany, New York 12255.

New York Higher Education Assistance Corporation sponsors a program through which students may obtain loans from local savings banks.

General Information

School Organization

All matriculated students are members of the Student Organization. The functions of the organization are to contribute to the development of the professional education of the individual student through cooperation with the medical community and to provide an all-inclusive organization through which student concerns may be voiced and resolved.

The Student Senate represents the Student Organization in determining and administering policy. Its aims are to coordinate and supervise the activities of the standing committees, to promote awareness of and involvement in the growth of the nursing profession, and to act as a channel of communication for the students within the academic nursing community and the broader medical community.

Housing

Facilities

Students attending the School of Nursing may live in University housing or select their own living facilities within the community. Applications for University housing should be available about April 1.

There are two main residence facilities for nursing students. Assignments to a particular facility are made based upon a priority system established by the students.

In general, single first-year nursing and medical students are assigned to F. W. Olin Hall, which is located at 445 East 69 Street, directly across from the Medical College entrance on York Avenue. Olin Hall contains a gymnasium, snack bar, lounge rooms, and 278 residence rooms. Each room is furnished as a single bedroom-study but, since two rooms share a connecting bath, they may be used as a suite for two students, if desired. The rooms are completely furnished and linen service is provided. Student rental for an academic year, which runs from August 29 to May 29, is \$990.

Jacob S. Lasdon House, located at 420 East 70 Street, provides fully furnished, carpeted, and air-conditioned apartments with kitchens, dining areas, living rooms, and baths for both second-year single and all married nursing students, as well as medical and graduate students registered in Cornell University. Single students may share a one- or two-bedroom apartment. By using the living room and the bedroom(s) as individual bedroom-study rooms, two students may share a one-bedroom apartment and three students may share a two-bedroom apartment. Four single students may share a two-bedroom apartment if two students share each bedroom. There are a limited number of studio apartments for married students. Married students without children will find the studio and one-bedroom apartments suitable. Married students with children will find the two-bedroom apartment more appropriate. The rents for the various units in Lasdon House range from \$231 per month to \$389 per month for the 1977-78 academic year, which runs from August 29 to May 29.

There are also some apartments available for married students in Livingston Farrand Apartments on 69 Street.

Regulations

Students signing leases for University housing must notify the appropriate office at least thirty days in advance of any move or change of roommate.

Students living a distance from the School should consider the time to be spent in commuting each day.

22 Facilities for Instruction

Classes and clinical experience may be scheduled Monday through Saturday in a combination of hours that may begin as early as 7:30 a.m. and end as late as 9:00 p.m.

All students must keep the Office of Records informed of their correct address and telephone number. The *Student Handbook* outlines the system used for distribution of official School communications to students. Each student is expected to follow the procedure to avoid delay in responding to the communications.

Recreational Facilities

Because the School believes that the education of young men and women today includes healthful social relationships, provisions have been made to encourage the development of such relationships in the life of the student.

A social committee is responsible for a full and varied social calendar that includes such activities as dances, coffee hours, and suppers. Other activities in which students may participate are the yearbook and singing groups. The director of student relations is available at all times to advise students in the organization of discussion groups and in the planning of social and cultural activities. University facilities shared for recreation must be reserved well in advance through the appropriate offices as noted in the *Student Handbook*.

Health Services

Personnel Health Service of The New York Hospital, located in J-1, provides comprehensive health care for students enrolled in the School. This includes a physical examination and routine tests following the initial registration in the School, an ongoing immunization program, ambulatory medical care in the outpatient clinics, and, when indicated, admission to The New York Hospital. Only matriculated full-time students are eligible for these services.

Health insurance is required. At registration, each student must either enroll in the Blue Cross/Blue Shield of Greater New York plan available at the School or provide evidence of equivalent health insurance coverage and sign a waiver. For insurance coverage through the School, a fee will be charged each semester based on the current insurance rate. (See Expenses p. 16.)

Students are expected to take corrective action for any health problems, including dental work, before registration in the School. Any subsequent elective procedures are to be scheduled during vacation periods.

If, in the opinion of the Personnel Health Service physician, the condition of a student's physical or emotional health makes it unwise for the student to remain in the program, the School authorities may require the student to withdraw either temporarily or permanently at any time.

Counseling Services

The School maintains active counseling services which are available to all students who need assistance, either in connection with routine matters that

may come up in their work in the School or in connection with special personal problems.

The director of student relations assists students in every way possible in their educational, personal, and social adjustment, and cooperates with the faculty in helping students in these areas. The director also helps students to locate those members of the staff who are best qualified to be of assistance in relation to the particular problem at hand.

Group therapy also is made available through the office of the director of student relations to assist students whose effectiveness and adjustment are impaired by personal concerns.

Division of Continuing Education

The Division of Continuing Education is an organized educational unit of the School of Nursing under the administration of the dean.

The division offers organized and planned presentations of appropriate educational experiences at a professional level that are university oriented and related to the needs and purposes of the employment or practice situation. The programs offered by the division have their origins in selected areas of nursing practice. The objectives of the programs are directed toward enabling registered nurses, both in practice and returning to practice, to update and expand their knowledge and skills in circumscribed areas of clinical nursing practice.

A variety of special workshops and formalized training programs are conducted cooperatively with the Cornell University Medical College; the professional staffs of The New York Hospital-Cornell Medical Center; the Department of Health, Health Services Administration of the City of New York; the Visiting Nurse Service of New York; and other cooperating community agencies.

Information on programs being offered, applications, and fees may be obtained by writing to the Division of Continuing Education, 515 East 71 Street, New York, New York 10021.

Facilities for Instruction

The facilities of The New York Hospital-Cornell Medical Center provide the setting for the major part of the educational program offered to students in both divisions of the School of Nursing. The classroom and office facilities for the School are located at 515 East 71 Street. In addition to the usual classroom and conference room facilities, there are audiovisual and learning laboratories for the practice of basic nursing skill.

In order to meet the objectives of the program, the School of Nursing contracts with selected voluntary and government agencies for additional clinical experiences. It is a requirement of the program that each student participate in the care of patients in the community. Representatives of various government and voluntary agencies plan with the faculty for

appropriate ways to contribute to the student's knowledge of the community and the organization for human services. Individuals who feel it would be difficult to travel within some parts of the New York City community and to participate fully in assigned experiences, should give thoughtful consideration to this before registering in the program of the School.

The library, in the Samuel J. Wood Library and Research Building at 1300 York Avenue, is shared by the students and the faculties of the School of Nursing and the Medical College and the staff of The New York Hospital.

The reading room of the library is located on the first floor. Adjoining the reading room are the sections for current journals, reference works, and monographs. The book stacks and carrels are on two floors below the main reading room. 1,600 current journals are received each year; the total collection has reached more than 100,000 volumes.

The library also is equipped with a communication terminal linked to a computer to provide searches of the medical literature. The Information and Reference Department receives requests for these searches. Typing and duplicating services and, most importantly, a staff willing to help also are available.

The clinical nursing departments have small libraries containing literature pertaining especially to the subject matter of the department. These collections, interlibrary loans, and photoduplicate copies from other libraries, including the National Library of Medicine, supplement the main library.

All students have clinical experience on the patient units of The New York Hospital. The Hospital comprises five clinical departments—Medicine, Surgery, Lying-in Hospital, Pediatrics, and The Payne Whitney Clinic (psychiatry). Each of these units (largely self-contained) has facilities for inpatients and outpatients, and for teaching and conducting research. The Hospital has approximately 1,100 beds and 90 clinics.

Description of Courses

Nursing Courses

All academic courses of the University are open to students of all races, religions, ethnic origins, ages, sexes, and political persuasions. No requirement, prerequisite, device, rule, or other means shall be used by any employee of the University to encourage, establish, or maintain segregation on the basis of race, religion, ethnic origin, age, sex, or political persuasion in any academic course of the University.

156 Introduction to the Nursing Process, Care of the Adult Patient Fall. Credit: five hours, theory; five hours, clinical laboratory. M. Sugimoto and faculty.

The first unit focuses on the profession of nursing and the components of the nursing process. Selected cognitive, psychomotor, and interpersonal skills are presented. In the second unit, concepts essential to the nursing care of adult patients with representative medical-surgical health problems are studied. Attention is given to the following parameters of each health problem: epidemiology, preventive measures, disease process, therapeutic regimens, and physical and psychosocial effects on the patient and family. Therapeutic nutrition and pharmacology are correlated with the health problems. The influence of these factors on nursing judgments and actions is explored. Experience in the clinical laboratory provides opportunity to apply theoretical concepts and skills in caring for patients.

157 Parent-Child Nursing Fall and spring. Credit: five hours, theory; five hours, clinical laboratory. Prerequisite: Nursing 156. Registration for this course is by advisement. E. W. Haas and faculty. Emphasis is placed on nursing assessment and intervention in relation to health needs of women, their children, and the role of the father. Theory and practice related to social trends, family influences, and normal growth and development are integrated throughout the course. Experiences are provided for the promotion and maintenance of optimal health to families in a variety of settings.

160 Interpersonal Processes in Nursing Fall. Credit: one hour. Prerequisites: psychology, three credits; sociology, three credits. L. Schwager.

Concepts of behavior, anxiety, socialization, dying, death, and grief are studied in the context of the nurse-patient relationship. Emphasis is on principles of communication and interviewing. The content is prerequisite to subsequent nursing courses.

256 Community Health: Care of Patients with Environmentally Related Health Problems Fall and spring. Credit: five hours, theory, five hours, clinical laboratory. Prerequisites: Nursing 156. Registration for this course is by advisement. D. Pearl-mutter and faculty. Focus is on the prevention and control of selected community health problems such as cerebral vascular accident, mental illness, and social problems such as addiction. The modality of nursing care will be both individual (therapeutic nurse-patient relationship) and group (family) in acute psychiatric hospital settings and the community. The common denominator utilized in teaching the selected community health problems will be the epidemiological approach. Experience is provided for students to observe and participate in group process.

257 Dimensions of Nursing Spring. Credit: four hours, theory; eight hours, clinical laboratory. Prerequisites: Nursing 156, 157 256, and 360. J. B. Dorie and faculty. Selected aspects of professional nurse practice are studied: care of patients with multiple and complex needs, including those with cancer; sharing responsibility for nursing care of groups of patients; and participating in the leadership activities related to nursing care. A variety of settings will be used for clinical learning.

360a Assessment of Health Status of Adults Summer, fall, intersession, and spring. Credit: two hours. Prerequisite: Biological Science 133; prerequisite or concurrent enrollment in Biological Science 136. Required: all students. M. Miller. Supervised practice in techniques of observation, interviewing, percussion, palpation, and auscultation with emphasis on normal ranges of the healthy individual. The course includes relevant anatomy, physiology, and pathology basic to understanding the significance of findings. Four hours of combined conference and practice are required each week.

360b Assessment of Health Status of Children

Fall, intercession, and spring. Credit: One or two hours. Prerequisite: Biological Science 133; prerequisite or concurrent enrollment in Biological Science 136. Supervised practice in techniques of observation, interviewing, percussion, palpation, and auscultation with emphasis on normal ranges of the healthy individual. The course includes relevant anatomy, physiology, and pathology basic to understanding the significance of findings. Four hours of combined conference and practice are required each week.

365 Clinical Nursing—Acute Care of Children or Adults

Fall. Credit: five hours. Prerequisite: Course 360 must be taken prior to or concurrently with this course. Required course: registered nurses not taking Course 366. Limited enrollment and by advisement. B. Friedman.

Within this clinical experience core, the student has the opportunity to develop proficiency in the exercise of clinical judgment and skills requisite to the supportive management of children or adults who require continuous, comprehensive observation in an intensive or critical care environment. Opportunities are provided for systematic study in a clinical area of interest. The focus is on nursing functions, assessment and problem-related intervention through health counseling, health education, and preventive, restorative, and therapeutic measures. Associated seminars serve as a mode for extending the scope of knowledge and experience and for developing professional peer communication and decision-making skills. Fifteen hours of combined practice and correlated seminars are required each week.

366 Clinical Nursing—Long-term or Chronic Illness of Children or Adults

Fall. Credit: five hours. Prerequisite: Course 360 must be taken prior to or concurrently with this course. Required course: registered nurses not taking Course 365. Limited enrollment and by advisement. B. Friedman.

Within this clinical experience core the student has the opportunity to develop proficiency in the exercise of clinical judgment and skills requisite to the supportive management of children or adults with long-term or progressive chronic illness. Opportunities are provided for systematic study in a clinical area of interest. The focus is on nursing functions: on assessment and problem-related intervention through health counseling, health education, and preventive, restorative, and therapeutic measures. Associated seminars serve as a mode for extending the scope of knowledge and experience and for developing professional peer communication and decision-making skills. Fifteen hours of combined practice and correlated seminars are required each week.

367 Clinical Nursing—Primary Care of Children or Adults

Spring. Credit: five hours. Prerequisite: Nursing 365 or 366. Required course: registered nurses. Limited enrollment and by advisement. B. Friedman.

Within this clinical experience core the student has the opportunity to develop proficiency in the initial screening assessment of the psychosocial and physical status of children or adults and responsibility of

the continuum of care of selected patients within the protocols mutually agreed upon by medical and nursing personnel. Experiences offer opportunities for the reinforcement or development of skills in case finding, interpretation of selected laboratory tests, health counseling, health teaching and techniques of surveillance and management of care for the selected patients (children or adults) in ambulatory care settings. Associated seminars serve as a mode for extending the scope of knowledge and experience and for developing professional peer communication and decision-making skills. Fifteen hours of combined practice and correlated seminars are required each week.

Professionally Related Courses

133 Biological Science Fall and spring. Credit: three hours. Required course: all students unless exempt by approved examination. V. Stolar.

An introduction to the fundamental mechanisms of human physiology. The course progresses from the cell to the complexities of human control systems, utilizing at each level of increasing complexity the information and principles developed previously. This approach is based on the theme that all phenomena of life are ultimately describable in terms of physical and chemical laws.

134 Biological Science Fall and spring. Credit: three hours. Prerequisite: Biological Science 133. Required prior to or concurrent with Nursing 157. R. S. Rubenstein.

This course includes some aspects of human reproductive physiology; male and female anatomy, sex steroids, birth control, and maternal physiology. Also covered are principles of heredity and medical genetics. There will be a survey of pathogenic microorganisms to acquaint the student with communicable diseases that are endemic and epidemic.

136 Biological Science Fall and spring. Credit: three hours. Prerequisite: Biological Science 133. Required course: all students. V. Stolar.

Morphological and functional study of the nervous system in man. Histology, neurotransmitters, gross anatomy, stimulus-response, and integrative control are covered. The physiology of striated, smooth, and cardiac muscle will be included.

140 Pharmacology Fall and spring. Credit: two hours. Prerequisite: Nursing 156 or equivalent. Required course: registered nurses; other students by advisement. R. Rubenstein.

The emphasis of the course is on the basic principles of pharmacology. These principles are elaborated in discussion of drugs acting on selected physiological systems, such as the nervous and cardiovascular. Drug interactions will be included.

247 Epidemiology Fall and spring. Credit: two hours. Required course: registered nurses; other students by advisement. R. S. Rubenstein. Introductory course in which the meaning and scope of epidemiology are considered. Relevant content is drawn from biostatistics, microbiology, environmental

studies, and health service administration. Particular emphasis is on scientific appraisal of the patterns of health and disease in society.

108 Introduction to Research Fall and spring. Credit: two hours. Required course: all students. E. Smith.

Introduction to skills requisite to critical review of published research in the health field. The purpose of the course is to develop intelligent consumers of research.

109 Life-span Growth and Development, Part I Fall. Credit: two hours. Required course: all students unless exempt by school approved examination. Faculty to be appointed.

Study of the critical stages and periods in the life cycle from birth through adolescent years. Discussion of psychophysiological and psychosocial factors that produce a range of human behavior will be based on work of theorists such as Piaget, Erickson, and Freud.

110 Life-span Growth and Development, Part II Spring. Credit: two hours. Prerequisite: 109 Life-span Growth and Development or by permission of instructor. Required course: all students. D. Schwartz. Theories and concepts relevant to the biological, psychological, and sociological aspects of aging. Emphasis is placed on the normal aging process; the significance of the usual life style of the individual and the potential consequences of interaction with physical and social environment; developmental tasks; and attitudes toward aging of individuals and society.

207 Nursing in the Social Order Fall and spring. Credit: two hours. Required course: all students. L. Schwager.

The structure and function of both formal and informal social organizations are considered, especially as they influence the work of the professional nurse in the delivery of health services.

Spanish for Health Professionals Spring. Credit: two hours. Prerequisite: one year of Spanish or the equivalent and pretesting for section assignment. Elective. Faculty to be appointed. The course assists the person already familiar with Spanish to develop skills in conversation as it relates to health care services.

Women's Health Spring. Credit: two hours, theory; one hour, clinical practicum (elective). Prerequisite: Nursing 157 and Biological Science 134 or its equivalent or permission of the instructor. Elective: limited enrollment. E. Smith and R. Rubenstein. An advanced seminar course in selected topics regarding the health care of women. Topics to be included

are health maintenance for women; gynecological problems; adolescent services; population and epidemiological approaches to identifying problem areas in women's health; and the influence of the women's movement on health care services to women. A contract between the students and the faculty will be negotiated regarding the topics to be covered. Class participation, individual and/or group projects, and a paper will be required.

Food and Nutrition for Health Spring. Credit: two hours. Prerequisite: Nursing 156 or its equivalent and Biological Science 133 or its equivalent prior to or concurrently with this course. Elective: limited enrollment. D. Erlander.

A study of the multiple factors, such as culture, religious-philosophic orientation, and health status, that affect food intake. Experience will be gained in assessing food intake with emphasis on helping individuals sustain or alter their eating patterns to promote quality of life. Attention will be focused on normal nutrition with or without modified diets.

Independent Study Offers the student an opportunity to delineate an area of interest for guided, systematic study under the sponsorship of a faculty member. Planned essentially for the winter intersession or summer session, on- or off-campus study is possible for credit ranging from one to four hours. Registration by endorsement of a faculty sponsor. D. Pearlmuter, E. Smith, and selected faculty.

Guided Study Offers qualified students an opportunity to participate in a specially designed program of study and course visitation under the direction of a faculty member. It permits participation in classes, seminars, conferences, library research, and selected nursing service programs. Offered during the regular term dates or in January. May be taken for credit or no credit. Request for attendance is filed in the Office of the Dean. A special fee is established after consultation with the dean.

Clinical Nursing Practicum—Selected Health Problems of Children or Adults January intersession. Credit: none. Professors of clinical practice and clinical preceptors.

A clinical practice experience in the assessment, planning, provision, and evaluation of nursing care for patients in selected patient care settings of The New York Hospital. Nursing Service personnel, head nurses, or clinical specialists will function as preceptors. A three-week period of practice and seminars is required. Student placement for clinical experience is dependent upon restrictions that relate to patient care services, the availability of nursing service personnel resources, and nursing service administrative policies. Priority is given to senior students.

 Bessie A. R. Parker, B.S., R.N., Professor Emeritus of Nursing
 Veronica Lyons Roehner, M.A., R.N., Professor Emeritus of Nursing
 Henderika J. Rynbergen, M.S., Professor Emeritus of Science

Class of 1978

The name of the student is followed by his or her home address. The college or university from which the student transferred is given in parentheses.

Program for College Graduates

Amand, Robert, Arlington, Massachusetts (University of Massachusetts)
 Askue, Elizabeth, Providence, Rhode Island (Brown University)
 Balmir, Roselyne, Cambria Heights, New York (City College of New York)
 Barton, Louise, Bronxville, New York (University of Denver)
 Bauer, Barbara, Berkeley, California (University of California at Berkeley)
 Bent, Lisa, Ashburham, Massachusetts (Middlebury College)
 Bentley, Lawrence, Whitestone, New York (Queens College)
 Blythe, Marguerite, New York, New York (Barnard College)

Borzain, Nancy, New Haven, Connecticut (Holy Cross College)
 Brown, David, Fulton, New York (Wagner College)
 Brown, Lynn, Blasdel, New York (Colgate University)
 Buchalski, Kathryn, Brooklyn, New York (State University of New York at Albany)
 Byerly, Ann, Lincoln, Nebraska (Coe College)
 Cahill, Mary, Jackson Heights, New York (College of Mount Saint Vincent)
 Carroll, Barbara, Oakland, California (University of California at Berkeley)
 Charnock, Roberta, Brandon, Vermont (Kalamazoo College)
 Cheely, Carole, New York, New York (Syracuse University)
 Cooperman, Ellen, Flushing, New York (State University of New York at Stony Brook)
 Csinsi, John, Newington, Connecticut (Central Connecticut State College)
 Cummins, Elaine, Queens Village, New York (Queens College)
 de Mille, Polly, Milton, Massachusetts (Mount Holyoke College)
 DiCioccio, Linda, New York, New York (Columbia University)
 Dillman, Linda, Hollis Hills, New York (Ithaca College)
 Dorsey, Jean, New York, New York (Kirkland College)
 Ehrlich, Carol, Brooklyn, New York (State University of New York, College at Cortland)
 Ernst, Carol, New York, New York (Connecticut College)
 Fennell, Kim, Stratford, Connecticut (Colby College)
 Fisher, Phoebe, Sharon, Connecticut, (Tufts University)
 Fralich, Deborah, Cape Elizabeth, Maine (Smith College)
 Frankel, Judith, North Babylon, New York (William Smith College)
 Garritt, Marcie, New York, New York (Wilson College)
 Giaccio, Frances, Flushing, New York (Cornell University)
 Giles, Wendy, Aurora, Colorado (University of Colorado)
 Golub, Carolyn, Brooklyn, New York (Brooklyn College)
 Golz, Catherine, Chicago, Illinois (University of Colorado)
 Greenberg, Jean, Elmhurst, New York (Bernard Baruch College)
 Greenberg, Phyllis, West Hartford, Connecticut (University of Hartford)
 Grennen, Jean, Bellerose, New York (Fordham University)
 Grossman, Andrea, New York, New York (State University of New York at Buffalo)
 Grow, Susan, Brookline, Massachusetts (Grinnell College)
 Guida, Linda, Jamaica, New York (State University of New York at Buffalo)
 Hubbard, Nancy, New York, New York (McGill University)
 Kaplan, Beryl, New York, New York (Barnard College)
 Katzin, Anne, Litchfield, Connecticut (Beloit College)
 Kedzielawa, Carol, Poughkeepsie, New York (State University of New York at Albany)
 King, Stephanie, Brooklyn, New York (Hunter College)

- Konefal, Tanya, Fayetteville, New York (Cornell University)
- Kotelnikoff, Diane, Oakland, California (Stanford University)
- Leene, Anne, Rochester, New York (Rochester Institute of Technology)
- Lewis, Susan, Garrison, New York (Cornell University)
- Linker, Jane, Lynchburg, Virginia (Saint Olaf College)
- MacDougall, Nancy, Madison, New Jersey (Temple University)
- Margolis, Barbara, New York, New York (Eastman School of Music)
- Michaels, Nancy, Brooklyn, New York (Cornell University)
- O'Donnell, Suzanne, Brooklyn, New York (Brooklyn College)
- Oliver, Charlene, Woodside, New York (State University of New York at Binghamton)
- Ormsby, Joan, Bronx, New York (Herbert Lehman College)
- Pastorfield, Ann, North Haven, Connecticut (Elmira College)
- Phillips, Susan, Los Angeles, California (University of Southern California)
- Phipps, Patricia, Brooklyn, New York (Simmons College)
- Reith, Marianne, Gainesville, Florida (University of Florida)
- Rosenbluth, Ilene, Fresh Meadows, New York (State University of New York at Buffalo)
- Rosenthal, Robin, New Brunswick, New Jersey (Douglas College)
- Rosselot, Gail, Sunnyside, New York (Dickinson College)
- Roston, Margaret, Hewlett, New York (Cornell University)
- Rubin, Phyllis, Baldwin, New York (State University of New York at Buffalo)
- Seelig, Patricia, New York, New York (Hofstra University)
- Stanley, Susan, New York, New York (Wellesley College)
- Steel, Jane, Buffalo, New York (Goucher College)
- Stiefel, Regina, New York, New York (Georgetown University)
- Sumi, Martha, Racine, Wisconsin (University of Wisconsin)
- Tabak, Minda, Brooklyn, New York (Brooklyn College)
- Teikmanis, Mahra, Pittsfield, Massachusetts (University of Massachusetts)
- Torok, Sr. Irene, Bloomfield, New Jersey (College of Saint Elizabeth)
- Tranchino, Dawn, Northport, New York (State University of New York at Stony Brook)
- Trott, Mary, Bethel, Vermont (University of Vermont)
- Valentine, Mary Jane, New Hyde Park, New York (Holy Cross College)
- Vinci, Vanessa, Grosse Pointe Farms, Michigan (University of Michigan)
- Vitkus, James, Binghamton, New York (State University College at Oswego)
- Walsh, Sr. Monica, Bronx, New York (Marymount Manhattan College)
- Waterfield, Patricia, Brighton, Massachusetts (Skidmore College)
- Whipple, Susan, Grafton, Massachusetts (Middlebury College)
- Will, Linsey, New York, New York (Oberlin College)
- Winkler, Katherine, Austin, Texas (University of Texas)
- Young, Judith, New York, New York (Florida State University)
- Zukof, Ronda, Bayside, New York (State University of New York at Albany)

Registered Nurse Students

- Addressi, Adrienne, New York, New York (Hunter College)
- Bilog, Aida, New York, New York (University of Santo Tomas)
- Cha, Eun Sook, Long Island City, New York (Marymount Manhattan College)
- Chantanakom, Nongyao, New York, New York (Hunter College)
- Conyers, Hope, New York, New York (Hunter College)
- Cosgrove, Mary, New York, New York (Bronx Community College)
- Emanuel, Harriet, New York, New York (Queensborough Community College)
- Esteves, Raymond, Woodside, New York (Queensborough Community College)
- Frederick, Nancy, New York, New York (Suffolk County Community College)
- Herberman, Mary, New York, New York (Marymount Manhattan College)
- Kasemsawat, Chongkol, New York, New York (Hunter College)
- Lang, Cheryl, Bronx, New York (Lehman College)
- Lannen, Eleanor, New York, New York (Hunter College)
- LaRocca, Theresa, New York, New York (Marymount Manhattan College)
- Lubansky, Stasi, New York, New York (Hunter College)
- Mallahan-Reebe, Jean, New York, New York (Staten Island Community College)
- Mazzarulli, Rosalie, Bronx, New York (Hunter College)
- McCaughley, Ellen, New York, New York (Marymount Manhattan College)
- Moscati, Joan, New York, New York (Marymount Manhattan College)
- Quesada, Ofelia, New York, New York (University of the Philippines)
- Ricketts, Linda, Brooklyn, New York (Brooklyn College)
- Seddio, Nancy, New York, New York (C. W. Post College)
- Stephens, Myrna, Brooklyn, New York (Manhattan Community College)
- Watson, Kathryn, New York, New York (Englewood Cliffs College)

List of Announcements

Following is a list of *Announcements* published by Cornell University to provide information on programs, faculty, facilities, curricula, and courses of the various academic units.

Agriculture and Life Sciences at Cornell
College of Architecture, Art, and Planning
College of Arts and Sciences: Introduction
Graduate School of Business and Public
Administration
Engineering at Cornell
Graduate Study in Engineering and Applied Sciences
General Information*
Graduate School
School of Hotel Administration
Human Ecology
School of Industrial and Labor Relations:
ILR at Cornell
Graduate Study at ILR
Law School
Medical College (New York City)
Graduate School of Medical Sciences (New York City)
Cornell University-New York Hospital School of
Nursing (New York City)
Officer Education (ROTC)
Summer Session
New York State College of Veterinary Medicine

* The *Announcement of General Information* is designed to give prospective students pertinent information about all aspects and academic units of the University.

In addition to the *Announcements* listed above, the University publishes a master catalog of University courses, *Cornell University: Description of Courses*.

Requests for the publications listed above should be addressed to
