* Cornell Aeronautical Laboratory, Inc., of Cornell University is a self-supporting corporation of which the University owns one hundred percent of the capital stock. It conducts an annual business of about 14 million dollar volume in fundamental and applied research in the aeronautical field, contracting about 95 percent of its business with military agencies of the U. S. Government or sub-contractors thereto. About 90 percent of these contracts are reimbursed on the basis of cost plus fixed fee. Income derived from its contracts in the form of fees is used to finance ten fellowships and three professorships at Cornell; to decrease its indebtedness; to augment its equipment; to improve its working capital position, and to conduct its own program of internal exploratory research. Many of these internal research projects in turn generate sufficient interest in some government agency to result in placement of a contract with the Laboratory. There are no commitments in the University budget present or implied in the operation of the Cornell Aeronautical Laboratory; in fact, its appropriate share of the overall expense of the Office of the Vice President for Research is estimated at 52%.

** The Cornell Research Foundation is a self-supporting corporation owned by Cornell University. Its income is derived from royalties of licenses or other return on patents conceived by University staff and assigned to it. In a majority of cases, it manages patent matters through the Research Corporation of New York on a contract agreement basis. Its budget for 1959-60 is \$7330. Net income augmented by appropriation from reserves established for the purpose is made available to a faculty committee for distribution to staff of the University for the conduct of fundamental research. In 1959-60, the amount to be allocated is estimated at \$3750 (or \$5000 if need is demonstrated to the officers). There are no commitments on the University budget in the operation of the Cornell Research Foundation. In fact, under expenses, it pays a proportion of the salary of certain University officials in the Office of the Vice President for Research (\$1740) and Budget Office (\$300). In the case of the Office of the Vice President for Research, this amounts to 3.3% of the budget of that office for 1959-60.

CORNELL UNIVERSITY

NEW YORK STATE COLLEGE OF AGRICULTURE

BUDGET 1959-60

As of April 1, 1959

New York State College of Agriculture
at Cornell University

Summary of Appropriations

1959 - 60

State Funds:-

For the fiscal year April 1, 1959 to March 31, 1960, the State Legislature by Chapter 65, Laws of 1959, as amended by the supplemental budget and a special salary adjustment law made an appropriation of \$6,868,513 to the College for current operations. Of this amount, \$5,068,256 is for personal service, \$1,730,257 for maintenance and operation and \$70,000 is for a deficiency in accessory instruction. Both personal service and maintenance and operation were appropriated as line items.

The above figures include the following estimated amounts to cover the special salary adjustment:

Regular Line Items	\$ 200,180
Regular Temporary Service	6,200
Research and Extension Projects	22,950
Soil Conservation Committee	334
Alfalfa Weevil	642
School of Nutrition	5,111
Dairy Records	800
Teaching Food Technology	<u>1,218</u>
Total	\$ 237,435

Federal Funds:-

Legislation is pending in Congress which would increase the amounts of Federal funds available for Research and Extension work. This legislation will probably not be acted upon for several months and, in the meantime, we can only assume that the amounts available for the 1959-60 fiscal year will be the same as for the current year. However, in view of the prospect that these amounts will be changed, definite allocations of these funds have not yet been made to the departments. For this reason, the department budgets which follow do not show the amount of Federal funds which will be available for maintenance and operation. These allocations will be made as soon as the necessary information is received.

CORNELL UNIVERSITY

NEW YORK STATE COLLEGE OF HOME ECONOMICS

BUDGET 1959-60

As of April 1, 1959

New York State College of Home Economicsat Cornell UniversitySummary of Appropriations

1959 - 60

State Funds:-

For the fiscal year April 1, 1959 to March 31, 1960, the State Legislature, by Chapter 65 of the Laws of 1959, as amended by the supplemental budget and a special salary adjustment law, made an appropriation of \$1,583,090 to the College for current operations. Of this amount, \$1,190,132 is for personal service, \$346,996 is for maintenance and operation, and \$45,962 is for a deficiency in accessory instruction. Both personal service and maintenance and operation were appropriated as line items.

The above figures include the following estimated amounts to cover the special salary adjustment:

Regular Line Items	\$ 43,523
Regular Temporary Service	200
Research and Extension Projects	<u>3,498</u>
Total	\$ 47,221

Federal Funds:-

Legislation is pending in Congress which would increase the amounts of Federal funds available for Research and Extension work. This legislation will probably not be acted upon for several months and, in the meantime, we can only assume that the amounts available for the 1959-60 fiscal year will be the same as for the current year. However, in view of the prospect that these amounts will be changed, definite allocations of these funds have not yet been made to the departments. For this reason, the department budgets which follow do not show the amount of Federal funds which will be available for maintenance and operation. These allocations will be made as soon as the necessary information is received.

NEW YORK STATE AGRICULTURAL EXPERIMENT STATION

AT GENEVA, NEW YORK

BUDGET 1959-60

As of April 1, 1959

New York State Agricultural Experiment Stationat Geneva, New YorkSummary of Appropriations

1959 - 60

State Funds:-

For the fiscal year April 1, 1959 to March 31, 1960, the State Legislature by Chapter 65, Laws of 1959, as amended by the supplemental budget and a special salary adjustment law, made an appropriation of \$1,416,427 to the Station for current operations. Of this amount, \$1,176,533 is for personal service and \$239,894 is for maintenance and operation. Both personal service and maintenance and operation were appropriated as line items.

The above figures include the following estimated amounts to cover the special salary adjustment:

Regular Line Items	\$ 48,733
Regular Temporary Service	2,800
Research on Residues	<u>2,144</u>
Total	\$ 53,677

Federal Funds:-

Legislation is pending in Congress which would increase the amounts of Federal funds available for Research and Extension work. This legislation will probably not be acted upon for several months and, in the meantime, we can only assume that the amounts available for the 1959-60 fiscal year will be the same as for the current year. However, in view of the prospect that these amounts will be changed, definite allocations of these funds have not yet been made to the departments. For this reason, the department budgets which follow do not show the amount of Federal funds which will be available for maintenance and operation. These allocations will be made as soon as the necessary information is received.
