LIST OF PROGENITORS AND LEGACIES

A member of the Delta Chi Chapter of DKE who at the time of initiation is directly related to a member of Delta Kappa Epsilon, living or deceased, is said to be a legacy. The progenitor is generally the most senior Deke blood relation of that legacy.

The Cornell Deke House has a distinguished tradition of bringing legacies into the Fraternity as clearly evidenced by the following list. Perhaps the most noteworthy instance of this commitment occurred in 1938 when nine of the fifteen men pledged were legacies.¹

Legacy groups are listed in order of progenitor class year and then alphabetically by progenitor last name. Legacies within a group are in class year order. The specified relationship is with respect to the progenitor unless otherwise noted. Question marks (?) indicate some uncertainty that will be resolved before final issue of the list.
