Track Design

- From edge of track to edge of track: 30'
- From 100FT to 120FT: 4'10"
- From 29FT: 1.8FT

Six Lanes

Distance from stadium to edge of track.

Note: There is no pitch on the whole track.
The materials used for the construction of a track depend largely upon the amount of money which will be spent. The following one is a reasonably built.

Last 3"-fine cinders mixed with fine clay as binder. Ratio of cinder to clay runs from 6:1 to 3:1.

Open tile drain 9" on the edges.
