VOL. IV.—No. 30.

ITHACA, N. Y., WEDNESDAY, MAY 14, 1902.

PRICE TEN CENTS

PRINCETON WINS AGAIN.

Cornell Nine Outplayed, Outbatted, and Beaten 18-6.

The second game with Princeton, played on Saturday at Percy Field, resulted in a victory for the Tigers who piled up eighteen runs while Cornell was securing six. Aside from the weakness of the pitchers, which will account in a large measure for the defeat, the most conspicuous fault of our team was stupidity. Once, when a man on first gave a chance for a double play, Brown fielded a hit, but no one covered second, and Brown held the ball until too late to catch a runner either at first or second. In the fifth inning, Cosgrave hit to Ferguson, and had either Chase or Brown covered first, it would have been an easy out, but neither took the opportunity. With the exception of these blunders, and the poor work of the pitchers, the team did well. The fielding was good in general, and the batting fair. In all four errors were made, but only one of them figured in Princeton's run getting. Bristol in center field captured five flies, most of them difficult, one resulting in a fall over the miniature embankment at the edge of the track near the club house. The game was marred by the disposition on the part of one or two Cornell players to kick, a tendency which ought to be checked. For Princeton, beside the heavy batting of the entire team, every man of whom secured at least one hit, the fielding of Captain Steinwender is worthy of note. He accepted eight chances while fielding his position at second base.

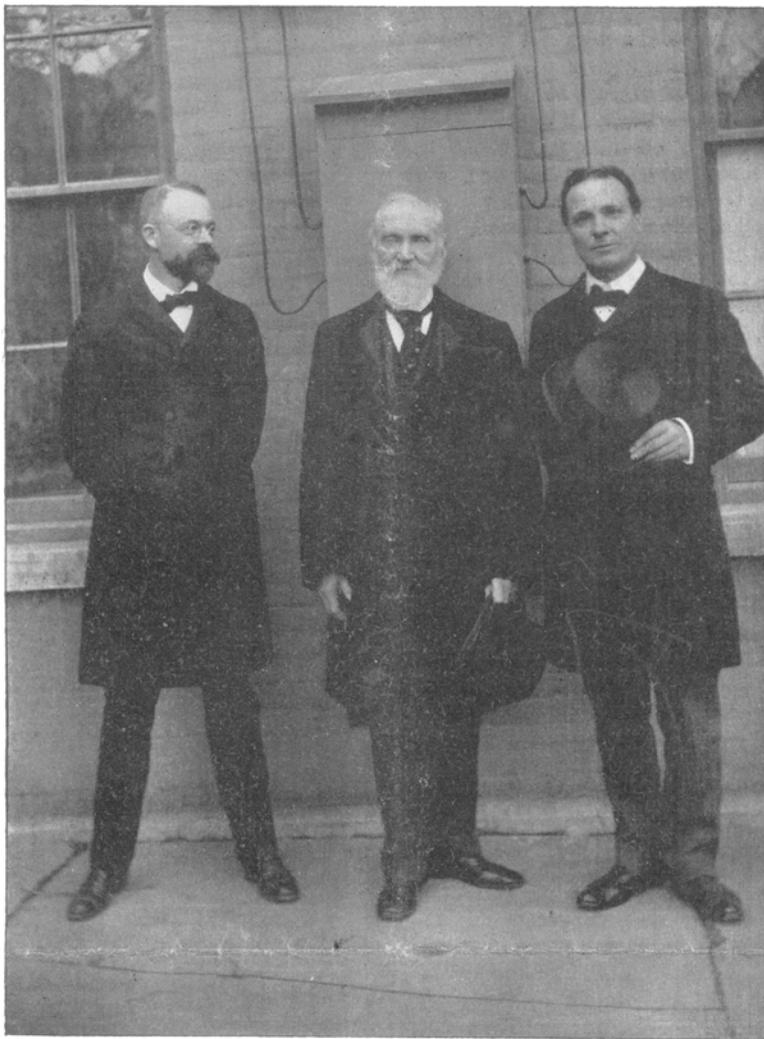

Princeton came to bat first, Steinwender hitting safely, going to second on Cosgrave's slow bunt, which the latter also beat out to first. Each advanced a base on Pearson's sacrifice. Meier hit safely scoring both, and came home a moment later on Brown's hit, which Brewster fielded slowly. Wells sent an easy one to Brown who doubled his Princeton namesake at second. For Cornell, Brewster hit safely past third base, and came home on D. K. Brown's three-bagger. Davis fielded Brown's hit to Steinwender who threw wild to Green to head off Brewster, and Brown came in. Lewis went out from Steinwender to Pearson. Whinery bunted safely along the third base line, and went to second when Bristol got a base on balls. Drake hit a slow one to Stevens who threw Bristol out at second, but Steinwender again threw wild, and Whinery and Drake scored. Chase was hit by the pitcher; but Bristol who ran for him was left on base, as Brewster struck out. Cornell 4, Princeton 3.

In the second, Davis struck out and Green fouled to Ferguson. Stevens hit struck the bag at third base and got away from Costello allowing him to reach first; he took third when Ferguson failed to catch Chase's throw, and scored on Steinwender's hit. The latter reached second on a passed ball by Whinery, but was left there when Cosgrave went out on an infield hit. Cornell's

first two batters in this inning, Brown and Lewis, failed to reach first, both being out on infield hits. Whinery hit safely, but was put out at second after Bristol's scratch hit. Cornell 4, Princeton 4.

Princeton failed to score in the third, which happened in only one other inning, the fourth. Bristol made a grand stand catch of Meier's long fly to center, after capturing a similar hit by Pearson in less sensational fashion. Brown went out on a fly to Ferguson. Drake, the first Cornell batter, fouled out. Ferguson sent a pretty one over the third baseman's head, taking second on Costello's walk and third when Pearson dropped Stevens's throw. He scored on Chase's fly to center. Brewster went out on an easy grounder to Stevens. Cornell 5, Princeton 4.

Neither side scored in the fourth, the only man to reach first being Davis of Princeton who drew a base on balls. The slaughter began in the fifth when Princeton secured five runs, four of them earned. Steinwender came up first and drew a pass. Cosgrave hit to Ferguson, but was thrown out at first by Whinery. Meier's long fly to Brewster scored Steinwender, and put Cosgrave on second. Brown hit to right scoring Cosgrave, and came home on Wells's two-bagger. Davis followed with another two-bagger and

After the reception given to Lord and Lady Kelvin at the Armory, Friday, May 2, Lord Kelvin visited the various physics laboratories of the University. The above photograph of Professor Nichols, '75, Lord Kelvin, and President Schurman was taken by Professor G. S. Moler, '75, at the east end of the Dynamo Laboratory.

scored on Green's single. Green tried to make second on Drake's throw in, but Whinery got the ball to Lewis in time to catch him. Meanwhile five runs had been scored, four of them after two men were out. For Cornell, Bristol flied out to Davis, and Drake and Costello to Wells, leaving Ferguson on first which he had reached on a base on balls.

The sixth netted Princeton three more runs, secured by hits by Stevens and Steinwender, an error by Drake on a difficult fly, and Meier's home run. Only four Cornell batters came up in this inning, Brewster making a two base hit, which availed nothing as the other three men went out.

Chase gave way to Henderson in the seventh, but the latter was touched up for four singles, a two bagger, and a base on balls, resulting in four runs. Cornell's half was a repetition of her last inning, and no run was made. In the eighth, Davis walked to first; Stevens, who attempted to score, was put out by Whinery after a good throw in by Drake. Steinwender walked, but was left as Cosgrave flied out to Drake. Princeton 17, Cornell 5.

The last inning resulted in a run for each side. Pearson drew a base on balls, Meier flied out to Bristol, and Brown knocked out a three bagger scoring Pearson. Henderson struck out the next two men, ending

(Continued on Page 220)

THE APPROACHING REGATTA.

Arrangements for Races—Work of the Crews.

As Memorial Day draws near, an air of earnestness and determination is exhibited throughout Cornell's rowing circles. A look of resolve is evident upon the face of every member of the crew and its management. It is recognized that Coach Courtney has a task of more than ordinary magnitude upon his hands in developing two Junior crews, and a Varsity crew, which shall win victory for the Cornellian and White in the three regattas to be held in Ithaca and Philadelphia on Memorial Day, and at Poughkeepsie on June 21. The earnestness with which Mr. Courtney has approached the problem is reflected in the work of every member of the crews, all of whom have settled down to work with a determination as earnest as that of the coach.

The development of two Junior Varsities is at present the most pressing. The contest for which Captain Petty's men, of the Varsity, are training does not occur till June 21; while the two Junior crews must be in condition to give a creditable account of themselves within two weeks. Accordingly interest for the present is centered in the make-up and the work of the Junior Varsities.

When Pennsylvania and Columbia refused to come to Ithaca to row the race with Harvard and Cornell in a single regatta, the development of two crews to row on the same day became necessary. It fell to Columbia this year to name the place for the Junior regatta, and she chose the Harlem course. When, however, it was demonstrated that for many reasons the Harlem course was undesirable, Columbia presently gave way, and Pennsylvania, thus gaining the right to designate a course, named the Schuylkill at Philadelphia. In many respects the Lake Cayuga course is the superior of any, and though Cornell urged this upon Pennsylvania, the latter adhered to her choice. When, however, Harvard signified a willingness to arrange a race with Cornell at Ithaca, the navy management again approached Pennsylvania, showing the desirability of a single regatta in which Columbia, Pennsylvania, and Cornell should row with Harvard. Cornell's efforts were unavailing, however, and it became necessary to prepare for two separate races on the same day.

Which of the two Junior crews will row at Philadelphia is not yet determined.

The race at Philadelphia, where Cornell will meet Columbia and Pennsylvania in a triangular regatta, will be over a course one and a half miles long. The headquarters of the crew at Philadelphia will be the Bachelor quarters, which are desirable in every respect. There has, of late, arisen a difficulty in regard to the eligibility of the men who are to row on the Schuylkill. Pennsylvania has signified her intention of entering some of the men which represented her last year at Henley, holding that in doing

so, she is not violating the rule which prohibits, as a member of a Junior crew, anyone who rowed on the 'Varsity the year before. Cornell, however, has taken the position that this crew, being concededly superior to Pennsylvania's regular 'Varsity which rowed at Poughkeepsie, is debarred by the spirit of the rule. Unfortunately matters are complicated by the absence of any distinct agreement which might solve the difficulty. On February 12 last, Professor Durand, of Cornell, and Mr. Bangs and Mr. Reath of Columbia and Pennsylvania, decided upon a ruling pertinent to the present situation, but the minutes of the conference cannot now be found. It is hoped, however, that the spirit of fairness in the different Universities will assure an amicable adjustment, and that the eligibility of the crewmen entered for the Schullkill race will be satisfactory to all concerned.

On Lake Cayuga, Cornell will row against Harvard and Syracuse over a two mile course. The accession of Syracuse to the regatta was decided upon by the Athletic Council on May 6, when the navy management received a request from Syracuse to have a crew admitted. Following out her policy to meet all competitors, Cornell gladly welcomed the newcomer to the regatta. Coach Sweetland, Cornell '99, is coach of the Syracuse crews, and when it is remembered how excellently his men did in the Poughkeepsie races last July, it is evident that Cornell will have a worthy rival for aquatic honors.

Harvard will be represented in the race by one of her club crews, either the Weld or the Newell. At first there was a rumor that the losing crew in the Weld-Newell races was to be sent to Ithaca. Harvard, however, emphatically denied this, asserting that the strongest combination admissible under the rules will represent the Crimson on Cayuga.

The north course on the east shore of the lake has been decided upon for the race. The south course, over which the race was rowed last year, is found undesirable this year because of the many obstructions which would shut off to sight of the crews from the observation train.

The north course offers an uninterrupted view of the race, commencing three and a quarter miles north of Renwick, and ending one and a quarter miles from the south shore of the lake. At first announcements were made for an observation train of thirty cars. With the admission of Syracuse, however, far larger accommodations were manifestly necessary. The train accordingly will be of forty cars or over. As examinations at Harvard commence on May 31, the contingent from Cambridge will be small, but Cornell and Syracuse will turn out *en masse*.

After the Junior races will doubtless come the traditional shake-up, and a final effort will be made to find the strongest combination for the 'Varsity races on the Hudson. The Poughkeepsie regatta this year promises a more hotly contested fight for the victory than ever before. Columbia, it is reported, has been doing some marvelous things in practice spins, and anon a report comes drifting northward that Pennsylvania is expecting to give a better account of herself this year than last. In the meantime, Georgetown, Syracuse, Wisconsin, and New York University, a new participator, have bent

earnestly to work. If signs and portents are of any significance, the world's record is again in danger of being broken.

The two Junior crews of Cornell are captained by Edmonston and Whittlesley respectively. A healthy spirit of rivalry has sprung up between these two combinations, and "scraps" of two, three, or four miles are almost daily occurrences. On May 8, Whittlesley's crew, in rowing across the south-western corner of the lake, struck a sunken snag, which ripped about thirty feet from the bottom of the shell. The crew coolly remained in their seats while the boat filled, and when thrown into the water kept themselves afloat till they were taken up by Coach Courtney in his launch.

It is impossible to give the various changes in the make-up of the crews that have been made from time to time. The most that can be done is to give the crews as they rowed last Monday. Some changes in the order given below may be made before the races. The make-up of the freshman crew is as yet wholly conjectural.

'Varsity: Bow, Kuschke; 2, Merrill; 3, Petty; 4, VanAlstyne; 5, Lueder; 6, Shepard; 7, Hazelwood; stroke, Coffin; coxswain, Smith.

The following are the Junior crews: Bow, Osborne; 2, Ballinger; 3, Sebring; 4, Fernow; 5, Torney; 6, Wadsworth; 7, Whittlesey, capt.; stroke, Frenzel; coxswain, Atkin.—Bow, Whittemore; 2, Bruce; 3, Haskin; 4, Nutting; 5, Sturdevant; 6, Odell; 7, Edmonston, capt.; stroke, Lyford; coxswain, Buchanan.

Foar-oar: Bow, Toohill; 3, Cutler; 3, Stone; stroke, Bentley.

The following are the freshman crews: Bow, White; 2, Chandler; 3, Boesch; 4, Barnhart; 5, Foote; 6, Snyder; 7, Fordham; stroke, Monroe; coxswain, Simmons.—Bow, Bush; 2, Dahmen; 3, Jones; 4, Smith; 5, Wells; 6, Schoellkopf; 7, Fisher; stroke, Adams; coxswain, Ford.

THE ALUMNI.

One purpose of THE ALUMNI NEWS is to keep Cornell men informed about one another. Every Cornell man, therefore, is invited to contribute to this column news concerning himself or any other student, and every contributor should remember that in sending news items he is conferring a favor upon other Cornellians.

'72, Ph. B. The *Independent* recently published a symposium on the subject of the concentration of wealth. Among the many writers who contributed was John DeWitt Warner, who discussed the political harm or harmlessness of great wealth.

'72, M. S. The May number of *World's Work* contains a biographical sketch of David Starr Jordan, accompanied by a photograph.

'75, B. S.; '97, Ph. D. Among the articles in the *Physical Review* for April were "Some Optical Properties of Asphalt," by Professor Edward L. Nichols, '75, and "The Velocity of the Ions from Hot Platinum," by Clement D. Child, '97.

'77, A. B. An article in the May *Cosmopolitan* on women college presidents contains a portrait and biography of M. Carey Thomas, president of Bryn Mawr.

'80, B. S. James T. Leary, who has been in the auditing department of the Pennsylvania Railroad company for a number of years, has been appointed general auditor of the Baltimore & Ohio railroad, which has been added to the Pennsylvania system.

'84, Ph. B. Henry J. Patten has discontinued his business as a grain shipper in Chicago under his own name, and has become a member of the firm of Carrington, Patten & Company. He is secretary of the new concern and will have charge of the Eastern shipping business.

'89, M. E. Frederick M. Whyte, who has held a number of important railroad positions, is now mechanical engineer for the motive power department of the N. Y. C. & H. R. railroad. His address is 610 Grand Central station, New York city.

'89, M. E. Albert Scheible is secretary and manager of the George Cutter company, of Chicago, makers of electric light specialties. His paper on "Yesterday and Today in Electric Street Lighting," read before the Chicago Electrical association, has been reprinted in the *Western Electrician*.

'90, B. S. in Arch. Professor Alexander B. Trowbridge has decided to spend the first two years after his resignation in study in Europe. He will pursue work in Paris and in Italy. In the latter country he will probably spend most of his time in Florence. On his return he will take up practice in New York city, but for this he has yet made no definite plans.

'91, E. E. Richford Danforth, after being ten years with the Buffalo street railroad and a year in Cleveland, O., has accepted the position of assistant manager of the Rochester street railroad.

'92, E. E. Francis Raymond is Chicago agent for several electrical manufacturers. His address is 48 West Jackson boulevard.

'92, M. E. Heber C. Peters is now superintendent of the American Arithmometer company, of St. Louis, Mo.

'92, E. E. Francis W. Throop has a position with the Elderfield-Hartshorn Hardware company of Niagara Falls, N. Y. He has invented and patented a unipolar dynamo.

'92, E. E. Henry V. Wille is engineer of tests at the Baldwin Locomotive works, Philadelphia.

'92, Ph. D.; '96, Ph. D. The *Philosophical Review* for May contains among its articles one on "Purposes of a Philosophical Association," by Professor James E. Creighton, '92, and a review of F. Pillion's "L'Annee Philosophique," by Grace Neal Dolson, '96.

'93, B. S. in Agr. Hermann von Schrenk's report on "The Decay of Timber" has been published by the United States Department of Agriculture for distribution.

'93, Ph. B. The engagement of Carlton E. Ladd to Miss Marie C. Babcock of Buffalo has been announced.

'93, E. E. A son was born to Mr. and Mrs. Frank C. Cosby at their home in New York city. Mr. Cosby now occupies a position in the sales department of the Westinghouse Electric and Manufacturing company, 120 Broadway.

'93, M. E. Harry J. Smith is a member of the Alberger company of Buffalo, and is engaged in consulting gas engineering. He has patents pending on several igniters and valves he has invented.

'93, E. E. Denney W. Roper, who is electrical engineer for Charles H. Ledlie, 918 Rialto building, St. Louis, is secretary of the Electrical Club of St. Louis.

'93, E. E. Thomas C. B. Snell is chief electrical engineer for the Hartford Street Railway company, Hartford, Conn.

'94, M. M. E. Edward McKim Hagar is manager of the cement department of the Illinois Steel company, Chicago.

'94, E. E. William A. Taylor is general superintendent and electrical engineer for the Stanford Telephone and Electric company, Madison, Ill. He has invented several telephone appliances and is a frequent contributor to *Telephony*, of Chicago.

'94, A. B. James P. Hall, who is now associate professor of law at Leland Stanford Jr. university, has been appointed to a full professorship in the same subject at the new law school of the University of Chicago. He received his law degree at Harvard in 1897.

'95, E. E. Floyd G. TenBroeck has been in business for himself since January 1st as a designer of mill machinery in New York city.

'95, LL. B., '97, LL. M. Lieutenant Louis H. Kilbourne is at present located at Fort Sill, Oklahoma, where he is acting as post adjutant, recruiting officer, signal officer, and officer in charge of the post exchange.

'96, E. E. George R. Shepard is assistant engineer for the Niagara Falls Hydraulic Power and Manufacturing company, Niagara Falls, N. Y.

'96, M. E. Allen P. Whittemore is a member of the firm of Thatcher & Whittemore, of St. Louis, importers of high grade window and photographic glass.

'96, B. S. Mrs. Mary Rogers Miller contributes "Glimpses of Brook Life" to *Country Life* for May.

'97, E. E. George L. Weller is manager for F. Weller & Sons, wholesale liquor dealers, Louisville, Kentucky.

'97, M. E. Perley S. Wilcox is a mechanical engineer and superintendent for the Eastman Kodak company, Rochester, N. Y. For the past two years he has been in charge of building and operating a special manufacturing plant.

'98, E. E. Saxton S. Barrett is a salesman in the telephone department of the Western Electric company, Chicago.

'98, E. E. Richmond L. Rathbone is now a representative for the Westinghouse Electric and Manufacturing company, at 53 State street, Boston.

'98, M. E. Alton A. Richardson is an engineer and estimator for the Dobbie Foundry and Machine company, Niagara Falls, N. Y.

'98, M. E. William McAllister Smith is telephone electrical engineer for the Western Electrical company, New York city.

'98, B. S. Stephen E. Rose formerly president of the Christian association, visited the university recently and addressed a meeting of the association.

'98, M. E. William B. Shafer, Jr., represented Cornell at a reception to prospective college students given by the Brooklyn Y. M. C. A., May 3. The meeting was attended by the members of the graduating classes of the various schools of the city who intend to enter college, and was addressed by a graduate of each of the leading universities and colleges on life at his institution.

'98, B. S. Leon W. Hartman, at present professor of physics at the Kansas State Agricultural college, has been elected to the Frazer fellowship in physics at the University of Pennsylvania for next year.

'98, B. S. The board of education of Frankfort, N. Y., has reengaged Frederick J. Medden as principal of the high school for another year, at an increased salary.

'99, M. E. Nelson K. Moody, who has been with the Carter Oil company since graduation, is now field foreman for the company at McKim, Tyler county, West Virginia. He has been engaged in nearly every branch of the business, acquiring a complete knowledge of drilling and producing wells.

'99, M. E. Nelson E. Otterson is now engaged in designing for the Rand Drill company of New York city.

'99, M. D. Richard J. E. Scott, who has been practicing medicine in White Plains, N. Y., has moved to New York city, where he has an office at 306 West 93rd street.

'99, M. E. Norman J. Gould is now travelling in the interests of the Gould Manufacturing company, with headquarters at the company's New York office, 16 Murray street.

'00, E. E. Julian C. Smith is now with W. C. Johnston, consulting engineer, Niagara Falls, N. Y.

Ex-'00. A daughter was born recently to Mr. and Mrs. Rodney C. Dewey at their home in Toledo, O.

'00, '01. Among recent visitors at the University were Harry S. Sleicher, '00, Mable M. Shea, '01, and Gilbert M. Tucker, Jr., '01.

'01- B. S. F. Clifford R. Pettis has been appointed assistant superintendent of forestry for New York state, and has already begun work in the Adirondacks, superintending the tree planting.

'01, C. E. Nelson O. Tiffany, Jr., is convalescing from an attack of typhoid fever at Sault Ste. Marie, Michigan, where he remained through his illness.

'01, A. B. Ray H. Whitbeck's baccalaureate thesis on "The Pre-glacial Course of the Middle Portion of the Genesee River" has been published in a recent number of the *Bulletin of American Geology*.

'01, A. B. Thomas A. Caine, of the United States Bureau of Soils, has been promoted to the position of director of a survey party and is now located at Newton, N. C.

'01, M. E. Arthur O. Berry, who has been with the Baltimore and Ohio railroad since graduation, was appointed a mechanical engineer April 1. This is the first appointment of the sort to be made by the company.

'01, D. V. M. Charles F. Flocken visited the University recently and gave the students of the Veterinary College an informal talk on his experience in the government service as a meat inspector.

Ex-'03. Daniel S. Bellinger is now with the Buffalo Pitts company of Portland, Oregon.

Weddings.

SHANKS—SCHOENBORN.

The marriage of Miss Mary Elizabeth Shanks and Lieutenant Henry F. Schoenborn, ex-'95, took place in Washington, D. C., Saturday, April 26, at the home of the bride's cousin. The Rev. Dr. Perry of St. Andrew's church officiated. After the ceremony the couple left on a northern trip, before going to Tampa, Florida, where the groom is stationed.

Lieutenant Schoenborn entered the electrical engineering department of the University in 1891, but completed only two years of the course. Since then he has enjoyed a very interesting career. He entered the United States revenue cutter service and took part in the battle of Manila. He has been round the world, was stationed in Alaska for a time, and is now assigned to Fort Tampa.

HUNTINGTON—DIMON.

On Saturday, April 26, Theodore Dimon, M. E., '98, and Miss Grace Louis Huntington were united in marriage in the Church of the Cornerstone, Newburg, N. Y. The Rev. George H. Huntington, father of the bride and pastor of the church, officiated. Frederic D. Huntington, '00, brother of the bride, acted as best man. The couple will make their home on Morningside Heights, New York city. Mr. Dimon is in the engineering department of the Western Electric company.

Obituaries.

WALTER A. BYRNE.

Particulars of the death of Walter Aloysius Byrne, LL. B., '89, which occurred October 28, 1901, have just been received at the University. The deceased practiced law in his native city, Auburn, N. Y., for a number of years after graduation. He was well known in the profession and also attained prominence through his connection with local Democratic politics. He was for a time a member of the Auburn civil service commission. In 1897 he moved to New York city, where he continued his practice. His death occurred at the Sisters' hospital, Spuyten Deyvil, after a five weeks' illness with pulmonary trouble. He was in his thirty-second year at the time, was unmarried, and was survived by his parents, three sisters and two brothers.

- " 25, Sunday--Rev. Robert Collyer, New York city.
- " 28, Wednesday--Baseball; Cornell vs. Harvard at Cambridge.
- " 29, Thursday--Baseball; Cornell vs. Holy Cross, at Worcester.
- " 30, Friday--Decoration Day - University exercises suspended. Junior Varsity regatta with Pennsylvania and Columbia, at Philadelphia. Second Varsity race with a club crew from Harvard, on Cayuga Lake. Baseball; Cornell vs. Brown at Providence.
- " 31, Saturday--Baseball; Cornell vs. Williams, at Williamstown.

THE SALE OF SEATS FOR THE OBSERVATION TRAIN HAS RESULTED IN THE DISPOSAL OF TWENTY-THREE OF THE THIRTY CARS COMPOSING THE TRAIN. THIS MEANS THAT THERE ARE PLENTY OF GOOD SEATS LEFT IN SEVERAL OF THE DESIRABLE CARS, AND THAT, BY APPLYING IMMEDIATELY, THE ALUMNI CAN BE ACCOMMODATED. ALTHOUGH NONE HAVE BEEN ESPECIALLY RESERVED FOR THEM, THEY CAN SECURE SEATS BY COMMUNICATING WITH THE LEHIGH VALLEY CITY TICKET OFFICE, STATE STREET, ITHACA, N. Y. THE SEATS ARE \$1.50 EACH. IN VIEW OF THE LARGE NUMBERS EXPECTED, ALL THOSE WHO EXPECT TO ATTEND THE RACES ARE URGED TO ATTEND TO THIS MATTER AT ONCE.

MEDICAL COLLEGE SUCCESSES.

A communication recently received from our Medical College in New York city reflects great credit not only on the work done there but also on the work done at the Ithaca branch of the College. There are at present eighteen members of the senior class in New York city who took part of

their preliminary medical work in Ithaca. In a competition among students from the medical departments of Columbia, Cornell, Harvard, Johns Hopkins, Pennsylvania, and other colleges, thirteen of these eighteen students obtained hospital appointments. Columbia was the only one by whom Cornell was beaten, and in the New York Hospital a Cornell man secured first place with a Johns Hopkins man second. Of the Cornell students who did not get places, three did not want hospital positions and one had secured a position in a hospital out of town. Especial interest is lent to this communication by reason of the fact that the competition has been getting harder every year and was exceptionally severe this year.

Another recent medical appointment in New York city has excited much interest in Cornell circles. Considerable pressure has of late been brought to bear upon the examiners for the position of ambulance surgeon in New York city to induce them to allow women to enter the competition. Permission was granted this year, and in an examination participated in by twenty-one competitors, several of whom were women, Dr. Emily Dunning, Cornell, '97, B. S., '01, M. D., was successful. Dr. Dunning is the first woman ambulance surgeon to be appointed in New York city. We understand from an authoritative source that it was very largely due to the efforts of another Cornell woman, Miss N. G. Seymour, '97, A. B., who is at present a senior in the Medical College in New York city, that this medical opening for women was made possible.

It seems that Col. Payne's ambition to make the Cornell University Medical College in New York city second to none in the country is being more rapidly realized than we dared hope. For us in Ithaca it is also gratifying to have evidence that the work of the members of the medical faculty here compares favorably with that done by their colleagues in New York city.

CAMPUS NOTES.

Current Happenings of Minor Importance and Present Interest.

At a meeting held Friday, May 9, the senior class decided several matters of importance. One of these was in regard to the class memorial. After the Class Day committee had reported that it had collected class taxes amounting to about \$1,250, and that, after paying all the expenses of Class day, about \$500 remained, it was voted to use this for the class memorial. Instead of devoting this to the Alumni Hall, as has been the custom for the past few years, this year's class will leave its memorial in the form of some distinctive feature of the new club house to be erected on the proposed Campus athletic field. The decision as to just what form the memorial will take was left with the class memorial committee.

The class also decided that on May 14, the day before it first wears the cap, it will celebrate by rolling hoops, spinning tops, playing marbles, and similar juvenile games. These games will be conducted on the Quadrangle, and the proceeds from the sale of these toys will go to the athletic fund.

At a recent meeting of the *Era* board the following were elected to membership: L. G. Wright, '03, C. P. Obendorf, '04, H. C. Hasbrouck, '04, E. M. Slocombe, '04; and F. B. Humphrey, '04, who was chosen assistant business manager. In addition to these, the following will compose the board for next year: A. J. Tietje, '03, J. L. Drake, '03, L. F. Brown, '03, E. N. Ferndon, '03; and J. M. Keeler, '03, business manager. Yesterday the board elected A. J. Tietje, '03, editor-in-chief, in place of Richardson Webster, '02, of the retiring board. Owing to the lack of competition no artistic editor was chosen.

The May issue of the *Era*, which appeared last week, is not only one of the largest, but one of the most interesting numbers thus far published. In addition to the customary articles and reviews, it publishes the six Woodford orations in full. It follows its customary plan of having an article in each issue written by some prominent Cornellian, and in this number contains "A 'Fin de Siecle' Agamemnon," by Theodore Stanton, '76.

During each year, Professor H. Wade Hibbard conducts several inspection tours through the important plants and shops of New York and Pennsylvania. Last Thursday, May 9, he left with a party for a two days trip to Scranton, where a visit was made to the locomotive and car shops of the Delaware, Lackawanna & Western railroad. Having inspected the improved machinery and modern boiler plant at these works, the party, after an interesting visit to the Dickson Locomotive works, spent part of the time in visiting a coal mine. An excellent opportunity was thus offered to see coal in all its different forms, and to get an accurate idea of modern mining methods. The party returned Friday evening after one of the pleasantest and most interesting trips of the year.

Last year, on the evening before the Memorial Day boat races, the musical clubs gave a concert, which was followed by a navy ball. These fea-

tures added greatly to the pleasures of the regatta, and similar arrangements are being made for this year's races.

On the evening of May 29, the musical clubs will present a concert similar to that of last year. Immediately after this concert, the navy ball will be held in the armory. The committee is making extensive arrangements, and everything points to a successful and enjoyable ball. It is not the committee's intention to rival the senior ball in magnificence of decoration, but the walls will be draped in the colors of the different colleges represented in the regatta. Rothschild is to build and decorate the boxes, twenty-three of which have already been engaged. The design for the programs has been chosen. They will be in the form of a booklet with the Cornell seal surmounted by two crossed oars upon the front cover. Refreshments will be served by Alberger, and Coleman's orchestra of twenty-five pieces will render an excellent program.

Now that the navy management is endeavoring to make the May 30 regatta at Ithaca an annual event the navy ball bids fair to become an annual feature of the week. The ball held last year was successful, both financially and otherwise, and from present indications, this one will surpass the former one in every respect. The concert, which immediately precedes the ball, will serve to make the evening all the more enjoyable, and with the races the next day as a climax, regatta week will be one of the most enjoyable of the year.

The Sibley Bell.

Very few of the friends of Cornell University and Sibley college, or even of the students who work within sound of it in the shops and laboratories, are probably aware that the old bell which called Robert Collyer to his work when he was a young man employed as a blacksmith is now mounted in the belfry over the Sibley College shops. The bell originally hung in the tower of an old mill in Lancashire, England, adjoining which was the blacksmith shop where Collyer worked. After he had become renowned in this country as a preacher, the old mill was dismantled, and a friend in England bought the bell and sent it to Collyer. It was secured for Cornell some fifteen years ago, probably through the agency of ex-President White. During President Adams's administration, Director Thurston, of Sibley College, discovered it in the basement of Morrill Hall, and had it placed in its present position over the shops.

In the following spring, Collyer made his annual visit to Cornell as a University preacher. One of the stipulations of his annual return was that he should come to Ithaca "in the time of the apple-blossoms." Accompanied by Dr. Thurston he visited the buildings of Sibley College, and passed directly beneath the little bell hanging above the shops. Dr. Collyer placed the bell rope in his hand and the eminent divine gave it a slight pull, which set the bell ringing. His face immediately lighted up with pleasure, and he exclaimed "The auld bell! The auld bell!" It was at this time that Collyer dictated to Dr. Thurston the legend which now appears on the lower part of the belfry on the north side, "The Gift of Robert Collyer to the Smithy," and the other legend on the opposite side, "By Hammer and Hand all Things do Stand."

LACROSSE CHAMPIONSHIP.

Cornell Wins it by Defeating Harvard and Columbia.

The Cornell lacrosse team has just completed one of the most successful trips in its existence. By defeating Harvard and Columbia—having already defeated Pennsylvania at Percy Field—it has won the championship of the inter-university league, composed of Harvard, Columbia, Pennsylvania, and Cornell. This year's team is one of the best that Cornell has ever turned out, and the Crescent players, who are considered the best players of this country and who have met the best college teams of the year, say that the Cornell attack is one of the fastest they have played against. The other prominent lacrosse league is composed of Johns Hopkins, Swarthmore, and Lehigh. The championship of this—triangular league—has been won this year by Johns Hopkins, but it is doubtful if a game can be arranged between the champions of the two leagues to decide the intercollegiate championship.

The Cornell team left via the Lehigh and Fall River line for Boston last Thursday, and on Friday lined up against Harvard at Soldiers' Field.

Harvard won the toss, and took advantage of the wind. Alford, of Harvard, was the first to score, Wood, Winters, and Ferguson, of Cornell, soon overcoming this lead by three quick goals. Wood soon scored again, and just before the end of the half, Harvard made her second point. At the beginning of the second half, Wood scored again and Michaelsoon followed with Harvard's last goal. The final score of the game was made by Winters, of Cornell. Our team work was excellent throughout, the attacks being aggressive and the defense strong. Finley, whose work at Cornell's goal was the feature of the game, and Forrest, of Cornell, and Wynn and Howard, of Harvard, were slightly injured. The final score was six to three.

Returning to Brooklyn via the Fall River line, the team lined up against the veteran Crescent Athletic Club players on Saturday afternoon, and were defeated by six goals to one. In spite of their defeat, our men made an excellent showing. Scoring started early in the game when Wall, of the Crescents, caged the ball, but no more goals were made until the end of the half. Cornell made her only point in the second half, while Crescent made four. Woodward replaced Bogart, Cornell's outside home, who received a severe scalp wound. The line-up against the Crescents was:

Crescent (6)		Cornell (1)
Lindsay	goal	Finley
Garvin	point	Alexander
Griffin	cover-point	Forrest
Rose	first defense	Armstrong
Delasnovova	second defense	Wagner
Dobby	third defense	Magoffin
Bennett	center	Boecher
Jewell	third attack	Winters
Wall	second attack	Kelly
Symington	first attack	Wood
Curry	outside home	Bogart
Miller	inside home	(Woodward) Ferguson

Referee, G. A. Smith, Cornell. The last game of the trip was played at the Crescent athletic field against Columbia, and was won with ease by a score of eight goals to none. Columbia was completely outclassed,

and after the first half our men made comparatively little effort to increase the already large score. Bogart was out of the game, so each of the attack men was moved up one position to make room for Woodward who played third attack. Thomas replaced Magoffin at third defense during the second half.

Only two games remain to be played this year, both with Hobart. One will be played at Geneva next Saturday, and the other at Percy Field the week following.

PRINCETON WINS AGAIN.

(Continued from Page 215.)

Princeton's half. On Cornell's side, Lewis reached first on an error by Wells, who fumbled the ball, reaching third on Whinery's hit. Whinery was doubled at second on Bristol's scratch hit, but Lewis scored on Drake's single. Ferguson drew his third base on balls, but hope died out when Costello went out from Meier to Pearson.

The score:

CORNELL		R	H	PO	A	E
Brewster, 1 f	----	1	2	1	0	1
Brown, 2 b	----	1	1	1	2	1
Lewis, s s	----	1	0	2	2	0
Whinery, c	----	1	3	7	2	0
Bristol, c f	----	0	0	5	0	0
Drake, r f	----	1	1	1	2	1
Ferguson, 1 b	----	1	10	0	0	1
Costello, 3 b	----	0	1	0	3	0
Chase, p	----	0	0	0	3	0
Henderson, p	----	0	0	0	0	2
Totals	-----	6	9	27	14	6

PRINCETON		R	H	PO	A	E
Steinwender, 2 b	----	4	3	1	8	0
Cosgrave, c f	----	2	2	1	0	0
Pearson, 1 b	----	1	13	0	0	2
Meier, ss	----	2	3	4	3	1
Brown, 1 f	----	1	3	0	0	0
Wells, 3 b	----	1	1	2	1	2
Davis, r f	----	3	1	1	0	0
Green, c	----	1	2	5	0	0
Stevens, p	----	3	3	0	3	0
Totals	-----	18	19	27	15	5

Score by innings:—
Cornell 4 0 1 0 0 0 0 1—6
Princeton 3 1 0 0 5 3 4 1—18

Earned runs—Cornell 1, Princeton 11. Two-base hits—Brewster, Wells, Davis. Three-base hits—Brown (Cornell), Brown (Princeton). Home run—Meier. First base on errors—Cornell 1, Princeton 2. First base on balls—Off Chase 3, off Henderson 4, off Stevens 5. Hit by pitched ball—Chase, Drake. Struck out—By Chase 2, by Henderson 4, by Stevens 4. Passed ball, Whinery. Sacrifice hits—Pearson 2. Stolen base—Costello. Double plays—Chase to Lewis to Ferguson, Steinwender to Pearson. Innings pitched—Chase 6, Henderson 3. Hits—Off Chase 13, off Henderson 6, off Stevens 9. Left on bases—Cornell 11, Princeton 8. Time of game, 2:20. Umpire—Hoagland.

Dr. Kingsbury Chosen.

At a meeting of the Executive Committee on April 22, Benjamin Freeman Kingsbury, of the department of Histology, Microscopy, and Embryology, was appointed assistant professor of physiology in Stimson hall. Professor Kingsbury came to Cornell from Buchtel college where he took his A. B. degree in 1893. In 1894 he received his M. S. at this University, and in 1895 he became Doctor of Philosophy. He held a fellowship in science in 1896, and in the same year was appointed to an instructorship in histology and embryology. Last year he was granted a leave of absence for study in Germany until Christmas, 1903, in order to obtain his degree of Doctor of Medicine; and to study the method of instruction in physiology in Germany.

TRACK TEAM DISABLED.

Captain Young Injured—Prospects for Princeton Meet.

Cornell's chances in the approaching dual track meet with Princeton are rather discouraging. In this meet, which will this year be held at Ridgefield Park, Albany, May 17, Princeton will be represented by one of her strongest teams, while Cornell can only send the remnants of hers.

The Cornell team is unfortunately weakened through the injuries of several of her best men. F. M. Sears, '04, the sprinter, whose ankle has been weak for some time is at present able to do nothing but light work, and in all probability will not enter the meet. F. J. Porter, '05, the weight man, is recovering slowly, but a sore ankle prevents his doing hard work. If he accompanies the team, he will not be able to do work of his accustomed standard. Last Monday, W. A. Frederick, '03, Cornell's crack vaulter sprained his ankle. His work this spring has been of a high standard, having but last week established a new record of 11 feet, 3 inches. But one of the most serious accidents of the year occurred last Friday when Captain Young, '02, while sprinting, suffered what is technically called "sprinters breakdown." This is a loosening of the muscles, and a straining of the tendons which attach them to the bone. This injury will probably keep him from work for the rest of the year; and inasmuch as he was expected to be one of Cornell's strongest men in the approaching contests, his loss will be the more keenly felt. Without these four men, one of whom is the team's captain, the track prospects are rather discouraging.

Cornell expects its best work from W. J. Warren, '03, in the sprints; and J. W. Knapp, '03, in the jumps and pole vault. H. Rogers, '02, has been doing excellent in the sprints, and last Saturday, in the inter-class relay race, ran a quarter mile in the excellent time of 51 seconds. Among Princeton's men will be Coleman and Horton in the pole vault, DeWitt in the weights, and Williams and Perry in the distance events.

The novice race which took place under the auspices of the cross country club on Thursday last, will, in all probability, effect a slight change in our present system of athletics by the addition of a novice track meet as an annual event. Much new material was brought out in this race, in fact the winner of the race was one who had not previously attracted attention as a runner. The excellent time made by the novices, who covered the three-mile course in 16 minutes 26 seconds, is not only encouraging in itself; but shows us what might be done by throwing open an annual meet in which novices might contest in every event of the track.

Handsome steins were awarded to the first five men who finished as follows as follows: J. S. Cahill, '05, L. M. Sanford, '05, S. E. Hickman, '02, E. E. Seelye, '04, Cazenove, '02.

SUCCESSFUL CANTATA.

Excellent Program Rendered by Sage Chapel Chorus.

The University was treated to such a musicale last Thursday evening as is seldom heard in a college town. The Sage Chapel chorus, augmented by soloists and a large orchestra, rendered selections from the works of Gounod, Dubois and Rossini. Under the direction of Professor Beall, of the Ithaca Conservatory of Music, the chorus rendered one of the greatest musical successes ever heard in Sage Chapel.

In point of attendance, the occasion surpassed anything in the history of Cornell. With the exception of a few reserved for those who had subscribed, the seats were unreserved. The crowd began to arrive early; by eight every seat was taken, and the aisles were packed. Those, numbering several hundred, who arrived later, were turned away. It was a most striking illustration of the great need of a hall adequate to accommodate a Cornell audience. Very many students do not even try to go to many important University functions owing to the invariable overcrowding.

The program was as follows:

1. Selections from "Gallia" ---- Gounod
MISS NICHOLSON, Soprano.
2. "The Seven Last Words of Christ"
----- Dubois
MISS NICHOLSON, Soprano.
PROFESSOR TROWBRIDGE, Tenor.
MR. BENSON, Baritone.
3. "Inflamatus et Accensus." Rossini
MRS. CHAMOT, Soprano.

The soloists were all in good voice. Miss Nicholson sang with fine expression and much depth of feeling. She has progressed greatly this year, and possesses the necessary temperament to make her singing most excellent. Mrs. Chamot sang up to her usual high standard. Mr. Benson, although new to Ithaca, and of less experience than his associates, used his voice to excellent effect. He promises to develop a voice of considerable power and range, and of good even quality. Professor Trowbridge sang with his usual sympathy and tenderness. The musical interests of the city will feel his coming departure keenly.

The chorus did especially fine work. The members, in all about forty, are from both the University, and the Ithaca Conservatory of Music. Too much praise cannot be given to Professor Beall for his excellent work in training them. He takes the utmost interest in the quality of work done, and spares no pains to make it the best possible. At all times he has the chorus under the most perfect control. The voices are especially excellent; in fact, it seemed as if there must be at least twice the actual number singing, so full and clear were the tones.

The usual Sunday orchestra was aided by kettle drums, a trombone, a double bass, a flute, clairnets, and a French horn from the Lyceum orchestra. Mr. Sumner Salter acted as organist. The total number of persons taking part was probably the greatest at any event held in Sage Chapel.

The students of Cornell are accorded a very great privilege in the music given weekly in Sage Chapel. Not often is the opportunity given students to hear the rendering of masterpieces in such an excellent manner. This concert took the place of the regular Thursday afternoon recital, and was similar to the May festival, given two years ago, but omitted last year.

BACTERIA IN MILK.

Expert Report by Dr. Moore of the Veterinary College.

Sometime ago Dr. Veranus A. Moore, '87, of the Veterinary college was requested by the State Commission of Agriculture, to prepare an article for the annual report on the present status of bacteria in milk. The article by Dr. Moore, entitled, "Bacteria in Milk; A Summary of the Present Knowledge Concerning Their Source and Significance", has been printed in pamphlet form, by the commission, in advance of the complete report.

The pamphlet consists of a report of twenty-four pages, a bibliography, of five charts, and three plates. It is a very complete, yet concise statement of the facts and is interesting reading. Dr. Moore divides his subject into three heads. First, the manner in which bacteria gain access to milk. Second, the effects bacteria produce (a) on the milk itself, and (b) the effect of the charged milk upon the consumer. Third, the methods of handling milk in order to keep the number of bacteria and the products of their growth at a possible minimum point.

There are two ways in which bacteria gain access to milk: from external sources, and from the udder itself. If the stables are kept clean, cows groomed, etc., the first of these causes may be very much lessened. It has been found that only rarely are the number of bacteria in the milk excessive when uncontaminated by outside sources.

The significance of bacteria in milk is seen by the fact that "nearly, if not all the changes that occur in milk, subsequent to its escape from the udder, are primarily caused by bacteria." The common "souring" of milk, the "appearance of blue milk, bitter milk etc.," are all due to their presence. The diseases producing bacteria in milk belong to two classes: (1) the specific bacteria of certain diseases of cattle, as tuberculosis, and (2) bacteria of certain human diseases as typhoid fever, and diphtheria. The latter come from various external sources during the handling of the milk. The discrimination against milk with a large amount of dirt or bacteria in it, is justified from the fact, that if there is any chance for infection, it will probably get into milk of this class.

Concerning the preservation of milk, it has been found that bacteria, in freshly drawn milk do not multiply to any great extent for from six to nine hours when kept at a temperature of 70° F., or below. If the milk is cooled to a temperature of 55°, like results are obtained for at least from 36 to 48 hours, and often for a much longer period. "If the milk is carefully protected, and promptly cooled down to, and kept at a temperature of 40°, the number of bacteria in it will not subsequently exceed the number present at the close of the milking process. An excessive number of bacteria in milk at any time within 72 hours after it is drawn indicates that it has not been properly handled." There is a germicidal action in the milk of some cows so that the number of bacteria actually decreases for some time after being drawn. The mixing of milk at dairies, although not decreasing the bacteria in the milk, has the effect of distributing this germicidal action throughout all the milk, so that bacteria will not in-

crease immediately after the milk is drawn. "As the care of milk required in the course of transportation is simply to have it put in clean cans, and kept at a low temperature, there is no reason why milk cannot be shipped hundreds of miles and delivered in a perfectly sweet and wholesome condition."

Fellows and Scholars Appointed.

At its meeting last Friday, the Faculty announced the following scholars and fellows for the ensuing year:

University fellows: Cornell fellowship, Caroline L. Sparrow, A. B., (Woman's College of Baltimore) English literature; McGraw fellowship, Ernest W. Schoder, B. S., (Washington) civil engineering; Sage fellowship, Arthur R. Middleton, A. B., (Rochester) chemistry; Schuyler fellowship, Louis C. Graton, B. S., geology; Sibley fellowship in mechanical engineering, to be elected later; Goldwin Smith fellowship, Ralph V. Chamberlin, B. S., (Utah) entomology; President White fellowship, Perley G. Nutting, M. S., (California) physics; Erastus Brooks fellowship, Clarence L. E. Moore, B. S., (Ohio State) mathematics.

OTHER FELLOWSHIPS:

Herman Dercum, B. Arch., architecture; to be elected later in mechanical engineering; James B. Hopkins, A. B., (Hamilton) Romance languages; Charles A. Williams, B.A., (Iowa) Germanic languages; Thomas C. Johnson, B. S. Agr., (West Virginia) horticulture; Willard E. Hotchkiss, Ph. B., and Garrick M. Borden, B. S., history and political science; Albert C. Muhse, A. M., (Indiana) and George P. Watkins, A. B., political economy; Clyde R. Jeffords, A. B., (Nebraska) and Edith M. Bickham, A. B., Latin and Greek; James W. Putnam, B. S., (Illinois) American history; Irving E. Miller, A. B., (Rochester); George W. T. Whitney, Ph. B., (Vermont) and Robert M. Ogden, B. S., philosophy and ethics.

Honorary fellow: Francis M. Schirp, Ph.D., (Canisius) philosophy.

Graduate scholars in philosophy: Murdock S. Macdonald, B. A., (Dalhousie), Annie D. Montgomery, A. B., (Penn. College for Women), Oliver G. Shumard, A. B., (Missouri), Herman C. Stevens, A. B., (Michigan), Claudius M. Story, A. B., (Nebraska), Robert B. Waugh, A. B., (Hobart).

University graduate scholars: William W. Coblenz, B.S., (Case school) physics; Christabel F. Fiske, Ph. B., English philology; Lillie S. Smith, A. B., (Syracuse) Greek and Latin; Fred Mutchler, A. B., (Indiana) botany; James I. Reynolds, A. B., classical archaeology; Thomas L. Hawkinson, B. S., neurology; Richard R. Lyman, (Michigan) civil engineering; C. P. Harris, B. S., (North Carolina) chemistry; Oscar P. Akers, A. B., (Avalon) mathematics; Edward M. Hulme, A. B., (California) history; Charles H. Sisam, A. B., (Michigan) mathematics.

The Jones Summer School

OF MATHEMATICS and the LANGUAGES.

Eighteenth Session, July 7-Sept. 19

Rapid reviews for candidates for admission to CORNELL UNIVERSITY and for conditioned students.

Address **GEO. W. JONES, A. M.,** Ithaca, N. Y.

**GASGADILLA
SCHOOL**

LEADING FEATURES.

(New list in each issue:)

1. Emphasis upon college preparatory subjects with consequent economy of time. 2. Opportunity for students back in less than a year of work to take freshman subjects and save loss of time. 3. Departments sharply defined; each teacher giving his his best because handling his speciality.

If possible visit and personally inspect the school. In no other way can be obtained an adequate idea of its ideal school homes, model recitation and recreation buildings, provision for physical culture, beautiful grounds and magnificent location. Registration 1901-02 from twenty three states. Address,

C. V. PARSELL, A. M., Principal,
Ithaca, N. Y.

ITHACA HIGH SCHOOL.

(CORNELL'S LARGEST FITTING SCHOOL)

Gets its Students from England, Russia, Italy, Ireland, Brazil, Mexico, Canada, Cuba, twenty eight states (28) and from twenty-four (24) counties in N. Y. State. Won 62 state and 1 Univ. scholarships in 7 yrs. Sends 76 to college this year. Tuition \$75 for 40 weeks including free books. Enter any time. Both sexes. Registration 671. Over 300 preparing for college. Gymnasium. 7-acre athletic field. Faculty of Cornell graduates. **Hundreds of Cornellians fitted in this school.***

*President schurman, Dean White, and Professors Bennett, Nichols, Jenks, Jacoby, Thurston, McDermott, Craig, Durand, DeGarmo, Moler, Stone, Reid, Gage, Fuertes, Ferrow, Powers, and Church are among the Cornell Professors who are patrons of this school.

"Like Your Mother Used to Make"

May be a matter of conjugal argument, but like what you used to wear at college is a sentiment that a man can cherish for his very own. In the matter of **DRESS AND NEGLIGENCE SHIRTS**, if we ever had your measure we can make them for you still and mail you samples of material at any time. We are head-quarters for **CORNELL FLAGS** and have the only correct Cornellian shade which differs from all other reds and we now have dyed to order. All the popular sizes at 50c., 75c., \$1.00, \$1.50 and \$2.00 on hand and mailed at once without extra charge.

C. R. SHERWOOD, ITHACA, N. Y.

**THE WORTH OF
ANY PRODUCT**

Is measured by the service it renders. DIXON'S PENCILS last longer, and give better satisfaction, than other pencils. They keep their points, and write right right from start to finish. They are constantly growing in favor with students, because they are extraordinary pencils and represent the acme of pencil quality. The experience of the past is the best guide for the future. *Send 16 cents in stamps, mentioning this publication, and receive samples worth double the money.*

 JOHN REAMER, Prop

Work in Forestry.

The junior and senior classes of the College of Forestry are now in the Adirondack regions. The students are twelve in number under the supervision of Professors Gifford and Clark. The earlier part of the season was devoted entirely to visiting the lumber operations, and inspecting log-driving. At present planting and work in the nursery is engaging the men's attention.

So far this spring, the New York State College of Forestry of Cornell is responsible for the planting of over a million trees. It has recently shipped from its nursery at Axton, 500,000 pine and spruce seedlings. These will be planted by the State Forest Commission, the Yale Forestry School, and other individual planters. The college itself intends to plant several hundred thousand plants besides sowing 300 pounds of seed.

Graduates of the college are carrying on the work in other sections of the country. Mr. Walter Mulford, State Forester of Connecticut, is starting a nursery for forest trees; and under the auspices of the Connecticut Experiment Station is planting a large number of trees. Mr. T. F. Borst is engaged in the same undertaking for the Metropolitan Water Board of Boston.

A large proportion of the junior and senior classes will undoubtedly continue their work during the summer as employees of the government. For several years past, the authorities at Washington have appointed over a hundred students as assistants to carry on forestry work during the summer months. Last year a number of Cornell students were so engaged, and it is probable that the same will be the case this year. The regions where this work is chiefly done are in Maine, the Adirondacks, eastern Tennessee, and in some of the western states. Forest working plans will be made for the various tracts of lands. Data will be collected to form a basis for the estimate of standing timber, and for facilitating the growth and production of forests.

A New Student Dormitory.

A private dormitory will shortly be erected on the east side of Huestis street just south of the intersection of the street railway. This lot is at present disfigured by the ruins of the East Hill house which was burned down two years ago. The property was transferred by the present owner to C. L. Sheldon, of Auburn, for a consideration of something more than \$10,000. The architect has not yet been selected, but the work will begin early this summer. Owing to the existing strike among masons and carpenters, and the necessary supervision of every detail in a first-class structure of this kind, the dormitory will not be ready for occupancy until September, 1903.

Externally, the building will be very attractive. It will be construct-

ed of brick and stone, four stories high, with a large archway opening on Huestis street. The first floor will probably be occupied by stores, though this is not yet settled upon.

Particular attention will be given to the sanitary conditions and protection from fire. There will be bath rooms on each floor, fire-escapes on three sides of the dormitory, and a hose on each floor. The arrangement of rooms will be modelled after that of other college dormitories in general and the Vanderbilt dormitory at Yale in particular i. e., with a large study and two smaller bedrooms. These suites are designed for two room-mates, though at Yale they are frequently occupied by three men.

Unlike most college dormitories, and owing to the peculiar conditions of boarding-house life in Ithaca, this dormitory will be thoroughly furnished. It is the object of the proprietor to make the rooms unusually desirable, and far ahead of anything in the boarding-house line. Partitions will probably separate the suites into divisions of four suits and a bath each. This will be done in order that a number of fellows may get together and at the same time be shut off from a public hall-way. In short, nothing will be spared to make this dormitory a pleasant home—distinctly unisex. There will not be a dining-hall in connection with the building, inasmuch as the first floor will probably be occupied by stores, and also because of the numerous dining-rooms already in the vicinity.

The 1904 *Cornellian* board has been organized as follows: F. B. Humphrey, editor-in-chief; G. C. Patterson, business manager; H. E. Santee, assistant business manager; P. H. Mallory, artistic editor; C. A. Sleicher, H. E. Green, A. A. Brewster, E. M. Slocombe, M. C. Wilson, and Miss M. M. Crawford. Of these, M. C. Wilson is the representative of the Medical College in New York city.

The Cornell Association of Rochester held its annual business meeting April 30 in the parlors of the Powers Hotel. The following officers were elected for the coming year:—President, James R. Davy, '94; vice-president, Mabel A. Clark, '97; secretary and treasurer, Morris L. Stern, '95; athletic councillor, Frederick Will, '01. The executive committee is composed of Lillian B. Coleman, '96, Andrew C. Gleason, '96, Andrew E. Tuck, '99, together with the officers already named.

Professor H. Morse Stephens addressed the Monday Night Club of Princeton on "The English Administrative System in India."

Rothschild, of Ithaca, has been awarded the contract for decorating the Armory for the Senior ball.

Plans have been drawn for a building for music at Harvard to cost \$75,000.
