CORNELL ALUMNI NEWS

Vol. XXIII, No. 14

Ithaca, N. Y., January 6, 1921

Price 12 Cents

A DESERTED CAMPUS; silence from the Library Tower; an occasional lonesome-looking student skating on Beebe Lake; many quiet, happy Christmases; and two rather serious automobile accidents on snowy pavements—this was Ithaca during the holidays.

PROFESSOR GEORGE L. HAMILTON has been named a member of the executive committee of the Dante Memorial Association of One Hundred. The purpose of the organization is to promote celebrations next year of the six-hundredth anniversary of the great poet's death and to raise a fund for the restoration of the Church of San Francisco in Ravenna, where Dante's body was first interred.

PROFESSORS W. L. WESTERMANN and Allyn A. Young are two of fifteen speakers to lecture on "What Really Happened at the Peace Conference," at the Academy of Music in Philadelphia. Colonel Edward M. House '82 is supervising these weekly lectures, which began December 10.

DR. JOHN S. SHEARER '93 showed how x-rays were used during the war to detect imperfections in airplane construction, in a recent lecture on "Recent Advances in the Production and Application of X-Rays" at the Franklin Institute in Philadelphia.

SPEAKING at the First Presbyterian Church in Buffalo recently, on "How May the League of Nations be Saved?" Professor Nathaniel Schmidt suggested several revisions of the present covenant.

DR. JOHN BAUER, formerly assistant professor of economics here, has opened offices at 63 Wall Street, New York, as a consultant on finance, accounting, and tax matters. After leaving Cornell he was assistant professor of economics and finance at Princeton. For three years he was chief of the division of accounts of the Public Service Commission for the First District of New York. He has also served as financial adviser to the Corporation Council of New York.

DR. HAVEN EMERSON, who was instrumental in organizing the present University system of hygiene and preventive medicine, has been appointed medical adviser and assistant director of the United States Bureau of War Risk Insurance.

BARNES HALL further fulfilled its mission as a University gathering place when it remained open over the holi-

days. Volunteers from the cooking staff served coffee and doughnuts every afternoon in the Coffee House. Parties on Christmas and New Year's Eves emphasized the holiday spirit. Wood was plentiful for all the fireplaces throughout vacation, and all sufficiently skilled were invited to make candy in the Coffee House kitchens.

FRANK SHEEHAN, familiarly known as "Doctor," is the possessor of a medal and letter of presentation from Mayor Hylan of New York, to commemorate his part in training the American team which won the Olympic games at Antwerp last summer.

DE YEN TWAS, Indian for "builders of farms," is the name of an organization founded in Ithaca by Iroquois Indian short course students at the College of Agriculture. Onondagas, Cayugas, Senecas, and Oneidas were charter members. Although active membership is limited to American Indians, Dean Mann is honorary president and four professors of the College are honorary members. The Indian students were sent to Cornell from their reservations to carry scientific agriculture back to their people.

PROFESSORS HERBERT J. DAVENPORT and Walter F. Willeox and Assistant Professors James H. Rogers and Donald English attended the convention of the American Economic Association at Atlantic City at the end of the year. Professor Davenport has just completed a term as president of the Association, and Professor Willeox is also a former president.

MINOR SPORTS TICKETS this year admit holders to varsity and freshman basketball, wrestling, lacrosse, hockey, skating, and tobogganing. The goal of \$10,000 from their sale set by the Athletic Association is rapidly being approached.

FRATERNITY MEN and independents have formed ice hockey leagues to use the new rinks which are appearing on different parts of the Campus.

THE FRESHMAN CLASS of the College of Agriculture and Omicron Nu, senior honorary society in home economics, have unanimously approved resolutions binding them to support the honor system in that College.

IN ADDITION TO HIS JOB as special assistant to the Secretary of Agriculture, which means that he is busy editing an

old-fashioned farmers' almanac for the United States Department of Agriculture, Professor Bristow Adams attended two conventions during his holiday "vacation." He spoke before the Association of College News Bureaus in Columbia, Missouri, and before the convention of the American Association of Teachers of Journalism at St. Louis.

FOUR MEMBERS OF THE FORESTRY FACULTY, Professors Hosmer, Recknagel, Spring, and Bentley attended a meeting of the American Society of Foresters at the Yale Club, New York, during the holiday recess. Professor Recknagel presented a paper on the cutting of hardwoods in the Adirondacks.

PROFESSOR CLARENCE A. MARTIN '90 was in Philadelphia last week to attend a meeting of the executive board of the Association of Collegiate Schools of Architecture, of which he has been secretary and treasurer.

THE ATHLETIC ASSOCIATION has received invitations to send teams to the twenty-seventh annual relay carnival on Franklin Field on April 29 and 30; to the thirty-second annual invitation handicap track meet and relay carnival of the Boston Athletic Association, in the Boston Arena February 5; and to the fourth annual relay carnival of the Illinois Athletic Association, which will be staged in the University of Illinois Armory March 5.

PRESIDENT SMITH'S OAR, which he wielded as a member of the first Cornell crew which ever won an intercollegiate championship, in 1876, has been added to the collection of Cornell trophies in Schoellkopf Memorial, as has also a picture, presented by Mrs. Charles E. Courtney, of Cornell's "Grand Old Man" in his rowing togs.

"MOSE" ZINBERG, vendor of "the weed" and its accessories to three generations of Cornellians, and loyal follower of varsity athletics, left his post at the University Smoke Shop in the Ithaca Christmas night to take charge of the New York office of H. Comoy & Co., Ltd., London manufacturers of briar pipes and other articles for smokers.

MAUDE RADFORD WARREN, feature writer for *The Saturday Evening Post*, has returned to Ithaca from a year's travel in Europe, Asia, and Africa. She expects to remain here for a year or more, writing articles and stories for the magazines.

To Report Next Week

Endowment Committee Estimates That Fund Will Near Original Goal.

Reaching an average of more than \$25,000 a day during Christmas Week, subscriptions to the Semi-Centennial Endowment fairly swamped the offices in Morrill Hall up to and including January 1, the day on which the intensive campaign officially ended. Campaign officials are now preparing a final statement of the total of the amount raised for presentation at the meeting of the Board of Trustees on January 8. A full report will be made in next week's issue of the ALUMNI NEWS.

In addition to the amount subscribed for increasing professorial salaries, in which totals have been announced weekly since early last spring, the special gifts for buildings and betterments that have been received since April 29, 1916 are included, by action of the University Trustees, in the Semi-Centennial Endowment Fund. With additional subscriptions signed before the end of the year the Endowment Committee anticipates that the grand total to be announced to the Trustees will closely approach the \$10,000,000 goal that was suggested by the New York City committee following the successful raising of the first part of the national quota of \$5,000,000.

The close of the calendar year will not see the end of solicitation of subscriptions from alumni for the support of the University. By action of the Trustees in June, the activities of the Semi-Centennial Endowment Committee are now merged with the Cornellian Council, which will carry on the work of obtaining funds for the support of the University from alumni and friends of Cornell. The executive committee of the Cornellian Council is now working on plans which will provide for the creation of a permanent organization whose function it will be to continue the work done during the past year and a half by the Semi-Centennial Endowment Committee.

Subscriptions which alumni make to the University hereafter should be sent to the Cornellian Council at 32 Morrill Hall. In the near future the Council will issue a uniform subscription blank which will enable donors to make subscriptions for any University purposes.

PROFESSOR LOUIS A. FUERTES '97 went to Miami, Florida, December 26 to direct the hanging of three of his canvasses in the Flamingo Hotel. Besides these pictures, he has designed menu cards and trunk labels to give artistic illustration to the name of this new hostelry.

COBLENTZ '01 HONORED

The Jansen Medal has been awarded by the Academy of Sciences in Paris to William W. Coblentz '01, physicist in the Bureau of Standards, for his discoveries in connection with rays emanating from the earth and stars.

Coblentz is a native of Ohio, and has received two degrees at Cornell, A. M. in 1901 and Ph. D. in 1903. He has been attached to the Bureau of Standards for the past twelve years, and has developed a method of measuring radiant heat by infra red and ultra violet rays. He has devised an instrument for astronomers to measure heat from the stars, and during the war he developed signal instruments for ships at sea and an instrument for detecting moving bodies, such as ships, by their heat emanation in the dark.

CORNELLIAN COUNCIL TO MEET

The semi-annual meeting of the Cornellian Council will be held in Morrill Hall on Saturday, January 22, at 10 a. m.

Police Take Denny

Southern Trip Proves Undoing of Bogus Check Expert.

R. L. Denny, the silver-tongued check cacher who has been operating for some time in South Carolina and points south, has been run to earth at Birmingham, Alabama, as predicted in our last issue. Through the quick action of H. W. Hagemann '13, of Miami, Florida, who recognized Denny as the same man who had approached him in New York City last summer, detectives were put on Denny's trail after he left Florida for Alabama, and the police along the route were instructed to watch for him. The man was arrested on December 22.

Hagemann had read stories of Denny's operations which have been appearing in the ALUMNI NEWS during the past few months. A copy of the ALUMNI NEWS with a story stating that Denny was operating in the South Atlantic States reached Hagemann the day after Denny called upon him, but the express receipt for his trunk and the forwarding address which he had left established Birmingham as the next destination of Denny and his Maxwell automobile. The police were there with a real old-fashioned welcome.

All of Denny's known victims—there are ten of them, indicating many others who are unknown—have been kept informed by the Alumni Representative of the developments in the case, and already a sufficient number of warrants have been sworn out to indicate that Denny will be located for some little time where it is difficult to raise money on bogus checks.

Harriers Surprise All

English and Americans Agree That Cornell Runners Put Up Remarkable Performance.

The cross country team was defeated by a picked combination of the fastest distance runners of Cambridge and Oxford Universities at Roehampton, England, last Thursday by the narrow margin of three points, the Britons scoring twenty-six points to twenty-nine by the Cornellians. The outcome of the race, characterized in the cable dispatches as one of the most spectacular events of its kind in the annals of British sport, was in doubt almost until its very end.

Not until W. R. Seagrove, the Cambridge captain, had beaten R. E. Brown in a dash to the tape, giving the Britons four out of the first seven, was the outcome of the race determined, so evenly balanced were the teams.

Individual honors were won by N. A. McInnes, a youthful Oxford star, who crossed the finish line about 100 yards ahead of Charles C. Carter of Cornell, Jack Moakley's latest distance find. T. C. McDermott of Cornell was third, beating out W. A. Montague, the Oxford captain and one of the most famous runners in Great Britain. The summary in order of finish follows:

N. A. McInnes, Oxford	42:09	4-5
C. C. Carter, Cornell	42:44	
T. C. McDermott, Cornell	43:04	2-5
W. A. Montague, Oxford	43:14	
W. T. Marsh, Cambridge	43:15	
N. P. Brown, Cornell	43:22	
W. R. Seagrove, Cam.	43:36	
R. E. Brown, Cornell	43:41	
W. H. Grave, Oxford	43:58	
H. V. Bousal, Cornell	44:09	1-5
R. B. Sutton, Oxford		
E. H. Anderson, Cambridge		
M. E. Richman, Cornell		
J. L. Dickinson, jr., Cornell		

The race was run over the Thames Hare and Hound course of about seven miles and a half, and it proved the most difficult course that any American cross country team has ever attempted. Considering the long trip, the necessary relaxing of training, the differences in climatic conditions and in course, that Cornell should hold the British runners to practically even terms was a first rate achievement and is so recognized both in England and America.

None dared look for a Cornell victory. There was just a bare outside chance, in the view of Coach Moakley and some American critics, that by bunching the pack the Cornellians might squeeze through.

But the more reasonable view was that if the team could make a good showing against the fastest runners of the two greatest English universities, running on their native heath, and in a sport to which they have been accustomed from boyhood, the Cornellians

would be accomplishing all that could be expected of them.

As a matter of fact, a cable to *The New York Herald* said that the Cornell team "gave the pick of the Oxford-Cambridge distance runners and the British sporting public the surprise of their lives by almost winning the race." Again, "The race was in doubt until the last man finished while thousands of spectators were gaily thrilled by what was called the most spectacular event of its kind ever held here." Cornell's performance was considered "worthy of the highest praise."

Continuing the *Herald's* correspondent said: "The most gratifying feature of the event was the excellent sportsmanship between the teams. Veteran sportsmen of both home universities turned out in great numbers and the course was lined with automobiles. The men were cheered at every obstacle—two water jumps, barbed wire fences, and a mile of ploughed land.

"The clean-cut, good-humored Yanks made a tremendous impression. Not a single unpleasant incident marred the race, which is sure to do much to further international competitions."

According to Arthur S. Draper, *The New York Tribune's* correspondent, the race was one of the greatest ever run over the famous Thames Hare and Hounds course. Some details of the event are given in Mr. Draper's copyrighted article in the *Tribune*:

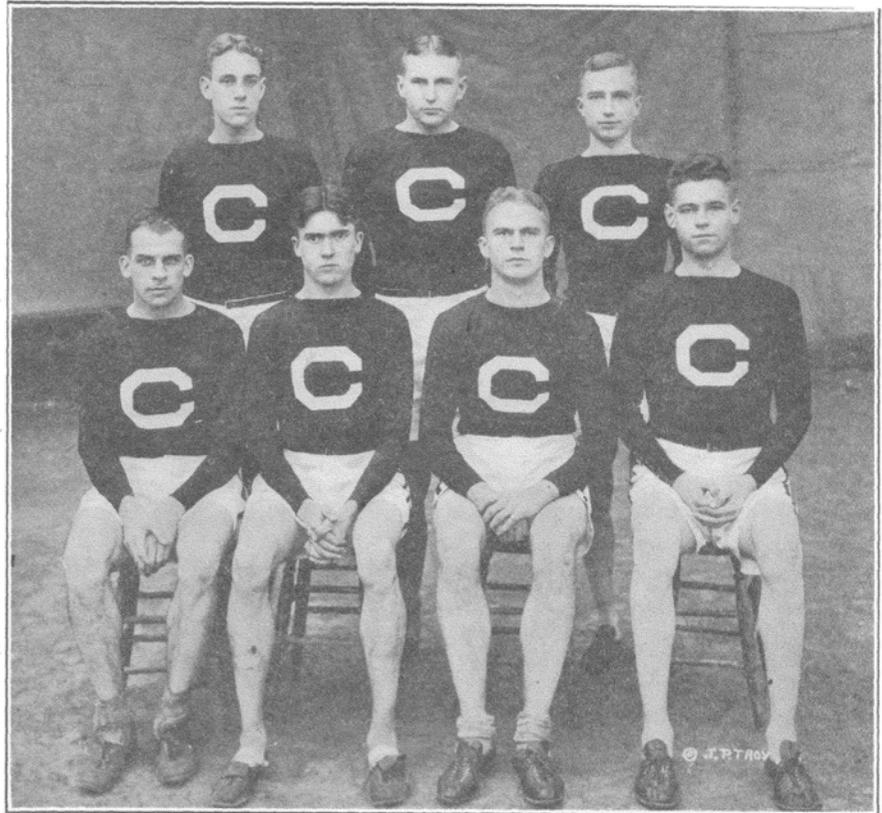

"The American runners, who have been in this country only a week, gave an amazingly fine exhibition against what was declared to be the finest varsity team England has produced in twenty years. . . .

"The seven and one-half miles . . . included three severe water jumps, a long stretch of plowed field, and numerous hills. Altogether, it was the stiffest course any American harrier ever journeyed over, and not only did every Cornellian finish in good condition, but they came within a few strides of defeating a wonderful English team at their favorite race.

"The friendliest sort of feeling existed and a large crowd of spectators cheered the mud-bespattered athletes individually as they crossed the finish line. The holiday spirit prevailed and Roclampton, the little London suburb where the race was run, was taxed to accommodate the large number of people who gathered for the big international event.

"At the starter's gunfire Seagrove, the Cambridge athlete who scored for England in the Olympic games, went to the front closely followed by Marsh, also of Cambridge, with Charlie Carter, Moakley's latest find, a good third. The rest of the field was strung out about ten yards back at the first half-mile post, where McInnes spurted to the front never to be headed.

"The first water jump brought about the downfall of Seagrove and, incidentally, it weakened several of the Cornell runners who were unaccustomed to such a severe course. When the plowed field was reached, McInnes lengthened his stride and pulled away from Carter, but the latter hung on gamely and the pair

CROSS COUNTRY TEAM THAT RACED AT ROEHAMPTON Photograph by J. P. Troy
From left to right: top row, M. E. Richman '23, C. C. Carter '22, H. V. Bonsal '23; bottom row, T. C. McDermott '21, R. E. Brown '22, J. L. Dickinson, jr. '21, N. P. Brown '21.

soon outdistanced the balance of the field. This section of the course was very muddy and at times the men had great difficulty lifting their feet from the mire.

"Open road running is where the Americans shine, and when the two-mile stretch of even road was encountered Moakley's boys began to pick up speed, Carter particularly, reducing the lead of the flying McInnes. Back in third place Tom McDermott was having a great time trying to stave off Montague, of Oxford, who holds the record for the course.

"McDermott actually outran the Englishman on the open stretch, but wherever the hedges and the rough country were met Montague went to the front. These two alternated in third and fourth positions until half a mile from the finish, where the Cornell man made his final sprint. Showing more reserve than Montague, the American led the Briton to the tape by about one hundred yards.

"Carter made frantic efforts to catch McInnes, and the Cornellian really finished stronger than the winner, but McInnes had the advantage of an early lead and great reserve strength and deservedly won first honors.

"Aside from the creditable manner in which the American runners performed, the outstanding feature of the team was the fine showing of Charles Carter. This youth did not compete in the intercollegiate title race at New Haven on November 20, but was selected a week before the Cornell team sailed after he had won the final tryout conducted at Ithaca."

The Cornell team was royally entertained at Cambridge and Oxford Uni-

versities and by Americans in London during its trip; on the night before the men sailed they were guests of honor at a banquet. The party sailed from England on January 1 and is due in New York about January 6 or 7 and in Ithaca directly thereafter. A fitting welcome home by the undergraduate body is assured.

According to an Associated Press cable dispatch from London, an invitation in behalf of the undergraduate body of Cornell was extended by the cross country team to the undergraduate bodies of Cambridge and Oxford to send their track teams and crews to America next spring to meet Cornell on track and water at Ithaca. This cable also quotes Coach Moakley as stating that he expected that Cornell would introduce the English system of cross country running into this country.

MODERN LANGUAGE MEETINGS

At the meeting of the Modern Language Association, which was held at Vassar College, Poughkeepsie, on December 28-30, Professor Ray P. Bowen, Ph. D. '16, of Syracuse, discussed "The Evolution of the Priest *Genre* in the French Novel of the Nineteenth Century"; Professor George L. Hamilton was to have discussed "The Source of an Old French Epic Prayer" but was prevented from attending; Professor

Ralph H. Keniston discussed "Juan de Valdés as a Literary Critic." The following were read by title: "Mistaken Ideas in the Folklore of Language" by Professor Charles Bundy Wilson '84, of the State University of Iowa, and "A Note on the Realism of Eugène Fromentin" by Professor Lewis P. Shanks '99, of the Western University. Professor Clark S. Northup '93 was the secretary of the English Section. Other Cornellians present were Dr. N. Gertrude Chase, A. M. '05, of Wells College, Professor Lewis P. Shanks '99, of Western University, Professor Georgianna Conrow '99, of Vassar College, Professor Lane Cooper, Dr. John W. Hebel, A. M. '13, Ernest H. Hespelt '10 and Mrs. Hespelt, A. M. '18, Professor Wesley D. Zinnecker, Ph. D. '12, and Homer A. Watt '06, of New York University, and Dr. Llewellyn M. Buell '10, of Yale.

At the meeting of the Central Division of the Association, which was held in Chicago under the joint auspices of the University of Chicago and Northwestern University on the same days, Professor Elijah C. Hills '92, of Indiana University, discussed "Spanish Arte Mayor Verse" and Professor Charles B. Wilson '84 offered a paper, read by title only, on "German and English Names of Animals in Folk Etymology." Professor Oliver F. Emerson, Ph. D. '91, of Western Reserve University, was the chairman of the conference on English instruction, at which Professor Clara E. Myers '96, also of Western Reserve, discussed "The Use and Abuse of the Contemporary in the Teaching of English" and Professor Allan H. Gilbert '09, of the University of Tennessee, spoke on "What Shall We Do with Freshman Themes?"

SEISMOGRAPH IS ADAMANT

The seismograph in McGraw Hall has vindicated itself in the face of what appeared to be a serious error. Reports from Kansu Province in China tell of earthquake shocks there on a date when the Weather Bureau instruments in Washington and those of other universities recorded shocks much nearer. At the same time the Cornell instrument recorded disturbances about 5,500 miles away, at the approximate distance, through the earth, of the Chinese province.

For a time scientists were worried over the apparent inaccuracy of their instruments, but now they have concluded that there must have been other tremors nearer this continent on the same date. But the drum on the Cornell instrument continued phlegmatically to revolve; the sensitive needle continued to trace its tell-tale irregular line, regardless of the fact that other needles

were recording a shock only 2,800 miles away. And now the telegraph has upheld its independence.

Class Secretaries Meeting

Alumni Rally to be Revived—In Charge of Fifteen-Year Class as Before

The Association of Class Secretaries held its annual winter meeting at the Cornell Club in New York on December 31. Dr. Coville '86, president, and Professor Northup '93, treasurer, were present; Ross W. Kellogg '12, secretary, was prevented by illness in the family from attending. There were secretaries or representatives from twenty-six of the fifty-two classes, and from the Medical College.

Professor Northup was designated acting secretary.

Professor Burr '81 by request spoke at some length on Dr. Andrew D. White. He strongly emphasized the point that Dr. White never had personal ambitions of a political sort, but accepted public office chiefly for the influence which this would exert in behalf of the institution of which he was president.

The Alumni Representative was elected an honorary member of the Association, and the present incumbent of that office, Foster M. Coffin '12, was elected secretary of the Association.

The Dix plan of reunions was discussed at some length, and a committee consisting of Messrs. Northup, A. J. Whinery '10, and J. E. O. Winslow '11 was appointed to investigate the plan and report at the June meeting.

The question of the relation of the Association to the Associate Alumni and whether there should be a closer amalgamation was discussed and a committee consisting of Messrs. W. W. Rowlee '88, W. H. Austen '91, and V. A. Moore '87 was appointed to consider the matter and report at the next meeting.

The Alumni Rally, which for several years proved so successful a feature of Alumni Days, and which was discontinued during the war, was discussed and the resumption of the annual custom was unanimously favored, the affair to be in charge, as formerly, of the fifteen-year-reunion class.

The treasurer reported a balance on hand of \$378.08 and a book balance of delinquent dues of \$286.25, for more than one-third of which two classes, '76 and '98, are responsible. The treasurer was instructed to take the steps necessary for the collection of these delinquent dues.

ITHACA WOMEN'S ORGANIZATIONS have made themselves a Christmas present of a women's community building. The City Federation of Women's Organiza-

tions has bought the Frederick W. Brooks house at the corner of Cayuga and Seneca Streets and moved in January 1 with a tea and "shower."

ITHACA WOMEN'S DINNER

The Cornell Women's Club of Ithaca will celebrate Founder's Day, January 11, with a dinner in the Home Economics Assembly Hall at 6.30. All Cornell women are invited. Representative undergraduates will be guests of the club. There will be stunts, pictures, and a few speeches (reminiscences).

A BRIDGE TALK

Thirty-five Detroit Cornellians on December 23 heard Col. H. H. Esselstyn, of Esselstyn, Murphy, and Hanford, talk on the Belle Isle Bridge, a \$5,000,000 project for which his firm are the engineers. It was an interesting talk, flattering for Cornellians, for Col. Esselstyn (an honor graduate of the well known School of Hard Knocks) stated that his opinion of Cornell, gained through Cornellian partners and other Cornellians of his acquaintance, had made him decide to send his son (even before he had one) to Cornell when the proper time arrived.

A. C. Trego '13 and J. Frazer Whitehead '13 reported excellent progress in the Endowment Fund campaign and on the plans for the Glee Club concert and ball.

CALIFORNIA OFFICERS

At the annual dinner of the Cornell Club of Northern California, held at the University Club of San Francisco on December 14, Ernest DeL. Magee '97 was elected president and William D. M. Shuman '13 was elected secretary for next year.

CORNING STARTS

The Cornell Club of Corning, New York, was organized on December 17, at a meeting held to discuss the Endowment Campaign. Professor Ogden was the principal speaker. The club started with twenty charter members; the following officers were elected: president, Judge John C. Wheeler '08; vice-president, Ernest Ling '15; secretary, Edwin J. Carpenter '18; treasurer, Charles L. Cook '13. The officers were constituted an executive committee and the details of organization were referred to them. The next meeting was fixed for January 18, at the Elks' Club.

BINGHAMTON ELECTS

At the annual meeting of the Cornell Club of Binghamton, at the University Club on December 17, officers for the ensuing year were elected as follows: president, Dr. F. M. Dyer '02; first vice-president, H. J. Underwood '11;

second vice-president, A. L. Gilmore '08; secretary, G. B. Cummings '12; treasurer, Miss Anna MacNamara '10.

The invitation of Dr. Hammer, principal of the High School, to have a Cornellian address the High School assembly regarding Cornell affairs was cordially accepted. An informal reception with impromptu harmony preceded the meeting, which was followed by a buffet luncheon and a general gab-fest.

The following night was Cornell night at the University Club and C. H. (Chie) Divine '11 talked on "Northern Africa—Algeria and Tunis." All Cornell men were invited to attend in addition to the regular club members.

ORTH DECLINES POST

Professor Samuel P. Orth has declined the invitation of Governor Nathan L. Miller to go to Albany as secretary to the chief executive of the State. The position includes wide and important powers in connection with the Governor's duties, and State affairs in general. Professor Orth was chosen because of his knowledge of government and public law and his experience with the organization of public administration in Ohio, where he resided before he came to Cornell. Although he was unwilling to leave the University to go to Albany at this time, Professor Orth has assured the Governor that he would be on call at any time to assist in the proposed reorganization of the State administration.

He is the second Cornellian who has so far been invited to become a member of Governor Miller's staff, Professor C. Tracy Stagg '02 having been appointed his legal adviser, as reported in the ALUMNI NEWS of December 23.

RESEARCH AND POVERTY

August Heckscher, donor of the half-million-dollar fund for research at Cornell which was announced last June, has disproved the claim, sometimes heard, that those interested in the promotion of science are not so much interested in what might be called the humanitarian side of life. He and Mrs. Heckscher recently gave four million dollars to the Society for the Prevention of Cruelty to Children, to give, as Mr. Heckscher expressed it, "the unfortunate children in New York a fair chance in life."

The immediate use to which this gift will be put is the erection of a new building for the Society in New York City, but Mr. Heckscher has expressed the hope that the good which will be done for the city's children will be an example in child welfare work to all the big cities of this country.

A FIELD LABORATORY

Professor and Mrs. Jeremiah W. Jenks, who are now in New York, have

deeded property on the east shore of Cayuga Lake to the University for the use of the Department of Biology. Boats, kept in the boathouse which comes with the property, will be available for collecting the specimens in which the end of the Lake and the marshes near it abound.

SPORT STUFF

There are a great many foreign students in the University and they are good sports. Beebe Lake is a cosmopolitan and colorful place these crisp, vacation afternoons.

Comes a cold snap and no work on the hill! Do Wally Dad and Angelo Maria and John H. Chow Hop and Giovanni crawl into their holes and mope? No. They purchase an expensive sporting outfit and go to it. Either they are such wonderful skaters that one gets the impression a circus has busted up in the vicinity or else they can't skate at all. On our right we have Miniskarkian '22 writing his name on the ice (some stunt!) while to the left Hop Lee '23 is playing hockey the first day he ever had skates on. The fact that Hop knocks the everlasting daylights out of himself every thirty seconds has no effect on his super-smile. When it comes to standing the gaff the Celestial is there. Anyone of those ninety-seven smacks he assimilates would have you and me on the shore taking off our skates and throwing them away.

There is something pathetic about a student who has no place to go at Christmas time except to the one dog wagon that stays open, but with ice on Beebe the little brothers from over seas seem to be keeping their heads and tails up and doing fine, thank you very much.

The principal athletic event in prospect is examinations. Every coach is pursuing his squad with cuss words and encouragements. For what profiteth it a man to be able to put a two-foot break on his spitter or do the hundred in evens if he hath merely a D in Spanish 1 or History of Religion 16? I ask you.

R. B.

INTERCOLLEGIATE NOTES

THE 11,673 STUDENTS now at the University of Pennsylvania represent every State in the Union and forty-five foreign countries. There are 8,644 from Pennsylvania, 873 from New Jersey, and 641 from New York; 101 come from the Latin-American countries, 45 from China, and 44 from the British Empire.

DARTMOUTH has voted not to permit the building of any fraternity house until the plans and a statement of the location have been submitted to the

Board of Trustees and formally approved. This action is intended to guard against the creation of artificial standards of living.

PLANS are under way for the publication of a magazine of Dartmouth verse. The editors will probably obtain college credit for their work.

WISCONSIN has on hand a building program which if approved by the State Board of Education and the Legislature, will call for more than \$3,000,000 in the next two years. There has been no important building since 1914; and by the time the new buildings can be used the university will have doubled in size.

CHICAGO has established fourteen university commissions, one for each of the following groups: The Law School; The Medical School; The Graduate Medical School; The Divinity School; The School of Education; The School of Commerce and Education; The Colleges of Arts, Literature, and Science; Women's Interests; Historical Group, including Political Economy, Political Science, Sociology, and Anthropology; Modern Language Group; Classical Language Group; Physics, Chemistry, and Mathematics; Geology and Geography; Biological Group (Zoology, Anatomy, Physiology, Botany, Pathology, Hygiene, and Bacteriology). Of each commission the president of the university is *ex officio* a member and there will be also the following members: two alumni, one to be elected by the Alumni Council, the other to be appointed by the president of the board of trustees on the recommendation of the president of the university; two or more residents of Chicago or vicinity not officially connected with the university, to be appointed like the second alumnus; two members of the faculty, when practicable to be heads of departments or deans closely associated with given departments; one member of the board of trustees and an alternate. Each commission is to meet at least once each quarter except in the summer, and at one of the meetings the teaching force of every department concerned is to be represented; there may also be special meetings in accordance with regulations provided by the commissions.

PENNSYLVANIA won the intercollegiate title in soccer as the result of a second game to play off the tie with Princeton. The regular schedule game was tied, as was the first play-off attempt.

MISSOURI has started a comic paper, *The Showme*. The editors do not state how often it is to appear. There are, however, to be six issues during the year. The first numbers are highly creditable.

Published for the Associate Alumni of Cornell University by the Cornell Alumni News Publishing Company, Incorporated.

Published weekly during the college year and monthly during the summer; forty issues annually. Issue No. 1 is published the last Thursday of September. Weekly publication (numbered consecutively) continues through Commencement Week. Issue No. 40 is published in August and is followed by an index of the entire volume, which will be mailed on request.

Subscription price \$4.00 a year, payable in advance. Foreign postage 40 cents a year extra. Single copies twelve cents each.

Should a subscriber desire to discontinue his subscription, notice to that effect should be sent in before its expiration. Otherwise it is assumed that a continuance of the subscription is desired.

Checks, drafts, and orders should be made payable to Cornell Alumni News.

Correspondence should be addressed—

THAT CROSS COUNTRY DEFEAT

Cornell was defeated in cross country running by the fastest combination of runners that could be selected from the mother country of the sport. Some alibi has been wasted by a patriotic press that believes that America can defeat the world in anything and everything, and always should.

Everyone who follows the sport at all is gratified that our seven representatives performed so well. It was felt that their situation was analogous to that of a skiing team racing the combined collegiate skiers of Scandinavia. But the result was so close that a slight difference in the order of finish would have changed it; the winners had to make the best time for the course this year; the course record was endangered at a season when the going was at its heaviest; and the largest crowd known to the sport thought it was the best contest they had ever seen—there are conceivably victories that are less to be coveted than this sort of defeat.

CORNELL HAS RECEIVED \$38,000 from the Carnegie Foundation this year.

OBITUARY

Ralph R. Duniway '92

Ralph Roelfson Duniway, a prominent attorney of Portland, Ore., died on December 7 at the Portland Medical Hospital. He had been at the hospital for about a month, suffering from acute muscular rheumatism, but was thought to be improving, and his death was very unexpected.

He was born at Albany, Oregon, on November 7, 1869, the son of Benjamin C. and Abigail Scott Duniway; two years later the family moved to Portland.

He came to Cornell in 1890, receiving the degree of LL. B. in 1892. He was a member of the Cornell Congress.

In the same year he was admitted to the bar of the State of Oregon, and after serving for a short time as first assistant city attorney of Portland, he opened offices in the Chamber of Commerce Building, where he had practiced for the past twenty-eight years. He was known throughout the State as an authority on municipal law; he was a keen student of public affairs, and never hesitated to champion a cause he deemed worthy. He was one of the organizers of the Lawyers' Auxiliary, and took a prominent part in all war activities, serving in the Multnomah Guard, and as a Four-Minute Man.

Mr. Duniway was the youngest of six children, the two oldest of whom are dead. His sister, Mrs. Clara Belle Stearns, died in 1885, and his oldest brother, Willis, died in 1913. Surviving him are his wife, Mrs. Kate Duniway, a son, Robert, a daughter, Katherine, and three brothers, Wilkie C. Duniway, of Portland, Dr. Clyde A. Duniway '92, president of Colorado College at Colorado Springs, and Hubert R. Duniway, of New York.

Eugene C. Zeller '99

Eugene C. Zeller died suddenly on November 11, following an operation for appendicitis.

He was born in St. Louis on April 14, 1876, and was the youngest son of Christine Zeller and the late William Zeller of St. Louis. He attended Washington University, St. Louis, for a time and entered Cornell in 1895, receiving the degree of B. S. in 1900. He was a member of Phi Delta Theta and Sphinx Head, and was a four-year member of the varsity track team, winning his C in 1897. At one time he held the Cornell record for the mile walk.

During the first thirteen years of his business life he was associated with the Carleton Dry Goods Company, of St. Louis, and for the past seven years had been affiliated with the bond brokerage firm of Whitaker and Company.

Since his graduation he had kept up

his interest in the affairs of the University and of the Cornell Club of St. Louis, of which he served as president for two successive years. Whenever it was possible he returned to Ithaca for Commencement, and this past summer he made a special trip to visit and enjoy the old familiar scenes.

The influence of his days at Cornell was shown all through the after years in his high ideals and through the many close and lasting friendships which had their beginning at Cornell.

He is survived by his mother, Mrs. Christine Zeller, a sister, Mrs. F. W. Frerichs, and a brother, William F. Zeller.

John L. Moffat, 6th, '16

John Little Moffat, 6th, died on December 4 at Asheville, N. C., of tuberculosis contracted while in France with the Air Service.

He was born on January 21, 1894, and was a son of the late John Little Moffat '73, well known throat, ear, and eye specialist, who died on February 18, 1917, at Ithaca where the family had lived for some time. He prepared at Adelphi Academy in Brooklyn, entering Cornell in 1912 in the course of veterinary medicine.

Moffat is survived by his mother, a sister, Helen Moffat '18, and a brother, R. Curtis Moffat '18. The funeral was held from the family residence in Brooklyn on December 7.

Constructive Criticism

Summaries of the Annual Reports from Arts, Law, and Medicine.

Below are summarized the reports of the deans of Arts and Sciences, Law, and Medicine.

Dean Thilly, whose report is finely constructive, speaks first of the excellent work of the newly created Advisory Board for underclassmen which is empowered "to select advisers for freshmen and sophomores, to require of the student a plan in the choice of his studies, and to administer the cases of scholastic deficiency arising in these classes." Speaking of the evils which beset the inexperienced freshman, he remarks, "The fraternities could render great service if they would look upon themselves not as mere social centers but as cooperating members of the academic polity, helping to realize what a university essentially stands for. At present their loyalty is only partial and incomplete; they must develop a loyalty to the spiritual purposes which it is the chief concern of an institution of learning to promote and make a living force in the world. A real university cannot do otherwise than emphasize scholastic

achievement as its primary aim; we cannot forget that this is what universities have been established for, and that they prove unfaithful to their trust when they worship idols. The notion ought not to gain ground that only a few peculiar and freakish persons are expected to take the academic tasks seriously while the normal and healthy-minded are here chiefly to shine in the extra-curricular activities. I do not believe that the expensive scholastic apparatus of the modern university is needed for the realization of such an ideal, or that the American people will go on paying for it, or professors be willing to become a part of it, if the ideal should become a reality.'

The next problem taken up is the very important one of upperclass electives. Too many upperclassmen scatter their shot. "One of the chief functions of our College to train the student in the use of the sources and the methods of knowledge, in the art of independent investigation, so that he may learn how to find knowledge for himself. To this end he should give a large part of his upperclass years to an intensive study of subjects of an advanced character, for which the foundations have been laid and which form a logical sequence. We cannot realize our purpose unless each department carefully studies the problem and works out a program to guide the particular upperclass adviser in his efforts to help the student. The weakest part of our educational structure is to be found in our upperclass years." This is a problem for the departments.

Concerning vocational courses the Dean believes that if new schools are established, they should be like the proposed School of Commerce, in which seniors may win A. B. after one year's work and A. M. after an additional year.

The Dean reports that there are still too many students per instructor and pleads for more consideration of quality rather than quantity. "There is need of trained minds to train minds, and we have not masters enough to go around." We cannot wisely cut down the number of courses, unless one were to cut in some of the elementary courses duplicating secondary school instruction; even this, unless the students involved went elsewhere, would avail nothing. We cannot safely limit the enrolment unless the other colleges do the same.

The enrolment of women, which in 1918-19 was 33.3 per cent, last year rose to 34.3 per cent.

The Law School.

Dean Woodruff urges all students

who can to take the six-year arts-law course, giving two degrees, instead of the five-year law course which gives only the one law degree. There were 213 students in law during the year. The Law Library now contains 53,197 volumes. The *Law Quarterly* "has won a place among the recognized periodicals of the country."

The Medical College.

Dean Niles, of the Medical College in New York, reports the circumstances which made it imperative to limit the number of entering students annually to seventy-five and the sophomore and upper classes to about sixty each. Women will from now on be admitted to the New York Division. A Committee on Educational Policy has been formed and meets monthly, and there are also committees on the curriculum, the dispensary, and the library. The salaries of the whole-time staff continue to be inadequate, as do the opportunities for clinical teaching, in consequence of the lack of hospital control. As soon as funds are forthcoming, Cornell must have her own adjoining hospital, "with funds adequate to carry on the larger work as well as to provide for certain extensions, particularly in the field of preventive medicine." The clinic in Bellevue Hospital (Second Division), chiefly manned by whole-time workers under the direction of Professor Du Bois, has proved a highly satisfactory development. The studies of cancer at the Memorial Hospital continue to progress satisfactorily. In its twenty-two years of existence the College has taken an important part in the development of American medical education.

LITERARY REVIEW

Books and Magazine Articles

The second edition of "Rus," Professor Bailey's directory of country life workers, has lately appeared. The number of entries is increased from 2,746 to 4,631. We regret to note that the editor, since this is only two-fifths the number of persons solicited for information, supposes "that the constituency is not sufficiently interested in a who's-who of its field to warrant the continuance of the enterprise"; we think rather that the failure to send back the filled-in blank is only a bit of carelessness which is another form of selfishness that ought to be severely rebuked wherever it appears. We hope that sentiment among the clientèle of this work will so strongly demand its continuance that the editor will take courage and continue to publish it regularly. As he says, "it is part," and it is a valuable part, "of the accumulating acknowledgement and inventory of the

rural side of our civilization." It is conceivable that sometime we might come to have a superfluity of such works of reference; but it will be a long time before we shall reach that state.

President William W. Comfort, of Haverford College, formerly of Cornell, in *The Nation* for December 1 reviews a Quaker novel, "Hannah Bye," by Harrison Morris.

Professor George L. Hamilton contributes to *The Modern Language Review* for October an article on "Tristram's Coat of Arms." Either he or Roger S. Loomis is responsible for a curious oversight, "loca classica," as a plural.

Dr. Leon A. Hausman '14 writes in *Natural History* for September-October on "Mammal Fur Under the Microscope." He shows how the microscopic structure of mammal fur permits of a systematic classification and identification of it. The article is illustrated by drawings of representative hair structures. The same number includes a review by Frank M. Chapman of "The Game Birds of California," by Joseph Grinnell, Harold Child Bryant, and Tracy Irwin Storer, illustrated by Louis A. Fuertes '97 (University of California Press, 1918). The review reproduces two of Fuertes' pictures, the mountain and California quails.

Dr. Leon A. Hausman '14 contributes to *The American Naturalist* for November-December an article on "Structural Characteristics of the Hair of Mammals." He has also lately written "The Microscopic Identification of Mammal Hairs Used in the Textile Industry" in *The Scientific American* for February 21 last, and "A Micrological Investigation of the Hair Structure of the Monotremata" in *The American Journal of Anatomy* for September.

The Woman's Press announces "A Woman's Point of View" by Harriot Stanton Blatch, sister of Theodore Stanton '76 and the late Robert Stanton '80 and mother of Mrs. Nora Blatch De Forest '05. The book is priced at \$1.25.

"The Burgess Animal Book for Children," by Thornton W. Burgess, with 74 illustrations by Louis A. Fuertes '97, has just been issued by Little, Brown & Company of Boston. There are 380 pages and the volume sells for \$3. The illustrations, many of which are colored, alone are worth the cost of the book, as all will agree who know of the man who so vividly narrates "The Death of the Chimpanzee." The author likewise is not unknown in local circles; his wife, formerly Miss Carrie Phillips, is a sister of Mrs. William L. Jenks of Ithaca.

George Ira Alden, M. M. E. '90, chairman of the board of directors of

the Norton Company of Worcester, Massachusetts, has recently published a very useful manual entitled "The Study of Electricity by the Deductive Method." Many years ago, Mr. Alden discovered that "an endless flexible shaft revolving about its geometric axis was a helpful analogy of the transmission of energy by electricity." More recently the attempt has been made to extend the analogy and its accompanying working hypothesis to the solution of all problems of the transmission of energy by the direct and the alternating current; and this book is the result. The exposition is clear and the drawings, we believe, are adequate for the full explanation of the principles discussed. The modest volume should meet with a wide sale. It is published by the Commonwealth Press, Worcester.

The December number of *The National Geographic Magazine* might be called a Louis Fuertes number, since the first two articles are from his pen and brush—"Falcony, the Sport of Kings," with twenty-three illustrations, several of which are colored, and "American Birds of Prey—a Review of Their Value," with six illustrations. Praise of the work of Cornell's Bird Artist has become superfluous.

Frederick L. Ackerman '01, in the *Journal* of the American Institute of Architects for December, discusses the investigation into building conditions in New York under the title "The Blot on the Escutcheon."

In *The Cornell Countryman* for December Professor Elmer S. Savage, M. S. '09, writes on "Futurities for New York State Cattle." Professor James D. Brew '12 writes on "Past and Present of Milking Machines." Harry S. Gabriel '15 discusses "The Freight Rate Increase in New York." Professor Howard E. Babcock writes on "Controlling Tuberculosis in Dairy Cattle." Professor George A. Works writes on "Rural School Study for New York State." John R. Fleming '21 reviews Hugh Findlay's "Handbook for Practical Farmers."

In *The Independent* for December '18 Edwin E. Slosson, of the staff, under the head "Traitors to Cornell," points out that "the university that Ezra Cornell founded is turning out just the sort of young men that he most particularly detested" (happily not all are of this type), and that it is from these young "aristoerats" that the opposition to coeducation chiefly comes. Mr. Slosson may fairly lay claim to some knowledge of the subject both from personal observation and from the fact that Mrs. Slosson, formerly Miss May Preston, was a member of the class of '80 (Grad.).

ALUMNI NOTES

'95 BSArch—George L. Coleman, director of the University Orchestra, Instrumental Clubs, and Band, was married on December 30 to Mrs. Louise Gertrude Grosse, in Cleveland, Ohio. Mrs. Coleman lived in her husband's home town, Titusville, Pennsylvania; was engaged in Red Cross work in Europe during the war, as was Mr. Coleman; and has since been superintendent of the hospital in Titusville. Mr. and Mrs. Coleman are living at 614 East State Street.

'95 BS—Professor Rufus H. Pettit, of the department of entomology of the Michigan Agricultural College, has returned to his duties after a three months' leave of absence during which he motored to Florida and collected specimens along the route.

'97 AB—Dr. John A. Hobbie is practicing as a physician at 600 Delaware Avenue, Buffalo. He continues to live in Tonawanda.

'99 BSA, '01 FE—Walter Mulford is director of resident instruction and acting dean of the University of California Agricultural College during the absence in Europe of Dean Hunt. He has a son and two daughters. Mrs. Mulford was formerly Miss Vera Waulding, A. B. '03.

'01 AM—William B. Guiteau has resigned as superintendent of schools of Toledo, Ohio.

'02—Charles W. Furlong delivered a lecture on "The Lost Kingdom of Montenegro" on November 27 at the Museum of the University of Pennsylvania.

'05 ME—James Lynch is president of the Domestic Labor Saving Corporation, with offices at 104 West Forty-fourth Street, New York. This company deals in household labor saving devices. He lives on Ocean Drive, West, Shippau Point, Stamford, Connecticut.

'06 BSA—Charles F. Shaw, professor of soil technology at the University of California, spent two weeks in November carrying on soil survey work in California. He spent a week in the Mojave Desert, studying soil conditions in the light of possible irrigation, and during the second week made a trip over the Imperial Desert in company with Director A. P. Davis, of the U. S. Reclamation Service, to study soil conditions and possibilities of irrigation there. Professor Shaw is a consulting engineer of the Reclamation Service. His address is 320 Hilgard Hall, University of California, Berkeley.

'06 AB—Miss Margaret Loomis Stecker is a member of the research

staff of the National Industrial Conference Board, 10 East Thirty-ninth Street, New York. The Board has recently moved its offices to New York from Boston. Miss Stecker has charge of the Board's reports on the cost of living, which include reports on the actual cost of living among wage-earners in different localities, and estimates, made three times a year, of changes in the cost of living since 1914. She lives at 270 First Avenue, Mount Vernon, N. Y.

'07 AB—Julian A. Pollak, vice-president of the Pollak Steel Company, is chairman of the Cincinnati chapter of the American Society of Mechanical Engineers.

'07 AB—Rufus D. Smith has resumed his work at New York University as professor of government and public economy. Since leaving his position in the Department of Economics at Cornell, Professor Smith has taught at the University of Pittsburgh, has been director of the Associated Charities of Montreal, and has served as secretary of the Canadian Conference of Charities and Corrections. During the past two years he has been in the War Camp Community Service and director of the Community Service of Boston. Resigning this position, he now returns to New York, remaining, however, an adviser of the Boston organization.

'09 ME—At the annual meeting of the American Society of Mechanical Engineers held in New York, December 7-10, James W. Cox, jr., presented a paper on "Cloth for Mechanical Uses."

'10 ME—Blaine B. Ramey is section engineer with the Westinghouse Electric and Manufacturing Company, East Pittsburgh, Pa., in charge of the design of small A. C. motors. He lives at 152 Wilkins Road, Wilkinsburg, Pa.

'10 CE—Lionel M. Levine has opened an office at 29 Broadway, New York, for engineering practice, especially as applied to construction and mechanical equipment of refrigerating plants, packing plants, and tanneries. He lives at 530 Manhattan Avenue.

'10 ME—Mr. and Mrs. George F. (Riek) Hewitt, jr., announce the birth of their son, George F. Hewitt, 3d, on November 8. Their address is 57 Lloyd Road, Montclair, N. J.

'11, '12 LLB—Walter D. Shultz is cashier of the Commercial Bank and Trust Company, Wenatchee, Wash.

'11 ME—Calvin W. Verity, betterment supervisor of the American Rolling Mill Company, has been serving for the past six months as acting assistant general superintendent. His address is 524 South Main Street, Middletown, Ohio.

'11 CE—Nathan R. Finkelstein has recently been elected secretary and

treasurer of Sam Finkelstein & Company, Inc., 801-807 Broadway, New York. His home address is 157 West Seventy-ninth Street, New York.

'11 ME—LeGrand D. Simson is assistant cashier of the State National Bank of North Tonawanda, N. Y., an institution with resources amounting to six millions. He is married and lives at 147 Delaware Street, Tonawanda.

'12 AB; '16—Owing to misinformation, the ALUMNI NEWS erroneously stated in a recent issue that Miss Luella Williams '16 was teaching in the Department of Romance Languages of the College for Women of Western Reserve University, Cleveland, Ohio. We are now in receipt of a communication from Miss Ethel M. Williams '12, stating that she, and not her sister, Miss Luella, is teaching at Western Reserve University. Miss Luella is in Kamuela, Hawaii, with her parents and will probably return late in January. Her mail address is 115 Valentine Place, Ithaca.

'12 ME—Mr. and Mrs. Joseph Kastner, jr., announce the birth of their first son, Donald Edwin, on September 11. They have also two daughters. Kastner is export manager of the American Writing Paper Company, of Holyoke, Mass. They live at 11 Frances Place, Montclair, N. J.

'12; '16 BS; '17—I. Avery Turner, Willis A. Conklin, and Francis R. Molther are with the Cuyamel Fruit Company at Puerto Cortés, Honduras, Central America, Turner is assistant engineer, Conklin is chief draftsman, and Molther is office engineer.

'13—J. Frazer Whitehead's address is changed to 178² Seminole Avenue, Detroit; he is secretary of the Kales Stamping Company of Detroit.

'14 CE—Adrian K. Webster is improving a section of land in Texas which he has owned for a number of years. He has harvested two crops from one hundred and fifty acres, and now has two hundred and twenty-five acres in cultivation. He is raising cattle and hogs, and expects to add sheep this winter. He says he likes the change from engineering, and that he would be glad to have any Cornellians visit him at any time when passing through the "Panhandle of Texas." His mail address is Box 3, Vega, Texas.

'13, '14 AB—Since receiving his discharge from the service in March, 1919, as first lieutenant in the Gas Offense Division of the Chemical Warfare Service, Frank S. Bache has been associated with Herman A. Holz, who has been engaged for several years in the manufacture and sale of metal testing equipment. Mr. Holz, and now the larger firm of Holz & Company, Inc., have been the pioneers in adapting magnetic test-

ing to the determination of the physical properties of iron and steel. The company is now marketing the magnetic equipment designed for both strictly magnetic determinations and for the physical inspection of iron and steel by means of their magnetic properties. Bache is treasurer of the company, the offices of which are at 17 Madison Avenue, New York. Frank H. Lowenfels, A. B. '16, who also served in the Chemical Warfare Service, has been associated with the company since last spring, and is now engineer in charge of laboratories.

'15 ME—The marriage of Miss Virginia Moran, daughter of Mr. and Mrs. Howard Moran, of Washington, and Ernesto Ornelas, of Chihuahua, Mexico, took place on October 27 at St. Stephen's Episcopal Church in Washington. Mr. and Mrs. Ornelas will make their home in Chihuahua, Mexico.

'15 ME—Arthur C. Watkins is assistant works engineer of the Warner & Swasey Company, Cleveland, Ohio. His address is 2256 Woodmere Drive.

'15 AB—Clayton W. (Duck) Cousens is field manager of the "Save the Surface" Campaign, representing the paint, varnish, and allied industries, with headquarters at 632 The Bourse, Philadelphia. Phillips Wyman '16 is busi-

ness manager. Cousens lives at 9 Montgomery Avenue, Cynwyd, Pa.

'16 ME—Mr. and Mrs. Knibloe P. Royce have recently returned from a three months' trip to England, where they visited Mrs. Royce's people. Royce is sales engineer with A. Harvey's Sons Manufacturing Company, of Detroit, specializing on heating, pumping, and steam power plant accessories.

'16 BS—Henry B. Raymore left the Hicks Nurseries on July 1, and entered into partnership with G. Clifton Sammis for the private practice of landscape architecture, with offices in Freeport and Huntington, Long Island. He lives at 59 North Bayview Avenue, Freeport.

'16 CE—Mr. and Mrs. W. H. Jackson announce the marriage of their daughter, Ruth Elizabeth, to Wayne MacVeagh on October 13 at Blairsville, Pa. Mr. and Mrs. MacVeagh are making their home in Sharon, Pa. Their mail address is P. O. Box 726, Sharpsville, Pa.

'16 AB—Herbert A. Wichelns has gone to Dartmouth as instructor in public speaking.

'16—Chapman Ebersole has resigned his position with the Big Four Railroad and is now a member of the firm of Ebersole & Pryor, district representa-

Sales Managers Wanted

We have an excellent opening in our sales organization for a man who has had considerable selling experience. We desire a good, live man to act as our sales representative for Chicago territory. Applicants must have had previous selling experience, preferably in electrical insulation. We are willing to pay the right kind of man a very liberal salary and commission.

We also require a representative for the state of Ohio, preferably someone to make his headquarters in Cleveland.

Address: S. Edgar Francis, Sales Manager, care of

National Fibre and Insulation Company
Yorklyn, Delaware

Lang's Palace Garage

is situated in the center of Ithaca

117-119 East Green Street

It is absolutely fireproof. Open day and night. Commodious and fully equipped. A full stock of tires and tubes and everything in the line of sundries.

Official Automobile
Blue Book Garage

William H. Morrison '90

Ernest D. Button '99

tives of the U. S. Metal Cap and Seal Company, of New York. Their office is in the Montana Building, 230 East Fifth Street, Cincinnati, Ohio.

'17—Miss Elizabeth Post, daughter of Mr. and Mrs. James Howell Post, of Brooklyn, and Thomas Irwin Morrow, also of Brooklyn, were married on October 19. Mrs. Morrow is a graduate of Packer Institute, class of 1916. Morrow served during the war as an ensign in the Naval Aviation Service.

'17 BChem—Robert J. Fletcher was married on February 17 to Miss Catherine A. Murphy, of Wilmington, Del. Fletcher is stationed at Wilmington as chemist for E. I. du Pont de Nemours & Company; they live at 2132 Linden Street.

'18 BS—C. Ward Comstock was married on June 30 to Miss K. Esther Evans, of Oriskany, N. Y. Comstock is with the International Paper Company, of Watertown, N. Y., and they live at 927 State Street.

'18 LLB—Professor Frederick Schuyler Reese and Miss Edith Louise Rathbun were married in New York on October 23. Professor Reese is a member of the faculty of the Law School of Dickinson College, Carlisle, Pa.

'18, '20 ME—Alan H. Beggs is training for sales engineering work with the

Hyatt Roller Bearing Company, New York. He lives at 289 Ridgewood Avenue, Glen Ridge, N. J.

'18 AB; '20 AB—Neil H. Dorrance and Henry T. Dorrance are among the incorporators of Dorrance & Company, the new book publishing house of Philadelphia, Pa.

'18 BChem—Julian A. Sohon is employed in the Engineering Societies' Library, 29 West Thirty-ninth Street, New York. He lives at 1344 Chishola Street.

'19 AB—Miss Lucia B. Raymond is teacher of English in the Highland, N. Y., High School.

'19 AB—Miss Gertrude A. Gillam is head of the history department of Coker College. Her address is Box 14, Coker College, Hartsville, S. C.

'19 BS—Percy L. Dunn was married on June 22 to Miss Clara R. Tailby, of Forest Home, Ithaca. Dunn is in the office of administration, Extension Service, College of Agriculture. They are living in Forest Home.

'19—Israel Safir has received permission to change his name to Irwin Crausse Safir; he lives at 119 Dryden Road, Ithaca.

'19 BChem—Eugene W. Beggs is in the engineering department of the Westinghouse Lamp Company, Bloomfield, N.

Men at the top prefer them.
Men on the way up can afford them.

The Road to Health Is Smooth and Clear If You Use Nujol

By C. Houston Goudiss

Publisher, The Forecast and Lecturer on Food and Nutrition

THE real Road to Health is an intestinal highway 30 feet long. When Constipation clogs this road, it's the same as when a landslide blocks a mountain pass. There is a difference, however. Constipation not only blocks the way, but breeds poisons which menace health.

The obstruction in the mountain pass can be blown out with dynamite, and the obstruction in the intestines CAN be blown out with powerful drugs—but any drug powerful enough to do this is bound to harm the body.

There is only one way to relieve Constipation without in the least measure endangering the delicate mechanism of the human system. That is the Nujol way.

Nujol is absolutely harmless. It is NOT a drug. Not a particle of it is assimilated by the body. All it does is to soften the mass impacted in the colon and lubricate the way to normal expulsion.

Nujol does this without causing any pain or discomfort. It does not in any way interfere with the digestive processes. It has no more effect on the delicate membranes and tissues than to smooth and soothe them. It is a healing force which gently but effectively removes the intestinal obstruction, and performs this great service to health without in any way lessening Nature's provisions for protection. Its sole province is to help Nature help herself. Nearly everyone is subject to Constipation at some time or other. Nearly everyone has proved the worthlessness of ordinary "remedies" as to lasting results.

Now try Nujol—and learn that there is a lasting relief for this curse.

Nujol
REG. U.S. PAT. OFF.
For Constipation

Sold by druggists, in sealed bottles, bearing the Nujol trade mark. Mail coupon for booklet, to Nujol Laboratories, Standard Oil Co. (New Jersey), Room 704, 44 Beaver St., New York. (In Canada, Address Nujol, 22 St. Francois Xavier St., Montreal.)

- "THIRTYFEET OF DANGER" Constipation—auto-intoxication in adults.
- "THE DAYS THAT GO BEFORE" Constipation in pregnancy and nursing.
- "ASTHESHADOWS LENGTHEN" Constipation in old age.
- "AS THE TWIG IS BENT" Constipation in infancy and childhood.
- "WAGES OF NEGLECT" Constipation as a cause of piles.

COLGATE'S
"HANDY GRIP"
The Refill Shaving Stick

Like putting a new blade in your razor

FASTENING the "Refill" Shaving Stick into your Colgate "Handy Grip" takes but a moment. It is like putting a new blade in your razor. The soap itself is threaded.

Your "Handy Grip" will last for years. Colgate "Refill" Shaving Sticks cost you the price of the excellent soap alone.

Shaving with Colgate's makes it unnecessary to rub the fragrant, softening lather in with the fingers.

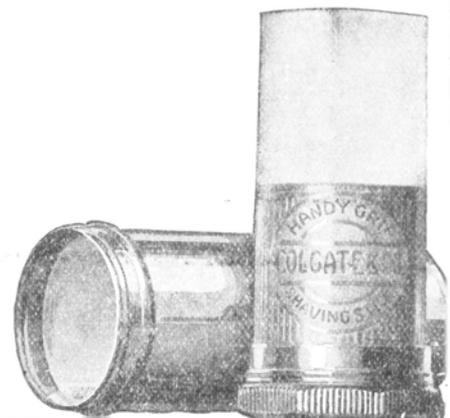

We took the rub out of shaving, originally, away back in 1903.

COLGATE & CO.

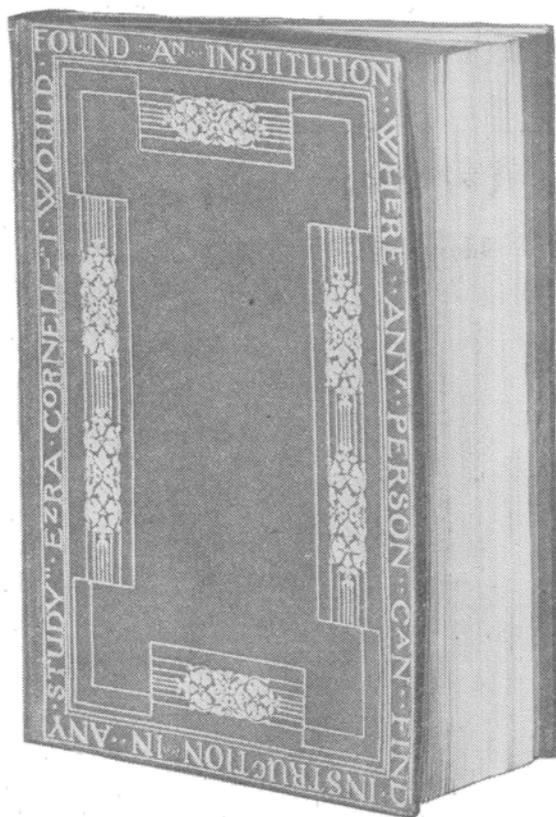

Dept. 212

199 Fulton Street

New York

The Shaving Stick is the economical way to make a satisfactory lather. We can give you this impartial advice because we make Shaving Sticks, Powder and Cream. Send 4c for trial size of any of these.

The most
interesting book
of the year
for Cornellians

THIS is not our opinion alone. Those who have bought the book say so. The revised edition is entirely rewritten. Some have copies of both editions. The praise coming to us regarding the new leather binding suggests its value as a gift book. The design and workmanship is such that you will consider it a valuable addition to your library.

Only a few of the
Troy Calendars left

WE usually plan to have between one and two hundred Troy calendars for sale after Christmas. There are less than one hundred this year. Do you want one? The collection of pictures we think is better than usual.

Have you read the books
by Andrew D. White?

THE two volume set of the "Warfare Between Science and Theology" is the work most in demand. The price is \$8.00. The later books are his "Autobiography" at \$8.00 and "Seven Great Statesmen" at \$4.00. We are mailing them postage paid at these prices.
