# CORNELL ALUMNI NEWS

VOL. XXVI, No. 20

ITHACA, N. Y., FEBRUARY 14, 1924

PRICE 12 CENTS

**D**RY, decorous, and delightful are the three adjectives generally applied to the Junior Week just past, even though the toboggan slide was not in working order to tempt the daring and hardy after sleepless nights of dancing and "sessions." Two athletic victories over Pennsylvania in hockey and basketball had their heartening effects on the general happiness; the decorations for the Junior Prom were never more beautiful; and the Masque was conceded to be much like that of last year, notable only for its scenery.

HOUSE PARTIES were held by twenty-eight Cornell fraternities in connection with Junior Week.

THE MUSICAL CLUBS show given in the Lyceum Theater on February 6 is generally acclaimed one of the best of such concerts ever held at Cornell. The Clubs used the same program that scored so marked a success on the Christmas Week tour.

WINTERGREENS or agricultural short course students leave Ithaca this week, after getting the last part of their instruction from Farmers' Week lectures, exhibits and demonstrations. Including twenty students sent by the Vetrans' Bureau, 230 took the twelve-week course, which was marked by more than the usual specialization in poultry and dairy courses.

FARMERS' WEEK was ushered in by snows which threaten to cut the attendance. If the registration figures at the similar gatherings already held at other agricultural colleges may be taken as guides, some slight falling off at Cornell may be expected, though every effort was made to get a record-breaking attendance, particularly on the day that Secretary Wallace of the United States Department of Agriculture spoke.

THE CORNELL GRAPHIC appeared during Junior Week with about twice as many pictures as in any of the first three numbers, with much better captions to the pictures, and with a greater variety of subjects included. One of the prominent photographs was that of a Junior Prom of thirty years ago, in which the present Junior Week attendants were invited to seek out the portraits of their parents. Unfortunately, the gravure company sadly misplaced the pages.

THE BENNO LOEWY Library has arrived in Ithaca, three box-cars having been required to transport the fifty thousand volumes recently willed to Cornell. Except for the law books, which can be housed in the Law Library, the rest of the volumes will remain in their present containers for lack of shelf room in the

main Library Building. The collection is particularly rich in subjects relating to the drama. Many rare editions are included.

THE SAGE CHAPEL Preacher for February 17 will be the Rev. Dr. Stephen Wise, rabbi of the Free Synagogue, New York City.

LECTURES for the week include Dean Mann's welcoming address to the Farmers' Week visitors on February 11; "The Strength and the Weakness of Cooperative Commodity Marketing" by Lloyd S. Tenney, of the Bureau of Markets, U. S. Department of Agriculture, on February 12; an address by Henry C. Wallace, U. S. Secretary of Agriculture, on February 13; "The Isle of Madeira," illustrated, by Professor Eugene P. Andrews '95, on February 13; "The Chemistry of Agriculture," illustrated, by Professor George W. Cavanaugh '93, on February 13; "A Naturalist's Rambles in Yucatan," illustrated, by Louis A. Furtess '97, on February 13; "Aus dem Leben Richard Wagners," illustrated, by Professor Paul R. Pope, before the Deutscher Verein on February 13; "The Farmers of To-Morrow" by L. J. Taber, master of the National Grange, on February 14; "In the Wake of Alexander" by Professor Andrews, the ninth in his series in the Museum of Casts, on February 14; "Education and Peace" by Frank P. Graves, State Commissioner of Education, on February 15. The Farmer's Week program also included a reading of Enoch Arden by George C. Williams of the Ithaca Conservatory of Music, with piano accompaniment by Bert Rogers Lyon, on February 14. On February 15 Edna St. Vincent Millay gave a lecture recital under the auspices of the Cornell Women's Club.

INTERFRATERNITY BASKETBALL, with only a few weeks of play left finds the following teams in the lead in their respective divisions: Pi Kappa Phi, Sigma Chi, Alpha Tau Omega, Alpha Sigma Phi, and Alpha Chi Rho.

ROMEYN BERRY '04, graduate manager of athletics, is in charge of the fund-raising campaign in Ithaca for the city's quota of the expenses of the Olympic teams.

FRESHMEN committeemen to take care of the class banquet, tax, and cap-burning were recently appointed by the Student Council.

THE LEAGUE of Women Voters will entertain the twelve women most notable in as many lines of work at a dinner in Buffalo on April 28. Among these are included three Cornellians, Anna Botsford Comstock '85, M. Carey Thomas '77, and Martha Van Rensselaer '00. The list of

twelve compiled last year by the League, includes Jane Addams, Cecilia Beaux, Carrie Chapman Catt, Minnie Maddern Fiske, Louise Homer, and Edith Wharton, among others.

PROPERTY consisting of a house and two large lots has been bought by the University from Professor James E. Rice '90. The house is at 308 Waite Avenue on Cornell Heights, and will be used temporarily for the housing of women students, though the acquisition of the ground is part of a general plan looking toward the development of dormitory units for women east of Prudence Risley Hall, and to the north of Beebe Lake.

ITHACA'S AUTOMOBILE SHOW is to be held March 3, not in the State Drill Hall as in recent years, but in the newly enlarged Lang's garage downtown.

INTERNATIONAL AGRICULTURISTS will hold their third annual banquet at the Cosmopolitan Club on March 1. Usually the menu is made up of dishes from foreign lands.

RELIGION among college students was recently discussed at a conference of twelve religious denominations held at Philadelphia. At this meeting, the Rev. William Horn, minister of the Lutheran Church recently dedicated, told how two hundred Cornell students had contributed \$26,000 toward the cost of a structure valued at \$100,000.

RICHARD H. EDWARDS, in charge of the united Christian work at Cornell, was one of the speakers at memorial services for Arthur Gleason, author, poet, newspaper man, and champion of the cause of labor, who died on December 30, in Washington, D. C. The memorial services were held last week in the parish house of the Church of the Ascension, New York.

BANDITRY almost equal to that afforded by the Metropolis marked a hold-up in the Campus Lunch at 409 Eddy Street on February 5, when four men, at two o'clock in the morning, took about \$250 from the cash register at the point of the revolver. A few moments before the attack students had been in the restaurant eating hot Texas wieners, and the robbery was evidently timed in relation to their departure.

DING'S syndicated cartoons from *The New York Tribune*, which have appeared on the front page of *The Cornell Daily Sun* for several years have now been put on the *Sun's* editorial page, as being comment rather than news. Their inclusion on the editorial page tends to cut down the amount of editorial utterance, and reduces the "Berry Patch" by about one third.

## Another Fraudulent Alumnus

Moving Picture Actor Claiming to be  
Cornellian Was Here for One  
Summer Session

The passing of worthless checks and the securing of money loans are not the only forms of fraud which are practiced in the name of Cornell. The January number of *Photoplay* under the caption, "Is Edison Wrong?" publishes a story relating to one "Le Roy Ellsworth Grooms, who has become a motion picture actor in an attempt to prove that Thomas A. Edison was all wrong when he said that college-trained men lack versatility."

The story continues: "Mr. Grooms is a Cornell graduate and for fifteen years has been a successful consulting mining chemist, located in Nevada. Last June the Sigma Phi fraternity held a convention in New York. Twelve members of the fraternity met one night at the University Club in Brooklyn. Mr. Edison had just made the statement that his son, who was about to be graduated from the Massachusetts Institute of Technology, would continue his studies toward another degree. The famous inventor stated that he believed that college training put men in a rut and that they could not change their occupations at will and be successful.

"The twelve Sigma Phi men, all of whom had been out of college for about fifteen years and each of whom had been successful in his chosen profession, decided to test Mr. Edison's theory. The suggestion came from Mr. Grooms, who knew that he and all the others were sufficiently independent financially to be able to afford such an experiment.

"In the group of men who decided upon this test were three lawyers, two stock brokers, two civil engineers, one physician, one mining engineer, one author, one consulting mining chemist, and one capitalist. They represented six colleges—Amherst, Harvard, Dartmouth, Cornell, Purdue, and Northwestern."

*The New York World* for July 30, 1923 published an article similar to the above, and added:

"Mr. Grooms, Cornell '08, was a mining engineer with headquarters in Reno, Nevada, and an income of \$25,000 a year. He is now for at least a year a moving picture actor with C. C. Burr of Glendale, Queens, and has been acting a minor role in a picture with Constance Binney."

The following replies to inquiries have been received: Mr. Edison says that he never made the statement attributed to him; the Alumni Representative of Cornell University says that Grooms is not a Cornell graduate and attended only one summer session in 1913; P. J. Ross, secretary of Sigma Phi, states that Grooms is not a member of Sigma Phi, that no convention was held in New York last June, and excepting at Cornell, that there

are no Sigma Phi chapters at the colleges mentioned.

The records of the New York Board of Education show that for nine years previous to July, 1922, Grooms was a teacher, six years of that time a teacher of shop-work in Public School 108, Brooklyn; this period is coincident with the time that he was said to have been a mining engineer with a \$25,000 income. It is true that subsequently to July, 1922, Grooms established a residence in Reno, Nevada, for the purpose of securing a divorce from his wife.

## SPORT STUFF

There are signs and portents that the Jazz Age is nearly over even tho some editors and many degenerate cabaret orchestras haven't get heard the news.

By and large the battalions of girls who occupied this town during Junior Week were a well bred and well mannered lot—and easy to look at withal. They behaved themselves. They gave every evidence of having been soundly spanked by an indignant parent some time or other and with highly salutary results.

They had manners and not just customs.

Manners seem to be coming back. This is important if true. If manners come back the Jazz Age will be over and a lot of lecherous orchestra leaders will have to go back to their old jobs in the tenderloin.

R. B.

## HAVANA CLUB OFFICERS

Three Cornellians were elected officers of the University Club of Havana, Cuba, at its recent annual election. Tomlinson C. Ulbricht '08 is treasurer of the Club, Charles H. Ballou '14 is assistant treasurer, and Robert W. Tassie '09 is a member of the board of directors. Ulbricht has recently changed his address to Apartado 166, Havana.

Ballou writes that the University Club of Havana extends a hearty welcome to visiting Cornell alumni and suggests that those who are thinking of visiting Havana write him at the University Club, Prado 35, Altos.

He adds that a Cornell dinner in Havana is planned for some time in the spring. The Cornell Club of Cuba was formed last April at a dinner given by Cornellians for Professor Vladimir Karapetoff, at which time Ulbricht was elected president.

PROFESSOR BRISTOW ADAMS had a busy week at Columbus, Ohio, speaking twice before the Associated Ohio Daily Papers conference, one of these talks being at the annual banquet; once before the Buckeye Press Association, made up of Ohio weekly papers; twice before journalism classes of Ohio State University; and once before a Farmers' Week audience. In addition he judged eleven classes on display and contents of both daily and weekly papers, with 216 separate entries.

## Receive Third Nomination

Edwin N. Sanderson '87 Named for Re-  
election as Member of University  
Board of Trustees

Edwin N. Sanderson, a graduate of the College of Mechanical Engineering in the Class of '87, has been nominated for reelection as Alumni Trustee.

In June Sanderson will have completed a first term of five years as University Trustee. He has been for three years a member of the Committee on Buildings and Grounds and as such was closely identified with the establishment of the Central Heating Plant, an engineering work of no small importance which was accomplished with skill and marked economy. It was very largely through his efforts and influence that a considerable portion of the equipment installed at the new heating plant was either donated to the University, or furnished at a substantial reduction from the usual price.

After his graduation from Cornell, Sanderson was associated with the Westinghouse Electric and Manufacturing Company for nine years, during which time he was manager of the Boston office and assistant to the general manager at the company's works in East Pittsburgh.

In 1896, he formed the engineering partnership of Sanderson and Porter, of which he still remains the senior partner. The firm has devoted its attention principally to the design and construction of steam and hydroelectric power plants, inventory and valuation work. During the war, Sanderson and Porter built for the Emergency Fleet Corporation ten 3,500-ton Ferris type ships.

In 1910 Sanderson assisted in the organization of the Federal Light and Traction Company, of which he became president in 1914 and to which he has since devoted the major part of his time. This company owns and operates more than twenty public service corporations in eight different States, most of which are located west of the Mississippi River. Sanderson is president and director of each of these subsidiary corporations.

In alumni affairs Sanderson has been one of the most active workers. He was president of the Cornell Club of New York for five successive years, from 1916 to 1921, re-elected each year, the longest term the office has ever been held by one man. His administration of the Club during the trying war period was conservative and successful.

Sanderson was a prime mover in the organization of the College Men's Training Corps, calling upon the presidents of the other New York college clubs to unite with the Cornell Club in forming a body of over fifteen hundred college graduates who, for the three critical months before April 6, 1917, drilled under regular Army officers twice a week in a New York armory. When war was declared, the

large majority of these men enlisted in the training camps.

As chairman of the special committee of the Associate Alumni for the Semi-Centennial Celebration in Ithaca in June, 1919, Sanderson was charged with the responsibility for the general alumni activities. More than five thousand alumni were then in Ithaca for the greatest Cornell meeting ever held.

Sanderson was for three years a director of the Associate Alumni, and was its president for the year 1919-20. He is a member of the Cornellian Council as representative of the Class of '87.

During the Endowment drive in 1919, Sanderson as a member of the executive committee in New York, was one of the most energetic and successful of the Metropolitan workers.

Sanderson entered Cornell after completing a course in civil engineering at Rensselaer Polytechnic Institute, being attracted by the further advantages of Sibley College and the great reputation of Professor Thurston.

While a Cornell undergraduate Sanderson played left field on the University baseball team. He is a charter member of Sigma Xi, and is a member, among other organizations, of Zeta Psi, the University Club of New York, the American Society of Mechanical Engineers, the American Institute of Electrical Engineers, the Cornell Club of New York, the City Midway Club of New York, the Rensselaer Society of Engineers, the Cornell Society of Engineers, and the Town and Gown Club of Ithaca.

GEORGE WORKS, professor of rural education, who is making a study of the rural schools of the State of Texas, spoke recently before the Parent-Teacher Association at Fort Worth.

## ATHLETICS

### Head Basketball League

Junior Week basketball traditions were upheld last Friday when Cornell defeated Pennsylvania. Few games in this long series have been so furiously and stubbornly fought. Cornell won by a score of 17 to 14, the issue remaining in doubt until Captain Capron threw a basket less than one minute before the timers' revolver shot announced the ending of play. Except in the opening stages, when the Red and White assumed a lead of seven points, the game was so close that a single basket would tie the count, or send one or the other team out ahead. By winning, the team went out ahead in the championship race.

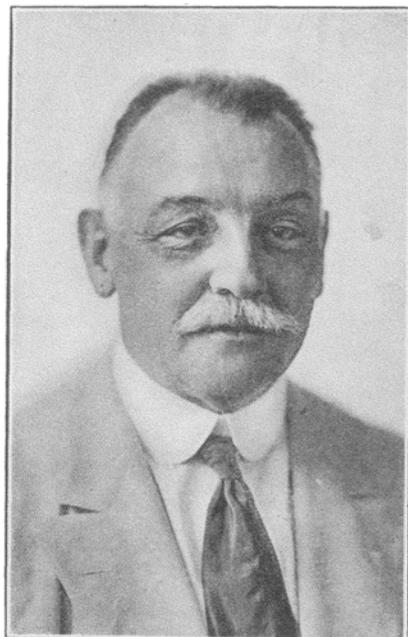

Pennsylvania's five-man defense proved more difficult for the Cornellians to solve than did Princeton's formations in the game played here on January 26. For the most part the home team had trouble getting a man clear under their opponents' basket. Pennsylvania found Cornell's guarding equally effective, but chanced a number of long shots, a few of which rang true. Cornell in the main declined any shots on or back of the 15-foot line; their aim was the close throw from under the basket.

The early developments were distinctly favorable to Cornell, goals by Capron and Wedell and fouls by Dake and Byron giving the home team seven points before Kneass dropped one point in from the foul line for the visitors. Here Pennsylvania's passing game improved, the Red

and Blue also began trying long shots. Dessen dropped one in from the west boundary line, and Leopold and Kneass also helped out, with the result that the Quakers caught up, and then although Capron registered another field goal, went out ahead before the half ended helped by baskets thrown by Kneass and Leopold. The score at half time was Pennsylvania 12, Cornell 11.

Mighty close guarding by both teams featured the second period, the sum total of scoring in that half being two baskets and four foul goals. So closely did each side play the ball that most of the passing and shooting for the basket was hurried and ineffective. After seven minutes of play Kneass dropped a foul goal in the net, making the score 13 to 11 in Pennsylvania's favor. Capron soon evened the count with a pretty basket, and then Coach Ortner made timely shifts in the line-up. Dake, who had tired, and Rossondo, who had failed to show the form he displayed in the Princeton game, were withdrawn. Wedell was moved to center, Meyer went in at left forward and Raymond at left guard. This steadied and strengthened the team play. In a few moments Meyer threw two foul goals, putting Cornell two points ahead. A little later Kneass cut the margin down to a single point when he threw a foul. With two minutes to play, a single field basket would settle the issue, either way. The Cornell five began to pass the ball about in their own territory, a somewhat hazardous enterprise. This maneuver, however, served to draw Pennsylvania's entire defense well into Cornell territory. Suddenly, with Pennsylvania's goal unguarded, Capron darted down the floor, with Wedell back of him, dribbling the ball madly. At just the right moment he

### Candidates So Far Nominated by Alumni to Fill Two Places on Board of Trustees Next June

I. N. SANDERSON '87

DR. MARY M. CRAWFORD '04

ROGER H. WILLIAMS '95

passed to Capron, who made a quick one-handed toss that scored a basket. This clinched the victory. Capron and Wedell starred for Cornell, while Kneass and Dessen were conspicuous for Pennsylvania.

The line-up and summary:

<b>Cornell (17)</b>	<b>Pennsylvania (14)</b>
Capron.....R.F.....	Carmack
Wedell.....L.F.....	Kneass
Dake.....C.....	Block
Byron.....R.G.....	Dessen
Rossomondo.....L.G.....	Leopold

Field Goals: Capron 4, Wedell 1, Byron 1, Dessen 2, Kneass 1, Leopold 1.

Foul Goals: Dake 2 out of 3, Byron 1 out of 6, Meyer (substitute for Wedell) 2 out of 2, Kneass 4 out of 9, Leopold 1 out of 1, Dessen 1 out of 3. Referee: Tom Thorp, Columbia. Umpire: Ed. Thorp, De La Salle. Substitutions: Cornell, Meyer for Wedell, Wedell for Raymond, Raymond for Rossomondo. Pennsylvania, Morris for Kneass, Kneass for Block.

### Wrestling Starts Well

Cornell wrestlers won six bouts, and one resulted in a draw, in the first meet of the season, with Springfield College, in the Drill Hall last Thursday afternoon. The score was 24 to 0. Three bouts were won on falls, three by decision.

On the Cornell team were Captain Charles M. MacWilliam, Raphael Ayau and Charles H. Burr, of last year's varsity outfit. The others, I. H. Chakin, in the 125-pound class, C. B. Quinby in the 135, E. S. May in the 158, and Frank O. Affeld,

Jr., the varsity center on the football team, in the heavyweight class, all were new men to intercollegiate wrestling.

MacWilliam, Ayau, and Affeld won their bouts by falls.

The Cornellians were aggressive and supple and the older men were skilful. The summary:

115-pound class: MacWilliam, Cornell, defeated Brown by a fall with a hammer and wrist lock. Time, 6 min. 21 sec.

125-pound class: Chakin, Cornell, defeated Sexton. Time advantage 9 min. 29 sec.

135-pound class: Quinby, Cornell, and Rudert, Springfield, draw.

145-pound class: Ayau, Cornell, defeated Mazeski by a fall with a hammer lock. Time, 4 min. 12 sec.

158-pound class: May, Cornell, defeated James, time advantage 6 min. 55 sec.

175-pound class: Burr, Cornell, defeated Thomas. Time advantage 7 min. 4 sec.

Unlimited class: Affeld, Cornell, defeated Bullock by a fall with a body hold. Time, 8 min. 6 sec.

Referee: Daniel Gallagher, Ithaca School of Physical Education.

### Wins Hockey Too

In the first hockey game an open winter

has permitted at Ithaca, Cornell defeated Pennsylvania on Beebe Lake Friday by a score of 6 to 1. Cornell was clearly superior, excelling the Quakers in skating and team play. Tilton, Tone, Burnett, and Kidd counted for Cornell, the home team making two points in each of the three periods. Pennsylvania's one tally was scored by Pringle in the second period.

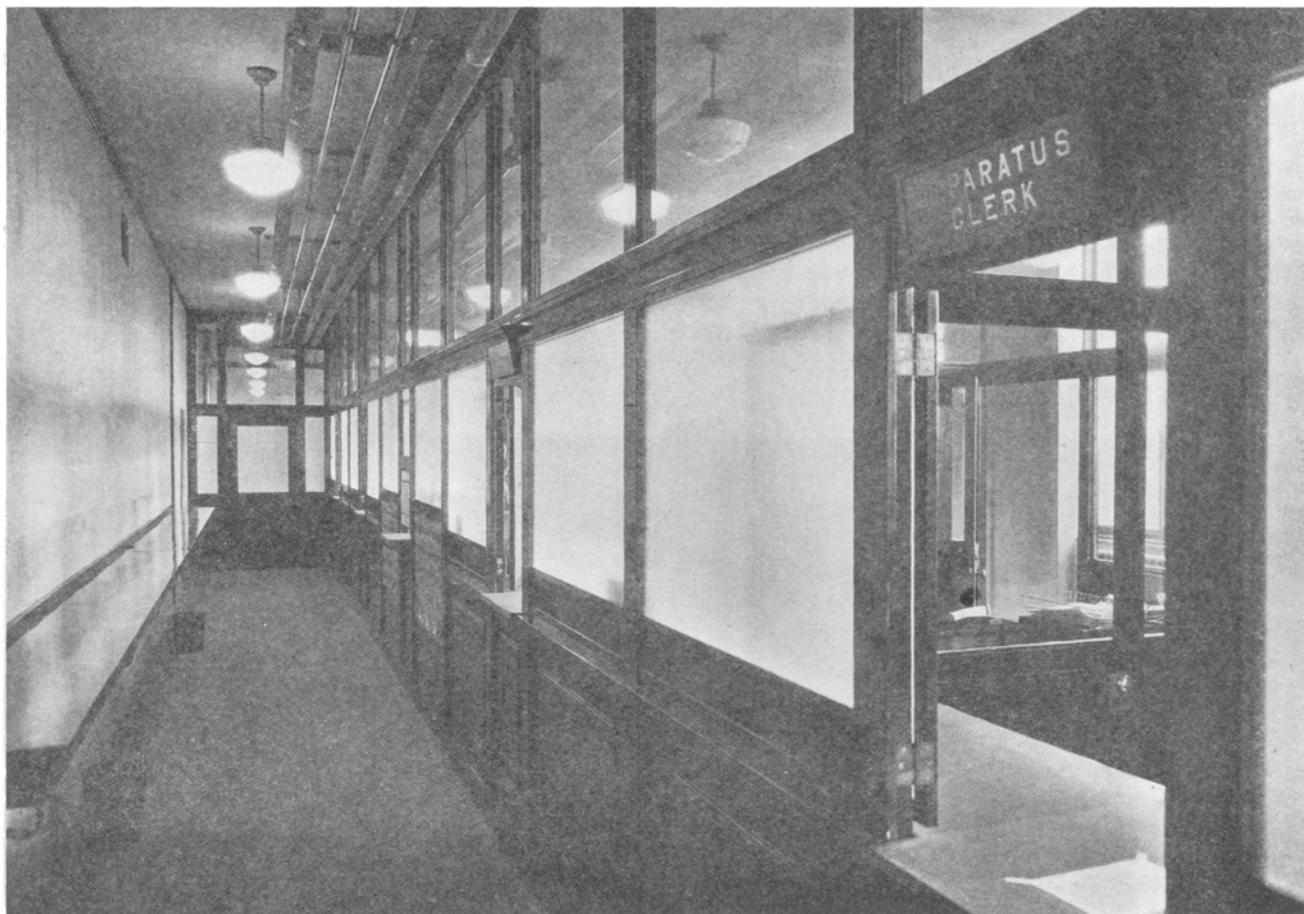

### Luther Assistant Coach

James H. Luther '23, captain of the last year's varsity basketball team, has been engaged as assistant coach of this year's team for the remainder of the season, Luther played three years on the varsity quintet and last season was individual point winner in the Intercollegiate League and was selected as a member of the All-Eastern team.

### SCHURMAN WARNS CHINA

Dr. Jacob Gould Schurman, addressing the American Association of Peking recently, sounded a warning note to China when he declared that while the United States sought to maintain a policy of friendship and helpfulness toward China, America must insist that China fulfill her obligations and protect the lives and property of American citizens as guaranteed by the treaties.

Dr. Schurman criticised mildly China's

THE BAKER LABORATORY OF CHEMISTRY

Photo by Troy

Just to the right of the main entrance as one enters the building, with a separate corridor of their own opening off the main corridor and immediately adjoining the office of the Director, are the administration offices. Their location is so planned that those who have business to transact may do so with the least inconvenience to themselves and with least disturbance to the regular occupants of the building.

failure to fulfill her treaty obligations, particularly in Chekiang province, where illegal taxes are being collected on American cigarettes. Steel and oil taxes were likewise scored. The foreign powers might find it necessary to take direct action if the Peking government failed to bring the provincial authorities under control and prevent the further levying of illegal taxes.

Referring to attacks made upon American missionaries, he said that intense feeling had been aroused at home and in China and that he hoped effective measures of coping with the situation would be devised soon.

Dr. Schurman declared that any scheme for the political reunification of the country that failed to take into consideration the vastness of the country and the lack of communication, with the consequent isolation of the different sections, together with racial, linguistic and social differences of the inhabitants, was doomed to failure.

Dr. Schurman's statements were the strongest made thus far by the representative of any foreign power in China.

ROBERT B. HINMAN, JR., '13, extension professor of animal husbandry, spoke last week before the Connecticut Sheep Breeders' Association at Hartford.

**OBITUARY**

**John Waddell '97-98 Grad**

John Waddell, who was a graduate student in chemistry in 1897-98, died on January 5 in Montreal, Canada.

He was born on September 19, 1858, and before coming to Cornell received the following degrees: B. A. Dalhousie College '77; B. S. University of London '82; D. Sc., Edinburgh '86; and Ph. D., Heidelberg '84.

**Francis J. Hogan '13**

News has just reached here of the death on March 1, 1917, of Francis James Hogan, at St. John, N. B., Canada.

He was born on February 4, 1882, at Bridgeport, Conn., and came to Cornell, as a special medical student in 1909 from Harvard. He remained for one year.

**Charles P. Whitney, Jr., '17**

Charles Pratt Whitley, Jr., died on January 28 at Colorado Springs, Colo.

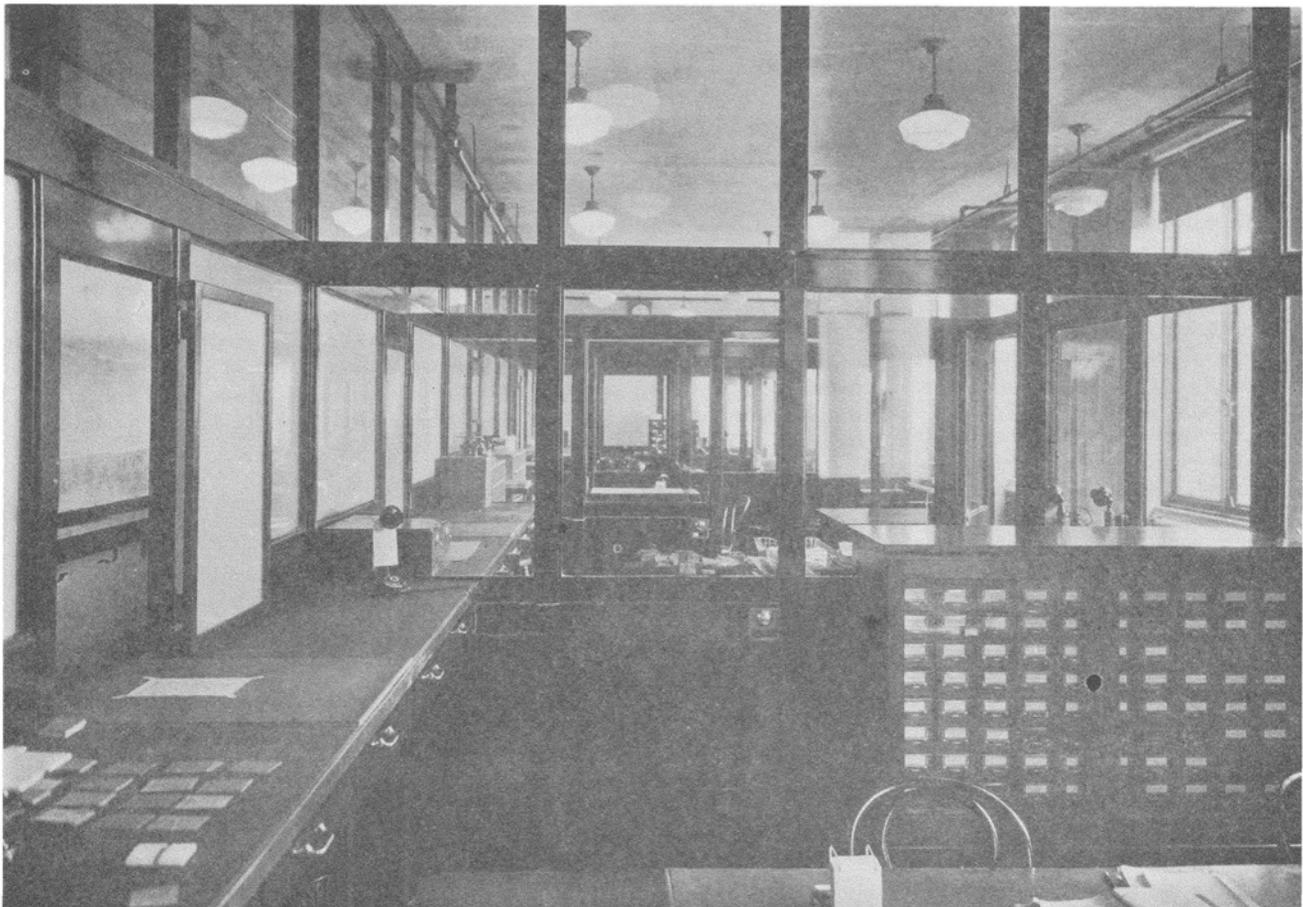

Whitney was born on December 12, 1893, and was the son of Mr. and Mrs. Charles P. Whitney of Evanston, Ill. He prepared at Evanston Academy and Cascadilla School, entering the University in 1913 in the course in arts. He left college at the end of his first year to enter business, and during the War he served with distinction in the Intelligence De-

partment of the Navy. Since receiving his discharge he had been active in the insurance business in Chicago with the firm of Critchell, Miller, Whitney and Barbour, making his home in Evanston, until about a year ago, when he went to Colorado Springs.

**COFFIN IN OHIO**

Most of the Cornell groups in Ohio, other than those in the two largest cities, will hold meetings during the week of February 17. Foster M. Coffin '12, the alumni representative, will spend practically the entire week in the state. He will meet with the Cornell organization of Youngstown on the evening of February 19, with the Cornell Club of Akron on February 20, the Cornell Club of Toledo February 21, and will wind up with two meetings on Washington's Birthday, at Columbus for a luncheon meeting, at Dayton for dinner and the evening. He will leave that night for Buffalo, to attend the annual banquet of the Cornell Club of Buffalo on February 23.

DR. FRANCIS E. HANCE '21, research assistant under the Hecksher fund, and Dr. Wilder D. Bancroft, professor of chemistry, had places on the program devoted to metallurgic sciences held in Syracuse recently.

THE BAKER LABORATORY OF CHEMISTRY

Photo by Troy

In the administration offices are to be found a department post office and separate quarters for the business clerk, record clerk, stenographers and the apparatus clerk, who cares for the more costly apparatus generally used throughout the laboratory. This includes such apparatus as standard weights, calibrated burettes, pipettes and flasks of the highest accuracy, standard and special thermometers, platinum ware, and quartz apparatus.

Published for the alumni of Cornell University by the Cornell Alumni News Publishing Company, Incorporated.

Published weekly during the college year and monthly in July and August; forty issues annually. Issue No. 1 is published the last Thursday of September. Weekly publication (numbered consecutively) ends the last week in June. Issue No. 40 is published in August and is followed by an index of the entire volume, which will be mailed on request.

Subscription price \$4.00 a year, payable in advance. Foreign postage 40 cents a year extra. Single copies twelve cents each.

Should a subscriber desire to discontinue his subscription a notice to that effect should be sent in before its expiration. Otherwise it is assumed that a continuance of the subscription is desired.

Checks, drafts and orders should be made payable to Cornell Alumni News.

ITHACA, N. Y., FEBRUARY 14, 1924

### THE GRADUATE LAW SCHOOL

LINCOLN was a bad influence, unconsciously, on the teaching of law. That a person could rise to his eminence with so little institutional learning has ever been a ready-made argument against requiring a lawyer to spend much time in a law school. In States where the minimum requirements are fixed by the Legislature, recognition of our martyred president's rise without unnecessary schooling has been perennial.

When the Cornell Law School opened in 1887 the entrance requirements were light and the course was short. Gradually both have stiffened up until at present the course is the equal in seriousness of that in any law school. and the requirements for entrance have increased to two years of college work. This is practically the minimum requirement of the State of New York. The eminence of the Law School has been due to the excellence of its teaching rather than to the stiffness of its requirements.

The change requiring for entrance the A.B. degree, announced last week, has finally removed the last cloud on the reputation of the Cornell Law School, placing it on a par with those schools that have enjoyed the highest rank, and presumably reaching the maximum requirements that it will ever be called on to enforce. It is the ninth law school in this

country to require a baccalaureate degree for admission.

The tendency in the professions is in the direction of a more thorough academic education prior to the pursuit of professional studies. A few geniuses, of whom Lincoln is an outstanding example, have managed to crowd in a wide general education by reason of their infinite capacity for absorption. The outlook for many Lincolns in this generation is, as usual, depressing. The Law School is playing safe by asking its students to bring their perspective with them in anticipation of a busy future in which the study of law will be the absorbing mental activity.

## CLUB ACTIVITIES

President Farrand arrived in New York on February 11, on board the S. S. Creole from New Orleans, following a trip of almost two weeks. He left Ithaca on January 28, and met with Cornell groups in Columbus, Cincinnati, Memphis, Birmingham, and New Orleans. Mrs. Farrand made the boat trip from New York, joining the President in New Orleans and returning with him.

### Columbus, Ohio

"Did you get your money's worth yesterday, Ed?"

"Yes, and then some. I am writing the Cornellian Council to double my subscription and from the talk of men near me at the luncheon I know other fellows who feel the same way about it."

That conversation was typical of the talk among Cornell men in Columbus, Ohio, after the luncheon with President Farrand on Tuesday, January 29.

It was the first time in many years that the Cornellians had had a real meeting with their president. Although they gave Dr. Farrand a welcoming luncheon just before his inauguration at Ithaca, this was the first opportunity they have had to learn at first hand the work that is going forward in keeping Cornell in the forefront of American universities.

Forty-five men turned out. Some of them drove forty miles for the meeting, even though the luncheon was restricted to two hours. Preceding Dr. Farrand's talk, which lasted an hour, President Thompson of Ohio State University spoke, mostly in reminiscence of his long friendship with Cornell's president.

### Cincinnati

Dr. Farrand spent Tuesday evening with a group of Southwestern Ohio alumni as he passed through Cincinnati. Prominent in the party were two of the four surviving members of the first class graduated, Judge Morris L. Buchwalter and Charles F. Hendryx of '69.

### Memphis

Thirty-two of the forty-one Cornellians who live in Memphis greeted President Farrand at the dinner held in his honor on

January 31. Harry N. Howe '04 acted as toastmaster. Arrangements were in charge of George S. Miles '17 and William F. Moffett '14, secretary of the Cornell Club of Memphis. Mayor Rowlette Paine of Memphis was one of the guests.

### Birmingham

The Cornell Club of Birmingham, Alabama, entertained Dr. Farrand on February 1, with a dinner at the Country Club. Forty-five Cornellians made up the party. William B. White '08, president of the club, presided.

### Rochester Women

The February meeting of the Cornell Women's Club of Rochester was held on the second at the home of Mrs. William F. Donoghue '02. After the regular business meeting Mrs. Joseph L. Humphrey (Winifred Ball) '91 gave a talk on the problem of the one-room rural school, and narrated her experiences in connection with the improvement of conditions at a district school in the locality of her summer home near Spencerport, New York. Fifteen members were present at the meeting.

### East Pittsburgh

The revised list of Cornellians who are with the Westinghouse Electric and Manufacturing Company at East Pittsburgh has increased from the twenty-five whom we mentioned in our issue of January 10 to fifty, and more additions are expected. On February 7 they met for luncheon in the guest room of the Westinghouse cafeteria, and were addressed by Frederic H. Parke '92, general engineer of the Westinghouse Air Brake Company. The secretary of the Westinghouse Cornellians is John K. Stotz '16, of the motor engineering department.

### New York

The Cornell Club of New York offers for annual competition by students of New York high and preparatory schools, a silver trophy given by John T. (Terry) McGovern '00, of which a photograph is reproduced below. This trophy will be awarded for the first time at the inter-scholastic indoor track meet which will be

THE MCGOVERN TROPHY

sponsored by the Club at the Twenty-Second Regiment Armory, New York, on February 23. Francis E. Brewer '92, chairman of the high school games committee of the Public Schools Athletic League of the City of New York, writes us that this trophy is an especially fine one.

### Niagara Falls

On January 29 fifty-two Cornell men gathered for dinner at the Prospect House (Daniel J. Reilly, Jr., '10, manager). Professor Charles L. Durham '99, the guest of honor, presented matters of general interest concerning Cornell of to-day and spoke specifically on the relationship between the alumni and the University.

After the dinner, "A Real Old Time Cornell Smoker" was held with movies, stunts, and songs. The songs were led by Lambert C. (Judge) Hickey '14 of Lockport, who was ably assisted by a trio consisting of Vic Albert '14, Dan Reilly '10, and Al Hooker '20.

The party was staged by Dick Cary '08 Alec Porter '20, Dan Reilly '10, and Bab (H. O.) Babcock '14, who presided over the dinner and at the piano.

### Knoxville, Tennessee

The Cornell Club of Knoxville, Tennessee, made up for the most part of men and women connected with the University of Tennessee, is the latest addition to the roll of new clubs. The group was organized on January 19, at the home of Nathan W. Dougherty '13 and his wife, who was Agnes A. Monteith '14.

Officers were elected as follows: president, Mrs. Ludwig S. Mayer; vice-president, Professor Charles E. Allred '13; secretary-treasurer, Professor Lemuel R. Hesler '14; chairman of membership, Mrs. Dougherty; chairman of programs, Professor Walter H. McIntire, Ph. D. '16; chairman of music, Professor Ludwig S. Mayer '17.

The club plans a banquet at Whittle Springs about May 24, in addition to informal meetings throughout the year. The date of the banquet will be set to coincide as closely as possible with the date of Spring Day in Ithaca.

### ENTRANCE BOARD REPORT

The twenty-third annual report of the secretary of the College Entrance Examination Board has lately been issued, in a volume of 162 pages. The total receipts of the Board for the year were \$223,237.48 and the total disbursements \$166,262.31. The examinations in June last were taken by 18,913 candidates, who wrote 69,702 papers. These were read in New York by a staff of 579 readers at a total expense per book which ranged from 30 cents each in Mathematics A to \$2.07 each in New Plan Comprehensive English, and at an expense per candidate of \$8.62, the latter figure including all expenses incurred by the Board in the preparation of questions, etc. Out of 60,235 Old Plan papers 60.9 per cent passed on the basis of 60 per cent as a passing mark; and

out of 9467 New Plan papers 63.7 per cent passed.

The following Cornellians served as examiners: Paul B. Mann '02, Evander Childs High School, New York, biology and zoology; Professor Louisa S. Stevenson, Ph.D. '11, of Mt. Holyoke, chemistry; Professor Clark S. Northup '93, Ph.D. '98, chief examiner, Ordinary English; Professor Oscar D. von Engeln '08, Ph.D. '11, geography; Professor Frederick W. C. Lieder '02, of Harvard, German; Professor Eloise Ellery, Ph.D. '02, of Vassar, history; Professor Elizabeth H. Haight, Ph.D. '09, of Vassar, Latin; Professor Louise S. McDowell, A.M. '07, Ph.D. '09, of Wellesley, physics. A large number of Cornellians served as readers, and seven were chief readers, as follows: Professor Benton S. Monroe '96, Ph.D. '01, English 1; Professor Northup, English 1-2; Professor von Engeln, geography; Professor Lieder, three-year and four-year German and New Plan German; Professor Alice Walton, Ph.D. '92, of Wellesley, two-year, three-year, and four-year Latin; Professor Virgil Snyder, '90-92 Grad., advanced mathematics.

### INTERCOLLEGIATE NOTES

THE FRIENDS of athletics continue serenely to point with pride. William H. Geer, director of physical education at Harvard, in a paper on "The Life Expectancy of College Athletics" read at Atlanta on December 29, summarizes the results of an investigation which seems to show that athletes live longer than others. Out of a group of Harvard crew men who rowed between 1852 and 1900, 67 have died, the relation of actual to expected deaths (American Experience Tables) being 69 per cent. Out of 130 football men 48 have died or 97 per cent of expected deaths; but some of these died from causes that had no connection with football. Out of 123 baseball men 38 have died, or 69 per cent of expected deaths; and out of 116 track men 26 have died or 72 per cent of expected deaths. Mr. Geer does not draw definite conclusions, but merely says: "It would seem, however, from the evidence now available, that it is fair to say that the life expectancy among men who have competed in intercollegiate athletic competition is favorable when compared with that of medically selected men accepted for life insurance."

COLGATE UNIVERSITY trustees have adopted a resolution limiting the enrollment to 1,000 students. President George Barton Cutten says, "Colgate will always remain a small college in spirit, and will retain the ideals of the small college."

JOHN C. BANBROFT, Harvard '23, and son of Professor Wilder D. Bancroft, is one of nine graduate students in the Harvard Business School studying scientific shoe retailing, and went with others in his classes to the National Shoe Retailers' Association annual conference in Chicago.

## LITERARY REVIEW

### Labor and Capital

*The Ethics of Capitalism.* By Judson G. Rosebush, '01-2 Grad., President of the Patten Paper Company, Ltd., of Appleton, Wis. New York. Association Press. 1923. 19.8 cm., pp. x, 196. Price, \$1.50.

Here is a highly useful and illuminating study of one of the most pressing of our economic problems. The author has had an admirable preparation for his task. The son of a business man, he pursued graduate study at Pennsylvania, Cornell, and Wisconsin, was professor of economics at Lawrence College from 1903 to 1910, and is now president of two paper companies and a timber company, a director in six banks, and an official of several other typical corporations. When he speaks on the subject of capital and labor, then, he must be heard with respect; he knows the academic attitude and also that of the employer; and he is not ignorant of the laborer's point of view as well.

He begins with a clear statement of the part which the five parties play in the economic field: the laborer, the land owner, the employer, the investor, and the consumer. Then he discusses industrial democracy. He defines democracy as "an open road for talent and an adequate reward to talent." Like Mr. Schwab, he is squarely in favor of collective bargaining for the workers, but he does not favor the general trade union movement; rather he would see the workers in each industrial plant a union by themselves. He objects to the general trade union because it tends to slow down the wheels of production, favors the anti-democratic closed shop, refuses to become legally responsible for the execution of contracts, and insists on the unlimited right to strike. He pricks the bubble of sovietism and shows the danger which lurks in a misuse of the word cooperation.

Discussing the subject of wages, he objects to a wage based on supposed "needs," because the theory works havoc with industry and thrift and because it must be accompanied by a system of forced labor to keep men at work steadily and in unattractive occupations. He finds fault likewise with the ability-to-pay theory because it makes no mention of the obligations of the toilers and would result in injustice to those who created the earnings as the result of foresight and good management. He does not think well of profit sharing, since it has not been conspicuously successful in solving the labor problems. But he finds the old age pension free from such objection, and he looks with favor upon the Dennison Plan of group prosperity sharing, and also upon the plan of employees acquiring stock in the company.

His views on taxation are sensible. Taxes should be levied, he thinks, on those who have the funds to pay with, in

such a way as to produce the minimum interference with private industry and the maximum social benefit. In general taxes should be levied not upon a man's income but upon his unproductive outgoes. The inheritance tax should be such as not to permit the transmission of bequests of more than five to twenty-five millions. We personally agree to this. The productivity theory of taxation here advocated of course favors the corporation; but Mr. Rosebush frankly expresses his belief "that corporations are the most efficient agents of production which the world has ever evolved." And there is much to be said for this view.

### Books and Magazine Articles

Marie Curie's story of "Pierre Curie" translated by Charlotte and Vernon Kellogg is reviewed by Benjamin Harrow in *The New York Times Book Review* for January 6.

In *The New York Times* for January 20 James C. Young publishes an interesting interview with Colonel Edward M. House '82 on European affairs. Three years ago Colonel House ventured the prediction that a peace basis would be reached in 1925; and this seems in a fair way to be fulfilled. He expects the British Liberals to pursue a moderate course, and he looks for a Liberal victory in the approaching French elections. If this results in returning Briand or some similar leader to power, then England and France will be nearer an agreement than they have for a long time back. He thinks it is unfair to charge the French with a bristling militarism. With her, preparedness is simply the only way she can live. If we had ratified the League of Nations and the American-Franco-British Treaty, France would undoubtedly have reduced her military establishment to a minimum. "With Germany beaten and Russia some distance away, and all the nations bound together for mutual protection, there could have been no need for her armies. When we wavered and faltered, the Franco-British Treaty went the same way, and France perforce had to guard herself. So I think we should be cautious in making hasty criticism about her armaments or her policies." Even in America Colonel House thinks that by 1925 we shall have a Liberal Government, which will join Liberal governments in London and Paris to reach a conclusive settlement of the world's most urgent problem, peace.

In *The Trinity Alumni Register* for January Professor William H. Glasson '96 writes on "The Department of Economics, 1893-1924." Glasson became connected with this department at Trinity in the fall of 1902.

Professor Preserved Smith's "Erasmus" was reviewed in *The Freeman* for November 21 by Henry B. Fuller, and in the *Hartford Courant* for December 9. We have recently published a notice of this important work. In *The Freeman* for December 19 Llewelyn Powys reviews Dr.

Hendrick W. Van Loon's "Story of the Bible."

In *The Journal of Forestry* for December Professor A. Bernard Recknagel writes on "The Growth of White Spruce in the Adirondacks."

"The New Larned History for Ready Reference," of which Dr. Donald E. Smith '01, of the George Washington High School, New York, is editor-in-chief and Dr. Daniel C. Knowlton '98, of the Lincoln School, New York, is one of the associate editors, is now in course of publication. It will be issued in twelve volumes, 26.7 cm. in height, and selling for \$8 a volume. The publishers are the C. A. Nichols Publishing Company of Springfield, Mass. The volumes thus far issued are reviewed by G. in *The Historical Outlook* for February.

The *Annals* of the American Academy of Political and Social Science for January are chiefly devoted to "The Price of Coal, Anthracite and Bituminous." Dr. Willard E. Hotchkiss '97 writes on "Management Leadership in Industrial Relations" and "The Unemployment Agreement in the Chicago Men's Clothing Industry." "The Economics of the Household" by Professor Benjamin R. Andrews '01, of Teachers College, is reviewed by Gertrude B. Biddle.

Dr. Hendrik W. Van Loon '05 supplies the cartoon frontispiece for *The Survey* of February 1.

In the January *Asia* Dr. David Starr Jordan '72 discusses "The Finny Tribes of Japan." The article is handsomely illustrated.

In *The Saturday Evening Post* for February 2, under the title "Slow Poison," Kenneth L. Roberts '08 returns to the attack on the evils of immigration.

The January issue of *The New York Medical Journal* contains the announcement "that the position of Busch Professor of Medicine in Washington University, St. Louis, has been given to Dr. David P. Barr, who has been assistant professor of medicine in the Cornell University medical College. Dr. Barr is an assistant visiting physician at Bellevue Hospital, New York, and is one of the younger group of physicians who are following in the footsteps of illustrious predecessors such as Dr. Austen Flint, Francis Delafield, Edward G. Janeway, William H. Welch and William K. Polk."

Dr. Jacob G. Lipman, A.M. '00, Ph.D. '03, of Rutgers, is the editor of the new Wiley Agricultural Series, published by John Wiley and Sons. The first number of the series will be "Soil Management" by Professor Firman E. Bears, of Ohio State University.

*Dougherty's Magazine*, edited by Donald C. Dougherty '13 in connection with his work as a publicity expert, in its issue for January 12, under the title "He Was Denied, Yet—," refers to the story of the late George C. Boldt, who, though not a

university man himself, became chairman of the Board of Trustees. "The greatest monument to his name is the splendid group of residential halls which has risen at Ithaca within the last few years as the result of the work Mr. Boldt did to promote this phase of the University's development."

"Farm Mechanics" by Professors Byron B. Robb '11 and Frederick G. Behrends '16 has been announced by the firm of John Wiley and Sons.

In *School and Society* for January 26 Dr. Vaughan MacCaughey '08 writes on "Schools and Taxes in California."

In *The University of California Chronicle* for January Professor George H. Sabine '03, of the University of Missouri, writes on "Henry Adams and the Writing of History." Charles Keeler reviews "The Days of a Man" by Dr. David Starr Jordan '72. "Cross Currents in Europe Today" by Charles A. Beard, '99-'00 Grad., is reviewed by Frank C. Palm.

*The Columbia Alumni News* in its issue for January 18 publishes a memorial address by Professor James Furman Kemp delivered in St. Paul's Chapel on January 13. A portrait of Professor Kemp accompanies the address. Professor Kemp was a member of our Faculty as instructor and assistant professor from 1886 to 1891; since then he has been professor of geology at Columbia. An anonymous gift of \$20,000 has recently been made to Columbia to establish the James Furman Kemp Fund, the income from which will be used for fellowships, scholarships, research, and the purchase of laboratory equipment.

In *The Cornell Sun* for January 21 Professor Nathaniel Schmidt criticizes the Bok Peace Plan, which he regrets to find "absolutely silent as to the really vital problems which will have to be faced if there is to be an advance toward peace."

Professor Alexander D. MacGillivray '00, Ph.D. '04, of the University of Illinois, is the author of a new entomological text, "External Insect Anatomy," which is reviewed in the January number of *The Illinois Alumni News*.

In *The Sibley Journal of Engineering* for January Professor George B. Upton '04 reprints an article on "Cross-Relations of Strengths of Materials of Metals in Tension, Torsion, and Transverse Loading." George E. Cassidy '17, of the General Electric Company, Schenectady, describes "Cement Manufacture." Professor Vladimir Karapetoff's article "On Continuous Threads of Activity" is reprinted from *The Bridge of Eta Kappa Nu*, illustrated by a portrait of the author. "The Relation of Aeronautical Research to National Defense" is presented by Joseph S. Ames, chairman of the executive committee of the National Advisory Committee for Aeronautics. An anonymous member of the Sibley School Faculty discusses "The Thermal Efficiency of an Injector." Pro-

ALUMNI NOTES

essor Frank O. Ellenwood and Clarence F. Hirshfeld '05 print an abstract of their paper on "High Pressure, Reheating, and Regenerating for Steam Power Plants" read at the annual meeting of the A.S.M.E. held in New York on December 3-6. There is a review of "Machine Design Drawing Room Problems" by Professor Calvin D. Albert '02, of the Sibley School Faculty.

Professor Lane Cooper writes in *The Cornell Sun* for January 19 on "The New Course for Beginners in Greek."

In *The Cornell Sun* for January 15 Professor Walter F. Willcox discusses "The Relation of the Bok Peace Plan to the League of Nations."

In *The Sun* for January 18 Professor Wilder D. Bancroft writes on "Causes and Properties of Metallic Luster," giving an abstract of the paper read by him at the Ithaca meeting of the National Academy of Sciences in November.

*The Journal of Physical Chemistry* with the January issue begins to function as the organ of the American Chemical Society, the British Chemical Society, and the Faraday Society. It will appear monthly at the merely nominal sum of ten dollars for the year. There must be money in chemistry. In this issue Professor Wilder D. Bancroft, the editor, writes on "Tyn-dall Blue in Solids" and reviews John A. Wilson, "The Chemistry of Leather Manufacture," S. E. Sheppard, "Gelatin in Photography," vol. i, and Sir Richard Glazebrook, "A Dictionary of Applied Physics," vol. i. Professor Emile M. Chamot '91 reviews Charles H. Stephenson and C. E. Parker, "Some Microchemical Tests for Alkaloids." The magazine is now printed by the Cornell Publications Printing Company.

*The Quill* of Sigma Delta Chi, in its issue for December, prints the report of Peter Vischer '19 as first vice-president to the ninth annual convention of the fraternity held at Minneapolis in November. At this convention Vischer was elected national treasurer.

In *The International Journal of Ethics* for January M. C. Otto reviews "Man and the Cosmos" by Professor Joseph A. Leighton, Ph.D. '94, of Ohio State University.

Professor Thomas N. Carver, Ph.D. '94, of Harvard, and Henry B. Hall are the authors of a textbook on "Human Relations" published by D. C. Heath & Company, of Boston.

In *The Psychological Bulletin* for December Professor Charles A. Ellwood '96, of the University of Missouri, reviews J. M. Williams's "Principles of Social Psychology," M. Ginsberg's "Psychology of Society," and E. W. Burgess's "Introduction to the Science of Sociology." Professor Glenn R. Morrow, Ph.D. '22, of the University of Missouri, reviews "An Introduction to Reflective Thinking" by L. Buermyer and others, calling themselves the Columbia Associates in Philosophy.

'85 PhD—James G. White, president of the J. G. White Engineering Corporation and an alumnus of Pennsylvania State College of the class of '82, has given Penn State a fund of \$25,000 the income from which is to be used as a loan fund for worthy women students. He recommends that loans shall bear interest at five per cent and shall be returnable as and when the women can afford to pay them. The repayments of loans and interest are to be added to the principal until it amounts to \$100,000, after which further receipts are to be available for distribution as soon as received. *The Penn State Alumni News* for February accompanies the announcement of this gift with a portrait of Dr. White.

'96 PhB—At the eighteenth annual meeting of the American Sociological Society, held in Washington in the holidays, Professor Charles A. Ellwood, of the University of Missouri, was elected president for the ensuing year.

'96 CE; '01 LLB—To facilitate the execution of contracts for engineering construction in the Middle West, and to extend its operations in that territory, the Arthur McMullen Company of New York announces the organization of the Arthur McMullen and Senior Company, an Illinois corporation, with offices in the Harris Trust Building, 111 West Monroe Street, Chicago. Frank S. Senior '96 and John L. Senior '01 are vice-president and treasurer, respectively, of the new corporation.

'96—The office and works of the Southern California Iron and Steel Company, of which Abram C. Denman, Jr., is president and general manager, are located at Huntington Park, Los Angeles County, Calif., and not at Huntington, Calif., as announced in a recent issue of the ALUMNI NEWS.

'99—Henry W. Blodgett is a member of the law partnership of Laughlin, Frumberg, Blodgett and Russell, organized on January 1, with offices in the Bank of Commerce Building, St. Louis.

'99 BSA, '01 FE—At the annual meeting of the Society of American Foresters, held recently in Baltimore, Professor Walter Mulford, of the University of California, was elected president.

'99 BS, 'c3 PhD—Dr. John E. Teeple, treasurer of the American Chemical Society and past president of the Chemists' Club, was honored at a dinner given by some fifty of his friends at the Chemists' Club, New York, on the eve of his fiftieth birthday, January 3. Fitting remembrances were presented to him by the hosts of the occasion.

'c2 AM, 'c4 PhD—*The Illinois Alumni News* for February prints letters from Dr. Albert Johannsen, professor of petrology in the University of Chicago, and Pro-

fessor Oskar A. Johannsen, of our Department of Entomology, both members of the Illinois class of '94, and then adds:

"Funny how the Johannsen brothers turned out! Thirty years after they have completed the architectural course at the University and received their degrees in architectural engineering, we find one of them studying striped-legged mosquitoes and an authority on systematic entomology, and the other busy with the optical indicatrix, and turning out some of the best young petrographers in the country."

To this it may be added that for some ten years (1899-1909) Oskar Johannsen was an instructor and assistant professor of civil engineering at Cornell and made his fine reputation as a teacher in that department. On the side he became an enthusiast over the extermination of the mosquito (God bless him!) and accepted a call to the University of Maine, where he filled with great success a chair in entomology until recalled to Ithaca.

'04 AB, '05 MSA; '16 AM—Rollin J. LaFollette '16 has been appointed assistant entomologist under Russell S. Woglum '04 in the field department of the Fruit Growers' Exchange of California.

'05 ME—Eustis H. Thompson is with the McGraw-Hill Company, Thirty-sixth Street and Tenth Avenue, New York.

'09 ME—Mr. and Mrs. Grandon D. Gates of Derby, Conn., announce the arrival of a son, Grandon D. Gates, Jr., on January 13. Gates is general manager of the Derby plant of the Creamery Package Manufacturing Company of Chicago, manufacturers of dairy machinery and equipment.

'09—John W. Sands is working in the Pittsburgh Testing Laboratory, Otis Building, Philadelphia.

'10—E. Warner Brooks, who has been doing sales development work in Utah for the Smith-Brooks Printing Company, of Denver, with headquarters in Salt Lake City, has now returned to the Denver office. He has a daughter, Jean, who was a year old in December.

'10; '20 CE; '21 CE; '24—Harry D. McCreary '10, Vincent B. Lamoureux '20, Marcus Sagal '21, Harold W. Bush '21, and Ned Williams '24 are with the Illinois Division of Highways. McCreary and Sagal are in the Springfield District Office, and the others are in the bridge office in Springfield.

'10 CE—Roy Taylor is still commuting between New York and Nassau for the Munson Steamship Company.

'11—Harold L. Caldwell is with the Public Service Corporation in Newark, New Jersey.

'11, '12 CE—Clarence Henry Trask has left Wilmington, Del., and is now with the Oakland Motor Car Company at Pontiac, Michigan.

'11 ME—Mr. and Mrs. C. Kenneth Getchell announce the birth of a son,

Charles Stephens, on December 3. Their address is 167 Furman Street, Schenectady N. Y. Getchell is in the engineering department of the American Locomotive Company, in charge of standard practicing, and is acting secretary of the engineering committee.

'11 AB—James O. Winslow is with the North Westchester Publishing Company, Mt. Kisco, N. Y.

'11 ME—Joseph E. Rutledge is with the Public Service Railway Company, 80 Park Place, Newark, N. J.

'12 ME—George C. Salisbury is secretary of the Cunningham-Ortmayer-Salisbury Company, distributors of construction and industrial equipment, of Milwaukee. He has two children, a daughter, Harriet, seven years old, and a son, George Champlin, Jr., two years old; and his address is 747 Cramer Street, Milwaukee.

'12 ME—Arthur G. Bogardus is with the Universal Oil Products Company, 111 Broadway, New York. He lives at Elizabeth Avenue and Howard Court, West New Brighton, Staten Island.

'13 ME—Stanley J. Chute is a mechanical engineer with the Griscom Russell Company, 90 West Street, New York; his residence address is 14 Howard Court, West New Brighton, N. Y.

'13, '14 ME—Paul Williams is with the H. H. Franklin Manufacturing Company of Syracuse, N. Y. He lives at 858 Lancaster Avenue.

'14 PhD—The United States Bureau of Education, says School and Society for February 2, has accepted the invitation of the Tennessee Association of Colleges to make a survey of higher education in that State. Dr. George F. Zook, specialist in higher education, will be in charge of the survey.

'14 BS—Mr. and Mrs. J. Sellman Woolen of Lothian, Md., announce the birth of their fourth child, a daughter, on August 1, 1923. She has been named Ella Gott, for her maternal grandmother.

'14 AB—Henry Vernon Davis is teaching German and French in the Dunkirk, N. Y., High School, and lives at 324 Robin Street. He has a daughter, Josephine Natalie, born on December 2.

'14 ME—James Moffatt was recently elected president of the Light Alloys Company of Painesville, Ohio. He is planning to return to Ithaca this year for his ten-year reunion.

'14 BS, '15 MF—Pan Cheng King has resigned as president of Tsing Hua College, Peking, China, which office he has held for the past three years, and is at present traveling in Europe. Upon his return to China he will be associated with the Yao Hua Mechanical Glass Works in Tientsin.

'15 BS—The members of the Fiftieth Aero Squadron on December 24 presented to Captain Daniel P. Morse, Jr., '15 a bronze plaque, twenty-four inches high and fourteen inches wide, upon which are

inscribed the names and dates of the engagements in which the squadron participated, and the following words: "Presented to the commanding officer of the squadron, Captain D. P. Morse, Jr., as a remembrance from the officers and men of his command."

'16 AB—Harry B. Carney is in the California department of the Nettleton Lumber Company, 1119 Fourth Avenue, Seattle, Wash. He lives at 3706 Thirtieth Avenue, South.

'16 ME—Laurence N. Siler resigned last May as assistant mechanical engineer of the power plant of the Havana Electric Railway, Light, and Power Company, Havana, Cuba, and is now field engineer for Stevens and Wood, Inc., of New York, in charge of the reconstruction of the Lowellville plant of the Penn-Ohio electric system. He is installing there a complete system of boiler regulators, by means of which the boilers and all boilerroom apparatus be governed from a central control room. His mailing address is 1616 Market Street, Youngstown, Ohio.

'16 ME; '19 AB—Mr. and Mrs. Leroy R. Grumman (Rose M. Werther '19) have moved from Elmhurst, Long Island, and their address is Vista Way, Port Washington, Long Island.

'16—John J. Schaefer is with the Universal Ice Cream Company, Binghamton, New York.

'16-17 Grad—Livingston P. Teas is with the Humble Oil Refining Company, Shreveport, La.

'16 BS—Elsie V. Botsford '16 was married to Arthur C. Maroney on December 29 at Rutherford, N. J. She may be addressed in care of the Taft School, Watertown, Conn.

'17 ME—Walter E. Roth is working in the Naval Aircraft Factory, Philadelphia.

'79—Mary M. Pitcher, in care of Mrs. J. S. Coffman, 249 North Marengo Street, Pasadena, Calif.

'87—Edwin N. Sanderson, 52 William Street, New York.

'88—William H. Pfau, 131 Buckeye Street, Hamilton, Ohio.

'04—W. Robert Johnston, 2644 Lakeview Avenue, Chicago, Ill.

'05—Alexander Nechamkin, 12 West Seventy-first Street, New York.—Mary

V. Waite, Oak Hill Place, Cayuga Heights, Ithaca, N. Y.

'06—William H. Forbes, 18138 Clifton Road, Lakewood, Ohio.

'10—William P. St. Lawrence, 950 Park Avenue, New York.

'11—Howard A. Lincoln, Charlestown Road, Claremont, N. H.

# Likewise the Daughter

By Strickland Gillilan

**D**ID you ever sit and weep and thrill through Dave Belasco's presentation of Lenore Ulrich in "The Son Daughter"?

That play is based on an old Chinese mistaken obsession that girl-children were always a liability and boy-children always an asset. The girl Lenore personated in that thrilling play believed this, and wanted to be so much like a son that she might amount to something. And she did amount to something—by being like a son? No! By being the best possible daughter.

We are not Chinese; yet it hasn't been long since we acted very much along the lines of that hidebound superstition. Usually we decided, when Henry was born and had to be named Henrietta, that we'd keep her anyway. But we just as usually, mother and all, hid a little disappointment that it hadn't been Henry himself instead of his little sister that came to board with us.

In the language of the comic strip, "them days is gone forever." We hail the girl-child as another human being come to bless the world, bringing her meal-ticket with her just as certainly as if she had been of the other sex. For her to work for a living is no stigma. For her to know practical, self-supporting, self-pro-

tecting things is no disgrace.

Therefore when we are considering insuring any youthful member of the family, why pass up the *daughter* of fifteen and a-half? She must be educated, she must undergo a period when she is an expense, she must be tided over till she becomes self-supporting, in her own home or in some other livelihood than home-making—for we have come to admit she has the right to choose or reject the maternal and home-building role.

Then: Every argument holds for her, that obtains for the insuring of the boy—to compensate the parents for the expense of the schooling, if she should die; to start the insured's insurance career on a low-priced basis easy for her to keep up when she goes "on her own"—every solitary argument FOR insurance (and there is no argument against it) goes double, for daughter as well as son.

So if you have a daughter coming sixteen, be good to her, be wise for yourself, and take out a long-term endowment policy—some day she will accept a few thousands of welcome (may be needed) dollars from an insurance company, and through gratitude-blurred eyes thank the one whose effective thoughtfulness granted her that boon.

Sixty-one years in business. Now insuring over One Billion Eight Hundred Million dollars in policies on 3,300,000 lives.

## Do You Own a Cornell Songbook?

If you sing you should know the songs by note. If you learn the songs by ear you are not much help to the song leader at the meetings. \$1.75 is not much. The Cornell Songbook is well bound and well printed. Order of the Co-op.

## Cornell Rowing      Concerning Cornell

The demand continues steady. Rowing at Cornell has been put into an interesting story by Tar Young. You know him and know that he knows where-of he writes. \$1.50 covers postage and a copy to your address. We'll wrap the book well.

We are getting the last of the edition. There were less than we expected. The book has been selling well. The leather bound gift edition at \$5 has sold as well as the cloth bound one at \$3.50. What do you know about the real history of the University?
