In Memoriam
Dr. Emmett Bergman
1929-1989

Dr. Bergman was an accomplished scientist and dedicated teacher. His research endeavors were recognized internationally, yet in the classroom, students remember his patience and commitment to our education. As a student advisor, he was sensitive to the concerns of freshman students and always willing to chat. His standards of excellence and compassion as well as his dedication to veterinary medicine set the tone for many classes of veterinary students. We will always remember these superior qualities.

THE VALUE OF A SMILE -by Marion T. Phillips
It costs nothing, but creates much; it enriches those who receive, without impoverishing those who give; it happens in a flash, and the memory of it sometimes lasts forever; none are so rich they can get along without it, and none so poor but are richer for its benefits. It creates happiness in the home, fosters good will in a business, and is the countersign of friends. It is rest to the weary; daylight to the discouraged, sunshine to the sad, and nature’s best antidote for trouble. Yet, it cannot be bought, begged, borrowed or stolen, for it is of no earthly good to anybody until it is given away. Nobody needs to smile so much as those who have none left to give. Smile, smile, smile.
SPECIAL THOUGHTS TO:
1) Mom, D, Kev, Meg, Jacko, Aunt Mary, Granky, and Pop (the family).
2) Rebhun, Mimi, Keith, Mark (for everything).
3) John and Amy (for caring).
4) Mrs. Meehan and Bear, David Moss and Beckett (for the inspirational relationships).
5) Chipper, Beck, Maddy (the pets), and Visual, Penelope, Mercury, Venus, Mars, Jupiter, Saturn, Uranus, Neptune (the puppies).
6) The top of the hill (for being a place to think special thoughts).
7) Those who smile . . .

Three of the greatest abilities that a person can possess are the ability to love, to be thankful, and to be humble. In this spirit, I dedicate this page to those people whose profound influence on my life has molded the way I think and act today. To my parents, for their love and support, for telling me that I could do anything that I set my mind to, for teaching me to ask questions and seek answers, and for showing me how to place the needs of others first, before my own.... I am truly thankful. To my sister Ellen, for her love and support, for teaching me to share what little I have with others and for showing me how to give willingly.... I am truly thankful. To my Auntie, Hazel Dean-John, for caring for me as her daughter, for teaching me a language, culture and history rich in beauty and meaning, and for her many gifts to future generations of Haudenosaunee.... I am truly thankful. To my mentor, Ward Stone, one of the few true heroes left in this world, for teaching me to love science, to seek truth and justice and to fight with the spirit of a warrior to protect the earth for future generations.... I am truly thankful. To my husband Stephen, for his love and support, for teaching me to laugh at myself, and for showing me how to love and trust another person implicitly, without reservation.... I am truly thankful.

Miriam Fitchett

To my family: Without your love, support, and encouragement, I would not be where I am today. Thank you for putting up with the endless parade of pets. You are my rock. I love you.
To my special friends: You have made vet school a fun (sometimes not) and interesting place to live for four years. You have helped me retain my sanity while driving me crazy at the same time. I will always be there for you. Thanks for the laughter, dog walks, long talks, and munchies. May your reach always exceed your grasp.
Last, to my K-9 companion: Who would have thought I would learn so much from just one little dog? Many thanks to the people who have kept him in a full hair coat and visual.
Have fun in the real world everyone — I know I will!

Lisa Fullam

To my Classmates,
I know you expect strange statements from me, so here are a few parting weird remarks: First - Thanks - you’ve taught me a great deal about all sorts of things—important things. I won’t forget. Second - as you go off into the real world - remember who you are, really. Third - from Cervantes - “When in doubt, err on the side of mercy.” Fourth - from Ghandi - “There’s more to life than increasing its speed.” Fifth - from Woody Guthrie - “Take it easy - but take it.”

Bye,
Lisa
Something is burning, baby, are you awake?
Something is burning, baby, are you awake?
Are you still my friend, baby, whom we sigh
Of the love in your heart for me?
Of the love in your heart for me?

You've been avoiding the main stages,
In a long dark smile.
You've just disappeared is the main feature.
What's going on?
What's going on?

I know everything about you, place, so it means.
But, I no longer feel in your place of your place?
What's happening?
What's happening?

I know everything about you, place.
I know everything about you, place.
I know everything about you, place.
I know everything about you, place.
I know everything about you, place.
I know everything about you, place.

Oh my darling, you're like a dog, baby, among the pasture begins
And festivities and a multitude of plan.
But it all is fine, you and me in the light?
Why are you so far from my ways?
Why are you so far from my ways?

I can feel it in the wind, the wind, the wind
I can feel it in the wind, the wind, the wind
I can feel it in the wind, the wind, the wind
If you can't live by that alone, you won't be satisfied.
You can't feel it all alone.

Get to start living, baby, can you explain?
Please can you save me of my baby, like a midnight train
Won't you save me, baby, because I don't know what to.

I can feel it in the wind, in the wind
And it's a whole meal.
I can feel it in the dust as I get off the box
Or the carousel of town.

I've been waiting for the last stage of a curve.
I don't want to see you either-I know you need.

But it ain't what you deserve.
Something is burning, baby, something in flames.
There's a man going around, selling stories.
Ring down when you're ready baby, I'm waiting for you.

I believe in the lighthouses, you know that I do.

"It is possible to commit no mistake and still lose. This is not a weakness, it is life."

As I look back on my 4 years at Vet school, I hope to remember the special times I have had here. Late nights in freshman anatomy with Chris, bleeding beagles in Dr. Concannon's lab, "Polar Bear" in Jr. Surgery, and the tremendous learning experiences from Anesthesia Crew 1989. The 4 years have also brought special friendships (especially Bev) among classmates and workmates, a new child (Nathaniel Lee), the joys (?) of owning a house, and new pets (neigh).

I'd like to thank all those who have helped me through the 8 years of college: my family, Keith, my special friends (Tarene, Sally), classmates, and all the technical staff.

Future Goals: to win the lottery. Barring that, to practice quality veterinary medicine in a small or mixed practice, raise our son, and continue participating in horse trials and hunts.

Best things about Vet School: Intramural sports and BEING DONE.
If anyone would have told me four years ago how fast our years in vet school would go by, I never would have believed them. I guess time flies when you are having fun?! After graduation, I plan on getting into a mixed animal practice somewhere in western New York. Finally, this page would not be complete if I did not thank my family for their constant love and support. This especially applies to my wife Kathy, whose companionship, love, support, and guidance have made the past four years the best of my life.

Richard Goldstein

Rich Goldstein, a native of Mahopac, NY, is pleased to graduate in the top 100% of the class. Having experienced the thrill of subcutaneous emphysema, he leaves NYSCVM on a bicycle journey to the Island of Boneo, where he hopes to practice veterinary medicine and teach Shakespeare to the proboscis monkeys. He would like to thank his Mom, Dad, sister and Salem for their constant love and support; Renee for helping him get through; everyone associated with LSOH and ADHANITU; and his eleventh grade English teacher for proving way-back-when, that grades don't matter. CARPE DIEM! See you on Broadway!

“Cat Naps Are Too Good for Cats”
Oh, early every afternoon
I like a temporary swoon.
I do not overeat at luncheon,
I do not broach the bowl or puncheon;
Yet the hour from two to three
Is always sleepy-time for me.

I would not sell my daily swoon
For all the rubies in Rangoon.
What! Sell my swoon? My lovely swoon?
I'll sell my soul before my swoon.
It’s not for sale, my swoon’s immune.

“The road Not Taken”
Two roads diverged in a wood, and I—
I took the one less traveled by,
And that has made all the difference.

Timothy Miller

When I was still a kid back in Pennsylvania, one day I was in my backyard, setting things on fire with a magnifying glass, when my nextdoor neighbor, Mr. Connor, came rushing over all excited and said, "Tim, come quick. A penguin has wandered into my yard." So I went over and sure enough there was a penguin, neither a spotted nor a herbaceous one, dabbling in an inflatable wading pool as penguins are want to do. Somewhat unnerved, Mr. Connor asked "What should I do?"

So I told him, "Mr. Connor, why don’t you take that penguin to Philadelphia to the zoo."

Well, he thought that would indeed be best and the two of them went walking off hand in flipper into Mr. Connor’s Buick and then drove off.

I didn’t think much about the incident until the very next day when, lo and behold and best beloved, I saw Mr. Connor and the same penguin coming out the front door, heading for the Buick. So I rushed over and said, "Mr. Connor, I thought I told you yesterday to take that penguin to the Philadelphia zoo."

And he replied, "I did and we had such a good time there, today we’re going to the Phillies game."

No worst of times, only best of times.
