<td>Examine the training and learning that occurs on jobs from both an economic and comparative international perspective. Will investigate the scale of the training enterprise, how it is accomplished, why some companies and nations train more than others and what impact training has on organizational performance and national competitiveness. Training will also be examined from the worker's perspective. The distinction between training and learning, how individuals influence the amount of training they receive and what determines the amount and kind of training they desire. The training institutions and customs of countries like Japan, Sweden, Germany, France, and the United Kingdom will be compared to their American counterparts and an effort will be made to understand why investments in employer training are so much more substantial in Japan and Germany than in the United States and whether there is any role for public policy in the stimulation or improvement of employer training.</td>

<td>Prerequisite: ILRHR 260/560 or equivalent.</td>
</tr>
</tbody>
</table>

The course surveys human resource practices in key countries and regions of the world: Germany, U.K., France, Eastern Europe, Japan, and Asia. The focus includes issues related to management of professional and managerial work force, such as selection and staffing.
development, and appraisal and reward systems. Special attention is given to current changes and trends in the human resource management area (e.g., Europe 92, transformation in Eastern Europe, globalization of Japanese firms). Implications for multinational operations in these countries will also be discussed.

ILRHR 691 Human Resource Planning and Strategy
Fall 1997 and spring 1998. 4 credits. Limited. Prerequisites: ILRHR 560 or equivalent, one course in statistics, and permission of instructor. L. Dyer, P. Wright.
Covers the content of human resource strategies and the process of human resource planning. The emphasis is on developing human resource strategies that are integrated with firm business strategies. Covered are methods and techniques used to forecast and plan for organization structures and processes, work force planning, and employment forecast, and employee contribution, and employee morale. Much of the course is organized around cases and simulations in which students make policy and program decisions for fictional organizations. Decisions are based on the basis of their contributions to the organizations’ human resource and business objectives

ILRHR 692 Training the Displaced and Disadvantaged
Fall or spring. 3 credits. Prerequisite: permission of instructor. J. Bishop.
Examines public and private efforts to lower unemployment and underemployment of displaced and disadvantaged workers. The seminar examines the scope of the problems, its causes, and why specific programs have worked and others have not. Topics covered will include training for displaced workers, rehabilitation of the disabled, job-search training, tax credits for hiring, vocational training, literacy instruction, EEO, public service employment, assisting new business, and valuation of displaced workers. Seminar also investigates how the structure of the economy influences the ability of targeted training and job creation to achieve sustained reductions in unemployment and draws lessons from the experience of other societies.

ILRHR 693 Design and Administration of Training Programs
Fall 1997 and spring 1998. 3 credits. Prerequisites: ILRHR 260/560 or equivalent, also ILRST 210, 211 or 510, 511) or equivalent and permission of instructor. M. Cavanaugh.
Purpose of this course is to acquaint students with various aspects of the training and development function in organizations. Systems and training cycle approaches are used. Topics include how to determine that a training problem exists, how to conduct a training needs assessment, issues regarding the design of training programs, a review of current training techniques and management development strategies, financial and evaluation strategies, and the role that training plays for U.S. firms in trying to become more competitive in the world economy. After completion of this class, students should be familiar with current views of the Human Resource Development function and profession, contemporary conceptual models of HRD and adult learning, and the management of an effective HRD function within the current business environment.

ILRHR 694 Human Resource Information System Applications
Spring 1998. 4 credits. Limited to 22 students. Prerequisites: ILRHR 260/560 or equivalent, ILRHR 290; at least one upper-level HRS elective; basic statistics; and permission of instructor. J. Boudreau.
Explores the development, implementation and management of computerized personnel information systems and their use in human resource management. Theories and concepts relevant to the design and implementation of such systems are presented and used as the framework for hands-on experience with personal and mainframe computer systems. Students create and use applications of current popular human resource software to design their own applications and present them to the class. Where possible, student applications are based on field work in actual organizations.

ILRHR 695 Education, Technology, and Productivity
Spring 1998. 3 credits. J. Bishop.
The seminar investigates the nexus between the education and training occurring in schools and at the workplace and the technological aggressiveness, productivity and competitiveness of firms, individuals, and nations. We will investigate (1) how technological progress is changing the nature of work and what this implies for reform of education and training, (2) why United States productivity has increased so little in the past two decades, (3) how education and training contribute to the growth and competitiveness, (4) why educational achievement has declined, and (5) how the responsibility for education and training should be apportioned among individuals, firms, private nonprofit organizations, and government.

ILRHR 697 Special Topics in Resource Studies
Fall or spring. 3 credits. Staff.
The areas of study are determined each semester by the instructor offering the seminar.

ILRHR 698 International Human Resource Policies and Institutions
Fall 3 credits. J. Bishop.
A comparative study of human resource policies and institutions in Western Europe, North America, Japan, and East Asia (with special emphasis on math and science education) and of the effects of these institutions on productivity, growth, and equality of opportunity. The institutions studied include primary and secondary education, apprenticeships, employer training, and higher education. Data on the consequences of policies is presented and an effort made to understand how human resource policies and institutions have contributed to the rapid growth and low levels of inequality in Europe, Japan, and the Pacific Rim nations. Another focus of the course is understanding the causes of the low levels of achievement of American high school students relative to their counterparts abroad.

ILRHR 760 Seminar in Human Resource Studies
Fall or spring. 3 credits. Prerequisites: ILRHR 560, ILRST 510/511, and ILRHR 669 and permission of instructor. P. Wright.
A "floating" seminar designed to give faculty and students opportunities to pursue specific topics in detail, with an emphasis on theory and research. Topics vary from semester to semester. Interested students should consult current course announcements for details.

ILRHR 761 Research Seminar on Comparative Systems and Industrial Performance
Fall 1997. 3 credits. Prerequisite: ILR 560 or equivalent and consent of instructor. R. Bapt.
Research seminar is designed for graduate students currently developing research proposals or conducting research on innovative approaches to work organizations and human resource strategies. Course covers current theory and empirical research on the determinants of industrial performance and competitiveness at the firm and establishment levels, considering the relative importance of new technology, human resource and industrial relations strategies, and institutional constraints. It focuses heavily on formulating interesting theoretically driven research questions and utilizing appropriate qualitative research methodologies. Students attend seminars to discuss student research projects in the context of relevant theoretical and empirical literatures.

ILRHR 762 Research Methods in Human Resource Studies
Spring 1998. 3 credits. P. Wright.
Designed to build social science research skills, particularly in the area of human resource studies (HRS). Topics include measurement reliability, construct validity, design of studies, external validity, meta-analysis, critiquing/reviewing HRS research, publishing HRS research, and applications of statistical models of HRS issues.

ILRHR 763 Human Resource Strategies for Competitiveness
Review of empirical and conceptual work in the field of human resource management strategy, which proposes that HRM decisions should be directly linked with business strategy. Will consider HRM as an organizational system and how it can support a variety of business strategies. In addition to reviewing the literature on this topic, time will be devoted to applying what is learned about the field to a variety of developing issues facing businesses today. Human resource strategies to support total quality management, high technology organizations, mergers and acquisitions, downsizing, and small businesses will be studied.

ILRHR 767 Human Resource Strategies for Entrepreneurial Firms
Spring 1998. 4 credits. Open to graduate students only. ILRHR 560, equivalent, or permission of instructor. T. Welbourne.
For course description, see ILRHR 660.

ILRHR 769 Topics in Compensation Theory and Research
Fall 1998. 4 credits. Prerequisite: ILRHR 669. G. Milkovich, B. Gerhart.
Examines recent developments in theory, research, and practice related to compensation. Discussion emphasizes development of theory and research to compensation decision making. Students examine compensation and reward-related theories and research from supporting disciplines such as economics, psychology, sociology, and organizational behavior and evaluate their relevance to employee, managerial, executive, and international compensation.
ILRHR 790 ILR M.P.S. Program
Fall and spring. 1–9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

ILRHR 798 Internship
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 799 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 960 Workshop in Human Resource Studies
Fall and spring. 2 credits. Enrollment limited to M.S. and Ph.D. candidates. S-U grades only. Staff. The workshop is designed to provide a forum for the presentation and critical discussion of current research being undertaken by graduate students, faculty members, and invited guests in the field of human resource studies. All M.S. and Ph.D. candidates in the Department of Human Resource Studies are urged to enroll; candidates in other departments are cordially invited. Each participant will have an opportunity to benefit from the collective wisdom of the others in the formulation, design, and execution of his or her research, as well as to become current on the latest developments in the field.

INTERNATIONAL AND COMPARATIVE LABOR

ILRIC 332 Labor in Developing Economies (also Econ 462)
Spring. 3 credits. Prerequisite: ILRLE 240, Economics 311, or permission of instructor. G. Fields. The economic problems of labor in less-developed nations. Among the subjects included are determinants of income and wage structures in less-developed countries; labor demand and unemployment; labor supply and migration; human resource policy; and development strategy and employment growth.

ILRIC 333 Western Europe, the United States, and Japan in a Changing World Economy
Fall. 3 credits (1 additional credit may be arranged). Open to juniors and seniors. L. Turner. Offers an introduction to the contrasting national trajectories and current political economies of Germany, Britain, France, Japan, and the U.S. Emphasis will be on (a) cross-national differences and comparisons; and (b) the different capacities that contrasting institutions offer each society as it grapples with intensifying trade competition, domestic political conflict, and the need for production reorganization and “new industrial relations.”

ILRIC 337 Special Topics:
Fall. 3 or 4 credits. Staff. Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

ILRIC 339 The Political Economy of Mexico
Fall. 3 credits. M. Cook. Explores the range of challenges affecting contemporary Mexican politics, society, and economic development—from democratization to immigration to NAFTA. The course provides both an introduction to Mexican political economy for those with no prior background and an opportunity for students with more knowledge of Mexico to explore a research topic in greater depth.

ILRIC 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRIC 532 Labor in Developing Economies
Spring. 3 credits. For graduate students. G. Fields. Students in this course attend the lectures in ILRIC 332 (see description for ILRIC 332). If enrollment warrants, they will also meet separately at a time to be arranged for discussion of topics in ILRIC 332 and additional topics.

ILRIC 533 Western Europe, the United States, and Japan in a Changing World Economy
Fall. 4 credits. Graduate students. L. Turner. See description for ILRIC 333. Graduate students attend class, take the midterm and submit an analytical research paper at the end of the semester.

ILRIC 537 Special Topics:
Fall or spring. 3 or 4 credits. Staff. Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

ILRIC 631 Comparative Labor Movements in Latin America (also Government 631)
Spring. 3 credits. M. Cook. Examines the historical development of labor movements in Latin America, their role in national political and economic development, and the impact of economic liberalization, authoritarianism, and redemocratization on contemporary labor organizations in the region. Countries examined will include but are not limited to Mexico, Brazil, Argentina, Chile, Peru, and Venezuela.

ILRIC 632 Reforming Industrial Relations: A Comparative Perspective
Fall. 4 credits. Graduate seminar open to seniors with permission of instructor only. L. Turner. Examines contemporary efforts in advanced industrial democracies to reform industrial relations. The first half of the course will examine contemporary industrial relations reform efforts in the U.S., including innovative organizing strategies, new calls for union militancy, business strategies for a “union-free” environment; efforts at labor-management cooperation; and the report of the Dunlop Commission. The second half will cover Britain—the Thatcher reforms of the 1980s and the current labor-backed works council movement; France—the Auroux Laws of the 1980s and their effects; and Germany—the transformation of industrial relations in eastern Germany since 1989.

ILRIC 633 Labor, Industry, and Politics in Germany
Fall. 4 credits. Open to seniors with permission of instructor only. Not offered 1997–98. L. Turner. Is the successful postwar “social partnership” model of organized capitalism in the Federal Republic of Germany viable in the 1990s? To answer this question, you will study the works councils and codetermination, the rise of a strong postwar labor movement, the contemporary German version of social partnership, with an emphasis on current events and the new challenges for German industry and labor posed by German unification and the single European market.

ILRIC 635 Labor Markets and Income Distribution in Developing Countries
Spring. 4 credits. Prerequisite: ILRLE 240 or Economics 313 or permission of instructor. Not offered 1997–98. G. Fields. A course analyzing who benefits how much from economic growth in developing countries and how income distribution would be affected by various public policies. Topics to be covered include: poverty, inequality, social welfare, and economic growth-theory and evidence; poverty profiles, earnings functions, and decompositions; employment, unemployment, wages, and labor markets; and an introduction to benefit-cost analysis, with application to the economics of education.

ILRIC 636 Comparative History of Women and Work (also Womens Studies 636)
Fall. 4 credits. Permission of instructor. Not offered 1997–98. I. DeVault. Will explore the similarities and differences between different cultures’ assumptions about the work of women as well as women’s experiences in varying work circumstances throughout history. Beginning with theoretical and factual pieces and overviews of the history of women and work, most of the course will consist of in-depth examinations of specific work situations or occupations across time and geography. Comparative examples will be taken from the United States, Europe, and the Third World.

ILRIC 637 Labor Relations in Asia
Spring. 3 credits. Permission of instructor required. S. Kuruvilla. A comparative survey of the industrial relations systems of selected Asian nations such as Japan, S. Korea, Thailand, Malaysia, Singapore, Hong Kong, China, and several others. The emphasis is on economic development strategies and industrial relations policies in these countries. Industrial relations practices, the extent of union organization, and labor force demographics of these countries will be examined. The primary objective is to provide students with an introduction to industrial relations systems in Asia. The countries chosen are representative, but not exhaustive.

ILRIC 638 Labor, Free Trade, and Economic Integration in the Americas (also Government 630)
Spring. 3 credits. Limited. Open to seniors and graduate students; juniors by permission. M. Cook. Analyzes the contemporary movements toward free trade and regional economic integration in the Western Hemisphere. Special attention is paid to labor’s role in this process. Examines the origins and implica-
tions of the North American Free Trade Agreement (NAFTA) and looks at integration schemes in South America (Mercosur), Central America, and the Caribbean, and at hemisphere-wide initiatives. A research paper is required.

**ILRRC 730 Research Seminar on Labor Markets and Economic Development**

Fall or spring. 3 credits. Prerequisite: open to M.S. and Ph.D., students only: G. Fields.

Research seminar for students writing theses or dissertations on aspects of labor markets and economic development. Will address research questions, methodologies, and contributions in the areas of employment and unemployment, income and earnings, educational and human resource development, welfare economics, and economic growth. Numerous presentations and written papers will be required.

**ILRRC 739 The Political Economy of Mexico**

Spring. 3 credits. M. Cook.

For course description, see ILRRC 339.

**ILRRC 790 ILR M.P.S. Program**

Fall and spring. 1-9 credits.

Supervised research only for those enrolled in the ILR M.P.S. program.

**ILRRC 799 Directed Studies**

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

**ILRH 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives**

Fall. R. Batt.

For description, see the section, Human Resource Studies.

**ILRH 469 Immigration and the American Labor Force**

Fall. V. Briggs.

For description, see the section, Human Resource Studies.

**ILRH 656 International Human Resource Management**

Spring. V. Pucik.

For description, see the section, Human Resource Studies.

**ILRH 690 Comparative Human Resource Management**

Fall or spring. V. Pucik.

For description, see the section, Human Resource Studies.

**ILRH 698 International Human Resource Policies and Institutions**

Fall. J. Bishop.

For description, see the section, Human Resource Studies.

**ILRH 699 Contemporary European Labor Markets**

Spring. J. Bishop.

For description, see the section, Human Resource Studies.

**ILRH 761 Research Seminar on Comparative Systems and Industrial Performance**

Fall. R. Batt.

For description, see the section, Human Resource Studies.

**ILRH 769 Topics in Compensation Theory and Research**

Fall. G. Milkovich.

For description, see the section, Human Resource Studies.

**ILRLE 448 Topics in Twentieth-Century Economic History: The Economics of Depression and the Rise of the Managed Economy**

Fall. G. Boyer.

For description, see the section, Labor Economics.

**ILRLE 640 Economic History of British Labor 1750-1960**

Fall or spring. G. Boyer.

For description, see the section, Labor Economics.

**ILRLE 628 Cross-Cultural Studies in Organizational Behavior**

Spring. J. Gruenfeld.

For description, see the section, Organizational Behavior.

**INTERDEPARTMENTAL COURSES**

**ILRIR 150 Freshman Colloquium**

Fall. 1 credit. Open only to ILR freshman. S-U only. Staff.

This course is offered: a) to acquaint new freshman students with some of the issues and disciplines in the field of industrial and labor relations; b) to establish acquaintance among members of the ILR faculty and small, randomly assigned groups of students. The course includes a plant visit and several meetings early in the semester designed to introduce issues encountered in studying the employment relationship.

**ILRLE 451 Science, Technology, and the American Economy**

Spring. 4 credits. Not offered spring 1998 V. Briggs.

The industrial revolution did not begin in the United States, but the nation became the world's first technological society. Attention will be given to the evolutionary confluence of science, technology, mathematics, religion, and capitalism in the formation of the U.S. economy, its institutions, and its labor force. Primary attention will be given to the post-World War II economic developments. The vantage point will be the linkage with employment, unemployment, income, and productivity in nations. Public policy issues (such as research and development policy, national defense influences, the "agricultural revolution," savings and investment rates, labor force preparedness) will be explored. Critical concerns pertaining to environmental impacts, income polarization, and consumerism will also be examined. The industrial and human resource policies of other nations as well as the implications of the globalization of technology in the future will also be discussed.

**ILRIR 452 Writing in Industrial and Labor Relations**

Fall or spring. 3 credits. J. Farley.

Will require close reading of four or five books related to the term's theme in the field of industrial and labor relations and careful writing about them. Students will also have an opportunity to practice writing about the world of work for different audiences.

**ILRIR 790 ILR M.P.S. Program**

Fall and spring. 1-9 credits.

Supervised research only for those enrolled in the ILR M.P.S. program.

**LABOR ECONOMICS**

**J. Abowd, chair; F. Blau, G. Boyer, R. Ehrenberg, G. Fields, R. Hutchens, G. Jakubson, L. Kahn, R. Smith**

**ILRLE 140 Development of Economic Institutions**

Fall. 3 credits. Prerequisite for non-ILR students: permission of instructor.

Provides students with an understanding of the historical roots of the economic system currently dominant in Western Europe and the United States. The course will focus on (a) the process of European economic growth prior to 1914, (b) the effect of industrialization on labor in Great Britain, and (c) the historical evolution of economic thought from Adam Smith to J. M. Keynes.

**ILRLE 240 Economics of Wages and Employment (also Economics 341)**

Fall and spring. 3 credits. Prerequisites: Economics 101-102 or Economics 103, Economics 313, or permission of instructor.

Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. Considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

**ILRLE 340 Economic Security (also Econ 481)**

Spring. 3 credits. Prerequisites: ILRLE 240 or equivalent.

Considers the economic and social effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accidents, temporary or permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

**ILRLE 348 The Economics of Unemployment (also Econ 453)**

Fall. 4 credits. Prerequisite: ILRLE 240 or Econ 453.

This course introduces students to several issues fundamental to an understanding of unemployment: the social costs; definitional questions and measurement problems; the patterns of unemployment; and the various types of unemployment, their causes, and the policies that can or have been pursued to alleviate unemployment. The course is designed for undergraduate and graduate students who have taken a survey course in labor economics or its equivalent.

**ILRLE 441 Income Distribution (also Econ 455)**

Fall. 4 credits. Prerequisite: ILRLE 240 or Economics 341.

Explores income distribution in the United States and the world. Topics to be covered include functional and size distributions of income, wage structure, income-generating functions and theories, discrimination, poverty, public policy and income distribu-
tion, and changing income distribution and growth. Students who have taken CEH 355 may not receive credit for 441.

ILRLE 442 The Economics of Employee Benefits (also Econ 458)
Fall. 4 credits. Prerequisites: ILRLE 240 or equivalent.
An in-depth treatment of the economics and financial management and administration of all employee benefits: health care, insurance, retirement income, family-care benefits, executive incentive plans, and other compensation provided as a service or contingent financial package to employees. Detailed international comparisons of health care and retirement systems are included.

ILRLE 444 Modern European Economic History
Spring. 4 credits. Prerequisite: ILRLE 240 or equivalent.
An introduction to the economic development of Europe from 1500 to 1939. Topics covered include: the establishment of an institutional framework supporting economic growth in early modern Europe; the causes of the first industrial revolution in Great Britain; the effects of industrialization on workers' living standards; the spread of industrialization to the major continental powers—France, Germany, Austria-Hungary, and Russia; and the economic causes and effects of the First World War.

ILRLE 445 Women in the Economy (also Econ 457)
Fall. 4 credits. Prerequisite: ILRLE 240 or equivalent.
Examines the changing economic roles of women and men in the labor market and in the family. Topics include: a historical overview of changing gender roles; the determinants of the gender division of labor in the family; trends in female and male labor force participation; gender differences in occupations and earnings; and the consequences of women's employment for the family.

ILRLE 448 Topics in Twentieth Century Economic History: The Economics of Depression and the Rise of the Managed Economy (also Econ 458)
Spring. 4 credits. Prerequisites: ILRLE 240 or Economics 314.
Topics covered include: the causes of the Great Depression in the United States; the economics of the New Deal; the causes of high unemployment in interwar Great Britain; and the development of demand management policies in Great Britain and the United States after 1945.

ILRLE 495 Honors Program
Fall and spring (yearlong course). 3 credits each term.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 497-498 Internship
Fall and spring. 3 and 6 credits.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 499 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 540 Labor Economics
Fall. 3 credits. Prerequisites: Economics 101-102 or Economics 103 or equivalent. Required of graduate students majoring or minoring in labor economics and M.I.L.R. candidates.
Applies the theoretical and elementary tools of economics to the characteristics and problems of the labor market. The course considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

ILRLE 541 Social Security and Protective Labor Legislation
Spring. 3 credits. Prerequisite: ILRLE 540 or equivalent. Required of graduate students majoring in labor economics and M.I.L.R. candidates.
Considers the economic and social effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accident, temporary and permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

ILRLE 540 Economic History of British Labor 1750-1940 (also Econ 459)
Fall or spring. 4 credits.
Will examine various aspects of British labor history from the beginning of the Industrial Revolution until World War II. Specific topics will include: (1) monetary and non-monetary changes in workers' living standards; (2) internal migration and emigration; (3) the London labor market; (4) the extent of poverty and its consequences; (5) unionism and the welfare state; and (6) the development of trade unions.

ILRLE 542 Economic Analysis of the Welfare State (also Econ 460)
Spring. 4 credits.
Includes economic rationales for government intervention and analysis of the effects of programs on economic welfare. Discusses taxes, in-kind, and cash programs. Includes some discussion of welfare states in other countries.

ILRLE 544 The Economics of Occupational Safety and Health (also Econ 461)
Spring. 3 credits.
Analyzes the problem of occupational injuries and illnesses in the United States. The first section concentrates on legal requirements, judicial interpretations, and legal implications of the Occupational Safety and Health Act; then shifts to such questions as the need for, and appropriate goals of, the act, the stringency of safety standards considered in a benefit-cost framework; the difficulties in enforcing the act; and estimates of the impact of the act.

ILRLE 647 Evaluation of Social Programs
Fall. 4 credits.
An introduction to the methodologies used by economists to evaluate the impacts of social-action programs and legislation. General evaluation methodology, cost-benefit analysis, and econometrics are discussed. Case studies are considered to illustrate the uses of these techniques, to acquaint the student with major current government programs and legislation, and to estimate these programs' economic impacts. Throughout, the primary analytic framework used by the instructor is microeconomics.

ILRLE 648 Economic Analysis of the University
Spring. 4 credits.
Seeks to illustrate the complexity of decision making in a nonprofit organization and to show how microeconomic analysis is used in general, and labor market analysis in particular, can be usefully applied to analyze resource allocation decisions at universities. Among the topics covered are financial aid, tuition, admissions policies, endowment policies, faculty salary determination, the tenure system, mandatory retirement policies, merit pay, affirmative action, comparable worth, collective bargaining, resource allocation across and within departments, undergraduate versus graduate education, research costs, libraries, athletics, and "socially responsible" policies. Lectures and discussions of the extensive readings will be supplemented by presentations by Cornell administrators and outside speakers who have been engaged in university resource allocation decisions or have done research on the subject.

ILRLE 741 Applied Econometrics I
Fall. 4 credits.
Considers methods for the analysis of longitudinal data, that is, data in which a set of individual units are followed over time. The focus will be on both estimation and specification testing of these models. Will consider how these statistical models are linked to underlying theories in the social sciences. Course coverage will include panel data methods (including fixed effects models for both linear and non-linear systems) and, if time permits, duration analysis.

ILRLE 742 Applied Econometrics II
Spring. 4 credits.
Covers statistical methods for models in which the dependent variable is not continuous. It covers models for dichotomous response (including probit and logit) and polytomous response (including ordered response and multinomial logit), various types of censoring and truncation (e.g., the response variable is only observed when it is greater than a threshold), as well as sample selection issues, etc. Will also include an introduction to duration analysis. Covers not only the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model.

ILRLE 744 Seminar in Labor Economics I (also Econ 662)
Spring. 3 credits.
ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.
This introductory (survey) course considers the basic individual and group processes in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

**ILRLE 746 Seminar in Labor Economics II (also Econ 643)**
Spring. 4 credits. ILRLE 744, 745, and 746 constitute the Ph.D.-level sequence in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

**ILRLE 748 Economics of Employee Benefits**
Fall. 4 credits. Students in this course attend the lectures in ILRLE 442 (see description for 442) but have additional course requirements. If enrollment warrants, they will also meet separately at a time to be arranged for discussion of topics in 442 and additional topics.

**ILRLE 749 Economics of Development (also Economics 672)**
Fall. 4 credits. Prerequisites: First-year graduate economic theory and econometrics. Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.

**ILRLE 790 ILR M.P.S. Program**
Fall and spring. 1–9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

**ILRLE 798 Internship**
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRLE 799 Directed Studies**
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

**ILRLE 940 Workshop in Labor Economics**
Fall and spring. 3 credits. Intended for Ph.D. students who have started to write their dissertations. Presentations of completed papers and work in progress by faculty members, advanced graduate students, and speakers from other universities. Reports of the formulation, design, and execution of economic dissertations.

**ORGANIZATIONAL BEHAVIOR**

**ILRROB 171 (120) Introduction to Micro Organizational Behavior and Analysis: The Social Psychology of the Workplace**
Fall. 3 credits. Staff. This introductory (survey) course considers the basic individual and group processes in the workplace. At the individual level, we will study personality, motivation, perception, attitude formation, and decision making. On the group level, we will emphasize group dynamics, leadership, power and influence, and culture.

**ILRROB 171 (120) Introduction to Macro Organizational Behavior and Analysis**
Spring. 3 credits. Staff. The relationship between industry and the economy as a whole and its implications for other social institutions in American society (including stratification, politics, and American values) is discussed. The course moves from classical sociological theory to the analysis of complex organizations. The central focus of the course is the study of industrial organizations and of complex organizations in general, emphasizing authority relations, goals, the division of labor, bureaucracy, and organizational design.

**ILRROB 320 The Psychology of Industrial Engineering**
Fall. 4 credits. T. Hammer. A study of the human factors in the industrial engineering of work, workplaces, tools, and machinery. The course examines the aspects of individual and social psychology that operate in the work setting and that should be taken into account in the design of jobs. These include limitations of the human sensory system; individual difference in skills, abilities, motives, and needs; group dynamics; intrinsic motivation; job satisfaction; conflict.

**ILRROB 325 Organizations and Social Inequality**
Spring. 3 credits. Limited. P. Tolbert. Examines the central role that organizations in industrial societies play in allocating income, status, and other resources to individuals. A variety of theoretical explanations of social inequality will be examined, and the social policy implications of each will be considered. Class assignments are designed to develop students' general writing skills, as well as substantive understanding of different theories and approaches to the problem of inequality.

**ILRROB 328 Cooperation, Competition, and Conflict Resolution**
Spring. 4 credits. Prerequisite: one course in social psychology or equivalent. Staff. An examination of theory and empirical evidence relating to the resolution of interpersonal, intergroup, and international conflict. Specific attention is devoted to studying factors that contribute to the development of cooperative or competitive bonds between parties to a conflict. The following topics are studied: the availability and use of threats, intensity, and costs of threat; fractioning and escalating conflict. Personality and situational factors that regulate conflict intensification are stressed.

**ILRROB 329 Organizational Cultures**
Fall or spring. 3 credits. Prerequisite: one or more courses in sociology. Staff. Reviews the concept of culture as it has evolved in sociology and anthropology, applying it to formal organizations in workplaces such as corporations and unions. The course first examines the nature of ideologies as sense-making definitions of behavior, concentrating on the cultural forms that carry these cultural messages, rituals, symbols, myths, sagas, legends, and organizational stories. Considerable attention will be given to rites and ceremonies as a cultural form in organizational life that consolidates many of these expressive forms into one. The course will examine types of ceremonial behavior such as rites of passage, rites of enhancement, and rites of degradation, including the role of language gestures, physical settings, and artifacts in ceremonial behavior. The presence of subcultures and countercultures in organizational behavior will also receive attention, especially the part played by occupational subcultures in formal organizations.

**ILRROB 370 The Study of Work Motivation**
Fall. 4 credits. Open to juniors and seniors. T. Hammer. Designed to acquaint the student with the basic concepts and theories of human motivation with implications for job design and organizational effectiveness. Focus is on theories of worker motivation and on research approaches and results. As these apply to the performance of individuals and groups in formal organizations. Readings are predominantly from the field of organizational psychology, supplemented by relevant contributions from experimental and social psychology. Each student will design, execute, and analyze a research study of his or her own.

**ILRROB 371 Individual Differences and Organizational Behavior**
Fall or summer. 3 credits. Recommended: some acquaintance with the substance and methods of behavioral or social science. L. Gruenfeld. Examines personality from a comparative psychodynamic point of view. Social behavior, authority relationships, and work motivation are used to illustrate how various theories could be applied to understand behavior and experience in organizations.

**ILRROB 373 Organizational Behavior Simulations**
Fall. 3 credits. Prerequisites: ILRROB 170 and 171 or equivalent. Limited enrollment. R. Stern. Basic principles of organizational behavior as studied through readings and participation in simulation games. Simulations model traditional organizations and cooperatives. Games model executive decision making, running a company, assembly work, and cooperative decision making. Organizational design, decision making, conflict, cooperation, and power are the central topics of discussion. The contrasting bases of power in the organizations permits the study of the assimptions underlying organization structure and process.

**ILRROB 420 Contemporary Organizational Behavior Applications**
Fall or spring. 3 credits. Prerequisites: ILRROB 170 and 171 (120 and 121). Introduces students to contemporary applications of organizational behavior theory in work organizations. Will explore the frameworks of common and current organizational and managerial change interventions, review contemporary literature about them, and try to discover existing links between these processes and the theoretical OB literature. Specific topics will vary from year to year. For this year, applications include TQM, re-engineering, team development, learning organizations; world-class manufac-
uring, competing values frameworks, assessment instruments, and multiculturalism and diversity issues in the workplace.

ILROB 421 Regulating the Corporation
Fall. 4 credits. R. Stem.
Will examine public and private power from an organizational perspective. The resource-dependence approach, resource dependence theories, provides a framework for interpreting government attempts at the regulation of corporate behavior. Topics cover the structure and functioning of government regulatory agencies and corporate responses to regulation, including corporate strategy, change, and political influence. Business ethics and corporate social responsibility are considered along with the role of interest groups such as consumer or citizen organizations. Research and case materials focus on the implementation of environmental protection, occupational health and safety, equal opportunity, antitrust, securities, and consumer regulations.

ILROB 422 Organizations and Deviance
Fall. 3 credits. Enrollment limited to 60. W. Sonnensuhl.
Focuses upon the deviant actions of organizations, including such behaviors as price fixing, environmental pollution, illegal campaign contributions, and discrimination in hiring and promotion. Examines the origins of such behaviors within organizations, the processes by which they become institutionalized, and the processes by which they become defined as deviant organizational actions. Within this context, the course will examine such contemporary cases as Exxon’s Valdez oil spill, Enron-Contragate, drug testing, and the federal savings and loan scandal. These events raise troubling questions about what it means to live and work within an organizational society, and they cannot be dismissed as instances of a few individuals gone bad.

ILROB 425 Sociology of Industrial Conflict
Spring. 4 credits. R. Stem.
The focus is on the social, economic, and political causes of industrial conflict. These causes include socialization, class relations, work-non-work effects, as well as the nature of work and employment relations. Social movement, collective organization, and individual actions are examined including such manifestations of conflict, as strikes, labor turnover, absenteeism, and sabotage, and the influence of the environments in which they occur.

ILROB 427 The Professions: Organization and Control
Fall. 3 credits. Prerequisite: permission of the instructor. P. Tolbert.
Focuses on the sources of power and control exercised by professional groups in contemporary society. A number of issues will be examined in this context including: the role of professions in society, processes through which an occupational group becomes defined as a profession, sources of control that professional associations have over their members, relations between professionals and nonprofessionals in organizations, and the relationship between unionization and professionalization of occupations.

ILROB 428 Organizational Change and Intervention
Fall. 3 credits. Limited to 25. Juniors and seniors with permission of instructor. L. Williams.
Seminar will focus on planned and unplanned change in organizations. Topics will include mergers and acquisitions, team building, self management and the role of change agents. Participants will be required to develop and present topics in addition to keeping a weekly journal and participating in exercises.

ILROB 429 Organizational Politics and Institutional Change
Spring. 2 credits. 7 weeks. Limited to juniors and seniors with permission of the instructor. Please see instructor before the first class. S. Bacharach.
Will examine the market, cultural, political, and structural forces that change the organizational “rules of the game,” how those changes affect individuals and organizations, and the distortions that occur as individuals and organizations attempt to adjust to a new unstable order. Issues to be examined include power, corruption, dealmaking, rationality, uncertainty, and competition. Course requirements include completing a major research paper and leading a class discussion.

ILROB 470 Group Processes
Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Permission of instructor, E. Lawler.
A review of theoretical approaches and selected research on group phenomena, including the formation of groups, the structure of group relations, and group performance. Specific topics include conformity and obedience, status and power relations, tactics of influence, solidarity and commitment, the management of emotion, the emergence and change of microcultures, and the role of groups in networks and organizations.

ILROB 472 Applied Organizational Behavior
Fall. 3 credits. Prerequisites: ILROB 170 and 171. S. Bacharach.
Introduces students to intermediate theory of organizational behavior. It will specifically concentrate on teaching students to use organizational theories for analytical and applied purposes. Among the issues to be addressed are organizational structure, work processes, organizational politics, organizational design, job design, incentive systems, and quality-of-work-life programs.

ILROB 479 Technical Workers and the Social Organization of Research and Development
Spring. 3 credits. Prerequisite: ILROB 170, 171 or equivalent in sociology or anthropology. Staff.
Examines how industrial R&D is organized and seeks to impart an appreciation for the practical problems that arise when firms employ a significant number of scientists, engineers, and other technical workers. It is designed for students who have an interest in high-technology firms or who anticipate working for firms in which R&D plays an important role. The course brings relevant theoretical perspectives to bear on pragmatic issues surrounding technical innovation and the employment of scientists and engineers. Representative topics include: the organization of scientific and technical communities, the innovation process of research, the nature of scientific and technical work, strategies for fostering innovation, the careers of scientists and engineers, and the managerial problems characteristic of high-technology firms. Requirements include a take-home midterm and a final paper.

ILROB 493 Honors Program
Fall and spring (cohort long course). 3 credits each term.
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 497-498 Internship
Fall and spring. 3 and 6 credits.
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 520 Micro Organizational Behavior and Analysis
Fall or spring. 3 credits. Staff.
Survey of concepts, paradigms, and research from the fields of organizational and social psychology as these relate to the behavior of individuals and groups in organizations. Job attitudes, motivation, performance, leadership and power, group formation, perception, and organizational climate. A preliminary course for advanced work in organizational behavior.

ILROB 521 Macro Organizational Behavior and Analysis
Spring. 3 credits. Staff.
Survey on concepts, paradigms, and research from sociological and organizational theory. Topics include formal structure, organizational design, organizational decision-making, demography, cross-cultural differences, power and authority. Intended to be preliminary to more intensive work in organizational behavior.

ILROB 620 Theories of Organizational Change, Innovation, and Evaluation
Spring. 4 credits. Prerequisites: two organizational behavior courses at the 300 level, or advanced courses in sociology or psychology. W. Sonnenstuhl.
Examines the dynamics of individual, structural, and environmental factors operating in organizational change in general, and in the implementation and use of innovations within formal organizations in particular. The role of evaluative research in assessing the effectiveness of the implementation of innovations and in determining organizational effectiveness are analyzed. Several case studies of organizational change in government, unions, and private industry are examined. The emphasis is on conceptual frameworks for analyzing organizational change and mounting evaluative research on innovations. Readings are interdisciplinary and include sociology, psychology, and political science.

ILROB 621 Organizational Diagnosis Intervention and Development
Spring. 4 credits. Prerequisites: undergraduates, ILROB 170 and 171; Graduate students, ILROB 520 and 521 or equivalent; and permission of instructor. L. Gruenfeld.
This applied course considers theories and techniques for the identification and improvement of organizational problems at the behavioral (micro) level. Methods for the implementing of change are evaluated in the light of several normative and descriptive theories of individual and group development and effectiveness. The course emphasizes
both quantitative and qualitative data processing procedures.

ILROB 623 Micropolitics in Organizations
Spring. 3 credits. Prerequisites: ILROB 170 and 171. Limited, permission of instructor. S. Buchachar.
Examines micro-political processes in organizations. Neorealism, Machiavellian, Marxian, and Weberian approaches to organizational politics will be specifically analyzed. An attempt will be made to understand how the micro-political rules of organizational games are institutionalized in change. Among the ideas to be discussed are the institutionalization of ideology and specification of the relationships among power, tactics, and strategy. Interest groups and coalition politics will be examined in terms of conflict and bargaining. Other issues to be discussed include corruption, dealmaking, and competition. Examples will be drawn from both the private and public sectors. Seminar requirements will include an in-class presentation and a major paper and/or take-home final exam.

ILROB 624 Groups in Work Organizations
Fall. 4 credits. Enrollment limited. Permission of instructor required. L. Gruenfeld.
This is an experiential learning course designed primarily for students who have a comprehensive background in the theory and methods of the behavioral sciences. Work group members study their roles and relationships to each other, the task, other work groups, and especially authorities. Students write a number of self-reflective papers in which they conceptualize their experiences and relate them to theory and method in organizational behavior and experience.

ILROB 625 Conflict, Power and Negotiation
Fall. 3 credits. Open to seniors and graduate students. Permission of instructor is required. Limited enrollment. E. Lawler.
Theoretical seminar adopts a power perspective on bargaining and conflict resolution. Examines how power and power processes affect the tactics people adopt in bargaining and also when power relations inhibit or promote conflict resolution. "Power" is viewed in the course as a capability, embedded in a social structure, and tactics are the action based on or using such power. The seminar gives overview of several theoretical approaches to conflict and bargaining (e.g., rational choice, cognitive, social exchange) and places the power perspective in this context.

ILROB 627 Leadership in Organizations
Spring. 3 credits. Prerequisites: two organizational behavior courses at the 300 level or advanced courses in sociology or psychology. L. Gruenfeld.
An examination of theories and research findings from the behavioral sciences that are relevant to leadership and the influence process in groups and organizations. Personality, situational factors, intergroup processes, interpersonal perception as well as motivation to lead and to follow will be discussed. The implications for leadership training, organization development, and action research are explored.

ILROB 628 Cross-Cultural Studies in Organizational Behavior
Spring. 3 credits. Limited. Permission of instructor before registering in course. L. Gruenfeld.
Designed for students interested in social psychological theory and research in international culture comparisons of behavior and experience in organizations. Variables such as power distance, individualism-collectivism, universalism-particularism and attitudes toward authority as well as work motivation will be examined. Upon completion of the readings and discussion of conceptual materials and consideration of several major international comparison studies, each student will prepare and present a paper on a topic of his/her own choice usually related to his/her country of origin (China, Japan, German, USA, etc.).

ILROB 629 Personality in Organization
Fall: 4 credits. Open to undergraduates with permission of instructor. L. Gruenfeld.
This advanced course considers psychodynamic theories of organizational diagnosis at the individual and group levels. Topics include leadership, authority, work motivation, intervention, and change. The topics are discussed and applied in small study groups. The professor's role is as a consultant and resource person. Class members study and research their own behavior and present their qualitative and quantitative findings to the class. Students are expected to have background and interest in both research methods and theory.

ILROB 670 Semester in Manufacturing
Spring. 15 credits. Open to master's and Ph.D. students in Industrial and Labor Relations with permission of instructor. Intended for students who want to work as professionals or who have a strong interest in the manufacturing industries. It is taught by an interdisciplinary faculty team from the College of Engineering, the Johnson School of Management, and the School of Industrial and Labor Relations. Course material will be based on plant visits and project work with local industry. Student participation will be in interdisciplinary teams with members representing the three colleges. Course content will concentrate on four major issues thought to make a competitive difference in today's economic environment: (1) the changing environment for product design, (2) rapid-response production systems; (3) organization, management, and compensation of the manufacturing team; and (4) performance measurement.

ILROB 675 Cooperative Strategies for Improving Organizational Performance
Spring. 4 credits. Will concentrate on presentation and analysis of a series of case studies involving projects using cooperative strategies to improve organizational performance. Emphasis will be given to the application in which union and management have been working together to enhance productivity and the quality of working life. Cases will be examined against a background of the research literature on improving organizational performance. Students will be responsible for a term paper.

ILROB 676 Systems of Labor Participation in Management
Fall. 4 credits. Prerequisites: senior standing and permission of instructor. Considers qualitative and psychometrically precise and systematic research methods for the study of behavior in groups and organizations. Includes a workshop that is designed to improve teamwork with the use of on-line data generated by group members. Personality, leadership culture, and group dynamics are the major focus. Students will observe, record, and videotape group and individual behavior, which will be analyzed with the help of microcomputing programs, especially SYMLOG (a system for the multiple-level observation of groups) developed by Bales (1970, 1979). In addition to lectures and discussion of research papers this course will also include a research project designed and executed by the students.
ILROB 720 Issues of Measurement in Research on Organizations (Instrumentation)  
Fall. 4 credits.  
Concerns the study of tests and measures used to assess central variables in organizational behavior and related fields. Students will learn where to find measures suitable for their research purposes and will examine the theories that define the constructs being measured; the empirical information available about different measures—construction, reliability, and validity; and the ways in which the instruments have been used in research and practice.

ILROB 721 Advanced Micro Organizational Behavior  
Spring. 3 credits. Prerequisites: ILROB 520 and 521.  
Examines the historical development of psychological theories of organizational behavior and contemporary issues in micro organizational research. The course will emphasize reading and analysis of primary source material.

ILROB 722 Advanced Macro Organizational Behavior  
Fall. 3 credits. Prerequisites: ILROB 520 and 521.  
Examines the historical development of sociological theories of organizations and contemporary issues in macro organizational research. The course will emphasize reading and analysis of primary source material.

ILROB 723 Behavioral Research Theory, Strategy, and Methods I  
Fall. 4 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll.  
Materials studied in ILROB 723 and 724 include (1) theoretical, conceptual, and ethical questions; (2) survey research and attitude-scaling procedures; (3) laboratory research methods; (4) participant observation and interview methods; (5) use of documents and qualitative data analysis. Provides students with an empirical background for doing research and exposes them to a well-balanced, interdisciplinary set of quantitative and qualitative research tools.

ILROB 724 Behavioral Research Theory, Strategy, and Methods II  
Spring. 3 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll.  
Course will cover (a) analysis and interpretation of quantitative data, (b) traditional problems encountered in the assessment of human and organizational characteristics, (c) the use of different methods of data analysis, and (d) an examination of the limitations imposed on data analysis and interpretation by traditional measures. Examples of topics covered in the course: the use of Chi-square, t-tests, ANOVA, simple and multiple correlation and regression, reliability and validity analyses, causal models, factor analysis, scale construction.

ILROB 725 Analysis of Published Research in Organizational Behavior  
Fall. 3 credits. Prerequisites: ILROB 520 and 521 and one year of statistics.  
An advanced research methods course that critically examines published research papers in the field of organizational behavior in terms of research design and method as well as theory.

ILROB 726 Selected Topics in Organizational Behavior  
Fall. 3 credits. Prerequisites: ILROB 520 and 521 and permission of instructor.  
An advanced seminar that seeks to develop an interdisciplinary perspective on selected topics in organizational behavior. The topics themselves will change from year to year depending on participants' interests. Course is designed to allow students and the instructor to jointly pursue significant scholarly inquiry into one or more arenas of organizational theory. Emphasis will be placed on exploring the relevance of tradition in related disciplines (anthropology, linguistics, philosophy, sociology, etc.) that may enrich our understanding of organizational life.

ILROB 727 Work and Industrial Conflict  
Spring, weeks 7-14. 2 credits.  
A concentrated examination of the sociology of industrial conflict. The seminar focuses on classic formulations of conflict theory in sociology, then the social, political, economic causes of industrial conflict. Both individual and collective forms of conflict expression are examined. Some discussion of the implications of various types of worker management of firms for industrial conflict will be included.

ILROB 728 Theories of Motivation and Leadership  
Spring. 2 or 4 credits. Prerequisites: ILROB 520 and 521.  
Two independent but sequence-connected minicourses.  
(1) Theories of Work Motivation. 7 weeks. 2 credits.  
Course will provide an introduction to basic concepts of human motivation in general, with particular emphasis on the theories that explain and predict work motivation. Students will examine the empirical research that tests the validity of the theories and shows how and under what conditions different motivation models can be used in practice in work organizations.  
(2) Theories of Leadership and Power. 7 weeks. 2 credits.  
Several current microtheories of leadership and power and related research are examined. The disciplinary perspective employed is social organizational psychology and the level of analysis emphasized is action and experience of individuals in groups.

ILROB 729 Organizational Change and Intervention  
Fall. 3 credits. Graduate students only; no exceptions.  
This seminar is concerned with planned and unplanned change in organizations. It is designed to analyze theory in practice. Particular attention will be paid to the role of internal and external change agents. Class members will be encouraged to analyze contemporary changes such as mergers and acquisitions and work force reductions. Participants will submit weekly work force journals.

ILROB 770 The Cultures of Work Organizations  
Fall. 3 credits. Open only to graduate students.  
Considers both administrative and occupational cultures in the workplace. It takes an anthropological perspective, focusing on ideologies as the main ingredient of cultures but emphasizing the role of cultural forms, e.g., myths, stories, sagas, language, rites and ceremonies, and physical settings of meaning. It pays special attention to the place of subcultures and countercultures in the makeup of administrative culture and to occupations as a major source of subcultures. The role of the environment in which organizations are embedded, and its influence on workplace cultures, is also included. Forms of cultural leadership and approaches to reading and changing cultures are also considered.

ILROB 777 Advanced Seminar in Cross-Cultural Studies of Organizational Behavior  
Fall. 3 credits. Permission of the instructor.  
Considers theory and method for the study of cross-cultural and cognitive style variables. Members participate in the conceptualization and conduct of a comparative research project.

ILROB 778 Organizational Implications of World Class Manufacturing  
Fall. 4 credits.  
Aimed at helping students develop an understanding of organizations as complex social systems, and the behavioral implications of new manufacturing initiatives. Live case studies are used to study the introduction of a variety of innovations in contemporary manufacturing firms, including manufacturing cells and teams, concurrent engineering, Total Quality Management, and Just-in-Time material flow. Analyses emphasize the impact of such innovations on individuals' role definitions and relationships, organizations communication requirements and patterns, group dynamics, leadership behaviors, labor relations, and human resource management systems. ILROB 778 is a core course in the Master of Engineering/Manufacturing Option degree program.

ILROB 779 Organizational Change and Intervention  
Fall. 3 credits. Prerequisite: ILROB 520.  
Aims at helping students manage complex, multi-dimensional organizational change. This seminar is designed to analyze theory in practice. Particular attention will be paid to the role of internal and external change agents. Class members will be encouraged to analyze contemporary changes such as mergers and acquisitions and work force reductions. Participants will submit weekly work force journals.

ILROB 780 ILR M.P.S. Program  
Fall and spring. 1-9 credits.  
Supervised research only for those enrolled in the ILR M.P.S. program.
ILRST 798 Internship
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRST 799 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRST 920 Organizational Behavior Workshop
Fall. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only.
This workshop is designed to provide a forum for the presentation of current research undertaken by faculty members and graduate students in the Department of Organizational Behavior and invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.

SOCIAL STATISTICS
A. Hadi, Chair; J. Angellotti, J. Bunge, T. DiCiccio, P. Velleman, M. Wells

ILRST 210 Statistical Reasoning I
Fall and spring 1997, 1998. 3 credits.
Attendance at weekly discussion section is required. J. Angellotti, P. Velleman.
An introduction to the basic concepts of statistics and data analysis. Descriptive methods, mathematical models and inference procedures for univariate and bivariate data. Basic statistical designs, an introduction to probability and applications of the Binomial and Normal distributions. Estimation, confidence intervals, and tests of significance for a population mean and proportion, simple linear regression, correlation, and two-way contingency tables. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

ILRST 211 Statistical Reasoning II
Fall and spring 1997, 1998. 3 credits.
Prerequisite: ILRST 210 or suitable introductory statistics course. J. Bunge, T. DiCiccio.
A second course in statistics. Applications of statistical data analysis techniques, particularly to the social sciences. Topics include: statistical inference; simple linear regression; multiple linear regression; elements of time-series analysis; and sample-survey design. Computer packages are used throughout the course.

ILRST 310 Statistical Sampling
Spring 1997. 3 credits. Prerequisite: ILRST 211 or equivalent. J. Bunge.
Theory and application of statistical sampling, especially in regard to sample design, cost, estimation of population quantities, and error estimation. Assessment of nonsampling errors. Discussion of applications to social and biological sciences and to business problems. Course includes an applied project.

ILRST 311 Practical Matrix Algebra
Matrix algebra is a necessary tool for statistics courses such as regression and multivariate analysis and for other "research methods" courses in various other disciplines. One goal of this course is to provide students in various fields of knowledge with a basic understanding of matrix algebra in a language they can easily understand. Topics include special types of matrices; matrix calculations; linear dependence and independence; vector geometry; matrix reduction (trace, determinant, norms); matrix inversion; linear transformation; eigenvalues; matrix decompositions; ellipsoids and distances; some applications of matrices.

ILRST 312 Applied Regression Methods
Fall 1997. 3 credits. Prerequisite: ILRST 211 or equivalent course. A. Hadi.
First, the matrix algebra necessary to analyze regression models is reviewed. Then, multiple linear regression, analysis of variance, nonlinear regression, and linear logistic regression models are covered. For these models, least squares and maximum likelihood estimation, hypothesis testing, model selection, and diagnostic procedures are considered. Illustrative examples are taken from the social sciences. Computer packages are used. Course includes an applied project.

ILRST 313 Design and Analysis of Experiments
3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 1997–98.
The statistical design and analysis of comparative experiments including completely randomized, factorials, randomized block, Latin squares, and split-unit designs including crossover and repeated measures. Application of statistical design to research problems. Analyses to compare treatment groups including ANOVA, ANCOVA, contrasts and multiple comparison procedures. Computer packages are used.

ILRST 314 Graphical Methods for Data Analysis
3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 1997–98.
Classical and recently developed graphical methods for data analysis and display. Characteristics of effective graphics and honest graphs with comparison of alternative methods for understanding data. Includes study of current computer programs and methods expected to be practical in the near future: graphing of univariate data, graphs of multivariate data, graphical methods of data analysis; the specification, modification, and control of graphs; study of interaction between choice of display and underlying patterns.

ILRST 410 Techniques of Multivariate Analysis
Spring 1998. 3 credits. Prerequisite: ILRST 312 or equivalent. P. Velleman.
Techniques of multivariate statistical analysis discussed and illustrated by examples from various fields. We emphasize application, but theory will not be ignored. Deviation from assumptions and the rationale for choices among techniques are discussed. Students are expected to learn how to thoroughly analyze real-life data sets using computer-packaged programs. Participants should have some knowledge of matrix notation. Topics include: multivariate normal distribution; sample geometry and multivariate distances; inference about a mean vector; comparison of several multivariate populations; variance, and covariances; detection of multivariate outliers; principal component analysis; factor analysis; canonical correlation analysis; discriminant analysis, and multivariate multiple regression.

ILRST 411 Statistical Analysis of Qualitative Data
Fall 1997. 3 credits. Prerequisite: two statistics courses or permission of instructor. M. Wells.
An advanced undergraduate and beginning graduate course. Includes treatment of association between qualitative variables, rank-order methods, and other nonparametric statistical techniques, including those related to chi-squared.

ILRST 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRST 510 Statistical Methods for the Social Sciences I
Fall 1997, spring 1998. 3 credits.
J. Angellotti, P. Velleman.
A first course in statistics for graduate students in the social sciences. Descriptive statistics, probability and sampling distributions, estimation, hypothesis tests, and simple linear regression and correlation. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

ILRST 511 Statistical Methods for the Social Sciences II
Fall and spring 1997, 1998. 3 credits.
Prerequisite: ILRST 510 or equivalent introductory statistics course. J. Bunge, M. Wells.
A second course in statistics that emphasizes applications to the social sciences. Topics include: simple linear regression, multiple linear regression (theory, model building, and model diagnostics), and the analysis of variance. Computer packages are used extensively.

ILRST 610 Seminar in Modern Data Analysis
3 credits. Prerequisite: two statistics courses or permission of instructor. Not offered 1997–98.
An advanced survey of modern data analysis methods. Topics include exploratory data analysis, data re-expression, philosophy of data analysis, robust methods, statistical graphics, regression methods, and diagnostics. Extensive outside readings cover recent and historical work. Participants should have some knowledge of multiple regression, including the use of matrices, and some experience using a computer.

ILRST 611 Statistical Computing
3 credits. Prerequisites: linear algebra, knowledge of a programming language, and statistics at least through multiple regression. Not offered 1997–98.
A survey of new aspects of statistical computing. Topics include: basic numerical methods, numerical linear algebra, nonlinear statistical methods, numerical integration and approximation, smoothing and density estimation. Additional special topics may include Monte Carlo methods, statistical graphics, computing-intensive methods, parallel computation, computing environments. Designed for graduate students in the social sciences and related fields interested in new advances. Students may be asked to write programs in a programming language of their choice.
[ILRST 612 Statistical Classification Methods]
3 credits. Prerequisite: ILRST 312 or equivalent, or permission of instructor.
Not offered 1997-98.
An introduction to a variety of statistical techniques that assign objects to categories on the basis of observed characteristics of the objects. Course topics include (but are not limited to): discriminant analysis and its extensions, classification and regression trees (CART), neural networks for classification, and estimation of error of classification rules.

[ILRST 613 Bayesian and Conditional Inference]
3 credits. Prerequisites: Graduate level courses equivalent to OR&IE 670 and OR&IE 651 or permission of instructor.
Not offered 1997-98.
This course covers the following topics: loss functions and utility theory, prior information and subjective probability, coherency, basic Bayesian inference, empirical Bayesian inference, Bayesian computations, ancillarity, conditional properties of statistical procedures, and Barnardo-Nielsen's exact likelihood theory.

[ILRST 614 Structural Equations with Latent Variables]
Spring 1998. 3 credits. Prerequisites: ILRST 210, 211 or ILRST 510, 511 or equivalent. M. Wells.
Provides a comprehensive introduction to the general structural equation system, commonly known as the "LISREL model." One purpose of the course is to demonstrate the generality of this model. Rather than treating path analysis, recursive and nonrecursive models, classical econometrics, and confirmatory factor analysis as distinct and unique, we will treat them as special cases of a common model. Another goal of the course is to emphasize the application of these techniques.

[ILRST 615 Export Systems and Probabilistic Network Models]
3 credits. S-U only. Prerequisite: OR&IE 560 or an equivalent course in probability and statistics. Not offered 1997-98.
This is an interdisciplinary course for students in applied mathematics, computer science, statistics, and other related fields of applications such as medical, engineering, and social sciences. Topics include: components of expert systems, rule-based expert systems, probabilistic-based expert systems, uncertainty measures, dependency models, Bayesian and Markov networks, propagation of uncertainties, learning structure from data, and examples of applications. Students will use computer software to gain experience.

[ILRST 611 Sensitivity Analysis in Linear Regression]
Spring 1998. 3 credits. S-U only. Prerequisite: ILRST 312 or equivalent, or permission of instructor. A. Hadi.
A course on regression for students in statistical sciences and related fields. Attempts to narrow the gap between the theory and practical application of the linear regression model. Classical and recently developed statistical procedures are discussed. Students will be expected to read articles and thoroughly analyze real-life data sets using computer-packaged programs. Topics include role of variables in a regression equation, regression diagnostics (outliers, leverage points, influential observations, generalized linear models, errors in variables, and multicollinearity).

[ILRST 799 Directed Studies]
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRST 712 Theory of Sampling
3 credits. Prerequisite: calculus and at least one semester of mathematical statistics. Not offered 1997-98.
Sampling theory from the viewpoint of mathematical statistics. The first part of the course focuses on the classical or "design" approach; the second part on the more recent "model-based" approach. Attention is paid to recent progress in the field.

[ILRST 713 Counting Processes with Statistical Applications]
3 credits. Prerequisite: a course at the technical level of Math 572 and 574 or permission of instructor. Not offered 1997-98.
The statistical analysis of life history data is playing an increasing role in the social, natural, and physical sciences. We will formulate and solve some practical problems in the statistical analysis of life history data using the modern theory of stochastic processes. We will examine the martingale dynamics for point processes relevant to life history data. Both non-parametric and parametric inference for multiplicative intensity models will be considered. The large sample properties of the proposed procedures will be discussed in detail using recent extensions of functional central limit theorems for martingales.

[ILRST 714 Topics in Modern Statistical Distribution Theory]
Spring 1998. 3 credits. Prerequisite: Courses equivalent to OR&IE 651 or Math 571, and STATS 409 or OR&IE 670. J. Bunge.
Recent research has revealed vast territories of distribution theory that are unfamiliar to most statisticians. Provides an introduction to three topics underlying this "modern" theory: infinite divisibility, decomposability, and stability; characterization of distributions; extensions of univariate distributions to multivariate distributions.

[ILRST 715 Likelihood Inference]
3 credits. Prerequisite: graduate courses equivalent to OR&IE 670 and OR&IE 670. Not offered 1997-98.
In most statistical models, exact distribution theory for testing hypotheses or constructing confidence intervals is either unavailable or computationally cumbersome. Inferences are routinely performed by using large-sample approximations to the distributions of test statistics. This course provides a survey of some recent higher-order asymptotic approximations for likelihood-based methods of inference.

[ILRST 716 Statistical Consulting]
A course in practical consulting on "real-world" statistical problems. Under the supervision of the instructor(s), students will hear problems presented by clients (usually faculty and graduate students from other fields) and will collaborate in proposing a statistical model, analyzing data, and interpreting results. Statistical computing will be used as needed.

ILRST 204 Managing Conflict
Fall or spring. 3 credits.
The purpose of this course is to provide students with opportunities to apply conflict resolution theory to specific situations, based on real-life problems that require resolution. Students will examine situations, analyze the facts and perceptions driving the actors, and engage in applying communication, negotiation, and mediation techniques to reduce or eliminate the conflict.

ILRST 205 Oral Skills for Conflict Management
Fall or spring. 3 credits.
This course emphasizes developing the oral communications skills required to successfully manage conflict both as a party to a dispute, and as a third party who is charged with helping to resolve a dispute. The course presents simulations as required to help the participants practice their skills.

ILRST 206 The Nature of Conflict
Fall or spring. 3 credits.
The purpose of the course is to provide students with the conceptual foundation to engage in further study of conflict management and conflict resolution. Having taken the course the students will 1) be able to identify and describe types of conflict; 2) be able to identify the various sources of conflict; 3) be able to apply a conceptual model of conflict to interpersonal, organizational, and international conflict situations; 4) be able to describe conflict situations in terms of social psychological aspects utilizing a "Person Perception" or "Attribution" theoretical orientation; 5) be able to identify their personal response styles to conflict.

ILRST 208 Workplace Negotiations
Fall or spring. 3 credits.
Will cover the theory and practice of negotiation as it applies to workplace and business situations. Students will be exposed to theoretical models of negotiation and will participate in negotiation exercises. Students will be participating in two negotiation exercises and will be asked to write a paper based on their negotiation. More weight will be given in grading to the student's ability to present a well-thought-out rationale for positions and tactics than to the outcome of the negotiation itself.
241 Arbitration 3 credits.
A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the law of arbitration, the handling of matters in briefs or oral presentation, the conduct of an arbitration hearing, and the preparation of an arbitration opinion.

242 Public Sector Collective Bargaining 3 credits.
This course is designed as an introduction to collective bargaining in the public sector. The course examines the historical development of bargaining in public employment, the evolution of state and federal and bargaining theory and practices, as well as impasse resolution techniques frequently found in this sector. Special emphasis will be given to developing an understanding of the similarities and differences between public and private sector bargaining and how they have affected tactics and strategies employed by the parties.

243 Growth of American Business and Management History 3 credits.
The growth and cycles of American business enterprise produced significant changes in education, government, work, the family, the economic composition of the population, and the landscape. As business and industry expanded, new methods evolved for managing these enterprises. This course will examine the development of managerial practices, the relationship of management to the work force, and the social ramifications of capitalist expansion.

245 Public Sector Labor Law 3 credits.
A survey and analysis of the New York State Public Employees Fair Employment Act is made as well as a comparison with other state laws covering public employees. The course will examine the extent to which the law protects and regulates concerted actions by employees in the public sector. The intent is to study and understand the law as written, but more importantly how it has been interpreted by the courts of New York State in its application. Major emphasis will be on employee and employer rights, including recognition and certification, improper practices, strikes, grievances, and disciplinary procedures of the New York State Public Employment Relations Board.

247 Labor and the American Economy 3 credits.
Will help the student understand how economic theories relate to the economic problems confronting the American citizen in general and the American union member in particular. Emphasis will be placed on contemporary economic theories and how their proponents attempt to solve American economic problems.

248 Employment Practices Law 3 credits.
Considers laws and regulations that impact directly on managers and employers. Students will examine a wide variety of laws such as Equal Employment Opportunity, Employee Retirement Income Security Act, Federal Wage and Hour Laws, Occupational Safety and Health Act, unemployment laws and other topics. Students will focus on the practical application of laws and their impact on the workplace.

250 New York Workers’ Compensation Law for Trade Unionists and Injured Workers 3 credits.
Fall or spring. There is a collective perception that the Worker’s Compensation system in New York compounds an injured personal predicament with Byzantine responses that lead to despair. Unions and injured workers’ organizations believe that, if properly empowered, they can be just as effective as lawyers in looking after their injured colleagues’ claims. This course is structured to meet both of these realities. We will delve into every nook and cranny of New York Worker’s Compensation Law. The course will be entirely practical. Skills teaching, i.e., explaining how to present a case, decomm, ethics, and persuasiveness, are built into the course. Experts on how the system really works will also be used.

251 Principles and Practices of Management 3 credits.
Fall or spring. Presents the theory and processes of management with an emphasis on supervision. Managerial functions of planning, organizing, staffing, and evaluating are included. Concepts and theories are presented, and case studies are analyzed. Motivating people, exercising leadership, and effectively developing employees are emphasized.

252 Contract Bargaining 3 credits.
Fall or spring. Examines the principles of contract bargaining, including bargaining environments and structures as well as standards used in bargaining. Students will learn to prepare bargaining demands, cost economic items, draft noneconomic contract language, negotiate economic and noneconomic issues, and resolve a contract bargaining impasse. The course will consider the impact of contract bargaining outcomes on workers, unions, employers, and the public.

253 Contract Administration 3 credits.
Fall or spring. Focuses on the role of the steward in administering the union contract in the workplace. Students will evaluate grievance and arbitration contract clauses, the grievance procedure in practice, the role of the union steward, the role of local and international unions, negotiation of grievances, and preparation for arbitration. Students will analyze the impact of grievance and arbitration procedures on workers, unions, and employers.

255 Labor History 3 credits.
Fall or spring. Reviews American labor history from the perspective of workers’ social dimensions of the development of the working class, reform and revolutionary movements, and the emergence of craft, unionizing, and public employee unions. Included will be a discussion of the development of trade union institutions and leaders and the evolution of union political activities and collective bargaining. Special emphasis will be paid to the involvement of women and minority workers with unions.

256 Dispute Resolution 3 credits.
Fall or spring. Examines third-party participation in dispute resolution in private and public sector collective bargaining. Development of dispute resolution methods in American labor relations; issues and practices in neutral, binding arbitration of grievances and mediation; conciliation; and fact finding procedures will be discussed. We will also look at exclusive labor management mechanisms to settle industry disputes.

257 Human Resource Administration 3 credits.
Fall or spring. Designed to provide an overview of personnel practices in the modern organization. It will focus on manpower planning, employment, training and development, motivation and compensation, and performance appraisal and communication for students who are currently supervisors or personnel practitioners or for those aspiring to those positions.

258 Organizational Behavior 3 credits.
Fall or spring. Designed to illustrate how behavioral science theory leads to research and how theory and research provide a basis for practical application in business, industry, education, and government.

259 Union Administration 3 credits.
Fall or spring. Focus is on the principles and practices of effective union administration. Students will study the dynamics of democratic organizations and the development of effective union leadership. The course explores alternative methods of decision making and lines of responsibility. The legal obligations of unions and union officials will be discussed and analyzed. The course also examines the structure and evolution of relationships inside the labor movement.

262 Project Management 3 credits.
Fall or spring. Through the process of restructuring, many companies are "flattening out" the hierarchy of management levels. This means that more responsibilities are shifting downward to employees who may not have the status (authority) of supervisor or manager, but who have the enormous responsibility of completing complex, critical projects within well-defined business constraints. In response to the shift in responsibility downward and with much more to be accomplished with limited resources, the demands for employees with effective project management skills are increasing. Employers who can successfully manage projects are and will continue to be the most marketable individuals in the work force because their skills are transferable to all disciplines, organizations, and situations.
264 Contemporary Labor Problems
Fall or spring. 3 credits.
A survey of the major challenges that confront the American labor movement. Students are briefed on the background of each problem and discuss and analyze a broad range of solutions proposed by the experts.

266 Professional Writing: The Power of the Written Word in Business
3 credits.
Focuses on the importance of developing effective writing skills and strategies required to be successful in business communities. Students will sharpen their writing skills, correct bad writing habits, and develop new writing habits through "real life" exercises taken from case studies and their own experiences. In addition, they will learn the importance of using rhetorical strategies such as prewriting, outlining, drafting, revising, and editing. They will learn the importance of techniques for responding, writing to a specific audience, attending to a specific purpose, choosing the appropriate language, and varying tone and style as the situation demands. Students, upon completing this course, will have the confidence and the writing skills to successfully address most situations requiring written communication. Genres include memos, proposal letters, and reports.

267 Speaking and Listening for Business and the Professions
3 credits.
The overall objective is to equip participants with the skills and knowledge they need to speak and listen effectively. By the end of the course, students will be able to accurately listen to, and interpret, oral communication; identify major causes of misunderstanding such as biases, distractions, emotions, etc.; and employ techniques for overcoming those listening barriers; speak effectively in front of an audience; describe ways to build rapport with an audience; persuade an audience; use visual aids effectively; introduce speakers, make presentations, and speak extemporaneously.

269 The Evolution of Work in America
Fall or spring. 3 credits.
Explores the evolution of contemporary business operations. Discussion will focus on historical and current theories of work organization, changes in the workplace and workforce, and future trends. The relationships between businesses and the societies in which they exist, both local and national economies, will also be examined.

343 Health in the Workplace
Fall or spring. 3 credits.
Examines the state and federal laws that affect job safety, and health, and the way workers and their unions can use legislation to promote safe and healthy working conditions. Topics include safety and health standards, the enforcement of laws and standards, the responsibilities of management; the rights of employees and their unions, including the rights to information; collective bargaining for safety and health; racial- and gender-based discrimination regarding hazardous work, and drug testing.

344 Union Strategies for Safety and Health
Fall or spring. 3 credits.
Even with OSHA, the most effective tool for change in the unionized work environment remains the collective bargaining process and collective action. This course explores specific strategies for making the workplace safer through collective bargaining, workers education, safety and health committees, joint labor-management committees, worker COSH groups, union-sponsored medical exams at occupational health clinics, and the OSHA complaint process. Case studies will consider integration of occupational health initiatives into broader union strategies such as organizing drives and industrial development planning.

345 Health Hazards Identification and Evaluation in the Workplace
Fall or spring. 3 credits.
This course builds on the knowledge acquired in both the safety hazard and health hazard courses to provide students with greater mastery of hazard evaluation and control methods. Students are encouraged to complete the health hazard and safety hazard courses before taking industrial hygiene. It will provide practical, hands-on training in evaluating potential workplace hazards. Students will learn about environmental monitoring methods such as air sampling and become familiar with the commonly used equipment. They will also learn to interpret and evaluate monitoring data provided by professional testers.

347 Safety Hazards Identification and Evaluation in the Workplace
Fall or spring. 3 credits.
Safety hazards (as opposed to health hazards) generally involve harm of an immediate and sometimes violent nature: health effects include burns, electrical shock, broken bones, and the loss of limb or sight, or hearing. With chemicals, the primary concern is their explosive, reactive, or flammable nature rather than with the toxic effects that are the focus of health hazard evaluation. Students will become familiar with site inspection and hazard identification methods and will learn about control techniques appropriate for a variety of work settings.

364 Labor, Government, and Politics
3 credits.
A survey of the ways the American political system affects labor and how organized labor affects the system through voting, political parties, and interest groups.

367 Safety and Health in the Workplace
Fall or spring. 3 credits.
To provide basic education and training in workplace safety and health. The course will focus on applicable federal and state laws, standards for safety and health, industrial hygiene, and such health concerns as asbestos, radon, and AIDS. Practical experience will be provided through workplace walk-through safety and health inspections and in use of industrial hygiene equipment that measure noise, temperature, humidity, airflow, and airborne toxics.

FACULTY ROSTER

Abowd, John M., Ph.D., U. of Chicago. Prof., Labor Economics
Bacharach, Samuel, Ph.D., U. of Wisconsin. Prof., Organizational Behavior
Bishop, John H., Ph.D., U. of Michigan. Assoc. Prof., Human Resource Studies
Blau, Francine D., Ph.D., U. of Wisconsin. Francis Perkins Prof. of Industrial and Labor Relations, Labor Economics
Boudreau, John W., Ph.D., Purdue U. Assoc. Prof., Human Resource Studies
Boyer, George R., Ph.D., U. of Wisconsin. Assoc. Prof., Labor Economics
Briggs, Vernon M., Jr., Ph.D., Michigan State U. Prof., Human Resource Studies
Bunge, John A., Ph.D., Ohio State U. Assoc. Prof., Social Statistics
Cook, Maria L., Ph.D., Univ. of Calif., Berkeley. Asst. Prof., Collective Bargaining, Labor Law, and Labor History
DiGiacomo, Thomas J., Ph.D., U. of Waterloo. Assoc. Prof., Social Statistics

LAW SCHOOL

ADMINISTRATION
Russell K. Osgood, dean of the law faculty and professor of law
John A. Siliciano, associate dean for academic affairs and professor of law
Claire M. Germain, law librarian and professor of law
Anne Lukingbeal, associate dean and dean of students
Gary J. Simson, associate dean for academic development and professor of law
Charles D. Gramton, assistant dean for alumni and international affairs
Richard D. Geiger, associate dean and dean of admissions
Harry B. Ash, assistant dean for development and public affairs
Richard F. Robinson, assistant dean for administration and finance
Albert C. Neimeth, associate dean of alumni affairs emeritus
Nan A. Colvin, registrar

LAW SCHOOL

The primary function of the Law School is to prepare attorneys for both public and private practice who will render the highest quality of ethical and professional service to their clients and who will further legal progress and reform. The curriculum is designed to prepare students for admission to the bar in all American states and territories.

Ordinarily, a student who is admitted to the Law School must have a baccalaureate degree from an approved college or university. The course of study leading to the degree of Doctor of Law (J.D.) covers three academic years. Students may be admitted to a program of study leading to the degree of Doctor of Law "with specialization in international legal affairs." The Law School also offers to a limited number of students an opportunity to earn both a J.D. degree and an LL.M. degree in international and comparative law.

There are combined graduate degree programs with the Johnson Graduate School of Management, the Department of City and Regional Planning of the College of Architecture, Art, and Planning, the School of Industrial and Labor Relations, the graduate divisions in economics, history, and philosophy of the College of Arts and Sciences, and the Université de Paris I (Panthéon-Sorbonne), as well as a special opportunity for highly qualified undergraduates in the College of Arts and Sciences to register in the Law School during their senior year.

Each year the graduate program of the Cornell Law School admits a limited number of students, generally all from abroad. The LL.M. degree (Master of Laws, Legum Magister) and the J.S.D. degree (Doctor of the Science of Law, Jurisprudentiae Scientiae Doctor) are conferred. A small number of law graduates may also be admitted as special students, to pursue advanced legal studies without seeking a degree.

For further information, refer to the Law School catalog, which may be obtained from the Office of the Registrar, Myron Taylor Hall.

FIRST-YEAR COURSES

LAW 500 Civil Procedure
Fall and spring. 6 credits. K. M. Clermont, B. J. Holden-Smith, R. B. Kent, J. J. Rachlinski
An introduction to civil litigation, from commencement of an action through disposition on appeal, studied in the context of the federal procedural system. Also, a detailed consideration of federalism and ascertainment of applicable law, jurisdiction, process, and venue, and former adjudication.

LAW 502 Constitutional Law
Fall. 4 credits. K. Abrams, S. L. Johnson, S. H. Shiffrin, G. J. Simson
A study of basic American constitutional law, including judicial review, some structural aspects of the Constitution as developed particularly in light of the passage of the Civil War amendments, and certain of its rights provisions.

LAW 504 Contracts
Fall and spring. 5 credits. J. Braucher, R. S. Summers
An introduction to the nature, functions, and processes of exchange; contract, and contract law. The course focuses on the predominant rules and principles governing contract and related obligation, including the substantive reasons underlying the rules and principles.

LAW 506 Criminal Law
Spring. 3 credits. S. D. Clymer, J. A. Siliciano
An introductory study of the criminal law, including theories of punishment, analysis of the elements of criminal liability and available defenses, and consideration of specific crimes as defined by statute and the common law.

LAW 507 Legal Process
Spring. 3 credits. S. P. Garvey, R. K. Osgood
An introduction to the theoretical aspects of the practical questions of what constitutes law, how it is to be interpreted once it is ascertained, what moral and political principles or visions it presupposes, and how its aspirations and purposes on the one hand relate to its formal dimension or literal shape on the other.

LAW 508 Practice Training I
Fall. 1 credit. P. G. Court, S. E. Childs, J. M. Wenger
An introduction to legal research, focusing on strategies and information sources. Uses a variety of electronic (Internet, Lexis, Westlaw, CD-ROM) and print (books, microforms) formats. Provides practical experience in finding court decisions, statutes, and administrative materials and in evaluating information authorities.

LAW 509 Practice Training II
Spring. 2 credits.
The preparation of materials of law practice, including the drafting of opinion letters, memoranda of law, and a brief. The functions and techniques of oral and written argument.

LAW 512 Property
Spring. 4 credits. P. W. Martin, E. L. Sherwin
An investigation of the law's protection of ownership, including the beginnings of property, legal and equitable estates, concurrent ownership, and public and private regulation of land use.

LAW 515 Torts
Fall. 4 credits. J. J. Barceló III, G. A. Hay, J. A. Henderson, J. A. Siliciano
An introduction to the principles of civil liability in the tort field: intentional wrongs, negligence, and strict liability. Attention is also given to the processes by which tort disputes are handled in our legal system.

UPPERCLASS COURSES

LAW 602 Administrative Law
Fall or spring. 3 credits. Limited enrollment. C. R. Farmá, J. J. Rachlinski
The powers, methods, roles, and procedures of public officials and bureaucracies. The lawmaking, law-application, and law-enforcement processes of independent regulatory and executive agencies; their place in constitutional government; and their control by judicial and other means.

LAW 604 Advanced Civil Procedure
Fall. 3 credits. R. B. Kent
A study of complex civil litigation involving multiple parties and multiple claims. Topics include joinder of parties and claims, impleader, interpleader, class actions, and intervention. There will be consideration of case management, the Civil Justice Reform Act of 1990, multidistrict transfers in the federal courts, and the use of alternative procedures for disposition of cases.

LAW 605 American Indian Law
Spring. 2 credits. Recommended Prerequisite: Administrative Law and Public International Law. J. Tahsuda
An examination of the primary themes and materials of the federal law concerning Native
American tribes and individuals. The course devotes considerable attention to the historical development of law and policy in that area and to the present division of authority over Indian country among federal, state, and tribal governments.

**LAW 609 Antitrust Law**

Spring. 3 credits. G. A. Hay.

A consideration of the basic antitrust rules enacted by Congress and amplified by the courts to protect competitive markets and limit the exercise of monopoly power. Price fixing, boycotts, and other restraint of trade; exclusionary agreements among competitors; agreements between suppliers and customers; joint ventures; attempts to monopolize and monopolization; price discrimination; and mergers.

**LAW 610 Banking Law and Regulation**

Fall. 3 credits. J. R. Macey.

The course begins by defining the roles that banks and other financial intermediaries play in the economy. It considers the claim that a specialized set of regulations governing the activities of financial intermediaries is justified by the special role banks occupy in society. In that context a variety of theoretical arguments about banking regulation are considered. The course then examines each of the major laws that govern banking activities against the background of the various regulatory theories discussed. Topics to be addressed include entry restrictions, growth and expansion of bank activities, regulation of the business of banking, expansion through the bank holding-company structure, branch banking, interstate banking, and regulation of failing or failed banks.

**LAW 613 Bankruptcy**

Spring. 3 credits. J. J. Hanks, Jr.

This course examines the principal business, legal, and accounting issues in the purchase and sale of privately and publicly held businesses. Emphasis is placed on the negotiation, structuring, financing, and documentation of the most common type of combining transaction—the acquisition of assets of a privately held company. Among the legal issues considered are the business and other reasons for selling or buying a business, the forms of business combinations, directors' duties, successor liability, securities regulation, tax, and antitrust. Additional issues surrounding acquisitions of publicly held companies (including hostile takeovers) are studied particularly for comparison. The responsibilities of transactional lawyers to persons other than their clients are also assayed.

**LAW 615 Civil Rights Legislation**

Fall. 3 credits. T. Eisenberg.

Explores in depth the history and current status of federal civil rights legislation. The course focuses on 42 U.S.C. §1983, the major statutory vehicle for vindication of constitutional rights in civil cases, and on Title VII of the Civil Rights Act of 1964, the principal federal statute covering employment discrimination.

**LAW 616 Comparative Law**

Fall. 3 credits. Prerequisite: basic common law.

The course tackles first the sources, structures, and assumptions common to the legal systems of continental Europe, Latin America, and some countries of the Far East, and then examines the enduring divisions of their private law. Particular examples are then studied: they may be grouped under a topic (e.g., the liability of the post office or the problem of the injured rescuer) or by country (e.g., English contract law, and Roman and German tort law). The course aims to demonstrate the utility of the comparative method by encouraging students to rethink their own law in the light of other approaches. This enables students to see how problems may sometimes be perceived in different legal systems and how they may be embedded in a given system, and thus to gain a better understanding of the reasons for the rules.

**LAW 619 Conflict of Laws**

Spring. 2 credits. G. J. Simson.

A study of the methods used by courts to decide the applicable law in cases that, in their parties or events, involve more than one state or country. Attention to the due-process limitations on jurisdiction, an American state's obligation under the fullfaith-and-credit clause to respect sister-state judgments, and conflicts between federal and state law.

**LAW 620 Constitutional Law II: The First Amendment**

Spring. 3 credits. S. H. Shiffrin.

A comprehensive discussion of freedom of speech, press, and association. The free-exercise-of-religion clause and the establishment clause of the First Amendment are treated less extensively.

**LAW 621 Contemporary Challenges to Traditional Jurisprudence**

Fall. 2 credits. F. E. Olsen.

Modern schools of American legal theory, such as critical legal studies, feminist legal theory, law and economics, legal positivism, critical race theory, post-modern law, and "gender-bending theory," emerged from a longer tradition of jurisprudential controversy in American and European legal thought. This course examines legal theory to situate recent developments in a broader context and consider where legal theory may go in the future. The course will look at both the philosophical roots of the jurisprudential traditions as well as emphasize the institutional practive legal theories produce. The class will meet for the first six weeks of the semester, and the final exam will take the form of a paper that may be written during the remainder of the semester. Students are encouraged to choose a paper topic of particular interest to them and to submit multiple drafts for feedback.

**LAW 622 Copyright and Digital Works**

Fall and spring. 3 credits. Prerequisite: a prior course covering the basic elements of copyright law. Year-long offering. Limited enrollment. P. W. Martin.

The application of copyright law's basic elements or concepts—coverage, protected rights, infringement and fair use—along with associated remedies and the legal issues encoded in digital form. The course will explore the major copyright issues posed by such categories of digital works as software, databases containing factual and other public-domain content, multimedia materials, computer-generated or assisted works, and audio recordings containing digital sampling. In addition the course will review the recent White Paper on Intellectual Property and the National Information Infrastructure and subsequent legislative proposals as a means of focusing on the Internet's implications for both domestic and international copyright regimes.

**LAW 624 Corporate Finance**

Fall. 3 credits. Prerequisite: Corporations. Limited enrollment. F. S. McChesney.

Course surveys various topics in corporate finance and their role in modern corporate law. Topics include valuation, individual capitalization vehicles (bonds, preferred and common stock), overall capital structure, and dividend policies, plus selected topics in mergers and acquisitions (e.g., appraisal rights). No previous study of finance required or expected.

**LAW 625 Corporations**

Fall or spring. 4 credits. Limited enrollment. J. R. Macey, F. S. McChesney.

An introduction to modern American business corporation law. Topics include corporate organization and defective incorporation, the corporation as a legal entity, corporate control and management, state and federal rules governing the solicitation of proxies, fiduciary duties of directors and controlling shareholders under state law, and antitrust and insider-trading provision under the federal securities laws.

**LAW 627 Criminal Procedure**

Fall. 3 credits. S. D. Clymer.

This course surveys the law of criminal procedure, with emphasis on the constitutional constraints that regulate the pretrial stage of the criminal process. More specifically, the course focuses on the law of search and seizure, interrogations and confessions, pretrial identification, and on the right to counsel during the pretrial stage.

**[LAW Current Topics at the Crossroads of Law and Finance [also MBA 551]]**

Financial institutions of all kinds, whether they are formally known as insurance companies, banks, investment banks, mutual funds, or pension funds, invest money on behalf of clients in a wide variety of investment vehicles. This course will look at the way that these financial institutions are treated both in a legal and an economic perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis. Topics to be covered include insurance, bank regulation and reform, securities markets, investment banking, and pensions.
LAW 628 Death Penalty In America: A Survey
Spring. 1 credit. J. H. Blume.
The course will survey the law relating to the administration of the death penalty.

LAW 630 Directed Reading
Fall or spring. 1 or 2 credits. A two-hour directed reading may also fulfill the second writing requirement. Arrange directly with instructor. See Law School Catalog.

LAW 633 Employment Law
Spring. 3 credits. S. J. Schwab.
Survey of major laws and programs affecting the employee-employer relationship other than laws regulating unions (covered in Labor Law). One major area covered is the common law relating to privacy, drug testing, and unjust dismissal in the workplace. That area is contrasted with major statutory programs such as worker's compensation, unemployment insurance, OSHA, and ERISA. Antidiscrimination legislation will also be covered.

LAW 634 Estate and Gift Taxation
Spring. 3 credits. Prerequisite: Federal Income Taxation. L. Kahng.
This course surveys the three federal taxes imposed on wealth transfers: the estate tax, the gift tax, and the generation-skipping tax. The course uses a problem-oriented approach, with emphasis on the Internal Revenue Code, regulations, and other tax materials.

LAW 637 European Union Law
Fall. 2 credits. P. Manin.
The course will study the EU treaty, institutions, and lawmaking processes; the direct effect, supremacy, and reception of EU law in the member states, the different actions before the Court of Justice and the Tribunal.

LAW 640 Evidence
Fall or spring. 3 credits. S. D. Olyner, D. A. Nance.
The rules of evidence in civil and criminal cases with emphasis on relevance, authentication, witnesses, experts, and hearsay. The course will focus on the Federal Rules of Evidence, with some attention to how they diverge from the common law.

LAW 641 Family Law
Spring. 3 credits.
An examination of the ways in which law seeks to intervene in the family as an institution. Besides examining the usual matters surrounding the legal formation and dissolution of families, the course emphasizes issues relating to children and pressures for new legal definitions of the family arising from social changes.

LAW 643 Federal Income Taxation
Fall or spring. 4 credits. Limited enrollment. L. Kahng, M. A. Livingston.
A basic course designed to develop understanding of tax concepts and ability to work effectively with the Internal Revenue Code, regulations, cases, and other tax materials.

LAW 645 Feminism and Gender Discrimination
Spring. 3 credits. K. Abrams.
The course provides an introduction to feminist theory as it has emerged in legal scholarship and the social sciences. Several feminist legal theories are then used as a framework for analyzing a series of legal problems implicating gender. Among the problems discussed are sexual harassment, work-family conflict, divorce and child custody, surrogacy, abortion, rape, spousal abuse, and pornography.

LAW 661 Intellectual Property
Fall. 3 credits. P. W. Martin.
An introduction to the domestic and international context of intellectual property law with a review of state and federal law relating to intellectual property, principally copyright, patent, and trademark law. Intellectual property issues raised by new information technologies are emphasized throughout the course.

LAW 662 International Business Transactions
Spring. 3 credits. J. J. Barcelo III.
An examination of the unique legal features of business transactions across national boundaries. Topics include trade in goods and services, technology licensing, and private commercial law in an international setting; international dispute settlement (litigation and arbitration); government regulation of imports and exports (trade policy); international
antitrust; international agreements for the control and harmonization of national regulatory policy; and foreign investment.

**LAW 653 International Commercial Arbitration**
Spring. 2 credits. J. J. Barceló III.
A study of arbitration as a dispute resolution process for international trade and business disputes. The course analyzes ad hoc and institutional arbitration, the authority of arbitral panels, enforcement of agreements to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, and enforcement of international arbitral awards. The course will give special attention to the international convention on the recognition and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. It will focus on commercial arbitration as an international phenomenon and not on arbitration under any particular national system.

**LAW 655 International Human Rights**
Spring. 3 credits. D. Wippman.
This course explores the development and effectiveness of international legal rules governing the conduct of a state toward people within its jurisdiction. Topics include the substantive norms of human rights, and their philosophic basis; the mechanisms for the protection of human rights, such as the United Nations and specialized agencies, international human rights commissions, and domestic courts; and current issues such as the doctrine of humanitarian intervention, the status of indigenous peoples, and human rights during armed conflicts, illustrated where possible through case studies of current situations.

**LAW 656 International Protection of Intellectual Property**
Spring. 2 credits. Recommended prerequisite: Intellectual Property.
J. Strauss.
This course studies intellectual property rights in the international legal system. A general introduction reviews the international protection of patents, trademarks, industrial design, and copyright. The starting and focal point is the Agreement on Trade Related Aspects of Intellectual Property (TRIPS) adopted in the framework of the World Trade Organization (WTO). The international protection of intellectual property is studied through consideration of the TRIPS agreement and the several international conventions and the observation of which is made mandatory for WTO Members by TRIPS. Also examined are issues of international court jurisdiction and applicable law in the area of intellectual property.

**LAW 659 Japanese Business Law**
Fall. 2 credits. H. Oda.
This course deals with the legal aspects of investment and trade in Japan. After a general introduction to the Japanese legal system (sources of law, administration of justice, and the legal profession including foreign attorneys), basic rules of corporate law are considered. This is followed by subjects such as contracts, restrictions on unfair trade practices, mergers and acquisitions, product liability, and intellectual property. Recent reform of the foreign investment code to the securities and exchange law are also covered. Finally, problems of international commercial litigation involving Japanese companies are addressed.

**LAW 660 Labor Law**
Fall. 3 credits. K. V. W. Stone.
A study of collective bargaining, including the process of union formation, legal regulation of strikes and other economic weapons, negotiation and enforcement of collective agreements, the duty of fair representation, the application of antitrust law to union activity, and the relationship between federal labor law and local law regulating the employment contract.

**LAW 661 Land-Use Planning**
A study of the legal matrix as a method of controlling the environment in which people live and work, including public nuisance as a device to control the town environment; zoning as a control mechanism; conflict between zoning as a plan for growth and as a brake on development; subdivision controls; planning as a respectable government activity; the dynamics of planning, zoning, subdivision controls, and use and use controls; the rehabilitation of-center-city syndrome; and future prospects of maintaining a decent environment in a multicultural society.

**LAW 662 Legal Aspects of Foreign Investment in Developing Countries**
This course will study legal aspects of foreign investments in developing countries. In addition to identifying the legal issues involved, it will discuss possible approaches to the solution of the problems. The course will include a discussion of the following topics: economic development and foreign capital; obstacles to investment; guarantees to investors and investment codes; nationalization; joint ventures; transfer of technology; international protection of foreign investment; processing and adjudication of trade law and settlement of disputes.

**LAW 663 Legislation**
Spring. 3 credits. L. I. Palmer.
This course explores various theories of legislation by studying how statutes become a source of public policy, how judges interpret them, and how lawyers draft them. Drafting exercises are used throughout the course to determine to what degree legislation can be used to reform law or to remedy particular social problems.

**LAW 664 Law and Medicine**
Fall. 3 credits. L. I. Palmer.
This course considers issues related to medical care and biomedical science. Topics include constraints on access to health care, organization and financing of health services, promoting quality of care in hospitals and outpatient sites, fraud and abuse in clinical practice and biomedical research, dilemmas engendered by therapeutic applications of new technologies, and pathways to reform of the U.S. health care system. Teaching materials will include a law and medicine casebook, and scientific literature.

**LAW 665 Law and Social Change**
Fall. 2 credits. G. Skupaska.
The course critically examines the law as an instrument of social change with reference to privatization and democratization processes taking place in central and Eastern Europe, and the growing cultural pluralism in Western, multicultural societies. Then the course will explore the more complex, mutual relations between law and social processes. The course is designed to give students an understanding of law as a social phenomenon, and to elucidate the connections of legal studies with sociology, anthropology, and political science.

**LAW 666 Law and Violence against Women**
Fall. 3 credits. Limited enrollment. B. Balos, M. L. Fellows.
This course will cover battering, sexual harassment, rape, prostitution, and pornography. The readings are interdisciplinary and are designed to provide students a framework for analyzing traditional legal reasoning. They are also designed to encourage students to consider how abilism, economic exploitation, heterosexism, racism, and sexism contribute to violence against women.

**LAW 668 Lawyers and Clients**
Fall. 3 credits. Satisfies the professional responsibility requirement. S. P. Koniak.
The usual vantage point of the law student and the lawyer is one outside the system of law. Law is something we study, shape, use, attack, or act upon in one way or another. That vantage point is, however, a creation of law itself and thus an illusion. This course examines the boundaries of that illusion. It examines the content of the law that governs lawyers. Agency law, criminal law, tort law, civil procedure, and the codes of ethics. It examines the roles that law creates for lawyers and the morality of those roles.

**LAW 669 Legal Aspects of Foreign Investment in Developing Countries**
Spring. 3 credits. M. B. Ndulo.
This course will study legal aspects of foreign investments in developing countries. In addition to identifying the legal issues involved, it will discuss possible approaches to the solution of the problems. The course will include a discussion of the following topics: economic development and foreign capital; obstacles to investment; guarantees to investors and investment codes; nationalization; joint ventures; transfer of technology; international protection of foreign investment; processing and adjudication of trade law and settlement of disputes.

**LAW 670 Legislation**
Spring. 3 credits. L. I. Palmer.
This course explores various theories of legislation by studying how statutes become a source of public policy, how judges interpret them, and how lawyers draft them. Drafting exercises are used throughout the course to determine to what degree legislation can be used to reform law or to remedy particular social problems.

**LAW 673 Negotiation**
Fall. 2 credits. Limited enrollment. M. D. Pinnisi.
This course is intended to develop methods and skills required for negotiation practice. Approaches to negotiation strategy formation, preparation, and conduct will be explored through discussion of selected readings and through class exercises. Students will engage in two or more mock negotiations in situations that typically involve lawyers.
and effectiveness of international law, the establishment and recognition of states, principles concerning state sovereignty, territory, and jurisdiction, the law of treaties, state responsibility, international environmental law, and human rights. Special attention will be given to the law governing the use of force.

**LAW 681 Roman Law and Modern Civil Law Systems**

Spring. 2 credits. A. Hausmaninger. Roman law has been the most influential legal system in Western legal history. The course will focus on selected areas of Roman law, including contract, tort, and property law. No prior knowledge of Latin is required. Limited enrollment. K. V. W. Stone.

**LAW 682 Secured Transactions**

Fall. 2 credits. J. Braucher. The course explores the use of security in commercial and consumer transactions. Specific subjects include creditor remedies, default, acceleration and cure, the creation and perfection of security interests, and defenses to security claims. The objective is to see secured credit as a system for lending and recovering money. Limited enrollment. R. W. Painter.

**LAW 683 Securities Regulation**

Fall. 3 credits. R. W. Painter. This course examines the federal system of regulation of the offering, sale and distribution of securities, including the Securities Act of 1933 and the Securities Exchange Act of 1934. Emphasis is placed on the structure, regulation, and consummation of securities transactions as part of the capital-raising process. The responsibilities of securities professionals are also reviewed. Limited enrollment. M. A. Livingston.

**LAW 684 Sports Law**

**LAW 685 Statistics and the Law**

Fall. 3 credits. Not available to students with prior training in inferential statistics without permission of instructor. Limited enrollment. P. S. McChesney. An introduction to statistical methods most commonly used in the law today, which assumes no prior knowledge of statistics. The course builds sequentially from elementary notions of probability and distributions to sophisticated topics in inferential statistics, including hypothesis testing and multiple regression analysis. Use of statistics in particular cases (e.g., employment discrimination) is studied, but the emphasis is on general technique. No final exam; grades are awarded on the basis of five take-home exercises distributed during the semester and a final statistical project of the student's choosing.

**LAW 686 Supervised Teaching**

Fall or spring. 1 or 2 credits. Arrange directly with instructor. See Law School Catalog.

**LAW 687 Supervised Writing**

Fall or spring. 1, 2, or 3 credits. A two- or three-credit supervised writing program may also fulfill the second writing requirement. Arrange directly with instructor. See Law School Catalog.

**LAW 688 Taxation and Business Planning**

This course examines the federal income taxation of corporations, partnerships, and limited liability companies in the context of specific business planning problems. The emphasis is on the practical significance of different tax regimes for choice of entity and design of business transactions. The course includes a significant writing component, one or more of which projects may be completed on a group basis.

**LAW 692 Trial Advocacy**

Spring. 3 credits. Prerequisite: Evidence. Limited enrollment. G. G. Galbreath. This course is devoted to the study of the trial. Fundamental skills in the design of alternative dispute mechanisms and includes six simulation and problem solving sessions.

**LAW 686 Supervised Teaching**

Fall or spring. 1 or 2 credits. Arrange directly with instructor. See Law School Catalog.

**LAW 687 Supervised Writing**

Fall or spring. 1, 2, or 3 credits. A two- or three-credit supervised writing program may also fulfill the second writing requirement. Arrange directly with instructor. See Law School Catalog.

**LAW 688 Taxation and Business Planning**

This course examines the federal income taxation of corporations, partnerships, and limited liability companies in the context of specific business planning problems. The emphasis is on the practical significance of different tax regimes for choice of entity and design of business transactions. The course includes a significant writing component, one or more of which projects may be completed on a group basis.

**LAW 692 Trial Advocacy**

Spring. 3 credits. Prerequisite: Evidence. Limited enrollment. G. G. Galbreath. This course is devoted to the study of the trial. Fundamental skills in the design of alternative dispute mechanisms and includes six simulation and problem solving sessions.

**LAW 692 Trial Advocacy**

Spring. 3 credits. Prerequisite: Evidence. Limited enrollment. G. G. Galbreath. This course is devoted to the study of the trial. Fundamental skills in the design of alternative dispute mechanisms and includes six simulation and problem solving sessions.

**LAW 692 Trial Advocacy**

Spring. 3 credits. Prerequisite: Evidence. Limited enrollment. G. G. Galbreath. This course is devoted to the study of the trial. Fundamental skills in the design of alternative dispute mechanisms and includes six simulation and problem solving sessions.

**LAW 692 Trial Advocacy**

Spring. 3 credits. Prerequisite: Evidence. Limited enrollment. G. G. Galbreath. This course is devoted to the study of the trial. Fundamental skills in the design of alternative dispute mechanisms and includes six simulation and problem solving sessions.
All problem courses and seminars satisfy the first or second writing requirement. Limited enrollment.

**LAW 700 Advanced Criminal Procedure Seminar: Post-Conviction Remedies**
Fall. 3 credits. J. H. Blume.
This seminar will explore various post-conviction remedies available to state and federal prisoners, including motions for new trial, state post-conviction proceedings, federal habeas corpus, and other extraordinary writs. A paper will be required.

**LAW 701 African Americans and the Supreme Court**
Spring. 3 credits. B. J. Holden-Smith.
Beginning with its first decisions related to the slavery question, the Supreme Court has at times aided and at other times hindered efforts to afford African Americans full citizenship. This course explores the relationship between blacks and the Supreme Court by examining three of the Court's decisions affecting African Americans and attempting to understand those decisions in their historical contexts. The course begins with a review of the background and meaning of the constitutional provisions promising the status of blacks in the new nation and ends with an intensive look at Brown v. Board of Education.

**LAW 702 American Legal Theory**
Fall. 3 credits. R. S. Summers.
The fall 1997 topic for this seminar is the formality of basic types of legal phenomena such as criteria of valid law (for both publicly and privately made law), statutory rules, accepted methods of statutory interpretation, the principle of stare decisis and common law rules, adjudicative processes, limitations on judicial power to modify rules, and the formal characteristics of the legal system viewed as a whole. American law lacks appropriate formality in many important ways and a heavy price is paid for this. However, legal formality and its distinctive underlying rationales (general legal principles) generally affect the overall content of law and its practice by lawyers in the American as well as other legal systems. Such formality and its rationales have as much or more of a claim to primacy as the omni-competent problem-specific policies that also inform the law's content. In this seminar, there is about equal emphasis on practical skills and theory.

**LAW 704 Biblical Law**
Fall. 3 credits. C. M. Carmichael.
Analysis of law and narrative in the Bible from the perspective of ancient law and legal history. Topics include the nature of the law codes (e.g., hypothetical formulation versus statutory law), legal issues in the narratives (e.g., law of adultery and women's rights), law and morality (e.g., Ten Commandments), law and religion (e.g., inquisitions guaranteed by the law but condemned by religious authority), the transformation of extralegal relations into legal ones (e.g., with the introduction of money), legal interpretation in antiquity (e.g., Semitic law, Jewish law, and Islamic law), and the religious expression of ideas (e.g., the Bible as a book of law and the law as a book of God).

**LAW 705 Children and the Law**
Fall. 3 credits. W. A. Kell.
Strategies for, and problems of, expanding constitutional and statutory protection of children's interests. Pervasive questions include: How do we determine the interest of the child? In what circumstances can we rely on the state to define and advance the child's interests? To what extent do parental rights limit state attempts to "help" the child? Can concepts of due process developed from rights adults enjoy ever suffice to protect the most basic interests of children? The course also covers the rights of children in adoption and custody proceedings, the rights of handicapped children, the rights of abused children, the procedural rights of children charged with delinquency, and the substantive limits on states with minors' liberty. A paper and two critiques are required.

**LAW 706 Class Actions, Mass Torts and Procedural Meltdown**
Fall. 3 credits. S. P. Koniat.
This seminar will examine the problems that plague class action practice today. We will concentrate on various practices in the settlement of mass tort class actions—problems such as collusion between class counsel and the defendant, inadequate notice to class members, extortion by objecting counsel and counsel's duty to check abuse. To study these problems we will examine a number of class actions in detail, including class settlements involving asbestos claims, and consumer fraud claims. We will also examine the proposed tobacco settlements. We will consider various solutions to the problems of class action abuse and whether class action practice as it is developing poses any real danger to our legal or democratic order. A paper is required.

**LAW 710 Constitutional Law and Political Theory**
Spring. 3 credits. S. H. Shiffrin.
The purpose of the seminar is to explore theories of freedom of speech and theories of equality. How are the ideas of freedom, equality, association, and community linked in doctrine, and are they still linked? Neoliberal, liberal, radical, feminist, and Marxist writings are considered.

**LAW 711 Constitutionalism and Social Progress**
Fall. 3 credits. G. Skapska.
The course will explore the idea of constitutionalism as an important factor in the processes of liberalization and democratization with reference to the postwar Germany, the emerging "new democracies" in Central and Eastern Europe, the Russian constitutionalism, and the emerging market economies (China). The principal subjects of the discussion are the division of powers, civic and human rights, and constitutional jurisdiction. The course tackles also the problem of civic, constitutional culture.

**LAW 714 Corruption Control**
Spring. 3 credits. R. C. Goldstock.
This seminar examines the factors that facilitate and inhibit public or private corruption and analyzes the wide variety of criminal, civil, and nontraditional approaches designed to control corruption and to promote governmental and commercial integrity.

**LAW 717 Employment Discrimination**
Fall. 3 credits. T. E. Eisen.
This seminar explores contemporary problems in equal-employment law. It focuses on legal issues involving Title VII, comparable worth, wrongful discharge, disability discrimination, age discrimination, and equal pay. Students are required to submit a paper as partial fulfillment of the requirements of the course.

**[LAW Ethnic Conflict and International Law**
3 credits. Recommended prerequisite: International Human Rights or Public International Law. Not offered 1997-98.
This seminar examines the status and rights of ethnic, racial, religious, and national groups under international law, and considers the role of international law in developing an adequate response to intercommunal conflicts in Europe, Asia, and Africa. Topics include the sources of nationalism and ethnic conflict, pertinent individual and group rights, principles of humanitarian law and humanitarian intervention, the relationship between group identity and democracy, the role of international organizations in responding to ethnic conflict, and possible solutions to ethnic conflict, including secession, autonomy, and federalism.

**LAW 725 Family Law Seminar**
Fall. 3 credits. B. Colapietro.
This course is designed to familiarize the student with the practical problems facing the practitioner in family law cases. Students participate in negotiating separation agreements, presenting oral arguments of motions or a trial summation, understanding the foundations of law, and developing interviewing skills and client relationships. The philosophy of the family law practitioner and methods of dealing with clients involved in divorce, custody, and the like are covered. The emphasis is on method rather than substantive law.

**LAW 726 Federal Litigation Seminar**
Spring. 3 credits. D. Bordewieck.
This seminar is designed for students genuinely interested in being litigators. We will explore the "real world" of civil litigation in federal court, from commencement of a lawsuit through termination by some means other than trial. Particular attention will be given to local rules; complaints, answers; document requests and responses thereto; venue motions; preliminary injunction motions; discovery motions; summary judgment motions; nonparty discovery; sanctions; FRCP 26 disclosures and requirements; attorney-client privilege issues; and case management procedures and orders. Throughout we will endeavor to determine how one rationally litigates before frequently disinterested judges pursuing their own agendas and against counsel evidencing little regard for the rules or the law.

**LAW 727 Foundations of Employment Law**
Spring. 3 credits. D. Schwab.
This seminar studies labor markets to catalog ways they succeed and ways they fail, and assesses ways that labor market regulation attempts to promote market success. The seminar examines the labor law (regulation of unions) and employment law (regulation of nonunion workplace) topics are covered. Specific topics include: internal labor markets and contingent workers; the decline of unions; policies underlying the National Labor Relations Act; the erosion of the employment-at-will doctrine; and regulation of health care and pensions. To add perspective, the seminar will attempt a comparative examination of the legal systems of Canada, Japan, Germany, France, New Zealand, and Macedonia.
philosophical and legal sources will possibly include: John McDowell, Martha Nussbaum, Onora O'Neill, Ronald Dworkin, Martha Minow, Margaret Radin, Frederick Schauer, Robin West, and Duncan Kennedy.

**LAW 762 Professional Responsibility of the Business Lawyer**  
Spring. 3 credits. Satisfies the professional responsibility requirement. R. W. Painter. This seminar will focus on professional responsibility issues confronting business lawyers, with an emphasis on securities lawyers. Students will read and discuss excerpts from administrative enforcement and disciplinary proceedings, judicial opinions, novels about corporate lawyers, and testimony before Congress concerning lawyer ethics. Paper required.

**LAW 765 Selected Business Transactions Seminar**  
Fall. 3 credits. Recommended prerequisites: Corporations. Z. J. Shulman. An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With public offerings, the course will cover the applicable statutory framework, pre-offering corporate preparations (such as the implementation of poison pills and stock option plans), the due diligence process, the negotiation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX) and the transaction closing. Regarding acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale), antitakeover measures and related fiduciary duties, public company versus private company merger and acquisitions consideration, and crucial legal aspects of the acquisition, such as letters of intent, successor liability, continuity of employees and non-competition agreements.

**LAW Seminar on the Psychology of Law**  
3 credits. Not offered 1997–98. This seminar explores the implicit psychological assumptions embedded in legal doctrine and policy. The focus is primarily on various topics in tort and substantive criminal justice, such as the law's assumed ability to control human conduct through deterrent signals and its conception of reasonable behavior implicit in various doctrines of justification and excuse. The seminar seeks to compare these legal assumptions about how people think, behave, and react with actual findings from the fields of psychology and psychiatry.

**LAW 768 Separation of Powers**  
Spring. 3 credits. Prerequisite for LLM students: Constitutional Law and Administrative Law or permission of instructor. C. R. Farina. The last fifteen years have witnessed more debate about the nature and consequences of "separation of powers" than we have seen since the Founding Era. This seminar examines the ways this concept is understood and used by modern judges, legislators, executive officials, and scholars to justify, or to attempt to modify, the distribution of power within contemporary American government.

**LAW Sovereignty, Self-Determination, and Secession**  
3 credits. Not offered 1997–98. This seminar explores the evolution and meaning of the concept of statehood, the legal rules governing the formation, existence, and breakup of states, and the historical, political, and philosophical underpinnings of those rules. Topics include the conditions for statehood, the meaning of territorial integrity, the status of territorial entities other than states, the international status of peoples and their right to self-determination, possible bases for a right to secession, the legal consequences of secession, and the use of force to separate or hold together an existing state. Special attention will be given to applying these concepts to contemporary events.

**LAW 772 Tax Policy Seminar**  
Spring. 3 credits. Prerequisite: Federal Income Taxation. L. Kahng. This seminar analyzes the tax policy goals of fairness, simplicity, and economic efficiency, and examines how well the present tax system satisfies these goals. Specific topics include: progressivity of the tax rate structure, the use of the tax system to advance social policies, tax legislation in consideration of the family; comparison of income and consumption taxes.

**LAW The Religion Clauses of the First Amendment**  
3 credits. Prerequisite: Constitutional Law. Course not available to students who have already taken Civil Liberties Clinic. Not offered 1997–98. This course examines various issues relating to the First Amendment's establishment and free-exercise clauses. In the early part of the semester the seminar meets to discuss assigned readings. The later part is devoted to the presentation of seminar papers. Each student must submit a substantial paper on an approved topic and brief written critiques of two other students' papers.

**LAW Theories of Property**  
3 credits. Prerequisite: Property. Not offered 1997–98. This seminar explores the various ways that people have conceived of, or understood, property. The materials studied are eclectic and interdisciplinary. They include readings on slavery and property, women and property, community interests in property, as well as classical theories (libertarian, utilitarian, Marxian.).

**LAW 776 United Nations, Elections, and Human Rights**  
Fall. 3 credits. M. B. Ndulo. This seminar will focus on elections and human rights. To what extent is the conduct of public affairs a basic human right increasingly prized by people throughout the world. Universally the right to take part in government is proclaimed and guaranteed by the Universal Declaration of Human Rights and the International Covenant of Civil and Political Rights and is recognized in many other treaties and declarations. Sometimes free and fair elections necessitate international assistance to countries to aid them in fulfilling international human rights standards, and cooperation in establishing and strengthening the legal, technical and physical infrastructures necessary to carry out elections. This seminar will explore the basic international human rights principles relating to free and fair elections and the right to take part in government.

**LAW 777 Voting and Political Participation**  
Spring. 3 credits. Prerequisite: some previous experience with legal materials (case studies, statutes) will be helpful, but it is not required. K. Abrams. This course will explore the meanings assigned to political participation in the American political system and examine a series of instances in which the law has been used to enhance, equalize, or otherwise regulate voting and other forms of political participation. These cases may be in the state investigating the problematic rationality of political participation, examining several arguments for participation notwithstanding the low probability that any participant's vote will have an effect on governmental agencies. We will then use a brief survey of historical and contemporary denials of the franchise to shed further light on the meaning(s) of political participation. The second part of the course will turn to the question of who should have the right of the vote, examining the merits and proper scope of plebiscitary democracy, the problem of apportionment resolved and created by the "one persons, one vote" rule; and efforts to facilitate minority political participation under the Constitution and the Voting Rights Act.

**LAW 781 Capital Punishment Clinic**  
Spring. 3 credits. J. H. Blume, S. L. Johnson. This course is taught as a clinic. Two (or possibly three) cases from the South Carolina Death Penalty Project will be worked on by students. These cases may be in the state postconviction relief stage or the federal habeas corpus stage, depending on the vagaries of litigation and the needs of the South Carolina Death Penalty Project. Students will read the record, may assist in drafting the initial pleading (an application for postconviction relief or a federal habeas petition), and/or may then assist in the preparation of briefs. Students are included in discussion regarding the necessary investigation and the thought process about the case.

**LAW 782 Community Lawyering Clinic**  
Fall. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1 or Legal Aid Clinic 2. (Six hours combined credit for both courses.) N. L. Cook. In this clinic students will both represent individual clients and engage in collaborative problem solving with community agencies. Small groups of students will work together and with local service providers to identify issues in the community and determine ways in which lawyers can assist in resolving the problems. Students will be expected to spend several hours per week at a community agency meeting with individual clients and participating in the work of the agency. Possible areas in which students may focus attention include youth/education, parenting/ criminal defense, and family violence/divorce. Seminar will stress collaboration, interdisciplinary problem-solving, creative lawyering skills, and lawyers roles in community contexts.
The course has both a substantive component, in which a broad conceptual understanding of a complex and controversial area of law and public policy is developed, and a live client clinical experience, in which those concepts can be applied in solving actual client problems. The substantive component of the course provides an introduction to government benefits law by examining various need-based benefit programs including Temporary Assistance to Needy Families (TANF), Supplemental Security Income (SSI), and Food Stamps. Case handling involves the representation of clients in government benefits cases (public assistance, food stamps, unemployment insurance, Medicaid, SSI, etc.) involving both the Tompkins County Department of Social Services, the N.Y.S. Department of Labor and the Social Security Administration. The course also includes a lawyering skills classroom component because students are simultaneously enrolled in Legal Aid 1 or 3 (see the descriptions below).

**LAW 785 Government Benefits Clinic/Neighborhood Legal Services Externship**

Spring. 5 or 6 credits. This course is a combination of Government Benefits and the Neighborhood Legal Services Externship and either Legal Aid Clinic 1 or Legal Aid Clinic 2. Students are required to register for both courses when combined with LA1; 5 hours when combined with LA3.

The course is the same as Government Benefits except that the case handling component involves handling cases for the Ithaca office of Neighborhood Legal Services. See the descriptions for additional details.

**LAW 792 Legal Aid Clinic 2**

Fall. 4 credits. Prerequisite: Legal Aid Clinic 1. This clinic offers multiple courses that include the LAI classroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic's clients in both federal and state courts.

**LAW 793 Legal Aid Clinic 3**

Fall or spring. 3 credits. Prerequisite: Legal Aid Clinic 1 or a clinic course that includes the Legal Aid Clinic 1 classroom component. Students handle legal aid cases, participate in a classroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic's clients in both federal and state courts.

**LAW 794 Legislative Externship**

Fall or spring. 3 credits. B. Strom. The students work with the local New York State Member of Assembly. Work involves drafting legislation, tracking legislation for constituents, legal research and writing, responding to constituent requests that particularly require legal research or an explanation of law. The emphasis is on learning about legislative process, drafting legislation, understanding the reasons for statutory ambiguity, and developing various skills. There are several informal meetings with the faculty supervisor during the semester with readings and group discussions related to the externship experience.

**LAW 795 Neighborhood Legal Services Externship**

Fall or spring. 3 to 4 credits. Requires simultaneous enrollment with Legal Aid Clinic 1, Legal Aid Clinic 2, or Legal Aid Clinic 3. Students handle legal aid cases, participate in a classroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic's clients in both federal and state courts.

**LAW 796 Public International Law Clinic**

Fall. 3 credits. Prerequisites: Public International Law or International Human Rights. D. Wippman. Students will prepare legal memoranda and policy proposals for foreign governments and international organizations. The memoranda will be prepared in coordination with the Public International Law and Policy Group, a nonprofit organization that provides pro bono advice on issues of public international law to governments, NGO's, and international organizations. Possible subject areas include minority rights, border treaties, citizenship and nationality disputes, state succession issues, and war crimes.

**LAW 797 Religious Liberties Clinic**

Fall and spring. 4 credits. Year-long offering. G. G. Galbreath, G. J. Simpson. Students work in teams on cases provided by organizations that handle Establishment and Free Exercise Clause cases. All students do substantial research and writing, and some may draft portions of briefs. To help ensure that students have the opportunity to take a case to completion (or at least to the next stage of litigation), this is a full-year course, with students required to register for both semesters for a total of four credit hours and a grade at the end. Given the nature of litigation, demands on student time may be sporadic, and students should be prepared to do some work over intersession if court deadlines so require.

**LAW 798 Women and the Law Clinic**

Fall or spring. 5 or 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1, Legal Aid Clinic 2 (6 hours combined credit for both courses), or Legal Aid Clinic 3 (5 hours combined credit). B. Balos (fall), J. M. Miner. Students will represent women clients who have legal matters primarily in the family law area (divorce, custody, support, domestic violence). Students will also participate in the lawyering skills classroom component of Legal Aid 1, 2, or 3. An additional class will focus on such issues as the impact of substantive law on women, the impact of legal institutions on women, professional role development, feminist lawyering methods, and other topics related to women and the law.
FACULTY ROSTER

Abrams, Kathryn, J.D., Yale U. Prof.
Alexander, Gregory S., J.D., Northwestern U. Prof.
Balos, Beverly, J. D., U. of Michigan. Visiting Clinical Prof.
Barceló, John J., III, S.J.D., Harvard U.
William Nelson Cromwell Professor of International and Comparative Law
Blume, John H., J.D., Yale U. Visiting Prof.
Braucher, Jean J., J.D., Boston U. Visiting Prof.
Clemont, Kevin M., J.D., Harvard U.
James and Mark Flanagan Professor of Law
Clymer, Steven D., J.D., Cornell U. Asst. Prof.
Cramton, Roger C., J.D., U. of Chicago.
Robert S. Stevens Professor of Law
Cripps, Yvonne M., Ph.D., U. of Cambridge.
Visiting Prof.
Eisenberg, Theodore, J.D. U. of Pennsylvania.

JOHNSON GRADUATE SCHOOL OF MANAGEMENT

ADMINISTRATION
Robert J. Swieringa, dean
L. Joseph Thomas, associate dean for academic affairs
Michael J. Hostetler, associate dean for executive education
Richard A. Highfield, assistant dean and director of the MBA Program
Steven J. Sharratt, assistant dean for external relations
John A. Elliott, director, doctoral program
Harriet Peters, director of advising and student services
Daphne Atkinson, director of admissions
Robert J. Swieringa, dean
Michael J. Hostetler, associate dean for academic affairs
Stephen F. Johansson, director of career services
Catherine M. Davidson, managing editor
Linda Pike, managing editor

The Johnson Graduate School of Management prepares men and women for managerial careers in business. The school offers courses in many disciplines to provide potential managers with an understanding of the complexities of the professional world in which they will operate and of the organizations of which they will become a part.

A bachelor's degree or an equivalent is required for admission to the two-year program leading to the Master of Business Administration (M.B.A.) degree. Nearly half of the students have a background in undergraduate study in arts and sciences, and about one-quarter in engineering. Five percent of the students begin their graduate training immediately after receiving their bachelor's degrees and the remaining 95 percent following work experience.

Combined degree programs allow highly qualified Cornell students to co-register in the Johnson Graduate School and a second undergraduate program leading to the Master of Business Administration (M.B.A.) degree. Nearly half of the students have a background in undergraduate study in arts and sciences, and about one-quarter in engineering. Five percent of the students begin their graduate training immediately after receiving their bachelor's degrees and the remaining 95 percent following work experience.

The doctoral program, administered through the Graduate School, provides an advanced level of education in business for those who seek careers in teaching and research at leading universities.

More detailed information about these programs is available from the Office of Admissions and Student Affairs, Johnson Graduate School of Management, Malott Hall.

Students in other graduate programs and undergraduate students registered within the university are welcome in many classes. Since matriculated MBA students require certain courses for graduation, non-Johnson School students are not allowed to pre-enroll. During the first week of classes, registration of non-Johnson School students occurs on a space-available basis.

UNDERGRADUATE ONLY

NBA 300 Entrepreneurship and Enterprise
This course provides a disciplined look at the entrepreneur and small business management. It deals with the formation and the acquisition of enterprises from the viewpoint of individuals who desire to become the principal owners. Reviews include legal and tax aspects, valuation techniques, organization forms, and venture-capital sources, as well as planning techniques necessary to launch a successful venture.

NCC COMMON CORE COURSES

NCC 500 Financial Accounting
Fall. 3 credits. Johnson School core course. Enrollment limited. R. Libby, J. D’Souza.

An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transactions analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure.

NCC 501 Statistics for Management
Fall. 3 credits. Johnson School core course. Enrollment limited. J. McClain, D. Wittink.

An introduction to decision making under conditions of uncertainty. Topics include descriptive statistics, probability theory, classical statistics, statistical decision theory, and simple and multiple regression analysis. Some knowledge of calculus required.

NCC 502 Microeconomics for Management
Fall. 3 credits. Johnson School core course. Enrollment limited. R. Frank

Microeconomic theory is introduced and applied to problems faced by managers. Specific topics covered include supply and demand, consumer behavior, pricing when a firm has market power, and the role of government. The class employs a lecture format and emphasizes problem solving. Grading is based on two midterms and a final exam.

NCC 503 Marketing Management
Fall. 3 credits. Johnson School core course. Enrollment limited. D. Stayman, J. Russo.

The course addresses controllable and uncontrollable marketing variables that managers in multiproduct firms face in today's business environment. Topics include market research, consumer behavior, product planning, distribution, advertising and promotion, pricing, international and competitive strategy. Separate graduate and undergraduate sections are offered in the fall.

NCC 504 Management and Organizations
Fall, spring. 3 credits. Johnson School core course. Enrollment limited. B. Nelsen, D. Sally.

This course takes a resource-based approach to management by arguing that organizations should link their strategy to their internal resources and capabilities. This theme is developed by addressing: (1) the strategic value of internal resources and capabilities, (2) the role of human resources and organizational behavior in formulating and implementing strategy, and (3) the importance of structure and the design of organizations in formulating and implementing strategy. Included among the topics are: how firms create sustainable competitive advantage through internal resources and capabilities, what the best practices are for managing people, what effects best practices have on attitudes and behaviors, why putting the customer first is not necessarily best practice from a resource-based perspective, why organizational culture is central to organizational effectiveness, why the formal organizational chart and structure of an organization are important, how organizations innovate, how organizations change through rearchitecture and reengineering, what firms gain and lose through pursuing core competencies, and what firms gain through strategic alliances and networks. The course makes extensive use of case materials.

NCC 506 Managerial Finance
Fall, spring. 3 credits. Johnson School core course. Enrollment limited. Prerequisites: completion of or concurrent enrollment in NCC 500 and NCC 501.

J. Hass, R. Michaely, H. Bierman.

An introduction to business finance through theory and case studies. Topics include the capital-budgeting decision, portfolio theory, the asset-pricing models, capital structure, mergers and acquisitions, costs of capital, option pricing, and international finance.

NCC 508 Operations Management
Spring. 3 credits. Johnson School core course. Enrollment limited. Prerequisite: NCC 501 or permission of instructor.

L. Robinson, M. Lojo.

Operations management deals with the problems of producing and delivering goods and services, topics that are of strategic importance.
importance in almost every organization. Production scheduling is a significant problem for manufacturing firms; smooth work flow and quality control are important in banking operations; inventory control is crucial in large retail establishments, and proper task sequencing is a major problem in the construction industry. The course deals with those and other problems, from a managerial viewpoint. The course is designed around managerial problems in the operations area. Students use case studies to improve skills in problem identification.

NBA MANAGEMENT ELECTIVE COURSES

Accounting

NBA 500 Intermediate Accounting
Fall, spring. 3 credits. Prerequisite: NCC 500 or equivalent. Staff.
The course is based on the essential concepts and terminologies of financial accounting introduced in the accounting core course. Students learn to evaluate financial statements through the use of case studies drawn from actual corporate financial reports.

NBA 501 Accounting for Mergers and Consolidations
Spring, first half of semester. 1.5 credits.
Prerequisite: NBA 500 or permission of the instructor. R. Libby.
The course deals with accounting problems related to equity financing, including equity restructurings, hybrid securities, intercorporate investments, consolidated reports, proforma statements for a merger prospectus, and other related financial reporting problems. The method of instruction is lecture mixed with cases. Grading is based on two exams. First half of semester. Course continues in NBA 508, Advanced Accounting, offered second half of semester.

NBA 502 Managerial Cost Accounting
Fall, spring. 3 credits. Prerequisites: NCC 500, NCC 501, and NCC 502, or the equivalent. R. Bloomfield, R. Hilton.
The course is designed both for those responsible for internal accounting information and those who use such information for decision making. Topics include budgeting, accumulating costs for product costing, activity-based costing, standard costs, the analysis of cost variances, cost estimation and prediction, cost-price-volume decisions, performance measurement, nonmanufacturing costs, cost allocation, and transfer pricing. Instruction will be a mixture of lecture and case discussion. Student evaluation will be based on a midterm exam, a final exam, a project, and class participation.

NBA 503 Strategic Cost Management
This course focuses on the role of cost management and related issues in helping a firm compete successfully in the global market. Topics considered include activity-based costing, activity-based management, value chain analysis, the lean enterprise, confronting competition in an industry dominated by lean enterprises, re-engineering, process value analysis, identification of non-value-added activities and costs, target costing, Kaizen costing, continuous improvement, time-based competition, cost versus quality, and benchmarking. The course is almost entirely based on cases, many of them lean enterprises in Japan.

NBA 505 Auditing
Spring. 3 credits. Prerequisite: NCC 500 or permission of the instructor. M. Nelson.
The course examines the process by which financial-accounting systems are audited. Topics include ethics, the meaning of audit reports, the legal liability of auditors, the study and evaluation of internal control systems, and various approaches for testing account balances. Problems, cases, and video simulations are used to illustrate concepts.

NBA 506 Business Analysis and Security Valuation
Fall, spring. 3 credits. Prerequisites: NCC 506, NBA 500 (or concurrent enrollment), or permission of instructor. C. Lee.
The focus of this course is on using accounting-based information to make business decisions. We consider a variety of decision contexts, including strategic ratio analyses, cash flow projections, security valuation, quality of earnings assessments, equity trading strategies, M&A fairness opinions, credit decisions, bankruptcy predictions and bond ratings. Our goal is to gain an appreciation for both the usefulness and limitations of accounting date in performing these tasks. Emphasis is on practical applications and special attention is given to cultivating your analytical and communication skills.

NBA 508 Advanced and International Accounting
Spring, second half of semester. 1.5 credits.
Prerequisites: NBA 501 or permission of the instructor. J. Elliott.
The course examines advanced topics in accounting for intercorporate investments, including leveraged buy-outs, international transactions and international subsidiaries, joint ventures, spin-offs, and other related financial reporting problems. The method of instruction is lectures mixed with cases. Grading will be based on two exams. Second half of semester. Continuation of NBA 501, Acctg for Mergers & Consol. (offered first half of semester).

Economics

[NBA 520 Pricing and Strategy]
This course extends material introduced in the core microeconomics course, where the focus is on pricing decisions. The course is taught very much like the core microeconomics course; i.e., the course consists mostly of lectures and problem sets that utilize the ideas contained in the lectures. One difference is that some understanding of calculus is required. The grading for the course is based on a midterm exam, a final exam, and a paper. Specific topics covered include price discrimination, peak-load pricing, product line pricing, and demand pricing when information is asymmetric.

[NBA 522 Managerial Economics]
3 credits. Not offered 1997-98.
A. McAdams.
Students review microeconomic theory and then apply it in a number of real-world situations. They explore the relationship between micro-theory and decisions for capital investments through concrete case-study applications. Those include problems related to the appropriate timing for the insertion of new technology (for example, whether it is preferable to buy an existing tanker or to wait for the next iteration of the technology). Also explored are complex pricing decisions, including peak-load pricing. The sequential relationships among those various applications of microeconomic theory are examined. The format of the course is that of a lecture-discussion.

NBA 523 Forecasting Time Series
Fall, second half of the semester. 1.5 credits.
Prerequisite: statistics core course or the equivalent. R. Highfield.
The course will focus on statistical and econometric approaches to forecasting business and economic time series. The course provides students with a toolbox of time series forecasting methods and teaches them how to choose the appropriate one. Topics will include univariate methods such as ARIMA modeling, some multivariate methods such as transfer functions and regression, as well as the relationship of forecasting to decision making. Applications will usually involve the forecasting of financial and economic data. Although statistical theory will be covered as necessary, emphasis will be on applications. Students will be evaluated on class participation, and both individual and group projects. There are no exams.

NBA 524 Macroeconomics and International Trade
Fall. 3 credits. Prerequisite: NCC 502 or equivalent or permission of the instructor. G. Staller.
The course applies basic macroeconomic theory to such problems as inflation, unemployment, economic growth, and productivity and examines how these problems interact with international trade and finance. Students learn to be informed observers of national and international economic policies and discerning users of economic analyses and forecasts. A lecture/discussion format is used as the method of instruction.

[NBA 526 Business and Economic Forecasting]
Not offered in 1997-98. 3 credits.
Prerequisite: NCC 501 or equivalent. R. Highfield.
This course provides students with a toolbox of useful, proven time-series forecasting methods and teaches them how to choose the appropriate one. Topics include the Box-Jenkins method and more traditional forecasting methods, the prediction of turning points, combinations of methods, and the relationship of forecasting to decision making. Application, rather than theory, is emphasized.

NBA 527 Applied Price Theory (also ECON 516)
Spring. 4 credits. Letter/S-U optional grading. R. Frank.
The course emphasizes applications of the principles of price theory to a variety of problems taken from concrete, practical settings.

NBA 528 Information and Incentives in Organizations
Fall, spring. 3 credits.
R. Gibbons.
Explores the role of information, incentives, and strategic behavior in shaping the internal structure and practices of organizations.
Consists of three major sections: compensation and incentives (including performance pay, distortionary performance measures, and subjective performance assessments), human resource management for general managers (including labor market mobility, up-or-out rules, and self-managed teams), and organizational design and performance (including communication, decentralization, and reengineering). Instruction is via lectures (about 50 percent, more toward the beginning) and case discussions. The discussions often involve mathematical models that are abstract but not technical. Pedagogical strategy is to use models as coherent frameworks for organizing the welter of facts presented in each case. Evaluation is via two take-home midterms (involving problems related to models discussed in class), five 2-page case write-ups; one group project (including longer write-up and class presentation); and class participation (particularly in case discussions where no write-up is required).

**Finance**

**NBA 540 Financial Policy Decisions**

Spring. 3 credits. Prerequisite: NCC 506 or the equivalent. H. Bieman.

An introduction to basic and advanced financial decision models, developed from the viewpoint of the financial manager, for different methods of corporate financing. Topics include leases and bonds, preferred stock and convertible securities, common stock, capital structure and cost of capital, dividend policy, interest-rate swaps, leveraged buy-outs, and mergers and acquisitions. The format is lectures, discussions, and a few very brief case studies. Grades are primarily based on two examinations, but significant contributions in class are also relevant. Two to four visiting financial executives conduct classes.

**NBA 541 Economic Evaluation of Capital Investment Projects**

Fall, spring, 3 credits. Prerequisite: NCC 506 or permission of the instructor. B. Swaminathan, S. Smith.

This course deals with the evaluation of capital investment projects under uncertainty. The first part of the course focuses on traditional capital budgeting techniques using the discounted cash flow approach. This involves the estimation of cash flows, the treatment of risk and discount rates, the role of inflation and taxes, and the use of simple factor and multifactor asset pricing models in determining discount rates. The second part of the course focuses on the valuation of future investment opportunities, with an emphasis on using option pricing techniques. This includes issues such as flexibility options, options on real assets, evaluation of natural resource investments, and evaluation of new product investments. The methods of instruction are lectures, case discussion, spreadsheet exercises, statistical exercises, and seminars by practitioners. Students are evaluated on the basis of midterm and final examinations, cases, and homework assignments.

**NBA 542 Investments and Portfolio Analysis**

Fall, spring, 3 credits. Prerequisites: NCC 501 and NCC 502. Recommended: NBA 624.

This course covers the pricing of financial assets and instruments such as securities, bonds, options, and futures; the concepts of diversification, market efficiency, and risk-and-return relationships for (portfolios of) securities. The approach balances rigor and mathematical simplicity, but this is an essentially quantitative course. Students must be comfortable with statistics, regression analysis, and quantitative analysis as these tools will be routinely used from the beginning of classes. Students should also be able to perform statistical analysis on computer packages (e.g., Minitab) and program worksheet packages (e.g., Lotus or Excel). The course will give the students a good view of the paradigms of asset valuation and their implications for financial asset management.

**NBA 543 Financial Markets and Institutions**

Fall. 3 credits. Prerequisite: NCC 506. M. O'Hara.

The course develops a framework for discussing financial intermediation. It analyzes the sources, uses, and pricing of funds in the economy and the various roles of banks and other financial intermediaries. Students explore the theory of commercial banking, study how central bank operations affect financial institutions, and learn when lending can be securitized and how such markets work. They also learn how the money market and the financial futures market operate. Quantitative techniques are used in economic theory.

**NBA 544 Bank Management**

The course provides an in-depth treatment of management issues in commercial banking. Topics include management of bank assets, credit decisions and pricing, information problems, bank performance evaluation, international lending, and strategic planning. Students learn concepts through case studies and participate in a bank-simulation exercise.

**NBA 545 Corporate Financial Policy and Investment Strategies**

3 credits. Prerequisite: NCC 506. R. Michaela.

Students in the course will deal with frontier topics in corporate finance and investment strategy. The course objective is to enable students to be better aware of financial situations that may be encountered in the future. From the perspective of either a corporate financial officer or an investor (such as a money manager), the basics for understanding corporate financial products is to understand the driving forces behind their creation. We analyze the factors that may affect corporate financial decisions: (1) taxes (both corporate and individual), (2) contracting (between managers and shareholders, and between shareholders and other claim holders such as bond holders), (3) asymmetric information, and (4) transaction costs. We explore the effects of each of these factors on the decision about the optimal mix of debt and equity in the firm's capital structure and on its investments decisions. After mastering the basics, we move to more advanced topics such as leveraged buyouts, restructurings, capital structures, and mergers and acquisitions. Issues raised in the cases are addressed in student presentations and class discussions. Several topics in the course are based on studies of financial institutions of all kinds, whether they are known as insurance companies, banks, investment banks, or pension funds, invest money, and advise clients in a wide variety of settings. This includes both the role of financial institutions in the intermediary-client relationship and this course will look at these issues from both an economic and legal perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis.

**NBA 546 Introduction to Derivative Securities**

Fall, spring, 3 credits. Prerequisite: NCC 506 (Finance Core) or permission of the instructor. R. Gulhal, F. Diz.

The course introduces students to the pricing and hedging of derivative securities. The course briefly covers forward contracts, futures contracts, and swaps. The primary emphasis is on option contracts. Underlying assets include stocks, currencies, and commodities. Fixed income derivatives are covered in NBA 555. The method of instruction is primarily lectures, supplemented by guest speakers. A midterm and a final exam comprise roughly half the grade, with the remaining half determined by assignments and class participation. The course is a prerequisite for NBA 550, Advanced Topics in Derivative Securities.

**NBA 547 Applied Financial Engineering**

Also OR&IE 565

Spring. 3 credits. Prerequisites: NCC 506, NBA 546, NBA 550, NBA 544, OR&IE 523, OR&IE 523, OR&IE 521, R. Jarrow, D. Heath.

This course is designed to integrate the students' course work in engineering (computing, stochastic modeling) and finance (or quantitative analysis) in order to provide students with a solid grounding in modern finance theory and legal analysis. Emphasis will be placed on the intersections between modern finance theory and legal analysis. The course format will be a mixture of lectures by faculty, industry professionals, and students (project presentations).

**NBA 550 Current Topics at the Crossroads of Law and Finance**

Spring. 3 credits. M. O'Hara.

This course explores a series of selected topics that involve important issues in law and finance. The premise of the course is that financial institutions of all kinds, whether they are known as insurance companies, banks, investment banks, or pension funds, invest money, and advise clients in a wide variety of settings. This includes both the role of financial institutions in the intermediary-client relationship and this course will look at these issues from both an economic and legal perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis.

**NBA 552 Case Studies in Finance**

Spring. 3 credits. Prerequisites: NCC 506 or the equivalent. Recommended: NBA 540. Course is restricted to second-year or 12-month option students. Letter/S/U optional grading. H. Bieman.

Students study and discuss finance cases. Most of the cases deal with corporate finance, but some treat other areas such as investment banking and securities investing. Issues raised in the cases are addressed in student presentations and class discussions. Issues raised in the cases are addressed in student presentations and class discussions. Several topics in the course are based on studies of financial institutions of all kinds, whether they are known as insurance companies, banks, investment banks, or pension funds, invest money, and advise clients in a wide variety of settings. This includes both the role of financial institutions in the intermediary-client relationship and this course will look at these issues from both an economic and legal perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis.

**NBA 553 Finance and Accounting for Manufacturing**

Spring. 3 credits. Course intended for non-Johnson School students only. J. D'Souza.

The course focuses basic financial and cost accounting, the economic and financial
The primary perspective is that of the venture risks, developing and negotiating investment subsequent management of such ventures. NBA 557 Case Studies in Venture Topics to be studied include: the term interest rates, credit risk spreads, and structure of interest rates, interest rate swaps hedging, and risk management of fixed questions. Analysis develop research skills and illustrate assignments and a term project requiring data basic themes. These range from corporate examples, and applications from the three of the class presents a variety of problems, NBA 555 Fixed Income Securities and international diversification. The second part first part of the class outlines three basic principles to a variety of problems. The teaching methods familiarize students with key concepts in cost of capital investment projects, and 4) to make students aware of financing alternatives, their risks and benefits. The teaching methods consist of lectures and cases. Students are evaluated on the basis of exams and case presentations.

NBA 554 International Finance Fall, spring 3 credits. Prerequisite: NCC 506. W. Bailey. This course applies principles of finance to the international setting. International finance is a different perspective. Firstly, the existence of multiple currencies adds risk to investment and financing decisions. Second, when corporations and portfolio investors cross international borders both problems and opportunities on these issues and highlight how finance theory can be extended to address them. We start with basic principles of international finance, then apply those principles to a variety of problems. The course helps students to understand the ideas and research results of international finance and to adapt what they learn to the practical problems of the increasingly globalized business world beyond the classroom. The first part of the course outlines three basic themes: exchange rate volatility, barriers to international capital flows, and the value of international diversification. The second part of the class presents a variety of problems, examples, and applications from the three basic themes. These range from corporate finance applications of capital budgeting to portfolio management strategies. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

NBA 555 Fixed Income Securities and Interest Rate Derivatives Fall, spring 3 credits. Prerequisites: NCC 506, NCC 501. R. Jarrow. This course is designed to study the pricing, hedging, and risk management of fixed income securities and interest rate derivatives. Topics to be studied include: the term structure of interest rates, interest rate swaps (caps, floors, collars), the risk structure of interest rates, credit risk spreads, and corporate bond valuation. The method of instruction is lectures and discussion, with computer illustrations an integral part of the class content.

NBA 557 Case Studies In Venture Investment and Management Fall, semester 1.5 credits. Prerequisites: NCC 500 and NCC 506 or concurrent enrollment. W. Thomas. A series of cases that focus on the venture capital investment process and on the subsequent management of such ventures. The primary perspective is that of the venture capitalist in assembling and evaluating information, preparing forecasts, assessing risks, developing and negotiating investment structure and terms, and deciding whether to invest. Cases also focus on management and financial problems and policy issues and the relationship between venture capitalists and entrepreneurs. The secondary perspective is that of the entrepreneur and the techniques and skills employed in managing growing enterprises. Presentations by venture capitalists and entrepreneurs will supplement student discussion and analysis of cases. Grades will be based on written report, quality of classroom participation, and a final exam.

NBA 558 Corporate Financial Policy Fall, first half of semester. 1.5 credits. Prerequisite: NCC 506. R. Michaely. The course will deal with frontier topics in corporate finance and investment strategy. The course objective is to enable you to better analyze financial situations you may encounter in the future, as well as firms' valuation techniques. The tools developed in the course will enable you to understand (and maybe even enhance) the financial product opportunities for companies of all types and highlight how finance theory can be extended to address them. We start with basic principles of international finance, then apply those principles to a variety of problems. The course helps students to understand the ideas and research results of international finance and to adapt what they learn to the practical problems of the increasingly globalized business world beyond the classroom. The first part of the course outlines three basic themes: exchange rate volatility, barriers to international capital flows, and the value of international diversification. The second part of the class presents a variety of problems, examples, and applications from the three basic themes. These range from corporate finance applications of capital budgeting to portfolio management strategies. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

General Management

NBA 560 Business Law I (also ARME 320) Fall. 3 credits. D. Grossman. The course introduces the basic tenets of law as they apply to businesses and their operations. Topics include personal property, contracts, agency, real property, and landlord-tenant concerns. Text readings and case studies are used. All students intending to be professional accountants are required to take the course, and it is strongly recommended for finance students.

NBA 561 Business Law II (also ARME 321) 3 credits. Prerequisite: NBA 560 or permission of the instructor. D. Grossman. The course examines business organizations and the principles of commercial law affecting businesses. Topics include secured transactions, bankruptcy, commercial-paper, antitrust, consumer-protection, security-regulation, and environmental-protection laws. Text readings and case studies are used.

NBA 562 Estate Planning (also ARME 422) Fall. 1 credit. D. Grossman. Fourteen sessions on the various aspects of estate planning. The law and use of trusts, the law of wills, federal and New York State estate and gift taxes, and probate procedures are covered.

NBA 564 Entrepreneurship and Enterprise Fall, spring. 3 credits. D. BenDaniel. The course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies.

Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and workouts, and potential sources of capital. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and workouts, and potential sources of capital. Students team up to write and present business plans. The course attempts to integrate marketing finance, operations, and human-resource topics in the context of high-growth business ventures.

NBA 565 Strategic Management Spring. 1.5 credits. Hass, Sally, Gibbons, M. Rosen. This course is comprised of three elements. The first element is the Cornell Management Game, a computerized management simulation that integrates the functional areas of accounting, marketing, operations and finance in a competitive, business strategy framework. The second element is a team presentation at the "Board of Directors' Meeting," which occurs at the end of playing the game. At that meeting, each team makes a presentation to its BOD regarding its successes and failures, lessons learned and current strategy. Erne & Young has agreed to send a team of their consultants to judge a contest with monetary payoffs in which the best team presentation from each industry is presented to them. The third element is another simulation played by teams in a manufacturing environment over the course of one day. This simulation integrates the OB/OS materials with Operations Management in a strategic context.

NBA 567 Management Writing Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, M. Hittleman. Students learn to write clearly and effectively by focusing on perspective, style, organization, and tone. Students learn to analyze and critique each other's work in class. A special section, emphasizing cultural differences, is reserved for students whose native language is not English.

NBA 568 Oral Communication Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, C. Rosen. Students learn to write clearly and effectively by focusing on perspective, style, organization, and tone. Students learn to analyze and critique each other's work in class. A special section, emphasizing cultural differences, is reserved for students whose native language is not English.

NBA 569 Management Consulting Fall. 3 credits. A. McAdams. The course is case-study oriented and focuses on strategic consulting and contemporary business challenges. The course is case-study oriented and focuses on strategic consulting and contemporary business challenges. The objectives. First, it provides students with the opportunity to understand the role of the consultant and to gain indirect experience in that role through dealing with a broad range of...
of practical and real-world issues. Second, it helps students improve their analytic skills through practice with case studies. Third, it provides students with information that they are unlikely to gain in other courses, as well as expertise making presentations and evaluating them. In addition, students are required to write a comprehensive analytic term paper.

NBA 570 Leadership in Management
Spring. 1.5 credits. MBA students only. Dyckman, CCL.

This course is an extraordinary partnership with the Center for Creative Leadership (CCL) to provide MBA students with the self-awareness and interpersonal skills required to be effective leaders. Training will be provided by professional staff from the Center for Creative Leadership.

NBA 571 Cornell Management Simulation
Fall, second half of semester. 1.5 credits. Restricted to second-year MBA students. S. Smidt.

This computer-based simulation is played by teams of four, self-selected students who make marketing, production, and finance decisions for one of five companies operating competitively in the same industry. After the first week, during which the rules of the simulation are explained and the software used by each team is demonstrated, the teams make weekly decisions (meeting at their own convenience). At the beginning of the simulation, each team writes a Strategic Intent paper and, before the results of the last simulation, each team writes a Strategic Intent paper and the instructor's evaluation of team's performance at the BOD meeting.

NBA 573 Projects in Environmental Management
Spring. 3 credits. A. McAdams.

This is a project course of interdisciplinary teams focused on environmental issues faced by real world organizations: businesses, governmental agencies, not-for-profit institutions. The project teams are to establish a "contract" with their organization to achieve mutually agreed goals during the semester, with appropriate "milestones" to be completed at intermediate stages. Project outcomes will be provided to the host organization through a formal presentation and report at the end of the semester, and result in a formal case study of the issues involved. This course is taught jointly with Professor McAdams/Advanced Consulting course, NBA 575.

NBA 575 Advanced Consulting
Spring. 3 credits. Limited to 20 students. Priority given to students who have taken NBA 579. A. McAdams.

The course investigates the efficacy of "concept maps" as tools integral to the consulting process. In the first part of the course, recent case studies, both fictional and actual, are employed to review the use of concept maps in various corporate settings. Following that, the research base documenting Professor Novak's use of concept maps in many other settings is examined. In the final part of the course, student teams undertake field projects designed to determine the potential contribution of concept maps in various business settings.

NBA 576 The World Geopolitical Environment of Business
Fall. 3 credits. Letter/S/U optional grading. R. Lind.

The geopolitical face of the world is changing at a pace that few could have envisioned even five years ago. The unification of Germany, the fall of communism and institution of sweeping economic restructuring in the former Soviet Union, the move toward democraacy in Eastern Europe, the movement of Europe toward a unified economy, and the flirtations with reform and its implications in China are just a few of the many examples of the changing world environment of business. The course provides students with a view of those fast-paced worldwide changes. Topics covered include developments in Western and Eastern Europe, the former Soviet Union, the Pacific Rim, Central and South America, the Middle East, and Africa, and the role and fate of developing countries in the world economy. Guest speakers include leading scholars from Cornell and other universities and leaders in business and government.

NBA 577 The Political, Legal, and Regulatory Environment of Business
Spring. 3 credits. Letter/S/U optional grading. R. Schuler.

The political climate, laws, regulations and government arrange for infrastructure have a profound effect on the nature, operation, and profitability of business. Many of the most important decisions that top management makes are driven by political, legal, and regulatory considerations (e.g., the responses of Exxon to the Exxon Valdez oil spill and Union Carbide to the Bhopal, India, gas leak and the decision of AT&T to accept the division of its company in response to an antitrust suit filed by the United States government). Environmental and waste-management concerns pointing to new laws and regulations that will affect many aspects of business well into the next century, creating opportunities as well as posing problems. The course begins with a discussion of the political and economic foundations of business regulation. Students examine different areas of application, including economic regulation, environmental regulation, antitrust, and product liability. Guest speakers include leading scholars from throughout the university and business and government leaders.

NBA 578 Business Ethics
Spring. 3 credits. R. Frank.

Students examine actual situations in business, both in the United States and abroad, that involve ethical issues affecting individuals and organizations. They are challenged to decide on appropriate ethical positions. Guest speakers include leading scholars from throughout the university and business and government leaders.

NBA 579 Cases in Business Strategy
Fall, first half of semester. 1.5 credits. Restricted to second-year MBA students. J. Suwinski.

Cases and current problems spanning a variety of industries and situations are used to develop an understanding and appreciation for business strategy principles. The course deals with issues such as ethical behavior, managing growth, employee empowerment, managing change, and achieving innovation. In addition to cases, class sessions will deal with principles and current situations described by visiting executives.

International Management

NBA 580 Strategies for Global Competitiveness
Spring. 3 credits. A. McAdams.

Initially, students explore the role of government in several private-market industrialized nations—Japan, France, Germany, the United Kingdom, and Italy—for lessons the United States might learn and use. They investigate the impact in each of those countries of government policies on the global competitiveness of the country's firms. Special emphasis is given to differential policies appropriate to each of a range of industries, from the mature to the high tech (including computers, telecommunications, and electronics), and to stages of development in each economy. Possible lessons are then tested for less developed countries that might include Venezuela and Malaysia and newly emergent countries such as Singapore.

NBA 583 Market Transitions in Eastern Europe
Fall, spring. 3 credits. D. Stark.

The course examines the problems and prospects of the transition from state socialism to a market economy in contemporary eastern Europe. Patterns of investment, enterprise decision making, labor markets, and property rights are examined from a comparative institutional perspective. The final part of the course is organized around the research interests of the seminar participants and includes such themes as privatization of state enterprises, the role of international monetary institutions, capital markets, new financial institutions, organizational restructuring, and the relationship between citizenship rights and property rights. Although the course focuses on recent changes in Hungary, Poland, and the Czech Republic, its content should yield insights for students interested in other societies (including China and the former Soviet Union) currently undergoing the transition from state socialism. Instructional methods used are lectures and discussion. Evaluation of students will be based on short papers on readings, class participation, a final paper and student presentations.

NBA 584 Management of the Multinational Corporation
Fall, spring. 3 credits. J. Katz.

This course introduces students to analytical frameworks and skills used in international management. The first half of the class focuses on international strategies, including selection and implementation of a competitive position. The second half covers comparative management (two focus countries are chosen each semester) and cross-national management. Topics include motivation in an international context, cross-cultural communication, and multinational team operations. The course is a mixture of lectures and cases. Grading is based on term papers, individual presentations, and participation. There are no prerequisites, but a real interest in international management is needed to benefit from the class.

NBA 589 Business in Japan

The course, based primarily on case studies and lectures, focuses on the organizational
NBA 590 Managing in Developing Countries
Fall, first half of semester. 1.5 credits. Letter/S-U; optional grading. J. Katz.
This class centers on the unique features of industrializing countries as hosts for multinational business operations. It is a case-based course; each day is spent discussing one or two cases. Topics include environmental variation and how to deal with it and concentrated national power structures and their management. We cover a large number of countries spread throughout the world. Students are responsible for providing class updates on the countries discussed, because while the case content remains valid, some of the facts presented about the countries are out-of-date. Grading is based on the country update presentation, a final case write-up, and class participation.

NBA 592 Experience in International Management
Fall, second half of semester. 1.5 credits. S-U grades only. J. Katz.
The objective of this course is to combine classroom sessions and an international study trip to give students a fuller understanding of differences in national industrial structures and national management styles. All students will attend six sessions (one per week for the last half of the semester) that will provide a theoretical background of business structures, management norms, and cross-cultural communications patterns in the countries that will be visited. Each student must then join one of the January study trips (Destinations to be announced in September). On the trips, students will visit local businesses, subsidiaries of foreign multinationals, government officials, local business school students and others. Following the trips, students will be required to write a final paper integrating the material learned in the classroom with their experiences. The class will also have one debriefing meeting. NOTE: participation in a study trip is required to complete this course (fee charged).

Management Information Systems

NBA 600 Database Management
Fall. 3 credits. Prerequisite: some knowledge of computing and systems, e.g., COM S 211. L. Orman.
The course introduces the design, use, and management of computerized databases. Topics include physical and logical data structures, design issues, and retrieval, maintenance, and security problems. Students design, create, and use databases using various database management systems.

NBA 609 MIS Policy
3 credits. Prerequisite: some knowledge of computing and systems, e.g., COM S 211. Not offered 1997–98. L. Orman.
Design, use, and management of information systems are studied through examples. The seminar format places heavy emphasis on class discussion and presentations. All major technologies and organizational objectives are studied in the context of MIS Policy, planning, and implementation.

NBA 610 Thriving on the Information Revolution
5 credits. Not offered 1997–98. Rapidly advancing information technologies are breaking down longstanding barriers to business productivity, innovation, and distribution. The resulting era of transformative change is called the Information Revolution. The purpose of this course is to prepare students for two decades of turbulent, high-stakes decision making driven by the Information Revolution. To accomplish this the course provides: 1) A vision of the driving forces and developmental process of the Information Revolution; 2) An assessment of its many strategic implications to business, education, entertainment and government, and, 3) An approach to developing strategies to exploit the Information Revolution for competitive advantage.

NBA 612 Imaging and the Electronic Age
Fall. 3 credits. D. Greenberg.
The advances of computer graphics, computer processing power, network bandwidths and video compression technologies are forcing the merger of the telephone, television and computer industries. The influence of these technologies has created paradigm shifts that will drastically change the way we communicate, how we are educated, the way we work, design, and in essence, how we will live in the near future. This course will start by presenting historical technological advances that created major paradigm shifts for communications. Advances in computer technology emphasizing the fundamentals behind the increases in processing power, video and computer graphics capabilities, and network transmission will be presented. The latter half of the course will cover the effects of these advances on several discipline-specific areas including photography and publishing, as well as the computer industry itself. One session will be devoted to the political and legal issues rising from the rapid advances in electronic communication. The course will be especially tailored to a business school and industrial concerns and will have interactive live demonstrations of the art laboratory of the Program of Computer Graphics. No prior knowledge in computer science is required.

NBA 614 Managing in the Information Age
Fall, first half of semester. 1.5 credits. A. McAdam.
This course explores a topic that is just beginning to emerge: the implications of the explosion of the Internet and interactive multimedia communications for the way managers think and manage. It will examine the origins of the Internet and some of the forces that have led to its rapid development, noting along the way why and how it has "blindsided us" as Andy Grove of Intel and Bill Gates of Microsoft candidly state. The course will focus on specific marketing techniques being used today in pioneering applications in organizations of various kinds based in part on original case studies and on guest lecturers. Throughout the semester the student will be asked to identify new and innovative uses of modern information technologies. The course itself will evolve— even in real time— with the developments in the field.

Marketing

NBA 620 Marketing Research
Fall, spring. 3 credits. Prerequisites: NCC 501 and NCC 503, or the equivalent. V. Rao, S. Srinivasan.
The course teaches students to identify information needs for developing marketing strategies and making tactical plans. They are introduced to up-to-date methods in research design and data collection, measurement, and analysis. They gain hands-on experience with such methods through problem sets and group projects. The discussion focuses on the viewpoint of researchers with that of managers who commission research.

NBA 621 Advertising Management
3 credits. Prerequisite: NCC 503. D. Stayman.
The course is designed to give students an understanding of the advertising and promotion management process. It covers the components of a successful advertising campaign and helps students develop an appreciation of the issues involved in advertising planning and decision making. They also learn how recent social-science findings and theories can facilitate advertising management.

NBA 622 Marketing Strategy
Fall. 3 credits. Prerequisite: NCC 503. V. Rao.
The course balances theoretical and practical approaches to the development and evaluation of marketing strategies for new and established products and services. Recent research results are applied to decisions on product-market boundary definition, resource allocation, product positioning, and competitive reactions. It includes selected current topics such as brand equity, acquisitions, and divestitures. Students use case studies extensively to develop skills in strategy analysis and to enhance skills in assessing external threats and opportunities. They employ computer-assisted market strategy simulations to evaluate the effects of competing strategies. Guest speakers from industry provide a view of the operational aspects of marketing strategy.

NBA 623 Models and Methods for New Product Development
Fall, spring. 3 credits. Prerequisites: NCC 501 and NCC 503. D. Wittink.
The successful introduction of new products requires careful planning and systematic screening and testing. This course covers models and methods that are useful to managers in the development of new products (e.g., specification of products and services) and marketing of new products. Heavy emphasis is placed on the measurement of consumer preferences. Students are required to complete a group project, consisting of an in-depth study using instrument, data collection (from at least 30 respondents) and data analysis, for a self-chosen product category. The method of instruction consists of a combination of lectures and discussion of cases and articles. Performance is evaluated primarily based on exams and the group project.
NBA 625 International Marketing
Spring. 3 credits. Recommended: NCC 503. J. Katz.
International Marketing is designed to train students to take a domestic product and expand it into international markets successfully. Market selection, international market research issues, and international marketing strategy are discussed. The term project (actually submitted in three parts throughout the term) requires that students choose some product and develop a plan for taking it abroad. The course test includes a series of short (1–3 page) cases that are used as the basis of discussions. Therefore, class preparation is essential. Grading is based on the term project, the final, and class participation. Core marketing provides a useful background, but is not a prerequisite.

NBA 626 Consumer Behavior
Spring. 3 credits. A. Isen.
Topics include factors that influence response to advertising of various kinds, purchase decisions, product perceptions, response to promotion, consumer satisfaction, and the basic methodologies for understanding consumer behavior.

NBA 627 Affect and Brand Equity
Spring. 3 credits. A. Isen.
The course examines ways in which affect, or feelings, can play a role in processes related to brand equity. It focuses on the influence of affect on the development, change, and maintenance of brand perceptions and brand loyalty. Topics include brand loyalty, variety seeking, product categorization, judgment, decision making, and risk preference. Those six areas are important in choices related to brand equity and brand loyalty (e.g., choosing brand-name products or value-priced ones, staying with a brand or switching).

NBA 630 Policies for Marketing Channels
3 credits. Prerequisite: NCC 503. Not offered 1997–98. V. Kadiyali.
Marketing channels are analyzed as a chain of interdependent and interlocking organizations that produce and deliver goods and services to various types of consumers. We will look at various aspects of these relationships, such as efficiency, conflict, incentives and government intervention. Instruction consists of lectures, cases and guest speakers.

NBA 631 MARKSTRAT Simulation
Fall, second half of semester. 1.5 credits.
Prerequisite: NCC 503. V. Rao.
MARKSTRAT Simulation offers an opportunity for students to make various marketing strategy decisions in a realistic, dynamic, simulated, competitive environment. Students, working in teams, will manage a portfolio of a firm’s products for several years (periods). They will learn how to make long-term decisions (introduction of new products) and will deal with various cross-functional issues related to marketing management (e.g., research and development, production design, and budgeting). Students will develop an initial strategy statement and strategic marketing plan for their firm.

NBA 635 Marketing Models
Fall. 3 credits. Prerequisite: NCC 503. V. Kadiyali.
Students learn how to use mathematical models to solve marketing problems. The objective is to develop students’ skills in evaluating marketing models and implementing them in management practice.

NBA 637 Direct Marketing
1.5 credits. Prerequisite: NCC 503
The objective of this short course is to expose MBA students to selected contemporary issues in the area of direct marketing. In addition to providing an overview of the direct marketing industry and trends in database technology, the course will address major strategic and tactical issues in the management of direct marketing. The discussion will mainly consider the perspective of a marketer interested in employing the opportunities in direct marketing as an integral element of the marketing mix for a product/service. It will also address appropriate ethical concerns with direct marketing. To acquire a flavor of various practices in the industry, students will visit one or two direct marketing firms in New York City or its vicinity toward the end of the course.

NBA 638 Analysis of Competitive Decision Making
This course brings together methods of microeconomics analysis to competitive decision making. Specifically, we will address issues relating to optimal competitive decisions for a firm interacting with current and potential rivals. We discuss how firms can, by their choice of appropriate decisions, best signal to rivals their intentions and degree of commitment to them. We also look at sustainability, flexibility, and correction of decisions choices in the context of Nash Equilibrium. Special emphasis will be put on analysis of Stackelberg games, which lead to understanding these concepts. The dimensions of competitive strategy that we look at include product proliferation, R&D and patent policies, choice of compatibility with existing products, bundling of products, investing in capacity, vertical integration, choice of channels of distribution partners, pricing, and promotions. We also discuss problems caused in the optimal choice and implementation of firm strategies when information is imperfect. Specifically, we look at issues of moral hazard and adverse selection, and how these issues affect firm choices of strategies (e.g., pricing, choice of channel partners, etc.). Instruction includes lectures and cases.

NBA 641 Logistics and Manufacturing Strategy
Spring. 3 credits. Prerequisite: NCC 508, ORIE 410, or permission of the instructor.
L. J. Thomas.
The course is about strategic management of the values chain, from materials to customer. Students discuss operations strategy issues that are important to both manufacturing and service. The course emphasizes written and oral communication skills. About a third of the classes are spent on case studies, with small groups presenting their analyses of them. There is one mid-term examination, but the majority of the grade is evaluated based on projects and class participation. There is an option of replacing some assignments with a "live case," a project with a local company.

NBA 642 Statistical Methods in Business
3 credits. Prerequisite: good performance in NCC 501 or the equivalent. Not offered 1997–98.
Regression analysis is one of the most abused quantitative techniques in the business world. Moreover, the field of econometrics is now hard to avoid for those who want to understand the theoretical literature of many areas of business, such as finance, economics, marketing, and operations research. The course offers indispensable theoretical and practical knowledge that makes students sophisticated consumers and good practitioners of econometrics in the world of business. Topics covered are the multiple-regression-model theory of estimation and prediction, diagnosis, and the complications encountered most often, such as outliers, heteroskedasticity, multicollinearity, autocorrelation, lagged dependent variables, simultaneity, and truncated variables. Principal component analysis and probit/logit analysis, often used in business, are also covered. Heavy emphasis is placed on the analysis of datasets from the fields of business and economics. Computer packages are used throughout the course. The students must be comfortable in quantitative thinking and computer environments.

NBA 644 Quality Management
Fall. 3 credits. Prerequisite: NCC 508 or permission of the instructor. L. Robinson.
The course uses the Malcolm Baldrige National Quality Award Criteria to examine issues in managing quality in both service and manufacturing environments. Topics include an external focus on identifying and satisfying the customer, an internal focus on process redesign and improvement (including bottleneck management and the just-in-time philosophy of eliminating waste), the strategic and competitive aspects of quality improvement, human-resource issues (such as worker participation, motivation and performance measurement, and worker teams), quality and design, and selected topics in statistics and quality control (experimental design, acceptance sampling, and process control). Students will have a working knowledge of Lotus 1–2–3 or Excel software.

NBA 645 Product Development Practicum
Spring. 3 credits. J. Thomas.
This course centers on developing a major new product for firms. It will involve training in creativity by a consulting firm and readings in product development. This course will provide the opportunity to learn from many different sources, consultants, faculty, and executives.

NBA 646 Service Operations
Fall. 3 credits. Prerequisite: NCC 508. M. Lojo.
This course addresses the unique aspects of managing service operations in contrast to manufacturing enterprises. Design, marketing, evaluation, and improvement techniques will be discussed. Types of services to be examined include consumer, professional, industrial, and not-for-profit, including government and volunteer-based services. The emphasis will be on high-end, knowledge-based services that play a critical role in our economy. Traditional operations management models will be applied to services, as well as theories based in other
The course will make the necessity of homework assignments or projects, to make students take the initiative. Through facilitating this integration will be introduced. Managerial tools and useful concepts that make manufacturing for a firm's success apparent. The primary focus of the course will be on union-management productivity partnership. Students will have the opportunity, through directed readings and case discussions. The course will be offered over two full days. NBA 652 Integrating Product Design, sourcing, technology transfer and R and D issues, currency risk, and capital budgeting; operations issues affected by globalization (lead-time, just-in-time, and cost issues, including accounting practices); and international cross-functional coordination (product development in an international context, workforce management, interface with marketing, understanding the psychology of decision making to teach managers how to recognize the situations that most commonly lead to error and offers methods to control such errors. Specific applications include forecasting, pricing and promotion strategies, negotiations, the psychology of financial markets, and managerial risk taking.

NBA 650 Semester in Manufacturing Management (also ILR 670) Spring. 15 credits. Enrollment limited; permission of instructor required. J. Bradley, R. Conway, R. Matthews, T. Hammer. This is a full-time program for the semester, students will not be able to take other courses concurrently. The course is concerned with the integration of technological, human-resources, logistical, and financial considerations in producing a manufacturing enterprise that can respond quickly and effectively to market requirements. It will be taught by a team of faculty and industrial practitioners, and much of the student work will be team-oriented. There will be considerable off-campus travel for field study of a variety of manufacturing plants. Note that this course is an approved substitute for both the Production and Operations Management and Organization core courses, i.e., NCC 504 and NCC 508. Johnson School students should complete NCC 506 before taking this course.

NBA 651 Employment Relations Spring. 1 credit. T. Hammer, Batt. The course will be offered over two full days and will consist of three parts: (1) an overview of U.S. labor and employment law and its effect on today's management, (2) a case analysis of what can lead a workforce to bargain collectively over wages and conditions of employment, and (3) an examination of the psychology of decision making to teach managers how to recognize the situations that most commonly lead to error and offers methods to control such errors. Specific applications include forecasting, pricing and promotion strategies, negotiations, the psychology of financial markets, and managerial risk taking.

NBA 652 Integrating Product Design, Marketing, and Manufacturing Spring. 1 credit. J. Bradley, V. Rao, J. Thomas. The course will make the necessity of integrating marketing and manufacturing for a firm's success apparent. Managerial tools and useful concepts that facilitate this integration will be introduced. Students will take the opportunity, through homework assignments or projects, to make a more in-depth foray into the course topics.

NBA 653 Strategic Alliances: Lessons from Experience Spring. 1 credit. J. Suwinski, J. Thomas. A wide variety of strategic alliances are being used today as companies try to leverage their resources for competitive advantage. This course will overview the spectrum of alliances, examining the strategic rationale and pros and cons of each major type of alliance. The primary focus of the course will be on joint ventures as a specific form of strategic alliance, where the success rate is less than 50%. The course will develop a set of principles that have contributed to success for Corning Incorporated. The course will be taught from the perspective of the general manager of a major business unit.

Behavioral and Organizational Science

NBA 663 Managerial Decision Making Fall. 3 credits. J. Russo. All managers make decisions, usually without the aid of formal tools. Much research has shown that such intuitive decisions produce common, predictable errors. The course uses the psychology of decision making to teach managers how to recognize the situations that most commonly lead to error and offers methods to control such errors. Specific applications include forecasting, pricing and promotion strategies, negotiations, the psychology of financial markets, and managerial risk taking.

NBA 665 Managing Technology and Innovation Fall. 3 credits. Not offered 1997–98. H. Haveman. This course is designed for students who see themselves in settings where they have to develop new products or processes and for students who must implement change in existing products or processes. We discuss major issues involved in managing the introduction of new technology, including competitiveness, technology assessment, R&D strategy, and positioning. We examine how industries are transformed by new technologies and how innovations diffuse among firms. We also consider internal management issues, including such topics as the structure of innovative organizations, the design of incentive and reward systems, and the role of executive leadership. The course uses a combination of readings, lectures, discussions, case analyses, and guest lectures.

NBA 666 Negotiations Fall, spring. 3 credits. D. Sally. Negotiation is the art and science of securing agreements between two or more interdependent parties. The purpose of this course is to understand the theory and processes of negotiation and the psychology of decision making in a variety of settings. This course is designed to complement the technical and diagnostic skills learned in other courses at the Johnson School. A basic premise of the course is that while a manager needs analytical skills to develop optimal solutions to problems, a broad array of negotiation skills is needed for these solutions to be accepted and implemented. The course will highlight the components of an effective negotiation and teach students to analyze their own behavior in negotiations. The course will be largely experiential, providing students with an opportunity to develop their skills by participating in negotiations and integrating their experiences with the principles presented in the assigned readings and course discussions.

NMI AND NRE RESEARCH AND ADVANCED STUDIES

NMI 500-502 Directed Reading and Research Fall, spring. 1, 2 or 3 credits. S-U grading only. Students undertake special-interest research under the supervision of faculty members. Registration is limited to students who have the approval of their advisers and of the faculty members involved in the research.

NMI 510 Multi-Cultural Work Environments Spring. 1 credit. S-U grading only. Restricted to Johnson School students. M. Rosen, B. Mink. NMI 510 is a 1-credit, S-U, independent study course that is open to students whose summer internships will be in a country other than that of their citizenship or prior work experience. The goal of the course is to promote an understanding of the cultural assumptions we bring to the work environment and the effects of cultural differences on organizational interactions and productivity. Registration for the course occurs in the spring semester prior to the internship, and grades are posted in the following fall semester after completion of the course project (a 10-page paper). Students may register for the course after obtaining an internship offer and completing the paperwork for the course instructors. International students will obtain and process work authorization forms with the International Students Office. See Charlotte Rosen (Malott 558) for further details about the academic and immigration requirements for NMI 510.

DOCTORAL SEMINARS

NRE 502 Doctoral Seminar in Econometrics Fall. 3 credits. D. Wittink. The seminar provides a rigorous and integrative exposure to those aspects of the literature in accounting, behavioral economics, and psychology that are related to questions of accounting and auditing theory and research. This course is for Ph.D. students only.

NRE 504 Doctoral Seminar in Accounting Spring. 3 credits. Staff. The seminar provides a rigorous and integrative exposure to those aspects of the literature in accounting, behavioral economics, and psychology that are related to questions of accounting and auditing theory and research. This course is for Ph.D. students only.

NRE 507 Doctoral Seminar: Affect and Cognition 3 credits. A. Isen. The course examines research on some of the ways affect influences such thought processes as memory, decision making (including risk taking), and problem solving (including creative problem solving). Disciplines such as social psychology and economics. courses are as follows:

COURSES 307
FACULTY ROSTER

Ainslie, Andrew; Ph.D., U. of Chicago. Asst. Prof., Marketing
e.

Babes, George; Ph.D., U. of California at Berkeley. Asst. Prof., Finance

Babiak, Peter M.; Ph.D., U. of California at Berkeley. Asst. Prof., Accounting

Bradley, James R.; Ph.D., Stanford U. Asst. Prof., Production and Operations Management

Cormier, Richard W.; Ph.D., Cornell U. Emerson Electric Co. Professor of Manufacturing Management, Prof., Information Systems

D’Souza, Julia; Ph.D., Northwestern U. Asst. Prof., Accounting

Elliot, John A.; Ph.D., Cornell U. Assoc. Prof., Accounting, Associate Dean for Academic Affairs, Director of Graduate Studies

Frank, Robert J.; Ph.D., U. of California at Berkeley. Goldman Smith Professor of Economics, Ethics, and Public Policy, Prof., Economics

Gibbons, Robert S.; Ph.D. Stanford U. Charles H. Dyson Professor of Management, Prof., Economics

Greenberg, Donald P.; Ph.D., Cornell U. Jacob Gould Schurman Prof., Computer Graphics, Prof., Management Information Systems

Gukhal, Reddy, Ph.D., Columbia U. Asst. Prof., Finance

Hass, Jerome E.; Ph.D., Carnegie-Mellon U. Prof., Finance and Business Strategy

Haveman, Heather A.; Ph.D., U. of California at Berkeley. Assoc. Prof., Organizational Behavior

Hilton, Ronald W.; Ph.D., Ohio State U. Prof., Finance

Isen, Alice M.; Ph.D., Stanford U. S. C. Johnson Prof., Marketing, Prof., Psychology

Jarrow, Robert A.; Ph.D., Massachusetts Inst. of Technology. Ronald P. and Susan E. Lynch Professor of Investment Management, Prof., Finance

Kadriyali, Vrinda, Ph.D., Northwestern U. Asst. Prof., Marketing and Economics

Lee, Charles M. C.; Ph.D., Cornell U. Assoc. Prof., Accounting

Li, Haitao; Ph.D, Yale U. Asst. Prof., Finance

Libby, Robert, Ph.D., U. of Illinois. Asst. Prof., Managerial Economics

Lind, Robert C.; Ph.D., Stanford U. Prof., Economics, Management, and Public Policy

Lojo, Maurine P.; Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Operations Management

McAdams, Alan K.; Ph.D., Stanford U. Assoc. Prof., Managerial Economics

McClain, John O.; Ph.D., Yale U. Prof., Quantitative Analysis, Clifford H. Whitcomb Faculty Fellow

Michaely, Roni, Ph.D., New York U. Assoc. Prof., Finance

Nelson, Bonaly, Ph.D., Cornell U. Asst. Prof., Organizational Behavior

Nelson, Mark W.; Ph.D., Ohio State U. Assoc. Prof., Accounting, Clifford H. Whitcomb Faculty Fellow, KMCG Peat Marwick Faculty Fellow

O’Connor, Kathleen, Ph.D., Northwestern U. Asst. Prof., Management and Organizations

O’Hara, Maureen, Ph.D., Northwestern U. Robert W. Purcell Prof., Management, Prof., Finance

Orman, Levent V., Ph.D., Northwestern U. Assoc. Prof., Information Systems

Peterson, Randall S.; Ph.D., U. of California at Berkeley. Asst. Prof., Management and Organizations

Rao, Vithala R., Ph.D., U. of Pennsylvania. Deane W. Malott Professor of Management, Prof., Marketing

Robinson, Lawrence W., Ph.D., U. of Chicago. Assoc. Prof., Operations Management

Sally, David F., Ph.D., U. of Chicago. Asst. Prof., Organizational Behavior

Smidt, Seymour, Ph.D., U. of Chicago. Nicholas H. Noyes Professor of Economics and Finance

Stayman, Douglas M., Ph.D., U. of California at Berkeley. Assoc. Prof., Marketing

Swaminathan, Bhaskar, Ph.D., U. of California at Los Angeles. Asst. Prof., Finance

Tasker, Sarah, Ph.D., MIT. Asst. Prof., Accounting

Thomas, I. Joseph, Ph.D., Yale U. Nicholas H. Noyes Professor of Manufacturing, Associate Dean for Academic Affairs, Director, Executive Development Program

Waldman, Michael, Ph.D., U. of Pennsylvania. Prof., Economics

Wittink, Dick R., Ph.D., Purdue U. Henrietta Johnson Louis Prof., Management, Prof., Marketing and Quantitative Methods

LECTURERS

Highfield, Richard A., Ph.D., U. of Chicago. Sr. Lect. Economics, Asst. Dean, Director of the MBA Program

Kamps, Paul M. Eng., Cornell U. Lect., Management Information Systems

Katz, Jan, Ph.D., Massachusetts Inst. of Technology. Sr. Lect., International Business and Marketing

Matthews, Ronald W., Sr. Lect., Operations Management

Mink, Barbara E., M.A., Cornell U. Sr. Lect., Management Communications

Pike, Alan S., M.A., Cornell U. Sr. Lect., Management Communications

Rosen, Charlotte, Ph.D., Cornell U. Sr. Lect., Coordinator, Management Communications

ADJUNCT AND VISITING FACULTY

Diz, Fernando, Visiting Assoc. Prof., Finance

Pucik, Vladimir, Ph.D., Columbia U. Prof., Industrial and Labor Relations

Schuler, Richard E., Ph.D., Brown U. Prof., Economics, Prof. Civil & Environmental Engineering

Stark, David, Ph.D., Northwestern U. Assoc. Prof., Sociology

Suwinski, Jan H., Sr. Lect. in Operations Management

Thomas, William, MBA, Harvard. Lect., Management
DIVISION OF NUTRITIONAL SCIENCES

ADMINISTRATION
Cutberto Garza, director
Carole Bisogni, associate director for academic affairs
Gerald Combs Jr., director of graduate studies, Field of Nutrition

THE DIVISION
Nutritional Sciences draws upon the chemical, biological, and social sciences to understand the complex relationships among human health, nutritional status, food and lifestyle patterns, and social and institutional environments. Understanding these relationships includes the study of the metabolic regulation and function of nutrients, nutrient requirements through the life span, role of diet in reducing risk of chronic disease, nutritional quality of foods, and interventions and policies designed to promote nutritional health of individuals and populations.

The focus of this broad field of study at Cornell is the Division of Nutritional Sciences, which brings together specialists from many disciplines. The faculty are involved in undergraduate and graduate teaching, research, and extension of research-based knowledge throughout New York State, the nation, and the world.

The division is affiliated with both the College of Human Ecology and the College of Agriculture and Life Sciences. An undergraduate program in Nutritional Sciences is offered through the College of Human Ecology, and an undergraduate program, Nutrition, Food, and Agriculture, is offered in the College of Agriculture and Life Sciences. In 1997 a new undergraduate program in Human Biology, Health, and Society was established in the College of Human Ecology. Graduate study is administered through the Field of Nutrition, which includes faculty members throughout the university.

FACILITIES
Most of the faculty members of the division work in Savage Hall and Martha Van Rensselaer Hall. In addition to housing offices, classrooms, and seminar rooms, those buildings contain research facilities, specialized laboratories, a human metabolic research unit, and computer facilities. The division’s Learning Resource Center in Martha Van Rensselaer Hall is used by students for individual study and for small group discussions. In addition to printed and audiovisual materials, the Learning Resource Center contains two computers enabling students to have access to specialized software. Savage Hall also has a graduate reading room.

UNDERGRADUATE PROGRAMS
The Division of Nutritional Sciences offers three programs leading to a B.S. degree:

**Nutritional Sciences**, College of Human Ecology: This program provides students with strong training in chemistry and biology and a strong foundation in the broad field of nutritional sciences. Students can prepare for a variety of career interests including medicine and other health careers, fitness and sports nutrition, nutrition counseling, clinical nutrition, dietetics, nutritional biochemistry, community nutrition, and nutrition education.

**Nutrition, Food, and Agriculture**, College of Agriculture and Life Sciences: This program is for students who desire strong training in human nutrition in combination with supportive coursework in agriculture and the life sciences. Strong preparation in biology, chemistry, and math is required. Students in the Nutrition, Food, and Agriculture program supplement the nutrition curriculum with courses in such areas as food science, animal science, plant science, advanced biology, business and economics, education, and communication. Students can prepare for a variety of career interests through this program.

**Human Biology, Health, and Society**, College of Human Ecology: Established in 1997, this program is for students who want to acquire a strong foundation in biology and to explore human health issues from the perspectives of both biology and the social sciences. Students complete a rigorous curriculum in the natural sciences and then focus their studies on health issues of their choice through the wide array of courses offered in the College of Human Ecology. Students can explore such topics as gene expression, metabolism, disease states, biological and social aspects of growth and development, and policies and programs influencing health.

THE CURRICULUM
Undergraduate students in these three programs complete the requirements of their colleges as well as the courses required by the program of their specific interests.

All three undergraduate programs offered by the division require a strong foundation in chemistry and biology, including introductory chemistry and biology, organic chemistry, biochemistry, and physiology. A minimum competency in college algebra is required with additional math and/or statistics required for some programs and career paths. Students in the Human Biology, Health, and Society major also complete a course in physics and two additional courses in advanced biology.

The Nutritional Sciences major and the Nutrition, Food, and Agriculture program require the completion of five core courses: Nutrition and Health: Concepts and Controversies (NS 115); Social Science Perspectives on Food and Nutrition (NS 245); Nutritional and Physicochemical Aspects of Foods (NS 345); Physiological and Biochemical Bases of Nutrition (NS 351); and Methods in Nutritional Sciences (NS 352). Students in these programs also must select a minimum of nine credits in advanced courses in nutritional sciences.

The Human Biology, Health, and Society major requires a minimum of six credits from courses that integrate biology and the social sciences as they examine health issues. In addition, students must also complete nine credits of advanced electives in courses focused on human biology, health, and society.

Undergraduate students in these three programs have a faculty advisor in the Division of Nutritional Sciences. Regular student-advisor conferences are required at least twice a year. Advisers help students plan their course schedules and can suggest opportunities for individual study or experience outside the classroom.

For all three undergraduate programs, correct sequencing of biology, chemistry, and/or nutrition courses is very important. Students considering these programs should get detailed information about course requirements from the division's Academic Affairs Office, 309/335 MVR.

CAREER OPTIONS AND COURSE PLANNING
Requirements for the three programs are the minimum set of courses necessary for a bachelor's degree in these fields. Students should supplement the requirements with elective courses and other learning experiences that will prepare them for entry-level jobs or advanced study in their field(s) of interest. A summary of suggested areas from which students can choose electives for different career interests follows.

**Medicine and Other Health Careers:** Recommended courses for pre-med students include calculus and two terms of physics. Specific information about medical school admissions requirements can be obtained from the university’s Health Careers Office, 203 Barnes Hall. Students interested in other health careers should acquire specific information about the requirements for their interests. Courses of interest may include those related to the biological and social determinants of health, human growth, development, and behavior through the life course; interpersonal communications; advanced biology; sociology; psychology; and ethics.

**Dietetics:** Students who wish to work in the areas of clinical nutrition, nutrition counseling, sports nutrition, community nutrition, or food and nutrition management should complete the academic requirements for The American Dietetic Association (ADA). Courses in foods, nutrition and disease, microbiology, manage-
ment, statistics, and nutritional care are added to the courses required for the nutrition programs. For additional information about meeting ADA requirements see Gertrude Armbruster, 366 MVR.

Exercise, Nutrition, and Health Promotion: Students should complete a course in physiology and a course in anatomy after introductory biology. Students can complete the Applied Exercise Science Concentration at Ithaca College, which includes courses in kinesiology, exercise physiology, and biomechanics. Students who wish to apply to graduate schools to study physical therapy should complete a year of introductory physics; a course in statistics; a course in ethics; and three courses in psychology. Students should check the specific requirements for schools of interests. For information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office, 309 MVR.

Biomedical Research/Nutritional Biochemistry: Recommended electives include calculus, physics, genetics, advanced biology and chemistry, and nutritional sciences courses related to the physiology, biochemistry, and metabolism of different nutrients and disease states.

Public Health and Community Nutrition: Recommended electives include courses in communications, education, human development, community nutrition, and International Food Economics.

Nutrition, Food, and Business: Recommended electives include courses in marketing, economics, communications, hotel administration, and food science.

Nutrition, Food, and Agriculture: Recommended electives include courses in food science, animal science, plant sciences, international agriculture, agricultural economics, biological sciences, and rural sociology.

International Nutrition: Recommended electives include courses in language, anthropology, agricultural economics, policy, economics, rural sociology, international agriculture, and nutritional sciences related to maternal and child health and problems of developing nations.

Biology and Behavior: Recommended electives include courses in psychology, human development, and neurobiology.

Food, Nutrition, and Health Policy: Recommended electives include courses in economics, sociology, government, policy analysis, and management.

SPECIAL EXPERIENCES

Undergraduates can enhance their experiences in Nutritional Sciences or Human Biology, Health, and Society by participating in structured field experiences or study abroad. Academic credit can be earned for field experiences in a community agency, health-care facility, or business. The Urban Semester in the College of Human Ecology provides students an opportunity to study and gain field experience in New York City. All students intending to spend a term off campus in field experience or study abroad must plan their courses well in advance to be sure that all program requirements can be met.

INDEPENDENT STUDY ELECTIVES

Independent study courses (NS 400, 401, 402) can be used to obtain credit for more diverse or intensive experience than the classroom can offer, whether this involves laboratory work, library research, or field study. Any student interested in independent study should obtain the sponsorship of a faculty adviser and the approval of the associate director for academic affairs or consider applying to the honors program.

HONORS PROGRAM

The honors program, leading to a B.S. degree with honors gives official recognition to students who have demonstrated excellence in their academic work and their capacity for independent study.

In addition to fulfilling the requirements for a major, students in the honors program take courses in designing and evaluating research, complete an original piece of research, and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact Michael Kazarinoff, 230 Savage Hall.

COURSES RECOMMENDED FOR NONMAJORS

Courses in nutritional sciences can strengthen programs of study in biological sciences, biology and society, communications, food science, human development, human services, and other fields.

NS 115, Nutrition and Health: Concepts and Controversies, is open to all students. After NS 115, nonmajors with limited backgrounds in chemistry and biology may elect NS 247, Food for Contemporary Living; NS 262, Nutrients and Human Biology and Evolution; NS 306, Nutritional Problems of Developing Nations; NS 315, Obesity and the Regulation of Body Weight; NS 347, Human Growth and Development: Biological and Behavioral Interactions; NS 349, Geriatric Nutrition; NS 380, Integrating Food Systems and Human Nutrition Needs; NS 457, National and International Food Economics.

Nonmajors with strong backgrounds in chemistry and the biological sciences may consider NS 331, Physiological and Biochemical Bases of Human Nutrition, as well as many advanced nutritional sciences courses, such as NS 345 Physicochemical and Nutritional Aspects of Foods; NS 421, Nutrition and Exercise; and NS 441, Nutrition and Disease.

GRADUATE PROGRAMS

Graduate study is administered by the Field of Nutrition, a group of more than fifty faculty members from throughout the university who have a common interest in nutritional problems. In the M.S. and Ph.D. degree programs, students may specialize in animal nutrition, human nutrition, international nutrition, nutritional biochemistry, foods, or general nutrition. Research is emphasized in all graduate programs. Field experience may be a component of concentrations in community, international and public-health nutrition, and nutrition education.

The specialties and interests represented by faculty in the Field of Nutrition provide almost unlimited opportunity for graduate study. Cornell's extensive laboratory and agricultural facilities ensure that students interested in experimental nutrition have exceptional choice and thorough training. As the largest faculty in the country devoted to the study of human nutrition, the field includes specialists in biochemical, metabolic, epidemiological, and sociocultural research. Opportunities to work with community and federal agencies are available to students interested in applied nutrition and public policy, and students in international nutrition are expected to conduct their thesis research abroad.

For more information about the graduate program, interested persons may write for the brochure Graduate Study in Nutrition, available from the Director of Graduate Studies, Field of Nutrition, Cornell University, MVR Hall, Ithaca, New York 14853–4401; phone (607) 255–4410.

COURSES

NS 115 Nutrition and Health: Concepts and Controversies

This course provides students enrolled in NS 115 individualized assistance in many skills used in NS 115 including using computers to analyze diets, using electronic mail, finding and using scientific references, and reviewing material presented in NS 115 lectures.

NS 120 Nutrition and Health: Issues, Outlines, and Opportunities

Spring. 1 credit. S–U grades only. Limited to 120 freshmen, sophomores and juniors, others by permission of instructor. C. Bisogni. W 12:20.

A course for students interested in exploring careers in the broad fields of food, nutrition, and health. Experts representing different areas will discuss their work, focusing on current issues and trends as well as the requisite knowledge and skills. This course describes the many disciplines that are drawn upon in the solution of human problems related to field, diet, and health as well as the related intellectual and career opportunities. This is not an introductory nutrition course for nonmajors.

NS 222 Maternal and Child Nutrition

Spring. 3 credits. Prerequisites: NS 115 and a college biology course or permission of the instructor. S–U grades optional. Limited to 25 students. Preregistration is required in room 309 Martha Van Rensselaer Hall. C. Garza. M W F 1:25.
Involves the study of nutritional requirements in pregnancy, lactation, infancy, and childhood through adolescence. Topics include the relationship between maternal diet and pregnancy outcome; analysis of different methods of infant feeding; and nutritional and pregnancy outcome; analysis of different biases that influence meal planning, selection, and preparation of food, such as resources available; ethnic, cultural, and behavioral considerations; food presentation, sensory quality evaluation. Safe food handling practices and storage procedures included.

**NS 245 Social Science Perspectives on Food and Nutrition**

Fall. 3 credits. Prerequisite: NS 115. Limited to nutrition majors. Letter grade only. D. Sanjuk, J. Sobal. T R 10:10-11:25. Theories, concepts, and methods from several social science disciplines will be applied to food and nutritional problems afflicting poor nations, the functional consequences of these problems on individuals and societies, and the types of programs that can be implemented to improve health and nutrition.

**NS 247 Food for Contemporary Living**

Fall and spring. 3 credits. Laboratory sections limited to seniors. Laboratory preregistration during course pre-registration required in 309 Martha Van Rensselaer Hall. Laboratory coat required. Division faculty. Fall. Lec M 12:20; lab T R 2:15-4:35; spring. Lec T 9:05; labs T R 10:10-12:40 or T R 2:15-4:35. Emphasizes integration of sound nutritional practice in the scientific concepts and techniques of food preparation. Priority will be given to factors that influence meal planning, selection, and preparation of food, such as resources available; ethnic, cultural, and behavioral considerations; food presentation, sensory quality evaluation. Safe food handling practices and storage procedures included.

**NS 252 Antitoxins and Cells**

Spring. 3 credits. Prerequisites: one semester of biology and chemistry. N. Noy. M W F 9:05. The course will focus on the relationships of the cell with the environment. Examples from three general areas will be considered: 1. Mechanisms of uptake of nutrients by bacterial and by mammalian cells. 2. Intracellular outcomes of nutritional stimuli: effects on metabolism and gene expression, toxicity. 3. Pathways of neutralization: detoxification, secretion, DNA repair.

**NS 275 Human Biology and Evolution (also Biological Sciences 275 and Anthropology 275)**

Fall. S-U grades optional, with permission of either instructor. Offered alternate years. Not offered 1997-98. See BIO SCI 275 for course description.

**NS 276 Motivation (also Psychology 276)**

Spring. 3 credits. Not offered 1997-98. E. M. Blas See PSYCH 276 for course description.

**NS 300 Special Studies for Undergraduates**

Fall or spring. Prerequisites: permission of instructor. S-U grades optional. DNS faculty. Special arrangements to establish equivalency for courses not transferred from a previous major or institution. Students prepare a description of the study they want to undertake on a form available from the Student Services Office. The form, signed by both the instructor directing the study and the associate director for academic affairs, is filed at course registration or during the change-of-registration period.

**NS 306 Nutritional Problems of Developing Nations**

Fall. 3 credits. Prerequisites: NS 115. S-U grades optional. J-P. Habicht, M. C. Latham, J. D. Haas. T R 10:10. The course is designed for undergraduates interested in the nutritional problems of developing countries. Attention is given to the array of nutrition problems encountered, the causes of hunger and malnutrition, the epidemiology of the major nutritional problems afflicting poor nations, the functional consequences of these problems on individuals and societies, and the types of programs that can be implemented to improve health and nutrition.

**NS 315 Obesity and the Regulation of Body Weight (also Psychology 613)**

Spring. 3 credits. Prerequisites: NS 115. Psych 101. S-U grades optional. Offered alternate years. D. Levitsky. T R 1:30-3:00. This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include: the biochemistry of eating behavior, genetics of obesity, role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

**NS 321 Nutrient Control of Mammalian Gene Expression**

Spring. 2 credits. Prerequisite: college chemistry and biology, biochemistry recommended but not required. P. Stover. T R 11:15. This introductory molecular biology course focuses on the mechanisms used by mammals to alter gene expression in changing nutrient environment. Fundamental concepts of eukaryotic DNA structure, function, and gene expression are covered. Key aspects of mammalian biochemistry, metabolism, and physiological chemistry integrated, emphasizing the relationships of these processes to mammalian gene expression. Topics include the basic principles of biotechnology and the application of the techniques to experimental animal nutrition and medicine.

**NS 331 Physiological and Biochemical Bases of Human Nutrition**

Spring. 4 credits. Prerequisites: Biological Sciences 350 or 351 or equivalent. S-U grades optional. M. Stipanuk, C. McCormick. Lec M W F 10:10; disc, W or R. This course examines the biochemical and physiological bases of human nutritional requirements. The instructors use an integrated approach to cover the digestion and metabolism of the nutrients (carbohydrates, proteins, lipids, vitamins, and minerals). Metabolic and chronic diseases that are related to nutrition are discussed throughout the semester. The discussion sections provide an opportunity to examine in greater depth selected topics covered in lecture.

**NS 332 Methods in Nutritional Sciences**

Fall and spring. 3 credits. Each section limited to 18 students. Prerequisites: NS 245, NS 345, NS 331 preferred or concurrent registration. Laboratory preregistration during course preregistration required in room 309 Martha Van Rensselaer Hall. One evening prelab to be scheduled. J. T. Brenna, M. N. Kazarinoff. Fall. Lec M 12:20; lab M W 1:25-4:00 or M W 6:30-9:00 or T R 10:10-11:10. Spring. Lec M 12:20; labs M W 1:25-4:00 or T R 10:10-11:10 or M W 6:30-9:30. Laboratory introduction to principles and analytical techniques of nutritional research. Emphasis is on analytical concepts and skills required to determine nutrient function and nutritional status of individuals. Topics include methods of nutrient metabolism, sampling and enzyme analysis in body fluids, and methods for assessing individual food intake and nutritional status.

**NS 341 Human Anatomy and Physiology Lab**

Spring. 4 credits. Letter grade only. Prerequisites: college biology, NS 115 recommended. Limit 120. V. Utermoehlen. Lec W F 12:20; lab W or R or F, 9:05-11:00 or 2:30-4:25. Introduction to human anatomy and physiology with particular emphasis on aspects of relevance to nutritional sciences and health maintenance. All major organ systems will be covered. Laboratories will emphasize location, description and recognition of anatomical structures and testing of physiological function with an emphasis on tests of nutritional and medical relevance.

**NS 345 Nutritional and Physicochemical Aspects of Food**

Spring. 3 credits. Prerequisite: college course in organic chemistry or biochemistry. S-U grades optional. R. Parker, B. Lewis. T R 1:25-2:40. A study of the nutritional, physical and chemical properties of foods including composition, food structure, enzymic and nonenzymic phenomena, and processing/preparation aspects. Issues related to food safety, regulation, and food composition data bases will also be discussed.

**NS 347 Human Growth and Development: Biological and Behavioral Interactions (also Human Development and Family Studies 347 and Biology and Society 347)**

Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent. Human Development and Family Studies 115 or Psychology 101 or equivalent. Offered alternate years. Not offered 1997-98. J. Haas, S. Robertson. This course is concerned with the interrelationships between physical and psychological growth and development in humans, particularly during infancy. Intrinsic and extrinsic causes of variations in growth, development, including various forms of malnutrition, are considered. In addition, the consequences of early growth and its variation for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.

**NS 349 Geriatric Nutrition**

Fall. 3 credits. Prerequisite: NS 115. Not offered 1997-98. Division faculty. T R 2:30-3:45. Aims of the course are to acquaint students with effects of aging on nutritional needs; to teach them methods of nutritional assessment that are appropriate for use with the elderly; and to give them information on nutritional
interventions that have been shown to have positive effects on the nutritional and health status of older individuals.

**NS 361 Biology of Normal and Abnormal Behavior**  
Fall 3 credits. Prerequisites: Biological Sciences 101-102 and Psychology 101, or permission of the instructor. A fundamental knowledge of biology and psychology is essential. S-U grades optional. Limited to juniors and seniors. B. Strupp. M W F 9:05.  
A critical evaluation of biological factors thought to influence behavior and/or cognitive functioning. Biological, psychological, and societal influences will be integrated. Topics include nutrition and behavior, psychiatric disorders, developmental exposure to environmental toxins and drugs of abuse, and biopsychology of learning, memory, intelligence, and related cognitive disorders.

**NS 378 Food, Nutrition, and Service Management**  
Fall 3 credits. Prerequisites: NS 115, NS 247 or permission of instructor. P. Tennant. T R 8:40-9:55.  
The application of management principles and theory to foodservice operations and nutrition services. Distribution systems and the concept of organization are emphasized. Emphasis is placed on leadership development, decision making, problem solving as related to procurement, production, distribution, and quality assurance in food and nutrition services. Recipe and menu development projects show the interrelationships of nutrition, labor, equipment, and environmental concerns. Marketing strategies and implementation are discussed.

**NS 380 Integrating Food Systems and Human Nutrition Needs**  
Spring. 2 credits. Prerequisites: NS 115 or Food 200 or An Sc. 100. Letter grade only. G. Combs. T R 8:40-9:55.  
A student-centered course that employs case studies to address concepts linking human nutrition and health issues to those involving systems of food production and distribution. Student teams will investigate new and existing technological options within food systems to address domestic or international human nutrition needs.

**NS 398 Honors in Nutritional Sciences**  
Fall. 1 credit. Limited to students admitted to the division honors program. S-U grades only. M. Kazarinoff. T 12:20.  
Research design. Analysis of research papers on selected topics.

**NS 400-401-402-403 Special Studies for Undergraduates**  
Fall or spring. Credits to be arranged. S-U grades optional. Division faculty.  
For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of nutritional sciences not otherwise provided through course work in the division or elsewhere at the university. Students prepare a description of the study they want to undertake on a form to be signed by the instructor directing the study and the associate director for academic affairs. The form, available from the Student Services Office, is filed at course registration or within the change-of-registration period. To ensure review before the close of the course registration or change-of-registration period, students should submit the special-studies form to the associate director for academic affairs as early as possible.

**NS 400 Directed Readings**  
For study that predominantly involves library research and independent reading.

**NS 401 Empirical Research**  
For study that predominantly involves data collection and analysis or laboratory or studio projects.

**NS 402 Supervised Fieldwork**  
For study that involves both responsible participation in a course-related setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**NS 403 Teaching Apprenticeship**  
For study that includes assisting faculty with instruction.

**NS 421 Nutrition and Exercise**  
Spring. 3 credits. Prerequisites: Bio S 311 or NS 361 and NS 115 or NS 331. S-U grades optional. Division faculty. M W F 11:15.  
This course will acquaint students with the interaction between nutrition, exercise, and athletic performance. Topics will cover the biochemistry of nutrient requirements to the cellular mechanisms that regulate the adaptive responses to exercise. Students will learn nutritional counseling techniques in educating the recreational and professional athlete, coach, and trainer.

**NS 441 Nutrition and Disease**  
Fall. 4 credits. Prerequisites: NS 331 and a human physiology course. S-U grades optional. V. Uhrmochlon. M W F 10:10; F 8:00.  
Study of the anatomical, physiological, and metabolic abnormalities in acute and chronic illness, and the role of nutritional therapy in their prevention and care. Topics covered include: nutritional assessment, nutritional pharmacology, starvation, infection, trauma, cancer, diabetes mellitus, and renal, cardiovascular, pulmonary, skeletal, neurological, liver, and gastrointestinal disorders.

**NS 442 Implementation of Nutrition Care**  
Fall. 3 credits. Limited enrollment. Prerequisites: NS 380 or concurrent registration in NS 441 (or equivalent background in either course). Laboratory preregistration during course preregistration required in room 309 Martha Van Rensselaer Hall. S-U grades optional. Division faculty. Lec M W F 9:05; lab 1 T 2:30-4:20; lab 2 R 11:15-1:10.  
Development of skills necessary to implement nutrition care plans: interviewing and analysis of the major economic factors and requirements for amino acids. A critical evaluation of biological factors thought to influence behavior and/or cognitive functioning. Biological, psychological, and societal influences will be integrated. Topics include nutrition and behavior, psychiatric disorders, developmental exposure to environmental toxins and drugs of abuse, and biopsychology of learning, memory, intelligence, and related cognitive disorders.

**NS 457 National and International Food Economics**  
Spring. 3 credits. Limited to 27 students. Prerequisites: NS 378, Micro 286 or equivalent. Laboratory preregistration required in room 309 Martha Van Rensselaer Hall. White lab coat is required. Approximately $25.00 will be needed for special supplies/activities. P. Tennant. Lec M W 9:05; labs, M T W 1:30-6:00. Students will gain experience in facility design; equipment selection, use, and care; job analysis and evaluation; human resources planning; management of financial resources; menu planning, recipe development, volume food production; computer-assisted management; employee training; applied safety and sanitation standards and will develop other skills required to operate/manage a foodservice program. The application of total quality management in food service operations and general facility management is stressed. Laboratories will be arranged through Cornell Dining.

**NS 488 Applied Dietetics in Foodservice Systems**  
Spring. 3 credits. Limited to 27 students. Prerequisites: NS 378, Micro 286 or equivalent. Laboratory preregistration required in room 309 Martha Van Rensselaer Hall. White lab coat is required. Approximately $25.00 will be needed for special supplies/activities. P. Tennant. Lec M W 9:05; labs, M T W 1:30-6:00. Students will gain experience in facility design; equipment selection, use, and care; job analysis and evaluation; human resources planning; management of financial resources; menu planning, recipe development, volume food production; computer-assisted management; employee training; applied safety and sanitation standards and will develop other skills required to operate/manage a foodservice program. The application of total quality management in food service operations and general facility management is stressed. Laboratories will be arranged through Cornell Dining.

**NS 498 Honors in Nutritional Sciences**  
Spring. 1 credit. Limited to students admitted to the division honors program. S-U grades optional. Division faculty. Lee M W 9:05; labs, M T W 11:15-1:10.  
Juniors (Mondays). Discussion of research opportunities in nutrition and orientation to research facilities. Delineation of honors research problems in consultation with faculty mentors. Seniors (Fridays). Workshop sessions on honors thesis and oral presentation preparation.

**NS 499 Honors Problem**  
Fall and spring. Credits to be arranged. Limited to graduate students recommended by their chair and approved by the instructor in charge. S-U grades optional. Division faculty. An independent literature, laboratory, or field investigation. Students should plan to spread the work over two or more semesters.

**NS 600 Special Problems for Graduate Students**  
Fall or spring. Credit to be arranged. Limited to graduate students recommended by their chair and approved by the instructor in charge. S-U grades optional. Division faculty. Emphasis on independent advanced work. Experience in research laboratories in the division may be arranged.

**NS 601 Proteins and Amino Acids (also Animal Science 601)**  
A course emphasizing the dynamic aspects of protein digestion and absorption, amino acid transport, and amino acid and nitrogen metabolism and their relationships to the requirements for amino acids.

**NS 602 Lipids (also Bio Sci 619)**  
Fall. 2 credits. A. Bensadoun. T R 11:15.  
Advanced course on biochemical, metabolic, and physiological aspects of lipids, more specifically lipid transport. Topics covered include lipid methodology, structure of plasma lipoproteins, molecular biology and cell biology of apolipoproteins, lipoprotein
receptors, lipid transfer factors, lipolytic enzymes, and atherosclerosis.

[NS 603 Mineral Nutrition: Metabolic, Health, and Environmental Aspects (also An Sc 603)]
Fall. 2 credits. Letter grade only. Prerequisites: biochemistry, physiology, and nutrition. X. G. Lei, G. F. Combs, Jr. M W 10:10. Offered alternate years, next offered 1998-99.

Course emphasizes the metabolic roles and environmental impacts of mineral nutrition in animal, human, and food systems. Team-taught lectures include general biochemical and physiological aspects of mineral metabolism and specific mechanisms of gene expression and regulatory steps in mammal health disorders associated with individual elements. Methodology and facility of mineral research is also discussed.

NS 604 The Vitamins (also An Sc 604)
Fall. 2 credits. G. Combs. T R 10:10.

Text-based discussion sessions on nutritional aspects of the vitamins, including recent developments in nutritional and biochemical interrelationships with other nutrients and metabolites.

NS 607 Nutrition as an Integrating Discipline: Concepts and Paradigms
Fall. 3 credits. Prerequisite: some prior coursework or experience in nutrition, or permission of the instructor. M. Kazarinoff, J-P. Habicht, and Division faculty. M W F 10:10.

An overview course for beginning graduate students in nutrition and related disciplines to introduce them to the full breadth of nutritional science disciplines, including quantitative and qualitative sciences. Also suitable for seniors as an integrating course. The course presents concepts and paradigms of molecular biology, biochemistry, clinical nutrition, epidemiology, anthropology, economics, program planning and administration, policy development, and ethics. This semester the course uses Vitamin A as the example. Emphasis will be placed on the integration of fundamental knowledge to solve nutrition problems in human societies.

NS 611 Molecular Toxicology (also Toxicology 611)
Spring. 3 credits. Prerequisite: Toxicology 610 and a full-year 400-level course in biochemistry or equivalent. S-U grades only. S. Bloom, R. Dietert. TBA. Not offered 1997-98.

[NS 612 Methods of Assessing Physical Growth in Children]

A laboratory course to train students in methods and techniques used to assess the physical growth and development of children.

The methods explored are those applicable for field, community, and clinical studies and cover anthropometry, body composition, skeletal age, manurial indices, physical fitness, and energy expenditure.

NS 614 Topics in Maternal and Child Nutrition
Fall. 3 credits. Prerequisites: NS 331, and 222 or 347, Biological Sciences 311, and permission of instructor. K. Rasmussen. T 8:30-9:55.

Advanced course on the role of nutrition during pregnancy and lactation. Feeding and growth of infants and children in health and disease is considered. Critical evaluation of current literature is emphasized via lecture, discussions, and a term paper.

NS 617 Teaching Seminar
Fall or spring. 0 credit. Limited to division graduate students and students who have permission of the instructor. S-U only. C. Bisogni, D. Way.

Individualized instruction focusing on development of teaching skills for guiding classroom learning in lecture, discussion, and laboratory settings. Preparation of content, presentation, and interaction techniques and evaluative methods are emphasized in relation to the student's specific teaching assignment. Videotape simulations provide opportunity for practice and analysis of teaching behaviors.

NS 618 Teaching Experience
Fall or spring. 0 credit. Limited to division graduate students and students who have permission of instructor. S-U only. C. Bisogni.

Designed to provide experience in teaching nutritional sciences by direct involvement in college courses under supervision of a faculty member. The aspects of teaching and the degree of involvement vary, depending on the needs of the course and the experience of the student.

NS 619 Field of Nutrition Seminar (also Animal Science 619)
Fall or spring. 0 credit. S-U only. Faculty and guest lecturers. M 4:00.

Lectures on current research in nutrition.

NS 620 Food Carbohydrates (also Food Science 620)
Spring. 2 credits. Prerequisites: Biologica Sciences 330 or equivalent. Letter grades only. Offered alternate years. J. Brady, B. Lewis. T R 10:10.

A consideration of the chemistry of carbohydrates, including sugars and complex carbohydrates (starches, pectins, hemicelluloses, gums, cellulose, and glycoconjugates). Emphasis is on intrinsic chemistry, functionality in food systems, and changes occurring during food processing and storage.

NS 626 Special Topics in Food
Fall. 2 credits. B. Lewis. TBA.

Current research related to basic concepts of foods and health issues.

[NS 635 Mechanisms of Metabolic Regulation and Mammalian Gene Expression (also BioBM 638)]

Molecular mechanisms by which sensory, hormonal, and nutritional inputs cause changes in enzyme activity in order to regulate metabolic transformations. Gene expression, protein modification, and allosteric effects will be emphasized using examples from mammalian systems. Identification and characterization of regulatory steps in metabolism will be considered from both theoretical and practical aspects.

NS 636 Integration and Coordination of Energy Metabolism (also Biological Sciences 637)
Fall. 3 credits. Prerequisites: Biological Sciences 330 and 331, or equivalent. M W F 9:05.

The dynamics of energy metabolism in humans and higher animals are developed through characterizations of how the metabolic components support the structure and function of the individual tissues. Mechanisms that control and coordinate basic energy metabolism within and between organs are analyzed in the context of selected physiological and pathological stresses.

NS 637 Epidemiology of Nutrition
Spring. 3 credits. Limited to graduate students. Prerequisites: Biometry 601 and concurrent registration in Biometry 602 or NS 641 or equivalent knowledge about the nutritional aspects of growth and development and about nutritional biochemistry. J-P. Habicht. TBA.

Course covers principles of nutritional epidemiology, impact assessment of nutrition intervention programs, and nutritional surveillance. Teaching principles of using nutritional information for decision making, including the levels of evidence about nutrition and health and making decisions. The course shows how the biochemistry and physiology of nutrition can be related to epidemiological assessment and research strategies.

[NS 639 Epidemiology Seminar (also Statistics and Biometry 639)]
Spring. 3 credits. Offered for credit. Limited to graduate students planning field intervention studies; by permission of instructor. Prerequisite: NS 637. J-P. Habicht. TBA.

Covers the meta-analysis, design, measurement, and analytic issues involved in developing, implementing, and analyzing studies of field interventions with nutritional impact.

NS 639 Epidemiology Seminar (also Statistics and Biometry 639)
Spring. 0-1 credit. Limited to graduate students, others by permission of instructor. Contact Department of Biometry 255-7551 for permission and credit information. S-U grades only. P. Cassano. M 12:20. Not offered 1997-98.

This course will develop skills in the preparation and interpretation of epidemiological data by discussing current research topics and issues.
The goal of the course is to help students gain an understanding of the statistical models and methods that are used in research on nutritional interventions. The seminar program covers varied topics in nutrition intervention, including methodologies for assessing the impact of nutrition interventions and the importance of nutritional interventions in developing countries. Presentations of original articles pertinent to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study on a agreed topic. Because the topics change, the course may be repeated for credit.

This option is designed for graduate students, mainly those with a concentration in international nutrition, who wish to become familiar with some specific topic related to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study. Topics covered include methodologies for assessing the impact of nutrition interventions and the importance of nutritional interventions in developing countries. Presentations of original articles pertinent to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study. Topics covered include methodologies for assessing the impact of nutrition interventions and the importance of nutritional interventions in developing countries. Presentations of original articles pertinent to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study.

A discussion of the most current developments in various areas of toxicological research and testing. Faculty and students will participate jointly in evaluating research findings and provide seminars and discussion of such material. For information regarding topic, instructor, and credit, contact the Office of the Graduate Field of Environmental Toxicology.

This seminar is designed for students who want to become familiar with some specific topic related to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study. Topics covered include methodologies for assessing the impact of nutrition interventions and the importance of nutritional interventions in developing countries. Presentations of original articles pertinent to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study. Topics covered include methodologies for assessing the impact of nutrition interventions and the importance of nutritional interventions in developing countries. Presentations of original articles pertinent to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study. Topics covered include methodologies for assessing the impact of nutrition interventions and the importance of nutritional interventions in developing countries. Presentations of original articles pertinent to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study. Topics covered include methodologies for assessing the impact of nutrition interventions and the importance of nutritional interventions in developing countries. Presentations of original articles pertinent to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study.
The goal of this course is to provide an integrative capstone learning experience for advanced graduate students with majors or minors in nutrition. Groups of students will focus on a series of special problems in nutrition drawn from those currently faced by nutrition professionals. Special problems may involve assuming the role of consultants, expert committee members or peer-reviewers who are charged with answering questions or formulating recommendations related to research, programs, or policies.

**NS 899 Master’s Thesis and Research**
FALL OR SPRING. CREDIT TO BE ARRANGED.
PREREQUISITE: PERMISSION OF THE CHAIR OF THE GRADUATE COMMITTEE AND THE INSTRUCTOR. S-U GRADES OPTIONAL. DIVISION GRADUATE FACULTY.

**NS 999 Doctoral Thesis and Research**
FALL OR SPRING. CREDIT TO BE ARRANGED.
PREREQUISITE: PERMISSION OF THE CHAIR OF THE GRADUATE COMMITTEE AND THE INSTRUCTOR. S-U GRADES OPTIONAL. DIVISION GRADUATE FACULTY.

**FACULTY ROSTER**

Arion, William J., Ph.D., U. of N. Dakota. Prof.
Armbruster, Gertrude, Ph.D., Washington State U. Assoc. Prof.
Bensadoun, Andre, Ph.D., Cornell U. Prof., Nutritional Sciences/Physiology
Bisogni, Carole, Ph.D., Cornell U. Assoc. Prof. and Associate Director for Academic Affairs

Bauman, Dale, Prof., Animal Science/ Nutritional Sciences
Blass, Elliot, Prof., Psychology/Nutritional Sciences
Miller, Dennis, Prof., Food Science/Nutritional Sciences
Van Campen, Darrell R., Assoc. Prof., U.S. Plant, Soil, and Nutrition Laboratory/ Nutritional Sciences
**OFFICER EDUCATION**

Military instruction began at Cornell University in 1868 under the provisions of the Morrill Act of 1862. Since that time, officer education has been highlighted by the construction of Barton Hall in 1914 and the establishment of a formal Reserve Officers Training Corps (ROTC) unit in 1917. The program continually evolves to keep pace with latest changes while placing an emphasis on the development of leadership and managerial skills. Throughout the years, Cornell’s program of officer education has produced many outstanding civilian and military leaders.

The programs of officer education allow the student to prepare for a commission as an officer in either the United States Army, Navy, Air Force, or Marine Corps. Each service program is headed by a senior military officer who also serves as a full professor on the Cornell faculty.

**MILITARY SCIENCE**

Lieutenant Colonel John M. Keefe, Engineer, United States Army, Professor of Military Science and Commanding Officer, U.S. Army ROTC instructor Group

Captain Mark Coomes, Infantry, United States Army

Captain Karen Ward, Engineer, United States Army

**United States Army ROTC Program**

The primary objective of the Army Officer Education Program at Cornell is to commission the future officer leadership of the United States Army. Intermediate objectives are to provide students with an understanding of the fundamentals of responsibility, integrity, and self-discipline, as well as an appreciation of the citizen’s role in national defense. The application of the decision-making process to a variety of situations is given major emphasis as a valuable aid in developing leadership potential.

These objectives are achieved through a program normally covering four years. A two-year program is available for those who qualify. The program includes special courses in military science, more general academic subjects that assure a well-rounded education, practical training in leadership through participation in the Cadet Corps (including attendance at one six-week summer camp at an Army installation), and the opportunity to participate in a number of extracurricular activities. The combination prepares the student for commissioning and effective performance in the many branches of the Army. The student’s academic major, academic performance, leadership ability, personal desires, and the needs of the Army determine the branch of the Army in which the student is commissioned upon graduation.

**Requirements for Enrolling**

Applicants must be citizens of the United States prior to being commissioned as lieutenants. (Noncitizens may enroll in selected portions of the program.) Students must meet Army medical requirements.

Overall sound mental and physical condition is essential, and students are required to undergo periodic physical fitness tests. Enrollment and continuation in the program is subject to the approval of the professor of military science.

Enrollment in specific courses by students not formally enrolled in the program must be approved by course instructors.

Contracted students must register for letter-grade military science classes and leadership laboratories for the purposes of commissioning assessments into the United States Army.

**Four-Year Program**

The Four-Year Program is open to students in their freshman year or, with the approval of the professor of military science, sophomores in a five-year degree program. Veterans of the Armed Forces of the United States and students entering Cornell with AROTC credit from secondary or military schools (Junior Division AROTC) may receive advanced standing.

Under the Four-Year Program students enroll in the Basic Course (Mil S I and II) during the first two years, and the Advanced Course (Mil S III and IV) during the next two years. A total of twelve credits of military subjects is taken. In addition, academic-enrichment courses are required in such fields as written communications, math logic, computer science, human behavior and military history.

All cadets attend a six-week camp, with pay, between the junior and senior years. All cadets participate in physical fitness training three days per week. Each year cadets are sent to the Army’s Airborne School, Winter Survival School, and Air Assault Course, dependent upon number of slots and the students’ standings within the ROTC program.

**Basic Course (Mil S I and Mil S II)**

Students in the first year of the Basic Course take one classroom course in military science in the fall and spring semesters, for which they receive academic credit depending upon their college. These courses include study of the U.S. organization for defense and principles and techniques of leadership and management.

Students also participate in leadership modules that include rappelling, orienteering, drill and ceremony, physical training, winter survival, rifle marksmanship, historical site visits, land navigation, interpersonal communication, and individual tactical training. These modules are designed to promote personal development and enrichment. While they do not receive academic credit for these activities, students receive physical education credit. Typical freshman participation in Army officer education is 48 1/2 program-related hours.

During the fall of the second year, students take a one-credit course in map reading and spend approximately two hours a week in practical leadership training, land navigation, and military skills. In the spring, students take a one-credit course in the basic principles of small organizations.

**Advanced Course (Mil S III and Mil S IV)**

The Advanced Course of the Four-Year Program is open to students who have successfully completed the Basic Course and are accepted by the Professor of Military Science for further enrollment. It is also open to students who have gained appropriate advanced standing through either successful completion of a six-week summer camp or prior military training. Students entering the Advanced Course must have two years of academic work remaining at Cornell or another degree-granting institution. Students must pass required physical and aptitude tests. In addition, the past performance and desire of each student is evaluated to determine potential for eventual commissioning.

When students are accepted for the Advanced Course or accept a scholarship, they execute a written contract with the U.S. government. Under terms of the contract, they agree to complete the Advanced Course and to accept a commission if tendered. Concurrently with the signing of the contract, students enlist in the United States Army Reserve for control purposes.

Classroom study in the Advanced Course includes one military science course each semester on such subjects as leadership and management, small-unit tactics, and command and staff organization and functions. The two hours a week of practical leadership training continues, and between the junior and senior years all cadets attend a six-week advanced summer camp currently conducted at Fort Bragg, North Carolina.

**Scholarships**

Scholarships are awarded on the basis of merit and are available for two, three, or four years. AROTC scholarships are awarded each year to outstanding Basic Camp participants and students in the freshman and sophomore classes. Scholarships pay from $15,000 to $20,000 toward tuition and mandatory fees. Scholarship cadets and Advanced Course cadets also receive $150 a month for up to ten months a year. Scholarship cadets receive $450 per year to defray the cost of books and may be reimbursed up to $400 per year for lab fees.

**Commissioning**

All students who successfully complete the Advanced Course, including the advanced summer camp, are commissioned as second lieutenants in the United States Army Reserve or Regular Army upon graduation.
Service Obligations
ROTC graduates may serve on Active Duty, in the Army Reserve, or in the National Guard, depending upon the needs of the Army and the leadership abilities of the cadet.

Officers beginning active duty attend the Officer Basic Course (normally ten to sixteen weeks) of their assigned branch. Upon completion, officers are assigned to a unit and location determined by the desires of the individual and the requirements of the Army. Officers selected for reserve duty attend the Officer Basic Course, after which they are released to reserve status.

Non-scholarship cadets accepting an Army commission serve a minimum of three years on active duty followed by five years in reserve status. They may elect to go into the Army Reserve after commissioning as opposed to active duty.

Scholarship cadets generally serve four years on active duty and four years in reserve status; however, some may serve eight years on reserve duty.

Choice of Branch
Cadets in the second year of the Advanced Course (normally the senior year) may specify the branch of the Army—such as Infantry, Armor, Field Artillery, Air Defense Artillery, Aviation, Special Forces, Corps of Engineers, Signal Corps, Military Police, Military Intelligence—in which they prefer to serve.

They are notified in the spring, before commissioning, of the branch to which they are assigned. The likelihood of appointment in a chosen branch depends upon the student’s academic and officer education performance, degree area, and the needs of the Army at that time.

Graduate Study
Active duty deferments, or educational delays, may be granted to individuals who want to attend graduate school at their own expense. Requests will be considered on the basis of needs of the service. Admission to graduate school is the student’s responsibility.

Benefits
Each cadet in the Advanced Course (Mil S III and Mil S IV) receives $150 a month for up to ten months a year. While attending the advanced summer camp (between the junior and senior years), each cadet receives approximately $700 and an allowance for travel to and from camp. A cadet in the Two-Year Program receives the same payments as cadets in the Advanced Course and, in addition, receives approximately $700 and travel costs for summer Basic Camp attendance before entering the Advanced Course.

Military Science Courses
All cadets take one course and a leadership laboratory each semester in military science. The number of hours a week spent in the classroom varies from semester to semester, as does the credit received for each course.

Freshman Year (Mil S I)
Mil S 101 United States Organization for Defense and Security
Fall. 1 credit. Required. Staff.
Students examine the U.S. defense structure in terms of organization, mission, personnel, and relationships among military forces and between the military forces and branches and departments of the government. The U.S. Army force structure is examined at all levels. The complexities and magnitude of operating the defense organization are studied to provide a framework for subsequent instruction. Students develop skills in conducting oral and written presentations.

Mil S 102 Leadership Theory
Spring. 1 credit. Required. Staff.
This course allows students to develop a basic understanding and appreciation of theories of social and organizational psychology and behavior as they apply to the military setting. Attention is given to leader types, the source and exercise of authority, and the impact of varying styles of leadership, resource management, motivation, and organization effectiveness. The student is introduced to the concepts of integrity, ethics, and professionalism. Classes on historical events and strategy will be presented.

Sophomore Year (Mil S II)
Mil S 221 Mapping: Land Navigation
Fall. 1 credit. Required. Staff.
This course provides practical knowledge of the various forms of topographic representation. Students use maps in terrain association and land navigation. Knowledge of topography is complemented by an orientation on significant environmental influences from physical, social, and climatic factors. Portions of the course offer experience in land navigation and orienteering.

Mil S 222 Small Organizational Operations
Spring. 1 credit. Required. Prerequisite: Mil S 102 or instructor approval. Staff.
Students learn the basic principles of group dynamics at the level of the smallest military unit, the squad. Troop-leading procedures are introduced through case studies and role-playing exercises. Leadership theories introduced in Mil S 102 are examined in a variety of realistic settings. The practical application of behavioral theories is explored in the context of small military organizations.

Junior Year (Mil S III)
Mil S 331 Theory and Dynamics of the Military Team
Fall. 2 credits. Required. Staff.
After an initial introduction to techniques of presenting briefings, students are provided with a broad understanding of the principles and application of teamwork in military organizations. Particular emphasis is given to leadership responsibilities of the commander as the team coordinator. Additionally, students have an opportunity to develop an understanding of the roles and contributions of the various branches of the Army in support of the military team.

Mil S 332 Leadership in Small-Unit Operations
Spring. 2 credits. Required. Prerequisite: Mil S 331 or instructor approval. Staff.
This course provides an understanding of the nature of decision making and the tactical application of the military team. Through the use of conferences and extensive practical exercises, students develop familiarity with the factors influencing a leader’s decisions; the processes of planning, coordinating, and directing the operations of military units through operation plans and orders.

Senior Year (Mil S IV)
Mil S 441 Contemporary Military Environment I
Fall. 2 credits. Required. Staff.
An overview of the functions, responsibilities, and interrelationships among small-unit leaders, the commander, and the staff. Detailed discussions focus on actions of small-unit leaders, communication skills, the military justice system, and the logistical support of the army in the field.

Mil S 442 Contemporary Military Environment II
Spring. 2 credits. Required.
A continuation of Mil S 441. Conferences and seminars examine the techniques of effective military leadership with special attention given to professionalism and ethical considerations in the armed forces during peacetime and armed conflict.

Practical Leadership Training
All Army Officer-Education Students
As with many laboratory periods, no credit is given, and participation is required for successful completion of the AR/ROC program. Students may receive physical education credit for the laboratory.

Each semester, cadets register for the appropriate leadership laboratory, consisting of physical fitness training three times per week, two hours of military training each week, and one or two weekend training exercises per semester.

Mil S 1 Leadership Laboratory I
Fall. 0 credits. S/U. Staff.
Mil S 151 Mil S 152
Spring.

Mil S 5 Cadets meet for two hours each week to learn a variety of military skills including rappelling, first aid, drill and ceremonies, military skating, and weapons familiarization.

Mil S 11 Leadership Laboratory II
Fall. 0 credits. S/U. Staff.
Mil S 251 Mil S 252
Spring.

Mil S Cadets meet for two hours each week as members of the cadet organization to participate in practical leadership exercises. Types of practical activities include rifle marksmanship, orienteering, drill and ceremonies, signal communications, physical fitness training, first aid, tactics and field exercises.

Mil S III Leadership Laboratory III
Fall. 0 credits. S/U. Staff.
Mil S 351 Mil S 352
Spring.

Mil S Cadets meet for two hours a week and some weekends to prepare for a six-week summer camp that follows the junior year. Emphasis is on the development of individual skills in leadership techniques and practical skills. Cadets rotate through leadership positions to develop an ability to apply decision-making processes to a myriad of situations. Cadets also acquire technical expertise and proficiency in signal communications, physical fitness, drill and ceremonies, rappelling, orienteering, tactics, water survival, and other military skills.
The objective of the Naval Officer Education Program is to prepare selected students for careers as commissioned officers in the United States Navy or United States Marine Corps by supplementing their undergraduate education with instruction in essential concepts of naval science and fostering development in the qualities of leadership, integrity, and dedication to their country and the naval services. The program is compatible with most undergraduate major fields of study, including five-year baccalaureate degree programs on a case-by-case basis.

The objective is achieved through a broad program, normally covering four years, that combines specific courses in naval science and specified academic subjects to supplement the various professional leadership programs in which the practical aspects of naval science and leadership procedure are stressed. It also includes at least one summer-at-sea period.

Non-naval officer education students:

- Those interested in serving in the Naval Science Institute in Newport, R.I.
- Those interested in serving in the Marine Corps

The United States Marine Corps is an integral part of the Naval Services and is commanded by the Commandant of the Marine Corps. The Marine Corps has a postgraduate training program midshipmen commissioned in the Navy or Marine Corps Reserve have a scholarship, students also receive money for textbooks, uniforms, and a $150-a-month stipend for a maximum of forty months.

Successful completion of the Scholarship Program leads to a commission in the Navy or Marine Corps Reserve. At Cornell University over 90 percent of NROTC students have a scholarship. Students entering NROTC without a prior scholarship award are entitled to compete for two- or three-year scholarships controlled by the Chief of Naval Education and Training.

Entering the Scholarship Program

There are three ways to enter the Scholarship Program:

First, by applying for the national competition each year. This process entails filling out and submitting an application; being interviewed; having a physical examination; and applying to, and being accepted by, one of the colleges or universities throughout the country. NROTC program midshipmen commissioned in the Navy or Marine Corps Reserve.

Second, by enrolling in the College Program at Cornell and being recommended by the Professor of Naval Science for a scholarship after at least one semester in the program.

Third, by entering through the Two-Year Scholarship Program.

College Program

There are two College Programs available:

- Both lead to a commission in the Naval or Marine Corps Reserve.

Each of these programs provides textbooks for naval science courses, uniforms, and a subsistence allowance of $150 a month from the beginning of the junior year.
for aviation receive flight training at the Naval Air Station, Pensacola, Florida, along with their Navy counterparts.

Curriculum
A student has three categories of requirements to fulfill as a midshipman. The first of these requirements is given to applied leadership as it relates to their Navy counterparts.

A study of fundamental aspects of naval science, including its contributions to sea power, factors and different warfare communities involved in the physical development of naval forces, resources that must be managed, and prospects for the future. Naval uniforms, customs, and traditions are covered.

Freshman Year (Navy and Marines)
Nav S 101 Fundamentals of Naval Science
Fall. No credit.
A study of fundamental aspects of naval science, including its contributions to sea power, factors and different warfare communities involved in the physical development of naval forces, resources that must be managed, and prospects for the future. Naval uniforms, customs, and traditions are covered.

Nav S 102 Sea Power and Maritime Affairs
Spring. 3 credits.
Discussions examine the history of the Navy as a force in diplomacy and an instrument of U.S. foreign policy. Relationships between Congress and the military for determining the national defense policy are also explored. An integrated examination of current events and issues gives a historical perspective throughout the course.

Nav S 157 Principles of Sailing
Fall and spring. Physical education credit. Instruction in basic sailing skills and safety principles. Students sail small boats on Cayuga Lake. Focus is on U.S. Navy Class B inshore skipper certifications.

Sophomore Year (Navy and Marines)
Nav S 201 Organizational Behavior and Small Group Processes
Fall. 3 credits.
The theme of the course is the "evolving role of the manager, organizational decision maker, and leader." The course will begin by briefly studying the theoretical principles of management and will progress through practical skills of managers and leaders. Lectures, reading assignments, films, and discussions should provide students with an excellent opportunity to wrestle with complex managerial and leadership issues. The goal of this course is for students to begin to develop a sound personal leadership philosophy that will enable them to more effectively accomplish assigned responsibilities leading men and women in today's demanding and increasing "hi-tech" naval environment.

Nav S 202 Naval Ship Systems I (also Mechanical and Aerospace Engineering 101)
Spring. 3 credits. Two lecture classes each week.
An introduction to primary ship-systems and their interrelationship. Basic principles of thermodynamics, propulsion, mechanical operation, internal communications, electronics, ship structure, and other marine systems.

Junior Year (Navy)
Nav S 301 Principles of Navigation (also Agricultural Engineering 305)
Fall. 4 credits. Four classes each week (lecture-recitation-project work).
An introduction to applied leadership as it relates to the administrative and managerial aspects of a Navy or Marine Corps officer's duties.

Nav S 302 Naval Operations
Spring. 3 credits.
The course covers the application of the nautical rules of the road and maneuvering board in order to avoid collisions at sea. Other aspects of naval surface ship operations that are introduced include visual and electronic communications methods, tactical disposition of forces, ship handling theory, and deck seamanship topics.

Senior Year (Navy)
Nav S 401 Naval Ships Systems II (Weapons)
Fall. 3 credits.
The principles and theories used in the development of naval weapons systems are examined. Theoretical, extensive study is made of detection systems, especially radar and sonar, followed by discussions of ancillary and instruction for computing, stabilizing, tracking, and weapons control and delivery.

Nav S 402 Leadership and Ethics
Spring. 3 credits.
A variety of topics important to the naval officer for both professional and managerial development are reviewed. The material is tailored for the midshipman to provide an understanding and appreciation of leadership and ethics in preparation for assignments in the naval service. Through the use of lectures, case studies, and role playing, the student will learn various aspects of Navy leadership and ethical decision-making. Marine-option students also take this course.

Junior or Senior Year (Marine Options)
Nav S 310 Evolution of War
Fall. 3 credits.
A study of warfare that examines the relationship of military strategy to geography, economics, sociology, technology, and national political realities and values; the evolution of warfare, including principles of war, weapons, and associated equipment; and the effects of nuclear weapons and guerrilla warfare on traditional concepts of national strategy.

Nav S 410 History of Amphibious Warfare
Spring. 3 credits.
The history of the development, theory, techniques, and conduct of amphibious operations from 490 B.C. to the present. Special emphasis will be on amphibious operations conducted in the central Pacific during World War II and the future of amphibious operations.

Other Required Courses

Naval Science Courses
All Navy and Marine midshipmen take one naval science course each semester during their freshman and sophomore years. Navy-option students continue to take a naval science course each semester during their junior and senior years. Marine-option students have slightly different curriculum requirements for their junior and senior years.

Naval Professional Laboratories
Nav S 141-142, 241-242, 341-342, or 441-442
All students in the program participate in one ninety-minute professional development session each week. The session is held from 2:30 until 4:00 on Wednesday afternoon. This period consists of both drill and professional information briefings. Students gain experience in actual leadership situations and at the same time learn the fundamentals of seamanship, military formations, movements, commands, discipline, courtesies, and honors. During information briefings special emphasis is given to applied leadership as it relates to the administrative and managerial aspects of a Navy or Marine Corps officer's duties.

NAVAL SCIENCE 319
for a commission in the U.S. Marine Corps or U.S. Marine Corps Reserve. Marine-option students take the same naval science courses and naval professional laboratories as Navy-option students for the freshman and sophomore years. During the junior and senior years, Marine-option students have slightly different naval science course requirements than their Navy-option students counterparts. Two semesters of courses (a minimum of 3 hours each) in the subject area of American Military Affairs or National Security Policy are required. One semester of a modern foreign language must be completed.

Extracurricular Activities
The NROTC midshipman at Cornell is offered a broad range of activities, including sail training and a comprehensive intramural sports program. The unit has won the Independent Division All Sports Trophy for fifteen of the last twenty-one years. Midshipmen participate in a myriad of social events, including the annual Navy/Marine Corps Birthday Ball.

DEPARTMENT OF AEROSPACE STUDIES
Colonel Larry L. Wheeler, United States Air Force, Professor of Aerospace Studies and Commander, Air Force ROTC Detachment 520
Captain Scott L. Wilcox, United States Air Force
TBA, United States Air Force
TBA, United States Air Force

The objective of the Air Force officer education program at Cornell is to prepare men and women for positions as officers in the United States Air Force. The program is designed to teach students about the mission and organization of the Air Force, the historical development of airpower, leadership, and management. Students study national security policy and the role of the military in a democratic society. This program includes specific courses in aerospace studies and practical leadership laboratories.

Requirements for Enrollment
The Air Force officer education program is open to any qualified undergraduate or graduate student enrolled in any major field of study.

Applicants must be United States citizens. Noncitizens may enroll and will receive certificates acknowledging completion of the course but cannot receive a commission.

All applicants receive physical examinations at no cost and must meet certain physical requirements to be accepted. Students who are interested in qualifying for flying categories (pilot or navigator) must meet more stringent physical requirements. In addition, students enrolled in the commissioning program must meet specified physical fitness requirements.

Though the program is designed to prepare future Air Force officers, Department of Aerospace Studies academic courses are open to all students at Cornell.

Four-Year Program
The Four-Year Program is open to all qualified freshmen. Sophomores may also enter a condensed version of the four-year program after coordination with the AFROTC staff. Students in a five-year program may enroll in their freshman, sophomore, or junior year.

Veterans of the U.S. armed forces and students entering Cornell from military schools may receive advanced standing, subject to approval by the Professor of Aerospace Studies.

The Four-Year Program consists of General Military Courses (GMC) and Professional Officer Courses (POC). For scholarship cadets, the first year of the GMC carries no military commands. Students may withdraw at any time. For nonscholarship cadets, both years of the GMC carry no military commitment, and students may withdraw at any time.

General Military Course
Students in General Military Courses (GMC) take a one-credit Aerospace Studies course each semester. During the freshman year, the student examines the organization and mission of the United States Air Force and the environment of the Force officer. In the sophomore year, the student studies the history and development of American air power. In both years, officer and professionalism within the United States Air Force are emphasized.

Students also spend 2 hours a week in a leadership laboratory. Leadership laboratory provides cadets with the opportunity to put into practice those skills they learn in their aerospace studies classes. These laboratories focus on the development of officer qualities through such activities as drill and ceremonies, group leadership problems, confidence-building exercises, and guest lecturers. In addition, all students participate in summer field training for four weeks between their sophomore and junior years.

Professional Officer Course
The Professional Officer Courses (POC) provide a two-year advanced program of instruction. Students who are accepted for the POC must have successfully completed or validated the basic course and must meet academic and physical standards. Each cadet accepted into the POC must sign an agreement to complete the program and accept, if offered, a commission in the United States Air Force upon graduation.

Classroom study in the POC is a 3-credit-hour course each semester. In the junior year, cadets study Air Force leadership and management at the junior officer level. During the senior year, cadets study the elements of national security and the military's role in American society. Leadership laboratory requires 2 hours a week in the junior and senior years. In leadership laboratory, cadets are exposed to advanced leadership experiences and apply principles of leadership learned in the classroom.

Two-Year Program
The Two-Year Program consists of the last two years (Professional Officer Courses) of the regular Four-Year Program plus a six-week summer training course preceding enrollment.

The Two-Year Program is open to all qualified students with two years of academic study remaining at Cornell (graduate or undergraduate) or at schools supported under a crosstown agreement. Applicants are accepted from October through April of the academic year preceding the applicant's planned entry into the program. Selectees are then required to complete a six-week summer training program at government expense.

Scholarships
The Air Force offers 4-year scholarships to high school seniors and 2- and 3-year scholarships to college students. Four-year scholarships are offered on a competitive basis in specified majors to high school seniors. Scholarship information can be obtained from a high school guidance counselor, from Air Force ROTC officers at Cornell (AFROTC phone number is 607-255-4004), from a local Air Force recruiter, or from AFROTC/RROO, Maxwell AFB, AL 36112-6663, 1-800-522-0033, extension 1903. The deadline for submitting a four-year scholarship application is December 1 of the year preceding the academic year in which a student wants to enter the program. Students should apply early.

Schools for 2 and 3 years. Applications for these scholarships shall be made to the Professor of Aerospace Studies during the freshman or sophomore years of college. All selections are based on the student's major, scores achieved on the Air Force Officer Qualifying Test, the student's overall grade point average, and the recommendation of the Professor of Aerospace Studies. Scholarship amounts range from $2,000 per year to full tuition, fees, and books, and provide a $150 monthly non-taxable allowance during the school year. Scholarships do not include the cost of room and board.

Fees
An initial uniform deposit of $50 is required on entry into AFROTC. Two subsequent $50 uniform payments are due, one on entry into the POC and one before commissioning, at which point the cadet can purchase the uniform with the deposits.

Benefits
All cadets in the advanced program (POC)—whether they are on scholarship or not—receive a $150-a-month, nontaxable subsistence allowance during the academic year. During the four- or six-week summer field training (see below), each cadet receives a pay allowance plus an allowance for travel to and from the field site. Textbooks and supplies required for Department of Aerospace Studies courses are provided.

All cadets are eligible to participate in AFROTC-sponsored field trips made to Air Force bases throughout the country as well as voluntary summer programs for professional development. Scholarship and advanced cadets (POC) are entitled to space-available travel on Air Force aircraft flying within the continental United States.

Field Training
There are two types of field training: a four-week course for cadets in the Four-Year Program and a six-week course for Two-Year Program applicants. Students in these programs normally attend field training between their sophomore and junior years.
Field training is designed to stimulate the development of military leadership skills through meaningful experiences. The curriculum consists of aircraft, aircrew, and survival orientation; junior officer training; physical training; small arms training; social actions program; and supplemental training. The six-week training program includes sixty hours of Air Force ROTC academic course work that substitutes for the freshman and sophomore Aerospace Studies courses.

Cadets may also volunteer for one of many Advanced Training Programs. These programs include the Professional Development Program, Air Force Academy Free-Fall Parachute Training, the British Royal Air Force (RAF) Exchange Program, Research and Development Experiences, the Academy Soaring Program, and Army Airborne Training.

**Commissioning Obligations**

All students who successfully complete the AFROTC advanced program (POC) are awarded a bachelor's degree, tendered a commission, and enter the Air Force as second lieutenants.

Second lieutenants commissioned in nonflying categories are required to serve on active duty for four years. Pilots are required to serve on active duty for eight years after completing flying training. Navigators serve six years after completing training.

**Air Force Careers**

The Air Force assigns new officers to a career field based on mission requirements, educational background, and officers’ preferences. Students in the engineering-scientific category may be assigned to practice in their specialty in research and development, communications, electronics, aeronautics, astronautics, the biological sciences, computer design and maintenance, meteorology, space, or other engineering and scientific fields. Graduates in the nontechnical category can anticipate assignments in manpower management, information management, logistics, law enforcement and investigation, intelligence, personnel, transportation, accounting and finance, and other career fields. They may use their educational backgrounds in positions of responsibility and be given the opportunity to further their development in leadership and management skills.

Any undergraduate major is suitable for those who are qualified and interested in becoming pilots or navigators. After completion of flying training, personnel are assigned to a specific type of aircraft.

**Curriculum**

Students in the Four-Year Program are required to take all courses listed below. Students in the Two-Year Program are required to take all of the courses listed for the junior and senior years. There are no prerequisites for any Aerospace Studies courses.

### Freshman Year

**Air S 161 Introduction to the Air Force Today, Part I**

*Fall. 1 credit.*

An introductory study of U.S. Air Force mission and organizational structure, with emphasis on officer and basic communications skills.

**Air S 162 Introduction to the Air Force Today, Part II**

*Spring. 1 credit.*

A study of U.S. Air Force mission and organizational structure with an emphasis on professionalism, officer and communications skills, and the principles of leadership.

### Sophomore Year

**Air S 211 American Air Power**

*Fall. 1 credit.*

This course studies the development of American air power. It concentrates on the evolution of thought on the proper way to employ air power to meet national security objectives and addresses the many factors that influenced air-power thinking. This course also emphasizes communications skills training and practical application.

**Air S 212 Introduction to Leadership**

*Spring. 1 credit.*

This course examines several topics that prepare cadets to succeed at field training. Subjects include effective communications, leadership, management, and problem-solving skills.

### Junior Year

**Air S 331 Air Force Leadership and Management**

*Fall. 3 credits.*

This course is divided into three major parts. Part I is an introduction to effective written and oral communication skills. Communication skills are practiced and developed throughout the course. Part II focuses on leadership and management principles. The final part addresses ethics, values, and the standards of conduct expected of and practiced by military members. Student-run seminars, case studies, and oral and written assignments are required.

**Air S 332 Management in the Armed Forces**

*Spring. 3 credits.*

This course focuses on Total Quality Management (TQM) and its role in today's Air Force. Written and oral communication skills are emphasized. Primary topics of discussion and analysis include the history and development of management thought, the fundamentals of TQM, TQM in the Air Force—Quality Air Force (QAF), and QAF application through team problem solving. Student-run seminars, case studies, Quality Improvement Team participation, and oral and written assignments are required.

### Senior Year

**Air S 401 National Security Forces in Contemporary American Society I**

*Fall. 3 credits.*

This is an advanced course on U.S. national security policy and processes, and current international political-military issues affecting American security interests. Primary topics of discussion include the role of military forces in the post-cold-war era, national security decision-making, and specific issues such as military operations other than war, alliances, international forces, peacekeeping, arms control, and terrorism. Roles of the U.S. Air Force in support of U.S. national security objectives are also examined.

**Air S 402 National Security Forces In Contemporary American Society II**

*Spring. 3 credits.*

This is a second-semester study of American national security policy, process, actors, and strategies. This course focuses on military law and officerhip and explores Air Force issues relevant to future officers. Throughout the course, writing and public speaking exercises are directed at improving students' communication skills.

**Leadership Laboratory Courses**

All Air Force cadets spend 2 hours a week throughout the academic year in a leadership laboratory, for which no academic credit is given. Occasionally laboratories are held at times other than the normally scheduled period. All cadets are expected to participate in an evening formal dinner and to meet minimum physical fitness and weight standards each semester. Leadership lab is open to students qualified to compete for an Air Force commission.

**Air S 141-142 Initial Military Experiences**

Introduction to the responsibilities, life, and work of an Air Force officer. Basic knowledge of drill and ceremonies, military courtesies, and the wearing of the uniform.

Field trip to a local military installation.

**Air S 241-242 Intermediate Military Experiences**

Develops skills in giving commands for drill and ceremonies. Introduction to the Air Force base environment in which the Air Force officer functions. Includes a look at career areas available based on academic majors. Students participate in leadership situations through military drills and ceremonies. Field trip to a local military installation.

**Air S 341-342 Junior Officer Leadership**

Cadets assume leadership responsibilities similar to those of a junior officer. Emphasis is on the importance of applying effective human relations skills in dealing with superiors, peers, and subordinates. Cadets gain insight into the general structure and progression patterns common to selected Air Force officer career fields.

**Air S 441 Advanced Leadership Experiences**

Cadets assume command leadership responsibilities to operate a military organization. Cadets apply effective leadership and managerial techniques with individuals and groups and participate in self-analysis of leadership and managerial abilities.

**Air S 442 Precommissioning Laboratory**

Factors that facilitate transition from civilian to military life are reviewed. The need for military security, basic services and activities, personal finances, travel regulations, and social obligations are introduced.
DEPARTMENT OF PHYSICAL EDUCATION AND ATHLETICS

ADMINISTRATION
Alan E. Gantert, director

COURSES
The courses and fees described in this catalog are subject to change or cancellation at any time by the administration of Cornell University. For current fee information on physical education courses call 255-4286; for Outdoor Education courses, call 255-6415 (ext. 2).

Enrollment in any course is limited by the space available. Other restrictions are included in the course description. Most courses are coeducational. The specific time and place of class meetings, as well as information about fees, are available at physical education course registration or may be found on "Bear Access," a package of software for accessing a variety of network services at Cornell, or on the World Wide Web (at http://www.cornell.edu/Academic.html#Class). Course fees are billed through the Office of the Bursar.

Additional course offerings may be listed at registration, as the curriculum is frequently reviewed and changed.

Aquatic Courses

Lifeguard Courses

Lifeguard Training
Fall and spring. Fee charged. Prerequisites: swimming test consisting of 500 yards, demonstrating three strokes, treading water without the use of hands, and retrieving a brick from seven feet of water. Three classes a week. An American Red Cross certification course.

Practice and execution of lifeguarding first aid and CPR skills and techniques. Certification is awarded in lifeguarding, first aid, and CPR upon satisfactory completion of the course.

Lifeguard Training Instructor
Spring. Fee charged. Prerequisites: current Red Cross ICT or instructor card, written and skill tests in lifeguarding, first aid, and CPR techniques. Students must not miss first class. Two classes a week.

American Red Cross lifeguarding instructor and CPR/RPR certifications are awarded upon successful completion.

Scuba, Open-Water
Fall, spring, and summer (6 weeks). Fee charged.

Program includes classroom work skill training in a pool and open-water training in Cayuga Lake. P.A.D.I. open water certification awarded upon successful completion.

Scuba, Advanced Open-Water
Fall and spring. Fee charged.

Advanced-level open-water training in Cayuga Lake. For those who have completed the open-water course.

Rescue Diver
Fall and spring. Fee charged.

Advanced course for scuba divers. For those who have completed Advanced Open-Water Scuba certification and are interested in learning rescue and safety techniques.

Dive Master
Fall and spring. Fee charged.

Advanced-level scuba course open only to those who have completed the Rescue Diver course. NOTE: This is a long, time-consuming course, which requires the student to be in good physical and swimming shape.

Specialty Scuba Diving
Fall and spring. Fee charged.

Courses offered in the following specialty diving areas: navigation, search and recovery, night diving, deep diving, underwater photography, wreck, multi-level, boat, tropical fish identification and buoyancy control, and underwater naturalist.

Scuba Diving Trips
Fall and spring. Fee charged. This course is offered during intersession periods. Scuba diving to various destinations such as the Bahamas. Locations change from year to year. See the information sheet at the registration table.

Swimming, Introduction to (ARC)
Fall, spring, and summer. (6 weeks). Instruction and practice in skills leading to passing the basic swimming proficiency test.

Swimming, Advanced Beginning (ARC)
Fall and spring.

Ideal for all who have taken one term of Beginning Swimming, regardless of whether the test was successfully completed. Areas of special emphasis are the crawl stroke and rotary breathing, back crawl, elementary backstroke, diving, treading water, and underwater swimming. The primary objective is to strengthen the student's confidence and competence.

Swimming, Intermediate (ARC)
Fall and spring.

Practice of basic skills and five basic strokes; front crawl, back crawl, elementary backstroke, breaststroke, sidestroke.

Swimming, Advanced (ARC)
Fall and spring.

Practice of nine strokes: front crawl, back crawl, elementary backstroke, breaststroke, sidestroke, overarm sidestroke, trudgeon, and butterfly.

Swimming Conditioning
Fall and spring. Prerequisite: good swimming ability. Introduction to, and practice of, different training methods. Final objective: to swim 2,500 yards during class period. Primarily a conditioning and not an instructional course.

Water Safety Instructor
Fall and spring. Fee charged. Prerequisites: passing of written and water tests, which are given on the first day. American Red Cross water safety instructor certification is awarded on satisfactory completion of the course. This is not a course for casual participant. Approximately 45 hours of work is required.

Water Safety Instructor Refresher Course
Spring. Fee charged.

Selected sessions of the water safety instructor certification course.

Bowling Courses

Bowling
Fall and spring. Fee charged.

For the beginning and intermediate bowler. Shoe rental is included in the fee.

Dance Courses

Develop flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with rhythmic accuracy, clarity of body design, and fullness of feeling. Auditions are required for admission to some advanced courses, since they require the mental and physical ability to perform more complex phrases in various styles.

African Dance
Fall and spring.

Ballroom Dancing
Fall and spring and summer. Fee charged. One class a week, Helen Newman Hall. Students and their partners must sign up at course registration. Includes instruction in the waltz, swing, cha cha, calypso, tango, and others.

Belly Dancing
Fall and spring. Fee charged.

Belly dancing is an exciting Middle Eastern folk art that can help in the development of flexibility, body awareness, and overall body tone. The class will begin with warm-ups and continue with basic movements and rhythms while putting them together in dance to music of the Middle East.

Country Line Dancing
Fall and spring. Fee charged.

No partners are needed. Most dances are done in parallel lines, with a few done in large circles. Once you learn a few basic steps, the possibilities are endless. Most dances have a fixed pattern and are simply different combinations of a few basic steps.

Exploration in Movement (A & B)
Fall and spring.

Interactive World Dance
Fall and spring. Fee charged.

This course consists of an interesting selection of popular, traditional dance forms that come from diverse cultures around the world. These include line, circle, set, trio, individual, and partner dances. No partner necessary.

Modern Dance I (also Theater Arts 124)
Fall and spring.

Modern Dance II (also Theater Arts 232)
Fall, spring, and summer (6 weeks).

Modern Dance III (also Theater Arts 306)
Fall and spring.

Modern Dance IV (also Theater Arts 308)
Spring.
Salt Water Fly Fishing
Fall. Fee charged.
Learn the special techniques necessary for salt water fly fishing. This course includes 4 hours of classroom instruction and 4 days of fishing over fall break.

Fitness Courses

Aerobic Dance
Fall, spring, and summer (6 weeks). Fee charged. A dance program designed to keep the cardiovascular system in top shape by making the body demand increased amounts of oxygen.

Body Sculpting
Fall and spring. Fee charged.

Fitness and Conditioning
Fall and spring. Physical fitness program that embodies features of stretching exercises, weight lifting, and jogging. Students work on their individual training needs.

Jogging
Fall and spring. This course will cover running and stretching techniques. A rigid attendance and participation requirement of supervising children.

Jogging Tours—Distance Running
Fall and spring. A course designed for the Intermediate Runner who can run an average of 3 miles in 30 minutes. Most tours will be 3-4 miles long and will go through campus and nearby countryside.

Wellness and Fitness
Fall and spring. Fee charged. Designed to acquaint students with the components of, and conditioning for, triathlon (running, swimming, and bicycling).

Golf Courses

Golf, Introduction to
Fall and spring. Fee charged. A PGA program of instruction is geared to all levels of experience and ability. The objective is to develop the student's physical fitness status, blood cholesterol levels, and overall lifestyle health habits. Each student will receive an individual exercise prescription and attend the Resident Cardiac Rehab Program.

Golf, Recreational
Fall and spring. Limited to students who are experienced golfers. Fee charged. Students must provide their own clubs. A minimum of ten rounds of nine holes each must be played to receive credit. Fee covers a semester's membership.

Gymnastics Courses

Gymnastics, Introduction to
Fall and spring. Introduction to gymnastics deals with a major emphasis on conditioning and will focus upon basic skills and is open to both male and female participants.

Ice Skating Courses

Skating, Introduction to
Fall and spring. Fee charged. Involves mastery of the basic skills of forward, backward, crossovers, turns, and spirals.

Figure Skating, Introduction to
Fall and spring. Fee charged. Includes many of the first aid skills taught in a basic EMT class.

Martial Arts—Self-Defense Courses

Boxing, Introduction to
Fall and spring. Fee charged. Involves mastery of the basic skills of forward, backward, crossovers, turns, and spirals.

Fencing, Introduction to
Fall and spring. Fee charged. Includes warm-up exercises and defensive movements. Equipment furnished.

Fencing, Intermediate
Fall and spring. Fee charged. Prerequisite: Introduction to Fencing or the equivalent. Includes many of the first aid skills taught in a basic EMT class.

Fencing, Classical
Fall and spring. Fee charged. Includes warm-up exercises and offensive and defensive moves. Equipment furnished.

Judo, Introduction to
Fall and spring. Fee charged. Involves mastery of the basic skills of forward, backward, crossovers, turns, and spirals.

Judo, Intermediate
Fall and spring. Fee charged. Involves mastery of the basic skills of forward, backward, crossovers, turns, and spirals.

Karate, Introduction to
Fall and spring. Fee charged. Involves mastery of the basic skills of forward, backward, crossovers, turns, and spirals.

Karate, Advanced
Fall and spring. Fee charged. Involves mastery of the basic skills of forward, backward, crossovers, turns, and spirals.

Figure Skating Courses

Skating, Introduction to
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves. Equipment furnished.

Figure Skating, Introduction to
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves. Equipment furnished.

Figure Skating, Intermediate
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.

Figure Skating, Classical
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.

Figure Skating, Advanced
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.

Figure Skating, Professional
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.

Figure Skating, Olympic
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.

Figure Skating, World Cup
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.

Judo, Introduction to
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.

Judo, Intermediate
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.

Judo, Advanced
Fall and spring. Fee charged. Includes warm-up exercises and decorative moves.
Kung Fu
Fall and spring. Fee charged. Exploration of conditioning and fitness procedures used in the major martial arts, such as karate and judo. Covers circular movement for generating strong blocks, kicks, and punches.

Self-Defense and Empowerment for Women
Fall and spring. Fee charged. Basic methods of physical protection for women.

Tae Kwon Do, Introduction to
Fall and spring. Fee charged. A Korean martial art distinguished by emphasis on high and powerful kicks. Basic kicking, punching, and blocking emphasized.

Tae Kwon Do, Intermediate
Fall and spring. Fee charged. A Korean martial art distinguished by emphasis on high and powerful kicks. Intermediate-level kicking, punching, and blocking are emphasized.

Tae Kwon Do, Advanced
Fall and spring. Fee charged. A Korean martial art distinguished by its emphasis on high and powerful kicks. Advanced-level kicking, punching, and blocking are emphasized.

T'ai Chi Chuan, Introduction to and Intermediate
Fall and spring. Fee charged. Introduction to T'ai Chi, a system of graceful, exercises that aim at nurturing relaxation, deep breathing, and improved circulation.

Outdoor Education Program
See the brochure for the Cornell University Outdoor Education Program at registration for more information about courses.

Climbing Courses
Basic Rock-Climbing
Fall, spring, and summer. Fee charged. Seven afternoons climbing inside on the Lindseth climbing wall.

Basic Rock-Climbing, for Women
Fall, spring. Fee charged. Seven afternoons climbing inside on the Lindseth climbing wall taught by and for women.

Basic Rock-Climbing, for 25 and Over
Fall, spring. Fee charged. Non-credit course. Four evenings climbing indoors on the Lindseth wall for people age 25 or older.

High Adventure 101
Fall, spring, and summer. Fee charged. Six afternoons at local parks and wilderness areas, some classes on indoor Lindseth climbing wall.

Continuing Rock-Climbing
Fall, spring. Fee charged. Seven afternoons of advanced climbing techniques on the Lindseth climbing wall.

Ice Climbing
Spring. Fee charged. Four outings to local state parks and gorges.

Outdoor Top Roping
Fall, spring. Fee charged. Two outings (nights) on the Lindseth climbing wall and two outings at local climbing areas.

Shawangunks Rock-Climbing
Fall, spring. Fee charged. Four-day climbing camp at the Shawangunks.

Backpacking Courses
Natural History of the Finger Lakes
Fall, spring. Fee charged. Backpacking skills with a strong environmental focus.

Backpacking in the Finger Lakes
Fall, spring. Fee charged. Classes lead to two full weekends on the trail.

Southwest Backpacking
Spring. Fee charged. Spring break trip to the SW deserts and canyons.

Trail Maintenance
Fall, spring. Fee charged. Work with the local trails club to maintain trail systems.

Wilderness Skills
Fall, spring. Fee charged. Break trip focusing on wilderness travel and living skills.

Wilderness Survival Skills
Fall, spring. Fee charged. Primitive living skills taught in three classes and a weekend backpack trip.

Biking Courses
Bike and Hike
Fall, spring. Fee charged. Four full days exploring local countryside.

Bike Repair, Beginning
Fall, spring. Fee charged. Non-credit. Two evenings of hands-on repair work.

Bike Repair, Intermediate
Fall, spring. Fee charged. Non-credit. One evening of hands-on repair work.

Mountain Biking
Fall. Fee charged. Four full days exploring local countryside.

Canoeing Courses
Canoeing, Adirondacks
Fall. Fee charged. A sampler of beginning canoeing and kayaking.

Canoe/Camping, Flatwater
Fall, spring. Fee charged. Four full days paddling local waterways including an overnight.

Canoeing, Moving Water
Fall, spring. Fee charged. Includes a full weekend of river paddling.

Caving Courses
Caving
Fall, spring. Fee charged. Four days in the fall and two weekends in the spring in Pennsylvania caves.

Hiking Courses
Day Hiking
Fall, spring. Fee charged. Day outings in the Finger Lakes Region.

Snowshoeing
Spring. Fee charged. Day outings in the Finger Lakes Region.
Expanding Awareness
Fall and spring. Fee charged. Provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation.

Health Issues for Student Athletes
Fall and spring.
To promote and encourage lifestyle choices on the part of student athletes that will help them establish and maintain high levels of all-around health, and thereby contribute positively to their academic and athletic achievement. NOTE: This is an NCAA requirement open to sophomore athletes only.

Relaxation and Stress Management
Fall and spring.
Introduction to basic relaxation techniques for the reduction of everyday stress. Techniques will be taught that can be used in normal everyday living situations.

Swedish Massage
Fall, spring, and summer. Fee charged. Provides an experiential introduction to several types of massage. Included are Swedish, shiatsu, polarity, and sports massage. Class members will participate in group exercises and practice on each other during class time. All exercises and techniques can be done while wearing street clothing.

Shiatsu Massage
Fall and spring. Fee charged. Gain an experiential understanding of your body and learn certain shiatsu massage techniques.

Yoga, Introduction to
Fall, spring, and summer (6 weeks). Fee charged. Fundamentals of hatha-yoga. Covers basic postures, breathing techniques, and deep relaxation. Introduces chanting.

Racket Sports Courses
Badminton, Introduction to
Fall and spring. Helen Newman Hall. Fundamental shots, scoring, and general play.

Badminton, Intermediate
Fall and spring. Helen Newman Hall. Review of fundamental shots, scoring, and general play.

Racquetball, Introduction to
Fall, spring, and summer. Fee charged. Instruction for beginners. Equipment is furnished. Protective eye wear required.

Squash, Introduction to, Intermediate
Fall, spring, and summer. Fee charged. Classes for appropriate level of play. Equipment is furnished. Protective eye wear required.

Tennis, Introduction to
Fall, spring, and summer. Fee charged. Basic skills taught include forehand, backhand, serve, and volley. Scoring methods taught.

Tennis, Intermediate
Fall, spring, and summer. Fee charged. Review basic strokes plus topspin and underspin. Doubles strategy emphasized.

Tennis, Advanced
Fall, spring. Fee charged. Advanced strokes and doubles play emphasized. Recommended for tournament players or those with previous team experience.

Tennis, Indoor-Recreational
Fall and spring. Fee charged. Play is conducted at the new Reis Tennis Center. Players must have high school or college tournament experience and a rating of 3.5 or higher from the USTA. Matches are played in both doubles and singles. Equipment furnished. NO BLACK-SOLE SHOES ALLOWED ON COURTS!

Sailing Courses
Board Sailing (Wind Surfing)
Fall, spring, and summer (6 weeks). Fee charged. A Mistral Board Sailing Academy certificate is awarded on successful completion.

Catamaran, Introduction to
Fall, spring, and summer (6 weeks). Fee charged. Learn unique skills necessary for sailing multi-hull catamarans.

Small-Boat Sailing, Introduction to
Fall, spring, and summer (6 weeks). Fee charged. Learn basic skills necessary to sail small sailboats and basic keelboats safely.

Small-Boat Sailing, Competitive
Fall and spring. Fee charged. Vanguard 420 sailboat used for the course. USYRA Rules Book used as a text for the course. Fee includes one-year membership in university sailing team program.

Skilling and Snow Boarding
Downhill Skiing and Snowboarding
Spring. Fee charged. Transportation, instruction, ski-lift fees, and skiing time are offered in a package deal. Greek Peak and Song Mountain personnel are present at registration to explain the program and accept fees. Bus transportation to Greek Peak is provided six afternoons a week for six weeks.

Cross-Country Skiing—See Outdoor Program.

Target Shooting Courses
Archery, Introduction to
Fall and spring. Fee charged. Two classes a week. Instruction in the care of equipment; seven basic steps for shooting; scoring; practice shooting at twenty, thirty, and forty yards.

Archery, Intermediate
Fall and spring. Fee charged. For those who have basic experience.

Pistol, Introduction to
Fall, spring, and summer (6 weeks). Fee charged. Instruction in use of pistol in the three modes of fifty-foot competitive target shooting—slow fire, timed fire, and rapid fire. Emphasis on safety and responsibility while firing.

Riflery
Fall and spring. Fee charged. Instruction and practice in the techniques of target riflery from various shooting positions.

Trap and Skeet
Fall, spring, and summer (6 weeks). Fee charged. Includes lectures and shooting at the Tompkins County Rod and Gun Club range. Guns and shells are furnished.

Team Sports Courses
Basketball
Fall and spring. Fundamental drills in passing, shooting, and dribbling. Scrimmages each class session.

Ice Hockey, Introduction to
Fall and spring. Fee charged. Stick handling, passing, and shooting are stressed. Students provide their own skates and sticks; all other equipment is furnished.

Ice Hockey, Intermediate
Fall and spring. Fee charged. Prerequisite: beginning hockey or previous participation in organized hockey. This course is designed for the intermediate hockey player. Advanced techniques taught include positioning, power play, penalty killing, and offensive and defensive attack. Each session emphasizes game situations and scrimmaging. Skates and hockey sticks must be supplied by the participants.

Soccer
Spring. Introduction to the game. Includes basic individual skills (passing, trapping, shooting) and team play and strategy.

Volleyball, Introduction to
Fall and spring. Fundamentals of ball handling, serves, defensive blocks, and position play are stressed. Classes will scrimmage.

Volleyball, Intermediate
Fall and spring. Passing and blocking strategy; scrimmages in class.

Volleyball, Advanced
Fall and spring. Offensive and defensive team strategy is emphasized in class scrimmages.

Weight Training Courses
Nautilus
Fall, spring, and summer. (6 weeks) Enrollment limited to capacity of facilities. Fee charged. Advanced weight lifting on specifically designed apparatus. Ten stations in the room.

Olympic Weight Training
Fall and spring. Fee charged. Introduces the proper use of olympic weights for improving physical condition and muscular strength. Instruction with focus on the relation between high-rep light weight lifting, low-rep heavy lifting, and the development of bulk, strength, and endurance.

Independent Study
Independent Study
Fall and spring. Independent study is designed for those who have difficulty fitting any of the regularly scheduled courses into their academic program. Class activities will be based on personal fitness programs. A term paper is required. Permission to enter this program must be granted by the program director.
The School of Continuing Education and Summer Sessions provides a wide variety of educational opportunities beyond the degree-granting programs of the university. These programs serve virtually all age groups in a great variety of formats and time frames. For information about the following programs write B20 Day Hall, Ithaca, New York 14853-2801; call 607/255-4987; e-mail info@sce.cornell.edu; or fax 607/255-8942; unless indicated otherwise below. You may also visit us on the Web at http://www.sce.cornell.edu/.

ADMINISTRATION
Glenn C. Aletschuler, dean
Alicia C. Dowd, media manager
Judith K. Eger, director, special programs
Abby H. Eller, director, Cornell University Summer College
Mary T. Serrano, computing director
Ralph Janis, director, Cornell's Adult University
Charles W. Jermy, Jr., associate dean, and director, Cornell University Summer Session
Cathy M. Pace, registrar
Diane E. Sheridan, director, finance and administration

CORNELL UNIVERSITY SUMMER SESSION
The Cornell University Summer Session provides unique and unusually attractive opportunities for study and recreation at a time when the Cornell campus and the Finger Lakes region of central New York are at their loveliest and the Ithaca weather is at its best. Participants may choose from a wide spectrum of courses scheduled during three-, eight-, and six-week sessions. Although admission is open to persons of all ages, the majority of summer session participants are matriculated Cornell students. Classes meet daily and are usually kept small to foster a close association between students and teachers.

SPECIAL AND PROFESSIONAL PROGRAMS
Intensive learning experiences are presented year-round both for students and for professionals in many fields. Formats include for-credit courses of one to eight weeks and noncredit weekend and weeklong short courses. Programs can also be designed to respond to the needs and interests of corporations, professional societies, and other groups. These programs take place on the Cornell campus, on site, and at other locations worldwide. For information call 607/255-7259; e-mail sp@sce.cornell.edu; or fax 607/255-8942.

SUMMER COLLEGE PROGRAMS FOR HIGH SCHOOL STUDENTS
High school sophomores, juniors, and seniors attend regular university courses through Cornell University Summer College and may earn college credit. They also explore career options through specially designed workshops. Students live in residence halls, become familiar with campus life, and attend seminars describing the college admissions process. The program is designed to help ease the transition from high school to college. For information call 607/255-6203; e-mail cau@sce.cornell.edu; or fax 607/255-8942.

CORNELL'S ADULT UNIVERSITY
Cornell's Adult University (CAU) offers week-long noncredit courses on campus for adults and families during the summer. During the fall, winter, and spring, there are weekend seminars, week-long domestic programs, and international study tours. Developed and led by distinguished members of the Cornell faculty, all programs are inspired by the belief that learning never ends and that one of the roles of a great university is to provide a bridge between traditional formal education and informal, noncredit study. For information, write Cornell's Adult University, 626B Thurston Avenue, Ithaca, New York 14850-2490; e-mail cau@sce.cornell.edu; or call 607/255-6260.

EXTRAMURAL STUDY
Cornell undergraduate or graduate students whose studies have been interrupted may find it appropriate to resume their studies by taking classes on a part-time basis. Area residents may take courses on a part-time basis by registering as extramural students. Those interested may enroll in almost any course offered in the fall and spring terms if they receive the instructor's written approval. Another offering, the Visitor's Program, allows adults to attend classes in many divisions of the university on a space-available basis at a reduced charge. In this program, no credit is given, and no record is kept of attendance or performance. Visitors are required to obtain written permission from the instructor.

WINTER SESSION
Cornell undergraduate and graduate students, as well as employees and area residents, can earn three to four credits between the fall and spring semesters by enrolling in the winter session. This quiet time on campus allows students to enjoy generally smaller classes and to concentrate on intensive study. Winter-session students may enroll in scheduled courses or design individualized study with a faculty member.

CONTINUING EDUCATION INFORMATION SERVICE
This service provides free information, counseling, and referral to people who have been out of school for several years and want to resume their education. It also provides information about short courses, workshops, professional updates, and executive programs offered by the university to people inside and outside Cornell.

SUMMER COURSE ROSTER
The Cornell University Summer Session offers a wide variety of courses. The list that follows includes those courses that are usually offered every summer. The list is not exhaustive; many new courses or courses offered only occasionally are not listed. For complete information, contact the Summer Session Office. The summer session catalog is published in February. A preliminary course roster is available beginning in late November and current course offerings are listed and updated on the Web from November through June.

African Studies
AS&RC 205 African Civilizations and Culture
A program in African languages is also offered. Consult the department for a complete listing.

Agricultural, Resource, and Managerial Economics
ARME 220 Introduction to Business Management
ARME 221 Financial Accounting
ARME 310 Introductory Statistics
ARME 320 Business Law I

Anthropology
ANTHR 101-102 Introduction to Anthropology
ANTHR 201 Lost Tribes and Sunken Continents
ANTHR 257 American Indians in Film

Archaeology
ARKEO 100 Introduction to Archaeology
ARKEO 201 Lost Tribes and Sunken Continents
ARKEO 319 Underwater Archaeology
ARKEO 358 Field Archaeology in Honduras
ARKEO 360 Field Archaeology in Greece
ARKEO 361 Summer Program in Etruscan Archaeology at La Planta

Other field study opportunities are usually available through this department.

Architecture
ARCH 110 Introduction to Architecture: Design Studio
ARCH 130 An Introduction to Architecture: Lecture Series
ARCH 251 Photography I
ARCH 351 Photography II
Consult the Department of Architecture office for a complete list of summer design offerings.

Clinical Sciences: M. White
Diagnostic Laboratory: D. Lein
Microbiology and Immunology: R. Avery
Pathology: B. Pauli
Pharmacology: G. Sharp
Physiology: J. Woottton, acting department chair

THE COLLEGE

The College of Veterinary Medicine offers a professional program that requires four years of full-time academic and clinical study of the normal and abnormal structure and function of the animal body and the diagnosis, treatment, and prevention of animal disease. Graduates of the college receive the Doctor of Veterinary Medicine (D.V.M.) degree, which is recognized by licensing boards throughout the world. Graduates generally enter private practice, academia, or become engaged in one of the increasing number of other biomedical activities.

Admission requires a minimum of three years of college work, including specific prerequisite courses and experience. Applications must be filed approximately one year before the proposed matriculation date. The competition for admission is keen, since there are many more qualified applicants than can be admitted. Graduate programs in veterinary research and postdoctoral training in clinical specialties are open to Doctors of Veterinary Medicine and some highly qualified holders of baccalaureate degrees and lead to the degree of Master of Science or Doctor of Philosophy.

More detailed information is contained in the Catalog of the College of Veterinary Medicine, which may be obtained by writing to the college.

The College of Veterinary Medicine has revised its professional curriculum; the new course requirements apply to the class that matriculated in the fall of 1993 and to subsequent classes. Courses in the revised professional curriculum are designated with the prefix "VTMED," and consist of two categories of courses: foundation courses and distribution courses.

The Professional Curriculum

FOUNDATION COURSES

In foundation courses I, II, III, IV, and V (VTMED 510, 520, 530, 531, 540, 550, and 551), students work in small groups under the guidance of a faculty tutor. Case-based exercises are used to facilitate the understanding of basic science concepts within the context of clinical medicine. On average, three to four 2-hour tutorial sessions are scheduled each week. These are complemented by lectures, laboratories, and discussion sessions or other organized learning opportunities specific to the individual course. Faculty are available to respond to questions that arise as a result of the case-based exercises.

Tutorial sessions and all other organized learning programs are usually scheduled during the mornings, thereby reserving the afternoons for independent study. By situating learning in a clinical context, students are better able to integrate material from the basic and clinical sciences, and are encouraged to develop an understanding of the clinical reasoning process from the beginning of the curriculum. The tutorial-based educational format creates an atmosphere that facilitates case-based exercises.

Note: Courses listed in brackets [ ] are approved courses that are not offered during the 1997-98 academic year.

VTMED 510 The Animal Body

Fall. 12 credits. Limited to first-year veterinary students. Letter grades only. S. S. Suarez (course leader) and others.

This course is designed to enable students to understand the principles of veterinary anatomy at the gross, microscopic, and ultrastructural levels. Developmental anatomy is emphasized to the extent that it reflects determination of adult form and species differences. Radiologic and related imaging techniques are used throughout the course to assist in the understanding of normal and abnormal structure anatomy. Understanding of the anatomic basis of common surgical procedures is achieved during the various dissection procedures. The course is based on tutorials with significant emphasis on practical laboratories. Lectures and modules complement student learning.

VTMED 517 Animals, Veterinarians, and Society: Part A (Foundation Course VII)

Fall. 1 credit. Limited to first-year veterinary students. Letter grades only. One fee of approximately $10 is charged for the course guide. J. E. Saidla (course leader) and others.

This course is the correlate for VTMED 510 The Animal Body. This is a laboratory-based course that teaches the physical examination of four species (dog, cat, cow, and horse). The class is divided into smaller groups and each group meets for two hours each week during the first eleven weeks. The skills of auscultation, percussion, palpation, and observation are taught along with clinically related diagnostic procedures.

VTMED 520 Genetics and Development (Foundation Course II)

Fall and spring. 8 credits. Limited to first-year veterinary students. Prerequisite: VTMED 510 The Animal Body. Letter grades only. D. M. Noden (course leader) and others.

This course emphasizes cellular and genetic control mechanisms operating during mammalian development and adulthood. Four basic processes—cell proliferation, cell movement, cell differentiation, and morphogenesis—are essential to all living systems but may be regulated differently in embryonic and mature cells and tissues. Tutorial cases are used to initiate explorations of the mechanisms that regulate these processes in embryonic, normal adult, and transformed (cancer) cell populations. Tutorial sessions are complemented by lectures, laboratories, minicase discussions, and modules.

VTMED 521 Neuroanatomy and Clinical Neurology

Spring. 3 credits. Limited to first-year veterinary students. Letter grades only. A. de Lahunta.

Fundamentals of functional neuroanatomy and diseases of the nervous system are taught so that each student is competent in the diagnosis of clinical neurologic disorders of domestic animals. This is a vertically integrated course that includes dissection of the central nervous system of the dog, the anatomic basis for the diagnosis of diseases of the nervous system, and the differential diagnosis of those diseases. Clinical cases with pertinent lesions are demonstrated with each system. Films and videotapes of clinical patients are used to demonstrate the clinical signs produced by the various diseases. Slides of gross and microscopic lesions are used to emphasize the clinical and neuroanatomic relationships and to stress characteristic features of representative conditions.
VTMED 527 Animals, Veterinarians, and Society: Part B (Foundation Course VIII)

This course begins in the last part of fall semester and finishes at the end of Winter Session. Limited to first-year veterinary students. Prerequisite: VTMED 517 Animals, Veterinarians, and Society: Part A. Letter grades only. A fee of approximately $7.00 is charged for the course guide. J. E. Saidla (course leader) and others.

This course is the correlate for VTMED 520 Genetics and Development. It enters into a study of ethical issues related to animal use, animal welfare, clinical genetics, clinical application of genetics, genetics counseling, and clinical day-to-day ethics. The course meets for one 2-hour session each week.

VTMED 530 Function and Dysfunction: Part I (Foundation Course IIIa)

Spring. 9 credits. Limited to first-year veterinary students. Prerequisite: VTMED 520 Genetics and Development. Letter grades only. B. J. Cooper (course leader) and others.

This course is designed to develop students' understanding of how an animal maintains itself as a functional organism, how this is achieved through the integration of different functional organ systems; how tissue structure relates to tissue function; how injury alters structure and leads to dysfunction, manifested as clinical signs; how organ function can be assessed; and how it can be modulated pharmacologically. The course incorporates aspects of physiology, biochemistry, cell biology, histology, pathology and histopathology, clinical pathophysiology and pharmacology.

VTMED 531 Function and Dysfunction: Part II (Foundation Course IIIb)

Fall. 7 credits. Limited to second-year veterinary students. Prerequisite: VTMED 530 Function and Dysfunction: Part I. Letter grades only. B. J. Cooper (course leader) and others.

A continuation of VTMED 530 Function and Dysfunction: Part I.

VTMED 537 Animals, Veterinarians, and Society: Part C1 (Foundation Course VIc)

Spring. 1 credit. Limited to first-year veterinary students. Prerequisite: VTMED 527 Animals, Veterinarians, and Society: Part B. Letter grades only. A fee of approximately $9.00 is charged for the course guide. J. E. Saidla (course leader) and others.

This course is the correlate for VTMED 530 Function and Dysfunction: Part I. The central goal of this course is to provide students with the interpersonal skills and techniques necessary to communicate effectively with clients. In addition, students will be offered an opportunity to study the human-animal bond, animal death, and grief counseling. This course also provides opportunities to practice client interviewing skills and to participate in a home or farm visit.

VTMED 538 Animals, Veterinarians, and Society Part C2 (Foundation Course VIc, continued)

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VTMED 537 Animals, Veterinarians, and Society: Part C1. Letter grades only. A fee of approximately $6.00 is charged for the course guide. J. E. Saidla (course leader) and others.

This course is the correlate for VTMED 531 Function and Dysfunction, Part II. This course provides for understanding the importance of the medical record, the diversity of clients, employees, and society in general, and a session on alternative medicine and its various practices. Students will be encouraged to critically read and evaluate clinical studies and journal articles is also provided.

VTMED 540 Host, Agent, and Defense

(Foundation Course IV)

Fall. 12 credits. Limited to second-year veterinary students. Prerequisite: VTMED 531 Function and Dysfunction: Part II. Letter grades only. J. T. Blue (course leader) and others.

This course is divided into six sections: the host response, intracellular environment, extracellular environment, somatic environment, external environment, and surrounding environment. Using this approach, students develop an understanding of the host response to insult; a familiarity with groups of important pathogens; an understanding of how pathogens manipulate the host and how the host defends itself against attacks; and an understanding of the roles played by both the external environment and human intervention in the epidemiology of infectious organisms.

VTMED 547 Animals, Veterinarians, and Society: Part D (Foundation Course VIIa)

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VTMED 538 Animals, Veterinarians, and Society: Part C2. Letter grades only. A fee of approximately $12.00 is charged for the course guide. J. E. Saidla (course leader) and others.

This course is the correlate for VTMED 540 Host, Agent, and Defense. This course will emphasize maintaining health in both individuals or populations of animals and humans. Topics will include animal bites, nosocomial infections, rabies control programs, vaccines and vaccine reactions, zoonotic diseases, and integrated health maintenance programs.

VTMED 550 Animal Health and Disease: Part I (Foundation Course V)

Spring. 10 credits. Limited to second-year veterinary students. Prerequisite: VTMED 540 Host, Agent, and Defense. Letter grades only. R. O. Gilbert.

This course integrates the clinical sciences of medicine, surgery, anesthesiology, radiology, and theriogenology, which are themselves integrated subjects, with systems pathology and relevant aspects of applied pharmacology. The course will be presented on a systems basis moving from clinical signs of alteration in function, to pathophysiology of clinical signs, to strategies for diagnosis and treatment. Specific examples will be used to establish a cognitive framework and knowledge of the most important diseases. This course will provide a sound foundation for clinical rotations in Foundation Course VI. It builds upon the strengths developed in earlier courses by an increased exposure to case examples in a more directed way, taking advantage of the diversity of skills and special knowledge of both faculty and students. A variety of educational techniques will be used, including case presentations in which interaction is encouraged, laboratories, demonstrations, case discussions, and autotutorials.

VTMED 551 Animal Health and Disease: Part II

(Foundation Course V, continued)

Fall. 20 credits. Limited to third-year veterinary students. Prerequisite: VTMED 550 Animal Health and Disease: Part I. Letter grades only. R. O. Gilbert (course leader) and others.

A continuation of VTMED 550 Animal Health and Disease: Part I.

VTMED 557 Animals, Veterinarians, and Society: Part E (Foundation Course VIIe)

Spring. Limited to second-year veterinary students rolling over into fall semester for the then third-year veterinary students. 1 credit. Prerequisite: VTMED 547 Animals, Veterinarians, and Society: Part D. Letter grade only. A fee of approximately $14.00 is charged for the course guide. J. E. Saidla (course leader) and others.

This course is a correlate with Foundation Course V, Animal Health and Disease. The course will examine governmental regulation of the veterinary profession, including proper drug usage, extra label drug use (ELDU), controlled substances (DEA), substance abuse, professional liability and malpractice insurance, professional and unprofessional conduct, hazardous waste in the workplace (OSHA), and environmental issues (EPA). Also included will be sessions relating to controlling and preventing the spread of animal diseases and the role of USDA and specifically APHIS in these regulatory functions.

VTMED 561 Community Practice

Service-Medicine

2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. E. Hornbuckle (coordinator) and others.

The Community Practice-Medicine Service is structured to provide supervised clinical experience in the practice of small companion animal medicine. The course is conducted in the Small Animal Clinic of the Veterinary Medical Teaching Hospital. Students interact directly with clients presenting their pet for primary medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plans to the clients and provide follow-up care and management of these patients.

VTMED 562 Community Practice

Service-Surgery and Anesthesiology

2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. H. J. Harvey (coordinator) and others.

Basic principles of anesthesiology and surgery are emphasized in the clinical rotation. Under direct staff supervision, students will anesthetize and perform surgical procedures on patients presented to the Small Animal Clinic for neutering and minor elective procedures. Students will be responsible for all aspects of patient care during their hospital stay and will be expected to fully participate in client communications. Ordinarily, this course will precede Anesthesiology Service and Small Animal Surgery Service (soft tissue component).
VTMED 563 Small Animal Medicine
Fall, spring, winter, and summer.
4 credits. Required course open to second-semester third-year and all fourth-year veterinary students; not open to others. Letter grades only. S. C. Barr, S. A. Center, J. F. Randolph (coordinator), K. W. Simpson.
The Small Animal Medicine Service is structured to provide supervised clinical experience in the practice of companion small animal medicine. The course is conducted in the Small Animal Clinic of the Companion Animal Hospital. Students interact directly with clients presenting their pets for primary or referral medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of those patients. After review, students explain their plans to the clients and provide follow-up care and management of those patients.

VTMED 564 Small Animal Surgery Service
Fall, winter, spring, and summer.
4 credits. Required of all third- and fourth-year veterinary students; not open to others. Letter grades only. E. J. Trotter (coordinator) and small animal surgery faculty.
A clinical service rotation, this course exposes the student to the practice of surgery under hospital conditions. Students participate in the diagnostic techniques, planning of therapy, and daily care of dogs, cats, and exotic species under the direction of a faculty veterinarian. Students assist experienced surgeons in the operating room and, with house-officer supervision, are responsible for patients undergoing ovariohysterectomy or castration. Client communications and the basics of efficient practice are also emphasized.

VTMED 565 Ambulatory Medicine Service
Fall, winter, spring, and summer.
4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. C. L. Guard (coordinator) and others.
A clinical service rotation in which students accompany ambulatory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prophylaxis, and routine procedures such as castration and dehorning. With appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled visits, students participate in diagnosis and medical or surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

VTMED 566 Large Animal Medicine Service
Fall, winter, spring, and summer.
3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. C. Rebhun (coordinator) and others.
Students assigned to this service will assist the faculty and house staff of the Large Animal Medicine service in the diagnosis and care of patients admitted to the service. It is hoped that students working on this service will acquire knowledge and skills in history taking, physical examination, election and completion of appropriate ancillary tests, diagnosis, treatment and patient care. Daily rounds and discussions are used to monitor patient progress and further educate students.

VTMED 567 Large Animal Surgery Service
Fall, winter, spring, and summer.
4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. P. Hackett (coordinator) and others.
This clinical rotation is structured to provide supervised clinical experience in the practice of large animal surgery. Under the direction of faculty and house staff, students participate in the diagnosis, surgical treatment, and care of patients presented to the Large Animal Clinic. Training through patient care is supplemented by formal rounds and by didactic instruction.

VTMED 568 Anesthesiology Service
Fall, winter, spring, and summer.
3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. D. Gleed (coordinator), J. W. Ludders, P. F. Moon and others.
This course is designed to provide clinical experience in the use of anesthetics in large animal medicine. The students participate in selecting suitable anesthetic techniques for patients in the Veterinary Medical Teaching Hospital and then implement those techniques under the supervision of residents and faculty. The goal is for students to learn the skills necessary to perform safe anesthesia in a modern veterinary practice.

VTMED 569 Dermatology Service
Fall, winter, spring, and summer.
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. D. W. Scott (coordinator) and others.
During this clinical rotation, students participate in the diagnosis and management of skin disorders in small and large animals. Patients are examined by appointment and through consultation with other hospital services.

VTMED 570 Ophthalmology Service
Fall, winter, spring, and summer.
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. C. Riis (coordinator) and others.
This course combines clinical experience with focusing skills in diagnostic ophthalmology. Students learn how to apply the ophthalmic diagnostic tests. The feeling of performing a good ocular examination is the goal of this rotation. Confidence in using direct and indirect ophthalmoscopy, tonometers, gonioscopes, conjunctival cytology, and surgery comes with practice introduced in this rotation. Students are required to review the introductory orientation videotapes in the Autovision Center entitled "Ocular Examination I and II" before the start of the rotation. This rotation provides surgical experience and consultations. A high percentage of the consultations are referral cases that usually challenge the service. Adequate routine case material is presented to prepare most students for practice.

VTMED 571 Pathology Service
Fall, winter, spring, and summer.
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. J. M. King (coordinator) and others.
This course involves the hands-on diagnostic necropsies of most mammalian species that are presented to the pathology necropsy room and of avian species that are admitted to the avian and aquatic animal medicine necropsy room. Students work in groups of three to five for the two-week rotation. Necropsies are performed under the guidance of pathology faculty and residents. Students prepare written reports of necropsies performed, review microscopic hematology and cytology slides, perform urinalyses, and discuss case studies.

VTMED 572 Radiology Service
Fall, winter, spring, and summer.
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. N. L. Dykes (coordinator) and others.
A two-week clinical rotation in the Radiology Section of the Veterinary Medical Teaching Hospital. Students will use radiographic, CT, ultrasonographic, and nuclear medicine imaging techniques to evaluate animal patients under treatment in the Veterinary Medical Teaching Hospital. With guidance of radiology faculty and technical staff, students obtain and interpret radiographic and ultrasonographic studies of patients. Laboratory sessions are given to allow hands-on experience in patient positioning and radiographic technique. An interactive teaching film is used to familiarize students with radiographic examples of common diseases of large and small animal species. Group discussions are scheduled to present and discuss current cases. Radiation safety aspects regarding the veterinary practitioner are emphasized.

VTMED 573 Fourth-Year Seminar
Fall and spring. 1 credit. Required of all fourth-year veterinary students. First-, second-, and third-year students and all staff members are also invited and encouraged to attend. S-U grades only. F. H. Fox, chair of the Senior Seminar Committee.
The aim of this course is to give the student the responsibility and opportunity of selecting and studying disease entity on the basis of a case or series of cases or to give the student the responsibility and opportunity of conducting a short-term, clinically oriented research project under the direction of a faculty member. In either case, an oral report will be presented at a weekly seminar. A written report will be submitted at the time of the seminar. All participants are encouraged to foster an atmosphere in which discussion, exchange of ideas, and the airing of controversial opinions might flourish.

DISTRIBUTION COURSES
Distribution courses comprise 30 percent of the curriculum and are usually scheduled during the first half of each spring semester. During the first two years, many of the
distribution courses are oriented to the basic sciences. During years three and four, students have additional distribution course offerings from which to choose. Some will emphasize clinical specialties, whereas others will integrate basic science disciplines with clinical medicine and will be co-taught by faculty representing both areas. Students from different classes have the opportunity to take many of these courses together.

Grades: Grading options for distribution courses are either letter or S-U.

VTMED 601 Anatomy of the Carnivore
Spring. 3 credits. Prerequisite: VTMED 510 The Animal Body or permission of the instructor. C. F. Farnham.

Carnivore anatomy is studied by detailed systematic and regional dissection of the dog and cat, supplemented by the use of X-projections. The lectures augment the laboratory dissection. Students will complete an independent dissection or research project in an area of particular interest to them and present their project in a seminar format.

VTMED 602 Anatomy of the Horse
Spring. 3 credits. Letter grade. Prerequisite: VTMED 510 The Animal Body or permission of instructor. M. S. Hackett.

This course is organized as a traditional anatomy course that relies primarily on students learning the anatomy of horses through hands-on dissection laboratories augmented by lectures and highlighted by clinical correlations. An understanding of anatomy that provides the foundation for surgery and is directly relevant to clinical practice will be emphasized in the regional approach to dissection. Structural-functional correlations that are unique or important in the horse will be the area of emphasis for most lectures. Microscopic anatomy will be integrated into the course in selected areas to lay a foundation for the later study of pathology or when it reinforces concepts of structure and function that are difficult to understand by a study of the gross anatomy alone (i.e., hoof). Student dissection cadavers will be supplemented by skeletal materials, radiographs, models, preserved pre-dissected specimens and fresh specimens when they are available.

VTMED 603 Anatomy of the Ruminant
Spring. 3 credits. Letter grade. Prerequisite: VTMED 510 The Animal Body or permission of the instructor. J. W. Hermanson.

The regional anatomy of several ruminant species will be covered using dissection laboratories, lectures, and large-group discussions. Functional consequences of structural modifications and anatomical features directly relevant to clinical practice will be emphasized. Microscopic anatomy will be correlated with gross anatomy when appropriate to relate structure to function and provide a foundation for later study in pathology.

Student dissection material will be supplemented by skeletal materials, radiographs, models, preserved specimens, and postmortem specimens. Students will be required to complete an independent study project on a relevant subject of their choice.

VTMED 604 Mechanics of Animal Movement
Spring. 2 credits. Open to veterinary students, graduate students, and qualified undergraduates with permission of the instructor. C. E. Farnham.

This course explores the mechanical factors that influence how movement occurs within animals. A conceptual approach to understanding the relationship between the animal and its performance is emphasized. The main focus will be on an analysis of whole animal locomotion and an exploration of the functional basis of gait and its abnormalities. This will be followed by investigation of functional features of the anatomical components that are involved with providing the capabilities for movement (both mechanical and physiological). The class operates in a discussion format, meeting two evenings per week. Four hands-on labs demonstrating how biomechanical research is conducted are distributed throughout the eight-week course. Assessment involves weekly short quizzes and a final term paper.

VTMED 605 Comparative Anatomy: Pattern and Function

The goal of this course is to remove the confusion surrounding anatomical variability among amniote species (mammals, birds, and reptiles). This is accomplished by reducing the anatomy of major organ systems in each species to a common basic pattern and relating the differences to functional and historical considerations. Six major systems will be explored (integumentary, locomotory, neurosensory, cardiovascular, respiratory, digestive, and urogenital) in a variety of species as available.

VTMED 606 Advanced Clinical Neurology
Spring. 1 credit. Letter grade. Prerequisite: VTMED 521 Neuroanatomy and Clinical Neurology. A. deLahunta.

The objective of this course is to further the experience and confidence of the student in the diagnosis and understanding of clinical neurological disorders. It continues their correlation of anatomy, physiology, and pathology in the diagnosis of diseases of the nervous system and the understanding of their pathogenesis. Students who are not covered in the foundation course will be considered here. The course is entirely based on case examples that are presented on videotapes or 16mm film and slides.

VTMED 607 The Literature and Subject Matter of Natural History
Spring. 1 credit. Letter grade. H. E. Evans.

This course is an introduction to classic and current literature of life on earth. Materials relating to the earth sciences and the biology of plants and animals from around the world will be shown and discussed. Students will be required to show and discuss a book that concerns natural history. A recommended text for this course is The Cambridge Illustrated Dictionary of Natural History by R. J. Lincoln and G. A. Boxhall, 1990.

VTMED 608 Anatomy and Histology of Fish
Spring. 2 credits. Minimum enrollment: 5; maximum enrollment: 10. Veterinary students or permission of the instructor. S-U or letter grade. P. R. Bowser.

This course provides an overview of the diversity of anatomy and histology of fish. Students will participate in lecture, discussion and laboratory exercises to review the major organ systems. Extensive use of library resources for assigned readings will be expected. Each student will prepare a term project and make one oral presentation.

VTMED 610 Introduction to Avian Biomedicine
Spring. Even-numbered years. 2 credits. Letter grade. Minimum enrollment: 10; maximum enrollment: 60. G. V. Kollas.

An introduction to avian biology for veterinary students. The course will include lectures and laboratories involving avian evolution, anatomy, physiology, and pathology. Emphasis will be on the development of a strong foundation in avian biology that will be applied in VTMED 616 Diseases of Birds and VTMED 652 Avian Medicine and Surgery.

VTMED 611 Fish Health Management
Spring, weeks 8–14. 1 credit. Minimum enrollment: 8; maximum enrollment: 16. Veterinary students or permission of instructor. S-U or letter grade. P. R. Bowser.

This course will present a summary of important diseases of fin fishes. Diseases covered will be those of commercial aquaculture as well as those encountered by the tropical fish hobbyist. The course is designed to provide the students with a knowledge base and hands-on diagnostic experience in diseases of fish.

VTMED 612 Management of Aquarium Systems
Spring, weeks 2–7. 1 credit. Minimum enrollment: 8; maximum enrollment: 16. Veterinary students or permission of instructor. S-U or letter grade. P. R. Bowser.

This is a lecture and laboratory course dealing with procedures and practices involved in management of aquarium systems. Topics include water quality, types of aquarium filtration systems, fish health, fish nutrition, and general fish biology. The course will require independent work in aquarium system management.

VTMED 613 Aquavet I: Introduction to Aquatic Veterinary Medicine
Four weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 4 credits. Minimum enrollment: 24 students from Cornell University, the University of Pennsylvania, and other U.S. colleges and schools of veterinary medicine. By permission of the instructor. S-U grade only. Course fee required. P. R. Bowser.

The course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutions at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is designed to introduce veterinary students to aquatic animal medicine. The marine environment is described and visited on field trips in the Woods Hole area. Specific aspects of the comparative anatomy, physiology, nutrition, microbiology, pathology, and medicine of a variety of marine and freshwater species are discussed. Emphasis is placed on systems of aquaculture. The specific diseases of a few selected species are presented as examples, including the diseases of a crustacean, a shellfish, a fish, and marine mammals. The course is taught
by an invited faculty of thirty-five individuals who are leaders in their respective fields of aquatic animal medicine. Students present seminars on appropriate topics.

**VTMED 614 Aquatic II: Comparative Pathology of Aquatic Animals**

Two weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 2 credits. Maximum enrollment: 18. Prerequisites: formal course work in diseases of aquatic animals or appropriate experience and permission of the instructor. S-U or letter grade.

Course fee required. F. R. Bowser. This course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutes at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is an advanced course in the comparative pathology of aquatic invertebrates and vertebrates commonly used as laboratory animals. The material presented will consist of the diseases of aquatic animals as well as extensive use of the microscope to examine the histopathology associated with these diseases. The course is taught by an invited faculty of twelve individuals who are leaders in their respective fields of aquatic animal medicine.

**VTMED 615 Veterinary Medicine in Developing Nations**

Spring. Offered alternate years. Offered spring 1997 and 1999. 2 credits. Maximum enrollment: 20. Primarily for veterinary students; others by permission of instructor. Letter grade. E. A. Schat. Veterinary medicine has an important role to play in developing nations in (a) developing and providing economical sources of animal proteins for human consumption and (b) protecting ecological resources. The seminar course will provide interested veterinary students with information on and insight in the multitude of complex issues facing U.S. veterinarians working in developing nations.

**VTMED 616 Diseases of Birds**

Spring. 2 credits. Second-, third-, and fourth-year veterinary students. Enrollment by 10 minimum; 80 maximum. S. Naqi and G. V. Kollia.

This course is designed to introduce second- and third-year veterinary students to a basic and practical knowledge of the most common infectious and non-infectious diseases affecting a variety of avian species. The course will emphasize the latest diagnostic and control approaches. The course format will be a combination of didactic lectures and discussions.

**VTMED 619 Pathogenesis of Viral Disease**

Emerging viruses like Ebola and equine morbillivirus have much to "learn" about how to survive long term in the real world. The goal of this course is to explore the mechanisms by which viruses cause disease and identify the ways in which successful virus pathogens perpetuate themselves in host populations despite our best efforts to eradicate them. Specific topics will include discussions of: (i) the mechanisms by which different viruses elicit disease and the evolution of the virus/host relationship; (ii) the mechanisms underlying the establishment of latent and persistent infections, and (iii) methods used by viruses to evade host responses. Consideration of these issues will lead to discussions of how some of these agents might eventually be eradicated.

**VTMED 620 Molecular Biology and Immunology of Host-Parasite Interactions (also VTM 702)**

The primary objective of this lecture course is to make the student aware of the most important areas of research in contemporary parasitology. Lectures will focus on a broad range of parasites, with an emphasis on those of medical importance. Recently published research articles and reviews will be used as the basis to explore the issues of host invasion, evasion of host defense mechanisms by parasites, chemotherapy, drug resistance, vector biology, and molecular diagnosis. Biological processes especially well understood through work on parasites, such as RNA editing and cytokine anchor biosynthesis and structure, will be covered in detail.

**VTMED 622 Foreign Infectious Diseases of Animals**

**VTMED 623 The Pathogenesis of Significant Bacterial Infections of Large Domestic Animals**

This course will require three contact hours per week for eight weeks thus: One contact hour in a lecture format to summarize the current canon of important, selected information about significant bacterial diseases of large domesticated animals and to emphasize the pivotal events in pathogenesis, including, where appropriate, ecology, colonization, virulence, invasion, evasion, host reaction, lesion production, and resolution. Two additional contact hours will be used as follows: 50 percent—a local expert with focus on an important aspect of the above, e.g., treatment, clinical findings, diagnosis, current problems, etc., to bring reality and expertise to bear on the subject. 50 percent—a group of students will present the results of their original explorations into one specific aspect of the course this week's infection. This might include an update of information, an in-depth look at one aspect of pathogenesis, or an intellectual attack on the current dogma about pathogenesis, treatment, or diagnosis.

**VTMED 624 Feline Infectious Diseases**

Spring. 1 credit. For second-, third-, and fourth-year veterinary students. Letter grade. Microbiology faculty.

This course will provide an opportunity for the student to understand and discuss the etiology, transmission, diagnosis, treatment, and prevention of various feline infectious diseases that are important to practicing veterinarians. Diseases to be discussed include feline panleukopenia, feline respiratory diseases, feline leukemia, feline immune deficiency virus, feline infectious peritonitis, rabies, toxoplasmosis, and various bacterial infections.

**VTMED 625 Osteoarthritis**

This course provides a basis in the molecular, cellular, and tissue levels for understanding the function of mammalian diarthrodial joints. It includes a description of a diarthrodial joint and the detailed composition and metabolism of bone, articular cartilage, ligaments, meniscus, capsule, and synovium. The interrelationship of synovium, synovial fluid, joint lubrication, articular cartilage, simple biomechanical considerations, and enervation are described to address joint function. A comprehensive discussion of the osteoarthritis that inextricably is associated with hip dysplasia in dogs serves as a basis for the etiopathogenesis of this disease. Osteoarthritis in joints of cats, dogs, horses, pigs, sheep, and cows also are discussed in detail as is osteochondrosis.

Consideration also is given to infectious arthritis and also human joint diseases such as gout and pseudogout. The role of pain receptors, a brief discussion of therapy such as the role of nonsteroidal anti-inflammatory drugs, glucocorticoids, and mention of possible corrective surgery procedures are included.

**VTMED 626 Epidemiology of Infectious Diseases**

Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Enrollment maximum 8. H. Mohammed and others.

This course will provide an introduction to epidemiologic methods used in the infectious disease investigations. The importance of surveillance systems in detecting modern epidemics and in the development of effective disease prevention and control strategies will also be discussed. An emphasis will be placed on understanding the relationships between the host, the agent and the environment as they relate to disease causation. The course will explore contemporary epidemiologic methods applicable to old diseases that remain real or potential problems, newly emerging infectious diseases, and nosocomial infections. Selected epidemics will be discussed to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and groups of animals. The students will have the opportunity to apply these methods they learned to actual disease problems and write an epidemiologic report that might lead to a publication in a peer reviewed scientific journal.

**VTMED 630 Clinical Biostatistics for Journal Readers**

This course will provide an introduction to biostatistics necessary for proper evaluation of research in professional journals.
The student will become familiar with the statistical methods commonly used in veterinary clinical articles and will be able to recognize obvious misuse of those methods.

VTMED 632 Senior Seminar
Fall and spring. 1 credit. S-U grade. Senior Seminar Committee. Attendance at fourteen of the senior seminar sessions presented during the academic year constitutes acceptable completion of this course.

VTMED 633 Introduction to Nontraditional Companion and Laboratory Animals
Spring. 1 credit. No minimum or maximum enrollment. Letter grade only. J. E. Saidla (course leader) and others. This course is both laboratory and lecture based and deals with a wide variety of nontraditional species that might be brought into a small animal practice other than a dog or cat. These can be either companion or laboratory animals and include rodents, lagomorphs, other small mammals, reptiles, amphibians, birds, fish, goats, sheep, potbellied pigs, primates, and llamas. Instruction in restraint and handling, breeding, husbandry, and nontraditional animal management information is provided for each species. This is followed, where practical, by laboratory sessions for observation, restraint, and physical examination.

VTMED 634 Introduction to Large Animal Ambulatory Practice
Fall, winter, spring, and summer. 1 credit. Letter grade only. D. F. Smith. This course introduces veterinary students to primary care large animal ambulatory practice and herd health management through direct exposure to the Large Animal Ambulatory and Production Medicine Clinic Service of the Veterinary Medical Teaching Hospital. Students observe and assist with restraint, examination and routine treatment of animals, and communication with clients. Successful completion requires satisfactory participation during five days of clinical service.

VTMED 635 Introduction to the Professional Literature
Spring. 1 credit. Minimum enrollment: 6. Maximum enrollment: 20. Letter grade. C. L. Guard (coordinator). This course introduces veterinary students to the professional and biomedical literature, including development of critical reading and research skills. Students will become familiar with the broad range of professional and biomedical literature and will be encouraged to develop a rigorous approach to journal and scientific article review. Secondary emphasis is on developing skills in library and bibliographic search techniques.

VTMED 637 Introduction to Community Practice Service
Fall, spring, and summer. 1 credit. W. E. Hombuckle. This course introduces veterinary students to primary care small animal clinical practice through direct exposure to the Community Practice Service of the Veterinary Medical Teaching Hospital. Students observe and assist with restraint, examination and routine treatment of pets, and communication with clients. Successful completion requires satisfactory participation during ten half-days of clinical service.

VTMED 638 Physiological Nutrition
Spring. 1 credit. Minimum enrollment: 10; maximum: 90. For second-year veterinary students; others by permission of instructor. A. J. Reynolds. This course will provide information on the evaluation and formulation of rations for large and small animals. These concepts will be applied in discussion on the nutritional requirements of these animals during maintenance, gestation, lactation, growth, stress, and aging. The course is recommended for all second-year veterinary students who do not have a strong background in ruminant, equine, canine, and feline nutrition. This course, or its equivalent, will be necessary for comprehension of clinical nutrition concepts in Foundation Course V.

VTMED 639 Veterinary Dentistry (Distribution Course)
Spring. 1 credit. Limited to second-, third-, and fourth-year students. Letter grade only. J. E. Saidla (course leader) and others. This is an introductory-level course in small animal dentistry. It is a laboratory course that meets for two hours, twice a week for 16 sessions. Basic concepts and practical topics in dentistry will be reviewed.Potential topics include dental anatomy, oral/dental examination, routine dental care, including prophylaxis, recording, keeping, and breed differences, feline-specific dental disease, occlusion/malocclusion, periodontics, endodontics, restorative and orthodontic procedures, and orthodontics are presented. Basic instrumentation and materials used in dentistry are stressed. The class will use prepared specimens for all sessions.

VTMED 640 Veterinary Aspects of Captive Wildlife Management
Spring. 2 credits. Letter grade. All years. G. V. Kollias. This course will concentrate on principles of captive wildlife management, both clinical and nonclinical. Students will be challenged to learn and integrate a variety of disciplines that are essential to successfully managing wildlife in a captive or semi-free-ranging environment. These disciplines include but are not limited to species-specific (1) behavior and behavioral requirements, (2) nutritional requirements and problems, (3) natural history, (4) zoologic, and toxicological problems, (5) manual restraint and anesthesia, (6) preventive medicine, and (7) medical and legal ethics.

VTMED 641 Approaches to Problems in Canine Infectious Diseases
Spring. 1 credit. Maximum enrollment: 80; minimum: 10. For second-, third-, and fourth-year veterinary students. Letter grade. S. C. Barr. The course consists of two 50-minute discussion/lecture periods a week for seven weeks. In the 8th week, students will work through cases in infectious diseases using a specifically designed computer software program. The letter grade will be obtained entirely from the result of a written examination given in the final period. The course will emphasize the approach to clinical medical problems generally and infectious diseases specifically. The overall objective is to give future small animal practitioners skills in the approach to clinical problems with specific emphasis placed on history taking, clinical signs and examination skills, assessment of clinicopathology data and diagnostic materials (radiographs, ultrasounds), treatment plans, and prevention. The course expands knowledge gained in Foundation Course IV and under the instruction of a clinical faculty member is aimed at facilitating the use of that knowledge into the practical skills of managing clinical cases encountered in practice. A basic level of computer literacy is advised but not required.

VTMED 642 Management of Fluid and Electrolyte Disorders
Spring. 2 credits. Minimum enrollment: 20. For second-, third-, and fourth-year veterinary students. Letter grade. D. F. Smith. Students will focus on clinical manifestations and the pathophysiologic mechanisms associated with fluid, electrolyte, and metabolic acid base disturbances in domestic animals. The course is divided into segments dealing with salt and water imbalances, potassium abnormalities, metabolic acidosis, metabolic alkalosis, and mixed acid-base disturbances.

VTMED 643 Fundamental Aspects of Embryo Transfer
Spring. 1 credit. Maximum enrollment: 16. Third- and fourth-year students. S-U grades only. R. G. Craven. This course provides an introduction to the theory and practice of embryo transfer in domestic animals. Topics include background, advantages and disadvantages, superovulation, embryo recovery techniques, embryo culture and manipulation, embryo transfer techniques, registration of offspring, import and export, and related topics in assisted reproductive technologies. Students are exposed to practical techniques of embryo transfer in cattle, small ruminants, horses, and swine. The course consists of lectures, demonstrations, and laboratory classes during which students practice techniques of embryo recovery, evaluation, handling, and transfer.

VTMED 644 Techniques in Equine Surgery
Winter. 1 credit. Limited to third- and fourth-year veterinary students. S-U grades only. S. L. Furini (coordinator) and others. This course consists of five laboratories. Some specialized surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating equine practice after graduation. This course is offered during a one-week period over winter intercession.

VTMED 645 Techniques in Food Animal Surgery
Winter. 1 credit. Limited to third- and fourth-year veterinary students. S-U grades only. S. L. Furini (coordinator) and other large-animal surgeons. This course consists of five laboratories. Performing surgical procedures on ponies and cadaver specimens. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with some specialized surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students anticipating equine practice after graduation. This course is offered during a one-week period over winter intercession.

VTMED 646 Techniques in Food Animal Surgery
Winter. 1 credit. Limited to third- and fourth-year veterinary students. S-U grades only. S. L. Furini (coordinator) and other large-animal surgeons. This course consists of five laboratories. Performing surgical procedures on sheep, calves, cadaver specimens, and adult cattle. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for those students anticipating food animal practice after graduation. This course
is offered during a one-week period over winter intersession.

VTMED 646 Llama Tutorial
Fall, spring, and summer. 1 credit.
Limited to third- and fourth-year veterinary students. M.A. Smith.
This autoritorial or group tutorial course covers common problems of llamas and alpacas. Each week, participants will be provided with a brief case description and a set of sample study questions. Reference will be made to textbooks, journal articles, videotapes, and, if available, a teaching llama to assist students in finding the answers to the questions efficiently. Grading is based on an oral exam.

VTMED 647 Poisonous Plants
Fall. 1 credit. All years. Students from other colleges by permission of the instructor. S-U grade. M. Smith.
Field trips demonstrate toxic plants growing in natural or cultivated settings. Lectures address economically important poisonous plants native to the United States. Information presented includes plant identification, natural habitat, toxic principles, clinical signs of toxicity, and treatment and prevention of poisoning in animals. Some of the major toxic principles found in plants are considered in detail. The course are nitrates, cyanide, oxalates, photodynamic agents, alkaloids, and mycotoxins.

VTMED 648 Clinical Management of Native Wildlife
Fall, spring, and summer (credit given for fall). 1 credit. All years. Letter grade. Enrollment not to exceed 42 students per semester. G. Kollias and staff.
This course introduces veterinary students to primary native wildlife care and to wildlife issues that face practicing veterinarians on a daily basis. Students are responsible for the assessment, physical examination, and medical care of native wildlife presented to the Veterinary Medical Teaching Hospital by the public and local wildlife rehabilitators. Student activities are directly supervised and assessed by faculty wildlife clinician in a daily basis. Successful completion of the course requires 40 hours of satisfactory supervised participation per semester in the clinic. Clinic times will be appropriately scheduled throughout the semester. Students are required to attend organized rounds one hour per week and submit three case summaries before the end of the semester.

VTMED 649 Introduction to Equine Practice
Spring, 0.5 credit. All years. Enrollment: no minimum; maximum 18. R. Hackett and C. Collyer.
This is an introductory course in equine husbandry intended for students with little or no experience working with horses. Lecture topics will include horse breeds and colors, housing facilities and fencing, and overview discussions of the racing, showing, and breeding industries. Laboratories will emphasize basic equine handling and restraint as well as feeds and bedding.

VTMED 650 Veterinary Parasitology (Large Animal)
Spring. Offered alternate years. 1 credit. All students. Letter grade. D. Bowman.
This course provides a basic introduction to large animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis will be given to parasites representative of significant disease processes or of significant economic importance to veterinarians, clients, and producers. The course will elaborate on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced through examples of each of the different groups of organisms.

VTMED 651 Veterinary Parasitology: Small Animals
Spring (Jan-Feb—4 weeks, Apr-May—4 weeks). 1 credit. Letter grade only. All years. D. Bowman.
This course provides a basic introduction to small-animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis will be given to parasites representative of significant disease processes or of significant clinical importance to veterinarians and pet owners. The course will elaborate on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced through examples of each of the different groups of organisms.

VTMED 652 Avian Medicine and Surgery
Spring (Mar-May—8 weeks odd years, or as advertised). 1-2 credits. Third- and fourth-year veterinary students. Enrollment: 20 minimum; 80 maximum. Letter grade only. G. Kollias and others.
This course is designed to introduce third- and fourth-year veterinary students to the principles and practice of avian medicine and surgery. The course will be taught in a basic didactic lecture and discussion format with laboratories that will reinforce concepts presented in the lectures.

VTMED 653 Advanced Equine Lameness
Spring (Apr-May—4 weeks). 1.5 credits. Third- and fourth-year veterinary students. Enrollment: 20 minimum; 100 maximum. S-U grade only. N. Ducharme, A. Nixon, and others.
This course is designed to help students understand the methodology and to develop the manual skills necessary in examining in horses. Emphasis will be on developing diagnostic skills. Specifically, the student will be expected to develop proficiency in the identification of clinical characteristics associated with recognized lamenesses and to localize the origin of the lameness. Teaching aids will include video modules outlining various gait abnormalities. In addition, horses with specific gait abnormalities will be available for physical, radiographic, and ultrasonographic examination.

VTMED 654 Current Therapy in Equine Reproduction
Spring (Jan-Feb—4 weeks). 2 credits. Lecture portion: 1 credit; laboratory portion: a) Jan-Feb 1/2 credit, b) Feb-Mar 1/2 credit. Enrollment: lecture, no limit; laboratory exercises, 12 minimum; maximum 24. Third- and fourth-year veterinary students. Letter grade only. D. Dabel.
This course will cover aspects of physiology and therapy of equine reproduction. The purpose of the course is to prepare the student for equine broodmare practice.

VTMED 655 Production Animal Theriogenology
This course deals with specific reproductive conditions of production animals as well as reproductive management of production units. Content includes reproduction of production animals, economic considerations, and medical and surgical approaches to management of reproductive disorders. Laboratory sessions are tailored to acquisition of specific skills fundamental to the practice of theriogenology of production animals. Emphasis is on dairy cows.

VTMED 656 Special Problems in Equine Medicine
This course is intended for students who plan to or may enter equine practice. In-depth study of important diseases, review of recent literature, health management, and hands-on procedures or demonstrations will be the core of this course.

VTMED 657 Disorders of Large Animal Neonates
Spring. 1 credit. Enrollment: minimum, 10; maximum, 100. All years. D. Ainsworth.
The common medical problems of foals and calves, with emphasis placed on the neonatal period, are discussed. Specific topics examined in detail include disorders affecting the respiratory, gastrointestinal, and musculoskeletal systems. Students will also spend several hours in the neonatal intensive care unit providing medical care of hospitalized patients under staff supervision.

VTMED 658 Small Animal Orthopedic Surgery
Spring (Feb-Apr—4 hours). 0.5 credit. Enrollment: no minimum; maximum 100. Prerequisite: Block 3. Third- and fourth-year veterinary students. Letter grade. E. Trotter.
This course is essentially a laboratory course utilizing inanimate models (Sawbones) and appropriate orthopedic equipment. Working in pairs, students perform a variety of surgical techniques for both the external and internal fixation of fractures under the direct supervision of board certified orthopedic surgeons. No live animals are used. Canine bone models provide an appropriate and inexpensive alternative to live animals. Utilizing these models and various surgical implants and power equipment, students should further develop their orthopedic surgical skills outside the operating room setting as a supplement to didactic instruction in the reduction and fixation of fractures in small animals.

VTMED 659 Equine Soft Tissue Surgery
This course, intended for students anticipating equine practice after graduation, will build upon material presented in the foundation courses to provide supplemental instruction in surgical disorders of the horse. Lectures will be case based and emphasize those disorders likely to be encountered in equine practice.
This course will provide students with a special interest in dairy practice the opportunity for in-depth discussions of special problems in bovine medicine and surgery. Emphasis will be on case discussions, physical examination techniques, and ethical and practical matters. The course will emphasize individual case treatment.

VTMED 668 Practice Management
Spring. 2 credits. Limited to third-year veterinary students. The number of sections will be determined by the enrollment. Letter grades. J. E. Saidla. Course participants form a veterinary group practice that includes the specialties of each person's interest. Topics are presented and discussed in the staff meeting format of the practice. Topics include basic practice organization, leadership styles, career planning, communication skills, facility management, human resource management, maintenance of standards, marketing and merchandising, building and maintaining clients, practice growth, finances, computing systems and information management, money management, legal issues and insurance, professional relations and responsibility, and maintaining an acceptable quality of life, including stress management. The managers of three area veterinary practices will speak to the group about their very different successful practices, concentrating on management and organization skills.

This course will discuss diagnosis, treatment, and prevention of medical and surgical problems of individual small ruminants and of sheep and goat herds. Basic information on breeds, behavior, nutritional requirements, and management systems will be supplied. Economically important contagious or metabolic diseases will be discussed in depth. The diagnostic evaluation and differential diagnoses for common clinical presentations such as skin disease, neurologic disease, lameness, and mastitis will be considered. Herd monitoring of economically important parameters and necropsy diagnosis of abortions and neonatal losses will be addressed. Breeding systems, pregnancy diagnosis methods, and correction of dystocia will be discussed and demonstrated in optional laboratory sessions.

VTMED 670 Drug Handling in the Body
Spring. 0.5 credit. Maximum enrollment: 60. For second-, third-, and fourth-year veterinary students. Letter grade. R. A. Cerione and G. A. Weiland. This course will provide an in-depth consideration of the pharmacological principles of administration, adsorption, distribution, metabolism, and elimination of drugs. Emphasis will be on the conceptual basis of the pharmacokinetic considerations in the therapeutic use of drugs. The course will build on the pharmacological and physiological principles learned in Foundation Course III.

VTMED 671 Autonomic Pharmacology
Spring. 0.5 credit. Maximum enrollment: 50. For second-, third-, and fourth-year veterinary students. Letter grade. G. A. Weiland. This course will provide an in-depth consideration of the pharmacological and physiological principles of autonomic pharmacology. Molecular, cellular, and organ system mechanisms will be emphasized. The course will explore in more detail the fundamental pharmacological and physiological principles of the effects of drugs on autonomic organs covered in Foundation Course III.

VTMED 672 Antimicrobial Drug Therapy in Veterinary Medicine
Spring. 1 credit. For second-, third-, and fourth-year DVM students. Letter grade. W. S. Schwark. The objective of this course is to familiarize students with antimicrobial drugs used in veterinary practice. The course will build on the fundamental pharmacological and microbiological principles covered in Foundation Courses III and IV and will consider antibacterial, antifungal, antiparasitic, and anticancer drugs from the point of view of unique pharmacokinetic properties, therapeutic use for clinical use, and potential toxicities as the basis for rational use.

VTMED 673 Growth Factor-Coupled Signal Transduction
Spring, even-numbered years. 0.5 credit. Letter grade. R. A. Cerione. This course will present information regarding the regulation of cell growth and differentiation. The emphasis will be on the signal transduction pathways that are responsible for translating growth factor binding at the cell surface into cellular responses and mitogenesis. The course should complement cases covered in Foundation Course II and tie together the biochemical pathways underlying cell growth.
with biological processes such as wound healing and disease states such as cancer.

VTMED 674 Physiology and Pharmacology in the Understanding and Treatment of Diabetes
Spring, even-numbered years. 1 credit. Maximum enrollment: 24. Letter grade. G. Sharp.

This course will cover the basic causes of the manifestations of diabetes, signal transduction mechanisms controlling insulin secretion and insulin action, and the principles underlying current and potential future treatment for this group of diseases. The course will stress the value of basic research into cellular and molecular mechanisms for the treatment and cure of disease.

VTMED 675 Fundamental Principles of Vertebrate Central Nervous System Pharmacology
Spring. 0.5 credit. Enrollment: 6 minimum; maximum open. Second-, third-, and fourth-year veterinary students. Letter grade. Linda M. Nowak.

This course will include up-to-date knowledge of physiological and pharmacological aspects of the main central nervous system neurotransmitter receptors and provide a basis for rational understanding of the drugs used during surgery and in treatment of neurological disease.

VTMED 676 Clinical Ophthalmology
Spring (Feb-Mar—4 wks). 0.5 credit. Enrollment: no minimum/maximum. Third- and fourth-year veterinary students. R. Biss and T. Kern.

This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and theriogenology and might include housing, facilities, manure management, and employee education. Data analysis, disease activity monitoring, and evaluation of deviations from targeted performance are used to plan cost-effective interventions or corrections, followed by continued surveillance to monitor their effect. Students will be introduced to the dominant software currently used in dairy management. Local dairy herds will serve as additional laboratories for class projects.

VTMED 677 Dairy Production Medicine
Fall. 2 credits. Enrollment: 6 minimum; maximum 14. Third-, and fourth-year veterinary students. Letter grade. C. Guard.

This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and theriogenology and might include housing, facilities, manure management, and employee education. Data analysis, disease activity monitoring, and evaluation of deviations from targeted performance are used to plan cost-effective interventions or corrections, followed by continued surveillance to monitor their effect. Students will be introduced to the dominant software currently used in dairy management. Local dairy herds will serve as additional laboratories for class projects.

VTMED 678 Small Animal Theriogenology
Spring (Feb-Mar—4 wks). 0.5 credit. Third- and fourth-year veterinary students. R. Gilbert.

This is a discussion course in a lecture-based format designed to complement the knowledge gained in the theriogenology component of Foundation Course V. Animal Health and Disease. Content includes discussion of breeding management, infectious and non-infectious causes of infertility and pathology of the male and female reproductive tracts, their diagnosis and management. The emphasis of the course will be on conditions affecting dogs and cats, but some conditions of other common pet species will be discussed.

VTMED 679 Clinical Pharmacology

This course is offered after Blocks I-V and formal exposure to pharmacology coursework is completed. The course is designed to familiarize students with drug use in the clinical setting and utilizes ongoing cases in the teaching hospital as a teaching tool. Pharmacological concepts are emphasized, with a focus on the rationale for drug choice, alternative drug choices available, pharmacokinetic considerations, and potential drug interactions/toxicity. This course is offered at the time students are about to embark on their clinical rotations. It is designed to emphasize practical aspects of pharmacology in the clinical setting, utilizing basic concepts obtained during formal coursework. The onus will be placed on the student to explain/rationalize drugs employed in clinical cases in the teaching hospital.

VTMED 680 Behavior Problems of Horses

The goal of this course is to give veterinary students the ability to treat the behavior problems of horses. History-taking, counseling, diagnostic tests, follow-up, the importance of cooperation with the referring veterinarian, prevention of behavior problems, training techniques of value to the practitioner, and socialization of foals will be presented.

VTMED 681 Behavior Problems of Small Animals

The goal of this course is to give veterinary students the ability to treat the behavior problems of cats and dogs. History-taking, counseling, and follow-up methods will be presented. Each student will have the opportunity to participate in client cases. Behavioral and pharmacological treatments for behavior problems will be presented.

VTMED 684 Thermal Regulation and Exercise (also Blop 713)
Fall. 1 credit. Offered alternate years. Next offered fall 1999. Letter grade. D. Robertshaw.

An examination of the competing demands on the body of exercise and heat exposure with particular emphasis on the cardiopulmonary system and integration of thermoregulatory reflexes.

VTMED 685 Physiology of Pregnancy

This course is presented in lecture fashion, with weekly assignments consisting of one major reference per lecture related to that week’s work to review. Subjects covered are placental function, fetal growth, central nervous system development, fetal breathing, biorhythms in maternal and fetal physiology, parturition, and adaptations to newborn life.

VTMED 687 Topics in the Physiology and Pathophysiology of the Digestive Tract: Simple Stomached Animals

A seminar course in which topics relevant to clinical problems will be considered at a fundamental level based in the current literature. A mix of brief lectures, student reports on research papers, and discussion by the group. Primarily gastrointestinal problems of dogs, cats, and pigs. Examples are gastric secretion and the gastric mucosal barrier (Why doesn’t the stomach digest itself?), biorhythms in maternal and fetal physiology, placental function and pancreatitis (Why doesn’t the pancreas digest itself?). The enteric nervous system and ileus (How can the intestines become paralyzed?)?

VTMED 688 International Animal Agriculture
Spring, alternate years (next offered spring 1999). 2 credits. Letter grade. D. Robertshaw.

This course will introduce students to the role of disease in the efficiency of animal production systems in developing countries from a basic science viewpoint. Agriculture is fundamental to the economy and economic stability of virtually all of these countries, and animal agriculture is an integral part of their systems ranging from the modest small-ruminant farmer to large parasitised beef-dairy operations. The focus will be on the peasant farmer since the large operations are usually relatively well managed but represent only a very small component of the total agricultural economy. The scope will be broad and will serve only as an overview of the subject, but will provide a rational basis for any intervention to improve production efficiency. The breadth of the suggested readings will provide those who are interested with an avenue for individual exploration.

VTMED 689 Fundamentals of Ruminant Digestion

This course is designed for the student with little or no previous course work in ruminant digestive physiology. It will consist primarily of lectures surveying the functional aspects of: control of feed intake; salivation; reticulo-rumen motility, including rumination and eructation; microbial flora and fauna; fermentation in reticulolumen (digestion of carbohydrates, proteins and fats); ruminal gas formation; absorption of short-chained fatty acids; special features of ruminal nitrogen metabolism; passage of nutrients to the lower tract; and a brief consideration of the functions of omasum, abomasum, small and large intestines. Emphasis will be on the differences of the ruminant digestive processes from those of the simple-stomached animals.

VTMED 690 Molecular and Genetic Basis of Metabolic Disorders in Animals
Spring, every other year. Offered spring 1998. 2 credits. All years. Enrollment: 5 minimum; 15 maximum. Letter grade. J. Ray.

This course introduces the molecular basis of metabolic diseases in domestic animals. Topics include several inherited metabolic defects causing systemic malfunctions;
VTMED 695 Genetic Basis of Eye Diseases
This course covers the topic of the molecular and genetic basis of inherited eye diseases in domestic and laboratory animals. It is aimed at the professional student in the veterinary curriculum. Specific course content and focus will be based on the level of students. The course will be given in a combination lecture/seminar format, with students leading and actively participating in discussions. The students are expected to do assigned and independent outside research, both for the class discussions and for the paper.

VTMED 696 Fundamental Principles and Anesthetic Techniques for Small Animal Practice
This course is designed for the veterinary student with interest in small animal practice. It will consist of lectures, case discussions, and anesthetic protocols for routine and complicated cases. Subjects covered in the course will include: management of anesthesia for elective surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, treatment of respiratory complications, treatment of cardiovascular complications, cardiopulmonary resuscitation, and post-anesthetic management.

VTMED 697 Fundamental Principles in Anesthetic Techniques for Equine or Mixed Animal Practice
Spring. 1 credit. Enrollment: 15 minimum; maximum open. Third- and fourth-year veterinary students. C. Short.
This course is designed for the veterinary student with interest in equine or mixed animal practice. It will consist of lectures, case discussions, and anesthetic protocol development for routine and complicated cases. Subjects covered in the course will include: management of anesthesia for elective surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, treatment of respiratory complications, treatment of cardiovascular complications, cardiopulmonary resuscitation, and post-anesthetic management.

VTMED 698 Special Projects in Veterinary Medicine
Fall, winter, spring, summer. Variable credit. Letter grade. Tenure track faculty, College of Veterinary Medicine.
This course provides the opportunity for students to work individually with a faculty member to pursue an area of particular interest and, typically, not part of the established curriculum. Specific course objectives and course content are flexible and reflect the scope and academic expertise of the faculty.

VTMED 699 Research Opportunities in Veterinary Medicine
Fall, winter, spring, summer. Variable credit. Letter grade. Tenure track faculty, College of Veterinary Medicine.
This course provides the opportunity for individual students to work in the research environment of faculty involved in veterinary or biomedical research. Specific course objectives and course content are flexible and reflect the specific research environment.

VTMED 700 Theriogenology Service
Spring. 2 or 4 credits. Enrollment min/max. Third- and fourth-year veterinary students. R. O. Gilbert and others.
This clinical service rotation is offered to provide additional hands-on experience in all phases of theriogenology. Equine reproductive experience is gained in teasing, rectal palpations, ultrasound scanning, semen collection and evaluation, natural breeding, and artificial insemination. Additional techniques emphasized include taking and evaluating endometrial biopsies, endometrial culturing, and collecting and evaluating endometrial cytology smears. Bovine experience includes weekly trips to the slaughterhouse, where rectal palpations and semen findings can be compared to actual structures present in recovered tracts. Additional experience in rectal palpation is gained by following cyclic changes in assigned cows in the college dairy herd. Students participating in herd-health palpations. Trips to the Department of Animal Science sheep and swine barns allow observation of breeding programs and provide experience in castration, docking, vulvar teeth, and notching ears. Weekly seminars are presented on current topics in theriogenology.

VTMED 701 Cardiology Service
Fall and spring. 2 credits. Enrollment min/max. Third- and fourth-year veterinary students. Letter grades.
S. Moise.
The purpose of the cardiology rotation is to provide the student with the opportunity to put into practice what they have learned in the foundation years. The management of the most common cardiac diseases will be emphasized including congestive heart failure, arrhythmias, and secondary cardiac diseases. All species will be examined, large and small, although the majority will be small animals. Diagnostics including cardiovascular physical examination, electrocardiography, radiography, and echocardiography will be taught. The rotation includes clinical work, didactic teaching, and self-initiated digging for information. A written report concerning a clinical case study will be required for completion of this rotation.

VTMED 702 Laboratory Animal Medicine
Fall and spring. 2 or 4 credits. Enrollment min/max. Third- and fourth-year veterinary students. Letter grades.
F. Quimby and others.
The practice of laboratory animal medicine requires a sophisticated understanding of animal care programs, clinical skills, knowledge of various species’ biologies, familiarity with research methodology, and acquaintance with state and federal regulations. This course is offered as a two-week introduction to that specialty. Students accompany laboratory animal veterinarians on clinical rounds of Cornell's research animal housing and participate in laboratory diagnostic work. Review sessions are conducted on the biology, medicine,
pathology, and husbandry of rodents, rabbits, and primates and on current legislation regulating the care and use of research animals. The course may include a field trip to the research animal facilities of Rockefeller University, the Cornell University Medical College, Marshall Farms, and the Laboratory of Experimental Medicine and Surgery in Primates.

**VTMED 703 Clinical Wildlife and Exotic Animal Medicine**

Fall, winter, spring, and summer. 2 credits. Enrollment min/ max 1 per rotation/max 3 per rotation. Third- and fourth-year veterinary students. Letter grades. G. V. Kollias and others. This course introduces students to primary medical care of non-traditional pet species including birds, reptiles, amphibians, ferrets, rabbits, and other small mammals. Students are responsible for the assessment, physical examination, and medical management of exotic animal species presented to the veterinary teaching hospital. Other opportunities available to assist in the development of clinical skills in wildlife and exotic animal medicine include the wildlife clinic cases, and ongoing wildlife research and service projects. Successful completion of the course requires satisfactory participation during this 14-day clinical rotation.

**VTMED 704 Quality Milk**

Fall or spring. 2 credits. Enrollment min/max. Third- and fourth-year veterinary students. Letter grades. R. Gonzalez, D. Wilson and others. This course covers the causes, diagnosis, treatment, and prevention of bovine mastitis. The role of management practices is stressed. The course includes lectures, readings, discussions, laboratory exercises, and farm visits as part of the Quality Milk Promotion Services—New York State Mastitis Control Program.

**VTMED 705 Special Opportunities in Clinical Veterinary Medicine**

Fall, spring, and summer. Variable credits. Enrollment min/max. Third- and fourth-year veterinary students. S-U grades only. This course provides opportunities for students after the end of Foundation Course V to explore professional areas not available through the regular curriculum. Blocks of two to four weeks are usually spent at other teaching hospitals, research laboratories, or zoological facilities. Student proposals are submitted to the associate dean for academic programs for review and approval. On-site supervisors of the block act as ex-officio faculty members and are required to evaluate each student formally.

### CLINICAL SCIENCES

**VETCS 666 Introduction to Epidemiology (Graduate)**

Fall. 3 credits. Prerequisites: Statistics and Biometry 601 (College of Agriculture and Life Sciences) may be taken concurrently. S-U grades optional. H. N. Erb. Lectures and discussion deal with the fundamentals of epidemiology. Current topics in epidemiology from the fields of nutrition, infectious and chronic diseases, occupational medicine, and veterinary medicine will be reviewed to illustrate the principles and practice of epidemiology, especially of clinical trial design and infectious-disease epidemiology.

**VETCS 665 Study Designs (Graduate)**

Spring. 2 credits. Prerequisites: VETCS 664 and Biometry 601 (College of Agriculture and Life Sciences). S-U grades optional. H. O. Mohammed. Design and interpretation of cross-sectional, case-control, and cohort studies (including controlled clinical trial) are covered. Design issues will include sample size, bias, and relative advantages and disadvantages. The course objectives are: 1) know the difference between different types of epidemiologic study designs and relative advantages and disadvantages of each; 2) given a problem (usually a field situation), be able to design an appropriate epidemiologic study; 3) be able to effectively analyze and criticize published epidemiologic studies. The course will consist of lectures on the principles of epidemiologic study design and related issues (sample size calculations, validity and precision, and identification and minimizing of bias); basic analysis of epidemiologic data; and discussion of published epidemiologic studies. These studies include observational cohort studies (prospective and retrospective), cross-sectional studies, case-control studies, and hybrid studies (ambidirectional, and other hybrid designs).

**VETCS 664 Advanced Methods in Epidemiology (Graduate)**

Fall. 3 credits. Prerequisites: VETCS 665 and Statistics and Biometry 602 (College of Agriculture and Life Sciences). S-U grades optional. Y. T. Grohn. Concepts introduced in VETCS 664 and VETCS 665 are further developed, with emphasis on statistical methods. Topics include interaction, effect modification, stratified analysis, matching and multivariate (logistic regression) methods, survival analysis, and strategies for the analysis of epidemiologic data.

**VTCS 700 Pathophysiology of Gastrointestinal Surgery (Graduate)**

Fall, every third year. 1.5 credits. Not offered 1997; next offered fall 1998. S-U grades only.

**VTCS 701 Pathophysiology of Orthopedic Surgery (Graduate)**

Spring, every third year. 1.5 credits. Not offered 1998; next offered spring 1999. S-U grades only.

**VTCS 702 Pathophysiology of Cardiopulmonary Surgery (Graduate)**

Fall, every third year. Offered fall 1999. 1.5 credits. Prerequisite: DVM degree or equivalent. S-U grades optional. R. P. Hackett, S. L. Fubini, N. G. Ducharme, H. J. Harvey. Using lectures and group discussions, the objective of this course is to explain the pathophysiologic of various cardiovascular diseases (cardiac arrest, cardiac arrhythmia under anesthesia) and thoracic disease (various forms of upper airway resistance). The emphasis is placed on understanding these mechanisms and outlining the surgeon's response to these.

**VTCS 703 Surgical Principles and Surgery of the Integumentary System (Graduate)**

Spring, every third year. Offered spring 1999. 1.5 credits. S-U grades only. This course is designed for surgery residents and graduate students. It is largely discussion format and examines surgical principles and surgery of the integumentary system.

**VTCS 704 Pathophysiology of Urogenital Surgery (Graduate)**

Fall, every third year. 1.5 credits. S-U grades only.

**VTCS 705 Animal Pain and Its Control (Graduate)**

Spring 1999. 2 credits. By permission of the instructor. Letter or S-U option. C. E. Short. This course is open to interns, residents, graduate students, and postdoctoral associates to provide instruction in fundamental and applied concepts of animal pain. The emphasis will be on neurologic, cardiopulmonary, and endocrine responses to either noxious stimulation or pain due to injury and disease processes and the medications used for its control. The subject material will be covered by lectures, group discussions, and group evaluation of protocols to treat or prevent animal pain.

**VETCS 706 Pathophysiology of Neurologic Surgery (Graduate)**

Spring, every third year. 1.5 credits. S-U grades only.

### ANATOMY

**VETA 600 Special Projects in Anatomy**

Fall and spring. 1 credit per 2.5-hour period. By permission of the instructor. S-U grades only.

**VETA 604 Mechanics of Animal Movement**

Spring. 2 credits. Open to veterinary students, graduate students, and qualified undergraduates with permission of the instructor. J. E. A. Bertram. For course description, see VETMED 604.
VETCS 707 Clinical Biostatistics (Graduate)
Spring, alternate years. Next offered spring 1997. 2 credits. Letter grade only. H. N. Erb, Y. T. Grohn, H. O. Mohammed, J. M. Scarlett (coordinator). The theory behind and interpretation of parametric and nonparametric statistical techniques commonly employed in clinical medicine will be explained. Students will analyze small data sets using a commercial statistical software package.

VETCS 708 Epidemiology Seminar Series (Graduate)
Fall and spring. 1 credit. S-U grades only. Epidemiology faculty. Advanced theoretical and analytical epidemiologic concepts and techniques will be discussed.

VETCS 710 Advanced Veterinary Anesthesiology I
Fall and winter. 3 credits. Third- and fourth-year veterinary students, graduate students, interns, and residents. Prerequisites: VTMED 508 Veterinary Anesthesiology or permission from instructor. S-U grading. P. F. Moon (coordinator) and others. The content of the course is designed for preparation for the American College of Veterinary Anesthesiology Board Exam. However, the course is also suitable for residency training in other areas such as surgery and internal medicine. Speakers will be from both inside and outside the college. Topics will cover the basic sciences as they apply to anesthesiology such as physics and engineering, applied pharmacology, physiology and pathology. Clinically orientated lectures will also be given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

VETCS 711 Advanced Veterinary Anesthesiology II
Fall and winter. 1 credit. Third- and fourth-year veterinary students, graduate students, interns, and residents. Prerequisites: VTMED 508, Veterinary Anesthesiology I or permission from instructor. S-U grading. P. F. Moon (coordinator) and others. For course description, see VETCS 710.

VETCS 766 Graduate Research (Graduate)
Fall, spring, and summer. Credit and hours to be arranged. By permission of the graduate faculty member concerned. S-U grades only. Epidemiology faculty.

VETCS 768 Master's-Level Thesis Research (Graduate)
Fall or spring. 1-6 credits. S-U grading. Epidemiology faculty. This course enables graduate students in the Section of Epidemiology to receive graduate research credits for master's-level thesis research.

VETCS 769 Doctoral-Level Thesis Research (Graduate)
Fall or spring. 1-6 credits. S-U grading. Epidemiology faculty. This course enables students in the Section of Epidemiology to receive graduate research credits for doctoral-level thesis research.

VETCS 790 Independent Studies in Epidemiology
Fall and spring. 1-3 credits. H. N. Erb, Y. T. Grohn, H. O. Mohammed, J. M. Scarlett.

The purpose of this course is to investigate an epidemiologic topic with one of the instructors. It provides experience in problem definition, research design, and the analysis of epidemiologic data.

DIAGNOSTIC LABORATORY

VETDL 700 Special Projects in Diagnostic Endocrinology
Fall and spring. 1-3 credits. By permission of the instructor. Letter grades only. J. Reimers.
An independent study course. Students have the opportunity to research a particular topic in diagnostic/clinical endocrinology of animals.

VETDL 701 Special Projects in Infectious Diseases
Fall and spring. 1-3 credits. By permission of the instructor. S-U grades only. Y. F. Chang.
The objective of this course is to offer a broad exposure to various aspects of infectious disease problems.

VETDL 702 Special Topics in Infectious Diseases
Fall and spring. 1-3 credits. By permission of the instructor. S-U grades only. Y. F. Chang.

VETDL 703 Doctoral-Level Thesis Research (Graduate)
Fall and spring. 0-9 credits. By permission of the instructor. S-U grades only. Diagnostic Laboratory faculty. Research leading to a Ph.D. degree.

VETDL 704 Master's-Level Thesis Research (Graduate)
Fall and spring. 1-3 credits. By permission of the instructor. S-U grades only. Diagnostic Laboratory faculty. Research leading to an M.S. degree.

MICROBIOLOGY AND IMMUNOLOGY

VETMI 315 Basic Immunology (Undergraduate) (also Biological Sciences 305)
Fall. 3 credits. Strongly recommended: basic courses in microbiology, genetics, and biochemistry. S-U optional. J. A. Marsh.
A survey of immunology, with emphasis on the biological functions of the immune response.

VETMI 320 Principles of Toxicology
Spring. 3 credits. 1 year each of introductory biology and chemistry, with lab; 1 semester of organic chemistry lecture. Lec., T R 1:25-2:40. S. Penningroth, R. Dietert, and S. Bloom.
The goal of this new course is to provide undergraduate students from a variety of majors with a useful bridge between biology and chemistry and an introduction to the field of toxicology. The organizing principle of the course is toxicological risk to human health and the environment. The scientific basis for evaluating risk will be presented, including principles underlying the effects of toxicants on biological systems and the transport of chemicals in the environment. The concept of risk will be elaborated to include individual effects at the level of specific organ systems, such as genes and the immune system, population effects, and ecosystem effects. Two case studies, one examining a chemical that is hazardous to human health and the other examining a chemical that impacts a non-human species, will integrate information presented in the course as well as provide an opportunity to examine cross-cultural issues of risk perception.

VETMI 404 Pathogenic Bacteriology and Mycology (also BIOM 404)
Spring, odd-numbered years. 2 or 3 credits (3 credits with lecture and seminar). Prerequisites: BIOM 290 and 291. Strongly recommended: VETMI 315. Seminar is required of graduate students and open to undergraduates with permission of instructor. Seminar limited to 15 students. E. Tullson.
This is a course in medical microbiology, presenting the major groups of bacterial and mycotic pathogens important to human and veterinary medicine. The emphasis of this course is infection and disease pathogenesis. Topics include disease causality, interactions of host, pathogen, and environment, including immunity to bacteria and fungi, and principles of antimicrobial therapy and drug resistance. A companion seminar addresses the current and classic literature related to microbial pathophysiology on the cellular and molecular level.

VETMI 408 Viruses and Disease (Undergraduate) (also Biological Sciences 408)
Spring, alternate years. 3 credits. Intended primarily for graduate and undergraduate microbiology majors. Prerequisites: Microbiology 290 and 291 (College of Agriculture and Life Sciences). Recommended: VETMI 315, GENetics 281. Letter grades only. J. W. Casey.
The course will cover basic concepts in virology with emphasis on virus-host interactions, strategies for gene regulation, and mechanisms of pathogenicity. Selected viral infections that result in immune dysfunction and neoplasia will be highlighted in the context of approaches to prevent or reduce the severity of diseases.

VETMI 431 Medical Parasitology (Undergraduate)
Fall, alternate years. Not offered fall 1997. 2 credits. Prerequisites: zoology or biology. Letter grades only. D. D. Bowman.
A systematic study of arthropod, protozoan, and helminth parasites of public health importance, with emphasis on epidemiologic, clinical, and zoonotic aspects of these parasites.
VETMI 700 The Biology of Animal Viruses (Graduate and Upper-level Undergraduate)
Fall, odd-numbered years. 2 credits. Next offered fall, 1997. Letter grade only. C. R. Parrish.

This course is a general introduction to the biology of animal viruses. A brief history of the concept and study of viruses, along with an overview and classification of the major viral groups, will be given. Topics include the structures of viruses and their components, viral nucleic acids and genome replication strategies, selected examples of gene regulation mechanisms, structural, and nonstructural viral proteins, and the interactions between viruses and cells. Traditional and recent examples of methods for the genetic analysis of viruses will be given. Further topics include evolution, variation, and selection of virus strains over time and during infections of host animals; traditional and novel approaches to vaccine development; and antiviral chemotherapy.

VETMI 701 Pathogenesis of Viral Diseases
Spring 1997 and alternative years. 2 credits. Letter grades. Given during 8-week spring or fall conjoint period, January-March. Open to graduate students and advanced undergraduates with permission of instructor. Strongly recommended prerequisite: Immunology. J. Baines. Course content and objectives: the course will focus on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spread between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory and urogenital systems. The basic principles of virus taxonomy, structure and replication will be included to introduce various viral groups and their properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from relevant current literature, the text, Nathanson's Viral Pathogenesis: 1997, and Field's Virology, third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.

VETMI 702 Molecular Biology and Immunology of Host-Parasite Interactions (Graduate) (also VTMED 620) Spring, even-numbered years. 2 credits. Letter grade or S-U option. E. J. Pearce. See description for VTMED 620.

VETMI 705 Advanced Immunology (Graduate) (also Biological Sciences 705) Spring, even-numbered years. 3 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. Letter grades only. R. G. Bell (coordinator) and staff. Coverage at an advanced level of molecular and cellular immunology.

VETMI 706 Immunology Seminar Series (Graduate) Fall and spring. No credit. Required of all graduate students in the Field of Immunology and by invited speakers from other institutions.

Presentations of research investigations by Cornell faculty members, postdoctoral fellows, and graduate students in the Field of Immunology and by invited speakers from other institutions.

VETMI 707 Advanced Work in Bacteriology, Virology, and Immunology (Graduate) Fall and spring. Credit to be arranged. By permission of the instructor. Letter grade or S-U option. Microbiology staff.

This course is designed primarily for graduate students with a good background in pathogenic microbiology and immunology. It may be elected by veterinary students who are properly prepared.

VETMI 708 Selected Topics in Animal Virology (Graduate) Spring. 2 credits. Microbiology staff. Lectures focus on the molecular biology of a few selected animal viruses. Important publications will provide the basis for a discussion of current models for host-viral interactions.

VETMI 709 Laboratory Methods of Diagnosis (Graduate) Fall and spring. 1–3 credits by arrangement. By permission of instructor. Letter grade or S-U option. Microbiology staff. Instructions and practice in the application of microbiological and serological methods for the diagnosis of disease.

VETMI 710 Microbiology Seminar (Graduate) Fall and spring. 1 credit. Required of all graduate students in the Department of Microbiology and Immunology. S-U grades only. E. J. Pearce, C. R. Parrish.

VETM 719 Immunology of Infectious Diseases and Tumors (also Biological Sciences 706) (Graduate) Spring, alternate years. Next offered spring, 1999. 2 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. S-U optional. R. G. Bell (coordinator) and staff. Coverage at an advanced level of the immunology of diseases caused by selected bacteria, viral, prion, and helminthic parasites, and tumor immunology.

VETMI 737 Advanced Work in Animal Parasitology (Graduate) Fall and spring. 1–3 credits by arrangement. For advanced undergraduate and graduate students. Letter grades only. D. D. Bowman and other faculty. This course is intended for graduate students minoring in parasitology and for highly motivated veterinary students with interests in parasitology research.

VETMI 770 Advanced Work in Avian Diseases (Graduate) Fall and spring. Credit to be arranged. By special arrangement with the instructor. Letter grades only. S. A. Naqi.

VETMI 772 Advanced Work in Aquatic Animal Diseases (Graduate) Fall and spring. Credit to be arranged. By special arrangement with the instructor. S-U grades only. P. R. Bowser.

VETMI 783 Seminars in Parasitology (Graduate) Fall and spring. 1 credit. Open to veterinary students, graduate students minoring in the field of parasitology; others by permission of the instructor. S-U grades only. D. D. Bowman.

This is a seminar series designed to acquaint students with current research in the field of parasitology. The range of topics is determined, in part, by the interests of those participating and may include such topics as the ecology of parasitism, parasite systematics, immunoparasitology, and parasitic diseases of plants and animals, including humans.

PATHOLOGY

VETPA 636 Wildlife Pathology
Fall and spring. 2 credits. Open enrollment. Letter grade or S-U option. J. King.

This course introduces students to common and important lesions of wild species of animals. The etiology and pathogenesis of diseases of importance to wildlife are discussed. Slide presentations of lesions are made; and they are discussed by an experienced pathologist.

The nature and causes of diseases of wild animals, birds, and some other species are presented. Emphasis is on epizootiology, etiology, pathogenesis and diagnostic lesions. Experience is provided in specimen collection and necropsy techniques. Attendance at Show and Tell at 4–5 P.M. Fridays during the course is mandatory in the necropsy room for the presentation of fresh, wet tissue specimens and discussion by clinicians and pathologists as well as actual handling of the tissues (gloves provided) after the class.

VETPA 637 Postmortem Pathology
Fall and spring. 2 credits. Intended for veterinary students, graduate students minoring in the field of pathology; others by permission of instructor. Letter grade or S-U option. J. M. King.

A presentation of gross and microscopic lesions of diagnostic significance, employing color projection slides as illustrations. Emphasis is on pathological and differential diagnosis of a wide spectrum of viral, bacterial, parasitic, and other diseases.

VETPA 639 Autotutorial in Laboratory Animal Medicine and Science
Spring. 1–3 credits. Letter grade. F. W. Quinby.

This course is offered to individuals interested in pursuing various aspects of laboratory animal medicine and science in depth. A variety of resources are available to assist students in their research on a particular topic: the library of the Division of Laboratory Animal Medicine, the autotutorial library; the university libraries; and special information collected from other institutions.

Grades are determined on the basis of a paper, oral presentation, or the criterion of an audiovisual teaching aid, any of which may be selected by the student.

VETPA 640 Principles of Toxicological Pathology
Fall, alternate years. 3 credits. Intended for veterinary and graduate students and residents. Letter grade. J. M. King.

The primary objective of this course is to make the student aware of the problems and their solutions encountered in pathology as it...
applies to the field of toxicology, with special emphasis on techniques and lesions found or produced.

**VETPA 641 Veterinary Clinical Immunology**

Fall. 1 credit. Limited to veterinary students; others by permission of the instructor. S-U grades. R. M. Lewis.

This course emphasizes the clinical aspects of fifteen specific diseases that are mediated by immunologic processes. Case material from the Teaching Hospital is used to illustrate presenting clinical signs, laboratory diagnostic approaches, and eventual outcome of each disease under discussion. Student participation in the informal case discussions is encouraged as a means of introducing students to the practice of veterinary medicine through case discussion and analysis. Training is also provided in the use of the college's computerized biomedical information system and the hospital records system to develop a critical written case analysis, which serves as the basis for grading.

**VETPA 713 Cell Cycle and Growth Regulation (Graduate) (Selective)**

Spring. 1 credit. S-U grades only. A. Yen and R. Levine.

This course reviews the regulation of the cell cycle in eukaryotes, the basic cellular physiology of the cell cycle transit, and the regulatory role of oncogenes and tumor suppressor genes in cell division. The course covers the historical development and current topics in the cell cycle. It includes cell growth regulation and de-regulation in cancer.

**VETPA 750 Cancer Cell Biology (also Biological Sciences 750) (Graduate)**

Spring, alternate years. 3 credits. Next offered spring 1998. Prerequisite: Biological Sciences 330 or 331 or equivalent. Recommended: graduate courses in biological sciences. Letter grade. J. L. Guan (coordinator), R. A. Levine, B. U. Pauli, A. Yen.

This advanced graduate course will cover molecular, cellular, and genetic aspects of cancer. The course is divided into three sections. The first section will address tumor etiology, progression, and metastasis. Topics in this section will include causes of cancer, morphologic and genetic models of cancer progression, tumor angiogenesis, tumor invasion, and metastasis. The second section will discuss cell-matrix and cell-cell interactions in cancer. Topics include the structure and function of the major matrix receptor integrin family of cell adhesion molecules, integrin interactions with the cytoskeleton, intracellular signaling pathways in cell-ECM interactions, integrin-mediated signaling in cellular growth regulation, changes of integrins in human tumors and metastasis, structure and function of cadherin family of cell-cell adhesion molecules, signaling mechanisms in cell-cell interactions in normal development and cancer. The third section will be on cell cycle. It will develop properties of the cell cycle and how its phases are measured, changes associated with cell transformation, and how oncogenes and tumor suppressor genes regulate cell proliferation, differentiation, and apoptosis.

**VETPA 788 Seminar in Surgical Pathology**

Fall and spring. 1 credit. Intended for residents. Third- and fourth-year veterinary students may attend. Letter grades only. B. A. Summers (coordinator) and others.

The major objective of this discussion and seminar course is to introduce the residents to the discipline of surgical pathology. Selected material from the Surgical Pathology Service is prepared in advance for independent review by the residents. The material is presented in a slide-seminar format by the residents under the review of the faculty. Emphasis is placed on pathogenesis, etiology, and pathologic descriptors of the lesions. In addition, appropriate guest lecturers cover specific areas of interest and special topics not encountered in the departmental service programs.

**VETPA 789 Seminar in Necropsy Pathology**

Fall and spring. 1 credit. Letter grades only. J. M. King.

The major objective of this course is to introduce students (veterinary and graduate students, residents) to the gross and microscopic features of necropsy pathology. Selected material from the Necropsy Service and elsewhere is prepared in advance for independent review by the students. This material is presented in a slide-seminar format by the students under the review of the faculty. Emphasis is on pathogenesis, etiology, and pathologic description of the lesions. In addition, appropriate guest lecturers cover specific areas of interest and special topics not encountered in the departmental service programs.

**VETPR 611 Systems Pharmacology**

Spring, even-numbered years. 2 credits. By permission of the instructors. Letter grades or S-U option. G. A. Weiland and pharmacology faculty.

A graduate-level course surveying system- and organ-related aspects of pharmacology. Topics covered include drug disposition; pharmacokinetics; autonomic pharmacology; central nervous system pharmacology; pharmacology of contraception, allergy and platelet function; cardiovascular, gastrointestinal and endocrine pharmacology; and chemotherapy, including antimicrobial agents and cancer chemotherapy.

**VETPR 615 Molecular Biophysics of Cell Dynamics (also A&EP 615)**

To be arranged. 3 credits. Prerequisite: graduate or senior level in science or engineering. Letter grade. W. W. Webb. Physical mechanisms in cellular function: statistical thermodynamics of ion channel molecules, single channel recording, receptor signaling, molecular and single channel processes. Intermolecular forces, spontaneous self-assembly of mesoscopic structures, molecular mechanisms of secretion, supramolecular mechanisms in memory and development.

**VETPR 672 Protein Kinetics (also CHEM 672)**

Fall. 4 credits. Prerequisite: CHEM 390, BIOMB 331 (or equivalents) or permission of the instructor. Letter grade or S-U option. B. A. Baird.

Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include: protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; role of cell membrane receptors in regulating cellular activities.

**VETPR 700 Calcium as a Second Messenger in Cell Activation**

Spring, even-numbered years. 2 credits. By permission of the instructor. Lecture-discussion. S-U grading. C. M. S. Fewtrell. Regulation of intracellular calcium and techniques for studying calcium movements and distribution in cells. Calcium channels and exchangers, calcium-binding proteins, and calcium stores. Phosphatidylinositol turnover, release of calcium from intracellular stores, and activation of calcium influx. Calcium gradients and oscillations. Mechanisms of exocytosis and the proteins involved. Each topic will be introduced with a lecture followed by discussion of recent papers from the literature.

**VETPR 701 Organ System Toxicology (also TOX 611)**

Fall. 4 credits. Prerequisite: CHEM 390, BIOMB 331 (or equivalents) or permission of the instructor. Letter grade or S-U option. G. A. Weiland and pharmacology faculty.

A minicourse on molecular mechanisms involved in chemical toxicity. Specific examples of toxicity in organ systems such as the nervous system, kidney, liver, respiratory tract, and cardiovascular system will be considered.

**VETPR 703 Receptor-Ligand Interactions (also BIOM 790-02)**

Spring, even-numbered years. 2 credits. By permission of the instructors. Letter grade or S-U option. R. E. Oswald, G. A. Weiland (coordinator).

The course covers both the practical and theoretical tools for the study of ligand-
VETPR 704 CNS Neuropharmacology: Mechanisms of Synaptic Transmission
Fall, even-numbered years. 2 credits. Maximum enrollment: 20 graduate students and undergraduate seniors by permission of the instructor. Letter grade or S-U option. L. M. Nowak.
This is a seminar survey course in vertebrate central nervous system pharmacology and pharmacology, and focuses on mechanisms of neurotransmitter and receptor action at the membrane and cellular levels. Roles of selected neurotransmitters in normal and dysfunctional brains are covered. Topics are introduced in lectures and followed up in discussions of recent journal articles.

VETPR 705 Molecular Mechanisms of Receptor-G Protein Coupled Signaling
Spring, odd-numbered years. 2 credits. By permission of the instructor. Letter grade or S-U option. R. A. Cerione.
This course focuses on the mechanisms of action of GTP binding proteins. Several receptor-coupled signaling systems are examined, including adenylate cyclase, vertebrate vision, phosphatidylinositol lipid turnover, receptor systems regulating ion channels, and receptors involved in cell growth regulation.

VETPR 706 Growth Factor-Coupled Signaling (also BIOBM 734)
Spring, odd-numbered years. 0.5 credits. By permission of the instructor. Letter grade or S-U option. R. A. Cerione.
General theme will be mitogenic signaling pathways. Receptor tyrosine kinases, src, ras, and ras-regulatory proteins will be covered.

VETPR 707 Protein NMR Spectroscopy (also BIOBM 730)
The fundamentals of NMR will be presented and the student will acquire the tools necessary to establish an in-depth understanding of multidimensional, multinuclear NMR techniques. Application of the technique to proteins for assignment of resonances, determination of structure, and characterization of dynamics will be presented. Special approaches for applying solution NMR techniques to large proteins will be discussed.

Special Projects and Research in Pharmacology
Fall, spring, and summer. 1-3 credits each topic. By arrangement with the instructor. Letter grade or S-U option. Pharmacology faculty. Independent study or research. These courses cover a variety of topics related to the research interests of the faculty.

PHYSIOLOGY

VETPH 346 Introductory Animal Physiology (also BIOAP 311) (Undergraduate)
Fall. 3 credits. Prerequisites: one year of college-level biology, chemistry, and mathematics. S-U by permission.
E. R. Loew, D. Robertshaw. MWF 11:15.
A general course in animal physiology emphasizing principles of operation, regulation, and integration common to a broad range of living systems from the cellular to the organismal level. Structure-function relationships are stressed along with underlying physiological mechanisms.

VETPH 528 Graduate Research in Animal Physiology (Graduate) (also BIO S 719)
Fall and spring. Variable credit. Prerequisite: written permission of section chairperson and staff member who will supervise the work and assign the grade. S-U grades optional.
Similar to Biological Sciences 499 but intended for graduate students who are working with faculty members on an individual basis.

VETPH 720 Special Problems In Physiology (Graduate)
Fall and spring. By permission. Laboratory work, conferences, collateral readings, and reports. Adapted to the needs of students.

VETPH 811 and 812 Advanced Physiology Methods I & II (also BIO S 811 and 812 (Graduate)
Fall and spring. 2 credits each. Enrollment limited. Prerequisite: graduate student status or permission of course coordinator. S-U grades only.
P. Nathanielis.
This is a course primarily for graduate students in physiology and related disciplines. Experiments are conducted in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

FACULTY ROSTER

Aguirre, Gustavo D., Ph.D., U. of Pennsylvania.
Alfred H. Caspary Professor, Clinical Sciences
Ainsworth, Dorothy M., Ph.D., U. of Wisconsin-Madison.
Assoc. Prof., Clinical Sciences
Dorothy Havemeyer McConville Professor of Microbiology and Immunology
Appel, Max J., Ph.D., Cornell U. Prof., Microbiology and Immunology
Appleton, Judith A., Ph.D., U. of Georgia. Assoc. Prof., Microbiology and Immunology
Avery, Roger J., Ph.D., U. of Newcastle-Upon-Tyne (England). Prof., Microbiology and Immunology
Baines, Joel, Ph.D., Asst. Prof., Microbiology and Immunology
Barr, Stephen C., Ph.D., Louisiana State U. Assoc. Prof., Clinical Sciences
Bell, Robin G., Ph.D., John Curtin School (Australia). Prof., Microbiology and Immunology
Bertram, John E., Ph.D., U of Chicago. Asst. Prof., Anatomy
Beyenbach, Klaus W., Ph.D., Washington State U. Prof., Physiology
Bloom, Stephen E., Ph.D., Penn State U Prof., Microbiology and Immunology
Foreign language: Proficiency in one language or qualification in two. See below.

Distribution Requirements: See below.

Elective requirement: See below.

Breadth requirement: See below.

Residence: Eight full-time semesters, unless a student can successfully complete all other requirements in fewer than eight semesters and meet the criteria to accelerate graduation. See below under "Acceleration."

Minimum number of courses: Thirty-four courses. A two-credit course counts as half a course; a six-credit language course counts as one and one-half courses; a one-credit course does not count toward this requirement. See below under "Courses and Credits."

Credits: A total of 120 academic credits, of which 100 must be taken in the College of Arts and Sciences. See below under "Non-credit courses."

Physical education: Completion of the College's requirements for graduation. Please note that physical education credit counts toward graduation or not in the major field.

Qualification
Qualification may be attained in any of the following ways:

1) Three years of high school study in any one language gives qualification in that language. Note that this route to qualification does not guarantee entrance into an intermediate (200-level) course. Students who want to continue studying the language must be placed in the appropriate course by an examination. Being placed below the intermediate (200-level) does not, however, cancel the requirement.

2) Passing the requisite Cornell course: 102, 123, or 134 in most languages taught by the Department of Modern Languages; Chinese 110, 112, or 114; Japanese 160; Near Eastern Studies 102 or 122 in Hebrew, 112 in elementary classical Arabic, or 118 in Turkish; Classics 103 or 104 in Greek, 106 or 107 in Latin, 112 in modern Greek; 132 in Sanskrit; AS&BC 154 in Swahili. Note: Except in the case of Sanskrit, completion of language sequences 151–152 does not constitute qualification.

3) A score of 600 or better in French, 580 in German, and 590 in Italian or Spanish on the SAT II taken in high school or a score of 56 or higher on the Cornell LP (Language Placement test) taken during orientation week. Students may earn a 56 placement test score at the end of a course numbered 122 (second semester of the introductory sequence) and consequently attain qualification without taking 123, the third semester of the introductory sequence. However, with a score of 56, it may be worthwhile to take 123 to be better prepared for the 200-level courses.
4) Placement into a 200-level course by departmental or (when no placement test is available) individual examination at Cornell.

**Placement in Language Courses and Advanced Placement Credit**

Placement into language courses and advanced placement credit are separate results of examinations.

**Placement**

Entering students who have had two or more years of high school study in a language or who have been awarded credit for language work at another college or university may enroll in a course in the same language only after being placed by examination. The placement exam may have been taken in high school (SAT II, taken after the last course) or at Cornell during orientation (LP test). Students may, but need not, reteke a language test if a year or more has passed since last taking it. Being placed into a 200-level course does not earn credit toward the degree. Credit is earned only for high school work equivalent in level to language courses numbered 200 and above at Cornell.

**Placement Tests and Advanced Placement Credit**

The type of test depends upon the language and the student’s level of achievement:

1) French, German, Italian, and Spanish: students register for the placement tests with the Department of Modern Languages, 203 Morrill Hall. Students who have a score of 65 and above on the appropriate LP test, 690 and above on the SAT test in French, Italian, or Spanish, and 680 and above on the SAT II in German, must take the Cornell Advanced Standing Examination (CASE) in order to be placed in a course. (The minimum score on the older SAT Achievement Test or a Cornell placement test taken prior to Fall, 1996 is 650 in all languages.) Cornell credit may be granted as a result of this test, depending on the student’s score.

2) Arabic: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

3) Greek, Ancient and Modern: departmental examination, Department of Classics, 120 Goldwin Smith Hall.

4) Hebrew: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

5) Latin: departmental examination, Department of Classics, 120 Goldwin Smith Hall.

6) Russian: Cornell Advanced Standing Examination (CASE), Department of Modern Languages, 203 Morrill Hall.

7) Turkish: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

8) Other languages: special examinations, see the instructor who teaches the language. Cornell is able to provide special examinations only when an instructor with the appropriate expertise is a member of the relevant department.

Distribution Requirements

In satisfying the distribution requirements, students become acquainted with a broad range of subject matter and points of view in the college and liberal arts, and sciences, and they explore areas that may be entirely new to them. Fulfilling the distribution requirements is part of the task of freshmen and sophomores. Although students may complete the requirements over the eight semesters, they can take advanced courses in many subjects they find intriguing only if they have previously completed the introductory prerequisites.

Students must take a total of nine courses (of three or more credits each) for the distribution requirements: four courses from Groups 1 and 2 below, at least two of which are from Group 1 and at least one of which is from Group 2 (for example, one chemistry, one physics, one geology, and one mathematics); five courses from Groups 3 and 4 below, with at least two in each group and two in the same department (for example, one course in sociology, one in history, one in history of art, and two in theater arts).

1. Physical and Biological Sciences

In fulfilling the science distribution requirement, students must take at least one course from the list of "primary" courses and may select additional courses from the supplementary list.

Primary list:
- Astronomy: all courses except 233
- Chemistry: all courses
- Biological Sciences: all courses
- Physics: all courses

Biological Sciences: all courses except 152, 200 (unless permission of the associate director is obtained), 208, 209, or 367. The following courses are especially suitable for the distribution requirement because they have no prerequisites: 101-104, 105-106, 107-108, 109-110, 154, 170, 194, 192, 202, 207, 212, 240, 241, 264 plus 266, 275. Note that introductory biology can count for distribution credit only when taken as a two-semester sequence: 102-110, 105-106, or 101 and 103 plus 102 and 104, or 107-108, or a combination of the first term of one sequence and the second term of another.

Supplementary list:
- Animal Science: 100, 150, 212
- Anthropology: 101, 208, 275, 371, 390, 474, 490
- Applied and Engineering Physics: 110
- Biology and Society: 301
- Entomology: 212
- Food: 200
- Materials Science and Engineering: 277
- Natural Resources: 201, 210, 301
- Nutritional Science: 115
- Plant Breeding: 225
- Psychology: 123
- Plant Pathology: 301
- Soils, Crops, and Atmospheric Sciences: 131, 231

2. Quantitative and formal reasoning

Biometry and Statistics: 215
City and Regional Planning: 320
Computer Science: 100, 211, 212
Economics: 321
Industrial & Labor Relations: 210, 211
Linguistics: 216
Mathematics: all courses except 101 and 109
Operations Research & Industrial Engineering: 115
Philosophy: 231, 331, 431, 436
Physics: 205, 209, 210
Psychology: 350
Sociology: 301

If students choose two courses from this list to satisfy part of the distribution requirement, those two courses may not have significant overlap. For example, students may not choose two beginning courses in statistics.

Under exceptional circumstances and upon petition, certain Cornell courses not listed above under Group 2 (courses such as those appearing on the following auxiliary list) may be used to satisfy the requirements in quantitative and formal reasoning. The petition should provide a persuasive rationale both in terms of the student's course of study and in terms of meeting the goals of the requirement.

Auxiliary list:
- Agricultural Economics 510
- Agricultural Engineering 151
- City and Regional Planning 321
- Industrial and Labor Relations 312
- Linguistics 421, 450
- Psychology 472-473 (a sequence of two two-credit courses which may count only in its entirety as one course)

3. Social sciences and history

- American Studies: 101, 102, 201, 202, 320
- Anthropology: all courses except 101, 208, 275, 371, 390, 451, 452, 453, 474, 490
- Archaeology: 100, 201, 202, 203, 204, 205, 275, 317, 353, 355, 362, 370, 405, 409, 458, 493, 494
- Asian Studies: courses in Asian anthropology, economics, government, history, linguistics, or sociology
- Biology and Society: 301, 342, 407, 427
- City and Regional Planning: 100, 101
- Cognitive Studies: 101, 201
- Economics: all courses except 317, 318, 319
- Engineering: 250, 292
- Government: all courses
- History: all courses
- Linguistics: all courses except 131, 132, 251, 252
- Near Eastern Studies: 197, 198, 244 and all other courses in Near Eastern archaeology and history
- Philosophy: all courses except 191 and courses in logic
- Russian Literature: all courses
- Science and Technology Studies: 205, 206, 286, 341, 384, 389, 390, 481, 661, 681
- Spanish Literature: all courses
Theatre, Film and Dance: all courses except technical production studios

Restrictions on Applying Courses to the Distribution Requirements
1) Advanced Placement Credit and Credit from Other Institutions

Students may apply up to two courses of approved advanced placement or transfer credit towards distribution requirements in Groups 1 and 2 (physical/biological sciences and quantitative/formal reasoning), as long as they take at least one course from the primary list in science at Cornell. Transfer credit applied to distribution in Group 2 (quantitative/formal reasoning) must be in mathematics or computer science; it may not be in other quantitative subjects, for example, statistics or logic.

Students may apply no advanced placement or transfer credit from other institutions for satisfaction of the distribution requirements in Groups 3 and 4 (social sciences/history and humanities/arts).

Students who enter the college as transfers from another institution are under the above rules for Advanced Placement credit, but are eligible to have credit for coursework taken at their previous institution count towards all distribution requirements. They will receive a detailed credit evaluation when they are accepted for admission.

2) Freshman writing seminars may not count towards any distribution requirement.

3) No single course may satisfy more than one distribution requirement. However, students may count courses in their major towards distribution. Courses offered or cross-listed by their major department may not be counted towards any distribution category beyond the usual category of the major department itself.

For example, a history major may not count a course cross-listed between history and a literature department towards distribution in the humanities.

Breadth Requirements
Students must include in their undergraduate curricula at least one Arts and Sciences course that focuses on an area or a people other than those of the United States, Canada, or Europe, and one course that focuses on an historical period before the twentieth century. (Arts and Sciences courses about Native American cultures may count toward the geographic breadth requirement if they focus on the cultures themselves and not interaction with European cultures.) Courses that satisfy the geographic breadth requirement are marked with a @ when described in this catalog. Courses that satisfy the historical breadth requirement are marked with a #. Many courses satisfy both requirements, and students may in fact use the same course to satisfy both. Students may also apply Cornell courses conferring proficiency in a non-Western language toward the geographical breadth requirement and use courses satisfying distribution, major, or elective (but not writing) requirements in satisfaction of either of the breadth requirements. They may not apply advanced placement or credit awarded by examination or, for students matriculating as freshmen, transfer credit to either of the breadth requirements.

The Major
In their last two years, students devote roughly one-half their time to acquiring depth and competence in a major subject. The choice of major is not intended to define a student's intellect or character or to lead to a lifetime's occupation, although it may do some of each. By majoring, students focus and develop their imaginative and intellectual capacities on a subject they find especially interesting.

Most departments and programs specify certain prerequisites for admission to the major; they are found in the department and program descriptions on the following pages. Students may apply for acceptance into the major as soon as they have completed their prerequisites. To apply, they take a copy of their transcript to an appointment with the director of undergraduate studies in their prospective major. Sophomores must be accepted into a major before registering for the junior year. A department or program may refuse admission into the major if the applicant's performance does not meet established standards. A student without a major at the end of the sophomore year should meet with an advising dean.

Available majors
Majors are offered by each of the departments. There are also majors in American studies, archaeology, biology and society, religious studies, Russian and East European studies, and women's studies.

Some students want to pursue an interest that cannot be met within an established major. They may plan, with the help of their faculty adviser, an independent major that includes courses from several departments. See "Independent Major Program," below, under "Special Academic Options."

Double Majors
One major only is required for graduation. Some students choose to complete two majors. No special permission or procedure is required; students simply become accepted into both majors and find an adviser in each department. Both majors will be posted on the official transcript.

Electives
Of the 34 courses and 120 credits required for graduation, almost one-third are free electives. How students use these electives frequently makes the difference between an ordinary and a truly interesting curriculum. Students must complete at least four electives and at least 15 credits offered outside the major field and not used to fill another requirement. AP credits not otherwise used may be used to fulfill elective requirements. Students may group electives to form a concentration separate from their major or even apply them to a second major. Some simply choose to explore a variety of subjects, while others develop a concentration in one particular department or subject outside Arts and Sciences to gain practical training or specialized knowledge.

Residence
The College of Arts and Sciences is primarily a residential college for students who devote their energy and spirit to full-time study. The faculty believes that integrated, full-time study for a defined period best promotes intellectual and creative development and best prepares people for citizenship and careers.

Consequently, eight semesters of full-time study in the College of Arts and Sciences are integral to earning the A.B. degree. Even if the minimum requirements can be met in fewer semesters, the faculty of the college expects students to take advantage of the resources of the university for eight full terms and obtain as rich and advanced an education in the liberal arts and sciences as possible.

Transfer students from other institutions must spend a minimum of four semesters on the Cornell campus in Ithaca enrolled in the College of Arts and Sciences. Transfers from other colleges at Cornell must spend four semesters on campus as full-time students in the Internal Transfer Division or in the college.

Approved study abroad, SEA Semester, and Cornell-in-Washington are considered semesters of residence, but not as semesters on the Cornell campus. Nonetheless, students may spend no more than two semesters on such programs and must be on campus during their last semester.

Some students enter with advanced placement credit from other institutions, take leaves and complete courses at other institutions, or take summer courses at other institutions. The college will accept credit for such courses, if they are comparable to courses offered by departments at Cornell and are approved by those departments (approval forms are available in the Academic Advising Center, 55 Goldwin Smith Hall). Students may not, however, count such credit as part of the 100 credits required in the College of Arts and Sciences or use such credit to replace a term of residence. Students may not leave the college after fewer than eight semesters of residence and complete their undergraduate degrees with credits earned at other institutions or as part-time or summer students at Cornell.

Acceleration
Some students decide that they do not need eight semesters of residence to obtain a solid undergraduate education. These students should compress the first four semesters and spend four full semesters in the major.

Benefiting from opportunities for advanced, seminar, and independent (sometimes honors) work in what best characterizes undergraduate education in the college. Students considering acceleration should discuss their plans with their major advisor.

Students occasionally enter with advanced placement credit from other institutions, take leaves and complete courses at other institutions, or take summer courses at other institutions. The college will accept credit for such courses, if they are comparable to courses offered by departments at Cornell and are approved by those departments (approval forms are available in the Academic Advising Center, 55 Goldwin Smith Hall). Students may not, however, count such credit as part of the 100 credits required in the College of Arts and Sciences or use such credit to replace a term of residence. Students may not leave the college for fewer than eight semesters of residence and complete their undergraduate degrees with credits earned at other institutions or as part-time or summer students at Cornell.
Academic Records. Such permission is normally granted only to:

1. Accelerants must meet either condition a or b:
   a. Complete 60 credits before the beginning of the last four semesters and complete the prerequisites for admission to the major in time to spend four semesters in the major.
   b. Pass 48 credits in College of Arts and Sciences courses numbered “300” and above. Upper-level courses taken in other colleges at Cornell University may count as College of Arts and Sciences credit only if approved for the major.

2. All accelerants are required to complete 100 credits at “C” or above. Courses completed with a grade of “S” will count toward the 100 credits.

3. Students may not use credits earned while on leave of absence to reduce their term of residence.

4. Accelerants may not finish the degree with credits earned in summer or winter session, through part-time study (unless they meet the guidelines for part-time study), or at an off-campus program, including Cornell-in-Washington, SEA Semester, or study abroad. That is, they may not exit through any program other than a regular, full-time Cornell semester in Ithaca.

Students matriculating as freshmen may not compress their undergraduate education into fewer than six semesters of residence. Transfer students, from other institutions and from other colleges at Cornell, must spend at least four semesters in the college on campus in Ithaca.

Ninth term

Students who can graduate in eight semesters should do so. If a worthy academic plan for a full ninth or tenth semester is presented, the dean of seniors can approve that plan and ask the registrar of the college to enroll the student as a special student for the additional semester.

Transfer students must successfully complete the outstanding courses as part-time study, from Cornell funds. Students who need only a part-time schedule of courses in a ninth or tenth semester may petition the Committee on Academic Records for part-time status and proration of tuition in the college. The college and university support students (with aid and services) as best they can to make full-time study possible. Rarely and occasionally, however, extraordinary but non-financial personal, academic, or medical circumstances make becoming a part-time student necessary and appropriate.

Students requesting part-time status should discuss their situation with Dean Walbridge if their reason is a documented disability that, under the Americans with Disabilities Act, requires appropriate accommodations. Otherwise, students should meet with the dean of their class.

Students may complete their degrees as part-time students at Cornell after fewer than eight semesters of full-time residence only if:

1) They have completed all requirements by the end of the sixth or seventh term, and could have accelerated.
2) They have received permission to accelerate, but have been forced to drop or delay a course for reasons beyond their control.
3) They are writing an honors thesis in the eighth semester and can complete all degree requirements by taking two or fewer courses, one of which is the thesis itself. They must register for the thesis and at least one additional course.

In all cases, approval of the dean of seniors must be sought in the semester prior to the part-time semester.

Courses and Credits

Students must complete at least 34 courses to graduate—that is, an average of four courses during each of six semesters and five courses during each of the last two semesters. A four-or five-credit course counts as one course; a two-credit course counts as one-half course. Single-credit courses do not count as part of the 34 except in certain cases when they form a part of a series and two in the same series can be aggregated to count as one-half course (certain offerings in the Departments of Music and Theatre, Film and Dance). Three- or four-credit courses do not aggregate to count as one course. A six-credit language course counts as 1 1/2 courses, while the summer Falcon Programs in Asian languages count as ten credits and 2 1/2 courses each. Archaeology and geology fieldwork for more than six credits count as two courses each. Biology 281 counts as 1 1/2 courses. Other five- or six-credit courses count as one course. AP exam scores that result in an award of 3 or 4 credits count as one course; those that result in an award of 5 credits count as two courses. Students must also complete 120 credits, 100 of which must be from courses taken in the College of Arts and Sciences. Liberal arts courses approved for study abroad during a semester or academic year of full-time study (not summer study) and courses taken in certain off-campus Cornell residential programs may be counted toward the 100 credits required within the college and also toward the required 34 courses. Credits earned in other colleges at Cornell, or in any subject at U.S. institutions other than Cornell, do not count as part of the 100 nor, for students matriculating in Fall 1994 or after, do advanced placement credits count as part of the 100. The only exception is for courses (usually no more than three) that certain departments accept from other colleges at Cornell as fulfilling major requirements.

A course may not be used to fulfill more than one college requirement, with the following exceptions:

1) A course may be used to fulfill a distribution requirement and also a major requirement.
2) A one-semester course in foreign literature (not language) that is acceptable for achieving proficiency in that language may also be used as a partial fulfillment of the distribution requirement in the humanities and the arts.
3) Courses may count toward breadth requirements and toward any other requirement except Freshman Writing Seminars.

4) Courses in a second major may count as electives.

Repeating courses

Students occasionally repeat courses. If the instructor certifies that the course content has been changed, credit will be granted a second time. If the content has not changed, both grades will appear on the transcript and will be included in any average that is calculated, but credit will be counted toward the degree only once. Students who plan to repeat a course should submit a petition to the college registrar. If the original course grade was F, no petition is necessary.

Auditing

The college encourages its students to take advantage of its rich curriculum by sitting in on courses that interest them but do not fit into their schedules for credit. As long as the instructor agrees, students are welcome to visit courses, but they must be in residence in the college for at least 60 credits and 16 courses at Cornell.

Transferring credit

The college evaluates credit earned either at another school or college at Cornell University or at another accredited institution of collegiate rank and determines the number of credits and courses that may apply toward the various requirements for the Bachelor of Arts degree at Cornell. Transfer students must successfully complete at least 60 credits and 16 courses at Cornell; they must be in residence in the college for four regular semesters (summer session does not count toward the residence requirement). Evaluations of their transfer credits are normally provided when they are notified of their admission. Advanced placement credit awarded by other colleges, either at Cornell or elsewhere, is subject to a re-evaluation by the college.

Advanced placement credit

See p. 5.
Summer session credit
A student may earn credit toward the degree by completing courses in Cornell's summer session or by petitioning to take courses at other colleges. Students should consult their advisors regarding summer study plans. Credit for summer courses not taken at Cornell must be approved by the appropriate Cornell department. Approval forms and information are available in the Academic Advising Center, 55 Goldwin Smith Hall. Credit earned in summer courses other than those at Cornell will not count toward the 100 credits required in the college (including summer or orientation programs abroad) and may be applied only to part of the Group 1 and 2 distribution requirements. Transcripts from other institutions must be sent to the associate registrar, 55 Goldwin Smith Hall.

Entering students who want to receive credit toward the degree for courses completed in a summer session away from Cornell should obtain approval forms as soon as possible and have transcripts sent to the associate registrar, 55 Goldwin Smith Hall, during the summer before matriculation. Credits completed in Cornell summer sessions will be awarded automatically.

Summer session at Cornell or elsewhere does not count toward the eight-semester residence requirement.

Non-credit courses
The college does not grant credit toward the degree for every course offered by the university. Courses in remedial or developmental reading, high school mathematics, supplemental science and mathematics offered by the Learning Skills Center, keyboarding, shorthand, military training, and service as a teaching assistant are among those for which credit is not given and that do not constitute part of the 12 credits required for good academic standing.

Examples of non-credit courses:
All courses numbered below 100 (with the exception of Computer Science 099)
All courses in Military Science, Naval Science, and Aerospace Studies
Biology G 498
Communications 498
Education 498
Hotel Administration 170
Human Development and Family Studies 403
Human Ecology 100, 101
Human Service Studies 403
Mathematics 109
Nutritional Science 403
Psychology 498

Physical Education
See "University Requirements for Graduation," p. 13. The college does not count physical education credit toward the 120 credits required for graduation, nor toward the twelve credits required for good standing each semester.

SPECIAL ACADEMIC OPTIONS

Degree Programs
The following five programs allow students to work toward more than one degree or to alter the regular college or major requirements.

Independent Major Program
The Independent Major Program allows students to design their own interdisciplinary majors to pursue a subject that cannot be found within an established major. Proposals for an independent major must be equivalent in coherence, breadth, and depth to a departmental major, well suited to the student's academic preparation, and consistent with a liberal education. Proposals must also be supported by a faculty adviser and are assessed by a board of faculty members. Independent majors substitute for established majors, but students must still satisfy all the other requirements for the baccalaureate degree. Students should contact the director of the Independent Major Program, Academic Advising Center, 55 Goldwin Smith Hall, for further information. Deadlines for submitting independent major proposals are listed on the calendar supplement for the College of Arts and Sciences.

College Scholar Program
The College Scholar Program frees up to forty students in each class from the usual college requirements for a degree and allows them to design their own curricula. It is meant to serve students whose interests and talents would benefit from a little more academic freedom than other students have, who demonstrate exceptional promise, and who show the maturity to plan and carry out, with the help of their adviser, a well-designed program of studies. College Scholars do not all design the same kind of program: some, for instance, pursue diverse interests, while others integrate a variety of courses with a common theme.

College Scholars must complete 120 credits of course work (100 in the college), 34 courses, and, unless permission from the program to accelerate, eight full terms of undergraduate study. They must complete the physical education requirement. All College Scholars must complete a senior project. They are not required to complete or fulfill the general education requirements, although members of the College Scholar Advisory Board believe that the spirit of the college requirements is a good one.

Each applicant to the College Scholar Program is asked to write an essay, which is due the last Wednesday in April of the freshman year. Mid-year freshmen apply at the end of their first spring semester in the college. Students should contact the Academic Advising Center, 55 Goldwin Smith Hall, for further information.

Dual-Degree Program with Other Colleges
The Dual-Degree Program enables especially ambitious undergraduate students to pursue programs of study in two colleges. Dual-degree candidates may earn both a Bachelor of Arts degree from the College of Arts and Sciences and (1) a Bachelor of Science degree from the College of Engineering or (2) a Bachelor of Fine Arts degree from the Department of Art in the College of Architecture, Art, and Planning or (3) a Bachelor of Science degree in urban and regional studies from the Department of City and Regional Planning in the College of Architecture, Art, and Planning or (4) a Bachelor of Science degree in architectural history from the Department of Architecture in the College of Architecture, Art, and Planning.

Students enter one of these colleges as freshmen or sophomores and begin the Dual-Degree Program with the second college in the second or, in some cases, the third year. The Dual-Degree Program ordinarily takes five years to complete, and students are eligible for five years of financial aid. For further information contact Dean Saraydar, Arts and Sciences Admissions, 172 Goldwin Smith Hall.

Double Registration with Professional Schools
Registration in the senior year of the College of Arts and Sciences and the first year of Cornell Law School, Cornell Medical College, or the Johnson Graduate School of Management, is possible. A few exceptionally well-prepared students who have earned 105 credits before the start of the senior year and have been accepted by one of the above-named professional schools may be permitted to register simultaneously in the college and in one or another of these professional schools during the seventh and eighth terms.

Students with eight or fewer credits to complete may apply to enter the Master's of Engineering program during the eighth semester, dual-degree students may enter this program no earlier than the ninth semester.

Students interested in the joint program with the Law School or the Graduate School of Management, or the Master's of Engineering program should see the dean of seniors. Academic Advising Center, 55 Goldwin Smith Hall.

Students registering simultaneously in the college and in the Cornell Medical College receive the Bachelor of Arts degree after the first year of medical studies and the Doctor of Medicine degree after the remaining years of medical college are completed.

Interested students should contact the health careers coordinator, 203 Barnes Hall.

Double-registered students must, of course, complete all requirements for the A.B. degree, including 100 credits in College of Arts and Sciences courses.

Teacher Education in Science and Mathematics
Students at Cornell may pursue teaching credentials in biology, chemistry, earth science, general science, mathematics, and physics. Teacher Education in Science and Mathematics (TESM) is a university program jointly conducted by the departments of education and mathematics. Although TESM offers options for undergraduate and graduate study, most students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching degree (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates, usually during their sophomore year.

For more information, contact the TESM student support specialist at 255-0255 or the program coordinator, D. Trumbull, 255–3108.
Special-Interest Options
The following options do not alter the college’s requirements but enable students to pursue special interests within the usual programs.

Informal Minors
Some students organize electives within a discipline or department. Such informal minors can be developed with the help of the departmental directors of undergraduate studies, but are not noted on the transcript.

Concentrations
Interdisciplinary concentrations, described in the pages following the descriptions of the departments and their curricula, provide structures for organizing electives. Completed concentrations are noted on the transcript.

Independent Study
Independent study affords students the opportunity to pursue special interests or research not treated in regularly scheduled courses. A faculty member, who becomes the student’s instructor for the independent course, must approve the program study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study (proposals are available in the Academic Advising Center, 55 Goldwin Smith Hall). In one semester students may earn up to six credits with one instructor or up to eight credits with more than one instructor.

Undergraduate Research Program
An excellent way to benefit from being an undergraduate at a research university and at Cornell in particular is to become an apprentice in on-going faculty research. About 400 students participate each year in creating new knowledge and earn independent study credit for what they learn and contribute. They sharpen their critical and creative abilities and can test their interest in pursuing a research career. Sometimes they publish their work.

The Undergraduate Research Program gathers information about research opportunities in most disciplines of the liberal arts and sciences, guides students in finding further opportunities—both on campus and elsewhere, and both during the academic year and during the summer—and helps students prepare for research and present themselves as candidates for apprenticeships. Other students locate research opportunities independently through faculty whose courses they have taken, through their major departments, or through published materials.

The Cornell Undergraduate Research Board, an undergraduate organization, conducts an annual open house to help students get started in research and an annual forum at which undergraduates present their work. Students interested in this program should see Dean Williams, Academic Advising Center, 55 Goldwin Smith Hall.

Language Study
More than forty languages are taught in the College of Arts and Sciences; some of them are taught only at Cornell. A full range of language, literature, and cultural courses are available in most of the major ancient and modern languages through the joint efforts of the Departments of Linguistics and Modern Languages and the departments that specialize in literary and cultural study: the Africana Studies and Research Center and the departments of Asian Studies, Classics, German Studies, Near Eastern Studies, Romance Studies, and Russian Literature. Semi-intensive courses afford students the option of accelerating the development of language skills.

FALCON (Full-Year Asian Language Concentration).
FALCON allows students who are interested in the Far East to study Chinese, Indonesian, or Japanese exclusively for one year. They gain proficiency in the language and familiarity with the culture. Students who are interested in the Far East should be aware of the opportunities here to pursue rapid and thorough beginning studies on campus with the objective of studying abroad later—in China, Japan, or Southeast Asia.

Language House Program
A complement to classroom cultural and linguistic instruction, the Language House Program combines residential and academic opportunities for developing and practicing conversational skills in French, German, Italian, Japanese, Mandarin Chinese, Russian, and Spanish. It helps prepare students who plan to study abroad and helps returning students share their cultural experiences while further increasing their language skills. Students interested in this program should see Academic Administrator Evett, 136 Goldwin Smith Hall.

Prelaw Study
Law schools neither require nor prefer any particular program of study; they do seek students with sound training in the liberal arts and sciences. It is important that students plan a program in which they are interested and do well. Beyond that, students are advised to take courses that will develop their powers of precise, analytical thinking and proficiency in writing and speaking.

The college offers a concentration in law and society. Students should work toward completion of this concentration because they find it interesting, and they believe it will convince law schools of their interest. The adviser for students in the College of Arts and Sciences who are applying to law school is Dean Cox, Arts and Sciences Admissions, 172 Goldwin Smith Hall.

Premedical Study
The breadth and depth afforded by a liberal arts education is invaluable for people who plan medical careers, whether they intend to practice or go into research. Such training has a profound effect on the doctor’s usefulness to patients, and it affords the flexibility of mind that is needed for major research undertakings. Medical and dental schools do not prescribe or even prefer a particular major; they do, however, require a unique set of requirements that is not the same for all students.

Medical and dental schools do not prescribe or even prefer a particular major; they do, however, require a unique set of requirements that is not the same for all students.

The adviser for students in the College of Arts and Sciences who are planning careers in medicine is Dean Turner, Academic Advising Center, 55 Goldwin Smith Hall.

Off-Campus Programs
Many students find it important to their majors or to their overall academic programs to study off campus or abroad for one or two semesters. When it makes academic sense, the college encourages its students to pursue such studies and grants credit toward the degree for work satisfactorily completed.

Study Abroad
All students planning to study abroad apply through Cornell Abroad; please see the Cornell Abroad program description in the introductory section of Courses of Study. Each year about 200 undergraduates in Arts and Sciences include semester- or year-long study abroad as part of their formal undergraduate education. Ideally, study abroad builds upon a broad liberal arts background in the early semesters: area studies, language training, and preparation in the proposed field of study are all essential.

The college encourages wherever possible study at foreign institutions alongside their degree candidates rather than study in self-contained programs that offer courses specially designed for foreigners. The primary goals of this educational immersion are to learn firsthand the modes of inquiry, methods of analysis, and educational values of higher education offered to students of another country and to involve students in social relationships with peers who may hold a new and unexpected range of social attitudes.

Many students go abroad to pursue work in their majors. Focused academic work in an appropriate institution abroad can prepare students for advanced study or honors work in the final semesters back in Ithaca.

The college advocates study abroad that enables students to become competent enough in another language to experience daily life, develop social relationships, and accomplish formal coursework in that language. Students who intend to study abroad in a country where the host language is not English must demonstrate a serious commitment to learning the language through coursework before studying abroad. At least one area studies course or one course in the history, culture, economics, politics, or social relations of the country of destination must be part of every student’s preparation for study abroad.

Students planning to study abroad need solid academic credentials to do so productively and successfully. The college requires a minimum overall GPA of 3.0 for all Cornell course work and good academic standing in the semester immediately before going abroad.

Study abroad is possible during the sophomore and junior years or during the first semester of the senior year. Study abroad in the final semester is rarely approved. Important steps to prepare for study abroad include:

- substantial progress with college distribution requirements;
- admission to a major and a faculty adviser in the major;
- clear academic agenda for study abroad.
• appropriate study of the country or region of destination, especially language study.

Study abroad can earn up to 15 liberal arts and sciences credits per semester of full-time course work as long as the curriculum abroad is consistent with that of the college. Courses that fall outside the scope of the liberal arts and sciences may earn non-Arts credits. Students must carry a full course-load as defined by the host institution. Students may spend up to two semesters abroad. Only those with compelling academic reasons may study in more than one location over two semesters. The college does not approve study abroad that tours more than one country or that is more touristic than scholarly in content and scope. Students must continue study of the host language while abroad. Only in exceptional circumstances will the college approve programs which, in non-English speaking countries, provide no language training.

All courses taken abroad will appear on the Cornell transcript and grades earned are reported in the system of the host institution. Grades earned through course work abroad do not, however, become part of the Cornell GPA.

Students who transfer to Cornell must complete a minimum of four semesters of residence on campus in Ithaca and may not study abroad during one of those four semesters.

Applications to study abroad must have the support of a faculty adviser in the major and the approval of Dean Terrell in the Academic Advising Center, 55 Goldwin Smith. Although students investigate options for study abroad and submit final applications through the Cornell Abroad office, Arts and Sciences applicants submit to the college an essay describing the academic rationale for study abroad and an outline of prospective courses to be taken.

Summer Residential Programs in Archaeology

During the summer months students may participate in a Cornell-sponsored archaeological project. In recent years the program has organized archaeological projects in New York State, Central America, Greece, and Italy. Students should contact the Archaeology Program for information about the sites currently available.

Marine Science

Shoals Marine Laboratory is a seasonal field station that offers a variety of courses and experiences designed to introduce undergraduates to the marine sciences. The laboratory is located on Appledore Island, six miles off the Maine/New Hampshire coasts. Students should contact the Division of Biological Sciences for further information.

Cornell-in-Washington

The Cornell-in-Washington program offers students from all colleges within the university an opportunity to earn full academic credit for a semester in Washington, D.C. Students take courses from Cornell faculty, conduct individual research projects, and work as externs. The Cornell-in-Washington program offers two study options: 1) studies in public policy, and 2) studies in the American experience. The program also offers unique externship opportunities: students serve as externs in a federal agency, congressional office, or non-governmental organization and take part in a public policy or humanities seminar. They define and carry out individual research projects under the supervision of Cornell faculty. Potential externships are arranged through, and approved by, the Cornell-in-Washington program. For further information, see p. 19 or inquire at 471 Hollister Hall, 255-4000. Seniors who wish to study in Washington during their final semester must petition the college for permission to do so; they should first consult with the dean of seniors, Academic Advising Center, 55 Goldwin Smith Hall, 255-5004.

Fieldwork

Sometimes it is appropriate for students to include fieldwork as part of their major. A three-member faculty committee helps the student plan the project, arranges for ongoing supervision, and evaluates the project at the end of the term. Fieldwork almost always involves writing a long paper or several short ones, as well as practical experience. All proposals for fieldwork must be presented in advance to the Committee on Academic Records for approval. A maximum of 15 credits in fieldwork may be earned. For further information students should contact an advising dean in the Academic Advising Center, 55 Goldwin Smith Hall or the Office of Admissions, 172 Goldwin Smith Hall.

ADVISING

The following advisers and offices provide academic advising or information on college procedures and regulations.

Faculty Advisers

All new students are assigned a faculty adviser. The adviser helps students plan programs of study and advises them about ways to achieve their academic goals. Advisers may also help students with study or personal problems or direct them to other offices on campus where help is available. Academic difficulties may frequently be solved or avoided if students and advisers recognize problems early.

Advisers and new advisees meet first during orientation week to discuss course selection. Students who are changing majors must have a consultation with the major department, with whom they make plans for their most important academic decisions at Cornell. The adviser eventually certifies the completion of the major. The major adviser should be consulted by the student about all academic plans, including honors, study abroad, acceleration, and graduate study. The adviser’s support is especially important if a student prepares for an exception to the requirements for the degree.

Academic Services

The Academic Advising Center, 55 Goldwin Smith Hall, 255-5004 and the Office of Admissions, 172 Goldwin Smith Hall, 255-4833, offer resources for faculty and student advisers and for students themselves and their parents. Advising deans are available to help students define their academic and career goals and to help with special academic options and exceptions to college rules.

Lynne S. Abel, dean of undergraduate education, independent majors and college scholars—255-5004

Thak Chaloemtarana, dean of seniors—255-4833

Gerry Cox, dean of juniors, pre-law adviser and coordinator of outside scholarships—255-4833

Michele Crane, associate registrar—255-5051

Patricia M. Dougherty, college registrar—255-5051

Daniel H. Evett, academic administrator, Language House—255-6543

Ken Gabard, dean of freshmen (fall matriculants)—255-5004

Lawrence Lamphere, dean of internal transfer students—255-4833

Stephen Saraydar, dean of freshmen (spring matriculants) and dual-degree students—255-4833

Maria S. Terrell, dean of sophomores and adviser for Cornell Abroad Students—255-5004

Janice Turner, dean of minority programs and premedical adviser—255-5004

Peggy Walbridge, dean of transfer students and students with disabilities—255-4833

Marilyn Williams, dean of undergraduate research and scholastic development and Career Center liaison—255-5004

REGISTRATION AND COURSE SCHEDULING

Enrollment in Courses in the College of Arts and Sciences

Students enroll in courses through the Academic Advising Center, 55 Goldwin Smith Hall. Any student not officially enrolled in a schedule of courses by the end of the third week of classes may be withdrawn from the college (see below under "Withdrawals").

New Students

During orientation week, the dean of freshmen and the dean of transfer students conduct briefings on course scheduling for new students.

Continuing Students

Continuing students are expected pre-register, that is, to select and schedule up to five courses in advance, during the semester prior...
to the one in which they will be taken. Students who fail to sign into courses during the designated period must wait until the beginning of the semester; they may well have difficulty securing places in those they most want. Before signing into courses, students should make appointments with their faculty advisers to plan their programs and discuss long-range goals. All students are welcome to discuss programs and plans with an advising dean in the Academic Advising Center, 55 Goldwin Smith Hall, or the Office of Admissions, 172 Goldwin Smith Hall. At the beginning of each term, students should check their schedules and records on "Just the Facts."

Limits on Courses and Credits
To meet the 34-course requirement, students must normally take four courses during each of six semesters and five courses during each of two semesters. To meet the 120-credit requirement, students should average 15 credits per semester. (AP credit and/or summer credits may reduce these numbers.) At a minimum, students must carry twelve credits per semester; if for compelling personal or academic reasons students need to carry fewer than twelve credits, they should consult their advisor and an advising dean. Permission is by petition only; it is relatively freely given for first-semester students. Completion of fewer than twelve credits without permission results in unsatisfactory academic standing. First-semester freshmen must petition to register for more than eighteen credits; other students may register for more than eighteen credits a term only if their previous term's average was a 3.0 or higher. No more than twenty-two credits may be taken in a regular semester without permission of the Committee on Academic Records. Students who fail to receive approval for excess credits from the committee run the risk of having only 18 credits for the semester count toward the degree.

Attendance
Attendance in classes is a matter between students and their instructors. If a student cannot attend classes because of illness or family crisis, the Academic Advising Center will notify instructors when requested to do so, but students must arrange to make up examinations or other work with their instructors. A student who will be absent because of religious holidays or athletic competitions must discuss arrangements for making up work with his or her instructors in advance. Alternative arrangements are at the discretion of the instructor.

Adding and Dropping Courses
After course enrollment (pre-registration), students may not adjust their schedules until the new term begins. During the first three weeks of the semester, students may change courses without petitioning. Add/drop forms are available in the Academic Advising Center, 55 Goldwin Smith Hall. After the third week of classes, students must petition to add or drop courses up to the seventh week. Between the seventh and twelfth weeks students may petition to withdraw from courses, if (1) the instructor approves; (2) the adviser approves; (3) no issue of academic integrity is at stake and (4) an advising dean approves. Students must meet with an advising dean to obtain petition forms. Courses dropped after the seventh week will be noted on the transcript by a "W" where the grade would normally appear. No petitions to withdraw from courses may be submitted after the end of the twelfth week in the term. Deadlines for short courses will be adjusted according to the length of the courses. After the midpoint of a short course, students who wish to drop the course must petition to do so.

Leaves of Absence
Taking time off from college to think about goals and progress, to gain additional experiences or funds, or just to take a break from studying is sometimes useful. Those in good standing who take a leave before the beginning of any semester or by the end of the seventh week of the term are welcome to register in the college the following semester. Five years is the maximum length of time a student may be on leave and return without special permission. Leaves of absence are of four types:

1) Personal leaves impose no conditions concerning reentering the college except for the five-year limit. Readmission is automatic upon written request made at least one month before the beginning of the term in which the student wishes to return. Required leaves: The Committee on Academic Records may require a leave of absence if a student is not making satisfactory progress toward the degree. See the section "Academic Actions."

2) Medical leaves, usually for at least six months, are granted by the college on recommendation of a physician from Gannett Health Center. In some cases, students must satisfy the Gannett Health Center that the condition requiring the leave has been corrected before they may return. The student's academic standing will also be subject to review at the time of the leave and on return.

3) Conditional leaves may be granted by an advising dean if the student is not in good standing or, in unusual circumstances, after the seventh week of the term. Normally students may not return from conditional leaves for at least two terms or until specific and individual conditions, such as completing unfinished work, have been met.

4) Required leaves: The Committee on Academic Records may require a leave of absence if a student is not making satisfactory progress toward the degree. See the section "Academic Actions."

A WARNING is posted on a student's unofficial college transcript but is not reported to the student's graduation date will be recalculated according to the number of terms completed. Students who take courses elsewhere while on leave may petition to have credits transferred and applied toward the 120 credits needed for graduation, but not toward the 100 credits required for a degree. Approval depends on acceptable grades and the judgment of the relevant departments about the quality of the courses. Credits earned during a leave do not count toward the eight semesters of residence and may not be used to reduce the terms of residence. See the section "Residence."

Withdrawals
A withdrawal is a voluntary, permanent severance from the university and from status as a degree candidate. If a student wants to withdraw after registering for the term, the withdrawal must be requested before the end of the seventh week of classes to avoid grades of "W" on the transcript. A notation of "W" will appear on the transcript for any course dropped after the seventh week. Students seeking readmission after withdrawing from the college must petition the Committee on Academic Records. If a student fails to register for a term and does not register for a leave, the student will be withdrawn from the college for failure to register.

Transferring within Cornell (Internal Transfer)
Internal transfer from one college or school at Cornell into another is attractive for many students whose intellectual interests change. Students who want to transfer should discuss their eligibility with a counselor in the new school or college.

In some cases, students who want to transfer into the College of Arts and Sciences may transfer directly. In other cases, they may be referred to the Intercollege Division. During the term immediately preceding transfer into the College of Arts and Sciences, students should complete at least 12 credits of courses in the College of Arts and Sciences with a B average and without any grades of Incomplete, any S-U grades (unless only S-U grades are offered for that particular course), or any grades below C. Satisfying this minimum requirement does not, however, guarantee admission. Admission to the college is based on consideration of the student's entire record at Cornell and the high school record, not just the work of one semester. Interested students should see Dean Gabard, Arts and Sciences Admissions, 172 Goldwin Smith Hall.
university registrar and does not appear on official transcripts.

Required leave of absence
A student in serious academic difficulty may be required by the Committee on Academic Records to take a leave of absence, normally for a full year. Usually, but not always or necessarily, the Committee on Academic Records warns students before suspending them. Before being allowed to return and reregister in the college, students must describe what they did on leave and how they resolved their problems and submit a plan for completing the degree. In some cases the students will be required to furnish evidence that they are ready to return before being allowed to reregister in the college. Students who request to return in less than a year must present to the committee exceptionally strong evidence of their readiness to return. "Required leave" and the date are posted on the student's transcript.

Required withdrawal
The Committee on Academic Records may dismiss a student from the college because of a highly unsatisfactory record for one term or for failure to make satisfactory overall progress in grades, credits, or the requirements of the major. This action expels the student permanently from the college. "Required withdrawal" and the date are posted on the student's transcript. Students being reviewed for academic action are urged to present evidence that will help explain their poor academic performance. Students may appeal a decision or action of the committee if they have new relevant information to present.

Forgery on Forms
Forging signatures or credentials on college forms is an academic offense; sometimes it constitutes academic fraud. In all cases of forgery on academic forms, the effect of the forged documents shall be negated. Students may then petition properly to do whatever they attempted to do improperly. Such incidents will be recorded in the Academic Integrity Hearing Board confidential file for forgeries. If a student forges more than once or if the forgery would advance the student's academic standing unfairly or fraudulently or if, for any other reason, the situation requires some response in addition to the uniform penalty, the Academic Integrity Hearing Board might make a different recommendation, such as a notation on the student's transcript, suspension, or dismissal.

GRADUATION

Application to Graduate
In the first semester of their senior year, students must complete an application to graduate so that the college can check each student's plan for full college requirements. This process is intended to help seniors identify problems early enough in the final year to make any necessary changes in course selection to satisfy those requirements. Meeting graduation requirements is the student's responsibility; problems that are discovered, even late in the final term, must be resolved by the student before the degree can be granted.

Degree Dates
There are three degree dates in the year: May, August, and January. Students who plan to graduate in August may attend graduation ceremonies in the preceding May. Students graduating in January are invited to a special recognition ceremony in December; they may also attend graduation ceremonies in the following May.

The Degree
The College of Arts and Sciences grants only one degree, the A.B. (or B.A.). A.B. is the abbreviation of the Latin name for the degree: "Artium Baccalarius," or translated into English, B.A.: "Bachelor of Arts."

Honors

Dean's List
Inclusion on the Dean's List for academic excellence is an honor bestowed by the dean of the college. The criteria are subject to change from semester to semester and are available in the Academic Advising Center, 55 Goldwin Smith Hall.

Bachelor of Arts with Honors
Almost all departments offer honors programs for students who have demonstrated exceptional ability in the major and who have completed original independent research. The honors programs are described by individual departments in the following sections. The degree of Bachelor of Arts with honors will be conferred upon students who, in addition to having completed the requirements for the degree of Bachelor of Arts, have satisfactorily completed the honors program in their major and have been recommended for honors by their major department, the Independent Major Program, or the College Scholar Program. Concentrations do not offer honors programs.

Bachelor of Arts with Distinction
The degree of Bachelor of Arts with distinction in all subjects will be conferred on students who have completed the requirements for the degree of Bachelor of Arts, if they have met the following requirements by the end of their final semester:

1. completed at least 60 credits while registered in regular sessions at Cornell;
2. ranked in the upper 30 percent of their class at the end of the seventh semester, or next-to-last semester for transfers and accelerants;
3. received a grade below C- in no more than one course;
4) received no failing grade;
5) maintained good academic standing, including completing a full schedule of at least 12 credits, in each of their last four semesters; and
6) have no Incompletes remaining on their records.

### CALENDAR SUPPLEMENT

All of the dates in the university calendar at the front of this volume apply to all Cornell students. Listed below are some additional dates that are of importance for students in the College of Arts and Sciences.

<table>
<thead>
<tr>
<th>Fall 1997</th>
<th>Spring 1998</th>
</tr>
</thead>
<tbody>
<tr>
<td>Last day for adding courses without petition.</td>
<td>Sept. 19</td>
</tr>
<tr>
<td>Last day for changing grade option to S/U or letter.</td>
<td>Sept. 19</td>
</tr>
<tr>
<td>First deadline for submitting independent major requests. Go to Academic Advising Center, 55 Goldwin Smith Hall, for further information.</td>
<td>Sept. 29</td>
</tr>
<tr>
<td>Last day for dropping courses without petition.</td>
<td>Oct. 17</td>
</tr>
<tr>
<td>Last day to petition to withdraw from a course.</td>
<td>Nov. 21</td>
</tr>
<tr>
<td>Second deadline for submitting independent major requests. Go to Academic Advising Center, 55 Goldwin Smith Hall, for further information.</td>
<td>Dec. 1</td>
</tr>
<tr>
<td>Deadline for requesting internal transfer to the College of Arts and Sciences for the following term.</td>
<td>Dec. 5</td>
</tr>
<tr>
<td>Deadline for applying to the College Scholar Program.</td>
<td>April 29</td>
</tr>
<tr>
<td>Deadline for applying to study abroad. See Cornell Abroad, 474 Uris Hall.</td>
<td></td>
</tr>
<tr>
<td>Course enrollment (pre-registration) for the following term.</td>
<td>TBA</td>
</tr>
</tbody>
</table>

### ADMINISTRATION

Phillip Lewis, dean—255-4146
Ronald Hoy, associate dean—255-4147
Biddy Martin, associate dean—255-4147
Lynne S. Abel, associate dean of undergraduate education—255-3866
Thak Chaloemtiarana, associate dean and director of admissions—255-7061
Jane V. Pedersen, director of administration and finance—255-7507

### Courses and Departments

### SPECIAL PROGRAMS AND AREAS OF CONCENTRATION

The college offers a number of interdisciplinary programs described in the section following the departmental program descriptions.

### AFRICANA STUDIES MAJOR

See “Special Programs and Interdisciplinary Studies.”

### AKKADIAN

See Department of Near Eastern Studies.

### AMERICAN STUDIES

See “Special Programs and Interdisciplinary Studies.”

### ANTHROPOLOGY

Anthropology is one of the most diverse disciplines in the university. Spanning human evolution, the development and heterogeneity of language and culture, human history, and the diversity of cultures past and present, the field has broad scope, utilizes a variety of methods, addresses basic issues about human origins and human life, and maintains commitment to understanding social life and using this understanding to improve society.

Anthropology is an ideal "liberal arts" major, and it also serves as a major that, when well designed by the student and their adviser, prepares students for a wide range of professional careers, e.g., law, medicine, foreign service, social services, and business, among others.

Courses for non-majors: Anthropology welcomes non-majors into many of its courses. Unless prerequisites are explicitly stated, 200- and 300-level courses do not have formal prerequisites and can be taken by students without prior experience in anthropology. Such students are welcome in these upper-level courses. For additional information to assist non-majors and students from other colleges in selecting anthropology courses, see the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/).

### The Major

The range and complexity of the field of anthropology requires active collaboration between the student and a faculty adviser in developing an individualized program of study. To enter the anthropology major, a student must pass one course in each of the two broad introductory areas of anthropology: "Nature and Culture" and "Culture and History" listed below under the heading "Introductory Courses." Entry into the major is possible before completing these courses, with permission from the director of undergraduate studies in anthropology. When students first enter the major, they work with their adviser to develop a preliminary program of study built around their own interests and goals.

In the first semester of the junior year, the student and adviser formalize a concentration reflecting the special interests of the student and select a set of courses from those listed below as a program of study. Once the concentration is developed, they submit the plan to the Anthropology Curriculum Committee for comment and advice. Examples of possible concentrations are Latin American ethnohistory and contemporary identity politics, nature and culture in human history, prehistory of the Americas, anthropology and literature, anthropology and social change, ethnomusicology, anthropology and the arts, etc. The plan must include a minimum of eight courses in anthropology (including Anthropology Senior Seminar) totaling 32 credit hours. When warranted, the adviser is free to approve up to two cognate courses from other departments totaling up to eight credit hours to fill this eight-course requirement. Students may revise their program of study in consultation with their adviser as they move through their studies. Our goal is to provide a close and supportive advising relationship and a strong and coherent structure for the student's major.

In their senior year, anthropology majors are required to take a Senior Seminar. These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboratively the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus, the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

### Study abroad and off-campus study programs:

The Department of Anthropology encourages students to consider a semester of study abroad or off-campus study developed as an integral part of the student's major concentration and has designated Professor Vrjanji Munasinghe as the Anthropology Study Abroad adviser.

### The Cornell-Nepal Study Program:

The Cornell-Nepal Study Program is a joint program of Cornell University and Tribhuvan University in Kathmandu, Nepal. It is designed for Cornell University students interested in anthropology and related fields. The program offers opportunities to study in a traditional and rural environment, gaining firsthand experience in anthropology.

Anticipated participation in the Cornell-Nepal Study Program is based on academic and language proficiency. Students are expected to complete a core curriculum in anthropology, which includes language courses and fieldwork.

The program offers a range of courses, from introductory to advanced levels, allowing students to explore various aspects of anthropology. Students can choose to focus on specific areas such as cultural anthropology, archaeology, or linguistic anthropology, depending on their interests and academic background.

The Cornell-Nepal Study Program also provides opportunities for students to engage in community service projects and to contribute to the local community. These activities are designed to foster a deep understanding of the local culture and to promote cross-cultural exchange.

The program is open to students from all disciplines, and it aims to create a diverse and inclusive community of learners. Students are encouraged to develop their own research projects and to participate in fieldwork, which is an integral part of the program.

In conclusion, the Cornell-Nepal Study Program offers a unique and rewarding experience for students interested in anthropology and related fields. It provides a platform for students to explore new cultures, engage in meaningful activities, and develop their skills in a supportive and collaborative environment.

For more information, including application procedures and requirements, please visit the Anthropology Department website or contact the program coordinator.
University, the national university of Nepal. Qualified juniors, seniors, and first- or second-year graduate students work with faculty from both universities to prepare for and undertake field research projects in Nepal. Students receive 15 credits per semester; students may enroll for either fall or spring semester, or for the entire year; application is through Cornell Abroad. For further information, contact David Holmberg or Kathryn March in the Department of Anthropology.

Other anthropologically-relevant study abroad options, using existing Cornell Abroad and off-campus options, can be worked out in consultation with the major adviser, the Anthropology Study Abroad adviser, and Cornell Abroad.

**Honors**

Honors in anthropology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. Anthropology majors interested in the Honors Program should consult the chair of the Honors Committee at the end of their junior year. To qualify for entrance into the Honors Program, a student must have at least a 3.5 GPA overall and 3.3 GPA in the major, and the consent of a faculty member in anthropology who will guide the honors thesis. After applying to the program and being admitted as a candidate by the Honors Committee, the student will conduct research and write a thesis. This thesis will be evaluated by the faculty research adviser and two other faculty members. Honors (i.e., cum laude, magna cum laude, or summa cum laude) are awarded based on the quality of the thesis and the student's overall record. Honors candidates must start this process by consulting their major adviser about the honors program early in their junior year.

While working on the thesis during the senior year, students should make use of the Senior Seminar as a place to develop the ideas for their thesis. In addition, students may enroll in Anthropology 483 (fall or spring) "Honors Thesis Research." To complete the thesis, students must enroll in 491 (fall or spring) "Honors Thesis Write-up." Only Anthropology 483 may be counted toward completion of the anthropology major. The credit hours for these courses are variable, according to the faculty adviser, and are based on performance in the thesis research and writing. Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

**Special Programs and Facilities**

Collections: The department has an extensive collection of archaeological and ethnological materials housed in the anthropology collections. A limited number of students can make arrangements to serve as interns in the department's collections. Olin Library houses some of the most extensive collections of materials on the ethnology of Southeast Asia, South Asia, East Asia, and Latin America to be found anywhere in the United States. The biological anthropology laboratory (McGraw 303) houses an extensive collection of materials for teaching purposes, including 1) human skeletal remains, 2) articulated skeletons and cranial casts of primates, and 3) casts of important fossils in the human lineage.

Independent Study: Specialized individual study programs are offered in Anthropology 407, "Topics in Anthropology," a course open to a limited number of juniors and seniors who have obtained consent and supervision of a faculty member. Undergraduates should note that many 600-level courses are open to them by consent of the instructor.

Colloquia: The Department of Anthropology holds colloquium on the second week of the semester on Friday at 3:30 in McGraw 215. Faculty members from Cornell and other universities participate in discussions of current research and problems in anthropology. Students are encouraged to attend.

For more complete information about the anthropology major, see the Director of Undergraduate Studies, pick up a copy of the major brochure (which includes descriptions of the courses not offered during 1997-98), or visit the Anthropology Department web page (http://falcon.abs.cornell.edu/~anthro/).

**I. Introductory Courses**

**A. Nature and Culture:**

ANTHR 101 *Introduction to Anthropology: Social and Cultural Perspectives on the Evolution of Humankind* #

- Spring: 3 credits. M. Small.
- The evolution of humankind is explored through the fossil record, studies of the biological differences among current human populations, and a comparison with our closest relatives, the primates. This course investigates the roots of human biology and behavior with an evolutionary framework.
- Fee for lab usage and maintenance, $5.

ANTHR 102 *The Scope of Anthropology* #

- Spring: 1 credit. Prerequisite: concurrent enrollment in or prior completion of Anthropology 101 or Anthropology 102.
- S-U grades only. Staff.
- This course is intended for majors or prospective majors in anthropology. Each week a different member of the faculty in anthropology at Cornell will make a presentation on the nature of their work within the field and discuss their interests with students.
- The course is meant to introduce the range of approaches found within anthropology and help students in planning future course work.

ANTHR 203 *Early Peoples: The Archaeological and Fossil Record (also Anthropology 203)* #

- Spring: 3 credits. Not offered 1997-98.

ANTHR 211 *Nature and Culture* #

- Spring: 4 credits. Staff.
- Cultural anthropology, because it encompasses the comprehensive study of humankind in society, provides a unique vantage on the nature of humanity. One of the focal questions of the discipline is the relationship between the physical/biological and symbolic/moral worlds in which we live. This inquiry places anthropology squarely at the center of social theory, as all social theorists and political ideologues are founded on premises regarding human nature. Through study of a variety of issues and debates (e.g., "sociobiology;" the origin and meaning of the incest taboo), this course examines a variety of past and current attempts to explain the relationships between nature and culture in human life.

ANTHR 275 *Human Biology and Evolution (also Biological Sciences 275)* #

- Fall: 3 credits. Not offered 1997-98.

**B. Culture and History:**

ARKEO 100 *Introduction to Archaeology* #

- Spring: 3 credits. Staff.
- A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies illustrate current methods and interpretive frameworks.
- Guest lectures by members of the Cornell Archaeology Program are an integral part of the course.

ANTHR 102 *Introduction to Anthropology: The Comparison of Cultures* #

- Spring: 3 credits. J. Krier.
- An introduction to cultural anthropology through ethnographies, or the descriptive accounts of anthropologists. Through readings and lectures, students acquaint themselves with a number of cultures from several parts of the world. The cultures range in form from those of small-scale tribal societies to those of state societies. Throughout the course, we attempt to make sense of exotic cultures in their own terms. Attention is focused on variation in cultural patterns as they are expressed in social, economic, and ritual practices. In this encounter, the principles of anthropology as a comparative enterprise that poses distinct cultural systems in relief will be developed. Fiction, films, and exercises supplement the formal anthropological materials.

ANTHR 103 *The Scope of Anthropology* #

- Spring: 1 credit. Prerequisite: concurrent enrollment in or prior completion of Anthropology 101 or Anthropology 102.
- S-U grades only. Staff.
- For course description, see section I.A.

ANTHR 200 *Cultural Diversity and Contemporary Issues* #

- Fall: 3 credits. J. Krier.
- This course will introduce students to the meaning and significance of forms of cultural diversity for understanding contemporary issues. Drawing from films, videos, and selected readings, students will be confronted with different representational forms that portray cultures in various parts of the world and they will be asked to examine critically their own prejudices as they influence the perception and evaluation of cultural differences. We shall approach cultures holistically, assuming the inseparability of economics, kinship, religion, and politics, as well as interconnections and dependencies between world areas (e.g., Africa, Latin America, the West). Among the issues considered: "political correctness" and truth; nativism and ecological diversity; race, ethnicity, and sexuality; sin, religion, and war; global process and cultural integrity.

ANTHR 202 *Interpretive Archaeology (also Archaeology 202)* #

- Fall: 3 credits. Limited to 50. T. Volman.
- An introduction to the analysis and interpretation of archaeological data, especially stone and ceramic artifacts, and related contextual data, such as the remains of plants and
This course is a synthesis of each student's graduate work in anthropology. Students will develop a series of topics representing the concentrations, visits to campus facilities, and analyses of logical data to answer questions about ancient animals. Emphasis is on the use of archaeological evidence for human behaviors, lifeways, and culture change. Topics include the formation of the archaeological record, the characterization and classification of artifacts, and the analysis of artifact distributions through space and over time. Sectional meetings include demonstrations, visits to campus facilities, and analyses of artifacts from Cornell archaeological collections.

ANTHR 204 Ancient Civilizations (also Anthropology 204) @
Fall. 3 credits. Not offered 1997–98.

II. Honors and Independent Study

ANTHR 483 Honors Thesis Research
Fall or spring. Credit and hours to be arranged. Prerequisite: consent of the Honors Committee. Staff. Independent work under the close guidance of a faculty member selected by the student.

ANTHR 491 Honors Thesis Write-up
Fall or spring. Credit and hours to be arranged. Staff.

ANTHR 497 Topics in Anthropology
Fall or spring. Credit and hours to be arranged. Intended for undergraduate students only. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

III. Anthropology Major Senior Seminars

In the senior year, anthropology majors are required to take a Senior Seminar. These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboration among the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

ANTHR 489 Anthropology Senior Seminar
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: Anthropology majors only. Fall: V. Munasinghe; spring, M. Small. This course is a synthesis of each student's undergraduate concentration in the major. In collaboration, the instructor and the students will develop a series of topics representing the interests of the students. Students will be required to read extensively and present topics.

IV. Nature and Culture

Thinking about nature and culture and their interaction is central to contemporary anthropology. The courses in this section present a biological and evolutionary perspective on behavior, focus on the interplay between nature and culture, and discuss the controversies surrounding these relationships between these dimensions of human life.

ANTHR 208 The Evolution of Human Mating
Spring. 4 credits. Not offered 1997–98.

ANTHR 344 Male and Female in Chinese Culture and Society (also Women’s Studies 344) @
Fall. 4 credits. Not offered 1997–98.

ANTHR 370 Environmental Archaeology (also Anthropology 670 and Anthropology 370/670)
Fall. 4 credits. Not offered 1997–98.

ANTHR 371 Human Paleontology (also Biological Sciences 371) @
Fall. 4 credits. Prerequisite: one year of introductory biology or Anthropology 101 or permission of instructor. Offered alternate years. K. Kennedy. A broad survey of the fossil evidence for human evolution with special attention to skeletal and dental anatomy, geological contexts, paleoecology, dating methods, archaeological associations, and current theories of human origins and physical diversity.

ANTHR 390 Primate Behavior and Ecology
Spring. 4 credits. Not offered 1997–98.

ANTHR 409 Approaches to Archaeology (also Anthropology 609 and Anthropology 409/609)
Spring. 4 credits. Prerequisite: Permission of instructor(s). J. Henderson, T. Volman. An exploration of the concepts that have shaped modern archaeology. The course briefly examines the history of theoretical orientations in archaeology, then considers the variety of perspectives and interpretive frameworks that guide present-day investigations. Case studies illustrate the implications of the nature of the archaeological record for reconstructing subsistence and economic systems, trade, social and political organization, demography, and ideology. An undergraduate seminar especially recommended for undergraduate majors and graduate archaeologists but open to anyone with a serious interest in archaeology.

ANTHR 475 Evolutionary Theory and Human Behavior (also Anthropology 675)
Spring. 4 credits. M. Small. One of the major recent controversies in anthropology focuses on the role of evolution in the behavior of modern humans. Some scholars feel that ever since our species became sentient, and developed ways to override or bypass nature, the rules of Natural Selection were suspended. Others are convinced that buried deep within our consciousness are strategies, thoughts, and desires that were molded long ago but still motivate our lives. This seminar will examine the role of evolution in modern human behavior. First, we will read the evolutionary theory upon which current hypotheses are based. Second, the class will read, discuss, and criticize the most recent literature on the evolution of human behavior. We will ask several questions: Is current human behavior molded by the rules of Natural Selection? Do the modern theorists present a convincing argument? How would their predictions best be tested? What contribution does this work make (or not make) to the larger field of anthropology?

ANTHR 490 Primates and Evolution

V. Human History and Archaeology

Archaeology tells the story of human origins, the invention of farming and settled life, the rise of complex social institutions and technologies, and the worldviews of the past, while also teaching field and laboratory methods for uncovering the human past.

ANTHR 317 Stone Age Archaeology (also Archaeology 317)
Fall. 4 credits. T. Volman. A survey of current approaches to the archaeological record of Stone Age peoples, from the earliest sites to those of recent times. Case studies are used to illustrate the nature of archaeological occurrences, excavation procedures, and analytical methods. Multidisciplinary efforts to expand our knowledge of prehistoric lifeways and behaviors are a major concern of the course.

ANTHR 355 Ancient Mexico and Central America (also Archaeology 355)
Spring. 4 credits. Not offered 1997–98.

ANTHR 370 Environmental Archaeology (also Anthropology 670 and Anthropology 370/670)
Fall. 4 credits. Not offered 1997–98.

ANTHR 371 Human Paleontology (also Biological Sciences 371)
Fall. 4 credits. Prerequisite: One year of introductory biology or Anthropology 101 or permission of instructor. Offered alternate years. K. Kennedy. For course description, see section IV.

ANTHR 405 Archaeological Research Design (also Anthropology 605 and Anthropology 405/605)
Spring. 4 credits. Not offered 1997–98.

ANTHR 409 Approaches to Archaeology (also Anthropology 609 and Anthropology 409/609)
Spring. 4 credits. Prerequisite: Permission of instructor(s). J. Henderson, T. Volman. For course description, see section IV.

ANTHR 456 Mesoamerican Religion, Science, and History @
Fall. 4 credits. Not offered 1997–98.

ANTHR 458 Archaeological Analysis (also Anthropology 658 and Anthropology 458/658)
Spring. 4 credits. Limited to 15 students. Prerequisite: One course in archaeology or permission of instructor. J. Henderson. An introduction to methods of recording, processing, and analyzing archaeological data. Topics include recording of excavation and survey data in the field; processing artifacts in the laboratory; software for analyzing data; and basic methods of describing, tabulating, analyzing, and interpreting artifacts (mainly ceramic vessels), stratigraphy, and spatial distributions. Intended for those with some understanding of the uses to which archaeological data are put in regional synthesis and interpretation; previous field experience is helpful.

ANTHR 493 Seminar in Archaeology (also Anthropology 493) @
Fall. 4 credits. Not offered 1997–98.
VI. Anthropological Thought and Method

As a form of inquiry, anthropology has a long and complex history and utilizes a wide variety of theories and methods. In this section, topics in the history of anthropological thought and a wide variety of anthropological approaches are presented, along with courses focused on the design of anthropological research projects.

ANTHR 291 Filming Other Cultures (also Anthropology 691 and Theatre Arts 291/691) @

Spring. 3 credits. Limited to 20 students. Preference given to students who have taken either Anthropology 102 or Theatre Arts 274. Fee for film screening and maintenance, $35. R. Ascher.

Shortly after the first films were screened, their makers saw in motion pictures a promise for greater understanding among peoples. Was the promise fulfilled? In this discussion course, responses to this question are examined through the study of short, representative films and related readings. The discussions are framed and informed by ideas from anthropology and film studies. For example, we consider aesthetic, ethics, and responsibility in filming and editing, connections between sound—or lack of it—and image; the implications of film as a product of Euroamerican culture, cultural assumptions in camera movements, film color, and film pace; indigenous people's presentations of themselves and Euroamerican representations of others; and the moving line that separates fiction from non-fiction films. For one meeting each week, two students, in cooperation with the instructor, are responsible for leading the discussion.

ANTHR 306 Ethnographic Description

Fall. 4 credits. Not offered 1997–98.

ANTHR 362 Democratizing Society: Participation, Action, and Research (also Anthropology 662)

Fall. 4 credits. D. J. Greenwood.

This course poses an alternative to distances, "objectivist" social science by reviewing some of the numerous approaches to socially engaged research. Among the approaches discussed are those centering on the pedagogy of liberation, feminism, the industrial democracy movement, and "Southern" participatory action research, action science, and participatory evaluation. There are no prerequisites and undergraduates are welcome.

ANTHR 400 The Craft of Anthropology: Ethnographic Field Methods

Fall. 4 credits. Not offered 1997–98.

ANTHR 405 Archaeology Research Design (also Anthropology 605 and Archaeology 405/605)

Spring. 4 credits. Not offered 1997–98.

ANTHR 412 Contemporary Anthropological Theory @

Spring. 4 credits. B. Lambert.

A survey of the assumptions anthropologists make concerning the nature of society and culture and the explanations they have proposed for social behavior, values, belief systems, and ritual. Problems of social continuity and change will be addressed by way of theories of process, conflict, and transaction. Problems of cross-cultural understanding will be explored through interpretive and structural studies of symbolism, ritual, mythology, concepts of the person, and cultural logic. Examples will be drawn from Western and non-Western societies, past and present.

ANTHR 420 Development of Anthropological Thought

Fall. 4 credits. Limited to 15. A. T. Kirsch.

An examination of the history and development of anthropological theory and practice. The course will focus on the differences and continuities among the various national and historical approaches that have come to be regarded as the schools of anthropology.

ANTHR 424 Anthropology Amongst the Disciplines @

Fall. 4 credits. J. T. Siegel.

Anthropology is distinguished amongst the disciplines in depending on a notion of the not-yet conceptualized, the encounter with which is thought to provide an inassimilable element into thinking about culture and society. The course provides a history and assessment of this idea and illustrations of its embodiment, particularly in studies of ritual.

ANTHR 451 Anthropological Boundaries @

Fall. 4 credits. Not offered 1997–98.

ANTHR 452 Portraits, Profiles, and Life Histories @

Spring. 4 credits. Not offered 1997–98.

ANTHR 453 Visual Anthropology

Spring. 4 credits. Enrollment is limited by appropriate space for showing work. S-U grades only. Fee for film screening and maintenance, $20. R. Ascher.

The expression of ideas about the human condition through original drawings, graphics, paintings, photographs, cinema, sculpture, and video that take person as subject. Writing can be combined with visual expression, as, for example, in concrete poetry or photographic essays. Projects must conform to two general guidelines: (1) the student must have prior knowledge of the medium chosen or concurrent course work in it, and (2) the project must be one that can be developed throughout the course and benefit from its particular setting. In the first half, the creative work of others is studied. For example, we read Spiegelman's MAUS and view films made by both anthropologists and people whom they visit. The second half is devoted to hour-long progress reports and discussions of the work of people in the course.

ANTHR 455 Archaeological Analysis (also Anthropology 658 and Archaeology 458/658) @

Spring. 4 credits. Limited to 15 students. Prerequisite: One course in archaeology or permission of instructor. J. Henderson.

For course description, see section V.

ANTHR 474 Laboratory and Field Methods In Human Biology (also Biological Sciences 474)

Spring. 5 credits. Not offered 1997–98.

ANTHR 487 Field Research Abroad @

Fall or spring. Credit to be arranged.

Intended for undergraduate students only. Staff.

Field research abroad as part of the Cornell-Nepal Studies Program, the Cornell-Honduras Program, or other departmentally-approved programs. Topics are selected and project proposals prepared by students in consultation with faculty. Fieldwork typically involves extended research (usually 4–6 weeks) in a foreign setting with faculty supervision, culminating in a major paper or report.

ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also Anthropology 494) @

Spring. 4 credits. T. Volman.

For course description, see section V.

ANTHR 495 Classic Theorists Seminar

Fall. 4 credits. Not offered 1997–98.

VII. Understanding Cultures

Anthropologists examine the diversity of human behaviors, social relationships and structures, economies, political and legal orders, worldviews, logics, languages, symbols, myths, and religions among the many other means human beings invent to create and reproduce social life around the world. Anthropologists work from a holistic perspective to account for differences and similarities across cultures. Anthropologists also take small-scale societies and local sociocultural systems as the object of analysis. They collect data primarily through ethnographic fieldwork, that is, months or years of participating in and observing of the societies they study. Anthropologists see inherent linkages between the practical and the meaningful dimensions of human existence.

A. Anthropological Approaches to Economy, Society, Law, and Politics

The courses below take as their starting point what are usually defined as the social, political, legal, and economic practices and structures of human life and show how they are shaped culturally and how they shape culture.

ANTHR 217 Ethnicity, Identity, and the State

Spring. 4 credits. Not offered 1997–98.

ANTHR 305 Emotion, Gender, and Culture (also Women's Studies 305) @

Spring. 4 credits. Not offered 1997–98.

ANTHR 313 Anthropology of the City @

Spring. 4 credits. Staff.

An examination of the sociocultural structure and process in urban settings, with emphasis on the role of rural migrants, the relationship of urbanism to political and economic development, the role of voluntary associations, and the adjustment of family and
kinship groups to urban life. Asian, African, and Latin American urban centers are emphasized.

**ANTHR 321 Sex and Gender in Cross-Cultural Perspective (also Women's Studies 321)**
Fall. 4 credits. Staff. An introduction to the study of sex roles cross-culturally and to anthropological theories of sex and gender. The course examines various aspects of the place of the sexes in social, political, economic, ideologically, and biological systems to emphasize the diversity in gender and sex-role definition around the world.

**ANTHR 323 Kinship and Social Organization**
Spring. 4 credits. B. Lambert. Much of this course is a survey of forms of the family, descent groups, and marriage systems. The role of age and sex in the social structure is also considered. The last part of the course is devoted to a history of the British and American family and its fate in utopian communities.

**ANTHR 326 Economic Anthropology**
Fall. 4 credits. Not offered 1997–98.

**ANTHR 328 Conflict, Dispute Resolution, and Law in Cultural Context**
Spring. 4 credits. Not offered 1997–98.

**ANTHR 330 State, Nation, and Everyday Life**
Spring. 4 credits. Not offered 1997–98.

**ANTHR 406 The Culture of Lives (also Women's Studies 406)**
Spring. 4 credits. Not offered 1997–98.

**ANTHR 408 Gender Symbolism (also Women's Studies 408)**
Spring. 4 credits. Not offered 1997–98.

**ANTHR 417 Person, Gender, and Song (also Women's Studies 416)**
Spring. 4 credits. Not offered 1997–98.

**ANTHR 421 Anthropological Boundaries**
Fall. 4 credits. Not offered 1997–98.

**ANTHR 426 Ideology and Social Reproduction**
Spring. 4 credits. Not offered 1997–98.

**ANTHR 432 Culture and Performance, and Performing Culture**
Spring. 4 credits. Not offered 1997–98.

**ANTHR 435 Theatre of Anthropology (also Women's Studies 435)**
Fall. 4 credits. V. Munasinghe.

**ANTHR 441 Anthropological Perspectives**
Fall. 4 credits. Not offered 1997–98.

**ANTHR 453 Visual Anthropology**
Spring. 4 credits. Enrollment is limited by appropriate space for showing work. S-U grades only. Fee for film screening and maintenance, $20. R. Ascher. For course description, see section VI.

**ANTHR 455 Theatre of Anthropology**
Spring. 4 credits. Not offered 1997–98.

**ANTHR 456 Mesoamerican Religion, Science and History**
Fall. 4 credits. Not offered 1997–98.

**ANTHR 460 Culture and International Order**
Fall. 4 credits. J. Borneman. For course description, see section VII A.

**C. Cultures in Anthropological Perspective:**
Anthropology constructs its theories in the comparison of different social and cultural systems and thus depends integrally on knowledge about particular places. The courses below are all based on the cultures and societies of particular areas of the world and organize knowledge about these areas in reference to key anthropological questions. Students without prior experience in anthropology are welcome in these courses.

**ANTHR 221 Anthropological Representation: Ethnographies on Latino Culture (also Latino Studies Program 221)**
Spring. 3 credits. Not offered 1997–98.

**ANTHR 223 Religion and Culture**
Fall. 4 credits. B. Lambert.

**ANTHR 230 Cultures of Native North America**
Fall. 4 credits. B. Lambert.

A survey of the principal Eskimo and American Indian culture areas north of Mexico. Selected cultures will be examined to bring out distinctive features of the economy, social organization, religion, and worldview. Although the course concentrates on traditional cultures, some lectures and readings deal with changes in native ways of life that have occurred during the period of European-Indian contact.

**ANTHR 303 Asians in the Americas: A Comparative Perspective (also Asian American Studies 303)**
Fall. 4 credits. V. Munasinghe.

The common perception of ethnicity is that it is a “natural” and an inevitable consequence of cultural difference. “Asians” overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the “Asians”? On what basis can we label “Asians” an ethnic group? Although there is a significant Asian presence in the Caribbean, the category “Asian” itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course will examine the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies will focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.
ANTHR 316 Power, Society, and Culture in Island Southeast Asia @
Fall. 4 credits. Not offered 1997-98.

ANTHR 333 Ethnology of the Andean Region @
Fall. 4 credits. B. J. Isbell. Cultural continuities in the development of Andean societies. The ecological, archaeo­
logical, ethnographical, and contemporary ethnological record. The Andean heritage as a resource for "modernization."

ANTHR 335 Subsistence, Polity, and Worldview in Mainland Southeast Asia @
Spring. 4 credits. Limited to 12 students. A. T. Kirsch. A survey of the peoples and cultures of Mainland Southeast Asia from prehistoric to contemporary times.

ANTHR 336 Change and Continuity in the Pacific Islands @
Fall. 4 credits. Not offered 1997-98.

ANTHR 339 Peoples and Cultures of the Himalayas @
Spring. 4 credits. Not offered 1997-98.

ANTHR 343 Religion, Family, and Community in China @
Fall. 4 credits. Not offered 1997-98.

ANTHR 344 Male and Female in Chinese Culture and Society (also Women's Studies 344) @
Fall. 4 credits. Not offered 1997-98.

ANTHR 345 Japanese Society @
Fall. 4 credits. Staff. A survey of the social structure of Japan and a discussion of trends in urban and rural life during the past century. Topics to be emphasized include family, ancestor worship, community and social organization, and urbanism and modernization.

ANTHR 350 Topics in the Anthropology of Europe
Spring. 4 credits. J. Borneman. This course explores ways in which Europe can and has been studied anthropologically. Emphasis will be on understanding processes of cultural differentiation and integration. The self-understandings of various peoples of Europe is accounted for in terms of the relation of local culture to national, transnational, and global processes. Among the topics to be explored: 1) the role of culture in nation-building; 2) the rise and decline of fascism and communism in the twentieth century; 3) Cold War division and everyday life; 4) the creation and displacement of culture areas (i.e., the Mediterranean, Scandinavia, Mitteleuropa, Slavic culture, the West, and the East).

ANTHR 355 Ancient Mexico and Central America (also Archaeology 355) @
Spring. 4 credits. Not offered 1997-98.

ANTHR 377 The United States (also Latino Studies Program 377)
Fall. 4 credits. Not offered 1997-98.

ANTHR 433 Andean Thought and Culture @
Spring. 4 credits. Not offered 1997-98.

ANTHR 434 Religion and Ritual in Chinese Society (also Religious Studies 443) @
Fall. 4 credits. P. S. Sangren. This course explores topics in the anthropological study of Chinese religion, including aspects of cosmology, ritual, and mythology as they relate to Chinese society. A premise of the course is that religion embodies values basic to Chinese culture. Consequently, study of Chinese religion provides important insights into Chinese society. By the same token, Chinese religion must be understood in the context of Chinese social institutions (family, community, state).

ANTHR 444 Japanese Social Organization @
Spring. 4 credits. Not offered 1997-98.

ANTHR 446 Mesoamerican Religion, Science, and History @
Fall. 4 credits. Not offered 1997-98.

ANTHR 477 Ethnology of Island Southeast Asia @
Fall. 4 credits. Not offered 1997-98.

ANTHR 493 Seminar in Archaeology (also Archaeology 493) @
Fall. 4 credits. Not offered 1997-98.

ANTHR 496 Seminar in Archaeology (also Anthropology 496) @
Fall. 4 credits. Not offered 1997-98.

Relevant courses in other departments
BIOPL 247 Ethnobiology Fall. 3 credits. D. Bates.
GOVT 444 Afrocentrism 4 credits. M. Bernal.
HIST 434/WOMNS 477 Gender in the Social History of Africa 4 credits. S. Greene.
MUSIC 245 Gamelan in Indonesian History and Cultures 3 credits. M. Hatch.
MUSIC 604 Ethnomusicology: Areas of Study and Methods of Analysis 4 credits. M. Hatch.

VIII. Graduate Seminars

The graduate program in anthropology is described in much greater detail in the Graduate Program brochure which is available through the Director of Graduate Studies. This document is also found on the Anthropology Department Internet page (http://falcon.arts.cornell.edu/~anthro/). The seminars described immediately below pertain to the program in socio-cultural anthropology. For information about graduate study in archaeology and biological anthropology, see the Anthropology Department Internet page.

A core set of seminars is required of all graduate students in socio-cultural anthropology: Anthropology 600, 601, and 602. Anthropology 603 is strongly recommended. These seminars are open to graduate students from other related fields. This sequence, and the graduate curriculum in general, is premised on the idea that anthropology is best defined as the comparative study of human social life. This definition resists institutional pressures in the academy to distinguish social science from humanistic or cultural studies and is supported by the integrationist approach to social groups and practices. The study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiotics, etc., is linked to the practical exigencies of social life. While emphasizing aspects of the discipline generally associated with cultural anthropology, the course will endeavor to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interrelated phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlin, among others, as well as contemporary theories are given careful attention.

ANTHR 600 Proseminar: Culture and Symbol
Spring. 6 credits. S. Sangren. This course focuses on an appreciation of symbolic, expressive, and representational forms and processes as both producers and products of social activities. Through the study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiotics, etc., we will investigate how identity and meaning are linked to the practical exigencies of social life. While emphasizing aspects of the discipline generally associated with cultural anthropology, the course will endeavor to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interrelated phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlin, among others, as well as contemporary theories are given careful attention.

ANTHR 601 Proseminar: Social Organization
Spring. 6 credits. S. Sangren. This course focuses on an appreciation of symbolic, expressive, and representational forms and processes as both producers and products of social activities. Through the study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiotics, etc., we will investigate how identity and meaning are linked to the practical exigencies of social life. While emphasizing aspects of the discipline generally associated with cultural anthropology, the course will endeavor to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interrelated phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlin, among others, as well as contemporary theories are given careful attention.

ANTHR 602 The Practices of Anthropology
Fall. 4 credits. D. Greenwood. The course builds on the foundation of the proseminar but broadens the concept of anthropological practices to include issues about the relations between theory and method, practice/theory relationships, the ethnography of anthropological practices themselves, the examination and critique of the concept of "participant observation," and a consideration of "ethical practices" in anthropology. The centerpiece of the seminar is the connection between the students' own
ANTHR 603 Research Design
Spring. 4 credits. V. Santiago-Izrayely. This seminar focuses on preparing a full-scale proposal for anthropological fieldwork for a dissertation. Topics include identifying of appropriate funding sources, defining a researchable problem, selecting and justifying a particular fieldwork site, situating the ethnographic case within appropriate theoretical contexts; selecting and justifying appropriate research methodologies, developing a feasible timetable for field research, ethical considerations and human subjects protection procedures, and preparing appropriate budgets. This is a writing seminar, students will complete a proposal suitable for submission to a major funding agency in the social sciences.

ANTHR 604 Praxis and Culture
Spring. 4 credits. Not offered 1997-98.)

ANTHR 605 Archaeological Research Design (also Anthropology 405 and Archaeology 405/605)
Spring. 4 credits. Not offered 1997-98.)

ANTHR 607 Special Problems in Anthropology
Fall or spring. Credit and hours to be arranged. Intended for graduate students only. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 609 Approaches to Archaeology (also Anthropology 409 and Archaeology 409/609)
Spring. 4 credits. Prerequisite: permission of instructor(s). J. Henderson, T. Volman. An exploring of the concepts that have shaped modern archaeology. The course briefly examines the history of theoretical orientations in archaeology, then considers the variety of perspectives and interpretive frameworks that guide present-day investigations. Case studies illustrate the implications of the nature of the archaeological record for reconstructing subsistence and economic systems, trade, social and political organization, demography, and ideology. An undergraduate seminar especially recommended for undergraduate majors and graduate archaeologists but open to anyone with a serious interest in archaeology.

ANTHR 610 Language and Myth
Fall. 4 credits. J. T. Siegel. An analysis of the theories on language leading to Levi-Strauss and Derrida. Myth and the notion of the father.

ANTHR 614 Reading in the Ethnographic Tradition (1880-1960)
Fall. 4 credits. Not offered 1997-98.)

ANTHR 615 Reading Contemporary Ethnographies (1960-1990)
Fall. 4 credits. Not offered 1997-98.)

ANTHR 616 Cultural Production of the Person
Spring. 4 credits. Not offered 1997-98.)

ANTHR 619 Anthropological Approaches to the Study of Buddhism in Asia
Spring. 4 credits. A. T. Kirsch. This seminar will examine the various conceptual and analytical strategies employed by social scientists in the study of Buddhism especially in South and Southeast Asia. Problems of religious complexity, the social correlates of Buddhism, and the role of Buddhism in social change will be explored.

ANTHR 621 Gender and Culture (also Women's Studies 621)
Fall. 4 credits. Not offered 1997-98.)

ANTHR 629 Chinese Ethnology
Spring. 4 credits. Not offered 1997-98.)

ANTHR 632 Andean Symbolism
Spring. 4 credits. Not offered 1997-98.)

ANTHR 635 Southeast Asia: Readings In Special Problems
Fall or spring. Credit and hours to be arranged. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 636 Cognition and Classification
Fall. 4 credits. Not offered 1997-98.)

ANTHR 637 Theorizing Social Movements, Human Rights and Democracy in Latin America
Spring. 4 credits. Not offered 1997-98.)

ANTHR 639 The Feminine Symbolic
Spring. 4 credits. Not offered 1997-98.)

ANTHR 641 South Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 645 Japanese Ethnology
Fall. 4 credits. Not offered 1997-98.)

ANTHR 648 Marriage and Death
Fall. 4 credits. Not offered 1997-98.)

ANTHR 649 Narrative and the Analysis of Culture
Spring. 4 credits. J. Bomeman. The purpose of the course is to acquaint students with narrative form and the use of narrative tools in the analysis of cultural artifacts. Narrative—a specific set of genres of discourse sharing the property of temporally sequenced clauses—is the subject of much research within many disciplines. Narrative is often said to fashion diverse human experiences into a form assimilable to structures of meaning that are generally human rather than culture-specific. By making personal knowledge communicable, narrative is intrinsic to the making of culture, its representation, and its comprehension. Participants will be introduced to the work of major narrative theorists and to attempts at applying narrative theory to culture. They will also be asked to examine critically a variety of cultural artifacts—including ethnography, performance art, film/video, and law—in terms of the theories discussed.

ANTHR 660 Latino Languages, Ideology and Practice (also Latino Studies Program 660)
Spring. 4 credits. Not offered 1997-98.)

ANTHR 662 Democratizing Society: Participation, Action, and Research (also Anthropology 362)
Fall. 4 credits. D. J. Greenwood.
This course poses an alternative to distanced, "objectivist" social science by reviewing some of the many numerous approaches to socially engaged research. Among the approaches discussed are those centering on the pedagogy of liberation, feminism, the industrial democracy movement, and "Southern" participatory action research, action science, and participatory evaluation.

ANTHR 663 Action Research
Spring. 4 credits. Prerequisite: Anthropology 362/662. Enrollment limited to 20 students. D. J. Greenwood.
This seminar is a practicum in action research—(AR) in which the semester becomes a self-managing learning environment for the exploration of the techniques and group processes involved in AR, including co-generative learning, searching, and AR facilitation. Participation in a seminar-centered LISTSERV is expected.

ANTHR 665 Topics in Native American Societies and Cultures
Spring. 4 credits. Not offered 1997-98.)

ANTHR 670 Environmental Archaeology (also Anthropology 370 and Archaeology 370/670)
Fall. 4 credits. Not offered 1997-98.)

ANTHR 673 Human Evolution: Concepts, History and Theory (also Biological Sciences 673)
Fall. 4 credits. Not offered 1997-98.)
ANTHR 675 Evolutionary Theory and Human Behavior (also Anthropology 475)
Spring. 4 credits. M. Small. For course description, see ANTHR 475 in section IV.

ANTHR 680 Theory and Ethnography in the Anthropology of Southeast Asia
Fall. 4 credits. Not offered 1997–98.

ANTHR 682 Perspectives on the Nation (also Asian American Studies 682)
Spring. 4 credits. V. Munasinghe. This course will examine critically the key texts that have informed our understanding of the nation and nationalism. Beginning with Kohn's The Idea of Nationalism: A Study in Its Origins and Backgrounds (1994), Plamenatz's Two Types of Nationalism (1976), and Renan's What is a Nation? (1882), we will then move on to more contemporary writings by Gellner, Hobbsawen, and Anderson and end with alternate analytical approaches that have been informed by the "national question" in the "Third World" such as Pantha Chatterjee's Nationalist Thought and the Colonial World. A central theme will be how notions of culture, power, and history are implicated in constructions of "the Nation."

[ANTHR 685 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America @ Fall. 4 credits. Not offered 1997–98.]

[ANTHR 690 Ritual and Myth: Structure, Process, Practice @ Spring. 4 credits. Not offered 1997–98.]

ANTHR 691 Filming Other Cultures (also Anthropology 291 and Theatre Arts 291/691 @ Spring. 4 credits. Fee for film screening and maintenance, $35. For description, see Anthropology 291 and Theatre, Film and Dance 291. Graduate students who register in this course attend the meetings of 291. In addition, they write in-depth studies of one or more films in consultation with the instructor.

ARABIC AND ARAMAIC
See Department of Near Eastern Studies.

ARCHAEOLOGY
See "Special Programs and Interdisciplinary Studies."

ASIAN STUDIES

The Department of Asian Studies encompasses the geographical areas of East Asia, South Asia, and Southeast Asia and offers courses in most of the disciplines of the social sciences and the humanities. Asian studies courses through the 400 level (ASIAN is the prefix) are taught in English and are open to all students in the university. Some of these courses may be counted toward majors in other departments; others fulfill the humanities distribution requirement. Courses listed under Asian Studies offered through other departments may fulfill distribution requirements in history, social sciences, and arts.

The Major
The applicant for admission to the major in Asian studies must have completed at least one area studies course selected from among those listed under the Department of Asian Studies and must receive permission for admission to the major from the director of undergraduate studies. The student must have received a minimum grade of C in this course and in all other courses counted toward the major.

A student majoring in Asian studies is required to complete two courses at the 200 level (a minimum of 6 credits with a grade of C or better) in one of the Asian languages offered at Cornell. The major consists of at least 30 additional credits (which may include up to 6 credits of further language study) selected by the student in consultation with his or her adviser from among the courses listed under the Department of Asian Studies and numbered 250 and above. Majors in Asian studies normally specialize in the language and culture of one country and often choose an additional major in a traditional discipline.

Concentration in Southeast Asia Studies
A candidate for the Bachelor of Arts or Bachelor of Science degree at Cornell may take a concentration in Southeast Asia Studies by completing 18 credits of course work. A recommended plan would include Asian Studies 208 and four courses at the intermediate or advanced stage, two of which could be a Southeast Asian language. Additional courses may be added if offered with comparable South Asia content.

Concentration in Southeast Asia Studies
A candidate for the Bachelor of Arts or Bachelor of Science degree at Cornell may take a concentration in Southeast Asia studies by completing 18 credits of course work. A recommended plan would include Asian Studies 208 and four courses at the intermediate or advanced stage, two of which could be a Southeast Asian language. Students taking a concentration in Southeast Asia studies are considered members of the Cornell Abroad Program. For those students desiring to accelerate their acquisition of Chinese, Japanese, or Indonesian, Cornell offers a full-time intensive language program, Full-Year Asian Language Concentration (FALCON). FALCON students spend six hours a day, five days a week, for periods of up to a full year studying only the language and thus are able to complete as many as twelve hundred hours of supervised classroom and laboratory work in one year. For further information, students should contact the FALCON Program Office, Department of Modern Languages, 413 Morrill Hall (telephone: 607-255-0457, e-mail: FALCON@cornell.edu).

One South Asian graduate course may be taken for the concentration with consent of both the instructor and the adviser. The same applies for one South Asia-related course with a research paper on a South Asian subject. Additional courses may be added if offered with comparable South Asia content.

Intensive Language Program (FALCON)
For those students desiring to accelerate their acquisition of Chinese, Japanese, or Indonesian, Cornell offers a full-time intensive language program, the Full-Year Asian Language Concentration (FALCON). FALCON students spend six hours a day, five days a week, for periods of up to a full year studying only the language and thus are able to complete as many as twelve hundred hours of supervised classroom and laboratory work in one year. For further information, students should contact the FALCON Program Office, Department of Modern Languages, 413 Morrill Hall (telephone: 607-255-0457, e-mail: FALCON@cornell.edu).
Study Abroad

Cornell is a member of the Inter-University Center for Chinese Language Study in Taipei and a member of the Council on International Educational Exchange offering study in China at Peking University and Nanjing University. These centers offer intensive training in both spoken and written forms of the languages. The Kyoto Center for Japanese Studies (KCJS) is an undergraduate program for students who want to spend one or two semesters in Japan studying both language and culture. Cornell is a class-A member of the American Institute of Indian Studies, which offers fellowships in India for intensive language study in Hindi, Bengali, and Tamil. Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kathmandu, cosponsors an academic seminar or year in Nepal. North American students study and live with Nepalese students who come from outside the Kathmandu Valley to Tribhuvan University. Students may participate in one or two semesters. Courses are offered at the Cornell-Nepal Study Program House adjacent to the university. All courses are officially taught in English. A five-week, in-country orientation program includes classes in intensive Nepali conversation, cultural orientation programs, and a ten-day field trip and trek. Semester course offerings include Nepali language (Tibetan and/or Newari Languages also possible), contemporary issues in Nepalese studies, field research design and methods in sociology/anthropology and ecology/environment, and guided field research.

Juniors and seniors in good academic standing (3.0 GPA, or higher) from any major may participate. Students must have a desire to study on the other side of the world, to participate in a multicultural program, and to undertake rigorous field research. No experience in Nepali language and instruction is in English, but some prior Nepali language study is strongly recommended. Students interested in the study abroad in Nepal program should consult with Cornell Abroad (474 Uris Hall) for further information. Other opportunities include a junior year abroad at IKIP-Malang, in Indonesia, or at the School of Oriental and African Studies, University of London. Many other options for study in Asia exist, including in Indonesia, Thailand, and Vietnam through the Council for International Educational Exchange. Undergraduates should consult Cornell Abroad; graduate students should inquire at the East Asia Program, the South Asia Program, or the Southeast Asia Program Office.

General Education Courses

ASIAN 208 Introduction to Southeast Asia @

Spring. 3 credits. T. Chaloemtiarana.

This course is for anyone curious about the part of Asia with the most diversity; it defines Southeast Asia both as the nation-states that have emerged since 1945 (Brunei, Burma, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, and Vietnam) and as a larger cultural world extending from southern China to Madagascar and Polynesia. Students will have a serious, organized introduction to a variety of disciplinary and topical approaches to this region, including geography, linguistics, history, religion and ideology, anthropology, marriage and family systems, music, literary and literature, art and architecture, agriculture, industrialization and urbanization, politics and government, warfare and diplomacy, ecological and human degradation, business and marketing. The course aims to teach both basic information and different ways of interpreting that information.

ASIAN 211 Introduction to Japan @

Fall. 3 credits. B. de Bary.

An interdisciplinary introduction to Japanese society and its history especially designed for students not majoring in Asian Studies. The first part of the course focuses on the historical changes in Japanese society from the eighth century down to the nineteenth century; the second part analyzes modern society from a variety of perspectives. It also addresses the question of how Japan is presented in the U.S. mass media. Guest lecturers from five or six different fields offer their opinions on Japanese history, culture, and politics.

ASIAN 212 Introduction to China @

Spring. 3 credits (4 credits with a special project; consult instructor for information).

Staff.

An interdisciplinary introduction to Chinese culture especially designed for students not majoring in Asian Studies.

ASIAN 215 Introduction to South Asian Civilization @

Spring. 3 credits (4 credits with a special project; consult instructor for information).

Not offered 1997-98. C. Minkowski.

An interdisciplinary introduction to the culture and history shared by India and other states of South Asia. Designed for students not majoring in Asian Studies. Guest lecturers will provide the perspective of their disciplines to the general themes of the course: cultural diversity and the role of tradition in contemporary life.

ASIAN 218 Introduction to Korea @

Spring. 3 credits. Not offered 1997-98.

An interdisciplinary introduction to Korean history and culture, including language, literature, art, and music. The course begins with an overview of Korean history from the Three Kingdoms Period to the present. The course then focuses on major events in twentieth-century Korean history: the March 1, 1919, Independence Movement, the Korean War, the 1960 Student Revolution, the 1980 Kwangju Massacre, and others. Visiting lecturers will speak about Korea from a variety of disciplinary viewpoints, including linguistics, sociology, anthropology, political science, and law.

ASIAN 291 Classical Indian Narrative (also Classics 291) @

Spring. 3 credits. Not offered 1997-98.

D. Gold.

This course treats the development of tantric traditions in ancient India. Sources will include the Vedas, the Sanskrit epics, the Buddhist Jatakas, the Kathasaritsagara, the Panchatantra, and related collections. Attention will be given to comparisons with Greek narrative, and to the diffusion of Indian narratives into the world's literature.

ASIAN 301 Modern Korean Culture and Literature @

Fall. 4 credits. Offered alternate years. Not offered 1997-98.

Staff.

The course will explore the relationship between thematic and formal concerns of Japanese film and narratives of modern Japanese history dealing with such issues as the nature of the Meiji Restoration, the rise of Taisho commodity culture, the Pacific War, postwar reconstruction, postmodernity and "new nationalism." Weekly analyses of specific films will be accompanied by readings that provide historical context and pose relevant interpretive and theoretical questions, particularly those of gender and cultural difference. Study of works by Ozu, Mizoguchi, Kurosawa, and Naruse will constitute the introductory portions of the course, followed each year by a series featuring recent works of contemporary directors.

ASIAN 302 Tantric Traditions (also Classics 302) @

Spring. 3 credits. Not offered 1997-98.

J. Srivastava.

This course focuses on the major religious traditions of India, China, and Japan, focusing on Vedic ritual and Buddhist Tantrism; Indian, Chinese, and Japanese Buddhism; the major Chinese traditions of Confucianism and Taoism; and Shinto, Confucianism, and the new religions in Japan. Emphasis will be on the great traditions of these cultures, with frequent reference to the differing realms of popular religions.

ASIAN 303 Pre-Modern Indian Culture and Literature @

Fall. 4 credits. Not offered 1997-98.

C. Minkowski.

Readings in translation from the principal story collection of ancient India. Sources will include the Vedas, the Sanskrit epics, the Buddhist Jatakas, the Kathasaritsagara, the Panchatantra, and related collections. Attention will be given to comparisons with Greek narrative, and to the diffusion of Indian narratives into the world's literature.

ASIAN 310 Pre-Modern Korean Culture and Literature @

Fall. 4 credits. Not offered 1997-98.

B. Strauss.

A comparative study, the course will focus on the Korean War (1950-1953) and the Peloponnesian War (431-404 BC). It will examine the relationship between ideas of democracy and democratic government, and the conduct of war to advance or defend these. We will be reading and discussing Korean materials on the background and prosecution of the Korean War, American newspapers and historical records on U.S. involvement; and histories, debates, plays, and other contemporary works on the Athenian conduct of its war aginast Sparta.

ASIAN 311 Modern Korean Culture and Literature @

Spring. 4 credits. Not offered 1997-98.

C. Minkowski.

The course will explore the relationship between thematic and formal concerns of Japanese film and narratives of modern Japanese history dealing with such issues as the nature of the Meiji Restoration, the rise of Taisho commodity culture, the Pacific War, postwar reconstruction, postmodernity and "new nationalism." Weekly analyses of specific films will be accompanied by readings that provide historical context and pose relevant interpretive and theoretical questions, particularly those of gender and cultural difference. Study of works by Ozu, Mizoguchi, Kurosawa, and Naruse will constitute the introductory portions of the course, followed each year by a series featuring recent works of contemporary directors.

ASIAN 338 Democracy and War (also History 338)

Spring. 4 credits. Not offered 1997-98.

B. Strauss.

A comparative study, the course will focus on the Korean War (1950-1953) and the Peloponnesian War (431-404 BC). It will examine the relationship between ideas of democracy and democratic government, and the conduct of war to advance or defend these. We will be reading and discussing Korean materials on the background and prosecution of the Korean War, American newspapers and historical records on U.S. involvement; and histories, debates, plays, and other contemporary works on the Athenian conduct of its war against Sparta.

ASIAN 347 Tantric Traditions (also Religious Studies 347) @

Fall. 4 credits. Not offered 1997-98.

D. Gold.

This course treats the development of tantric traditions in the Indian subcontinent and beyond. Philosophical, socio-religious, cultural, and visionary dimensions of tantra will be discussed. We study different Hindu and Indo-Tibetan traditions, with some attention also paid to tantric developments in East Asian Buddhism.

ASIAN 351 The Religious Traditions of India (also Religious Studies 351) @
Spring. 4 credits. D. Gold.
A study of the relationships between the main currents of Indian religion. The course will focus on the Hindu tradition and its holistic worldview within the context of the caste system. It will then describe the rise of Jainism and Theravada and Mahayana Buddhism, as well as Hindu and Buddhist Tantrism, as religious phenomena reflecting the emergence of individualism.

ASIAN 354 Indian Buddhism (also Religious Studies 354) @
Fall. 4 credits. C. Minkowski.
A survey of Buddhist tradition in India from the life of the Buddha through the formation of the early schools, to the development of the Mahayana and the emergence of tantric Buddhism. Topics to be considered will include Buddhist concerns of human suffering and spiritual liberation, the nature of reality and human understanding, and the importance of compassion and emptiness. Attention will be paid to the institutional identity and social function of the Buddhist movements in classical India.

[ASIAN 355 Japanese Religions (also Religious Studies 355) @]
Fall. 4 credits. Not offered 1997-98.
J. M. Law.
This course is an exploration of major themes in Japanese religion through a focus on the category of religious practice. After an overview of the major sources of Japanese religion, we look at the dominant understandings of sacrality and the human soul. With the syncretic interaction between Shinto and Buddhism as our foundation, we will study four dynamic themes that express aspects of Japanese religious practice: 1) ritual purity and pollution, 2) the concept of matsuri (festival) and girei (rite), 3) the concept of shugyo (cultivation) as expressed in asceticism, pilgrimage, and aesthetic discipline, and 4) religious understandings of the human body, expressed in healing rituals.

[ASIAN 357 Chinese Religions (also Religious Studies 357) @]
Fall. 4 credits. Not offered 1997-98.

[ASIAN 359 Japanese Buddhism (also Religious Studies 359) @]
Spring. 4 credits. Not offered 1997-98.
J. M. Law.

ASIAN 360 Buddhist and Confucian Cultures of Asia
Spring. 4 credits. K. Taylor.
Combining two cultures that were contemporaries 2,500 years ago. Teachings attributed to them spread over large parts of Asia and were used to formulate expressions of cultural authority in many times and places. This course surveys historic themes in Buddhist and Confucian studies, such as Theravada and Mahayana, Pure Land, Zen, and other forms of Buddhist thought and practice, including interaction with and adaptation to local religions. Confucius and Mencius, Han eclecticism, Confucianism, Song Chu Hsi Confucianism, and dissenting or variant forms of Confucian thought. This course explores and compares specific examples of these themes in Japan, Korea, China, Vietnam, Thailand, and Burma.

This course is intended for Asian studies majors and other interested students. Premodern focus.

ASIAN 363 Contemporary Mass Culture in Japan and the U.S. (also Comparative Literature 343) @
Fall. 3-4 credits. B. de Bary.
A comparative study of Japanese and American mass cultures. Rather than seeking, through comparison, to delineate distinctive models of national cultures, the course will trace the complex relationships between cultural nationalist impulses and transnational economies, entertainers, processes of hybridity and fusion. The course will introduce students to a small number of important theoretical writings on mass culture. Areas of study will include the analysis of science fiction, comic books, film and video, popular music, and toy industries. Enrollment limited to 25 students.

ASIAN 371 Chinese Philosophical Literature @
Fall. 4 credits. T. L. Mei.
Readings in English translation of Confucian, Taoist, and Buddhist works.

ASIAN 373 Twentieth-Century Chinese Literature @
Fall. 4 credits. E. Gunn.
A survey of the principal works in English translation, the course introduces fiction, drama, essays, and poetry of China beginning with the Republican era and continuing up to the present in the People's Republic and Taiwan, with attention to social and political issues and literary theory.

[ASIAN 374 Chinese Narrative Literature @]
Spring. 4 credits. Not offered 1997-98.
E. Gunn.
Selected works in classical Chinese fiction are read in translation. Major novels, such as The Dream of the Red Chamber and Water Margin, are emphasized.

[ASIAN 375 Japanese Poetry and Poetic Prose @]
K. Brazell.

[ASIAN 376 Modern Japanese Literature: From Meiji through the Pacific War (also Comparative Literature 369) @]
Fall. 4 credits. Not offered 1997-98.
B. de Bary.

[ASIAN 377 Japanese Narrative Literature @]
Spring. 4 credits. Alternates with AS 375.
K. Sakai.
A study in English translation of major narratives from the eighteenth to the twentieth century. Subject matter will include novelistic narratives like The Tale of Genji, biographical stories, poems, tales, war tales, and popular stories.

[ASIAN 378 The Postwar and the American Form in Japanese Literature @]
B. de Bary.

[ASIAN 380/680 Vietnamese Literature in Translation @]
Spring. 4 credits. Not offered 1997-98.
K. Taylor.
A study of Vietnamese poetry, short stories, and novels available in English translation. The course will focus primarily upon texts from the last three centuries, with particular attention to contemporary literature.

[ASIAN 382 The Tale of Genji in Art and Theater @]
Spring 4 credits. Not offered 1997-98.
K. Brazell and M. Watanabe.
After a careful reading of the Tale of Genji and the 12th-century Genji Picture Scroll, the class will explore representations of the Genji in the noh theater and in a wide variety of art forms. Extensive use will be made of materials in the Johnson Art Museum.

ASIAN 383 Introduction to the Arts of China
See ART H 380 for description.

ASIAN 385/685 Vietnamese Cultural Studies @
Spring. 4 credits. K. Taylor.
Issues related to constructions of Vietnamese histories and cultures, including languages and literatures, the visual and performing arts, families and societies, religions and ideologies, politics and governments, traditions and modernities, revolutions and wars, localization and regionalism, nationalism, and globalization. This course will fulfill a humanities distribution requirement.

[ASIAN 390 Comparative Sanskrit Myth and Epic in Translation (also Classics 390) @]
Fall. 4 credits. Not offered 1997-98.
C. Minkowski.
Readings in translation from the two Sanskrit epics, the Mahabharata and the Ramayana, and from the main cycles of the Puranas, the Sanskrit mythological literature. Special attention will be given to parallels and comparisons with Greek myth and epic, especially Homer and Hesiod. Classics 236 or 238 would be useful as background, but not presupposed.

[ASIAN 393 Images of Humanity in Medieval China (also History 393) @]
Not offered 1997-98. C. Peterson.
For description, see HIST 393.

[ASIAN 395 Classical Indian Philosophical Systems (also Classics 395 and Religious Studies 395) @]
Fall. 4 credits. Prerequisite: some background in philosophy or in classical culture. Not offered 1997-98.
C. Minkowski.

ASIAN 410 Chinese Performing Arts @
Spring. 4 credits. E. Gunn.
The course will survey drama, music theater, and film in twentieth-century China. Some material will require knowledge of Chinese.

[ASIAN 421 Religious Reflections on the Human Body (also Religious Studies 421) @]
Spring. 4 credits. Not offered 1997-98.
J. M. Law.
One undeniable and inescapable fact of human life is that it is experienced in a body. How this fact is understood to define the parameters of religious experience and expression will be the focus of this course. While the format will be comparative, the majority of cases will be drawn from East Asian, primarily Japanese, sources. We will explore how such aspects of the human body as ecstasy, gender, sexual passion, illness, the
dialectic of the physical and the spiritual, and corporeal ascetic discipline reveal models of religious reflection on this fact of human experience. Further, we will study how these models become represented in visual art, narrative, and ritual practice.

[ASIAN 440 Meditation Schools of East Asian Buddhism (also Religious Studies 440)]
Spring. 4 credits. Prerequisite: ASIAN 250 or equivalent. Not offered 1997-98.
[ASIAN 441 Mahayana Buddhism (also Religious Studies 441)]
Spring. 4 credits. Not offered 1997-98.
J. M. Law.
By reading successive examples of Mahayana Buddhist literature, we will study the formation and evolution of the ideal of the bodhisattva, the understanding of transcendental wisdom and the concept of emptiness; and the workings of both the conscious and subconscious mind in the course of spiritual practice. We will include discussion of major philosophical schools, as well as issues of social setting and popular religious practice, in both India and East Asia.

[ASIAN 449 History and Methods of the Academic Study of Religion (also Religious Studies 449)]
Spring. 4 credits. D. Gold.
For description, see RELST 449.

[ASIAN 451/625 Children, Literature, and Society (also Anthropology 441/625)]
Spring. 4 credits. Not offered 1997-98.
S. Shiraishi.

[ASIAN 460 Indian Meditation Texts (also Religious Studies 460)]
Spring. 4 credits. Not offered 1997-98.
D. Gold.
Because texts that record visionary experience, prescribe the practice of contemplation, and present enigmatic utterances are highly valued in Indian tradition, they need to be taken seriously by students of Indian and world civilizations. Yet the special problems of interpretation that they present have often caused meditation texts to be passed over in enthusiasm, sometimes reverent silence. In this course we will draw on approaches from literary criticism, anthropology, and religious studies to explore a number of the problems to which these texts give rise. In what ways are the apparent differences in experience presented in meditation texts shaped by different cosmologies and ritual practice? Do different literary genres have particular religious implications? What are the relations between cognition and experience in the creation of the texts? Readings will be drawn from the Upanishads and Tantra, devotional verse in the vernaculars, and the classical meditation manuals of Hinduism and Buddhism. Some attention may be given to Indian Sufi materials. No knowledge of Indian languages is required.

[ASIAN 463 Readings in Hindi and Urdu Literature]
Fall. 4 credits. Not offered 1997-98.
D. Gold.
Selected topics in Hindi and Urdu literature, with readings in the original, discussions in Hindi-Urdu and English. May be repeated for additional credit with consent of instructor.

[ASIAN 464 Readings in Urdu Literature]
Spring. 2-4 credits. Not offered 1997-98.
D. Gold.
Selected topics in Urdu literature, with readings in the original; discussions in Urdu and English.

[ASIAN 470 The Japanese Noh Theater and Modern Dramatists (also Comparative Literature 470 and Theatre Arts 470)]
Several weeks will be spent studying the literary, performance, and aesthetic aspects of the noh theater. Emphasis will be on noh as a performance system, a total theater in which music, dance, text, costume, and props all interact to create the total effect. Then attention will turn to modern theater people who have reacted to noh in some creative way. Choice of dramatists will depend partly on student interests but will probably include Yeats, Brecht, Britten, Claudel, Grotowski, and Mishima. All readings may be done in English translation.

[ASIAN 471 Japanese Theatre (also Theatre Arts 471)]
Fall. 4 credits. Alternates with ASIAN 470.
K. Brazell.
A study of traditional forms of Japanese theatre. Topics will include ritual and theatre, noh and kyogen, kabuki, and the puppet theatres, and contemporary theatrical use of the traditional forms. Special emphasis will be placed on dramaturgy, acting styles, performance aesthetics, and theories of performer training.

[ASIAN 475 Modernization and the Korean Family (also HSS 490 sec 30)]
Fall. 3 credits. Not offered 1997-98. J. Mueller.

[ASIAN 481 Translation and Identities]
Fall. 4 credits. Not offered 1997-98.
N. Sakai.

[ASIAN 483 Internationalism, Nationalism, and Modern Japanese Discursive Space]
Fall. 3 credits. Not offered 1997-98.
N. Sakai.
The late 19th century marks an important transitional period; nation-states formed in Britain, France, Japan, Germany, the United States, and elsewhere sought to become imperial powers; and “internationalism” virtually collapsed. Focusing on Japanese examples but not excluding other cases, we will study the discursive spaces of modern national subjectivity with a view to the problems of ethnicity, colonialism, imperial sexism, violence, historical memory, post-coloniality and academic knowledge. A major critical paper will be required.

[ASIAN 496 Tokugawa Literature and Thought]
Spring. 4 credits. 1997-98. N. Sakai.
An introduction (in English translation) to literary, theatrical, and intellectual works of the Tokugawa period (1600-1868). We will examine the characteristics of early Tokugawa literary and theatrical works and see how different they are from the literary works of the later Tokugawa period. We will also read the philosophical and philological works on the classics by writers such as Oguy Sorai and Motoori Norinaga to understand the ways contemporary Japanese intellectuals understood cultural activities and literature during the Tokugawa period.

Asia—Graduate Seminars
For complete descriptions of courses numbered 600 and above, consult the director of graduate studies.

ASIAN 601 Seminar: Upland Peoples of Southeast Asia
Fall. 3-4 credits. H. Jonsson.

ASIAN 602 Southeast Asia Seminar: Topic TBA
Spring. 4 credits. Not offered 1997-98.
Staff.
See ASIAN 607.

ASIAN 605-606 Master of Arts Seminar in Asian Studies
605, fall; 606, spring. 2-4 credits. Staff.

ASIAN 607-608 The Plural Society Revisited (also Government 653)
Spring. 4 credits. 607 may be taken independently for credit; 607 is a prerequisite for 608. B. Anderson.
For description, see GOVT 653.

ASIAN 609 Modern Japanese Studies: The Formation of the Field in History and Literature (also History 609)
N. Sakai, J. V. Koschmann.
For description, see HIST 609.

ASIAN 611 Chinese Bibliography and Methodology
Spring. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. D. O’Rban.

ASIAN 612 Japanese Bibliography and Methodology
Fall. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. F. Kotas.

ASIAN 613 Southeast Asian Bibliography and Methodology
Fall. 1 credit. Prerequisite: permission of instructor. A. Riedy.
This course is designed to instruct students in methods of identifying and locating sources for the study of Southeast Asia. Emphasis will be on the practical aspects of using various types of bibliographical tools to identify both primary and secondary sources in Southeast Asian and Western languages. The use of electronic databases and online services as well as traditional printed resources will be covered. Sources which are more general in nature, but have a significant Southeast Asia component will be discussed. Relevant arcana of library science will be explained as necessary. Required of honors students and Master of Arts candidates. No foreign language competence is required but a reading knowledge of at least one Southeast Asian language or one South Asian language (especially Chinese or Japanese) and a major European language (especially French, Spanish, or Dutch) is highly desirable.

ASIAN 621-622 South Asia Seminar: Topic to be announced
621, fall; 622, spring. 4 credits. Not offered 1997-98.

ASIAN 623-624 Topics In South Asia
623, fall; 624, spring. 1 credit. Staff.
A series designed to introduce as well as enhance and build on students’ knowledge of various topics of importance to South Asia (Bangladesh, India, Nepal, Pakistan, and Sri
Lanka). Weekly lectures will survey contemporary themes in South Asian scholarship where visiting scholars and members of the Cornell community will discuss a multidisciplinary range of issues. These may include science and nation building; ritual power and resistance; tribal communities and the environment; industrial and agrarian relations; gender and the media; and economic liberalization. A short essay will be required at the end of the course.

**ASIAN 630 Seminar in Translation Studies**
Spring. 4 credits. K. Taylor.
A graduate seminar designed to introduce students to theoretical writings about, and related to, translation, conceived both as a linguistic exercise and as a broader field of cultural activity; will include the practice of translation. Limited to graduate students by permission of instructor; must have skill in Classical Chinese, French, or Vietnamese sufficient to begin translating.

**ASIAN 650 Graduate Seminar in Asian Religions**
Spring. 2-4 credits. Prerequisite: permission of instructor. Not offered 1997-98. J. M. Law.

**ASIAN 676 Southeast Asia Research Training Seminar**
Fall or spring. 3-4 credits. Staff.

**ASIAN 701-702 Seminar in East Asian Literature**
701, fall; 702, spring. 1-4 credits. Staff.

**ASIAN 703-704 Directed Research**
703, fall or spring; 704, fall or spring. 1-4 credits. Staff.

For additional courses on Asian religion, see “Related Courses” in the China and Japan area courses listing.

**Asia—Honors Courses**

**ASIAN 401 Asian Studies Honors Course**
Fall or spring. 4 credits. Intended for seniors who have been admitted to the honors program. Supervised reading and research on the problem selected for honors work.

**ASIAN 402 Asian Studies Honors: Senior Essay**
Fall or spring. 4 credits. Prerequisite: admission to the honors program. The student, under faculty direction, prepares an honors essay.

**ASIAN 403-404 Asian Studies Supervised Reading**
Fall, spring, or both. 1-4 credits. Prerequisite: permission of instructor. Open to majors and other qualified students. Intensive reading under the direction of a member of the staff.

**Literature in Chinese**

**CHLIT 213-214 Introduction to Classical Chinese**
213, fall; 214, spring. 3 credits each term. Prerequisite: qualification in Chinese or permission of instructor. May be taken concurrently with Chinese 101-102, 201-202, 301-302. T. L. Mei.

**CHLIT 420 T'ang and Sung Poetry**
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98. T. L. Mei.
Readings in the original Chinese, together with secondary works by Chinese and Western critics.

**CHLIT 421-422 Directed Study**
Fall or spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff.

**CHLIT 424 Readings in Literary Criticism**
Fall or spring. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98. T. L. Mei.

**CHLIT 435 Chinese Buddhist Texts**
Spring. 4 credits. Not offered 1997-98.

**CHLIT 603 Seminar in Chinese Fiction and Drama**
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98. E. Gunn.

**CHLIT 605 Seminar in Chinese Fiction and Drama**
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98. E. Gunn.

**CHLIT 610 Chinese Cultural Criticism**
Fall. 4 credits. E. Gunn.

**CHLIT 621-622 Advanced Directed Reading: Chinese Historical Syntax**
621, fall; 622, spring. 2-4 credits. Prerequisite: permission of instructor. Staff.

**Japanese Language**

See Language Courses.

---

**FALCON Program**

**Literature in Japanese**

**JPLIT 406 Introduction to Classical Japanese**
Spring. 4 credits. Prerequisite: permission of instructor. K. Brazell.

**JPLIT 407 Advanced Classical Japanese**
Spring. 4 credits. Prerequisite: JPLIT 406 or permission of instructor. Not offered 1997-98. K. Brazell.

**JPLIT 421-422 Directed Readings**
421, fall; 422, spring. 2-4 credits. Prerequisite: for JPLIT 421, Japanese 402 or equivalent; for JPLIT 422, Japanese 421 or equivalent. Staff. Note: For complete descriptions of courses numbered 600 or above, consult the appropriate instructor.

**JPLIT 611 Seminar in Classical Japanese Literature**
Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1997-98. K. Brazell.

**JPLIT 612 Seminar in Medieval Genres**
Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. K. Brazell.
This seminar will explore medieval literary genres in terms of the contemporary religious, social, political, and aesthetic discourses. Readings will be in classical and modern Japanese as well as in English.

**JPLIT 613 Seminar in Tokugawa Culture and Thought: Otherness, Text, and Body**
Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1997-98. N. Sakai.

**JPLIT 614 Seminar in Modern Japanese Literature**
Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1997-98. N. Sakai.

---

**Graduate-Level Reading Courses**

**JPLIT 621 Advanced Readings in Pre-Modern Japanese Narrative Literature**
Fall or spring. 2-4 credits. Prerequisite: permission of instructor. Not offered 1997-98. K. Brazell.

**JPLIT 622 Advanced Readings in Pre-Modern Japanese Poetry**
Fall or spring. 2-4 credits. Prerequisite: permission of instructor. Not offered 1997-98. K. Brazell.

**JPLIT 623 Advanced Readings in Pre-Modern Drama**
Fall or spring. 2-4 credits. Prerequisite: permission of instructor. Not offered 1997-98. K. Brazell.

**JPLIT 624 Advanced Readings in Modern Japanese Literature**
Fall and spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1997-98. B. de Bary.
Note: See courses listed under Asia—Literature and Religion courses—for Japanese literature courses in translation.

### Literature in Korean

**[KRLIT 405 Readings in Korean Literature](#)**  
Fall. 4 credits. Not offered 1997-98.

**[KRLIT 406 Korean Literature Translation Workshop](#)**  
Spring. 2-3 credits. Prerequisite: Korean 301-302 or equiv.; permission of instructor. Not offered 1997-98.

### Sanskrit

**SANSK 131–132 Elementary Sanskrit**  
(also Classics 131–132 and Linguistics 131–132)  
131, fall; 132, spring. 4 credits each term.  
An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.

**SANSK 251–252 Intermediate Sanskrit**  
(also Classics 251–252 and Linguistics 251–252)  
251, fall; 252, spring. 3 credits each term.  
Prerequisite: Sanskrit 132 or equivalent. A. Nussbaum, fall; C. Minkowski, spring.

Readings from the literature of classical Sanskrit. Fall: selections from the two Sanskrit epics, the Mahabharata and the Ramayana. Spring: more selections from the epics and selections from either Sanskrit story literature or from Sanskrit dramas.

### Literature in Sanskrit

**[SNLIT 467–468 Reading in Sanskrit Literature: The Vedas](#)**  
Spring. 3 credits. Prerequisite: permission of instructor. Not offered 1997-98. C. Minkowski.

### Related Courses in Other Departments and Colleges

Check the primary department section for the offering status of the following courses. Courses in other colleges will count as College offering status of the following courses. Check the primary department section for the and Colleges of Arts and Sciences credit only for Asian Courses in other colleges will count as College.

ASTRONOMY

Cornell's astronomy faculty, research staff, and graduate students are active in diverse areas of modern astronomy ranging from theoretical astrophysics and general relativity to radio and radar astronomy, infrared and optical astronomy, and the exploration of the solar system. Cornell operates two local optical observatories, the world's largest radio telescope at Arecibo, Puerto Rico, and with two other institutions, the 200-inch optical telescope at Mt. Palomar in California.

The department offers a number of courses to satisfy a general interest in astronomy. These courses have few or no prerequisites and are not intended for the training of professional astronomers. Among the introductory courses, several choices are available, depending on background and on the requirements to be fulfilled. The 100-level courses are designed primarily for non-science majors. The alternative introductory sequence Astronomy 211–212 is geared toward sophomores planning to concentrate in astronomy.

Special topics courses are also urged to acquire computer literacy.

Acceptance to the major is normally required:

Mathematics 412 and 422 (or equivalent, e.g. A&EP 321–2)

Astronomy 410, 431, and 432

Students interested in planetary studies may substitute one or more appropriate advanced courses upon consent of the major advisor or may pursue an independent major under the program in the Science of Earth Systems. In addition, majors are also encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level. Advanced seniors can enroll in astronomy graduate courses with the consent of the instructor. Students are also encouraged to work with faculty members on independent study projects under the course Astronomy 440 or to apply to a variety of programs at Cornell, Arecibo, and elsewhere that offer undergraduate research opportunities.

The major prepares the student for a variety of graduate programs.
Distribution Requirement

All courses in astronomy, except Astronomy 233, may be used to fulfill the science distribution requirement in the Colleges of Arts and Sciences.

Courses

ASTRO 101 The Nature of the Universe
Fall. 4 credits. No prerequisites. Labs and discussions limited to 30 students each. T. Herter, labs: G. Stacey.

The history of the universe and the physical nature of existence. An examination of the universe and our place in it and the possible existence of life and intelligence elsewhere in the cosmos. The nature of stars, galaxies, and quasi-stellar sources. The birth, evolution, and death of stars and the formation of the chemical elements, including discussions of supernovae, pulsars, neutron stars, and black holes. The physical state and composition of the interstellar material and its influence on the evolution of our galaxy. An introduction to the special and general theories of relativity. The nature of time. Modern theories of cosmology and the structure and evolution of the universe. The complete lecture notes are made available on the World Wide Web.

ASTRO 102 Our Solar System
Spring. 4 credits. No prerequisites. Labs and discussions limited to 30 students each. J. Veverka; labs: G. Stacey.

A survey of the current state and past evolution of our solar system, with emphasis on results from the direct exploration of planets by spacecraft. The course is divided into four parts: theories of formation, the inner planets, the outer solar system; and the search for life in the solar system and elsewhere. Stress is placed on the important processes that have shaped the evolution of planets and satellites.

ASTRO 103 The Nature of the Universe
Fall. 3 credits.

Identical to Astronomy 101 except for omission of the laboratory (see description above).

ASTRO 104 Our Solar System
Spring. 3 credits.

Identical to Astronomy 102 except for omission of the laboratory (see description above).

ASTRO 105 An Introduction to the Universe
Summer. 3 credits.

How do we measure the size of our galaxy and the size of the universe? Is the universe round or flat? How are the stars born, why do they shine, and how do they die? What are the chemical elements, and how were they formed in stars? What are quasars, pulsars, and black holes? How was the solar system formed? What are the environments of other planets like? What is the basic structure of Earth and the other planets? Will we catastrophically alter the earth? Does life exist elsewhere in the universe? How can we find it? Each student has an opportunity to make observations with small telescopes.

ASTRO 106 Essential Ideas in Relativity and Cosmology
Summer. 3 credits. Prerequisites: high school algebra and trigonometry. Einstein’s theory of special and general relativity, which brought about a fundamental change in our conceptual understanding of space and time, will be studied. Correspondence to, and conflicts with, common sense will be pointed out. Applications to various areas will be studied: in special relativity—space travel, equivalence of mass and energy, nuclear fission and fusion, and thermonuclear processes in the sun; in general relativity—motion of light and particles in curved space-time, cosmology in models, and the question of whether the universe is open or closed.

ASTRO 107 An Introduction to the Universe
Summer. 4 credits.

Identical to Astronomy 105 except for the addition of the afternoon laboratory.

ASTRO 195 Observational Astronomy
Fall. 3 credits. Limited to 20 students. G. Stacey.

This course provides a "hands-on" introduction to observational astronomy intended for students at the freshman and sophomore level in the liberal arts. The course has no prerequisites—its goal is to teach us what we know about the Universe. The course consists of 14 lectures, 10 to 12 formal laboratory exercises, plus one or two "take home" labs. Planned exercises include a few observational labs (star gazing with binoculars, telescopic investigations of star clusters, nebulae and the planets, and radio observations of the Milky Way Galaxy), computer simulations of planetary orbits, including the effects of orbits and obliquity on planetary weather, construction and use of simple instruments (optical spectroscopes, and sun dials), experiments in radioactive dating and planetary cratering, and cosmological explorations using data from the Hubble Space Telescope available on the World Wide Web.

ASTRO 201 Our Home in the Universe
Fall. 3 credits. Assumes no scientific background or preference given to freshmen and sophomores. D. Chervoff, Y. Terzian.

A general discussion of our relation to the physical universe and how our view of the universe has changed from ancient to modern times. Several main themes are covered over the course of semester: (1) our view of the night sky from the ancient Greeks to the Hubble Space Telescope, (2) the death of stars and the formation of black holes, (3) dark matter and the structure of galaxies, and (4) the origin, evolution, and fate of the universe. We present a nonmathematical introduction to these subjects and discuss uncertainties and unresolved issues in our understanding.

ASTRO 202 Our Home in the Solar System
Spring. 3 credits. Prerequisite: some background in science. Course intended for freshmen and sophomores. Staff.

A comparison of the Earth with the other worlds in our solar system, with an emphasis on the nature and fragility of planetary environments. Topics to be discussed include the climate and weather, species extinctions, the history of climate change, evolution of the atmosphere of the Earth and other planets, ecology and biological interdependence, and threats to the current global environment— including ozone layer depletion, greenhouse warming, and nuclear winter. Possible solutions to these problems, including their economic and social costs and their ethical implications, will be considered. The course will attempt to develop skills in writing and in elementary physics and chemistry.

ASTRO 211 Astronomy: Stars, Galaxies, and Cosmology
Fall. 4 credits. Intended for engineering and physical sciences freshmen and sophomores. Prerequisite: introductory calculus or coregistration in Mathematics 111 or 191. J. Houck.

The formation and evolution of normal stars, supernovae, pulsars, quasars, and black holes. The interstellar medium. Cosmology and the structure and evolution of galaxies.

ASTRO 212 The Solar System: Planets, Satellites, and Rings
Spring. 4 credits. Intended for first and second year engineering and physical sciences students. Prerequisite: introductory calculus or coregistration in Mathematics 111 or 191, some knowledge of classical physics (mechanics and thermodynamics). P. Gierasch.

Celestial mechanics; tidal evolution; the physics and chemistry of planetary surfaces, atmospheres, and satellites; planetary interiors; planetary rings; asteroids, comets, and meteorites; searches for other planetary systems.

ASTRO 223 Topics in Astronomy and Astrophysics
Fall. 2 credits. Prerequisites: Physics 112 and 213, Mathematics 112 and 221, or permission of instructor. Intended for sophomores planning to major in astronomy or related fields. S. Squyres.

A seminar course on selected topics in astronomy and astrophysics designed for prospective astronomy majors. Content will vary from year to year, but will include topics from the fields of planetary, galactic, and extragalactic research.

ASTRO 280 Space Exploration
Fall. 3 credits. S. Squyres.

This course provides an overview of space science, with particular emphasis on the solar system, and a detailed examination of a few selected objects, including the planet Mars, the satellites in the outer solar system, and comets. The focus is on methods of collecting information and especially on spacecraft and space missions. Topics will include the design and limitations of instruments. Ethical and political questions associated with space exploration will be discussed. Intended for students with an interest in science, technology, and associated policy issues. No special background in physical sciences, math, or engineering is assumed.

ASTRO 290 Relativity and Astrophysics
Spring. 4 credits. Prerequisites: freshman physics and calculus; knowledge of geometry. T. Wasserman.

This course provides a geometrically based introduction to special and general relativity, followed by consideration of astrophysical applications. Included will be discussion of tests of Einstein’s theory of space, time, and gravitation; physics of white dwarfs, neutron stars, and black holes; introduction to modern cosmology.
This course is divided into two broad topics; the level of transfer, and the interstellar medium. At the majors. Atomic and electromagnetic processes in space. Introduction to star formation, instrumentation and data analysis as applied to galaxies. The contents of the universe will be surveyed. Theories of cosmic and stellar evolution, and of the formation and evolution of planetary systems, planetary atmospheres and surfaces will be reviewed. Questions regarding the evolution of life and the development of technology will be discussed. Methods to detect extraterrestrial life with emphasis on radio telescopes and associated instrumentation will be presented. Hypothetical cosmic communication systems will be developed and discussed.

ASTRO 331 Climate Dynamics (also SCAS 331)

ASTRO 332 Elements of Astrophysics

ASTRO 400 Experimental Astronomy

ASTRO 431 Introduction to Astrophysics and Space Sciences I

ASTRO 432 Introduction to Astrophysics and Space Sciences II

ASTRO 434 The Evolution of Planets

ASTRO 440 Independent Study in Astronomy

ASTRO 485 Atmospheric and Interstellar Physics (also ELE E 485)

ASTRO 490 Senior Seminar Critical Thinking

ASTRO 509 General Relativity

ASTRO 510 Applications of General Relativity

ASTRO 511 Physics of Black Holes, White Dwarfs, and Neutron Stars (also Physics 525)

ASTRO 516 Galactic Structure and Stellar Dynamics

ASTRO 520 Radio Astronomy

ASTRO 523 Signal Processing and Data Analysis in Astronomy

ASTRO 525 Techniques of Optical/Infrared and Submillimeter Astronomy
ASTRO 530: Astrophysical Processes
- Topics: Fundamentals of radiative transfer, bremsstrahlung, synchrotron radiation, and Compton scattering; spectral line transfer, gas heating and cooling, and topics in atomic and molecular spectroscopy.

ASTRO 555: Theory of the Interstellar Medium
- Topics: Observations techniques, current problems and results.

ASTRO 560: Theory of Stellar Structure and Evolution (also Physics 667)
- Fall: 4 credits. Not offered 1997-98.
- Observational overview; hydrostatic equilibrium; equations of state; radiative and convective energy transport, nuclear burning, solar neutrinos, rotation and magnetic fields; stellar seismology; brown dwarfs; pre-main sequence contraction.

ASTRO 570: Physics of the Planets
- Fall: 4 credits. P. Nicholson.
- Topics: An introductory survey of planetary science with an emphasis on the application of physical principles. Planetary dynamics, including satellite orbits, tidal interactions, resonances, and ring dynamics. An introduction to the theory of planetary interiors, gravitational fields, heat sources, and rotational mechanics.

ASTRO 571: Mechanics of the Solar System (also Theoretical and Applied Mechanics 673)
- Spring: 3 credits. J. Burns.

ASTRO 575: Theory of the Interstellar Medium
- Spring: 4 credits. T. Herter.
- Topics: Fundamental radiative transfer, bremsstrahlung, synchrotron radiation, and Compton scattering. These topics will be discussed in a framework of astrophysical situations, such as star formation, interstellar gas and dust clouds, jets, active galactic nuclei, clusters of galaxies, and cosmology.

ASTRO 590: Galaxies and the Universe

ASTRO 599: Cosmology (also Physics 599)
- Spring: 4 credits. Prerequisites: statistical physics, quantum mechanics and electromagnetic theory. I. Wasserman.
- This course is intended to provide a detailed theoretical development of current ideas in cosmology. Topics will include observational overview, growth of irregularities, galaxy formation and clustering; big bang cosmology, recombination, nucleosynthesis; very early universe, symmetry breaking, inflationary scenarios. At the level of Peebles, *Principle of Physical Cosmology*.

ASTRO 620 Seminar: Advanced Radio Astronomy
- Spring: 2 credits. Prerequisites: some background in extragalactic astronomy and/or radio astronomy suggested. Open to advanced undergraduates by permission of instructor. Not offered 1997-98.

ASTRO 621 Seminar: Planetary Radar Astronomy
- Spring: 2 credits. Prerequisites: permission of instructor. Not offered 1997-98.

ASTRO 621: Seminar: Planetary Radar Astronomy
- Spring: 3 credits. Prerequisites: acceptable completion of undergraduate mathematics and physics sequences for physical science/engineering majors, or permission of instructor. Not offered 1997-98.

ASTRO 640 Advanced Study and Research
- Fall or spring. Credit to be arranged.

ASTRO 660 Cosmic Electrodynamics (also Applied and Engineering Physics 608)
- Spring: 2 credits. Not offered 1997-98.

ASTRO 671 Seminar: Planetary Science
- Fall: 3 credits. J. Veverka.
- An informal series of lectures discussing the techniques used to obtain and interpret spacecraft and earth-based remote sensing data to the planets and smaller bodies in the solar system. Intended for graduate students and seniors. The emphasis this year will be on the exploration of asteroids, including recent results obtained by the Galileo spacecraft and data expected from the NEAR spacecraft currently on its way to asteroid 433 Eros.

ASTRO 673 Seminar: Planetary Atmospheres
- Spring: 2 credits. Not offered 1997-98.

ASTRO 680 Seminar: Cosmic Rays and High-Energy Electromagnetic Radiation
- Spring: 2 credits. Not offered 1997-98.

ASTRO 681 Seminar: Computational Astrophysics (also Physics 680)
- Spring: 3 credits. Prerequisites: working knowledge of FORTRAN. C. S. Teukolsky.

ASTRO 689 Seminar: Problems in Theoretical Astrophysics (also Physics 665)
- Fall: 3 credits. Not offered 1997-98.

ASTRO 690 Seminar: Theoretical Astrophysics (also Physics 680)
- Spring: 2 credits. Prerequisites: permission of instructor. Not offered 1997-98.

ASTRO 695 Seminar: Advanced and Practical Numerical Recipes
- Fall: 2 credits. J. Flannery.
- Topics will include solving ordinary and partial differential equations, linear algebra and eigenvalue problems, Monte Carlo techniques, fast Fourier transforms, etc. In contrast to traditional numerical analysis courses, the flavor of the course will be "how-to," rather than theoretical. No theorems will be proved. Students will be allotted computer time to solve, both individually and in small teams, assigned numerical exercises. Text: *Numerical Recipes* by Press, Teukolsky, Vetterling, and Flannery.

ASTRO 699 Seminar: Problems in Theoretical Astrophysics (also Physics 665)
- Spring: 2 credits. Not offered 1997-98.

ASTRO 699 Seminar: Theoretical Astrophysics (also Physics 680)
- Spring: 2 credits. Not offered 1997-98.
- An informal seminar for advanced graduate students in astronomy or physics. Topics will include the Hubble space telescope results.
CHEMISTRY

The chemistry major at Cornell provides a great deal of flexibility and prepares students for a large variety of career options. In recent years, chemistry majors have gone on to graduate study in chemistry, medicine, law, and business management, as well as directly into positions with chemical, pharmaceutical, and other industrial companies. A major in chemistry can also provide the basis for work in related areas such as molecular biology, chemical physics, geochemistry, chemical engineering, materials science, solid state physics, and secondary education. The required courses for the major can be completed in three years, leaving the senior year open for advanced and independent work under the supervision of a professor.

The courses are arranged as a progression, with some (including mathematics and physics) prerequisite to those that are more advanced. During the first year, a student should normally register for general chemistry (preferably Chemistry 215–216 although Chemistry 207–208 is acceptable), mathematics, a freshman writing seminar, a foreign language if necessary, or physics. Chemistry 215–216 is aimed at those students with good preparation and a strong interest in chemistry. Students who do not know if their preparation is adequate should consult the instructor. In the second year a student should complete calculus and take physics and organic chemistry. Chemistry 359–360 is preferred to Chemistry 357–360. The second-year laboratory courses include 300, Quantitative Chemistry, if needed, and 301, Experimental Chemistry I. Chemistry 389–390, Physical Chemistry I and II, and Chemistry 302–303, Experimental Chemistry II and III, should be completed in the third year. Chemistry 410 should be completed in the third or fourth year. Advanced work in chemistry and related subjects can be pursued in the fourth year and in the earlier years as well. The opportunity for independent research is also available. All students with questions about the major are encouraged to consult the chair of the Department of Chemistry or the chair's representative. Entering students who are exceptionally well prepared in chemistry may receive advanced placement credit for Chemistry 207.

Prerequisites for admission to a major in chemistry are (1) Chemistry 215–216; or 207–208; 300; or 211–208, 300; or 105, 208, 300; (2) Physics 207 or 112; and (3) Mathematics 111 or 191. Students are encouraged to undertake a major in chemistry unless they have passed those prerequisite courses at a good level of proficiency. The minimum additional courses that must be completed for the standard major in chemistry are listed below.

1) Chemistry 301–302–303, 359–360 (357–358 may be substituted), 389–390, and 410
2) Mathematics 112, 213, or 122, 221–222, or 192–293–294
3) Physics 208

Potential majors electing to take Mathematics 213 are strongly urged to do so in their sophomore year to avoid scheduling conflicts with Chemistry 389 in their junior year.

The sequence described above is a basic program in chemistry that students can extend substantially in whatever direction suits their own needs and interests. Those going on to do graduate work in chemistry should recognize that these requirements are minimal and should supplement their programs, where possible, with further courses such as Chemistry 405, 605, 606, 666, 668, and 681. Even students not planning graduate work in chemistry should consider advanced work in physics and mathematics, courses in the biological sciences, and advanced work in chemistry as possible extensions of the basic program.

Honors. The honors program in chemistry offers superior students in the standard major an opportunity to study independently in seminars and to gain additional experience by engaging in research during the senior year. It is particularly recommended to those who plan graduate work in chemistry. Prospective candidates should complete the introductory organic chemistry and physical chemistry sequences by the end of the junior year, although failure to have completed those courses in the junior year does not in itself disqualify a student from the honors program. Completion of the program at a high level of performance leads to the degree of Bachelor of Arts with honors in chemistry. Students will be admitted to the program by invitation of the department, with selection based on a superior cumulative average, including chemistry grades, and good performance in a prior research program.

Prospective candidates should discuss their plans with advisers by March 1 of their junior year. Participants are notified by early January of their senior year. To be awarded honors, candidates must show outstanding performance in at least 8 credits of undergraduate research such as is offered in Chemistry 421, 433, 461, or 477. In addition, the taking of a thesis for honors seminar (Chemistry 498) is expected.

The Alternative Major

The alternative major is a flexible program that provides core coverage of chemistry around which students can design a program to meet their own career goals. Requirements consist of a core program along with four...
Students are required to pay for glassware and any other items broken or missing from their laboratory desks at the close of each semester. Students who fail to inventory their desks at the appointed time in the presence of their instructor are charged a $1.00 fee in addition to charges for any breakage.

**Courses**

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

Preliminary examinations for all courses may be given in the evening.

**CHEM 103 Introduction to General Chemistry**

Fall or summer. 4 credits. Enrollment limited. Recommended for students who have not had high school chemistry and for those needing a less intensive course than Chemistry 107. Lecs. M W F 11:15; lab, T R or F 8:00-11:00, or M W or F 1:25-4:25. Prelims: 7:30-9 p.m., Oct. 7, Nov. 13. D. Y. Sogah.

An introduction to general chemistry, with emphasis on important principles and facts. Chemistry 103 covers much of the same material as Chemistry 207 plus chemical equilibrium and introduction to chemical kinetics, but does so at a slower pace.

**CHEM 203 Strategies in Science: The World of Chemistry**

Spring. 3 credits. No prerequisite. This course plus Chemistry 103, 204, or 207 or 211 satisfies the College of Arts and Sciences physical science distribution requirement. Chemistry 203 also satisfies the C.A.L.S. physical science requirement of one course in chemistry. S-U or letter grades. Lecs. M W F 11:15. Prelims: 7:30-9 p.m., Feb. 24, March 31. F. J. DiSalvo.

A general appreciation of chemistry in the everyday world which will highlight for nonscientists the way the scientific method works. Using several case studies, the course will focus not only on what modern chemistry has accomplished, but more generally on the way scientists think, how they function, what they accomplish, and the way the scientific method works. Students who fail to inventory their desks at the appointed time in the presence of their instructor are charged a $1.00 fee in addition to charges for any breakage.

**CHEM 204 The Language of Chemistry**

Fall. 3 credits. This course contributes to meeting the College of Arts and Sciences "Physical and Biological Sciences" (Group D) distribution requirement, as well as the C.A.L.S. physical science requirement of one course in chemistry. S-U or letter grades. Lecs. M W F 12:20. Prelims: 12:20 p.m. Not offered 1997-98. J. Metzwald.

In his autobiography, A. Kornberg (Nobel Laureate in Medicine, 1959) wrote, "much of life can be understood in rational terms if expressed in the language of chemistry. It is an international language, a language for all time, a language that explains where we came from, what we are, and where the physical world will allow us to go." Through careful examination of a few recent discoveries that illustrate the nature of chemistry, the students will be shown to the beauty, the elegance, and the underappreciated vastness of the physical world.
CHEM 215-216 General and Inorganic Chemistry

CHEM 222 Molecular Messengers in Nature
Spring. 3 credits. Prerequisite: one year of high school chemistry, Chemistry 103 or 207, or permission of instructor. Not offered 1997-98.

Organisms communicate with one another in nature chiefly by means of chemical signals. We will examine this intriguing mode of communication as it applies to a wide variety of species ranging from bacteria to insects and mammals, including humans. Essential concepts of organic chemistry and biology will be introduced and illustrated. Each student will be expected to prepare a term paper, and there will be an opportunity for oral presentation of some of these papers for class discussion.

CHEM 225 Introduction to Experimental Organic Chemistry
Fall, spring, or summer. 2 credits. Recommended for non-chemistry majors. Enrollment limited. Prerequisites: coregistration in Chemistry 257 or 357. Lect: fall, R 11:15 or F 8:00; spring, F 8; lab, M T W R or F 1:25-4:25, or T or R 8-11. Prelims: 7:30-9 p.m., Fall; Nov. 6. Spring: April 7. Fall: S. Russo; Spring: S. Russo.

Introduction to the synthesis, separation, and handling of materials, including applications of many types of chromatography, simple and fractional distillation, crystallization, extraction, and others.

CHEM 252 Elementary Experimental Organic Chemistry
Spring or summer. 2 credits. Recommended for non-chemistry majors. Prerequisite: Chemistry 251. Lect, R 11:15; lab, M T W R or F 1:25-4:25, or T or R 8-11. Prelims: 7:30-9 p.m. April 7. S. Russo.

A continuation of Chemistry 251.

CHEM 257 Introduction to Organic and Biological Chemistry
Spring. 3 credits. Prerequisite: Chemistry 103 or 207. Because Chemistry 257 is only a three-credit course, it does not provide a practical route to satisfying medical school requirements. Lect: MWF 11:15. Prelims: 7:30-9:00 p.m., Feb. 26, April 9. D. A. Usher.

A continuation of Chemistry 251.

CHEM 258-259 Introductory Physical Chemistry Laboratory
258, fall; 259, spring. 3 credits each term. Prerequisites: Chemistry 208 or 216 and Mathematics 111-112, or permission of instructor. Prerequisite for Chemistry 259: Chemistry 258 or 258. Lects, MWF W 9:05; 258: rec, M or W 1:25, T 9:05; 258: rec, M or W 1:25. Prelims: 7:30-9 p.m., 287: Sept. 30, Nov. 6, Dec. 2. 287: March 5, April 16. Fall: H. D. Abrudia; spring: A. C. Albrecht.

A systematic treatment of the fundamental principles of physical chemistry, focusing in the fall on thermodynamics and the quantum mechanics of the periodic table and chemical bonding. In the spring the course will be oriented toward the physical chemistry of biological systems, including transport, kinetics, electrochemistry, spectroscopy. Chemistry 287 satisfies the minimum requirement for physical chemistry in the alternative chemistry major.

CHEM 289-290 Introductory Physical Chemistry Laboratory
289, fall; 290, spring. 2 credits each term. Lect: fall, R 8:00 a.m.; spring, R 9:05. Lab: fall, M T 1:25-4:25; spring, M T W R F 1:25-4:25. Fall: J. H. Freed; spring: T. McCarrick.

Qualitative and qualitative methods basic to the experimental study of physical chemistry.

CHEM 300 Quantitative Chemistry
Fall. 2 credits. Prerequisite: Chemistry 208 or advanced placement in chemistry. Lect, R 10:10; lab, M T W R F 1:25-4:25 or T 8-12. Prelim: 7:30-9 p.m., Oct. 23, Nov. 20. J. J. Rusco.

Volumetric, spectrophotometric, and potentiometric methods are emphasized. Techniques are learned by analysis of knowns, and then are used on unknowns. Lectures and problem sets stress the relationship between theory and applications.

CHEM 301 Experimental Chemistry I
Spring. 4 credits. Prerequisites: Chemistry 216 or 250, and 253 or 357 or 359. Lect, MWF 8:00; 2 labs, M 1:25-4:25 or T R 8-11 or T R 1:25-4:25. T. P. Begley.

An introduction to the techniques of synthetic organic chemistry. A representative selection of the most important classes of organic compounds will be explored in the laboratory. The theoretical basis for these reactions and the separation techniques used will be discussed in the lectures.

CHEM 302 Experimental Chemistry II
Fall. 4 credits. Enrollment limited; preference given to chemistry majors. Prerequisite: Chemistry 301. Lects, MWF W 9:05; 2 labs, M 1:25-4:25, T R 8-11 or T R 1:25-4:25. M. A. Hines.

Instrumental methods of analysis, including UV, IR and AA spectroscopies, gas chromatography, and electrochemical methods. The design of experiments is stressed.

CHEM 303 Experimental Chemistry III
Spring. 4 credits.Each lab limited to 11 students. Prerequisites: Chemistry 302, 389, 390; coregistration in the latter is permissible. Lects, M W F 9:05; 2 labs, M 1:25-4:25, or T R 9:00-12 or T R 1:25-4:25. M. Hines.

An introduction to experimental physical chemistry, including topics in calorimetry, spectroscopy and kinetics. The analysis and numerical simulation of experimental data is stressed.

CHEM 357-358 Organic Chemistry for the Life Sciences
357, fall or summer; 358, spring or summer. 3 credits each term. Prerequisite for Chemistry 357: Chemistry 208 or 216 or advanced placement; recommended: concurrent registration in Chemistry 251 or 300. Prerequisite for Chemistry 358: Chemistry 357 or permission of the instructor. Lects, M W F 9:05 or 10:10, optional rec may be offered. Prelims: 7:30-9 p.m., Sept. 23, Oct. 21, Nov. 18, Feb. 12, March 10, April 14. Fall: B. K. Carpenter; spring: J. C. Claridy.

A study of the more important classes of carbon compounds—especially those encountered in the biological sciences. Emphasis will be placed on their three-dimensional structures, mechanisms of their characteristic reactions, their synthesis in nature and the laboratory, methods of identifying them, and their role in modern science and technology.

Note: Because of duplication of material, students who take both Chemistry 257 and 357 will receive graduation credit only for Chemistry 257.

CHEM 359-360 Organic Chemistry I and II
359, fall; 360, spring. 4 credits each term. Recommended for students who intend to specialize in chemistry or closely related fields. Enrollment limited. Prerequisites: Chemistry 216 with a grade of B or better, Chemistry 208 with a grade of A or better, or permission of instructor. Prerequisite for Chemistry 360: Chemistry 359. Recommended: coregistration in Chemistry 300-301–302. Lects, MWF 9:05; dis sec, W 7:30 p.m. Sept. 24, Oct. 22, Nov. 12, Spring: 7:30-9:00 p.m., Feb. 25, April 8. Fall: D. A. Usher; spring, D. B. Collum.

A rigorous and systematic study of organic compounds, their structures, the mechanisms of their reactions, and the ways they are synthesized in nature and in the laboratory.

CHEM 389-390 Physical Chemistry I and II
389, fall; 390, spring. 4 credits each term. Prerequisites: Mathematics 213 or, ideally, 212-212; Physics 208; Chemistry 208 or 216 or permission of instructor. Prerequisite for Chemistry 390: Chemistry 389. Lects, 389: M W F 10:10; rec M or W 1:25 or T 9:05. Lects, 390: M W F 10:10; prelims: 7:30-9 p.m. Sept. 23, Nov. 20, Feb. 12, March 10, April 14, April 21. Fall: G. S. Ezra; spring: 390: R. Loring.

The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, kinetic theory, statistical mechanics, and quantum chemistry.
CHEM 391 Physical Chemistry II (also CHEM E 391)
Spring. 4 credits. Enrollment limited to engineering students only. Prerequisites: Mathematics 293; Physics 112, 213; Chemistry 208 or 216 or permission of instructor. Co-requisite: Math 294. Prerequisites for Chemistry 391. Chemistry 389. Lec 2 M W F 9:05; rec. M 9:00 or T 9:05; prelims: 7:30-9 p.m. Mar. 3, Apr. 7.
B. Anton.
The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, kinetic theory, statistical mechanics, and quantum chemistry.

[CHEM 405 Techniques of Modern Synthetic Chemistry]
Spring. 3 or 6 credits. Enrollment limited. Prerequisites: Chemistry 302 and permission of instructor. To receive three credits, students must perform a minimum of three two-week experiments. Six credits will be given for three additional experiments. Completion of five exercises in elementary glass-blowing will count as one experiment. Lab time required: 16 hours each week, including at least two 4-hour sessions in one section (M W 1:25). First meeting will be at 1:30 on first class day of semester.LEC. first week only, at times to be arranged. Not offered 1997–98. J. M. Burlich.

The syntheses of complex organic, organometallic, and inorganic molecules are carried out with emphasis on the following techniques: vacuum line, high pressure, high-temperature solid, inert atmosphere, nonaqueous solvents, radioactive labeling, sol-gel, photochemical and electrochemical methods, solid phase peptide synthesis, and polymer synthesis. [Elementary glassblowing.]

CHEM 410 Inorganic Chemistry
Fall. 4 credits. Prerequisites: Chemistry 255, 358 or 390, or 287 or 390. Lec, M W F 2:20–3:10 p.m. or MWF 1:15–2:05 p.m. or MWF 9:05–10:00 a.m. or rec. F 11:15–12:05 or T 9:05 or T 11:15 (Fall, Spring). R. C. Fay.

A systematic study of the synthesis, structure, bonding, reactivity and uses of inorganic molecular and solid state compounds.

CHEM 421 Introduction to Inorganic Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 303 and 390, or Chemistry 287–288, and Chemistry 269–290 with an average of B– or better, or permission of instructor. Selected faculty.

Research in inorganic chemistry involving both laboratory and library work, planned in consultaion with a faculty member.

CHEM 433 Introduction to Analytical Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 302 and 390 with an average of B– or better or permission of instructor. Selected faculty.

Research in analytical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 461 Introduction to Organic Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 302 and 358 or 360 with a grade of B– or better or permission of instructor. Selected faculty.

Research in organic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 477 Introduction to Physical Chemistry Research
Fall or spring. 2 credits. Prerequisite: Chemistry 390 with an average of B– or better or permission of instructor. Selected faculty.

Research in physical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 498 Honors Seminar
Spring. No credit. Admission to standard chemistry majors only by departmental invitation. Additional prerequisites or corequisites: outstanding performance in either (1) two coherent 4-credit units of research in a course such as Chemistry 421, 433, 461, or 477; or (2) one 4-credit unit in a course such as Chemistry 421, 433, 461, or 477 and summer research equivalent to at least 4 credits in the same subject W 2:30–4. R. Hoffmann.

Informal presentations and discussions of selected topics in which all students participate. Chemistry as a profession, chemistry in culture. Individual research is on advanced problems in chemistry or a related subject under the direction of a faculty member, culminating in a written report.

CHEM 600–601 General Chemistry Colloquium
Fall, Spring. 2–4 credits. No credit. Required of all graduate students except those majoring in organic or bioorganic chemistry. Juniors and seniors are encouraged to attend. R 11:15. Fall: J. H. Freed; spring: R. Hoffmann.

A series of talks representative of all fields of current research interest in chemistry other than organic chemistry, given by distinguished visitors and faculty members.

CHEM 602 Information Literacy for the Physical Scientist
Spring. 1 credit. Primarily for undergraduate chemistry majors doing research and first-year graduate students. Lec, W 4:45–6:00. P. O’Neill.

An introduction to physical science information research methods, including use of paper and electronic resources. With the continued information explosion, much time can be wasted and important information missed unless an efficient information research strategy is developed. This course demonstrates the use of library and information resources as a method to start and critically evaluate the success of research projects. Text: Journal Literature of the Physical Sciences by Alice Leffer Primack and Chemical Information Sources by Gary Wiggins.

CHEM 605 Advanced Inorganic Chemistry I: Symmetry, Structure, and Reactivity
Fall 4 credits. Prerequisite: Chemistry 389–390 or equivalent or permission of instructor. Lec, M W F 11:15. J. M. Burlich.

Selected topics in structure, bonding, and reactivity of inorganic compounds with emphasis on main group elements; at the level of Chemistry of Inorganic Elements by Greiner and Earnshaw. Group theory applications: hybrid orbitals, molecular orbitals, molecular vibrations, and ligand field theory; at the level of Cotton’s Chemical Applications of Group Theory.

CHEM 606 Advanced Inorganic Chemistry II: Synthesis, Structure, and Reactivity of Inorganic and Organotransition Metal Compounds
Fall. 4 credits. Lecs, M W F 10:10. P. T. Wołczanski.

Synthesis, structure, and reactivity of coordination compounds and organometallic complexes. Emphasis on bonding models, structure, and reactivity, including the elucidation of mechanisms. Readings at the level of Purcell and Koza’s Inorganic Chemistry, and Collman, Hegedus, Finke, and Norton’s Principles and Applications of Organotransition Metal Chemistry.

CHEM 607 Advanced Inorganic Chemistry III: Solid-State Chemistry
Spring. 4 credits. Prerequisite: Chemistry 605 or permission of instructor. Lecs, M W F 11:15. Not offered 1997–98. F. J. DeSalvo.

CHEM 622 Chemical Communication
Fall. 3 credits. Not offered 1997–98. J. Meinwald.

For description, see BION 623.

CHEM 625 Advanced Analytical Chemistry I
Fall. 4 credits. Prerequisite: Chemistry 288 or 390 or equivalent. Lecs, M W F 9:05; occasional prelims W 7:30 p.m. C. F. Wilcox.

The application of molecular spectroscopy to chemical problems. Topics in infrared, NMR, and mass spectroscopy are discussed.

CHEM 627 Advanced Analytical Chemistry II
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 390 or equivalent; but Chemistry 793 or equivalent would be helpful. Lecs, M W F 12:20. D. B. Zax.

Modern techniques in nuclear magnetic resonance. Little overlap is expected with Chem 625, as this course will focus on more general questions of experimental design, understanding of multipulse experiments, and aspects of coherent averaging theory. Example to be taken from both liquid and solid-state NMR. May also be of interest to other coherent spectroscopies.

CHEM 628 Trace Element and Isotopic Analysis (also Nutritional Sciences 690)
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 288 or 390, or Chemistry 208 and Mathematics 112, or permission of instructor. Offered alternate years. Lecs, T R 10:10. J. T. Brenna.

Modern trace, micro, and surface methods of analysis, including atomic spectrometry, solids mass spectrometry, high precision isotope ratio techniques, microscopic, microprobe, and electron spectroscopy. Applications to biological and solid state problems.
The first part of the course deals with general concepts and techniques for the elucidation of enzyme reactions will be examined from a mechanistic perspective. Topics discussed will include the important classes of enzyme-catalyzed reactions; statistical mechanics of helix-coil transition in biopolymers; conformation of biopolymers; protein folding. Modern concepts in synthetic polymer chemistry. The application of organic synthetic methods to the development of new polymers and copolymers and the control of their architecture. Topics include main and step growth polymerizations, reactions of polymers, block and graft copolymers, dendrimers and star polymers. A broad spectrum of applications from recent literature will also be discussed.

CHEM 672 Protein Kinetics
Fall. 4 credits. Primarily for graduate students in Chemistry and Biochemistry. Prerequisite: Chemistry 390, Biological Sciences 331, or equivalents or permission of instructor. Lecs, M W F 10:10.

Focus is on protein interactions with ligands and consequence changes in structure and activity. Topics include: protein structure and dynamics, thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; role of membrane receptors in regulating cellular activities.

[CHEM 677 Chemistry of Nucleic Acids
Spring. 4 credits. Primarily for graduate students. Prerequisites: Chemistry 358 or 360, and 390 or equivalents. S-U grades. Letter grades for undergraduates. Offered alternate years. Not offered 1997-98. Chemical constitution, molecular weight, and structural basis of proteins, thermodynamic, hydrodynamic, optical, spectroscopic, and electrical properties; protein and enzyme reactions; statistical mechanics of helix-coil transition in biopolymers; conformation of biopolymers; protein folding.]

CHEM 700 Baker Lectures
Fall, on dates to be announced. No credit. Distincted scientists who have made significant contributions to chemistry present lectures for periods varying from a few weeks to a full term. This year's lecturer: Prof. Michael E. Fisher, University Maryland.

[CHEM 701-702 Introductory Graduate Seminar in Analytical, Inorganic, and Physical Chemistry
Fall. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 288 or 390 equivalents. MWF 10:10. D. Y. Soga.

The purpose of this course is to build a qualitative picture of the bonding in all molecules, including organic, inorganic, organometallic systems and extended structures (polymers, surfaces and threedimensional materials). The approach uses molecular orbital theory to shape a language of orbital interactions. Most quantum mechanic ideas needed will be taught along the way; the course is specifically directed at organic, inorganic, and polymer chemists who are not theoreticians.]

[CHEM 745 Physical Polymer Science I (also Chemical Engineering 745)
[CHEM 762] Special Topics in Organic Chemistry: Fundamentals of Polymer Chemistry
Fall. 4 credits. Prerequisite: Physical Chem 389/390 and Organic Chem 359/360 or equivalent or permission of instructor. Primarily for graduate and advanced undergraduate students. Lects, T R 8:30-10:00. Not offered 1997-98. Introduction to polymer physical chemistry. Kinetics and mechanisms of Polymerization methods: ionic, radical, step-growth and group transfer polymerization. Polymer Stereoregular, Solution properties: Molecular weight characterization and polymer solubility. Mechanical and Thermal Properties. Structure-Property Relations. The discussions will focus on chemistry rather than engineering of polymers and examples will be taken from current literature.

[CHEM 765] Physical Organic Chemistry I
Spring. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 665 or permission of instructor. Lects, M W F 10:10. C. F. Wilcox.

Application of computational and experimental techniques to studies of organic reaction mechanisms and the properties of reactive intermediates.

[CHEM 766] Physical Organic Chemistry II
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 765 or permission of instructor. Not offered 1997-98.

[CHEM 774] Chemistry of Natural Products

Particular attention is devoted to methods of structure determination and synthesis as applied to selected terpenes, steroids, alkaloids, and antibiotics.

[CHEM 780] Principles of Chemical Kinetics
Fall. 4 credits. Prerequisite: Chemistry 681 or permission of instructor. Lects, T R 10-11:35. H. F. Davis.

Principles and theories of chemical kinetics; special topics such as surface reactions, photochemistry, enzymatic reactions, energy transfer, and molecular beams.

[CHEM 782] Special Topics in Biophysical and Bioorganic Chemistry
Spring. 3 credits. Lects, T R 11:15. Not offered 1997-98. Topics vary from year to year.

[CHEM 788] Macromolecular Crystallography (also BIOBM 738)

Lectures briefly cover the fundamentals of crystallography and focus on methods for determining the 3-dimensional structures of macromolecules. These include crystallization, data collection, multiple isomorphous replacement, molecular replacement, model building, refinement, and structure interpretation.

[CHEM 789] X-ray Crystallography
Spring. 4 credits. Prerequisite: Chemistry 288 or 390 or permission of instructor. Offered alternate years. Lects, M W F 10:10. Not offered 1997-98. J. Clardy.

A beginning course in the applications of X-ray crystallography to chemistry. Topics include symmetry properties of crystals, diffraction of X-rays by crystals, interpretation of diffraction data, and refinement of structures. The chemical information available from a diffraction experiment is stressed, and practical aspects are incorporated.

[CHEM 791] Spectroscopy
Fall. 4 credits. Prerequisite: Chemistry 793 or Physics 443 or equivalent. Lects, T R 8:40-9:55. A. C. Albrecht.

This course will explore the interaction of light with matter. We will start with the quantum mechanical foundations of spectroscopy and develop its statistical basis in the density matrix language. Emphasis will be on the many electric-field-based linear and nonlinear spectroscopies from vibrational to electronic.

[CHEM 792] Molecular Collision Theory

The concepts and methods of scattering theory are described with particular emphasis on applications to problems of chemical interest. At the level of Child's Molecular Collision Theory and Taylor's Scattering Theory.

[CHEM 793] Quantum Mechanics I
Fall. 4 credits. Prerequisites: Chemistry 390, coregistration in ACC 321 or equivalents or permission of instructor. Lects, M W F 11:15. R. Loring.

Schrödinger's equation, wave packets, uncertainty principle, WKB theory, matrix mechanics, orbital and spin angular momentum, exclusion principle, perturbation theory, variational principle. At the level of Cohen-Tannoudji's Quantum Mechanics.

[CHEM 794] Quantum Mechanics II
Spring. 4 credits. Prerequisites: Chemistry 793 or equivalent and the equivalent of Mathematics 422 or Physics 443, or the equivalent of Mathematics 422, or permission of instructor. Lects, M T W F 9:05. G. S. Ezra.

[CHEM 796] Statistical Mechanics
Spring. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 678 and 793 or equivalent. Lects, T R 8:30-9:55. B. Widom.

Statistical mechanics of systems of interacting molecules. Structure and thermodynamics of classical liquids. Phase transitions and critical phenomena. Inhomogeneous fluids. Introduction to non-equilibrium statistical mechanics. Students are presumed to have taken a course in statistical thermodynamics at the level of the first twelve chapters of Statistical Mechanics, by McQuarrie.

[CHEM 798] Special Topics in Physical Chemistry
Spring. 4 credits. Prerequisite: Chemistry 605, or 681, or 793, or Physics 443, or the equivalent. Lects, T R 10-11:25. Not offered 1997-98. R. Hoffmann.

FALCON Program (Chinese)
J. Wheatley, 416 Morrill Hall, 255-9301.

CLASSICS
J. Rusten (chair). L. S. Abel, F. M. Ahl, C. Brittain, K. Clinton, J. E. Coleman, J. R. Ginsburg, E. Hohenadl, G. Holst-Warhaft, G. M. Kirkwood (emeritus), H. Kolias, M. Landon, D. Mankin (director of graduate studies), G. M. Mesier (emeritus), C. Minkowski, A. Nussbaum, H. Pelliccia (director of graduate studies), P. Pucci, H. R. Rawlings III, J. Reed, D. M. Shanz (acting chair, 1997-98). Cornell University has long recognized the importance of studying the civilizations of ancient Greece and Rome. Particularly in an age of increasing specialization, study of the Classics is widely viewed as an excellent means of acquiring a liberal education; at Cornell, we are deeply interested in the continuing humanistic values contained in the literature of the ancient world and in gaining a fuller understanding of these important cultures and their imprint upon subsequent ages.

The Department of Classics at Cornell is one of the oldest and largest in the country. With nineteen faculty members, together with professors of related interests in the departments of History, Philosophy, Comparative Literature, History of Art, Modern Languages and Linguistics, and Near Eastern Studies and in the Archaeology, Medieval Studies, and Religious Studies programs, the range of instruction available is very large, including not only the traditional study of language, literature, and ancient history, but also newer developments in the field, such as comparative study of Mediterranean civilizations and modern literary theory.

Although Classics, like other areas of humanistic study, does not aim at providing specific preprofessional training, over the years Classics majors from Cornell have gone on to a wide variety of careers: in law, teaching, medicine, diplomacy, management, educational administration, government, and many others.

The department offers courses in Bronze Age and Classical archaeology and is active in field projects in Classical lands. It sponsors archaeological excavations at Halai in Greece, which serves as a field laboratory for Cornell undergraduate and graduate students. On campus there are also collections of ancient artifacts, reproductions of ancient sculpture, and one of the few laboratories in the world to concentrate on the tree-ring dating of ancient monuments from Greece, Cyprus, and Turkey. The archaeology courses may be used to satisfy some of the require-
ments for the Intercollegiate Program in Archaeology or for the major in Classical Civilization. They require no knowledge of either Greek or Latin. Similarly, the department offers a variety of courses and seminars in English on such subjects as Greek mythology, Greek and Roman mystery religions, early Christianity, and Greek and Roman society, as well as ancient epic, tragedy, history, and philosophy. For those whose interest in things Greek and Roman extends no further than a desire to understand the English language a little better, the department offers one course in the Greek and Latin elements that make up a huge proportion of the vocabulary of Modern English, and another that deals more specifically with the Greek and Latin ingredients of bioscientific vocabulary. Programs in Greek and Latin at the elementary level are also offered, of course; and for the more ambitious there are courses involving reading, in the original, of Greek and Latin authors from Homer to St. Augustine and Bede and, periodically, the Latin works of Dante, Petrarch, and Milton. Sanskrit, the classical language of ancient India, is also offered, along with courses in translation on Indic religion, myth, and literature. The department makes every attempt to adapt its program to the needs of each student. If there is a Classical writer you would like to study, the department will do its best to help you do so whether you are a major in the department or not.

Majors

The Department of Classics offers majors in Classics, Greek, Latin, and Classical Civilization.

Classics

Those who major in Classics must complete 24 credits in advanced Greek or Latin (numbered 201 or above) and 15 credits in related subjects selected in consultation with the adviser.

Classical Civilization

Those who major in Classical Civilization must complete (a) qualification in Latin and Greek or proficiency in either; (b) 24 credits selected from the courses listed under Classical civilization, Classical archaeology, Latin, and Greek; and (c) 15 credits in related subjects selected in consultation with the adviser.

Greek

Those who major in Greek must complete 24 credits of advanced courses in Greek and 15 credits in related subjects (including Latin).

Latin

Requirements for the major in Latin parallel those of the major in Greek.

Honors

Candidates for the degree of Bachelor of Arts with honors in Classics, Greek, Latin, or Classical civilization must fulfill the requirements of the appropriate major study as given above and must also successfully complete the special honors courses 370, 471, and 472. Credit for honors courses may be included in the credits required for the major study. Students who wish to become candidates for honors, who have a cumulative average of B+ or better, and who have demonstrated superior performance in Classical courses (Greek, Latin, and Classical Civilization), submit an outline of their proposed honors work to the honors committee during the first month of their fifth semester. The chair will appoint a committee of three faculty members for each candidate, and the committee will be responsible for evaluating the candidate’s proposal and subsequently supervising his or her work. At the completion of the honors thesis, which must demonstrate knowledge of the main bibliographical sources, give promise of scholarly talent, and show creativity, the committee will determine the level of honors to be awarded.

Study Abroad

Cornell participates in the Intercollegiate Center for Classical Studies in Rome, which offers courses in Latin, Greek, ancient history, art, archaeology, and Italian. Another opportunity for a semester’s study abroad is available through Cornell Abroad in Greece at the Athens Centre. (Contact Cornell Abroad for details.) In addition, Cornell is a member institution of the American School of Classical Studies at Athens, whose Summer Program is open to graduate students and qualified undergraduates. The American Academy in Rome, of which Cornell is also a member institution, offers full-year and summer programs for qualified graduate students. For graduate students the Department of Classics offers a few travel grants each year from the Townsend Memorial Fund. Detailed information on these programs is available in the Department of Classics Office, 120 Goldwin Smith Hall.

Summer Support for Language Study

The Beatrice R. Kanders Memorial Scholarship (for the summer immediately following the freshman or sophomore year; preference given to dyslexic students) and a certain amount of tuition aid made possible by gifts from the Constantinos C. Polychronis Foundation are normally available to students who want to enroll in Intensive Latin or Greek in the Cornell summer session. These courses are designed to enable students to enter second-year Latin or Greek the following fall. Preference is given to Classics undergraduate majors, and other students needing Latin or Greek for completion of their majors. Applications are due to the chair of the Department of Classics by March 27.

Placement in Latin, Ancient Greek, and Modern Greek

Placement of first-year students in Latin, ancient Greek, and modern Greek courses is determined by an examination given by the Department of Classics during orientation week or by arrangement with the director of undergraduate studies.

Freshman Writing Seminars

The department offers freshman writing seminars on a variety of topics. Consult John S. Knight Writing Seminar Program brochures for times, instructors, and descriptions.

Classical Civilization

CLASS 100 Word Power: Greek and Latin Elements in the English Language

Spring. 3 credits. I. Hohendahl.

This course gives the student with no knowledge of the Classical languages an understanding of how the Greek and Latin elements that make up over half our English vocabulary operate in both literary and scientific English usage. Attention is paid to how words acquire their meaning and to enlarging each student’s working knowledge of vocabulary and grammar.

CLASS 102 Bioscientific Terminology

Summer. 3 credits. H. Roisman.

A study of the Greek and Latin word elements that combine to form most of the specialized terms in the biological sciences. The student who learns the meanings of those elements and the rules of word formation usually can recognize the basic meaning of any unfamiliar word in that field. The class also gives attention to misformations and words still in use that reflect outdated scientific theories.

CLASS 211 The Greek Experience #

Fall. 3 credits. Limited to 50 students. F. Ahl.

An introduction to the literature and thought of ancient Greece. Topics will include epic and lyric poetry, tragedy and comedy, and historical, political, philosophical, and scientific writings. Some attention will also be given to the daily life of ordinary citizens, supplemented by slides of ancient art and architecture.

CLASS 212 The Roman Experience #

Fall. 4 credits. Limited to 18 students. D. Mankin.

An introduction to the civilization of the Romans as expressed in their literature, religion, and social and political institutions.

CLASS 217 Initiation to Greek Culture #

Fall. 4 credits. Limited to 18 students. D. Mankin.

This course is intended especially for freshmen (a few exceptionally motivated sophomores or upperclassmen may be accepted). Apply in writing to the chair, Department of Classics, 120 Goldwin Smith Hall. P. Pucci and J. Reed.

Knowledge of Greek or Latin is not necessary, since all texts are in translation. What is necessary is the willingness to participate in three one-hour seminars each week and also a supplementary one-hour (occasionally two-hour) session, during which the class will participate in workshops with specially invited guests.

This course will examine the development in Greek thought from mythological to philosophical explanations of the world and man’s place in it. Readings will include Homer, Aeschylus, Sophocles, Euripides, the pre-Socratics, Plato, and Aristotle, as well as works by such seminal modern thinkers as Hegel, Nietzsche, Heidegger, and Derrida.

CLASS 223 The Comic Theater (also Comparative Literature 223 and Theatre Arts 223)

Next offered summer of 1998 and spring 1999. 3 credits. J. Rusten.

The origins of comic drama in ancient Greece and Rome, and its subsequent incarnations especially in the Italian renaissance (Commedia erudita and Commedia dell’arte).
Elizabethan England, seventeenth-century France, the English Restoration, and Hollywood in the thirties and forties. Chief topics will include: the growth of the comic theatrical tradition and conventions; techniques and theories of mimicry (farce, caricature); and the role of comedy in society. All readings in English.

CLASS 231 Ancient Philosophy (also Philosophy 211)
Fall. 4 credits. C. Britain.
For description, see PHIL 211.

CLASS 236 Greek Mythology (also Comparative Literature 236)
Fall 1997 and summer 1998. 3 credits.
Limited to 200 students. D. Martin.
A survey of the Greek myths, with emphasis on the content and significance of the myths in Mediterranean society, including the place of myth in Greek life and consciousness; the factors and influences involved in the creation of myths; and for our understanding of Greek literature, religion, and moral and political concepts.

CLASS 237 Greek Religion and Mystery Cults (also Religious Studies 237)
Greek religion constituted one of the essential features of ancient Greek civilization and distinguished it from later Western civilization. Since religion permeates Greek culture, including the major art forms (epic poetry, tragedy, comedy, architecture, painting, and sculpture), the course will investigate the interaction of religion with these forms—an investigation that is fruitful both for the understanding of Greek religion and the forms themselves, some of which, like tragedy, originated in cult. A representative variety of cults and their history will be studied with special emphasis on mystery cults, such as the Eleusinian mysteries of Demeter and Persophone, the Kabirai, the Great Gods of Samothrace, and Bacchic rites.

CLASS 238 The Ancient Epic and Woman
We will move, Odysseus-like, to the West: beginning with Homer’s Iliad (and including the British poet Christopher Logue’s “account” of the opening books) and Odyssey, we will continue in the Hellenistic and Augustan eras with Apollonius of Rhodes’ Argonautica and Virgil’s Aeneid. A violent shift in space and time will have us conclude with two New World maritime epics: Herman Melville’s Moby Dick and Derek Walcott’s Omeros.

CLASS 291 Classical Indian Narrative (also Asian Studies 291)
For description, see ASIAN 291.

CLASS 323 Greek and Roman Mystery Cults and Early Christianity (also Religious Studies 323)
A study of the controversial question of religious continuity between paganism and early Christianity. After a brief survey of Classical mystery cults and Hellenistic religion, the course will focus on such Hellenistic cults as the mystery cults of Isis, Bacchus, and Attis and the Great Mother and on the distinctive features that contributed to their success. Discussion of Christian liturgy and beliefs both in the East and the West to determine what Christianity contributed to its pagan predecessors and to isolate the factors that contributed to its triumph over the “rival” pagan cults of late antiquity.

CLASS 345 The Tragic Theater (also Comparative Literature 344 and Theatre Arts 345)
Spring. 4 credits. Limited to 40 students. F. Ahl.
Tragedy and its audiences from ancient Greece to modern theater and film. Topics: origins of theatrical conventions; Shakespeare and Seneca; tragedy in modern theater and film. Works studied will include: Aeschylus’ Agamemnon, Sophocles’ Oedipus Tyrannus, Philoctetes; Euripides’ Alcestis, Helen, Iphigenia in Aulis, Orestes; Seneca’s Thyestes, Trojan Women; Shakespeare’s Julius Caesar, Titus Andronicus, Othello, Strindberg’s The Father, Dürrenmatt’s The Visit, Bergman’s Seventh Seal, Cacoyannis’ Iphigenia.

CLASS 363 Representations of Women in Ancient Greece and Rome (also History 367 and Women’s Studies 363)
Spring. 4 credits. L. S. Abel and J. Ginsburg.
The task of this course is to analyze ancient Greek and Roman representations of women—some famous, some infamous, some nameless—within their historical and cultural contexts and to understand those underlying these representations. Using literary, historical, legal, and artistic sources (in translation) and examining the historiographical and methodological problems of the support of such evidence, the class will assess the changing social conditions that relate to the roles, status, and images of women in antiquity. Among the topics considered are: myth and ideology, women’s role in the family and society, views of the female body and female sexuality, the place of women in creative art.

CLASS 382 Greeks, Romans, and Victorians (also Comparative Literature 382)
Modern popular and scholarly views of Greek and Latin literature were shaped in the Victorian years of the nineteenth century, between the years of Republican and Marxist revolution. This course explores some of the ways in which nineteenth-century social and intellectual upheavals, and changes in scholarly techniques and approaches, may have affected how English and Irish writers presented Greco-Roman antiquity and, especially, how they began to discard an idealized past based on a Roman model for one based on a Greek model. The focus will be on poets and dramatists (and a few novelists and novelists rather than on philosophers and scientists). The varied influences of Vergil and Homer, Seneca and Sophocles, Plautus and Aristophanes, Horace, and Greek lyric poetry will be discussed in selected works of writers such as Tennyson, Shelley, Byron, Swinburne, Arnold, Tennyson, W. S. Gilbert, Oscar Wilde, Samuel Butler, and others, including important artists such as Aubrey Beardsley.

CLASS 390 Comparative Sanskrit Myth and Epic (also Asian Studies 390)
Fall. 4 credits. Not offered 1997–98. C. Minkowski.
For description, see ASIAN 390.

CLASS 395 Classical Indian Philosophical Systems (also Asian Studies 395 and Religious Studies 395)
4 credits. Prerequisite: some background in philosophy or classical Indian culture. Not offered 1997–98. C. Minkowski.
For description, see ASIAN 395.

CLASS 463 Gender and Politics in the Roman World (also History 463 and Women’s Studies 464)
An undergraduate seminar examining the relationship between gender and politics in the late Roman Republic and early Empire. Among the questions this course will address are: what was politics the exclusive domain of men in Roman society (as is generally assumed) or does a broader definition of politics and an understanding of the various forms political activity in ancient Rome might take allow a place for women in Roman political life? What role does gender have in Roman political discourse and ideology? Why do issues such as family, marriage, and sexuality become subjects of political debate and legislation?

CLASS 465-466 Independent Study in Classical Civilization, Undergraduate Level
465, fall, 466, spring. Up to 4 credits.

CLASS 480 Roman Society and Politics under the Julio-Claudians (also History 473)
Spring. 4 credits. Prerequisite: Classics 212, History 268, or permission of instructor. J. Ginsburg.
This course examines several of the important social and political changes in Roman society under Augustus and his successors, the Julio-Claudians. Topics to be investigated include Augustus’s consolidation of power through political and social revolution, the Augustan attempt to regulate family life and social relations by legislation, the rise of the emperor Tiberius with the members of the old ruling class, the growth of the imperial bureaucracy and the new opportunities for social mobility, the political opposition to Claudius and Nero, Nero’s cultural and provincial policy, and the manipulation of the imperial cult. All readings will be in English.

CLASS 711-712 Independent Study for Graduate Students in Classical Civilization
711, fall; 712, spring. Up to 4 credits.

Greek

CLASS 101 Greek for Beginners
Fall. 4 credits. H. Pelliccia.
Introduction to Attic Greek. Designed to enable the student to read the ancient authors as soon as possible.

CLASS 103 Attic Greek
Spring. 4 credits. Prerequisite: 101 or equivalent. M. Landon.
A continuation of Classics 101.
CLASS 104 Intensive Greek
Summer. 6 credits. Staff.
An intensive introduction to the fundamentals of ancient Greek grammar. Prepares students in one term for 200-level Greek.

CLASS 111-112 Modern Greek
111, fall; 112, spring. 3 credits each term. Not offered 1997-98. H. Kotas.

CLASS 201 Attic Authors #
Fall. 3 credits. Prerequisite: Classics 103 or 104 or equivalent. H. Pelliccia.
Selected readings from Greek prose.

CLASS 202 The Greek New Testament (also Near Eastern Studies 220 and Religious Studies 202) #
3 credits. Prerequisite: at least one year of ancient Greek (Classics 101-103) or permission of instructor. Not offered 1997-98. Staff.
Selections from Greek new testament.

CLASS 203 Homer #
Spring. 3 credits. Prerequisite: Classics 103 or equivalent. P. Pucci.
Readings in the Homeric epic with emphasis on formulative style.

CLASS 206 Herodotus #
Spring. 3 credits. Prerequisite: Classics 103 or equivalent. Not offered 1997-98.
Selected readings from Herodotus’ Histories.

CLASS 209 Greek Composition
Fall. 3 credits. Prerequisite: one term of 200-level Greek or equivalent. Not offered 1997-98; next offered 1998-99.

CLASS 213 Intermediate Modern Greek
Fall. 3 credits. Prerequisite: Classics 112 or placement by departmental examination. G. Holst-Warhaft.
This course, designed for students who have completed introductory modern Greek or have a reading knowledge of the language, will give attention to developing facility in conversational and written expression, usually in connection with assigned readings reflecting Greek history and culture.

CLASS 310 Greek Undergraduate Seminar #
Fall and spring. 4 credits. Prerequisite: two 200-level courses in Greek or permission of instructor. Fall topic: Aristophanes. P. Pucci. Spring topic: Aeschylus. F. Ahl.

CLASS 311 Greek Philosophical Texts: (also Philosophy 411) #
Fall and spring—up to 4 credits. Prerequisites: Knowledge of Greek and permission of instructor. Fall, C. Shields; spring, C. Brittain.
Readings of Greek philosophical texts in the original.

CLASS 313 Greek Epic #
Fall. 4 credits. Prerequisite: Classics 206 or equivalent. Not offered 1997-98.

CLASS 401-402 Independent Study in Greek, Undergraduate Level
401, fall; 402, spring. Up to 4 credits.

CLASS 417 Advanced Readings in Greek: Hellenistic Poetry #
Spring. 4 credits. J. Reed.

CLASS 419 Advanced Greek Composition
Spring. 3 credits. Prerequisite: Classics 209 or equivalent. K. Clinton.

CLASS 433 Greek Mystery Cults (also Classics 633 and Religious Studies 433) #
4 credits. Prerequisite: one term of 300-level Greek or permission of instructor. Not offered 1997-98. K. Clinton.
Discussion of the major Greek mystery cults—the Mysteria at Eleusis, the cult of the Great Gods at Samothrace, and Dionysiac mysteries—with the aim of elucidating the structure and religious purpose of these cults and the nature of the initiates’ experience. The evidence includes: the Hymn to Demeter; Plato’s Symposium; works of Christian Fathers, inscriptions, artistic representations, and archaeological data.

CLASS 501 Introduction to Greek Epigraphy

CLASS 555 Graduate Proseminar
Graduate students will be introduced to the tools, techniques, and methods of Classical scholarship.

CLASS 633 Greek Mystery Cults (also Classics 433) #
For description, see Classics 433.

CLASS 671 Graduate Seminar in Greek: Religion
Fall. 4 credits. K. Clinton.

CLASS 672 Graduate Seminar in Greek: Hesiod
Spring. 4 credits. P. Pucci.

CLASS 701-702 Independent Study for Graduate Students in Greek
701, fall; 702, spring. Up to 4 credits.

CLASSICS 383
CLASS 220 Introduction to Art History: The Classical World (also History of Art 220) #
Fall. 4 credits. A. Ramage.
An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the late empire.

CLASS 221 Minoan-Mycenaean Art and Archaeology (also Archaeology 221 and History of Art 221) #
The birth of civilization in Greece and the Aegean islands during the Bronze Age. The main focus is on the rise and fall of Minoan Crete and Mycenaean Greece, with consideration given to the nature and significance of Aegean interactions with Egypt, the Near East, and Anatolia.

CLASS 232 Archaeology in Action I (also Archaeology 232 and History of Art 224) #
Fall. 3 credits. Prerequisite: permission of instructor. Not offered fall 1997. P. I. Kuniholm.

CLASS 233 Archaeology in Action II (also Archaeology 233 and History of Art 225) #
Spring. 3 credits. Prerequisite: permission of instructor. Not offered spring 1998. P. I. Kuniholm.

CLASS 309 Dendrochronology of the Aegean (also Archaeology 309 and History of Art 309)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm.
For description, see ART H 309.

CLASS 320 The Archaeology of Classical Greece (also History of Art 320) #

CLASS 322 Greeks and Their Neighbors (also History of Art 328) #
4 credits. Prerequisite: Classics 220 or 221, or permission of instructor. Not offered 1997-98; next offered 1999-2000. J. Coleman.
A study of the archaeological and other evidence for the interaction between Greek civilization and the peoples of the eastern and western Mediterranean from the thirteenth to the fourth centuries B.C.E. The course will focus on Greek relationships with Egypt, Phoenicia, Cyprus, Anatolia, and Italy in the post-Greek and Roman period.

CLASS 323 Painting in the Greek and Roman World (also History of Art 323) #

CLASS 325 Greek Vase Painting (also History of Art 325) #
Spring. 4 credits. A. Ramage.
For description, see ART H 325.

CLASS 326 Greek Cities and Towns (also History of Art 326) #
Ancient Greek cities and towns from an archaeological perspective. Topics include the city in its geographical setting, the development of the fortified city, town planning, the Classical house and household, official and religious life versus private life, the territorial and boundaries of cities and towns, regional states and leagues, warfare between cities and regions, and roads and sea routes. Examples will mostly be drawn from Athens/Attica and central Greece. Two short oral presentations, presented after consultation in written form, and a final examination.

CLASS 327 Greek and Roman Coins (also History of Art 327) #
Fall. 4 credits. A. Ramage.
For description, see ART H 327.

CLASS 328 Greek Sculpture (also History of Art 328) #
An examination of ancient Greek sculpture, both three-dimensional and two-dimensional, from the Archaic to the Hellenistic period. Aspects of the works studied include: technological advances, changing ideology of the sculptors, regionalism of styles, and taste of individual patrons.

CLASS 330 The Art of the Roman Empire (also History of Art 330) #
For description, see ART H 330.

CLASS 350 The City of Rome (also Archaeology 351 and History of Art 321) #
Fall. 3 credits. M. Landon.
A detailed survey of the architectural development of the Roman capital from the early Iron Age to the fourth century A.D. Students will be introduced to the principal ancient monuments through slide lectures and selected readings from ancient and modern written sources. Special attention will be given to recent archaeological discoveries and to the social and historical currents that helped to shape the appearance of the largest city in the ancient world.

CLASS 360 Field Archaeology in Greece (also Archaeology 360) #
Summer 1998. 6 credits.
A six-week archaeological field training program in conjunction with the Cornell Halai and Earth Lokis Project. For information and application forms, contact Professor John E. Coleman, Department of Classics, 120 Goldwin Smith Hall.

CLASS 423 Ceramics (also Archaeology 423 and History of Art 423) #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98. Staff.

CLASS 430 Seminar on the Bronze Age Architecture of Asia Minor (also Archaeology 425 and History of Art 425) #
For description, see ART H 425.

CLASS 432 Sardis and the Cities of Asia Minor (also Archaeology 432 and History of Art 424) #
4 credits. Prerequisite: permission of instructor. Not offered 1997-98. A. Ramage.

CLASS 434 The Rise of Classical Greece (also Archaeology 434 and History of Art 434) #
Spring. 4 credits. Recommended: Classics 220 or 221, History of Art 220 or 221, or permission of instructor. P. I. Kuniholm.
For description, see ART H 434.

CLASS 435 Seminar on Roman Art and Archaeology (also Archaeology 435 and History of Art 427) #
Spring. 4 credits. Prerequisite: permission of instructor. A. Ramage.
For description, see ART H 427.

CLASS 475-476 Independent Study in Classical Archaeology, Undergraduate Level #
475, fall; 476, spring. Up to 4 credits.

CLASS 529 The Prehistoric Aegean (also Archaeology 529) #
Seminar with focus on the Aegean and neighboring regions in the Neolithic and Early Bronze Ages.

CLASS 630 Seminar in Classical Archaeology (also Archaeology 520 and History of Art 520)
Fall. 4 credits. P. I. Kuniholm.
For description, see ART H 520.

CLASS 721-722 Independent Study for Graduate Students in Classical Archaeology,
721, fall; 722, spring. Up to 4 credits.

Greek and Latin Linguistics

CLASS 421 Greek Comparative Grammar (also Linguistics 609) #
4 credits. Prerequisite: thorough familiarity with the morphology of classical Greek. A. Nussbaum.
The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

CLASS 422 Latin Comparative Grammar (also Linguistics 610) #
The prehistory and evolution of the sounds and forms of Classical Latin as reconstructed by comparison with the other Indo-European languages.

CLASS 424 Italic Dialects (also Linguistics 612) #

CLASS 425 Greek Dialects (also Linguistics 611) #
The language of the Homeric epics: dialect and morphological aspects of epic compositional technique.

An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.

A program of reading and conferences centered on an author or topic chosen in accordance with the special interests of the student and instructor.

A continuation of Classics 370, with change of author or topic.

Spring. 4 credits. For students who have successfully completed Classics 471. Topics must be approved by the student's honors committee at the end of the first term of the senior year.

COMPARATIVE LITERATURE

E.S. Apter, chair (141 Goldwin Smith, 255–759A); directors of undergraduate studies: fall: Calum Carmichael (139 Goldwin Smith, 255–8265); spring: W. J. Kennedy, director of graduate studies (163 Goldwin Smith, 255–339B); C. M. Arroyo, A. Caput (Emeritus), D. Castillo, W. Cohen, J. Culler, B. deBary, D. Grossvogel, P. Holum, W. Holdheim (Emeritus), N. Melas, J. Monroe, J. Porter, I. W. Wetherbee Also cooperating: A. Adams, D. Bathrick, J. Bishop, R. Brann, S. Buck-Morss, P. Carden, E. Hanson, C. Kaske, D. Mankin, B. Maxwell, M. Migiel, A. R. Parker, R. Schneider, R. Sellars, M. Steinberg, A. Vidler, G. Wate The Department of Comparative Literature provides a broad range of courses in European as well as non-European literatures. Courses variously stress significant authors, themes, problems, styles, genres, historical periods, and theoretical perspectives. In cooperation with related departments in the humanities, the departmental offerings reflect current interdisciplinary approaches to literary study: hermeneutics, semiotics, deconstruction, cultural criticism, Marxism, reception aesthetics, feminism, psychoanalysis.

The Major

The major enables students to develop an integrated knowledge of Western literature, to strengthen their reading and writing abilities, and to prepare for careers demanding analytical, interpretive, and evaluative skills. Prospective majors should consult with the director of undergraduate studies. After declaring a major, a student chooses an adviser from the department's faculty. The requirements for the major are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests. The specific contours of such a program are worked out in consultation with the student's adviser.

Requirements for the Major

1) Five courses in Comparative Literature at the 200 level and above, including the core course listed below. A student may include up to two literature courses from other departments.

2) One core course in Comparative Literature (for 1997–98 Comparative Literature 411 [spring], to be taken by all majors in their junior or senior year. At the discretion of the department, students may enroll in core courses in both their junior and senior years.

3) Five courses in literature and other areas of the humanities at the 200 or higher level, to be taken in one or more foreign literature departments. Texts must be read in the original language. A student may offer one language course (conversation, composition, etc.) towards fulfilling the language requirement.

4) An honor's essay (Comparative Literature 495) of roughly fifty pages, to be written during the senior year under the direction of a faculty member, preferably from within the department, who has agreed to work in close cooperation with the student. Students are urged to begin research on their thesis topic during the summer preceding their senior year.

The department also encourages:

1) a program that includes broad historical coverage (e.g., Comparative Literature 201–202: Great Books); intensive study of a single genre (e.g., Comparative Literature 363–364: The European Novel, Comparative Literature 365: Contemporary Fiction); analysis of problems in literary theory (e.g., Comparative Literature 302: Literature and Theory, Comparative Literature 448: Subject to Translation). Beginning in 1998–99, the department will offer a number of strongly recommended 200-level courses designed to acquaint undergraduates with the discipline: Comparative Literature 203: "Introduction to Comparative Literature," as well as broadening introductory courses in World Fiction (Comparative Literature 204) and World Poetry (Comparative Literature 205), with emphasis on the nineteenth and twentieth centuries.

2) a second foreign language, especially for students interested in graduate work in literature.

Honors

A student who completes the requirements for the major is eligible for the degree of Bachelor of Arts with honors in comparative literature. The department bases its decision on the student's achievements of at least B+ in the senior essay and in course work for the major, and on overall academic performance at Cornell.

Freshman Writing Seminars

Most 100-level courses may be used toward satisfying the freshman writing seminar requirements. See "John S. Knight Writing Program" for a full description of the freshman seminar program.

Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide updated information as soon as possible.

COM L 201#-202 Great Books

201, fall; 202, spring. 4 credits. Comparative Literature 201 and 202 may be taken independently of each other.

A reading each semester of seminal texts that represent and have shaped Western culture and hence form an essential part of the student's intellectual development. By analyzing, interpreting, and evaluating, students will develop critical reading abilities.

201: Selections from the Bible, Homer, Dante, Rabelais, Shakespeare, and others.

202: World literature of the last 300 years, emphasizing the response to European worldwide expansion first in the colonizing countries, then in the colonized. The persistence of certain themes (such as slavery, monstrosity, overreaching, coercion, and vengeance) will be a central concern in many of the texts studied. A certain amount of attention will be given to an examination of differing ideological perspectives on the notion of "Great Books." Readings chosen from texts by Shakespeare, Defoe, Swift, Voltaire, Goethe, Mary Shelley, Balzac, Poe, Melville, Marx, Flaubert, Conrad, Kipling, Brecht, Woolf, Céline, Toculla, Brathwaite, Naipaul, and Armah.

COM L 203 Introduction to Comparative Literature
4 credits. To be offered in 1998-99. Staff. The course is intended to answer the question persistently asked by undergraduates: "What is comparative literature, anyway?" The format of the course is designed to acquaint prospective majors, or interested undergraduates generally, with the range and variety of the field by having the members of the department take turns in presenting those aspects with respect to which differences of their expertise and methods of teaching. Each faculty member will give a manageable reading assignment; of the two meetings each week, the first will generally take the form of a lecture, the second will be a discussion of the assigned text.

COM L 204 Global Fictions
4 credits. To be offered in 1998-99. Staff. An introduction to the enormously rich field of the novel, from the astonishingly modern fiction to emerge from the medieval and post-medieval Far East to both Eurocentric and Third World literary movements of the twentieth century. Translated into names, our roster would implicate people from Lady Murasaki to Vladimir Nabokov—and beyond. We shall be reading some shorter and longer fictions which have been generally considered milestones in the history of the novel and the novella, including works by Cervantes, Defoe, Austen, Flaubert, Henry James, Joyce, Kafka, and Borges and/or "essential" writers not covered in the more advanced novel courses.

COM L 205 Introduction to Poetry, Chiefly Modern
4 credits. To be offered in 1998-99. Staff. Unlike Comparative Literature 207, 205 is intended to be a survey that concentrates largely (but of course not exclusively) on foreign poetry. The course will cut across historical periods and poetic genres, from conventional "strict" genres of the sonnet-variety to forms more nearly associated with our own times: free verse, "the prose poem," etc. Difficult as it may be to avoid poets on the order of Milton, Goethe, and Keats, we propose to focus on the practitioners of the craft from Baudelaire, Whitman, Hopkins, Mallarmé, and Rilke on down.

COM L 206 Introduction to Literary Criticism
Spring. 4 credits. T R 2:55-4:10. R. Sellers. More advanced undergraduate seminars normally tend to focus on contemporary literary theory; after all, it is essential for students of literature to be well-informed about contemporary theoretical debates, methodologies, and problems. But literary theory and criticism did not begin with the structuralist revolution of the 1960s, and it is also essential for students to understand earlier developments—many of which still have the power to provoke and inspire. Critical historicization should begin at home, with an awareness of how different the forms, practices, institutions and politics of literary criticism have been, and this course will thus introduce students to the vast field of pre-1960 debates. We will examine the historical evolution of key terms now more or less taken for granted as part of critical vocabulary, and we will pay particular attention to the (relatively recent) emergence of literature itself as a category of study. Critics and theorists will be chosen from among Plato, Aristotle, Cicero, Horace, and Augustine; Renaissance and neo-classical critics such as Spenser, Dryden, and Dr. Johnson; Enlightenment, Romantic and post-Romantic theorists such as Kant, Hegel, Swift, Wilde, and Pater; and such major twentieth-century figures as Heidegger, Bataille, Sartre, Benjamin, Adorno, and I. A. Richards. No prior knowledge of the subject will be assumed, and all texts will be read in English.

COM L 206 Shakespeare and the 20th Century (also ENGL 208)
Fall. 4 credits. M W F 10:10-11. W. Cohen. What is the relationship between the plays of Shakespeare in their own time and the various ways they have functioned in modern culture? We will compare restored works of Shakespeare with their adaptations in fiction, theater, film, the educational system, government, and popular culture. The discussion of each play will be organized around one or more critical approaches. The course as a whole will attempt to provide a systematic introduction to the contemporary study of literature and culture.

COM L 223 The Comic Theater (also CLASS 223 and THETR 223) #

COM L 236 Greek Mythology (also CLASS 236) #
Fall. 3 credits. T R 11:40-12:55. Limited to 200. (Also offered summer '98). D. Malkin. For description, please see Classics 236.

COM L 239 Cultural History of the Jews of Spain (also NSES 239, JWST 239, REL. ST. 239 and SPAN L 239)
Fall. 3 credits. M W F 10:10-11:00. R. Brann. For description, please see Near Eastern Studies 239.

COM L 302 Literature and Theory (also COM L 622 and ENGL 302/602)
Fall. 4 credits. M W F 9:05-9:55. J. Culler. Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings from Barthes, Derrida, Foucault, J. Butler, B. Johnson, and others. No previous knowledge of literary theory is assumed.

COM L 305 Irony: An Introduction
Fall. 4 credits. M W F 1:25-2:15. R. Sellers. Oscar Wilde suggested that all bad poetry is sincere. Was he being ironic? Irony is an aspect of literature (and everyday life) that is very common and of fundamental importance but misunderstood and even distrusted. This course will confront the theory and politics of irony. Our approach will be historical, philosophical, and literary but will never lose sight of practical questions that students necessarily face: must we—or can we—mean what we say? How can we analyze irony in a text? In what sense is the performance of a drag queen ironic? Texts about irony—or ironic texts—to be studied will include Plato, Kierkegaard, Swift, Flaubert, and German idealists. We will also investigate nonverbal irony in twentieth-century music from Mahler to Madonna.

COM L 322 Encounters with the Dead (also ITAL L 322/623)

COM L 328 Literature of the Old Testament (also REL. ST. 328) @ #
Fall. 4 credits. T R 2:55-4:10. C. M. Camicmichael. Analysis of small sections of well-known material for in-depth discussion.

COM L 330 Political Theory and Cinema (also GERST 330, GOVT 370 and THETR 329)
Fall. 4 credits. T R 1:25-2:40. G. Waite. For description, please see Theatre Arts 329.

COM L 334 Muslims, Christians and Jews in Islamic Spain: Literature and Society (also NSES 339/639, JWST 339, REL ST. 334 and SPAN L 339/699) @ #

COM L 336 European Drama 1680-1900: Mollière to Ibsen (also ENGL 335 and THETR 333) #
Spring. 4 credits. T R 10:10-11:25. A. R. Parker. Major works by such writers as Mollière, Congreve, Goethe, Schiller, Kleist, Shelley, Byron, Büchner, Ibsen, and Chekhov. Attention to influential theater traditions (commedia dell'arte, melodrama, pantomime); theories and styles of acting (Diderot, Garrick, Kran); the role of theater in the cultural politics of Enlightenment and Revolutionary Europe (Rousseau, Burke).

COM L 343 Contemporary Mass Culture in Japan and in the U.S. (also Asian St 363)

COM L 352 European Cultural History, 1750-1870 (also HIST 362) #
Spring. 4 credits. TBA. M. Steinberg. For description, please see History 362.
COM L 355 Decadence (also ENGL 355 and WOMNS 355) Fall. 4 credits. M W F 10:10-11. E. Hanson.

For description, please see English 355.

COM L 362 The Culture of the Renaissance II (also ENGL 325, HIST 354, MUS 390, ART H 351 and REL. ST. 362) Fall. 4 credits. T R 11:40-12:55 plus discussion section to be announced. C. Kaske, W. J. Kennedy.

Members of various departments will lecture on Luther, Michelangelo, Edmund Spenser, Cervantes, Copernicus, Galileo, and Monteverdi. Guest lectures will include Peter Dear, History; Esther Dotson, History of Art; and Rebecca Harris-Warrick, Music. Lectures and discussion will introduce different methods of interpretation and of historical analysis. Written requirements: two short papers and a final take-home examination.

363: From Boccaccio to Goethe. Survey of the novel up to its participation in the romances of chivalry. Ambiguities derived from the lack of the word "novel." Different epochs in the development of the novel and intellectual history in different epochs: character and structure in the novels of contemporary philosophical views on man, cosmetics, gender, and social classes. Readings include Boccaccio's Flonne, Gómez de la Serna's Lazarillo de Tormes, Cervantes's Don Quixote, Mme de Lafayette's The Princess of Cleves, Defoe's Robinson Crusoe, Horace Walpole's The Castle of Otranto, and Goethe's The Sorrows of Young Werther, as well as a short paper comparing critical statements about the genre from Giraldi Cinthio to Goethe. All texts read in English.

364: From Stendhal to the present (in translation). Close reading of novels from the 19th and 20th centuries: Stendhal's The Red and the Black, Flaubert's Madame Bovary, Dostojevsky's Crime and Punishment, Joyce's Portrait of the Artist as a Young Man, Kafka's The Metamorphosis; and Kundera's The Unbearable Lightness of Being. Study of the changing ways of representing recurring themes: the role of the creative imagination; the city and country; rebellion and revolution; communities and solidarity; dominant groups and minorities (social, ethnic, religious, psychological); interplay of politics, sex, and humanity. Artistic and structural developments: coherence, connectedness, fragmentation; from realism to modernism.

COM L 365 Contemporary Fiction Fall. 4 credits. T R 1:25-2:40. B. Maxwell.

A study of European fiction and drama largely drawing on texts from the first half of the twentieth century. In particular, attention to the making of literary types and characters; to traces of utopian and messianic elements; to the relations between memory and political revolution; and to the motive of 'surrender (transformation) chosen from the following: Robert Walser, Strawinsky and The Walk, Franz Kafka, The Trial, Thomas Mann, Death in Venice, Bertolt Brecht, The Rise and Fall of the City of Mabagonny, Joseph Roth, Hotel Savoy: Alfred Doblin, Berlin Alexanderplatz; Christa Wolf, The Quest for Christa T, Louis Aragon, Paris Peasant, Louis-Ferdinand Celine, Death on the Installment Plan; Elia Vail, Natalia Ginzburg, stories; and Isaac Babel, stories. Collateral theoretical readings by Georg Lukács, Ernst Bloch, Bertolt Brecht, Walter Benjamin, Siegfried Kracauer, Gershon Scholem, Elias Canetti, and Chiswala.

For description, please see Russian Literature 367.

COM L 368 Visual Culture and Social Theory (also GOVT 375 and ART H 370) Fall. 4 credits. M W F 1:25-2:15. S. Buck-Mors, A. Vidler.

For description, please see Government 375.

COM L 369 Interpretation and/as Violence Spring. 4 credits. T R 11:40-12:55. R. Sellars.

This course is a response to the approach of the millennium and the increase of violence that seems destined to accompany it. The working hypothesis of the course is that reading should be a process of radical patience which resists the millenarian drive towards apocalypse, and that 'reading' should be distinguished from 'interpretation.' The course will introduce students to the history and theory of interpretation and will show how it has implied a certain kind of violence at least since the beginnings of Christianity. We will begin by exploring how the New Testament comes into being as a more or less violent interpretation of Jewish scriptures, and how Christianity sets up a strong interpretative regime that continues to exert its power today. Given that the ethics of interpretation is becoming increasingly urgent, we will focus on how literary interpretation becomes institutionalized in order to rethink what happens when a reader meets a text. Particular attention will be given to developments in nineteenth-century Germany, where theological categories gradually became secularized as part of the founding process of the modern university.

COM L 395 Fin de Siécle or Belle Époque?: Parisian Culture Around 1900 (also FRLIT 383) Spring. 4 credits. T R 1:25-2:40. E. Apter. Focusing on Parisian culture between 1880 and 1914, a period in which artists and intellectuals confronted a startling new world wrought by industrial production, urban concentration, and political reorganization, this course will consider the relationship between decadence and modernity, with special attention to sexuality and the subject of modernity in the Belle Époque. Themes to be considered will include: 1) theories of pathology, decadence, and difference; 2) city spectacle and mass entertainment; 3) the retreat to the interior as a site of psycho­logical exploration and artistic innovation; 4) feminine culture and the New Woman; 5) spaces of the demimonde (the culture of courtesans, saphism 1900); 6) identity and technological innovation. Short critical texts will be read in relation to well-known authors of the period such as Max Nordau, Zola, Huysmans, Rachilde, Colette, and Proust.

Requirements will include short oral presentations and a term paper.

COM L 396 German Film (also GERST 396 and THETR 396) Spring. 4 credits. Requirements: participation in class discussion, one paper, midterm, and final. TBA.

For description, please see Theatre Arts 396.

COM L 404 History into Fiction: Nazi and the Literary Imagination (also ENGL 404 and GERST 414) Fall. 4 credits. M W F 11:15-12:05. E. Rosenberg.

For description, please see ENGL 404.

COM L 410 Semiotics and Language (also LING 400 and Fr Rom St 400) Spring. 4 credits. Prerequisite: some background in an area relevant to semiotics: e.g., linguistics, philosophy, psychology, anthropology, or literature; or permission of instructor. TBA. L. Waugh.

For description, please see Linguistics 400.

Discussion of some ten authors who excelled in the form of the novel and whose names are thus up to a point "given," in addition to James and Flaubert, writers like Conrad, Tolstoy, Mann, Kafka, Joyce, Faulkner, Marquez, Morrison. One novella each week or week and a half, but not in canonical order, e.g., Conrad's Heart of Darkness, Kafka's Penal Colony, and Ozick's The Shawl as versions of modern politics (or atrocities); the question of "status" as this is reflected in the relations between employer and domestic in things like Flaubert's Simpleton, Tolstoy's Master and Man, and Gertrude Stein's The Good Anna; versions of the récit—specifically on the conditions of marriage—in Tolstoy's Kreutzer Sonata and (to stick with Beethoven) Andre Gide's Pastoral Symphony; same-sex relations in James's Martin's Death in Venice, then also varieties of the fantastic in, say, Jekyll and Hyde, Turn of the Screw, Dostoevsky's Double.

COM L 413 Death, Culture and the Literary Monument Fall. 4 credits. T R 1:25-2:40. N. Melas. Beginning with Homer's Iliad, this course will inquire into the monumental transformation of death into immortality in the literary composition. How do death's negations become fiction's triumphs? We will pay particular attention to the fate of this procedure when its subjects are no longer heroic warriors but slaves and women. How does colonial domination and gender difference alter the aesthetic procedures and assumptions underlying commemoration and literary immortality? In addition to death and language, we will consider such themes as the relation of antiquity to the present, of identity to its dissolution and of politics to culture. Readings of literary texts drawn from a variety of languages and traditions will be attended by selected readings in critical theory and a glance at visual culture, particularly surrounding monuments commemorating the emancipation of slaves and the holocaust. Authors will include Homer, Derek Walcott, Simone Schwartz-Bart, Virginia Woolf, Krista Wolf, Tayeb Salih, Maurice Blanchot, Hegel, Orlando Patterson, Walter Benjamin.
COM L 419–420 Independent Study
419, fall; 420, spring. Variable credit. Comparative Literature 419 and 420 may be taken independently of each other. Applications available in 145 G.S.

COM L 429 Readings in the New Testament (also NES 429, Rel. St. 425 and ENGL 429) Fall. 4 credits. Limited to 40 students. M W F 10:10–11. J. P. Bishop. Close readings of representative texts from the New Testament in modern scholarly editions, with the help of an introductory and specialized commentary. The focus for 1997 will be on Acts and the letters of Paul. All readings will be in English, but repeated reference to the Greek original will be made. Graduate students and undergraduates from other colleges who are interested in the material should not feel inhibited from enrolling. The approach will be primarily exegetical, that is, we will try to find out what the texts say and what they mean by what they say. Thus we can hope to stay open to scholarly and religious issues alike.

COM L 455 Caribbean Literature (also Africana St. 455) Fall. 4 credits. Enrollment limited to 15. M 2:00–4:25. A. Adams. For description, please see Africana Studies 455.

COM L 493 Senior Essay Fall and spring. 8 credits. Hours to be arranged individually in consultation with the director of the Senior Essay Colloquium. Approximately fifty pages to be written over the course of two semesters in the student's senior year under the direction of the student's adviser. An "R" grade will be assigned on the basis of research and a seminar will investigate the global politics they say. Thus we can hope to stay open to the texts say and what they mean by what they say. Thus we can hope to stay open to the meaning, to what extent and in what circumstance can comparison produce cultural difference, consolidate it, dissolve it, erect borders, inhabit borderlands, propose a global euclidean? With particular attention to colonialism and globalization, we will inquire into the relation between various modes of comparison and broader contexts and ideologies. Though focused on the humanities and on theoretical texts, readings will include incursions into the social sciences and selected poetry and film. Authors may include Lyotard, Foucault, Fanon, Tilley, Gilroy, Clifford, Appadurai, Bhabha, Lancer, Kincaid, Walcott.

COM L 619–620 Independent Study 619, fall; 620, spring. Variable credit. Comparative Literature 619 and 620 may be taken independently of each other. Applications available in 145 G.S.

COM L 622 Literature and Theory (also Com L 302 and ENGL 302/602) Fall. 4 credits. M W F 9:05–9:55. J. Cullen. For description, please see Comparative Literature 302.

COM L 626 Baroque (also GER ST 627) Fall. 4 credits. T 4:30–6:30. G. Waite. For description, please see German Studies 627.

COM L 641 Bakhtin as Reader (also RUSS L 641) Spring. 4 credits. Also open to undergraduates with permission of instructor. W 3:35–5:30. P. Carden. For description, please see Russian Literature 641.

COM L 657 Seminar in Dramatic Theory (also THETR 637) Spring. 4 credits. Prerequisite: permission of instructor. TBA. R. Schneider. For description, please see Theatre Arts 637.

COM L 674 Contemporary Poetry and Culture: 1968–1998 (also ENGL 679, and GERST 674) Spring. 4 credits. W 1:25–3:20. J. Monroe. The redrawing of cultural and political boundaries underway since the late 1980's has made it possible to conceive of the poetry of the Cold War era with a degree of closure unimaginable only a few years ago. In light of this changed situation, we will focus on the second half of the post-1945 period—the thirty years extending from 1968 to the present—with particular attention to the past two decades. Exploring issues of emerging and evolving importance for a poetry of the present moment in light of the recent past, we will consider contemporary cultural production as alternative practices; canon formation, gender, and multiculturalism; the roles of the publishing industry, popular culture, creative writing programs, and new computer technologies in shaping reading habits and writing communities.

COM L 675 After the Divide: German Critical Theory of the Seventies and Eighties (also GERST 675 and HIST 675) Fall. 4 credits. W 2:30–4:25. P. Hohenadl. For description, please see German Studies 675.

COM L 699 German Film Theory (also GERST 699 and THETR 699) Fall. 4 credits. M 2:30–4:25. D. Batchik. For description, please see Theatre Arts 699.

COMPUTER SCIENCE

The Department of Computer Science is affiliated with both the College of Arts and Sciences and the College of Engineering. Students in either college major in computer science. For details, visit our World Wide Web site at http://www.cs.cornell.edu/Info/Ugrad.

The Major
CS majors take courses in algorithms, data structures, logic, programming languages, scientific computing, systems, and theory. Electives in artificial intelligence, computer graphics, computer vision, databases, multimedia, and networks are also possible. Requirements include:

- four semesters of calculus (MATH 111–122, 211–222 or 191–192, 293–294)
- two semesters of introductory computer programming (COM S 100 and 211 or 212)
- a seven-course computer science core (COM S 222, 280, 314, 381, 410, 414, and 482)
- two 400+ computer science electives, totaling at least 6 credits
- a computer science project course (COM S 413, 415, 418, 433, or 473)
- a 3+ credit mathematical elective course (ORIE 270, MATH 300+, TRAM 300+, etc.)
- two 300+ courses that are technical in nature and total at least six credits
- three courses which are related to one another from a discipline other than computer science. These courses must be numbered 300-level or greater and total at least eleven credits.

The program is broad and rigorous, but it is structured in a way that supports in-depth study of outside areas. Intelligent course selection can set the stage for graduate study and employment in any technical area and any professional area such as business, law, or medicine. With the advisor, the computer science major is expected to put together a coherent program of study that supports career objectives and is true to the aims of liberal education.
Admission
The prerequisites for admission to the major are:

1) Completion of Computer Science 100–211 (or 212–280) (or equivalent)
2) Completion of Mathematics 111–122–221 or Mathematics 191–192–293
3) A 2.75 grade-point average in all computer science and mathematics courses
4) Acceptance by the department's admissions committee

After admission, students are expected to maintain at least a 2.75 grade-point average in their major courses. Any grade below C- in a core course or related elective is not acceptable.

Honors. To qualify for departmental honors a student must have:
- maintained a cumulative GPA ≥ 3.5
- completed 8 credit hours of COM S course work at or above the 500 level
- completed 6 credit hours of CS 490 research with a COM S faculty member, spread over at least two semesters and obtaining grades of A- or better.

Note: Honors courses may not be used to satisfy the COM S 400+ elective requirement or the COM S project requirement.

Courses
For complete course descriptions, see the computer science listing in the College of Engineering section.

<tbody>
<tr>
<td>COM S 099</td>
<td>Fundamental Programming Concepts</td>
<td>Fall, summer. 2 credits. S-U grades only. No prerequisites.</td>
</tr>
<tr>
<td>COM S 100</td>
<td>Introduction to Computer Programming</td>
<td>Fall, spring, or summer. 4 credits. During the fall semester, two versions of COM S 100 (COM S 100a and COM S 100b) are available as described in the computer science listing in the College of Engineering.</td>
</tr>
<tr>
<td>COM S 101</td>
<td>Introduction to Cognitive Science (also COGST 101, LING 170, and PSYCH 102)</td>
<td>Fall. 3 credits.</td>
</tr>
<tr>
<td>COM S 113</td>
<td>Introduction to C</td>
<td>Fall, spring. 1 credit. Weeks 5–8. Prerequisite: COM S 100 or equivalent programming experience. Credit is granted for both COMS 113 and 213 only if 113 is taken first. S-U grades only.</td>
</tr>
<tr>
<td>COM S 114</td>
<td>Unix Tools</td>
<td>Fall, spring. 1 credit. Weeks 1–4. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only.</td>
</tr>
<tr>
<td>COM S 130</td>
<td>Creating Web Documents</td>
<td>Fall. 3 credits.</td>
</tr>
<tr>
<td>COM S 211</td>
<td>Computers and Programming (also ENGRD 211)</td>
<td>Fall, spring, or summer. 3 credits. Prerequisite: COM S 100 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.</td>
</tr>
<tr>
<td>COM S 212</td>
<td>Structure and Interpretation of Computer Programs (also ENGRD 212)</td>
<td>Fall, spring. 4 credits. Prerequisite: COM S 100 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.</td>
</tr>
<tr>
<td>COM S 213</td>
<td>C++ Programming</td>
<td>Fall, spring. 2 credits. Prerequisite: COM S 211 or 212 or equivalent programming experience. Students who plan to take COMS 113 and 213 must take 113 first. S-U grades only.</td>
</tr>
<tr>
<td>COM S 222</td>
<td>Introduction to Scientific Computation (also ENGRD 222)</td>
<td>Spring, summer. 3 credits. Prerequisites: COM S 100 and (MATH 222 or MATH 294).</td>
</tr>
<tr>
<td>COM S 280</td>
<td>Discrete Structures</td>
<td>Fall or spring. 4 credits. Prerequisite: COM S 211 or 212 or permission of instructor.</td>
</tr>
<tr>
<td>COM S 314</td>
<td>Introduction to Digital Systems and Computer Organization</td>
<td>Fall, spring. 4 credits. Prerequisite: COM S 211 or 212, or equivalent.</td>
</tr>
<tr>
<td>COM S 381</td>
<td>Introduction to Theory of Computing</td>
<td>Fall, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor.</td>
</tr>
<tr>
<td>COM S 400</td>
<td>The Science of Programming</td>
<td>Spring. 4 credits. Prerequisite: COM S 280 or equivalent. Not offered every year; next offered spring 1998.</td>
</tr>
<tr>
<td>COM S 410</td>
<td>Data Structures</td>
<td>Fall, spring, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor.</td>
</tr>
<tr>
<td>[COM S 411]</td>
<td>Programming Languages and Logics</td>
<td>Fall. 4 credits. Prerequisites: COM S 410 or permission of instructor. Not offered every year; semester to be announced.</td>
</tr>
<tr>
<td>COM S 412</td>
<td>Introduction to Compilers and Translators</td>
<td>Spring. 3 credits. Prerequisites: COM S 314, 381, and 410. Corequisite: COM S 413.</td>
</tr>
<tr>
<td>COM S 414</td>
<td>Systems Programming and Operating Systems</td>
<td>Fall, summer. 3 credits. Prerequisite: COM S 314 or permission of instructor.</td>
</tr>
<tr>
<td>COM S 415</td>
<td>Practicum in Operating Systems</td>
<td>Fall. 2 credits. Prerequisite: COM S 410. Corequisite: COM S 414.</td>
</tr>
<tr>
<td>COM S 417</td>
<td>Computer Graphics and Visualization (also ARCH 374)</td>
<td>Spring. 3 credits. Prerequisite: COM S 211 or 212. Corequisite: COM S 414.</td>
</tr>
<tr>
<td>COM S 421</td>
<td>Numerical Analysis</td>
<td>Fall. 4 credits. Prerequisites: MATH 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.</td>
</tr>
<tr>
<td>COM S 432</td>
<td>Introduction to Database Systems</td>
<td>Fall. 3 credits. Prerequisites: COM S 211 or 212 and COM S 410. Recommended: COM S 213.</td>
</tr>
<tr>
<td>COM S 433</td>
<td>Practicum in Database Systems</td>
<td>Fall. 2 credits. Corequisite: COM S 432.</td>
</tr>
<tr>
<td>COM S 444</td>
<td>Distributed Systems and Algorithms</td>
<td>Fall. 4 credits. Prerequisite/co-requisite: COM S 414 or permission of instructor. Not offered every year; next offered fall 1998.</td>
</tr>
<tr>
<td>COM S 472</td>
<td>Foundations of Artificial Intelligence</td>
<td>Fall. 3 credits. Prerequisites: COM S 211 or 212, and COM S 280 or equivalent.</td>
</tr>
<tr>
<td>COM S 473</td>
<td>Practicum in Artificial Intelligence</td>
<td>Fall. 2 credits. Prerequisites: COM S 211 or 212, and COM S 280 or equivalent. Corequisite: COM S 472.</td>
</tr>
<tr>
<td>COM S 481</td>
<td>Introduction to Theory of Computing</td>
<td>Fall. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481. A faster-moving and deeper version of COM S 381. Corrective transfers between COM S 481 and 381 (in either direction) are encouraged during the first few weeks of instruction.</td>
</tr>
<tr>
<td>COM S 482</td>
<td>Introduction to Analysis of Algorithms</td>
<td>Spring, summer. 4 credits. Prerequisites: COM S 410 or 481, or permission of instructor.</td>
</tr>
<tr>
<td>COM S 486</td>
<td>Applied Logic (also MATH 486)</td>
<td>Fall or spring. 4 credits. Prerequisites: MATH 222 or 294, COM S 280 or equivalent (such as MATH 332, 432, 434, 481), and some course in mathematics or theoretical computer science.</td>
</tr>
<tr>
<td>COM S 490</td>
<td>Independent Reading and Research</td>
<td>Fall or spring. 1–4 credits.</td>
</tr>
<tr>
<td>COM S 501</td>
<td>Software Engineering: Technology and Techniques</td>
<td>Fall. 4 credits. Prerequisite: COM S 410 and knowledge of the C programming language.</td>
</tr>
<tr>
<td>COM S 514</td>
<td>Practical Distributed Computing</td>
<td>Fall or spring. 4 credits. Prerequisites: COM S 414 or permission of instructor.</td>
</tr>
<tr>
<td>COM S 515</td>
<td>Practicum in Distributed Systems</td>
<td>Fall or spring. 1–2 credits. Co-requisite: COM S 514.</td>
</tr>
<tr>
<td>COM S 516</td>
<td>High-Performance Computer Architecture</td>
<td>Spring. 4 credits. Prerequisite: COM S 314 required; COM S 412 or 414 highly recommended.</td>
</tr>
</tbody>
</table>
COM S 519 Engineering Computer Networks  
Fall. 4 credits. Prerequisites: COM S 214, 314, and 410, or permission of instructor.

COM S 522 Software Tools for Computational Science  
Spring. 4 credits. Prerequisites: a numerical analysis course such as (COM S 222 or 421) or PHYS 480; willingness to work in Matlab and C or Fortran; interest in mathematics and the natural sciences. Not offered every year; semester to be announced.

COM S 572 Introduction to Automated Reasoning  
Spring. 3 credits.

COM S 601 System Concepts  
Fall. 3 credits. Prerequisite: open to students enrolled in the COM S Ph.D. program. Not offered every year; next offered spring 1997.

COM S 611 Advanced Programming Languages  
Fall. 4 credits. Prerequisites: graduate standing or permission of instructor.

COM S 612 Compiler Design for High-Performance Architectures  
Spring. 4 credits. Prerequisites: COM S 314 and 412, or permission of instructor.

COM S 613 Concurrent Programming  
Spring. 4 credits. Prerequisites: COM S 414 or permission of instructor. Not offered every year; semester to be announced.

COM S 614 Advanced Systems  
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor.

COM S 618 Principles of Distributed Computing-MESSAGE Passing  
Fall. 4 credits. Prerequisites: COM S 444 or permission of instructor.

COM S 621 Matrix Computations  
Fall. 4 credits. Prerequisites: MATH 411 and 431 or permission of instructor.

COM S 622 Numerical Optimization and Nonlinear Algebraic Equations  
Spring. 4 credits. Prerequisite: COM S 621. Offered in odd-numbered years.

COM S 624 Numerical Solution of Differential Equations  
Spring. 4 credits. Prerequisite: Previous exposure to numerical analysis, mathematical analysis including Fourier methods, and differential equations. Offered in even-numbered years.

COM S 631 Multimedia Systems  
Fall. 4 credits. Prerequisite: COM S 414 or permission of instructor.

COM S 632 Advanced Database Systems  
Spring. 4 credits. Prerequisite: COM S 432 or permission of instructor.

COM S 664 Machine Vision  
Spring. 4 credits. Prerequisites: under-graduate-level understanding of algorithms and Mathematics 221 or equivalent.

COM S 671 Introduction to Automated Reasoning  
Fall. 4 credits. Prerequisites: graduate standing and COM S 611 or permission of instructor.

COM S 674 Natural Language Processing  
Spring. 4 credits. Prerequisites: COM S 472 or permission of instructor. Not offered every year; semester to be announced.

COM S 676 Reasoning About Knowledge  
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered every year; next offered fall 1998.

COM S 677 Reasoning About Uncertainty  
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered every year; next offered fall 1997.

COM S 681 Analysis of Algorithms  
Fall. 4 credits. Prerequisite: COM S 381 or 481, or permission of instructor.

COM S 682 Theory of Computing  
Spring. 4 credits. Prerequisite: (COM S 381 or 481) and (COM S 482 or 681), or permission of instructor.

COM S 709 Computer Science Colloquium  
Fall, spring. 1 credit. S-U grades only. For staff, visitors, and graduate students interested in computer science.

COM S 713 Seminar in Systems and Methodology  
Fall, spring. 4 credits. Prerequisites: a graduate course employing formal reasoning, such as COM S 660, 611, 613, 615, 671; a logic course, or permission of instructor. Not offered every year; semester to be announced.

COM S 719 Seminar in Programming Languages  
Fall, spring. 4 credits. Prerequisite: permission of instructor.

COM S 717 Topics in Parallel Architectures  
Fall. 4 credits. Prerequisite: COM S 612 or permission of instructor. Not offered every year; semester to be announced.

COM S 721 Seminar in Programming Languages  
Fall, spring. 4 credits. Prerequisite: COM S 611 or permission of instructor. S-U grades only.

COM S 722 Topics in Numerical Analysis  
Fall, spring. 4 credits. Prerequisite: COM S 621 or 622 or permission of instructor. Not offered every year; semester to be announced.

COM S 729 Seminar in Numerical Analysis/ACRI  
Fall, spring. 1-4 credits (to be arranged). Prerequisite: permission of instructor. S-U grades only.

COM S 754 Seminar in Work in Progress-Distributed Systems  
Fall. 1 credit.

COM S 773/774 Proseminar in Cognitive Studies I & II (also COGST, PHIL, LING, and PSYCH 773/774)  
Fall and spring. 2 credits.

COM S 775 Seminar in Natural Language Understanding  
Fall, spring. 2 credits.

COM S 789 Seminar in Theory of Algorithms and Computing  
Fall, spring. 2-4 credits. Prerequisite: permission of instructor. S-U grades only.

COM S 890 Special Investigations in Computer Science  
Fall, spring. Prerequisite: permission of a computer science adviser. Letter grade only. Master of Science degree research.

COM S 990 Special Investigations in Computer Science  
Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Doctoral research.

CZECH  
See Language Courses under Languages and Linguistics.

DANCE  
See listings under Department of Theatre, Film and Dance.

DANISH  
See Language Courses under Languages and Linguistics.

DUTCH  
See Language Courses under Languages and Linguistics.

ECONOMICS  

The study of economics provides an understanding of the way economies operate and an insight into public issues. The department offers a broad range of undergraduate courses in such fields as money and banking, international and comparative economics, econometrics; theory; history; growth and development; and the organization, performance, and control of industry.
Social Science Distribution Requirement

The microeconomics distribution requirement can be fulfilled with any of the following:
- Economics 101, Economics 301, or Economics 313.
- The macroeconomics distribution requirement can be satisfied with any of the following:
- Economics 102, Economics 302, or Economics 314.

The Major

Prerequisites

Economics 101 and 102 and Math 111 (or equivalents, with approval of the director of undergraduate studies), all with grades of C or better.

Economics 301 with a grade of C or better substitutes for 101; Economics 302 with a grade of C or better substitutes for 102.

Requirements

Eight courses listed by the Department of Economics at the 300 level or above, or approved by the student's major adviser, all with grades of C- or better.

These eight courses must include:
1. Economics 313 and 314.
2. Economics 321 or Economics 319 and 320.
3. at least 3 courses from the following: 318, 320, 322-62, 364-98, 404, 406.

Economics 301 with a grade of B or better substitutes for both 101 and 313; Economics 302 with a grade of B or better substitutes for both 102 and 314.

If Economics 321 is applied toward the major, neither 319 nor 320 can be applied.

Courses

ECON 101 Introductory Microeconomics
Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102. Explanation and evaluation of how the price system operates in determining what goods are produced, how goods are produced, and who receives income. And how the price system is modified and influenced by private organizations and government policy.

ECON 102 Introductory Macroeconomics
Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102. Analysis of aggregate economic activity in relation to the level, stability, and growth of national income. Topics discussed may include the determination and effects of unemployment, inflation, balance of payments, deficits, and economic development, and how these may be influenced by monetary, fiscal, and other policies.

ECON 301 Microeconomics
Fall. 4 credits. Prerequisite: calculus. Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 101 and 313. (Can replace 313 only with grade of B or better). This course covers the topics taught in Economics 101 and 313. An introduction to the theory of consumer and producer behavior and to the functioning of the price system.

ECON 302 Macroeconomics
Spring. 4 credits. Prerequisite: Economics 301. Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 102 and 314. This course covers the topics taught in Economics 102 and 314. (Can replace 314 only with grade of B or better). An introduction to the theory of national income determination, unemployment, growth, and inflation.

ECON 307 Introduction to Peace Science (also CRP 495.18 and Introduction to Peace Science)
Winter session. 4 credits. Prerequisites: Economics 101-102 or permission of instructor. Introduction to the theories of and research on conflict resolution. Topics include conflict, its role and impact on society; theories of aggression and altruism; causes of war; game theory; conflict management procedures and other analytical tools and methods of peace science; alternatives to war.

ECON 313 Intermediate Microeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101-102 and calculus. The pricing process in a private enterprise economy are analyzed under varying competitive conditions, and their role in the allocation of resources and the functional distribution of national income is considered.

ECON 314 Intermediate Macroeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101-102 and calculus. The theory of national income and determination and economic growth in alternative models of the national economy is introduced. The interaction and relation of these models to empirical aggregate economic data is examined.

ECON 317 Intermediate Mathematical Economics I
Fall. 4 credits. Prerequisites: Economics 101-102 and Math 111-112. Not offered 1997-98. Introduction of calculus and matrix algebra; problems of maximization of a function of several variables. Economic examples are used to illustrate and teach the mathematical concepts.

ECON 318 Intermediate Mathematical Economics II
Spring. 4 credits. Prerequisites: Economics 101-102 and Math 111-112. Advanced techniques of optimization and application to economic theory.

ECON 319 Introduction to Statistics and Probability
Fall. 4 credits. Prerequisites: Economics 101-102, 319, or equivalent. This course provides an introduction to statistical inference and to principles of probability. It includes descriptive statistics, principles of probability, discrete and continuous distributions, and hypothesis testing (of sample means, proportions, variance). Regression analysis and correlation are introduced.

ECON 320 Introduction to Econometrics
Spring. 4 credits. Prerequisites: Economics 101-102, 319, or equivalent. Introduction to the theory and application of econometric techniques. How econometric models are formulated, estimated, used to test hypotheses, and used to forecast; understanding economists' results in studies using regression model, multiple regression model, and introduction to simultaneous equation models.

ECON 321 Applied Econometrics
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101-102 and calculus. This course provides an introduction to statistical methods and principles of probability. Topics to be covered include analysis of data, probability concepts and distributions, estimation and hypothesis testing, regression, correlation and time series analysis. Applications from economics are used to illustrate the methods covered in the course.

ECON 322 American Economic History
Fall. 4 credits. Prerequisites: Economics 101-102 or equivalent. Problems in American economic history from the first settlements to early industrialization are surveyed.

ECON 324 American Economic History I
Spring. 4 credits. Prerequisites: Economics 101-102 or equivalent. A survey of problems in American economic history from the Civil War to World War I.

ECON 324A American Economic History II
Spring. 4 credits. Prerequisites: Economics 101-102 or equivalent. Same material as Economics 324, seminar limited to 12 students.

ECON 331 Money and Credit
Spring. 4 credits. Prerequisites: Economics 101-102 and 319. A systematic treatment of the determinants of the money supply and the volume of credit. Economic analysis of credit markets and financial institutions in the United States.

ECON 333 Financial Economics
Fall. 4 credits. Prerequisites: Economics 313 and 314. The theory and decision making in the presence of uncertainty and the practical aspects of particular asset markets are examined.

ECON 335 Public Finance: The Microeconomics of Government
Fall. 4 credits. Prerequisites: Economics 101-102 and 313, or their equivalent, and one semester of calculus. The role of government in a free market economy is analyzed. Topics covered include
public goods, market failures, allocation mechanisms, optimal taxation, effects of taxation, and benefit-cost analysis. Current topics of an applied nature will vary from term to term.

**ECON 336 Public Finance: Resource Allocation and Fiscal Policy**

Spring. 4 credits. Prerequisites: Economics 101-102, 313 or their equivalent and one semester of calculus.

This course covers the revenue side of public finance and government transfers. Subjects covered include the federal debt, the budget, and government regulation and transfers, as well as problems like local public goods, health care, education, the hierarchy of governmental structure, plus a variety of applied problems.

**ECON 341 Labor Economics**

For description, see IRLE 240.

**ECON 351 Industrial Organization**

Fall. 4 credits. Prerequisite: Economics 313 or its equivalent.

A study of markets that differ from the ideal of perfect competition (e.g., monopoly and oligopoly) and the efforts of our legal system through the antitrust laws to deal with the kinds of problems that arise in such markets. Specific topics covered include mergers, price fixing, price discrimination, predatory pricing, and vertical restraints such as resale price maintenance.

**ECON 352 Advanced Topics in Industrial Organization**

Spring. 4 credits. Prerequisites: Economics 311 and 313.

This course is an extension of 351 and will emphasize (a) more-advanced topics in the theory of industrial organization with special attention to recent developments in the literature; and (b) empirical analysis of numerous issues relating to the structure of markets and their performance.

**ECON 361 International Trade Theory and Policy**

Fall. 4 credits. Prerequisites: Economics 101-102 and 313.

This course surveys the sources of comparative advantage. It studies commercial policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

**ECON 362 International Monetary Theory and Policy**

Spring and summer. 4 credits. Prerequisites: Economics 101-102 and 314.

This course surveys the determination of exchange rates and theories of balance of payments adjustments. It also explores open economy macroeconomics, and it analyzes some of the institutional details of foreign exchange markets, balance of payments accounting, and the international monetary system.

**ECON 363 International Economics**

Spring and summer. 4 credits. Prerequisites: Economics 101-102 or equivalent.

This course surveys international economics in one semester. First, it surveys the sources of comparative advantage, and it analyzes commercial policy and the institutional aspects of the world trading system. Second, it discusses exchange rates, and it studies theories of balance of payments adjustments. This course is intended primarily for government majors who are comfortable with a less technical approach to international economics. (Cannot be applied to the economics major.)

**ECON 371 Economic Development**

Spring. 4 credits. Prerequisites: Economics 313 or equivalent.

Study of the problem of sustaining accelerated economic growth in less-developed countries. Trade-offs between growth, welfare, and equity; the legacy of colonialism; relevance of history and economic theory; problems of capital formation, economic planning and international specialization; and the interaction of industrialization, agricultural development, and population change are emphasized.

**ECON 372 Applied Economic Development**

Fall or spring. 4 credits. Prerequisites: Economics 101-102. Not offered 1997-98.

This course examines several special topics in the economics of developing countries. Among the topics covered recently are the concepts of development and underdevelopment, the debate over development economics, the peasant household and its place in the world economy, the debt crisis, the state vs. market debate and the role of the state in economic development, and the question of sustainable development.

**ECON 399 Readings in Economics**

Fall or spring. Variable credit.

Independent study.

**ECON 404 Economics and the Law**

Fall. 4 credits. Prerequisite: Economics 101.

An examination, through the lens of economic theories, of legal principles drawn from various branches of law, including contracts, torts, and property. Cases are assigned for class discussion; in addition, there are several writing assignments.

**ECON 408 Production Economics**

For description, see ARME 608.

**ECON 409 Environmental Economics**

For description, see ARME 451.

**ECON 413 Economics of Consumer Demand**

For description, see CEH 613.

**ECON 415 Price Analysis**

For description, see ARME 415.

**ECON 416 Intertemporal Economics**

Spring. 4 credits. Prerequisites: Economics 313. Not offered 1997-98.

This course is intended for advanced economics majors who are especially interested in economic theory. Topics to be covered: (a) review of the one good Ramsey model of optimal savings and accumulation; conditions for intertemporal efficiency in production; competitive dynamics and sensitivity analysis; (b) some earlier models of capital accumulation; the roles of present value and internal rate of return in guiding investment decisions; (c) growth, exhaustible resources, pollution and conservation discussion of the trade-offs facing a society.

**ECON 417 History of Economic Analysis**

Fall and spring. 4 credits. Prerequisites: Economics 101-102 or permission of instructor.

Early writings in economics and their relationship to current economic analysis and policy issues, for example, ancient and medieval philosophers on justice in exchange; mercantilist arguments for trade protection; early theories about the effect of monetary expansion (D. Hume); the role of the entrepreneur (Cantillon); and general competitive equilibrium (the Physiocrats). The most recent reading assignment in this course is Adam Smith's Wealth of Nations but the emphasis is on the relationship between the precursors of Adam Smith and his Wealth of Nations to modern economics analysis and current efforts to answer some of the questions raised in the early writing on economics.

**ECON 419 Economic Decisions under Uncertainty**

Fall. 4 credits. Prerequisites: Economics 313 and 319. Not offered 1997-98.

This course provides an introduction to the theory of decision making under uncertainty with emphasis on economic applications of the theory.

**ECON 420 Economics of Family Policy—Adults**

Economics 420 and 421 together, count as one course for the Economics major.

For description, see CEH 320.

**ECON 421 Economics of Family Policy—Children**

Economics 420 and 421 together, count as one course for the Economics major.

For description, see CEH 321.

**ECON 422 The Economics of Infrastructure and a Sustainable Environment**

For description, see CEE 422.

**ECON 424 Economics of Household Behavior**

For description, see CEH 624.

**ECON 425 History of Latin America**

Spring. 4 credits.

A survey of changing economic institutions and policies from pre-Columbian to modern times.

**ECON 426 History of American Enterprise**

Spring. 4 credits. Prerequisites: Economics 101-102 or equivalent.

History of the changing structure of American business from 1800 to the present, with major emphasis upon developments after the Civil War. The focus of the course will be the changing structure of challenges (for example, the rise of unions, development of a national capital market, changing role of government) and the various responses of business organizations and entrepreneurs to those challenges.

**ECON 428 Technology: Management and Economic Issues**

For description, see ARME 428.

**ECON 430 Policy Analysis: Welfare Theory, Agriculture, and Trade**

For description, see ARME 630.

**ECON 435 Information and Regulation**

For description, see CEH 635.

**ECON 436 Projects in Environmental Management**

For description, see NBA 573.

**ECON 440 Analysis of Agriculture Markets**

Economics 440 and 441 together, count as one course for the Economics major.

For description, see ARME 640.
ECON 441 Commodity Futures Markets  
Economics 440 and 441 together, count as one course for the Economics major. For description, see ARME 441.

ECON 444 Modern European Economic History  
For description, see ILRLE 444.

[ECON 445 Topics in Microeconomic Analysis—Markets and Planning  
Fall. 4 credits. Prerequisites: Economics 313. Not offered 1997–98.  
This is a course of economic theory designed for upperclass undergraduates. Course contents may vary from year to year. Issues that may be examined include: (1) How can economic activities be efficiently organized through the market mechanism? Why is the presence of many traders essential to efficiency? (2) What can be done if the indivisibility in production processes becomes an important hindrance to competitive pricing? (3) How can economic planning be decentralized efficiently? This course serves two purposes: (1) to introduce concepts that are novel to undergraduates and relevant to public policy but require only a modicum of analytic tooling up, and (2) to illustrate the deductive approach of modern economic analysis. (3) To define concepts unambiguously, how to  form propositions in clean-cut fashion, and how to follow up logical implications sequentially to the conclusion.]

[ECON 446 Topics in Macroeconomic Analysis—Is Keynesianism Dead?  
Fall or spring. 4 credits. Prerequisites: Economics 314. Not offered 1997–98.  
The coverage of this course may vary from term to term. Presently the content of the course deals with the range of criticisms against Keynesian theory by the New Classical Economists, alias the Equilibrium School, alias the Rational Expectations School. Despite the fact that almost all intermediate macroeconomic textbooks are Keynesian in perspective, clearly Keynesian economics is currently at bay. We shall review critically, critiques to Keynesian theory.]

ECON 448 Housing Economics  
For description, see CEH 648.

ECON 451 Economic Security  
For description, see ILRLE 340.

ECON 452 Corporate Finance  
For description, see ILRLE 345.

ECON 453 The Economics of Unemployment  
For description, see ILRLE 348.

ECON 454 The Economics of Health Care  
For description, see ARME 440.

ECON 455 Income Distribution  
For description, see ILRLE 441.

ECON 456 The Economics of Employee Benefits  
For description, see ILRLE 442.

ECON 457 Women In the Economy  
For description, see ILRLE 445.

ECON 458 Topics in Twentieth Century Economic History  
For description, see ILRLE 448.

ECON 459 Economic History of British Labor 1750–1940  
For description, see ILRLE 640.

ECON 460 Economic Analysis of the Welfare State  
For description, see ILRLE 642.

ECON 461 The Economics of Occupational Safety and Health  
For description, see ILRLE 644.

ECON 462 Labor in Developing Economies  
For description, see ILRLE 332.

ECON 464 Economics of Agricultural Development  
For description, see ARME 464.

ECON 465 Food and Nutrition Policy  
For description, see ARME 665.

ECON 466 Economics of Development  
For description, see ARME 666.

ECON 467 Game Theory  
Spring. 4 credits. Prerequisites: Economics 313 and 319.  
This course studies mathematical models of conflict and cooperation in situations of uncertainty (about nature and about decision makers).

ECON 468 Economic Problems of Latin America  
Spring. 4 credits. Prerequisites: Economics 310–104.  
Current topics include, international debt, capital flight, economic integration, stabilization programs, etc.

ECON 469 The Economy of China  
Fall. 4 credits. Prerequisites: Economics 101–102 or permission of instructor.  
Examines the development of the Chinese economy and the evolution of China’s economic system since 1949.

[ECON 471 The Economics of the Former Soviet Union and of Central Europe: From Central Planning to Markets  
Fall. 4 credits. Prerequisites: Economics 313 and 314. Not offered 1997–98.  
The course will introduce first the basic features of a centrally planned economy and proceed to consider the most important example: the rise and fall of the Soviet Union. Secondly, the analysis will be extended to what used to be known as "Eastern Europe" (e.g., Czechoslovakia, Hungary, Poland). From this necessary historical background, the course will proceed to current attempts to move away from Socialist central planning and its legacies to market economy, privatization, and independence.]

[ECON 472 Comparative Economic Systems: East and West  
Fall. 4 credits. Prerequisites: Economics 101–102. Not offered 1997–98.  
The course will develop first a framework for studying economic systems and national economies and present three simple stylized systemic models: capitalist market, socialist market, and central planning. Secondly, the course will consider economic goals to be achieved (such as growth, stability, and productivity) and introduce quantitative measures used in the evaluation of the performance. Thirdly, comparative studies of selected national economies representing the models will be carried out.]

ECON 473 Economics of Export-led Development  
Spring. 4 credits. Prerequisites: Economics 313, 314, or their equivalent.  
This course will examine the phenomenon of export-led development from both the theoretical and empirical points of view. Concentration will be on experiences within the West Pacific Rim.

ECON 474 National and International Food Economics  
For description, see NS 457.

ECON 475 Economic Problems of India  
Fall. 4 credits. Prerequisite: Economics 101–102 or equivalent background.  
This course will present the major economics and development problems of contemporary India and to examine the country’s future economic prospects. It will, however, be our aim to discuss these problems in their proper historical perspectives. Hence, the course will start with a brief outline of the social and political history of India. It will then turn to a more detailed account of the economic history of India in two stages.

ECON 499 Honors Program  
Fall and spring. 8 credits. Consult the Director of Undergraduate Studies for details. Interested students should apply to the program in the spring semester of their junior year.

Graduate Courses and Seminars

ECON 609 Microeconomic Theory I  
Fall. 4 credits. Topics in consumer and producer theory.

ECON 610 Microeconomic Theory II  
Spring. 4 credits. Topics in consumer and producer theory, equilibrium models and their application, externalities and public goods, intertemporal choice, simple dynamic models and resource depletion, choice under uncertainty.

ECON 613 Macroeconomic Theory I  

ECON 614 Macroeconomic Theory II  

ECON 616 Applied Price Theory  
Spring. 4 credits. The course emphasizes the applications of the principles of price theory to a variety of problems taken from concrete, practical settings.
ECON 617 Intermediate Mathematical Economics I
Fall. 4 credits. Prerequisites: Calculus II and intermediate linear algebra.
The course will cover selected topics in Matrix algebra (vector spaces, matrices, simultaneous linear equations, characteristic value problem), calculus of several variables (elementary real analysis, partial differentiation, convex analysis), classical optimization theory (unconstrained maximization, constrained maximization).

ECON 618 Intermediate Mathematical Economics II
Spring. 4 credits.
A continuation of Economics 617, the course develops additional mathematical techniques for applications in economics. Topics covered could include study of dynamic systems (linear and nonlinear difference equations, differential equation, chaotic behavior), dynamic optimization methods (optimal control theory, nonstochastic and stochastic dynamic programming), game theory (repeated dynamic and evolutionary games).

ECON 619 Econometrics I
Fall. 4 credits. Prerequisites: Economics 315–320 or permission of instructor.
This course gives the probabilistic and statistical background for meaningful application of econometric techniques. Topics to be covered are (1) probability theory: probability spaces, random variables, distributions, moments, transformations, conditional distribution; (2) calculus: differentiation, and expected values of distributions. Further topics in statistics will be considered in Economics 620.

ECON 620 Econometrics II
Spring. 4 credits. Prerequisite: Economics 619.
This course is a continuation of Economics 619 (Econometrics I) covering (1) statistics: estimation theory, least squares method, method of maximum likelihood, generalized method of moments, theory of hypothesis testing, asymptotic test theory, and nonnested hypothesis testing and (2) econometrics: the general linear model, general linear equation, specification test, instrumental variables, dynamic regression models, linear simultaneous equation models, nonlinear models, and applications.

ECON 639 Public Political Economy (also CEE 528)
Spring. 4 credits. Prerequisite: Economics 531 or permission of instructor.
Designed as part of the core curriculum for MPA students in Cornell's Institute for Public Affairs, this course emphasizes the application of economic concepts and methods in the identification, formulation, administration and evaluation of public policy. It is open to all students with a policy interest who have met the prerequisite.
Topics covered include the intrinsic nature of goods and services, decreasing cost of production, externalities and congestion, amenities and environmental regulation essential for an effective market, the efficient role of government in non-market resource allocation methods, methods for inferring the demand for public goods, efficient public decision-making, the supply of public services and raising revenue through taxes and user-fees. Particular emphasis will be placed on the intersection of government and economy in resolving conflicts over public good provision, including defining jurisdictions for the provision of particular services. Examples will emphasize the proper provision of infrastructure services: physical (transportation, utilities, tele-information); human-capital (education and R&D) and biological (renewable resources, species diversity and the environment).

ECON 699 Readings in Economics
Fall or spring. Variable credit. Independent study.

ECON 703 Seminar in Peace Science
Fall. 4 credits.
Among topics to be covered at an advanced level are game theory, coalition theory, bargaining and negotiation processes, cooperative procedures, microbehavior models, macrosocial processes, and general systems analysis.

ECON 710 Stochastic Economics: Concepts and Techniques
Spring. 4 credits. Prerequisites: Economics 609, 610, 614, 615, 619, and 620.
This course will review a number of techniques that have been useful in developing stochastic models of economic behavior. Among these are (a) discrete-time Markov processes, (b) dynamic programming under uncertainty, and (c) continuous-time diffusion processes. Examples of economic models will be drawn from recent literature on optimal capital accumulation and optimal savings and portfolio selection problems; permanent income hypothesis of the consumer, models of price adjustment, etc. Advanced graduate students contemplating work in economic theory and econometric theory will be able to get some exposure to current research.

ECON 711 Advanced Microeconomic Theory: "The Mathematics of Institutions"
4 credits.
The objectives of this class are to provide the tools to study institutions and to analyze some particular institutions. We will borrow from many literatures: game theory, social choice, political science, microeconomics, microeconomics. The structure of the class will be rather informal. The syllabus will only be an indicator of the material that will be covered during the class. In particular, depending upon the number of students that attend and their interests, we can decide to shorten some parts of this syllabus and to spend more time on other parts.

ECON 712 Advanced Macroeconomics
4 credits.
The purpose of this course is to introduce the student to some of the topics and analytic techniques of current macroeconomic research. The course will fall into three parts: dynamic programming, new Keynesian economics, and recent theories of economic growth. The dynamic programming section will include models of consumption, investment, and real business cycles. The new Keynesian section will cover models of wage and price rigidity, coordination failure and credit markets. The section on endogenous growth will look at recent efforts to add non-convexities to models of optimal growth. These topics are intended to complement the material on overlapping generations covered elsewhere.

ECON 717 Mathematical Economics
4 credits. Prerequisites: ECON 609–610 (or equivalent training in micro theory) and MATH 413–414 (or equivalent training in analysis).
The primary theme of this course is to explore the role of prices in achieving an efficient allocation of resources in microeconomics. Some of the classical results on static equilibrium theory and welfare economics on attaining optimal allocation through decentralized organizations are examined through an axiomatic approach. Some basic issues on capital theory are also analyzed.

ECON 718 Topics in Mathematical Economics
4 credits.

ECON 719 Advanced Topics in Econometrics I
Fall. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
Advanced topics in econometrics, such as asymptotic estimation and test theory, robust estimation, Bayesian inference, advanced topics in time-series analysis, errors in variable and latent variable models, qualitative and limited dependent variables, aggregation, panel data, and duration models.

ECON 720 Advanced Topics in Econometrics II
Spring. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
For description see Economics 719.

ECON 721 Time Series Econometrics
Spring. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
This course covers traditional and current time series techniques that are widely used in econometrics. Topics include the theory of stationary stochastic processes including univariate ARMA(p, q) models, spectral density analysis, and vector autoregressive models; parametric and semi-parametric estimation, current developments in distributional theory, estimation and testing in models with integrated regressors including, unit root tests, cointegration, and permanent vs. transitory components.

ECON 731 Monetary Theory and Policy
Fall. 4 credits. Prerequisites: Economics 614 or permission of the instructor.
Advanced topics in monetary economics, macroeconomics, and economic growth—such as overlapping generations, taxes and transfers denominated in money, transactions demand for money, multi-asset accumulation, exchange rates, and financial intermediation.

ECON 732 Monetary Theory and Policy
Spring. 4 credits. Prerequisites: Economics 731 or permission of the instructor.
Advanced topics in monetary economics, macroeconomics, and economic growth—such as economic volatility, the "burden" of government debt, restrictions on government borrowing, dynamic optimization, endogenous growth theory, technological evolution, financial market frictions, and cyclical fluctuations.

ECON 735 Public Finance: Resource Allocation and Fiscal Policy
Spring. 4 credits.
This course develops a mathematical and highly analytical understanding of the role of government in market economies and the fundamentals of public economics and related issues. Topics covered include generalizations...
and extensions of the fundamental theorems of welfare economics, in-depth analysis of social choice theory and the theory on implementation in economic environments, public goods and externalities and other forms of market failure associated with asymmetric information. The theoretical foundation for optimal direct and indirect taxation is also introduced along with the development of various consumer surplus measures and an application to benefit cost analysis. Topics of an applied nature vary from semester to semester depending upon faculty research interests.

**ECON 736 Public Finance: Resource Allocation and Fiscal Policy**

Fall. 4 credits.

This course spends a large part of the semester covering the revenue side of public finance. Topics include the impact of various types of taxes as well as the determination of optimal taxation. The impact of taxation on labor supply, savings, company finance and investment behavior, risk bearing, and portfolio choice are explored. Other topics include the interaction of taxation and inflation, tax evasion, tax incidence, social security, unemployment insurance, deficits, and interactions between different levels of government.

**ECON 737 Location Theory and Regional Analysis**

Fall. 4 credits. Prerequisites: Economics 609, 617, and Econometrics. Not offered 1997–98.

Economic principles influencing the location of economic activity, its spatial equilibrium structure, and dynamic forces. Topics include spatial pricing policies, price competition, and relocation by firms, residential location patterns, patterns of regional growth and decline; and patterns of urbanization.

**ECON 741 Seminar in Labor Economics**

For description see ILRLE 744.

**ECON 742 Seminar in Industrial Economics**

For description see ILRLE 745.

**ECON 747 Economics of Evaluation (also Industrial and Labor Relations 647)**

For description see ILRLE 647.

**ECON 748 Issues in Latin American Development**

Fall. 4 credits.

The topics include: “informal sector” (or multi-part labor markets), evolving capital markets (particularly the market for short-term, domestic currency denominated public sector debt, privatization, etc.). The emphasis will be placed on the impact of these institutional (or structural) changes on economic growth.

**ECON 751 Industrial Organization and Regulation**

Fall. 4 credits.

This course focuses primarily on recent theoretical advances in the study of industrial organization. Topics covered include market structure, non-linear pricing, quality, durability, location selection, advertising, repeated games, collusion, entry deterrence, managerial incentives, switching costs and government intervention. These topics are discussed in a game-theoretic context.

**ECON 752 Industrial Organization and Regulation**

Spring. 4 credits. Prerequisites: Economics 609 and 651.

This course focuses on some topics in the Theory of Industrial Organization with the specific intent of addressing the empirical implications of the theory. The course reviews empirical literature in the SCP paradigm and in the NEIO paradigm.

**ECON 753 Public Policy Issues for Industrial Organizations**

Spring. 4 credits. Prerequisites: Economics 609, 610, and 751. Not offered 1997–98.

The course takes an in-depth view of the interaction between the government and business. Methods of business control, including antitrust, price regulation, entry regulation, and safety regulation. Emphasis will be not only on the economic effects on business, but on the economics of selecting and evolving the method of control.

**ECON 755 Rivalry and Cooperation**

Fall. 4 credits. Prerequisites: Economics Graduate Coordinator’s permission. Not offered 1997–98.

In standard models, economic interaction is impersonal. Agents respond to price signals and measure their own welfare not in relative but in absolute terms, and cooperative behavior emerges only when it coincides with narrow self-interest. This course will explore the details of rivalry and cooperation in an effort to synthesize broader views of economic interaction. Topics will include the effect of concerns about relative income on wage rates, consumption, savings, and regulation; the effect of concerns about fairness on prices and wages; the conditions that foster trust and cooperation, and the role of positional competition in the distribution of economic rewards.

**ECON 756 Noncooperative Game Theory**

Fall. 4 credits. Prerequisites: Economics 609–610 and 619.

This course surveys equilibrium concepts for non-cooperative games. We will cover Nash equilibrium and subgame-perfect equilibrium refinements, including perfect equilibrium, proper equilibrium, sequential equilibrium and more! We will pay attention to important special classes of games, including bargaining games, signalling games, and games of incomplete information. Most of our analysis will be from the strict decision-theoretic point of view, but we will also survey some models of bounded rationality in games, including games played by automata.

**ECON 757 Economics of Imperfect Information**

Spring. 4 credits. Prerequisites: Economics 609–610 and 619.

The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered will vary from year to year, subjects such as markets with asymmetric information, signalling theory, sequential choice theory, and record theory will be discussed.

**ECON 760 Topics in Political Economy**

Fall. 4 credits. Prerequisite: Economics 313 or equivalent.

This course will develop critiques and extensions of economic theory, taking into account the political and social moorings of economic activity and equilibria. The formation and persistence of social norms; the meaning and emergence of property rights; the role of policy advice in influencing economic outcomes; and the effect of political power and ideology on economic variables will be studied. While these topics were popular in the classic works of political economy, recent advances in game theory and, more generally, game-theoretic thinking allow us to approach these topics from a new perspective. Hence, the course will begin by devoting some lectures to elementary ideas in game-theory and strategic analysis.

**ECON 761 International Economics: Trade Theory and Policy**

Fall. 4 credits.

This course surveys the sources of comparative advantage. It analyzes simple general equilibrium models to illustrate the direction, volume, and welfare effects of trade. Topics in game theory and econometrics as applied to international economics may be covered.

**ECON 762 International Economics: International Finance and Open Economy Macroeconomics**

Spring. 4 credits.

This course surveys the determination of exchange rates and theories of balance of payment adjustments. It explores open economy macroeconomics by analyzing models of monetary economies. Topics in monetary economics and econometrics as applied to international economics will be covered.

**ECON 771 Economic Development and Development Planning**

Spring. 4 credits.

Reviews the existing literature on the determinants of economic growth and the interrelationship between growth and income distribution through the process of economic development. A general equilibrium approach to development is taken. Computable general equilibrium models, based on social accounting matrices, are used to explore the performance of a variety of developing countries. Among the topics explored are: impact of structural adjustment and stabilization policies on growth, equity and internal and external equilibrium; sectoral interrelationships and interdependence through the growth process. Critical review and evaluation of national, sectoral and regional development models built for such developing countries as India, Brazil, Indonesia and Ecuador.

**ECON 772 Economics of Development**

Spring. 4 credits. Prerequisites: first-year graduate economic theory and econometrics.

Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.
ECON 773 Economic Development
Fall. 4 credits. Prerequisites: Economics 609 and 620.
The course is concerned with theoretical and applied works that seek to explain economic development, or economic growth at low-income levels. Specific topics vary each semester.

ECON 774 Economic Systems
Spring. 4 credits.
The course deals with economic systems, with the formerly centrally planned economies, and with the economies in transition.

ECON 784 Seminars in Advanced Economics
Fall and spring. 4 credits.

ENGLISH
J. Culler, chair; B. B. Adams, director of undergraduate studies (255–3492); D. Mermin, director of graduate studies (255–7989).

The Department of English offers a wide range of courses in English, American, and Anglophone literature as well as in creative writing, expository writing, and film. Literature courses focus variously on the close reading of texts, the study of particular authors and genres, questions of critical theory and method, and the relationship of literary works to their historical periods and to other disciplines. The department seeks not only to foster analytical reading and lucid writing but also, through the study of literary texts, to teach students to think about the nature of language, and to be alert to the rigor and pleasures of that ordinary and peculiar activity, reading.

Students who major in English develop their own programs of study in consultation with their advisers. Some focus on a particular historical period or literary genre; others combine sustained work in creative writing with the study of literature. Others pursue special interests in such areas as women's literature, African-American literature, literature and the visual arts, or critical theory. There are also many ways for students informally to supplement their course work in English, by attending lectures and poetry readings sponsored by the department, or by writing for campus literary magazines.

The Major
The Department of English recommends that its students prepare themselves for the English major by taking at least one introductory course. Freshmen interested in majoring in English are encouraged to take one of the following freshman seminars: The Reading of Fiction (English 270), The Reading of Poetry (English 271), Introduction to Drama (English 272). These courses concentrate on the skills basic to the English major and to much other academic work: responsive, sensitive reading and lucid, effective writing. English 270, 271, and 272, which may be used to satisfy the freshman writing seminar requirement, are open to all second-term freshmen. First-term freshmen with a score of 750 or above on the CEEB Advanced Placement Examination in English, may enroll in English 270, 271, 272 as space permits (all students who have taken at least one high school English course, and for whom English is not a foreign language, must complete this requirement by the end of their sophomore year). Students who elect English 270, 271, and 272 but fail to complete all three courses satisfactorily must complete an additional 36 credit hours in courses approved in the major. Students are also urged to complete this requirement by the end of the sophomore year, and those who enter Cornell without sufficient preparation should begin their language study at once.

Course Requirements
English majors are required to complete, with passing letter grades, 36 credits of foreign language study in courses for which qualification is a prerequisite. These should be in the literature of the foreign language. Majors are urged to complete this requirement by the end of their sophomore year, and those who enter Cornell without sufficient preparation should begin their language study at once.

Besides fulfilling the English Department language requirement, each major must complete with passing letter grades at least 36 credit hours in courses approved for the major. Courses approved for the major include English 201 and 202, and all English courses numbered 300 or above. In addition to English 201 and 202, students may count up to two additional 200-level courses for the major (except those courses which specify they do not count). English majors may use the same courses to satisfy both College of Arts and Sciences distribution requirements and English major requirements.

Of the 36 credits required for the major, 12 credits (three courses) must be taken in literature written before 1800. Students may count toward the English major a maximum of 12 credits in courses in literature and creative writing, at the 300 level or above, given by such departments as Comparative Literature, Theatre Arts, foreign languages, the Africana Studies and Research Center, and the Society for the Humanities. Double majors may count courses at the 300 level or above taken in their other major toward these 12 credits if such courses are approved by their English Department adviser as relevant to the study of literature.

The Major in English with Honors
Prospective candidates for the degree of Bachelor of Arts with honors in English should read the brochure "Honors in English," available in the English office. These students should discuss their qualifications with the chair of the Honors Committee during the spring term of their sophomore year, when they will be admitted provisionally to the program. During their junior year, honors candidates must take one honors seminar (English 491 or 492), which will reflect a dominant area of interest, address methods of scholarly research, and require the composition of a long end-of-term essay. Honors students are strongly encouraged to take an honors 400-level course in which they plan to concentrate. On the basis of their performance, students will be officially admitted to the program at the end of the junior year. Seniors in honors enroll in a year-long tutorial (English 493 and 494) in which they work closely with a faculty member especially qualified to supervise the topic of the candidate's choosing; the year's work culminates in the writing of a scholarly honors thesis. (All seniors in the program are expected to attend informal meetings in which they discuss their work-in-progress.) More information about the program may be found in the department's brochure for honors candidates.

Courses for Nonmajors
For students not majoring in English, the department makes available a variety of courses at all levels. Some courses at the 200 level are open to qualified freshmen, and all of them are open to sophomores. Courses at the 300 level are open to juniors and seniors and to underclass students with permission of the instructor. The suitability of courses at the 400 level for nonmajors will vary from topic to topic, and permission of the instructor is required. Students may elect any two of these courses during their first year to satisfy the Freshman Writing Seminar requirement. Descriptions of Freshman Writing Program offerings may be found in the Freshman Writing Program listings, available from college registrars in August for the fall term and in November for the spring term.

Freshman Writing Seminars
As part of the Freshman Writing Program, the Department of English offers many one-semester courses concerned with various forms of writing (narrative, biographical, expository), with the study of specific areas in English and American literature, and with the relation of literature to culture. Students may elect any two of these courses during their first year to satisfy the Freshman Writing Seminar requirement. Descriptions of Freshman Writing Program offerings may be found in the Freshman Writing Program listings, available from college registrars in August for the fall term and in November for the spring term.

Freshman Writing Seminars Recommended for Prospective Majors

ENGLISH 270 The Reading of Fiction
Fall, spring, each summer. 3 credits. Each section limited to 17 students. Freshman Writing Seminar. Recommended for prospective majors in English. English 270 examines modern fiction, with an emphasis on the short story and novella. Students will write critical essays on English, American, and continental authors who flourished between 1870 and the present, such as Joyce, Woolf, James, Lawrence, Tolstoy, Kafka, Fitzgerald, Faulkner, Rhys, Welty, etc.
Salinger, and Morrison. Instructors may include the reading of a novel. This course does not satisfy requirements for the English major.

ENGL 271 The Reading of Poetry
Fall, spring. 3 credits. Each section limited to 17 students. Freshman Writing Seminar. Recommended for prospective majors in English. This course does not satisfy requirements for the English major. Designed to sharpen the student’s ability to understand and respond to poetry, through readings in the major periods, modes, and genres of poetry written in English. This course does not satisfy requirements for the English major.

ENGL 272 Introduction to Drama
Fall, spring. 3 credits. Each section limited to 17 students. Freshman Writing Seminar. Students in this seminar study plays, older and newer, in a variety of dramatic idioms and cultural traditions. A typical reading list might include works by Sophocles, Shakespeare, Molière, Chekhov, Brecht, Miller, Williams, Beckett, and O’Casey. Course work consists of writing and discussion and the occasional viewing of live or filmed performances. This course does not satisfy requirements for the English major.

Expository Writing

ENGL 288-289 Expository Writing
Fall and spring. 3 credits. Each section limited to 16 students. Students must have completed ENGL 280 or 281 and English majors and non-majors who have done distinguished work in freshman writing seminars and in such courses as ENGL 280–281, 288–289, and who desire intensive practice in writing personal essays. The course assumes a high degree of self-motivation, a capacity for independent work, and critical interest in the work of other writers; it aims for a portfolio of creative nonfiction that is conceptually rich and stylistically polished.

Creative Writing

Students usually begin their work in Creative Writing with English 280 or 281, and only after completion of the Freshman Writing Seminar requirement. Please note that either English 280 or English 281 is the prerequisite for 300-level creative writing courses. English 280 and 281 may satisfy a distribution requirement in your college (please check with your college adviser). English 282–283, 284–285, and 286-281 are approved for the English major.

ENGL 280-281 Creative Writing
Fall, spring, summer, winter session. 3 credits. Prerequisites: completion of the Freshman Seminar requirement. Limited to 18 students.

Majors and prospective majors, please note. Although recommended for prospective English majors, English 280–281 cannot be counted towards the 36 credits required for completion of the English major. It is a prerequisite for 300-level courses in writing, which count towards the major. English 280 is not a prerequisite for English 281.

An introductory course in theory, practice, and reading of prose, poetry, and allied forms. Students are given the opportunity to try both prose and verse writing and may specialize in one or the other. Many of the class meetings are conducted as workshops.

ENGL 382-383 Narrative Writing
Fall, spring. 3 credits. Each section limited to 15 students. Each section limited to 15 students. Previous enrollment in English 280 or 281 recommended. Prerequisite: permission of instructor, normally on the basis of a submission of written work are required. In the case of a well-written sample, the instructor may recommend the student for advanced work. The course is designed to develop the student’s understanding of how to write fiction and/or nonfiction. Students are given the opportunity to try both prose and verse writing and may specialize in one or the other. Many of the class meetings are conducted as workshops.
ENGL 480-481 Seminar in Writing  
Fall: 480; spring 481. 4 credits each term. Each section limited to 15 students. Students are encouraged to take English 280 or 281 and at least one 300-level writing course. Prerequisites: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, L. Herrin; sec. 2, S. Vaughn. Spring: M. McCoy, S. Vaughn. Intended for those writers who have already gained a basic mastery of technique. Although English 480 is not a prerequisite for 481, students normally enroll for both terms and should be capable of a major project—a collection of stories or poems, a group of personal essays, or perhaps a novel—to be completed by the end of the second semester. Seminars are used for discussion of the students' manuscripts and published works that individual members have found of exceptional value.

200-Level Courses Approved for the Major

Students may take up to four 200-level courses for credit toward the English major.

Introductions to Literary Studies

These courses have no prerequisites and are open to freshmen and non-majors as well as majors and prospective majors.

ENGL 201-202 The English Literary Tradition 

201: Fall. 4 credits. Open to undergraduates who have completed the freshman writing requirement. English 201 is not a prerequisite for 202. This course may be used as one of the three pre-1800 courses required of English majors. G. Teskey. An introduction to the study of English literature examining its historical development and many of its highest achievements. Works to be read include Sir Gawain and the Green Knight, selections from Chaucer’s Canterbury Tales and Spenser’s Faerie Queene, Shakespeare’s A Midsummer Night’s Dream, poems by Jonson, Donne, and Herbert, and Milton’s Paradise Lost.

202: Spring. 4 credits. F. Bogel. A survey of English literature from the late seventeenth century to the early twentieth century, including poetry and some prose works from the Restoration and eighteenth century, the Romantic period, the Victorian period, and Modernism. Lectures and discussion sections.

ENGL 204 Mostly Poems and Stories  

Spring. 4 credits. R. Parker. Introduction to the pleasures of close reading, with special emphasis on analyzing the forms, structures, and rhetorical dynamics that characterize poems, prose narratives, and drama and contribute to their appeal. Some attention also to the ways that ideologies of power, whether those of gender, race, and cultural difference, impinge on how readers interpret literary works. The syllabus will include works from older as well as more recent periods; among them this semester will be works by Whitman, Elizabeth Bishop, and Seamus Heaney, stories by Nathaniel Hawthorne, Flannery O’Connor, and Julian Barnes; and such novels as George Eliot’s Adam Bede and Toni Morrison’s Jazz.

ENGL 208 Shakespeare and the Twentieth Century (also Comparative Literature 208)  

Fall. 4 credits. W. Cohen. What is the relationship between Shakespeare’s plays in their own time and the various ways they have functioned in modern culture? We will compare selected works of Shakespeare with their adaptations in fiction, theater, film, the educational system, government, and popular culture. The discussion of each play will be organized around one or more critical approaches. The course as a whole will attempt to provide a systematic introduction to the contemporary study of literature and culture.

ENGL 227 Shakespeare  

Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. B. Correll. The course will survey formal, historical and thematic aspects of representative Shakespearean drama: comedies, tragedies and history plays. (Majors and non-majors, see also Engl 327 Shakespeare.)

Major Genres and Areas

These courses are designed for freshmen and sophomores but are open to all students.

ENGL 235 Major Poets  

Spring. 4 credits. J. Culler. Intensive reading in the work of eight to ten poets chosen to represent important periods and modes of poetry. Poets to be studied may include William Shakespeare, John Milton, John Keats, Emily Dickinson, Walt Whitman, Gerard Manley Hopkins, Robert Frost, and A. R. Ammons.

ENGL 238 Readings in English Literature Spring. 3 credits. This course does not satisfy requirements for the English major. R. Farrell. English literature to 1800: This course is intended for non-majors, and is open to any student interested in literature and culture. Authors covered include Chaucer, Shakespeare, Jonson, Swift, and Pope. There will be a take-home mid-term and final, both open book. Students will be strongly encouraged to follow their own interests in two brief papers.

ENGL 274 Scottish Literature and Culture  

Fall. 4 credits. B. Correll. An introduction to the kinds of cultural forms we encounter in our studies and in our lives and to some of the literature that has been written about them. Examples will be selected from a range of texts, both “high” and “low”—literature, cinema, advertisements, music—chosen from historical and contemporary sources. The course will follow a lecture-discussion format.

ENGL 255 African Literature  

Spring. 4 credits. B. Jeyifo. An introduction to major African writers and literary traditions. Authors to be studied may include Wole Soyinka, Chinua Achebe, Bessie Head, Ayi Kwei Armah, Ama Ata Aidoo, Tayeb Salih and Ousmane Sembene.

ENGL 265 Introduction to American Indian Literatures (also American Studies 265)  

Fall. 4 credits. D. Moore. An introduction to Native American literatures. We will read a variety of genres—novels, short fiction, autobiography, poetry, oral traditions—spanning American publications through the last two centuries. Issues arising from the texts include aesthetics of orality and literacy; cultural change and survival; colonial identity politics; mythic histories; world views and ideologies; and contemporary political sovereignty. A goal of the course is to read historical American contexts through the eyes of Native American texts.

ENGL 266 Ethnic Literature: Bridges and Boundaries  

Spring. 4 credits. K. Shanley and S. Wong. The American literature that, William Carlos Williams noted, came from the mouths of Polish mothers” has also been shaped by the oral and written traditions of Native Americans, African Americans, U.S. Latinos, and Asian Americans whose literary production will be examined in this course. Works by writers in these traditions will be studied as sites marking the emergence of a contemporary American language and literature capable of representing the social realities of a multicultural nation. This course will focus especially on how each ethnic tradition uses the contested territories of geography, language, and gender in texts that both refer to and imaginatively construct communities and traditions based on collective experience.

ENGL 265 Contemporary African American Literature  

4 credits. To be offered 1998-99.

ENGL 274 Scottish Literature and Culture  

Fall. 3 or 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. The course may be taken for 3 or 4 credits; those taking it for 4 credits will complete an additional writing project. This course only counts towards the English major when taken for 4 credits. Non-majors are welcome. Enrollment limited to 20. T. Hill and H. Shaw. Scotland was an independent kingdom during most of its history. Although it is now politically united with England, it preserves its cultural distinctiveness. This course provides an introduction to Scottish literature and its cultural context. We will focus on important Scottish literary texts, with special emphasis on the medieval period and the eighteenth century.
and nineteenth centuries. The course should appeal to those who wish to learn more about their Scottish heritage, to those who wish to view in a new perspective works normally considered monuments of "English" literature, and to those who simply wish to know more about a remarkable culture and the literature it produced. Some of the texts will be read in Scots, but no familiarity with Scots or earlier English is presumed. Authors studied will include Henryson, Dunbar, Anonymous (the Scottish Ballads), Hume, Burns, Scott, Hogg, Stevenson, and Grasick Gibbon.

ENGL 275 The American Literary Tradition (also American Studies 275)
Fall and spring. 4 credits. Fall, B. Maxwell; spring, D. Moore.
The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

ENGL 295 The Essay in English #
Spring. 4 credits. Prerequisite: completion of freshman seminar requirement. This course may be counted as one of the three pre-1800 literature courses required of English majors. L. Fakundiny.

ENGL 299 The Essay in English #
Spring. 4 credits. Prerequisite: completion of freshman seminar requirement. This course may be counted as one of the three pre-1800 literature courses required of English majors. L. Fakundiny.

Special Topics

ENGL 263 Studies in Film Analysis
Fall and spring. 4 credits. Enrollment limited to 20 students. Preference given to English majors. L. Bogel.
Fall: Special topic: Interpreting Hitchcock. Through detailed analysis of at least twelve of Hitchcock's major films—from British silents such as The Lodger and the British talkies of the 30's (The Thirty-Nine Steps) to the early 40's work in Hollywood (Shadow of a Doubt, Notorious), and major American films of his late period (Rear Window, The Birds)—we will consider Hitchcock as a major technical and stylistic innovator in the history of cinema. As texts for psychoanalytic and feminist approaches to study, his films invite questions about film language, the ethics of spectatorship, and the nature of desire and sexuality. Frequent short essays and viewing exercises encourage students to engage through their writing the course’s critical concerns. Students must be free to attend regular evening screenings and video showings of the films once or twice a week. Lab fee.

ENGL 268 The Culture of the 1960s
Spring. 4 credits. P. Sawyer.
The 1960s survive today as a quasi-mythical period and a constant reference-point for contemporary events. But what are the most useful ways to remember that turbulent decade? Was it a time of dangerous experimentation with drugs, sex, and alternative lifestyles, or the start of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated a principled and impassioned critique of American society? How can the experiences of young "boomers" contribute to our understanding of the relation of these films to American culture, about the relation of these films to American culture, about Hollywood's changing constructions of "woman," the "maternal," and the "feminine," and questions about desire, pleasure, fantasy, and ideology in relation to the melodramatic heroine. Required weekly, evening screenings of such films as: Picnic, Now, Voyager, Rebecca, Mildred Pierce; The Women, Imitation of Life; Gilda; Leave Her to Heaven; Gaslight. Regular critical readings, frequent viewing questions, two longer essays, no exam. Students must be free to attend regular evening screenings and video showings of the films once or twice a week. Lab fee.

ENGL 280 Icelandic Family Sagas
Spring. 4 credits. T. Hill.
An introduction to the Icelandic family saga—the "native" heroic literary genre of Icelandic tradition. Texts will vary but will normally include the Prose Edda, the Poetic Edda, Hrafnkleis Saga, Njals Saga, Laxdaela Saga, and Grettis Saga. All readings will be in translation.

ENGL 311 Old English (also English 611)
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.
This course will provide a grounding in the Old English language, and precede the reading of some major texts in poetry, such as The Wanderer and The Battle of Maldon. No previous knowledge of Old or Middle English is required or expected. There will be both a mid term and a final, plus oral reports. Students will be encouraged to follow their own interests. Graduate students will be expected to do a substantial paper, or other research exercise.

ENGL 312 Beowulf (also English 612)
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill.
A close reading of Beowulf. Attention will be given to relevant literary, cultural, and linguistic issues. One semester's study, or the equivalent, of Old English is a prerequisite.

ENGL 319 Chaucer
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.
This course will begin with the study of the major Canterbury Tales, and some of Chaucer's minor works, such as The Book of the Duchess. All works will be read in Middle English, but ample time will be devoted to learning the language, for it is impossible to read Chaucer as a poet without Middle English. Lectures will cover Chaucer's life, society, literary and linguistic context. There will be take home mid- and end-of-term exams, and student presentations.

ENGL 320 Literature of the English Renaissance (1500-1660)
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Adams.
This course will focus on major works of English literature from the Renaissance period. Students will examine the works of Shakespeare, Marlowe, Webster, Jonson, Donne, Herbert, Bacon, Marvell, Suckling, Love, Burton and Browne, and others. Students will be encouraged to follow their own interests. Graduate students will be expected to do a substantial paper, or other research exercise.
ENGL 321 Spenser and Malory
4 credits. Limited to 45 students. This course may be used as one of the three pre-1800 courses related to English majors. To be offered 1998-99.

ENGL 325 The Culture of the Renaissance II (also Comparative Literature, History, E. Artis 364). Fall. 4 credits. C. Kaske and W. Kennedy. For complete description, see Comparative Literature 362.

ENGL 327 Shakespeare
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Limited to 25 students. C. G. O. Petrie.

For both non-majors and majors in English who wish to encompass the reading and small-class discussion of some ten representative plays in the work of a single semester.

ENGL 328 The Bible
Spring. 4 credits. G. Teskey.
The purpose of the course is to provide students of English literature with a basic knowledge of that literature's most important, underlying text. Students will learn not only the significance of the division of the Bible into "old" and "new" testaments but of the important divisions within those two parts. The Old Testament will be examined with an eye to generic differences between, for example, the early narrative books (Genesis and Exodus), the books of the law (e.g., Leviticus), the prophetic books (e.g., Ezekiel), and the epic, historical books (e.g., first and second Kings). The New Testament will likewise be examined with an eye to differences: between the four gospel accounts of Jesus, between the various episodes of Paul on the meaning of Jesus for the institution of the church, and between the relatively straightforward history of the early church (in Acts) and the final, apocalyptic vision of the end of history (Revelation). Some account will be given of the historical contexts for the various parts of the Bible, in particular the fate of the Hebrew nation from about the sixth century B.C. and of the early Christian church under the Roman empire. But the main purpose of this course will be to elucidate the literary, indeed symbolic, historiography of the Bible, that is, of the poetic idea of human experience in time as having a total form. This form lay behind the organization of a vast array of separate writings in Hebrew, Aramaic, and Greek into one surprisingly coherent design. It is not the writings from which the Bible was made but rather this inner design that William Blake was referring to when he called the Bible "the great code of art." The King James Version (1611) will be used.

ENGL 329 Milton
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. G. Teskey.

An introduction to the life, poetry, and thought of John Milton, one of the most important English poet after Shakespeare.

ENGL 330 Restoration and Eighteenth-Century Literature
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. N. Sacchamano.

Close reading of a variety of genres (poetry, fiction, drama, autobiography) will be guided by such topics as the nature of satire, irony, and mock-forms; the languages of the ridiculous and the sublime; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

ENGL 333 The Eighteenth-Century English Novel
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Bogel.

A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction; romance, realism, satire, and the gothic; heroic and mock-heroic modes; sentiment, sensibility, and sexuality; race and gender; and the forms and uses of narrative. Readings may include Behn's Oroonoko, Defoe's A Journal of the Plague Year, Richardson's Clarissa, Fielding's Joseph Andrews, Geddes's Memoir of a Woman of Pleasure, Johnson's Rasselas, Walpole's The Castle of Otranto, Sterne's Tristram Shandy, Moraes's The Man of Feeling and Auent's Pride and Prejudice.

ENGL 335 European Drama 1660-1900: Molière to Ibsen (also Comparative Literature 336)
Spring. 4 credits. R. Parker.

For complete description, see Comparative Literature 336.

ENGL 336 American Drama and Theatre (also Theatre Arts 336)
Spring. 4 credits. J. E. Gainor.

For complete description, see Theatre Arts 336.

ENGL 340 The English Romantic Period
Fall. 4 credits. C. Chase.

Readings in various writers from the late 1780s through the 1820s—among them Blake, Burke, Wordsworth, Coleridge, Byron, Mary Shelley, Percy Shelley, and Keats—with major emphasis on poetry but substantial collateral attention also to prose fiction, drama, letters, and criticism. The course will be centered both with formal experiments in narrative, lyric, and dramatic representation and with political and cultural contexts in an age of national reform and international revolution.

ENGL 345 The Victorian Period
Spring. 4 credits. S. Siegel.

How did the Victorians view themselves? This course will explore the controversies that divided literary culture: Should universities award higher degrees to women? Is "manliness" revealed through "character" or "behavior"? What kind of behavior is "masculine"? Does the study of "primitive men" reveal truths about the present? Should the "Colonies" be allowed to rule themselves? Should women be allowed to vote? Should some artworks be censored? Do machines degrade the works? Can "esthetic" experience replace "religious" experience? Is our time marked by progress or decline? Readings will include the poetry of the Brownings, the Rossettis, Swinburne, Tennyson and Yeats, plus Arnold, Carlyle, Morris, Pater, and Ruskin; paintings by Burne-Jones, Hunt, Shaw, and Whistler; and three novels: Great Expectations, The Mill on the Floss and The Picture of Dorian Gray.

ENGL 350 The Modern Tradition I: 1890-1930
Fall. 4 credits. D. Schwartz.

Critical study of major works by Hardy, Conrad, Lawrence, Joyce, Woolf, Eliot, Yeats, Hopkins, Wilde, W. H. Davies, and T. S. Eliot. While the emphasis will be on close reading of individual works we shall place the authors and works within the context of literary and intellectual history. The course will seek to define the development of literary modernism (formal but not exclusively) and to relate literary modernism in England to that in Europe and America as well as to other intellectual developments. We shall be especially interested in the relationship between modern literature and modern painting and sculpture; on occasion, we shall look at slides.

ENGL 351 The Modern Tradition II: Modernism and the Two World Wars
Spring. 4 credits. English 350 is not a prerequisite. M. Hite.

This class will examine the relation of important English, Irish and U.S. modernist poetry, fiction and essays to the violence and ideological upheavals of the first half of the century. We will pay special attention to working and personal correspondences between some (but not all) of the following writers: W. B. Yeats, Ezra Pound, H. D., T. S. Eliot, James Joyce, Mina Loy, Virginia Woolf, W. H. Auden, Marianne Moore, Ford Madox Ford and Jean Rhys. Requirements include online coursework discussion assignments, two critical papers, a take-home midterm and a take-home final.

ENGL 353 Postcolonial Literature
Spring. 4 credits. S. Mohanty.

Topic: Modern Indian Literature and Culture. A survey of twentieth-century literature, film, and other cultural productions from the Indian subcontinent. Our approach will be thematic and historical, and the course will include some works by historians, anthropologists, and social theorists (e.g., Karl Marx, Bipan Chandra, M. N. Srinivas, Romila Thapar). Literary works by Anglophone writers as well as those from various regional traditions such as Hindi, Oriya, Marathi, Bengali, and Tamil (to be read in translation). Texts will be selected in part to represent the variety and diversity of styles, attitudes, and voices that constitute modern "Indian" writing—from R. K. Narayan and Rabindranath Tagore to Nissim Ezekiel and Jayanta Mohapatra, and from Salman Rushdie and Anita Desai to Gopinath Mohanty, Mahasweta Devi, and Agha Shahid Ali. Films and videos will be used to deepen our understanding of emerging cultural trends and social movements.

ENGL 355 Decadence (also Comparative Literature 355 and Women's Studies 355)
Fall. 4 credits. E. Hanson.

"My existence is a scandal," Oscar Wilde once wrote, summing up in an epigram the effect of his carefully cultivated style of perversity and paradox. Through their valorization of aestheticism and all that was considered artificial, unnatural, or morbid, the so-called "decadent" writers of the late-nineteenth century sought to free the pleasures of beauty and sexual desire from their more conventional ethical moorings. We will focus primarily on the various ways that decadence
became a powerful trope for the articulation of proscribed sexual pleasures. We will focus in particular on five writers, Charles Baudelaire, Leopold von Sacher-Masoch, J. K. Huysmans, Walter Pater, and Oscar Wilde. Topics for discussion will include homophobia and sexual encoding, androgyny and sexual inversion, sodomy and Satanism, lesbianism and vampirism, cultural and linguistic difference, paranoia, masochism and mysticism, chastity and sublimation, Catholicism and Hellenism, and the dandy.

ENGL 356 Postmodernist Fiction
Fall. 4 credits. M. Hite.
This class will explore experimental (i.e., weird, counterrealist, "difficult") fiction written in the post-World War II period by some (but not all) of the following writers: Kathy Acker, Margaret Atwood, John Barth, Jorge Luis Borges, Christine Brooke-Rose, Angela Carter, Theresa Hak Kyung Cha, Robert Coover, Don DeLillo, Nathaniel Hawthorne, Vladimir Nabokov, Thomas Pynchon, Ishmuel Reed, Salman Rushdie, Joanna Russ, Meredith Steinbach, Kurt Vonnegut, Fay Weldon. We will also read some criticism and theory dealing with writing and conditions, or movement described as "postmodern." Requirements include online newsgroup participation, two critical papers, a take-home midterm and a take-home final.

ENGL 361 Early American Literature
(also American Studies 361)
Fall. 4 credits. This course may be used as one of the three-1800 Courses required of English majors. S. Samuels.
An exploration of national identities in the formative British colonial period, including the relation of sexualities, religions, narrative practices, and encounters with other cultures to the contested formulations of destiny and free will in determining and explaining an American national character. Moving from early contact narratives through the conflicts that led to revolution and beyond, this course will consider American writing from the 1630s to the 1830s; among other sources, we will read sermons, diaries, journals and poetry of the Puritans, captivity narratives, autobiographies and how-to manuals; in the 1830s, we will approach the literature of the last fifty years mindful of this double perspective of closeness and distance, familiarity and strangeness. Topics will include the particular difficulties of judging contemporary writing, the establishment, maintenance, and decay of literary reputations within the context of cultural institutions; the literary disruption of Cold War consensus models, the redefinitions of American literature in the wake of the social movements of the period; and the importance of poetry and poetics; and problematic populist revivifications of poetry via rap and performance poetry. The reading list will be chosen from the following: fiction by Saul Bellow, Paul Bowles, Carson McCullers, Jack Kerouac, Vladimir Nabokov, Tllie Olsen, Alexander Trocchi, N. Scott Momaday, Walter Abish, Don DeLillo, and Carolivia Herron; poetry by James Baldwin, Norman Mailer, and Joan Didion. Time permitting, we will look at a recent collection of illustrated stories, Ben Katchor's Julius Knipl, Real Estate Photographer.

ENGL 362 The American Renaissance
(also American Studies 362)
Spring. 4 credits. J. Porte.
American writing from the 1830s through the 1850s, with emphasis on the major literary achievements of Emerson, Poe, Hawthorne, Thoreau, Melville, Whitman and Dickinson. We shall also study Douglass's 1845 Narrative and Stowe's Uncle Tom's Cabin.

ENGL 363 The Age of Realism and Naturalism (also American Studies 363)
Spring. 4 credits. J. Goldsby.
Literary history tells us that realism was an aesthetic movement that emerged in American fiction at the turn of the 19th century. Cultural histories of the era tell us that realism emerged as a social ideal debated by Americans as they coped with the revolutionary changes that turned their worlds upside down between the Civil and First World Wars. This course moves between these two accounts in order to appreciate the varied styles and issues that comprised the literature of American realism at the turn of the 19th century. Possible authors include Charles Chesnutt, Stephen Crane, Rebecca Harding Davis, Theodore Dreiser, Charlotte Perkins Gilman, William Dean Howells, Henry James, Mark Twain, and Edith Wharton.

ENGL 364 American Literature Between the Wars (also American Studies 365)
Spring. 4 credits. L. Herrin.
This course will concern itself with American writers between the two World Wars. Fiction writers may include Faulkner, Hemingway, Porter, Fitzgerald, Richard Wright, and others. Poets will include William Carlos Williams and T. S. Eliot and other poets. We will also read non-fiction prose writers, and, perhaps, dramatists (O'Neill). Interpretive papers and a final.

ENGL 365 American Literature Since 1945
(also American Studies 369)
Spring. 4 credits. B. Maxwell.
At one moment the literature of the last half of the twentieth century may appear wholly contemporary, and at the next sunken or embedded in a world that is historically and aesthetically remote. We will approach the literature of the last fifty years mindful of this double perspective of closeness and distance, familiarity and strangeness. Topics will include the particular difficulties of judging contemporary writing, the establishment, maintenance, and decay of literary reputations within the context of cultural institutions; the literary disruption of Cold War consensus models, the redefinitions of American literature in the wake of the social movements of the period; historicity and referentiality in the period; the redefinitions of American literature in the wake of the social movements of the period; the redefinitions of American literature in the wake of the social movements of the period; and the importance of poetry and poetics; and problematic populist revivifications of poetry via rap and performance poetry. The reading list will be chosen from the following: fiction by Saul Bellow, Paul Bowles, Carson McCullers, Jack Kerouac, Vladimir Nabokov, Tllie Olsen, Alexander Trocchi, N. Scott Momaday, Walter Abish, Don DeLillo, and Carolivia Herron; poetry by James Baldwin, Norman Mailer, and Joan Didion. Time permitting, we will look at a recent collection of illustrated stories, Ben Katchor's Julius Knipl, Real Estate Photographer.

ENGL 366 The Nineteenth-Century American Novel (also American Studies 366)
# To be offered 1998-99.

ENGL 370 Nineteenth-Century English Novel (also American Studies 370)
# 4 credits. To be offered 1998-99.

ENGL 371 American Poetry to 1950
(also American Studies 371)
# 4 credits. To be offered 1998-99.

ENGL 372 English Drama to 1700 (also Theatre Arts 372)
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. S. McMillin. Major plays and other events in the English theatre, from the medieval craft cycles through the age of Shakespeare and into the Restoration period. Writers include Marlowe, Kyd, Shakespeare, Dekker, Jonson, Middleton, Beaumont and Fletcher, Webster, Wycherley and Congreve.

ENGL 373 English Drama from 1700 to the Present (also THETR 373)
# 4 credits. To be offered 1998-99.

ENGL 374 Nineteenth-Century American Women Writers (also Women's Studies 374 and American Studies 374)
Spring. 4 credits. L. Brown.
In this cross-cultural examination of nineteenth-century American women writers, we will contrast a variety of nineteenth-century works of fiction, poetry, and non-fiction produced by black American writers from the period of the Harlem Renaissance, to the present. Readings will include works by authors such as Louisa May Alcott, Lydia Marie Child, Kate Chopin, Sui Sin Far, Margaret Fuller, Pauline Hopkins, Sarah Winnemucca Hopkins, Frances Harper, Harriet Beecher Stowe, and Harriet Wilson.

ENGL 375 Survey in African American Literature to 1917 (formerly English 369) (also American Studies 375)
Fall. 4 credits. J. Porte.
This course surveys the first half-century of African American novel production (1850-1912), with these as our founding propositions: what prompts African American authors to embrace the novel as a specific mode of expression in these years? How do they incorporate the major traditions of American novel writing (e.g., romance, sentimentalism, realism, naturalism, and modernism) into their writing? What are the social fictions of race that not only require but inspire these writers to invent narrative strategies that challenge the conventions of the novel as such? Authors will include Frederick Douglass, William Wells Brown, Harriet Jacobs, Charles Chesnutt, Pauline Hopkins, Paul Laurence Dunbar, and James Weldon Johnson.

ENGL 376 Survey in African American Literature: 1918 to present
Spring. 4 credits. H. Spillers.
This course will select its readings from the genres of poetry, drama, and non-fiction produced by black American writers from the period of the Harlem Renaissance, to the present. Readings will include poems by Harlem Renaissance poets, the poems of African-American modernism, i.e., Gwendolyn Brooks and Robert Hayden, and some of the poetry of the Black Arts Movement of the 60s, by way of Leroi Jones/Imamu Baraka's and Larry Neal's Black Fire, plays by Lorraine Hansberry, Ed Bullins, and August Wilson, non-fictional and fictional writings by Malcolm X, Martin Luther King, Nella Larsen, Jean Toomer, Zora Neale Hurston, Toni Morrison, and Nate Mackey. (Cane, The Autobiography of an Ex-Colored Man, Passing, The Autobiography of Malcolm X, Letter from an Birmingham Jail, Black Boy, Invisible Man, Flight to Canada, Ombreding Tales, Middle Passage, Jazz, and The Bedouin Hornbook will be among the selected texts for the spring term.) The course is designed for majors, but will be open to all interested students.

ENGL 377 Gay Fiction (also Women's 376)
# 4 credits. To be offered 1998-99.
ENGL 381 Reading as Writing
See complete course description in section headed Expository Writing.

ENGL 382-383 Narrative Writing
See complete course description in section headed Creative Writing.

ENGL 384-385 Verse Writing
See complete course description in section headed Creative Writing.

ENGL 386 Philosophic Fictions
See complete course description in section headed Expository Writing.

ENGL 388-389 The Art of the Essay
See complete course description in section headed Expository Writing.

ENGL 390 Autobiography: Memoir, Memory, and History
Fall. 4 credits. L. Falundo.
Central to this course is the question: how does the life constructed in memoir, through the personal activity of “remembering,” assimilate and position the “public,” or cultural, contexts? How, in other words, does history inhabit memory and how does memory personalize history? How aware is the constructed self (the life that is being remembered) of his or her historical moment, and to what ends is the self historicized in a given memoiristic text? A core list of readings might be chosen from the following modern works in English: Nabokov’s Speak Memory, Wright’s American Hunger (the restored 1991 edition of Black Boy), Hurston’s Dust Tracks on a Road, Hemingway’s A Moveable Feast, Welty’s One Writer’s Beginnings, Crews’s Childhood. The Autobiography of a Place, Soyinka’s Ake. The Years of Childhood, Nir’s The Lost Childhood, Hoffman’s Lost in Translation, Man’s Red Azalea, Suleri’s Meatless Days, Gates’s Colored People, Wolf’s In Pharaoh’s Army, Conway’s Road from Coorain, Lessing’s Under My Skin, Santiago’s When I was Puerto Rican, Kari’s The Liars Club. Additional texts—considered (in excerpt) for their self-conscious and/or fictive enactments of memoiristic conventions—might include Kaplan’s French Lessons, Stein’s The Autobiography of Alice B. Toklas, Naipaul’s A Way in the World. Also required: a critical reading of two substantial critical papers or a critical paper and an essay-length memoir.

[ENGL 391 Irish Studies: Since the Eighteenth Century
4 credits. To be offered 1998-99]  

ENGL 392 Asian American Literature (also Asian American Studies 392 and American Studies 392)
Fall. 4 credits. S. Wong.
This course will introduce students to a range of writing by Asian Americans and to some critical issues concerning the production and the reception of Asian American texts. In reading through selected works of prose, poetry and drama, we will be asking questions about the relation between literary forms and the sociohistorical context within which they take on their meanings, and about the historical formation of Asian American identities.

ENGL 393 Survey of U.S. Latino/a Literature (also LSP 393)
Spring. 4 credits. H. M. Vira Montes.
This course seeks to introduce students to the growing body of literature across time, space and genre (poetry, fiction, theater, performance art, testimonial narrative) that is being produced by the various Latina/o communities that have maintained or recently established a strong presence in the “United States of America.” Concurrent with our study of literature as belles lettres the course will examine how Latina/o authors of various heritages—Chicano (Mexican American), Puerto Rican, Cuban American, Dominican American, Salvadoran American and “Mixed-Blood”—converge and diverge as they explore issues of race and class, gender and sexuality, as well as ideology, identity and culture in general. For example, what is the relation of a given text to the history of the Latino group to which the author belongs? How do the various literary forms and formats deployed by Latina/o authors interact with particular historical exigencies such as the various Black, Native American and Latino Civil Rights Movements? What, for instance, is the significance of Spanish, Caló, Nahua, English and various forms of bilingualism and multiculturalism to the “Huysmon” verse in the 1960s? Furthermore, how are various paradigms of cultural nationalism revisited in subsequent eras by Latinas and Latinos? How is popular culture manifested in these texts, and what are the various ideological statements being made by these representations? What do these authors reveal about the limits of various sociological models of analysis such as notions of acculturation, assimilation, accommodation? What does post-modernism mean for U.S. Latinos, or should this question be inverted? And, in general, how are various power relations-articulated along gender, race, class and culture—negotiated? Authors examined include Julia Alvarez, Lorna Dee Cervantes, Junot Diaz, Cristina García, Oscar Hijuelos, Cherrie Moraga, Willie Perdomo, Miguel Piñero, Tomás Rivera, Esmeralda Santiago, Helena María Viramontes, and others.

ENGL 394 Topics in American Indian Literature (also American Indian Studies 394 and American Studies 394)
Spring. 4 credits. D. Moore.
Native Cultural Studies. The course is an interdisciplinary exploration of the literature, history, and politics of various American cultures and their conceptual universes. Questions range from comparative studies of land-based versus transcendent religious to issues of cultural appropriation, economic development, tribal sovereignty, and other contemporary contexts of Native American literature.

[ENGL 395 Video: Art, Theory, Politics (also Theatre Arts 395)
4 credits. Not offered 1998-99]

Courses for Advanced Undergraduates

Enrollment in courses at the 400 level is generally limited by prerequisite or permission of the instructor.

ENGL 401 The Sexual Child (also English 401 American Society for the Humanities 418)
Fall. 4 credits. E. Hanson.
For complete course description, see Society for the Humanities 418.

ENGL 402 Literature as Moral Inquiry
Fall. 4 credits. To be offered 1998-99.

[ENGL 403 Studies in American Poetry
4 credits. Not offered 1998-99]

ENGL 404 History into Fiction: Nazis and the Literary Imagination (also Comparative Literature 404 and German Studies 414)
Fall. 4 credits. E. Rosenberg.
The twelve years of Hitler’s rule remain the most critical, “longest” years of the 20th century. We shall read some seven or eight texts by Anglophone and Continental novelists (and a few playwrights and poets) that explore the salient features of the regime: Weimar, Hitler’s scenario and his rise to power (e.g., Mann’s “Mario and the Magician,” Isherwood’s Goodbye to Berlin, Faulkner’s “Percy Grimm”); civilian life in Nazi Germany and the rise of anti-Semitism (Brecht’s “The Jewish Wife” and other one-acters, Sartre’s “Childhood of a Leader,” Grass’s Tin Drum); World War II and the occupation of Europe (Camus’s The Plague, Heinrich Böll’s short fiction, Anne Frank’s Diary); genocide and a glimpse at post-War Germany (e.g., Weiss’ The Investigation, Borowski’s This Way for the Gas, Spiegelman’s Maus, Celan’s “Lyrics by Yvonne Sachs, Anthony Hecht”). Brief ancillary selections by historians and memoirists (Arcndt, Primo Levi, Bruno Bettelheim). Two papers; no exam.

ENGL 405 The Politics of Contemporary Criticism
Fall. 4 credits. S. Moody.
An introduction to some of the major issues in contemporary criticism and theory, with primary focus on such questions as: What is a literary or cultural text? What is interpretation and what are its limits? What views about knowledge, society, and politics underlie particular critical strategies and methodological choices? Drawing on representative essays and books from a variety of critical schools and traditions (from New Criticism to deconstruction, marxism, and feminism), we will examine the competing claims of the various positions and focus on the implications of answers to the above questions in actual critical analysis. Readings from Clanchy Brooks, Paul de Man, Jacques Derrida, Shoshana Felman, Michel Foucault, Hans-Georg Gadamer, Fredric Jameson, Toni Morrison, Barbara Herrnstein Smith, Charles Taylor, and Richard Rorty, among others. Two papers and a weekly journal.

ENGL 407 The Geography of Race (also Asian American Studies 407)
Fall. 4 credits. S. Wong.
The frontier, the Mariboran Man, the open road, riding the rails—just a few of the defining topos of an American understanding of space and its role in the making of Americans. In recent decades, the longstanding—and highly cherished—American romance with mobility has been retooled by its encounter with a postmodern celebration of liminality, border crossing and ephemerality. This course looks at how this encounter holds both promises and perils for minority subject formation, and for the production and the reception of Asian American and African American literature. Other topos to be visited along the way may include nationalism, transnationalism, diaspora, and travelling. Readings will include works by some of the following writers: Gwendolyn Brooks, Carlos Bulosan, Joy Kogawa, Toni Morrison, Li-Young Lee, Bharati Mukherjee, Ann Petry, Frank Chin, Jessica Hagedorn, James Weldon Johnson,
James Baldwin, Carolivia Herron, Theresa Cha, and Shawn Wong.

413 Middle English (also English 613)
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill.
This course surveys the literature of late medieval England, beginning with the cultural, literary, and linguistic collapse of standard Old English and proceeding to the age of Chaucer and perhaps a bit beyond. Readings will move through chronicles, homilies, lyrics, and acknowledged literary masterpieces such as The Owl and the Nightingale, the works of the Pearl poet, selections from Piers Plowman, and other poems from the "alliterative revival."

[ENGL 416 Chaucer and the Politics of Love #]
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 1998-99.]

[ENGL 417 Early Medieval Archaeology and Literature (also English 817, Archeo 417, & 617)
Spring. 4 credits. Permission of the professor is required, and the number of students will be limited to fifteen. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 1998-99.]

420 Objects Lost and Found: Psychoanalysis and the Scene of Reading (also English 620 and Society for the Humanities 420)
Spring. 4 credits. Jacobus.
For complete course description, see Society for the Humanities 420.

[ENGL 423 Seventeenth-Century Lyric #]
4 credits. To be offered 1998-99.]

ENGL 424 Freud and Sex: Trauma and the Object (also English 624 and Society for the Humanities 405)
Fall. 4 credits. M. Jacobus.
For complete course description, see Society for the Humanities 405.

[ENGL 425 Elizabethan and Jacobean Drama #]
4 credits. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 1998-99.]

ENGL 427 Shakespeare #
Fall and Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors.
Fall: Romance and Courtesy C. Levy.
A study of themes and patterns in Shakespeare's later history plays (Richard II, Parts I and II, Henry IV, and Henry V) in the perspective afforded particularly by Castiglione's Book of the Courtier, Machiavelli's Prince, A Mirror for Magistrates, and Sidney's The Countess of Pembroke Arcadia. Among topics to be explored are growth, responsibility, play, order, and community. Two short papers and a term-paper of about ten pages. Each student will conduct class-discussion on topics he or she has explored for two of those papers and on at least one other topic. No final examination.
Spring: Later Shakespeare S. McMillin.
A reading of major plays from the second half of Shakespeare's career, with particular emphasis on Othello and Winter's Tale. Particular attention to the theory of theatre

and acting implied by these texts. Prerequisite: English 327, or a comparable survey of Shakespeare.

ENGL 429 Readings in the New Testament (also Near Eastern Studies 429, Comparative Literature 429 and Religious Studies 429) #
Fall. 4 credits. J. Bishop.
For complete description, see Comparative Literature 429.

[ENGL 431 Studies in Enlightenment (also Women's Studies 431) #]
4 credits. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 1998-99.

ENGL 433 The Invention of Humanity: Passion and Experience in the 17th and 18th Century
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. N. Saccomano.
This course will investigate the role played by the passions in "inventing" the notion of a "common humanity" that has been dominant in our culture for over two centuries. We will examine the ways in which the stress on the body, individual experience, and sexuality in writings of the seventeenth and eighteenth centuries challenges or reinforces definitions of human nature and gave rise to new forms of discourse (auto/biographical essay, genealogical history, novel). Concentrating primarily on literary works of various genres, we will also read some moral and political philosophy. Topics will include the social and political significance of passion from "possessive individualism" to the gender politics of sentimentalism; the "savage" in histories of human nature; and the relationship between the "common humanity" and modernity. We will also examine Rousseau's notion of "common humanity" as a concept for the education of the indigent poor.

ENGL 434 Electronic Art, Cultural Memory, Baroque Theory (also English 634 and Society for the Humanities 421)
Spring. 4 credits. T. Murray.
For complete course description, please see Society for the Humanities 421.

ENGL 437 Fictions of Apartheid and Modes of Liberalism #
Fall. 4 credits. B. Jeyifo.
This course involves a study of selected works of four major contemporary writers from South Africa, Athol Fugard, Nadine Gordimer, Andre Brink, and J. M. Coetzee. The iconography includes drama, fiction, and the essay. Issues to be examined include apartheid and the deformations of a refined modernity, interpellations of racialized and gendered identity by the juridical and cultural texts and practices of apartheid, multiculturalism in the South African context, the place of the aesthetic artifact in the dismantling of apartheid and the transition to a post-Apartheid South Africa.

[ENGL 442 Austen and the Eighteenth Century #]
4 credits. To be offered 1998-99.]

[ENGL 443 The Dandy in London and Dublin: 1790-1890 #]
4 credits. To be offered 1998-99.]

[ENGL 446 Victorian Poetry #]
4 credits. To be offered 1998-99.]

[ENGL 448 The American Short Story #]
4 credits. To be offered 1998-99.]

ENGL 450 The History of the Book
Spring. 4 credits. Limited to 20 students. Prerequisite: permission of the instructor. D. Edely.
A study of the physical object of books printed during the last six centuries. Included are papermaking, typography and printing, bookbinding, and the anatomy of book illustrations; the transmission of texts and bibliographical descriptions of hand-printed and modern trade books. Above all, this is the study of the book as a work of art.

ENGL 454 American Musical Theatre (also Music 490 and Theatre Arts 46)
Spring. 4 credits. Prerequisite: English 272 or Theatre Arts 240-41 plus ability to read music at the level of Music 105 S. McMillin.
A close reading of some seven or eight leading examples of the American musical, together with their sources, from Showboat to Sweeney Todd. A chronological approach will give a historical basis to the course, but the prime concern will be with learning how to analyze musical drama and how to handle the problems and opportunities of interpretation integral to this complex theatrical form. Readings will include Rogers and Hammerstein's Carousel and its source, Molnar's Liliom; the Gershwin's Porgy and Bess and its source, Dubose Heyward's novel Porgy; Loesser and Burrows's Guys and Dolls, and its source, stories by Damon Runyon; Bernstein's West Side Story and its source, Romeo and Juliet.

ENGL 457 The Pathological Public Sphere (also English 657 and Society for the Humanities 409)
Fall. 4 credits. M. Selzer.
For complete course description, see Society for the Humanities 409.

[ENGL 459 Contemporary British Drama #]
4 credits. To be offered 1998-99.]

ENGL 463 Problems in the Novel: Murder and Crimewriting
Spring. 4 credits. M. Selzer.
An investigation of the representation of murder across a range of novels, non-fictional accounts, and film. Focus on turn of the century and recent materials.

ENGL 465 Proseminar in American Studies (also AmSt 465)
Spring. 4 credits. J. Porte.
For complete description, see American Studies 465.

ENGL 466 Studies in American Fiction: 1870-1915 (also American Studies 467)
Fall. 4 credits. Prerequisite: a lower-level course in American literature. Limited to 15. J. Porte.
A study of novels and stories by such writers as Mark Twain, Henry James, William Dean Howells, Sarah Orne Jewett, Stephen Crane, Kate Chopin, Theodore Dreiser, Gertrude Stein, Edith Wharton, James Weldon Johnson, and Willa Cather.

[ENGL 468 Studies in American Fiction: 1870-1915 (also American Studies 467)
Fall. 4 credits. To be offered 1998.]

ENGL 469 William Faulkner
Fall. 4 credits. H. Spillers.
This course will examine selected writings of William Faulkner, beginning with some of the early novels (Sartoris, The Birds of the-Past, Light in August, Absalom, Absalom!) and concluding with A Fable. We will consider Faulkner’s impact as a maker of myth and as one of the leading figures of a literary discourse that creates a modernist sensibility in American letters. As a socially written writer, Faulkner is traditionally confined to the character study of exotic types, but his systematic functional exploration of “violence and the sacred” provides a powerful clue to the larger issue of national identity. Faulkner, in his own terms, dared to imagine “culture” as a problem for fiction. This course will attempt to consider the outcome.

ENGL 470 Studies in the Novel: Reading Joyce’s Ulysses
Spring. 4 credits. D. Schwarz.
A thorough episodic-by-episodic study of the art and meaning of Joyce’s Ulysses. We shall place Ulysses in the context of Joyce’s canon, Irish culture, and literary modernism. We shall explore the relationship between Ulysses and other experiments in modernism—especially painting and sculpture—and show how Ulysses redefines the concepts of epic, hero, and reader. We shall discuss how Ulysses raises major issues in literary study and tests various critical and scholarly approaches. Such a self-conscious inquiry into theories and methods should prepare students to confront other complex texts. No previous experience with Joyce is required.

ENGL 471 American Indian Women’s Literature (also Women’s Studies 471 and American Indian Studies 471)
Fall. 4 credits. K. Shanley.
Through a variety of genres—fiction, poetry, the non-fictional essay, and autobiography—as well as media other than writing, we will explore what it means and has meant to be an indigenous woman in North America. Although our focus will be on American Indian women in the United States, we will touch on the experiences of Canadian Native women. Beginning with early tribal histories as expressed in the autobiographies, we will look at the way Indian women fit in their respective cultures, their roles in their families and communities, and the geographical and inter-cultural circumstances of their lives. The most famous Indian women such as Pocahontas and Sacagawea—have earned their places in American mainstream culture based on heroism enacted primarily to benefit non-Indians. How historically accurate are such portrayals and how representative are such women of other Native women? These and many other questions will guide us throughout the term. In addition to works about/ by historical figures, we will read works by well-known contemporary writers such as Leslie Silko, Louise Erdrich, Beth Brant, Joy Harjo, and others. The student’s grade will be based on two formal papers and a number of informal writing assignments and reports. Background in American Indian history is not required.

ENGL 480-481 Seminar in Writing
Fall, spring. 4 credits. See complete description in section headed Creative Writing.

ENGL 482 Forms of Poetry
Fall. 4 credits. R. Morgan.
Part survey of the evolution of forms in poetry in modern English. In a 3-hour workshop, the course will focus on the formal aspects of poetry from the time of Sir Thomas Wyatt to the early 20th century. Students will write examples of the forms studied and give short presentations in class. Particular attention will be paid to the word forms from other languages and earlier cultures have been introduced and adapted, reinvigorating poetry in English, for example, the Italian sonnet, the French villanelle, the classical ode, and the Chinese Tang lyric.

ENGL 481 Honors Seminar I
Fall. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.

ENGL 482 Honors Seminar II
Spring. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.

Section I: Writing the Civil War (also American Studies 402) S. Samuels.
This course will consider 19th-century male and female American writers who take on the story of the war. We will pay attention to accounts of wounding, healing, violence, slavery, romance, and nation-building enterprises and will read authors such as Melville, Whitman, Stowe, Alcott, Southworth, and Child. Course requirements will include in-class presentations, short research projects, and a longer research paper.

Section II: Narrators and Readers: Austen, Eliot, Forster, H. Shaw
A close look at representative works by three authors central to the classic realist novel. We will be particularly interested in how novelists use their narrators to share complex visions of life in society. Students should emerge from the course with a richer sense of how to read these three novelists and others, an acquaintance with a variety of critical approaches, and a notion of how one goes about doing extended writing on narrative fiction. Short papers and a longer writing project.

ENGL 483 Honors Essay Tutorial I
Fall or spring. 4 credits. Prerequisites: senior standing and permission of Director of the Honors Program.

ENGL 484 Honors Essay Tutorial II
Fall or spring. 4 credits. Prerequisites: English 493 and permission of Director of the Honors Program.

ENGL 495 Independent Study
Fall or spring. 2-4 credits. Prerequisites: Permission of departmental adviser and director of undergraduate studies.

Courses Primarily for Graduate Students

Permission of the instructor is a prerequisite for admission to courses numbered in the 600s. These are intended primarily for graduate students, although qualified undergraduates are sometimes admitted. Undergraduates seeking admission to a 600-level course should consult the instructor. The list of courses given below is illustrative only; a definitive list, together with course descriptions and class meeting times, is published in a separate department brochure before course enrollment each term.

Graduate English Courses for 1997-98

ENGL 600 Colloquium for Entering Graduate Students
Fall

ENGL 602 Literature and Theory (also English 502, Comparative Literature 302, and Comparative Literature 322)

ENGL 604 Paleography, Bibliography, and Reception History for 14th-17th Century Literature

ENGL 611 Old English (also English 311)

ENGL 613 Middle English (also English 413)

ENGL 615 Piers Plowman

ENGL 624 Freud and since: Trauma and the Object (also English 424 and Society for the Humanities 405)

ENGL 627 Studies in Shakespeare: Shakespearean Tragedy

ENGL 636 Richardson and Fielding

ENGL 641 Studies in Romantic Writing: Byron, Shelley, Keats, and the Issue(s) of Romanticism

ENGL 649 Victorian Fiction and the Sphere (also English 457 and French Literature 703 and Theatre 703)

ENGL 657 The Pathological Public Sphere (also English 457 and Society for the Humanities 409)

ENGL 665 Studies in Early American Literature

ENGL 685 Reconstructing the Era: Nineteenth Century African American Women’s Literature and Society (also Women’s Studies 685)

ENGL 695 Race, Colonialism, and Contemporary Theory

ENGL 703 Theorizing Film: Race, Nation, Psychoanalysis (also French Literature 703 and Theatre 703)

ENGL 780.1 MFA Seminar: Poetry

ENGL 780.2 MFA Seminar: Fiction
GEOLOGICAL SCIENCES

As an intercollege unit, the Department of Geological Sciences offers degree programs in both the College of Arts and Sciences (B.A. degree) and the College of Engineering (B.S. degree).

We live on a planet with finite resources and a finite capacity to recover quickly from human-induced environmental stresses. It is also a powerful planet, with geologic hazards such as earthquakes and volcanic eruptions that alter the course of history with little prior warning. As the human population grows, understanding the earth and its resources becomes progressively more important for both future policy makers and ordinary citizens. Because the human need to understand the earth is so pervasive, we provide our students with a broad and solid minimal set of required courses plus room to explore more specialized topics with well-chosen electives within and outside the department. The Geological Sciences Major prepares students for advanced study in geology, geophysics, geochemistry and geobiology, and careers in mineral and petroleum exploitation or in environmental geology. Alternatively, it is a valuable major for a pre-law or pre-med program or in preparation for a career in K-12 education.

In addition to course work, students learn by outdoor field work and involvement in research projects. Facilities include equipment for processing seismic signals and digital images of the earth's surface, instruments for highly precise isotopic and element analyses, and extensive libraries of earthquake records, satellite images, and exploration seismic records. High-pressure, high-temperature mineral physics research uses the diamond anvil cell and the Cornell High Energy Synchrotron Source (CHESS). Undergraduates have served as field assistants for faculty members and graduate students in Argentina, British Columbia, the Aleutian Islands, Scotland, Switzerland, Tibet, and Barbados. Undergraduates are encouraged to participate in research activities, frequently as paid assistants.

The Department of Geological Sciences is taking part in a new intercollege program in the Science of Earth Systems (SES). In the College of Arts and Sciences, this program can be taken as a separate major administered by the Department of Geological Sciences (described in more detail in the section at the front of this catalog, "Interdisciplinary Centers, Programs, and Studies"). The Geological Sciences major emphasizes the structure, composition, and evolution of our planet, while the SES major is more concerned with currently active processes on and near the earth's surface where the interactions of water, life, rock and air produce our planetary environment. The SES major is for students interested in careers in atmospheric, hydrological and ocean sciences, environmental chemistry (biogeochemistry), and environmental geophysics.

The prerequisites for admission to a major in geological sciences in the College of Arts and Sciences are two two-semester sequences in mathematics and physics, MATH 111-112 or MATH 191-192 and PHYS 207-208 or PHYS 112-213, or their equivalents, and a semester course in chemistry, such as CHEM 207 or 211. GEOL 101 or GEOL 201 followed by GEOL 102 or GEOL 104 are strongly recommended, but a student with a strong foundation in mathematics and science may be accepted as a major without completion of an introductory sequence.

Majors take GEOL 210 and GEOL 214, the five 300-level core courses listed below, 6 credits of additional course work from geological sciences courses numbered 300, 400, or 600, plus an additional course in either computer science or biological science, or an intermediate-level course in biological science, mathematics, chemistry, or physics.

In addition, a requirement for an advanced outdoor field experience may be met by completing one of the following 4 credit options: (a) GEOL 491-492 (Undergraduate Research, 2 credits each) with a significant component of field work; (b) GEOL 491 or 492 based on field observations obtained in GEOL 212 (Special January Field Trip, 2 credits) or GEOL 417 (Field Mapping in Argentina, 3 credits) for a combined 4-credit minimum; (c) GEOL 437 (Geophysical Field Methods, 3 credits) plus at least 1 credit of GEOL 491 or 492 using geophysical techniques from GEOL 434; or (d) An approved outdoor field course taught by another college or university (4 credit minimum).

Core Courses

GEOL 326 Structural Geology
GEOL 355 Mineralogy
GEOL 356 Petrology and Geochemistry
GEOL 375 Sedimentology and Stratigraphy

GEOL 388 Geophysics and Geotectonics

Prospective majors should consult R. W. Kay, director of undergraduate studies, or another faculty member as early as possible for advice in planning a program. Students majoring in geological sciences may attend the departmental seminars and take advantage of cruises, field trips, and conferences offered through the Department of Geological Sciences.

Courses offered at the 100 and 200 level are open to all students. Certain 300- and 400-level courses in geology also may be of particular interest to students of chemistry, biology, ecology, and physics. Students are encouraged to inquire about courses that interest them at the department office in Snee Hall.

Honors. An honors program is offered by the Department of Geological Sciences for superior students. Candidates for honors must maintain an overall 3.0 grade-point average, a cumulative average of 3.5 in the major, and complete an honors thesis (geological Sciences 491 or 492). Students interested in applying should contact the director of undergraduate studies during the second semester of the junior year.

GEOLOGICAL SCIENCES 405

FRENCH LANGUAGE AND LINGUISTICS

See Languages and Linguistics.

FRENCH LITERATURE

See Department of Romance Studies.

FRESHMAN WRITING SEMINARS

For information about the requirements for freshman writing seminars and descriptions of seminar offerings, see "Special Programs and Interdisciplinary Studies" at the end of the Arts and Sciences section of this catalog and consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in November for the spring term.
COURSES

Freshman and Sophomore Courses

GEOL 101 Introductory Geological Sciences
Fall, spring, or summer. 3 credits. Fall: W. B. Travers; spring: J. M. Bird; summer: W. Brice.

Designed to enhance an appreciation of the physical world. Natural environments, surface features, dynamic processes such as mountain belts, volcanoes, earthquakes, glaciers, and river systems are emphasized. Interactions of the atmosphere, hydrosphere, biosphere, and lithosphere (Earth System Science). Water, mineral, and fuel resources; environmental concerns. Field trips in the Ithaca region.

GEOL 102 Evolution of the Earth and Life (also Bio G 170)
Spring, summer. 3 credits. Spring: J. L. Cisne.

GEOL 104 The Sea: An Introduction to Oceanography (also BIO ES 154)
Spring, summer. 3-4 (4 credits with lab section) credits. Spring: C. H. Greene, W. M. White; summer: L. Godfrey.

A survey of the physics, chemistry, geology, and biology of the oceans for both science and non-science majors. Topics include: sea-floor spreading and plate tectonics, marine sedimentation, chemistry of seawater, ocean currents and circulation, the oceans and climate change, ocean ecology, coastal processes, marine pollution, and marine resources.

GEOL 105 Writing on Rocks (Freshman Seminar)
Fall. 3 credits. J. Chiment.

See Freshman Seminar Handbook for description.

GEOL 106 Vertebrate Fossil Preparation
Spring. 1 credit. Prerequisites: one introductory geology course or concurrent enrollment, class size is limited. J. Chiment.

A laboratory-oriented course that will expose students to techniques of vertebrate fossil preparation. Roughing-out and fine preparation of large specimens in solid matrix will be covered, as well as screen washing and microscope techniques for the recovery of micro-vertebrate remains. Specialized scanning techniques will be discussed.

The class will meet for one hour each week for the first six weeks of the semester. Students will be assigned to an individual or group project requiring two hours of participation each week for the remainder of the semester.

GEOL 107 How the Earth Works
Fall. 1 credit. J. L. Cisne.

A S/U/IR friendly introduction to the workings and interactions of solid earth, ocean, atmosphere, and life as they relate to understanding ongoing global change.

GEOL 108 Geology and Society
Spring. 1 credit. May be taken concurrently with or after GEOL 101, 102, 104, 111, or 201. Not offered 1997-98. T. E. Jordan.

Intended for students who are curious about the impact of geological materials and processes on society, what geologists actually do, what the big questions are in current research, and what geology might hold in store. A different speaker each week takes a look at topics ranging from environmental law to natural resources to agriculture.

GEOL 109 Dinosaurs
Fall. 1 credit. J. L. Cisne.

An entry-level survey course for those who are interested in dinosaurs and may lack a science background. Lectures examine the fossil evidence and illustrate how various geological and biological disciplines contribute to understanding dinosaurs and their world.

GEOL 111 To Know the Earth and Build a Habitable Planet
Fall. 3 credits. J. M. Bird.

GEOL 122 Earthquakes! (also ENGR 122)
Fall. 3 credits. L. D. Brown.

The science of natural hazards and strategic resource use in the 21st century and an environment­ally sound fuel-minerals cycle.

GEOL 123-124 Science of Earth Systems (also SCAS 123-124, ENGR 123-124)
SCAS 101-102 and SES 101-102)
For description, see the Science of Earth Systems section in "Interdisciplinary Centers, Programs, and Studies," in the front part of the catalog.

GEOL 125 Global Environment (also ENGR 125)
Fall. 2 credits. Prerequisites: GEOL 101 or 201 or equivalent, and permission of instructor. Staff.

Appropriate for students who have completed GEOL 101 or 201 and have passed GEOL 123-124, or have equivalent course work. An introductory course in the Earth sciences. Topics include: global climate, the greenhouse effect, ozone depletion, water resources, coastal and ocean resources. Credit for only one of GEOL 125 or ENGR 125.

GEOL 126 Global Environmental Science (also ENGR 126)
Spring. 2 credits. Prerequisites: ENGR 123-124.

An introductory course in the Earth sciences. Topics include: global climate, the greenhouse effect, ozone depletion, water resources, coastal and ocean resources. Credit for only one of GEOL 125 or ENGR 125.

GEOL 210 Introduction to Field Methods in Geologic Sciences
Fall. 3 credits. Prerequisite: GEOL 101, 102, or permission of instructor. Weekly field sessions. A weekend field trip.

GEOL 211 Marine Geology
Fall. 3 credits. J. Chiment.
The science of marine geology, oceanography, and the study of the Earth's oceans. Emphasis on the physics, chemistry, and biology of the oceans for both science and non-science majors. Topics include: sea-floor spreading and plate tectonics, marine sedimentation, chemistry of seawater, ocean currents and circulation, the oceans and climate change, ocean ecology, coastal processes, marine pollution, and marine resources.

GEOL 212 Marine and Coastal Geology
Summer. 2 credits. Prerequisites: GEOL 101 or 201 or equivalent, and permission of instructor. Staff.

A special one-week course offered at Cornell's Shoals Marine Laboratory (SML), on an island near Portsmouth, New Hampshire. For more details and an application, consult the SML office, G14 Stimson Hall. Estimated cost for 1998 (including tuition, room, board, and ferry transportation) is $895.

For description, see the Science of Earth Systems section in "Interdisciplinary Centers, Programs, and Studies," in the front part of the catalog.

GEOL 214 Western Adirondack Field Course
Spring, one week at the end of the semester. 1 credit. Prerequisite: GEOL 210 or equivalent, or permission of instructor. Students should be prepared for overnight camping and share in the cost of camp meals. Independent project. W. A. Bassett.

Field mapping methods, mineral and rock identification, examination of Precambrian metamorphic rocks and lower Paleozoic sediments, talc and zinc mines.

Junior, Senior, and Graduate Courses

Of the following, the core courses GEOL 326, 355, 356, 375, and 380 may be taken by B.S. candidates who have successfully completed GEOL 201 or the equivalent, and by B.A. candidates who have completed GEOL 101 or the equivalent, or who can demonstrate to the instructor that they have adequate preparation in mathematics, physics, chemistry, biology, or engineering.

Weathering cycle: chemical cycles, CO2 (weathering), rock cycle, controls on global temperature (CO2 or ocean currents), oil and mineral resources.

GEOL 203 Natural Hazards and the Science of Complexity
Fall. 3 credits. Prerequisites: 1 calculus course. D. L. Turcotte.

Studies of natural hazards: earthquakes, volcanic eruptions, floods, hurricanes, tornadoes, severe storms, wildfires, meteor impacts. Applications of the science of complexity to natural hazards: fractals, chaos, and self-organized criticality.

GEOL 210 Introduction to Field Methods in Geologic Sciences
Fall. 3 credits. Prerequisite: GEOL 101, 102, or permission of instructor. Weekly field sessions. A weekend field trip.

S. Mhulburg Kay.

The methods by which rocks are used as a geological database. Field methods used in the construction of geologic maps and cross sections; systematic description of stratigraphic sections. Field and laboratory sections on Saturday mornings until Thanksgiving. One additional lecture during most of these weeks. One weekend field trip to eastern New York.

GEOL 212 Special January Field Trip
Fall. 2 credits. Prerequisites: GEOL 101 or 201 or equivalent, and permission of instructor. Staff.

A trip of one week to ten days during January intersession in an area of interesting geology in the lower latitudes. Interested students should contact the instructor during the early part of the fall semester.

GEOL 213 Marine and Coastal Geology
Summer. 2 credits. Prerequisites: GEOL 211 or equivalent, or permission of instructor. Staff.

A special one-week course offered at Cornell's Shoals Marine Laboratory (SML), on an island near Portsmouth, New Hampshire. For more details and an application, consult the SML office, G14 Stimson Hall. Estimated cost for 1998 (including tuition, room, board, and ferry transportation) is $895.
GEOL 302 Evolution of the Earth System
(also SES 332 and SCAS 302)
For description, see the Science of Earth Systems section in “Interdisciplinary Centers, Programs, and Studies,” in the front part of the catalog.

GEOL 321 Introduction to Biochemistry
(also SES 321, 201) C"D 201
Fall. 4 credits. Prerequisites: college level chemistry, plus a course in biology and/or geology. L. A. Derry, J. Yavit.
Control and function of the Earth’s global biochemical cycles. The course begins with a review of the basic inorganic and organic chemistry of biologically significant elements, and then considers the biochemical cycling of carbon, nutrients, and metals that take place in soil, sediments, rivers, and the oceans. Topics include weathering, acid-base chemistry, biological redox processes, nutrient cycling, trace gas fluxes, bio-active metals, the use of isotopic tracers, and mathematical models. Interactions between global biochemical cycles and other components of the Earth system are discussed.

GEOL 326 Structural Geology
Spring. 4 credits. Prerequisite: GEOL 101 or 201, or permission of instructor. Visiting Professor Alexandra Moore.
Nature and origin of deformed rocks at microscopic and macroscopic scales, with emphasis on structural geometry and kinematics. Topics include stress, strain, rheology, deformation mechanisms, minor structures, faulting, folding, and structural families.

GEOL 335 Mineralogy
Fall. 4 credits. Prerequisite: GEOL 101 or 201 and Chem 207 or permission of instructor. W. A. Bassett.
Examination of minerals by hand-specimen properties and optical microscopy. Geological setting, classification, crystal structures, phase relations, chemical properties, and physical properties of minerals. X-ray diffraction is introduced. Independent research project.

GEOL 355 Petrology and Geochemistry
Spring. 4 credits. Prerequisite: GEOL 355. R. W. Kay.
Principles of phase equilibrium as applied to igneous and metamorphic systems. Description, classification, chemistry, origin, regional distribution, and dating of igneous and metamorphic rocks. Geochemical distribution of trace elements and isotopes in igneous and metamorphic systems. The petrological evolution of the planets.

GEOL 375 Sedimentology and Stratigraphy
Fall. 4 credits. Prerequisite: GEOL 101 or 201. J. L. Cisne.

GEOL 388 Geophysics and Geotectonics
Spring. 4 credits. Prerequisites: Mathematics 192 and Physics 208, 213, or equivalent. B. L. Jacks.
Global tectonics and the deep structure of the solid earth as revealed by investigations of earthquakes, earthquake waves, the earth’s gravitational and magnetic fields, and heat flow.

GEOL 411 Satellite Remote Sensing of Geology, Earthquakes, Erosion
Fall. 3 credits. Prerequisite: Permission of instructor. B. L. Jacks.
Instruction in satellite remote sensing, image processing, geographic information systems (GIS) and analysis of digital elevation models, using advanced computer workstations, via participation in current research on earthquake, mountain glaciers, and erosion processes.

GEOL 417 Field Mapping in Argentina
Summer. 3 credits. Prerequisites: GEOL 210 and 326; Spanish desirable, but not required. S. M. Kay.
Modern techniques of geological mapping applied in the region of San Juan, Argentina, including folded and faulted sedimentary rock units of the Andean Precordillera (San Juan River section), intensely deformed Precambrian metamorphic rocks of the Pampach Ranges (Pie de Palo), and shallow-level intrusive silicic intrusions (Cerro Blanco-Ullan).

GEOL 423 Petroleum Geology
Fall. 3 credits. Recommended. GEOL 426. Offered alternate years. W. B. Travers.
Introduction to hydrocarbon exploration and development. Exploration techniques, including well logs, fluid pressures, seismic reflection methods, gravity, and magnetic measurements to map subsurface structures and stratigraphy. Petroleum origin and migration. Dispersal systems and depositional patterns of petroleum reservoirs. Economics of exploration, leasing, drilling and production. Estimates of petroleum reserves, including tar sands and oil shales.

GEOL 434 Reflection Seismology
Spring. 4 credits. Prerequisites: Mathematics 192 and Physics 208, 213, or equivalent. L. D. Brown.
Fundamentals of subsurface imaging by multichannel seismic reflection techniques as used in oil exploration and geohydrological investigations. Covers survey design, acquisition, processing and interpretation in both 2D and 3D. Includes discussion of related techniques such as seismic refraction analysis, tomographic inversion, vertical seismic profiling, shear wave exploration and ground penetrating radar. Lab is keyed to state-of-the-art seismic processing, modeling and interpretation software from LandMark.

GEOL 437 Geophysical Field Methods
Fall. 3 credits. Prerequisites PHYS 213 and MATH 192 or equivalents, or permission of instructor. L. D. Brown.
Introduction to field methods of geophysical exploration, especially as applied to environmental issues. Emphasis on seismic, gravity, and magnetic techniques. Field surveys carried out at the beginning of the semester are analyzed under the guidance of the instructor. Field trips are planned on a weekly follow-up basis. The results are analyzed and interpreted. A field companion to GEOL 436, which is recommended but not required prior to this course.

GEOL 445 Geohydrology (also ABEN 471 and CAEE 431)
Intermediate-level study of aquifer geology, groundwater flow, and related design factors. Includes description and properties of natural aquifers, groundwater hydraulics, soil water, and solute transport.

GEOL 452 X-Ray Diffraction Techniques
Spring. 3 credits. Prerequisites: GEOL 355 or permission of instructor. Offered alternate years. W. A. Bassett and staff.
Automated X-ray diffractometers, Debye-Scherrer, real-time Laue, high-temperature diffraction, high-pressure diffraction, and plo­­figure analysis. Applications in materials science and geological sciences. Labs will be held in the new Materials Science X-Ray Facility.

GEOL 453 Advanced Petrology
Fall. 3 credits. Prerequisite: GEOL 356. Offered alternate years. Not offered 1997–98. R. W. Kay.
Magma formation and metamorphism in the context of plate tectonics. Major and trace element chemistry and phase relations as monitors of the creation and modification of igneous rocks. Temperature and stress in the crust and mantle and their influence on reaction rates and textures of metamorphic rocks. Application of experimental studies to natural systems.

GEOL 461 Introduction to Meteorology
Spring. 4 credits. Prerequisites: GEOL 101 or 201, or permission of instructor. W. M. White.
The Earth from a chemical perspective. Formation of the elements; cosmochemistry; chemical evidence regarding the formation of the Earth and Solar System. Application of the heat engine concept to the Earth. Processes occurring in the oceans, atmosphere, and hydrosphere including the carbon and water cycles. Examination of the atmosphere, crust, mantle, and core. Weathering and the chemistry of natural waters. Chemical evidence regarding the formation of the Earth and Solar System. Trace-element geochemistry, isotope geochemistry, geochronology, and geothermometry.

GEOL 465 Geochimistry
Fall. 4 credits. Prerequisites: Chemistry 207 and Mathematics 192 or equivalent. Recommended: GEOL 356. Offered alternate years. W. M. White.
The Earth from a chemical perspective. Formation of the elements; cosmochemistry; chemical evidence regarding the formation of the Earth and Solar System. Application of the heat engine concept to the Earth. Processes occurring in the oceans, atmosphere, and hydrosphere including the carbon and water cycles. Examination of the atmosphere, crust, mantle, and core. Weathering and the chemistry of natural waters. Chemical evidence regarding the formation of the Earth and Solar System. Trace-element geochemistry, isotope geochemistry, geochronology, and geothermometry.

GEOL 470 Volcanology
GEOL 475 Special Topics in Oceanography
Spring, 2-5 var. credits. Prerequisites: GEOL 104 or BIO ES 154, and permission of instructor. C. H. Greene Undergraduate instruction and participation in advanced areas of oceanographic research. Topics will change from term to term. Contact instructor for further information.

GEOL 478 Sedimentary Basins: Tectonics and Mechanics
Spring. 3 credits. Prerequisite: GEOL 375 or permission of instructor. Offered alternate years. Not offered 1997-98. T. E. Jordan. Subdivision of sedimentary basins from the point of view of plate tectonics and geomechanics. Interactions of subdivision, sediment supply, and environmental characteristics in development of stratigraphic sequences. Stratigraphic characteristics of active-margin, passive-margin, and cratonic sequences. Stratigraphic characteristics of sediment supply, and environmental characteristics. Numerical modeling. Sequence stratigraphy. Modern and ancient examples.

GEOL 497 Paleobiology (also BIOES 479)
Fall. 3 credits. Prerequisites: one year of introductory biology for majors and either BIOES 274, 373, GEOL 375, or permission of instructor. Offered alternate years. W. Allmon. A survey of the major groups of organisms and their evolutionary histories. Intended to fill out the biological backgrounds of geology students and the geological backgrounds of biology students concerned with the nature and significance of the fossil record for their respective studies.

GEOL 481 Senior Survey of Earth Systems
Fall. 3 credits. Limited to seniors majoring in geological sciences. J. M. Bird. Survey course that integrates undergraduate course work, intended to enhance overall understanding of geological sciences. Emphasis on current models of earth's dynamic systems (e.g., global climate change; mantle evolution). Guest lecturers; synthesis and review literature; scientific literature readings; discussions; student presentations.

GEOL 491-492 Undergraduate Research
Fall, spring. 1 or 2 credits. Staff. (M. A. K. Kay, coordinators). Introduction to the techniques and philosophy of research in the earth sciences and an opportunity for undergraduates to participate in current staff research projects. Topics chosen in consultation with the instructor, and guided by a staff member. A short written report is required, and outstanding projects are prepared for publication.

GEOL 500 Design Project in Geohydrology
Fall, spring. 3-12 credits. An alternative to an industrial project for M. Eng. students choosing the geohydrology option. May continue over two or more semesters. L. M. Cathles. The project may address one of many aspects of groundwater flow and contamination, and must involve a significant geological component and lead to concrete recommendations or conclusions of an engineering nature. Results are presented orally and in a professional report.

GEOL 502 Case Histories in Groundwater Analysis
Spring. 4 credits. L. M. Cathles. Groundwater flow in a specific area, such as a proposed nuclear-waste disposal site, analyzed in depth. Geological and resource data on the area are presented early in the course. Then the material is analyzed by students working as an engineering analysis team. Each student makes a weekly progress report and writes part of a final report. Results are presented in a half-day seminar at end of term.

GEOL 522 Advanced Structural Geology I
Spring. 3 credits. Prerequisites: GEOL 326 and permission of instructor. Offered alternate years. Not offered 1997-98. R. W. Allmendinger. Stress-strain theory and application. Advanced techniques of structural analysis. Topics include finite and incremental strain measurement; microstructure, preferred orientation, and TEM analysis; pressure solution and chemical development, and experimental deformation. Applications to deformation of unconsolidated sediments, brittle and brittle-ductile deformation of supracrustal strata, and ductile deformation of high-grade metamorphic rocks. Kinematic analysis of shear zones and folds in these regimes.

GEOL 524 Advanced Structural Geology II

GEOL 622 Advanced Structural Geology
Fall. 3 credits. Prerequisite: GEOL 455 or permission of instructor. Offered alternate years. L. A. Kerry. Dynamics of biogeochemical systems. Kinetic treatment of biogeochemical cycles. Box models, residence time, response time. Analytical and numerical solutions of model systems. Eigen-analysis of linear systems. Feedback and nonlinear cases, problems of uncertainties in natural systems. Modeling software such as Stella II and Matlab, applications to current research of participants or from recent literature.

GEOL 651 Analysis of Biogeochemical Systems
Spring. 3 credits. Open to undergraduates. Prerequisite: GEOL 455 or permission of instructor. Offered alternate years. W. M. White. Nucleosynthetic processes and the isotopic abundances of the elements. Geochronology and cosmochronology using radioactive decay schemes, including U-Pb, Rb-Sr, Sm-Nd, K-Ar, U-series isotopes, and cosmogenic isotopes such as 14C and 230Th. Use of radiogenic and stable isotopes in petrology and their application to study of the evolution of the crust and mantle. Isotopic evidence regarding the formation of the Earth and the Solar System. Stable isotopes and their use in geothermometry, paleotemperature, paleontology, and the global climate system.

GEOL 681 Geotectonics
Fall. 3 credits. Prerequisite: permission of instructor. J. M. Bird. Theories of orogeny; ocean and continental evolution. Kinematics of lithosphere plates. Rock-time assemblages of modern oceans and continental margins, and analogs in ancient orogenic belts. Time-space reconstructions of specific regions. Problems of dynamic mechanisms—corollaries and evidence from crustal features.

GEOL 695 Computer Methods in Geological Sciences
Fall, spring. 3 credits. L. Brown, B. L. Isacks. Independent research projects using state-of-the-art computational resources in the Department of Geological Sciences. Possibilities include: image and seismic processing, seismic and geomechanical modeling, GIS, use of interpretational workstations for 3D seismic and satellite imagery; modeling fluid flow through complex media.

GEOL 700-799 Seminars and Special Work
Fall, spring. 1-3 credits. Prerequisite: permission of instructor. Staff. Advanced work on original investigations in geological sciences. Topics change from term to term. Contact appropriate professor for more information.
GEOL 722 Advanced Topics in Structural Geology

GEOL 731 Plate Tectonics and Geology
J. M. Bird.

GEOL 733 Fractals and Chaos—Independent Studies
D. L. Turcotte.

GEOL 751 Petrology and Geochemistry
S. Mahlburg Kay, R. W. Kay.

GEOL 753 Advanced Topics in Mineral Physics
W. A. Bassett.

GEOL 755 Advanced Topics in Petrology and Tectonics
J. M. Bird, W. A. Bassett.

GEOL 757 Current Research in Petrology
S. Mahlburg Kay, R. W. Kay.

GEOL 762 Advanced Topics in Petroleum Exploration
Fall. W. B. Travers.

[GEOL 771 Advanced Topics in Sedimentology and Stratigraphy]

GEOL 773 Paleobotany
J. L. Cusne.

GEOL 775 Advanced Topics in Oceanography
Spring. C. H. Green.

GEOL 780 Earthquake Record Reading
Fall. M. Barazangi.

GEOL 781 Geophysics, Exploration Seismology
L. D. Brown.

GEOL 783 Advanced Topics in Geophysics
B. L. Isacks.

GEOL 789 Lithospheric Seismology (COCORP Seminar)
L. D. Brown.

GEOL 793 Andes-Himalaya Seminar

GEOL 795 Low Temperature Geochemistry
L. A. Derry.

GEOL 796 Geochemistry of the Solid Earth
W. M. White.

GEOL 797 Fluid-Rock Interactions
L. M. Cathles.

GEOL 799 Soil, Water, and Geology Seminar
L. M. Cathles, T. S. Steenhuis.

GERMAN STUDIES

L. Adelson, acting chair, fall; A. Groos, chair, spring; D. Ezerigailis, director of undergraduate studies; P. T. Hohendahl, director of graduate studies; D. Bathrick, D. Brenner, B. Buettner, H. Deinert, P. Gilgen, B. Martin, A. Schwarz, G. Waite.

The Department of German Studies offers students a wide variety of opportunities to discover the literature and culture of German-speaking countries, whether as part of their general education, a major in German Studies or a double major involving another discipline, preparation for graduate school or an international professional career. Courses are offered in English as well as German, and range from medieval to contemporary literature as well as from film and visual culture to intellectual history, music, history of psychology, and women's studies.

The department's offerings in German begin with a series of Freshman Writing Seminars introducing various aspects of German literature (the fairy-tale and romantic narratives, twelfth-century writers such as Kafka, Hesse, Mann, Brecht), issues in mass culture and modernity, problems of German national identity, and cinema and society. A variety of courses in English translation is also offered on the 300- and 400-level, exploring such topics as the Faust legend, aesthetics from Kant to Heidegger, Freud and his legacy, opera from Mozart to Strauss, the German novel, political theory and cinema, the Frankfurt School, and feminist theory.

Students wishing to begin German at Cornell enroll in GERLA 121-122 in the Department of Modern Languages. Those successfully completing this sequence, or those who place into the 200-level, may pursue further language study in that department or begin with the literature and cultural studies tracks in German Studies. The beginning sequence of 200-level courses in German Studies, with readings and discussion in German, is designed to provide further grounding in the language as well as introduce German language (GERST 201-202) and cultural studies (GERST 220). Beginning in spring 1998, GERST 201 and GERLA 203 will be replaced by GERST GERLA 200. More advanced courses introduce majors and other qualified students to a broad variety of literary and cultural topics in German-speaking countries.

Advanced Standing

Students with an AP score of 4 or better are automatically granted three credits in German. Students with an AP score of 4 or better, an LPG score of 65 or higher, or a SAT II score of 660 or higher must take the CASE examination for placement in courses above GERST 201 or GERLA 203. Students coming to Cornell with advanced standing in German and/or another subject are encouraged to consider a double major and to discuss the options with the director of undergraduate studies as early as possible.

The Majors

The department offers two options for the major: German literature/culture and German area studies, the latter a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, to acquaint them with German culture, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines. For both majors, there is a wide variety of courses co-sponsored with other departments (Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Women's Studies).

The department encourages double majors and makes every effort to accommodate prospective majors with a late start in German.

Students interested in a major should consult the director of undergraduate studies, Ina Ezerigailis, 178 Goldwin Smith Hall.

German (Literature/Culture)

Although the emphasis of this track is on literature, majors can also pursue individual interests in courses on film and visual culture, theater and performing arts, music, intellectual and political history, and women's studies that have a substantial German component. Please consult with the director of undergraduate studies.

Admission:

By the end of their sophomore year, prospective majors should have successfully completed GERST 202, GERST 220, or GERLA 204.

To complete the major, a student must:

1. demonstrate competence in the German language by successful completion of GERLA 304 or the equivalent.
2. complete six courses in German Studies at the 300 level or above. One of these must be the Senior Seminar (GERST 410).

German Area Studies

Students select courses from the Department of German Studies as well as courses with a substantial German component from other departments, such as Comparative Literature; Government; History; Music; Theatre, Film, and Dance; Women's Studies; etc.

Admission:

By the end of their sophomore year, prospective majors should have successfully completed GERST 202, GERST 220, or GERLA 204.

To complete the major, a student must:

1. demonstrate competence in the German language by successful completion of GERLA 304 or the equivalent.
2. complete six courses with a substantial German component at the 300 level or above. Three of these must be in German Studies, including the Senior Seminar (GERST 410).
3. select a committee of two or more faculty advisors to help formulate a coherent program of study. One of the advisors must be from the Department of German Studies.

Study Abroad

The department encourages undergraduate majors to consider studying abroad for 1-2 semesters, normally during the junior year, as regular students at a German-speaking university. Interested students should consult Bonnie Buettner (German Studies) or Gunhild Lischke (Department of Modern Languages) as early as possible.

Honors

Eligibility: A student wishing to receive honors in German Studies must have a GPA of 3.5 in all courses relevant to the major.

Committee: Candidates for honors form an advisory committee consisting of an advisor from German Studies and at least one additional member.

Honors essay: During the first term of their senior year, students determine the focus of their honors essay through an appropriate course or in independent study under the
direction of their advisors. During the second term they complete an honors essay, which will be evaluated by the committee.

**Determination of honors:** An oral examination concludes the process. The level of honors will be determined by the essay, the exam, and grades in the major.

**Freshman Writing Seminar Requirement**
The following courses may be used to satisfy the freshman writing seminar requirement: German 109, 111, 150, 151 and 175. For details, students should consult the instructors.

**Freshman Writing Seminars**
See Freshman Seminar booklet for course times and descriptions.

**GERST 109 From Fairy Tales to the Uncanny: Exploring the Romantic Consciousness**
Fall or spring. 3 credits. B. Buettner, P. Gilgen, and staff.

**GERST 111 Workshop in German Studies**
Fall. 3 credits. H. Deinert.

**GERST 130 Metropolis, Modernity, and Mass Culture: The Roaring Twenties, German-style**
Fall or spring. 3 credits. B. Buettner, P. Gilgen and staff.

**GERST 150 Imagining Germany/s**
Fall or spring. 3 credits. B. Buettner, P. Gilgen and staff.

**GERST 151 Kafka, Hesse, Brecht, and Mann**
Fall or spring. 3 credits. H. Deinert.

**GERST 175 Cinema and Society**
Fall or spring. 3 credits. G. Waite and staff.

**Courses Offered in German**

**GERST 200 Contemporary Germany (also GERLA 200)**
Spring. 3 credits. Prerequisite: qualification in German (LPG score of 56-64 or SAT II score of 580-670 or GERLA 123). Fulfills the Arts and Sciences language proficiency requirement and can be used in partial fulfillment of the Arts and Sciences humanities distribution requirement. Staff.

An intermediate language course designed to provide an introduction to modern German culture and literature while students develop language proficiency. Students examine issues that shape German society, literature, and thought as reflected in short stories, poems, socio-cultural and political texts, video, and audio materials. Selected themes include "Beyond the Wall: German Unification," "Germany: a Multi-cultural Society?", "Speaking and Identity," and "Musikszene." Oral and written work and individual and group presentations emphasize accurate and idiomatic expression. Successful completion of the course enables students to continue with more advanced courses in language, literature and culture. This course replaces GERST 201 and GERLA 203.

**GERST 201 Introduction to German Literature I: Prose**
Fall. 3 credits. Prerequisite: qualification in German or permission of instructor. Taught in German. Fulfills the language proficiency requirement and can be used in partial fulfillment of the humanities distribution requirement. B. Buettner.

An intermediate course designed to introduce major German-speaking authors of the twentieth century and to improve oral and written German language skills. Selected prose works of Bachmann, Brecht, Kafka, Mann, Dürrenmatt, Aichinger, and others explore problems of subjectivity and identity in modern society. Review of selected points of grammar; emphasis on developing reading competency and accurate and idiomatic expression in class discussion and written assignments; expansion of vocabulary. Beginning in spring 1998, GERST 201 and GERLA 203 will be replaced by GERST/GERLA 200.

**GERST 202 Introduction to German Literature II: Drama**
Fall or spring. 3 credits. Prerequisite: GERST 201, GERLA 203, or permission of instructor. Taught in German. Can be used in partial fulfillment of the humanities distribution requirement. B. Buettner and P. Gilgen.

An intermediate course designed to introduce the work and basic drama theories of major Austrian, Swiss and German dramatists. Selected plays by Dürrenmatt, Brecht, Frisch, Borchert, Hein, and others explore major social and political issues of twentieth-century German culture. Emphasis on further improvement in oral and written German, expansion of vocabulary and basic familiarity with modern literature in German. Review of grammar as needed.

**GERST 220 Was Ist Deutsch?**
Spring. 3 credits. Taught in German. Prerequisite: one German course at the 200 level. B. Buettner.

Questions of German identity have always raised difficult issues—both for Germans themselves and for others. These issues are again taking center stage as Germans redefine themselves in a reunified Germany. How has the concept of "Germanness" evolved? How do past perceptions of identity impinge on the present? Through selections from film, literature, art, and music we will explore this peculiarly German question.

**GERST 307 Modern Germany**
Spring. 4 credits. Prerequisite: GERST 201-202 or equivalent. Taught in German. L. Adelson.

Introduction to the history of postwar Germany, the development and unification of the two Germanys, and their societies. The emphasis is on cultural and social institutions as well as political and intellectual debates. Focal topics include responses to the Nazi past, Germany and Europe, protest movements, migration patterns, women, mass media, and youth, and others. We will consider the changes taking place in Germany today in light of the recent past. Some films will also be shown.

**GERST 312 Workshop in German Studies II**
Not offered 1997-98.

**GERST 315 From Dawn Song to Requiem: Introduction to German Poetry**
Fall. 4 credits. Prerequisite: GERST 201-202 or equivalent. Readings in German. I. Ezergailis.

Reading selected German verse, from the Middle Ages through the Baroque to Goethe, Heine, and the Romantics; from Rilke to Gelan, Ingeborg Bachmann, and other twentieth-century authors, we will pay attention to the microcosm of each poem as well as to its contexts—socio-political, cultural, and aesthetic—and consider the formal constraints and the enabling openings of writing in verse.

**GERST 320 Postwar German Novel**
Spring. 4 credits. I. Ezergailis.

A reading, in English translation, of such post-1945 German novelists as Grass, Böll, Johnson, and Christa Wolf. This course is recommended for the concentration in modern European studies.

**GERST 330 Political Theory and Cinema**
(also COM L 330, GOVT 370 and THETR 329)
Fall. 4 credits. G. Waite.

This course provides an introduction to some fundamentals of current film analysis and political theory and their relationship to one another. Our investigation has two main aspects. On the one hand, we will be interested in the work of film-makers who have been particularly concerned to rehash ideas about politics in the cinematic medium. On the other, we will attempt to develop a way of reading political theory using techniques borrowed from cinema and vice versa—thus forging between these two disciplines productive analogies that are not necessarily based on influence. We will study not only mainstream but also experimental and low-budget films; similarly, we will find political theory in obscure places, as well as more obvious ones. While the course has a historical perspective, the main emphasis will be on contemporary work. Our texts/films will be taken from the works of such thinkers/filmmakers as: P. Pasolini, J.-L. Godard, S. Eisenstein, D. Vertov, G. Romero, R. Corman, M. von Trott, D. Cronenberg, T. W. Adorno, W. Wenders, R. Fassbinder, A. Kluge, P. K. Dick, W. Benjamin, G. Deleuze, M. Gorris, K. Tahimik, L. Strauss, K. Marx, J. G. Fichte, L. Althusser, R. Scott, L. Butteluel, A. Gramsci.

**GERST 342 The New Europe**
(also GOVT 342)
Not offered 1997-98.

**GERST 353 Kleist #**
Not offered 1997-98.

**GERST 354 Schiller #**
Not offered 1997-98.

**GERST 357 Major Works of Goethe**
(1749-1832)
Spring. 4 credits. Prerequisite: GERST 201-202 or equivalent. Please consult instructor. Seminar discourse in English and German. H. Deinert.

Poet, statesman, artist, scientist, rebel, conservative, mythmaker and iconoclast, Goethe stands at the center of Germany's beloved Renaissance. Taking his early cues...
from Homer, Shakespeare and the Bible, he created cultural icons at once modern and steeped in tradition. We will examine works from all phases of the man’s incredibly productive life against the background of political turmoil in Europe and the Americas. We will use art, music and theater as additional tools of interpretation.

GERST 385 Austrian Literature
Spring. 4 credits. Prerequisite: GERST 201-202 or permission of instructor. I. Ezergailis.
A careful study of texts by Austrian authors writing between the turn of the century and World War II, a productive and controversial time that includes the demise of the Austro-Hungarian Empire. We will read some drama and poetry, but most of the texts will be medium-length prose pieces and excerpts from longer ones. The diverse list includes figures such as Arthur Schnitzler, Franz Kafka, Marie von Ebner-Eschenbach, Karl Kraus, Rainer Maria Rilke, and Robert Musil.

Courses in English Translation
GERST 320 Postwar German Novel
GERST 330 Political Theory and Cinema (also COM L 330, GOVT 370 and THETR 329)
GERST 374 Opera and Culture (also MUSIC 374 AND ITALL 374) *
For description, see Music 574.

GERST 378 German Aesthetic Theory: From Kant to Hegel *
Fall. 4 credits. Readings and discussion in English. P. Gilgen.
Beginning with Kant’s Critique of Judgment (1790), German philosophy around 1800 is concerned with the philosophical status of the beautiful and of art. Especially in Romantic theory and practice, art is meant to provide a solution to the philosophical dilemmas in the wake of Kant’s critical philosophy. But already in Hegel’s Phenomenology, and more explicitly in the Encyclopedia and the Lectures on Aesthetics, art loses its elevated position vis-à-vis philosophy. Taking this observation as a guiding thread, this course is structured around in-depth readings of Kant’s Critique of Judgment and the “Introduction” to Hegel’s Lectures on Aesthetics. Further readings will include Schiller, Schelling, Schlegel, Novalis, and Hölderlin. The following questions will be addressed: What are the conditions for the move from the subjective judgment of taste (Kant) to objective beauty (Romantics, Hegel)? How is the relation of art and nature reconceived by the Romantics, particularly Schelling? What is the relation of aesthetic theory and the history of art? In the concluding part of the course, we will discuss contemporary philosophers whose work on aesthetics relies explicitly on Kant’s and/or Hegel’s theories, such as Adorno, Danto, and Lyotard.

GERST 383 German Literature of the Twentieth Century
Fall. 4 credits. Taught in German. Prerequisite: GERST 201-202 or permission of instructor. L. Adelson.
This survey course introduces students to twentieth-century German literature in its historical, social, and aesthetic contexts. Discussion of representative literary texts will be emphasized. Readings will include works by Thomas Mann, Georg Kaiser, Marie Luise Fleisser, Bertolt Brecht, Anna Seghers, Heinrich Boll, Christa Wolf, Ingeborg Bachmann, Ulrich Plenzdorf, Botho Strauss, Peter Schneider, and Vera Kamenko.

GERST 396 German Film (also COM L 396 and THETR 396)
Spring. 4 credits. Prerequisites: participation in class discussion, one paper, midterm, and final. D. Bathrick.
This course will explore German film from the Weimar and Nazi periods to the present in relation German and will proceed in a context of which it was a part. Readings and lectures will be devoted to formal and cultural developments historically as well as interpretative analysis of selected individual films.

GERST 398 The Poetic and the Political: A Look at Some German Women Writers
Not offered 1997-98.

GERST 408 Uncanny Communities (also COM L 412 and WOMNS 413)
Not offered 1997-98.

GERST 411 Theory, Pathology, and Treatment (also S HUM 412)
Fall. 4 credits. B. Martin and C. Miller.
For complete description, please see S HUM.

GERST 413 Women around Freud (also COM L 412 and WOMNS 413)
Not offered 1997-98.

GERST 414 History Into Fiction: Nazis and the Literary Imagination (also ENGL 404, COM L 404, and NES 404)
For description, see ENGL 404.

GERST 415 Marx, Freud, Nietzsche (also COM L 425 and GOVT 473)
Not offered 1997-98.

GERST 418 Thomas Mann
Not offered 1997-98.

GERST 442 German Jewish Culture: From the Enlightenment to the Present (also JWST 442 and S HUM 444)
Spring. 3 credits. This introductory course is designed for undergraduates who do not read German. Centered in a cognitively cumulative fashion, starting with past developments in order to elucidate the present. D. Brenner.
We will examine debates surrounding minority identity by discussing fiction, autobiography, essay, and film by “German Jews” from the Enlightenment through the post-Holocaust period. The course will confront the social, cultural, and religious conflicts that typify the history of Jewish existence in German-speaking lands during the modern epoch. Authors to be addressed include: Moses Mendelssohn, Solomon Maimon, Heinrich Heine, Karl Marx, Sigmund Freud, Arthur Schnitzler, Martin Buber, Hannah Arendt, Gertrud Kolmar, Nelly Sachs, Else Lasker-Schüler, Franz Kafka, Fritz Lang, Henriek Galeen, Paul Celan, Walter Benjamin, Maxim Biller, Rafael Seligmann, Katja Behrens, Barbara Honigmann, Henryk Broder, Esther Dischereit, Peter Stephan Jungk, Rachel Abraham, Irene Dische, George Mosse, and others.

GERST 450 Representing the Holocaust, Then and Now (also JWST 451 and S HUM 450)
Fall. 3 credits. Limit 20 students.
D. Brenner.
It has been argued that the most brutal crime humans have committed against humankind was the “Final Solution.” The Nazis attempted and nearly successful destruction of European Jewry. Gypsies, the disabled, homosexuals, communists, Jehovah’s Witnesses, Poles, and Russians were also singled out for persecution. Since the end of the Second World War, numerous social scientists and cultural historians have tried to describe how and why such genocides occurred. Writers, poets, memoirists, artists, filmmakers, museum curators and others have also attempted to represent and communicate the experiences of Holocaust survivors, victims and perpetrators. Mediated through cultural forms and practices, a number of Holocaust “discourses” have developed, particularly in the United States—and leading many critics to decry the “Americanization” of the Holocaust.
In this seminar, we will consider the ways in which the events of 1938-1945 have been, might be, and will be remembered. Exactly how these events are represented is contingent upon a number of factors: political, social, psychological, literary, linguistic, etc. We will frequently make comparisons of a cross-cultural and cross-historical nature (i.e., “here and there,” “then and now”) as well as discussing the implications of Holocaust representations for the practice of tolerance and cultural diversity.

GERST 456 Comparative Democritization (also GOVT 456)
Not offered 1997-98.

Course in Latvian and Baltic Literature
GERST 377 Perfection of Exile? Baltic Emigré Literature (also RUSSL 377)
Not offered 1997-98.

Graduate and Advanced Undergraduate Courses
GERST 405 Introduction to Medieval German Literature I *
Not offered 1997-98.
GERST 406 Introduction to Medieval German Literature II *
Not offered 1997-98.

GERST 410 The Brothers Mann: Senior Seminar
Fall. 4 credits. Readings and discussion in German. I. Ezergailis.
The relationship of Thomas and Heinrich Mann has been described as “a brotherhood in which German history was mirrored...in all its agony.” We will read selected texts by the Mann brothers—novels, short stories, essays, publicistic pieces, and letters—to examine the dynamic of a brothers’ strife that illuminates confrontations and tensions of a whole culture at a decisive time in German history. Some background material will provide the social, political, and intellectual context.

GERST 412 German Literature from 1770 to 1848 *
Not offered 1997-98.
GERST 430 Brecht, Artaud, Müller, Wilson (also COM L 430 and THETR 420)
Not offered 1997-98.
GERST 435 Introduction to Literary Theory (also COM L 439)
Not offered 1997-98.

GERST 447 Reading Freud: Gender, Race, and Psychoanalysis (also COM L 447 and WOMENS 447)
Not offered 1997-98.

GERST 451-452 Independent Study
451, fall; 452, spring. 1-4 credits each term. Prerequisite: permission of instructor.

GERST 472 Poetry of the 1990s (also COM L 472, ENGL 408, and SPANL 472)
Not offered 1997-98.

GERST 492 The Advance of Humanism: Aspects of the European Enlightenment #
Not offered 1997-98.

GERST 495 The Aesthetic Theory of the Frankfurt School (also COM L 495)
Not offered 1997-98.

GERST 496 Theorizing the Public Sphere (also COM L 496 and HIST 496)
Not offered 1997-98.

GERST 600 Special Topics in Feminist Theory (also ANTHR 600 and COM L 600)
Not offered 1997-98.

GERST 608 Modern/Postmodern (also COM L 608)
Not offered 1997-98.

GERST 615 Jews in German Culture Since 1945 (also JWST 615)
Fall. 4 credits. Required readings in German. Class discussion in English. L. Adelson.
This seminar will explore Jewish literature written in German since 1945, including works by authors such as Elisabeth Langgasser, Paul Celan, Hans Keilson, Edgar Hilsenrath, Grete Well, Jeannette Lander, Esther Dischereit, Irene Dische, Rafael Seligmann, Maxim Biller, and Barbara Honigmann. This material will be considered against the larger background of postwar German attempts to represent both Jewish identity and the Holocaust. To this end the course will consider pivotal crises of representation such as those reflected in the Fassbinder scandal, the "Historians' Debate," and the more recent competition for a "German national monument to the murdered Jews of Europe." Additionally, we will consider how these literary works and cultural contexts are relevant to international cultural studies in memory, diaspora, "hybridity," and representation.

GERST 621 Issues in Gay and Lesbian Studies (also WOMENS 621)
Not offered 1997-98.

GERST 624 Seminar in Medieval German Literature II
Not offered 1997-98.

GERST 626 Nuremberg
Not offered 1997-98.

GERST 627 Baroque (also COM L 626)
Fall. 4 credits. The course is conducted in English. G. Waite.
This graduate seminar focuses on the "baroque" in two basic ways: (1) as a period of cultural production in seventeenth-century continental Europe (France, Holland, Italy, and Spain in addition to Germany); (2) but more especially as a problem in current theory. Thus we will study concepts such as: "allegory" and Trauerspiel (Walter Benjamin); "action from a distance," "absent and immanent cause" (Spinoza, Louis Althusser); "the fold" (Leibniz, Gilles Deleuze); "savage anomaly" (Antonio Negri); and "guided culture" (José Antonio Maravall). Approximately equal attention will be given to literary and philosophical texts, written and visual practices. Thus, in addition to representative literary texts, we will analyze works by Leibniz and Spinoza, Caravaggio, Poussin, and Velázquez, as well as some contemporary critics and theorists (Christine Buci-Glucksmann, Michel Foucault, Louis Marin, among others).

GERST 629 The Enlightenment
Not offered 1997-98.

GERST 630 Classicism and Idealism
Not offered 1997-98.

GERST 634 German Romanticism
Not offered 1997-98.

GERST 635 The Gates to Modernity: From Karlbad to the 1848 Revolution
Spring. 4 credits. Anchor course. P. U. Hohendahl.
The seminar will focus on Germany's entry into the modern age represented by authors such as Heine, Büchner, Feuerbach, and Marx. The course will deal with the cultural, political, and social consequences of the Enlightenment, among them the democratization of literature and culture, the politicization of philosophy, and the emancipation of underprivileged groups (women and working class). The readings will trace the formation of bourgeois culture and its contradictions as they are articulated by the writers of Young Germany, the Left Hegelians, and radical literati of the 1840s. In addition to the authors mentioned above, texts will be taken from the works of Bettina von Arnim, Börne, Grabbe, Hebbel, and Fanny Lewald.

GERST 637 Novelle Workshop
Not offered 1997-98.

GERST 647 German Literature from 1949 to 1989: Questions about Identity
Spring. 4 credits. L. Adelson.
This seminar/anchor course will focus on German literature during the period between 1949 and 1989. The central point of the course will be to trace major themes and styles in German-speaking literature, East and West, in light of recent events. While individual texts will be examined within their specific historical (temporal, geopolitical, and social) contexts, the course will also be organized comparatively around critical debates concerning such topics as fictional representation of the immediate past, attempts by minority/majority voices to challenge and change the canon; writing and social change; questions concerning a national cultural identity; the politics of postmodernity, etc. Readings will be taken from authors such as Böll, Grass, Bachmann, Koerpern, Andersch, Handke, Dürenmatt, C. Wolf, Weiss, H. Muller, V. Braun, Hein, Morgner, J. Becker, Enzensberger, B. Strauss, Süsskind, and Maron. Secondary materials will include critical writings and visual media from the period.

GERST 650 Culture in the Weimar Period
Not offered 1997-98.

GERST 652 Culture in Germany 1933-1945
Not offered 1997-98.

GERST 653 Opera (also COM L 655 and MUSIC 679)
Not offered 1997-98.

GERST 660 Visual Ideology (also COM L 660 and THETR 660)
Not offered 1997-98.

GERST 661 After the City: From Metropolis to Electropolis (also ARCH 338/636 and COM L 661)
Not offered 1997-98.

GERST 663 Nietzsche and Heidegger (also COM L 663)
Spring. 4 credits. G. Waite.
This graduate seminar investigates the basic thoughts, types of argumentation, and styles of writing of these two philosophers, with particular focus on Heidegger's appropriation of Nietzsche. We will consider both as political thinkers in the tradition of esotericism—as a way of grasping the paradoxical existence of Left-Nietzscheans and Left-Heideggerians, given Nietzsche's and Heidegger's self-understanding of themselves as men of the Right. At issue, too, is a relation of Nietzsche and Heidegger to both Plato and Machiavelli. In this regard, the grasp of Nietzsche not only by Heidegger but also by Straussians will be contrasted with that of the Left. Basic texts include: Nietzsche, "The Greek State," "On Truth and Lie in the Extraporal Sense," Thus Spoke Zarathustra, and Beyond Good and Evil; and Heidegger, "Who Was Nietzsche's Zarathustra?" Nietzsche's Word "God Is Dead," and selections from his Nietzsche. Further: Lawrence Lampert, Leo Strauss and Nietzsche, Stanley Rosen, "Nietzsche's Revolution" and The Mask of Enlightenment: Nietzsche's "Zarathustra" and al. Strauss, "What Is Political Philosophy?" and "Note on the Plan of Nietzsche's Beyond Good and Evil."

GERST 664 Freud and the Fin de Siècle
Not offered 1997-98.

GERST 666 Ingeborg Bachmann
Not offered 1997-98.

GERST 667 "Minor" German Literatures?
Not offered 1997-98.

GERST 671 Postcolonial Theory and German Studies
Not offered 1997-98.

GERST 672 German Opera (also MUSIC 674)
Not offered 1997-98.

GERST 674 Contemporary Poetry and Culture: 1960-1993 (also COM L 674, ENGL 697 and SPAN L 674)
Spring. 4 credits.
For description, please see COM L.
GERST 675 After the Divide: German Critical Theory of the Seventies and Eighties (also COM L 675 and HIST 675)
Fall. 4 credits. P. U. Hohendahl.
The death of Theodor W. Adorno in 1969 marked the end of classical Critical Theory. During the following decade his students and disciples moved in different and conflicting directions. In this country only the project of Jürgen Habermas has received serious and consistent attention. However, the German configuration of the 1980s is considerably more complex. The seminar examines the writings of H. M. Enzensberger, Habermas, O. Negri, A. Kluge, P. Bürger, A. Wellmer, and C. Dahlhaus. Their works range from social and political theory to aesthetic theory and literature and music criticism.

GERST 679 Bertolt Brecht in Context (also COM L 679 and THETR 679)
Not offered 1997-98.

GERST 685 Gramsci and Cultural Politics (also COM L 685 and GOVT 675)
Not offered 1997-98.

GERST 687 The Politics of Culture in the German Democratic Republic
Not offered 1997-98.

GERST 690 Feminist Criticism and Theory (also WOMNS 690)
Not offered 1997-98.

GERST 692 The Politics of Criticism (also COM L 692 and THETR 692)
Not offered 1997-98.

GERST 699 German Film Theory (also COM L 699 and THETR 699)
Fall. 4 credits. D. Batchick.
This course examines critically major German film theories from the Weimar period to the present. Works by Balazs, Arnhem, Kraucau, Benjamin, Adorno, Horkheimer, Kluge, Syberberg, Koch, Elsaesser, and others will be discussed in relation to the context in which they emerge as well as current debates in film theory.

GERST 733-754 Tutorial in German Literature
Fall and spring. 1-4 credits per term. Prerequisite: permission of instructor.

member nations of the European Community, to discuss issues and resolutions of current concern to the EC. To prepare for this simulation, a 2-credit seminar, Government 431, is offered each spring. Participation in the simulation will be open only to those who register for this seminar. Any student interested in participating or in finding out more information should contact the Western Societies Program at 130 Uris Hall, 255-7592.

International Relations Concentration.

See the description under "Special Programs and Interdisciplinary Studies."

Honors. Each fall a small number of qualified seniors enter the honors program. To apply, junior majors submit applications in April. Along with a fuller description of the honors program, application forms are available in 125 McGraw Hall. The two courses comprising the honors sequence (honors courses) are described below.

Introductory Courses

Students registering for introductory courses should register for the lecture only. Sections will be assigned during the first week of class. Introductory courses are also offered during summer session.

**GOVT 111** Introduction to American Government and Politics

Fall and summer. 3 credits. T. J. Lowi. An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

**GOVT 131** Introduction to Comparative Government and Politics

Fall and summer. 3 credits. V. Bunce. This course provides a survey of the institutions, political processes, and policies of contemporary states. It focuses on the conditions for and workings of democracy. Looking at Western Europe, we will analyze institutional variations among liberal democracies, and their political implications. We will then probe the origins of democracy in Western societies and the reasons why communism and other forms of authoritarian rule have prevailed elsewhere. Finally, we will explore the impulses behind the obstacles to democratization in the Third World and the erstwhile Communist Bloc. Throughout this survey, problems of democracy will be related to problems of economic development, efficiency, and equality.

**GOVT 161** Introduction to Political Philosophy #

Spring and summer. 3 credits. I. Kramnick. A survey of the development of Western political theory from Plato to the present. Readings from the works of the major theorists. An examination of the relevance of their ideas to contemporary politics.

**GOVT 181** Introduction to International Relations

Spring and summer. 3 credits. S. Telhami. An introduction to the basic concepts and practice of international politics.

Freshman Writing Seminars

**GOVT 100** Freshman Seminars

Fall, spring, or summer. 3 credits. Seminars will be offered in fall, spring, and summer terms. Consult the listings for the Freshman Seminar Program in the section "Special Programs and Interdisciplinary Studies," the supplement issued by the department, and the Freshman Seminar booklet for course descriptions and instructors.

Major Seminars

**GOVT 400** Major Seminars

Fall or spring. 4 credits. These seminars, emphasizing important controversies in the discipline, cap the majors' experience. Thus preference in admission is given majors over nonmajors and seniors over juniors. Topics and instructors change each semester. To apply, seniors should pick up an application in 125 McGraw Hall during the course selection period the semester before the seminar is given.

The following courses are open to sophomores, juniors, and seniors without prerequisites unless otherwise indicated.

American Government and Institutions

Government 111 is recommended.

**GOVT 121** Economic Growth and Democratic Legitimacy

3 credits. Not offered 1997-98.

**GOVT 302** Social Movements in American Politics (also American Studies 302)

Fall. 4 credits. E. Sanders. From populism to environmentalism, social movements directed at reform of national policies and political structures have been an earmark of American politics. This course will begin with an examination of late nineteenth-century agrarian and labor movements and move through progressivism, a variety of 1930s upsurges, civil rights, and more or less contemporary environmental, consumer, feminist, and peace movements. The focus will be on the conditions that gave rise to these movements, their internal resources, and external alliances and their ultimate impact on the national state (as well as vice versa).

**GOVT 303** Introduction to American Political Parties

4 credits. Not offered 1997-98.

**GOVT 305** Atomic Consequences: The Incorporation of Nuclear Weapons in Post-War America

Spring. 4 credits. M. Dennis. This course will explicate the development of atomic weapons from early twentieth-century rumina tions about super bombs in science and fiction through the Manhattan Project, the postwar development of thermonuclear weapons and civil defense, and more recent plans for strategic defense. Our focus will expand to cover the lives of researchers at such institutions as Los Alamos during and after World War II as well as discussions of national policies. Other topics include the Nazi effort to develop an atomic bomb, the role of technical espionage during and after World War II, and the problems posed by the classification of technical knowledge. From our vantage point at the end of the cold war, we will seek to understand how the bomb became part of American culture through the use of literature and film, as well as reading in primary historical documents and secondary analyses.

**GOVT 308** Science in the American Polity 1800-1960

Fall. 3 credits. M. Dennis. For description, see S&TS 390.

**GOVT 309** Science in the American Polity

Spring. 4 credits. S. Jasanoff. For description, see S&TS 391.

**GOVT 310** Power and Poverty in America

4 credits. Not offered 1997-98.

**GOVT 311** Urban Politics

Fall. 4 credits. M. Shefter. The major political actors, institutions, and political styles in large American cities: mayors, city councils, bureaucracies, ethnic and racial minorities, urban machine politics and the municipal reform movement. The implications of these political forces for policies pertaining to urban poverty, homelessness, and criminal justice.

**GOVT 313** The Nature, Functions, and Limits of Law

Fall. 4 credits. Undergraduates only. R. Ogden. A general education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of varied techniques for resolving conflicts and dealing with social problems. The roles of courts, legislatures, and administrative agencies in the legal process is analyzed, considering also the constitutional limits on their power and practical limits of their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process. Students are expected to read assigned materials before each class and to be prepared for participation in class discussion.

**GOVT 316** The American Presidency (also American Studies 316)

4 credits. Not offered 1997-98.

**GOVT 317** Campaigns and Elections

4 credits. Not offered 1997-98.

**GOVT 318** The American Congress

Spring. 4 credits. M. Shefter. The role of Congress in the American political system. Topics to be discussed: the political setting within which Congress operates, the structure of Congress, the salient features of the legislative process, and recent congressional behavior in a number of policy areas.

**GOVT 320** Public Opinion and Public Choice

4 credits. Prerequisite: Government 111 or permission of the instructor. Not offered 1997-98.

**GOVT 322** Political Economy of Capitalist Development

Fall. 4 credits. A. Rutten. Everyday life in Europe has been radically transformed over the past millennium. This course examines how political, economic, and social institutions shaped that transformation, and the institutional reaction to that transfor-
nation. It gives special attention to the development of limited government in Europe, and to the evolution of the American state. We will also consider what lessons, if any, the history of the West offers for modern developing countries.

GOVT 324 Legal Reasoning and Legal Adaptation: A Comparison of American and Talmudic Law
Spring. 4 credits. J. Rabin.
Legislatures may change old laws to reflect new preferences, but much American law is still adapted to modern challenges by judges invoking old precedents and principles, particularly in fields like family law, the law of contracts, and the law of torts. Talmudic law, which rests on much older principles and precepts and cannot fall back on new legislation to justify change in the modern world, must also be adapted to new circumstances. The rabbinic authorities who seek to apply this law often invoke similar kinds of reasoning as American courts but under peculiar conditions. This course, an unusual venture in comparative law, will focus on characteristic modes of reasoning in each system, rather than attempting any systematic surveys of legal outcomes. Readings will include selections from ancient texts as well as modern decisions and contemporary commentaries. No previous background is required.

GOVT 327 Civil Liberties in the United States
Spring. 4 credits. A. Rutten.
An analysis of contemporary issues in civil liberties and civil rights, with emphasis on Supreme Court cases. Cases are analyzed in terms of democratic theory and the social and political context in which they arose.

GOVT 328 Constitutional Politics: The United States Supreme Court
Fall. 4 credits. J. Rabin.
The course investigates the role of the Supreme Court in American politics and compares it to the historical development of constitutional doctrine and the institutional role the court has played in American politics.

GOVT 352 Feminism Movements and the State (also Women's Studies 353)
4 credits. Not offered 1997-98.

GOVT 401 Introduction to Science and Technology Policy (also S&T 431)
4 credits. Not offered 1997-98.

GOVT 402 Public Opinion and Mass Political Behavior
Fall. 4 credits. J. Cowden.
This survey course examines the processes by which people develop their political attitudes and beliefs, the ways in which these attitudes and beliefs find expression in electoral behavior, and the conditions under which public sentiment is translated in public policy and government action.

GOVT 405 Government and the Economy (also GOVT 705)
4 credits. Not offered 1997-98.

GOVT 406 Politics of Education (also GOVT 706)
Fall. 4 credits. E. W. Kelley.
Education is simultaneously America’s biggest business and the institutional process through which skills and values are passed on to the next generation. This course deals with conflicts about, and the politics of, education as they occur in administrative, state, and local levels. What (including values) will be taught and to whom; who will benefit from formal education as a vehicle for entry into economic opportunity? What are the powers and restrictions on government in this area? How does the American system differ from other systems? How does educational testing affect equal opportunity to obtain meaningful competencies and jobs?

GOVT 407 Law, Science, and Public Values (also S&T 407)
4 credits. Not offered 1997-98.

GOVT 409 Racial Prejudice and Political Intolerance
Fall. 4 credits. J. Cowden.
This course explores the nature, scope, and etiologies of intolerance and its implications for the operation of politics in the United States. Readings will include many of the “classics” in political science, political psychology, psychoanalysis, and social psychology, dating from the 1930s to the present.

GOVT 410 Legislatures, Courts, and Public Policy
Fall. 4 credits. A. Rutten.
Courts play a central role in the formulation and enforcement of policy in the United States. However, courts are not all powerful; politicians and bureaucrats have a variety of ways of changing judicial decisions. This course examines judicial control over policy by examining the relations among politicians, bureaucrats, and judges. To do so, we must examine how courts fit into the political process. Among the topics that we will consider are statutory interpretation, administrative procedures, and constitutional review.

GOVT 413/613 Finance, Federalism, and Politics
4 credits. Not offered 1997-98.

GOVT 427 The Politics of Environmental Protection in America
Fall. 4 credits. S. Jasenoff.
For description, see S&T 427.

GOVT 428 Government and Public Policy: An Introduction to Analysis and Criticism
4 credits. Not offered 1997-98.

Comparative Government
Government 131 is recommended.

GOVT 252 Contemporary Palestinian Society (also NES 296)

GOVT 271 Introduction to African Development (also CRP 271 and ASRC 271)
3 credits. Not offered 1997-98.

GOVT 325 Eastern Europe
4 credits. Not offered 1997-98.

GOVT 333 Modern European Politics
4 credits. Not offered 1997-98.
This course presents an introduction to politics and political change in Western Europe. It starts from the formation of the European nation-state and the growth of democratic regimes after the French Revolution. It continues with the nature of European systems of government and with the political party system; it then turns to the politics of public policy and to the interaction between policy-makers and societal interest groups. The course ends with a consideration of the interaction between politics and economics in the different countries. The main country studies are France, Germany, Britain, Italy, Spain, and the Scandinavian countries, with the United States used as an external reference point.

GOVT 333 Government and Politics of the Former Soviet Union
4 credits. Not offered 1997-98.

GOVT 334 Political Economy of East Asia
Spring. 4 credits. R. Bullock.
This lecture course examines East Asian political economy in historical and comparative perspective. Central questions include: Why have Japan, South Korea, and Taiwan developed so rapidly in the postwar era? Can we identify an East Asian mode of development? What does the region's growth mean for other countries and for the international economy? Are Southeast Asian countries following a similar trajectory today? Particular topics include Japanese colonialism, industrial policy and its critics, domestic political consequences of rapid growth, political corruption, US-Japan economic conflict, and recent attempts at political-economic liberalization.

GOVT 335 America in the World
4 credits. Not offered 1997-98.

GOVT 340 Latin American Politics
Spring. 4 credits.
This is the introductory lecture course to the politics of Latin America. The main purpose is to view the region in a conceptual and comparative perspective. Country cases will be introduced in order to understand the fundamental historical processes as well as to explain the significance of competing theoretical frameworks that have shaped the debate in the field. The course will focus on the political economies of the region in order to analyze the role of groups and classes under different political regimes and contrasting strategies of development.

GOVT 342 The New Europe
4 credits. Not offered 1997-98.

GOVT 344 Government and Politics of Southeast Asia
4 credits. Not offered 1997-98.

GOVT 346 Modern Japanese Politics
Fall. 4 credits. R. Bullock.
This course is an introduction to Japanese domestic politics and political economy. Subject matter begins with post-Meiji Japan but focuses on the postwar era. Questions to be explored include: Who rules Japan? How is policy formulated? How do we account for postwar political stability and rapid economic growth? How are opposition interests accommodated or ignored? How is the political system changing today?

GOVT 347 Government and Politics of China
Fall. 4 credits. V. Shue.
An introduction to fundamental currents in China’s domestic politics over the last sixty years. Topics include the revolutionary rise of communism; Maoism, in theory and in practice; the politics of bitterness during the “Cultural Revolution”; the evolving roles of the party and the military, and of peasants,
workers, and intellectuals in the polity; the prospects for democracy, perceived social inequality, violence, corruption, and other pressing problems that have emerged with the reforms under Deng Xiaoping.

[GOVT 349] Political Role of the Military  
4 credits. Not offered 1997-98.

[GOVT 350] Comparative Revolutions  
4 credits. Not offered 1997-98.

[GOVT 354] America In the World Economy  
4 credits. Not offered 1997-98.

[GOVT 355] International Relations of the Ancient Near East  
4 credits. Not offered 1997-98.

[GOVT 357] Understanding Russia Today  
4 credits. Not offered 1997-98.

For description, see, Russ L 330.1

GOVT 358 Modern History of the Middle East: Changing Politics, Society, and Ideas @  
Fall. 4 credits. M. Litvak.

For description, see NES 294.

[GOVT 433] Democracy, Power, and Economic Reform  
4 credits. Not offered 1997-98.

At a time of major political and economic reforms taking place in much of the Second and Third Worlds, and also in some of the First, fundamental questions about governance have been raised. The task before reformers is not limited to establishing a political system of individual rights and the rule of law, or of designing fair electoral systems and holding regular elections. It is also about establishing new forms of political power, or as Max Weber might put it, establishing new and effective systems of political domination. The reformers' need to carry out massive structural transformations has often implied centralizing authority, at the same time they are supposed to foster democracy. The dual challenge is thus one that much of the political development theory has tended to see as sequential rather than simultaneous: to centralize political power in order to carry out major socio-economic transformations, and to build democratic institutions which, by definition, disperse power. This seminar will examine these questions by focusing on some of the more important debates about the interrelationship between democracy and structural reform, the state and the economy, the crafting of order and the creation of markets.

[GOVT 431] Model European Union  
2 credits. Not offered 1997-98.

This two-credit course is designed to prepare students to participate in the annual Model European Union Simulation held, on an alternating basis, at SUNY Brockport and in Brussels. The simulation provides an opportunity for participants, representing politicians from the member states of the European Union, to discuss issues and resolutions of current concern to the EU. The preparatory course introduces students to the EU, the country that the Cornell will represent, and the issues to be discussed at the simulation. A substantial part of travel costs for the Cornell will be paid by the Institute for European Studies, and course enrollment will be restricted by budgetary considerations. Students enrolled in this course are required to write a research paper.

[GOVT 433] The Politics of Economic Liberalization in the Developing World @  
4 credits. Not offered 1997-98.

[GOVT 434] Politics and Society in Modern Italy  
4 credits. Not offered 1997-98.

[GOVT 436] Environmental Politics and Policy  
4 credits. Not offered 1997-98.

[GOVT 437] Contemporary China: Society and Politics @  
Spring. 4 credits. V. Shue.

Selected reading and in-class discussion of some of the central dilemmas that have been posed by the rapidly escalating processes of social change taking place under conditions of continuing political authoritarianism in China today. Topics include broad changes in demographic and social structure, rising tensions in family and gender relations, the enduring salience of community and workplace, the resurgence of Chinese nationalism, of ethnic nationalism, of regionalism, and of popular religious movements; the significance of rising rates of crime and of political corruption; the growing crisis of social welfare delivery; and the limits on political dissent and on the development of civil society.

[GOVT 438] Contemporary China: Political Economy @  
4 credits. Not offered 1997-98.

[GOVT 439] Japan in International Politics @  
4 credits. Not offered 1997-98.

[GOVT 442] Feminist Politics and Policy in the United States and Europe (also GOVT 655)  
Spring. 4 credits. U. Liebert.

In both Western Europe and the United States, feminist organizations as well as public policies that support gender equality are simultaneously under siege and yet still vibrant. Instances of this are the increasing gender gap in political voting behavior, the advancements in feminist political representation and participation in all major spheres of society and politics, the public debates on topics once considered private—including women's, gay and lesbian issues—and ongoing demands for state and federal legislation (in Europe: national and EU-legislation) to act on gender related discrimination. Through cross-national comparisons we hope to assess the strengths and weaknesses of public and private gender politics and policies in Europe and the U.S., and to discuss how differences can be traced to variations in institutional structures of "party government" and the "welfare state," to media framing and patterns of public discourse, to feminist organizational strategies, power resources and alliances, as well as to conflicts of interests and struggles over values and symbolic meanings. The course is addressed to students who have completed undergraduate and graduate students interested in studying gender issues in a comparative perspective.

[GOVT 443] Prosseminar in the Politics of South Asia @  
4 credits. Not offered 1997-98.

[GOVT 444] Afrocentrism  
4 credits. Not offered 1997-98.

[GOVT 454] The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also Comparative Literature 454, History 454) #  
Fall. 4 credits. M. Bernal.

The basic premise of the seminar is that the concept of "Western civilization" is a problematic one in need of critical and historical analysis. The course will examine the evolution and transformation of this concept from antiquity to the twentieth century by focusing on selected moments (and texts in which they are represented) of actual and/or perceptual encounters with other civilizations. It will also inquire into the political uses and abuses of the idea of the West, and the literary, psychological, and anthropological dimensions of the idea's history.

[GOVT 458] Comparative Democratization  
4 credits. Not offered 1997-98.

[GOVT 468] Global and Domestic Dimensions of Science and Technology Policy (also S&S 425)  
4 credits. Not offered 1997-98.

Political Theory

Government 161 is recommended.

[GOVT 361] Modern Ideologies: Liberalism and Its Critics #  
4 credits. Not offered 1997-98.

[GOVT 362] Politics of Sexuality (also Women's Studies 262)  
4 credits. Not offered 1997-98.

[GOVT 364] The Selfish Individual and the Modern World  
Fall. 4 credits. N. Hirschmann.

Michael Milken and Ivan Boesky broke the law: but did they really do anything wrong? Is acting selfishly simply human nature, or its perversion? Do we have natural obligations to others, or is everyone out for themselves? This course will consider these questions through the lens of modern political theory from Hobbes to contemporary times. We will consider the relation of the individual to society to examine different understandings of "the individual," and how they change over time. In the process, we will examine how these understandings affect the meaning of concepts such as freedom, equality, and justice, as well as the form and role of government. This course will follow a seminar format and rely heavily on class discussion. Enrollment limited.

[GOVT 366] American Political Thought from Madison to Malcolm X (also History 316 and American Studies 366) #  
4 credits. Not offered 1997-98.

[GOVT 368] Global Climate and Global Justice (also Philosophy 368)  
4 credits. Not offered 1997-98.

[GOVT 369] Introduction to Feminist Political Thought (also Women's Studies 269)  
4 credits. Not offered 1997-98.

GOVT 370 Political Theory and Cinema  
Fall. 4 credits.

For description, see GERST 330.
GOVT 375 Visual Culture and Social Theory (also ART H 370 and Comp. Lit. 368) Fall. 4 credits. S. Buck-Morss. Introduction to theoretical concepts for the analysis of visual culture, in specific socio-historical contexts.

GOVT 377 Concepts of Race and Racism Spring. 4 credits. A. M. Smith. This course examines race and racism from a political theory perspective. We will discuss the different types of racism: traditional racism, "new racism," or cultural racism, scientific racism and contemporary hybrid racism. We will then examine the politically ambiguous "ethnicity theory." In the second half of the course, we will consider the works by Marable on African American political economy, women of color feminist theorists, native American theorists, Takaki on Asian American labor history, and Hero on Latinos/Hispanic studies. Some discussion of theoretical approaches before taking this course.

GOVT 378 Visual Culture and Social Theory (also SAT H 370 and Comp. Lit. 368) Fall. 4 credits. S. Buck-Morss. Introduction to theoretical concepts for the analysis of visual culture, in specific socio-historical contexts.

GOVT 377 Concepts of Race and Racism Spring. 4 credits. A. M. Smith. This course examines race and racism from a political theory perspective. We will discuss the different types of racism: traditional racism, "new racism," or cultural racism, scientific racism and contemporary hybrid racism. We will then examine the politically ambiguous "ethnicity theory." In the second half of the course, we will consider the works by Marable on African American political economy, women of color feminist theorists, native American theorists, Takaki on Asian American labor history, and Hero on Latinos/Hispanic studies. Some discussion of theoretical approaches before taking this course.

GOVT 468 Global and Domestic Dimensions of Science and Technology Policy Spring. 4 credits. S. Jasanoff. For description, see S&TS 425.

GOVT 470 Anthropology-Theory-Politics-Performance (also Anthropology 470) 4 credits. Not offered 1997-98.

GOVT 473 Marx, Nietzsche, Freud (also German Studies 415) 4 credits. Not offered 1997-98.

GOVT 474 Community, Nation, and Morality Spring. 4 credits. R. Miller. For description, see PHIL 446.

International Relations

Government 181 is recommended.

GOVT 294 Global Thinking (also Philosophy 294) @ Fall. 4 credits. No prerequisites; intended for Freshmen and Sophomores. Fulfills geographical distribution requirement. H. Shue. The analysis taught in this course is global and regional in nature. Students will develop skills in critical thinking and written expression. The course will be taught in a seminar format. It will cover contemporary issues, and to understand how concepts have been used to explain its evolution. The goals of the course are to gain insights into contemporary issues, and to understand how scholars of international relations and economics describe and explain problems in the global economy.

GOVT 391 Chinese Foreign Policy @ Spring. 4 credits. T. Christensen. This undergraduate lecture course will review and analyze the foreign policy of the People's Republic of China from 1949 to the present. Lectures will discuss the Cold War history of Beijing's relations with the Soviet Union, the United States, Southeast Asia and the Third World. Various theories of foreign policy will be discussed as potential tools for understanding Chinese foreign policy. The class will conclude with a discussion of the future of Chinese foreign policy in light of the end of the Cold War, changes in the Chinese economy and the post-Tiananmen legitimacy crisis in Beijing.

GOVT 392 International Relations of the Middle East (also NES 395) @ 4 credits. Not offered 1997-98.

This course will examine patterns of international relations in the Middle East in the twenty-first century, with special reference to the Arab-Israeli and Iran-Iraq conflicts. These conflicts will be treated as part of a Middle East system, whose other main elements are the interaction between domestic and external politics, inter-Arab relations, and the involvement of extraregional powers.

GOVT 393 Introduction to Peace Studies (also SOC 393) Fall. 4 credits. J. Repp. This course serves as an introduction to the study of war, peace, and peacemaking. We will study different theories of peace and war from a variety of disciplinary perspectives. The course will cover definitions of peace and war, causes of conflict, conflict prevention and resolution. The concepts will be applied to a range of historical and current conflicts. Students will prepare analyses of specific conflicts or instances of peacemaking for class presentation.

GOVT 394 Comparative Foreign Policy Spring. 4 credits. M. Evangelista. This course explores the sources of differences in foreign-policy processes and outcomes between and within states. One school of thought holds that differences in the characteristics of the countries in question (large versus small, democratic versus authoritarian, industrialized versus developing, etc.) lead to differences in their foreign policies. Another argues that the important differences are not so much between countries as between policy preferences, for example, military policy versus trade policy. In this course, students will evaluate the competing explanations by looking at a number of aspects of foreign policy— including diplomacy, strategy, economic policy, and alliance policy—in several areas and historical cases: the World Wars, the Cold War era, etc.
War, arms races, North-South political and economic relations, foreign economic policies of advanced industrial, state-socialist, and developing countries. We will attempt to understand why some states are more successful than others in achieving the main goals of foreign policy: security and prosperity.

GOVT 395 Palestinian Nationalism (also NES 399) 4 credits. Not offered 1997–98.

GOVT 475 The Politics of International Monetary and Financial Relations Spring. 4 credits. J. Kirshner. Government 475 is a topical seminar which focuses on a different aspect of international political economy each time it is offered. The goal of the course is to explore the historical and theoretical background of a particular issue or controversy and consider the implications of that analysis for the contemporary system.

GOVT 477 Rational Choice Approaches to International Relations Spring. 4 credits. D. McDermott. Rational Choice paradigms are becoming increasingly predominant in International Relations scholarship. This course teaches international relations from a Rational Choice perspective. This course will cover modelling methodology and theoretical issues. Familiarity with mathematics is not required, but logical reasoning is emphasized. This course will cover rational choices approaches to social choice and public good problems, negotiation, alliances and constraints of domestic politics. Critics of balance of power, deterrence, and power transition theories from a rational choice perspective will be introduced. An introduction to Game Theory will be provided. Alternative psychological approaches will be mentioned briefly.

GOVT 482 International Relations of East Asia 4 credits. Not offered 1997–98.

GOVT 491 Conflict, Cooperation, and Norm: Ethical Issues in International Affairs Fall. 4 credits. M. Evangelista. This course examines current and historical issues in international relations from the perspective of international law, norms, and ethics. We develop general principles and concepts, such as “just war,” “national interest,” and “human rights,” and apply them to real-world situations. Most of the focus of the course is on particular cases that involve legal and ethical issues: violations of human rights and genocide; war crimes; military intervention; economic sanctions; environmental degradation; economic injustice. The first part of the course examines these issues using examples from 20th century international affairs, including recent events. The second part focuses on current issues that pose ethical problems for the foreign policy of the United States: internal violence and human rights abuses in the former Yugoslavia and former Soviet Union; indigenous uprisings in Mexico and their relation to U.S. foreign economic policy; the appropriate U.S. response to situations in countries such as Haiti, Nigeria, and China.

Honors Courses

Each April a limited number of junior majors are admitted to the honors program, their work to begin the following fall. Application forms and a full description of the program may be obtained in 125 McGraw Hall.

GOVT 494 Honors Seminar: Thesis Clarification and Research Fall. 4 credits. Each student works individually with a faculty member. The student initiates the tutorial by interesting a faculty member in his or her likely thesis project and by submitting to the director of undergraduate studies a form outlining the general area the thesis will treat and the thesis advisor’s signature. This form is due the third week of classes. The tutorial culminates in a ten-to-fifteen-page paper setting forth the central questions to be addressed by the thesis, the state of existing knowledge regarding those questions, and why they matter.

GOVT 495 Honors Thesis: Research and Writing Spring. 4 credits. Limited to students who have successfully completed Government 494. Students continue the work of the preceding semester typically with the same faculty tutor. Research on the thesis is completed and writing begun. The tutorial culminates in a thesis of some sixty to eighty pages. The grade for the tutorial is determined by the faculty tutor, while the degree of honors (if any) awarded the thesis is decided by a committee of faculty members established for that purpose.

Independent Study

Independent study, Government 499, is a one-on-one tutorial which is arranged by the student with a faculty member of their choosing. Government 499 is open to government majors doing superior work, and it is the responsibility of the student to establish the research proposal and to find a faculty tutor. Applicants for independent study must present a well-defined program of study that cannot be satisfied by pursuing courses in the regularly scheduled curriculum. No more than 4 credits of independent study may count toward fulfillment of the major. Students who elect to continue taking this course for more than one semester must select a new theme or subject each semester. Credit can be given only for work that results in a satisfactory amount of writing. Emphasis is on the capacity to subject a body of related readings to analysis and criticism. Keep in mind that independent study cannot be used to fulfill the seminar requirement. The application form for Independent Study is available in 125 McGraw Hall and must be completed at the beginning of the semester in which the course is being taken.

GOVT 499 Readings Fall or spring. Fall or spring. 1–4 credits.

Graduate Seminars

Qualified undergraduates are encouraged to apply for seminars listed with 600 course numbers but may only register with the permission of the instructor. Students may consult the supplement that lists graduate courses, available in the department office.

Field Seminars

GOVT 603 Field Seminar in American Politics Fall. 4 credits. M. Lefler and J. Rabkin. The basic issues and institutions of American government and the various subfields of American politics are introduced. The focus is on substantive information and theoretical analysis and problems of teaching and research.

GOVT 606 Field Seminar in International Relations Fall. 4 credits. J. Kirshner and K. Christensen. A general survey of the literature and propositions of the international relations field. Criteria are developed for judging theoretical propositions and are applied to the major findings. Participants will be expected to do extensive reading in the literature as well as research.

GOVT 607 The Western Political Tradition: A Survey Fall. 4 credits. N. Hirschmann. An introduction to political theory through a reading of selected classics in political thought from Plato to Marx.

Methodology

GOVT 601 Scope & Methods of Political Analysis Fall. 4 credits. J. Cowden and J. Pontusson. This course introduces the major analytical approaches used in contemporary political science research. We touch on broad philosophical issues concerning the nature of theory and inference, the practices of cultural and historical interpretation, and the relevance of moral values and political commitments. Several kinds of research designs, including comparative case study and quasi-experimentation, are briefly examined. The basic analytical ideas involved in statistical methods such as sampling and regression analysis are introduced, as are the basic concepts of the theory of collective choice and the elementary methods of applied game theory.

GOVT 605 Comparative Methods 4 credits. Not offered 1997–98.

This course will present various normative and interpretive methodological approaches to issues in political science. Though the specific focus of the course will vary depending on the interests of the instructor, the general orientation of the seminar will be to expose students to the role of hermeneutic techniques and qualitative criticism in political analysis. This course will fulfill departmental requirements for the second methodology course.
American Government and Institutions

**GOVT 609 Political Parties and Elections**

**GOVT 611 The Political Economy of American Development, 1860–1900**
Fall. 4 credits. R. Bensel.

This course will trace and describe the political economy of national state formation from the last decades of the antebellum period, through the Civil War and Reconstruction eras, and end with the transition to a more industrial society during the late nineteenth and early twentieth centuries. Utilizing a broad survey of the historical literature on these periods, the course will investigate: (1) the connection between slavery and the emergence of southern separatism; (2) the impact of conflict between the plantation South and industrializing North on American state formation; (3) the failure of post-Civil War attempts to remold the southern political economy; (4) the role of finance capital markets in industrial and western agrarian expansion and the consequent emergence of monetary issues in national politics; and (5) the political economy of possible developmental trajectories other than the high-tariff, gold-standard one actually followed.

**GOVT 612 American Political Development II: Social Movements and State Expansion in the Twentieth Century**

**GOVT 613/413 Finance, Federalism, and Politics**

**GOVT 615 State and Economy in Comparative Perspective**
Spring. 4 credits.

This course reviews the extensive literature on the political economy of comparative state formation and institutional change. Among the topics covered will be war-making and state expansion, regime evolution and economic development, and market processes and class transformations. Although much of the reading will focus on the United States and Europe, the limits of these cases as theoretical prototypes for the remainder of the world will also be considered.

**GOVT 618 Politics, Markets, and the Middle Classes**
Spring. 4 credits. E. Sanders and R. Bullock.

The middle sectors—white collar workers, farmers, professionals, and small business people—have played critical roles in development, democratization, and social movements, but the literature analyzing their class identities, values and coalitional tendencies is rather sparse. Readings for this course will be diverse, ranging from the U.S. and Europe to East Asia and developing countries. However, the course is primarily intended as a research workshop, with members presenting their work-in-progress during the second half of the semester.

**GOVT 620 The United States Congress**

**GOVT 623 The Politics of Courts**
Spring. 4 credits. J. Rakbin.

All modern or westernized governments have judicial organs, designed to provide impartial decisions on certain kinds of disputes. But the kinds of issues that are left to courts vary widely from country to country and from era to era; the forms and degrees of political insulation for courts also vary widely; even the official rationales for such institutions vary a good deal. All of these differences are sometimes subjects of political controversy. This course will survey various forms and doctrines of judicial authority, seeking to clarify the relationship between particular judicial models and the political systems in which they operate. Supra-national courts and administrative organs will be included in the survey, but principal emphasis will be on the role of courts in English-speaking countries.

**GOVT 629 Cleavages and Coalitions in Contemporary American Politics**

**GOVT 703 Political Economy**

**GOVT 705/405 Government and the Economy**

**GOVT 707 The Politics of Education**
Fall. 4 credits. E. W. Kelley. See Govt 406 for description.

**GOVT 626 Workshop on Law, Science and Technology (also S&T 626)**

**GOVT 627 Comparative Government**

**GOVT 629 Latin American Political Economy**
Spring. 4 credits. H. Scharrer.

The central goal of this seminar is to examine the magnitude and scope of the decades-long process of economic transformation in the region and capture its implications for political stability. In order to do so, we will adopt a historical political economy approach. Old concepts—populism, corporatism, nationalism—will be reviewed in light of new developments. Different economic phases and strategies—export-led growth, import-substituting industrialization, market-oriented reform—will be analyzed in light of the region's changing social structures, unstable political institutions, and shifting preferences and ideologies of social actors. And classic theoretical approaches—Modernization, Dependency, Bureaucratic-Authoritarianism—will be reevaluated in light of the current convergence toward marketization and democratization.

**GOVT 639 Studying Political Culture**
Fall. 4 credits. V. Shue.

Selected readings deploying a range of differing approaches to the study of the relations between culture and politics. Discussion of central methodological and interpretive questions including the linkage of cultural with structural explanations and the framing of informative comparisons across cultures. Readings and discussion focused on, but not confined to, Asian examples.

**GOVT 642 Comparative Political Economy: East and Southeast Asia**
Fall. 4 credits. R. Bullock.

This seminar focuses on the political economy of rapid growth in postwar Japan, South Korea, and Taiwan. Seminar themes include: Japanese colonial legacies; containing models of East Asian economic success; international implications of rapid growth; the "Japanese model of development" and regional variance; one-party conservative rule; structural corruption and political scandal; ongoing efforts at political-economic liberalization; and Southeast Asian cases as second-generation NICs.

**GOVT 644 Sociotechnical Aspects of Irrigation**
Not offered 1997–98.

**GOVT 645 Chinese Politics**
Spring. 4 credits. V. Shue.

Review and assessment of several of the major currently competing approaches to the study of Chinese politics. Discussion and evaluation of leading works in the field analyzing Chinese state and society, policymaking and policy implementation, bureaucratic politics, elite political culture, and political economy. Special attention to problems of research and interpretation.

**GOVT 647 Political Anthropology: Southeast Asia**

**GOVT 648 Political Economy of Change: Rural Development in the Third World**

**GOVT 649 Agrarian Political Economy: Land, Labor, and Nature**

**GOVT 652 Southeast Asia Seminar: The Philippines (also Asian Studies 601)**

**GOVT 653 The Plural Society Revisited (also Asian Studies 602 and 607)**

**GOVT 655 Gender, Politics and Welfare Policies in Europe and the U.S. (also Govt 442)**
Fall. 4 credits. U. Liebert.

How can we rethink the welfare state from a gender perspective? How do welfare reforms restructure and welfare debates re- and/or deconstruct gender relations? To what extent do institutional constraints and gender representation matter in explaining gender bias in different welfare retenchment policies? By comparing recent experiences and developments in the U.S. and Europe (European Union), we will discuss and further develop the emerging body of feminist
theories on democratic welfare state politics and policies. Situated at the intersection of gender studies and welfare state analyses, the materials will cover the following areas: (1) feminist as well as "mainstream" theories of the welfare state and its "retreat" in the context of global change; (2) comparative analyses of the impact of distinct welfare regimes on the development of gender relations; (3) cultural and discourse analyses of how welfare reform debates are framed and how they de- and reconstruct gender relations differently in different countries; (4) the institutional constraints on and incentives for gender politics, including gender representation and welfare policies, that are embodied in various forms of party government.

**GOVT 656 Comparative Political Economy**

**GOVT 657 Comparative Democratization**

Fall. 4 credits. H. Schamis.

This course will focus on the transition from authoritarian to liberal politics in Eastern Europe and in Latin America. Particular attention will be paid to Poland, Hungary, Russia as well as Argentina, Brazil, and the not-necessarily-transitional Mexico. During the course, we will also bring in a variety of other cases of democratization—in particular, Spain, Portugal, Italy, and Greece. Our focus will be equally divided between the empires of these transitions and the theoretical understandings of transitions to democracy.

**GOVT 660 Globalization and Social Movements and Contentious Politics (also SOC 660)**

Spring. 4 credits. S. Tarrow.

This is a research seminar on the relationships among politics, organized social movements, and periods of mass mobilization like those that swept through Western Europe and the U.S. in the 1960s and in Eastern and Central Europe today. The course begins with a theoretical introduction to major approaches to social movements and collective action, concentrating on the factors that induce masses of people to adopt disruptive forms of collective action. It moves from there to a historical section focusing on cycles of protest in the recent and not-so-recent past. It continues with case materials that illustrate a series of theoretical problems in the study of movements and collective action—particularly that of the relations between protest and reform. Students will write term papers on particular cycles of protest and reform.

**GOVT 692 The Administration of Agricultural and Rural Development**

Spring. 4 credits. N. Uphoff.

For description, see INTAG 603.

**Political Theory**

**GOVT 663 Political Theories of Power**

Spring. 4 credits. A. M. Smith.

Through reading and discussion of theorists such as Lukes, Gramsci, Laclau and Mouffe, Nietzsche, Foucault, Connolly, Fraser, Butler, (Biddy) Martin, (Renata) Saclel, (Joan) Scott, (Jacqueline) Rose and (Mike) Davis, we will explore the contemporary debates on the structure of power relations. Seminar themes will include: social agents and interests, hegemony, disciplinary regimes, subjectivity and resistance. Seminar participants should already have a basic familiarity with the treatment of power in the political theory tradition.

**GOVT 664 Contemporary Democratic Theory**

Fall. 4 credits. A. M. Smith.

Many theorists and activists working on questions of class, racial, gendered and sexual identities have claimed that we must develop a rigorous critique of "essentialism" in order to make way for a truly democratic form of political practice. How are these diverse claims, in post-Marxist texts, critical studies of race and feminism, feminist theory and lesbian, bisexual and gay studies, structurally similar? How do the political practices envisioned in these anti-essentialist texts differ from each other strategies? Do the demands for anti-essentialist theories and practices risk the erasure of politically important identity claims? The reading list will change from year to year; it will probably include selections from the work of Ernest Laclau, Chantal Mouffe, Stuart Hall, Etienne Balibar, Patricia Williams, Yvon Ware, Teresa de Lureis, Biddy Martin, Chandra Talpade Mohanty, Joan Scott and Judith Butler.

**GOVT 665 American Political Thought: From Madison to Malcolm X**

**GOVT 669 Modern Social Theory I**

Fall. 4 credits. S. Buck-Morss.

Readings include works of this course are whether something resembling a transnational society is developing and what are the effects of transnational movements on the state.

**GOVT 670 Modern Social Theory II**

Spring. 4 credits. S. Buck-Morss.

**GOVT 671 Graduate Seminar in Feminist Political Theory**

Spring. 4 credits. A. Hirschmann.

This seminar will examine contempor­ary feminist theory from the perspective of political theory. We will study the work of feminist theorists who work specifically within the discipline of political science, as well as the specifically political dimensions of work not generally considered political theory. Though particular readings and topics will change from year to year in response to the most recent literature, in general the course will focus on questions of epistemology and methodology as a way to explore a variety of issues of relevance to feminism as an academic, intellectual, and political enterprise. The course is open to undergraduates who have taken Government 463 or other courses in feminist theory, with permission of the instructor.

**GOVT 674 Theory and Practice of Nationalism**

**GOVT 675 Gramsci and Cultural Politics (also German Literature 665)**

**International Relations**

**GOVT 681 Politics of Transnationalism**

Spring. 4 credits. M. Evangelista and S. Tarrow.

With the globalization of the world economy and media and the diffusion of new international organizations and institutions, economists, political scientists and sociologists have been asking whether the monopoly of the nation-state or international society is eroding. Such erosion could be part of the explanations for the mobility of capital and employment, the diffusion of transnational movements, and for the apparent inability of states to control identity politics within and contagion from without. The central questions of this course are whether something resembling a transnational society is developing and what are the effects of transnational movements on the state.

**GOVT 682 International Relations of the Middle East**

The focus of this seminar will be patterns of alliances among Middle Eastern states. We will examine the applicability of competing theories of alliance formation in the Middle East, including those that focus on power distribution, perceptions, and domestic politics.

**GOVT 683 Foreign Policy Analysis**

This seminar will survey theories of foreign policy and examine their applicability by comparing the foreign policy making in several states. Both theories emphasizing the role of the international system and theories highlighting the relevance of domestic politics will be assessed.

**GOVT 685 International Political Economy**

Spring. 4 credits. J. Kirshner.

An exploration into a range of contemporary theories and research questions in the field of international political economy. The seminar will cover different theoretical perspectives and a number of substantive problems.

**GOVT 686 International Strategy**

Spring. 4 credits. T. Christensen.

This seminar will analyze and compare national security strategies, including military doctrine, alliance policies, and foreign economic policy. We will examine how various factors—international structure, domestic politics, and leadership psychology—contribute to policy outcomes. We will study how different strategies act as stabilizing or destabilizing influences in the international system. We will examine how variation in the international distribution of power (e.g., bipolar, multipolar) affects both individual nations' policies and international stability more generally. Specific topics will include great power strategy, China's Cold War strategies, and factors for stability and instability in the post-Cold War world.

**GOVT 687 International Environmental Policy**

Not offered 1997–98.

**GOVT 688 Political Economy and National Security**

**GOVT 689 International Security Politics**

**GOVT 691 Normative Elements of International Relations**

Fall. 4 credits. M. Evangelista and H. Shue.

We examine selected normative elements of international affairs, divided into three inter­locking clusters. First are issues about
conflict, including both low-intensity military intervention and nuclear weapons. Second are questions about cooperation, especially between rich nations and poor nations. Third are debates about the authority and status of the major players in the international system: individual persons, nation-states, and international regimes. Questions considered include: is the retention by some nations of nuclear weapons morally justified? Is the world economy unjust? Should national governments be pressured to respect individual human rights?

[GOVT 694 Research Design and Grant Writing
4 credits. Not offered 1997-98.]

Independent Study
This course is NOT open to undergraduates. Undergraduates wishing to conduct supervised study should register for Government 499.

GOVT 799 Independent Study
Fall or spring. 4 credits. GOVT 799 is a course of individualized readings and research for graduate students. Topics, readings, and writing requirements will be designed through consultation between the student and the instructor. Graduate students in government who are looking to use this as an option to fulfill their course requirements should check with their chairs to be certain that the program of study is acceptable for this purpose. Applications must be completed and signed by the instructor and by the chair of their special committees. They are available from, and must be returned to, the graduate secretary in 125 McGraw Hall.

HISTORY

The popularity of history among Cornell students is due to its usefulness as preparation for graduate, professional, or law school and for any career that requires critical thinking and good writing; the reputation of the faculty for scholarship, teaching, and advising; and most of all, the intrinsic interest of the discipline. A wide variety of introductory and advanced courses is offered. The department is particularly strong in ancient, medieval, and modern European history; in American, Latin American, and Asian history; and in the history of science.

The Major
To complete the history major, a student must fulfill the requirements listed below:

Entry requirement: completion of any two History courses excluding Freshman Writing Seminars.

1) Take history department courses totaling 40 credits and complete all these courses with a grade of C or better. (Courses taken for entry may count towards to 40 credits.)

2) Of the courses totaling 40 credits, take a minimum of:
   a. 16 credits outside of American history
   b. 12 credits in history before 1800.

Courses used to fulfill Requirement (1) above may also be used to fulfill Requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill Requirement (2b).

A course before 1800 in a field other than American history can be used toward fulfillment of both Requirements (2a) and (2b).

3) Of the courses totaling 40 credits, take at least one 400-level seminar. Appropriate seminars may be used to fulfill Requirements (2a) and (2b).

Honor Program
The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take the Honors Seminar (History 400) and an additional 400-level seminar, preferably during their junior year, and complete 44 credits in history before the fourth week of April. In May each honors candidate is given an oral examination administered by the supervisor; examination focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, seventeenth-century science, nineteenth-century America). To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a B+ cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral examination.

Cornell-in-Washington Program. History majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

Course Offerings

Comparative history
History of science
American history

African history
Asian history
Near Eastern history
Ancient European history
Medieval, Renaissance, and early modern European history
Modern European history
Honors and research courses

Course Numbering System
100–level courses are very general introductory courses (like 151–152, 190–191) and freshman writing seminars.

200–249–level courses are similar to freshman writing seminars, except that there is greater emphasis on subject matter and less on writing.
250–299–level courses have no prerequisites and admit freshmen. They cover a relatively broad geographical area, period of time, or subject.

300–399–level courses may have specified prerequisites or deal with more-specialized subjects than do those numbered 250–299. Admission of freshmen varies from course to course and is indicated in the course descriptions.

400–499 are upper level undergraduate courses.

600–699 and 700–799 are graduate level courses.

**Comparative History**

**HIST 274 Foodways: A Social History of Food and Eating**
Fall. 4 credits. S. L. Kaplan.
An interdisciplinary examination of the validity of the adage "man is what he eats." Among the topics: food and nutrition, food and social structure, the politics of food control, food and modernization, taste making, and food in religion and literature. Cases will be drawn widely across space and time, from Pharaoh's Egypt to the 1990s.

**HIST 360 Early Warfare, East and West**
Spring. 4 credits. C. Peterson.
A study of the principal modes of warfare found both in the East and the West from ancient times up to the eighteenth century. Tactical evolution and the impact of innovations are stressed, but attention is also paid to the general social and cultural background and the role of nonmilitary factors.

**HIST 380 Social History of Western Technology**
For description, see History of Science.

**HIST 393 Images of Humanity in Medieval China (also Asian Studies 393)**
Fall. 4 credits. Prerequisite: any course on modern China or Chinese religions, or permission. Not offered 1997–98. C. Peterson.

**HIST 405 Population and History**

**HIST 409 Seminar on Work in Europe and America**
A comparative study of the meaning of work in different societies from premodern times to the present. Emphasis on the "representations" of work of the actors themselves who worked, as well as of those who for various critical reasons did not work. The seminar will examine not only ideology but also the organizational, social, and physical place of work. It will explore theory as well as "cases," and draw on anthropological and sociological as well as historical materials.

**HIST 432 The City in History: Europe and America**
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1997–98; next offered 1998–99. S. Blum

Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe and in modern Europe and America. Individual research projects.

**HIST 451 Lord and Peasant in Europe: A Seminar in Social History**
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1997–98; next offered 1998–99. S. L. Kaplan.

**HIST 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also Government 454)**
Fall. 4 credits. Limited to 20 students. Prerequisite: permission of instructor. J. Najemy, M. Bernal.
The basic premise of the seminar is that the concept of "Western civilization" is a problematic one in need of critical and historical analysis. The course will examine the evolution and transformation of this concept from antiquity to the twentieth century by focusing on selected moments (and texts in which they are represented) of actual and/or perceptual encounters with other civilizations. It will also inquire into the political uses and abuses of the idea of the West, and the literary, psychological, and anthropological dimensions of the idea's history. Readings include selections from Herodotus's History, Virgil's Aeneid, Augustine's City of God, The Song of Roland, Petrarch, Pico, Machiavelli, Montesquieu, Flaubert, Shelley's Hellass, Arnold, Hegel's Philosophy of History, James Mill's History of British India, and, from secondary critical literature, Tzvetan Todorov's The Conquest of America and Edward Said's Orientalism.

**History of Science**

**HIST 250 Technology in Society**
(also Engineering General Interest 250, Electrical Engineering 250, and Science and Technology Studies 251)
Fall. 3 credits. R. Kline.
For description, see ENGRG 250.

**HIST 281 Science in Western Civilization**
(also Science and Technology Studies 281)
Fall. 4 credits. History 281 is not a prerequisite to 282. P. R. Dear.
This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show science as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. 281 is tailored for the pre-eminent guide to practical action has deep roots in the thought of 18th-century Europe, the period known as the Enlightenment. The practice and image of science in the Enlightenment show how this idea has been developed and understood, and what its meanings and implications were. Those meanings, and their associated values, remain strongly with us today. This course will investigate our current scholarly understanding of many themes and issues relating to "enlightened science," as well as studying writings of the period itself in a variety of topical areas, from political economy to astronomy and natural history, in

**HIST 282 Science in Western Civilization**
(also Science and Technology Studies 282)
Spring. 4 credits. History 281 is not a prerequisite to 282. P. R. Dear.

How did the natural philosophy of the 18th century become the natural science of the 19th and 20th centuries? This course will explore the changing conceptions of knowledge in the West with particular attention to the connections among theories of nature, political cultures, and commercial and industrial practices. In addition to the traditional discussions of such fundamental figures and constellations of events as William Herschel, the Chemical Revolution and the French Revolution, Darwin and the theory of evolution, and natural philosophy in the Scottish Enlightenment, lectures will also focus on the development of research in the sciences in Germany, the role of research schools in dissemination new knowledge and experimental practice, and the different national styles of support for science during the period.

**HIST 287 Evolution**
(also Biology-General Courses 207; Science and Technology Studies 287)
Fall. 3 credits. Not offered 1997–98. W. Provine.
For description, see BIO G 207.

**HIST 292 Inventing the Power and Information Societies (also Engineering General Interest 298, Electrical Engineering 298, and Science and Technology Studies 292)**
For description, see ENGRG 298.

**HIST 380 Social History of Western Technology**
Studies in the interaction between technological changes and social changes in Western Europe and America since the eighteenth century. Readings and lectures will deal both with instances of social transformation that accompanied technological changes and with the role of technology in social thought and cultural expression. Special attention to three periods: Britain during the Industrial Revolution, America in the nineteenth century, and America during the Vietnam War.

**HIST 415 Seminar in the History of Biology**
(also Biology-General Courses 467, Biology and Society 447; Science and Technology Studies 447)
Summer. 4 credits. W. Provine.
For description, see BIO G 467.

**HIST 416 Enlightened Science**
(also Science and Technology Studies 416)
Spring. 4 credits. P. R. Dear and M. A. Dennis.
"Science" is a term that is often associated with "rationality." The idea that "reason," rather than "truth" or "tradition" should be the pre-eminent guide to practical action has deep roots in the thought of 18th-century Europe, the period known as the Enlightenment. The practice and image of science in the Enlightenment show how this idea has been developed and understood, and what its meanings and implications were. Those meanings, and their associated values, remain strongly with us today. This course will investigate our current scholarly understanding of many themes and issues relating to "enlightened science," as well as studying writings of the period itself in a variety of topical areas, from political economy to astronomy and natural history, in
several national contexts including Scotland, France, and Germany. We will attempt to view these materials from the perspective both of developments from earlier periods and in relation to the later consequences of this ideology.

HIST 525 Seminar in the History of Technology (also Science and Technology Studies 525)  
Fall. 4 credits. R. Kline.  
For description, see STS 525.

HIST 465 Scientific Rhetoric in Historical Perspective (also Communication 465 and Science and Technology Studies 465)  
Spring. 4 credits. No prerequisites. Not offered 1997–98. R. P. R. Dear, B. Lewenstein. Exploration of the development of scientific discourse since the Scientific Revolution, with special emphasis on understanding the rhetorical purposes served by differing forms and techniques. Readings will include classics from Newton, Darwin, and others, along with representative samples of more routine scientific communications. Students will prepare brief reports during the semester and a final term paper.

HIST 680 Seminar in Historiographical Approaches to Science (also Science and Technology Studies 680)  
Fall. 4 credits. Not offered 1997–98. R. P. R. Dear.  
Examines philosophical, sociological, and methodological dimensions of recent historiography of science.

HIST 682 Topics in the Scientific Revolution (also Science and Technology Studies 682)  
Fall. 4 credits. Not offered 1997–98. R. P. R. Dear.  
This is a graduate seminar devoted to investigation of recent scholarship and issues in sixteenth- and seventeenth-century European knowledge of nature. Students will be expected to produce a substantial paper focused on the study of primary source documents. The seminar will focus alternately on the study of recent historiography in selected areas, and an examination of primary source materials intended to critique and test those historiographical approaches. Topics will include: credibility and social status; the academic environment; philosophy and court culture; the situated meaning of experiment.

HIST 711 Introduction to Science and Technology Studies (also Science and Technology 711)  
Fall. 4 credits. R. P. R. Dear.  
For description, see STS 711.

American History

HIST 101 Introduction to American History  
Fall. 3 credits. 101 is not a prerequisite to 102. M. Washington.  
A survey of American history from the colonial era to the Civil War. Major topics include cultural encounters of white, black, and Indian, the social construction of Colonial America, the American Revolution, conflict and consensus in the early republic, socioeconomic aspects in the rise of immigration, Indian relations and removal, slavery and reform, and the coming of the Civil War. Among the topics to be discussed are women's familial roles, the changing nature of household work, the women's rights movement, employment of women outside the home, racial and ethnic differences in women's experiences, and contemporary feminism.

HIST 102 Introduction to American History  
Spring. 3 credits. 101 is not a prerequisite to 102. G. Okitiro.  
An introductory survey of the development of the United States since the Civil War.

HIST 208 The Era of Franklin D. Roosevelt  
Spring. 4 credits. Primarily for sophomores. Prerequisite: permission of instructor. R. Polenberg. The impact of the Great Depression and World War II on American politics, law, and culture.

HIST 209 Political History of Indians in the United States (also American Indian Studies 209)  
Spring. 4 credits. D. Usner.  
An investigation of political organization and change among Native American societies. Discussions and assignments examine forms of tribal government, diplomacy, and warfare, as well as political relations with European colonies in the United States. Specific topics include pan-Indian confederacies, Indian policy, struggles over sovereignty, and Indian strategies of autonomy and resistance.

HIST 213 Asian American History (also Asian American Studies 213)  
Fall. 4 credits. Not offered 1997–98. G. Okitiro.  
Comparative introductory history of Asian Indians, Chinese, Filipino, Japanese, and Koreans in the U.S. from about 1850 to World War II. Themes include U.S. expansionism in the Pacific, Asian migrant labor in Hawaii and the American West, the anti-Asian movement, and Asian resistance.

HIST 214 Seminar on American Foreign Policy  

HIST 227 Men and Women in Modern America (also Women's Studies 227)  
Fall. 4 credits. Limited to 20 students. Permission of instructor required.  

HIST 238 History of Women in the West (also American Studies 238, and Human Development and Family Studies 288)  
For description, see HDFS 288.

HIST 251 Black Religious Traditions from Slavery to Freedom (also American Studies 251; Religious Studies 251)  
This course focuses on the black religious and spiritual traditions during bondage and the early years of freedom. The course will examine slave religion, the rise of black churches in the North, the formation of black churches after the Civil War, the independent church movement and the churches' role in social protest.

HIST 273 Women in American Society, Past and Present (also Women's Studies 273)  
Spring. 4 credits. M. B. Norton.  
A survey of women's experiences in America from the seventeenth century to the present. Among women's topics to be covered are women's familial roles, the changing nature of household work, the women's rights movement, employment of women outside the home, racial and ethnic differences in women's experiences, and contemporary feminism.

HIST 208 American Indian History, 1500–1850 (also American Indian Studies 276)  
A survey of North American Indian history from the sixteenth century to the mid-nineteenth century. Relations between Indian nations and with European colonies will be explored. Different cultural groups and cross-cultural encounters will be compared, with emphasis on resistance and adaptation to European colonialism. The formative years of U.S. Indian policy and the experiences of Indian people through the removal era will receive close attention.

HIST 276 American Indian History, since 1850 (also American Indian Studies 277)  
Spring. 4 credits. D. Usner.  
A historical study of American Indians in the United States and Canada from the mid-nineteenth century to the present. The active and complex role played by Indian people in their responses to government policies and to socioeconomic changes will be emphasized. Challenges faced and initiatives taken by Indians will be traced from the early reservation years to the current era of self-determination. Cultural change and continuity within Indian communities will be closely examined.

HIST 303 African-American Women in Slavery and Freedom (also Women's Studies 307)  
Historical exploration of African-American women from a sociopolitical perspective. Topics include women in Africa, slavery and freedom, sexuality, labor, the family, gender cross-culturally that began in the African background and ends at 1900.

HIST 304 American Culture in Historical Perspective, 1880–1980 (also American Studies 304)  
An introduction to American Studies and the study of modern American culture. Emphasis upon relationships between mass culture, popular culture, and high culture; and on the question of American exceptionalism (distinctiveness). Special attention also to the situation of subcultures and regions, to the changing role of entertainment in relation to leisure, the media, ethnicity (pluralism), the decorative and popular arts.

HIST 309 The U.S. and the Third World  
This course examines American relations with Asia, Africa, Latin America, and the Middle East, with particular emphasis on the post–World War II period. Connections between domestic factors in the United States and American foreign policy will be emphasized.
HIST 311 The Structure of American Political History (also American Studies 311) Fall. 4 credits. J. Silbey.
Examines the course of American politics from the eighteenth century to the Gilded Age, focusing on the development of American political culture, the nature of decision making, and the role of interest groups, political parties, and political elites in shaping our political history.

HIST 312 The Structure of American Political History Spring. 4 credits. J. Silbey.
A continuation of History 311 but can be taken independently. Examines the course of American politics from the 1800s to the present, focusing on the massive transformation of American political life in the late nineteenth and twentieth centuries in response to industrialism and urbanization, the depression and the international crises from the 1930s to the 1990s.

HIST 313 U.S. Foreign Relations, 1750-1812 Fall. 4 credits. Open to freshmen with permission of instructor. W. LaFeber.
Examines the development of the U.S. continental and global empires by analyzing policy and policymakers from Benjamin Franklin to Woodrow Wilson. Emphasis is placed on domestic events that shaped foreign policy. In conjunction with Hist. 313, a special course, 301, for discussion and guided research will be offered.

Students examine the emergence of the United States as a world power in the twentieth century. The course focuses on the domestic sources of foreign policy and the assumptions of the major policymakers (Wilson through Clinton). Important themes include the American response to a revolutionary world since 1912, the role of American racial views in the making of foreign policy, and the increasingly dominant role of the president in the making of U.S. foreign policy.

For description, see GOVT 365.

HIST 316 American Constitutional Development Fall. 4 credits. R. Polenberg.
Major issues in constitutional history. Topics include: the drafting of the Constitution; the Bill of Rights; the Marshall era; the crises caused by slavery and emancipation; the rise of substantive due process; Holmes, Brandeis, and freedom of speech; the Roosevelt "reution"; civil liberties and civil rights in modern American life; the institution of privacy; the contemporary Supreme Court.

HIST 318 American Constitutional Development Fall. 4 credits. R. Polenberg.
Major issues in constitutional history. Topics include: the drafting of the Constitution; the Bill of Rights; the Marshall era; the crises caused by slavery and emancipation; the rise of substantive due process; Holmes, Brandeis, and freedom of speech; the Roosevelt "revolution"; civil liberties and civil rights in modern American life; the institution of privacy; the contemporary Supreme Court.

HIST 328 Indians, Settlers, and Slaves in the Early South (also American Indian Studies 328) Fall. 4 credits. D. H. Usner.
History of the American South from the sixteenth century to the early nineteenth century with an emphasis on intercultural relations. Topics include: the classification of the region by Spain, England, France, and the United States, American Indian adaptation and resistance, the evolution of slavery, African American relations with European and Indians, and the role of racial ideology and ethnic identity in the formation of the South as a distinct section of the United States.

An analysis of the factors leading up to the breakup of the Union, the impact of the war in North and South, and the problems of restoration and reconstruction of the seceded states.

America was born in the country and moved to the city. This course examines the transformation of America from a rural to a rapidly urbanizing society and culture, from the first European settlements to the era of the Civil War. It is also a history of the city itself, as a human community, and as a crucible of cultural contact and change.

America was born in the country and moved to the city. This course examines the transformation of America from the urbanizing society and culture of the mid-nineteenth century to the thoroughly metropolitan nation of the present (and near future). It is also a history of the city itself, as a human community, a crucible of cultural contact and change, and a focus of public policy.

Introductory course on African-Americans from 1619 to 1865. Emphasis will be on life in bondage, the free black communities, and racism. Other topics include African cultural heritage, the slave trade, religion, the family, and the black freedom struggle.

An examination of American society in the context of capitalist development, and of capitalism as a social phenomenon. The transformation of pre-industrial colonies into an industrializing nation; the development of
social classes; the emerging ethos of free enterprise.]

[HIST 337 Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840-2000 (also American Studies 337)]

[HIST 340 Recent American History, 1925-1960]
Fall. 4 credits. Not open to freshmen. Not offered 1997-98; next offered 1998-99. R. Polenberg. Topics include the Sacco-Vanzetti case; radicalism and reform in the New Deal; Franklin Roosevelt and World War II; the Holocaust and the atomic age; the Cold War and civil liberties; individualism and conformity in the 1950s.

[HIST 341 Recent American History, 1960 to the Present]
Spring. 4 credits. Not open to freshmen. R. Polenberg. Topics include the Supreme Court and civil rights; Kennedy, Johnson, and social reform; the Vietnam War and Watergate; politics and the presidency from Carter to Clinton; and class, race, and ethnicity in modern America.

[HIST 345 The Intellectual and Cultural Life of Nineteenth-Century Americans (also American Studies 345 and Religious Studies 345)]
Fall. 4 credits. R. L. Moore. An examination of the development of cultural and intellectual diversity in the United States. Particular emphasis will be placed on religious pluralism.

[HIST 346 The Modernization of the American Mind (also American Studies 346)]
Spring. 4 credits. R. L. Moore. American thought and culture from 1890 to the present. Emphasizes the intellectual impact of major political and economic events and the adaptation of social ideas and values to new conditions.

[HIST 359 American Families in Historical Perspective (also American Studies 359, HDF 359, and Women's Studies 357)]
Spring. 3 credits. Prerequisite: HDF 150 or one 100-level social science or history course. S-U grades optional. Human ecology students must register for HDF 359. Not offered 1997-98. J. Brumberg. For description, see HDF 359.

[HIST 375 The African-American Workers, 1865-1910: The Rural and Urban Experience (also ILRCB 385)]
Fall. 3 credits. Prerequisite: juniors and seniors, or permission of instructor. Not offered 1997-98. N. Salvatore. For description, see ILRCB 385.

[HIST 376 The African-American Workers, 1619 to the present: Race, Work, and the City]
Not offered 1997-98. N. Salvatore. For description, see ILRCB 386.

[HIST 411 Undergraduate Seminar in American Political History]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98. J. Silbey.

[HIST 412 Undergraduate Seminar in Asian American History (also Asian American Studies 412)]
Spring. 4 credits. Not offered 1997-98. G. Okirho. A reading and research seminar that will cover various topics in Asian American history.

[HIST 414 Motivations of American Foreign Policy]
Fall. 4 credits. Prerequisite: Permission of instructor. W. LaFeber. Topic for Fall 1997: Willard and Dorothy Straight, the Chinese Revolution, and the origins of the American Century.

[HIST 418 Undergraduate Seminar in the History of the American South]

[HIST 419 Seminar in American Social History (also American Studies 419)]
Spring. 4 credits. Prerequisite: permission of instructor. N. Salvatore. This undergraduate seminar will focus this semester on the social and cultural dimension of the urban black experience in the decades following World War II. A research paper is required.

[HIST 421 Undergraduate Seminar in American Cultural History (also American Studies 421)]
Spring. 4 credits. Prerequisite: permission of instructor. N. Salvatore. This undergraduate seminar will focus this semester on the social and cultural dimension of the urban black experience in the decades following World War II. A research paper is required.

[HIST 422 Undergraduate Seminar in American Cultural History (also Women's Studies 426)]

[HIST 426 Undergraduate Seminar in Early American History (also Women's Studies 426)]

[HIST 428 Undergraduate Seminar in American Frontier History]
Fall. 4 credits. D. Usner.

[HIST 429 Undergraduate Seminar in Indians of Eastern North America (also American Indian Studies 429)]
Fall. 4 credits. D. Usner. A seminar examining the history of Native Americans in the eastern woodlands from colonial times to the present. The cultural and economic participation of Indians in the evolution of frontier societies will be examined. Major topics include fur-trade networks, political relations, removal, and the persistence of Indian communities in eastern states.

[HIST 432 The City in History: Europe and America]
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98; next offered 1998-99. S. Blumin. Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe, and in modern Europe and America. Individual research projects.

[HIST 438 Reform in Antebellum America]
Spring. 4 credits. Prerequisite: permission of instructor. M. Washington. An examination of American society from 1830 to 1860 through the eyes of people attempting to bring change. The emphasis will be on individuals, such as William Lloyd Garrison, Abby Kelly Foster, and Horace Bond. The course will also emphasize issues such as slavery, temperance, Indian removal, and public education.

[HIST 440 Undergraduate Seminar in Recent American History]

[HIST 442 Religion and Politics in American History (also Asian American History, Women's Studies 442 and Religious Studies 442)]
Fall. 4 credits. R. L. Moore. A reading and research seminar concerned with popular culture in nineteenth-century America (publications, performances, and audiences).

[HIST 458 Female Adolescence in Historical Perspective (also Women's Studies 436 and Human Development and Family Studies 417)]
Spring. 3 credits. Prerequisite: permission of instructor. J. Brumberg. For description, see HDF 417.

[HIST 484 Seminar in the History of American Labor: Race, Work, and the City (also ILR 304)]
Fall. 4 credits. Open to juniors and seniors only with the permission of the instructor. Not offered 1997-98. N. Salvatore. For description, see ILRCB 304.

[HIST 486 Seminar on the 1960s]
Fall. 4 credits. T. Bontelmann. This course will explore the issues and developments of the most turbulent and significant decade in recent U.S. history. Major topics will include the civil rights movement, the Kennedy and Johnson administrations, the Vietnam War, the anti-war movement, the counterculture, the women's liberation movement, the media, and the Nixon administration. A substantial research paper will be required.

[HIST 500 Undergraduate Research Seminar (also American Studies 500)]
Fall and spring. 8 credits each term. J. Silbey and others. Offered in Cornell-in-Washington Program. An intensive research and writing experience utilizing the extensive resources of Washington, D.C.

[HIST 521 Seminar in American Cultural Studies (also American Studies 521)]
Fall. 4 credits. Not offered 1997-98; next offered 1998-99. M. Kammen. The focus will be the relationship between government and culture in historical perspective. After three contextual sessions devoted to 19th-century background, we will mainly be concerned with the period from the 1930s to the present. Several comparative sessions will be devoted to government as a patron of culture in other societies. A research paper is required.

[HIST 607 Writing Seminar on African-American Women]
Fall. 4 credits. Prerequisite: permission of instructor. M. Washington. This course is designed for students actively engaged in a writing project on African-
American women's history. Students must have already done the research and most of the reading for their papers prior to enrollment. Reading and discussion will focus on style, methodology, and theory. An extensive research paper is due at the end of the semester.

A reading and discussion topics seminar focusing on the experiences of African-American women in nineteenth-century America, including the Caribbean. Topics include women and labor, abolitionism, women's rights, sexuality and race relations, education and racial uplift, black women's literature, marriage and family.

Reading and discussion course focusing on the way historians write and interpret the Black experience in America. Students will be concerned with individual historians, various schools of thought, and historical approaches.

A reading and research seminar in twentieth-century American diplomatic history, emphasizing the Cold War period. Discussion will focus on interpretive approaches to U.S. foreign policy and on U.S. relations with the Third World since 1945. A research paper is required.

[HIST 618 Seminar in American Cultural History] Spring. 4 credits. R. L. Moore.

A reading and research seminar concerning selected topics in nineteenth century America.

[HIST 624 Graduate Seminar in American Indian History (also American Indian Studies 624)] Spring. 4 credits. Not offered 1997-98. D. Usner.

A reading and research seminar intended primarily for graduate students. Major works in American women's history will be carefully scrutinized, and each student will prepare a lengthy research paper.

A research seminar intended primarily for graduate students exploring society, culture, and politics of the United States between 1815 and 1896.

[HIST 640 Graduate Seminar in Recent American History] Fall. 4 credits. Prerequisite: permission of instructor. R. Polenberg.

A graduate research seminar that will examine American legal and constitutional history in the twentieth century.

[HIST 683 Seminar in American Labor History (also ILRCB 783)] Fall. 3 credits. Prerequisites: graduate students only. Not offered 1997-98. N. Salvatore.

For description, see ILRCB 783.

Examination of major approaches, periods, issues, and modes of interpreting American history. Readings include recent "classics" of American scholarship from diverse subfields and genres.

Latin American History

HIST 295 Colonial Latin America @ # Fall. 4 credits. T. Holloway.

Survey of Latin America from the rise of pre-Columbian civilizations through the European conquest, the establishment of the Spanish and Portuguese colonial societies, imperial rivalries in the New World, the background of the independence movements, and the achievement of political independence.

HIST 296 Latin America in the Modern Age @ Spring. 4 credits. Not offered 1997-98. T. Holloway.

Survey of the Latin American nations from independence to the present. Major themes include the persistence of neocolonialism, economic and social institutions, the development of nationalist and populist politics, revolutionary movements of the twentieth century, and United States-Latin American relations.

The development of rural patterns of wealth, status, and power, focusing on the role of country people in the larger society. Topics include disruption of the conquest, evolution from encomienda to hacienda, rise of plantation agriculture and export enclaves, decline of Indian communities, peasant protest, and land reform and development programs of the recent past.

[HIST 348 Contemporary Brazil @ Fall. 4 credits. Not offered 1997-98. T. Holloway.

With some historical background, the course focuses on the twentieth century. Topics include the impact of subordinating growth model, contradictions leading to military rule 1964-1985, transition to competitive politics, debt, ecology, regional and social disparities. Some comparisons are made to other Latin American countries.

This seminar focuses on ethnic interaction and class formation in the historical development of Latin American societies considering the roles of Native Americans, Europeans, and Africans. Each unit will be approached as an analysis of the historical origins of contemporary patterns, and comparisons will be made among units in a search for underlying and overarching themes.

African History

HIST 255 Cultures and Ecology in Precolonial Africa @ # Fall. 4 credits. S. E. Greene.

This course will cover the history of Africa from the origins of humankind through the emergence of small-scale societies and state systems, such as Egypt, Meroe, Mali, Bunyoro, the Swahili city states and the Zimbabwe complex that had regional and international significance. Emphasis will be placed on understanding the character of preindustrial societies, and the way in which historic ecological conditions affected processes of change and the character of African cultures up to 1800.

HIST 390 Southern African History @ # Spring. 4 credits. Not offered 1997-98. G. Okhio.

Southern African history from foundations to union, or from the earliest human inhabitants to 1910. Major themes will include the peopling of southern Africa, the interaction and change among the San, Khoikhoi, and Bantu-speaking peoples, the arrival and expansion of Europeans, African state systems, and the economic transformation of the 1870s and 1880s leading to the South African war and union.

HIST 391 Riot and Revolution in Nineteenth Century Africa: The Birth of the Modern Era Spring. 4 credits. S. E. Greene.

The beginning of the nineteenth century witnessed the rapid and often times forceful expansion of Islam in West Africa, the end of the Atlantic slave trade, the transformation of the Zulu from a small, inconsequential people to the largest and most powerful ethnic group in South Africa, and the wild fire spread of Swahili as a lingua franca in east and central Africa. This course explores these revolutionary changes and the upheavals that accompanied them as Africa remade itself to face the modern era. Lectures, readings and discussions will focus on the causes and consequences of these events and their significance for understanding contemporary Africa.
HIST 434  Gender and Sexuality in the Social History of Africa (also Women's Studies 477) @ #
Spring. 4 credits. S. Greene.
This course will examine theoretical literatures and case studies on the history of gender relations and sexuality in African social history. The course will be organized topically on such themes as gender and political-economy, gender and social relations, gender and (homo-/hetero) sexuality, and gender and the religions of Africa. Readings for each topic will cover both the precolonial and colonial periods.

Asian History

[HIST 190  Introduction to Asian Civilizations @ #]
An introduction to the distinctive cultures of China, India, Japan, and Southeast Asia that features an intensive examination of selected topics and periods of particular significance in the history of each.

[HIST 191  Introduction to Modern Asian History @]
Fall. 4 credits. S. Cochran, D. Wyatt.
The history of Asia-Pacific from the nineteenth century to the present, focusing on relations of China, Japan, and Southeast Asia with each other and with the West.

[HIST 293  History of China up to Modern Times @ #]
A survey of the principal developments in the history of China from the earliest times to the eighteenth century that also undertakes a topical introduction to Chinese culture and civilization, in part by the use of visual materials.

[HIST 294  History of China in Modern Times @ #]
Spring. 4 credits. S. Cochran.
A survey that concentrates on the rise of the last imperial dynasty in the seventeenth and eighteenth centuries, the upheavals resulting from domestic rebellions and foreign imperialism in the nineteenth century, and the twentieth-century efforts to achieve social mobilization, political unity, and commercial expansion.

[HIST 297  Japan Before 1600 @ #]
Spring. 4 credits. J. Piggott.
This course explores Japan before 1600 from a variety of perspectives. Analysis of primary sources, including literary and archaeological experiences compared with those of other societies around the globe. History 297 is a good introduction to issues of premodern historical study and to the general study of East Asia. (Graduate students or more advanced undergraduates who would like to do a research project should register for History 497.)

[HIST 298  State, Society, and Culture in Modern Japan @ #]
Spring. 4 credits. J. V. Koschmann.
A survey of Japan from early-nineteenth century to the present, which attempts to connect the political, socio-economic, and imaginative realms of modern Japanese life so as to achieve a complex view of modern Japanese society. Pays particular attention to the changing situation of women and men in Japan's modern period, and problems of historical representation and consciousness. Readings will include Japanese works in translation as well as secondary sources.

[HIST 322  Taming the Samurai: Warrior History in Japan @ #]
Fall. 4 credits. J. Piggott.
This course explores the role of the samurai at various epochal moments in Japan, and the effects samurai-centered governance has had on culture writ broadly up to the early modern era. This is very much a hands-on course in which analysis and writing are emphasized—students will do extensive primary and secondary source readings, write a critical book review, and write a final essay.
Graduate students are welcome but should register for History 522 after consultation with the instructor.

[HIST 326 From Medieval to Early Modern in Japan @ #]
A course on the development of samurai warfare and society from the Heian to the Edo periods.

[HIST 352 The Past as Prologue? Japan in Asia, Germany in Europe (also Government 396) @ #]
Fall. 4 credits. Not offered 1997–98.
Katzrin, Koschmann.

[HIST 360  Early Warfare, East and West #]
Spring. 4 credits. C. A. Peterson.
For description see Comparative History.

[HIST 393  Images of Humanity in Medieval China (also Asian Studies 393) @ #]

[HIST 395  Southeast Asia to the Eighteenth Century @ #]
Fall. 4 credits. R. Mrazek.
A survey of the earlier history of Southeast Asia, concentrating particularly on regional movements of economic, social, cultural, and political change and using, to the extent possible, readings in translated primary sources.

[HIST 396  Southeast Asian History from the Eighteenth Century @ #]
Spring. 4 credits. R. Mrazek.
A survey of the modern history of Southeast Asia with special attention to the formation of modern states (colonial as well as national), changing economic and social structure, and consciousness. Primary texts will be read in translation whenever feasible.

[HIST 420  Japan in the Year 1000: The Tale of Genji in Historical Perspective @ #]
The tale of Genji is a classic of premodern Japanese literature that provides readers a broad view into Japan's courtly society at a time when many of the elements of Japan's classical tradition were taking form. Additional primary source readings and secondary sources provide insight into the countryside beyond the capital as well. Previous study of premodern Japan is advised.

[HIST 448  Gender and Family in Classical Japan @ #]
An inquiry into structures of family and gender from the eighth to the fourteenth centuries. Themes will include kinship and family, state formation, and gender construction, and those interested in these themes in comparative perspective are invited to enroll. "Breaching" reading, primary source materials, and comparative reading placing Japan in an East Asian context will be assigned. Previous study of some aspect of premodern Japan is recommended.

[HIST 466  Kings and Shoguns @ #]
Spring. 4 credits. J. Piggott.
The turn of the fourteenth century witnessed epochal changes in Japan as structures of monarchy, court-Bakufu relations, landholding, judiciary, international relations, and popular culture were deeply affected by the failure of Go-Daigo Tenno's royal restoration. Core readings of the seminar will include portions of the epic, the Taiheiki, and other materials from which insights into these transformations can be drawn. Previous course work in Japanese history, especially History 322, is recommended.

[HIST 489  Seminar in Modern Japanese History @]
Fall. 4 credits. Prerequisites: History 298 or equivalent. J. V. Koschmann.
Topic for Fall 1997: Japan Since World War II.

[HIST 492  Undergraduate Seminar in Medieval Chinese History @ #]
Spring. 4 credits. Prerequisite: History 190, 293, 360, or permission of instructor. C. A. Peterson.
Topic for spring 1998: The intellectual and cultural life of the medieval Chinese literati including an examination of their careers, literary output, and private lives.

[HIST 493  Problems in Modern Chinese History (also History 653) @]
Fall. 4 credits. Prerequisite: History 294 or permission of instructor. S. Cochran.
Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

[HIST 494  The Japanese in Asia @]
Spring. 4 credits. Not offered 1997–98.
J. V. Koschmann.

[HIST 495  Asian Kingship and State Formation @]
Fall. 4 credits. J. Piggott.
The turn of the fourteenth century witnessed epochal changes in Japan as structures of monarchy, court-Bakufu relations, landholding, judiciary, international relations, and popular culture were deeply affected by the failure of Go-Daigo Tenno's royal restoration. Core readings of the seminar will include portions of the epic, the Taiheiki, and other materials from which insights into these transformations can be drawn. Previous course work in Japanese history, especially History 322, is recommended.
This course gives each student an opportunity to participate in a special weekly colloquium. Students will attend History 297 lectures and from a variety of historical perspectives.

HIST 499 Problems in Modern Chinese Japanese colonial policy and practice in and/or Japanese history but need for comparative or other purposes to develop a familiarity with the main problems and contours of modern Korean history. Readings will be selected primarily from English-language works on Korea from the 1870s through the post-World War II era, including Japanese colonial policy and practice in Korea, the Korean War, and the postwar history of the Republic of Korea.

HIST 588 Proseminar in Modern Korean History
Fall. 4 credits. Prerequisite: a course on East Asian history or equivalent. J. V. Koschmann.

Designed primarily for graduate students in East Asian Studies who specialize in Chinese and/or Japanese history but need for comparative or other purposes to develop a familiarity with the main problems and contours of modern Korean history. Readings will be selected primarily from English-language works on Korea from the 1870s through the post-World War II era, including Japanese colonial policy and practice in Korea, the Korean War, and the postwar history of the Republic of Korea.

HIST 598 Colloquium in Modern Japanese History
Spring 4 credits. J. V. Koschmann.

For graduate students only. Students will attend lectures and do the reading for History 298, participate in a special weekly colloquium, and write a seminar paper.

[HIST 609 Modern Japan Studies: The Formation of the Field in History and Literature (also Asian Studies 609)

The course will provide both a historical introduction to and critical analysis of the constitution of modern Japan studies as a "field" of postwar academic inquiry. While reading texts particularly influential in the early and contemporary formation of the field, we will consider such questions as the domestic and international contexts in which Japanese studies has been institutionalized and maintained, and the relationship between "Japan" as object of area studies discourse and "Japan" as represented in American journalism, popular culture, and politics. Interdisciplinary and team-taught, the course will aim to introduce students to a range of methodological and topical issues developed in historical and critical works, problematizing assumptions in each case. Possibilities for cross-disciplinary research (along lines recently undertaken in areas such as feminist criticism and cultural studies, for example), will also be explored.]

[HIST 693 Problems in Modern Chinese History (also History 493)
Fall. 4 credits. Prerequisite: permission of instructor. S. Cochran.

Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

HIST 694 Problems in Modern Chinese History (also History 498)
Spring. 4 credits. Prerequisite: permission of instructor. S. Cochran.

For description, see HIST 499.

HIST 695 Early Southeast Asia: Graduate Proseminar
Fall. 4 credits. D. Wyatt.

Introduction to the history of Southeast Asia for graduate students. Students will be expected to attend the lectures and complete the readings for History 395, and they will meet separately as a group to further explore selected topics.

HIST 696 Modern Southeast Asia: Graduate Proseminar
Spring. 4 credits. R. Mazek.

Introduction to the modern history of Southeast Asia for graduate students. Students will be expected to attend the lectures and complete the readings for History 396, and they will meet separately as a group to further explore selected topics.

[HIST 791 Seminar in Medieval Chinese History
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98. C. A. Peterson.]

[HIST 792 Seminar in Medieval Chinese History
Spring. 4 credits. Prerequisite: permission of instructor. C. A. Peterson.

[HIST 795 Seminar in Modern Southeast Asian History
Fall. 4 credits. Permission of the instructor. Not offered 1997-98.]

[HIST 796 Seminar in Southeast Asian History
Spring. 4 credits. Prerequisite: reading knowledge of relevant languages. Not offered 1997-98. D. Wyatt.]

[HIST 797 Seminar in Japanese Thought
Fall. 4 credits. Prerequisite: reading knowledge of Japanese desirable. Grad only. J. V. Koschmann.

Topic for fall 1997: Taisho thought and culture.

[HIST 798 Seminar in Japanese Thought
Fall. 4 credits. Prerequisite: reading knowledge of Japanese and permission of instructor. Not offered 1997-98; next offered 1998-99. J. V. Koschmann.

Near Eastern History

[HIST 248 History of the Near East: 1250-1914 (also Near Eastern Studies 258 and Religious Studies 258)
Fall. 3 credits. Not offered 1997-98. L. Pierce.

For description, see NES 258.]

[HIST 254 Islamic History: 600-1258 (also Near Eastern Studies 257 and Religious Studies 257)
Fall. 3 credits. D. Powers.

For description, see NES 257.]

[HIST 317 Politics and Culture in Late Medieval Central Asia and the Near East (also Near Eastern Studies 353)
Fall. 4 credits. L. Peirce.

For description, see NES 353.]

[HIST 372 Introduction to Islamic Law (also History 652, Near Eastern Studies 351/651, Religious Studies 350)
Fall. 4 credits. Enrollment is limited to 25 students. D. Powers.

For description, see NES 351.

[HIST 437 Sexuality, Society, and the State in the Near East (also Near Eastern Studies 456/657, History 657 and Women's Studies 455/655)

For description, see NES 456.]

[HIST 441 Ottoman History: 1600-1923 (also History 641, Near Eastern Studies 359/659)
Spring. 4 credits. L. Peirce.

For description, see NES 359.

[HIST 446 Ottoman History, 1300-1600 (also History 646, Near Eastern Studies 358/658)
Fall. 4 credits. Enrollment is limited to 20 students. L. Peirce.

For description, see NES 358.

[HIST 457 Women, Men and the Law in Muslim Court (also History 657, Near Eastern Studies 459/659)
Fall. 4 credits. Prerequisites: previous course within Islamic Studies desirable but not essential. L. Peirce.

For description, see NES 459.

[HIST 460 Seminar in Islamic History: Muhammad and the Rise of Islam (also Near Eastern Studies 418 and Religious Studies 418)

For description, see NES 418.]

[HIST 461 Seminar in Islamic History 600-750 (also History 671, Near Eastern Studies 451 and 650, and Religious Studies 451)
Spring. 4 credits. Enrollment is limited to 25 students. D. Powers.

For description, see NES 451.

[HIST 641 Ottoman History: 1600-1923 (also History 441, Near Eastern Studies 359/659)
Spring. 4 credits. L. Peirce.

For description, see NES 359.

[HIST 646 Ottoman History: 1300-1600 (also History 446, Near Eastern Studies 350/650)
Spring. 4 credits. Enrollment is limited to 20 students. L. Peirce.

For description, see NES 358.

[HIST 652 Introduction to Islamic Law (also History 372, Near Eastern Studies 351/651, Religious Studies 350)
Fall. 4 credits. Enrollment is limited to 25 students. D. Powers.

For description, see NES 351.

[HIST 460 Seminar in Islamic History: Muhammad and the Rise of Islam (also Near Eastern Studies 418 and Religious Studies 418)

For description, see NES 418.]

[HIST 461 Seminar in Islamic History 600-750 (also History 671, Near Eastern Studies 451 and 650, and Religious Studies 451)
Spring. 4 credits. Enrollment is limited to 25 students. D. Powers.

For description, see NES 451.

[HIST 641 Ottoman History: 1600-1923 (also History 441, Near Eastern Studies 359/659)
Spring. 4 credits. L. Peirce.

For description, see NES 359.

[HIST 646 Ottoman History: 1300-1600 (also History 446, Near Eastern Studies 350/650)
Spring. 4 credits. Enrollment is limited to 20 students. L. Peirce.

For description, see NES 358.

[HIST 652 Introduction to Islamic Law (also History 372, Near Eastern Studies 351/651, Religious Studies 350)
Fall. 4 credits. Enrollment is limited to 25 students. D. Powers.

For description, see NES 351.

[HIST 460 Seminar in Islamic History: Muhammad and the Rise of Islam (also Near Eastern Studies 418 and Religious Studies 418)

For description, see NES 418.]

[HIST 461 Seminar in Islamic History 600-750 (also History 671, Near Eastern Studies 451 and 650, and Religious Studies 451)
Spring. 4 credits. Enrollment is limited to 25 students. D. Powers.

For description, see NES 451.

[HIST 641 Ottoman History: 1600-1923 (also History 441, Near Eastern Studies 359/659)
Spring. 4 credits. L. Peirce.

For description, see NES 359.

[HIST 646 Ottoman History: 1300-1600 (also History 446, Near Eastern Studies 350/650)
Spring. 4 credits. Enrollment is limited to 20 students. L. Peirce.

For description, see NES 358.

[HIST 652 Introduction to Islamic Law (also History 372, Near Eastern Studies 351/651, Religious Studies 350)
Fall. 4 credits. Enrollment is limited to 25 students. D. Powers.

For description, see NES 351.
We will look at the impact of the reformation, counter-reformation and wars of religion on aspects of political, social and cultural life in 16th- and 17th-century Europe, exploring shifts in gender relations, the problem of social control, the effect of religious conflict on the power of the state and its contested boundaries with the church, the relationship of elite and popular religion, and the encounter of European missionaries with other cultures. Students will engage with major historiographical interpretations of the period, as well as with the close reading of primary sources.

**HIST 257 English History from Anglo-Saxon Times to 1485**
Fall. 4 credits. P. Hyams.

A survey of the government, social organization, and cultural and religious experience of the English people. Particular stress is laid on land settlement, the unification of the realm, the emergence of state institutions such as Parliament, and changes in economic organization (manors, towns and commerce).

The approach will be comparative within a context of contemporary European developments. The course offers students who wish to work on their writing skills an opportunity to do so, especially in the second paper.

**HIST 263 The Earlier Middle Ages: An Introduction and Contextualization**
Spring. 4 credits. P. Hyams.

As a single-semester alternative to History 263-4, this survey aims to convey what was significant in that area of the "West" that was to become Europe, between the end of the Roman Empire in the West and the Renaissance, from 395 to 1400. It thus takes a critical look at a formative period of Western Civilization. The course is organized into modules. The first of which surveys in five weeks the main public developments in Political and Church History over the period. Other modules focus in some depth on select aspects, such as technology, culture, material resources and religions, to other choice samples from the best of medieval culture. The emphasis is on students finding their own ways to win credit.

**HIST 265 Ancient Greece from Homer to Alexander the Great**
Spring. 4 credits. B. Strauss.

A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy, and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture.

**HIST 657 Women, Men and the Law in Muslim Civilizations**
Fall. 4 credits. D. Peterson.

A study of legal aspects of gender in Muslim history. Topics include marriage, divorce, women's status, and the role of Islamic law. Readings draw from classical Islamic texts, as well as from contemporary sources.

We will look at the impact of the reformation, counter-reformation and wars of religion on aspects of political, social and cultural life in 16th- and 17th-century Europe, exploring shifts in gender relations, the problem of social control, the effect of religious conflict on the power of the state and its contested boundaries with the church, the relationship of elite and popular religion, and the encounter of European missionaries with other cultures. Students will engage with major historiographical interpretations of the period, as well as with the close reading of primary sources.

**HIST 268 History of Rome from Republic to Holy City**
Spring. 4 credits. Open to freshmen.

Fall. 4 credits. D. Peterson.

A study of Rome from its founding in the 8th century B.C. to the end of the Western Empire in 476. Topics include the Roman Republic, the Empire, and the Byzantine period. Readings draw from classical Roman texts, as well as from contemporary sources.
European and Italian politics in the early sixteenth century; the decline of the Florentine republic and the rise of the Medici principate; Machiavelli’s own career in government and his, and the republic’s, crisis in 1512-13; the intellectual traditions of Renaissance classical thought, and the revival of antiquity; vernacular literary currents and popular culture; and the remarkable generation of political figures, writers, and theorists with whom Machiavelli associated and corresponded. Emphasis will be placed on a close reading of the major works (including the letters, The Prince, the Discourses, Mandragola, and selections from The Art of War and the Florentine Histories, all in translation) and a critical examination, in the light of that reading, of some major modern interpretations of Machiavelli.

[HIST 361 The Culture of the Renaissance I (also History of Art 350 and Comparative Literature 361)]
An interdisciplinary exploration of some major themes of Renaissance society and culture from the fourteenth to the sixteenth centuries. Using the perspectives of history, art history, and literature, the course will investigate the representation in primary texts and works of art (and with the aid of selected modern criticism) of Renaissance discourses of antiquity and authority, education and learning, republics and courts, politics, gender and family, love and eros, and cross-cultural encounters. Most of the attention will be to Italian history and culture, but with some comparisons to other European contexts.

Readings include selections from Petrarch, Boccaccio, Alberti, Machiavelli, More, Erasmus, and Vasari. Artists range from Ambrogio Lorenti to Mantegna, Durer, Titian, and others. Two lectures and a required discussion section each week.

(HISs 330 and 335, and Religious Studies 362; Music 390)

[HIST 364 The Culture of the Renaissance II (also Comparative Literature 362; English 325; Religious Studies 362; Music 390)]
Fall. 4 credits. C. Kaske, W. Kennedy. For description, see COM L 362.

[HIST 365 Medieval Culture, 400-1150 (also Religious Studies 365)]
Fall. 4 credits. Prerequisite: History 263 or permission of instructor. J. J. John. Intellectual and cultural developments in the age of monasticism, from St. Augustine and St. Benedict to St. Anselm and St. Bernard of Clairvaux.

[HIST 366 Medieval Culture, 1100-1300 (also Religious Studies 366)]
Spring. 4 credits. Prerequisite: History 264 or permission of instructor. Not offered 1997-98; next offered 1999-00. J. J. John.
The origin and development of the universi-
ties will be studied as background for a consideration of the scholastic mentality and its influence on the art, literature, philosophy, science, script, and theology of the period. Readings from Abelard, Hugh of St. Victor, Bonaventure, Thomas Aquinas, Dante, and others.

[HIST 367 Marriage and Sexuality in Medieval Europe (also Religious Studies 368, Women’s Studies 368)]
Spring. 4 credits. Not offered 1997-98. P. Hyams.
Few topics generate heat so readily as gender relations and sexuality. Behind the current controversies lie decisions made in the first Christian centuries, and firm ed in the course of the Middle Ages, these still affect all of us, believers and unbelievers alike. This course studies Western attempts to deal with the problem of sexuality up to about 1500. The class will first clarify the church’s normative rules of law and theology. Armed with this framework, it will then turn to more specific topics, including homosexuality, prostitution, rape, abduction and sexuality in medieval literature. The goal is to be able to compare the ideal model with the reality, and to assess the product the medieval church passed on to Western culture and ourselves. No formal prerequisite, though some prior knowledge of medieval European history is desirable.

[HIST 369 The History of Florence in the Time of the Republic, 1250-1530]
Spring. 4 credits. D. Baugh.
Frequent terms of enterprise, imperial policy, and naval power in the age of expansion. The rise and decline of the Portuguese and Spanish empires are considered, but the emphasis is on English, French, and Dutch rivalry in the Atlantic and Caribbean.

[HIST 374 War, Trade, and Empire, 1500-1815]
Spring. 4 credits. D. Baugh.
Maritime enterprise, imperial policy, and naval power in the age of expansion. The rise and decline of the Portuguese and Spanish empires are considered, but the emphasis is on English, French, and Dutch rivalry in the Atlantic and Caribbean.

[HIST 377 Medieval Latin Literature (also Women’s Studies)]
An inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?

[HIST 405 Population and History]
For description, see Comparative History.

[HIST 408 Secular Culture in Medieval France, 1000-1300]
An upper-level seminar on the main currents of noble lay culture in France, which led European fashions in love, warfare, entertainment, and environment through most of the
period. There will be heavy emphasis on contemporary sources (in English), including lively and complete readings from epic literature (the Song of Roland), lives, and chronicles.

For description see Comparative History.

[HIST 427 Power and Society in Early Medieval Europe and Japan] Spring. 4 credits. Prerequisite: a course in medieval European or Japanese historiography or permission of instructor. Not offered 1997–98. P. Hyams and J. Figgott.
This seminar will focus on structures, processes, and practices of society in early medieval Europe and Japan. It will provide a forum for discussion of the ways in which, in some very different societies, Europeans and Japanese handled power. We will also be interested in comparing historiographical methodologies employed and issues considered by historians of these societies.
The nature of power and authority and characteristic organizational practices, including kingship, land tenure, status systems, and religious and military structures; the formation of ideology through art, ritual, literature, and law; and various means of linking center and periphery in these societies will be topics for discussion.

This seminar concentrates on a time (late 9th-13th centuries) when much of Europe lacked formal systems of justice, and so handled questions of social control quite largely by extra-legal means. Its subject is in one sense political history upside-down, as viewed by individuals rather than their rulers. We examine ways anthropologists and some recent approaches to law can assist: the readings will be partly anthropology, partly translated medieval accounts of actual conflicts, with samples of recent interpretation. The topics covered could be of interest to law students and majors in anthropology and other modern social sciences.

[HIST 443 Gifts, Commodities and Alliances: Historical Perspective on Exchange] Spring. 4 credits. Not offered 1997–98. Almost all forms of social interaction are predicated on some type of exchange, whether equal or unequal, voluntary or coerced, real or fictive. This course is an exploration of the varieties of exchange. Readings will combine classic theoretical treatment (Marx, Mauss, Goody and others) with historical monographs from both the Western and non-Western worlds, as well as contemporary literature in economic anthropology. The main themes of the course will be the social corollaries of exchange and the homologies between material and immaterial modes of exchange.

[HIST 447 Crusaders and Chroniclers] Fall. 4 credits. P. Hyams.
An intensive reading seminar offering a natural progression from History 259 The Crusades. It will examine contemporary accounts of the crusading movement in English translation. The twin goals are to follow select themes of crusading history to a deeper level than is possible in History 259 and to study medieval historiography through whole chronicles and other primary sources.

[HIST 450 Power and the Sacred in Late Medieval and Early Modern Europe] Fall. 4 credits. D. Petersen.
Explores the transformations of European religious life in a period of declining ecclesiastical authority, new secular powers, and social changes brought on by the rise of commerce, the towns, and plague. Primary and secondary readings on topics in rough chronological order, including: humanist, and “popular” religion; heresy, dissent, minorities and religious discipline; ritual and charitable communities; prophecy, mysticism, and women’s religious experience. In a European framework, roughly 1200–1500, with special attention to Italy and urban settings.

This graduate seminar tentatively explores the comparative study of medieval English history to that of the British Isles and its inhabitants within the wider context of Europe and Western Christendom. Readings will mostly be representative original sources. The precise texts and topics studied will depend on the interests (and especially future teaching plans) of participants, but will certainly allow for a critical examination of existing literature on the general and cultural history of England, Scotland, Ireland and Wales.

[HIST 463 Graduate Seminar in Renaissance History] Spring. 4 credits. Open to undergraduates with permission of instructor. J. Najemy.

[HIST 469 Politics, Power, and Culture in Early Modern England] Fall. 4 credits. R. Weil.
An inquiry into how the ruling class ruled, and what that meant to and for everyone else. Topics include: the invention of the "state," the relationship of central and local power, clientage and corruption, the construction of categories of "public" and "private," representations of monarchy, hegemony and resistance, court culture, the social interpretations of the English Revolution and their critics. Focus is on historiography and methodology, with some engagement with primary sources.
Modern European History

HIST 152 Introduction to Western Civilization (1600 to the end of World War II) #
Spring. 4 credits. P. Holquist and R. Weil.
This course is designed to introduce students to some of the main themes of European history from the Reformation to the present. The lectures are organized around the problems of state-building and social order: how have European societies ordered and reproduced themselves? why did the modern state and modern civil society develop? how have a succession of political ideologies legitimized them? how have state and society responded to crisis and disruption? what balance has been struck between acquiescence and force; between law and violence, in upholding or questioning order? Readings emphasize primary works by figures such as Luther, Hobbes, Tocqueville, Marx, etc.

HIST 217 Totalitarianism
Spring. 4 credits. P. Holquist.
One of the distinguishing features of the twentieth century is the rise of a qualitatively new political project, one that produced massive violence and fundamentally reordered the societies it operated upon. Totalitarianism seeks to explain these developments as related to the emergence of a certain political ethos and the development of particular state tools. This seminar will first examine totalitarianism as a concept through a reading of classic studies on this phenomenon, and then test the concept's applicability in a range of case studies (especially Stalinist Russia and Nazi Germany, but including also Fascist Italy and Maoist China) and see how it operated in a variety of spheres (aesthetics, politics, economic policies, state measures for the population, repressive policies). This course is designed primarily for sophomores, to acquaint them with historical issues and methodologies and to develop their writing abilities.

HIST 218 The Russian Imperial and Foreign Policy #
Fall. 3 credits. W. Pintner.
An examination of Imperial Russian foreign policy, examining military, economics, and social factors. Examples will be taken from various periods ranging from the early Muscovite period to the First World War. Students will write 6 to 7 short papers, do extensive reading, and participate in class discussion.

HIST 220 The French Experience: An Introduction (also French Literature 224)
Spring. 3 credits. S. Kaplan.
An examination of French society and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals and cinemas. Looking attentively at texts, images and contexts, at selected moments in the seventeenth, eighteenth, nineteenth, and twentieth centuries, we will attempt to unravel some of the defining enigmas of the French experience. Two lectures/week in English and one course section (one section conducted in English, one in French). Readings available both in French and English translation.

HIST 224 The British Empire, ca. 1760-1960
Spring. 3 or 4 credits. Not offered 1997-98. D. A. Baugh.
A seminar covering the key instances of British rule on five continents. Topics will explore dynamics of colonization, interactions with native peoples, and the goals, successes, and failures of British imperial policies and institutions.

HIST 235 Antisemitism and the Crisis of Modernity: From the Enlightenment to the Holocaust (also Jewish Studies 254)
Spring. 4 credits. V. Caron.
This course will examine the role of antisemitism in nineteenth and twentieth century European ideological, political and socioeconomic developments. Attention will be paid to the way in which antisemitism illuminates the underside of European history, allowing us to see how anti-Jewish intolerance and prejudice became embedded in the worldviews of significant sectors of the European population, culminating in the Holocaust. Topics will include: the Christian roots of antisemitism and the extent to which modern antisemitism marks a break with the medieval past; the politicization of antisemitism by both Left and Right; the role of antisemitism in socioeconomic conflicts linked to the rise of capitalism; Jewish responses to antisemitism; antisemitism in the Nazi and Fascist revolutions; and contemporary interpretations of antisemitism.

HIST 252 Russian History to 1800 #
Fall. 4 credits. W. Pintner.
The origin and development of the fundament­al social, political, economic, and cultural institutions that have determined the nature of contemporary Russian society.

HIST 253 Russian History since 1800 #
Nineteenth- and twentieth-century Russia up to the revolution of 1917, with emphasis on the major social, political, and economic changes that have transformed Russia since the mid-nineteenth century.

HIST 258 English History from the Revolution to the Restoration
An introductory course encompassing political, social, economic, imperial, and constitutional developments. Major themes are the significance of 1688, eighteenth-century society and politics, the rise and decline of liberalism, the Irish Question, the impact of the two world wars, and the challenges and achievements of the welfare state.

HIST 283 Europe in the Technological Age
An introduction to politics, culture, and technology in contemporary Europe. In the sections on politics a survey of party systems and their interactions with social movements is followed by examinations of post-Communist constitutions and political structures, the New Germany, and the European Union. The section on European culture pays special attention to the European press and electronic media as shapers and reflectors of cultural values. A section on the struggle over the control of the past deals with tensions and conflicts in European national memories. In the section on Nationalism and ethnicity, political and cultural approaches are combined in consideration of the wars in former Yugoslavia as well as conflicts between nationalists and members of ethnic minorities elsewhere in Europe. The section on technology deals with the design of products and processes as a cultural phenom­enon, making cross-national comparisons of some of the social, cultural, and institutional influences on engineering performance.

HIST 290 Twentieth-Century Russia and the Soviet Union
Fall. 4 credits. P. Holquist.
An introductory lecture course spanning the lifetime of the USSR (1917-1991), but covering the last years of the Russian Empire and the first years of the post-communist present as well. Geographically, it focuses on the Russian heartland and the non-Russian areas of the Soviet Union. The course will explore the roots and consequences of the Russian Revolution; the nature and evolution of Leninism, Stalinism and Soviet communism; the entrenchment of reform of the post-Stalinist system; and the legacy of communism for the region's new regimes. Students are introduced to a wide variety of historical materials, including documents, essays, memoirs, literature and film.

HIST 291 Modern European Jewish History, 1789-1948 (also Jewish Studies 252)
Spring. 4 credits. V. Caron.
Jewish life in Europe experienced a profound transformation as a result of the process of Jewish emancipation which began at the end of the eighteenth century. While emancipation offered Jews unprecedented social, economic and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course will examine the ways in which Jewish and non-Jewish society responded to these new developments from the eighteenth century Enlightenment to the post-World War II era. Topics will include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation, the development of modern anti-semitism; the rise of Zionism and the creation of the state of Israel; the modernization of Eastern European Jewry; the impact of mass immigration; and the Nazi era.
The course will focus on the making of violence and volatility from 1890 through that is the political, cultural, economic and social consequences of the First World War. Emphasis on the relations between the "Great Powers," their ideologies, their repertoire of interventions, the growth of extreme nationalism, and the arms race. It ends by considering why the war was so long and destructive and why, afterwards, no one could put the pieces back together again.

[HIST 380 Social History of Western Technology]

[HIST 383 Europe, 1900-1945]
Fall. 4 credits. J. Weiss. An investigation of the major developments in European politics between 1900 and the end of the Second World War. Emphasis on the rise and fall of democratic political systems and their alternatives. Topics include the reorientation of liberalism and socialism, the transforming effects of war and depression, the dynamics and diplomacy of fascism, the European response to the economic and ideological influence of America and the Soviet Union, the changes in Eastern Europe during the interwar years, and the interaction between politics and social structure.

[HIST 384 Europe, 1945-1968]
Spring. 4 credits. J. Weiss. A political and social history of Europe between the fall of fascism and the political crises of 1968. Emphasis on the comparative study of the elaboration of democratic institutions and ideologies. Topics include the origins and course of the Cold War in Western and Eastern Europe, Gauß and Christian Democracy, the emergence of welfare states, liberal-democratic and Communist culture, the end of colonial empires in the West, opposition movements in Eastern Europe, and the general upheaval of 1968.

[HIST 385 Europe in 20th Century: 1968-1990]
Spring. 4 credits. Not offered 1997–98. J. Weiss. The major political developments in Europe between the upheaval of 1968 and the collapse of Communist regimes. Topics will include the effects of economic turmoil in 1973–1974; the response to terrorism, regionalist movements, new ethnic minorities and their governments; Socialist governments in southern Europe; the arrival of democracy in Spain, Portugal, and Greece; new dynamics in the European Community; the rise of Thatcherism; the war scare of the 1980s; and the final phase of the Cold War.

[HIST 405 Population and History]

[HIST 406 The People in the French Revolution]
Fall. 4 credits. S. Kaplan. The Revolution was nothing if not a mass event. Mass action played a critical part in shaping its course. The "re-invention" of France affected the population down to every village and demanded decisions from virtually every adult. This course will focus on the people as actors: their collective memory, their ideologies, their repertoire of interventions, the formation of a popular political culture. It will examine the encounters between the people (in their multiple incarnations) and the revolutionary elites who sought to articulate and appropriate the Revolution. A major theme will be the tension between the ambitions to achieve liberty and equality.

[HIST 409 Seminar on Work in Europe and America]
Fall. 4 credits. Not offered 1997–98; next offered 1998–99. S. L. Kaplan. For description, see Comparative History.

[HIST 435 Collective Action and Politics in Modern Europe]
Not offered 1997–98. S. Kaplan, S. Tarrow. For description, see GOVT 435.

[HIST 441 Seminar in the European Enlightenment]

[HIST 451 Lord and Peasant in Europe: A Seminar in Social History]

[HIST 456 Seminar in European Cultural History]

[HIST 457 Seminar in European Fascism]
HIST 462 Popular Culture in European History  
Spring. 4 credits. S. L. Kaplan.  
An examination of the origins, practices and meanings of popular culture throughout Europe from the Middle Ages to the era of the French Revolution. After considering the various ways in which "culture" and "popular" can be construed, the seminar will focus on the specific manifestations of popular culture, its various languages and gestures, and its complex relations with the dominant/elite cultures.

HIST 463 The Gates to Modernity: From Karlbad to the 1848 Revolution (also German Studies 635)  
4 credits. Prerequisite: permission of instructor. Not offered 1997–98.  
W. Pintner.  
The collapse of the Soviet Union provides an opportunity to reconsider the entire Stalinist experience, both on the basis of newly accessible documents and from fresh perspectives. This course approaches Stalinism as an entire system, examining the links between high politics, foreign relations, culture and everyday strategies. Readings will include historical studies as well as newly available primary materials. Knowledge of Russian not required.

HIST 464 Russian Social History  
Fall. 4 credits. Prerequisite: one semester of Russian history or permission of instructor. Not offered 1997–98.  
W. Pinter.  
Examines the development of major social groups throughout Russian history in the sixteenth and twentieth centuries and compares them to similar groups in other societies.

HIST 465 The Historical Origin of the Post-Soviet Successor States  
Spring. 4 credits. Not offered 1997–98.  
Permission of the instructor required.  
J. Weiss.

HIST 466 Seminar in Modern European Intellectual History  
Spring. 4 credits. Not offered 1997–98.  
Juniors, and seniors. D. Baugh.

HIST 467 Seminar in Modern European Political History  
Spring. 4 credits. Not offered 1997–98.  
Permission of instructor required.  
J. Weiss.

HIST 468 Twentieth-Century Britain  
Spring. 4 credits. Open to sophomores, juniors, and seniors. D. Baugh.  
A seminar course, focusing on political and social history. The main emphasis is on the two world wars and their role in British economic and imperial decline. The course also looks at some great personalities—Lloyd George, Churchill, and Bevin—and the major political and social transitions, taking departure from Edwardian era.

HIST 469 Empire, State, and Nation in Russian and Soviet History  
Fall. 4 credits. Not offered 1997–98.  
P. Holquist

HIST 470 Graduate Seminar in European Cultural and Intellectual History (also Music 605)  
Fall. 4 credits. Anchor course. Not offered 1997–98.  
P. Holquist

HIST 471 Seminar on the Politics of the Enlightenment  

HIST 472 Seminar in European Intellectual History  
Fall. 4 credits.  
W. Pinter.

HIST 473 Seminar in Modern European and Soviet History  
Spring. 4 credits. Permission of the instructor required.  
J. Weiss.

HIST 474 Topics in Modern European Intellectual History  
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1997–98.  
D. LaCapra.

HIST 475 Social and Cultural History of Contemporaneous Europe  
Fall. 4 credits. J. Weiss.

HIST 476 Seminar in Modern European Intellectual History  
Fall. 4 credits.  
Juniors, and seniors. D. Baugh.

HIST 477 Seminar in the Politics of the Enlightenment  
An inquiry into the historical origins of European (especially French) political, social, and economic thought, beginning in the 1680s, at the zenith of Louis XIV's absolutism, and culminating in the French Revolution a century later. The emphasis is on the relation of criticism and theory to actual social, economic, religious, and political conditions. An effort is made to assess the impact of enlightened thought on the eighteenth-century world and to relate its intellectual heritage to modern political discourse. Readings in translation from such authors as Bayle, Montesquieu, Voltaire, Rousseau, Diderot, and others as well as from modern scholarship and polemical literature.

HIST 478 Stalinist Civilization  

HIST 479 The Historical Origin of the Post-Soviet Successor States  
Spring. 4 credits. Not offered 1997–98.  
W. Pinter.

HIST 480 Twentieth-Century Britain  
Spring. 4 credits. Open to sophomores, juniors, and seniors. D. Baugh.

HIST 481 Seminar on the Politics of the Enlightenment  
Spring. 4 credits.  
W. Pinter.

HIST 482 Popular Culture in European History  
Spring. 4 credits. S. L. Kaplan.

HIST 483 The Gates to Modernity: From Karlbad to the 1848 Revolution (also German Studies 635)  
4 credits. Prerequisite: permission of instructor. Not offered 1997–98.  
J. Weiss.

HIST 484 Seminar in Modern European Political History  
Spring. 4 credits. Not offered 1997–98.  
Juniors, and seniors. D. Baugh.

HIST 485 The Historical Origin of the Post-Soviet Successor States  
Spring. 4 credits. Not offered 1997–98.  
W. Pintner.

HIST 486 Seminar in Modern European Intellectual History  
Fall. 4 credits.  
J. Weiss.

HIST 487 Seminar in Modern European Political History  
Spring. 4 credits. Not offered 1997–98.  
Juniors, and seniors. D. Baugh.

HIST 488 Seminar in Modern European Intellectual History  
Fall. 4 credits.  
J. Weiss.

HIST 489 Empire, State, and Nation in Russian and Soviet History  
Fall. 4 credits. Not offered 1997–98.  
P. Holquist.

HIST 490 Empire, State, and Nation in Russian and Soviet History  
Fall. 4 credits. Not offered 1997–98.  
P. Holquist.

HIST 491 Seminar on the Politics of the Enlightenment  

HIST 492 Seminar in European Intellectual History  
Fall. 4 credits.  
W. Pinter.

HIST 493 Seminar in Modern European Intellectual History  
Fall. 4 credits.  
J. Weiss.

HIST 494 Seminar in Modern European Political History  
Fall. 4 credits. Not offered 1997–98.  
J. Weiss.

HIST 496 Graduate Seminar in European Cultural and Intellectual History (also Music 605)  
Fall. 4 credits. Not offered 1997–98.  
P. Holquist

HIST 497 Seminar on the Politics of the Enlightenment  

HIST 498 Twentieth-Century Britain  
Spring. 4 credits. Open to sophomores, juniors, and seniors. D. Baugh.

HIST 499 Empire, State, and Nation in Russian and Soviet History  
Fall. 4 credits. Not offered 1997–98.  
P. Holquist.

HIST 500 Graduate Seminar in European Cultural and Intellectual History (also Music 605)  
Fall. 4 credits. M. Steinberg.

HIST 501 Supervised Reading  
Fall or spring. 2 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HONORS AND RESEARCH COURSES  
Note: History 301–302 are not regular courses for which students may sign up at will. They are personal arrangements between an instructor and a particular student. Students must first gain the consent of a particular instructor to work with them.

HIST 301 Supervised Reading  
Fall or spring. 2 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 302 Honors Thesis  
Fall or spring. 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 303 Honors Research  
Fall or spring. 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 304 Honors Project  
Fall or spring. 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.
The major in history of art enables students to acquire a familiarity with the art of many different cultures and a deeper knowledge of selected periods and places. The major strengthens visual, analytic, and interpretive skills, and reading and writing abilities. The major has requirements to ensure both breadth and depth, but it is also flexible enough to be tailored to each student's interests. In their junior and senior years, majors work closely with their advisers to determine their own course of study.

Admission to the Major

Students wishing to major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. One of the two courses required for entry into the major must be at the 200-level and one must emphasize material either predominantly before 1800 or outside Europe/America. These two courses are prerequisites for the major and may not be counted toward fulfillment of the major requirements. Prospective majors should consult with the director of undergraduate studies.

Requirements for the Major

Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, Baroque, modern, Southeast Asia, China, Japan, and Africa. Majors practice a range of art historical methods and interpretive strategies, including connoisseurship, dendrochronology, feminism, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is encouraged strongly.

Honors

To become a candidate for the degree of Bachelor of Arts with honors in the history of art, a student must have a cumulative average of B+ for all courses taken in the department and in all second-year courses. Applicants to write an honors thesis must be made to the director of undergraduate studies during the second term of the junior year. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student's transcript. The senior year the honors candidate will include in his/her course load, History of Art 600 and 601. These courses address the research and writing of the senior thesis under the direction of the student's project advisor.

Course Numbering System

100-level courses are all freshman writing seminars. 200-level courses are introductions to the major subdivisions of Western and non-Western art and they often have large enrollments. 300-level courses are more specialized, and some have the introductory course in the appropriate area as a prerequisite. Freshmen are advised to take the introductory courses unless they already have substantial background in the history of art. 400-level courses are upper-level seminars, primarily for undergraduates, although graduate students in the history of art and other fields also take them. 500-level courses are primarily graduate seminars, which undergraduates may also take.

The Major

The major in history of art enables students to acquire a familiarity with the art of many different cultures and a deeper knowledge of selected periods and places. The major strengthens visual, analytic, and interpretive skills, and reading and writing abilities. The major has requirements to ensure both breadth and depth, but it is also flexible enough to be tailored to each student's interests. In their junior and senior years, majors work closely with their advisers to determine their own course of study.

Admission to the Major

Students wishing to major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. One of the two courses required for entry into the major must be at the 200-level and one must emphasize material either predominantly before 1800 or outside Europe/America. These two courses are prerequisites for the major and may not be counted toward fulfillment of the major requirements. Prospective majors should consult with the director of undergraduate studies.

Requirements for the Major

Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, Baroque, modern, Southeast Asia, China, Japan, and Africa. Majors practice a range of art historical methods and interpretive strategies, including connoisseurship, dendrochronology, feminism, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is encouraged strongly.

Honors

To become a candidate for the degree of Bachelor of Arts with honors in the history of art, a student must have a cumulative average of B+ for all courses taken in the department and in all second-year courses. Applicants to write an honors thesis must be made to the director of undergraduate studies during the second term of the junior year. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student's transcript. The senior year the honors candidate will include in his/her course load, History of Art 600 and 601. These courses address the research and writing of the senior thesis under the direction of the student's project advisor.

Course Numbering System

100-level courses are all freshman writing seminars. 200-level courses are introductions to the major subdivisions of Western and non-Western art and they often have large enrollments. 300-level courses are more specialized, and some have the introductory course in the appropriate area as a prerequisite. Freshmen are advised to take the introductory courses unless they already have substantial background in the history of art. 400-level courses are upper-level seminars, primarily for undergraduates, although graduate students in the history of art and other fields also take them. 500-level courses are primarily graduate seminars, which undergraduates may also take.

The Major

The major in history of art enables students to acquire a familiarity with the art of many different cultures and a deeper knowledge of selected periods and places. The major strengthens visual, analytic, and interpretive skills, and reading and writing abilities. The major has requirements to ensure both breadth and depth, but it is also flexible enough to be tailored to each student's interests. In their junior and senior years, majors work closely with their advisers to determine their own course of study.

Admission to the Major

Students wishing to major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. One of the two courses required for entry into the major must be at the 200-level and one must emphasize material either predominantly before 1800 or outside Europe/America. These two courses are prerequisites for the major and may not be counted toward fulfillment of the major requirements. Prospective majors should consult with the director of undergraduate studies.

ART H 230 Introduction to Art History: Monuments of Medieval Art (also Religious Studies 230) #
Spring. 4 credits. Each student must enroll in a section. R. G. Calkins.
An introduction to the approaches to art history through a study of selected works of art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

ART H 245 Introduction to Art History: Renaissance and Baroque Art #
Fall. 4 credits. Each student must enroll in a section. C. Lazzaro.
A survey of major works of European painting, sculpture, and architecture from 1400 to 1700. The focus is on preeminent artists, workshop methods, style, meaning, patronage, and the function of art in a range of social contexts. The course also covers the methods of art history currently practiced in Renaissance and Baroque studies. Weekly section meetings are required.

ART H 260 Introduction to Art History: The Modern Era
Spring. 4 credits. Not open to students who have taken History of Art 261. Each student must enroll in a section.
J. E. Bernscock.
A discussion of the most important developments in art from 1780 to the present. The emphasis is on major movements and artists such as Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol).

ART H 261 Introduction to Art History: Modern Art
Summer only. 3 credits. Staff.
An introduction to early modern art as it developed between the French Revolution and World War I. Both European and American movements are examined, including Romanticism, Impressionism, and Cubism. Units are organized around central figures such as Mary Cassatt, Edgar Degas, Thomas Eakins, and Vincent van Gogh. Lectures are supplemented with discussions of methods of inquiry, including social history and feminism, fundamental to interpreting works of art.

ART H 280 Introduction to Art History: Approaches to Asian Art #
Fall. 3 credits. K. McGowan.
Arranged according to selective focus and emphasis rather than broad chronological survey, this course introduces students to the varied responses of the Asian artist in diverse social, geographical and historical contexts. Indian miniature paintings, Japanese prints, high-fired ceramics from Thailand and Vietnam, Indonesian textiles and jewelry, Javanese shadow-puppet theater, and Balinese ritual and performance traditions will be explored. A number of class sessions will meet in the Herbert F. Johnson Museum of Art.

ART H 309 Dendrochronology of the Aegean (also Classics 309 and Archaeology 309)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. J. Kuniholm.
Participation in a research project of dating modern and ancient tree-ring samples from the Aegean and Mediterranean. Supervised reading and laboratory work. A possibility exists for summer fieldwork in Greece and Turkey.

ART H 320 The Archaeology of Classical Greece (also Classics 320) #
4 credits. Not offered 1997-98.
A. Ramage.

ART H 321 The City of Rome (also Classics 351 and Archaeology 351) #
Fall. 3 credits. M. Landon.
For description, see CLASS 351.

ART H 322 Arts of the Roman Empire (also Classics 350) #
4 credits. Not offered 1997-98.
A. Ramage.
The visual arts in the service of the first world state. The course starts with the architecture, painting, and sculpture of the Etruscan and Republican period but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered, along with the official presentations of the emperors.

ART H 323 Painting in the Greek and Roman World (also Classics 323) #
4 credits. Not offered 1997-98.
A. Ramage.

ART H 325 Greek Vase Painting (also Classics 325) #
Spring 4 credits. A. Ramage.
A stylistic and iconographical approach to an art in which the Greeks excelled. The course will be arranged chronologically from the early (eleventh century B.C.), anonymous beginnings to the "personal" hands of identifiable masters of the fifth and fourth centuries B.C. Styles of cities other than Athens will be stressed.

ART H 326 Greek Cities and Towns (also Classics 326)
J. Coleman.

ART H 327 Greek and Roman Coins (also Classics 327) #
Fall. 4 credits. A. Ramage.
The varied issues of Greek cities and the Roman state are examined. Coins are considered as art objects as well as economic and historical documents. The changes in design, value, and metals from the origins of coinage to the late Roman period are studied. Lectures, student presentations, and work with the actual examples.

ART H 328 Greeks and Their Neighbors (also Classics 328) #
J. Coleman.
For description, see CLASS 322.

ART H 329 Greek Sculpture (also Classics 329) #
4 credits. Not offered 1997-98.
J. Coleman.
For description, see CLASS 329.

ART H 332 Architecture in the Middle Ages (also Architecture 382, Religious Studies 332) #
4 credits. Not offered 1997-98.
R. G. Calkins.

ART H 333 Early Medieval Art and Architecture #
4 credits. Not offered 1997-98.
R. G. Calkins.
Sculpture, painting, and architecture in the period from the late antique through the Carolingian era (A.D. 300-900). The evolution of the early Byzantine tradition will also be considered.

ART H 334 Romanesque Art and Architecture #
4 credits. Not offered 1997-98.
R. G. Calkins.
The painting, manuscript illumination, sculpture, and architecture of the eleventh and twelfth centuries, primarily in France, England, and Spain. Particular attention will be paid to the art of the Pilgrimage Roads, the manifestation of specific regional styles, the problems of Byzantine influence, the significance of the art of the church treasuries, and the factors that brought about the transition to the early Gothic.

ART H 335 Gothic Art and Architecture (also Religious Studies 335) #
4 credits. Not offered 1997-98.
R. G. Calkins.

ART H 336 Prelude to the Italian Renaissance (also Religious Studies 336) #
4 credits. Not offered 1997-98.
R. G. Calkins.

ART H 337 The Medieval Illuminated Book (also Religious Studies 337) #
4 credits. Not offered 1997-98.
R. G. Calkins.
A study of selected major examples of medieval illuminated manuscripts from between A.D. 300 and 1500. Facsimiles of major manuscripts such as the Lindisfarne Gospels, the Book of Kells, and the Hours of Mary of Burgundy will be examined. Students will write a research paper on a manuscript of their choice.

ART H 341 Flemish Painting (also Religious Studies 342) #
4 credits. Not offered 1997-98.
R. G. Calkins.
An examination of Flemish painting in the 15th century, with emphasis on the works of Robert Campin, Jan van Eyck, Roger van der Weyden, Hugo van der Goes, Hans Memling, and ending with Jerome Bosch. Issues of the social, economic, and devotional context will be discussed as they pertain to the particular development of Northern Realism and Symbolism during this century.

ART H 342 Italian Renaissance of the Fifteenth Century #
4 credits. Not offered 1997-98.
C. Lazzaro.

ART H 344 Italian Renaissance of the Sixteenth Century: Leonardo, Michelangelo, and Raphael #
4 credits. Not offered 1997-98.
S. Reiss.
A detailed examination of the art and architecture of these three great artists and of the cultural and historical environment in which they worked. The primary focus of the course will be works of art and architecture created by Leonardo, Michelangelo, and Raphael, but their writings will be studied as well. The importance of drawing for these artists will be studied, as well as the profound impact of their art and thought on other sixteenth-century painters, sculptors and architects. The course will emphasize...
ART H 345 Rome, Florence, and Venice in the Sixteenth Century # Spring. 4 credits. C. Lazzaro.
This course examines the distinctive cultural identities and their visual representation of three city-states in sixteenth-century Italy: Rome, Florence, and Venice. A papal turned duchy ruled by the Medici dynasty, and an oligarchic republic, they had in common a shared culture: a social and intellectual elite of both rulers and patricians joined by a shared classical culture. Artistic models and mythological figures from classical antiquity provided a universal visual language, which was modified by local artistic traditions and histories. The course examines the images and symbols of each state; center of power, including St. Peter’s, the Vatican, and the Capitoline Hill in Rome, the Piazza Signoria and San Lorenzo complex in Florence, and the piazzas of San Marco and the Doge’s palace in Venice; government-sponsored propagandistic works of sculpture, wall painting, architecture, and spectacle in the buildings and squares, issues of church and state relations, and in Florence of civic and dynastic ideas of the state; and also the role of private collections and commissions (of portraits, allegorical paintings, palaces, and gardens) in establishing cultural identity. The course discusses works of some of the major artists of the sixteenth century, including Michelangelo, Raphael, Bronzino, and Titian, but focuses on topics and issues, which are examined through class lectures, discussions, weekly readings, and term paper.

ART H 350 The Culture of the Renaissance I (also History 361 and Comparative Literature 361) # 4 credits. Each student must enroll in a section. Not offered 1997–98. C. Lazzaro, J. M. Najemy.
ART H 351 The Culture of the Renaissance II (also Religion Studies 362, History 364, Music 390, Religious Studies 362, English 325) # Fall. 4 credits. W. J. Kennedy, C. Kaske. For description, see COM L 362.

ART H 355 Art as Spectacle: The Italian Baroque (also Religious Studies 352) # Fall. 4 credits. K. Barzman.
This course examines the Italian Baroque as a society of spectacle. Lectures and discussions will focus on frescoes, public sculpture, architecture, and the re-organization of urban space in Italian cities from the end of the Council of Trent (1563) through the papacy of Clement XII (1706). Emphasis will be placed on speculatively the forms of address intended to guide and impress the viewer, and on the various institutions and individuals served by this kind of cultural production. Artists covered include Bernini, Borromini, Caravaggio, Carracci, Gaulli, Cortona, and Tiepolo.

ART H 356 Religion and Images Across the Americas (also Religious Studies 360) # Spring. 4 credits. K. Barzman.
This course will look at the religious use of images from the fourteenth through the eighteenth centuries. It will take a cross-cultural perspective, focusing on Italy, France, the Low Countries, Spain, and Spanish colonial South America and Meso-America. The emphasis will be on major iconographic themes (e.g., the Passion of Jesus, Eucharistic imagery, the miraculous interventions of Mary and the saints) and on the incorporation of images in rituals of devotional practice revolving around marriage, birth, illness, death, and the salvation of the soul. We will concentrate on works ranging from anonymous production to the masterpieces of early modern artists (including Giotto, van Eyck, Dürer, Grünewald, Caravaggio, Rubens, Ribera, and Murillo.)

Nineteenth-century American painters often constructed images of "exceptionalism." DeTocqueville’s term for the social harmony and material abundance he considered unique to the New World. Embedded in these icons of national cohesion, however, were signs of race, class, and political conflict that we will decode through interdisciplinary methods. Our topical units include New England portraiture and commodity, Hudson River landscape and corporate (railroad) patronage, images of African-Americans and Reconstruction, images of Native Americans, the West, and Manifest Destiny. Through these, we will challenge the assumption that American art celebrated democracy, and consider more conflicted attitudes. Our key artists include John S. Copley, George Caleb Bingham, Caleb Bingham, Winslow Homer, Mary Cassatt, and Thomas Eakins. Our readings include art historical texts and others by Poe, Emerson, and Whitman.

ART H 362 Impressionism and Society Spring. 4 credits. L. Melnick.
This course discusses French Impressionism as it relates to nineteenth-century public life. Chief artists include Manet, Cassatt, Morisot, Degas, Pissarro, Monet, Seurat, Toulouse-Lautrec, and Van Gogh. Images are interpreted as cultural products of the Third Republic, with close attention to cafe and brothel society, middle-class leisure, japonisme and imperialism, workers’ movements, and Le Bon’s theory of crowds. Women into history is considered, as are more theoretical considerations of utopia, capital, pathology, and the public body. Overarching issues of class, gender, and power in urban Paris will be addressed through the writings of Baudelaire, Benjamin, Pollock, Jameson, and Zola.

ART H 365 Art from 1940 to 1990 Fall. 4 credits. J. E. Bernstein.
Major artists and movements in the United States since 1940, beginning with Jackson Pollock and Abstract Expressionism, and continuing through recent developments in art. Attention is devoted to the critical reception that artists have received and to artists’ statement themselves.

ART H 370 Visual Culture and Social Theory (also Government 375 and Comparative Literature 368) # Fall. 4 credits. A. Vidler, S. Buck-Morss.
For description, see Government 375.

A historical and critical survey of the architecture of Washington. Attention will be given to the periods, styles, architects, and clients—public and private—of notable buildings and to the urbanscape of the nation’s capital. The vocabulary of architectural analysis and criticism will be taught. Field trips required.

ART H 378 Art in African Culture and Society (also AS&RC 310) # Fall. 3 credits. S. Hassan.
For description, see AS&RC 310.

ART H 380 Introduction to the Arts of China (also Archaeology 380 and Asian 382) # Fall. 4 credits. S. Oertling.
A one semester introduction to the arts of China, this course will examine the visual arts of the world’s oldest continuous civilization in a topical rather than strict chronological framework. The lectures will cover the major contributions the Chinese have made in the areas of ritual bronzes, burial art, Buddhist sculpture, pottery and porcelain, caligraphy and painting. A substantial part of the course will be devoted to the development of landscape painting, particularly in the later centuries of Chinese art. Sections for the course will meet in the Kress Library to examine original works from the museum’s large Chinese collection.

ART H 381 Buddhist Art in Asia # 4 credits. Not offered 1997–98.

This seminar assembles key works of art from various cultures and periods, with an emphasis on the role of the house in shaping cultural identity. It will explore the construction and transmission of notions of art, identity, and power, and examine the relationship between art and the world in which it is created. The seminar will be taught by A. Ramage and will meet in the Johnson Art Museum Study Gallery. Enrollment is limited to 15 students, and students interested in this course should notify the department directly at the time of pre-registration. Students will be expected to give brief presentations on prints in the collection and to consider the social and cultural issues raised in the medium of prints and their unique visual language. These issues include: the construction and transmission of notions of art, identity, and power; the representation of the urban and rural environment; the relationship between art and the world in which it is created; and the social and cultural issues raised in the medium of prints and their unique visual language.
for professional and amateur artists from the sixteenth through twentieth centuries.

[ART H 462] Topics in Early Modernism # Fall. 4 credits. Prerequisite: permission of instructor. Auditing is not permitted. Not open to freshmen or sophomores. L. L. Meixner.

Seminar Topic for fall 1997: Early Modernism in America. Using the Armory Show (1913) as its center, this interdisciplinary seminar examines American modernism prior to World War II. Against the backdrop of post-World War I society and politics, we will examine the machine aesthetic and kinetic poetry, the rise of photography at *291,* Precisionism, American Dada, the Harlem Renaissance, and the work of women artists from antiquity to the present. This seminar will be devoted to a study of the major sculptors, such as Auguste Rodin, Constantin Brancusi, Henry Moore, David Smith, Alberto Giacometti, Louise Nevelson, George Segal, Donald Judd, Robert Morris, Eva Hesse, and Richard Serra.

Topic for 1996: Modern Sculpture. Developments in modern sculpture will be explored from their beginnings in the late nineteenth century. A wide range of styles, media, and content will be studied. The focus will be on major sculptors, such as Auguste Rodin, Constantin Brancusi, Henry Moore, David Smith, Alberto Giacometti, Louise Nevelson, George Segal, Donald Judd, Robert Morris, Eva Hesse, and Richard Serra.

[ART H 464] Studies in Modern Art Spring. 4 credits. Prerequisite: permission of instructor. Auditing is not permitted. J. E. Bernstock.

Topic for 1998: To be announced.

[ART H 466] Women Artists (also Women's Studies 404) Fall. 4 credits. Prerequisite: permission of instructor. J. E. Bernstock.

This seminar will be devoted to a study of the work of women artists from antiquity to the present. The works of the most prominent women artists from each period will be studied in relation to the changing roles of women in society. The artists to be studied include Jennifer Bartlett, Artemisia Gentleschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Käthe Kollwitz, Georgia O'Keeffe, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger.

[ART H 470] Postmodernist Art and Criticism (also Comparative Literature 474) 4 credits. Prerequisite: permission of instructor. Not offered 1997–98. H. Foster.

[ART H 482] Ceramic Art of China and Southeast Asia # 4 credits. Prerequisite: permission of instructor. Not offered 1997–98.

Seminar participants will examine the impact of feminist theory on art historical practice. Based on critical analysis of texts from the early 1970s to the present, we will consider the range of methods employed, the discursive traditions to which they belong (e.g., liberal, Marxist, psychoanalytic, poststructuralist), the relative merits of the methods, and the interpretive problems they present. At the graduate level, some additional meetings and work required.

[ART H 520] Seminar in Classical Archaeology (also Classics 630 and Archaeology 520) Fall. 4 credits. Prerequisite: permission of instructor. P. L. Kuniholm.

[ART H 531] Problems in Medieval Art and Architecture (also Religious Studies 531) Spring. 4 credits. Prerequisite: permission of instructor. R. G. Calkins.

Topic for spring 1998: Narrative and miniatures in medieval illuminated manuscripts.

This seminar will examine assumptions about meaning and how meaning is produced in Renaissance art. Various interpretive strategies will be examined, among them iconographic, semantic, feminist, and psychoanalytic, within a specifically Renaissance literary, intellectual, and social context. Texts by Panofsky and critical discussions of them, Baxandall, Bryson, and others will be read and discussed with reference to particular works of art. The seminar is intended primarily for graduate students in all areas of the history of art and those in other disciplines with an interest in the Italian Renaissance. Senior History of Art majors with background in the Italian Renaissance are also welcome.

This seminar focuses on early modern rituals of family, church, and state in which palaces, shrines, streets, and squares provided a theatre for the rehearsal of formalized practices and the constitution of various economies (of pleasure, fear, mastery, control) in an asymmetrical field of social exchange. Emphasis will be placed on mixed media and ephemeral displays as the backdrop for civic parades, the elevation of popes and crowned heads of state, the reception of diplomats, trials, public executions, feastday celebrations, religious processions, funerals of state, family obsequies, banquets, weddings, and other rites of passage. Opera, ballet, and staged drama (liturgical and secular) will be introduced as more codified forms of public performance, with which performances of the self and of corporate community had much in common. Students are encouraged to attend lectures for ART H 555 in addition to required seminar meetings.

[ART H 570] Theories of Modernism Topic: Shock and Trauma (also Comparative Literature 672) 4 credits. Prerequisite: permission of instructor. Not offered 1997–98. H. Foster.

[ART H 571] African Aesthetics (also AS&RC 503) Fall. 4 credits. S. Hassan.

For description, see AS&RC 503.

[ART H 580] Problems in Asian Art (also Religious Studies 580) Fall. 4 credits. Prerequisite: permission of instructor. K. McGowan.

Topic for fall 1997: Religion in South and Southeast Asian art.

[ART H 591–592] Supervised Reading 591, fall; 592, spring. 4 credits. May be repeated for credit. Limited to graduate students.

[ART H 595] Art History and Visual Culture (also Comparative Literature 625) Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1997–98. H. Foster.

[ART H 600] Honors Work Fall or spring. 8 credits. Prerequisite: History of Art 600. Selected for senior art history majors who have been admitted to the honors program. Basic methods of art historical research will be discussed and individual readings assigned, leading to the selection of an appropriate thesis topic.

[ART H 601] Honors Work Fall or spring. 8 credits. Prerequisite: History of Art 600. The student under faculty direction will prepare a senior thesis.

HUNGARIAN

See Language Courses under Languages and Linguistics.
LANGUAGES, MODERN

Language is enormously complex and encompasses virtually all areas of human endeavor.

Learning individual languages is, of course, integral to understanding language itself as well as to understanding other cultures. The Department of Modern Languages is responsible for a large variety of language courses (the departments of linguistics, classics, Near Eastern studies, and Africana studies offer still others). In addition to fulfilling the College of Arts and Sciences language requirement, some language courses satisfy the college's breadth requirements.

Courses at all levels are offered not only in Spanish, French, German, Italian, Chinese, Japanese, and Russian, but also in some less familiar languages such as Korean, Hindi, Indonesian, Quechua, and many others—a total of about thirty. See the listings below under the rubric "Language Courses." The department's resources include the Center for Language Learning at Noyes Lodge, a state-of-the-art facility where instructors can create high-tech language study materials and students can use them in a beautiful setting on Beebe Lake.

The study of language itself is part of many disciplines and this is offered in various departments in the College of Arts and Sciences. The members of the professorial faculty in the Department of Modern Languages are linguists who have interests in common with the faculty of the Department of Linguistics. The contributions of the Department of Modern Languages lie mainly in the areas of language use, language perception and production, language acquisition, textual and discourse analysis, cognitive, social and cultural aspects of language, and the structure, history, or social circumstances of a particular language or language family.

LINGUISTICS

S. McConnell-Ginet, chair; J. Whitman, director of graduate studies (320 Morrill Hall); M. Diesing, director of undergraduate studies (212 Morrill Hall); J. Bowen, W. Browne, V. Casstens, A. Cohn, C. Collins, W. Harbert, S. Hertz, J. Jasanoff, A. Nussbaum, F. Parkinson, M. Suter, D. Zec, A. Zucchi. Visiting: F. Parkinson.

Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences, and much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics and linguistic colleagues in the Department of Modern Languages and other departments span most of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning; historical linguistics, the study of language change over time; sociolinguistics, the study of language's role in social and cultural interactions; and applied linguistics, which relates the results of linguistic research to problems of bilingual education, second-language learning, and teaching.

Studying linguistics is not a matter of studying many languages. Linguistics is a theoretical discipline with ties to such areas as cognitive psychology, philosophy, logic, computer science, and anthropology. Nonetheless, knowing particular languages (e.g., Spanish or Japanese) in some depth can enhance understanding of the general properties of human language. Not surprisingly, then, many students of linguistics owe their initial interest to a period of exposure to a foreign language, and those who come to linguistics by some other route find their knowledge about languages enriched and are often stimulated to embark on further foreign language study.

Students interested in learning more about linguistics and its relationship to other disciplines in the humanities and social sciences are encouraged to take Linguistics 101, which is a prerequisite for most other courses in the field, or one of the freshman writing seminars offered in linguistics on topics such as metaphor, American Sign Language, and the science of language). Linguistics 101 and other introductory courses fulfill the social science distribution requirement. Most 100- and 200-level courses have no prerequisites and cover various topics in linguistics (e.g., Ling 118 Varieties of Human Language, Ling 200 Introduction to Bilingualism, Ling 216 Mathematical Linguistics) or focus on the linguistics of a particular geographic region or historical development of particular languages (e.g., Ling 217 History of the English Language, Ling 230 Introduction to Southeast Asian Languages and Linguistics). Some of these courses also fulfill the breadth requirements.

Talks and discussions about linguistics are offered through the Undergraduate Linguistics Forum and the Cornell Linguistic Circle. These meetings are open to the university public and anyone wishing to learn more about linguistics is most welcome to attend.

The Major

For questions regarding the linguistics major, contact Professor Molly Diesing (212 Morrill Hall, 255-8635, md20@cornell.edu).

The prerequisite for a major in linguistics is the completion of Linguistics 101 and either Linguistics 201 or 203. The major has its own language requirement, which should be completed as early as possible: qualification in two languages other than English, one of which must be either non-European or non-Indo-European. With approval of the department's director of undergraduate studies, this requirement may be waived (i.e., reduced to the normal arts college language requirement).
The requirements for the linguistics major are as follows:

1) Linguistics 201 (Introduction to phonetics and phonology) or Linguistics 203 (Introduction to syntax and semantics), whichever one was not taken as a prerequisite to the major
2) Linguistics 410 (Historical)
3) Three of the following five courses, one of which must be either Phonology I or Syntax I:
   - Linguistics 301 (Phonology I)
   - Linguistics 303 (Syntax I)
   - Linguistics 309 or 310 (Morphology I or II)
   - Linguistics 319 (Phonetics I)
   - Linguistics 421 (Semantics I)
4) A course at or beyond the 300 level in the structure of English or some other language, or a typological or comparative structure course such as Linguistics 401, 402, or Field Methods.
5) One additional linguistics course for at least 4 credit hours, which may be a course with significant linguistic content in a related field.

Honors. Applications for honors should be made during the junior year. Candidates for admission must have a 3.0 (B) average overall and should have a 3.2 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors will complete an honors thesis and take a final oral examination in defense of it. The thesis is usually written during the senior year but may be begun in the second term of the junior year when the student's program so warrants. The oral examination will be conducted by the honors committee, consisting of the thesis adviser and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. Linguistics 493 and 494 may be taken in conjunction with thesis research and writing but are not required.

The courses in both the Department of Modern Languages and the Department of Linguistics are listed below under the following rubrics: General Linguistics, Linguistics of Particular Languages, Language Courses.

General Linguistics

 Fees: Depending on the course, a small fee may be charged for photocopied texts for course work.

Freshman Writing Seminars

LING 100 Language, Thought, and Reality
For descriptions, see freshman writing seminar brochure.

LING 101 Theory and Practice of Linguistics
Fall, spring, or summer. 4 credits each term. F. Parkinson; S. McConnell-Ginet
An introductory course designed to provide an overview of the science of language, especially its theoretical underpinnings, methodology, and major findings. The course focuses on the basic analytic methods of several subfields of linguistics, including phonetics, phonology, morphology, syntax, semantics, language variation, language change, and psycholinguistics.

LING 110 Language Learning and Language Use
Fall. 3 credits. J. Sereno.
Language permeates every aspect of our life—cognitive, social, economic, and political. In this course, we will explore how language is used in everyday conversation and how language is learned. What communicative functions does language serve? What is the social significance of language use? How does language relate to the mental capacities that people have? How do we learn language as children? Is this process different from learning languages as an adult? How does literacy influence the processing of language?

LING 115 Language and Culture
Spring. 3 credits. J. Whitman.
We often assume that there is a close relationship between differences in language and cultural variation. This course focuses on that relationship, beginning with an examination of the theory of language structure, which posits a link between basic properties of languages and crosscultural differences in worldview. We also examine potential cultural determinants of variation in language: pronouns and honorifics, systems of ritual and taboo, and the impact of narrative organization on grammar. Special attention is paid to 'extreme' forms of language: invented languages from Esperanto to Klingon; glosсалa and trances languages; language games and secret languages.

LING 118 Varieties of Human Language
Fall. 3 credits. P. Patkinson.
Language diversity has a place in our complex world. Whether spoken by a handful of speakers or by hundreds of millions, each language manages the same tasks of communication and fits in with its social environment. Language identification, literacy, and multilingualism are among the issues touched on.

LING 170 Introduction to Cognitive Science (also Cognitive Studies 101, Computer Science 101, and Psychology 102)
For description, see COGST 101.

LING 200 Introduction to Bilingualism
Spring. 3 credits. J. Sereno.
A basic introduction to the study of individual and societal bilingualism. Characteristics of bilingual language learning and use, and possible cognitive consequences will be discussed. Aspects of societal bilingualism in terms of social and political issues will also be considered.

LING 201 Introduction to Phonetics and Phonology
Spring. 4 credits. Prerequisite: Linguistics 101 or equivalent. F. Parkinson
An introduction to the study of human speech sounds and how they pattern in languages. The first part of the course will focus on phonetics: the production, acoustics, and perception of speech, with attention to both the common and the less common sounds of the world's languages. The second part of the course will focus on phonology: how human speech sounds pattern within and across languages, with an emphasis on the rules that govern these patterns and their possible representation.

LING 203 Introduction to Syntax and Semantics
Fall. 4 credits. Prerequisite: Linguistics 101 or equivalent or permission of instructor. C. Collins.
This course focuses on language as a system of knowledge that enables native speakers to create and interpret the structures of their language. Part of the course will consider issues of syntactic structure, such as the order of constituents, the hierarchical organization of grammars, and universal grammar. The other part of the course will focus on meaning and interpretation, addressing such issues as the role of context, how information is structured, and how it is encoded in the syntax.

LING 215 Psychology of Language (also Psychology 215)
Not offered 1997-98. J. Whitman.
For description, see PSYCH 215.

LING 216 Mathematical Linguistics
Spring. 4 credits. A. Zucchi.
The course is an introduction to the mathematical concepts and techniques most frequently used in theoretical linguistics.

LING 220 Acquisition of Spoken Language
A survey of phonetic aspects of language learning, focusing on first- and second-language acquisition. Relevant concepts in phonetics and psycholinguistics will be introduced at every stage. Topics include the role of innate knowledge versus linguistic experience in phonological development, language-universal aspects of speech learning, the phonetics of motherese, the existence of a critical period for language learning, and the phonetics of foreign accents.

LING 240 Experiments on Language Use and Gender Relations (also Women's Studies 244)
Spring. 4 credits. For non-majors or majors. S. McConnell-Ginet.
This course explores connections between language (use) and gender/sex systems, addressing such questions as the following: How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women's and men's roles affect their language use, their relation to language change? What is meant by sexist language? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and the general women's studies and feminist theory.
A general survey of syntactic theories that highlight grammatical function and reveal its role in discourse structure.

LING 309 Morphology
Spring. 4 credits. Prerequisite: Linguistics 101 or equivalent. Not offered 1997–98. Fall: F. Parkinson; spring: D. Zee.

A general survey course focusing on the relationship of meaning and form in morphological analysis. Current research on form-meaning questions is discussed.

LING 310 Morphology II
Fall. 4 credits. Prerequisite: Linguistics 203 or permission of instructor. Fall, not offered 1997–98. Spring. Prerequisite: Linguistics 203 or permission of instructor. Not offered 1997–98. Staff.

LING 311 Syntax I
Fall. 4 credits. Prerequisite: Linguistics 201 or permission of instructor. A. Jongman.

Provides a basic introduction to the study of syntax. Topics to be covered include grammar and phonology of the speech production apparatus, transcription and production of world's sounds, basic acoustics, computerized methods of speech analysis.

LING 312 Syntax II
Spring. 4 credits. Prerequisite: Linguistics 203 or permission of instructor. V. Carstens.

Prerequisite: Linguistics 203 or permission of instructor. Not offered 1997–98. J. Lantolf, Y. Shirai.

A general survey of syntactic theories that highlight grammatical function and reveal its role in discourse structure.
LING 405 Sociolinguistics
Fall. 4 credits. Prerequisite: Linguistics 101, 110, or permission of instructor. J. Wolff.
Systematically within the interactions between language and social context, we will examine dialect usage (diglossia, multilingualism, code-switching) variation and language change (network theory, change in progress), ethnography of communication and speech acts; language and culture; and language and gender, race, and power (including pidgins and creoles).

LING 406 Ethnolinguistics
Spring. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. J. Wolff.
This course will be an introduction to the study of pidgin and creole languages and the issues surrounding them both in and beyond linguistics. Topics covered will include: genesis of pidgins and creoles; classification of pidgins and creoles; creoles and language universals; creoles and sociolinguistic variation; a module on Saramaccan Creole English; educational and language planning issues; sociolinguistic issues; Black English.

LING 409 Psycholinguistics of Second-Language Reading
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1997-98. G. Appel.
In-depth analysis of the research on the reading process in a second language. Topics include processing of narrative vs. expository texts (descriptive, problem solving, causative, etc.); comparison of the reading process in native vs. second languages, and development of methodologies for the teaching of reading in the second-language classroom.

LING 410 Introduction to Historical Linguistics I
Spring. 4 credits. Prerequisite: Linguistics 201 or permission of instructor. J. Jasanoff.
A survey of the basic mechanisms of linguistic change, with examples from a variety of languages.

LING 413 Topics in Historical Linguistics I
Fall. 4 credits. Prerequisite: Linguistics 410 or permission of instructor. W. Haberb. J. Jasanoff, and C. Rosen.
Examines a selection of recent research illustrating a variety of productive and innovative approaches to problems in historical linguistics. Readings center on phonological and morphological evolution in the Romance and Germanic families. Students carry out guided research projects.

LING 421-422 Semantics I, II
421, fall. 422, spring. 4 credits each term. Prerequisites: for Linguistics 421, Linguistics 203; for Linguistics 422, Linguistics 421 or permission of instructor. Fall: M. Diesing, spring: A. Zucchi.
421: An introduction to semantics of natural language. The course starts from basic foundational questions concerning the nature of meaning and the empirical domain of semantic theory. Truth-conditional and logical theories and their application to the investigation of the structure of natural languages are extensively explored (with some comparisons with other approaches). Through the study of quantification, scope, anaphora, modalities, presuppositions, and the like, one tries to gain insight into general characteristics of the cognitive apparatus that is at the basis of our capacity for understanding sentences.
422: Guides students into current work in semantic theory. The first half of the course is an introduction to Montague-style semantics, whose influence on current research is quite extensive. The second half of the course focuses on selected topics that have grown out of (and sometimes against) classical Montague semantics. Such topics are usually drawn from the following: generalized quantifiers and anaphora, type-shifting, problems of tense and aspect, the linguistic relevance of algebraic approaches to properties, propositions, events and thematic roles, and discourse representation theory.

LING 436 Language Development (also Human Development and Family Studies 436 and Psychology 436)
Spring. 4 credits. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. Offered alternate years. B. Lust.
A survey of basic issues, methods, and research in study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental linguistic issues of universal grammar and the biological foundations for acquisition as well as the issues of relations between language and thought. The acquisition of communication systems in nonhuman species such as chimpanzees are addressed, but major emphasis is on the child.

LING 493 Honors Thesis Research
Fall. 4 credits. Staff.
May be taken before or after Linguistics 494, or may be taken independently.

LING 494 Honors Thesis Research
Spring. 4 credits. Staff.
May be taken as a continuation of, or before, Linguistics 493.

LING 600 Field Methods
Spring. 4 credits. Prerequisites: Linguistics 201 and 203 or permission of instructor. Not offered 1997-98. Staff.
Elicitation, recording, and analysis of data from a native speaker of a non-Western language not generally known to students.

LING 601 Topics in Phonological Theory
Spring. 4 credits. Prerequisites: Linguistics 301 and one higher-level course in phonology. D. Zec.
Selected topics in current phonological theory.

LING 602 Topics in Morphology
Fall. 4 credits. Prerequisites: Linguistics 301 or 303 or permission of instructor. D. Zec.
Selected topics in current morphological theory.

LING 604 Research Workshop
Fall. 4 credits. S-U grade only. Prerequisite: thesis or more semesters of graduate study in linguistics. V. Carstens, A. Cohn. Participants will present their ongoing research and discuss it with their colleagues. Individual topics will be chosen on the basis of interest to the instructor, and probable focus of dissertation research.

LING 607 Twentieth-Century Approaches to Language
Fall. 4 credits. Prerequisite: at least one course in linguistics or permission of instructor. Offered alternate years. L. Waugh, M. Bernal.
The development of 20th-century approaches to language in America and Europe. Work in 19th-century approaches will also be considered in their relation to 20th-century approaches, and will be given special attention in fall 1997.

LING 608 Discourse Analysis (also Comparative Literature 618)
Linguistic theory applied to relationships beyond the sentence.

LING 616 Syntax III
Fall. 4 credits. Prerequisites: Linguistics 304 or permission of instructor. C. Collins.
An examination of recent developments in syntactic theory, including "minimalist" approaches to phrase structure, derivations/representations and the nature of economy conditions, and parametric differences.

LING 633 Seminar in First-Language Acquisition: Cross-linguistic Studies of the Acquisition of Anaphora (also Human Development and Family Studies 633)
Fall. 1-4 credits. Prerequisite: Linguistics 436 or equivalent or permission of instructor. Not offered 1997-98. B. Lust.
This seminar will review and critique current theoretical and experimental studies of the first-language acquisition of anaphora, with a concentration on insights gained by cross-linguistic study of this area. The seminar will focus on relating current developments in syntactic theory regarding anaphora to current experimental research on first-language acquisition of anaphora. Attention will also be given to the development of research proposals.

LING 637 Experimental Research for Language Sciences
Fall. 4 credits. M. McCarthy, J. Sereno.
A detailed study of experimental procedures for carrying out research in linguistics, especially in the areas of applied linguistics, phonetics, and language acquisition. Quantitative and qualitative research methods are considered.

LING 648 Speech Synthesis by Rule
Spring. 4 credits. Prerequisite: Linguistics 301, 319, or permission of instructor. Offered alternate years. Not offered 1997-98. S. Hertz.
Investigates the nature of the acoustic structure of speech synthesis, using speech as a tool for exploring this structure. A particular acoustic model will be proposed, developed, and motivated by considering the relationship between phonological and acoustic structure, speech timing, phonetic universals, articulation, and speech perception. The primary tool for investigation will be the Delta System, a powerful software system for investigating phonology and phonetics through speech synthesis. The course is meant for graduate students and advanced undergraduate students in linguistics, but may also be of interest to students in psychology/psycholinguistics, computer science, and cognitive studies.

LING 700 Seminar
Fall or spring, according to demand. Credit to be arranged. Seminars are offered according to faculty interest and student demand. Topics in recent years have included subject and topic.
Montague grammar, speech synthesis, lexicon, classical and autonomous phonology, Japanese sociolinguistics, relation grammar, semantics and semiotics, and others.

LING 701-702 Directed Research
701, fall, 702, spring. 1-4 credits. Hours to be arranged. Staff.

LING 773-774 Proseminar in Cognitive Studies I, II (also Cognitive Studies 773-774, Psychology 773-774, Philosophy 773-774, and Computer Science 773-774)
Fall: R. Grade; spring: S-U only. 4 credits. J. Sereno.
This year-long seminar is intended to provide graduate students with an interdisciplinary introduction to the study of knowledge, its representation, acquisition, and use.

Linguistics of Particular Languages
Fees: Depending on the course, a small fee may be charged for photocopied texts for course work.

African

[LING 235 Introduction to African Languages and Linguistics @] Fall. 3-4 credits variable. Not offered 1997-98. C. Collins.
This is a survey of aspects of language use in Africa. We will discuss the relation between language and culture, the structural characteristics of African languages, and the historical relationships between different African languages.

[LING 431 Structure of an African Language] Spring. 4 credits. Prerequisite: Linguistics 101 or permission of the instructor. Offered alternate years. Not offered 1997-98. V. Carstens.
A survey of the grammar of an African language in light of current linguistic theory.

Selected topics in the syntax of African languages.

Arabic

LING 416 Structure of the Arabic Language (also Near Eastern Studies 416) @
For description, see NES 416.

Celtic

[LING 236 Introduction to Gaelic] Spring. 3 credits. W. Harbert.
This course is an introduction to the history, structure, and current status of the Scottish Gaelic language, oriented around elementary Gaelic texts.

LING 238 Introduction to Welsh
Spring. 3 credits. W. Harbert.
This course surveys the history, structure, cultural and political situation of the Welsh language. It includes several sessions of elementary language instruction and a brief introduction to Welsh literature.

LING 239/539 The Celtic Languages
Fall. 4 credits. Graduate students register under Ling 539. Not offered 1997-98.
W. Harbert.
This course surveys the history, structure, and political and social situation of the Celtic languages (Welsh, Scottish Gaelic, Irish Gaelic, Breton, Cornish, and Manx). The course includes a few days of introductory language instruction in some of these languages.

LING 437 Celtic Linguistic Structures
Fall. 4 credits. Prerequisite: Linguistics 303. W. Harbert.
This course will treat selected topics in the syntax and morphosyntax of the modern Celtic languages.

LING 623-624 Old Irish I, II
623, fall; 624, spring. 4 credits each term. Prerequisite for 624: 623 or permission of instructor. Not offered 1997-98.
J. Jasanoff.

LING 625 Middle Welsh
Fall. 4 credits. Prerequisite: permission of instructor. W. Harbert.
Students develop a reading knowledge of Middle Welsh through reading prose and poetic texts with emphasis on prose tales, including the Mabinogi.

LING 627 Advanced Old Irish]

Chinese

CHIN 403 Structure of the Chinese Language: Introduction to Chinese Linguistics @
Spring. 4 credits. Prerequisite: permission of instructor. H. Tao.
This course will be an introduction to the structure of Chinese and to general issues related to Chinese linguistics. Special attention will be paid to Chinese discourse and pragmatics and to general questions of language use.

English

LING 217 History of the English Language #
Fall. 4 credits. W. Harbert.
This course explores the development of the English language from its Indo-European beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old English, Middle English, Standard English, dialects, and World Englishes.

LING 311 The Structure of English: Demystifying English Grammar
Spring. 4 credits. W. Harbert.
Do you suffer from grammatical insecurity? In foreign language classrooms, do you find yourself at a loss because you don't know how grammatical terminology applies to English? This course will make English grammar accessible and comprehensible to native speakers who want to understand how the language they use so easily works. In addition to standard grammatical notions, the course will consider dialectal variation, matters of style, how sentence structure conveys viewpoint, and other discourse phenomena.

LING 649 Structure of Old English
Spring. 4 credits. Prerequisite: Ling 441. Offered alternate years. Not offered 1997-98.
W. Harbert.
Linguistic overview of Old English, with emphasis on phonology and syntax.

French

The Major
The French major has three separate tracks: the literature track, the area studies track, and the linguistics track. The linguistics track is described here; for the literature and area studies tracks, see the description under Romance Studies. The major in French linguistics is designed to give students proficiency in the oral and written language and to develop skills in the linguistic analysis of French.

While prospective majors should try to plan their programs as far ahead as possible, no student will be refused admission merely because of a late start. It is even possible for a student to begin French and/or linguistics at Cornell and become a major. Students are admitted to the major in French linguistics by the director of undergraduate studies of the Department of Romance Studies, Professor Jacques Béraud, but will be guided by their individual advisers.

The French Linguistics Major
To be admitted to the major, students should have completed Linguistics 101 and French 200, 203, 205, or 213 (or their equivalents) by the end of the sophomore year. It is expected that all students in the major will also take either French 220, 221, or 222, preferably by the end of the sophomore year.

To complete the major, a student must:
1) acquire a sound degree of competence in French. This competence is demonstrated by the successful completion of French 312 (or its equivalent) or by the passing of a special examination. Typically, students in the major will have taken 312 by the end of their junior year.
2) take six courses in French, Romance, and general linguistics (in addition to Linguistics 101). These courses will include at least one course concerning the history of French (e.g., Romance Linguistics 321, French 629 [listed under Romance Studies]), one course concerning the structure of French (e.g., French 405, 408, 410, Linguistics 323), and one other course in French linguistics.
3) take two courses (preferably a sequence) in some allied area, for example,
(a) French literature and civilization,
(b) psycholinguistics, (c) philosophy of language, (d) French history, culture, music, or history of art or architecture. (This requirement may be waived for students who are double majors in other fields.)

Honors. The honors program encourages well-qualified students majoring in French linguistics to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not practically possible in the case of course papers.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have
meet the minimum requirements for the major. An award of honors is determined by the student's grades in the major and the quality of the honors essay. [FRDML 405 Contemporary Theories of French Grammar] Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1997–98. L. Waugh. Selected topics in twentieth-century French linguistics.[FRDML 408 Linguistic Structure of French I (also Linguistics 408)] Fall. 4 credits. Prerequisites: qualification in French and Linguistics 101 or Linguistics 400, or permission of instructor. Offered alternate years. Not offered 1997–98. L. Waugh. A synchronic study and analysis of modern French, with emphasis on its phonology and morphology.[FRDML 410 Linguistic Structure of French II: Semantics, Pragmatics, and Discourse Analysis] Fall. 4 credits. Prerequisite: qualification in French. Offered alternate years. Not offered 1997–98. L. Waugh. A synchronic study and analysis of modern French, with emphasis on semantics, pragmatics, and discourse analysis.[FRDML 700 Seminar in French Linguistics] Spring. according to demand. Credit to be arranged. Seminars are offered according to faculty interest and student demand. Topics in recent years have included current theories in French phonology, current theories in French syntax, and semantics of French.[LING 232 The French Language Today (also French 222)] Fall. 3 credits. Prerequisite: Linguistics 101. Not offered 1997–98. A. Cohn. Designed for students with a working knowledge of French, this course explores the structure of French and how it is used. The course investigates the sound system, word structure and sentence structure of French as well as different varieties of French, including regional and social variation and formal vs. informal differences. [LING 315–316 Old Norse] 315, fall; 316, spring. 4 credits each term. H. Bernhardsdottir. Old Norse is a collective term for the earliest North Germanic literary languages: Old Icelandic, Old Norwegian, Old Danish, and Old Swedish. The richly documented Old Icelandic will be the center of attention, and the purpose is twofold: the student will gain (a) knowledge of an ancient North Germanic language, important from a linguistic point of view, as well as (b) access to the medieval Icelandic (and Scandinavian) literature. 315: The structure of Old Norse (Old Icelandic), phonology, and morphology, with reading of selections from the Prose-Edda, a 13th-century narrative based on the Eddic poetry. 316: Extensive reading of Old Norse texts, among them selections from some of the major Icelandic family sagas: Njal's saga, Grettis saga, and Egils saga, as well as the whole Háf妖nki saga.[LING 441 Introduction to Germanic Linguistics] Fall. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. J. Jasonoff. Survey of major issues in historical Germanic linguistics.[LING 607 Topics in Historical Germanic Morphology] Fall. 4 credits. Prerequisite: Ling 441. Not offered 1997–98. J. Jasonoff. The Germanic verbal system and its Indo-European origins.[LING 608 Topics in Historical Germanic Syntax] Fall. 4 credits. Prerequisite: Ling 441. Not offered 1997–98. W. Harbert. A diachronic and comparative investigation of syntactic processes in the older Germanic languages.[LING 710 Seminar in Germanic Linguistics] Fall or spring, subject to the needs of students and to the limitations of staff time. 4 credits. Not offered 1997–98.[LING 720 Seminar in Comparative Germanic Linguistics] Fall or spring, subject to the needs of students and to the limitations of staff time. 4 credits. Not offered 1997–98. W. Harbert, M. Diesing. This course surveys the history, structure, and use of the modern Germanic languages (English, German, Dutch, Afrikaans, Swedish, Danish, Icelandic, Norwegian, Faroese, and Yiddish).[LING 241 Yiddish Linguistics] Spring. 3–4 credits variable. Prerequisite: Linguistics 101 or permission of instructor. Not offered 1997–98. M. Diesing. This course will cover a wide variety of topics relating to the Yiddish language and Yiddish culture, including the structure of Yiddish, the history of the Yiddish language, Yiddish in America (the Yiddish revival, the role of the Yiddish press, etc.), Yiddish as a minority/dying language, and the influence of Yiddish on present-day American English. No previous knowledge of Yiddish required.[LING 424 Indo-Aryan Structures] Fall. 4 credits. Prerequisite: Linguistics 101. Not offered 1997–98. J. Gair. A basic introduction to the linguistic and sociolinguistic character of the subcontinent, with special attention to their implications for Greek historical grammar and dialectology.[LING 609 Greek Comparative Grammar (also Classics 421)] Fall. 4 credits. Prerequisite: thorough familiarity with the morphology of Classical Greek. A. Nussbaum. The diachrony and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.[LING 611 Greek Dialects (also Classics 425)] 4 credits. Not offered 1997–98; next offered 1998–99. A. Nussbaum. A survey of the dialects of ancient Greek through the reading and analysis of representative epigraphical and literary texts.[LING 613 Hellenistic Philology (also Classics 427)] 4 credits. Prerequisite: ability to read Homeric Greek. Not offered 1997–98; next offered 1999–2000. A. Nussbaum. An introduction to the epigraphy, language, and content of the Linear B tablets with special attention to their implications for Greek historical grammar and dialectology.[LING 615 Mycenaean Greek (also Classics 429)] 4 credits. Prerequisite: thorough familiarity with the morphology of Classical Greek. Not offered 1997–98. A. Nussbaum. An introduction to the epigraphy, language, and content of the Linear B tablets with special attention to their implications for Greek historical grammar and dialectology.
Indo-European

LING 131-132 Elementary Sanskrit (also Classics 131-132 and Sanskrit 131-132)

For description, see SANSK 131-132.

[LING 251-252 Intermediate Sanskrit (also Classics 251-252 and Sanskrit 131-132) @ #

For description, see SANSK 131-132.]

LING 617-618 Hittite

617, fall; 618, spring. 4 credits each term.
Prerequisites: for Linguistics 617, permission of instructor; for Linguistics 618, Linguistics 617 or permission of instructor.
Not offered 1997-98. J. Jasanoff.

LING 619 Rigveda

Fall. 4 credits. Not offered 1997-98.
J. Jasanoff, C. Minkowski.
Reading and linguistic analysis of selected Vedic hymns.

LING 631 Comparative Indo-European Linguistics

Fall. 4 credits. Prerequisite: permission of instructor. J. Jasanoff.
An introduction to the comparative grammar of the Indo-European languages.

LING 635-636 Indo-European Workshop

635, fall; 636, spring. 4 credits each term.
Prerequisite: permission of instructor. Not offered 1997-98. Fall: J. Jasanoff, spring: A. Nussbaum.
An assortment of subjects intended for students with previous training in Indo-European linguistics: problems in the reconstruction of Proto Indo-European, topics in the historical grammars of the various IE languages, reading and historical linguistic analysis of texts, and grammatical sketches of "minor" IE languages.

ITALIAN

ITALA 403 Linguistic Structure of Italian

Fall. 4 credits. Prerequisites: Linguistics 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 1997-98. C. Rosen.
Survey of Italian syntax, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modal clitics, reflexive constructions, agreement, impersonal constructions, causatives.

ITALA 404 History of the Italian Language #

Spring. 4 credits. Prerequisites: Linguistics 321 and either Italian 201, 203, or equivalent. Offered alternate years. C. Rosen.
Overview of Italian and its dialects from the earliest texts to the present day. Emergence of the standard language. External history and sociolinguistic circumstances.

Japanese

LING 404 Linguistic Structure of Japanese (also Japanese 404) @

Fall. 4 credits. Prerequisites: Japanese 102 or permission of instructor and Linguistics 101 or equivalent introductory course in linguistics. Offered alternate years. J. Whitman.

Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

LING 411 History of the Japanese Language (also Japanese 410) @ #

Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. J. Whitman.
An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

Korean

LING 430 Structure of Korean

Spring. 4 credits. Offered alternate years. J. Whitman.
Intensive examination of the syntax and phonology of a non-Indo-European language with the objective of testing principles of current linguistic theory. No previous knowledge of Korean required.

Latin and Italian

LING 610 Latin Comparative Grammar (also Classics 422)

The prehistory and evolution of the sounds and forms of classical Latin as reconstructed by comparison with the other Indo-European languages.

LING 612 Italic Dialects (also Classics 424) @

4 credits. Not offered 1997-98.
A. Nussbaum.
The phonology and morphology of Faliscan, Oscan, and Umbrian studied through the reading of epigraphical texts. Attention to the relations of these languages to Latin and the question of proto-Italic.

LING 614 Archaic Latin (also Classics 426) @

Reading of epigraphic and literary preclassical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy, the rudiments of Latin historical grammar, and aspects of the development of the literary language.

Russian and Slavic

LING 417-418 History of the Russian Language (also Russian 401-402) @ #

417, spring, 418. 4 credits each term.
Prerequisites: for Ling 417, permission of instructor; for Ling 418, Ling 417 or equivalent. Offered alternate years. Ling 418 not offered 1997-98. W. Browne.
Phonological, morphological, and syntactic developments from Old Russian to modern Russian.

LING 443-444 Linguistic Structure of Russian (also Russian 403-404)

443, fall; 444, spring. 4 credits each term.
Prerequisites: for Linguistics 443, Linguistics 101 and permission of instructor; for Linguistics 444, Linguistics 443 or equivalent. Offered alternate years. Ling 444 not offered 1997-98. W. Browne.
A synchronic analysis of the structure of modern Russian. Linguistics 443 deals primarily with morphology and its relation to syntax and 444 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.

LING 671-672 Comparative Slavic Linguistics (also Russian 651-652)

671, fall; 672, spring. 4 credits each term.
Prerequisites: for Linguistics 671, Russian 601 taken previously or simultaneously or permission of instructor; for Linguistics 672, Linguistics 671 or permission of instructor. Offered alternate years. Not offered 1997-98. W. Browne.
Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.

RUSSA 601 Old Church Slavic

Fall. 4 credits. This course is prerequisite to Russian 602. Offered alternate years. W. Browne.
Grammar and reading of basic texts.

RUSSA 602 Old Russian Texts

Spring. 4 credits. Prerequisite: Russian 601. Offered alternate years. W. Browne.
Grammatical analysis and close reading of Old Russian texts.
Topics chosen according to the interests of staff and students.

**Southeast Asian**

**KHMER 403-404** Structure of Khmer @ 403, fall; 404, spring. 4 credits each term. Prerequisite: Linguistics 101 or equivalent. G. Diffloth.

Introduction to the linguistic study of Khmer.

**LING 230** Introduction to Southeast Asian Languages and Linguistics @

Fall. 3–4 credits variable. For non-majors or majors. Not offered 1997–98. A. Cohn, J. Wolff.

This is a survey of the languages of Southeast Asia. The goal of this course is to expose students to Southeast Asia as a linguistic area and introduce them to the rich language diversity of the region. It includes three main parts: 1) sociolinguistic and ethnolinguistic issues of language and politics, language and culture, and language use; 2) language structures and typological patterns of the area's languages; 3) historical linguistics, genetic relations between languages, as well as the linguistic effects of language contact and linguistic evidence for prehistory.

**LING 653-654 Seminar in Southeast Asian Linguistics**

653, fall; 654, spring. 4 credits each term. Prerequisite: Linguistics 303 or permission of instructor. Linguistics 653 is not a prerequisite for 654. Not offered 1997–98. G. Diffloth.

Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.

**LING 655-656 Seminar in Austronesian Linguistics**

655, fall; 656, spring. 4 credits each term. Prerequisite: Linguistics 655. Linguistics 101 and permission of instructor; for Linguistics 656, Linguistics 655. J. Wolff.

Descriptive and comparative studies of Malayo-Polynesian languages.

**LING 657-658 Seminar in Austroasiatic Linguistics**

657, fall; 658, spring. 4 credits each term. Prerequisite: Linguistics 101, 110, or permission of instructor. G. Diffloth.

Descriptive and comparative studies of Austroasiatic languages.

**Spanish**

**The Major**

The major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in the linguistic analysis of Spanish. (For the major in Spanish literature see the description under Romance Studies.) Satisfactory completion of the major should enable students to meet language requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, or to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake pre-professional training for graduate study in law, medicine, business, etc. Students interested in a Spanish major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult the director of undergraduate studies for Spanish linguistics, Professor Margaret Sufer (218 Morrill Hall).

**The Core**

All majors will work out a plan of study in consultation with their advisers. Previous training and interests as well as vocational goals are taken into account when the student's program of courses is determined. Spanish 201 and 204 or 212 (or equivalent) are prerequisite to entering the major in Spanish. All majors normally include the following core courses in their programs:

1) Spanish 315–316–318
2) Spanish 311 and 312 (or equivalent)

Spanish majors have great flexibility in devising their programs of study and areas of concentration.

**The Linguistic Option**

Spanish linguistics, for which the program normally includes at least 20 credits, and at least 8 additional credits in general or Spanish linguistics (such as 306, 405, 407, 408, and others). (Linguistics 101 is recommended before entering this program.) The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

**Honors.** Honors in Spanish may be achieved by superior students who want to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty engaged in Spanish literature or linguistics to supervise their work and direct the writing of their honors essays (see Spanish 429–430).

**LING 366 Spanish in the United States (also Spanish 366 and Latino Studies Program 366)**

Fall. 4 credits. Prerequisite: some knowledge of Spanish. M. Sufer.

Examination of major Spanish dialects in the United States from a linguistic perspective. Contrast with the standard language. Borrowing, interference, and code switching. Syntactic, morphological, and phonological characteristics. Sex-related phenomena.

**LING 407 Applied Linguistics: Spanish (also Spanish 407)**

Spring. 4 credits. Prerequisite: proficiency in Spanish or permission of instructor. M. Sufer.

This course seeks to equip the advanced student or the future teacher of Spanish with insights into problem areas for foreign language learners with the aid of linguistic descriptions. The intent is to narrow the gap that is known to exist between the knowledge that a native speaker has and the incomplete one that a foreign language learner possesses.

**[SPAND 405 Hispanic Dialectology](#)**

**[SPAND 408 The Grammatical Structure of Spanish](#)**

Spring. 4 credits. Prerequisites: Linguistics 101 and proficiency in Spanish or permission of instructor. Offered alternate years. Not offered 1997–98. Survey of the salient morphological and syntactic characteristics of contemporary Spanish.

**[LING 655-656 Seminar in Austronesian Linguistics](#)**

Prerequisite: for Bengali 201, Bengali 122 or examination. D. Sudan.

The emphasis is on basic grammar, speaking, and comprehension skills; Bengali script will also be introduced.

**BENGALI 201-202 Intermediate Bengali**

Reading @

201, fall; 202, spring. 3 credits each term. Prerequisites: for Bengali 201, Bengali 122 or examination; for Bengali 202, Bengali 201 or examination. D. Sudan.

Continuing instruction in grammar with attention to speaking and reading skills.

**BENGALI 203-204 Intermediate Bengali Composition and Conversation @**

203, fall; 204, spring. 3 credits each term. Prerequisites: for Bengali 203, Bengali 122 or examination; for Bengali 204, Bengali 203 or examination. D. Sudan.

Continuing instruction in grammar with attention writing skills.
BENG 300 Directed Studies
Fall or spring. 1–4 credits variable.
Prerequisite: permission of instructor.
D. Sudan.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BENG 303-304 Bengali Literature I, II
303, fall; 304, spring. 4 credits each term.
Prerequisites: Bengali 203–204 or equivalent. D. Sudan.
An introduction to noted Bengali writers. Selections of works by Rabindranath Tagore and Abanindranath Tagore and short stories by Bonophul will be covered. The course will be devoted to reading these works and developing literary criticism and creative writing in Bengali.

BURM 301-302 Advanced Burmese
Taught on a specialized basis to address writing.

BURM 401-402 Burmese Directed Independent Study
401, fall; 402, spring. 2–4 credits variable each term.
Prerequisite: permission of instructor. S. Tun.
Various topics according to need.

Cambodian
See Khmer.

Chinese
For literature courses (conducted in English or Chinese) and Classical Chinese, see Asian Studies.

Chinese
For literature courses (conducted in English or Chinese) and Classical Chinese, see Asian Studies.

CHIN 101-102 Elementary Standard Chinese ('Mandarin')
101, fall; 102, spring. 6 credits each term.
Prerequisite: for Chinese 102, Chinese 101 or equivalent. Since each section is limited to 15–18 students, students missing the first two class meetings without a university excuse are dropped so others may register. No student will be added after the second week of classes. Satisfactory completion of Chinese 102 fulfills the qualification portion of the language requirement.

CHIN 111-112 Beginning Cantonese (Spoken)
111, fall; 112, spring. 3 credits each term.
Prerequisite: for Chinese 112, Chinese 111 or equivalent.

CHIN 113-114 Beginning Reading for Cantonese Speakers
113, fall; 114, spring. 3 credits each term.
Prerequisite: everyday conversational ability in Cantonese. Completion of 114 satisfies the qualification portion of the language requirement.

CHIN 201-202 Intermediate Standard Chinese ('Mandarin')
201, fall or summer; 202, spring or summer. 4 credits each term.
Prerequisites: for Chinese 201, Chinese 102 with a grade of C+ or above or equivalent; for Chinese 202, Chinese 201 or equivalent.

CHIN 209-210 Intermediate Reading and Writing (Standard Chinese)
209, fall; 210, spring. 4 credits each term.
Prerequisites: for Chinese 209, Chinese 110 or equivalent; Chinese 210, Chinese 209.

CHIN 215 Mandarin for Cantonese Speakers
Fall or spring. 3 credits each term.
Prerequisites: basic conversational Cantonese and Chinese 114 or the equivalent. Native or near-native Cantonese (speakers/readers) will be allowed in this course. Staff.

CHIN 300 Directed Studies
Fall or spring. 1–4 credits variable.
Prerequisite: permission of instructor.
S. Tun.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

CHIN 401-402 Advanced Chinese Reading
301, fall or spring; 302, fall or spring. 3 credits each term.
Prerequisites: for Burmese 301, Burmese 202 or permission of instructor; for Burmese 302, Burmese 301. S. Tun.
Continuing instruction in spoken and written Burmese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

CHIN 401-402 Advanced Chinese Reading
301, fall or spring; 302, fall or spring. 3 credits each term.
Prerequisites: for Burmese 301, Burmese 202 or permission of instructor; for Burmese 302, Burmese 301. S. Tun.
Continuing instruction in spoken and written Burmese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.
CHIN 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

CHIN 301–302 High Intermediate Chinese
301, fall; 302, spring. 4 credits each term. Prerequisites: for Chinese 301, Chinese 202 or equivalent; for Chinese 302, Chinese 301. Staff.
Continuing instruction in spoken Chinese and in various genres and styles of written Chinese.

CHIN 303–304 Advanced Mandarin Conversation @
303, fall; 304, spring. 1 credit each term. Prerequisite: Chinese 201–202 or equivalent or permission from instructor. S-U grades only. Not offered 1997–98. Staff. Conversation and reading practice for students who wish to maintain language skills. Guided conversation and oral composition and translation. Corrective pronunciation drills.

CHIN 411–412 Advanced Chinese: Fiction, Reportage, Current Events
411, fall; 412, spring. 4 credits each term. Prerequisites: for Chinese 411, Chinese 302 or equivalent; for Chinese 412, Chinese 411. Q. Teng. Reading, discussion, and composition at advanced levels.

CHIN 413–414 Advanced Chinese: Focus on Current Events
413, fall; 414, spring. 3 credits each term. Prerequisites: for Chinese 413, Chinese 412 or equivalent or permission of instructor, for Chinese 414, Chinese 413. S-U grades only. Not offered 1997–98. Reading and discussion, with a focus on current events. One of the goals of this course is to build reading confidence and speed. The content will partially be determined by student need and interest.

CHIN 425 Special Topics
Fall or spring, according to demand. 4 credits. Prerequisite: permission of instructor. S. Schaffzin. A number of different topics in advanced Chinese language, advertised the previous semester, will be offered under this title to accommodate the needs of advanced or specialized students, and take advantage of faculty interests. Topics include: correspondence and composition, excerpts from classical novels, Chinese documents, xiesheng comedy routines, etc. May be repeated for credit.

FALCON (Full-year Asian Language Concentration)
For full information, brochures, etc., see the FALCON secretary 413 Morrill Hall (e-mail: falcon@cornell.edu).

CHIN 160 Introductory Intensive Mandarin
Summer only. 8 credits. Completion of 160 fulfills the qualification portion of the language requirement. Staff. Introduction to spoken and written Mandarin. Lectures on linguistic and cultural matters, intensive practice with native speakers, and laboratory work. Students who complete this course with a grade of at least B are normally eligible to enroll in Chinese 201.

CHIN 161–162 Intensive Mandarin @
161, fall; 162, spring. 16 credits each term. Prerequisites: for Chinese 161, Chinese 160 or equivalent or permission of instructor; for Chinese 162, Chinese 161. S-U grades only. Not offered 1997–98. Staff. Conversation and reading practice for students who wish to maintain language skills. Guided conversation and oral composition and translation. Corrective pronunciation drills.

Czech
Fees. A small fee may be charged for photocopied texts for course work.

[CZECH 131–132 Elementary Czech
131, fall; 132, spring. 3 credits each term. Prerequisite: for Czech 132, Czech 131 or equivalent. This language series (131–132) cannot be used to satisfy the language requirement. Not offered 1997–98. Staff. Covers all language skills: speaking, listening comprehension, reading, and writing.

[CZECH 133–134 Continuing Czech
133, fall; 134, spring. 3 credits each term. Prerequisites: for Czech 133, Czech 132 or equivalent; for Czech 134, Czech 133. Satisfactory completion of Czech 134 fulfills the qualification portion of the language requirement. Not offered 1997–98. Staff. An intermediate conversation and reading course.

[CZECH 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Danish
Fees. A small fee may be charged for photocopied texts for course work.

[DANISH 131–132 Elementary Danish
131, fall; 132, spring. 3 credits each term. Prerequisite: for Danish 132, Danish 131 or equivalent. This language series cannot be used to satisfy the language requirement. Not offered 1997–98. Covers all language skills: speaking, listening comprehension, reading, and writing.

[DANISH 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Not offered 1997–98. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Dutch
Fees. A small fee may be charged for photocopied texts for course work.

DUTCH 121–122 Elementary Dutch
121, fall or summer; 122, spring or summer. 4 credits each term. Prerequisite: permission of instructor. M. Briggs. Intensive practice in listening, speaking, reading, and writing basic Dutch in meaningful contexts. The course also offers insight into Dutch language, culture, and society.

DUTCH 123 Continuing Dutch
Fall. 4 credits each term. Prerequisite: Dutch 122 or equivalent. Satisfactory completion of Dutch 123 fulfills the qualification portion of the language requirement. M. Briggs. Improves speaking skills such as fluency and pronunciation, focusing on verbal communication skills; offering a wide range of readings and sharpening listening skills based on Dutch and Dutch-speaking cultures.

DUTCH 203 Intermediate Composition and Conversation
Spring. 3 credits. Prerequisite: Qualification in Dutch or permission of instructor. M. Briggs. Improved control of Dutch grammatical structures and vocabulary through guided conversation, compositions and reading, drawing on all Dutch-speaking cultures.

DUTCH 204 Intermediate Composition and Conversation
Fall. 3 credits. Prerequisite: Dutch 203 or permission of instructor. M. Briggs. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

English
See Intensive English Program.

English for Academic Purposes
Fees. A small fee may be charged for photocopied texts for course work.

ENGLF 205 English as a Second Language
Fall or spring. 4 credits. Prerequisite: placement by examination. S. Schaffzin. An all-skills course emphasizing listening and speaking, with some writing practice. Students also meet individually with the instructor.

ENGLF 206 English as a Second Language
Spring. 3 credits. Prerequisite: ENGLF 205 or placement by examination. S. Schaffzin. Designed for those who have completed ENGLF 205 and who need further practice, particularly in writing. Individual conferences are also included.

ENGLF 209 English as a Second Language
Fall or spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin. Practice in classroom speaking and in informal conversational English techniques for gaining information. Students also practice giving informal presentations. Individual conferences with the instructor supplement class work.
ENGL 210  English as a Second Language
Spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in academic speaking. Formal classroom discussion techniques and presentation of information in various forms. Individual conferences supplement class work.

ENGL 211  English as a Second Language
Fall, spring, or summer. 3 credits.
Prerequisite: placement by examination. D. Campbell.

Academic writing with emphasis on improving organization, grammar, vocabulary, and style through the writing and revision of short papers relevant to students' fields. Frequent individual conferences supplement class work.

ENGL 212  English as a Second Language
Spring. 3 credits. Prerequisite: permission of instructor. Enrollment will be restricted to the first five days of classes on a first-come, first-served basis. Must have signature of instructor before enrolling.

Classes begin the second week of the semester. D. Campbell.

Research paper writing. For the major writing assignment of this course, the students must have a real project that is required for the graduate work. This can be a thesis proposal; a pre-thesis; part of a thesis, such as the literature review or discussion section; a paper for another course or a series of shorter papers (with permission of the other instructor); or a paper for publication. Time limitations make it difficult to deal with work over 20 pages in length. Course work involves practice in paraphrase, summary, the production of cohesive, coherent prose, vocabulary use, and grammatical structure. Frequent individual conferences are a necessary part of the course. Separate sections for Social Sciences/Humanities and for Science/Technology.

ENGL 213  Written English for Non-Native Speakers
Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

Designed for those whose writing fluency is sufficient for them to carry on regular academic work but who want to refine and develop their ability to express themselves clearly and effectively. Individual conferences supplement class work.

Freshman Writing Seminar

ENGL 215-216  English for Later Bilinguals
For description, see freshman writing seminar brochure.

French
For information on language placement and transfer credit, contact C. Waldron (403 Morrill Hall, 255-0702). For literature and advanced language courses see Romance Studies. For information on the literature and area studies tracks of the French major, see Romance Studies. For the linguistics track, see French under Linguistics of Particular Languages.

Study Abroad in France
French majors or other interested students may study in France for one or two semesters during their junior year. Offering for one of several study-abroad plans recognized by the Departments of Romance Studies and Modern Languages facilitates the transfer of credit. Information about these plans is available from Professor Jacques Béreaut, director of undergraduate studies, Department of Romance Studies. (For a description of the Study Abroad programs in Paris and in Geneva, see the listing under the Department of Romance Studies.)

Fees. Depending on the course, a small fee may be charged for photocopied texts for course work.

FRDML 101  Basic Course I
Summer only. 6 credits. M. J. Highfield and staff.

An introductory course offering opportunities for student interaction and intensive practice in listening to, speaking, reading, and writing basic French in meaningful contexts. Students who have previously studied French must take the language placement test (LPF) or receive permission from the instructor before registering for this course. French 101 is the equivalent of 2 semesters of elementary French.

[FRDML 103-104  Intensive Elementary French]
103, fall; 104, spring. 6 credits each semester. Prerequisite: 103, none; students with previous study of French may enter only with instructor's permission. 104. FRDML 121, 103, placement score between 37 and 44, or equivalent, by permission of instructor. Students completing only 103 and 104 will have achieved qualification in French; placement in subsequent French courses will be by examination. Not offered 1997-98.
N. Gabriel.

While complete a core curriculum equivalent to that of 121-122, this course offers additional materials, presentations, activities and individualized intensive practice. It is intended to facilitate students' acquisition of active language skills as well as to offer insight into learning processes and into French language, culture, and society. In particular, there will be opportunities for students to choose to focus more intensively on certain skills than on others and to vary the pace of their language study.

FRDML 121  Elementary French
Fall or spring. 4 credits. Spring enrollment limited. No prerequisites. Students who have studied French before must take the language placement test (LPF).

Intended for beginning students or those placed by examination. Small classes provide the opportunity for student interaction and intensive practice in listening to, speaking, reading, and writing basic French in meaningful contexts, which offer insights into French language, culture, and society.

FRDML 122  Elementary French
Fall or spring. 4 credits. Prerequisite: French 121, LPF score 37-44, or SAT II 370-480. Students who receive an LPF score of 56 after French 122 attain qualification and may enter the 200-level sequence; otherwise, satisfactory completion of French 123 is required for qualification. Staff.

The goal of French 122 is to build on the students' elementary knowledge of French so that they can function in basic situations in a French-speaking culture. Courses offer intensive, context-specific practice in speaking, listening, reading, and writing.

FRDML 123  Continuing French
Fall, spring, or summer. 4 credits. Limited to students who have previously studied French and have an LPF score 45-55 or SAT II 490-500. Satisfactory completion of French 123 fulfills the qualification portion of the language requirement. Staff.

French 123 is an all-skills course designed to improve pronunciation, oral communication, and reading ability; to establish a groundwork for correct writing; and to provide a substantial grammar review. The approach in the course encourages the student to see the language within the context of its culture.

FRDML 200  Intermediate Reading and Writing
Fall or spring. 3 credits. Prerequisite: qualification in French (French 123, LPF score 50-64, or SAT II 600-680). Satisfactory completion of French 200 fulfills the proficiency portion of the language requirement. C. Sparfel.

Study of the language in different text types, prose and poetry, articles on current events, and a contemporary novel. Discussion of texts with emphasis on vocabulary development, grammar review and expansion, and appreciation of stylistic levels and cultural differences. Students have the opportunity to select reading material and work on their areas of interest.

FRDML 203  Intermediate Composition and Conversation I
Fall, spring, or summer. 3 credits. Prerequisite: qualification in French (French 123, LPF score 50-64, or SAT II 600-680). Satisfactory completion of French 203 fulfills the proficiency portion of the language requirement. Staff.

Readings, conversation, composition; various other activities based on films, videos, and newspaper articles. The course gives students the opportunity to expand their language skills and to strengthen their knowledge of grammar for better control.

FRDML 205  Intermediate French: le français multicolore
Fall. 3 credits. Prerequisite: qualification in French (French 123, LPF score 50-64, or SAT II 600-680). Satisfactory completion of French 205 fulfills the proficiency portion of the language requirement and can be used to satisfy the breadth requirement in French.

Opportunities to strengthen and expand active language skills within the context of the wider French-speaking world. Contemporary readings, video and audio materials, and people from francophone countries of Europe, Africa, and the Americas will provide bases for individual and group projects. Taught in French.
Study Abroad
All students planning to study abroad apply through Cornell Abroad; please see the Cornell Abroad program description in the introductory section of the Courses of Study. Interested students should contact Bonnie Buettner (German Stds) or Gunhild Lischke (Department of Modern Languages) as early as possible.

Fees
Depending on the course, a small fee may be charged for photocopied texts for course work.

GERLA 121 Elementary German I
Fall or spring. 4 credits. Intended for students with no prior experience in German or with a language placement test (LPG) score below 37, or an SAT II score below 370. Staff. Elementary German I is designed to familiarize students with basic vocabulary and structures so they can communicate about everyday life. Videos and audio tapes facilitate listening comprehension and insight into German culture. Daily practice in small classes provides the opportunity to learn vocabulary and structures.

GERLA 122 Elementary German II
Fall or spring. 4 credits. Prerequisite: GERLA 121, LPG score 37-44, or SAT II score 370-450. Students who obtain an LPG score of 56 or above after German 122 attain qualification and may enter a 200-level course, otherwise, successful completion of German 123 is required for qualification. D. McGraw and staff. Elementary German II, the second semester of elementary German, presupposes that students have not yet learned narrative past, subjunctive, passive or dependent word order. Topics include travel, free time, work and the work environment, Germany's role within the European Union, the dual education system, German news broadcasts, reading German newspapers on the www, and projects on current events, videos, and group projects. Topics include: awareness of culture, dependence of meaning on perspective, interviews with native speakers, and social changes in Germany. This course replaces GERLA 203 and GERST 201.

GERLA 123 Continuing German
Fall or spring. 4 credits. Limited to students who have previously studied German and have an LPG score 45-55 or SAT II 460-570. Satisfactory completion of German 123 fulfills the language qualification requirement. G. Valk and staff. German 123 is a course on the beginning intermediate level. Students will further develop their language proficiency by communicating about broadly cultural topics and themes. To provide each student with a maximum opportunity for speaking in German and getting as much help and feedback as possible, much of the work in class will be done in pairs and/or small groups.

GERLA 200 Contemporary German (also GERST 200)
Spring. 3 credits. Prerequisite: qualification in German (LPG score of 56-64 or SAT II score of 580-670 or GERLA 123). Successful completion of German 200 fulfills the Arts and Science language proficiency requirement and can be used in partial fulfillment of the Arts and Sciences humanities distribution requirement. G. Lischke and staff.

An intermediate language course designed to provide an introduction to modern German culture and literature while students develop language proficiency. Students will examine issues that shape German society, literature and thought as reflected in short stories, poems, socio-cultural and political texts, video and audio materials. Selected themes include: “Beyond the Wall: German Unification,” “Germany: a Multi-cultural Society?” “Speaking and Identity,” emphasize accurate and idiomatic expression. Successful completion of the course enables students to continue with more advanced courses in language, literature, and culture. This course replaces GERLA 203 and GERST 201.

GERLA 203 Intermediate Conversation and Composition
Fall or spring. 3 credits. Prerequisite: qualification in German (German 123 or an LPG score 56-64, or SAT II score between 580-670). Successful completion of German 203 fulfills the language proficiency requirement. D. Hobbs and staff. Conversation; review of selected points of grammar; composition, reading of literary and non-literary texts; discussion of current events and films, participation in group projects and presentations. Emphasis is on development of accurate and idiomatic expression. The topics of the course include: the fall of the Berlin wall and the unification of Germany, multicultural life, and social changes in Germany. This course will be replaced by GERLA/German 200 in spring 1998.

GERLA 204 Intermediate Conversation and Composition
Fall or spring. 3 credits. Prerequisite: German 203 or Gerst 201, or German/GERST 200, or placement by examination (placement score and CASE). G. Lischke. Emphasis on improving oral and written expression of idiomatic German. Enrichment of vocabulary and appropriate use of language in different conversational contexts and written genres. Material consists of readings in contemporary prose, articles on current events, videos, and group projects. Topics include: awareness of culture, dependence of meaning on perspective, interviews with native speakers, and social changes in Germany. This course replaces GERST 200.

GERST 205-206 Business German
205: Fall, 206: spring. 3 credits. Prerequisite: qualification in German (German 123) or an LPG score of 56-64 or an SAT II score between 580-670. Successful completion of German 203 fulfills the language proficiency requirement. G. Lischke.

Learn German and understand German business culture at the same time. This course examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants will learn about the business culture in Germany and how to behave in a work environment, Germany's role within the European Union, the dual education system, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage and a Business German textbook.
GERLA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

GERLA 303 Advanced Conversation and Composition
Fall or spring. 4 credits. Prerequisite for German 303: German 204, GERST 202, GERST 220, or placement by examination (CASE). G. Valk, G. Lischke. Further enrichment of vocabulary and emphasis on improving students' oral and written style. Study of the language of different text types, including journalistic and literary texts. Discussion of current events provides insight into the historical, political and social-issues of German-speaking countries. Individual and group projects provide an opportunity for each student to pursue his/her field of interest and share it with the class.

GERLA 304 Advanced Conversation and Composition
Spring. 4 credits. Prerequisite: German 303 or placement by examination (CASE). G. Valk. Students in this course, already quite fluent in German, will have the opportunity to refine and improve both written and spoken language. Reading materials consist of two contemporary novels, articles from DER SPIEGEL and DIE ZEIT. German 304 provides students with an up-to-date picture of Germany, with a special emphasis on both East and West and the ongoing process of unification.

GERLA 306 Zeltungseutsch
Fall. 4 credits. Prerequisite: German 304 or equivalent. G. Lischke. Analysis of various German daily and weekly newspapers, magazines and German TV with special emphasis on stylistic differences in journalism; discussion of current events. Students have the opportunity to research material for class presentation, lead discussions and share their interests/special fields with the group.

GERLA 631-632 Academic German I and II
631, fall; 632, spring. 3 credits each term. Limited to graduate students. Prerequisite: for German 632, German 631 or equivalent. D. Hobbs. Intended primarily for beginners with little or no previous German knowledge. Emphasis in 631 on acquiring basic German reading skills. Emphasis in 632 on development of the specialized vocabulary of student's field of study.

Modern Greek
See listings under Classics.

Modern Hebrew
See listings under Near Eastern Studies.

Hindi
Fees. A small fee may be charged for photocopied texts for course work.

Hindi 101-102 Elementary Hindi-Urdu
101, fall; 102, spring. 6 credits each term. Prerequisite: for Hindi 102, Hindi 101 or equivalent. C. Fairbanks. A semi-intensive course for students without prior experience in Hindi-Urdu or a closely related language. A thorough grounding is given in all language skills: listening, speaking, reading, and writing. Students who have had exposure to Hindi-Urdu or a closely related language in the home or otherwise should generally take Hindi 109-110. Check with instructor regarding placement.

Hindi 109-110 Accelerated Elementary Hindi-Urdu
109, fall; 110, spring. 3 credits each term. Prerequisite for Hindi 110: Hindi 109 or equivalent. C. Fairbanks. An entry-level sequence for students with some prior exposure to Hindi-Urdu or a closely related language. This course sequence will provide a thorough grounding in all the language skills: listening, speaking, reading, and writing. Completion of this sequence, including satisfactory performance on an examination given at the end of Hindi 110, will constitute a level of performance equal to that of the 101-102 sequence, and will thus be considered to fulfill qualification for the language requirement plus eligibility for 200-level Hindi-Urdu courses. Check with instructor regarding placement.

Hindi 201-202 Intermediate Hindi Reading @
201, fall, 202, spring. 3 credits each term. Prerequisites: for Hindi 201, Hindi 102; for Hindi 202, Hindi 201 or permission of instructor. Not offered 1997-98. C. Fairbanks.

Hindi 203-204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Hindi 203, Hindi 102; for Hindi 204, Hindi 203 or permission of instructors. C. Fairbanks. Throughout this course sequence all aspects of language learning are practiced: listening, speaking, reading, and writing. In 203, video materials are used and the emphasis is on the conversational aspect of the language. In 204, the focus shifts to reading skills and the main text used is a popular novel.

Hindi 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. C. Fairbanks. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Hindi 301-302 Advanced Readings in Hindi Literature @
301, fall; 302, spring. 4 credits each term. Prerequisites: for Hindi 301, Hindi 202; for Hindi 302, Hindi 301 or equivalent. Not offered 1997-98. C. Fairbanks. Selected readings in modern Hindi literature.

Hindi 303-304 Advanced Composition and Conversation @
303, fall; 304, spring. 4 credits each term. Prerequisites: for Hindi 303, Hindi 204 or equivalent; for Hindi 304, Hindi 303 or equivalent. C. Fairbanks.

Hindi 305-306 Advanced Hindi Readings @
305, fall; 306, spring. 4 credits each term. Prerequisites: for Hindi 305, Hindi 202 or equivalent; for Hindi 306, Hindi 305 or equivalent. Not offered 1997-98. Intended for those who wish to do readings in history, government, economics, etc., instead of literature.

Hungarian
Fees. A small fee may be charged for photocopied texts for course work.

HUNGR 131-132 Elementary Hungarian
131, fall; 132, spring. 3 credits each term. This language series cannot be used to satisfy the language requirement. Not offered 1997-98. Intended for beginners or students with limited knowledge of the language.

HUNGR 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Indonesian
For students who have completed Indonesian 121–122 or its equivalent there is the option of a one-semester program in Malang, East Java, during the junior year. The program combines a variety of cultural and artistic options with area course work and advanced language study. Complete information is available through Cornell Abroad.

Students who have completed a minimum of 18 credits or the equivalent are eligible to apply for a summer program in the Advanced Indonesian Abroad Program. Further information is available from Professor John Wolff (307 Morrill Hall, 255-0733).

Fees. A small fee may be charged for photocopied texts for course work.

INDO 121-122 Elementary Indonesian
121, fall; 122, spring. 4 credits each term. Prerequisite: for Indonesian 122, Indonesian 121. J. Wolff and staff. A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

INDO 123 Continuing Indonesian
Fall. 4 credits. Prerequisite: Indonesian 122 or equivalent. Satisfactory completion of Indonesian 123 fulfills the qualification portion of the language requirement. J. Wolff and staff. Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings and sharpens listening skills.

INDO 203-204 Intermediate Composition and Conversation
203, fall; 204, spring. 3 credits each term. Prerequisites: for Indonesian 203, Indonesian 123; for Indonesian 204, Indonesian 203 or permission of instructor. J. Wolff and staff.
INDO 205-206 Intermediate Indonesian
205, fall, 206, spring. 3 credits each term. Prerequisites: for Indonesian 205, Indonesian 120 or equivalent; for Indonesian 206: Indonesian 205 or equivalent. Satisfactory completion of Indonesian 205 fulfills the proficiency portion of the language requirement. J. Wolff and staff.

This course develops all four skills: reading, writing, speaking, and comprehension.

INDO 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. J. Wolff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

[INDO 301-302 Advanced Readings in Indonesian and Malay]
301, fall; 302, spring. 4 credits each term. Prerequisites: for Indonesian 301, Indonesian 205-206 or equivalent; for Indonesian 302, Indonesian 301. Not offered 1997-98. J. Wolff and staff.

[INDO 303-304 Advanced Indonesian Conversation and Composition]
303, fall; 304, spring. 4 credits each term. Prerequisites: for Indonesian 303, Indonesian 206; for Indonesian 304, Indonesian 303 or equivalent. Not offered 1997-98. J. Wolff and staff.

[INDO 305-306 Directed Individual Study]
305, fall; 306, spring 2-4 credits.
Prerequisites: Indonesian 301-302 and 303-304 or equivalent knowledge of Indonesian or Malay. J. Wolff.

A practical language course on an advanced level in which the students will read materials in their own field of interest, write reports, and meet with the instructor for two hours a week for two credits and twice a week for four credits.

[INDO 401-402 Advanced Readings in Indonesian and Malay Literature]
401, fall; 402, spring. 4 credits each term. Prerequisites: for Indonesian 401, Indonesian 302 or equivalent; for Indonesian 402, Indonesian 401 or equivalent. Not offered 1997-98. J. Wolff and staff.

FALCON (Full-year Asian Language Concentration)

INDO 161-162 Intensive Indonesian
161, fall; 162, spring. 16 credits each term. Prerequisite: permission of instructor. J. Wolff and staff.

Italian
For literature courses see Romance Studies. The Italian Major. Study Abroad in Italy. Italian majors may study in Italy, generally during their junior year, under any of those study-abroad plans organized by American universities that allow the transfer of grades and credit, such as the Cornell program in Rome. The College of Architecture, Art, and Planning maintains a program open to all qualified students attending Cornell. The program is housed in the sixteenth-century Palazzo Massimo, designed by the architect Baldassare Peruzzi, on the Corso Vittorio Emanuele in the heart of Rome. Students may enroll for a semester in the fall or spring. Courses regularly taught at the Palazzo Massimo include: Architecture 300, 401, 402, 500, 502, Design Studio; Architecture 336 and 399, Special Topics in Architectural History; Architecture 458, Special Projects in Design Communications; Architecture 367, Contemporary Italian Culture; Architecture 510, Thesis Introduction; Art 251, 311, 322, and 571; and History of Art 371, Renaissance and Baroque Art in Rome; Italian 111, 112, Elementary Italian 111 and 112 correspond to Cornell courses 121 and 122 respectively (see below). Students having passed 111 in Rome will be admitted to 122 when they get back to Cornell. Students having passed 112 in Rome will be granted credit but must take the language placement test (LPI) for satisfaction of the language requirement and for placement into more advanced courses upon their return to Cornell. Italian classes in Rome are also being organized. To be eligible, students must have completed the first two years of their curriculum requirements and be in good academic standing.

Fees. Depending on the course, a small fee may be charged for photocopied texts for course work.

ITALA 101 Basic Course I
Summer only. 6 credits.
A thorough grounding in all basic language skills. Students who have previously studied Italian must take the placement examination before registering for this course.

ITALA 121-122 Elementary Italian
121, fall; 122, spring. 4 credits each term. Prerequisite: for Italian 122, Italian 121 or equivalent. Intended for beginners or students placed by examination. At the end of Italian 122, students who score 56 or higher on the LPI attain qualification and may enter the 200-level sequence; otherwise Italian 123 is required for qualification. K. Bättig, C. Rosen.

A thorough grounding in all the language skills: listening, speaking, reading, and writing. Language practice is in small groups. Lectures cover grammar and cultural information.

ITALA 123 Continuing Italian
Fall, spring, or summer. 4 credits. Limited to students who have previously studied Italian and have an LPI score of 45-55 or SAT II 460-580. Satisfactory completion of Italian 123 fulfills the qualification portion of the language requirement. Staff. Italian 123 is an all-skills course designed to improve speaking and reading ability, to establish a groundwork for correct writing, and to provide a substantial grammar review.

ITALA 203-204 Intermediate Composition and Conversation
203, fall or spring; 204, fall or spring. 3 credits each term. Prerequisites: for Italian 203, qualification in Italian; for Italian 204, 203 or equivalent. P. Swenson. Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

ITALA 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

ITALA 313 Advanced Italian: Language and Social Issues
Spring. 3 credits. Prerequisite: Italian 204 or equivalent or permission of instructor. Italian 313 is not prerequisite to Italian 314 and may be taken after Italian 314. P. Swenson.

Further development of all skills. Readings and discussions center on two themes: (1) contemporary Italian life and (2) the Italian language, its origins, evolution, and present state, including the role of the dialects. Emphasis on vocabulary building and awareness of stylistic levels.

ITALA 314 Advanced Italian: Language and Social Issues
Fall. 3 credits. Prerequisite: Italian 204 or equivalent. Italian 313 is not prerequisite to Italian 314 and may be taken after Italian 314. S. Stewart.

Further development of all skills, with emphasis on self-expression. Content: evolution and crisis in Italian politics, values, and national identity against the background of European unification. Social movements, issues, and attitudes, especially as reflected in the mass media.

ITALA 631 Readings in Italian Opera Libretti
Spring. 2 credits. For graduate students only. Prerequisite: permission of instructor. Offered concurrently with appropriate seminars in the Department of Music. Not offered 1997-98.

Japanese
For literature courses see Asian Studies. Fees. A small fee may be charged for photocopied texts for course work.

JAPAN 101-102 Elementary Japanese
101, fall; 102, spring. 6 credits each term. Prerequisite for Japanese 102: Japanese 101 or placement by the instructor during registration. Intended for beginners or for those who have been placed in the course by examination. Staff.

A thorough grounding is given in all the language skills at beginning level: listening, speaking, reading, and writing.

JAPAN 122 Accelerated Introductory Japanese
Fall. 6 credits. Prerequisite: placement by the instructor at beginning of semester. Not offered 1997-98. Staff.
already acquired a limited facility in Japanese through residence in Japan or brief formal study, but who require additional training to qualify for admission to Japanese 102. Attend Japanese 101 lectures. Offered if enrollment is sufficient.

**JAPAN 141-142 Beginning Japanese at a Moderate Pace**
141, fall; 142, spring. 4 credits each term. Y. Shirai and staff.

Beginning-level training in listening, speaking, and basic reading and writing. This series of ‘Moderate Pace’ courses provides an alternate choice for students who find it difficult to schedule the more intensive 101-102 sequence into their schedules. Can be followed by the 241-242, 543-544 and 545-546 sequences. All students planning to study abroad apply through Cornell Abroad; please see the Cornell Abroad program description in the introductory section of the Courses of Study.

**JAPAN 201-202 Intermediate Japanese Reading I & II**
201, fall; 202, spring. 2 or 3 credits each term. Prerequisites: for Japanese 201, Japanese 102 or placement by the instructor during registration; for Japanese 202, Japanese 201 and 203 or placement by the instructor during registration. Staff.

Reading of elementary texts emphasizing practical materials, with development of writing skills.

**JAPAN 203-204 Intermediate Japanese Conversation**
203, fall and summer; 204, spring and summer. 4 credits each term. Prerequisites: for Japanese 203, Japanese 102 or placement by the instructor during registration; for Japanese 204, Japanese 203 or placement by the instructor during registration. Staff.

Training in listening and speaking for students who have acquired basic oral proficiency. Students are strongly encouraged to enroll in Japanese 201-202 concurrently.

**JAPAN 241-242 Intermediate Japanese at a Moderate Pace**
241, fall; 242, spring. 4 credits each term. Prerequisites: for Japanese 241, Japanese 160 or placement by instructor during registration; for Japanese 242, Japanese 241 or placement by instructor during registration period. Y. Nakashishi-Whitman.

Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command. Provides an alternate choice for students who find it difficult to schedule the more intensive Japanese 201/203 and 202/204 into their schedules: MBA students, engineering students, hotel school students, arts college students, and others. Also highly recommended for those with prior background in the language who are weak in the more complex and difficult grammar patterns. Students planning to major in Japanese studies should take 101–102, not 141–142.

**JAPAN 401–402 Advanced Japanese Reading**
401, fall; 402, spring. 4 credits each term. Prerequisite: Japanese 302 or permission of instructor.

**Section I: Area of Humanities.** Cannot be used for distribution. K. Selden. Reading of selected modern texts with emphasis on expository style.

**Section II: Area of Economics and Social Science.** Cannot be used for distribution. Y. Kawasaki. Reading of selected modern texts with emphasis on expository style.

**JAPAN 407-408 Oral Narration and Public Speaking**
407, fall; 408, spring. 2 credits each term. Prerequisites: for Japanese 407, Japanese 304 or placement by the instructor during registration; for Japanese 408, Japanese 407 or placement by the instructor during registration. N. Nakada.

Instruction in making and delivering socially appropriate and effective speeches, with emphasis on both the construction of discourse and Japanese patterns of oral delivery.

**JAPAN 421-422 Directed Readings**
421, fall; 422, spring. Credit to be arranged. Limited to advanced students. Prerequisite: placement by the instructor during registration. K. Selden.

Topics are selected on the basis of student needs.

**JAPAN 543-544 Intermediate Japanese for Business Students**
543, fall; 544, spring. 4 credits each term. Prerequisites: for Japanese 543, Japanese 160, 102, and permission of instructor or placement by instructors during registration period; for Japanese 544, Japanese 543, 102, or placement by instructors during registration. Y. Nakashishi-Whitman.

Training in listening, speaking, reading, and writing for students who find it difficult to acquire a basic oral proficiency. Course times are arranged to accommodate those in the MBA program, but the material is oriented toward any student. Particularly suited to students who find it difficult to schedule the more intensive 201-203 or 202-204 courses into their schedules.

**JAPAN 545-546 Advanced Japanese for Business School Students**
545, fall; 546, spring. 4 credits each term. Prerequisites: for Japanese 545, Japanese 544 or placement by instructors during registration period; for Japanese 546, Japanese 545 or placement by instructors during registration period. Not offered 1997–98. Staff.

Training in listening and speaking at an accelerated pace; continued work on reading and writing at intermediate level. Course times are arranged to accommodate those in the MBA program, but the material is oriented toward any student. Particularly suited to students who find it difficult to schedule the more intensive 201-203 or 202-204 courses into their schedules.

**FALCON (Full-year Asian Language CONcentration)**
R. Suke, 412 Morrill Hall, FALCON secretary, 413 Morrill Hall

**JAPAN 160 Introductory Intensive Japanese**
Summer only. 8 credits. R. Suke and staff.

This is the first term of the Japanese FALCON Program. It is a full-time, nine-week course; the degree of intensity does not allow students to take other courses simultaneously. Formal application must be made to the program, but admission is open to all students, not just those students intending to take the fall and spring terms of FALCON. The course is an introduction to Japanese from absolute beginning level, in speaking as well as in reading and writing. There are three small interactive classes per day conducted entirely in Japanese and one lecture in English and Japanese. Two hours during the day are required language labs. Additional preparation time in the language lab is necessary in the evenings. Students completing this course can move smoothly in the academic year into Japanese 241-242 or 543-544. These can be taken the following year by Japanese 341-342 or Japanese 545-546, respectively.

**JAPAN 161-162 Intensive Japanese (FALCON)**
161, fall; 162, spring. 16 credits each term. Prerequisites: for Japanese 161, Japanese 160 or Japanese 102 at Cornell, or placement prior to beginning of fall term by FALCON staff; for Japanese 162, Japanese 161, or placement prior to beginning of spring term by FALCON program. Students must apply formally to the program (applications available from FALCON secretary, 413 Morrill Hall). Admission is open to graduate and undergraduate students from Cornell or from elsewhere, provided the applicant...
has the necessary prerequisites or is able to place into this level. Work on spoken and written Japanese from intermediate into advanced level. This is a full-time program and a full academic load; the demands of the program do not normally permit students simultaneously to take other courses. With the sequence 150–161–162 a student can, in one calendar year complete as much Japanese as would be in three or more years of part-time study in many academic programs. This course also serves to fulfill the language requirement for the MA in Asian Studies and the joint MBA/MA in Asian Studies.

**Javanese**

Fees. A small fee may be charged for photocopied texts for course work.

**JAVA 131-132 Elementary Javanese**

101, fall; 102, spring. 3 credits each term. Prerequisite: for Javanese 132, Javanese 131 or equivalent. This language series (131–132) cannot be used to satisfy the language requirement. J. Wolff and staff.

An elementary language course for those who have had no previous experience in the language.

**JAVA 133-134 Continuing Javanese**

133, fall; 134, spring. 3 credits each term. Prerequisites: for Javanese 133, Javanese 132 or equivalent; for Javanese 134, Javanese 133 or equivalent. Satisfactory completion of Javanese 134 fulfills the qualification portion of the language requirement. J. Wolff and staff.

An intermediate conversation and reading course.

**JAVA 203-204 Directed Individual Study**

203, fall; 204, spring. 3 credits. Prerequisite: Javanese 134 or equivalent. J. Wolff and staff.

This is a practical language course on an intermediate level in which the students will work through readings and conversations under the guidance of a native speaker for three contact hours a week.

**JAVA 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. J. Wolff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**Khmer (Cambodian)**

Fees. A small fee may be charged for photocopied texts for course work.

**KHMER 101-102 Elementary Khmer**

101, fall; 102, spring. 6 credits each term. Prerequisite: for Khmer 102, Khmer 101 or equivalent. Staff.

A course for beginners or for those who have been placed in the course by examination. The course gives a thorough grounding in speaking and reading.

**KHMER 201-202 Intermediate Khmer Reading**

201, fall; 202, spring. 3 credits each term. Prerequisites: for Khmer 201, Khmer 102; for Khmer 202, Khmer 201. Staff.

Continuing instruction in spoken and written Khmer.

**KHMER 203-204 Intermediate Composition and Conversation @**

203, fall; 204, spring. 3 credits each term. Prerequisites: for Khmer 203, Khmer 102; for Khmer 204, Khmer 203. Staff.

Letter writing and other forms of composition.

**KHMER 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**KHMER 301-302 Advanced Khmer @**

301, fall; 302, spring. 4 credits each term. Prerequisites: for Khmer 301, Khmer 202 or equivalent; for Khmer 302, Khmer 301. Staff.

Continuing instruction in spoken and written Khmer; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

**KHMER 401-402 Directed Individual Study**

401, fall; 402, spring. For advanced students. 2–4 credits each term. Prerequisite: permission of instructor. Staff.

Various topics according to need.

**Korean**

Fees. A small fee may be charged for photocopied texts for course work.

**KOREA 101-102 Elementary Korean**

101, fall; 102, spring. 6 credits each term. Satisfactory completion of Korean 102 fulfills the qualification portion of the language requirement. H. Diffloth and staff.

Covers the basics of speaking, reading, and writing. Introduces Hangul writing system and grammar.

**KOREA 109-110 Elementary Reading**

109, fall; 110, spring. 3 credits each term. Prerequisite: permission of instructor. Satisfactory completion of Korean 110 fulfills the qualification portion of the language requirement. H. Diffloth and staff.

This course is for students who have spoken some Korean in the home, but whose reading and writing skills are limited or nonexistent. If in doubt about eligibility, see instructor.

**KOREA 201-202 Intermediate Korean @**

201, fall; 202, spring. 4 credits each term. Prerequisites: for Korean 201, Korean 102 or permission of instructor; for Korean 202, Korean 201. Staff.

Satisfactory completion of Korean 201 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.

Covers the basics of speaking, reading, and writing at the intermediate level. Introduces some reading and writing with Chinese characters.

**KOREA 209-210 Intermediate Reading**

209, fall; 210, spring. 4 credits each term. Prerequisites: for Korean 209, Korean 110 or permission of instructor; for Korean 210, Korean 209 or permission of instructor. Satisfactory completion of Korean 209 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.

An intermediate level of reading comprehension and writing course for students who have acquired basic oral proficiency. Introduces some reading and writing with Chinese characters. If in doubt about eligibility, see instructor.

**KOREA 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. H. Diffloth.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**KOREA 301-302 Advanced Korean**

301, fall; 302, spring. 4 credits each term. Prerequisites: for Korean 301, Korean 202 or equivalent; for Korean 302, Korean 301 or placement by instructor. H. Diffloth and staff.

Reading of advanced texts, including newspapers and Chinese character material, together with advanced drill on the spoken language.

**Languages**

Fees. A small fee may be charged for photocopied texts for course work.

**LANG 501 Teaching Second Languages**

Fall. 3 credits. Note: this course will count as out-of-college credit for College of Arts and Sciences undergraduates. Y. Shirai, M. McCarthy and staff.

This course is designed primarily for graduate teaching assistants in the Department of Modern Languages who have no prior experience in the teaching of foreign and second languages. It is also open to others interested in language teaching methodology. The course has a general component relevant to the teaching of all second languages as well as a language-specific component tailored to the pedagogical needs of particular languages. Topics include: observing and reflecting upon the language classroom; principles and research in second-language learning; teaching grammar, pronunciation, and vocabulary; teaching reading, writing, and speaking, teaching for proficiency; discourse and language functions; materials preparation, the task-based syllabus, lesson plans; evaluation and testing, student errors and teacher feedback, portfolios, discrete point and integrative tests, learner attitude, aptitude, motivation, and individual differences; learning strategies; individual and small group activities and collaborative learning; culture in the language classroom; and the role of technology in the language classroom.

**Latin**

**Nepali**

Study Abroad in Nepal

Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, co-sponsor an academic year in Nepal. North American students study and live with Nepalese students who come from outside the Kathmandu Valley to Tribhuvan University. Students may participate in one or two semesters. Courses are offered both at Tribhuvan University and at
Juniors and seniors in good academic standing in ecology/environment, and guided field research design and Nepali language (Tibetan and/or Newari) are encouraged to participate in the study abroad in Nepal program. Students should consult with the Cornell Abroad office (474 Uris Hall) for further information.

Fees. A small fee may be charged for photocopied texts for course work.

NEPAL 101-102 Elementary Nepali
101, fall; 102, spring. 6 credits each term. Prerequisite: for Nepali 102, 101 or examination. S. Oja.

Intended for beginners. The emphasis is on basic grammar, speaking and comprehension skills, utilizing culturally appropriate materials and texts. Devanagari script for reading and writing is also introduced.

NEPAL 160 Intensive Nepali
Summer only. 10 credits. Intended for beginners. Offered alternate years. Not offered 1997-98. S. Oja.

Emphasis will be on the spoken language, in dialogues, exercises, and conversation practice. In addition, however, special attention is given to assisting students to develop vocabularies and abilities appropriate to their unique professional needs. Reading and writing practice use both colloquial and scholarly materials in the Nepali (Devanagari) script.

NEPAL 201-202 Intermediate Nepali Conversation
201, fall; 202, spring. 3 credits each term. Prerequisite: for Nepali 201, Nepali 102 or examination; for Nepali 202, Nepali 201 or examination. S. Oja.

Intermediate instruction in spoken grammar and verbal comprehension skills, with special attention to developing technical vocabularies and other verbal skills appropriate to students' professional fields.

NEPAL 203-204 Intermediate Nepali Composition
203, fall; 204, spring. 3 credits each term. Prerequisite: for Nepali 203, Nepali 102 or examination; for Nepali 204, Nepali 203 or examination. S. Oja.

A systematic review of written grammar and reading comprehension, with special attention to the technical vocabularies, necessary writing skills, and published materials typical of advanced students' professional fields.

NEPAL 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. S. Oja.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

NEPAL 301-302 Advanced Nepali
301, fall; 302, spring. 3 credits each term. Prerequisite: Nepali 204 or permission of instructor. S. Oja.

Reading of advanced texts, together with advanced drill on the spoken language.

Pali
Fees. A small fee may be charged for photocopied texts for course work.

PALI 131-132 Elementary Pali
131, fall; 132, spring. 3 credits each term. This language series cannot be used to satisfy the language requirement. J. Gair.

131 is an introduction to the language of the canonical texts of Theravada Buddhism. Reading of authentic texts of Theravada Buddhism. Emphasis on both content and grammatical structure. Familiarity with Sanskrit is not required. 132 is a continuation of 131 with further readings.

POLISH 131-132 Elementary Polish
131, fall; 132, spring. 3 credits each term. Prerequisite: for Polish 132, Polish 131 or equivalent. This language series (131-132) is not sufficient to satisfy the language requirement. Offered alternate years. Not offered 1997-98. Staff.

Covers all language skills: speaking, listening, comprehension, reading, and writing.

POLISH 133-134 Continuing Polish
133, fall; 134, spring. 3 credits each term. Prerequisite: for Polish 134, Polish 133 or equivalent. Polish 134 fulfills the qualification portion of the language requirement. Offered alternate years. W. Browne, E. Domisch.

An intermediate conversation and reading course.

QUECH 131-132 Elementary Quechua
131, fall; 132, spring. 3 credits each term. Prerequisite: qualification in Spanish. This language series (131-132) cannot be used to satisfy the language requirement. L. Morató-Peña.

A beginning conversation course in the Cuzco dialect of Quechua.

QUECH 133-134 Continuing Quechua
133, fall; 134, spring. 3 credits each term. Prerequisite: Quechua 133; Quechua 131-132 or equivalent; for Quechua 134; Quechua 133 or equivalent. Satisfactory completion of Quechua 134 fulfills the qualification portion of the language requirement. L. Morató-Peña.

An intermediate conversation and reading course. Study of the Huarochiri manuscript.

QUECH 135-136 Quechua Writing Lab
135, fall; 136, spring. 1 credit each term. Letter grade only. L. Morató-Peña.

Computer-assisted drill and writing instruction in elementary Quechua.

QUECH 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. L. Morató-Peña.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Polish
Fees. A small fee may be charged for photocopied texts for course work.

POLISH 304 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. L. Morató-Peña.

Letter grade only. L. Morató-Peña.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

QUECH 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. L. Morató-Peña.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Quechua
Fees. A small fee may be charged for photocopied texts for course work.

POLISH 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. L. Morató-Peña.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Romainian
Fees. A small fee may be charged for photocopied texts for course work.
Russian

For literature courses see Russian Literature.

The Russian Major

See Russian Literature.

Study Abroad

Cornell is an affiliated institution in the Council on International Education Exchange program for Russian language study in St. Petersburg and other Russian cities. Cornell students also frequently go on the American Council of Teachers of Russian program in Moscow and other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from Professor Patricia Carden or Diane Williams, 236 Goldwin Smith Hall.

Honors. Students taking honors in Russian undertake individual reading and research and write an honors essay.

Freshman Writing Seminar Requirement

See Russian Literature.

Russian Studies Major

See "Special Programs and Interdisciplinary Studies," which follows the department listings.

Fees. A small fee may be charged for photocopied texts for course work.

RUSSA 103-104 Conversation Practice

103, fall; 104, spring. 2 credits each term. Must enroll in one section of 103 and one section of 121, in the fall; and one section of 104 and one section of 122 in the spring. L. Paperno.

RUSSA 121-122 Elementary Russian

121, fall or summer; 122, spring or summer. 4 credits each term. May be taken alone and qualification will be achieved with satisfactory completion of 121-122-123; or may be taken concurrently with 103-104 and qualification will be achieved at completion of 122-124. V. Tsimberov and staff.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing. An experimental section, Beginning Russian through Film, will be taught in 1997-98 in addition to the regular sections. Most of the work in the experimental section will be based on video clips from original Russian films and TV programs.

RUSSA 123 Continuing Russian

Fall. 4 credits. Limited to students who have previously studied Russian or been placed by department. Satisfactory completion of Russian 123 fulfills the qualification portion of the language requirements. V. Tsimberov, S. Paperno, L. Paperno.

A course designed to prepare students for study at the 200 level. Passing this course is equivalent to qualification. Authentic Russian materials are used: TV, books, etc.

RUSSA 203-204 Intermediate Composition and Conversation

203, fall, or summer; 204, spring or summer. 3 credits each term. Prerequisites: for Russian 203, qualification in Russian; for Russian 204, Russian 203 or equivalent. L. Paperno, S. Paperno, V. Tsimberov.

Guided conversation, composition, reading, pronunciation, and grammar review. Emphasizing the development of accurate and idiomatic expression in the language. An additional experimental section, Intermediate Russian through Film, may be taught in 1997-98, with a significant portion of the work based on clips from an original Russian feature film.

RUSSA 205-206 Reading Russian Press

205, fall; 206, spring. 2 credits each term. Prerequisite: qualification in Russian (Russian 123 or placement by department). Both semesters must be taken in order to satisfy the proficiency level for the language requirement. This course cannot be used to satisfy the humanities requirement. Staff.

Reading unabridged articles on a variety of topics from current Russian periodicals.

Note: Students placed in the 200-level courses also have the option of taking courses in introductory literature; see separate listings under Russian 201 and 202 for descriptions of these courses, any of which may be taken concurrently with the 203-204 and 205-206 language courses described above. The introductory literature courses are offered by the Department of Russian Literature, and the 203-204 and 205-206 language courses by the Department of Modern Languages. Two sections will be in Russian. Section I: Russian Press for Everyday Culture. Section II: Russian Press for Business and Politics.

RUSSA 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

RUSSA 303-304 Advanced Composition and Conversation

303, fall; 304, spring. 4 credits each term. Prerequisites: for Russian 303, Russian 204 or equivalent; for Russian 304, Russian 303 or equivalent. L. Paperno, S. Paperno, V. Tsimberov.

Writing, reading, and conversation: viewing and reading authentic language materials; current Russian films (feature and documentary), newspapers, TV programs, and other materials are used.
An intermediate conversation and reading course.

SEBCR 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

---

**Sinhala (Sinhalese)**

**Fees.** A small fee may be charged for photocopied texts for course work.

**SINHA 101–102 Elementary Sinhala**
101, fall; 102, spring. 6 credits each term. Prerequisite: for Sinhala 102, Sinhala 101 or equivalent. Staff.

A semi-intensive course for beginners. A thorough grounding is given in all the language skills, listening, speaking, reading, and writing.

**SINHA 160 Intensive Sinhala**
Summer only. 10 credits. Intended for beginners. Offered alternate years. Not offered 1998.

Emphasis is on the spoken (colloquial) language, the writing system is introduced and used to present all Sinhala materials, with additional reading practice with colloquial materials. A foundation is laid for later study of the written language (literary Sinhala).

**SINHA 201–202 Intermediate Sinhala**
Reading &
201, fall; 202, spring. 3 credits each term. Prerequisites: for Sinhala 201, Sinhala 102; for Sinhala 202, Sinhala 201 or equivalent. Staff.

**SINHA 203–204 Intermediate Composition and Conversation**
203, fall; 204, spring. 3 credits each term. Prerequisites: for Sinhala 203, Sinhala 102 or permission of instructor, for Sinhala 204, Sinhala 203 or equivalent. Staff.

**SINHA 300 Directed Studies**
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

---

**Spanish**

For advanced Spanish language and literature courses see Romance Studies.

**Study Abroad in Spain**
Cornell, the University of Michigan and the University of Pennsylvania cosponsor an academic year in Spain program. Students enrolled in this program spend the first four weeks before the fall semester begins in a residential college located on the campus of the University of Madrid, where they take a course in Spanish language and contemporary society and take advantage of special lectures and field trips to Madrid and Castile. This course carries three credits. In early October the program moves to Seville, where students enroll in as many regular classes at the University of Seville as their language competency and general education permit. Their academic work is supplemented by courses designed explicitly for the program by Seville faculty, as well as a seminar regularly offered by the resident director, who is chosen from the faculty of either Cornell, Michigan or Pennsylvania. The special courses normally include history of art and architecture, Spanish composition and syntax, and modern Spanish history. In Seville students live with selected families. Cornell-Michigan-Pennsylvania also maintains a center in Seville, which is used by students for special seminars, tutorials, lectures, and informal gatherings.

Applicants are expected to have at least completed Spanish 204 prior to departure. Students are strongly encouraged to study abroad for the entire year rather than for one semester. Students interested in the study abroad program should consult with the Cornell Abroad office for further information (474 Uris Hall, 255-6224).

**Fees.** Depending on the course, a small fee may be charged for photocopied texts for course work.

**Important information about registration for Spanish classes**

The Spanish Program offers a number of elementary and intermediate courses to satisfy the needs of students with a variety of backgrounds; students are urged to register for the appropriate level so as to start the semester in the right class. Students with 2 or more years in the language are required to take the placement test before taking any Spanish course.

*the placement score can be from an achievement test, the CPT, or the LPS.

**SPAND 101 Basic Course I**
Summer only. 6 credits. Prerequisite: no Spanish.

This course is intended for students with absolutely no experience in Spanish. (Spanish 123 and 205 are usually offered in the summer concurrently with 101 for students with prior experience.) Spanish 101 provides a thorough grounding in all language skills. Language practice in small groups. Lectures cover grammar, reading, and cultural information.

**SPAND 112 Elementary Spanish: Review and Continuation**
Fall. 4 credits. Prerequisite: LPS score 37–44, M. Rice.

This course is designed for students who have taken some Spanish and who have a placement score of 37–44 or SAT II 370–450.

It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken Spanish 121 may enroll for this course. As part of the final exam, students take the LPS and, according to their score, may place into Spanish 123 (score below 50) or receive qualification (56 or above), and placement into the 200-level courses. Evening prelim.

**SPAND 121–122 Elementary Spanish**
121, fall; 122, spring. 4 credits each term. Prerequisite: For Spanish 122, Spanish 121.

Z. Iguina and staff.

This course is intended for students with no experience in Spanish. (Students who have previously studied 2 or more years of Spanish are not eligible for 121 unless they have an LPS score lower than 50 or SAT II lower than 376.) The course provides a thorough grounding in all language skills. Language practice in small groups. Lectures cover grammar, reading, and cultural information. Evening prelim.

**SPAND 123 Continuing Spanish**
Fall, spring, or summer. 4 credits. Prerequisite: Spanish 112, Spanish 122, or an LPS score 45–55 or SAT II 460–580.

L. Morató-Pénta, M. K. Redmond, J. Routier-Pucci, A Tio and staff.

An all-skills course designed to prepare students for study at the 200 level. Satisfactory completion of Spanish 123 fulfills the qualification portion of the language requirement. Evening prelim.

**SPAND 200 Spanish for English/Spanish Bilinguals**
Fall or spring. 3 credits. Prerequisite: LPS score 56–64, SAT II 590–680. Not available to students who have taken Spanish 123. D. Cruz de Jesús.

A course designed to expand bilingual students' knowledge of Spanish by providing them with ample opportunities to develop and improve each of the basic language skills. Not available to students who have taken Spanish 203 or 213.

**SPAND 203 Intermediate Composition and Conversation**
Fall, spring, or summer. 3 credits. Prerequisite: qualification in Spanish (Spanish 123, LPS score 56–64, or SAT II 590–680). Not available to students who have taken Spanish 213. D. Cruz de Jesús, M. Rice, J. Routier-Pucci and staff.

Convensional grammar review with special attention to the development of accurate and idiomatic oral expression. Includes readings in contemporary Spanish prose and practice in writing.

**SPAND 204 Intermediate Composition and Conversation**
Fall or spring. 3 credits. Prerequisite: Spanish 203 or permission of instructor. E. Dozier and staff.

Practice in conversation with emphasis on improving oral and written command of Spanish. Includes treatment of specific problems in grammar, expository writing, and readings in contemporary prose.

**SPAND 212 Intermediate Spanish for the Medical and Health Professions**
Fall or spring. 3 credits. Prerequisite: qualification in Spanish (Spanish 123, LPS score 56–64, or SAT II 590–680) or permission of instructor. Students who have taken Spanish 203 or 200 should speak to the instructor. A. Tio.
 Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**SPAN D 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**SPAN D 310 Advanced Conversation and Pronunciation**

Spring. 3 credits. Prerequisite: Spanish 204 or equivalent. Z. Iguina.

A conversation course with intensive oral practice obtained through the production of video programs. Study of the fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. Weekly pronunciation labs.

**Swahili**

See listings under Africana Studies and Research Center.

**Swedish**

**Fees.** A small fee may be charged for photocopied texts for course work.

**SWED 121–122 Elementary Swedish**

121, fall; 122, spring. 4 credits each term. Prerequisite: for Swedish 122, Swedish 121 or equivalent. L. Tranvik.

The aim of this course is to develop skills in listening, speaking, reading and writing within Sweden’s cultural context. Interactive computer programs are used in these courses.

**SWED 123 Continuing Swedish**

Fall. 4 credits. Prerequisite: Swedish 122 or equivalent. L. Tranvik.

Developments of skills in spoken and written Swedish within Sweden’s cultural context.

**SWED 203 Intermediate Swedish**

Spring. 3 credits. Prerequisite: Swedish 123 or permission of instructor. L. Tranvik.

Intermediate to advanced level instruction utilizing audio-visual material and text to enhance language comprehension.

**SWED 204 Advanced Swedish**

Fall. 3 credits. Prerequisite: Swedish 203 or permission of instructor. Taught in Swedish. L. Tranvik.

Emphasis on improving oral and written expression of Swedish, including vocabulary, readings in contemporary prose, treatment of specific problems in grammar, and presentation of videos and films.

**SWED 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. L. Tranvik.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**TAGalog**

**Fees.** A small fee may be charged for photocopied texts for course work.

**TAG 121–122 Elementary Tagalog**

121, fall; 122, spring. 4 credits each term. Prerequisite: for Tagalog 122, Tagalog 121. J. Wolff and staff.

A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

**TAG 123 Continuing Tagalog**

Fall. 4 credits. Prerequisite: Tagalog 122 or equivalent. Satisfactory completion of Tagalog 123 fulfills the proficiency portion of the language requirement. J. Wolff and staff.

Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings; and sharpens listening skills.

**TAG 205–206 Intermediate Tagalog @**

205, fall; 206, spring. 3 credits each term. Prerequisites: for Tagalog 205, Tagalog 123 or equivalent; for Tagalog 206, Tagalog 205 or equivalent. Satisfactory completion of Tagalog 205 fulfills the proficiency portion of the language requirement. J. Wolff and staff.

This course develops all four skills: reading, writing, speaking, and comprehension.

**TAG 300 Directed Studies**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. G. Wolff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**Tamil**

**Fees.** A small fee may be charged for photocopied texts for course work.

**[TAMIL 101–102 Elementary Tamil]**

101, fall; 102, spring. 6 credits each term. Prerequisites: for Tamil 102, Tamil 101 or equivalent. Not offered 1997–98. Staff.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

**[TAMIL 201–202 Intermediate Tamil Conversation]**

201, fall; 202, spring. 3 credits each term. Prerequisites: for Tamil 201, Tamil 102 or permission of instructor; for 202, Tamil 201 or permission of instructor. Not offered 1997–98. Staff.

Intermediate instruction in spoken grammar and verbal comprehension skills with special attention to developing technical vocabularies and other verbal skills appropriate to the students’ professional fields.

**[TAMIL 203–204 Intermediate Tamil Composition]**

203, fall; 204, spring. 3 credits each term. Prerequisites: for Tamil 203, Tamil 202 or permission of instructor; for 204, Tamil 203 or permission of instructor. Not offered 1997–98. Staff.

A systematic review of written grammar and reading comprehension, with special attention to the technical vocabularies, necessary writing skills, and published materials typical of advanced students’ professional fields.

**Thai**

**Fees.** A small fee may be charged for photocopied texts for course work.

**[THAI 101–102 Elementary Thai]**

101, fall; 102, spring. 6 credits each term. Prerequisite: for Thai 102, Thai 101 or equivalent. Intended for beginners or students placed by examination. N. Jagacinski.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

**[THAI 201–202 Intermediate Thai Reading]**

201, fall; 202, spring. 3 credits each term. Prerequisites: for Thai 201, Thai 102; for Thai 202, Thai 201 or equivalent. N. Jagacinski.

**[THAI 203–204 Intermediate Composition and Conversation]**

203, fall; 204, spring. 3 credits each term. Prerequisites: for Thai 203, Thai 102; for Thai 204, Thai 203. N. Jagacinski.

Selected readings in Thai writings in various fields.

**[THAI 300 Directed Studies]**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. N. Jagacinski.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**[THAI 303–304 Thai Literature]**

303, fall; 304, spring. 4 credits each term. Prerequisite: Thai 302 or equivalent. N. Jagacinski.

Reading of significant novels, short stories, and poetry written since 1850.

**[THAI 401–402 Directed Individual Study]**

401, fall; 402, spring. 4 credits each term. For advanced students or students with special problems or interests. Prerequisite: permission of instructor. N. Jagacinski.

**Ukrainian**

**Fees.** A small fee may be charged for photocopied texts for course work.

**[UKRAN 131–132 Elementary Ukrainian]**

131, fall; 132, spring. 3 credits each term. Prerequisite: for Ukrainian 132, Ukrainian 131 or equivalent. This language series cannot be used to satisfy the language requirement. Not offered 1997–98. Covers all language skills: speaking, listening, comprehension, reading, and writing.

**[UKRAN 300 Directed Studies]**

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**Urdu**

See listings under Hindi.

**Languages and Linguistics 459**
Vietnamese

Fees. A small fee may be charged for photocopied texts for course work.

**VIET 101-102** Elementary Vietnamese
101, fall; 102, spring. 6 credits each term. Prerequisites: for Vietnamese 101, Vietnamese 102 or equivalent. Intended for beginners or students placed by examination. Satisfactory completion of Vietnamese 102 fulfills the qualification portion of the language requirement. T. Tran Viet.

**VIET 201-202** Intermediate Vietnamese
201, fall; 202, spring. 3 credits each term. Prerequisites: for Vietnamese 201, Vietnamese 102 or equivalent. For Vietnamese 202, Vietnamese 201. T. Tran Viet.

Continuing instruction in spoken and written Vietnamese. T. Tran Viet.

**VIET 203-204** Intermediate Vietnamese Composition and Reading
203, fall; 204, spring. 3 credits each term. Prerequisite: permission of instructor only. T. Tran Viet.

Designed for students and "native" speakers of Vietnamese whose speaking and listening are at the advanced level, but who still need to improve writing and reading skills. T. Tran Viet.

**VIET 300** Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. T. Tran Viet.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor. T. Tran Viet.

**VIET 301-302** Advanced Vietnamese
301, fall or spring; 302, fall or spring. 4 credits each term. Prerequisites: for Vietnamese 301, Vietnamese 202 or permission of instructor; for Vietnamese 302, Vietnamese 301. T. Tran Viet.

Continuing instruction in spoken and written Vietnamese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose. T. Tran Viet.

**VIET 401-402** Directed Individual Study
401, fall; 402, spring. 2-4 credits variable each term. Prerequisite: permission of instructor. Intended for advanced students. T. Tran Viet.

Various topics according to need. T. Tran Viet.

Welsh

Fees. A small fee may be charged for photocopied texts for course work.

**WELSH 411** Readings in Modern Welsh
Fall. 3 credits. Prerequisite: permission of instructor. W. Harbert.

Topics are selected on the basis of student needs.

**WELSH 300** Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. W. Harbert.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor. W. Harbert.

Yoruba

Fees. A small fee may be charged for photocopied texts for course work.

**[YORUB 121-122** Elementary Yoruba (also Africana Studies and Research Center 121-122)
Not offered 1997-98.

For description, see ASRC 121-122, sec. 01.

**[YORUB 123-203** Continuing Yoruba (also Africana Studies and Research Center 123-203)
Not offered 1997-98.

For description, see ASRC 123-203, sec. 01.

**Mathematics**

Mathematics is the language of modern science; basic training in the discipline is essential for those who want to understand, as well as for those who want to take part in, the important scientific developments of our time. Acquaintance with mathematics is also extremely useful for students in the social sciences who are interested in the full range of human culture and the ways of knowing the universe in which we live.

The Department of Mathematics faculty has strong groups specializing in algebra, number theory, real and complex analysis, Lie groups, topology and geometry, logic, probability and statistics, mathematical physics, and applied mathematics. Related departments at Cornell have specialists in computer science, operations research, linear programming, and game theory, and courses in these topics can be integrated readily into the mathematics major.

The department offers a rich variety of undergraduate courses, and many of its beginning graduate courses are suitable for advanced undergraduates as well. Under some conditions, a student may carry out an independent reading and research project for college credit under the supervision of a faculty member.

Members of the department are available to discuss with students the appropriate course for their levels of ability and interest, and students are urged to avail themselves of this help.

Students who want to take any of the courses numbered 300 or above are invited to confer, before registering, with the instructor concerned. The level of a course is indicated by the first digit of the course number:

- 1, 2, indicate underclass courses; 3, 4, upperclass courses; 5, professional level and mathematics education courses; 6, 7, graduate courses. The subject matter of courses is often indicated by the second digit: 0, general; 1, 2, analysis; 3, 4, algebra; 5, 6, topology and geometry; 7, 8, probability and statistics; 9, logic; 9, other.

Midterm grades, when required, will be S or U only, except in special circumstances. In all 700-level courses, all grades will be S-U only, with the exception of 790. In courses with numbers below 700, students will receive letter grades, with the exception of non-mathematics majors who have requested an S-U grade.

**Advanced Placement**

Secondary school students are strongly urged to take one of the two advanced placement examinations of the College Entrance Examination Board in their senior year. Freshmen who have had some calculus but who have not taken an advanced placement examination should take the placement examination in mathematics offered at Cornell just before the beginning of classes in the fall. It is most important that anyone with any knowledge of calculus carefully read "Advanced Placement," p. 5.

**The Major**

The mathematics major adapts to a number of purposes. It can emphasize the theoretical or the applied. It can be appropriate for professionals and nonprofessionals alike. It can be broad or narrow. Questions concerning the major should be brought to a departmental representative.

Prerequisites. The traditional prerequisites are Mathematics 221-222 or 293-294. A unit on infinite series is required. Such a unit is offered in Mathematics 112, 122, and 192. Normally students will be admitted to the major only when they have grades of B- or better in all sophomore-level mathematics courses they have taken. Alternative prerequisites are Mathematics 213, 231, normally with grades of B+ or better.

**Requirements**

There are five requirements for the major:

1) Computer Science 100. Students are urged to take this course before the end of the sophomore year.

2) Two courses in algebra. Eligible courses are Mathematics 431 or 433, 432 or 434 or 332, 336.

3) Two courses in analysis. Eligible courses are Mathematics 321, 411 or 413, 414, 418, 420, 422, 423, 427, 428.

4) Further high-level mathematical courses. Any one of the following is sufficient:
   a) four additional Mathematics courses numbered 300 or above.
   b) (Concentration in Computer Science) five additional courses from i) and ii) below, of which at least one is from i) and three are from ii)
      i) Mathematics courses numbered 300 or above
      ii) Computer Science courses numbered 310 or above.
EDUC 115**
junior year.
director during the second semester of their
major advisers and the Mathematics major
Thesis, and present it orally to the department.

requirements for Mathematics majors declared
Mathematics with serious mathematical
models. Any course from outside
mathematics after EDUC 115 may take MATH
105 or if they need more calculus, MATH 111.

5) One course dealing with mathematical
models. Any course from outside
mathematics with serious mathematical content and dealing with scientific
matters, provided the course has not been used toward satisfying the previous
requirement, e.g., Physics 208, 213, or 217 (but not 112 or 207), or Computer Science
211 (if Computer Science option not used above). Students may consider courses
from biology, chemistry, economics, and
other fields; they should consult their
adviser.
A course may be counted toward the
mathematics major only if a grade of C–
or better is received for that course.
Major advisers can alter these requirements
upon request of an advisee, provided the
intent of the requirements is met. The
requirements for Mathematics majors declared
before July 1, 1994 are slightly different from
what is stated here, particularly in respect to
Requirement 4).

Honors Program
The Department of Mathematics awards
honors (cum laude) and high honors (magna
laude and summa cum laude) to
graduating mathematics majors who have
demonstrated outstanding ability in the major
program.
The awards are determined by the Mathemati-
cs Major Committee in the latter part of the
semester prior to graduation. Normally, one
requirement for honors is participation in the
Honors Seminar (Math 401) for one semester,
or independent study at a high performance
level. The committee will also be looking for
excellent performance in mathematics courses, particularly in challenging courses at the
400-level or beyond. Students interested in
honors should consult their major advisers
concerning suitable courses.
To be considered for high honors, a student
usually will be expected to write a Senior
Thesis, and present it orally to the department.
This project is carried out during the senior
year under the supervision of a member of the
Mathematics department faculty. Students
interested in high honors should consult their
major advisers and the Mathematics major
director during the second semester of their
junior year.

Teacher Education in Science and
Mathematics (TESM)
Students at Cornell may pursue teaching
credentials in biology, chemistry, earth
science, general science, mathematics, and
physics. TESM is a university program jointly
conducted by the Departments of Education
and Mathematics. Although TESM offers
options for undergraduate and graduate study,
most students enroll in a five-year program,
which combines an undergraduate major in
mathematics or one of the sciences with a
one-year Master of Arts in Teaching (MAT).
Students from any college at Cornell are
eligible to apply to the program as undergraduates. Students who complete their
undergraduate studies and their student
teaching are eligible for provisional teaching
certification from the State Education
Department, effective for five years. Students
completing the graduate program can earn the
master's degree required for permanent
certification.
For more information, contact the TESM
Student Support Specialist at 255-9255 or the
program coordinator, D. Trumbull (Education)
255–3108 or, in Mathematics, A. Solomon
255–3894.

Distribution Requirement

Virtually all mathematics courses can be used
to satisfy the Quantitative and Formal
Reasoning part of the Distribution Require-
ments. Explicit exceptions are noted in the
beginning of the Arts and Sciences section of
the Courses of Study.

Basic Sequences

Precalculus

Course Description Course Numbers

1) Algebra and trigonometry to prepare students for calculus MATH 109* or EDUC 005*
2) Algebra, analytic geometry, elements of calculus EDUC 115**

**Students who want a second semester of mathematics after EDUC 115 may take MATH 105 or if they need more calculus, MATH 111.

Calculus

Course Description Course Numbers

1) Standard three-semester sequence for students who do not expect to take advanced courses in mathematics MATH 191–193–224
2) Calculus for engineers (also taken by some physical science majors) 293–294
3) Prospective mathematics majors and others who expect to take advanced courses in mathematics: many sequences are possible. For example, 111–112–221–222; or 121–122–221–222; or the engineering sequence 191(193)–192–293–294; or a mix of the above. There is no specifically "approved" basic sequence for mathematics majors. Students should consult with their advisers for each individual case.

Mathematics 191 or 193 may be substituted for 111 in sequences 1 and 3. Sequences 2 and 3 are two-year sequences that include some linear algebra.

Students who take sequence 1 may learn some linear algebra by taking Mathematics 231. A student whose performance in 112 is exceptional may switch to sequence 3 and take 221.

Special-Purpose Sequences

Mathematics Course Numbers

1) Finite mathematics and calculus for biology majors 105–106
2) Other possible finite mathematics and calculus sequence 105–111

Students who want to take two semesters of calculus are advised to take the first two
semesters of one of the three calculus sequences. It is also possible to follow
Mathematics 106 with 112 or 122.

Switching between calculus sequences is often difficult, especially at the 200 level. Students
should not attempt such a switch without consulting the associate chair.

Courses with Overlapping Content

Because the department offers many courses
with overlapping content, students must
choose their courses carefully to ensure that
they will receive credit for each course they
take. Listed below are groups of courses with
similar content. Students will receive credit
for only one of the courses in each group.

106, 111, 191, 193
112, 122, 192
213, 222, 224, 293
221, 223, 231, 294
321 and 432
336 and 436
321 and 420

Fees

In some courses there may be a small fee for computer lab use or for photocopying
materials to be handed out to students.

Undergraduate Course Offerings

Foundation courses: 105, 106, 109, 111, 112,
121, 122, 123, 191, 192, 193, 213, 221, 222,
223, 224, 293, 294

Mathematics Education: 405, 408, 451

History of Mathematics: 101, 403

General and Liberal Arts Courses: 103, 150,
171, 181, 401, 405, 408, 490

Analysis: 411, 413, 414, 418

Algebra and Number Theory: 231, 332, 336,
431, 432, 433, 434, 436

Combinatorics: 441, 442

Geometry and Topology: 150, 356, 451, 452,
453, 454, 455

Probability and Statistics: 171, 471, 472, 474

Mathematical Logic: 181, 481, 482, 483, 486

MATH 101 History of Mathematics
- Summer. 4 credits. Prerequisite: three years of high school mathematics.
- The history of the main ideas of mathematics from Babylonian, Egyptian, and Greek times to the present day.

MATH 103 Mathematical Explorations
- Fall, spring, or summer. 3 credits. This course may be used to satisfy the distribution requirement in mathematics.
- This course is for students who wish to experience how mathematical ideas naturally evolve.
- The homework will consist of writing assignments.
- Topics will vary depending on the instructor. Some assessment will be done through writing assignments.

MATH 105 Finite Mathematics for Biologists
- Fall or summer. 3 credits. Prerequisite: three years of high school mathematics, including trigonometry and logarithms.
- Probability (with some applications to genetics), Markov chains.
- Examples from biology are used.

MATH 106 Calculus for Biologists
- Spring or summer. 3 credits. Prerequisite: Mathematics 105 or 109 or EDUC 115 or permission of instructor. (A strong background in functions is required.)
- Mathematics 111, rather than 106, is recommended for those planning to take 112.*
- Introduction to differential and integral calculus, partial derivatives, elementary differential equations.
- Examples from biology are used.

MATH 109 Precalculus Mathematics
- Summer. 3 credits. Prerequisite: three years of high school mathematics, including trigonometry and logarithms.
- The course will emphasize ideas and imagination as opposed to techniques and calculations.

MATH 111 Calculus
- Fall, spring, or summer. 4 credits. Prerequisite: Mathematics 109 or three years of high school mathematics, including trigonometry.*
- Functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic and exponential functions.
- Applications of differentiation, including graphing, max-min problems, tangent line approximation, implicit differentiation, applications to the sciences.
- The mean value theorem. Antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus, substitution in integration, the area under a curve. Graphing calculators will be used, and their pitfalls will be discussed, as applicable to the above topics.

MATH 112 Calculus
- Fall, spring, or summer. 4 credits. Prerequisite: Mathematics 106 or 111 with a grade of C or better. Those who do well in Mathematics 111 should take 122 instead of 112, unless they plan to continue with 213.*
- Integration, applications, including volumes and arc length, techniques of integration, approximate integration with error estimates, improper integrals, differential equations. (separation of variables, initial conditions, systems, some applications). Infinite sequences and series; definition and tests for convergence, power series, Taylor series with remainder.
- Parametric equations.

MATH 121 Honors Calculus
- Fall. 4 credits. Prerequisite: Three years of high school mathematics, including calculus or permission of the department.
- This is a first-semester honors course in calculus intended for students who have had calculus in high school. The course material will be the same as that in Mathematics 111, but it will be covered in greater depth.

MATH 122 Honors Calculus
- Fall or spring. 4 credits. Prerequisite: one semester of calculus with a high performance or permission of the department.
- Students planning to continue with Mathematics 213 are advised to take 112 instead of this course.*
- Differentiation and integration of elementary transcendental functions, the techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems. The approach is more theoretical than in Mathematics 112.

MATH 123 Analytic Geometry and Calculus
- Summer. 4 credits. Prerequisite: High school mathematics through trigonometry and plane analytic geometry.
- The honors section of Mathematics 111. Covers the same topics more deeply (at the level of Apostol's Calculus).

MATH 150 From Space to Geometry
- Spring. 3 credits.
- The course is restricted to engineering students who have no previous successful experience with calculus. Students who have had such experience but wish a first-semester calculus course should take MATH 193.

MATH 181 Elementary Logic and Formal Proof
- Fall. 3 credits. Prerequisite: high school mathematics.
- The course will explore, from an elementary viewpoint, several topics selected by the instructor from the following list: sets and relations, mathematical induction, cardinal numbers and the notion of infinity, formal and informal proofs and their roles in mathematics and computer science, introduction to mathematical logic, applications of formal logic to world problems and puzzles. The course is designed for liberal arts students, including those who may be "math-averse." Rather than providing a systematic treatment of formal logic, it attempts to instill an appreciation for mathematics and its uses, as well as some understanding of the process by which intuitive notions are developed into precise mathematical statements.

MATH 191 Calculus for Engineers
- Fall. 4 credits. Prerequisite: three years of high school mathematics, including trigonometry.*
- Plane analytic geometry, differential and integral calculus, and applications. This course is restricted to engineering students who have had no previous successful experience with calculus. Students who have had such experience but wish a first-semester calculus course should take MATH 193.

MATH 192 Calculus for Engineers
- Fall, spring, or summer. 4 credits. Prerequisite: Mathematics 191 or 193.*
- Methods of integration, polar coordinates,
complex numbers, infinite series. Introduction to physical vectors and calculus of functions of several variables.

MATH 193 Calculus for Engineers
Fall, spring, or summer. 4 credits. Prerequisite: three years of high school mathematics including trigonometry, plus some knowledge of calculus.*
Plane analytic geometry, differential and integral calculus, and applications. Mathematics 193 covers essentially the same topics as 191, but is designed for students with some previous successful experience with calculus.

MATH 213 Calculus
Fall or spring. 4 credits. Prerequisite: Mathematics 112, 122, or 192.*
Vectors, vector-valued functions, line integrals. Multivariable calculus, multiple integrals. First- and second-order differential equations with applications. Introduction to numerical methods, series solutions, systems of differential equations, elementary partial differential equations. The course is designed for students who wish to master the basic techniques of calculus, but whose major will not require a substantial amount of mathematics.

MATH 221 Linear Algebra and Calculus
Fall, spring, or summer. 4 credits. Prerequisite: two semesters of calculus with a grade of B or better, or permission of instructor.*
Linear algebra and differential equations. Topics include vector algebra, linear transformations, matrices, and differential equations, as well as an introduction to proving theorems. This course is especially recommended for students who plan to major in mathematics or in a strongly mathematics-related field.

MATH 222 Calculus
Fall or spring. 4 credits. Prerequisite: Mathematics 221.*
Vector differential calculus, calculus of functions of several variables, multiple integrals. This course is especially recommended for students who plan to major in mathematics or in a strongly mathematics-related field.

MATH 223 Honors Linear Algebra and Calculus
Fall. 4 credits. Prerequisites: Two semesters of calculus with a grade of A- or better, or permission of instructor.*
Vectors, matrices and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems; quadratic forms, extrema, and manifolds; multiple and iterated integrals. Mathematics 223-224 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses.

MATH 224 Honors Linear Algebra and Calculus
Spring. 4 credits. Prerequisites: Mathematics 223.*
Vector fields; line integrals; differential forms and exterior derivative; work, flux, and density forms; integration of forms over parametrized domains; Green's, Stoke's, and divergence theorems.

*See the list of courses with overlapping content at the end of the introduction.

MATH 231 Linear Algebra
Spring. 3 credits. Prerequisite: Mathematics 111 or equivalent.*
Vectors, matrices, and linear transformations, affine and Euclidean spaces, transformation of matrices, and eigenvalues.

MATH 281 Formal Logic (also Philosophy 331)
Fall. 4 credits.
For description, see PHIL 331.

MATH 293 Engineering Mathematics
Fall, spring, or summer. 4 credits. Prerequisites: Mathematics 192 plus a knowledge of computer programming equivalent to that taught in Computer Science 100.*

MATH 294 Engineering Mathematics
Fall, spring, or summer. 4 credits. Prerequisite: Mathematics 293.*

MATH 321 Applicable Analysis
Fall. 4 credits. Prerequisites: Mathematics 294, or 221 and 222, or 213 and 231.
Graduate students who need mathematics extensively in their work and who have had solid courses in calculus and complex variables should take Mathematics 615-616. With less preparation they should take Mathematics 420 (or 521-422-423).*
(This course was formerly MATH 421 and has a substantial overlap with MATH 420.)
A survey of some of the mathematical techniques that are of primary use in applications to the physical sciences and engineering. The primary mathematical tool explored in harmonic analysis, including Fourier Series, Fourier Integral, Laplace Transform. The applications will be principally to boundary value problems for ordinary and partial differential equations. Moderately advanced mathematical ideas will be used but explained as the course progresses at an elementary level. Much of the formal mathematical material missing in applied courses (e.g., uniform convergence, dominated convergence, complete orthonormal sets) will be thoroughly explained in the course and at the working level.

MATH 332 Algebra and Number Theory
Fall. 4 credits. Prerequisites: Mathematics 221, 231, or 294.*
Various topics from number theory and modern algebra, usually including most of the following: Primes and factorization, Diophantine equations, congruences, quadratic reciprocity, continued fractions, rings and fields, finite groups, introduction to arithmetic of the Gaussian integers and quadratic fields. Motivation and examples for the concepts of abstract algebra are derived primarily from number theory and geometry.

MATH 336 Applicable Algebra
Spring. 4 credits. Prerequisites: Mathematics 293-294, or 221, 222, or Mathematics 293-294.
An introduction to concepts and methods of abstract algebra and number theory that are of importance in science and engineering. Applications of the theory to concrete problems will be stressed. The course treats mathematical topics usually selected from the following list: Elementary number theory and congruences, groups, fields, partially ordered sets, lattices, graph theory, Boolean algebras, finite machines and languages. Applications discussed usually include at least some of the following: Cryptography, primality testing, elementary coding theory, enumeration problems, fast Fourier transform, difference equations. Additional topics and applications may be chosen by the instructor.

MATH 356 Groups and Geometry
Spring. 4 credits. Prerequisites: Mathematics 291-292, or Mathematics 293-294.
Groups were introduced in the nineteenth century as the set of symmetries of an algebraic or geometric object, and this viewpoint is a central one in modern mathematics. This course studies Euclidean and non-Euclidean (especially hyperbolic) geometry in terms of the groups of symmetries of the relevant spaces. Prior knowledge of groups is not a prerequisite. One aim is to give students experience in modern algebra and geometry (including the geometry of complex numbers) and a sense of the unity of mathematics before they take the 400-level courses. Special care is taken in learning to write proofs. Groups of transformations. Subgroups and cosets. Homomorphisms and isomorphisms. Orbit-stabilizer theorem. Friere groups and wallpaper groups and associated tessellations of the Euclidean plane. Geometry and trigonometry of the hyperbolic plane. Tessellations of the hyperbolic plane.

MATH 401 Honors Seminar: Topics in Modern Mathematics
Spring. 4 credits.
This course is a participatory seminar primarily aimed at introducing senior and junior mathematics majors to some of the challenging problems and areas of modem mathematics. The seminar will help students develop research and expository skills in mathematics, which is important for careers in any field that makes significant use of the mathematical sciences (i.e., pure or applied mathematics, physical or biological sciences, business and industry, medicine). The content will vary from year to year.

MATH 403 History of Mathematics
Spring. 4 credits.
Prerequisites: Two courses in mathematics above 300, or permission of instructor.
Survey of the development of mathematics from antiquity to the present, with an emphasis on the achievements, problems, and mathematical viewpoints of each historical period and the evolution of such basic concepts as number, geometry, construction, and proof. Readings from original sources in translation. Students will be required to give oral and written reports.

*See the list of courses with overlapping content at the end of the introduction.
MATH 405 Mathematical Exposition
Fall. 3 credits. A seminar in mathematics and its applications to other fields. Students are asked to have had at least two years of college-level mathematics. Course work will consist of discussions, written projects, and student talks. The content of these discussions, projects, and talks will vary, to be determined by the instructor in consultation with the students.

MATH 408 Mathematics in Perspective
Spring. 4 credits. Prerequisite: consent of instructor (intended for senior mathematics majors and other students with strong mathematics backgrounds). The purpose of this course is for students to step back and to form an overview of the mathematics they have learned.

MATH 411 Introduction to Analysis
Fall. 4 credits. Prerequisite: Mathematics 222 or 295-294. Students who need to measure their Lebesgue integration for advanced probability courses should take Mathematics 413-414 or audit the first few weeks of Mathematics 621. Undergraduates who plan to attend graduate school in mathematics should take 413-414.

MATH 413-414 Introduction to Analysis
413, fall; 414, spring. 4 credits each. Prerequisite for 413: Mathematics 222 or 293-294. Prerequisite for Mathematics 414: Mathematics 413. This sequence, designed for honors students, provides an introduction to the theory of functions of real variables, stressing concepts and a logical development of the subject rather than applications. Topics include Euclidean spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, and the Riemann integral. Students who wish to continue study of theoretical analysis upon completion of Mathematics 411 may take, for example, Mathematics 418.

MATH 418 Introduction to the Theory of Functions of One Complex Variable
Spring. 4 credits. Prerequisite: Mathematics 222 or 294 or 213. May be offered only in alternate years. A rigorous introduction to complex variable theory. Complex numbers. Differential and integral calculus for functions of a complex variable, including Cauchy's theorem and the calculus of residues. Elements of conformal mapping.

MATH 420 Applicable Analysis
Fall or spring. 4 credits. Prerequisites: high level of performance in Mathematics 294; or 221 and 222; or permission of instructor. Graduate students who need mathematics extensively in their work and who have had solid courses in calculus and complex variables should take Mathematics 615-616. With less preparation they should take Mathematics 420 or 321-422-423.* Ordinary differential equations in one and higher dimensions: qualitative, analytic, and numerical methods, with physical applications. Some important partial differential equations (heat equation, wave equation, and vibrating membrane) and their connections with Fourier series and the Laplacian. Vector calculus and Stokes Theorem, with applications to electromagnetics. Mathematics 420 has substantial overlapping content with Mathematics 321, but more strongly emphasizes the mathematical properties of solutions of ordinary differential equations and the approximation to such solutions by numerical and computer methods.

MATH 422 Applicable Analysis
Fall or spring. 4 credits. Prerequisite: Mathematics 420 or 521. Complex variables, Fourier transforms, Laplace transforms. Additional topics may include: An introduction to generalized functions. Applications to partial differential equations.

MATH 423 Applicable Analysis

MATH 425 Numerical Solutions of Differential Equations
Spring. 4 credits. Prerequisites: Mathematics 222 or 294, one course numbered 300 or higher in mathematics, or permission of instructor. Not offered 1997-98. Expected to be offered 1998-99. Methods and basic theory for the numerical solution of ordinary differential equations. Linear multistep methods, Runge-Kutta methods, and the problem of stiffness for ordinary differential equations. Finite difference methods and Galerkin finite element methods for partial differential equations. Homework will involve use of a computer.

MATH 427 Introduction to Ordinary Differential Equations
Fall. 4 credits. Prerequisite: Mathematics 222 or 294 or permission of instructor. Covers the basic existence, uniqueness, and stability theory together with methods of solution and methods of approximation. Topics include singular points, series solutions, Sturm-Liouville theory, transform methods, approximation methods, and application to physical problems.

MATH 428 Introduction to Partial Differential Equations
Spring. 4 credits. Prerequisite: Mathematics 222 or 294 or permission of instructor. Topics selected from first-order quasilinear equations, classification of second-order equations, maximum principles, existence, uniqueness, stability, Fourier series methods, approximation methods.

MATH 431-432 Introduction to Algebra
431, fall; 432, spring. 4 credits each. Prerequisite: Mathematics 221 or 231. Prerequisite for Mathematics 432: Mathematics 431 or 433. Undergraduates who plan to attend graduate school in mathematics should take 433-434.* An introduction to linear algebra, including the study of vector spaces, linear transformations, matrices, and systems of linear equations; quadratic forms and inner product spaces; canonical forms for various classes of matrices and linear transformations; determinants. 431: an introduction to various topics in abstract algebra, including groups, rings, fields, factorization of polynomials and integers, congruences, and the structure of finitely generated modules over Euclidean domains with application to canonical forms of matrices.

MATH 433-434 Introduction to Algebra
433, fall; 434, spring. 4 credits each. Prerequisite: Mathematics 221 or 231. Prerequisite for Mathematics 434: Mathematics 433. Honors version of Mathematics 431-432. Mathematics 433-434 will be more theoretical and rigorous than 431-432 and will include additional material such as multilinear and exterior algebra.

MATH 436 Applications of Abstract Algebra
Fall. 4 credits. Prerequisites: Linear algebra (MATH 231 or higher). Familiarity with elementary algebra or number theory such as MATH 352 would also be helpful.* The course is intended for students who would like to learn modern algebra and its applications outside of mathematics. There will be at least as much emphasis on applications as the relevant modern algebra. Frequently, the applications involve or were made possible by the advent of computers. Students who already know the modern algebra covered in the course may still find the applications to be of interest. Specific topics will be chosen by the instructor. The algebra typically includes items drawn from elementary number theory, polynomials and ring theory, monoids and group theory, real closed fields, algebraic combinatorics, Groebner bases, and other algebraic field theory. The applications and related topics typically include items drawn from: complexity theory, coding theory, encryption, discrete and fast Fourier transform, primality testing, factoring integers and polynomials, root counting and isolation, solving systems of polynomial equations, formal language theory and automata.

MATH 336 and 436 may overlap in choice of material. Where they overlap, the coverage in MATH 436 will be of greater depth appropriate to a 400-level course. Students cannot get credit for both MATH 336 and MATH 436.

MATH 441 Introduction to Combinatorics
Fall. 4 credits. Prerequisites: Mathematics 221, 231, or 294. Enumerative Combinatorics: Permutation enumeration, Stirling and Bell numbers, generating functions, exponential formula, Lagrange inversion, basic and asymptotic methods, rational generating functions. Basic Graph Theory: Trees and Cayley's theorem, chromatic polynomial.

*See the list of courses with overlapping content at the end of the introduction.

MATH 442 Introduction to Combinatorics

MATH 451 Euclidean and Spherical Geometry
Fall. 4 credits. Prerequisite: Mathematics 221 or 231 or permission of instructor. Topics from Euclidean and spherical (non-Euclidean) geometry. A non-lecture, seminar-style course organized around student participation.

MATH 452 Classical Geometries
Spring. 4 credits. Prerequisites: Mathematics 221 or its equivalent. This is an introduction to hyperbolic, spherical, and projective geometry—the classical geometries that developed as Euclidean geometry was better understood. For example, the historical problem of the independence of Euclid's fifth postulate is understood when the existence of the hyperbolic plane is realized. Straightedge (and compass) constructions and stereographic projection in Euclidean geometry can be understood within the structure of projective geometry. Topics in hyperbolic geometry include models of the hyperbolic plane and relations to spherical geometry. Topics in projective geometry include homogeneous coordinates and the classical theorems about conics and configurations of points and lines. Optional topics include principles of perspective drawing, finite projective planes, orthogonal Latin squares, and the cross ratio.

MATH 453 Introduction to Topology
Fall. 4 credits. Prerequisites: Mathematics 411 and 221, or permission of instructor. Basic point set topology, connectedness, compactness, metric spaces, fundamental groups. Application of these concepts to surfaces such as the torus, the Klein bottle, the Moebius band.

MATH 454 Introduction to Differential Geometry
Spring. 4 credits. Prerequisites: Mathematics 222 or 294, plus at least one mathematics course numbered 300 or above. Mathematics 453 is not a prerequisite. Differential geometry of curves and surfaces. Curvature, geodesics, differential forms. Introduction to two-dimensional Riemannian manifolds. This material provides some background for the study of general relativity; connections with the latter will be indicated.

MATH 455 Applicable Geometry
Fall. 4 credits. Prerequisite: Mathematics 221-222 or equivalent, or permission of instructor. In general, this course will cover various applicable topics to be chosen from among the geometry of convex bodies, polyhedra, algebraic curves and surfaces, rigid polyhedra, crystallographic patterns, projections and similar topics. Computational aspects of geometry will be included where appropriate.

MATH 471 Basic Probability
Fall. 4 credits. Prerequisite: Mathematics 221. May be used as a terminal course in basic probability. Intended primarily for those who will continue with Mathematics 472. Topics include combinations, important probability laws, expectations, moments, moment-generating functions, limit theorems. Emphasis is on diverse applications and on development of use in statistical applications. See also the description of Mathematics 671.

MATH 472 Statistics
Spring. 4 credits. Prerequisite: Mathematics 471 and knowledge of linear algebra such as taught in Mathematics 221. Some knowledge of multivariate calculus helpful but not necessary.* Classical and recently developed statistical procedures are presented in a framework that emphasizes the basic principles of statistical inference and the rationale underlying the choice of these procedures in various settings. These settings include problems of estimation, hypothesis testing, large sample theory.

MATH 474 Basic Stochastic Processes
Spring. 4 credits. Prerequisites: Mathematics 471 or equivalent and knowledge of linear algebra such as taught in Mathematics 221. This is a second-semester undergraduate course on probability. It covers topics from renewal theory, martingales, discrete and continuous time Markov chains, Brownian motion and related diffusion processes, and applications to queuing theory and finance. Theoretical as well as applied aspects of the subject will be emphasized.

MATH 481 Deductive Logic (also Philosophy 442)

MATH 482 Topics in Logic (also Philosophy 432)
Spring. 4 credits. Prerequisites: One logic course from the Mathematics Department at the 200 level or higher, one logic course from the Philosophy Department at the 300 level or higher, or permission of the instructor. For description, see PHIL 432.

MATH 483 Intensional Logic (also Philosophy 436)
Fall. 4 credits. Prerequisites: One logic course at the 200 level or higher from the Philosophy Department or the Mathematics Department, or permission of instructor. For description, see PHIL 436.

*MAY 486 Applied Logic (also Computer Science 486)
Spring. 4 credits. Prerequisites: Mathematics 222 or 294; Computer Science 280 or equivalent (such as Mathematics 532, 432, 434, or 481); and some additional course in mathematics or theoretical computer science. Propositional and predicate logic; compactness and completeness by tableaux, natural deduction, and resolution. Equational logic. Herbrand Universes and unification. Rewrite rules and equational logic. Knuth-Bendix method and the congruence-closure algorithm and lambda-calculus reduction strategies. Topics in Prolog, LISP, ML, or Nuprl. Applications to expert systems and program verification.

MATH 490 Supervised Reading and Research
Fall, spring, or summer. 1–6 credits. Supervised reading and research by arrangement with individual professors. Not applicable for material currently available in regularly scheduled courses.

Professional Level and Mathematics Education Courses
MATH 500 College Teaching
Fall. 1 credit. Among the topics covered: Basic topics about teaching, such as how to plan recitations, how to prepare lesson plans for lectures, exam design and grading, syllabus planning. Also discussed: the structure of colleges and universities, jobs and tenure, professionalism, alternative teaching strategies.

MATH 508 Mathematics for Secondary School Teachers
Spring. 1–6 credits. Prerequisites: secondary school mathematics teacher, graduate standing, or permission of instructor. An examination of the principles underlying the content of the secondary school mathematics curriculum, including connections with the history of mathematics and current mathematics research.

Graduate Courses
Graduate-level mathematics courses (formerly 500 and 600 level) have been renumbered to conform to university guidelines regarding course level numbers. p. 5. The level numbers (first digit of the course number) have been raised by one, effective in the fall of 1997. Course content and level of difficulty remain unchanged. Students interested in taking graduate courses in mathematics should consult the department for further details, times, and possible changes in courses as described below.

MATH 611–612 Real and Complex Analysis
611, fall; 612, spring. 4 credits each. 611: measure and integration, functional analysis. 612: complex analysis, Fourier analysis, and distribution theory.

MATH 613–614 Topics in Analysis
613, fall; 614, spring. 4 credits each.

MATH 615–[616] Mathematical Methods In Physics
615, fall; 616, spring. 4 credits each. 616 not offered 1997–98. Expected to be offered 1998–99. Intended for graduate students in physics or related fields who...
have had a strong advanced calculus course and at least two years of general physics. A knowledge of the elements of finite dimensional vector space theory, complex variables, separation of variables in partial differential equations, and Fourier series will be assumed. The course overlaps with parts of Mathematics 420 (or 521)-422-425. Undergraduates will be admitted only with permission of instructor. Mathematics 615 is a prerequisite for 616.

Topics designed to give a working knowledge of the principal mathematical methods used in advanced physics. A brief discussion of some basic notions: metric space, vector space, linearity, continuity, integration. Generalized functions (Schwartz distributions). Fourier series and Fourier integrals. Saddle point method. Linear operators. Differential operators and integral operators, the equations and eigenvalue problems connected with them and the special functions arising from them. Elements of group theory. The rotation group and its representations.

MATH 617 Dynamical Systems
Fall. 4 credits.

MATH 618 Smooth Ergodic Theory
Spring. 4 credits.

MATH 619-620 Partial Differential Equations

MATH 621 Measure Theory and Lebesgue Integration
Fall. 4 credits.
Measure theory, integration, and Lp spaces.

MATH 622 Applied Functional Analysis
Spring. 4 credits.
Basic theory of Hilbert and Banach spaces and operations on them. Applications.

MATH 631-632-634 Algebra
631, fall; 632, spring; 634, spring. 4 credits each. Not offered 1997-98. Expected to be offered 1998-99. Topics: finite groups, field extensions, Galois theory, rings and algebras, tensor and exterior algebra. 632: Wedderburn structure theorem, Brauer group, group cohomology. 634: Dedekind domains, primary decomposition, Hilbert basis theorem, local rings.

MATH 637 Analytic Number Theory

MATH 649 Lie Algebras

MATH 650 Lie Groups
Spring. 4 credits.

MATH 651 Introductory Algebraic Topology
Spring. 4 credits.
Fundamental group and covering spaces. Homology theories for complexes and spaces.

MATH 652 Lie Groups
Spring. 4 credits.
Differentiable Manifolds
652, fall, 653, spring. 4 credits each. Prerequisites: advanced calculus, linear algebra (Mathematics 431), point set topology (Mathematics 451). Not offered 1997-98. Expected to be offered 1998-99. This is an introduction to differential geometry and differential topology at the level of the beginning graduate student.

MATH 661 Geometric Topology
Fall. 4 credits.

MATH 662 Riemannian Geometry
Spring. 4 credits.
Linear connections, Riemannian metrics and parallel translation. Covariant differentiation and curvature tensors. The exponential map, the Gauss Lemma and completeness of the metric. Isometries and space forms, the space forms, the Gauss Lemma and completeness of the metric. Isometries and space forms, the space forms. Sjafrid theme. The exponential map, the Gauss Lemma and completeness of the metric. Isometries and space forms, the space forms. Sjafrid theme. The exponential map, the Gauss Lemma and completeness of the metric. Isometries and space forms, the space forms. Sjafrid theme. The exponential map, the Gauss Lemma and completeness of the metric. Isometries and space forms, the space forms. Sjafrid theme. The exponential map, the Gauss Lemma and completeness of the metric. Isometries and space forms, the space forms.
MATH 731-732 Seminar in Algebra
Fall, 731; spring, 732. 4 credits each.

MATH 735 Topics in Algebra
Fall. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 737 Algorithmic Number Theory
Fall. 4 credits.

MATH 739 Topics in Algebra II
Spring. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

[MATH 740 Homological Algebra
Spring. 4 credits. Not offered 1997-98. Expected to be offered 1998-99.]

MATH 751-752 Seminar in Topology
751, fall; 752, spring. 4 credits each.

MATH 753-754 Algebraic Topology
753, fall; 754, spring. 4 credits. 754 not offered 1997-98. Expected to be offered 1998-99. The continuation of 651. Cohomology, cup products, Poincare duality, higher homotopy groups, fibrations, vector bundles, characteristic classes, K-theory, spectral sequences, cohomology operations.

MATH 757-758 Topics in Topology
757, fall; 758, spring. 4 credits each. Selection of advanced topics from modern algebraic, differential, and geometric topology. Course content varies.

MATH 761-762 Seminar in Geometry
761, fall; 762, spring. 4 credits each.

[MATH 767 Algebraic Geometry
Fall. 4 credits. Not offered 1997-98. Expected to be offered 1998-99.]

MATH 771-772 Seminar in Probability and Statistics
771, fall; 772, spring. 4 credits each.

MATH 777-778 Stochastic Processes
777, fall; 778, spring. 4 credits each.

MATH 781-782 Seminar in Logic
781, fall; 782, spring. 4 credits each.

[MATH 783 Model Theory
Spring. 4 credits. Not offered 1997-98. Expected to be offered 1998-99.]

MATH 784 Recursion Theory
Spring. 4 credits.

MATH 785 Automata Theory
Fall. 4 credits. Prerequisite: Mathematics 481 or similar mathematical logic course at 400-level or higher. Basic results in finite and tree automata, including the algebraic approach to these topics. Pushi automata, with applications to computability theory and decidability problems. Rabin automata and their applications to decidability problems, boolean algebras, linear orderings, topology. Applications of automata theory to theoretical computer science in modal and temporal logic and concurrency.

[MATH 786 Proof Theory
Fall. 4 credits. Not offered 1997-98. Expected to be offered 1998-99. This course will cover basic ideas and methods of proof theory along with major recent developments motivated by computer science and knowledge presentation theory. The topics will include Gentzen style and "natural" derivations, normalization theorems for classical and constructive logics, connections with the typed lambda calculus, Curry-Howard isomorphism, and realizability of proof theory, incompleteness theorems, Lob's theorem, modal logic of formal provability, models of arithmetic, consistency proofs and normalization theorems in typed lambda calculus.

[MATH 787 Set Theory

MATH 788 Topics in Applied Logic
Fall. 4 credits. This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automatic theorem proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), non-standard analysis. The student is expected to be familiar with the standard results in graduate level mathematical logic.

MATH 790 Supervised Reading and Research
Variable credit (maximum 6 each term).

MATH 901-902 Oliver Club Seminar
Fall. 4 credits.

MATH 903-904 Olivetti Club Seminar
Fall. 4 credits.

MATH 905-906 Occasional Seminar on Undergraduate Education
Fall. 4 credits.

MATH 911-912 Seminar in Analysis
Fall. 4 credits. The student is expected to be familiar with the standard results in standard analysis. The student is expected to be familiar with the standard results in standard analysis.

MATH 912-914 Seminar in Dynamics and Geometry
Fall. 4 credits.

MATH 949-950 Seminar in Lie Groups
Fall. 4 credits.

MATH 951-952 Topics in Topology and Geometry
Fall. 4 credits.

MATH 967-968 Seminar in Combinatorial and Algebraic Geometry
Fall. 4 credits.

MUSIC

MUSIC 467

MUSICAL PERFORMANCE AND CONCERTS
Musical performance is an integral part of Cornell's cultural life and an essential part of its undergraduate academic programs in music. The department encourages music making through its offerings in individual instruction and through musical organizations and ensembles that are directed and trained by members of the faculty. Students from all colleges and departments of the university join with music majors in all of these ensembles:

Vocal ensembles
Cornell Chamber Singers
Cornell Choirale
Cornell University Chorus
Cornell University Glee Club
Sage Chapel Choir

Instrumental ensembles
Chamber Music Ensembles
Cornell Chamber Orchestra
Cornell Experimental Lab Ensemble
Cornell Gamelan
Cornell Jazz Ensembles
Cornell Symphony Orchestra
Cornell University Chamber Winds
Cornell University Symphonic Band
Cornell University Wind Ensemble
Cornell University Wind Symphony

Information about requirements, rehearsal hours, and conditions for academic credit can be found in the following listings for the Department of Music. Announcements of auditions are posted during registration each fall term and, where appropriate, each spring term as well.

The university is also home to many student-run musical organizations, including the Big Red Marching Band and Big Red Pep Band, the Cornell Savoyards, and several a cappella groups. Information about these groups, too, is available through the Department of Music office, 104 Lincoln Hall (255-4097). The Department of Music and the Faculty Committee on Music sponsor more than one hundred formal and informal concerts each year by Cornell's ensembles, faculty, and students and by distinguished visiting artists. The great majority of concerts are free and open to the public. Lectures and concerts are listed on the World Wide Web (http://www.arts.cornell.edu/music/).

More information is available through the events office (255-4760).

NONMAJORS
In addition to its performing, instructional, and concert activities, the department offers numerous courses for nonmajors, many of which carry no prerequisites and presuppose no previous formal training in music. Consult the following course listings, and for further information apply to the department office, 104 Lincoln Hall (255-4097), or to the director of undergraduate studies.

THE MAJOR
Two options are available to the student planning to major in music. Each carries the study of music to an advanced level through the integration of performance, music theory, and music history. Option I is a more general course, not necessarily oriented toward eventual graduate or professional work in music. Option II is a more specialized and concentrated program, suitable for students who want to prepare for graduate or professional work in music.
All students contemplating a major in music under either option should arrange for placement examinations and advising in the department as early as possible, usually during the freshman orientation period. Information is available from the director of undergraduate studies. All students are expected to have chosen an adviser from among the department faculty at the time of application for major status.

**Option I** presupposes some musical background before entering Cornell. Prerequisites for admission into the Option II program are the completion of Music 152 and 154, at the latest by the end of the sophomore year (the freshman year is preferable), with an overall grade of B- or better in each course. For further information, apply to the director of undergraduate studies.

The requirements for the Bachelor of Arts degree with a major in music under Option I comprise the following:

1. in music theory: Music 251, 252, 253, 254, 351, 353, and one of the following: Music 451, 452, 453, 454, 455, 456.
2. in music credit courses numbered 381 or above listed under Music History Courses for Majors. At least three of these courses must be drawn from the four-course sequence Music 381–384.
3. in performance: four semesters of participation in a musical organization or ensemble sponsored by the Department of Music (Music 331 through 346 and 421 through 446).

**Option II** presupposes considerable musical study before entering Cornell. Prerequisites for admission into the Option II program are previous acceptance as an Option I major and satisfactory completion of Music 252 and 254, normally by the end of the sophomore year. Students must apply to the department for formal acceptance as an Option II major. An Option II major concentrates in one of the three areas listed below. For Option II in performance, exceptional promise must be demonstrated, in part by a successful solo recital before the end of the sophomore year.

The requirements for the Bachelor of Arts degree with a major in music under Option II are:

1. completion of all the requirements for Option I, except as noted below, and
2. in addition:
   a) in performance:
      1) the requirement for four semesters of participation in a musical organization or ensemble is waived (but such majors are expected to participate actively in chamber and other ensembles sponsored by the department);
      2) sixteen credits in individual instruction in the student’s major instrument or voice, earned by taking Music 391–392 throughout the junior and senior years.
   b) in theory or composition or in history: twelve additional credits in this area of concentration at the 300 level or above, of which either four may be in either Music 301 or 302 or taken when once for four credits, or eight may be earned in Music 401–402.

**Honors.** The honors program in music is intended to provide special distinction for the department's ablest undergraduate majors. Qualified students are invited to become candidates by the faculty early in the second semester of their junior year. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. In the senior year the candidate enrolls in Music 401–402 with the chair of the honors committee as instructor. Candidates will be encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities, resulting in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. A comprehensive examination administered by the candidate’s committee is held not later than May 1. The level of honors conferred is based primarily on the candidate’s performance in the honors program, and secondarily on the candidate's overall record in departmental courses and activities.

**Distribution Requirement**

College of Arts and Sciences students may apply either one or two Music Department courses toward the distribution requirement in Group 4 (humanities and the arts). Neither freshman seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least 3 credits, and it may not be in music courses numbered 321–322, 391–392 or in organizations and ensembles (Music 331 through 346 and 421 through 446).

If two music courses are counted for distribution, they must total at least 6 credits, and at least one of the courses must be academic, not performance-oriented. The second "course," however, may comprise either up to 4 credits earned in performance (Music 321–322, 391–392) or up to 4 credits earned in organizations and ensembles (Music 331 through 346 and 421 through 446), but not both.

**Facilities**

**Music Library.** The Music Library, in Lincoln Hall, has an excellent collection of standard research tools. Its holdings consist of approximately one hundred-twenty thousand books, periodicals, and scores and forty-five thousand sound and video recordings. Particularly noteworthy are the collections of opera from all periods; twentieth-century scores and recordings; a large microfilm collection of Renaissance sources; both theoretical and musical; and a collection of eighteenth-century chamber music. In addition, the Rare Books section is available in the rare books area of the library.

**Concert Halls.** The Department of Music sponsors more than one hundred concerts annually. Cornell's principal concert halls are Bailey Hall Auditorium (about 2,000), Alice Statler Auditorium (about 900), Sage Chapel (about 800) and Barnes Hall Auditorium (about 400).

**Rehearsal Spaces.** The orchestras and bands rehearse in Bailey Hall, Barnes Hall, and Barton Hall; the Jazz Ensembles, Gamelan, and Chamber Ensembles rehearse in Lincoln Hall; and the choral ensembles are quartered in Sage Chapel. Eleven practice studios in Lincoln Hall are available for individual practice by pianists, vocalists, and instrumentalists.

Throughout the department, there are two concert grand pianos (Steinway and Mason & Hamlin), two eighteenth-century fortepiano replicas (copies of Johann Andreas Stein and Anton Walter), an original Broadwood grand piano from 1827, a Bösendorfer grand piano from 1842, one Dowd and one Hubbard harpsichord, and a Challis clavichord. Barnes Hall houses a chamber organ and an organ. A large Aeolian Skinner Organ is located in Sage Chapel, and there is a Helmuth Wolff tracker organ in Anabel Taylor Chapel.

**Digital/Electronic Equipment.** A Macintosh Master studio is available for graduate student use (hours to be arranged) and occasional independent study use. The software used is Performer, Mosaic, Finale, and several Opcode patch editor/librarians. The instruments include a Yamaha KX88 MIDI Controller keyboard, a Yamaha TX802 FM synthesizer, an E-Mu Proteus XR, a Casio FS 10M sampler, and various other synthesizers. In addition, there are two MIDI work stations with additional instruments, including a Korg M1 synthesizer and an Akai 5900 sampler.

**Freshman Seminars**

**MUSIC 111 Sound, Sense, and Ideas**

Section I—"High" and "Low": The Valuing of Music in Western Society. Fall and spring. 3 credits. J. Scheinbaum.

Implicit and explicit value judgments about genres, styles, and individual pieces of music are often made without an examination of the reasoning and ideologies behind them. This seminar will explore various contexts of conventional divisions into "high" and "low" music. We will investigate and write about various repertoires that challenge the boundaries between these categories, thereby questioning the weight of the usual kinds of value judgments. Composers and repertoires to be studied include the 20th-century avant garde, the songs of the Beatles, and progressive rock.

Section II—Love Songs from the Middle Ages to the Millennium. Fall. 3 credits. J. Peraino.

In Western culture, the emotion of love and the act of singing have a long history of association. Consequently, love songs encode much about the cultural beliefs and values of their time. This course examines various conceptions of love (romantic, platonic, homoerotic), the construction of gender, and the expressions of these concepts in music over many centuries, beginning with the courtly love songs of the troubadours and ending with present-day rock genres.

**MUSIC 115 Popular Musics Today**

Fall. 3 credits. Not offered 1997–98.
INTRODUCTORY COURSES

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

MUSIC 100 Elements of Musical Notation
Fall or spring. 1 credit. Prerequisite: concurrent enrollment in any three-credit course in music and permission of instructor. D. Conn.
This four-week course, given at the beginning of each term, will fulfill the requirement of basic pitch and rhythm and reading skills needed for introductory courses (except 101 and 103) and 200-level courses with prerequisites. The material covered in this course is no longer part of Music 105.

MUSIC 101 The Art of Music
Fall. 3 credits. M W 11:15-12:05. 1-hour disc to be arranged. M. Hatch.

MUSIC 102 Introduction to the Musics of the World
Spring. 3 credits. No previous training in music required. J. Peraino.
Exploration of musical genres from selected regions of the world. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments and projects that investigate the cultural context of music are major components of the course.

MUSIC 105 Introduction to Music Theory
Fall or summer, spring. 3 credits. Fall, T R 10:10-11:00 plus two hours to be arranged. Experience in reading music is highly recommended. Fall, W. Cowdery; spring, D. Yearsley.
An elementary, self-contained introduction to music theory emphasizing fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads, basic concepts of tonality; extensive listening to music in various styles; analysis of representative works of Bach, Mozart, Haydn and Beethoven.

MUSIC 106 Introduction to Music Theory
3 credits. Prerequisite: Music 105 with grade of B- or better. Limited to 50 students. Not offered 1997-98.

MUSIC 107 Medieval to Mozart
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. Not offered 1997-98.

MUSIC 108 Beethoven to Bernstein
Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. N. Zaskaw
A survey of Western art music in all genres from the beginning of the 19th century to the present.

MUSIC 120 Learning Music through Digital Technology
Fall or spring. 3 credits. Enrollment limited. Prerequisite: permission of instructor. D. Bos. A computer music course that explores various aspects of music and technology. This course uses selected commercially available technological resources to produce live music. The student is expected to master the Macintosh computer, several music software programs, and several synthesizers using MIDI. The ability to read music is helpful but not necessary. There are no papers to write; homework is presented in three classroom concerts. The final is a live presentation of the student's final project in a concert open to the public.

MUSIC 201 Diction for Oral Presentation
(Fall) or spring. 1 credit. Prerequisite: permission of instructor. Not offered fall 1997. J. Kellock.
Introduction to the use of the International Phonetic Alphabet for pronunciation of English, French, German, and Italian. Open to singers and non-singers. Assignments will vary according to musical experience. Singing students will be expected to perform their assignments. Students taking voice lessons for credit (321a-322a) must take Music 201 by the end of the third semester of lessons.

MUSIC 205 The Art of Music #
Fall. 3 credits. Nonmajors. Not offered 1997-98.
A course designed to give non-music majors a broad introduction to Western music as an art form. The course will emphasize the role of music in society and the way various musical styles have developed from historical, social and cultural factors.

MUSIC 210 Introduction to Music Theory
Fall or spring. 3 credits. Fall, T R 10:15-11:05. 1-hour disc to be arranged. M. Hatch.
Detailed study of the fundamental elements of tonal music: rhythm, scales, intervals, triads, melodic principles and 2-part counterpoint; diatonic harmony and 4-part voice leading in root position and first inversion; analysis of phrase and period structure.

MUSIC 220 Learning Counterpoint through Digital Technology
Spring. 3 credits. Enrollment limited. Prerequisite: 152 or permission of instructor. T R 2:55-4:10. D. Borden.
This course is a study of traditional contrapuntal techniques from the fourteenth century to the present, with emphasis on invention and fugue. Synthesizers, samplers, MIDI, and music software will be covered. There are three classroom concerts, some analysis and a final public concert.

MUSIC 225 Learning Counterpoint through Digital Technology
Spring. 3 credits. Enrollment limited. Prerequisite: concurrent enrollment in or previous credit for Music 152. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 154, and failure in none of the individual musicianship components of the course, are required for admission to the music major. 3 hrs. TBA. E. Murray.
Sight singing: longer melodies in 3 clefs, including diatonic modulation. Keyboard: diatonic chord progressions and sequences. Dictation: intervals, rhythms; longer melodies; chorale phrases with diatonic modulation.

MUSIC 401 Introduction to Improvisational Theory
Fall. 2 credits. Prerequisite: permiss­ion of instructor. Intended for performers in "jazz" and related styles. Not offered 1997-98. E. Hester.
Tonal, modal, and blues harmonic resources, and the formal structures in which they are embodied. Development of improvisational skills and creation of spontaneous compositions.

MUSIC 403 Tonal Theory II
Spring. 3 credits. Prerequisites: Music 152, or equivalent. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 154, and failure in none of the individual musicianship components of the course, are required for admission to the music major. 3 hrs. TBA. E. Murray.

MUSIC 154 Musicianship II
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 152. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 154, and failure in none of the individual musicianship components of the course, are required for admission to the music major. 3 hrs. TBA. E. Murray.
Sight singing: longer melodies in 3 clefs, including diatonic modulation. Keyboard: diatonic chord progressions and sequences. Dictation: intervals, rhythms; longer melodies; chorale phrases with diatonic modulation.

MUSIC 404 Tonal Theory IV
Spring. 3 credits. Prerequisites: Music 251 and 253 or equivalent, and concurrent enrollment in Music 254. M W F 10:10-11:00. J. Webster.
Continuation of diatonic and introduction to harmonic harmony; species counterpoint; introduction to counterpoint in the style of Bach; composition in small forms.

MUSIC 251 Tonal Theory III
Fall. 3 credits. Prerequisites: Music 152 and 154 or equivalent, and concurrent enrollment in Music 253. M W F 10:10-11:00. J. Webster.
Study of and composition in larger forms, including sonata form. Study of harmonic harmony, voice-leading, and modulation; composition in chromatic style.

MUSIC 253 Musicianship III
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 251. 2 hours TBA. J. Webster.
MUSIC 254 Musicanship IV
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 252. 2 hours TBA. J. Webster. Sight singing; melodies in 4 clefs, including modal and chromatic modulation. Keyboard: chromatic sequences, chromatic modulations, improvised modulations employing diatonic pivot chords. Dictation: intervals, rhythms, short melodies and short, diatonic chorale phrases. Score reading: 4 parts, including transposing instruments. Musical terms: other terms in French, German, and Italian.

MUSIC 351 Materials of Twentieth-Century Music
Fall. 3 credits. Prerequisite: Music 252 and 254 or equivalent, and concurrent enrollment in Music 353. MWF 10:10–11:00. R. Sierra. Introduction to some techniques of twentieth-century music, including extended tonality, modes, twelve-tone technique, set theory and new approaches to melody and rhythm. Analysis of representative works by Debussy, Bartók, Webern, Hindemith, Schoenberg, Stravinsky, and others.

MUSIC 353 Musicanship V
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 351. 2 hours TBA. R. Sierra. Sight singing: advanced chromatic, twelve-tone, and atonal melodies in 4 clefs. Keyboard: continued chromatic harmony; improvised chromatic modulations. Dictation: continued chromatic harmony, atonal sets and melodies; 2-part counterpoint. Score reading: 4 clefs, transpositions. Music terms: twentieth-century terms.

[MUSIC 451 Counterpoint
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1997–98. S. Stucky. Composition in the polyphonic vocal style of the late Renaissance.

[MUSIC 452 Topics in Music Analysis
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1997–98. J. Webster. A survey of important analytical approaches to tonal music, including thematic-motivic relations, phrase-rhythm, large-scale paragraph construction, structural-tonal voice-leading, and relations among the movements in a multiview movement.

[MUSIC 453 Introduction to Improvisational Theory
Fall. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1997–98. K. Hester. Study and performance of modal, modal, and blues harmonic resources; introduction to the formal structures in which these resources are embodied. Includes ear training, work at the keyboard, composing short pieces, and analyzing selected representative works of popular music and African-American art music from 1940 to 1970.

MUSIC 454 Composition
Fall. 4 credits. Prerequisite: Music 251 or permission of instructor. W 1:25–4:25. D. Borden. Using MIDI and Digital Audio, non-linear methods of musical composition are explored. In addition, interdisciplinary projects are carried out in conjunction with students from the Film Program, Dance Program, and Computer Animation Projects in other departments. The collaboration receive public performances. Live performances can use corporate instruments as well as electronic ones.

MUSIC 455 Conducting
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. S. Tucker. Fundamentals of score reading, score analysis, rehearsal procedures and conducting technique; instrumental and choral contexts.

[MUSIC 458 Orchestration
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1997–98. R. Sierra. Orchestration based on nineteenth- and twentieth-century models.

Music in History and Culture

MUSIC 221 History of Rock Music
Fall. 3 credits. No previous training in music required. J. Peraino. This course examines the development and cultural significance of rock music from its origins to present-day genres of alternative rock and hip hop.

MUSIC 222 A Survey of Jazz
Spring. 3 credits. Enrollment limited. K. Hester. This course will trace the evolution of jazz historically from its African roots to the current diverse spectrum of improvisational styles that form popular, Neoclassic, and innovative contemporary jazz music.

MUSIC 245 Gamelan in Indonesian History and Culture
Fall or spring. 3 credits. Permission of instructor. No previous knowledge of musical notation or performance experience necessary. MWF 1:25–2:15. M. Hatch, fall; J. Mrázek, spring. A survey of Indonesian music through the art. Elementary techniques of performance on the gamelan will be integrated with local concert offerings and local concert offerings.

MUSIC 251 Bach and Handel #
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1997–98. W. Kennedy and C. Kaske. The music of, and the social structures supporting, large instrumental ensembles in the Western world, including Italian court festivals of the 16th century, string bands of the 17th century, Lully's ascendency at Paris and Versailles, and music of Purcell, Corelli, Vivaldi, Bach, Handel, Haydn, Mozart, Beethoven, Schubert, Schumann, Mendelssohn, Berlioz, Liszt, Wagner, Brahms, Tchaikovsky, Bruckner, Mahler, Strauss, Stravinsky, Schoenberg, Webern, Bartók, Shostakovitch, Messiaen, Copland, Carter, Tower, Stucky, Sierra, and others.

MUSIC 390 Culture of Renaissance II
(also Comp. Lit. 362, Eng. 325, Hist. 364, Art H. 351)

Music History Courses for Majors and Qualified Non-Majors

Prerequisite: Music 152 or permission of instructor. Intended primarily for music majors, these courses investigate selected topics and repertories from each period in some detail. Each course includes lectures, readings, oral and written papers, and analyses.
MUSIC 374 Opera and Culture (also Gerst 374 and Itala 374)
Spring. 4 credits. Prerequisite: any three-credit music course or proficiency in German or Italian. A. Groos.
This course is designed to explore interrelationships between opera and cultural practice, using examples principally from the German and Italian repertories (e.g., Mozart, Wagner, Verdi, Puccini, Strauss). Lectures and discussion will examine operatic representations of central issues in the emergence of modern culture in the late eighteenth and nineteenth centuries: politics and national identity, issues of gender and sexuality, orientalism, representations of madness and disease. Depending on student interest, the final segment of the semester may extend our focus into twentieth-century opera or other media such as film and theatre.
MUSIC 381 Music in Western Europe to 1700
Fall. 4 credits. T R 10:10-11:25. R. Harris-Warrick.
Western European music from the Middle Ages to the early Baroque, including Gregorian chant, secular monophony, the development of polyphony, the birth of opera, and the rise of independent instrumental practice.

MUSIC 382 Music of the Eighteenth Century
Spring. 4 credits. J. Webster.
Music in Western and Central Europe and North America from Bach, Handel and Vivaldi to Haydn and Mozart, including comic and serious opera, church music, concert music, and social music.

MUSIC 383 Music of the Nineteenth Century
A chronological survey of nineteenth-century music from Beethoven through Puccini including reference to its cultural and historical context.

MUSIC 384 Music of the Twentieth Century
A systematic study of music from the turn of the century to the present. Historical context will be an integral part of the course.

MUSIC 388 Historical Performance Practicum
The study of 18th- and 19th-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.

MUSIC 398-399 Independent Study in Music History
398, fall; 399, spring. 4 credits. Prerequisite: Music 152 and permission of instructor. Staff.
Advanced study of various topics in music history. Students enrolling in Music 398-399 participate in, but do not register for, an approved 200-level music history course and, in addition, pursue independent research and writing projects.

MUSIC 489 African American Music Innovators (also ASARC 489)
Fall. 4 credits. Permission of instructor. K. Hester.
This course examines and experiments with methods of analyzing, appreciating, and understanding innovative art forms. Students will write three reports (with transcribed music examples or some form of accurate analytical charting, where appropriate), utilizing three different perspectives on African American Music.

MUSIC 490 American Musical Theatre
(also English 454)
Spring. 4 credits. S. McMillin.
See English 454 for description.

MUSIC 492 Music and Queer Identity
Spring. 4 credits. Prerequisite: Music 152 or permission of instructor. J. Peraino.
Throughout history music has been associated with "otherness" in Western cultures. Appropriately, lesbian and gay individuals and communities have turned to music as a means of expressing and negotiating their "queer" identity within status-quo culture. This course examines how and why music encodes "queerness" by focusing on various musical genres (such as opera, disco, women's music, country) and composer/musicians (such as Franz Schubert, Judy Garland, David Bowie) that have become significant for various lesbian and gay communities. The course will also examine the reasons behind the general popularity of queer-coded but "straight-identified" performers such as Elvis Presley, Prince, and Michael Jackson.

Independent Study

MUSIC 301-302 Independent Study in Music
301, fall; 302, spring. Credit to be arranged. Prerequisite: departmental approval. Presupposes experience in the proposed area of study. Staff.

Honors Program

MUSIC 401-402 Honors in Music
401, fall; 402, spring. 4 credits each term. Limited to honors candidates in their senior year. Staff.

Musical Performance

Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, and some brass and woodwind instruments to those students advanced enough to do college-level work in these instruments. Lessons are available by audition only. They may be taken either without credit or, through Music 321-322, 331 through 340, 391-392, or 421 through 448. These 3 credits must be earned prior to, or simultaneously with the first 2 credits in 321-322; they cannot be applied retroactively. Transfer credit for appropriate music courses already taken elsewhere may be used to satisfy this requirement with the approval of the department.

Lessons taken outside Cornell. Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of Music 321h-322h and contact the Music Department office.

MUSIC 321-322 Individual Instruction in Voice, Organ, Harpsichord, Piano, Strings, Woodwinds, and Brass
Prerequisite: advanced students may register only after a successful audition with the instructor, usually scheduled during the first week of classes, and will receive credit only as described under "Earning credit," above. Students may register for this course in successive years. Students, at the sole discretion of the instructor, earn 2 credits each term for a one-hour lesson (or two half-hour lessons) weekly accompanied by an appropriate practice schedule.

MUSIC 321a-322a Individual Instruction in Voice
321a, fall; 322a, spring. 2 credits each term. Prerequisite: successful audition during registration. Music 201 must be taken by the end of the third semester of lessons. Limited enrollment. Fall. H. Boatwright; spring, J. Kellock.
The Vocal Coaching Program offers noncredit lessons to members of the choral ensembles.
MUSIC 321b-322b Individual Instruction in Organ
321b, fall; 322b, spring. 2 credits each term. Prerequisite: successful audition. Fall, staff; spring, A. Richards.

MUSIC 321c-322c Individual Instruction in Piano
321c fall; 322c, spring. 2 credits each term. Prerequisite: successful audition. M. Bilson, X. Bjerken and staff.

MUSIC 321d-322d Individual Instruction in Harpsichord
321d, fall; 322d, spring. 2 credits each term. Prerequisite: successful audition. Fall, staff; spring, D. Yearsley.

[MUSIC 321e-322e Individual Instruction in Violin or Viola
321e, fall; 322e, spring. 2 credits each term. Prerequisite: successful audition. Not offered 1997-98.]

[MUSIC 321f-322f Individual Instruction in Violin or Viola
321f, fall; 322f, spring. 2 credits each term. Prerequisite: successful audition. Not offered 1997-98.]

MUSIC 321g-322g Individual Instruction in Brass
321g, fall; 322g, spring. 2 credits each term. Prerequisite: successful audition. Not offered 1997-98.

MUSIC 321h-322h Individual Instruction outside Cornell
321h, fall; 322h, spring. 2 credits each term. Prerequisite: successful audition. Coordinator: D. Conn.

MUSIC 321i-322i Individual Instruction in Windwinds
321i, fall; 322i, spring. 2 credits each term. Prerequisite: successful audition. D. Conn.

MUSIC 391-392 Advanced Individual Instruction
391, fall; 392, spring. 4 credits each term. Open only to juniors and seniors majoring in music under Option II with concentration in performance and to graduate students. Option II majors whose lessons must be taken outside Cornell may apply to the department for financial assistance toward the cost of lessons; $225 per semester will normally be awarded to such students and a larger amount may be awarded under certain circumstances. Music 391 is not a prerequisite to 392.

MUSICAL ORGANIZATIONS AND ENSEMBLES

Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admission is by audition only, except that the Sage Chapel Choir and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than 8 credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit.

MUSIC 331-332 Sage Chapel Choir
331, fall or summer; 332, spring. 1 credit. No audition for admission. M 7–9. T. Folan.

MUSIC 333-334 Cornell Chorus or Glee Club
333, fall; 334, spring. 1 credit. Prerequisite: permission of instructor. Chorus (treble voices): W 5:15–7:15 p.m. plus 2 hours to be arranged. Glee Club (mens voices): W 7:30–9:30 p.m., plus 2 hours to be arranged. S. Tucker.

MUSIC 335-336 Cornell Symphony Orchestra
335, fall; 336, spring. 1 credit. Prerequisite: permission of instructor. W 7:30–16:00 p.m. E. Murray.

MUSIC 337 Wind Symphony
Fall. 1 credit. Prerequisite: permission of instructor. M W 4:45–6:30. M. Scatterday and D. Conn.

MUSIC 338 Symphonic Band
Spring. 1 credit. Prerequisite: permission of instructor. M W 4:45–6:30. D. Conn.

MUSIC 339-340 Cornell Jazz Ensembles
339, fall; 340, spring. 1 credit. Prerequisite: permission of instructor. W 6–8 p.m. K. Hester.

MUSIC 342 Wind Ensemble
Spring. 1 credit. Prerequisite: permission of instructor. M 7:30–9:30 and R 4:45–6:30. M. Scatterday.

[MUSIC 345-346 Introduction to the Gamelan @
345 fall. 346 spring. 1 credit. Enrollment limited. Prerequisite: permission of instructor. M W 2:30–3:20. Not offered 1997-98. Concentrated instruction for beginning students in elementary techniques of performance on the Indonesian gamelan. Music 245 is a 3-credit course that complements the instruction in gamelan by an introduction to Indonesian history and cultures.]

MUSIC 421-422 Cornell Chamber Orchestra
421, fall; 422 spring. 1 credit. Prerequisite: permission of instructor. R 5–6:30 p.m. J. Hsu.

Study and performance of the chamber symphonies of Haydn, Mozart, and their contemporaries. For strings, woodwinds, and horns. More recent music may also be included in the spring.

MUSIC 437-438 Chamber Winds
437, fall; 438, spring. 1 credit each term. Prerequisites: enrollment in Symphonic Band, Wind Symphony or Wind Ensemble in the same semester as this course AND permission of instructor only. Fall, T R 4:45–6:30 p.m. Spring, T F 4:45–6:30 p.m. M. Scatterday, D. Conn.

A flexible instrumentation ensemble performing original woodwind, brass, and percussion music from Gabrieli brass choirs and Mozart serenades through more contemporary works such as Stravinsky’s Octet or premiers of works. The ensemble will perform on wind symphony, symphonic band and wind ensemble concerts in addition to several chamber concerts throughout the year.

MUSIC 439-440 Experimental Lab Ensemble
439 fall; 440 spring. 1 credit each term. Permission of instructor. W 8:30–10:30 p.m. K. Hester.

MUSIC 441-442 Chamber Music Ensemble
441, fall; 442, spring. 1 credit. Prerequisite: permission of instructor. J. Hsu.

Study and perform chamber music works from duos to octets for pianists, string and wind players.

MUSIC 443-444 Chorale
443 fall; 444 spring. 1 credit each term. Prerequisite: permission of instructor. F 4:30–6:15 p.m. R. Riley.

Study and performance of selected choral music for mixed voices.

MUSIC 445-446 Cornell Gamelan Ensemble
445 fall; 446 spring. 1 credit each term. Enrollment limited. Prerequisite: Music 245 or 345–346, or permission of instructor. R 7:30–10:00 p.m. Fall, M. Hatch; spring, J. Mrázek.

Advanced performance on the Javanese gamelan. Tape recordings of gamelan and elementary number notation are provided. Some instruction by Indonesian musicians is offered in most years.

MUSIC 447-448 Chamber Singers
447, fall; 448, spring. 1 credit each term. Prerequisite: permission of instructor. F 4:15–6:15. Plus 2 hours to be arranged. S. Tucker.

GRADUATE COURSES

Open to qualified undergraduates with permission of instructor.

MUSIC 601 Introduction to Bibliography and Research
Fall. 4 credits. M 1:25–4. L. Coral. This course explores the nature of the discipline and introduces the many types of bibliographic tools, both printed and electronic, needed to pursue research in music.

[MUSIC 602 Analytical Technique
Spring. 4 credits. Not offered 1997-98. J. Webster.

A critical survey of various analytical methods in current use. Frequent analytical assignments and class presentations.]

[MUSIC 603 Editorial Practice
Spring. 4 credits. Not offered 1997-98.]

[MUSIC 604 Ethnomusicology: Areas of Study and Methods of Analysis
Spring. 4 credits. Open to graduate students in anthropology, linguistics, psychology, sociology, and other cognate fields with permission of instructor. Not offered 1997–98. M. Hatch.

Major aspects of research into musical cultures of the world. Problems, theories, and methods, especially those affecting analytical terminology, transcription and analysis of sound events, and fieldwork.]
MUSIC 605 Graduate Seminar in European Cultural and Intellectual History (also History 605) Fall. 4 credits. M. Steinberg. See History 605 for description.

MUSIC 620 Introduction to MIDI Techniques Spring. 4 credits. Permission of instructor. Directions. Borden. This course is an introduction to MIDI for students who are already at an advanced level in music composition.

[MUSIC 622 Historical Performance Practicum Spring. 4 credits. Not offered 1997-98. M. Bilson. The study of 18th- and 19th-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.]

[MUSIC 653 Topics in Tonal Theory and Analysis Spring. 4 credits. Not offered 1997-98.]

[MUSIC 654 Topics in Post-tonal Theory and Analysis Spring. 4 credits. Not offered 1997-98.]

MUSIC 657-658 Composition 657, fall; 658, spring. 4 credits each term. F 1:25-4:00 p.m. plus 1 hour to be arranged. R. Sierra.

[MUSIC 674 German Opera (also German Studies 672) Fall. 4 credits. Not offered 1997-98. A. Groos. See German Studies for description.]

[MUSIC 677 Mozart: His Life, Works, and Times (also German 757) Fall. 4 credits. Not offered 1997-98.]

[MUSIC 680 Topics in Ethnomusicology Spring. 4 credits. M. Hatch. Not offered 1997-98.]

[MUSIC 681 Seminar in Medieval Music Fall. 4 credits. M. Hatch. Not offered 1997-98.]

MUSIC 686 Seminar in Baroque Music Fall. 4 credits. N. Zaslav. Topic: the music of J. S. Bach. Recent controversies over Bach's career and music, including conflicting approaches to his biography, dating his works, the meaning of The Musical Offering, the size and make-up of his performing forces, harpsichord vs. piano, anti-Semites in the Passion. According to St. John, and the status of The Brandenburg Concertos as absolute or program music.

MUSIC 688 Seminar in Classical Music Fall. 4 credits. J. Webster. Topic: the music of Haydn.

MUSIC 690 Seminar in Music of the Twentieth Century Spring. 4 credits. R. Sierra. Topic: the music of Gyorgy Ligeti.

MUSIC 691-692 Historical Performance 691, fall; 692, spring. 4 credits each term. Prerequisite: permission of instructor. Hours to be arranged. M. Bilson. Lessons on the major instrument with supplementary study and research on related subjects.

[MUSIC 693 Seminar in Performance Practice Fall or spring. 4 credits. Not offered 1997-98.]

MUSIC 697-698 Independent Study and Research 697, fall; 698, spring. Credit to be arranged. Staff.

[MUSIC 785-786 History of Music Theory 785, fall; 786, spring. 4 credits each term. Not offered 1997-98.]

MUSIC 787 History and Criticism Spring. 4 credits. A. Richards. Topic for 1998: Crossing the Classic/Romantic Divide. An introduction to late 18th- and early 19th-century German aesthetics and music criticism, considering the impact of English thought and literature to Germany, and questioning notions of periodization and the canon, specifically the problematic division between 'classical' and 'romantic' as it has been applied to the repertory from this period. Topics include the sublime and the beautiful, the picturesque and the grotesque, landscape aesthetics and the English garden, Witz and the fragment, fantasy, constructions of gender, and Gothic horror.

[MUSIC 789 Liturgical Chant in the West Spring. 4 credits. Not offered 1997-98.]

MUSIC 901-902 Thesis Research 901, fall; 902, spring. Up to 6 credits each term, to be arranged. Offered for S-U only. Limited to doctoral students in music who have passed the Admission-to-Candidacy Exam.

Near Eastern Studies: General Information

Near Eastern Studies 473

NEAR EASTERN STUDIES

R. Brann, chair; C. Baker, A. Gade, M. Litvak, D. Owen, J. Webster. (director of Undergraduate Studies) A. Gade, J. Webster, M. Litvak, D. Powers, D. I. Owen, (director of the Program of Jewish Studies); D. Powers, (director of undergraduate studies). All 200 or 300-level offerings treat the Near East from the dawn of human history to the present and emphasize methods in the social sciences/history. Any two Near Eastern Studies civilization or literature courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the humanities. NES 197, 198 or a 200-level survey course plus any other Near Eastern studies course will constitute a sequence to fulfill the distribution requirement in either social sciences/history or humanities, depending on the second course used in combination with 197, 198 (or a 200-level survey course). All 200 or 300-level language courses may fulfill the humanities requirement.

The Major

The precise sequence and combination of courses chosen to fulfill the major is selected in consultation with the student's adviser. All majors must satisfy the following requirements (no course may be used to satisfy two requirements; S-U options not permitted):

A. Qualification in two Near Eastern languages or Proficiency in one.

B. Nine three- or four-credit NES courses, which must include the following:

1. NES 197 or 198 (when NES 197-198 are not offered, students may substitute a 200-level survey course with the approval of the director of undergraduate studies).

2. Two 200-level NES survey courses, one whose chronological parameters fall within the period 3000 B.C.E to 600 C.E. and one whose chronological parameters fall within the period 600 C.E. to the present. The following are examples (a complete list can be obtained in the department office):

3000 B.C.E to 600 C.E.

NES 223, Introduction to the Bible
NES 263, Introduction to Biblical History and Archaeology
NES 248, Introduction to Classical Jewish History

600 C.E. to the present

NES 233, The Lyrics of Love and Death: Medieval Hebrew and Arabic Poetry in Translation
NES 257, Islamic History 600-1258
NES 258, Islamic History 1258-1914
NES 294, Modern History of the Near East

3. At least two NES courses at the 300 level or above (one of which may be NES 301, 302, 311, or 312).

Prospective majors should discuss their plans with the director of undergraduate studies before formally enrolling in the department. To qualify as a major, a cumulative grade average of C or better is required.

Honors. Candidates for the degree of Bachelor of Arts with honors in Near Eastern Studies must fulfill the requirements for the appropriate major study and enroll in the honors course, NES 499, in the fall and spring semesters of their senior year. For admission to the honors program, candidates must have a cumulative average of B+ or better and have demonstrated superior performance overall in Near Eastern Studies courses. After consulting their major adviser, candidates should submit...
an outline of their proposed honors work to
the department during the second semester of
their junior year.

Study abroad. Near Eastern Studies majors
may choose to study in the Near East during
during their junior year. There are various academic
programs in the countries of the Near East that
are recognized by the Department of Near
Eastern Studies and that allow for the transfer
of credit. Archaeological field work on
Cornell-sponsored projects in the Near East
may also qualify for course credit.

Freshman Seminar

NES 108 At the Crossroads of History:
Readings in Modern Hebrew
Literature
Fall. 3 credits. Enrollment limited to 17
students. A. Brener.
The events that gave rise to modern Israel and
continue to shape it today have been only
announced by several decades. Literature, however,
unique in its ability to
create its own special meanings and to convey
truths of the present through writing. In this course we
will explore writings by six major Hebrew
novelists in an attempt to see how significant
moments in modern Jewish history have been
reflected in Hebrew literature of the twentieth
century. Through a specially keyed sequence
of writing assignments, we will focus on the
literary aspects of these works. Students will also
be introduced to the ways in which
library resources can be utilized for research.
All readings in English.

NES 143 Jewish Travelers Through
the Ages
Fall. 3 credits. Enrollment limited to 17

NES 154 Harems, Houris, and Hashshash:
Western Perceptions of the
Middle East
Spring. 3 credits. Enrollment limited to 17
students. D. Powers.
Societies acquire their identities, in part, by
defining themselves in relation to foreigners,
strangers, aliens, or enemies; we divide the
world into the familiar (Europe, the West,
"us") and the strange (the Orient, the East,
"them"). In this course we will explore how
contemporary Western perceptions of the
Middle East have been shaped by the imperial
and colonial experience of the past 150 years.

Language Courses

NES 101-102 Elementary Modern
Hebrew I and II (also Jewish
Studies 105-106)
101, fall; 102, spring. 6 credits each term.
Prerequisite for NES 102: 101 or
permission of instructor. Satisfactory completion
of NES 102 fulfills the qualification portion
of the language requirement. Enrollment
limited to 15 students in each section.
S. Shoer.

Intended for beginners. This course provides
a thorough grounding in reading, writing,
grammar, oral comprehension and speaking.
Students who complete the course will be
able to function in basic situations in a
Hebrew-speaking environment.

NES 111-112 Elementary Arabic I and II
111, fall; 112, spring. Enrollment limited to
15 in each session. 6 credits each term.
Prerequisite for Arabic 112: Arabic 111 or
permission of instructor. M. Younes and
L. White.
The course provides a thorough grounding in
all language skills: listening, speaking,
reading, and writing. Students, with
spoken Arabic and gradually integrates Modern
Standard Arabic in the form of listening and
reading texts. Emphasis will be on learning
the language through using it in meaningful
contexts. The student who successfully
completes the two-semester sequence will be able to:
1) understand and actively participate
in simple conversations involving basic
practical and social situations (introductions,
greetings, school, home and family, work,
simple instructions, etc.); 2) read Arabic
material of limited complexity and variety
(simple narrative and descriptive texts,
directions, etc.); 3) write notes and short letters
describing an event or a personal experience.
It is an important objective of the course
is to familiarize students with basic facts about the
geography, history, and culture of the
Arab world.

NES 201-202 Intermediate Modern
Hebrew I and II (also Jewish
Studies 201-202)
201, fall; 202, spring. Enrollment limited to
15 students in each section. 4 credits each
term. Prerequisites for NES 201, 202 or
permission of instructor; for NES 202, 201 or
permission of instructor. N. Scharf.
A sequel to NES 101-102. Continued
development of reading, writing, grammar,
oral comprehension, and speaking skills. The
course introduces Hebrew literature and
Israeli culture through the use of texts and
audio-visual materials.

NES 211-212 Intermediate Arabic
I and II
211, fall; 212, spring. Enrollment limited to
15 students in each section. 4 credits each
term. Prerequisites: for NES 211, one year
of Arabic or permission of instructor; for
NES 212, 211 or permission of instructor.
M. Younes. L. White.
A sequel to NES 111-112. Continued
development of the four language skills
through extensive use of graded materials
on a wide variety of topics. Increasing attention
will be given to developing native-like
pronunciation and to grammatical accuracy,
but the main focus will be on developing
communication skills. The student who
successfully completes 212 will be able to:
1) understand and express himself or herself
in Arabic in situations beyond the basic needs;
2) read and comprehend written Arabic of
average difficulty; 3) write a letter, a
summary of a report or a reading selection.
An appreciation of Arabic literature and culture
will be sought through the use of authentic
materials.

NES 301-302 Advanced Modern
Hebrew I and II (also Jewish
Studies 301-302)
301, fall; 302, spring. Limited to 15
students. 4 credits each term. Prerequisite for
NES 301: 302 or equivalent, with
permission of instructor. Prerequisite for
NES 302: 301 or equivalent, with
permission of instructor. This sequence
may be used to fulfill the humanities
distribution requirement in literature.
Limited to 15 students. N. Scharf.

Advanced study of Hebrew through the
analysis of literary texts and expository prose.
This course employs a double perspective:
language is viewed through literature and
literature through language. Students will
develop composition skills by studying
language structures, idioms, and various
registers of style.

NES 311 Advanced Arabic I
Fall. 4 credits. Prerequisite: NES 212 or
permission of instructor. Limited to 15
students. M. Younes, L. White.
Students will be introduced to authentic,
unedited Arabic language materials ranging
from poems, short stories, and plays to
newspaper articles dealing with social,
political, and cultural issues. Emphasis will be
on developing fluency in oral expression
through discussions of issues presented in the
reading selections. A primary objective of the
course is the development of writing skills
through free composition exercises in topics
of interest to individual students.

NES 312 Advanced Arabic II
Spring. 4 credits. Prerequisite: NES 311, or permission
of instructor. M. Younes and L. White.
This course is a continuation of NES 311 using
similar but more challenging materials. There
will be more focus on the writing skills,
development of native-like pronunciation,
and accurate use of grammatical structures than in
NES 311. Each student will be required to
make an oral presentation in Arabic on a topic
of his/her choice and submit a written version
of the presentation.

NES 330-331 Hieroglyphic Egyptian I
and II
330, fall; 331, spring. 4 credits. Not

NES 332-334 Elementary Akkadian
I and II (also NES 633-634)
332, fall; 333, spring. 4 credits. Prerequi­
tive for NES 334: 333 or permission of
instructor. D. I. Owen.

An introduction to the cuneiform language of the
Akkadians and Babylonians of ancient
Mesopotamia. Utilizing the inductive method,
students are rapidly introduced to the
grammar and the cuneiform writing system of
Akkadian, through readings in the
Code of Hammurapi, the Descent of Ishtar,
and the Annals of Sennacherib. Secondary
readings on the history and culture of
Mesopotamia provide the background for the
study of the language. Knowledge of another
Semitic language helpful but not essential.

NES 335-336 Readings in Akkadian
Texts (also NES 635-636)
335, fall; 336, spring. 4 credits. Prerequi­
tive for NES 336: 335-334. Prerequisite for
D. I. Owen.

NES 337-338 Ugaritic I and II
337, fall; 338, spring. 4 credits. Prerequi­
tive: Knowledge of another Semitic
language (preferably Hebrew). Not

NES 416 Structure of the Arabic
Language (also LING 416)
Spring. 4 credits. Prerequisite: NES 112 or
one year of Arabic. M. Younes.

The course deals with the history of the
Arabic and its place in the Semitic language family,
the sociolinguistic situation in the Arab world
(diglossia), Arabic phonology (sounds,
emphasize, syllable structure, and related processes), morphology (verb forms and derivational patterns), and syntax (basic sentence structures, cases, and moods).

[NES 420 Readings in Biblical Hebrew Prose (also JWST 420 and RELST 420) @ #]
Fall. 4 credits. Prerequisite: one year of Hebrew, Biblical or modern. Course may be repeated for credit. Not offered 1997–98. G. Rendsburg]

[NES 433 Introductory Sumerian I (also NES 631) @ #]
Spring. 4 credits each semester. Prerequisite: knowledge of Sumerian. Not offered 1997–98. D. Owen.

[NES 434 Introductory Sumerian II (also NES 632) @ #]

[NES 435-436 Aramaic I-II (also JWST 435-436) @ #]
455, fall; 436, spring. 4 credits each term. Prerequisite: knowledge of Hebrew. Enrollment limited to 15 students. Not offered 1997–98. G. Rendsburg.

[NES 631 Introductory Sumerian I (also NES 433)]
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1997–98. D. Owen.

[NES 632 Introductory Sumerian II (also NES 434)]

[NES 633-634 Elementary Akkadian I and II (also NES 233-234) @ #]
633, fall; 634, spring. 4 credits. Prerequisite: NES 634: 633 or permission of instructor. D. I. Owen.
For description, see NES 333 under Near Eastern Languages.

[NES 635-636 Readings in Akkadian Texts (also NES 635) @ #]
635, fall; 636, spring. 4 credits. Not offered 1997–98. G. Rendsburg.

[NES 637-638 Ugaritic I and II (also NES 337-338) @ #]
337, fall; 338, spring. 4 credits. Prerequisite: Knowledge of another semitic language (preferably Hebrew). Not offered 1997–98. G. Rendsburg.

Archaeology

[NES 261 Ancient Seafaring (also Archaeology 275) @ #]

[NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, and RELST 264) @ #]
Fall. 3 credits. Enrollment limited to 50 students. J. Zorn.
A survey of the principal archaeological developments in Canaan/Palestine from the Neolithic period (ca. 9000 B.C.E.) to the Babylonian Exile (586 B.C.E.). Includes an introduction to archaeological methodology utilized in the reconstruction of ancient cultures in the area, as well as the basic bibliography of the field. Emphasis will be placed on the use of archaeological data for the understanding of some major problems in

Israelite history and archaeology, such as the dating of the cultural milieu of the patriarchs, the dating and geographical setting of the Exodus and the Israelite conquest, and the origin and history of the Philistines. Recommended for student planning to participate in excavations in Israel.

[NES 264 Agriculture and Society in the Ancient Near East @ #]

[NES 366 The History and Archaeology of the Ancient Near East (also Archaeology 310) @ #]

[NES 367 The History and Archaeology of Ancient Egypt @ #]

Civilization

[NES 197 Introduction to Near Eastern Civilization (also Jewish Studies 197 and Religious Studies 197) @ #]
Fall. 3 credits each term. Required for all NES department majors. NES 197 and any other NES course will constitute a sequence to fulfill the distribution requirement in either the social sciences or humanities, depending on the second course used in combination with NES 197. D. I. Owen.
This course is designed to provide a basic introductory overview of the various civilizations of the ancient Near Eastern/Biblical world from the advent of writing, ca. 3000 B.C.E. to the conquest of Alexander the Great. Lectures and discussions will focus on four major geographical areas: Mesopotamia, Iraq, Anatolia/Turkey, Syria/Canaan/Syria, Lebanon, Israel, and Egypt. For each area we will consider the development of major religious ideas, social and political institutions, economic structures and literary forms common or unique to each of the peoples who inhabited those areas—Sumerians, Babylonians, Canaanites, Hittites, Phoenicians, Israelis and Egyptians. Readings will be chosen from primary sources in translation and archaeological evidence, and secondary studies. In addition, presentation of slides, videos, and recordings will be integrated into the course.

[NES 234 Arabs and Jews: Cultures in Confluence and Conflict (also JWST 234, RELST 234, and COM L 234) @ #]
Fall. 3 credits. Not offered 1997–98. R. Brann.

[NES 25 Introduction to Islam: Religion, Politics, and Society (also RELST 252) @ #]
Spring. 3 credits. A. Gade.
In this course we shall examine the Islamic religious tradition from its inception to the present. The first part of the course will focus on the message and style of the Qur'an, the life and experience of the Prophet Muhammad, and the major beliefs and practices of Islam. We shall then turn to

political, religious, and legal developments in the early centuries of Islam. The third part of the course will deal with theological, philosophical, and mystical movements in the Islamic empire. Finally we will examine a few specific modern social issues and political movements, such as feminism and Islam, the rise of fundamentalism, and African-American Muslim movements.

[NES 281 Gender and Society in the Muslim Middle East (also Religious Studies 281, Women's Studies 281) @ #]

[NES 339 Muslims, Christians, and Jews in Islamic Spain: Literature and Society (also JWST 339, COM L 334, RELST 334, NES 639, SPANL 339/369) @ #]
Spring. 4 credits. Enrollment limited to 25 students. R. Brann.

Islamic Spain was a frontier society comprising six distinct ethnic-religious communities: Arabs, musulmadan (native descendants of Iberian converts to Islam), Berbers, musta'riban (Arabicized Christians), Jews and "Slaves" (European slave soldiers and their descendants). This first part of the course will focus on the literature, culture, and society of al-Andalus (Islamic Spain) from the Umayyad emirate until the close of the Reconquista (711-1248). The development of Arabic (and Hebrew) poetry will be surveyed, with focus on style, genres, and motifs. Conflicting theories of the origin and identity of Hispano-Arabic poetry and culture will also be considered.

[NES 344 Seminar on Jewish Mysticism (also RELST 344 and JWST 342) @ #]
Fall. 4 credits. Enrollment limited to 20 students. Not offered 1997–98. Staff.

[NES 345 Gender and Judaism (WOMNS 347, RELST 343 and JWST 347) @ #]
Spring. 4 credits. Enrollment limited to 25 students. Not offered 1997–98. Staff.

[NES 357 Islamic Law and Society (also NES 651, RELST 350, HIST 372/652) @ #]
Fall. 4 credits. Enrollment limited to 25 students. D. Powers.
After surveying the historical development of Islamic law, the seminar will focus on the structure and function of the Islamic legal system in the fourteenth and fifteenth centuries, using legal documents, judicial opinions, and court cases (all in English translation!) to elicit major themes and issues.

[NES 357 Islamic Law and Society @ #]

[NES 639 Muslims, Christians and Jews in Islamic Spain: Literature and Society (also COM L 334, SPANL 339/369, RELST 334, NES 339, and JWST 339) @ #]
Spring. 4 credits. R. Brann.
For description, see NES 339 under Near Eastern Civilization.

[NES 651 Introduction to Islamic Law (also NES 351, RELST 350, HIST 372/652) @ #]
Fall. 4 credits. Limited to 25 students. D. Powers.
For description, see NES 351 under Near Eastern Civilization.
ARTS AND SCIENCES - 1997-1998

History

NES 239 Cultural History of the Jews of Spain (also JWST 239, COMP LIT 239, RELST 239, SPAN LIT 239) @ #
Fall. 3 credits. R. Brann.
A survey of the cultural history of the Jews in Spain from the late Visigothic period until the converso crisis of the fourteenth and fifteenth centuries and the Expulsion, focusing on the interaction of Jewish with Muslim and Christian cultures, and the stable yet evolving sense of a "Sefardi" identity. The course will establish historical and literary-critical frames for reading primary sources in translation, including secular and synagogal poetry, philosophy and kabbalah, biblical hermeneutics, historiography, polemics, and other genres.

[NES 244 Introduction to Ancient Judaism (also JWST 244 and RELST 244) @ #]
Spring. 3 credits. Enrollment limited to 140 students. Not offered 1997-98.
G. Rendsburg.

NES 248 Introduction to Classical Jewish History (RELST 240 and JWST 248) @ #
Fall. 3 credits. C. Baker.
A survey of the major developments in Jewish history between the destruction of the first temple in 586 B.C.E. to the rise of Islam. Topics will include the return under Ezra and Nehemiah; the encounter with Hellenism; the Antiochene persecutions; the growth of Roman influence; the rebellion of 70 C.E.; the rise of such Jewish groups as the Saducees, Pharisees, and Essenes; the conflict with early Christianity; and the nature of rabbinic Judaism.

[NES 249 Introduction to Modern Jewish History (also JWST 245) #]
Spring. 3 credits. Not offered 1997-98.
Staff.

NES 257 Islamic History: 600-1258 (also HIST 254 and RELST 257) @ #
Fall. 3 credits. D. Powers.
A survey of the Islamic history from the lifetime of the Prophet to the Mongol conquest of Baghdad. Topics to be covered will include the emergence of Islam as a major world religion; the impact of the Arab conquests on the Mediterranean world; political, military, and cultural contacts between the Islamic Near East and western Europe.

[NES 258 History of the Near East 1250-1914 (also HIST 248 and RELST 258) @ #]
Fall. 3 credits. Not offered 1997-98.
L. Peirce.

[NES 261 Ancient Near East (also Archaeology 275) @ #]
Spring. 3 credits. Not offered 1997-98.
D. Owen.

NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, RELST 264) @ #
Fall. 3 credits. Enrollment limited to 50 students. J. Zorn.
For description, see NES 263 under Near Eastern Archaeology.

NES 294 Modern History of the Near East: Changing Politics, Society, and Ideas (also Government 356 and JWST 394) @ #
Fall. 4 credits. Fulfills the college distribution requirement in history or the social sciences. M. Litvak.
This introductory course is designed to acquaint students with the main political, social, and cultural trends that have shaped the modern and contemporary history of the Near East. While discussing developments in the region during the nineteenth and twentieth centuries, the lectures will focus on such themes as modernization, nationalism, Islamic response, and Arab politics in global and regional contexts. The course does not presuppose any knowledge of Near Eastern languages.

NES 324 The History of Early Christianity (also JWST 344, RELST 325) @ #
Fall. 4 credits. C. Baker.
History of Christianity in the Roman Empire from its beginning in the New Testament period to the Council of Chalcedon. Emphasizing primary sources (both textual and archaeological/iconographic), the course treats the socio-cultural changes in Christian communities, as well as developments in Christian "orthodoxy" and "heretical" movements (e.g., Gnostics); the role of Greek philosophy in shaping Christian thought; martyrdom and persecution; asceticism, monasticism, and holy persons; Christian views of political and social responsibility.

NES 358 Ottoman History: 1300-1600 (also HIST 446/446 and NES 658) @ #
Fall. 4 credits. L. Peirce.
The Ottoman empire at its height included much of southwestern Europe, the Middle East, and North Africa; its poopoulation was made up of peoples of a variety of ethnic and religious identities. This course studies the history and culture of the Ottoman empire from 1300 to 1600 (the period from 1600 through 1923 is studied in NES 359). Among the topics to be covered are: conflicting interpretations of the rise of the Ottomans; the empire's multi-ethnic (ethnico-national) nature; religious currents and institutions; social and economic classes; modes of dissent and resistance; and Ottoman relations with Europe and Asia. Throughout we will be concerned with questions of identity and of the nature of political and social changes. We will also examine one or two communities in detail to get a sense of the rhythm of daily life.

NES 359 Ottoman History: 1600-1923 (also HIST 441/461 and NES 659) @ #
Spring. 4 credits. L. Peirce.
This course studies the history and culture of the diverse regions an dpeoples making up the Ottoman empire in the period 1600 to 1923. Developments in the seventeenth and eighteenth centuries (cultural, social, military) are examined as essential preliminaries to understanding the dominant features of the nineteenth and early twentieth centuries: rapid political and social transformations, proliferation of ideological positions, and territorial dissolution. We will examine current debates around the questions of nineteenth-century modernization vs. decline, the economic and cultural impact of Europe, and the emergence of nationalism. Each student will select an area of the empire to trace in depth.

NES 374 Seminar on 19th-Century Jewish Intellectual History (also RELST 346 and JWST 346)
Spring. 4 credits. Enrollment limited to 20 students. Not offered 1997-98.

NES 351 Introduction to Islamic Law (also NES 651, RELST 350, HIST 372/652) @ #
Fall. 4 credits. Enrollment limited to 25 students. D. Powers.
For description, see NES 351 under Near Eastern Civilization.

NES 351 Introduction to Islamic Law (also NES 651, RELST 350, HIST 372/652) @ #
Fall. 4 credits. Enrollment limited to 25 students. D. Powers.
For description, see NES 351 under Near Eastern Civilization.

NES 361 Interconnections in the Eastern Mediterranean World in Antiquity @ #
Fall. 4 credits. Not offered 1997-98.
D. Owen.

NES 365 The History and Archaeology of the Ancient Near East (also Archaeology 310) @ #
Fall. 4 credits. Not offered 1997-98.
D. Owen.

NES 367 The History and Archaeology of Ancient Egypt @ #
Fall. 4 credits. Not offered 1997-98.
D. Owen.

NES 391 International Relations of the Ancient Near East, 3500-500 BCE (also GOVT 358)
Spring. 4 credits. Not offered 1997-98.
M. Bernal.

NES 393 Religion and Politics in the Middle East (also RELST 393)
Fall. 4 credits. Enrollment limited to 25 students. M. Litvak.
The seminar will discuss key issues in the relationships between Islam and politics from the early Islamic period to the present with a special emphasis on modern fundamentalist movements. It will examine the differences between Sunni Shi movements as well as the relationships between nationalism and Islam and the social bases of modern Islamic movements.

NES 395 International Relations of the Middle East (also GOVT 392) @ #
Fall. 4 credits. S. Telhami.
This course will examine patterns of international relations in the Middle East in the 20th century, with special reference to the Arab-Israeli and Iran-Iraq conflicts. These conflicts will be treated as part of a Middle East system, whose other main elements are the interaction between domestic and external politics, inter-Arab relations, and the involvement of extra-regional powers.

NES 418 Seminar in Islamic History: Muhammad and the Rise of Islam (also HIST 460/660, NES 618, and RELST 419) @ #
Fall. 4 credits. Enrollment limited to 20 students. Prerequisite: NES 257 or 258, or permission of instructor. Not offered 1997-98.
D. Powers.
An examination of Islamic history from 600-750, with special attention to interpretive issues relating to the career of the Prophet Muhammad, the Arab conquests, the emergence of the Caliphate, conversion to Islam, and the Abbasid revolution. Students will read primary sources in English translation, especially *The History of Tabari*. 

**NES 456** Sexuality, Society and the State in the Near East (also History 457 and Women's Studies 455) @ Spring. 4 credits. Prerequisites: Previous course in Islamic Studies helpful but not essential. Enrollment limited to 20 students. L. Peirce.

This course examines relations between women and men by focusing on the manner in which one 16th-century community in the Muslim Middle East functioned through its court. By analyzing actual court cases, we will explore issues such as marriage and divorce, property rights, sexuality and its regulation, access to communal and domestic space and the control of knowledge. We will be particularly interested in the question of whether normative codes of law (religious, state) were compatible with the individual's sense of moral worth and self-interest; hence we will also be concerned with relations between the individual and the community, and between the community and the state.

**NES 618** Seminar in Islamic History: Muhammad and the Rise of Islam (also HIST 480/660, NES 418, and RELST 475/675) @ Fall. 4 credits. Prerequisites: Previous courses in Islamic Studies helpful but not essential. Enrollment limited to 20 students. Not offered 1997-98. D. Powers.

**NES 650** Seminar in Islamic History: 600-750 (also HIST 461/671, NES 451, and RELST 451) @ Spring. 4 credit. D. Powers. For description, see NES 451 under Near Eastern History.

**NES 651** Introduction to Islamic Law (also NES 351, RELST 350, HIST 372/652) Fall. 4 credits. Enrollment limited to 25 students. D. Powers. For description, see NES 351 under Near Eastern Civilization.

**NES 655** Women, Men and the Law in Muslim Court (also WOMNS 458, RELST 459, HIST 457/657 and NES 455/459) Fall. 3 credits. Prerequisites: previous course in Islamic Studies helpful but not essential. Enrollment limited to 20 students. L. Peirce. For description, see NES 459 under Near Eastern History.

**NES 662** International Relations of the Middle East (also GOVT 652) Fall. 4 credits. Graduate seminar. Undergrad seniors only with permission of instructor. S. Telhami.

The focus of this seminar will be the contemporary international relations of the Middle East, with special attention paid to patterns of relations among states of the Middle East, and to the international and domestic variables that could account for these patterns. In Part I of the seminar, we will study a) the ways in which superpower competition and changing objectives affect the relations of states in the Middle East; b) the extent to which a change in the distribution of political, military, and economic power in the Middle East alters political, economic and cultural patterns in the region, and c) the impact of domestic variables on the foreign policies of states in the Middle East. In Part II, we will examine three major international crises in the Middle East: the Arab-Israeli conflict, the Iran-Iraq conflict, and the crisis in Lebanon.

**Literature**

**NES 213** Introduction to the Qur'an (also RELST 213) @ Spring. 3 credits. A. Gade. This course examines the sacred book of the Muslims, the Qur'an, and for the purpose of contextualization the life of their Prophet Muhammad. The Qur'an's transmission and form, as well as its major themes, such as God, humanity, prophethood, and the hereafter will be explored. The course will then deal with the theological and mystical interpretations of the Qur'an and the life of Muhammad. The Qur'an's role in art, politics and personal piety of Muslims will also be examined. Finally, the course will discuss some of the recent theories about the origin of the Qur'an and the life of Muhammad, such as those by R. Bell, J. Burton, and J. Wansbrough.

**NES 220** The Greek New Testament (also CLASS 202 and RELST 202) @ Spring. 3 credits. Prerequisite: at least one year of ancient Greek (Classics 101-103) or permission of instructor. Not offered 1997-98. Staff.

**NES 223** Introduction to the Bible (also JWST 223 and RELST 223) @ Spring. 3 credits. C. Baker. This course is intended to introduce students to the literature of the Hebrew Bible, with particular attention paid to the material in Genesis through 1 Kings. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, mythology, law and culture.

**NES 230** The Quest for the Historical Jesus (also RELST 231) Spring. 3 credits. C. Baker. Who was Jesus? What did he really say and do? In this course we are concerned with the ways in which scholars approach these questions and the often startling answers they obtain. We examine the social, political, economic and religious environments in which Jesus operated to provide a context for critical readings of the Gospels of Mark, Matthew, Luke, John, and Thomas and other early Christian texts. We then reconstruct the essential features of the original Jesus movement, which we compare and contrast with Cynic philosophy, the Greco-Roman gender system, the belief and practices of the early Church, and the social patterns and religious philosophies of small-scale societies.

**NES 339** Muslims, Christians, and Jews in Islamic Spain: Literature and Society (also JWST 339, COMP LIT 334, RELST 334, NES 639, SPAN LIT 339/699) @ Spring. 4 credits. Enrollment limited to 25 students. R. Brahm. For description, see NES 339 under Near Eastern History.

**NES 356** Readings in Ottoman Turkish @ Fall. 3 credits. C. Baker. For description, see NES 356 under Near Eastern Studies Civilization.

**NES 500** Seminar in Advanced Hebrew (also JWST 400) Spring and fall. 4 credits. Prerequisite: NES 302/JWST 302 or permission of instructor. Enrollment limited to 15 students. N. Scharf.

Continuation of work done in NES/JWST 302, with less emphasis on the study of grammar. We will read and discuss texts of cultural relevance, using articles published in Israeli newspapers and works by authors in each of the three principal genres: poetry, theater and
Section 478

The Program of Jewish Studies

The Program of Jewish Studies encompasses a broad spectrum of disciplines that includes civilization, history, language, literature, philology, and religion. The program offers students the opportunity to take a wide variety of courses in Jewish Studies whose subjects are not represented in the Department of Near Eastern Studies. Students interested in planning a program in Jewish Studies should consult with the director, Professor David A. Owen, 360 Rockefeller Hall. For complete listings and descriptions, see Program of Jewish Studies under "Special Programs and Interdisciplinary Studies."

PALI

See Language Courses under Languages and Linguistics.
The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 100s or 200s is suitable for beginning students. Sections of Philosophy 100 are part of the freshman writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (seven to ten students each), they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take Philosophy 101, but many students with special interests may find that the best introduction to philosophy is a 200-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to freshmen.

The Major

Students expecting to major in philosophy should begin their study of it in their freshman year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student's work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses are required for the major. They must include at least one course in ancient philosophy (Philosophy 210 or 211), or a course with a large component on Plato or Aristotle (one course in classical modern metaphysics and epistemology (Philosophy 212 or a course on the empiricists, the rationalists, or Kant), and a minimum of three courses numbered above 300. Students admitted to the major after fall 1996 will be required to take a minimum of six philosophy courses numbered above 200, and may not count more than one section of Philosophy 100 toward the major. A course in formal logic (e.g., Philosophy 231), while not required, is especially recommended for majors or prospective majors. Courses numbered 191–199 do not count toward the major.

Philosophy majors must also complete at least 8 credits of course work in related subjects approved by their major advisors. Occasionally majors may serve as teaching or research aids, working with faculty members familiar with their work.

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B- or better for all work in the College of Arts and Sciences and an average of B+ or better for all work in philosophy. In either or both terms of the senior year a candidate for honors enrols in Philosophy 490 and undertakes research leading to the writing of an honors essay by the end of the final term. Honors students normally need to take Philosophy 490 both terms of their senior year in order to write a satisfactory honors essay. Philosophy 490 does not count toward the eight philosophy courses required for the major. Prospective candidates should apply at the philosophy department office, 218 Goldwin Smith Hall.

Introductory Courses

These courses have no prerequisites; all are open to freshmen.

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

PHIL 100 Freshman Writing Seminars in Philosophy
Fall. 3 credits. Consult the brochure listing freshman writing seminars prepared by the John S. Knight Writing Program.

PHIL 101 Introduction to Philosophy

As the title suggests, this is an introductory course. It has an opening unit, a closing unit, and four units in-between. The opening and closing units are devoted to questions concerning the nature and purpose of philosophy, while in each of the four main units a philosophical problem is discussed. The problems belong to four principal areas of philosophy: epistemology, philosophy of mind, ethics, and metaphysics. (If you don't know what some of these terms mean, you can be sure that you will learn something here.) The topics are loosely connected, but each is understandable on its own.

Our first topic is illusions and dreams. We will discuss what, if anything, distinguishes them from experiences we regard as reliable guides to how things are around us. The second topic is minds and minds. We will look at the suggestion that the human brain is a computer and that the mind is its program. Next, we will discuss the relationship between self-interest and morality. We will focus on the strengths and weaknesses of rational egoism. Our final topic is determinism and free will. We will see whether there is a genuine conflict between the theses that all events are causally determined and that some of our actions are free.

PHIL 131 Logic, Evidence, and Argument
Fall. 3 credits. M W F 10:10-11:00.

Logic, Evidence, and Argument is designed as an introduction to the concepts and skills central to critical reading and thinking. The course aims at providing a general understanding of the principles of reasoning and developing skills for identifying, analyzing, and evaluating the sorts of reasoning we encounter everyday in ordinary discourse. Students will be expected to attain facility with two different formal systems for representing and evaluating arguments—propositional logic and traditional syllogistic logic—and to acquire the ability to apply these systems in the analysis and evaluation of various kinds of ordinary reasoning.

PHIL 145 Contemporary Moral Issues
Fall. 3 credits. M W 2:30-3:20. R. Miller.

An examination of central moral issues in American politics today. At what point, if any, is abortion wrong, and in what circumstances should it be legal? What should be done to reduce economic, racial and sexual inequalities? For example, is there a moral justification for affirmative action programs? For welfare programs? What are the limits of the right to free speech? Do they protect pornography? Racist speech? When is it right to go to war? What obligations do U.S. citizens have to help people in poor countries? What restrictions on immigration are justifiable? We will analyze the answers and arguments of moral philosophers, political leaders and judges, through both lectures and discussion sections.

PHIL 191 Introduction to Cognitive Science (see Cognitive Studies 101)
Fall. 3 credits. T R 11:40-12:55. M. Spivey-Knowlton.

For description, see Cognitive Studies 101. Does not count toward the Philosophy major or toward the Humanities Distribution Requirement in Philosophy.

PHIL 201 Philosophical Problems
Fall. 3 credits. T R 11:40-12:55. C. Britain.

This course explores the origin and development of Western philosophy in Ancient Greece and Rome. We will explore some of the central ideas of the Pre-Socratics, Socrates, Plato, Aristotle, and the Hellenistic philosophers (Epicsurus, Stoics, and Sceptics). Questions to be considered include: What are the nature and limits of knowledge? How reliable is perception? What are the basic entities in the universe: atoms, Platonic Forms or Aristotelian Substances? Is moral knowledge possible? What is the nature of happiness and what sort of life will make people happy? Do human beings have free will? This course has no prerequisites.

PHIL 212 Modern Philosophy
Spring. 4 credits. T R 1:25-2:40. Z. Szabo.

This course is an introduction to early modern philosophy (roughly, the period between 1640 and 1790). We will read and interpret five complete works which played a central role in the development of philosophical thought during this time. These works are: Descartes's Meditations, Berkeley's Principles, Leibniz's Monadology, Hume's Enquiry, and Kant's Prolegomena. We will focus on questions concerning the nature, justification, and limits of human knowledge.

The aim of the course is twofold. First, we will analyze and evaluate the arguments these philosophers offer in support of their respective positions. This will make it possible to understand what philosophical problems are, and how philosophical debates might illuminate them. Second, in exploring
the arguments we will also learn about interpretation, about ways of approaching texts that were written centuries ago. This will help to see what changes and what remains the same in our understanding of philosophical problems.

PHIL 213 Existentialism and Literature (also Comparative Literature 213) 4 credits. Not offered 1997-98.

PHIL 231 Introduction to Formal Logic Spring. 4 credits. M W F 10:10-11:00. C. Ginet.
The logic of truth-functional connectives and the universal and existential quantifiers: analysis of English statements in terms of a formal language; evaluation of deductive reasoning in terms of such an analysis. And more. The Macintosh programs, Tarski's World and Hyperproof, will be used.

PHIL 241 Ethics (by petition for breadth requirement) Spring. 4 credits. TR 2:55-4:10. R. Miller.
Introduction to the philosophical study of major moral questions—for example: Are all values relative, or are there some objective moral values? Have we ever any good reason to care about the interests of other people? Do people have rights with which governments should not interfere, even to advance the general welfare? What inequalities are unjust? The course discusses general issues in moral philosophy, together with some of their implications for particular current moral controversies, such as the debates over abortion, reverse discrimination, and policies reducing economic inequality. Readings from major philosophers of the past, as well as contemporary sources.

PHIL 244 Philosophy and Literature 4 credits. Not offered 1997-98.

PHIL 245 Ethics and Health Care Fall. 4 credits. Normally offered also in the six-week summer session. M W F 11:15-12:05. K. Jones.
This course is an introduction to the ethical issues surrounding health care. Topic include: (1) the professional-patient relationship, (2) justice and access to health care, (3) autonomy, quality of life, personhood and their relation to issues such as abortion and euthanasia.

PHIL 246 Ethics and the World Environment Spring. 4 credits. Open to all undergraduates. Permission of instructor required for graduate students. M W F 11:15-12:05. N. Sturgeon.
Critical philosophical analysis of the conceptual frameworks in which policies affecting the environment are formulated and judged. Topics include the nature of ethics and the possibility of ethics; the nature and extent of individual and social obligations to distant people, future generations, non-human animals and non-sentient things (e.g., the ecosystem); the origin of environmental problems and the range of options for their solution.

PHIL 247 Ethics and Public Life Spring. 4 credits. Not offered 1997-98.

PHIL 249 Feminism and Philosophy Fall. 4 credits. M W F 10:10-11:00. J. Whiting.
An historical introduction, using literary as well as philosophical texts, to views about the nature of women and their position in society—from the ancient debate (between Plato and Aristotle) about whether men and women are by nature suited to different activities, to contemporary debates between “sameness” and “difference” feminists. Texts will include Aeschylus, Plato, Aristotle, Rousseau, Wollstonecraft, Engels, and various twentieth-century authors (such as Virginia Woolf, Carol Gilligan, Catherine MacKinnon, and Sarah Hoagland).

PHIL 251 Knowledge and Reality Spring. 4 credits. M W F 2:30-3:20. H. Hodes.
An introduction to philosophical issues concerning knowledge, belief, perception, truth, probability, meaning, causation and necessity.

PHIL 252 Philosophy of Mind Fall. 4 credits. M W F 10:10-11:00. S. Shoemaker.
A study of philosophical issues concerning the place of mind in the physical world, including the mind-body problem (are thoughts and experiences physical entities?), the problem of knowledge of other minds (how can we know that others have minds and are not mere automatons?), the possibility of artificial intelligence (can computers think?), and the problem of personal identity (what makes you the same person you were ten years ago?). Readings from classic and contemporary sources.

What must (or could) God be like, and what reasons do we have for thinking that a being of that sort actually exists? What difference would (or could) the existence of God make to our lives? Religion and Reason examines the idea, common to several major world religions, that God must be an absolutely perfect being. What attributes must a perfect being have? Must it have a mind, be a person, care for human beings? Is the concept of a perfect being coherent? Is the existence of a perfect being compatible with the presence of evil in the world and the existence of human freedom? Does human morality depend in any important way on the nature or will of a perfect being? Is a perfect being among the things that actually inhabit our universe? The course approaches these questions with the tools and methods of philosophical reason and through readings drawn from both classic texts and contemporary philosophical discussion.

In this course, with the use of classic papers in the philosophy of language and linguistics, we will motivate and introduce the basic concepts behind the project of giving a rigorous theory of meaning for natural language. Our goal will be to understand how philosophers and linguists have used concepts such as reference and truth to explain linguistic content. We will also discuss how issues of learnability and language processing raise constraints for this project.

PHIL 286 Science and Human Nature (also Science and Technology Studies 286) Spring. 4 credits. M W F 10:10-11:00. R. Boyd.
An examination of attempts in the biological and social sciences to offer scientific theories of human nature and human potential and to apply such theories to explain important social and psychological phenomena.

PHIL 294 Global Thinking (also Government 294) Fall. 4 credits. No prerequisites; intended for freshmen and sophomores. TR 1:25-2:40, plus disc. Satisfies geographical distribution requirement. H. Shue.
The analysis taught in this course is global in two different respects: international subjects and interdisciplinary methods. We look in detail at questions raised by one of the most important and most difficult issues facing international society: when, if ever, should other nations unilaterally or multilaterally intervene militarily into ethnic conflicts like those in Bosnia and Rwanda in this decade? Both of these recent events, and one in Europe and one in Africa, raise fundamental questions about the kind of world we are constructing for the 21st century.

To what extent is the system of nation-states we now have either desirable or unavoidable? Does every ethnic group have a right to a self-determining and sovereign state? When is the use of military force morally justified? Should trials for war crimes or crimes against humanity be routinely held after military conflicts? These and other ethical questions need to be answered in light of the best available knowledge about the political dynamics of foreign intervention and the changing international legal regime, bringing together political science, law, and ethics. The course is team-taught by leading faculty researchers from the three fields involved.

Intermediate or Advanced Courses

Some of these courses have prerequisites.

PHIL 309 The Philosophy of Plato Fall. 4 credits. TR 10:10-11:25. C. Shields.
This course offers an in-depth introduction to Plato's philosophy. We will read full dialogues from each of Plato's major periods, with a special emphasis on the most philosophically mature writings in metaphysics and epistemology. Part One of the course will be given over to Plato's earliest works, which mostly try to recount the ethical investigations of Socrates, Plato's teacher. Part Two takes up Plato's own early metaphysical and epistemological developments, including most importantly his introduction of the theory of Forms. Part Three charts Plato's final thoughts on the theory of Forms. In his most challenging works, he raises some formidable objections to that theory. We will consider whether these objections are compelling. Throughout the semester our aim will be to analyze and assess Plato's arguments in an effort to determine whether we should accept them ourselves.
PHIL 310 Aristotle
Spring. 4 credits. T R 10:10–11:25.
J. Whiting.
A general introduction to Aristotle's works—from the logical and biological through the ethical and political—organized around the differences, and relations, between his theoretical or scientific works and his practical or ethical works. Other topics will include: the extent to which his ethical and political views are based on his metaphysical and psychological views; and the contrast between the universality and exactness of mathematics and other sciences and the alleged particularity and inexactness of ethics.

PHIL 311 Modern Rationalism

PHIL 312 Modern Empiricism
Fall. 4 credits. M W F 1:25–2:15.
S. Shoemaker.
An examination of the epistemological and metaphysical views of Bishop Berkeley and David Hume. Readings will include Berkeley's Principles of Human Knowledge and Three Dialogues Between Hylas and Philonous, and Hume's Treatise of Human Nature, Bk. I, and Enquiry Concerning Human Understanding. Topics will include the nature of perceptual knowledge, the origin of ideas and the nature of "abstract ideas," the nature of sensible things, the nature of empirical reasoning, the nature of causation, and the nature of the self.

PHIL 314 Ancient Philosophy: The World of Theory and the World of Ordinary Life

PHIL 315 Medieval Philosophy

PHIL 316 Kant

PHIL 317 Hegel

PHIL 318 Twentieth-Century Philosophy
A survey of philosophical writings from the late 19th to early 20th century including G. Frege, B. Russell, L. Wittgenstein, on language, foundations of mathematics, topics in metaphysics (and perhaps epistemology).

PHIL 319 Philosophy of Marx

PHIL 321 Formal Logic (also Mathematics 281)
Fall. 4 credits. M W F 2:30–3:20.
H. Hodges.
Review of derivations and truth-in-a-model; functions, constants and identity; truth in non-finally-distinguished models; very basic set-theory; sets as the only mathematical objects; mathematical induction; soundness; completeness.

PHIL 332 Philosophy of Language
Fall. 4 credits. T R 11:40–12:55. Z. Szabo.
This course is an introduction to contemporary philosophy of language. Its main focus is the notion of singular reference. The course has four parts. In the first, we will read texts by Frege, Russell, Strawson and Quine which frame the basic problems. In the remaining three parts we will examine questions concerning the three main types of singular terms: descriptions, names and demonstratives. Reading will include papers by Saul Kripke, Keith Donnellan, John Searle, Gareth Evans, David Kaplan, and Irene Heim. The aim of this course is threefold. First, we will read classic papers which will help you to orient yourself in the literature. Second, we will try to connect some of the linguistic data with theories that are largely motivated by philosophical considerations. Finally, we will discuss the larger philosophical significance (within metaphysics, epistemology and the philosophy of mind) of problems of singular reference.

PHIL 341 Ethical Theory

PHIL 342 Law, Society, and Morality (also Law 666)

PHIL 343 Resistance and Responsibility (also Law 676)

PHIL 344 History of Ethics: Ancient and Medieval

PHIL 345 History of Ethics: Modern

PHIL 346 Modern Political Philosophy (also Government 462)
Fall. 4 credits. T R 2:55–4:10. R. Miller.
A study of the leading contemporary theories of justice, including the work of Rawls, Nozick, Gauthier and Scanlon. We will discuss rival views of the moral significance of economic inequality, the kinds of freedom that governments ought to protect, the kinds of values and convictions that are a proper basis for laws (as opposed to being private matters), the tension between unequal political influence and democratic rights, and the roles of community, virtue and group-loyalty in political justification. We will largely be concerned with the conceptions of freedom, equality, obligation and community underlying competing theories. We will also consider implications for specific political controversies, e.g., over abortion, welfare programs and pornography.

PHIL 361 Metaphysics and Epistemology
Topics in epistemology. Attention to both a priori and a posteriori knowledge.

PHIL 362 Philosophy of Mind

PHIL 363 Topics in the Philosophy of Religion

PHIL 368 Global Climate and Global Justice (also Government 368)

PHIL 369 Limiting War: The Morality of Modern State Violence (also Government 469)

PHIL 381 Philosophy of Science: Knowledge and Objectivity (also Science and Technology Studies 381)
Fall. 4 credits. W 7:30–10:00 p.m. R. Boyd.
An examination of central epistemological and methodological issues raised by scientific theorizing: the nature of evidence, scientific objectivity; the nature of theories, models, and paradigms; and the character of scientific revolutions.

PHIL 382 Philosophy and Psychology

PHIL 383 Choice, Chance and Reason
Fall. 4 credits. M W F 1:25–2:15.
H. Hodes.
Orderings and choice functions; plausible constraints on rational choice; decision under strict uncertainty; value functions, multi-attribute value theory, probability, utility and Bayesian analysis; decision trees; social choice. We'll attend to the mathematical ideas and the philosophical issues they raise. Students should have some familiarity with mathematical proofs, recommended background: one year of calculus.

PHIL 384 Philosophy of Physics

PHIL 387 Philosophy of Mathematics

PHIL 389 Philosophy of Science: Evidence and Explanation

PHIL 390 Informal Study
Fall or spring. Credit to be arranged. To be taken only in exceptional circumstances. Must be arranged by the student with his or her adviser and the faculty member who has agreed to direct the study.

Advanced Courses and Seminars

These courses are offered primarily for majors and graduate students.

PHIL 395 Majors Seminar

PHIL 409 German Philosophical Texts (also Classics 311)
Fall and spring. Variable credit. Prerequisites: knowledge of Latin and permission of instructor. Hours to be arranged. S. MacDonald.
Reading of philosophical texts in the original Latin.

PHIL 411 Greek Philosophical Texts
Fall and spring. Variable credit. Prerequisites: knowledge of Greek and permission of instructor. Hours to be arranged. C. Shields; spring, C. Brittain.
Reading of philosophical texts in the original Greek.

PHIL 410 Latin Philosophical Texts (also Classics 311)
Fall and spring. Variable credit. Prerequisites: knowledge of Latin and permission of instructor. Hours to be arranged. S. MacDonald.
Reading of philosophical texts in the original Latin.

PHIL 412 Medieval Philosophy
Not offered 1997–98.

PHIL 413 Aristotle's Theory of Substance: Beings and Living Beings
Fall. 4 credits. T R 1:25–2:40.
C. Shields.
Aristotle offers an account of substance in which living beings figure prominently. Our aim in this class is to determine and assess Aristotle's mature theory of substance, first by focusing on the criteria he develops for what living beings satisfy so well. This will require understanding how Aristotle conceives of the nature of life and living beings; it will
Accordingly require an investigation into Aristotle's conception of soul as form. Our main texts will be the *Metaphysics* and *De Anima*. Fairly clearly, the *De Anima* draws upon the technical machinery of the *Metaphysics*. It is less clear, however, whether the theory of soul adumbrated in the *De Anima* shapes the account of substance advanced in the *Metaphysics*.

**PHIL 414 German Philosophy after Kant**
Not offered 1997-98.

**PHIL 415 Special Topics in the History of Philosophy**
Fall. Not offered 1997-98.

**PHIL 416 Modern Philosophy**
Not offered 1997-98.

**PHIL 431 Deductive Logic (also Mathematics 481)**
4 credits. Not offered 1997-98.

**PHIL 432 Topics in Logic (also Math 482)**
Spring. 4 credits. Prerequisites: One logic course either from the Mathematics Department or from the Philosophy Department at least at the 300-level, or permission of the instructor. T R 10:25-11:40. H. Hodes.

**PHIL 433 Philosophy of Logic**
4 credits. Not offered 1997-98.

**PHIL 434 Intensional Logic (also Math 48B)**
Fall. 4 credits. Prerequisite: Philosophy 231 or the equivalent and permission of the instructor. T R 4:30-5:45. J. Stanley.

The central focus of this class will be the model theory of propositional modal logics (and, in particular, completeness proofs for various different modal systems). We will also cover basic issues in the model theory of quantified modal logic. Time permitting, we may also discuss the basic concepts of free logic and tense logic.

**PHIL 437 Topics in the Philosophy of Language**
4 credits. Not offered 1997-98.

**PHIL 441 Contemporary Ethical Theory**
4 credits. Not offered 1997-98.

**PHIL 442 Ethics and Value Theory (also Society for Humanities 404)**
Fall. 4 credits. Not offered 1997-98.

**PHIL 444 Contemporary Legal Theory**
(also Law 710)
4 credits. Not offered 1997-98.

**PHIL 446 Topics in Social and Political Philosophy (also Government 474)**

Topic for 1998: Community, Nation and Morality. Although the moral point of view is often taken to transcend ties to particular groups, actual political choices often express the choosers' ties to a nationality, state, community, religion or racial or ethnic group. To what extent are such choices morally legitimate? Do such choices, expressing particular loyalties, conflict with universalist moral principles, e.g., principles requiring equal respect for all? Our discussions will include such topics as: the role of community in liberalism and in critiques of liberal individualism; nationality and political community and their roles in individual identity, moral obligation and justice; multiculturalism, separatism, and group rights, including, for example, those of race, gender and sexuality; the moral status of patriotism; justice and international inequality; the impact on individuals and minority groups of collective goals and shared convictions of the majority. Readings will include work by Taylor, Kymlicka, Waldron, David Miller, MacIntyre, Nagel, Guinier, Walzer and Nussbaum. The course will have a seminar format. It is intended for both advanced undergraduates and graduate students.

**Philosophy 461 Feminist Epistemology**
(also Women's Studies 461)
Fall. 4 credits. T R 10:10-11:25. K. Jones.

Topic for 1997: Recent feminist work in epistemology and metaphysics. Many feminists recognize that the concepts of reason and objectivity have served the ideological function of maintaining oppressive social structures by, among other things, delegitimizing knowledge claims on the part of the oppressed. At the same time, radical critiques of reason and objectivity threaten to self-undermining, casting into doubt the status of the critique itself. The course begins with this problem. We also examine feminist work on the social construction of gender and the role that "experience" has played in discussions of whether women are a social group.

**PHIL 481 Problems in the Philosophy of Science**
Spring. 4 credits. W 7:30-10:00. R. Boyd.
Topic to be announced.

**PHIL 490 Special Studies in Philosophy**
Fall and spring. 4 credits. Open only to honors students in their senior year. See Honors description at front of Philosophy section.

**PHIL 601 Ancient Philosophy**
4 credits. Not offered 1997-98.

**PHIL 602 Medieval Philosophy**
Spring. 4 credits. T 4:30-6:30. S. MacDonald.
Topic to be announced.

**PHIL 611 Modern Philosophers**
4 credits. Not offered 1997-98.

**PHIL 612 Philosophy of Language**
4 credits. Not offered 1997-98.

**PHIL 621 History of Philosophy**
4 credits. Not offered 1997-98.

**PHIL 633 Philosophy of Language**
4 credits. Not offered 1997-98.

**PHIL 641 Ethics and Value Theory**
Fall. 4 credits. M 4:30-6:30. N. Sturgeon. Spring. 4 credits. M 4:30-6:30. J. Whiting.

**PHIL 661 Theory of Knowledge**
4 credits. Not offered 1997-98.

**PHIL 662 Philosophy of Mind**
4 credits. Not offered 1997-98.

**PHIL 663 Philosophy of Religion**
4 credits. Not offered 1997-98.

**PHIL 664 Metaphysics**
4 credits. Not offered 1997-98.

**PHIL 665 Metaphysics**
4 credits. Not offered 1997-98.

**PHIL 668 Philosophy of Science**
4 credits. Not offered 1997-98.

**PHIL 669 Philosophy of Social Science**
4 credits. Not offered 1997-98.

**PHIL 770 Informal Study**
Fall or spring. Credit to be arranged. To be taken by graduate students only in exceptional circumstances and by arrangement made by the student with his or her Special Committee as well as the faculty member who has agreed to direct the study.

**PHIL 773 Proseminar in Cognitive Studies (also cognitive Studies 773, Linguistics 773, and Computer Science 773)**
Fall. 2 credits. Fall. R grade.
For description, see COGST 773.

**PHIL 774 Proseminar in Cognitive Studies (also Linguistics 774)**
For description, see COGST 774.

**Related Courses in other departments**
German Studies 378. German Aesthetic Theory from Kant to Hegel. P. Gilgen.

**PHYSICS**

The Department of Physics offers a full range of university-level work in physics, from general education courses for nonscientists to doctoral-level independent research. Major research facilities are operated by two component organizations, the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory of Nuclear Studies (LNS). LASSP carries out extensive research efforts in condensed-matter physics and in low-temperature physics. LNS operates a major high-energy particle physics research facility at Wilson Laboratory, the Cornell electron-positron storage ring (CESR). Theoretical work is carried out in many fields of physics, including astrophysics. There is a full schedule of weekly research-oriented seminars and colloquia. Junior and senior students will find many opportunities for research participation and summer employment.

Introductory physics sequences are: 101-102, 207-208, and 112-213-214, or its honors version 116-217-218. In addition, there is a group of general-education courses, Physics 200 through 206, 209, 210. Physics 101-102, a self-paced autotutorial course, is designed for students who do not intend to take further physics courses and who do not have preparation in calculus. Physics 112 and 207 both require calculus (Mathematics 191 or
PHYSICS 483

111), and additional mathematics is required for subsequent courses in the sequence. Physics 101-102 or 207-208 may be taken as terminal physics courses. The three-term sequence 112–213–214 or its honors version, 116–217–218, is recommended for engineers and physics majors. Physics 214 and 218 are placing an increasing emphasis on use of the computer for homework, laboratory exercises, and projects; some knowledge about computing, perhaps at the level of Computer Science 99 or 101, is desirable.

Courses beyond the introductory level that might of be interest to nonmajors include:

Physics 316, (Modern Physics I); Physics 330, (Modern Experimental Optics); and Physics 360, (Electronic Circuits).

Advanced placement and credit are offered as outlined in "Advanced Placement of Freshmen," or students may consult Professor Galik, the director of undergraduate studies, as should students requesting transfer credit for physics courses taken at another college.

The Major

The major program is constructed to accommodate students who wish to prepare for professional or graduate work in physics as well as those who wish to complete their major program in the field of physics but have other post-graduation goals. Students who wish to major in physics are advised to start the physics sequence in the first term of their freshman year. (Note that students who have had contact with introductory calculus may take Physics 112 with registration in Mathematics 191.) The major program can still be completed with a second-term start, but flexibility in future course scheduling is reduced.

Prospective majors are urged to make an early appointment at the physics office for advice in program planning. Acceptance into the major program is normally granted upon completion of a year of physics and mathematics courses at Cornell with all course grades at the B-level or higher. The department office will give advice in the matter of selecting a major faculty adviser. Details of the major course program are worked out in consultation between the student and major faculty adviser.

Physics Core

Common to all major programs is a requirement to complete a core of physics courses. In addition to the three-term introductory sequence (Physics 112–213–214 or Physics 116–217–218), the core includes five upper-level courses—(a) the two-course sequence in modern physics (Physics 316–317), (b) at least three semester hours of laboratory work selected from Physics 310, 330, 360, 410, Astronomy 410, (c) an intermediate course in classical mechanics, and (d) an intermediate course in electromagnetism.

Accompanying these physics courses should be work in mathematics through at least Mathematics 294 or 222. Students following the professional/graduate school channel are expected to complete at least one additional year of applicable mathematics (Applied and Engineering Physics 321–322 or Mathematics 321/420–422).

In addition to the core, each physics major must complete 15 semester hours of credit in an area of concentration which has been agreed upon by the student and major faculty adviser.

Concentration within Physics

A student who wishes to pursue professional or graduate work in physics or a closely related field should follow a concentration within the field of physics. For those students with a strong secondary school preparation, the sequence Physics 116–217–218 is encouraged. Core courses in mechanics and electromagnetism will normally be Physics 318 and Physics 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course Physics 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who may follow the different sequences is the amount and level of pre-college work in calculus and in physics. Changes in these typical patterns will be common, as agreed upon between student and major faculty adviser.

Concentration outside Physics

The concentration will reflect the student's interest in some area related to physics. The array of courses that comprise the concentration must have internal coherence. The array will normally be worked out in conference with the major faculty adviser and must be approved by the adviser. Of the required 15 hours credit beyond the core, at least 8 credits must be in courses numbered above 300. Students have chosen to concentrate in such topics as chemical physics, astrophysics, natural sciences, history and philosophy of science, computer science, meteorology, or econometrics. A combined biology-chemistry concentration is appropriate for pre-medical students or those who wish to prepare for work in bio-physics. Students interested in a career in the teaching of science should consider the Teacher Education in Science and Mathematics (TESM) program, which is administered by the Department of Education and is described in detail in the College of Agriculture and Life Sciences section of this catalog. A concentration in "science education" would then typically include Education 402 and 403, both part of TESM, and two or more courses designed to broaden the student's background in general science and mathematics.

For students with concentrations outside physics, the core requirements in mechanics and electromagnetism can be appropriately met with Physics 314 and Physics 325, respectively.

Students with an astronomy concentration who might continue in that field in graduate school should use Astronomy 410, 431, 432 as part of the concentration; they are encouraged to use Physics 318 and 327 to satisfy the core requirements in mechanics and electromagnetism.

Foreign Language Requirement

Students interested in eventual graduate work in physics are advised to meet this College of Arts and Sciences requirement with work in French, German, or Russian.

Honors

A student may be granted honors in physics upon the recommendation of the Physics Advisers Committee of the physics faculty. There is no particular course structure or thesis requirement for honors.

Double Majors

Double majors including physics are possible and not at all uncommon. It should be noted, however, that if a student wishes to complete a major in physics as well as a major in one or more other subjects, any course used to satisfy

Typical Physics Course Sequences (other sequences are also possible)

• For majors with concentrations outside physics, there will be wide variation in individual programs, arranged to best match the field of concentration.

• Crossovers between the two sequences 112–113–214 and 116–217–218 are possible, although the combination 112–213–218, is difficult. Physics 207 may be substituted for Physics 112. Students taking 217 after 112 must register for 216.

• Exceptionally well-prepared students may be able to begin work at Cornell with Physics 217. Such students should come to the department office for advice in planning a course program.

• Physics electives include 360, 444, 454, 455, 480, 525, 553, 561, 572, the senior seminars 481-483, Astronomy 332 or 431-432, and A&EP 434, 436.

• One semester of intermediate laboratory, listed here as 3x0, is required.

• Well-prepared sophomores wishing to take Physics 318 should consult the instructor before registering.
a requirement of the second major may not be used also in satisfaction of any physics major requirement.

Courses with Overlapping Content
Because the department offers several courses with overlapping content, students should select courses carefully to meet the needs of their academic programs and to ensure credit for each course they take. Listed below are groups of courses with largely similar content. In general, students may receive credit for only one of the courses in each group.

Physics 101, 112, 116, 207
Physics 102, 208, 213, 217
Physics 214, 218

Course Prerequisites
Prerequisites are specified in physics course descriptions to illustrate the materials that students should have mastered. Students who wish to plan programs different from those suggested by the prerequisite ordering are urged to discuss their preparation and background with a physics adviser or with the instructor in the course. In many cases an appropriate individual program can be worked out without exact adherence to the stated prerequisites.

Courses
Listed days and times are not definite but are unlikely to change. Days and times will not be listed for 600-level courses.

PHYS 101-102 General Physics
101. fall, 102; spring: 101, 102, summer 4-week or 8-week session. 4 credits each term. General introductory physics for non-physics for non-physics majors. Prerequisites: Three years of high school mathematics, including some trigonometry. A student without high school physics should allow extra time for Physics 101. Prerequisite for Physics 102: Physics 101 or 112 or 207. Includes less mathematical analysis than Physics 101 and 207-208 but more than Physics 200-206, 209, 210. Enrollment may be limited. Fall introductorylec. R Aug. 28 or M Sept. 1, 7:30 p.m. Spring introductorylec. M Jan. 19, 7:30 p.m. 101, D. Fitchen; 102, D. Cassel.

Physics 101-102 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit each term. Most instruction occurs in the learning center utilizing video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and programmed solutions of sample test questions. Unit testing is designed to measure mastery with a limit of three test tries taken at times of the student’s choice. Major topics for 101: kinematics, forces and dynamics, momentum, energy, fluid mechanics, waves and sound, thermal physics, kinetics, thermodynamics. For 102: electricity and magnetism, optics, relativity, atomic, quantum, and nuclear physics. At the level of Physics by Cutnell and Johnson.

PHYS 103 General Physics
Summer. 4 credits. Prerequisite: Three years of high school mathematics, including some trigonometry. Primarily for students majoring in the life sciences. Lectures and discussions. M-F 10:00-11:15; laboratories M W 2:00-5:00. Basic principles treated quantitatively but without calculus. Kinematics, forces and fields, momentum, angular momentum and energy, thermal physics, fluid mechanics, and sound waves. Text at the level of Physics, 3rd edition, by Cutnell and Johnson.

PHYS 112 Physics I: Mechanics
Fall, spring, summer 6-week session. 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisite: coregistration in Mathematics 192 or 194 or 112 or substantial previous contact with introductory calculus combined with coregistration in Mathematics 191 or 111. Lec. M W F 10:10-11:00 or 12:20-1:10. Two rec. and one lab/cooperative learning session each week. Evening exams. Fall. P. Krasiycky; spring, R. Galik.

PHYS 116 Physics I: Mechanics and Special Relativity
Fall, spring. 4 credits. More analytic than Physics 207-208 but more rigorous version of Physics 112, intended for students who will be comfortable with a deeper, somewhat more abstract approach. Intended mainly but not exclusively for prospective physics majors. Prerequisites: a good secchology physics course and familiarity with basic calculus. Corrective transfers between Physics 116 and Physics 112 (in either direction) are encouraged during the first few weeks of instruction. Lec. M W F 10:10-11:00. Fall, H. Tye; spring, R. Patterson.

A more rigorous version of Physics 112, covering similar topics at the level of An Introduction to Mechanics, by Kleppner and Kolenkow.

PHYS 190 Supplemental Introductory Laboratory
Fall, spring. 1 credit. Times by arrangement with instructor. S-U only. (first offered spring 1996) Enrollment limited to students who have all of the following; (i) three transfer credits for introductory physics lecture material; (ii) a degree requirement of the laboratory component of that introductory course; (iii) approval of the director of undergraduate studies; (iv) permission of the lecturer of that course at Cornell. Enrollment limited. A Physics 190 Permission Form must be filed in 121 Clark Hall with the physics department course coordinator. Students perform the laboratory component of one of the introductory courses (Physics 112, 213, 214) to complement the lecture and course credit acquired elsewhere. Those wishing to take the equivalent of one of these introductory courses at another institution should receive prior approval from the director of undergraduate studies.

PHYS 200 Art, Archaeology, and Analytical Toolbox Engineering 185, MS&E 285, Archaeology 285, and Art 372
For description, see ENGR 185.

PHYS 201 Why the Sky Is Blue: Aspects of the Physical World
Fall. 3 credits. Lec. T R 2:55-4:10, rec. W 2:30-3:20 or W 3:35-4:25. A. Sadoff. This is a descriptive physics course aimed specifically at the non-science student. There is an emphasis on the ideas of modern physics where the approach is both historical and thematic. The methodology of science and the nature of evidence is emphasized. An overriding theme is the character of physical laws as shown through the great principles of symmetry and conservation. While there are a few computational problems assigned, the purpose is to help students to understand the concepts rather than to master problem-solving techniques. At the level of Physics for Poets by March.

PHYS 202 The World According to Physics—The Way Things Work
Summer 3-week session. 3 credits. Prerequisite: three years of high school mathematics, including some trigonometry. M T W F 10:00-12:00, L. Maruggi. Two 2 afternoons per week to be arranged. R. Lieberman. Intended to provide students majoring in fields outside the sciences with an appreciation for the familiar physical world surrounding them. Which falls faster, a pound of gold or a pound of feathers? What trajectory does a launched rocket follow? Why are the curves on highways banked? What actually keeps a satellite circling the earth—why doesn’t it just fall down or fly away? Can you build a ship that runs off the heat found in the ocean? With an emphasis on problem solving, the course helps the student to develop skills transferable to other areas. Topics include Newton’s basic laws of motion, trajectories, satellites, space travel, and the concepts of energy.

PHYS 203 Physics of the Heavens and the Earth—A Synthesis

This course shows how the unification of apparently distinct areas of physics leads to an explosion in the growth of our knowledge and understanding. The material is divided into three parts: the physics of motion on earth and motion in the heavens, showing how the two evolved separately, from the ideas of the ancient Greeks to the dynamics and telescopic discoveries of Galileo; the final melding of these two topics with Newton’s Universal Gravitation; an exploration of this “new” physics and its impact. There is an emphasis throughout on how do we know the laws? These are the stories of breakthrough discoveries and the brilliant insights made by fascinating people, offering at the same time a humanistic perspective.

PHYS 204 Physics of Musical Sound
Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec. M W F 9:05-9:55; rec. R or F 3:35-4:25. E. Cassel.

Many features of the production, propagation, and perception of musical sound may be understood in terms of important concepts in physics. Topics covered will include the mechanism of tone production in musical instruments, distinctions in tone quality, musical scales and tuning, some basic principles of room acoustics and reproduction.
of sound, and aspects of the mechanism of hearing. At the level of \textit{The Science of Sound}, by T. D. Rossing.

**PHYS 205 Reasoning about Luck**  
Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec. T R 2:30–4:00; rec. T 2:30–3:20. L. N. Hand.

An attempt to explain how and when natural scientists can cope rationally with chance. The first part is a constructive way with the basic ideas of probability theory and explains why it is that in large systems likely events can become overwhelmingly likely. An introduction to mechanics and to heat as probabilistic mechanics follows. In this way, interested students are given a nontrivial understanding of the second law of thermodynamics, that putative bridge between C. P. Snow's two cultures. Another physical theory, quantum mechanics, in which chance occurs—though in a somewhat mysterious way—is touched on.

**PHYS 206 War and Peace in the Nuclear Age (also Government 384)**  

This course is intended for any student who wishes to understand the following: the evolution and history of military strategy; the development in 20th-century physics that culminated in the development of the "atomic" bomb; the principles, types, and effects of nuclear weapons; the development of arms-control negotiations. The course will also examine the military concepts involved in military strategy and arms control. Much attention will be given to the problem and mechanisms of control of proliferation and weapons of mass destruction. Assignments emphasize critical reasoning skills as well as the technical subject matter.

**PHYS 207-208 Fundamentals of Physics**  
207: Fall, 208: spring. 4 credits each term.  
Prerequisites for Physics 207: high school physics plus Mathematics 111 or 191, or substantial previous contact with introductory calculus, combined with coregistration in a math course approved by instructor.  
Prerequisites for Physics 208: Physics 207 or 112 or 101 and at least coregistration in Mathematics 112 or 192. Physics 207-208 is a two-semester introduction to physics with emphasis on tools generally applicable in the sciences, intended for students majoring in a physical science, mathematics, or an analytically oriented biological science. Lec. M W F 9:05–9:55 or 11:15–12:05. Two rec. each week and one 3-hour lab alternating weeks. Evening exams. Lec. P. Drell; spring, P. Lepage.

Temperature, heat, thermal energy, electrostatics, behavior of matter in electric fields, DC circuits, magnetic fields, Faraday's law, Maxwell's equations, electromagnetic oscillations. At the level of \textit{Physics for Scientists and Engineers}, by Serway. Laboratory covers electrical measurements, circuits, and some aspects of heat transfer.

**PHYS 210 Randomness in Classical and Quantum Physics**  
Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec. T R 1:25–2:40; rec. M 2:30–3:20 or M 3:35–4:25. N. D. Mermin.

We will examine two revolutionary fields of classical physics, one venerable and one relatively recent: the special theory of relativity will be developed, with a view to understanding how certain simple but apparently contradictory facts about light lead to extraordinary insights into the nature of time; and the newer subject of "chaos" will be explored, with a view to seeing how extremely simple rules can lead to behavior of breathtaking complexity.

**PHYS 211 Physics II: Heat/ Electromagnetism**  

Temperature, heat, thermal energy, electrostatics, behavior of matter in electric fields, DC circuits, magnetic fields, Faraday's law, Maxwell's equations, electromagnetic oscillations. At the level of \textit{Physics for Scientists and Engineers}, by Serway. Laboratory covers electrical measurements, circuits, and some aspects of heat transfer.

**PHYS 212 Physics II: Optics, Waves, and Particles**  

Physics of wave phenomena, electromagnetic waves, interference and diffraction effects, wave properties of particles and introduction to quantum physics. Course includes computer use in solving problems and labs. At the level of \textit{Physics for Scientists and Engineers}, by Serway.

**PHYS 216 Introduction to Special Relativity**  
Fall, spring. Based upon preregistration. 1 credit. S-U only. Enrollment may be limited. Course will be completed within first four to six weeks of term.  
Registration in this course is a requirement for registration in Physics 217, unless 192 student has taken a relativity course at the level of Physics 116 or Astronomy 106. Prerequisites: Physics 112 or Physics 207 or permission of instructor. Lec. T R 8:00–8:50. Fall, spring, staff.

Introduction to Einstein's Theory of Special Relativity: Galilean and Lorentz transformations, the concept of simultaneity, time dilation and Lorentz contraction, the relativistic transformations of velocity, momentum and energy, and relativistic invariance in the laws of physics. At the level of \textit{An Introduction to Mechanics} by Kleppner and Kolenkow or \textit{Space and Time in Special Relativity} by Mermin.

**PHYS 217 Physics II: Electricity and Magnetism**  
Fall, spring. 4 credits. Enrollment may be limited.  
Intended for students who have done very well in Physics 112 or 116 and in mathematics and who desire a more analytic treatment than that of Physics 213. Prospective physics majors are encouraged to select Physics 217. Prerequisites: approval of student's adviser and permission from the instructor. A placement quiz may be given early in the semester, permitting those students who find Physics 217 too abstract or analytical to transfer into Physics 213, which they can do without difficulty at that time. Vector calculus will be taught in this course, but previous contact, especially with the operations \textit{grad}, \textit{div}, and \textit{curl}, is helpful. It is assumed the student has seen Special Relativity at the level of Physics 116 or is currently enrolled in Physics 216. It is also assumed that the student has covered the material of Mathematics 192 and is coregistered in Mathematics 293 or the equivalent. Lec. M W F 10:10–11:00. Fall, staff; spring, K. Berkelman.

At the level of \textit{Electricity and Magnetism}, by Purcell (Vol. 2, Berkeley Physics Series).

**PHYS 218 Physics III: Waves and Thermodynamics**  
Fall, spring. 4 credits. Enrollment may be limited.  
A more rigorous version of Physics 214. Conditions governing enrollment are similar to those of Physics 217. Lec. M W F 11:15–12:05. Fall, J. Brock; spring, E. Bodenschatz.

Topics covered in recent years have included oscillators, mechanical waves, waves at interfaces, standing waves, electromagnetic waves, guided waves, scattering, interference and diffraction, geometric optics, the doppler effect, and an introduction to water waves. Evening exams may be scheduled. At the level of \textit{Physics of Waves} by Elmore.

**PHYS 310 Intermediate Experimental Physics**  
Spring. 3 credits. Enrollment may be limited. Prerequisite: Physics 208 or 213. Labs T 1:25–4:25.

Students select from a variety of experiments. An individual, independent approach is encouraged. Facilities of the Physics 410 lab are available for some experiments.
PHYS 314 Intermediate Mechanics
Spring. 4 credits. Prerequisites: Physics 208 or 214 (or equivalent) and Math 293 or 294 (or equivalent). This course in Applied and Engineering Physics 322 or coregistration in Mathematics 420 recommended. Intended for physics majors with concentration outside of physics or astronomy; Physics 314 covers similar material at a more analytical level. Lec. M W F 10:10–11:00, rec. F 1:25–2:15. C. Franck.
Includes Newtonian mechanics, Lagrange and Hamilton formulations, central forces, rigid body motion, and planetary motion. At the level of Classical Dynamics by Marion and Thornton.

PHYS 316-317 Modern Physics I and II
3 credits each term. Physics 316, fall; Physics 317, fall. The two courses comprise a two-term sequence and it is assumed that majors registering in Physics 316 will continue with Physics 317.
Introduction to the physics of microscopic phenomena, emphasizing the use of elementary quantum and statistical mechanics. Physics 316: Breakdown of classical concepts in microphysics, quanta and matter waves; Schrödinger equation and solutions in 1 and 3 dimensions; hydrogen atom, exclusion principle, the periodic table at the level of Modern Physics from A to Z by Rohlf. Physics 317: Classical statistical mechanics; molecules; solid state physics; nuclear physics and radioactivity; elementary particle physics at the level of An Introduction to Quantum Physics by French.

PHYS 318 Analytical Mechanics
Spring. 4 credits. Prerequisites: Physics 110 or permission of instructor; Applied and Engineering Physics 321 or Mathematics 420. Intended for junior physics majors concentrating in physics or astronomy. Physics 318 covers similar material at a less demanding level. Lec. M W F 10:10–11:00; rec. T 10:30–11:20. R. M. Clar.
Newtonian mechanics of particles and systems of particles, including rigid bodies; oscillating systems; gravitation and planetary motion; moving coordinate systems; Lagrange and Hamilton formulations; normal modes and small vibrations; introduction to chaos. At the level of Mechanics by Landau and Physics 318 Lecture Notes by Hand and Finch. Supplementary reading will be assigned.

PHYS 323 Intermediate Electricity and Magnetism
Fall. 4 credits. Prerequisites: Physics 208 or 214 (or equivalent) and Math 293 or 294 (or equivalent); coregistration in Applied and Engineering Physics 321 or Math 321 or 420 recommended. Intended for physics majors with concentration outside of physics or astronomy; Physics 323 covers similar material at a more analytical level. Lec. M W F 11:15–12:05, rec. F 2:30–3:20. G. F. Dugan.
Includes electrostatics, magnetostatics, boundary value problems, dielectric and magnetic media, Maxwell's Equations, and electromagnetic waves, and sources of electromagnetic radiation.

PHYS 327 Advanced Electricity and Magnetism
Electro and magnetostatics, vector and scalar potentials, Laplace's Equation and boundary value problems, multipoles, radiation-solutions to Maxwell's Equations, energy-momentum of radiation, electromodynamics in media; special relativistic-transformations, four vectors, particle kinematics and dynamics, relativistic electro-dynamics. At the level of Classical Electromagnetic Radiation, by Heald and Marion.

PHYS 330 Modern Experimental Optics (also A&E&P 330)
A practical laboratory course in basic and modern optics. The seven projects cover a wide range of topics from geometrical optics to classical wave concepts as interference, diffraction and polarization. Each experimental setup is equipped with standard, off-the-shelf optics and opto-mechanical components to provide the students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. The students will also be introduced to digital imaging and image processing techniques. At the level of Modern Optics by Guenther.

PHYS 341 Thermodynamics and Statistical Physics
Statistical physics, developing both thermodynamics and statistical mechanics simultaneously. Concepts of temperature, laws of thermodynamics, entropy, thermodynamic relations, free energy. Applications to phase equilibrium, multicomponent systems, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems; introduction to treatment of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics with applications. Elementary transport theory. At the level of Fundamentals of Statistical and Thermal Physics, by Reif, or Introduction to Statistical Mechanics by Betts.

PHYS 360 Electronic Circuits (also A&E&P 363)
Fall, spring. 4 credits. Prerequisites: Physics 208 or 213 or permission of the instructor. No previous experience with electronics assumed. However, the course moves quickly through some introductory topics such as basic DC circuits. Fall term is usually less crowded. Lec. M 2:30–4:25; labs, T R or W F 1:35–2:45 (also evening labs M W 7:30–10:30 spring). Fall, E. Kirkland; spring, R. Thorne.
Analyze, design, build and experimentally test circuits used in scientific and engineering instrumentation (with discrete components and integrated circuits). Analyze linear amplifiers with feedback, oscillators, comparators, filters, diodes and transistors. Digital circuits: combinatorial (gates) and sequential (flip-flops, counters, shift registers) logic. Computer interfacing introduced and used to investigate digital to analog (DAC) and analog to digital conversion (ADC) and signal averaging. At the level of Microelectronic Circuits by Sedra.

PHYS 400 Informal Advanced Laboratory
Fall, spring. (Summer, 6 week session). Variable to 3 credits. Prerequisites: two years of physics or permission of instructor. Lab T W 1:25–4:25. Fall, W. Ho; spring, D. Hartill.
Experiments of widely varying difficulty in one or more areas, as listed under Physics 410, may be done to fill the student's special requirements.

PHYS 410 Advanced Experimental Physics
Fall, spring. 4 credits. Limited to seniors except by special permission. Prerequisites: Physics 214 (or 310 or 360) plus 318 and 327, or permission of instructor. Lec. M 2:30–3:20, lab T W 1:25–4:25. Fall, W. Ho; spring, D. Hartill.
Selected topics in experimental concepts and techniques. About forty different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, nuclear physics. The student performs three to six diverse experiments, depending on difficulty, selected to meet individual needs and interests. Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

PHYS 443 Introductory Quantum Mechanics
Spring. 4 credits. Prerequisites: Physics 327 or 323, and Physics 316 and Applied and Engineering Physics 321 or Mathematics 420; coregistration in Physics 320 or 318; permission of instructor. Lec. M W F 9:05–9:55, rec. F 9:05–10:00. Staff.
Introduction to concepts and techniques of quantum mechanics, at the level of Quantum Mechanics, by Cohen-Tannoudji.

PHYS 444 Nuclear and High-Energy Particle Physics
Behavior of high-energy particles and radiation; elementary particles; basic properties of accelerators and detectors; general symmetries and conservation laws. At the level of Concepts of High Energy Physics, by Gottfried and Weisskopf.

PHYS 454 Introductory Solid-State Physics (also A&E&P 450)
An introduction to modern solid-state physics, including crystal structure, lattice vibrations, electron theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, and defects. At the level of Introduction to Solid State Physics, by Kittel, and Solid State Physics, by Ashcroft and Mermin.
PHYS 455 Geometrical Concepts in Physics
Spring and summer. Prerequisite: Physics 327 and at least coregistration in Physics 318 or permission of instructor. Usually offered every other spring. Lec. T R 10:10–11:25.

Geometrical methods are an essential tool in modern theoretical physics and also provide deep insights into classical physics—electrodynamics, thermodynamics, mechanics, special and general relativity. This course will introduce basic concepts from topology and differential geometry, emphasize calculation methods and illustrate their utility by drawing examples from these areas of physics. In particular, we shall cover manifolds, differential forms, vector bundles, homotopy, homology and lie groups. At the level of Geometrical Methods of Mathematical Physics by Schutz.

PHYS 480 Computational Physics (also Phys 680 and Astro 690)
Spring. 3 credits. S-U grades only. Prerequisites: The course assumes a good background in the standard "mathematical methods for physics," and the ability to write programs in Fortran or C. No previous knowledge of numerical analysis is assumed. Lec. T R 10:10–11:25.

S. Teukolsky.

A course designed to familiarize students with numerical techniques for solving diverse problems in physics and related fields. The problems will be drawn from many different branches of physics, but the emphasis will be on common techniques of solution. Numerical techniques discussed in the course will include ordinary and partial differential equations, linear algebra and eigenvalue problems, Monte Carlo techniques, solving nonlinear equations, fast Fourier transforms, etc. In contrast to traditional numerical analysis courses, the flavor of the course will be "how-to," rather than theoretical. No theorems will be proved. Students will be expected to solve, both individually and in small teams, assigned numerical exercises. Text: Numerical Recipes: The Art of Scientific Computing, by Press, Teukolsky, Flannery, and Vetterling.

PHYS 481–489 Special Topics Seminar
Offerings are announced each term. 2 and 3 credits. Limited to senior physics majors and those who receive permission of instructor. S-U grades only.

PHYS 490 Independent Study in Physics
Fall or spring. Variable to 4 credits. Ordinarily limited to seniors. Prerequisite: permission required of professor who will direct proposed work. A copy of Request for Independent Study form must be filed with the course coordinator, 121 Clark Hall. Individual project work (reading or laboratory) in any branch of physics.

PHYS 500 Informal Graduate Laboratory
Fall, spring, summer. Variable to 2 credits. By permission of instructor. Experiments of facility in one or more areas, as listed under Physics 510, may be done to fulfill student's special requirements.

PHYS 510 Advanced Experimental Physics
Fall, spring, summer. 3 credits. Lab. T W 1:25–4:25. Fall, W. Ho; spring, D. Hartill. About sixty different experiments are available in acoustics, optics, spectroscopy, electrical, circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, nuclear physics. Students perform four to eight experiments selected to meet individual needs. Independent work is stressed. An optional lecture associated with Physics 410, M 2:30–4:25 is available. It includes lectures on techniques used in experimental physics in the advanced laboratory and on current research topics.

PHYS 520 Projects in Experimental Physics
Fall, spring, summer. Variable to 3 credits. To be supervised by faculty member. Prerequisites: Students must advise department course coordinator of faculty member responsible for their project. Projects: Prerequisite: Physics 510.

Projects of modern topical interest that involve some independent development work by student. Opportunity for more initiative in experimental work than is possible in Physics 510.

PHYS 525 Physics of Black Holes, White Dwarfs, and Neutron Stars (also Astronomy 511)
Spring. 4 credits. D. Chernoff.

The formation of compact objects: neutrino and gravitational radiation from supernova collapse and neutron stars. Equilibrium configurations, equations of state, stability criteria, and mass limits. The influence of rotation and magnetic fields. Pulsar phenomena. Mass flow in binary systems; spherical and disk accretion; high-temperature radiation processes. Compact X-ray sources and X-ray bursts. Emphasis will be on the application of fundamental physical principles to compact objects. Topics in diverse areas of physics will be discussed: solid-state physics, nuclear physics, relativity, fluid dynamics, high-energy physics, etc. No astronomy or general relativity prerequisites. Text: Physics of Black Holes, White Dwarfs, and Neutron Stars, by Shapiro and Teukolsky.

PHYS 551 Classical Mechanics

Lagrangian and Hamiltonian formulation of classical mechanics, using modern methods, modern applications in nonlinear dynamics. At the level of Geometric Mechanics, by Talmam.

PHYS 553-554 General Relativity (also Astronomy 509–510)

PHYS 561 Classical Electrodynamics
Fall. 3 credits. Lec. T R 8:30–9:55. Sec. 2:30–5:20. V. Yaffe. Maxwell's equations, electromagnetic potentials, electrodynamics of continuous media (selected topics), special relativity, radiation theory. At the level of Classical Electrodynamics, by Jackson.

PHYS 562 Statistical Physics
Spring. 4 credits. Primarily for graduate students. Prerequisites: a good knowledge of quantum mechanics (at the level of Merzbacher), classical mechanics (at the level of Marion), and statistical mechanics (at the level of Reif). Lec. M W F 9:05–10:10.

N. Ashcroft.

Macroscopic or thermodynamic concepts including the laws of thermodynamics, thermodynamic functions, thermodynamic stability, and the thermodynamics of phase equilibria. Microscopic concepts including 1-, 2-, and N-particle quantum systems, the micro-canonical, canonical and grand-canonical distributions, Bose-Einstein, Fermi-Dirac and Boltzmann statistics, the density-matrix—the microscopic-macroscopic connection. Applications include spin systems—the Ising and related models, strongly correlated fluids, and lattice-gases, including distribution and correlation functions, thermodynamic perturbation theory and introduction to critical phenomena and the renormalization group; dense Fermi- and Bose-systems; linear response of quanlal and classical systems, transport properties and the Boltzmann equation. At the level of Statistical Mechanics (2nd edition) by Pathria and Statistical Mechanics of Phase Transition by Yeomans.

PHYS 572 Quantum Mechanics I
Fall. 4 credits. Lec. M W F 11:15–12:05.

D. Cassel.

General principles of quantum mechanics, formulated in the language of Dirac. Systems with few degrees of freedom: hydrogen, including fine and hyperfine structure; the deuteron and neutron-proton scattering, helium. Theory of symmetries, perturbations and collisions will be developed to analyze phenomena displayed by these systems. At the level of Quantum Laws and Lifezh. A knowledge of the subject at the level of Phys 443 will be assumed, but the course will be self-contained.

PHYS 574 Quantum Mechanics II

E. Flanagan.

Systems with many degrees of freedom. Quantization of the electromagnetic field; interaction of light with matter. Many electron atoms. Second quantization for fermions. Quantum liquids. Scattering of complex systems. Introduction to the Dirac equation. At the level of Quantum Laws and Lifshitz. A knowledge of the subject at the level of Phys 561 and 572 will be assumed.

PHYS 599 Cosmology (also ASTRO 599)
For description, see ASTRO 599.

PHYS 635 Solid-State Physics I
Fall. 3 credits. Prerequisite: A good undergraduate solid-state physics course, such as Physics 454. D. Raphael.

A survey of the basics of the physics of solids: crystal structure, x-ray diffraction, phonons, and electrons. Selected topics; superconduction, magnetism, disordered materials, dielectric and optical properties and mesoscopic physics. At the level of Solid State Physics by Ashcroft and Mermin.
Note: Only S-U grades will be given in courses numbered 650 or above.

PHYS 651 Relativistic Quantum Field Theory I
Fall. 3 credits. S-U grades only.
H. Tye.
Topics to be covered include consequences of causality and Lorentz invariance, field quantization, perturbation theory, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and weak interactions.

PHYS 652 Relativistic Quantum Field Theory II
Spring. 3 credits. S-U grades only.
H. Tye.
This course is a continuation of Physics 651 and introduces more advanced methods and concepts in quantum field theory. Topics include functional integral methods, quantization of non-abelian gauge theories, the renormalization group, phase transitions, and spontaneous symmetry breaking. Applications to the electroweak theory and quantum chromodynamics are emphasized. At the level of An Introduction to Quantum Field Theory by Peskin and Schroeder.

PHYS 653 Statistical Physics
Fall. 3 credits. Normally taken by graduate students in their second or later years. Prerequisites: Competence in the basic principles of quantum mechanics, statistical physics at the level of Physics 562, and thermodynamics. S-U grades only.
C. Henley.
Survey of topics in modern statistical physics: Dynamical statistical physics (kinetic theory, Boltzmann equation, hydrodynamics); theory of simple fluids; scaling theories and the renormalization group; phase transitions in disordered systems; pattern formation in nonlinear systems, percolation theory.

PHYS 654 Theory of Many-Particle Systems
Spring. 3 credits. Prerequisites: Physics 562, 574, 635, 636, and 653. S-U grades only.
C. Henley.
A continuation of Physics 635; magnetism, superconductivity, broken symmetries, elementary excitations, and other topics in quantum condensed matter physics not covered in Solid State Physics by Ashcroft and Mermin, such as topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory, disordered systems, Anderson localization and other metal insulator transitions.

PHYS 661 Advanced Topics in High Energy Particle Theory

This course will present advanced topics of current research interest. Subject matter will vary from year to year. Some likely topics are two-dimensional conformal field theory with applications to string theory and condensed matter physics, applications of the electroweak theory, lattice gauge theory, mathematical methods (e.g. group theory), perturbative quantum chromodynamics, anomalies and geometry, supersymmetry, current algebra, heavy quark physics, heavy quark symmetry and phenomenological issues beyond the standard model.

PHYS 665 Topics in Theoretical Astrophysics
Not offered 1997-98.
For description, see PHYS 480.

PHYS 670 Instrumentation Seminar
Conception, design, and performance of innovative instrumentation in condensed matter and elementary particle physics.

PHYS 680 Computational Physics (also Physics 480 and Astronomy 690)
For description, see PHYS 480.

PHYS 681-689 Special Topics
Offerings are announced each term. Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

PHYS 690 Independent Study in Physics
Fall or spring. Variable to 4 credits.
A student must advise the department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only. Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

PSYCHOLOGY

The major areas of psychology represented in the department are perceptual and cognitive psychology, biopsychology, and personality and social psychology. These areas are very broadly defined, and the courses are quite diverse. Biopsychology includes such things as animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. Perceptual and cognitive psychology includes such courses as cognition, perception, memory, and psycholinguistics. Personality and social psychology courses in social psychology and personality (such as Psychology and Law, Judgment and Decision Making, and Social Construction of Gender), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department also emphasizes the statistical and logical analysis of psychological data and problems.

The Major

Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C+ or better. Provisional admission requires two such courses. To apply to the major and receive an adviser, a major application form may be obtained from the department office (211 Uris Hall).

Requirements for the major are:
1) a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisers, a range of courses that cover the basic processes in psychology (laboratory and/or field experience is recommended), and
2) demonstration of proficiency in statistics before the beginning of the senior year (See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:

1) Perceptual and cognitive psychology
2) Biopsychology
3) Social, personality, and abnormal psychology

The following classification of Department of Psychology offerings is intended to help students and their advisers choose courses that will ensure that such breadth is achieved.

PSYCHOLOGY

Perceptual and cognitive psychology

Biopsychology

Social, personality, and abnormal psychology

The following classification of Department of Psychology offerings is intended to help students and their advisers choose courses that will ensure that such breadth is achieved.

1) Perceptual and cognitive psychology

Biopsychology

1) Perceptual and cognitive psychology

2) Biopsychology
3) Social, personality, and abnormal psychology: Psychology 128, 265, 275, 277, 280, 325, 327, 328, 380, 402, 404, 450, 481, 489, 491.

4) Other courses: Psychology 101, 347, 350, 410, 440, 441, 470, 471, 472, 473, 475, 478, 479. The major adviser determines to which group, if any, these courses may be applied.

With the permission of the adviser, courses in other departments may be accepted toward the major requirements.

Fieldwork, independent study, and teaching. The department requires students to observe the following limits on fieldwork, independent study, and teaching:

1) Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.

2) An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

Statistics requirement. Proficiency in statistics can be demonstrated in any one of the several ways listed below:

1) Passing Psychology 350.

2) Passing an approved course or course sequence in statistics in some other department at Cornell. The approved list of courses and sequences may change. It has usually included Sociology 301, and the sequences Education 352 and 353, and Industrial and Labor Relations 210 and 211. Requests that a particular course be added to this list may be made to Professor Gilovich for approval.

3) Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or sequence must be equivalent to at least 12 undergraduate credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.

4) Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives notice at least one week before. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

Concentration in biopsychology. Psychology majors interested in psychology as a biological science can elect to specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology, the physical sciences (at least introductory chemistry, and mathematics). Students will design with their advisers an integrated program in biopsychology built around courses in physiological, chemical, anatomical, and psychological determinants of human and nonhuman behavior offered by the Department of Psychology.

Courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major after consultation between the student and his or her biopsychology adviser.

Concentration in personality and social psychology. This concentration is offered in cooperation with the Department of Sociology. Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their departmental statistics. To ensure a solid interdisciplinary grounding, students in the concentration will be permitted to include some major courses in sociology and related fields. Advisers will assist students in the selection of a coherent set of courses from social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced psychology seminars, with the permission of the instructor. Undergraduate honors program. The honors program is designed for those exceptionally able students who wish to pursue an intensive and independent program of research in psychology. Successful participation serves as evidence of the student's facility in the two most important skills of an academic psychologist: the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to engage in creative research activity. All qualified students planning on a graduate education in psychology or other academic fields should consider the honors program seriously. The program offers most students the closest contact and collaboration with faculty that they will receive during their time at Cornell.

The core of the honors program is a research project that the student carries out in close collaboration with a faculty member in the field of psychology. It is assumed that most students will do so while enrolled in Psychology 470 (Undergraduate Research in Psychology). A written report of the research is to be given to the chair of the honors committee (currently Professor Khurana) by the end of the last semester of the student's senior year. A defense of the thesis is then given before a committee of three faculty members, and the student presents his or her work in a public forum. Final honors standing (summa cum laude, magna cum laude, cum laude) is indicated on the student's diploma. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year.

A student may formally apply to the honors program at any time during the senior year provided that she or he is actively engaged in independent research. However, students must do so by the second week of November. Applications should be given to Professor Khurana and should be made directly by the student.

Distribution Requirement

The distribution requirement in the social sciences is satisfied by any two courses in psychology with the exception of Psychology 123, 290, 307, 322, 324, 326, 332, 350, 361, 390, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492.

Note: The Department of Psychology has listed all days and times for each course that we offer. If there should be changes in the days, times, or semester that a course is offered, we will post the necessary changes throughout the department and in the supplements of the Course and Time and Course and Room Rosters. Changes are also available on the World Wide Web site, http://comp9.psych.cornell.edu

Courses

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry
Fall. 3 credits. Students who would like to take a discussion/demonstration seminar should also enroll in Psychology 103. M W F 10:10. J. B. Maas. The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made about human behavior.

PSYCH 102 Introduction to Cognitive Science (also Cognitive Studies 101)
Fall. 3 credits. T R 11:40–12:55. M. Spivey-Knowlton. This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of the brain. Topics in cognitive science: language, categorization, memory, vision, and action.

PSYCH 103 Introductory Psychology Seminars
Fall. 1 credit. Limited to 300 students.
Prerequisite: concurrent enrollment in Psychology 101. Hours to be arranged. A weekly seminar that may be taken in addition to Psychology 101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a term paper related to the seminar topic. Choice of seminar topics and meeting times will be available at the second lecture of Psychology 101.

PSYCH 123 Introduction to Biopsychology
Fall. 3 credits. No prerequisites. Can be used to satisfy the psychology major breadth requirement and as an alternative prerequisite for upper-level biopsychology courses. Students who would like to take a discussion/demonstration seminar should also enroll in Psych 125, a one hour per week one-credit section. M W F 10:10.
E. A. Regan. An introduction to psychology from a biological perspective, including both evolutionary and physiological approaches to behavior. Topics include the structure,
function, and development of the nervous system, genetic and biochemical bases of behavior, hormones and behavior, biological bases of learning, cognition, communication, and language, and the ecology and evolution of social organization and social development.

**PSYCH 128 Introduction to Psychology: Personality and Social Behavior**  
Summer only. 3 credits. M-F 10:10-11:15.  
Staff.  
Personality: the behavioral similarities and differences among people and how they develop. Freudian, learning, and humanistic theories of personality; research in personality, and personality assessment through testing. Social behavior: how people behave in interactions with others; attitudes, persuasion, attraction, aggression, and conformity. How personality and social behavior influence each other and cause many interesting social and psychological phenomena.

**Introductory courses in cognitive psychology.** Each of the following four courses (205, 209, 214, 215) provides an introduction to a major area of study within cognitive psychology. These courses are independent of one another, and none has any prerequisites. Students may take any one of the courses or any combination of them (including all four). Courses may be taken in any order or simultaneously.

**PSYCH 201 Exploration of Cognitive Science in Ecological Settings (also Cognitive Studies 201)**  
Fall or spring. 4 credits. Prerequisites: Introduction to Cognitive Science COGST 101 or written permission of the instructor.  
Fall: B. Halpern and staff. Spring: D. Field and staff.  
A laboratory-oriented course designed to teach the theory and techniques of cognitive science in relation to the full range of both present and anticipated-future activities in the workplace, the classroom, and in everyday life. Lecture time is used to present laboratory exercise results, to supplement laboratory topics, and for discussion of primary research papers. State of the art computing, display (visual, auditory, and other perceptual/sensory systems), digital communication, and simulation approaches, including virtual reality methods when relevant, are used to apply cognitive science principles and concepts to the analysis, exploration, and direct testing of human-machine interfaces that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings such as fixed and mobile offices, libraries, laboratories, point-of-sale locations, Internet and World Wide Web communications, manufacturing, storage and distribution facilities and systems, on-site maintenance and repair procedures, and personal and group transportation, vehicles and systems.

**PSYCH 205 Perception**  
Spring. 3 credits. Open to first-year students. Graduate students, see Psychology 605. T R 11:40-12:55. J. E. Cutting.  
One of four introductory courses in cognitive psychology. Basic perceptual concepts and phenomena are discussed with emphasis on stimulus variables and sensory mechanisms. All sensory modalities are considered. Visual and auditory perception are discussed in detail.

**PSYCH 209 Developmental Psychology**  
Spring. 4 credits. Graduate students, see Psychology 709. T R 10:10-11:25. F. C. Keil.  
One of four introductory courses in cognition and perception. A comprehensive introduction to current thinking and research in developmental psychology that approaches problems primarily from a cognitive perspective. The course focuses on the development of perception, action, cognition, emotion, personality, social understanding, language, and moral reasoning.

**PSYCH 214 Issues in Cognitive Psychology**  
Fall. 3 credits. Sophomore standing required. Limited to 150 students. Graduate students, see Psychology 614. M W F 10:10. B. Khurana.  
Various approaches to the study of cognition will be discussed. Basic concepts in how humans process different kinds of information such as visual, auditory, and symbolic will be introduced. These concepts will then be used to explore topics such as attention and consciousness, concept formation and representation, memory processes and systems, imagery and cognitive maps, problem solving and reasoning, language and language acquisition and comprehension, intelligence and creativity, and social cognition.

**PSYCH 215 Psychology of Language (also Linguistics 215)**  
Spring. 3 or 4 credits (4-credit option involves term paper). Graduate students, see Psychology 715. M W F 11:15. J. Sereno.  
One of four introductory courses in cognitive psychology. Introduction to the psychological study of language. Covers research in spoken language comprehension and production, reading, and language acquisition.

**Introductory courses in social and personality psychology.** Each of the following four courses (265, 275, 277, 280) provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and none has any prerequisites. Students may take any one of the courses or any combination of them (including all four). Courses may be taken in any order or simultaneously.

**PSYCH 216 Cognitive Psychology Lab**  
Fall. 1 credit. Limited to 16 students. Prerequisite: concurrent enrollment in Psychology 214. Hours to be arranged. B. Khurana.  
If you've ever wondered how humans manage to represent their visual world, why telephone numbers are seven digits long, why imagery works as a mnemonic device, why certain things are better remembered than others, whether bilinguals are disadvantaged relative to monolinguals, how children acquire language, how people make decisions... this laboratory is for you! A weekly lab meeting that encourages students to discover the scientist in themselves through the study of Cognition. Much of Cognitive research takes place in the laboratory and this course allows students to become familiar with the "how-to" of such research. Students will be given six to eight basic experiments to explore and tinker with. They will be encouraged to pose "what if" questions and eventually test them. The course promotes independent thinking, problem solving in an experimental setting, proposing and testing of one's own hypotheses, relating laboratory cognition to the real world, and communicating scientific ideas through informal and formal writing and oral assignments. Prepared for an interactive learning experience.

**PSYCH 265 Psychology and Law**  
Fall. 3 credits. M W F 1:25. D. A. Dunning.  
This course examines the implications of psychological theories and findings for the law and the criminal justice system. We concentrate on psychological research on legal topics (e.g., confession, eyewitness testimony, jury decision making, homicide, aggression, the prison system), social issues (e.g., death penalty, affirmative action), as well as on psychologists as participants in the legal system (e.g., assessing insanity and dangerousness and for expert testimony).

**PSYCH 275 Introduction to Personality Psychology (also HDFS 260)**  
Fall. 3 credits. Prerequisites: Psychology 101, HDFS 115, or permission of instructor. T R 10:10-11:25. D. J. Bem.  
An introduction to personality psychology, with an emphasis on personality development and contemporary research. Covers the major theories of personality, influences on personality development (including genetic, biological, experiential and environmental factors), and methods for assessing personality.

**PSYCH 277 Social Construction of Gender (also Women's Studies 277)**  
Fall. 3 credits. Limited to 240 students. M W 4:40-5:55. S. Field. Psychology/Women's Studies 277 is an interdisciplinary course that addresses two broad questions: 1) how an individual's gender and sexuality are constructed; and 2) how hidden assumptions or "lenses" embedded in our social institutions, cultural discourses, and individual psyches perpetuate male power and oppress women and sexual minorities. Three lenses in particular are emphasized: androcentrism, gender polarisation, and biological essentialism. A fundamental assumption of the course is that social science has worried too much about difference per se and too little about how even our most neural-looking institutions invisibly transform difference into disadvanta- 

g. Although some attention is given to biological perspectives, the course emphasizes the cultural and psychological processes whereby the historically contingent comes to appear as the natural. Among some of the many topics discussed are the importance of looking at biology in context, the parental "instinct," androcentrism in law, sexual orientation cross-culturally, egalitarian relationships, gender-liberated child-rearing, and homophobia.

**PSYCH 280 Introduction to Social Psychology**  
Spring. 3 or 4 credits; the optional (or fourth) credit is for participation in a limited enrollment discussion section. T R 1:25-2:40. T. D. Gilovich and D. T. Regan.  
An introduction to research and theory in social psychology. Topics include processing of social information, social influence, persuasion, and attitude change; social interaction and group phenomena.
PSYCH 290 Motivation
The course surveys traditional and contemporary approaches to motivational behavior from Aristotle to Freud to Skinner to Lorenz. It also draws upon field studies, laboratory analyses, clinical cases and developmental stages to establish a scientific basis for motivation analysis. Normal and pathological teachings will serve as a target behavior.

PSYCH 292 Intelligence
Spring. 3 credits. Prerequisites: one 200-level course in psychology. M W 2:55–4:10. U. Neisser.
A scientific overview of the controversial issues that surround intelligence tests and what they measure. Topics include the history of testing, correlates of test scores, alternative approaches to mental ability, genetic and environmental contributions to diversity in intelligence, effects of schooling, worldwide IQ gains, cultural factors and group differences.

PSYCH 305 Visual Perception
Fall. 3 credits. 40–80 students. Prerequisite: Psychology 205 or permission of instructor. M W F 10:10. J. E. Cutting.
A detailed examination of pictures and their comparison to the real world. Linear perspective in Renaissance art, photography, and cinema will be discussed in light of contemporary research in perception and cognition.

PSYCH 307 Chemosensory Perception
Fall. 3 or 4 credits; the optional (or fourth) credit is for an independent laboratory project. Registration for the 4-credit option requires permission of the instructor; students will read, analyze, and discuss difficult original literature in the areas covered. Graduate students, see Psychology 607. Not offered 1997–98. T R 9:05–10:25. B. P. Halpem.
An examination of basic theory, data, and processes for perception of the chemosensory environment. After a very brief (about two weeks) lecture survey of the anatomy and physiology of taste and olfaction, the remainder of the course uses the Socratic method, in which the instructor asks questions of the students, to cover topics such as chemosensory psychophysics, salivary chemosensory bases for the tastes of foods, taste-smell interactions, chemosensory function in neonates and in the aged, temporal aspects of tasting, sweetness, effects of pollution of the chemosensory environment, and interactions between body state and chemosensory stimuli. At the level of Smell and Taste in Health and Disease, edited by T. V. Getchell et al., Sensory Science Theory and Applications in Foods, edited by H. T. Lawless and B. Klein, Sensory Analysis of Foods, 2nd edition, edited by J. R. Piggott.

PSYCH 309 Development of Perception and Representation
Fall. 3 credits. Prerequisite: Psychology 205, 209, 214, or 305, or permission of instructor. Graduate students, see Psychology 609. Not offered 1997–98. T R 2:55–4:10. Staff.
An introduction to theories and research on the origins and development of knowledge of the immediately surrounding world. The course focuses on knowledge of the world as an arrangement in space and time, knowledge of the world as a space that can be encountered through multiple sensory modes, knowledge of the world as a place that can be acted upon, and organization of the world into meaningful objects and events.

PSYCH 311 Introduction to Human Memory
Spring. 3 credits. Limited to 40 students. Some familiarity with statistical methods and experimental design and with the study of cognition is desirable. Graduate students, see Psychology 611. T R 11:40–12:55. Not offered 1997–98. B. Khurana.
This course offers an overview of experimental findings and theoretical issues in the study of human memory. Coverage includes topics such as the nature of memory, various memory systems, coding and retrieval processes, practice and habit acquisition, organization for learning and memory, interference and forgetting, models of memory, memory dysfunction and its relation to normal memory.

PSYCH 316 Auditory Perception
Fall. 3 or 4 credits; the 4-credit option involves an independent project or paper. Prerequisite: Psychology 205, 209, 214, or 215 (other psychology, linguistics, or biology courses could serve as prerequisite with permission of the instructor). Limited to 30 students. Graduate students, see Psychology 716. T R 10:10–11:25. C. L. Krumhansl.
Basic approaches to the perception of auditory information, with special consideration of complex patterns such as speech, music, and environmental sounds.

PSYCH 322 Hormones and Behavior (also BIONB 322)
Spring. 3 or 4 credits; the 4-credit option involves a one-hour section once a week in which students will be expected to read original papers in the field and participate in discussion. Limited to juniors and seniors; open to sophomores only by permission. Prerequisites: BIONB 221 or 222 or one year of introductory biology plus a course in psychology. S-U grades optional. Graduate students, see Psychology 722. T R 12:20–1:10. C. L. Krumhansl.
Following a review of the neural and endocrine systems, this course connects endocrine physiology to specific behaviors observed in various species, including humans. Although the relationship between sexual physiology and behavior is strongly emphasized, the lectures also describe hormonal contributions to parental behavior, aggression, stress, learning and memory, homeostasis, and biological rhythms. Topics for the discussion sections are chosen by the students within the context of hormonal influences on behavior.

PSYCH 324 Biopsychology Laboratory (also BIONB 324)
Fall. 4 credits. Limited to 20 juniors and seniors. Prerequisites: Psychology 123 or BIONB 221 or 222, and permission of instructor. T R 1:25–4:25. Staff.
Experiments designed to provide experience in animal behavior (including learning) and its neural and hormonal components. A variety of techniques, species, and behavior patterns are included.

PSYCH 325 Psychopathology
Fall. 4 credits. Prerequisite: 2 courses in psychology. M W F 11:15. K. L. Lockhart.
This course examines the nature and symptoms of the major forms of psychopathology: schizophrenia, depression, anxiety disorders, dissociative disorders, and personality disorders. Etiological factors are studied from a variety of different perspectives, e.g., psychological, biological and socio-cultural. Weekly discussion sections focus on controversial issues in the field of psychopathology and examine specific disorders in depth.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits. Prerequisite: Psychology 123, or an introductory biology course, or an introductory anthropology course. Graduate students, see Psychology 626. T R 2:55–4:10. R. E. Johnston.
A broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics covered will vary but will include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior and organization, cooperation and altruism, sexual behavior, mating and marriage systems, aggression, warfare.

PSYCH 327 Fieldwork in the Helping Relationship
Fall, spring. 4 credits. Prerequisites: Psychology 325, HDFS 370 or concurrent registration in 325 or HDFS 370 and permission of instructor. S-U grades only. Students do not enroll in advance for this course. Field placement assignments are made during the first two weeks of the semester. Students who have already taken Psychology 325 or HDFS 370 must contact the instructor during the first week of the semester. Enrollment is limited by the fieldwork placements available. Fee, $25 each semester. T R 12:20–1:10. K. L. Lockhart and staff.
This is a year-long field study and discussion course. The year-long commitment is mandatory. Psychology 328 will be for students taking the course a second time. An "R" grade will be assigned in the fall semester, and a S-U grade will be assigned in advance for the spring semester. An introductory fieldwork course for students currently enrolled in or who have taken Psychology 325 or HDFS 370. Fieldwork placements include the school system, psychiatric institutions, halfway houses, and other mental health oriented facilities. In addition to fieldwork, weekly supervisory/seminar meetings are held to discuss fieldwork issues and assigned readings.

PSYCH 328 Continuing Fieldwork in the Helping Relationship
Fall, spring. 4 credits. Prerequisites: Psychology 325, 327, or HDFS 370 and permission of instructor. S-U grades only. May not be taken more than twice. Students do not enroll in advance for this course. Fee, $25 each semester. T R 12:20–1:10. K. L. Lockhart and staff.
Designed to allow students who have done fieldwork as part of Psychology 327 to continue their field placements or begin new field placements under supervision this academic year. An "R" grade will be assigned in the fall semester, and a S-U grade will only be assigned in the spring semester.
PSYCH 332 Biopsychology of Learning and Memory (also BIONB 328)
Spring. 3 credits. Prerequisites: one year of biology and either a biopsychology class or BIONB 222. Limited to 60 students. Graduate students, see Psychology 632. M W F 11:15. Staff.
This course will survey the approaches that have been or are currently being used in order to understand the biological bases for learning and memory. Topics will include invertebrate, "simple system" approaches, imprinting, avian song learning, hippocampal and cerebellar function, and human pathology. Many of the readings will be from primary literature.

PSYCH 342 Human Perception: Applications to Computer Graphics, Art and Visual Display
Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: Psychology 101 or permission of instructor. Psychology 205 strongly recommended. Graduate students, see Psychology 642. T R 11:40–12:55, D. J. Field.
Our present technology allows us to transmit and display information over a variety of media. To make the most of these media, it is important to consider the limitations and abilities of the human observer. The course will consider a number of applied aspects of human perception with an emphasis on the display of visual information. Topics to be covered include: (1) two-dimensional display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.

PSYCH 347 Psychology of Visual Communications
Spring. 3 credits. Limited to 15 students. Prerequisite: Psychology 101 and permission of instructor. R 10:10–12:05, J. B. Maas.
An exploration of theories of education, communication, perception, attitude, and behavior, and how they relate to the effectiveness of visual based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages.

PSYCH 350 Statistics and Research Design
Acquaints the student with the elements of statistical description (measures of average, variation, correlation, etc.) and more important, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.

PSYCH 361 Biopsychology of Normal and Abnormal Behavior (also Nutritional Sciences 361)
Fall. 3 credits. Prerequisites: an introductory biology course and an introductory psychology course, or permission of instructor. S-U grades optional. Juniors and seniors only. M W F 9:05–9:55, B. J. Strupp.
A critical evaluation of factors thought to underlie normal and abnormal behavior and/or cognitive functioning. Psychological, biological, and societal influences will be integrated. Topics include: (1) psychiatric disorders (e.g., eating disorders); (2) the biopsychology of attention and memory; (3) nutritional influences on behavior (sugar, food additives, malnutrition, dieting); (4) cognitive dysfunction (e.g., amnesia, Alzheimer's disease), and (5) cognitive effects of developmental exposure to environmental toxins and drugs of abuse.

PSYCH 380 Community Mental Health (also Human Service Studies 380)
Summer only. 3 or 4 credits (3-credit option involves term paper). M-F 10:00–11:15. Staff.
Basic concepts in the field of community mental health. Social models of mental illness, epidemiology of the culture and social class in mental illness, public attitudes, and civil liberties.

PSYCH 396 Introduction to Sensory Systems (also BIONB 396)
Spring. 3 or 4 credits (4 credits with term paper). Registration for the 4-credit option requires permission of instructor. Prerequisites: an introductory course in biology or biopsychology, plus a second course in neurobiology or behavior or perception or cognition or biopsychology. Students will be expected to have elementary knowledge of perception, neurophysiology, behavior, and chemistry. No auditors. Offered alternate years. Graduate students, see Psychology 696.
The course will be taught using the Socratic method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with those characteristics of sensory systems that are common across living organisms and those sensory properties which represent adaptations of animals to particular habitats or environments. Classroom discussion can increase, but not decrease, a student’s final grade. There are two preliminary exams and a final exam. The principles and limitations of major methods used to examine sensory systems will be considered. General principles of sensory systems, and auditory, visual and neuromuscular systems are covered. One aspect of each system (e.g., localization of objects in space by sound, color vision, thermoreception) will be selected for special attention. Two or more textbooks and a course packet of reproduced articles will be used. An Introduction to the Physiology of Hearing, 2nd edition by J. O. Pickles; Hearing: Physiological Acoustics, Neural Coding, and Psychoacoustics, by W. E. Galt; G. A. Gescheider, and R. D. Frisina; The Retina: An Approachable Part of the Brain, by J. F. Dowling. Handbook of Physiology—The Nervous System. III Sensory Processes, edited by J. M. Brookh. and V. B. MounkFORMANCE.

PSYCH 402 Current Research on Psychopathology: Depression
Spring. 4 credits. Limited to 20 students. Prerequisite: Psychology 325 or HDFS 370 and permission of the instructor. M 1:25–4:25, K. Lockhart.
Current research and theory on the nature and etiology of depression. Approaches from various perspectives (biological, psychological, socio-cultural) are considered. Minimal attention to psychotherapy and symptomatology.

PSYCH 404 Psychopathology and the Family
Spring. 4 credits. Limited to 20 students. Prerequisite: Psychology 325 or HDFS 370 and permission of the instructor. Not offered 1997–98. M 1:25–4:25, J. B. Maas.
This course will explore familial influences on the development of abnormal behavior. It will examine how psychological, biological, and cultural factors in a family might contribute to such disorders as anorexia nervosa, depression, sexual abuse, psychopathy, and psychosomatic illnesses. Emphasis will be placed on early childhood experiences in the family and their impact on the development of later psychopathology. The course will also discuss how the evolution of family structures in more recent times (e.g., the rise in day care and divorce) influences the individual. Family therapy approaches and techniques will also be examined.

PSYCH 410 Undergraduate Seminar in Psychology
Fall or spring. 2 credits. Nonmajors may be admitted, but psychology majors are given priority. Hours to be arranged.
Information on specific sections for each term, including instructor, prerequisites, and time and place, may be obtained from the Department of Psychology office, 211 Uris Hall.

PSYCH 412 Laboratory in Cognition and Perception
Spring. 4 credits. Prerequisites: at least one course in human experimental and perception or cognition is recommended. Graduate students, see Psychology 612.
A laboratory course is designed to introduce students to experimental methods in perception and cognitive psychology. Students will take part in a number of classic experiments and develop at least one independent project. Computers will be available and used in many of the experiments although computer literacy is not required. Projects will be selected from the areas of visual perception, pattern recognition, memory, and concept learning.

PSYCH 413 Information Processing: Conscious and Non-conscious
Spring. 4 credits. Prerequisites: at least one course in human experimental and permission of instructor; Psychology 350 or equivalent will be useful for evaluating empirical articles. R 10:10–12:35, B. Khurana.
In the past decade or so, a not-so-quiet revolution has been taking place in the field of cognition regarding the problem of conscious mental computation. Data have come from patients with striking neuropsychological syndromes, i.e., the phenomenon of “blindsight” in which patients can respond to visual stimuli without the conscious experience of vision or the “amnesic” syndrome in which patients show normal learning and memory sans the awareness of the learning encounters. This signature of independent mental computations has also been amply demonstrated in normal individuals in laboratory settings. We will critically evaluate the theoretical worth and empirical justification of the distinction between “conscious” and “non-conscious” mental computations in normal and patient populations. Weekly
This course offers a survey of several computational models applied to some aspects of language processing. Students will be required to complete weekly in-class exercises, submit weekly summaries of the assigned readings, and write a term paper on a topic of their interest. Students should be prepared to read extensively, think analytically, discuss cogently, and write succinctly.

**PSYCH 414 Comparative Cognition**  
Spring. 3 credits. Prerequisites: Psychology 205, 209, 214, or permission of instructor. Graduate students, see Psychology 714. Not offered 1997–98. T R 11:40–12:55. M. Owren.

Students will consider different species of behavior, human development, and human pathology may shed light on the nature of knowledge and reasoning. This seminar will focus on knowledge and reasoning about space, time, number, physical objects, and persons. Questions will include: (1) How do cognitive abilities vary across species? Are there reasons of why are distinctively human? (2) Do humans and/or other animals reason in the same way about entities in different domains (e.g., numbers, physical objects, and persons)? (3) How do knowledge and reasoning change throughout human development: Is knowledge enriched, or more radically restructured, as children grow and gain experience?

**PSYCH 415 Concepts, Categories, and Word Meanings**  
Fall. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. Graduate students, see Psychology 615. M 1:25–4:25. F. C. Keil.

A consideration of what types of categories are psychologically important, of how they are represented and used through concepts, and of how concept structure and semantic structure are interrelated. Different models of concept structure and categorization processes are evaluated, and examples of conceptual change and concept acquisition. Other topics include: relations between concepts and broader knowledge representation systems such as scripts, mental models, and intuitive theories; the representation of psychological categories; the representation of knowledge in terms of neural systems. This course will focus on issues in neuropsychology of everyday acts involving fixed acts. Assigned readings include original articles from the scientific literature, as well as textbooks and graduate-level research monographs.

**PSYCH 418 Psychology of Music**  
Spring. 3 or 4 credits, depending on whether student elects to do an independent project. Prerequisites: junior or senior standing; familiarity with psychology or music and some background in both, or permission of instructor. Graduate students, see Psychology 618. M W 5:25–4:10. C. L. Krumhansl.

Detailed analysis of topics in the psychology of music, including theories of consonance, perception of tonal-harmonic structure, memory for music, and effects of musical training. Emphasis given to experimental methodologies.

**PSYCH 419 Neural Networks Laboratory**  
Spring. 4 credits. Prerequisites: at least one course in biology or biological psychology, one year of calculus, and permission of instructor. Limited to 15 students. Graduate students, see Psychology 619. Not offered 1997–98. T R 2:55–4:10. D. E. Haber.

The course will take a hands-on approach to understanding the limitations and successful applications of neural networks to problems in cognitive and biological psychology. A variety of research methods will be discussed and explored using computer simulations. Applications of networks to perceptual recognition and representation will be emphasized. We will consider the class of problems that different networks can solve and consider the accuracy with which they model real neural systems. Students will complete weekly lab reports and develop one independent project demonstrating the application of a neural network to a problem discussed in the course.

**PSYCH 420 Laboratory in Neuroethology (also BIOLB 420-03)**  
Spring. 1 credit. Prerequisite: BIOLB 424 or Psychology 424 or equivalent. Permission of instructor required. Lab: M 12:20–3:00. Not offered 1997–98. C. D. Hopkins. Designed as a laboratory component for BIOLB 424/PSYCH 424, this course will be an introduction to the principles of neuroethology: sensory processing, neuroanatomy, and behavioral analysis. Students will participate in six laboratory exercises scheduled throughout the semester. The laboratory will be open from 12:20 until 5:00 p.m. on Mondays and Wednesdays. Labs will be done in groups of two.

Students in this course will learn the fundamentals of electrophysiology, neuroanatomy, and behavior through a series of six laboratory exercises using electric fish, Drosophila, crayfish and Limulus, bats and moths.

**PSYCH 422 Developmental Biopsychology**  
Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as Psychology 125 or BIOLB 221). Graduate students, see Psychology 622. M W F 9:05–9:55. B. L. Finlay.

We will discuss the relationship of the development and evolution of the brain to the development of behavior. Topics include: how neurons are generated, find targets, and establish connections; the emergence of reflexive and complex behavior; how experience affects the developing brain; evolutionary perspectives on the development of perception, memory, and communication systems; and abnormal development.

**PSYCH 424 Neuroethology (also BIOLB 424)**  
Spring. 3 credits. Prerequisites: BIOLB 221 and 222. S-U grades optional for graduate students only. T 9:05–11:00, R 9:05–9:55. Classes will be held on T R at 9:05–11:00. Thursday's class will run for one hour. Recitations will be scheduled in class. Not offered 1997–98.

C. D. Hopkins.

In the 1950s-1970s the ethologists attempted to understand the mechanisms of animal behavior through the use of comparative methods, evolutionary analysis, careful observations of animals in their native habitats, and clever experimentation. Now, with the explosion of knowledge and techniques in the neurosciences, many of the ethologist's mechanisms are being explained in terms of neural systems. This course will review the current status of research in neuroethology, including: mechanisms of acoustic communication in insects and in vertebrates; echolocation in bats and sound localization in owls; electroreception and electrololocation; chemical communication; and visual processing. In addition, it will review structural and functional changes in the brain associated with decision making, in initiating action, and in coordinating fixed acts. Assignments will include articles on the scientific literature. A term paper or poster on neuroethology will be required.

**PSYCH 425 Cognitive Neuroscience**  
Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as Psychology 125 or BIOLB 221). Graduate students, see Psychology 625. Not offered 1997–98. M W F 9:05–9:55. B. L. Finlay.

We will study the relationship between structure and function in the central nervous system. The importance of evolutionary and mechanistic approaches for understanding the human behavior and cognition will be stressed. The course will focus on issues in cognitive neuroscience: mechanisms of perception, particularly vision, and the neuropsychology of everyday acts involving complex cognitive skills such as recognition of individuals, navigation in the world, language, memory, and social interaction.
PSYCH 429 Olfaction and Taste: Structure and Function (also BIONB 429)
Spring. 3 or 4 credits (4-credit option requires a term paper or research project. The research, but does not need to, study nonhuman vertebrates). Preference given to junior and senior psychology and biology majors and graduate students. Prerequisite: one 300-level course in biology or equivalent. Graduate students, see Psychology 629. T R 9:05. B. P. Halpern.

The structural and functional characteristics of olfaction and taste will be explored by reading and discussing current literature in these areas. Structure will be examined at the light levels of electron microscopes as well as at the molecular level. Function will be primarily neurophysiological and biochemical aspects, especially air-breathing vertebrates in the case of olfaction, but there will be some coverage of invertebrate forms. A textbook and a course packet of reproduced articles will be used. At the level of the nervous system, Smell and Taste in Health and Disease, edited by T. V. Getchell, R. L. Doty, L. M. Bartoshuk, and J. B. Snow, The Neurobiology of Taste and Smell, edited by T. E. Finger and W. L. Silver.

PSYCH 431 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421)
Fall. 3 or 4 credits; the optional (or fourth) credit involves a term paper. Prerequisites: an introductory course in biology or psychology, plus a second course in perception or neurobiology or cognition or psychology. No auditors. Limited to 25 students. Graduate students, see Psychology 631. T R 10:10-11:25. B. P. Halpern.

A literature-based examination of post-maturation changes in the perceptual, structural, and physiological characteristics of somesthetic, chemosensory, visual, and auditory systems. Emphasis will be on human data, with non-human information included when especially relevant. Current developments in the field of somatosensory sciences, and in regeneration of receptor structures, will be examined. Brief written statements (by electronic mail) of questions and problems related to each set of assigned readings will be required at least one day in advance of each class meeting. This course will be taught using the Socratic Method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with the subject matter of the course. Students are expected to come to each class having already done, and thought about, the assigned readings.

Spring. 4 credits. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. Open to undergraduates and graduate students. S-U grades optional. Graduate students will also meet for additional advanced discussion of course content. Graduate students should also enroll under HPDS 700/Linguistics 700 (2 credits). T R 10:45-12:55. L. B. Lust.

This course is a survey of basic issues, methods, and research in the study of first language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental linguistic issues of "universal grammar" and the biological foundations for language acquisition are discussed, as are the issues of relations between language and thought. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child.

PSYCH 440 The Brain and Sleep
Fall. 4 credits. Prerequisites: At least Psychology 6 or BIONB 221. An additional course in biology, biopsychology or neurobiology is recommended. S-U grades optional. Graduate students, see Psychology 640. W 8:40-9:55. H. S. Porte.

Taking a comparative evolutionary perspective, this course examines the neural events that instigate, maintain, and disturb the states and rhythms of sleep in various species. Emphasizing human data where possible, special topics will include sleep deprivation and the biological functions of sleep; sleep's putative role in learning and memory; biologically interesting deviations from normal sleep. A cognitive neuroscience of sleep will take shape as we look at sleep's psychological correlates—including dreams in REM sleep—in light of what we know about the brain and sleep.

PSYCH 441 Laboratory in Sleep and Dreaming
Spring. 4 credits. Prerequisites: Psychology 440 or comparable preparation, and permission of the instructor during preregistration. Laboratory fee: $50. W 7:30-10:30 p.m. H. S. Porte.

Emphasizing the neurobiology of sleep state, the course introduces the laboratory study of human sleep and dreaming. Serving as both experimenter and subject, each student will learn the rationale and techniques of electroencephalography and other biobehavioral measures of behavioral state. Using computerized data analysis, students will complete weekly laboratory reports and a collaborative term project. Sleep recordings will be done during the day or evening when possible. In addition, overnight recording sessions are required.

PSYCH 450 The Lances of Gender (also Women's Studies 450)
Spring. 4 credits. Permission of instructor. Previous coursework in Women's Studies strongly recommended. Limited to 15 seniors and graduate students. No preregistration; interested students should attend the first class session. Graduate students, see Psychology/Women's Studies 650. F 1:30-3:30. S. L. Bern.

This seminar analyzes the ideological, institutional, and psychological mechanisms that are responsible for the ideological reproduction of male power in Western—and especially American—culture. It is very interdisciplinarily, covering material from biology, history, anthropology, law, sociology, psychology, psychiatry, philosophy, and feminist theory. As much as the central focus of the seminar is on gender, it does not analyze gender in isolation but looks also at its interactions with race and (especially) sexuality. Students must write a final exam, a term paper; plus weekly commentaries on the readings.

PSYCH 470 Undergraduate Research in Psychology
Fall or spring. 1-4 credits. S-U grades optional. Written permission from the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours to be arranged. Practice in planning, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 471 Advanced Undergraduate Research in Psychology
Fall or spring. 1-4 credits. S-U grades optional. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours to be arranged. Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research. One, and preferably two, semesters of Psychology 470 is required. The research should be more independent and/or involve more demanding technical skills than that carried out in Psychology 470.

PSYCH 472 Multiple Regression
Spring, weeks 1–7. 2 credits. Prerequisite: one solid semester of introductory statistics. Analysis of variance is helpful but not required. M W F 10:10. R. B. Darlington.

Uses and pitfalls of multiple regression in causal analysis, path analysis, and prediction. Emphasis on analyzing data collected under uncontrolled conditions. Includes collinearity, indicator variables, sets, adjusted and shrunken R^2, suppressors, hierarchical analysis, overcontrol, experimental design. Very little hand computation; uses MYSAT computer program.

PSYCH 473 General Linear Model
Spring, weeks 8–14. 2 credits. Prerequisite: Psychology 472 or equivalent. M W F 10:10. R. B. Darlington.

Includes multivariate statistical models, results of multiple regression, diagnostic methods, nonlinear relationships, interaction, and simple effects. Basic power analysis, Emphasizes MYSAT and SYSTAT, briefly discusses SAS PROC REG and SAS PROC GLM.

PSYCH 475 Multivariate Analysis of Psychological Data
Fall. 2 credits. Prerequisite: Psychology 473 or permission of instructor. R 10:10-12:05. R. B. Darlington.

Students vote on topics to cover, choosing among nonparametric methods, time series, cluster analysis, multidimensional scaling, component analysis, factor analysis, MANOVA, canonical correlation, repeated measures, logistic regression, log-linear models, corrections for unreliability in regression, nesting, power analysis, influence analysis, and other topics. First class sketches all these topics before vote.

PSYCH 478 Psychometric Theory
Fall. 2 credits. Prerequisite: Psychology 472 or permission of instructor. Not offered 1997–98. T R 10:10-12:05. R. B. Darlington.
Statistical methods relevant to the use, construction, and evaluation of psychological tests.

[PSYCH 479 Multisample Secondary Analysis]
Fall, weeks 11–14. 1 credit. Prerequisite: Psychology 350 or equivalent. Not offered 1997-98. TR 10:10–12:05.
B. B. Darlington
Statistical methods for analyzing and integrating the results of many independent studies on related topics.

PSYCH 481 Advanced Social Psychology
Fall. 4 credits. Limited to 20 students, by application. Senior psychology majors have priority. Graduate students, see Psychology 681. TR 10:10–11:25.
D. T. Regan
Selected topics in social psychology are examined in depth with an emphasis on the relationship between experimental research and the development of theory. Readings will be mostly primary sources. Among the theoretical approaches to social behavior we may discuss are social comparison theory, cognitive dissonance, attribution processes and social judgment, dramaturgy and impression management, and biological perspectives.

PSYCH 489 Seminar: Beliefs, Attitudes, and Ideologies
Spring. 4 credits. Prerequisites: admission is by application during the fall preregistration period. Seniors are given priority. M 2:30–4:30. D. J. Bern.
The seminar examines fundamental properties of beliefs and attitudes: how they are formed and changed, what psychological functions they serve for the individual, and how they coalesce into belief systems or ideologies. Several specific ideologies are examined in detail: for example, the political ideologies of the American public, gender, sexual orientation, the ideological factors that promote anorexia in a society, the contrasting worldviews of "people of color" and "pro-life" activists, the ideologies of psychology and science, and more. Participants write weekly commentaries on the readings in addition to a term paper examining a particular ideology.

PSYCH 491 Research Methods in Psychology
Spring. 4 credits. Enrollment limited to 25 students. Recommended: permission of instructor, Psychology 350, experience in upper-division psychology courses, or graduate standing. Graduate students, see Psychology 691. TR 10:10–11:25.
D. A. Dunning
An intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course will focus on design and conducting experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. Beyond learning methods of "correct" and rigorous experimentation, we will also discuss what makes a research study actually interesting. The course in addition will cover test construction, survey methods, and "quasi experiments." Students will concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

[PSYCH 492 Sensory Function (also BIONB 492)]
Spring. 3 or 4 credits. The 4-credit option involves a one-hour session once a week, in which students are expected to participate in discussion. The 4-credit option is not always offered. Prerequisite: a 300-level course in biopsychology, or BIONB 222 or BIOAP 311, or permission of the instructors. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. Offered alternate years. Graduate students, see Psychology 692. Not offered 1997-98. M W F 10:10.
B. F. Halpern and H. C. Howland.
This course covers classical topics in sensory function such as vision, hearing, touch and balance, as well as some more modern topics like sensory coding, location of stimulus sources in space, the development of sensory systems, and non-classical topics such as electroreception and internal chemoreceptors. Both human and nonhuman systems are discussed. In all cases the chemical, physical, and neurophysiological bases of sensory information are treated, and the processor of this information is followed into the central nervous system. At the level of The Senses, edited by Barlow and Mollon, and An Introduction to the Physiology of Hearing, 2nd edition, by Pickles.

Advanced Courses and Seminars
Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each term is determined by the needs of the students.
A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Uris Hall). The following courses may be offered either term and carry 4 credits unless otherwise indicated.

PSYCH 510-511 Perception
PSYCH 512-514 Visual Perception
PSYCH 513 Learning
PSYCH 515 Motivation
PSYCH 518 Topics in Psycholinguistics
PSYCH 519-520 Cognition
PSYCH 521 Psychobiology
PSYCH 522 Topics in Perception and Cognition
PSYCH 523 Hormones and Behavior

[PSYCH 524 Sex Differences in Brain and Behavior (also BIONB 628)]
Spring. 2 credits. Limited to 12 seniors and graduate students. Not offered 1997–98. Hours to be arranged. T. J. DeVoogd.
A survey of the newly discovered animal models for sex differences in the brain. Topics include the role of steroids in brain development, whether hormones can modify the structure of the adult brain, and the consequences of such sex differences in anatomy for behavior.

PSYCH 525 Mathematical Psychology
PSYCH 527 Topics in Biopsychology
PSYCH 535 Animal Behavior

PSYCH 541 Statistics in Current Psychological Research
PSYCH 543 Psychological Tests
PSYCH 544 Topics in Psychopathology and Personality
PSYCH 551 Distinguished Speakers
PSYCH 580 Experimental Social Psychology
PSYCH 600 General Research Seminar
Fall or spring. No credit.

PSYCH 605 Perception (also Psychology 505)
Spring. 4 credits. TR 11:40–12:55.
J. E. Cutting.

PSYCH 607 Chemosensory Perception (also Psychology 307)

PSYCH 609 Development of Perception (also Psychology 309)

PSYCH 611 Introduction to Human Memory (also Psychology 311)

PSYCH 612 Laboratory in Cognition and Perception (also Psychology 412)
D. J. Field.

PSYCH 613 Obesity and the Regulation of Body Weight (also Nutritional Sciences 315)
Spring. 3 credits. Limited to 30 students.
Prerequisites: one course in psychology and one course in nutrition. Undergraduate students may register with permission of instructor. S-U grades optional. Offered alternate years. T 1:30–3:30.
D. A. Levitsky.
This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

PSYCH 614 Issues in Cognitive Psychology (also Psychology 214)
Fall. 4 credits. M W F 10:10. B. Khurana.

PSYCH 615 Concepts, Categories, and Word Meaning (also Psychology 415)
Fall. 4 credits. M 1:25–4:25.
F. C. Keil.

PSYCH 618 Psychology of Music (also Psychology 418)
C. Krumholz.

PSYCH 619 Neural Networks Laboratory (also Psychology 419)

PSYCH 622 Developmental Biopsychology (also Psychology 422)
Fall. 4 credits. M W F 9:05–9:55. B. L. Finlay.

PSYCH 625 Cognitive Neuroscience (also Psychology 425)
PSYCH 626 Evolution of Human Behavior (also Psychology 326)
Fall. 4 credits. TR 2:55-4:10.
R. E. Johnston.

PSYCH 629 Offence and Taste: Structure and Function (also Psychology 429 and BIONB 429)
Spring. 4 credits. TR 9:05. B. P. Halpern.

PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also Psychology 431 and BIONB 431)
Fall. 4 credits. TR 10:10-11:25.
B. P. Halpern.

PSYCH 632 Biopsychology of Learning and Memory (also Psychology 332 and BIONB 328)
Spring. 4 credits. M W F 11:15. Staff.

PSYCH 640 The Brain and Sleep (also Psychology 640)
Fall. 4 credits. M W 8:40-9:55.
H. S. Porte.

PSYCH 641 Laboratory in Sleep and Dreaming (also Psychology 441)
Spring. 4 credits. W 7:30-10:30.
H. S. Porte.

PSYCH 642 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also Psychology 342)

PSYCH 650 The Lenses of Gender (also Psychology 450 and Women's Studies 450 and Women's Studies 650)
Spring. 4 credits. F 1:30-3:30. S. L. Bern.

[PSYCH 676] Motivation (also Psychology 276)
Spring. 4 credits. Not offered 1997-98.

PSYCH 681 Advanced Social Psychology (also Psychology 481)
Fall. 4 credits. TR 10:10-11:25.
D. T. Regan.

PSYCH 689 Seminar: Beliefs, Attitudes and Ideologies (also Psychology 489)

PSYCH 691 Research Methods in Psychology (also Psychology 491)
Spring. 4 credits. TR 10:10-11:25.
D. A. Dunning.

[PSYCH 692] Sensory Function (also Psychology 492 and BIONB 492)
Spring. 4 credits. Not offered 1997-98.

[PSYCH 696] Introduction to Sensory Systems (also Psychology 396 and BIONB 396)
Spring. 4 credits. Not offered 1997-98.
M W F 10:10. B. P. Halpern.

PSYCH 700 Research in Biopsychology

PSYCH 773-774 Proseminar in Cognitive Studies I and II (also Cognitive Studies 773-774, Philosophy 773-774, Linguistics 773-774, and Computer Science 773-774)
Fall: R. grade. Spring: S-U only. 4 credits.
The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar will consist of a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that make up the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty members from the field will introduce the theoretical and methodological issues that underlie the field and its relation to Cognitive Studies; in addition, they will introduce various labs in which active research is being conducted in their field at Cornell. The proseminar will include suggestions from faculty in each field for further advanced interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It will conclude (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice.

Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An “R” grade will be assigned in the fall semester, and a S-U grade only will be assigned in the spring semester.

PSYCH 775 Proseminar in Social Psychology I
Fall. 2 credits. Limited to 10 graduate students in social psychology. Hours to be arranged. D. A. Dunning and T. D. Gilovich.

This is the first term of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasize social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.

PSYCH 776 Proseminar in Social Psychology II
Spring. 2 credits. Limited to 10 graduate students in social psychology. Hours to be arranged. D. A. Dunning and T. D. Gilovich.

This is the second half of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasize social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.

PSYCH 900 Doctoral Thesis Research In Biopsychology

PSYCH 910 Doctoral Thesis Research In Human Experimental Psychology

PSYCH 920 Doctoral Thesis Research In Social Psychology and Personality

Summer Session Courses

The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses will be offered in a particular summer.

Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry

PSYCH 123 Introduction to Biopsychology

PSYCH 128 Introduction to Psychology: Personality and Social Behavior

PSYCH 280 Introduction to Social Psychology

PSYCH 350 Statistics and Research Design

PSYCH 380 Community Mental Health (also Human Service Studies 380)

QUECHUA

See Language Courses under Languages and Linguistics.

RELIGIOUS STUDIES MAJOR

See "Special Programs and Interdisciplinary Studies."

ROMANCE STUDIES

The Department of Romance Studies (Mitchell Greenberg, chair) offers courses in French literature, Italian literature, and Spanish literature. In addition, the department's program includes courses in the French and Spanish languages, French linguistics, Spanish linguistics, semiotics, and Francophone, Italian, and Hispanic culture. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.
other literatures, and with other fields of inquiry.

French

The Major

The major in French, literature option, is described below.

The Literature Option

The major in French, literature option, is designed to give students proficiency in the oral and written language, to acquaint them with French literature and culture, and to develop skills in literary analysis.

Admission

To be admitted to the major, students should have completed FRIT 201, 220, or 221 plus 222 and FRDML 213 or its equivalent by the end of their sophomore year.

For completion of the major, a student must:

(1) acquire a sound degree of competence in French language. This competence is demonstrated by the successful completion of French 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).

(2) take two courses in Romance Studies (literature or civilization) at the 300 level or above.

(3) take six courses at the 300 level or above in no more than three areas of interest such as—but not limited to—African studies, anthropology, comparative literature, French literature, economics, government, history, history of art, linguistics, music, theater arts, women's studies. Each area must be represented by at least two courses, and each course must have a significant French component. At least one of these six courses should be at the 400 level.

Administration of French Area Studies

Students are admitted to the major by the director of undergraduate studies in the French section of the Department of Romance Studies, Professor Jacques Béreoud.

The French Area Studies Option

Admission

To be admitted to the major, students should have completed French Literature 201, 220, 221 or 224 plus French Language 213 or its equivalent by the end of their sophomore year.

For completion of the major, a student must:

(1) acquire a sound degree of competence in the French language. This competence is demonstrated by the successful completion of French 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).

(2) take two courses in Romance Studies (literature or civilization) at the 300 level or above.

(3) take six courses at the 300 level or above in no more than three areas of interest such as—but not limited to—African studies, anthropology, comparative literature, French literature, economics, government, history, history of art, linguistics, music, theater arts, women's studies. Each area must be represented by at least two courses, and each course must have a significant French component. At least one of these six courses should be at the 400 level.

Administration of French Area Studies

Students are admitted to the major by the director of undergraduate studies in the French section of the Department of Romance Studies, but will be guided by their individual advisers. A copy of each student's program will be given to the director of undergraduate studies for approval and safekeeping.

Study Abroad in France

French majors or other interested students may study in France for one or two semesters during their junior year. For one of several study-abroad programs recognized by the departments of Romance Studies, Modern Languages, and Linguistics facilitates the transfer of credit. Information about these plans is available from the director of undergraduate studies.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of FRDML 213 or its equivalent in advanced French preparation is the completion of FRROM 301 and/or 312 is, however, strongly recommended. Students interested in studying in France are encouraged to consider the special benefits offered by EUDUCO, the program in Paris cosponsored by Cornell and by Duke University. EUDUCO offers students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program spend the entire year as well-qualified students majoring in French or other related fields. The program provides students with the opportunity to experience French life, culture, and language in a stimulating and enriching environment. Participants will have access to a wide variety of cultural events, including concerts, exhibitions, and theater productions, as well as to a large and diverse selection of courses offered by the University of Paris VII and other institutions of higher learning in Paris, including the Institut d'Études Politiques (Sciences Po), selecting courses in many fields from the regular university course offerings. Students begin the academic year with an intensive three-week orientation into French history, society, and daily life. While it is possible to enroll in the EUDUCO Program for a single course, admission will be given first to students planning to study abroad for the full academic year. EUDUCO maintains a center in Paris with appropriate support staff. The resident director, chosen annually from the Cornell and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the courses. The center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as informal gatherings.

Honor’s. The honors program encourages well-qualified students majoring in French literature or culture to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers. No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student’s grades in the major and the quality of the honors essay.

Fee. Depending on the course, a small fee may be charged for copies of texts used in course work.

Language and Linguistics

Most language courses and French linguistics courses are offered by the Department of Modern Languages and the Department of Linguistics. Further language courses (conversation and advanced level), French linguistics courses, and all literature courses are listed below.

Note: Students placed in the 200-level courses have the option of taking language and/or literature courses; see listings under “Literature” for descriptions of the literature courses, some of which may be taken concurrently with French Language 201 or 213 (offered by Modern Languages and by Linguistics) or Hotel Administration 266.

FRROM 301 Advanced French I

Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRDML 213 or Q++. On the Cornell Advanced Standing Examination (CASE) Fall: J. Béreoud or J. Daly; spring: J. Daly and staff.

Class discussions based on reading of selected contemporary texts: half will be short stories by 20th-century writers, half will be articles on current events taken from French magazines or newspapers. All texts are chosen for thematic or cultural interest and linguistic quality. Special attention will be given to correctness and accuracy in French through grammar review and weekly papers (essays or translations). Two films will be shown to illustrate today's idiomatic language. Course required of French majors.

FRROM 312 Advanced French II

Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRROM 301 or placement by the Cornell Advanced Standing Examination (CASE). Fall, A. Berger; spring, S. Tarrow and staff.
Continuation of work done in French 301. The objective of French 301 is to teach students to speak and write correct French; in French 312 students will be expected to have a richer, more idiomatic and hopefully elegant command of the language.

Formal study of grammar will be discontinued, and more attention will be devoted to the examination of language in texts and to oral presentations by students. Weekly papers as in French 301.

**FRLIT 201 Introduction to French Literature**
Fall, spring or summer. 3 credits. Prerequisite: qualification in French (SAT II score of 640, LF P score of 56, or French 123). Fall, A. Szczeznec and staff, spring, M.-C. Vallois and staff.

French 201, like all other 200-level French literature courses, is devoted to the language requirement by giving proficiency in French; but French 201 and 221 are mutually exclusive. Students with an SAT II score of 690 or more, or an LF P score of 60 or more, should take French 221. French 201 is divided into small sections and is conducted in French. Papers can be written in French or in English.

French 201 is designed for students interested in improving their written and oral skills in French and also their literary proficiency. Texts have been chosen both as a function of their literary merit and their manageable linguistic difficulty. Close scrutiny of the works and active class discussions will sharpen students' critical and analytical abilities. Different genres are covered (poetry, drama, and narrative prose); and the reading list may include authors such as Baudelaire, Beckett, Ionesco, Camus, Duras, Rimbaud and Sartre.

### FRLIT 222 Early Modern French Literature 
Spring. 3 credits. Prerequisite: FRLIT 201, 220, 221 or permission of the instructor. Required of all literature majors, but not limited to them. Conducted in French. M. Greenberg and staff.

Study of the classic literature of seventeenth-century France (Corneille, Racine, Molére, Mme. de Lafayette, La Fontaine) and of eighteenth-century Enlightenment literature (Voltaire, Rousseau, Diderot, Beaumarchais). Special attention is paid to the ways in which these various works represent or deal with the shift from an aristocratic cultural code of values to modern bourgeois ideology and aesthetics. The course will also invite reflection on the status and centrality of female characters in classical and neo-classical French literature and on the ideological context. It will then try to trace the evolution from the classical tragic heroine to more modern (but no less problematic) representations of women.

### FRLIT 224 The French Experience: An Introduction
Fall. 3 credits. M. Greenberg. An examination of French society, culture, and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals, and cinema. Looking attentively at texts, images, and contexts from selected moments in the eighteenth, nineteenth, and twentieth centuries, we will attempt to unravel some of the defining enigmas of the French experience. Readings available both in French and in English translation.

Note: Prerequisite for all 300-level courses in French literature: FRLIT 201, 220, 221, or the equivalent.

### FRLIT 226 From Chivalry to Chanel: Perspectives in French Culture
Spring. 3 credits. Conducted in English. R. Klein and staff.

From chivalric and courtly codes of conduct through the poetic and artistic theories of the Renaissance, the rise and articulation of absolutism, the scientific skepticism of the Enlightenment, the manifestoes of the Revolution, of surrealism, of French feminists from Christine de Pizan to Hélène Cixous, French culture has always analyzed itself with a methodological rigor and theoretical alertness that has frequently been imitated and adopted by others. This course proposes a study of how French people read, and reads, itself, by means of a range of texts chosen from the above-mentioned fields, among others.

### FRLIT 320 French Civilization II: Contemporary France
Fall. 4 credits. French 213 or equivalent. Conducted in French. M. Béreaud.

Detailed, analytical study of contemporary French society, its structure and its culture. In the second half of the course, students will select a topic for in-depth personal research leading to the writing of a term paper. Short oral presentations will be encouraged. A variety of resources will be used: texts, magazine and television excerpts, and internet items. A few films will be shown to illustrate some aspects of French life.

### FRLIT 330 Francophone African Literature
Fall. 4 credits. Conducted in French. J. Ngaté.

Introduction to the works of representative poets, dramatists, novelists, and short story writers from sub-Saharan Africa and Madagascar. A. Seznec and staff; spring: N. Furman and staff.

This course will first study the writers’ revolt of May 1968 in France, placing it in its national and international political and ideological context. It will then try to trace the changes brought about by the spirit of May 68 in some areas of French society, especially youth and education. Finally, it will lead to a reflection on current ideologies and the change from modernism to postmodernism.

### FRLIT 334 The Novel as Masterwork
Spring. 4 credits. Conducted in French. J. Ngaté.

Introduction to the works of representative poets, dramatists, novelists, and short story writers from sub-Saharan Africa and Madagascar. A. Seznec and staff; spring: N. Furman and staff.

This course traces the evolution of the nineteenth-century French novel. Readings include novels by Stendhal, Balzac, Flaubert, and Zola.

### FRLIT 349 Love and Hate in the Middle Ages
Fall. 4 credits. Prerequisite: FRLIT 221 or permission of instructor. Conducted in French. K. Long.

This course is designed to offer an introduction to medieval French literature and old French while tracing the invention and decline of courtly ideals and the rise of satirical misogyny. The basic tenets of courtly love and courtly poetics will be analyzed by selections from the Lais of Marie de France, the Chevalier au Lion of Chrétien de Troyes, and the Roman de la Rose of Guillaume de Lorris. Satirical revisions of the courtly ideal will be studied in selections from the Roman de la Rose of Jean de Meun, the lyric poetry of Rutebeuf, Charles d’Orléans, François Villon,
and Christine de Pizan, as well as in medieval *farces* and *fabliaux*. Readings in old and medieval French.

**FRLIT 356 Urban Cultures: Lyon and Paris**

Spring. 4 credits. Prerequisite: FRLIT 221 or permission of the instructor. Conducted in French. K. Kroll.

This course will explore the importance of royal patronage and systems of censorship for the evolution of a centralized culture in France. This culture, however, is surrounded by multiple alternative cultures which intersect at various points: popular culture, with its tendency to mock the institutions of Church and State; Huguenot (Protestant) culture, the repression of which is a defining moment in the rise of absolutism; women's culture, which alternately creates new intellectual parameters and is mocked and suppressed by representatives of the predominant institutions. Texts will include works by Labè, Marguerite de Navarre, Ronsard, du Bellay, d'Aubigné, Mme. de Lafayette, Mollière, among others.

**FRLIT 370 Perspectives on the Age of Enlightenment: "Enlightened" Literature**

Fall. 4 credits. Conducted in French. M.-C. Vallois.

Through a reading of various works of the French eighteenth century (by Montesquieu, Voltaire, Diderot, Rousseau and Sade), we will study the emergence of new literary discourses and practices aiming at a "secularisation" of the literary field, in conjunction with the ideological and epistemological changes that took place under the name of Enlightenment.

**FRLIT 371 French Comedy in the Seventeenth and Eighteenth Century**

Fall. 4 credits. Conducted in French. A. Seznec.

Starting with *L'illusion comique* of Corneille and ending with *Beaucaire* and *Le Mariage de Figaro*, we will read plays by Mollière, Sedaine, Lesage, and Marivaux. The course will study the evolution of the comic form, as well as the political and social changes these works reflect.

**FRLIT 381 Nineteenth-Century French Women Writers (also WOMNS 381)**

Fall. 4 credits. Conducted in French. A. Berger.

While situating the works read within their specific historical and literary context, this course will attempt to address two sets of questions: 1) How does the inscription of literature as a Public Institution within a phallocentric cultural order affect women authors' status and writing strategies? 2) To what extent and at what levels does being a woman inform or shape the text produced? In what ways is literary writing concerned with sexual difference? Writers will include Mme. de Staël, George Sand, M. Desbordes-Valmore, Flora Tristan, and Rachilde.

**FRLIT 393 Fin de Siècle or Belle Époque?: Parisian Culture around 1900 (also Comparative Literature 393)**

Spring. 4 credits. Conducted in English. E. Apter.

For description, see Comparative Literature 393.

**FRLIT 419-420 Special Topics in French Literature**

419, fall; 420, spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff.

Guided independent study of special topics.

**FRLIT 420-430 Honors Work in French**

420, fall; 430, spring. 8 credits year-long course, R grade fall semester, letter grade spring semester, with permission of the adviser. Open to juniors and seniors. Consult the director of the honors program. R. Klein.

**FRLIT 448 Medieval Literature**

Spring. 4 credits. Prerequisite: French 221 or permission of the instructor. Conducted in English. A. Colby-Hall.

French 448 deals with the romance and the lyric. Faculty in reading Old French and appreciation of these two major genres are the primary goals of this course.

**FRLIT 476 The Libertine Novel**

Fall. 4 credits. Conducted in French. M.-C. Vallois.

From Montesquieu and Crébillon to Sade, we will study the rise of the libertine novel in eighteenth-century France. Foucault writes that this type of novel marks the beginning of the "epoch of sexuality." We will try to understand what is at stake in this new staging of "sexuality." The assertion of the supremacy of desire over social rules and values participated in the undermining of the theological and patriarchal order. We will inquire about the extent of this process as we discuss the place and representation of women's desire in these novels.

**FRLIT 483 France and Its Jews (also FRLIT 681 and JWST 452)**

Spring. 4 credits. Prerequisite: one 300-level course in French literature or permission of the instructor. Conducted in English. N. Furman.

From their expulsion from Paris during the Middle Ages to the French Revolution that extended citizenship to the Jews of France; from the Dreyfus affair to their deportation during the Holocaust, France has in turn welcomed and expelled the Jews. We will study this uneasy relationship through a variety of texts: historical documents, anti-Semitic tracts, essays by Sartre and Sarras, novels (Proust and Modiano) and films.

**FRLIT 484 Perfume, Jewelry, Cigarettes: Cultural Artifacts in French Literature**

Fall. 4 credits. Conducted in French. R. Klein.

This course invites reflection on some of the cultural artifacts that have played a large part in the social imagination of the French, and in France's idea of itself. Literary texts, poetry and prose, will serve as the principle means for understanding the function of these artifacts and their beauty, their utility and frivolousness—the dreams they incite and the ambitions they fulfill. Readings will include works of Barville, Baudelaire, Mallarmé, Mertini, Maupassant, Mauriac, Pierre Louys, Colette, and Sarras.

**FRLIT 486 Hospitality in Twentieth-Century French and Francophone Literature (also S HUM 486)**

Fall. 4 credits. Conducted in French. E. Kaufman.

Through readings in French and North African literature, this course seeks to explore the various dynamics of hospitality, a fundamental ethical mode of relating to an other. Topics considered include hospitality and exile, gendered and racialized relations of hospitality, same-sex hospitality, hospitality to the non-human, transgressive hospitality, and nomadic hospitality. Readings will include works by Albert Camus, Simone de Beauvoir, Tahar Ben Jelloun, Pierre Klossowski, Bouguin Ami, Georges Bataille, Marguerite Duras, and Ken Bugul.

**FRLIT 489 Politics and Silence in the Wake of World War Two (also S HUM 489)**

Spring. 4 credits. French recommended but not required. E. Kaufman.

This course will focus on texts that engage the events of World War Two (as well as the Moroccan and Algerian revolutions) with restraint, reserve, circumscription, and silence. We will read literature that might be variously categorized as apolitical, political allegory, and poeticized history. Our theoretical readings will analyze the complexity of the term "politics" and "silence", they will also address the specific relation of the intellectual to politics and silence (specifically with regard to accusations of collaboration). Readings will include works by Sarras, Tales, Celan, Cesáre, Djibril, Duras, Blanchot, Derrida, Agamben, and Lyotard.

**FRLIT 495 Existentialism**

Spring. 4 credits. Conducted in French. R. Klein.

This course will focus on the writing of Jean-Paul Sarrte, with special emphasis on his principle philosophical text, *Being and Nothingness*. Sarrte's literary work, as well as that of some of his contemporaries (de Beauvoir, Vian, Camus), will be read in conjunction with specific chapters of *L'être et le néant*. The question of what it means for there to have been such a profoundly theoretical, philosophical influence on literature, at that moment in French history, will be at the center of our concern.

**FRLIT 499 France During the Occupation**

Fall. 4 credits. Prerequisite: FRLIT 221 or ability to read French. D. I. Grossvogel.

This course intends to examine an important moment of French history: the period between 1940 and 1944 when France was defeated by Nazi Germany. During four years, there were those who collaborated and those who resisted. The trauma was felt long after Germany was finally defeated. The texts to be read were for the most part written during the Occupation. The films to be shown were either made during the Occupation or reflect upon it.

**FRLIT 639-640 Special Topics in French Literature**

639, fall; 640, spring. 4 credits each term. Staff.

Guided independent study for graduate students.

**FRLIT 681 France and Its Jews (also FRLIT 483 and JWST 452)**

Spring. 4 credits. Prerequisites: one 300-level course in French literature or permission of the instructor. Conducted in English. N. Furman.

For description, see FRLIT 483.
FRLIT 684 The Novel as Masterwork (also FRLIT 334)
Spring. 4 credits. Prerequisite: FRLIT 201 or permission of instructor. Conducted in French. N. Furman.
For description, see FRLIT 334.

FRLIT 695 Theorizing Film (also ENGL 703)
Fall. 4 credits. T. Murray.
For description, see ENGL 703

Italian

M. Migiel, director of undergraduate studies.

The Major
Students who wish to major in Italian should choose a faculty member to serve as a major adviser; the general plan and the details of the student's course of study will be worked out in consultation with the adviser. Italian majors are encouraged to take courses in related subjects such as history, art history, music, philosophy, anthropology, classics, linguistics, and other modern languages and literatures. While a major often occupies only the junior and senior years, it is wise for students to seek faculty advice about the major as early as possible.

Students who elect to major in Italian ordinarily should have completed Italian 201 by the end of their sophomore year. Exemptions can be made on the basis of an examination. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature, to acquaint themselves with the outlines of Italian literary history, and to develop some skill in literary analysis. To this end, students will be expected to complete successfully 32 credits of Italian literature courses at the 300 level or higher, with papers to be written in Italian or English. Required courses for the major are ITALL 303, 304, and a course on Dante. ITALL 402, History of the Italian Language, and 403, Linguistic Structure of Italian, may be counted toward the 32 credits required for the major (an introductory linguistics course is a prerequisite of ITALL 402 and 403).

Students majoring in Italian will also be expected to acquire competence in the critical handling of the language. That competence may be demonstrated by passing an oral and written examination to be arranged with the adviser.

Italian majors will also be required to complete successfully two courses in related fields (for example, Italian history, Italian art history, literary theory). Italian majors may study in Italy, generally during their junior year, under any of those study-abroad plans organized by American universities that allow the transfer of grades and credit, such as the Cornell program in Rome.

The College of Architecture, Art, and Planning maintains a section for qualified students attending Cornell. The program is housed in the sixteenth-century Palazzo Massimo, designed by the architect Baldassare Peruzzi, on the Corso Vittorio Emanuele, in the heart of Rome. Students may enroll for a semester in the fall or spring. Courses regularly taught at the Palazzo Massimo include Italian language (beginning and intermediate); Architecture 300, 401, 402, 500, 502, Design Studio, Architecture 338 and 399, Special Topics in Architectural History; Architecture 458, Special Projects in Design Communications; Architecture 357, Contemporary Italian Culture; Architecture 510, Thesis Introduction; Art 251, 311, 322, and 371; and History of Art 371, Renaissance and Baroque Art in Rome.

To be eligible, students must have completed the first two years of their curriculum requirements and be in good academic standing.

Literature
Most language courses and Italian linguistics courses are offered by Modern Languages and by Linguistics. Advanced language courses and all literature courses are listed below.

ITALL 201-202 Introduction to Italian Literature
3 credits. Prerequisite: permission of instructor. ITALL 201 is not prerequisite to ITALL 202 or ITALL 205. Conducted in Italian. Fall, 202; spring, 201. M. Migiel and staff.
In this course, students will develop their language skills in Italian by reading, discussing, and writing about short works of fiction (twentieth-century short stories in ITALL 201; sixteenth-century novels in ITALL 202).

ITALL 250 Introduction to Italian Cultural Studies
Spring. 3 credits. Conducted in Italian. M. Migiel and staff.
This course is a historical, socio-political, and cultural survey of 20th century Italy. We will be looking at literature, movies, television, music, newspaper articles, advertisements, various other cultural products from the Fascist period to the present. By incorporating a variety of texts across disciplines the course will attempt to contextualize works within a historical framework as well as suggesting the limitations of such a framework through the use of feminist and post-structuralist theories. Students will be expected to speak, read, write, and understand Italian at a high level of proficiency. They will improve and polish these skills during the course of the semester.

ITALL 203 Introduction to Medieval and Renaissance Literature #
Spring. 4 credits. Conducted in Italian. Prerequisite: one Italian literature course at the 200 level or permission of the instructor. M. Migiel.
Manageable readings selected from authors such as: early Italian lyric poets, Dante, Petrarch, Boccaccio, Machiavelli, Castiglione, Ariosto, Tasso, and lyric poets of the sixteenth century. The course is designed not only to introduce students to the major authors and currents of the Italian Middle Ages and Renaissance, but also to help students improve their critical thinking and their linguistic skills.

ITALL 323 Encounters with the Dead (also ITALL 623 and COM L 323)
Spring. 4 credits. Conducted in English. M. Migiel.
Focusing on two epic works obsessed with death and with the dead (Dante Alighieri's Comedy [1321] and Claude Lanzmann's Shoah [1985]), this seminar will explore how Dante's poem and Lanzmann's film, often along analogous lines, address such issues as the problems inherent in the representation of events, the search for a poetic/cinematic language adequate to convey experiences surpassing human comprehension, the creation of a narrating "I," the "education" of the reader/spectator; national, political, and religious identities; the possibility of heroism; the place of women in the epic enterprise; the challenge of writing a history based on ironic displacement; the redemptive potential of art (and its ability to deceive as well as to enlighten and console); the call to bear witness, both to life and to loss. The seminar will also ask what value there is in comparing such vastly different works (a pre-Renaissance conversion narrative bearing witness to the Creator vs. a post-Holocaust testimonial marked by a crisis of witnessing). Students may read in English translation or the original; Shoah will be shown with English subtitles.

ITALL 374 Opera and Culture (also MUSIC 374 and GERST 374)
Spring. 4 credits. Prerequisite: any three-credit music course or proficiency in German or Italian. A. Groos.
For description, see MUSIC 374.

ITALL 394 Calvino and Levi: Then and Now (also ITALL 694)
Fall. 4 credits. Conducted in English. M. Migiel.
A study of the principal works by Italo Calvino and Primo Levi, two of the most important Italian writers of the second half of the twentieth century, and a critical examination of the theoretical frameworks that have been used to understand them so far.

ITALL 419-420 Special Topics in Italian Literature
419, fall; 420, spring. 2-4 credits each term. Prerequisite: permission of instructor. M. Migiel.
Guided independent study of specific topics.

ITALL 429-430 Honors in Italian Literature
429 fall; 430, spring. 8 credits. Year-long course, B for fall semester; letter grade for spring semester. Limited to seniors. Prerequisite: permission of instructor. M. Migiel.

ITALL 445 Boccaccio: Gender, Power, and the Medieval Text (also COM L 456, WOMNS 448, ITALL 645)
Fall. 4 credits. Conducted in English. M. Migiel.
A study of the discourses about reading and sexual difference in Boccaccio's Decameron. We will devote special attention to two questions: 1) What does it mean to carry out a feminist reading of a male-authored text? 2) How do the narrators of the Decameron rework earlier discourses about reading and sexual difference found in literary, historical, and philosophical material drawn from Italian, Old French, and Latin sources? All readings will be done in English translation; students who command the pertinent foreign languages may read texts in the original language. An extra hour-long discussion section will be organized for students who read and speak Italian.

ITALL 623 Encounters with the Dead (also ITALL 323, COM L 623)
Spring. 4 credits. Conducted in English. M. Migiel.
For description, see ITALL 323.
3) Either of the above options with a

2) A combination of literature and linguistics.

major are: concentration. Some typical options of the

Spanish majors have great flexibility in
devising their programs of study and areas of

language and contemporary society and take

proficiency in the oral and written language,

be taken concurrently with SPAND 203-204

option a student chooses, he or she is

couraged to enrich the major program by

including a variety of courses from

related fields or by combining Spanish

with related fields such as history,

philosophy, sociology, anthropology, art,
music, Classics, English, comparative

literature, and other foreign languages

and literatures. The interdepartmental

programs in Latin American Studies and

Spanish Studies sponsor relevant courses in a

variety of areas.

The J. G. White Prize and Scholarships are

available annually to students who achieve

excellence in Spanish.

For the concentration in Spanish linguistics,

see Department of Linguistics—Spanish.

Study abroad in Spain. Cornell, the

University of Michigan, and the University

of Pennsylvania cosponsor an academic year in

Spain program. Students enrolled in this

program spend the first three weeks before

the fall semester begins in a residential college

located on the campus of the University of

Madrid, where they take a course in Spanish

language and contemporary society and take

advantage of special lectures and field trips in

Madrid and other regions. The course carries three

credits. In early October the program moves to

Seville, where students enroll in as many

regular classes at the University of Seville as

their language competency and general

education permit. Their academic work is

supplemented by courses designed explicitly for

the program by Seville faculty, as well as a

seminar regularly offered by the resident
director, who is chosen from the faculty of

either Cornell, Michigan or Pennsylvania.

The special courses normally include history of

art and architecture, Spanish composition and

syntax, and modern Spanish history.

In Seville students live with selected families in

"residencias," or in a few cases in "colegios

mayores." Cornell-Michigan-Pennsylvania also

maintains a center in Seville, which is used by

students for special seminars, tutorials,

lectures, and informal gatherings.

Applicants are expected to have at least

completed SPAN 204 prior to departure.

Students are strongly encouraged to study

abroad for two or even three quarters rather than for one

semester. Students interested in the study

abroad program should consult with the

Cornell Abroad office for further information.

Honors. Honors in Spanish may be achieved by

superior students who want to undertake

guided independent reading and research in

an area of their choice. Students in the senior

year select a member of the Spanish faculty to

supervise their work and direct the writing of

their honors essays (see Spanish 429–430).

Fees. Depending on the course, a small fee

may be charged for film use or for copies of
texts for course work.

Language

Most language courses and Spanish linguistics

courses are offered by the Department of

Modern Languages and the Department of

Linguistics. Advanced language courses and

all literature courses are listed below.

Note: Students placed in the 200-level courses

have the option of taking language and/or

literature courses, see listing under SPANL 201

for description of the literature course that may

take place concurrently with SPAND 203–204

(offered by Modern Languages).

SPANL 311 Advanced Composition and

Conversation

Fall. 4 credits. Prerequisite: SPAN 204

or 212 or equivalent. M. Stycos and staff.

Advanced language skills, developed through

reading, grammar review, and intensive

practice in speaking, writing, and translation.

Analysis of present-day Spanish usage in a

wide variety of oral and written texts.

SPANL 312 Advanced Composition and

Conversation

Spring. 4 credits. M. Stycos and staff.

Readings and class discussion will focus on the

stylistic analysis of modern texts.

Increased emphasis, through weekly essays,

on students' development of an effective

Spanish prose style.

Literature

SPANL 201 Introduction to Hispanic

Literature 6

Fall or spring. 3 credits. Prerequisite:

qualification in Spanish or permission of

instructor. The course is divided into small

sections and is conducted mainly in

Spanish. (Fulfills both the language

proficiency requirement and the humani-
ties distribution requirement. The

literature course that normally follows

SPANL 201 is either 316 or 318.)

D. Castillo and staff.

SPANL 239 Cultural History of the Jews

of Spain (also NES 239, JWST 239,

COM L 239, and RELST 239)

Fall. 3 credits. Conducted in English.

R. Brann.

For description, see NES 239.

SPANL 246 Contemporary Narratives by

Latina Writers (also LSP 246)

Spring. 3 credits. L. Carrillo.

This course offers a survey of narratives,

including novels, short fiction, essays,

political/feminist manifestoes and memoirs by

representative Latina writers of various Latino

ethnic groups in the United States including

Chicana, Chileno, Cuban, Dominican, and

Puerto Rican, among others. We will

investigate the parallel development of a

Latina perspective on personal, social, and

cultural issues alongside that of the U.S. ethnic

liberation/revitalization movements of the

1960s through to contemporary feminist

activism and women of color movements. We

will investigate these works as artistic attempts

to deal with such issues as culture, language

and bilingualism, family, gender, sexuality,

and domesticity. We will account for regional

distinctions and contributions. Readings will

include works by Julia Alvarez, Gloria

Anzaldua, Elena Castedo, Ana Castillo, Denise

Chavez, Sandra Cisneros, Judith Ortiz Cofer,

Cristina Garcia, Nora Glickman, Nicholas

Mohl, Cherrie Moraga, Achy Obejas,

Esmeralda Santiago, Ana Lydia Vega, and

Helena Maria Viramontes.

SPANL 301 Hispanic Theater Production

Fall or spring. 1-2 credits. S/U only.

D. Castillo.

Students involved in Hispanic Theater

Production develop a specific dramatic text for

full-scale production. The course will involve

selection of an appropriate text, close analysis of

the literary aspects of the play, and group

evaluation of its representational value and

effectiveness. All students signing up for the

course will be involved in some aspect of

production of the play, and will write a final

paper as a course requirement. Credit will be
SPANL 315 Renaissance Hispanisms: Spain and the Americas #
Spring. 4 credits. Conducted in Spanish.
Prerequisite: SPANL 316 or SPANL 318.
C. M. Arroyo.
Study of canonical texts of the "Golden Age" of Spanish Literature. Discussions on the historical and ideological background—the era of Charles V, Lutheranism, the very notions of Renaissance, Humanism and Baroque, etc. Readings include Columbus, Larazzil de Torres, Garcilaso, St. Teresa of Avila, Cervantes, and plays by Lope de Vega, Calderón, and the birth of the Don Juan myth.

SPANL 316 Readings in Modern Spanish Literature
Fall or spring. 4 credits. Prerequisite: Spanish 201 or 4 years of high school Spanish or permission of instructor.
Taught in Spanish: Fall: M. Stycos or J. R. Resina; spring: J. R. Resina or M. Gil.
Readings and discussion of representative texts from Spain from the romantic period to the present. Bécquer, Galdós, Unamuno, García Lorca, Cela, and others.

SPANL 318 Readings in Spanish-American Short Story
Fall or spring. 4 credits. Fall: J. E. Paz-Soldán or M. Gil; spring: J. E. Paz-Soldán or J. Piedra.
Readings and discussion of representative works from Spanish America during the past two centuries. In addition to representatives of the Romantic, Realist, Modernist, and creolista schools, the course focuses on contemporary writers such as Arreola, Borges, Cortázar, Fuentes, García Márquez, and Rojo.
Note: The prerequisite for the following courses, unless otherwise indicated, is SPANL 315, 316, or 318, or permission of instructor.

SPANL 333 The Spanish-American Short Story
Spring. 4 credits. Conducted in Spanish.
D. Castillo.
A study of the short narrative genre as it has been practiced in Spanish America during the past two centuries. In addition to representatives of the Romantic, Realist, Modernist, and creolista schools, the course focuses on contemporary writers such as Arreola, Borges, Cortázar, Fuentes, García Márquez, and Rojo.

SPANL 339 Muslims, Christians, and Jews in Islamic Spain: Literature and Society (also SPANL 699, NES 339, JHST 339, COM L 334, and RELST 334) #
Spring. 3 credits. S/U option. This course can be used to fulfill the requirements of the Medieval Studies Program. Taught every other year. R. Brann.
For description, see NES 339.

SPANL 363 The European Novel (also Comparative Literature 363)
Fall. 4 credits. C. M. Arroyo.
For description, see COM L 363.

SPANL 365 "Fin de Siglo" and Modernity
Fall. 4 credits. Conducted in Spanish.
J. Paz-Soldán.
A comprehensive review of the literature written in Spanish America during the period known as the "fin de siglo." Movements such as "naturalismo" and "modernismo," and a variety of genres will be examined in the context of the crisis of liberal projects of modernization, and in the light of the specific nature of modernity in Latin America. A selection of texts includes Martí, Cambaceres, Dario, Clorinda Matta, Silva, Quiroga, Agustini, and others.

SPANL 384 Literature and Revolution
Spring. 4 credits. Conducted in Spanish.
J. Piedra.
A study of primary and secondary documents of and about Spanish American revolutionary episodes with a literary flair or literary and meta-literary texts which endorse revolution. Materials range from testimonies and manifestoes to novels and films, from Evita Peron to Che Guevara, from national liberation and civil war to gender and sexual liberation.

SPANL 387 The Novel of Memory
Spring. 4 credits. Conducted in Spanish.
J. R. Resina.
In the 1960s a category of novels develops in Spain that seeks to account for history in terms of personal experience and self-understanding. Through an ideological reversal, the 1980s and 90s are a period of political aestheticization driven by the impulse to forget the past. Some of the theoretical issues explored include the relation between fiction and memory, the fantastic, and the social construction of memory. Authors studied include Matute, Rodoreda, Benet, Goytisolo, Martín Gaite, Marsé and Vázquez Montalbán.

SPANL 399 Spanish Film
Fall. 4 credits. Conducted in Spanish.
Screenings to be announced. J. R. Resina.
Examines the evolution of Spanish cinema since Franco's death in 1975, both from a historical and a cinematic perspective. The focus will be on documentary, fictional and allegorical reconstructions of the past, and on the images of the new democratic society which illustrate a postmodern aesthetics. Selected films include works by directors who started their careers under the dictatorship (Saura, Erice, Borau), and by members of the younger generation, such as Almodóvar.

SPANL 404 Trauma and Captivity from Cervantes to Garcia Marquez (also S HUM 404)
Fall. 4 credits. Conducted in English.
M. A. García.
For description, see S HUM 404.

SPANL 417 Maladies of the Soul: Don Quijote and the Modern Novel (also S HUM 417)
Spring. 4 credits. Conducted in English.
M. A. García.
For description, see S HUM 417.

SPANL 419-420 Special Topics in Hispanic Literature
419, fall; 420, spring. 2-4 credits each term. Staff.

SPANL 429-430 Honors Work in Hispanic Literature
429, fall; 430, spring. 8 credits. Year-long study of specific topics. Limited to seniors. Prerequisite: permission of instructor.
D. Castillo.

SPANL 451 Spanish Theater of the Golden Age #
Fall. 4 credits. Prerequisite: limited to juniors, seniors, and graduate students. Conducted in Spanish.
This course will examine plays of the "Spanish National Theater" from Juan del Encina to Calderón; philosophical anthropology of the period and the art of characterization; topical themes and structures, and originality; text and performance. Readings include Encina, Gil Vicente, Lope de Vega, Tirso, Alarcón, Mira de Amezcua, and Calderón. Open to Spanish majors and to other students who can read the texts in Spanish.

SPANL 483 MACONDO/McDONDO: Our "Fin de Siglo"
Spring. 4 credits. Conducted in Spanish.
J. Paz-Soldán.
A review of Latin American narrative of the last two decades, in the context of the modernity/postmodern debate, and in view of the social, cultural, and political changes brought about by globalization. Topics will include the new historical novel, the emergence of new cultural actors, magical realism and the revolt against it by the new generation of Latin American writers. Works by Vargas Llosa, Allende, Cervantes, Martínez, Mastretta, among others.

SPANL 609 The Generation of 1898
Spring. 4 credits. Conducted in Spanish.
C. M. Arroyo.
Graduate seminar on one of the most controversial moments in Spanish civilization. Topics covered will include the Cubans' wars of independence; José Marti; the Spanish-American War; the idea of generation in literature; the search for "the soul of Spain"; the contemporary European discourse on nationalism, the origins of Catalan and Basque nationalism; the generation of 1898 and Modernism. Readings include Unamuno, Rubén Darío, Valle-Inclán, Benavente, Azorín, Baroja, R. de Maetzu, A. Machado.

SPANL 639-640 Special Topics in Hispanic Literature
639, fall; 640, spring. 2-4 credits each term. Staff.

SPANL 690 Hispanic Feminisms (also WOMNS 692)
Fall. 4 credits. Conducted in Spanish.
D. Castillo.
This seminar is designed to explore the interrelationship of feminist literary theory and the narrative production of the Hispanic world. In this inquiry, we will be developing feminist critical methodologies (based on readings of essays by thinkers such as Barthes, Castellanos, Derrida, Freud, and Glantz) and defining strategies or possibilities for feminist criticism(s). Finally, we will study the ways in which feminist analyses of literature alter our readings of texts by men (Isaacs, Cortázar, Onetti, García Lorca) as well as by women (Pardo Bazán, Tusquets, Valenzuela, Garro), and how they challenge our conceptions of criticism and the task of the critic.

SPANL 699 Muslims, Christians, and Jews in Islamic Spain: Literature and Society (also SPANL 339, COM L 339, NES 639) #
Spring. 3 credits. S/U option. This course can be used to fulfill the requirements of the Medieval Studies Program. Taught every other year. R. Brann.
For description, see NES 639.
**RUSSIAN**

See Language Courses under Languages and Linguistics.

**P. Carden, director of undergraduate studies**

**The Russian Major**

Russian majors study Russian language, literature, and linguistics, emphasizing their specific interests. It is desirable, although not necessary, for prospective majors to complete Russian 121–122, 201–202, and 203–204 as freshmen and sophomores, since these courses are prerequisites to most of the junior and senior courses that count toward the major. Students may be admitted to the major upon satisfactory completion of Russian 122 or the equivalent. Students who elect to major in Russian should consult Professor Carden as soon as possible. For a major in Russian, students will be required to complete (1) Russian 301–302 or 303–304 or the equivalent, and (2) 18 credits from 300- and 400-level literature and linguistics courses, of which 12 credits must be in literature in the original Russian.

Certain courses may, with the permission of the instructor, be taken for one additional hour’s credit. Such courses will involve a one-hour section each week with work in the Russian language. These courses count one hour each of credit toward the 12 courses of Russian literature in the original language required for the major.

**Study Abroad**

Cornell is an affiliated institution in the Council on International Educational Exchange program for Russian language study at St. Petersburg State University. Cornell students also frequently attend the American Council of Teachers of Russian program in Moscow and other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from W. Browne, in the Department of Modern Languages.

**Honors.** Students taking honors in Russian undertake individual reading and research and write an honors essay.

**Fees.** Depending on the course, a small fee may be charged for photocopied texts for course work.

**Freshman Writing Seminar Requirement.** The following courses will satisfy the freshman writing seminar requirement: Russian 103, 104, 105, and 109.

**Russian and Soviet Studies Major**

See “Special Programs and Interdisciplinary Studies,” which follows the department listings.
politics and government; relations with other nations, inside Russia and outside; Jews and Russians; folklore; social matters, customs, values; position of women; education; music, architecture; agriculture and industry; Russian materialism, rationalism, the ecology, film, TV, theatre, journalism.

[RUSSL 321 Introduction to Russian Poetry #] Fall. 4 credits. Prerequisites: Russian 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. Not offered 1997–98. S. Senderovich. A survey of Russian poetry with primary emphasis on the analysis of individual poems by major poets.

[RUSSL 332 Russian Drama and Theatre (also Theatr 322)] Fall. 4 credits. Not offered 1997–98. S. Senderovich. Selected topics. Discussion of a number of the most representative Russian plays of the nineteenth and twentieth centuries in chronological order. Introductions to the historical period, cultural atmosphere, literary trends, and crucial moments in the history of the Russian theater will be especially emphasized. Among the works we will be studying will be Gogol’s Inspector General, Ostrovsky’s The Storm, and Chekhov’s The Cherry Orchard. All readings will be in English translation. Additional assignments in critical literature will be made for graduate students.

[RUSSL 334 The Russian Short Story #] Fall. 4 credits. Prerequisites: Russian 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. Not offered 1997–98. N. Poliak. A survey of two centuries of Russian story telling. Emphasis on the analysis of individual stories by major writers, on narrative structure, and on related landmarks of Russian literary criticism.

[RUSSL 350 Education and the Philosophical Fantasies] Spring. 4 credits. Not offered 1997–98. P. Carden. A major philosophical tradition has conceived of education as encompassing the whole of our lives. What we should do or be is seen as the result of every choice we make. The whole of our human contacts is understood as a school in which we form ourselves. This all-encompassing vision of education has been embodied in the works of great philosophers: those who use the forms of fiction to explore fundamental issues of education. In this course we will examine several key philosophical fantasies, among them Plato’s Republic, Rousseau’s Emile, and Tolstoy’s War and Peace. Our aim will be to understand how the discourse on education became a central part of our Western tradition.

[RUSSL 367 The Russian Novel (also Comparative Literature 367)] # Fall. 4 credits. Also open to graduate students. Special discussion section for students who read Russian. G. Gibian. Sentimentalism, rationalism, Realism, Modernism. Novels and short stories by Gogol, Turgenev, Tolstoy, Dostoevsky, Chekhov, and others. Readings in English translation.

[RUSSL 368 Russian Literature from 1917 to the Present] Fall. 4 credits. Also open to graduate students. Prerequisites: Russian 367. No prerequisites. There will be a special section for students who read Russian. G. Gibian. In translation. A survey of Russian literature focusing on the most important writers. Among the themes to be explored will be Russian Modernism, social command, socialist realism, the Thaw, dissident and emigre literature, post-modernism. Writers include Blok, Mayakovsky, Babel, Olesha, Platonov, Pasternak, Nabokov, Solzhenitsyn, and the two Euroepeans, and contemporary women poets and short story writers.

[RUSSL 369 Dostoevsky #] Fall. 4 credits. Not offered 1997–98. S. Senderovich. Reading and discussion of Anton Chekhov’s short stories in the context of the European art of the short story and painting of that era. The course is designed for nonspecialists as well as literature majors. All reading is in English translation.

[RUSSL 373 Chekhov in the Context of Contemporary European Literature and Art (also Comparative Literature 373)] Spring. 4 credits. Not offered 1997–98. S. Senderovich. Reading and discussion of Anton Chekhov’s short stories in the context of the European art of the short story and painting of that era. The course is designed for nonspecialists as well as literature majors. All reading is in English translation.

[RUSSL 377 Baltic Literature (also German Studies 377)] Spring. 4 credits. Not offered 1997–98. I. Ezergailis. Estonia, Latvia, and Lithuania have created a rich literary tradition since the beginning of a written indigenous culture. In the twentieth century, we will read texts from each of these literatures, selected for their quality, importance, and the availability of acceptable translations, representing, as much as possible, writers from the pre-Soviet independence period, those writing under Soviet rule, and emigres.

[RUSSL 379 The Russian Connection (also Comparative Literature 379)] # Spring. 4 credits. P. Carden. Our topic will be the development of a poetics of introspection in European prose in the course of the 19th century, culminating in two major Russian novels: Tolstoy’s War and Peace and Dostoevsky’s The Idiot. Among other works we will read: Constant’s Adolphe, Stendhal’s Chartreuse of polyester, and several short works relevant to the theme.

[RUSSL 384 Dialogue into Text (also Comparative Literature 384)] Spring. 4 credits. Not offered 1997–98. P. Carden. An examination of the principle of dialogue and dialogism as it appears in fictional discourse. Using the theories of Mikhail Bakhtin as a point of departure, we will examine the use of dialogue as a form of discourse beginning with Plato’s Phaedrus. Dostoevsky’s novels Notes from Underground, The Possessed, and The Brothers Karamazov will be discussed as dialogic, or polyphonic forms of discourse. Finally, we will discuss selected works of Gide, Sartre and Camus, who acknowledged their debt to Dostoevsky, to see if they are indeed polyphonic in structure.

[RUSSL 385 Reading Nabokov (also Comparative Literature 385 and English 379)] Fall. 4 credits. Not offered 1997–98. G. Shapiro. This course offers an exciting trip to the intricate world of Nabokovian fiction. After establishing himself in Europe as a distinguished Russian writer, Nabokov, at the outbreak of WWII, came to the United States where he reestablished himself, this time as an American writer of world renown. In our analysis of the Nabokovian artistic universe, we shall focus on his two splendid achievements as a Russian writer, The Defense (1930) and Despair (1954) (both in their English forms), and then examine the two widely read novels that he wrote in Ithaca while teaching literature at Cornell—Lolita (1955) and Pnin (1957).

[RUSSL 389 Contemporary Literature in Central and East Europe (also Comparative Literature 389)] Spring. 4 credits. Not offered 1997–98. G. Gibian. The course this year will study developments in literature (and to some extent in other areas of culture) in Hungary, Poland, Slovakia, and the Czech Republic in the most recent periods. We shall study novels and short stories, but some consideration will also be given to drama and poetry. No knowledge of Eastern European languages is required. The reading will be done in English translation.

[RUSSL 393 Honors Essay Tutorial] Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year. Credit for the first semester will be awarded upon completion of second semester. For information, please see Director of Undergraduate Studies.

[RUSSL 404 History and Nationality in Russia and Eastern Europe (also S Hum 404)] Fall. 3 credits. Not offered 1997–98. G. Gibian. Ethnicity and nationality appear as the main forces behind the recent dramatic changes in Eastern Europe. The seminar addresses these issues in Russia, Czech Republic, and elsewhere, mainly from a literary perspective and also in the context of rising ethnic and national consciousness throughout the world.

[RUSSL 409 Russian Stylitics] Fall. 4 credits. Also open to graduate students. Prerequisite: three years of Russian. Not offered 1997–98. G. Gibian. A few steps beyond normative grammar. Introduction to the subtleties of idiomatic Russian on the levels of morphology, syntax, vocabulary, and phraseology. Introduction to the genres of live colloquial and written language. Development of writing skills through short assignments and their analyses. First notions of literary stylitics and their practical application.
This course is a survey of Russian Formalism, a trend in literary interpretation that flourished in the 1910s and the 1920s. We will read the writings of such scholars as Tytianov, Elkhinbaum, Shklovsky, and Jakobson, as well as the works they studied. The course provides a historical examination of some of the most important movements in twentieth-century Western criticism—and in other disciplines, such as linguistics and anthropology. The course also provides both a look at classics of Russian prose and an approach to literature that has something to offer readers today. No knowledge of Russian is required.

**RUSSL 428 Futurism and Formalism**

FALL. 4 CREDITS. S. BANKS.

In the linguistic inventiveness of the Futurists, theorists such as Viktor Shklovsky found the vital engagement with the material of poetry which they believed could truly renovate Russian literature. In this course we will read key critical essays by members of the Petersburg OPAYAZ and the Moscow Linguistic Circle, while we also carefully examine the material and textual elements of Futurist poetry collections and dramatic productions. We will also study the literary and theoretical impact of new genres such as the manifesto which, with its status between literary utterance and performative program incubates the intersection of literature and theory. Readings in English translation.

**RUSSL 429 Music in Russian Symbolist Poetry**

SPRING. 4 CREDITS. S. BANKS.

In his hierarchy of the arts, Schoenauer placed music at the apex as the pure manifestation of world will. Poetry claimed second place, and to the Russian Symbolists this meant that a heightening of the musical aspects of poetry could bring it closer to the ideal art. In this course we will read essays and poems by Blok, Ivanov, Briussov, and others as well as excerpts from Schoenauer and a few selected works of the French Symbolists, whom the Russians admired and translated. We will examine the idea of musicality as expressed in the rhythm and sonority of the poems while we also interpret musical metaphors and themes against the backdrop of larger aesthetic and philosophical valuations of music. Our attention to musical motifs and techniques will take us out of the traditionally defined chronological boundaries of Symbolism, but this breadth will help us to define an essential aspect of the movement as well as to assess the movement's impact on other artistic programs of the early twentieth century. Readings in English translation.

**RUSSL 430 Practice in Translation**

SPRING. 4 CREDITS. PREREQUISITES: PROFICIENCY IN RUSSIAN OR APPROVAL OF INSTRUCTORS. W. BROWNE AND S. SENDEROVICH.

A practical workshop in translation: documents, scholarly papers, literary works (prose and poetry). Translation mostly from Russian to English, partly from English to Russian. Attention to problems and development of skills.

**RUSSL 431 Contemporary Russian Prose**

SPRING. 4 CREDITS. PREREQUISITES: RUSSIAN 301-302 OR 303-304, AND PERMISSION OF INSTRUCTOR. THIS COURSE MAY BE COUNTED TOWARDS THE 12 CREDITS OF RUSSIAN LITERATURE IN THE ORIGINAL LANGUAGE FOR THE RUSSIAN MAJOR. GRADUATE STUDENTS MAY AUDIT THE COURSE. NOT OFFERED 1997-98. STAFF.

This course is designed to acquaint students with the way Russian prose has developed during the past forty years. Although the emphasis will be on comprehension of the text, we will also discuss literary structure, modern literary history, social and political problems, and the ways in which life in Russia is reflected in its literature. Authors to be read include Viktor Nekrasov, Yuri Kazakov, Alexander Solzhenitsyn, Varlam Shalamov, Abram Tertz (Andrei Sinyavsky), Vasilii Axyonov, and Tatyana Tolstaya. This course is specifically intended for third- and fourth-year Russian majors.

**RUSSL 432 Pushkin I**

SPRING. 4 CREDITS. PREREQUISITES: RUSSIAN 202 OR EQUIVALENT, AND PERMISSION OF INSTRUCTOR. THIS COURSE MAY BE COUNTED TOWARDS THE 12 CREDITS OF RUSSIAN LITERATURE IN THE ORIGINAL LANGUAGE FOR THE RUSSIAN MAJOR. ALSO OPEN TO GRADUATE STUDENTS. NOT OFFERED 1997-98. S. SENDEROVICH.

Reading in the original language and discussion of selected works by Pushkin: lyrics, narrative poems, and Eugene Onegin.

**RUSSL 445 Batiushkov and Pasternak**

FALL. 4 CREDITS. PREREQUISITES: AT LEAST ONE 300-LEVEL COURSE IN RUSSIAN LITERATURE IN THE ORIGINAL LANGUAGE OR PERMISSION OF THE INSTRUCTOR. N. POLIAK.

A study of the works of Konstantin Batiushkov (b. 1787) and Boris Pasternak (b. 1890), two poets who have been described as innovators in Russian poetic language. We will examine the poetry (and prose) of these poets and some of their contemporaries, with a view to exploring their parallel roles in two ages of poetry a century apart.

**RUSSL 460 Short Works of Tolstoy and Dostoevsky**

SPRING. 4 CREDITS. DAYS AND HOURS, TBA. G. GIBIAN.

Readings in Russian and in translation. Open to graduate students.

**RUSSL 491 Reading Course: Russian Literature in the Original Language**

FALL OR SPRING. 1 CREDIT EACH TERM. PREREQUISITE: PERMISSION OF INSTRUCTOR. STAFF.

This course is to be taken in conjunction with any Russian literature course in English translation. Students will receive one credit for reading and discussing works in Russian in addition to their normal course work.

**RUSSL 492 Supervised Reading in Russian Literature**

FALL OR SPRING. 1-3 CREDITS EACH TERM. PREREQUISITE: PERMISSION OF INSTRUCTOR. STAFF.

**RUSSL 499 The Avant-Garde in Russian Literature and the Arts**

SPRING. 4 CREDITS. OPEN TO ANY STUDENT WHO HAS COMPLETED RUSS 202. MAY BE USED IN SATISFACTION OF THE TWELVE HOURS OF READING IN RUSSIAN REQUIRED FOR THE RUSSIAN MAJOR. NOT OFFERED 1997-98. IN THIS COURSE WE WILL EXAMINE CLOSELY REPRESENTATIVE SHORT TEXTS IN RUSSIAN BY SUCH LEADING FIGURES OF THE RUSSIAN AVANT-GARDE AS BLOCK, BEHJ, REMIZOV, MAYAKOVSKY, KHLÉBNIKOV, KRUCHENYKH, AND BABEL. WE WILL ALSO EXAMINE RELATED DEVELOPMENTS IN THEATER, FILM, AND THE VISUAL ARTS.

**Graduate Seminars**

**RUSSL 603 Graduate Seminar: Neglected Masterpieces of Short Russian Prose**

SPRING. 4 CREDITS. NOT OFFERED 1997-98. G. GIBIAN.

Nineteenth- and twentieth-century works chosen according to the needs of the students enrolled. Stress on skills useful in teaching Russian literature.

**RUSSL 611 Supervised Reading and Research**

FALL OR SPRING. 2-4 CREDITS. PREREQUISITE: PERMISSION OF THE DEPARTMENT. STAFF.

**RUSSL 617-618 Russian Stylistics I and II**

NOT OFFERED 1997-98.

**RUSSL 619 Seventeenth-Century Russian Literature**

FALL. 4 CREDITS. NOT OFFERED 1997-98. G. SHAPIRO.

Seventeenth-century Russian literature is often studied together with Medieval literature. Is such an arrangement justified, or does seventeenth-century literature have its own problematic that makes it worth studying separately? In scholarship the seventeenth century is referred to as the Age of Baroque. Did Muscovite Russia experience its own Baroque, and, if so, what are its unique features? These and other important issues will be addressed in the seminar. In the course of the seminar a variety of concepts, genres, and themes characteristic for the epoch will be discussed. We will read the works of such authors as Simeon Polotsky, Silvester Medvedev, Karion Isomirin, and the archpriest Avvakum.

**RUSSL 620 Twentieth-Century Russian Prose**

SPRING. 4 CREDITS. OPEN TO ADVANCED UNDERGRADUATES WITH PERMISSION OF INSTRUCTOR. NOT OFFERED 1997-98. N. POLIAK.

An in-depth study of the works of selected twentieth-century poets. Authors may include Blok, Mandelstam, Pasternak, Tsveetayeva, and Khlébnikov.

**RUSSL 621 Old Russian Literature**

SPRING. 4 CREDITS. NOT OFFERED 1997-98. S. SENDEROVICH.

A survey.

**RUSSL 622 Eighteenth-Century Literature**

SPRING. 4 CREDITS. NOT OFFERED 1997-98. S. SENDEROVICH.

[RUSSL 624] Russian Romanticism
Spring. 4 credits. Taught in Russian. S. Senderovich.
A survey of concepts, themes, genres, and main individual contributions in Russian literature of the Age of Romanticism. The Age of Romanticism encompasses the first four decades of the nineteenth century. Zhukovsky, Batiushkov, Pushkin, Baratynsky, Gogol, and Lermontov are the major representatives of this style and the most important period of Russian literature. The emphasis is on poetry, its historical and theoretical problems. It was, above all, the golden age of Russian poetry, which prepared and deeply influenced the following age of great Russian prose. Turgenev, Tolstoy, Dostoevsky, and Chekhov are full of allusions to the texts of the golden age and cannot be properly understood without it.

[RUSSL 625] Russian Realism
Fall. 4 credits. Not offered 1997–98. P. Carden.
A study of the development of psychological realism in Russian prose of the nineteenth century, with some attention to the poetic tradition. In addition to reading representative works, we will pay attention to the historical background of the period. We will approach the works through the critical writings of several important theorists, in particular those of Lydia Ginzburg.

[RUSSL 626] The Tradition of Russian Poetry
This course will examine a selection of poems that have been particularly important for the tradition of Russian poetry, with some attention to the poetic tradition. In addition to reading representative works, we will pay attention to the historical background of the period. We will approach the works through the critical writings of several important theorists, in particular those of Lydia Ginzburg.

[RUSSL 627] Russian Formalism (also Comparative Literature 627)
See RussL 427 for course description.

[RUSSL 630] Gogol
Gogol's artistic career from his "Ukrainian" cycles to Dead Souls. We will examine representative works from each of the major divisions of Gogol's early work, in particular from his cycles Evenings on a Farm near Dikanka and Mirgorod, and will trace the writer's development toward his magnum opus, Dead Souls. Although some of the readings will be done in English to enable the class to cover a significant amount of material, the class work will be focused on close analysis of the Russian text.

[RUSSL 641] Bakhtin as Reader (also COMP L 641)
Spring. 4 credits. Also open to undergraduates with permission of instructor. P. Carden.
The course will investigate the literary and cultural theories of Mikhail Bakhtin, focusing in particular on his interpretations of literary texts. We will read a representative selection of works by Bakhtin covering the chronological development of his ideas. Each member of the class will select one or more of the literary texts commented on by Bakhtin as an occasion for independent work. A reading knowledge of Russian is not required, although Russian readers may have alternative assignments in the language.

[RUSSL 650] Russian Intellectual History
Nineteenth- and twentieth-century selected topics. Taught mostly in English.

[RUSSL 669] Dostoevsky
Fall. Also open to advanced undergraduates. Not offered 1997–98. G. Gibian and guest lecturers.
Study of representative works from various periods of Dostoevsky's life, including some articles, speeches, and parts of The Diary of a Writer, against the context of nineteenth-century Western European and Russian literature. A variety of critical and scholarly approaches (from Russian formalists to recent Western scholars) will be sampled and evaluated.

[RUSSL 671] Seminar in Nineteenth-Century Russian Literature
Fall. 4 credits. P. Carden.
Topic: War and Peace.

[RUSSL 672] Seminar in Twentieth-Century Russian Literature
Fall. 4 credits. Open to advanced undergraduates. Not offered 1997–98.

[RUSSL 673] The Russian Nabokov
Fall. 4 credits. Also open to advanced undergraduates. G. Shapiro.
Vladimir Nabokov wrote much verse, several plays, numerous short stories, and nine novels in Russian before switching to English. He is a major Russian writer of the twentieth century. This seminar will examine his work in the context of modern Russian literature, concentrating in particular on the novels. Knowledge of Russian is highly desirable, but all the works discussed also exist in English translation.

[RUSSL 675] Russian Literature, 1917–1945
Fall. 4 credits. Not offered 1997–98.
This semester will focus on the achievements of Russian prose between the two World Wars. Among the authors whose works will be closely read and discussed, there are Babel, Olesha, Zoshchenko, Ilf and Petrov, Bulgakov, and Nabokov.

[RUSSL 676] Russian Literature, 1945–Present
Spring. 4 credits. Not offered 1997–98.

[RUSSL 699] Russian Modernism
We will be investigating the rich and innovative period of the avant-garde in Russia from 1910 to 1925. In addition to examining outstanding works in a variety of forms, we will look at the movements, social context, and ties to the European avant-garde. Among the artists whose works we will examine are Blok, Bely, Mayakovsky, Khlebnikov, Pilyuk and Babel. We will examine theater through the Futurist performance piece, "Victory Over the Sun," through Meyerhold's productions of Mayakovsky's plays and other experimental pieces, and through mass spectacles. We will discuss the film theories of Eisenstein and Dziga Vertov and see several of their films. In the visual arts we will be examining the experiments of Larionov and Goncharova, Malevich, Kandinsky, and Tatlin. We will also look at the photomontage of Rodchenko.

SERBO-CROATIAN
See Language Courses under Languages and Linguistics.

SCIENCE AND TECHNOLOGY STUDIES
The importance of science and technology in the modern world is difficult to overstate. Whether one looks at the role of computers in society, the history of evolutionary theory, the challenges of environmental controversies, the ethical dilemmas of biomedicine, or the military applications of research, science and technology profoundly affect our lives—often in ways that we scarcely understand or only dimly perceive. The field of science & technology studies uses tools from the history, philosophy, sociology, and politics of science and technology to examine science and technology in their social and cultural context and to explore their political and policy implications. Systematic, integrated study of the origins and impacts of science and technology provides an understanding of the interactions among science, technology, and society and yields invaluable insights into the nature of the modern world.
The Science & Technology Studies Major

The major in Science & Technology Studies offers students wishing to pursue careers in law, public policy, health care, or management an opportunity to develop a full appreciation of the place of science and technology in society. The curriculum aims to further students' understanding of the historical, social, political, and ethical aspects of science and technology and to enable students to participate effectively in policy debates and decision making. In today's world, issues at the intersection of the technical and social arise continually in professional practice, management, and research. Thus, the integrated approach of the S&TS major provides a strong foundation for careers in the professions, in public policy, and in management, as well as in research and teaching.

Themes of the Major

Students in the S&TS major develop a program individually tailored to their particular interests. To give their coursework a coherent focus, students select a theme that draws together a group of related courses. Available themes include:

1. Science, Technology & Public Policy. Many of the most important policy issues of our time involve science and technology. This theme offers students an opportunity to gain a deep appreciation of the problems this situation raises in democratic societies. Through courses that survey the place of science in American politics and through courses that focus on such substantive issues as national technology policy or the politics of genetic engineering, this theme explores the tensions between expertise and democracy, the uses of scientific knowledge in making and legitimating policy, social movements that question technology and science, and contemporary debates over economics, innovation, and technology policy.

2. Technology, Culture, & Society. Students interested in this theme may examine the connections among technology and culture by studying the manifold ways in which social groups (scientists, engineers, inventors, corporations, government agencies, and consumers) interact to construct technological artifacts and systems, and how the use of these artifacts and systems is related to social and cultural change. Areas of particular interest are: computers and society, the military and technological change, gender and technology, biotechnology and society, and telecommunications.

3. Environment, Science, & Society. By focusing on the relationship between scientific knowledge and political power, this theme offers unique insights into the making and implementation of environmental policy. Courses are available on such topics as American environmental politics, international environmental policy, science and the law, the history of agricultural science, and environmental communication. Students explore the causes and consequences of environmental controversies, the nature of risk and uncertainty in environmental issues, the roles of experts and the public in environmental decisions, and the challenges of global environmental policy.

4. History and Philosophy of Science and Technology. This theme provides students with an appreciation of science and technology in historical perspective and with an understanding of the philosophical problems posed by scientific knowledge. Courses available range from broad surveys to intensive studies of focused subjects. Students in this theme address such topics as the emergence of modern science; gender and science; the goal of achieving valid knowledge and the philosophical and institutional problems that this entails; the issues for history and philosophy of science raised by the new sociology of scientific knowledge; the relationship between knowledge, technology, and ethics; and the impact of major institutions—such as religion, medicine, the military, and the modern consumer economy—on the development of the sciences.

Beyond the four themes described above, S&TS majors may also create their own themes, carefully tailored to their particular interests. Examples might include "Computers, Innovation, and Society" or "Science, Technology, and Globalization."

Admission to the Major

Students intending to major in Science & Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes (1) a one-page statement explaining the student's academic interests and goals; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling S&TS requirements; and (4) an up-to-date transcript of work completed at Cornell University (and elsewhere, if applicable). Acceptance into the major requires completion of the following prerequisites: a) Two introductory courses chosen from some combination of history, philosophy, sociology, or government; b) the science requirement of the College of Arts and Sciences; c) Mathematics or computer science courses in fulfillment of the Arts College Group Two distribution requirement. Sophomores in the process of completing these prerequisites may be admitted to the major on a provisional basis. Further information and application materials are available at 275 Clark Hall (255-6047).

Requirements

S&TS majors must complete the following requirements:

1. Core Courses. Science and Technology Studies majors will be required to take:
   (a) either S&TS 250 (Technology in Society) or S&TS 282 (Science in the American Polity: 1800-1960) and S&TS 381 (Philosophy of Science: Knowledge and Objectivity)
   (b) either S&TS 250 (Technology in Society) or S&TS 381 (Philosophy of Science: Knowledge and Objectivity) or S&TS 382 (Science in the American Polity: 1800-1960)

2. Additional Science and Technology Studies Courses. Science and Technology Studies majors will be required to complete at least 21 credit hours of additional courses in Science and Technology Studies, subject to the following restrictions:
   (a) Breadth requirement: At least one course beyond the core courses in each of the three areas of concentration (history, philosophy, and social studies of science and technology);
   (b) Depth requirement: At least two courses in one area beyond the core courses and intended for advanced undergraduates or graduate students.

3. Science Requirement. In addition to the science requirement of the College of Arts and Sciences, Science and Technology Studies majors are required to take an additional two semesters of a natural science or engineering (including computer science) course. Mathematics sufficient to follow the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student major adviser and should be related to the theme selected by the student.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected, to do independent study and research, with faculty guidance on issues in science and technology studies. Students who participate in the program should find the experience stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of the spring semester before their junior year. More information on the honors program is available from the S&TS undergraduate office at 275 Clark (255-6047).

The Biology and Society Major

The Department of Science & Technology Studies also offers the Biology and Society major, which includes faculty from throughout the university. The Biology and Society major is ideally suited for students who wish to combine training in biology with exposure to perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing foundational training in biology, Biology and Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology and Society major is offered to students enrolled in the College of Arts and Sciences and the College of Human Ecology. Undergraduates in the College of Agriculture and Life Sciences can develop an approved sequence of courses from the Biology and Society curriculum under general studies. The major is coordinated for students in all colleges through the Biology and Society.
The concentration in Science and Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The concentration is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from multiple disciplinary perspectives.

The S&TS concentration permits students to develop an individualized program of study closely related to their major field. For example, students might use the S&TS concentration to further explore issues related to their major focusing on such topics as computers and society; gender and technology; science and law; biotechnology; science and politics; and environmental policy. By choosing courses in which their particular goals, students can tailor the concentration to provide breadth and depth in areas of special interest.

S&TS courses are organized into three areas: history, philosophy, and social studies of science and technology. To satisfy the requirements for the S&TS concentration, students must complete with letter grades a minimum of four courses selected from the course offerings listed for the major. At least one course should be chosen from the list of core courses. The remaining three courses should be chosen in consultation with an S&TS faculty adviser and must be drawn from at least two of the three areas. Interested students may obtain further information about courses by contacting the S&TS undergraduate office, 275 Clark Hall (255-6042).

Course Offerings

History

Philosophy

Social Studies of Science

Independent Study

History

S&TS 233 Agriculture, History, and Society: From Squanto to Biotchnology
Fall. 3 credits. Not offered 1997–98. M. W. Rosister.

S&TS 444 Historical Issues of Gender and Science (also Women's Studies 444)
Fall. 4 credits. Open to sophomores. M. W. Rosister.

One-semester survey of women's role in science and engineering from antiquity to the 1980s, with special emphasis on the United States in the twentieth century. Readings will include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, we shall have attained a broad view of the problems that have faced women entering science and those that still remain.

S&TS 447 Seminar in the History of Biology (also Biology and Society 447, History 414, and Biological Sciences 447)
Summer. 4 credits. Limited to 18 students. S/U grades optional. For description see Biology Sci (BIO G) 467.

S&TS 525 Seminar in the History of Technology (also History 525)
Fall. 4 credits. R. Kline.

Exploration of the history of technology in Europe and the United States from the eighteenth century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technological utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field will be considered in selecting the topics for the seminar.

S&TS 644 Topics in the History of Women in Science

This is a one-semester graduate seminar on selected topics in the history of women and gender in science and technology, covering mostly the U.S. in the 20th century but broadly defined to include earlier periods and other countries. It seeks to acquaint advanced students with some of the best recent literature on this topic and to identify and explore possible new topics. Weekly readings and a research paper.

S&TS 680 Seminar in Historiographical Approaches to Sciences (also History 680)
Fall. 4 credits. Not offered 1997–98. For description, see History 680.

S&TS 682 Topics in the Scientific Revolution (also History 682)
Fall. 4 credits. Not offered 1997–98. For description, see History 682.

S&TS 687 Seminar in the History of the Agricultural Sciences
Fall. 4 credits. Open to advanced students interested in the history of the agricultural sciences, broadly defined. M. W. Rosister.

Weekly readings and a research paper.
This graduate seminar will examine the weekly discussion, each student will prepare a organization of the postwar university, and the biomedical, and environmental sciences since seminar. In addition to participation in the particular institutions, technologies, and affect the development of the sciences, the research paper for presentation to the seminar. We will examine the structure of the medical profession, medical training and professional socialization; the social organization of the hospital, and doctor-patient interactions. The course will also explore how biomedical knowledge and technology get produced and introduced into clinical practice. Topics may include the intensive care unit, the training of surgeons, the regulation of pharmaceuticals, AIDS and breast cancer activism, genetic testing, and priority setting in biomedical science.

S&T 324 Environment and Society (also Rural Sociology 324) Spring. 3 c. dis. For description, see R SOC 324.

S&T 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also Government 305) Spring. 4 credits. M. Dennis. This course will explicate the development of atomic weapons from early twentieth-century rumina tions about super bombs in science fiction through the Manhattan Project, the postwar development of thermonuclear weapons and civil defense, and more recent plans for strategic defense. Our focus will expand to cover the lives of researchers at such institutions as Los Alamos during and after World War II as well as discussions of national politics. Other topics include the Nazi effort to develop an atomic bomb, the role of technical espionage during and after World War II, and the problems posed by the classification of technical knowledge. We will seek to understand how the bomb became part of American culture through the use of literature and film, as well as readings in primary historical documents and secondary analyses. In addition to class meetings, there is also a required screening session on T 7-10 p.m. in Lins media room b. Films will generally last less than two hours, but some are longer. Viewing the movies is an essential part of the course.

S&T 352 Science Writing for the Mass Media (also Communication 352) Fall. 3 credits. For description, see COMM 352.

S&T 360 Ethical Issues in Engineering (also Engineering 360) Spring. 3 c. dis. For description, see ENGR 360.

S&T 390 Science in the American Polity, 1800-1960 (also Government 308) Fall. 4 credits. M. Dennis. How did America become a leading nation in scientific and technical research? This course charts the development of American science from its origins in gentlemanly societies in the early nineteenth century through the development of large-scale federally funded research or Big Science. Particular attention will be paid to the interplay of government patronage in creating new social and intellectual spaces for research; the importance of medicine and the biomedical disciplines for the development of university-based research; the origins and expansion of research in corporations; and the role of war in the political economy of American science.

S&T 391 Science in the American Polity, 1960-Now (also Government 309) Spring. 4 credits. S. Jasanoff. This course reviews the changing political relations between science, technology and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for the course. Topics addressed will include science funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

S&T 400 Components and Systems: Engineering in a Social Context (also Mechanical and Aerospace Engineering) Spring. 3 credits. Not offered 1997-98 For description, see M & AE 400.

S&T 401 Biology and Society: The Social Construction of Life (also Biology and Society 301) Fall. 4 credits. For description, see B & SOC 301.

S&T 406 Biotechnology and Law (also Biology and Society 406) Fall. 4 credits. Limited to 16 students. Recommended: a course in genetics or rDNA, a course in American government or law, or permission of instructor. Fee for course reading material. Not offered 1997-98. S. Jasanoff.

Biotechnology, with myriad applications in areas such as medicine and agriculture, is developing more rapidly than the social institutions that are capable of controlling it. This course explores the use and potential abuse of biotechnology in areas such as genetic screening and counseling, reproductive technologies, intentional release of genetically engineered organisms, patents, and ownership of human tissue. Particular attention will be given to evolving legal and management strategies for regulating the applications of biotechnology. Readings are from science, medicine, law, and public policy. A research paper is required.

This course explores the varied interactions between science and the legal process that have developed in recent years as a result of attempts to bring greater public accountability to the use of science and technology. It examines the activities of both legislatures and
courts in controlling science and analyzes the values underlying these initiatives. Three major types of science-law interactions form the focus of the course: expert testimony in the courtroom, regulation of hazardous chemicals and nuclear power, and the control of professional standards in science and medicine. Specific topics include the regulation of toxic chemicals and nuclear power, controversies about biotechnology, reproductive technologies, and biomedical research, and scientific misconduct.

S&TS 425 Science and Technology Policy in Global Perspective (also Government 468)
Spring. 4 credits. S. Jasanoff
This course examines the influence of globalization on contemporary science and technology policy. The development of science and technology is increasingly shaped by national as well as transnational forces, such as strategic alliances or confrontations between companies, supranational institutions, and international organizations. Furthermore, many scientific and technological developments, from the damming of rivers in India to power generation in the United States, arouse social resistance on a cross-national level. Is a coherent national science and technology policy possible in this field of apparently centrifugal forces? What values, philosophies, and institutions could guide a socially responsible science and technology policy in the post-cold war era? These questions will be at the center of the course. We will approach the normative questions by looking at the evolution of science and technology policy in a comparative framework covering the U.S., Japan, Europe, and various Third World countries.

S&TS 427 Politics of Environmental Protection in America (also Government 427)
Fall. 4 credits. S. Jasanoff
An introduction to the distinctive feature of environmental protection in America, focusing particularly on law, science, and citizen activism in public policymaking. Readings from law, political science, and policy analysis will examine the changing role of expert agencies, courts, public interest groups, Congress, and the states in environmental politics since the late 1960s. Case studies of specific environmental controversies (nuclear power, siting, pesticides, endangered species) will be used to explore dominant public conceptions of risk and safety, regulatory costs and benefits, and the goals and instruments of environmental policy.

S&TS 442 The Sociology of Science (also City and Regional Planning 442 and Biology and Society 342)
Spring. 4 credits. T. J. Pinch
A view of science as an autonomous activity than as a social institution. We will discuss such issues as controversies in science, analysis of scientific text, gender, and the social shaping of scientific knowledge.

S&TS 467 Innovation: Theory and Policy
Fall. 4 credits. Open to upper-level undergraduates and interested graduate students. Economics 102 or permission of the instructor. J. Reppy.
In this course we will study the innovation process (that is, the introduction of new technology into practice) through the critical analysis of selected theories of innovation and supporting empirical evidence. Economic theories will be contrasted to the insights to be found in science and technology studies. The focus will be on the context of interests and ideology in which the various theories have been framed and their differing implications for technology policy. Authors to be covered include Schumpeter, Solow, Scherer, Nelson and Winter and Bijker and Pinch.

S&TS 469 Food, Agriculture, and Society (also Biology and Society 469, and Biology General 469)
Spring. 3 credits. For description, see BIO G 469.

S&TS 483 The Military and New Technology
Spring. 4 credits. For description, see GOVT 483.

[S&TS 490 The Integrity of Scientific Practice
Fall. 4 credits. Not offered 1997–98. S. Hilgartner.
Research? and ethical issues involving scientific fraud, debates about financial conflicts of interest, disputes about the use of human and animal subjects, and tensions over ownership of data have raised concern about integrity in science. In addition, changes in the American research system—from funding to new university-industry relationships to the growth of electronic communication—pose new questions about who owns and controls research. The course addresses practices that present problems of integrity in research (e.g., fraud, secrecy, commercialization). It also examines how scientific practices affect the structural integrity of science as an institution. Through these complementary concepts of integrity, the course explores the connections between the conduct of science and its cultural authority.

S&TS 520 Economics Meets Science Studies
Spring. 4 credits. J. Reppy.
This course will cover a variety of possible interactions between the disciplines of economics and science and technology studies. Economists (at least some economists) are interested in science and technology as important components in economic growth, while scholars in science studies often appeal to economic motives and institutions to explain behavior in the production of scientific and technological knowledge. We will explore ways in which economics can provide new questions and theoretical approaches for science and technology studies. From another perspective, economists, as the most "scientific" of the social sciences, is itself a subject for study. Internal critiques by economists will be compared to external analyses in the science and technology studies literature. Readings will include works on the epistemology and use of rhetoric in economics and on the "new economics of science," and examples of the use of economic analysis in the science studies literature.

S&TS 532 Inside Technology: The Social Construction of Technology
Spring. 4 credits. T. J. Pinch.
Rather than analyze the social impact of technology upon society, in this course we will investigate how society gets inside technology. In other words, is it possible that the very design of technologies embody assumptions about the nature of society? And, if so, are alternative technologies possible which embody different assumptions about society? Do engineers have implicit theories about society? Is technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments will be illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.

[S&TS 626 Workshop on Law, Science, and Technology (also Government 626)
Legal proceedings provide a powerful mechanism for deconstructing, and to some extent reconstructing, a society's understanding about the nature and social role of expertise, the boundaries of science and technology, and the meaning or validity of scientific "facts." Using a combination of primary legal materials and theoretical studies in science and technology, this course will explore how varying scientific realities are constructed in legal forums and what impact these constructions have on the social relations of science and technology. The course will also consider the policy implications of conflicting legal and scientific approaches to the discovery and verification of scientific facts.

[S&TS 627 Comparative Methods in Policy Analysis (also Government 627)
Fall. 4 credits. Not offered 1997–98. S. Jasanoff.
Comparisons, at levels of analysis ranging from individual biographies to national decisionmaking, have emerged as an important methodological approach in policy analysis. Focusing primarily on historical and social studies of science and technology, this course seeks to enhance the student's ability to carry out effective comparative analyses at a variety of research sites including laboratories, regulatory agencies, and new social movements. Work in structuralist as well as post-structuralist idioms will be examined in order to sharpen and refine notions such as national styles and political culture that have loomed large in the policy literature on the politics of science and technology. Topical areas include military research, biotechnology, and environmental controversies.

S&TS 631 Qualitative Research Methods for Studying Science
Spring. 4 credits. T. J. Pinch.
Much has been learned about the nature of science by sociologists and anthropologists doing lab coats and studying scientists in action. In this course we will look at the methods used in this new wave of science studies. We will examine what can be learned by interviewing scientists, from videos and from detailed examinations of scientific texts. Students will gain hands-on experience by conducting a mini-project in which they investigate some aspect of scientific culture.

[S&TS 645 Genomic Engineering: Politics and Society (also Government 634)
Spring. 4 credits. Limited to seniors and graduate students. Not offered 1997–98. S. Hilgartner.
Since its development, genetic engineering has been a passionately debated technology,
The goal of this course is to develop a technology transfer in different contexts, employing that framework to evaluate current production of knowledge and social order. Among the specific issues to be considered are trust and coherent analytical framework for analyzing theoretical developments in science and theoretical writings and case studies.

Sociology provides students with particularly effective ways to understand the complexities of modern life. For many students, the undergraduate years are a last opportunity to gain the insights these fields have to offer. The Department of Sociology is continuing to design an array of beginning and advanced courses that convey a broad understanding of the methods and insights of sociological analysis—courses that will be of particular interest to undergraduates who may not major in sociology. First- and second-year students should note that the introductory courses (101, 103, 110, 115, 150) provide substantial focus on the sociological analysis of major issues of public life. A wide selection of general education courses is available at the 200 level. Advanced undergraduates who are majors in other fields should also see, in particular, the descriptions of Sociology 303, 310, 354, 370, 380, for which there are no prerequisites other than junior or senior status.

Related Courses in Other Departments
Students interested in sociology should consult the course lists of the other social science departments in the College of Arts and Sciences (including Anthropology, Economics, Government, and Psychology) and of these other departments: Organizational Behavior (College of Industrial and Labor Relations), Human Development and Family Studies (College of Human Ecology), and Rural Sociology (College of Agriculture and Life Sciences).

The Major
Requirements for general sociology: (1) 101 and any other 100-level or 200-level course (excluding Freshman Writing Seminar) with a 2.5 minimum grade-point average; (2) no later than the junior year, the 301 and 303 methods courses; (3) one course in the department at the 400 level or higher (491 is recommended); and (4) 20 additional credits in sociology, of which 6 may be taken in related departments on the approval of the student's major adviser. A list of pre-approved courses is maintained by the director of undergraduate studies, some of which are listed under "Related Courses."

Requirements for honors: Potential honors students are encouraged to begin taking the methods and statistics courses during their sophomore year and to take at least 2 credits of Sociology 491, Independent Study, during their junior year. Honors students take Sociology 495–496 during their senior year. Graduation with honors requires a cumulative average of at least B+ in all sociology courses and the successful completion of an oral defense of the honors thesis. Interested students should consult the director of undergraduate studies no later than the second semester of their junior year.

Cornell-in-Washington program. Qualified sociology majors may include a semester in the Cornell-in-Washington program, in which students take courses and undertake a closely supervised internship. For further information, see p. 19. Supervised research. Qualified sociology majors are invited to participate with faculty members in conducting research. Such projects are usually initiated in one of two ways: the student may be offered to assist the faculty member in an ongoing project, or the student may request that the faculty member
supervise the execution of a project conceived by the student. In either case the student should enroll in Sociology 491. Interested students may direct inquiries to any faculty member.

Society and Economy Concentration

Sociology majors or students in other disciplines who wish to prepare for graduate study in any of the social sciences or in a profession (Business, Management, or Law) may elect to acquire a concentration in society and economy (including international dimensions). This program is designed to provide training in economic sociology, formal organizations, and social science methods. The requirements for the concentration in society and economy include courses in economic sociology, formal organizations, and methods. For further information, consult Professor Victor Nee, 330 Uris Hall.

Introductory Courses

[SOC 115 Utopia in Theory and Practice] 3 credits. Not offered 1997–98. D. Strang. This course examines imaginings of the "ideal society" and how to realize them. We discuss the classic literary utopias, from Plato's Republic to Moore's Utopia to Bellamy's Looking Backward, and also the dystopias of Huxley and Orwell. We also examine social experiments like the nineteenth-century American intentional communities, various socialisms, and the design of contemporary political constitutions. Throughout, the emphasis is on two sociological questions. What leads people to conceive of particular social arrangements as ideal? How can we tell social structures that can work from those that cannot?

[SOC 150 Introduction to American Religion (also RELST 150)] Fall. 3 credits. MW 11:15–12:05 plus section. P. Becker. This course will introduce students to the sociological study of religion. Our main focus will be on how religion shapes social identity and influences public debate in our society. We will examine how religion serves as a marker for social status and contributes to the construction of gender and ethnic identities. We will explore how religion serves as a basis for moral critique and political mobilization by looking at local and national religiously based social movements. Our readings will provide a basis for our discussion of these themes, and will reflect the diversity of religious life in the contemporary United States.

General Education Courses

[SOC 203 Gender, Work, and Family (also ECON 103)] 3 credits. Not offered 1997–98. The line that divides men and women is one of the deepest and most firmly entrenched in societies. Many people believe that gender differences are natural and thus unchangeable, but most sociologists argue these differences are created and maintained by culture and social relationships. In this course, we will explore the social construction and maintenance of gender differences and inequalities, focusing particularly on the areas of work and family. Students of all levels (and genders) are welcome.

[SOC 204 Race and Ethnic Relations] Fall. 4 credits. Prerequisite SOC 101, SOC 103, or R SOC 101. H. A. Walker. This course focuses on race and ethnic relations in contemporary perspective. It examines the social and behavioral implications of attributions of race and ethnicity in small group interaction, the world of work, and the larger society. Topics: inequalities in income and employment, affirmative action, ethnic political mobilization, patterns of marriage and family formation.

[SOC 210 Group Solidarity] Spring. 4 credits. M. Macy. What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How do the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We will explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights movement, protest activities, athletic teams, work groups, and college fraternities.

[SOC 215 Organizations: An Introduction] Fall. 3 credits. S. Han. This is an introductory course in the study of organizations. We will start by taking a look at various examples of organizing, including a street gang in a Boston neighborhood, General von Moltke's army, a government agency, and an industrial corporation. These brief glimpses serve as exercises in looking behind and beyond diverse rhetoric for common patterns in organizational phenomena. We will consider these both from the inside and outside perspectives. The focus of the course is upon research scholarship, not the training of managers. Nonetheless, the analytical skills you will acquire are applicable to work in firms, government agencies, and nonprofit organizations.

[SOC 227 Embedded Markets] Spring. 3 credits. S. Han. This is a course designed for a wide range of students who are generally interested in organization perspectives on markets and businesses. The primary focus of the course is on cases of organizing. In particular, we will look at the ways in which economic actions are played out in social settings. Call that "embedded markets." For example, what are the differences, if any, between the shops in the Pyramid Mall and the Commons? What kind of books do you find in small boutique bookstores vs. supermarkett bookstands, or huge chains like Barnes and Noble or Borders? Basic conceptual frameworks will be provided, yet the course will extensively use, and ask you to come up with, contemporary and local problems to illustrate the core issues.

[SOC 220 Culture and Conflict in Organizations] Spring. 3 credits. P. Becker. How do the organizations we belong to shape us? What is organizational identity and how does it come about? How do cultural beliefs shape organizations? What kinds of organizations strike us as legitimate and effective, and why? Organizations may be goal-directed problem-solvers, but they also locate functions for storing and transmitting social facts, like the hierarchical relations among groups, and powerful ideas, including moral codes. Organizations may seem to evolve naturally, but are often shaped by internal conflicts or powerful outsiders. The first part of this course will examine theories of organizational culture and power; the second part will consist of case studies or organizations, businesses, religious denominations, little league teams, and social movement organizations.

[SOC 222 Social Policy and Organization in Health, Education, and Welfare] Fall. 3 credits. Not offered 1997–98. D. Strang. Introduces the development of three central kinds of social policy: those concerned with delivering medical care, schooling the young, and providing resources for the economically vulnerable. The course treats the historical development of large-scale public programs, regulatory systems, or movements to formulate action; political struggles over social
rights and the allocation of resources; and the organizations that are constructed to carry out the policies. The focus is on American policy, but with considerable comparative attention to the health, education, and welfare programs of other nations.

**[SOC 230 Knowledge and Power]**
Spring. 3 credits. Not offered 1997–98. D. Sark

Modernity will be studied in this course by examining dual aspects of the rationalization of power 1) as attempts to bring ever-larger spheres of social action under rationalized control, and 2) as the production of rationalized justifications by which power is represented and legitimated. These processes will be examined in three historical settings: Frederick Winslow Taylor's schemes of "scientific management" at the turn of the century in the United States; the Leninist project of "scientific socialism" in Eastern Europe; and the International Monetary Fund's current project of "scientific capitalism" in contemporary post-socialist societies. Our century begins and ends with blueprints for making capitalism by design—but whereas Taylor's project was attempted in the microsphere at the level of the firm, current recipes attempt to shape entire national economies by making capitalism according to a plan.

**[SOC 235 Paradoxes of Cooperation and Collective Action]**

All theories of rational behavior predict that individuals will not voluntarily contribute to collective goods when they can receive the benefit without doing so; individuals will be freeloaders unless they are somehow forced to contribute. Yet many examples of successful and seemingly voluntary collective action abound in natural settings. The same theories of rational behavior also portray such collective action as being likely only when issues of self-image, identity, and commitment, yet most of us know how important these things are in our own behavior. How can we reconcile the theory with evidence? We will focus on the paradoxes of cooperation and self-interest, rationality and commitment, self-image and self-enhancement.

**[SOC 245 Social Inequality]**

Why do some people have a great deal of money and influence while others have barely enough to eat? Some degree of inequality among individuals exists in all modern industrial societies, inequality that is related to class, race, gender, and other social characteristics. This course focuses on the social systems that generate this inequality. We will learn how to analyze and interpret the processes that generate social stratification, drawing on alternative theoretical viewpoints to aid in our understanding. Specific topics include class consciousness, class hierarchies, social mobility, income and poverty. Course structure will be a mixture of lectures and class discussion. Homework includes hands-on data analysis using computers. No prerequisites or experience necessary.

**[SOC 250 Religion and Public Life (also RELST 249)]**
3 credits. Not offered 1997–98. P. Becker

This course explores how religion provides a basis for moral critique, political mobilization, and social identity in a modern society. The first part introduces basic issues—definitions of religion, the sociological approach to the study of religion, religion and modernity. In the main body of the course, we will read studies of specific religious groups and organizations in the contemporary United States—examining such questions as: "How does religion provide a basis for gender identity and gender norms?" "What do religious groups and discourses contribute to public debate on issues ranging from economic justice to abortion?" "How do religious leaders mobilize citizens for social action in their communities?"

**[SOC 265 Latinos in the U.S. (also LSP 265)]**
Spring. 3 credits (4-credit option available). H. Velez

Exploration and analysis of the Hispanic experience in the United States. An examination of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

**[SOC 275 Women at Work (also Women's Studies 275)]**
3 credits. Not offered 1997–98. E. Bell

Women have always contributed their labor to production and reproduction. With industrial development and the movement of market production out of the home and into the public sphere, however, women's work was relegated to the private sphere of the family. Recently this has changed as women seek employment outside the home. We will examine women's position and the role women play in the labor force, looking at data from both developed and developing societies. Specific topics will include sex differences in pay and sex segregation in the labor force, theoretical explanations from rational choice to Marxist feminism, the relationship between women's paid and unpaid labor and the role of the state and government policy.

**[SOC 283 Groups and Relationships]**
3 credits. Not offered 1997–98. S. Kanazawa

We will tackle the mysteries of human behavior and pursue a single question throughout this course: Why do human beings behave the way they do? We will first discuss several celebrated examples of seemingly unusual and bizarre behavior and then try to explain these with the help of selected social psychological theories: behaviorism, attribution theory, exchange theory and game theory. The emphasis will be on the application of the theories to explain empirical examples of human behavior.

**[SOC 290 Social Psychology of Interpersonal Relations]**
Fall. 3 credits. H. A. Walker

The focus of this course is on the relationship between the individual and the social group. It will examine the way in which the individual shapes "society," and in turn, how society influences behavior. Topics include formation of self, influence and conformity, and the emergence of racial and gender differences in status and power.

**Methods and Statistics Courses**

**[SOC 301 Evaluating Statistical Evidence]**
Fall. 3 credits. R. L. Breiger

A first course in statistical evidence in the social sciences, with emphasis on statistical inference and multiple regression models. Theory is supplemented with numerous applications.

**[SOC 303 Design and Measurement]**
4 credits. Prerequisite: a course in sociology. Not offered 1997–98. D. P. Hayes

Foundations of sociological analysis, issues arising from using humans as data sources; the quality of our primary data; methods of its collection, research design, and its limitations; pragmatic considerations in doing research on humans, organizations, communities, and nations.

**Intermediate Courses**

**[SOC 310 War & Peace]**

Every human group, community, or society presents many examples of altruism, helping, cooperation, agreement, and social harmony. Each grouping or society also manifests numerous examples of competition, rivalry, opposition, disagreement, conflict, and violence. Both conflict and cooperation are permanent and common aspects of the human condition. Collective conflicts, especially wars and revolutions, are frequent and dramatic events. But "peace" and "war" are equally active social processes, not passive happenings. This course describes various commonly accepted but erroneous notions of the causes and consequences of war and deterrence. It deals with the major theories concerning the sources of war in international and intranational social systems. The last half of the course analyzes the modes, techniques, and outcomes of efforts to restrict, regulate, and resolve international conflicts.

**[SOC 313 Social Networks and Social Structure (also SO 513)]**
4 credits. Not offered 1997–98. R. L. Breiger

A critical survey of theories and techniques of structural analysis in sociology, centering on the usefulness of social network analysis in providing integration of studies at different levels of generality. Applications in the areas of the sociology of organizations, community studies, social stratification, and dependence relations among nations. Emphasis on the mutual relevance of theories and operational research procedures.

**[SOC 315 Business Organization for the 1990s]**
4 credits. Not offered 1997–98. D. Strang

In the last two decades, American business organizations have undergone a revolution in form and process. Corporate downsizing has changed the face of American management, and altered white-collar career paths. Large bureaucratic organizations are giving way to smaller firms that develop complex relations with each other rather than building from within. Japanese organizational styles and organizational reform strategies like Total Quality Management have become the buzzwords of the 1980s and 1990s. This course discusses the new forms of business.
organization (and their manifestation in other domains, such as education and healthcare) that mark a crucial shift in the world of work and the way it shapes people’s lives.]  

**SOC 326 Social Policy (also SOC 526)**  
Fall. 4 credits. S. B. Caldwell.  
The dramatic growth of the policy research sector as an institutional and intellectual force signals a changing relationship of social science to social policy in the United States. With an eye on that relationship, this course examines the development of social policy in selected areas, among them welfare, poverty, housing, crime, and health. The policy research sector itself—people, values, and institutions—is also surveyed.  

**[SOC 340 Health, Behavior, and Health Policy]**  
This course examines the social contexts of physical and mental health, illness and medical care; its purpose is to explore the contributions of social science to health promotion and health policy. Topic areas include: social context of health, disease and illness, role of medical services; use of health services; effectiveness of health service use; health promotion and disease prevention; and national health care policies.]  

**SOC 345 Gender Inequality**  
Gender inequality in contemporary perspective; emphasis on social origins of gender categories and implications of gender status for collective and individual behavior. Topics include inequalities in interpersonal relations, the family and work organizations, and implications of gender inequality for family violence, sexual harassment, and rape.]  

**SOC 350 Comparative Revolutions**  
Not offered 1997–98.  
For description, see GOVT 350.  

**SOC 354 Law and the Social Order (also JUR 354)**  
Fall. 4 credits. B. Breifner.  
In what ways, if any, do laws and legal institutions make a difference to people who have disputes? How did lawyering come to be a modern profession? How do business organizations deal with legal ambiguity in constructing symbols of compliance with laws? How do networks of interpretive communities structure the authority of law? By exploring selected topics such as these, we seek to understand the distinctive contributions of sociology to the study of law and the social order.  

**SOC 358 Modes of Institutional Analysis (also SOC 558)**  
Much social theory treats individual behavior as occurring within and shaped by “institutions.” For example, discussions of American health care policy emphasize not only the preferences of physicians, businesses, and consumers, but also the institutional structure of American government that provides multiple veto points and makes broad cross-class coalitions difficult to build. This course will examine the main types of institutional analysis active in contemporary social science, including sociological accounts of institutions as cultural frameworks and accounts of institutions as decision-making systems, and economic accounts of institutions as decision-making systems, and economic accounts of institutions as choice-theoretic equilibria. These approaches will be examined via the discussion of classic problems such as the bases of collective action, the construction of the rationalized actor, the diffusion of new models of appropriate behavior, and the explanation of cross-societal differences in national policies.]  

**SOC 370 Careers**  
By examining various career paths, we will consider the implications of career as a continuous process or as a sequence of periodizations. We will explore differences and similarities among different career paths and lay out the patterns and structures of the career formation from a sociological point of view. We will also discuss the settings in which the career development takes place, giving some comparative attention to the ways of organizing careers in other societies.]  

**SOC 380 Gender, Ideology, and Culture**  
This course will explore representations of women in popular culture, including images, narratives, and religious practices. We will examine the relationship between popular culture and ideology, and look at how women “read” popular culture. The aim of the course is to enable students to think critically and analyze the effects of ideological representations of difference on personal identity construction, family, and personal relationships. Readings are drawn mostly from sociology of culture and cultural studies; most texts deal with popular culture and gender in the 19th- and 20th-century United States.]  

**Advanced Courses**  
The following courses are intended for advanced undergraduates with substantial preparation as well as for graduate students in sociology and related disciplines. The normal prerequisite for all 400-level courses is one introductory course plus 301 (or an equivalent statistics course). Students who are not sure whether their background is sufficient for a particular course should consult the professor in charge.  

**SOC 408 Qualitative Methods (also SOC 508)**  
Spring. 4 credits. P. Becker.  
This course will cover a range of qualitative methods, from fieldwork to cultural/interpretive methods. The course is designed to give students an introduction to a range of methods and techniques. Students will be required to engage in an ongoing research project on which they will report periodically throughout the course of the semester, in class discussions and in short papers that concentrate on solving concrete research problems.]  

**SOC 410 Comparative Societal Analysis (also SOC 510)**  
This course examines contending analytic strategies for comparing institutions (and institutional configurations) across societies and social systems. How, for example, does the institutions of the socialist economy contribute to our understanding of the specificity of modern capitalism? Special emphasis will be given to comparing transitions from state socialism (in Eastern Europe and elsewhere) with transitions from authoritarianism in Latin American and Southern Europe.]  

**SOC 429 Culture and Agency (also SOC 529)**  
This course will look at the development of sociological theory on questions of culture and agency. Starting with various reflection or materialist approaches to culture that decenter agency, we will then follow the development of theories that explicitly link culture to actors and events in an attempt to account for both social reproduction and social change. The readings will cover a broad time span and a variety of intellectual approaches, including critical theory and cultural studies, but will center on the sociology of culture.]  

**SOC 434 The Sociology of Reproduction (also Women's Studies 435)**  
4 credits. Not offered 1997–98. Women's biological potential to bear children and their childbearing experiences are socially constructed. The social context of women's reproductive capacity is one area in which women themselves are socially defined, and therefore within this realm exists the potential to control women through the control of reproduction and childbirth. We will examine the social construction and control of reproduction using both empirical findings and theoretical arguments. Specific topics include: historical trends in fertility; the medicalization and medical control of conception and childbirth; biological versus social definitions of women as mothers; the role of state policy, and theoretical explanations of reproduction and gender stratification.]  

**SOC 438 Immigration and Ethnic Identity**  
Spring. 4 credits. V. G. Nee.  
Immigration has been a central process in the peopling of American society. The early immigration to the United States involved primarily the migration and settlement of European national groups. Since 1965, the mix of immigration has shifted to include increasing diversity of ethnic groups, especially from Latin America and Asia. As American society moves into a era of increasing ethnic diversity, the issue of ethnic boundaries and identity become increasingly complex and problematic. This course seeks to examine the causes of international migration, the dynamics of immigrant incorporation into American society, and the making of new ethnic groups and identities.]  

**SOC 439 Philosophy of Social Sciences (also SOC 539)**  
In this course, we will discuss issues related to science. We will first survey different approaches to science (positivism, realism, conventionalism, instrumentalism, pragmatism, and relativism), and then discuss questions such as: What is the purpose of science? What is the difference between science and engineering? Are there any differences between natural sciences and social sciences? What is theory? How do we evaluate theory? What is the relationship between theory and experiment? Does the difference between the social sciences and natural sciences make a difference? How can we construct true theories from unrealistic assumptions? What is the difference between methodological individualism and methodological holism? What is the future of general theories in social sciences? Can one theory explain all human behavior at all times? Can social sciences ever be as good as natural sciences? This course will be ideal for graduate students in all fields of natural
and social sciences, and advanced undergraduate students who plan to go on to graduate school in natural or social sciences.

**SOC 444 Contemporary Research in Social Stratification**  
Spring. 4 credits. R. L. Breiger.  
Stratification and mobility as paired concepts, requiring mutual articulation. The interplay of structure (occupational groups, labor markets, organizational demographics, social classes) and process (tracking, career trajectories, socioeconomic attainment). Recently formulated log-linear models of mobility and structure provide a central focus of the course.

**SOC 480 Simulating Social Dilemmas (also SOC 580)**  
Fall. 4 credits. M. Macy.  
This course introduces students to the use of computer simulation to study emergent properties of nonlinear systems. The course will focus on applications involving problems of cooperation among interdependent agents trapped in a social dilemma. Readings will consist of articles based on theoretical research using computer simulation of social dilemmas. Students will learn how to write a computer simulation program, and then use these skills to replicate one or more published studies in the social dilemma literature. Assignments will include source-code exercises during the first few weeks, and a final seminar-length paper reporting results of the student's experiments. Previous programming experience would be helpful but is not expected or required.

**SOC 491 Independent Study**  
Fall or spring. 1–4 credits. For undergraduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure agreement of a faculty member to serve as supervisor for the project throughout the term. Graduate students should enroll in 891–892.

**SOC 495 Honors Research**  
Fall or spring. 4 credits. Limited to sociology majors in their senior year. Prerequisite: permission of instructor.

**SOC 496 Honors Thesis: Senior Year**  
Fall or spring. 4 credits. Prerequisite: Sociology 495.

**SOC 497 Social Relations Seminar (also Anthropology 495)**  
Spring. 4 credits. Limited to seniors majoring in social relations.

**Graduate Core Courses**

These courses are primarily for graduate students in sociology but may be taken by other graduate students with permission of the instructor. Graduate students in sociology will normally take each of the five courses listed below, but with the concurrence of the instructor special committees other arrangements may be made.

**SOC 501 Basic Problems in Sociology I**  
Fall. 4 credits. V. Nee.  
Analysis of theory shaping current sociological research. Examination of several central problems in sociological inquiry provides an occasion for understanding tensions and continuities between classical and contemporaneous approaches, for indicating the prospects for unifying microsociological and macrosociological orientations, and for developing a critical appreciation of efforts to integrate theory and research.

**SOC 502 Basic Problems in Sociology II**  
Spring. 4 credits. Continuation of Sociology 501. Emphasis is on the logical analysis of theoretical perspectives, theories, and theoretical research programs shaping current sociological research. The course includes an introduction to basic concepts used in the logical analysis of theories and examines their application to specific theories and theoretical research programs. Strategies include functionalism, social exchange, and interactionism.

**SOC 505 Research Methods I: Logic of Social Inference**  
Fall. 4 credits. Prerequisite: a first course in statistics and probability. S. B. Caldwell. This course is an introduction to techniques of social inference. We will cover research methods, sources of evidence, model design, and questions of empirical validity.

**SOC 506 Research Methods in Sociology II**  
Spring. 4 credits. Prerequisite: Sociology 505 or equivalent. V. Nee.  
A survey of methods for analyzing sociological data, including measurement error models, confirmatory factor analysis, panel models, and general structural equation methods. Readings from the sociological research literature will illustrate various methods. Periodic assignments on micro and mainframe computers will integrate theory, method, and data.

**SOC 507 Research Methods in Sociology III**  
Fall. 4 credits. Prerequisite: Sociology 506. D. Strang.  
 Models and methods for the quantitative and formal analysis of social dynamics. The course focuses on event history analysis in the case of discrete outcomes and pooled cross-sectional and time-series analysis in the case of continuous outcomes.

**Graduate Seminars**

These seminars are primarily for graduate students but may be taken by qualified advanced undergraduates who have permission of the instructor. Which seminars are to be offered any term is determined in part by the interests of the students, but it is unlikely that any seminar will be offered more frequently than every other year. The list below indicates seminars that are likely to be offered, but others may be added and some may be deleted. Students should check with the department before each term.

**SOC 508 Qualitative Methods (also SOC 408)**  
Spring. 4 credits. P. Becker.  
This introductory graduate course will cover a range of qualitative methods, from fieldwork to cultural/interpretive methods. The course is designed to give students an introduction to a range of methods and techniques. Students will be required to engage in an ongoing research project that will report periodically throughout the course of the semester, in class discussions and in short papers that concentrate on solving concrete research problems.

**SOC 510 Comparative Societal Analysis (also SOC 410)**  
For description, see SOC 410.

**SOC 513 Social Networks and Social Structure (also SOC 313)**  

**SOC 524 Rational Choice Theory**  
Rational choice perspective has gained popularity in all social sciences. The main focus in this course will be sociological rational choice, although we will discuss the work of economists, political scientists, psychologists, and others where relevant. We will first discuss the foundations of rational choice as a macro-sociological perspective, and emphasize the deductive derivation of various rational choice theories from this perspective. We will discuss the pioneering work of Coleman Hechter and Willer as well as the more recent work by Heckathorn, Macy, Jasso, and others. We may have some guest speakers to talk about their current research.

**SOC 526 Social Policy (also SOC 326)**  
Spring. 4 credits. S. B. Caldwell.

**SOC 529 Culture and Agency (also SOC 429)**  
For description, see SOC 429.

**SOC 530 Social Organization of Economic Action**  
The issue of organizational boundary has been a central concern for both organizational sociology and economic sociology. The seminar approaches the issue, although it covers many other relevant literatures, mainly by playing two lines of argument against each other: transaction cost economics and transfer pricing problem. Meta-analytic techniques are also introduced, which are to be used for the final team project reviewing the empirical research on vertical integration.

**SOC 539 Philosophy of Social Sciences (also SOC 439)**  
For course description, see SOC 439.

**SOC 551 Modes of Institutional Analysis (also SOC 351)**  

**SOC 558 Modes of Institutional Analysis (also SOC 480)**  
Fall. 4 credits. M. Macy.

**SOC 560 Simulating Social Dilemmas (also SOC 480)**  
Fall and spring. 4–8 credits.  
These graduate seminars will be offered irregularly. Topics, credit, and instructors will vary from semester to semester. Students should look at the sociology department bulletin board at the beginning of each semester for possible offerings.

**SOC 606-607 Sociology Colloquium**  
Fall and spring. No credit. Required of all sociology graduate students.  
A series of talks representative of current research interests in sociology, given by distinguished visitors and faculty members.
Voluntary Work: Discussions on the current state of sociology and on the research interests of the members of the field, given by members of the field.

THEATRE, FILM & DANCE

Through its courses and production laboratories, the department provides students with a wide range of opportunities in theatre, film, and dance. It offers a theatre arts major with concentration in theatre or film and a major in dance. These majors educate students in accordance with the general liberal arts ethic of the college. The programs in dance and film and the advanced undergraduate theatre program give some measure of professional preparation in those arts as well. The department encourages academic and studio participation by students from all disciplines and also provides the Cornell community with an opportunity to take part in its productions on an extracurricular basis.

Theatre Arts Major
Theatre Concentration
The theatre concentration offers studies in the history of theatre, dramatic theory and criticism, playwriting, acting, directing, design/technology, and stage management. Students interested in the Theatre Arts major should consult with Alison Van Dyke (Director of Undergraduate Studies, Theatre, Film & Dance).

Course requirements for the concentration:

1) THETR 240 and THETR 241 (two-semester introduction to theatre) 8
THETR 250 Introduction to Theatre Design and Technology 4
THETR 280 Introduction to Acting 3

2) Four laboratory courses distributed as follows:

THETR 151 Production Lab I 1-3
THETR 153, THETR 253, or
THETR 353 Stage Management
Lab I, II, or III 1-3
THETR 155 Rehearsal and Performance or
THETR 151 in a different area 1-3
THETR 251 or THETR 351
Production Lab II or III 1-4

3) Four courses in the area of Theatre Studies (see Theatre Studies section of theatre courses) chosen in the following manner:
one course must be at 300 level one course must be at 400 level two additional courses at the 300 or above level one of the four courses must be pre-twentieth century.

4) Three courses (at least 9 credits) in other Theatre courses chosen in consultation with the faculty advisor. Course taken to qualify for admission to the Advanced Undergraduate Theatre Program (described below) may also be used to fulfill this requirement.

5) Courses in which a student receives a grade below "C" cannot be used to fulfill the requirements for a Theatre Arts major.

The Advanced Undergraduate Theatre Program
The department offers advanced study in directing, playwriting, design/technology and stage management to students who qualify on the basis of outstanding achievement in course work. Admission to the AUTP is by invitation of the area faculty supervisor and the completion of a recommended "track" of courses or equivalent experience. (For recommended course of study please see listing of courses at end of departmental listings.) Approval process will include a portfolio review and/or interview. The program provides students with intensive study in theatre as well as the opportunity to collaborate with professional faculty and guest artists.

Film
The study of film began in this department in the 1930s and continues to be based here. In the interim years, however, it has also spread into a significant number of other departments in the college: Africana studies, anthropology, Asian studies, comparative literature, English, German studies, history, psychology, and romance studies. This proliferation of courses has been accompanied by a comparable proliferation of perspectives and faculty concerns, e.g., the relationship of national cinemas to national literatures and specific cultures, film's relationships to myth and ideology, the use of film as historical evidence, film's efficacy as a rhetorical medium, and film's contribution to perennial issues in aesthetics, the history of the arts, and studies in cognition. In addition, courses in film production and the history and theory of film as an art are centered in this department. This richness of courses and perspectives is matched by the ways in which students may make film the focus of their undergraduate studies. The four ways currently being used are as follows: 1) concentrating on film within the Department of Theatre, Film & Dance; 2) constructing an individually tailored Independent Major in film (including the possibility of placing film in tandem with another medium or discipline); 3) focusing on film as a College Scholar; and 4) concentrating in Visual Studies. Students interested in option 4 should consult Marilyn Rivchin (Theatre, Film & Dance). Students interested in options 2 or 3 should consult Don Fredericksen (Theatre, Film & Dance) and Lynne Abel (director, College Scholar and Independent Major programs). Students interested in the first option should consult Don Fredericksen (Director, Film Studies, Theatre, Film & Dance).
The department offers advanced study in film analysis, filmmaking and screenwriting. Acceptance to the AUPF and admission to the advanced film production course (THETR 493) will be determined by a committee of film faculty in December of each year, based on applications from students who have a proposal (script or treatment) for a film or video project. Up to four of these students will also be selected to receive the Melville Shavelson Award to help fund their advanced film projects.

**Film Study Abroad**
The College of Arts and Sciences, through this department and in consort with a number of other colleges and universities, offers up to a full year of study at the Inter-University Center for Film and Critical Studies in Paris, France. The center's program is theoretical, critical, and historical. It is most useful to students pursuing a major in film studies and serves as an intensive supplement to their Cornell film courses. Fluency in French is required, and Theatre Arts 274 and 375 are prerequisites. Inquiries should be addressed to Professor Fredericksen, Cornell's liaison with the center.

**The Dance Program**
The dance program offers courses in dance technique, improvisation, composition, performance, anatomical analysis of movement, and the history, theory, and criticism of dance. Technique courses include modern dance at four levels and ballet at three levels. Other dance forms, such as historical dances, Japanese Noh, Indian and Javanese, dance are offered on a rotating basis. Courses in African, jazz and ballet dance, taken through the Physical Education program, supplement these offerings. Technique classes develop strength, flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with clarity of rhythm, body design, and expression. The more advanced courses require the ability to perform complex phrases in various styles. Students may earn up to eight academic credits (one each semester) in technique classes. Students may also satisfy the physical education requirement by taking dance technique classes in the dance program. The schedule for all dance technique classes is available in the main office of the Center for Theatre Arts. Students planning technique for academic credit must also register through their own colleges.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance classes is by audition. Students may receive one academic credit (S-U grades only) when performing in student-faculty concerts by registering for THETR 155.

**The Dance Major**
To be admitted to the major, students must have completed two technique courses in modern dance or ballet at level II or above, Theatre Arts 233 or 305 (Explorations in Movement and Performance) and Theatre Arts 210 (Beginning Dance Composition and Music Resources). It is also recommended that Theatre Arts 201 (Dance Improvisation), Theatre Arts 250 (Fundamentals of Theatre Design and Technology) and Music 105 (Introduction to Music Theory) be taken before the junior year. The following requirements are expected of the major.

**Prerequisites for the Major:**

**THETR 210** Beginning Dance Composition and Music Resources

THETR 233 or 305 Explorations in Movement and Performance

Two technique courses in modern dance or ballet at level II or above

**Requirements for the Major:**

**Music 105** Introduction to Music Theory (or substitute at the appropriate level)

**Theatre 201** Dance Improvisation

**Theatre 250** Fundamentals of Design and Technology

**Credits**
Students will be expected to perform in at least two concerts and to present at least two of their own dances, in addition to the senior project.

Department Courses:
See individual sections for: Freshman Writing Seminars, General Survey Courses; Theatre Studies; Acting; Directing; Playwriting; Design; Technology; Stage Management; Independent Study, Internships and Honors; Film; Dance.

Freshman Writing Seminars

**THTHR 115 Staging Shakespeare**  
Fall and spring. 3 credits. M. Gay. Considering various stage and screen productions of Shakespeare's plays, from Elizabethan English to the present, this seminar will examine the ways in which staging choices-acting, setting, costumes, text-fundamentally affect a play's meaning. Students will learn to critically interpret productions, analyze texts, and also participate in acting workshops. Occasional screenings. No previous acting experience is required.

**THTHR 125 Deviance**  
Fall and spring. 3 credits. R. Saunders. This class will explore the interplay among the performance of the abnormal, its audience, and society. Creative and analytical exercises will explore the social politics and functions of deviance, both conscious and involuntary. Representative texts will include the play Ubu Roi and the film Trainspotting.

**THTHR 165 Theatre Behind Bars**  
Fall and spring. 3 credits. M. Mitchell. The United States has the highest per capita incarceration rate. This course will discuss the ethical, cultural and political aspects of imprisonment today through the lens of theatre by and about the imprisoned. A direct link with prisoners studying theatre will be maintained; recent inmates may be guest speakers.

**THTHR 178 Desire (also English 178)**  
Fall. 3 credits. E. Hanson. For description, see English 178 in the Fall Freshman Writing Seminar listings, available in August for the fall term.

**THTHR 185 Secret Stages: The Theatre of Living Dangerously (also English 185)**  
Fall. 3 credits. C. Burroughs. For description, see English 185 in the Fall Freshman Writing Seminar listings, available in August for the fall term.

**THTHR 190 When a Girly Girl Meets a Manly Man: Gender & Tales of Love**  
Fall and spring. 3 credits. T. Rhys. Romantic love remains one of the most persistent themes of popular entertainment. By examining selected plays and films that depict men and women in the search for love, we will explore questions of gender construction in popular culture.

**General Survey Courses**

**THTHR 230 Creating Theatre**  
Spring. 3 credits. Limited to 25 students. K. Goetz and faculty. An introduction to theatrical production for the non-major. Students will develop a new critical perspective of the performing arts by examining the creation of theatre onstage and backstage through lectures, demonstrations, discussions with various faculty and staff at the Center for Theatre Arts, and by attending department productions. Some writing is required.

**THTHR 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also English 301)**  
4 credits. Limited to 40 students. Not offered 1997–98. For description, see English 301.

**THTHR 430 Introduction to Theatre Management**  
Fall. 4 credits. Limited to 15 students. J. E. Gainor. This class is designed to introduce students to the profession of theatre management. The class will be a project-oriented study of components of the field, such as marketing, fundraising, contracts, organizational structures, personnel management, accounting, and box office.

**Theatre Studies Courses**

**THTHR 220 The Comic Theater (also Comparative Literature 223 and Classics 223)**  
Summer. 3 credits. Next offered summer 1998 and spring 1999. J. Rusten. For description, see Classics 223.

**THTHR 240 Introduction to World Theatre I #**  
Fall. 4 credits. R. Schneider. A survey of the roots of theatrical representation around the world from ritual practice to classical Greek and Roman theatre as well as Indian, Chinese, Japanese, African, and European theatre. A charting of modern and postmodern theories of performance and the roles of theatre in society. It may also examine Western style theatre in other settings.

**THTHR 241 Introduction to World Theatre II #**  
Spring. 4 credits. R. Schneider. A survey of the major developments and innovations in world theatre since 1900, engaging with the evolution of naturalism, the birth of the director as well as the emergence of the avant-garde in the West and its supposed demise today. This course will examine the impact of colonialism on theatre practices around the world.

**THTHR 325 Classic Plays of the American Theatre (also English 323 and American Studies 325)**  
Summer. 3 credits. J. E. Gainor.

This class will examine major plays from the 20th century in America, and discuss how they intersect with issues in American culture and American history. We will read, and see film versions of, plays by Eugene O'Neill, Tennessee Williams, Arthur Miller, Lillian Hellman, David Mamet, August Wilson, and Sam Shepard, among others.

**THTHR 322 Russian Drama and Theatre (also Russian Literature 332)**  

**THTHR 333 European Drama 1660-1900: Moliere to Ibsen (also English 335 and Comparative Literature 336)**  
Spring. 4 credits. R. Parker. For description, see English 335.

**THTHR 335 The Modern and Contemporary Theatre (also Comparative Literature 337)**  
4 credits. Prerequisites: THTHR 240 or permission of instructor. Not offered 1997–98. Faculty.

A study of the drama and its cultural contexts from the late nineteenth century to the present. This course will raise questions about modern as well as postmodern theories of performance and the role of theatre in society. It may also examine Western style theatre in non-Western settings.

**THTHR 336 American Drama and Theatre (also English 336)**  
Spring. 4 credits. Limited to 25 students. Prerequisite: permission of instructor. J. E. Gainor. A survey of American theatre from 1900–1960. Emphasis will be placed on the relationship between theatre, culture, and history.

**THTHR 337 Contemporary American Theatre (also English 337)**  

A survey of American drama and theatre post-1960. Particular emphasis will be placed on plays by women and dramatists of color to explore questions of identity and theatrical responses to contemporary American culture.

**THTHR 339 Theories and Techniques of 20th Century Western Theatre**  
Fall. 4 credits. Prerequisite: permission of instructor. R. Schneider.

A look at Western performance across the 20th century emphasizing theatre theory and directing technique rather than drama. Beginning with symbolism, naturalism and the avant-garde we’ll move on to explore Meyerhold, dada, Brecht, Artaud, Happenings and performance art, Boal, theatre images, feminist theatre, multicultural theatre, theatre of AIDS, and other theatre issues and innovations. Students will engage in performance projects.

**THTHR 345 The Tragic Theater (also Classics 345 and Comp. Literature 344)**  
Spring. 4 credits. Limited to 40 students. Prerequisite: permission of instructor. See Classics 345 for description.

**THTHR 372 English Drama to 1700 (also English 372) #**  
Fall. 4 credits. S. McMillin.

For description, see English 372.

---

**THTHR 410 Advanced Dance Composition**  
4 credits.

**THTHR 430 Advanced Dance Composition**  
4 credits.

**THTHR 481 Seminar in History of Dance (or other 400-level academic dance course)**  
4 credits.

**THTHR 491 Senior Project**  
4 credits.
[THETR 373 English Drama from 1700 to the Present (also English 373)] 4 credits. Not offered 1997–98. S. McMillin. See English 373 for description.

[THETR 425 Introduction to Dramaturgy and Dramatic Criticism] 4 credits. Prerequisite: THETR 240 & 241, or their equivalents. Limited to 15 students. Not offered 1997–98. J. E. Gainor. What is dramaturgy? What does a dramaturg do? We will examine this position in the theatre in both historical and practical modes. The class will be primarily a practicum, involving dramaturgical work on departmental productions, participation with student playwrights on new script development, and practice in the writing of dramatic criticism.

[THETR 431 Theory of the Theatre and Drama (also Comparative Literature 433)] 4 credits. Prerequisite: some theatre history and dramatic literature work at the 300 level or permission of instructor. Not offered 1997–98. A survey of dramatic theory and theories of theatrical representation from Aristotle to the present.

[THETR 435 Special Topics: Theories of Contemporary Performance (also Comparative Literature 436)] 4 credits. Limited to 15 students. Prerequisite: permission of instructor. Not offered 1997–98. Faculty.

[THETR 436 The Female Dramatic Tradition (also Women's Studies 433)] 4 credits. Not offered 1997–98. J. E. Gainor. Is there a "female dramaturgy"? What is the female tradition in the theatre? The course will explore these questions through an investigation of texts by women dramatists, including Hrotsvitha, Aphra Behn, and Caryl Churchill, as well as theory by such critics as Sue Ellen Case and Jill Dolan.

[THETR 438 East and West German Drama (also German Studies 438 and Theatre 640)] 4 credits. Not offered 1997–98. D. Bathrick. Major historical and textual developments in German theatre from the end of World War II to the present. Leading dramatists from West and East Germany, Switzerland, and Austria (Brecht, Frisch, Durrenmatt, Weiss, Hochhuth, Muller, Brain, Kroetz, Handke, and others) will be treated in the light of the political events and aesthetic-dramaturgical traditions from which they emerge and with which they are taking issue.

[THETR 445 Text Analysis for Production: How to Get from the Text onto the Stage] Fall. 4 credits. Prerequisite: THETR 240 or THETR 281 or THETR 250 or THETR 398, and permission of instructor. Limited to 15 students. B. Levitt. This course examines the play as the central, essential source for production decisions made by the actor, the director, the designer and the dramaturg. Students "present" their conclusions about the performance of studied texts through project work as either an actor, director, designer or dramaturg, as well as through two to three papers.

[THETR 454 American Musical Theatre (also English 454)] Spring. 4 credits. S. McMillin. See English 454 for description.

[THETR 471 Japanese Theatre (also Asian Studies 471)] Fall. 4 credits. K. Brazell. For description, see Asian Studies 471.

[THETR 600 Seminar: Seminar in Dramaturgy] Spring. 4 credits. Limited to Theatre Arts graduate students. J. E. Gainor. An introduction to the theory and methods involved in the study of the theatre. Attention will focus on pedagogy and the profession in Part I. Part II will explore current scholarly trends.

[THETR 637 Seminar in Dramatic Theory (also Comparative Literature 638)] Spring. 4 credits. Prerequisite: Permission of instructor. R. Schneider. Topic for 1998: Theatre and Postmodernity: Appropriation, Adaptation, and Simulation. Exploration of the craft of postmodern theatre artists who appropriate and replay "classic" drama or art against itself. This is sometimes called adaptation, sometimes parody, sometimes "performativity." Examination of the development of avant-garde of representation about representation, laying some historical groundwork. Cultural critical theory will accompany the readings of plays or viewing of video.

[THETR 660 Visual Ideology (also Comparative Literature 660 and German Studies 660)] 4 credits. Not offered 1997–98. G. Waite. For description, see German Studies 660.

[THETR 679 Bertolt Brecht in Context (also German Studies 679 and Comparative Literature 679)] 4 credits. Requirements: seminar paper that will form the basis for an oral presentation for class discussion. Not offered 1997–98. D. Bathrick. See German Studies 679 for description.

[THETR 682 The Politics of Criticism (also Comparative Literature 682 and German Studies 692)] Fall. 4 credits. Not offered 1997–98. D. Bathrick. See German Studies 692 for description.

[THETR 703 Theorizing Film (also English 695 and French Lit 695)] Fall. 4 credits. T. Murray. See English 703 for description.

**Acting**

[THETR 155 Rehearsal and Performance] Fall or spring. 1–2 credits. 1 credit per production experience per term up to 2 credits per term. Students must register for the course in the term in which credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the department's scheduled auditions. Students should add this course only after they have been assigned roles. S-U grades only. The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

[THETR 205 Rehearsal Workshop] Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production; and by permission. Staff. This course will enable students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the class will depend on the needs of a particular production (history, choreography, textwork, dramaturgy, etc).

[THETR 280 Introduction to Acting] Fall or spring. 3 credits. Each section is limited to 16 students. Registration only through roster in the department office, Center for Theatre Arts. A. Van Dyke and staff. An introduction to the actor's technique and performance skills, exploring the elements necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus will be on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

[THETR 281 Acting I] Fall or spring. 3 credits. Each section is limited to 14 students. Prerequisites: THETR 280 and audition. Registration only through roster in department office, the Center for Theatre Arts. 281 is restricted to sophomores and above. B. Levitt and S. Cole. Practical exploration of the actor's craft through improvisation and exercises in physical and psychological action. Scene study utilizing the plays of Williams, Inge, and Miller.

[THETR 283 Voice and Speech for Performance] 2 credits. Limited to 12 students. Primarily for department majors. Prerequisite: permission of instructor. Not offered 1997–98. Faculty. Registration only through department roster in the main office of the Center for Theatre Arts.
Development of the speaking voice with  
additional emphasis on dramatic interpretation.]

[THETR 284 Speech and Dialects for Performance  
3 credits. Limited to 12 students. Primarily  
for department majors or advance  
undergraduate training program candidates. Prerequisites: THETR 281 and  
permission of instructor. S. Cole.  
A study of the art of acting in its historical and  
cultural context from the Greeks to the early  
20th Century, with an emphasis on an  
analytical understanding of acting methodol­ogy  
in relation to social context. Lectures and  
film showings, with student papers and  
presentations required.

THETR 454 American Musical Theatre  
(also English 454)  
Spring. 4 credits. Prerequisite: ENGL 272  
and THETR 240 and 241 and ability to read  
music at the level of MUSIC 105  
S. McMillin.  
See English 454 for description.

Directing:

THETR 177 Student Laboratory Theatre Company  
Spring. 1 credit.  
The Student Laboratory Theatre Company is a  
group of student-actors who earn credit by  
acting in three scenes directed by students  
taking THETR 498. Students enrolling in SLTC  
for credit will earn 1 credit for 2 projects and  
2 credits for 3 projects. SLTC also meets with  
directors once a week.

THETR 285 Creativity and the Actor  
Summer. 3 credits. Limited to 10 students.  
Although this course is focused particularly  
on the actor, creativity training is equally  
applicable to any area of performance (for  
example, sports, dance, music) and those  
areas relying on individual creativity such  
as writing and the visual arts. No previous  
experience or course work in the main  
area of theatre is required. D. Feldshuh.  
Using mime, physical and vocal exercises,  
karaté, Gestalt therapy, theatre games, and  
Zen meditation, this course will attempt to  
make the student more aware of how he/she  
participates in and can influence the creative  
process of acting and to assist the student  
toward a greater capacity for stage presence.

THETR 287 Summer Acting Workshop  
Summer. 3 credits. Limited to 16 students in  
a section. Levitt and staff.  
An introduction to the processes of acting.  
Practice in training techniques, rehearsal  
procedures, and methodology.

THETR 298 Fundamentals of Directing II  
Fall. 3 credits. Prerequisite: THETR 280 and  
and audition. Limited to 12 students.  
R. Wilson.  
A continuation of Acting I. Special considera­ 
tion will be given to a physical approach to  
characterization utilizing the plays of Chekhov  
and Ibsen.

THETR 263 Computer-Aided Design for  
Design and Technology

THETR 250 Fundamentals of Theatre  
Design and Technology  
Fall and spring. 4 credits. Not open to  
first term freshman. Limited to 12  
students. Registration only through  
department roster in CTA 225. A minimum  
of one credit of Production Lab (THETR  
151 or 251) is strongly recommended  
concurrently. K. Goetz, R. Archer,  
J. Johnson, C. Hatcher, C. Orr Brookhouse,  
and E. Intemann.  
An introduction to design and technology in  
the theatre. Lectures, discussion, and project  
work introduce the principles of designing  
scenery, costumes, lighting and sound, and  
the technical process of realizing designs on  
stage. Students are required to purchase  
materials, which the instructors will specify  
(approximate cost, $40).

THETR 281 Acting III: Advanced  
Scene Study  
Spring. 3 credits. Prerequisite: THETR 380  
and audition. Limited to 10 students.  
L. Levitt.  
This course focuses on advanced problems in  
language and period style (movement, bows,  
curtises, and period dances). Monologues and  
scenes will be drawn from these playwrights:  
Shakespeare and Moliero.

THETR 398 Fundamentals of Directing II  
Spring. 4 credits. Enrollment strictly  
limited. Prerequisite: THETR 280 and 398,  
and permission of instructor. Special  
consideration is given to students who  
have completed THETR 280 or are  
tending to continue in the area of stage  
and screen directing. Recommended:  
THETR 250 and 281. D. Feldshuh.  
This course builds on the staging techniques  
learned in Fundamentals of Directing I. In  
this course each student will direct a series of  
project and public presentations focusing on  
specific directorial challenges.

THETR 399 Practicum in Directing  
Fall or spring. 1–4 credits. Prerequisites:  
THETR 240, 250, 280, 398, 498, and 499,  
and permission of instructor. D. Feldshuh.  
This course will allow the student who has  
completed the appropriate prerequisites the  
option to direct a full presentation of  
theatre in conjunction with a faculty mentor.  
It may also involve an internship with a  
prominent director on campus or the  
opportunity to assist in directing a  
faculty or student production.
discussions. In addition to twice-weekly class meetings the course requires a laboratory period of fifty hours for the semester. Laboratory II

Production Laboratories

THEATRE 151 Production Laboratory I Fall and spring. 1–3 credits. May be repeated for credit. Prerequisite: admittance to Advanced Undergraduate Theatre Program. P. Lillard.

Stage Management

THEATRE 153 Stage Management Production Laboratory I Fall and spring. 1–2 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

THEATRE 255 Theatrical Make-up Studio Fall. 3 credits. Students are required to purchase materials which the instructor will provide (approximate cost: $50.00). Limited to 12 students. J. Johnson.

- Basic techniques of make-up for the stage including corrective, old age, and fantasy use of prosthetics, wigs, hair and hairpieces.

THEATRE 256 Costume Design Studio Fall. 3 credits. Students are required to purchase materials which the instructor will specify (approximate cost: $50.00). Limited to 10 students. J. Johnson.

- Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style. May be repeated for credit.

- Stage Lighting and Sound Technology: The practical aspects of lighting and sound technology including equipment setup, engineering, electrics, organization, recording techniques, and production paperwork will be explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of fifty hours for the semester.

- THEATRE 252 Technical Production Studio I Fall. 3 credits. Limited to 6 students. C. Hatcher and M. Williams.

- Stage Lighting and Sound Technology: The practical aspects of lighting and sound technology including equipment setup, engineering, electrics, organization, recording techniques, and production paperwork will be explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of fifty hours for the semester.

- THEATRE 254 Teatrade Makeup Studio Fall. 3 credits. Students are required to purchase materials which the instructor will provide (approximate cost: $50.00). Limited to 12 students. J. Johnson.

- Basic techniques of make-up for the stage including corrective, old age, and fantasy use of prosthetics, wigs, hair and hairpieces.

THEATRE 340 Theatrical Drafting and Technical Drawing Studio Fall. 3 credits. Limited to 6 students. Prerequisite: THEATRE 250 or permission of instructor. S. Brookhouse.

- Implementation of the fundamentals of drafting and technical drawing. Introduction of the concept of an individual style in the approach to drafting for the theatre. A series of projects to familiarize students with the convention and process of visualization and drafting.

THEATRE 352 Themed Entertainment: The Technical Perspective Fall. 3 credits. Limited to 12 students. R. Archer.

- Exploration into the integration of art and science in today's theme parks and interactive entertainment attractions. Papers, projects, and discussions will deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation. Focus will be on the specialized entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

THEATRE 354 Stagecraft Studio Fall. 3 credits. A minimum of one credit of production laboratory (THEATRE 151 or 251) is strongly recommended concurrently. Prerequisite: THEATRE 250 or permission of instructor. R. Archer.

- Exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

THEATRE 356 Costume Construction Studio Spring. 3 credits. A minimum of one credit of production laboratory (THEATRE 151 or 251) is strongly recommended concurrently. Prerequisite: THEATRE 250 or permission of instructor. Lab fee of $25 to be paid in class. C. Orr Brookhouse.

- A project/lecture/discussion class in costume research, patterning, cutting, construction, and fitting.

Stage Management

THEATRE 370 Stage Management Studio Fall and spring. 1–5 credits. May be repeated for credit. Prerequisite: admittance to Advanced Undergraduate Theatre Program. P. Lillard.

- Practical experience in theatrical production as Stage Manager for a Dance Theatre Concert, for an AUTP production or as Production Manager for the Black Box lab season under the supervision of the faculty Production Manager. THEATRE 370 complements this course.

THEATRE 453 Stage Management Laboratory IV Fall and spring. 1–5 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.

- Practical experience in theatrical production as Stage Manager for a season production under the supervision of the faculty Production Manager. THEATRE 453 complements this course.

THEATRE 456 Stage Management Laboratory V Fall and spring. 1–5 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre. P. Lillard, S. Brookhouse, N. Cross, T. Honesty, C. Hatcer, M. Williams, C. Orr Brookhouse.

- This course provides practical experiences in theatrical production. Students can work on scenery, costumes, properties, lighting, or stage crew. No prerequisites or experience required.

THEATRE 461 Lighting Design Studio Fall and spring. 1–3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

- Practical experience in theatrical production as Assistant Stage Manager for a season production under the supervision of the faculty Production Manager. THEATRE 461 complements this course.

THEATRE 250 Technical Production Studio I Fall and spring. 1–3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

- Practical experience in theatrical production as Assistant Stage Manager for a season production under the supervision of the faculty Production Manager. THEATRE 250 complements this course.

THEATRE 251 Production Laboratory II Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard, S. Brookhouse, D. Hall, C. Hatcher, C. Orr Brookhouse, M. Williams.

- Practical experience in theatrical production, as a light board operator, sound board operator, sound technician, head dresser or scenery/props special project.
THETR 351 Production Laboratory III
Fall and spring. 1-3 credits. May be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, D. Hall, E. Intemann, M. Williams, C. Hatcher, J. Johnson, C. Orr Brookhouse.
Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager or assistant to a faculty or guest director.

THETR 451 Production Laboratory IV
Fall and spring. 1-4 credits. May be repeated for credit. Prerequisite: permission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, C. Hatcher, J. Johnson, E. Intemann, C. Orr Brookhouse.
Practical experience in theatrical production, in the position of designer, shop manager, technical director or sound engineer.

Independent Study, Internships and Honors

THETR 300 Independent Study
Summer, fall, or spring. 1-4 credits. Independent Study in the Theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study.

THETR 485 Undergraduate Internship
Fall, spring, or summer. 1-6 credits. To be eligible to enroll and receive credit for an internship, Theatre Arts students must either be majors or be admitted to the Advanced Undergraduate Theatre Program (AUTP). Students are responsible for arranging their own internships in consultation with the AUTP faculty in their area of choice prior to preregistration of the semester in which the internship is planned to take place. To receive credit for this course, it must be an unpaid internship; if it is a paid internship, it is possible to receive independent study (see THETR 300) credit for it.

THETR 495 Honors Research Tutorial
Fall or spring. 2-8 credits. Limited to Theatre Arts seniors only.
This course is the first of a two-semester sequence (the second is THETR 496). Up to eight credit hours and one grade will be given upon completion of second semester. The Theatre Arts honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be a part of the honors program the student must maintain an average of 3.5 in departmental courses and an average of 3.0 in all courses. Students should consult with their advisers in their junior year if deciding to do honors. Admissions to honors is at the discretion of the departmental committee.

THETR 496 Honors Thesis Project
Fall or spring. 2-8 credits. Limited to Theatre seniors only.
This course is the second of a two-semester sequence (the first is THETR 495). Up to eight credit hours and one grade will be given upon completion of second semester. See THETR 495 for further information.

Film

THETR 274 Introduction to Film Analysis: Meaning and Value
Fall. 4 credits. Limited to thirty-five students. D. Fredericksen.
An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Prospective film majors should enroll in their sophomore year.

THETR 277 Video Production I
Spring, alternate years and occasionally in summer. 3 credits. Limited to 12 students. Permission of instructor. Open to sophomores, juniors, and seniors. M. Rivchin.
A hands-on, beginning video production course using Super-VHS cameras and editing equipment. Students will learn camera, lighting, sound recording, editing and digital effects through a series of technical exercises. Students will develop two short, original video projects to be shown publicly at the end of the semester. A $100 equipment maintenance fee per student will be collected in class. Cost for videocassette approximately $50-100.

THETR 291 Filming Other Cultures (also Anthropology 291) @ Spring.
3 credits. Limited to 20 students, with preference given to those who have taken either Anthropology 102 or Theatre Arts 274. R. Archer.
For description, see Anthropology 291.

THETR 313 Japanese and Asian Film (also Asian Studies 313 and Comparative Literature 313) @ Spring. 4 credits. B. de Bary.
For description, see ASIAN 313.

THETR 329 Political Theory and Cinema (also German Studies 330, Comparative Literature 330 and Government 370) @ Fall. 4 credits. G. Waite.
For description, see German Studies 330.

THETR 374 History and Theory of the Commercial Narrative Film
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Offered alternate years. A. Villarejo.
Consideration of the broad patterns of narration in the history of the commercial narrative film. Emphases placed upon the early articulation of a cinematic means of narration, realism as an artistic style, the nature and functions of popular film, and the modes of modernist and post-modernist "art cinema" narration.

THETR 375 History and Theory of Documentary and Experimental Film
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Offered alternate years. A. Villarejo.
First, the history and theory of documentary film up to the end of World War II. Second, the history and theory of the experimental and personal film forms in Europe and the United States.

THETR 377 Fundamentals of 16mm Filmmaking
Fall. 4 credits. Limited to 12 students. Intended for juniors and seniors (who may need to sign up a year or more in advance). Prerequisite: THETR 274 (or higher-level film studies course) and permission of instructor. Fee for maintenance costs, $100 (paid in class). The average cost to each student for materials and processing is $400. M. Rivchin.
A hands-on course in the basics of 16mm filmmaking techniques, requiring no prior production experience, emphasizing creative development of filmic ideas through critical discussion. Students may explore narrative, experimental, documentary, animation, and abstract genres, producing short exercises and a final sound film project (8-12 minutes) to be screened publicly.

THETR 378 Soviet Film of the 1920s and French Film of the 1960s
Spring. 4 credits. Fee for screening expenses, $10 (paid in class). Offered alternate years. Next offered spring 1999. D. Fredericksen.
An intensive treatment of two distinct periods of radical innovation in film theory and history. Emphasis on the vital relationship between theory and practice in these two periods. Major figures include Eisenstein, Pudovkin, Vertov, Dovzhenko, and Renoir, in the Soviet 1920's; Godard, Truffaut, Resnais, Rohmer, Tati, Rouche and Bresson in French 1960's.

THETR 379 Documentary Film from 1945 to present
Spring. 4 credits. Prerequisite: THETR 376 or permission of the instructor. Fee for screening expenses, $10 (this fee is paid in class). Offered alternate years. D. Fredericksen.
Emphasizes on the contemporary documentary film as a sociopolitical force, as an ethnographic tool within and without a filmmaker's own culture, and as an artistic form with a distinct history and set of theoretical questions.

THETR 383 Screenwriting
Spring. 3 credits. Prerequisites: THETR 274 and 377, and permission of instructor. Limited to 12 students. R. Wilson.
Exercises in various genres of screenwriting will be explored: the commercial narrative, documentary, experimental, and abstract. This class will culminate in the writing of a finished script for a ten to fifteen-minute film. Note: This class is an intensive writing experience that will demand a great deal of outside work.

THETR 386 Third Cinema
Spring. 4 credits. Prerequisite: previous course in film history or analysis helpful, though not mandatory. A. Villarejo.
This course explores postcolonial film and video through the rubric of "third cinema." We will investigate the diverse historical, national, political and generic commitments of films from Africa, South Asia, Latin America, the US and UK (Sembene, Ray, Brocka, etc.). Readings in film and postcolonial theory will guide our critical analyses of the films.
The Nature of Film, a seminar taught by M. Rivchin.

THETR 477 Intermediate Film and Video Projects
Spring. 4 credits. Limited to 8 students. Prerequisites: THETR 377 or 277, and 477; recommended: 383 (screenwriting) and 398 (Directing I). M. Rivchin.

This course will explore German film from the Weimar and Nazi periods to the present in relation to the cultural and sociopolitical context of which it was a part. Readings and lectures will be devoted to formal and cultural developments historically as well as interpretative analysis of selected individual films.

THETR 475 Seminar in the Cinema I (also College Seminar)
Fall. 4 credits. Limited to 20 students. Offered alternate years. Prerequisite: some analytic studies in film. D. Frederiksen.

THETR 474 Film and Performance
Spring. 4 credits. An interdisciplinary, collaborative course taught by M. Rivchin (Film/Video) with guest lectures by: David Borden (Music) Kent Hubbell (Architecture) Gail Scott-White (Fine Arts) Staff (Dance) Limited to 15–18 students (3–4 accepted from each area listed). Prerequisite: THETR 377 or 277, and 477; recommended: 383 (screenwriting) and 398 (Directing I). M. Rivchin.

This is a third-level film production course for those students who have already written and proposed a script, or are working on, a documentary treatment, or a storyboard. Experimental or animated film project. Working in two production crews, directing, cinematographers, and sound recordists, students will be responsible for editing and all completion costs of their projects, which will be screened publicly at the end of the semester.

THETR 398 Advanced Film and Video Projects
Spring. 4 credits. Limited to 4 students, those selected to the Advanced Undergraduate Film Program by application in December. Prerequisite: THETR 477 or 277, and 477; recommended: 383 (screenwriting) and 398 (Directing I). M. Rivchin.

This course is for selected advanced students who have already written and proposed a script or are working on, a documentary treatment, or a storyboard. Experimental or animated film project. Students will edit the films they write and direct, and will be individually responsible for editing and all completion costs of their projects, which will be screened publicly at the end of the semester.

THETR 423 Ballet I (also Physical Education 423)
Spring. 0 or 1 credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Chu; spring: J. Kovar.

The fundamentals of modern dance technique. Elementary dance movement phrases, with attention to rhythm, placement, and vitality of performance.

THETR 124 Modern Dance I (also Physical Education 424)
Fall and spring. 0 or 1 credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Chu; spring: J. Kovar.

The fundamentals of modern dance technique. Elementary dance movement phrases, with attention to rhythm, placement, and vitality of performance.

THETR 155 Rehearsal and Performance
Fall and/or spring. 1–2 credits. 1 credit per production experience per term up to 2 credits per term. Students must register for the course in the term in which credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the dance program's auditions. Students should add this course only after they have been assigned roles. S-U grades only.

The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

THETR 201 Dance Improvisation
Fall. 3 credits. Limited to 12 students. Concurrent enrollment in a dance technique class at the appropriate level is required. Registration only through department roster in the main office of the Center for Theatre Arts. Attendance at dance concerts is required. J. Self.

When the body knows where, when, and how to move without prior direction, we call that improvisation. This course offers the possibility of "training" one's movement instincts to respond with lightness, humor, grace, and spontaneity. Solo and group forms are covered. Includes some dance history.

THETR 210 Beginning Dance
Composition and Music Resources
Spring. 3 credits. Concurrent enrollment in a dance technique class at the appropriate level is required. Registration only through department roster in the main office of the Center for Theatre Arts. Attendance at dance concerts is required.

J. Chu and A. Fogelbarger.

Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through class improvisations. Study of contemporary music and ways to combine movement and music. Informal showing at end of semester.

THETR 211 Dance Movement Workshop
Summer. 3 credits. Limited to 15 students. For students with varied levels of training, including those with no experience.

J. Kovar.

Students explore new ways of moving and creating dances and present short studies each week based on material covered in class.

Modern dance technique, improvisation, and composition are covered. Students observe and discuss the main concerns of contemporary dance and movement. Informal showing at end of semester.
An intermediate ballet class that is a continuation of Ballet I with intermediate work in the areas of port de bras, adage and petite and grande allegro. There is an emphasis on placement through muscular harmony.

**THETR 232 Modern Dance II (also Physical Education 432)**
Fall and spring. 0 or 1 credit. Prerequisite: Modern Dance I or permission of instructor. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Kovar; spring: J. Morgenroth.

A continuation of Modern Dance I, for students with at least a year of dance training. Practice of longer dance phrases, with attention to clarity of design, rhythm, and expression.

**THETR 233 Explorations in Movement and Performance A (also Physical Education 440)**
Fall. 0 or 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.

A physically demanding exploration into various movement realms. Specific subjects covered are gendered movement, erotic power, spiritual power, ritual and performance. Techniques include extensive use of breath, animal movement, improvisation, and group games. This course requires an eagerness to investigate the nature of performance and explore unfamiliar territory in movement.

**THETR 234 Ballet III (also Physical Education 434)**
Fall and spring. 0 or 1 credit. May be repeated for credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.

Study and practice of classical ballet at an advanced level. Work is done on strengthening the body through harmonic muscular control combining Russian, Danish and American techniques.

**THETR 305 Explorations in Movement and Performance B (also Physical Education 440)**
0 or 1 credit. Explorations A, dance improvisation or permission. May be repeated for credit. Limited to 16 students. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Not offered 1997-98. J. Self.

This course continues the investigations of Explorations A with special emphasis on performance and ritual. The class will create performance opportunities throughout the semester.

**THETR 306 Modern Dance III (also Physical Education 436)**
Fall and spring. 0 or 1 credit. May be repeated for credit. Prerequisite: Modern Dance II or permission of instructor. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Chu.

Advanced work with rhythm, placement, and phrasing for students who are prepared to refine technical skills of dancing. Students will be physically and mentally challenged by lengthy, complex phrases and will be expected to bring the instructor's material to life.

**THETR 307 Asian Dance and Dance Drama (also PE 427)**

<table>

<tbody>
<tr>
<td>01</td>
<td>Indian Dance</td>
</tr>
</tbody>
</table>

Fall. 0, 1 or 3 credits. May be repeated for credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Morgenroth.

This course is designed to give the student a practical working knowledge of Indian classical dance, specifically in the indigenous style of Orissa known as Odissi. The technique strengthens the body and develops grace, rhythmic expression, and dexterity that can benefit all forms of dance.

**THETR 308 Modern Dance IV (also Physical Education 438)**
Fall and spring. 0 or 1 credit. May be repeated for credit. Prerequisite: Modern Dance III or permission of instructor. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Self; spring: J. Morgenroth.

A continuation of, and supplement to, Theatre Arts 306/Physical Education 436.

**THETR 310 Intermediate Dance Composition and Music Resources**
Fall and spring. 3-4 credits. Prerequisite: THETR 210 and concurrent enrollment in a technique class at the appropriate level is required. Registration only through department roster in 225 Center for Theatre Arts. Fall, J. Chu and A. Fogelsanger; spring, J. Morgenroth and A. Fogelsanger.

Intermediate choreographic projects will be critiqued in progress by faculty and peers. Consideration of design problems in costume and lighting. Weekly music sessions will aim to expand music vocabulary and skills through a survey of contemporary music for dance, the study of music and dance collaborations, and rhythm studies.

**THETR 311 Intermediate Projects in Dance Composition**
Spring. 3-4 credits. Prerequisite: THETR 310. Attendance at dance concerts is required. J. Chu.

A continuation of THETR 310.

**THETR 312 Physical Analysis of Movement**

This course is an examination of human movement with particular attention to dance movement. Readings in texts on human anatomy, physiology, and kinesiology and in Sweigard's *Human Movement Potential.* Guest lectures by experts in anatomy and health areas. Practical and laboratory work. Demonstration of dissection.

**THETR 314 Western Dance History I: Classical Ballet History as a Reflection of Western Ideology**
Fall. 4 credits. Attendance at dance concerts is required. B. Suber.

A critical survey of the history of classical ballet defining elements of classicism and determining why ballet is defined as classical. Texts, videotapes, and through live performance, the class will explore how ballet has perpetuated or confronted social issues of race, class, gender, sexuality, the body, and abuse.

**THETR 315 Western Dance History II: History of Modern Dance**
Spring. 4 credits. Attendance at dance concerts is required. J. Chu.

This class will study the course of modern dance in the twentieth-century United States. We will examine each generation of dancers starting with Isadora Duncan and ending with performers emerging today. Issues of gender, cultural identity, elitism, and democracy will be discussed.

**THETR 317 Asian Dance II**
Spring. 0, 1 or 3 credits. Prerequisite: THETR 307 or previous training in Odissi Classical Dance. Theatre Arts and Physical Education Registration at Teagle Hall only. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. D. Bor.

The continuation of THETR 307; Odissi Classical Dance. Emphasis is mainly on choreography as well as continuing to refine and perfect the basic movements learned in the preliminary course. We will meet twice weekly for movement classes; an extra class will be arranged to learn the art of makeup.

**THETR 410 Advanced Dance Composition I**
Fall and spring. 3-4 credits. Prerequisite: THETR 310 and 311. Attendance at dance concerts is required. Fall: J. Chu and A. Fogelsanger; Spring: J. Morgenroth and A. Fogelsanger.

Students work on advanced choreographic problems, to be presented in performance. Work in progress will be critiqued by faculty on a regular basis.

**THETR 411 Advanced Dance Composition II**
Fall and spring. 3-4 credits. Attendance at dance concerts is required. Fall: J. Chu and A. Fogelsanger.

A continuation of THETR 410.

**THETR 418 Seminar in History of Dance**
Spring. 4 credits. Attendance at dance performances required. B. Suber.

Topic for 1998: Cyberdance. Considers the dynamic body as it has interfaced with technology in performance and within a social context, beginning with tools of primitive agriculture and warfare and continuing through industrialism to computer technology.

**THETR 490 Senior Paper in Dance**
Spring. 4 credits. Prerequisite: THETR 418, senior standing. Attendance at dance concerts is required. Under faculty direction, the student will write a senior paper in dance history, criticism, or theory.

**THETR 491 Senior Project in Dance**
Fall or spring. 4 credits. Prerequisite: THETR 410 or permission. This course is limited to senior dance majors only. Students who take this course will create a project in choreography and performance, dance film or video, dance pedagogy, or other appropriate area agreed upon with a member of the dance faculty. Senior projects that are to be performed, must be presented within one of the three regularly scheduled department concerts.
Tracks toward admission into the advanced undergraduate theatre program

Design, Technology, and Stage Management

Recommended for individuals interested in a Design, Technology, or Stage Management track:

THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 398 Directing I
THETR 498 Directing II

Playwriting
Recommended for individuals interested in a playwriting track:

THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 348 Playwriting
THETR 340 Advanced Playwriting
Students in the advanced undergraduate theatre program may also elect to take THETR 485 (Undergraduate Internship) in addition to or in place of one production assignment.

THEAVER STUDIES AND INTERDISCIPLINARY STUDIES

Africana Studies and Research Center

The Africana Studies and Research Center is concerned with the examination of the history, culture, intellectual development, and social organization of Black people and cultures in the Americas, Africa, and the Caribbean. Its program is structured from an interdisciplinary and comparative perspective and presents a variety of subjects in focal areas of history, literature, social sciences, and African languages including Mandinka, Swahili, and Yoruba.

The center offers a unique and specialized program of study that leads to an undergraduate degree through the College of Arts and Sciences and a graduate degree, the Master of Professional Studies (African and African-American), through the university's Graduate School.

A student may major in Africana studies; however, another attractive alternative is the center's joint major program. This program enables the student to complete a major in any of the other disciplines represented in the college while at the same time fulfilling requirements for a major in Africana Studies. This requires only a few more credits than is usually the case when one completes a single major course of study. Courses offered by the center are open to both majors and nonmajors and may be used to meet a number of college distribution requirements, including historical/ temporal breadth (H) and geographical breadth (G) requirements, such as freshman writing seminars, language (Mandinka, Swahili, Yoruba), expressive arts, humanities, social sciences, and history.

The center also brings distinguished visitors to the campus, sponsors a colloquium series, and houses its own library.

The Africana Major

The undergraduate major offers interdisciplinary study of the fundamental dimensions of the African-American and African experiences. Because of the comprehensive nature of the program, it is to the students' advantage to declare themselves Africana majors as early as possible. The following are prerequisites for admission to the major.

Students should submit:

1) a statement of why they want to be an Africana studies major;
2) a tentative outline of the area of study they are considering (African or African-American) for the undergraduate concentration; and
3) a full transcript of courses taken and grades received.

The center's undergraduate faculty representative will review the applications and notify students within two weeks of the status of their request.
After acceptance as a major in the Africana Center, a student must maintain a cumulative average in the center's courses while completing the major program. The Africana major must complete 36 credits in courses offered by the center, to include the following four core courses: AS&RC 205, 231, 290, and 422. Beyond the core courses, the student must take 8 credits of center courses numbered 200 or above and 15 credits numbered 300 or above. The program of an undergraduate major may have a specifically Afro-American focus or a specifically African focus.

**Joint Majors**

The center encourages joint majors in the College of Arts and Sciences and in other colleges. Joint majors are individualized programs that must be worked out between the departments concerned. The center's undergraduate faculty representative, Professor Adams, will assist students in the design and coordination of joint major programs. However, in any joint major program, the center will require at least 15 credits be taken in Africana studies courses, including AS&RC 290.

**Double Majors**

In the case of double majors (as distinct from joint majors) students undertake to carry the full load of stipulated requirements for a major in each of the two departments they have selected.

**Certificate in African Studies**

In conjunction with the Institute for African Development, the Africana Studies and Research Center administers an undergraduate Certificate in African Studies program. The certificate is offered as a minor concentration available to students in all of the undergraduate colleges at Cornell. Many of the courses in the program might be used to fulfill other course distribution requirements. By pursuing this certificate, students acquire an interdisciplinary understanding of Africa. After developing a foundation of knowledge on the culture, society, and development of Africa in the core course “Africa: The Continent and Its People,” students pursue 15 credit hours in a humanities or development studies track or a combination of the two, including an additional core course, either “African Civilizations and Cultures” or “Contemporary African Development Issues.” The requirements for the certificate are a minimum of 18 credit hours, including the core courses. Students interested in the certificate program must contact Professor Adams (the center's undergraduate faculty representative) who will register them in the program and assign them a faculty adviser from their own college. The faculty adviser will be responsible for determining completion of the certificate requirements.

**Honors**

The honors program offers students the opportunity to complete a library research thesis, a field project in conjunction with a report of the field experience, or a project or experiment designed by the student. The requirements for admission to the honors program for all students—regular majors, joint majors, and double majors—are a B cumulative average in all courses and a B+ cumulative average in the center's courses. Each student accepted into the honors program will have an honors faculty commit-

tee consisting of the student's adviser and one additional faculty member, which is responsible for final evaluation of the student's work. The honors committee must approve the thesis or project before May 1 of the student's junior year. The completed thesis or project should be filed with the student's faculty committee by May 10 of the senior year.

**Distribution Requirement**

Two Africana Studies and Research Center courses from the appropriate group may be used in fulfillment of the following distribution requirements:

- Freshman writing seminars: AS&RC 100.

**Language Requirement**

Courses in Mandinka, Swahili, and Yoruba may be used to satisfy the College of Arts and Sciences language requirement. Successful completion of the Mandinka or Yoruba series AS&RC/DMLL 121, 122, 123 provides qualification, and study through 203 in either language provides proficiency. In Swahili, successful completion of AS&RC 131, 132, 133, and 134 provides qualification, and the addition of 204 provides proficiency. AS&RC majors are not required to take an African language, but the center recommends the study of one to complete the language requirement.

**Courses**

AS&RC 122 Sec 01 Continuing Yoruba Fall. V. Carstens and staff. For description, see YORUB 123.

AS&RC 132 Swahili Spring. 4 credits. A. Nanji. Advanced study in reading and composition.

AS&RC 133 Swahili Fall. 4 credits. Prerequisites: Swahili 131 and 132. A. Nanji.

AS&RC 134 Swahili Spring. 4 credits. Prerequisite: Swahili 133. A. Nanji.

In this course of the sequence more emphasis is placed on the development of reading ability and the acquisition of writing skills. Students are expected to read and comprehend selected Swahili stories and write compositions on chosen topics. Ample consideration is given to oral practice in the classroom.

AS&RC 171 Black Families and the Socialization of Black Children
Fall. 3 credits. Staff. This course provides an examination of the evolution of the Black family from its roots in Africa, the evolution of family forms, the impact of social policy, and a consideration of the literature stressing family well-being. Among the major topics considered will be male/female relationships, childbearing and parental roles, the extended family, economic and health issues. The contribution of the course focusing on youth will primarily cover child and adolescent development.

AS&RC 172 The Education of Black Americans: Historical and Contemporary Issues
Spring. 3 credits. Staff. This course will be devoted to the history of educating Black Americans. Considerable attention will be given to contemporary issues. The major topics of focus will include an examination of the debates concerning the type of the education needed, public and private schooling efforts, the Africana Studies movement, community control issues, busing, affirmative action, re-segregation debates and new initiatives in education including vouchers, and charter schools.

AS&RC 191 Africa: The Continent and Its People
Fall. 3 credits. L. Edmondson. An introductory interdisciplinary course focusing on Africa's geographical, ecological, and demographic characteristics; indigenous institutions and values; the triple cultural heritage of Africanity, Islam, and Western civilization; main historical developments and transitions; contemporary political, economic, social, and cultural change. Africa's ties with the United States (from trans-Atlantic slavery to the present), its impact on the emerging world order, and its contribution to world civilization will also be explored.

AS&RC 202 Swahili Literature
Fall. 4 credits. A. Bekerie. Students gain mastery over spoken Swahili and are introduced to the predominant Swahili literary forms.

AS&RC 204 History and Politics of Racialisation: A Comparative Study
Spring. 4 credits. L. Edmondson. The primary focus of this course will be on the historical and contemporary significance of racialisation in the United States and South Africa with regard to societal development and inter-relations. It will include an analysis of the historical development of racialised barriers as an instrument of power and privilege. The ways with which racialisation is used as an instrument of ideology to social status, cultural hierarchy and economic positions will also be examined. Particular emphasis will be given to the development and perpetuation of scientific racism in both places. The apparent success against Jim Crow form of racism in United States and apartheid in South Africa appears to transform racism into subtle and 'scientific' sphere. This transformation and its continued impact in perpetuating social inequality will be further analyzed.

AS&RC 290 Swahili Language
Fall. 3 credits. A. Nanji. For description, see YORUB 123.

AS&RC 302 Swahili Literature
Fall. 4 credits. A. Nanji. Students gain mastery over spoken Swahili and are introduced to the predominant Swahili literary forms.
AS&RC 205 African Cultures and Civilizations
Spring. 3 credits. D. Ohadike.
This course is concerned with the peoples of Africa and the development of African cultures and civilizations from the earliest times to the present day. It focuses on the near modern civilizations of Africa south of the Sahara, and the ancient civilizations of Egypt and the Nile Valley, together with their contributions to the development of the major world civilizations. The course also deals with the socio-political organization of African societies, their kinship systems, cross-cutting ties, rites of passage, gender relations, arts (including music, dance, folklore, architecture, sculpture, painting, and body decoration).

AS&RC 210 Major Works of Black World Writing
Fall. 3 credits. A. Adams.
This course surveys classic texts by African American, Caribbean, and African writers. The focus is on literary texts by authors such as Langston Hughes, Toni Morrison, James Baldwin, Maryse Conde, and Chinua Achebe, with a view toward analyzing common experiences, references, themes, and literary strategies across the Black world. The works of fiction, poetry, and drama that constitute the central material of the course are supplemented by essays and biographies from other authors who have influenced the creative vision and the movement of the peoples of Africa and the Diaspora, e.g., W.E.B. DuBois and Marcus Garvey, Nelson and Winnie Mandela.

AS&RC 231 African American Social and Political Thought
Spring. 3 credits. J. Turner.
This is an introductory course that will review and analyze the major theoretical and ideological formulations developed and espoused by African-Americans in the struggle for liberation. This semester we will focus specifically on the political philosophy and historical significance of Malcolm X, and the writings and movements of Marcus Garvey, as the prime movers of nationalism and pan-Africanism among Black people in this century. Such themes as slave resistance, nationalism, Pan-Africanism, emigration, anti-imperialism, socialism and internal colonialism, and the political and social views of Black women will be discussed. Black political thought will be viewed in its development as responses to concrete conditions of oppression and expression.

AS&RC 271 Introduction to African Development (also CRP and Government 271) @
For description, see CRP 271.

AS&RC 280 Racism in American Society
This course will be a topical treatment of the psychological aspects of race relations in America, with specific reference to the differences and intersections of race, class, gender, and ethnicity.

AS&RC 285 Black Theater and Dramatic Literature
Fall. 3 credits. K. Bowman.
This course is an introduction to the history and literature of African American Drama at times in conjunction with other parts of the African diaspora. It also provides an opportunity for students to cultivate an interest in individual and group presentation of Black dramatic materials. Students who successfully complete this course will be granted preference for the limited enrollment in AS&RC 425 (Advanced Seminar in Black Theatre and Dramatic Literature), which produces a public performance in the spring.

AS&RC 290 The Sociology of the African-American Experience
Fall. 3 credits. J. Turner.
This is an introductory course to the field of Africana Studies. It assumes a historical/sociological approach to the examination of the African-American experience. The course surveys the African beginnings of human kind and the classification of people in world civilization and the making of early culture. The course treats issues in the humanities, social sciences, and history. This course is required for all undergraduate students majoring at the Africana Center.

AS&RC 304 African American Art
Spring. 3 credits. S. Hassan.
This course investigates the different forms of African American visual artistic traditions in relation to their historical origins and sociocultural context from the early days of slavery to the present time. The course will start with an overview of African art and the experiences of the Middle Passage and slavery in relation to African American traditions in the decorative arts including: pottery, architecture, ironwork, quilting, basketry. This is followed by a fine art survey starting with the eighteenth and nineteenth centuries, continuing through the early twentieth-century Harlem Renaissance up to the present. Certain issues related to African American arts and creativity such as "improvisation," "Black Aesthetic," and "Black Arts" will also be explored. Slides, films, film strips will be used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

AS&RC 310 Art in African Culture and Society @
Fall. 3 credits. S. Hassan.
This course is a survey of the visual art and material cultural traditions of sub-Saharan Africa. It aims at investigating the different forms of visual artistic traditions in relation to their historical and sociocultural context. The symbolism of traditional African art will be explored through the analysis of myth, ritual, and cosmology. In-depth analysis of particular African societies will be used to examine the relationship of the arts to indigenous time, space, color, form, and sociopolitical order. New and contemporary art forms associated with major socioeconomic changes and processes of assimilation and acculturation will also be explored. These include tourist art, popular art, and elite art.

AS&RC 311 Government and Politics in Africa @
Power and political participation in Africa. The colonial background and its political consequences. The pre-colonial continuities in the post-colonial politics. Ethnicity and allegiance in the African polity. The monarchical tendency in African political culture. From the warrior tradition to the military coup in the post-colonial era. From the elder tradition to presidentialism in the 1970s. From the sage tradition to intellectual meritocracy. Class versus ethnicity in African politics. The one-party versus the multiparty state. Socio-cultural versus socio-economic ideologies. The gender question versus the economics of the polity. The soldier and the state. The African political experience in a global context.

AS&RC 362 Global Perspectives on Gender
The course will examine how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class will be taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty member directing the course, the class will consider such issues as cross-cultural perspectives on gender; the history of work and family life in different societies; the formation of international labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; the roles of the state in constructing an engendered economy and polity.

AS&RC 370 African American History: The Twentieth Century
Examines the transition of African Americans from countryside to city through the process of migration and urbanization and their transformation into industrial laborers. Probes the transition from segregation to civil rights through the process of protest and the transformation of African Americans from second-class into first-class citizens. The purpose is to understand historical experiences of the African American experience and its meaning for the current socioeconomic political, and cultural status of African Americans.

AS&RC 380 African History: Earliest Times to 1800 #
Fall. 3 credits. A. Bekerie.
This course covers the history of Africa from the origins of humankind, through the emergence of small-scale societies and state systems, such as Egypt, Meroe, Mali, Bunyoro, the Swahili city-states and the Luba-Lunda complex, that had regional and international significance. Emphasis is placed on understanding the way in which different ecological conditions, political developments, and religious change affected gender, class, and ethnic relations within these societies and their relations with other societies. The course also examines the interaction with Islamic and European cultures up to 1800.

AS&RC 381 African History, 1800-Present @
Spring. 3 credits. D. Ohadike.
This is a survey of African history in the nineteenth and twentieth centuries. It deals with African revolutions in the nineteenth century; the ending of the slave trade in the 1860s; the politics of the abolition; European scramble and partition of Africa; resistance to European colonial conquest; African societies in the colonial period; Christian missionaries and
Western educated Africans, colonial administration, French and British styles, Pan-Africanism and the politics of decolonization, liberation movements in Africa, the armed struggles in Algeria, Angola, Mozambique, Zimbabwe, Namibia and South Africa; Neocolonialism, the rise and decline of military regimes the World Bank, the IMF, African debt crisis, and the Structural Adjustment Programs.

AS & RC 404 Afrocentricity: Paradigm and Critical Readings
Fall. 4 credits. A. Bekerie. What is Afrocentricity? It is a theoretical framework designed to study and interpret the histories and experiences of Africa and African descent by locating them at the center of their experiences. In other words, it is a method of knowing the life experiences of African peoples from the inside out. The course will examine—through the writings of Asante, Kerto, Clarke, Jean, Myers, Amín, Mzumi, Gates, Appiah, Richards, Schlesinger and Thiongo—the conception and depth of the paradigm, its relevance in the production and utilization of knowledge, particularly emanicipatory knowledge, the history of the paradigm, and the debate it generates among a wide range of thinkers and scholars.

AS & RC 410 African American Politics
Spring. 4 credits. Not offered 1997–98. Next offered spring 1999. J. Turner. The central thesis of African American politics has been its movements for political change and democratic access and human rights. This development since the seventeenth century is a complex political legacy. This course will conduct a close study of African American political practice and theoretical analysis of the American political system. Implications of the political systems for prospects and limitations to participation by Black people will be analyzed. Critical historical stages in the process of Black politics will be examined. The development of electoral offices in federal and state-wide politics, and the significant urban political power bases giving rise to African American mayoral politics in critical industrial centers, as well as rural centers will center the course. Presidential politics—the Jesse Jackson campaigns—and new political formations including Black Republicans/conservatives will constitute the emphasis on contemporary events. The course will review the development of the literature on African American politics.

AS & RC 420 Public Policy and the African American Urban Community
Spring. 4 credits. J. Turner. The socioeconomic conditions of the African American urban community will be the central focus of the course. Community development models will be explored in relationship to the social needs of the African American population. The changing configuration of internal organization of the African American community nationally will be examined.

AS & RC 422 African Literature
Spring. 4 credits. P. E. I. Lecky. With such great focus, both inside and outside Africa, on issues of Africa’s “development,” what place does “literature” take? Is African literature influencing or influenced by the mundane, daily lives faced by African people? Or does African literature concern itself with philosophical ideas and ideals that transcend those realities to embrace the general human condition? Or, does it do both? The texts that we will be reading this course will be approached in terms of these issues of “African development” and the universal human experience.

AS & RC 425 Advanced Seminar in Black Theater and Dramatic Literature
Spring. 4 credits. Enrollment limited. This course will be devoted to the study, rehearsal, production, and public performance of a play or plays drawn from the annals of Black American dramatic literature. Students will participate in all the various phases and categories of theatrical production, from acting to production crew to theater management. A field trip to a Black Theater attraction in New York City will also be arranged if possible. Students who have successfully completed AS & RC 285 (Black Theater and Dramatic Literature) will be granted preference for the limited enrollment in this course.

AS & RC 435 African Cinema (also Society for the Humanities 445)
Spring. 4 credits. S. Hassan. This course offers an overview of African cinema and filmmaking. It surveys historically the evolution of African cinema from its early days to the present. Through screening of selected African films, different trends within African cinema will be explored, such as “Return to the Sources” and the rediscovery of the pre-colonial “Social Reality” as a narrative and critique of post-independence Africa; reconstructing the story of colonialism from the perspective of the colonized; and the entertainment genre. Techniques, style, and aesthetics of African film will also be discussed. The course offers a unique opportunity of looking at African culture and society, and at issues of social change, gender, class, tradition, and modernization through African eyes.

AS & RC 451 Politics and Social Change in the Caribbean
Fall. 4 credits. E. D. Richardson. A study of the historical, geostrategic, political, economic, and social (including racial and cultural) forces bearing on the domestic and international experiences of Caribbean societies. Special attention will be given to conflicting definitions and perceptions of the Caribbean; contending theories of Caribbean social structure and models of development; the continuing salience of struggles for change and transformation; prospects of regional integration; and Caribbean challenges to the global system, especially with regard to the region's relations with the United States and the region's position in the Third World in the context of the North-South cleavage.

AS & RC 455 Caribbean Literature
Fall. 4 credits. A. Adams. This course will examine the prose literature of the Caribbean islands. Through the reading of several novels and short stories from the various languages and cultural strains that comprise the Caribbean societies, students will study the points of commonality and the diversity within this body of literature. The recurrence of certain historical, social, and cultural issues that have formed the multi-ethnic Caribbean peoples will be analyzed in their varying manifestations across the linguistic and other boundaries to uncover the underlying shared experience.

AS & RC 459 Educational Innovations in Africa and the African Diaspora (also Social Sciences 459 and Women's Studies 459)
Fall. 4 credits. N. Assié-Lumumba. This course deals with theories and concepts of planned change for social development and their application to educational innovations geared to promoting equal opportunity based on gender, race, and class in Africa and the African diaspora. The first part of the course will be concerned with the stage of innovations from their inception to their implementation, resistance, diffusion and impact on different social categories. The second part of the course will deal with different cases of educational innovations such as the creation of educational institutions and change in curriculum development and medium of instruction. Historical and contemporary cases of educational innovations will be presented and analyzed. The case studies include the development of African Studies as a discipline, the creation and expansion of historically black institutions such as Lincoln University in Pennsylvania, Tuskegee Institute in Alabama, Spelman College in Georgia, and the Westside Preparatory School of Chicago. The African cases to be studied include education for self-reliance in Tanzania, African languages as a medium of instruction in Nigeria and Mali, and television as a medium of instruction in Côte d'Ivoire. Gender will be a main focus in the analysis of the agents and beneficiaries of the innovations.

AS & RC 462 The Black Church: Resistance and Empowerment
Spring. 4 credits. Staff. The course will be devoted to the study of the Black Church historically as the most viable institution in African American life. Consideration will be given to the African spiritual heritage, development of the rural and metropolitan churches, leadership in the church, the African American worship experience, the range of issues and challenges confronting the church's future and the emergence of non-Christian Black churches. The instructor's lectures will be supplemented by audio-visuals and class discussion.

AS & RC 475 Black Leaders and Movements in African-American History
Fall. 4 credits. R. Harris. Analyzes the personalities, ideas, and activities central to the struggle for African-American liberation from the eighteenth-century to the present. Examines theories of leadership and the structure of protest movements with the goal of understanding current leadership needs and trends among African Americans.

AS & RC 478 Family and Society in Africa (also Women's Studies 478)
Fall. 4 credits. N. Assié-Lumumba. The family as a social institution is structured according to socio-economic, historical, political, and cultural specificities. The topics to be discussed include the concepts of nuclear and extended family, the place and role of different age-generations in the family, marriage and related issues, such as dowry, divorce, parenthood, child-rearing, gender roles, class differences, "family planning." The course also deals with the impact of westernization, urbanization, and modern economy on the structure of the family in Africa. Finally, the course addresses the legacy of African family values in the African diaspora. Examples will be drawn from urban and rural communities.
address these areas of Black comparison: Comparative Slavery—A Triple Heritage; Race and Race Mixture in Four Traditions; Comparative Emancipation from Slavery; Comparative Liberation from Colonialism; Comparative Struggle for Civil Rights; The Gender Question in Global Africa; Comparative Quest for Global Equality.

AS&R 502 Education and Development in Africa

Spring. 4 credits. N. Assié-Lumumba. In the 1950s and 1960s, the human capital theory that emphasizes the importance of formal education for achievement of full productive potential of individuals and countries enjoyed a renewed popularity. African countries promoted educational expansion with the expectation that it would lead to socio-economic development. The initial euphoria, however, was followed by skepticism and then disillusion. Education began to be perceived even as a hindrance to development. This course examines the relationship between formal education and individual and national development. In this seminar, different paradigms of development including modernization and dependency theories and Third World Forum are presented with an emphasis on the perceived and actual roles of education in individual and national development.

AS&R 503 African Aesthetics

Fall. 4 credits. S. Hassan. The goal of this course is to investigate in depth the principles of aesthetics and philosophy of African visual arts. The course will offer a critical survey of the different writings and the growing body of research on this relatively new area of inquiry. The objectives of the course are to review how African aesthetics has been studied to date, to provide a critical analysis of the different approaches to the subject and related issues, and to suggest future directions of research. In-depth analysis of particular African societies will be used to examine the relationship of arts and aesthetics to indigenous concept of time, space, color, form, and sociopolitical order. In addition, issues related to African aesthetics and arts such as style, gender, class, and social change will also be explored.

AS&R 504 Political Change in Africa

Fall. 4 credits. Not offered 1997-98. Next offered fall 1998. A. Mazrui. The study of Africa can be approached either diachronically (focusing on the tension between opposing forces) or thematically (focusing on themes as chapters of experience). This course will borrow from both those approaches. In their class assignments and examinations students are free to use either approach. The first approach will explore the dialectic between continuity and change, tradition and modernity; dependency and liberation; foreign and indigenous influences; anarchy and order; political decay and political development; democracy and authoritarianism; socialism and capitalism. The thematic approach will examine African Nationalism; race consciousness and Pan-Africanism; political parties and interest groups; executive power; ethnicity in politics; class-formation; civil-military relations; economic and cultural dependency; sub-regional and continental Pan-Africanism; crisis of the African state; and Africa in World Politics.

AS&R 510 Historiography and Sources: The Development of African-American History

Spring. 4 credits. Prerequisite: upperclass or graduate standing or permission of instructor. Next offered 1998-99. Next offered spring 1999. K. Harris. Studies the way historians in particular have explained the African-American past. Examines the development of writing on African-American history from the earliest writers to the present. Seeks to determine the principles for interpreting African-American history. Acquaints participants with the methodologies and sources central to understanding the African-American experience.

AS&R 530 Womanist Writing in Africa and the Caribbean

Spring. 4 credits. A. Adams. Theoretical essays on the nature, relevance, and articulation of feminist thought from African and Caribbean writers will complement literary texts. Gender issues, as manifested both at home and in emigrant situations abroad will be examined in texts by such writers as Sistren, Conde, Dangarembga, Allod, Warner-Vieya, Ba, Emetcha, Kincaid, W. Mandela. (Francophone works may be read in the original by individuals who so desire.)

AS&R 598-599 Independent Study

598-fall; 599-spring. Variable credit. For all graduate students.

AS&R 602 Research, Theory and Methodology in Africana Studies

Spring. 4 credits. Faculty. This course, which will be conducted as a seminar, is designed for first-year AS&R graduate students. It will cover basic research design, methodology and means of gathering and organizing data and will also address specific issues related to research and theoretical discourse in African, Caribbean, and African American humanities and social sciences.

The course will be coordinated and supervised by one professor (the Director of Graduate Studies or by rotation) but taught by three or four faculty per semester. Each participating faculty will be responsible for a topical segment of the course related to her/his areas of specialization or an area of interest pertaining to theory and methodology of Africana Studies.

Readings will be assigned and distributed in advance before each faculty presentation, to allow students to prepare for discussion. This course will allow first-year graduate students wider exposure to faculty and the field of Africana Studies early in their tenure in the program, and thus help them make an informed decision regarding faculty adviser and topic for their theses. Each student will be required to produce a bibliographic essay related to his/her thesis topic, and a fully developed thesis proposal as an end product of the course.

AS&R 698-699 Thesis

698, fall; 699, spring. Limited to Africana Studies and Research Center graduate students.
Agriculture, Food, and Society Concentration

Agriculture, Food, and Society is an interdisciplinary concentration that is designed to introduce students to the study of agricultural and food issues from diverse perspectives within the liberal arts. The Agriculture, Food, and Society concentration seeks to make available to students a coherent program of study in which the role of agriculture in modern or prehistorical-historical and developed or developing societies can be understood from biological, social, scientific, and humanistic perspective. The concentration draws upon courses in several colleges—in particular, the Colleges of Arts and Sciences, Agriculture and Life Sciences, and Human Ecology.

The work of the committee is supported from the faculty associated with the concentration. The members of this committee include faculty from each of the major colleges from which courses in the concentration are drawn. The work of the committee is supported administratively through the Biology and Society Major. The office of the Biology and Society Major (275 Clark Hall) also provides a central location for students to receive information about relevant course offerings, upcoming seminars and presentations, faculty interests, and so on.

Basic Requirements

The requirements for the Agriculture, Food, and Society concentration are designed to ensure a broad background in the biological, social, economic, and humanistic dimensions of agricultural and food issues. These requirements include foundation courses in biology; the Senior Seminar B&B/Soc/BioG/S&T 469, Food, Agriculture, and Society; plus a minimum of five electives totaling 15 credits drawn from the courses offerings. Students enrolling in the Agriculture, Food, and Society concentration should take the following foundation courses in biology to prepare themselves for course work in agricultural science: a two-semester introductory biology sequence selected from Biologica-l Sciences 109/110, 105/106, or 101–104. (Advanced placement in biology with a score of 4 or 5, or Biological Sciences 107/108, offered during the eight-week Cornell summer session, also satisfies the biological sciences requirement). These courses may be used to meet group 1 (physical or biological sciences) distribution sequence requirements in the College of Arts and Sciences.

It is recommended (but not required) that students in the Agriculture, Food, and Society concentration elect one or more freshman writing seminars with agriculturally related content to meet basic college requirements for graduation. The electives for the concentration, from which a minimum of five courses and 15 credits must be taken, are organized into three groups: agricultural and nutritional science; humanities, and social science/history. Students must select one agricultural and nutritional science course, one humanities course, and three social science or history courses. A maximum of six of the 15 credits may be earned in 100-level courses.

In addition, students are required to take the senior seminar, B&B/Soc/BioG/S&T 469, Food, Agriculture and Society. Adjustments to these and other requirement of the concentration may be made with the approval of the student's Agriculture, Food, and Society faculty adviser.

American Studies

The Major

The major in American Studies, appropriate for a wide variety of future professions, is basically a program of coordinated study in the history, literature, and politics of the United States. The prerequisites are two courses from the following: American Studies 101, American Studies 102, English 275, English 268, Government 111, History 101, History 102. Students contemplating becoming American Studies majors are encouraged to speak with the chair as early as possible to arrange for a major adviser.

In consultation with their advisers, American Studies majors elect, in addition to the prerequisites, 36 credits (or nine courses) of work in American history, American literature, and American government. Their work must include courses in all of the three large periods into which the nation's development can be divided (defined for the purposes of the program as colonial, nineteenth century, and twentieth century). Students must take no fewer than 4 courses before 1900. At least one of these courses must be in the period before 1800. Each student must also take one of the adviser-approved seminars in the 400 or 600 level. When the subject matter is appropriate, such a seminar may count toward the satisfaction of the period requirements. Students divide their work among history, literature, and politics in whatever proportion serves their interests, so long as their advisers consider their programs to be well-balanced. No more than 18 credits may be in any one department.

Beyond the basic core requirements for the major, 8 credits of work in the history or literature or both of another culture are required, students are also encouraged to take at least 4 credits in American thought, society, or culture studies from the perspective of another discipline such as anthropology, economics, history of art, or sociology. (This last 4-credit supplement may be satisfied outside the college.)

Courses in American history that will satisfy the 36-credit requirement are offered by the Department of History; those in American literature are offered by the Department of English, the Department of Theatre Arts, and the Africana Studies and Research Center; those in American government are offered in the Department of Government. Occasionally a course that fits an individual student's program may be offered elsewhere. Substitution will depend on the adviser's approval. Advisers determine what courses count for the interdisciplinary seminars.

Honors. Candidates for honors must maintain an average of B+ in courses pertinent to the major. To be eligible for a degree with honors in American Studies, a student must in the senior year write an honors essay for American Studies 493, Honors Essay Tutorial, and take an oral examination in the declared area of special interest.

Cornell-in-Washington Program. American Studies majors may apply to the Cornell-in-Washington program to take courses and participate in a closely supervised externship during a fall or spring semester. For further information, see Interdisciplinary Centers, Programs, and Studies or inquire at 471 Hollister Hall, 255-4090.

AM ST 101 Introduction to American Studies: American Revolution to the Beginning of the 20th Century Fall. 4 credits. G. Altschuler and D. McCall.

In this interdisciplinary course we will analyze American values and behavior as the intersection of culture, politics, literature, and society. Among the topics explored in the course will be the democratization of American society and politics, the formation of the middle class, the Civil War, the rise of industrialization, the Victorians and sexuality, the Pragmatic revolt against Formalism. Intensive examination of Hawthorne's Scarlet Letter, Melville's Moby-Dick, James's Portrait of a Lady, and Mark Twain's Huckleberry Finn will help illuminate the relationship between literature and American values.

AM ST 102 Introduction to American Studies: Progressive Era to the Present Spring. 4 credits. G. Altschuler and D. McCall.

In this interdisciplinary course we will analyze American values and behavior as the intersection of culture, politics, literature, and society. Among the topics explored in the course will be the death of the West and the rise of the Western, the Roaring Twenties, the New Deal and Writers on the Left, the Great War, the ideology of anti-Communism, the Civil Rights Movement, Vietnam, the Reagan Revolution, Post-Modernism and the politics of multiculturalism. Intensive examination of the works of Ernest Hemingway, F. Scott Fitzgerald and William Faulkner will help illuminate the relationship between literature and American values.

AM ST 201 Popular Culture in the United States 1900-1945 Fall. 4 credits. Not offered 1997-98. Next offered fall 1998. American Studies 201 will deal with American popular culture in the period between 1900 and the end of World War II. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines and music, we will try to better understand the ways in which popular culture shapes and reflects American values. The course will also depict popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and the less powerful, seek to "control" images
and themes. Topics for 201 include: the Western, Cultural Heroes and the Cult of Individualism in the 1920s; The Hays Code and the Black Sox Scandal; Mae West and the "New Women"; Advertising in an Age of Consumption; Guns and G-Men; Jackie Robinson and the American Dilemma.

[AM ST 202] Popular Culture in the United States 1945 to Present
Spring. 4 credits. Not offered 1997–98.

Next offered spring 1999. American Studies 202 will treat the period from 1945 to the present. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines and music, we will try to better understand the ways in which popular culture shapes and/or reflects American values. The course will also depict popular culture as "contested terrain," the place where social classes, racial and ethnic groups, women and men, the powerful and the less powerful, seek to "control" images and themes. Topics for 202 include: the "Trekkies" and "Star Wars," and "Survivor" television; soap operas; "Gross-out" movies; Elvis, The Beatles, and Guns 'n Roses; Gothic Romances; People Magazine and USA Today.

[AM ST 251] Black Religious Traditions from Slavery to Freedom (also History 251 and Religious Studies 251)
For description, see HIST 251.

[AM ST 258] Historical Development of Women as Professionals, 1800 to the Present (also Human Development and Family Studies 256, History 238, and Women Studies 238)
Spring. 3 credits. J. Brumberg.

[AM ST 260] Introduction to American Indian Literature (also English 260)
Fall. 4 credits. D. Moore.
For description, see ENGL 260.

[AM ST 267] American Literary Identities: Nineteenth Century (also English 267)

[AM ST 275] The American Literary Tradition (also English 275)
Fall, spring. 4 credits. Fall, B. Maxwell; spring, D. Moore.
For description, see ENGL 275.

[AM ST 291] American 1920s: Literature and Culture (also English 291)

[AM ST 302] Social Movements in American Politics (also Government 302)
Fall. 4 credits. E. Sanders.
For description, see GOVT 302.

[AM ST 304] American Culture in Historical Perspective (also History 304)

[AM ST 311] Structure of American Political History (also History 311)
Fall. 4 credits. J. Silbey.
For description, see HIST 311.

[AM ST 312] Structure of American Political History (also History 312)
Spring. 4 credits. J. Silbey.
For description, see HIST 312.

[AM ST 316] The American Presidency (also Government 316)
Spring. 4 credits. E. Sanders.
For description, see GOVT 316.

[AM ST 320] Understanding Work in America 1800–1990 (also History 320)
This course examines both the experience and the perception of work in American life in the century framed by two fundamental formations: the emergence of a system of industrial capitalism largely nationalistic in its orientation and the development of a more international economic system in more recent times. Among the topics considered will be the effects of technological change, its impact on the experience of work across numerous occupational categories, and the changing perceptions of work as reflected in contemporary cultural expression, literature, and commentary across the century.

[AM ST 324] Varieties of American Dissent, 1880–1980 (also History 324)
Fall. 4 credits. N. Salvatore.
The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course will explore the varieties of economic, political, and cultural dissent in America between 1880 and 1990, and will examine how understanding dissent in its specific historical context illuminates major aspects of American life and culture.

[AM ST 330] The Age of Jackson, 1815–1850 (also History 330)

[AM ST 331] American Civil War and Reconstruction, 1860–1877 (also History 331)

[AM ST 332] The Urbanization of American Society: 1600 to 1860 (also History 332)

[AM ST 333] The Urbanization of American Society: 1860 to 2000 (also History 333)

[AM ST 336] The American Ethos of Entrepreneurialism: Capitalism and Society in Developing America, 1607–1877 (also History 336)

[AM ST 337] Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840–2000 (also History 337)

[AM ST 345] Intellectual/Cultural Life of Nineteenth-Century Americans (also History 345 and Religious Studies 345)
Fall. 4 credits. R. L. Moore.
For description, see HIST 345.

[AM ST 346] Modernization of the American Mind (also History 346)
Spring. 4 credits. R. L. Moore.
For description, see HIST 346.

[AM ST 359] American Families in Historical Perspective (also Human Development and Family Studies 359, Women Studies 357, and History 359)

[AM ST 360] Painting and Everyday Life in Nineteenth-Century America (also History of Art 360)

[AM ST 361] Early American Literature (also English 361)
Fall. 4 credits. S. Samuels.
For description, see ENGL 361.

[AM ST 362] The American Renaissance (also English 362)
Spring. 4 credits. J. Porte.
For description, see ENGL 362.

[AM ST 366] The Nineteenth-Century American Novel (also English 366)

[AM ST 367] The Modern American Novel (also English 367)

[AM ST 369] Survey of African American Literature to 1917 (also English 375)
Fall. 4 credits. J. Goldsby.
For description, see ENGL 375.

[AM ST 371] American Poetry to 1950 (also English 371)

[AM ST 374] 19th-Century American Women Writers (also English 374 and Women's Studies 374)
Spring. 4 credits. B. Maxwell.
For description, see ENGL 374.

[AM ST 378] American Political Thought from Madison to Malcolm X (also Government 366)

[AM ST 392] Asian American Literature (also English 392 and Asian American Studies 392)
Fall. 4 credits. S. Wong.
For description, see ENGL 392.

[AM ST 394] Topics in American Indian Literature: Native Cultural Studies (also English 394)
Spring. 4 credits. D. Moore.
For description, see ENGL 394.

[AM ST 398] Independent Research
Fall and spring. 1–4 credits. By permission only. J. Porte.
This is a course of individualized research for junior or senior students. Topics, readings, and writing requirements will be designed through consultation between the student and the instructor.
AM ST 399 Readings in American Studies
Fall and spring. 1-4 credits. By permission only. J. Porte.
This is a course of individualized readings for junior or senior students. Topics, readings, and writing requirements will be designed through consultation between the student and the instructor.

AM ST 411 Seminar: American Political History [also History 411]
4 credits. Not offered 1997-98.

AM ST 417 History of Female Adolescence [also Human Development and Family Studies 417; Women Studies 410 and History 458]
Spring. 3 credits. J. Brumberg.
For description, see HDFS 417.

AM ST 419 Seminar in American Social History [also History 419]
Spring. 4 credits. N. Salvatore.
For description, see HIST 419.

AM ST 421 Cultural Taste Levels in Historical Perspective [also History 421]
4 credits. Prerequisite: permission of instructor. Not offered 1997-98.

AM ST 431 Cultural Taste Levels in the American Civil War (also History 431)
Fall. 4 credits. J. Porte.
For description, see HIST 431.

AM ST 465 Proseminar in American Studies [also English 465]
Spring. 4 credits. J. Porte.
Selected topics in American history, literature, the arts, politics, and popular culture. Recommended for American Studies majors.

AM ST 467 Studies in American Fiction: 1870-1915 [also English 467]
Fall. 4 credits. J. Porte.
For description, see ENGL 467.

AM ST 471 American Indian Women's Literature [also English 471]
Fall. 4 credits. K. Shanley.
For description, see ENGL 471.

AM ST 479 Jewish-American Writing [also English 479 and Jewish Studies 478]
4 credits. Not offered 1997-98.

AM ST 485 American Modernist Writing [also English 485]
4 credits. Not offered 1997-98.

AM ST 492 Honors Seminar II, Writing the Civil War [also English 492]
Spring. 4 credits. Permission by instructor. S. Samuels.
For description, see ENGL 492.

AM ST 493-494 Honors Essay Tutorial 493, Fall; 494, Spring. Up to 4 credits each semester. See J. Porte for appropriate advisers.

AM ST 500 Research Seminar in American Studies [also History 500]
Fall or spring. Offered in Cornell-in-Washington Program only. J. H. Silbey and others.
For description, see HIST 500.

AM ST 521 Seminar in American Cultural Studies [also History 521]
4 credits. Not offered 1997-98.

AM ST 665 American Political Thought [also Government 665]
4 credits. Not offered 1997-98.

Center for Applied Mathematics
The Center for Applied Mathematics administers a broadly based interdisciplinary graduate program that provides opportunities for study and research over a wide range of the mathematical sciences. This program is based on a solid foundation in analysis, algebra, and methods of applied mathematics. The remainder of the graduate student's program is designed by the student and his or her Special Committee. For detailed information on opportunities for graduate study in applied mathematics, students should contact the director of the Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall.

There is no special undergraduate degree program in applied mathematics. Undergraduate students interested in an application-oriented program in mathematics may select an appropriate program in the Department of Mathematics, the Department of Computer Science, or some department of the College of Engineering.

A listing of selected graduate courses in applied mathematics can be found in the description of the center in "Interdisciplinary Centers, Programs, and Studies."

Archaeology Program

Archaeology is an interdisciplinary field at Cornell, which is one of the few universities in the United States to offer a separate archaeology major. Program faculty members, affiliated with several departments, coordinate course offerings and help students identify opportunities for fieldwork, graduate study, and professional positions.

The Major
Prospective majors must complete Archaeology 100 or one of the basic courses as defined below before they will be admitted to the major. This initial course will not be counted toward the major requirements.

Because the major draws on the teaching and research interests of faculty from many departments to present a broad view of the archaeological process, interested students should discuss their course of study with a participating faculty member as early as possible. In some areas of specialization, intensive language training should be coordinated with other studies as early as the freshman year.

Once admitted to the major, students must take an additional 32 credits from the courses listed below, selected in consultation with a major adviser of their choosing. These courses should provide exposure to a broad range of archaeologically known cultures and the methods of revealing and interpreting them. Sixteen of the credit hours should be at the 300 level or above. At least two courses must be taken from each of categories B-E.

Courses basic to the discipline of archaeology are marked with the word "Basic" after the number of credit hours. It is recommended that majors who are planning to pursue graduate studies in archaeology take at least two of the basic courses in each category. Further courses in languages and in geology are also recommended.

Honor.
Honors in archaeology is awarded on the basis of the quality of an honors essay and the student's overall academic record. Prospective honors students should have a 3.5 grade point in the major and a 3.0 grade point overall. They should consult with the director of undergraduate studies before the beginning of the senior year. The honors essay is normally prepared in consultation with a faculty adviser during the senior year; students may enroll in Archaeology 481, fall, 492, spring for this purpose.

Fieldwork.
Every student should gain some practical experience in archaeological fieldwork on a project authorized by his or her adviser. This requirement may be waived in exceptional circumstances. The Jacob and Hedwig Hirsch bequest provides support for a limited number of students to work at excavations sponsored by Cornell and other approved institutions.

The Concentration
Students in Cornell schools and colleges other than Arts and Sciences may elect a concentration in archaeology. To concentrate in archaeology, the student must complete five courses, all with a grade of C or better. The five courses must consist of either (1) Archaeology 100 and four other courses from categories B-D, at least three of which must be basic courses, or (2) five courses from categories B-D, at least four of which must be basic courses. Concentrators are encouraged to gain some fieldwork experience. They are eligible on the same basis as majors for Hirsch Scholarships in support of fieldwork.

Freshman Writing Seminars
For course descriptions, see the freshman writing seminar brochure.

A. Introductory Courses and Independent Study Courses

ARKEO 100 Introduction to Archaeology
Spring. 3 credits. Staff.
A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies illustrate current methods and interpretive frameworks. Guest lectures by members of the Cornell Archaeology Program are an integral part of the course.

ARKEO 300 Individual Study in Archaeology and Related Fields
Fall and spring. Credit to be arranged. Prerequisite: Archaeology 100 or permission of instructor.
Students pursue topics of particular interest with the guidance of a faculty member.
ARKEO 481-482 Honors Thesis
481. Fall, 482. Spring. S-U only. Prerequisite: admission to Honors Program. The student, under faculty direction, will prepare a senior thesis.

ARKEO 600 Special Topics in Archaeology
Fall and spring. 4 (V) credits. Students pursue advanced topics of particular interest under the guidance of a faculty member(s).

ARKEO 681-682 Master's Thesis
681. Fall, 682. Spring. S-U only. Limited to students admitted to Master's Program in Archaeology. Students, working individually with faculty member(s), prepare a Master's Thesis in Archaeology.

B. Theory and Interdisciplinary Approaches

ARKEO 202 Interpretive Archaeology
(also Anthropology 202) #
Fall. 3 credits. Basic. Limited to 50 students. For description, see ANTHR 202.

ARKEO 203 Early Peoples: The Archaeological and Fossil Record
(also Anthropology 203)

ARKEO 317 Stone Age Archaeology
(also Anthropology 317)
Fall. 4 credits. T. P. Volman.
For description, see ANTHR 317.

ARKEO 409 Approaches to Archaeology
(also Archaeology 609 and Anthropology 409/609)
For description, see ANTHR 409.

ARKEO 494 Seminar in Archaeology:
The Archaeology of Human Origins
(also Anthropology 494) @ #
Spring. 4 credits. T. P. Volman.
For description, see ANTHR 494.

[LA 261 Urban Archaeology
(also CRP 261)
For description, see LA 261.]

LA 569 Archaeology in Preservation Planning and Design
(also CRP 569)
Spring. 3 credits. S. Baugher.
For description, see LA 569.

C. Old World Archaeology

ARKEO 221 Minoan-Mycenaean Art and Architecture
(also Classics 221 and History of Art 221) #
For description, see CLASS 221.

ARKEO 233 Archaeology in Action II
(also History of Art 225 and Classics 233) #
Spring. 3 credits. Prerequisite: permission of instructor. Not offered spring 1998. P. I. Kuniholm.

ARKEO 262 Laboratory in Landscape Archaeology
(also Landscape Architecture 262)
For description, see LA 262.

ARKEO 263 Introduction to Biblical History and Archaeology
(also NES 263, Jewish Studies 263, and Religious Studies 264) # @
Fall. 3 credits. J. Zorn.
For description, see NES 263.

ARKEO 275 Ancient Seafaring
(also Near Eastern Studies 261) # @
For description, see CLASS 275.

ARKEO 351 The City of Rome
(also Classics 351 and History of Art 321) #
Fall. 3 credits. M. Landon.
For description, see CLASS 351.

ARKEO 360 Introduction to the Arts of China
(also History of Art 360) # @
Fall. 4 credits. S. Oertling.
For description, see ART H 360.

ARKEO 417 Early Medieval Archaeology and Literature
(also Archaeology 617; English 417 and 617)
4 credits. Prerequisite: permission of instructor. Enrollment limited to 15 students. This course may be used as one of the three pre-1800 courses required of English majors. Not offered 1997-98; next offered 1998-99. R. T. Farrell.
For description, see ENGL 417.

ARKEO 425 Seminar on the Bronze Age Architecture of Asia Minor
(also Art History 425 and Classics 430)
4 credits. Prerequisite: permission of instructor. Not offered 1997-98. P. I. Kuniholm.

ARKEO 432 Sardis and the Cities of Asia Minor
(History of Art 424 and Classics 432) #
4 credits. Prerequisite: permission of instructor. Not offered 1997-98. A. Ramage.

ARKEO 434 The Rise of Classical Greece
(also History of Art 434 and Classics 434-434) #
Spring. 4 credits. Recommended. Classics 220 or 221 or History of Art 220 or 221, or permission of instructor. P. I. Kuniholm.
For description, see ART H 434.

ARKEO 435 Seminar on Roman Art and Archaeology
(also Classics 435 and History of Art 427) #
Spring. 4 credits. Prerequisite: permission of instructor. A. Ramage.
For description, see ART H 427.

ARKEO 520 Seminar in Classical Archaeology
(also History of Art 520 and Classics 630)
Fall. 4 credits. P. I. Kuniholm.
For description, see ART H 520.

ARKEO 617 Early Medieval Archaeology and Literature
(also Archaeology 417; English 417 and 617)
For description, see ENGL 417.

ARKEO 628 The Prehistoric Aegean
(also Classics 629) #
4 credits. For graduate students, and advanced undergraduates with permission of instructor. Not offered 1997-98; next offered spring 1999. J. E. Coleman.
For description, see CLASS 628.

CLASS 220 Introduction to Art History:
The Classical World
(also History of Art 220) #
Fall. 4 credits. A. Ramage.
For description, see ART H 220.

CLASS 322 Greeks and Their Neighbors
(also History of Art 328) #
4 credits. Prerequisite: Classics 200 or 221, or permission of instructor. Not offered 1997-98; next offered 1998-99. J. E. Coleman.
For description, see CLASS 322.

CLASS 326 Greek Cities and Towns
(also History of Art 326) #
For description, see CLASS 326.

CLASS 329 Greek Sculpture
(also History of Art 329) #
For description, see CLASS 329.

CLASS 333 Greek and Roman Mystery Cults and Early Christianity
(also Religious Studies 333) #
For description, see CLASS 333.

ART H 322 Arts of the Roman Empire
(also Classics 350) #
For description, see ART H 322.

ART H 325 Greek Vase Painting
(also Classics 325) #
Spring. 4 credits. A. Ramage.
For description, see ART H 325.

ART H 327 Greek and Roman Coins
(also Classics 327) #
Fall. 4 credits. A. Ramage.
For description, see ART H 327.

[NES 367 History and Archaeology of Ancient Egypt @ #

B. New World Archaeology

ARKEO 355 Ancient Mexico and Central America
(also Anthropology 355) # @
For description, see ANTHR 355.

ARKEO 403 Seminar in Archaeology
(also Anthropology 403) @ #
Fall. 4 credits. Not offered 1997-98.

[ANTHR 456 Mesoamerican Religion, Science, and History @ #
Fall. 4 credits. Not offered 1997-98.]

LA 360 Pre-Industrial Cities and Towns of North America
(also CRP 360)
Fall. 3 credits. S. Baugher.
For description, see LA 360.
Asian American Studies Program

The Asian American Studies Program is a university-wide academic program housed administratively within the College of Arts and Sciences. Its aim is to promote teaching, research, and educational activities related to Asian Americans and to serve as a resource to the campus and regional communities. The program’s undergraduate courses, offered within the program and cross-listed with departments in various colleges, meet distribution requirements and count toward a concentration in Asian American Studies. The program does not offer a graduate course of study, but students can undertake graduate work in Asian American Studies within selected disciplines of the university.

Undergraduate Concentration

The program’s undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Asians in America. The course of study stresses developments within the United States, but also underscores the transnational and comparative aspects of Asian America and the field’s connections with African American, American Indian, Latino, and Women’s Studies. Students must work with a faculty adviser from among the program’s affiliated faculty and must complete at least fifteen (15) units of credits as follows: (a) AAS 110 and two (2) additional courses in Asian American Studies; (b) one (1) course in African, American Indian, Latino Studies, or Women’s Studies; and (c) one (1) course in East Asian, South Asian, or Southeast Asian Studies. Students must file an application for the concentration with the Asian American Studies Program.

Resource Center

The program’s Asian American Studies Resource Center provides meeting space for the more than twenty-five undergraduate student organizations of the Cornell Asian Pacific Student Union and the graduate student Asian Pacific Graduate Association. It also holds a modest print collection of books, periodicals, and newspapers; a current news clip file; a comprehensive data base of publications on Asian Americans since 1977; and a sizable collection of videotapes on the Asian American experience.

Research

The program encourages faculty and student research on Asian Americans by sponsoring guest lectures, conferences, film festivals, readings, and exhibitions. It also funds research projects and student travel to conferences and research sites. The Asian American Studies Workshop is the program’s principal research initiative, engaging Cornell’s faculty and students with invited faculty from other universities in a year-long intensive study of selected themes.

Affiliated Faculty

Gary Y. Okhiro, director, B. Anderson (Government), T. Chakravarti (Human Development), V. P. Kayastha (Kroch Library), J. V. Koschmann (History), L. C. Lee (Human Development), V. Munasinghe (Anthropology), V. Nee (Sociology), G. Okhiro, (History), R. E. Ripple (Economics), N. Sakai (Asian Studies), S. Samuels (English), P. S. Sangren (Anthropology), A. M. Smith (Government), K. W. Tayse (Asian Studies), S. Tien (Gannett Health Center), S. Wong (English), D. Yeh (Vice President Student/ Academic Services).

Courses

AAS 110 Introduction to Asian American Studies

Fall and spring. 3 credits. Interdisciplinary, cross-cultural introduction to Asian American Studies focusing on contemporary issues. Major themes include: identity and stereotypes, gender, family, community, education, migration and labor, and anti-Asianism. Coverage will be given to both Hawaii and the U.S. mainland, and to Asian Indians, Chinese, Filipinos, Hawaiians, Japanese, Koreans, and Southeast Asians.

AAS 213 Asian American History

For description, see HIST 213.

AAS 303 Asians in the Americas: A Comparative Perspective

Fall. 4 credits. The common perception of ethnicity is that is a “natural” and an inevitable consequence of cultural difference. “Asians” overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the “Asians”? On what basis can we label Asians an ethnic group? Although there is a significant Asian presence in the Caribbean, the category “Asian” itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course will examine the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies of the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

AAS 350 The Art and Politics of Defining the Self in Media Images

Fall. 4 credits. Spring. 3 credits. Not offered 1997–98. The focus of this course is an exploration of the way films deal with the representation of people of poor within the American experience. Through the analysis of selected films and class discussions we will explore filmic representations of history, culture, class, gender, and identity.

AAS 392 Asian American Literature

For description, see ENGL 392.

AAS 412 Undergraduate Seminar in Asian American History

Spring. 4 credits. Reading and research seminar that will cover various topics in Asian American history. The topic will be the idea of the “yellow peril” in European and American thought.
The Biology and Society major, which involves faculty from throughout the university, is offered by the Department of Science & Technology Studies. Students in the College of Arts and Sciences and the College of Human Ecology are eligible for the major. In addition, students in the College of Agriculture and Life Sciences can develop an approved sequence of courses from the Biology and Society curriculum under general studies. The major is coordinated for students by the Biology and Society office. Students can get information, specific course requirements, and application procedures for the major from the undergraduate records office in 275 Clark Hall, 255–6047.

Because the major is multidisciplinary, students must attain a basic understanding of the several disciplines it comprises. The curriculum includes courses in ethics; mathematics; statistics; history, philosophy, and social studies of science and biology; and basic biology (e.g., genetics and development; biochemistry and molecular-cell biology; ecology; evolutionary biology) as well as integrative courses offered through Biology and Society. In addition, majors are required to take a core course and must develop a theme: an intellectually coherent grouping of courses representative of their special interest in Biology and Society. Recommended themes in the Biology and Society major include biology, behavior, and society; biology, and humanities; population; biology and public policy; environment and society; food agriculture, and society; and health and society. Students may also develop their own individually tailored themes (which in recent years have included topics such as biotechnology and society, and agriculture, environment, and society). In consultation with their faculty advisor, students select courses that meet the foundation and core course requirements so as to build a coherent theme. Sample curricula for the recommended themes and for several student-developed themes are available in the Biology and Society office.

There are student advisers and faculty available (according to posted office hours or by appointment) in the Biology and Society offices, 275 Clark Hall or 279 Clark Hall, to answer questions and to provide assistance.

Admission to the Major
All students should have completed a year of college-level biology and submit an application during their sophomore year. Juniors are considered on a case-by-case basis. Upper-division applicants should realize the difficulties of completing the major requirements in fewer than two years. The application includes (1) a one-page statement explaining the student's intellectual interests in the Biology and Society major and why the major is consistent with the student's academic goals and interests; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling Biology and Society requirements, including courses taken and those the student plans to take; and (4) a transcript of work completed at Cornell University and elsewhere, if applicable, current as of the date of application.

Acceptance into the major requires completion of the course sequence in introductory biology. Sophomore year is the process of completing this prerequisite may be admitted to the major on a provisional basis. It is the student's responsibility to assure that final acceptance is granted on satisfactory completion of the introductory biology sequence. Although only introductory biological science is a prerequisite for acceptance, students will find it useful to have completed some of the other requirements (listed below) by the end of their sophomore year, preferably in the first semester. Human Ecology students should also consult the current Human Ecology Guide and meet with the college advising coordinator, Kay Obendorf, 202 Martha Van Rensselaer Hall, 255–3151.

Major Requirements

1) Basic courses
A. Biological sciences 101–104 or 105–106 or 107–108 (prerequisite for admission to Biology and Society)

B. College calculus (one course)* Math 106, 111, 112 or any other higher level calculus

Recommended but not required:
- General chemistry (one year sequence)
- Biochemistry and other chemistry courses:
  - Chemistry 103–104, 207–208, or 215–216

2) Foundation Courses (should be completed by end of junior year)
A. Ethics: One course; B&SOC 205 (also S&TS 205) or B&SOC 206 (also S&TS 206)

B. Social sciences/humanities foundation:
  - Two courses; one from any of the following subject areas: History of Science; Philosophy of Science; Sociology of Science; Politics of Science; and Science Communication*

C. Biology foundation (Breath requirement):
  - Three courses; one from each of the following subject areas:
    - Ecology (BIO ES 261); Evolutionary Biology (BIO ES 278); Biochemistry, Molecular and Cell Biology (BIO BM 251 or 350 or 351 or 353); Microbiology (BIO BM 290); Genetics and Development (BIO GD 281 or 282 or Plant Breeding 225); Neurobiology and Behavior (BIO NB 221 or 222); Botany (BIO PL 241); and Anatomy and Physiology (BIO AF 311 or NS 341 but NOT BIO AF 212)

D. Biology foundation (Depth requirement):
  - One biology course for which one of the above (B.C.) is a prerequisite

E. Statistics: One course selected from BTRY 200, ILR 210, BTRY 215, AG EC 310, EDUC 353, Soc 301, Psych 350, Econ 319, ORIE 370, BTRY 601, CRP 326

3) Core Course: (one course). Should be completed by end of junior year
B&Soc 301 Biology and Society: The Social Construction of Life (also S&TS 401); or Phil 286 Science and Human Nature (also S&TS 286)

4) Theme (five courses that correspond to the theme selected by the student). These courses must be above the 200- level, at least 3 credit hours and taken for a letter grade)
A. Natural Science Issues/Biology Elective (two courses). Select from the list of B&SOC approved Natural Science Issues courses or choose course(s) with introductory biology as a prerequisite from: ALS, AN SC, BIOSCI, BIOTECHNOLOGY, FOOD, HPDS, NS, NTRES, PL BR, PL PA, PSYCH, VTMED.

B. Humanities/social sciences electives** (Two courses. Courses from the list of Senior Seminars may be used as theme electives if not used to meet another requirement).

C. Senior Seminar (One course taken senior year). Courses change yearly.

- Students may petition to take a second statistics course (an advanced course, in sequence with the statistics course taken in the foundation) in place of the calculus requirement.

- Among the courses taken to meet the social sciences and humanities requirements (2.A, 2.B, 3, and 4.C), a minimum of two social science courses and two humanities courses must be chosen. History of science and philosophy of science courses may be counted toward the humanities requirement for the major.

** Independent Study

Projects under the direction of a biology and society faculty member are encouraged as part of the program of study in the student’s theme area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1-4 credits in Biology and Society 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology and Society office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented undergraduate students whose major is Biology and Society (B&SOC). Students who enroll in the honors program are expected, with faculty guidance, to do independent study and research dealing with issues in biology and society. Students who participate in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career.

Biology and Society majors are considered for entry into the honors program at the end of the spring semester before their senior year. Application forms for the honors program are available in the Biology and Society office, 275 Clark Hall. The honors program is available to Biology and Society majors from the College of Arts and Sciences. Biology and Society majors in the Colleges of Human Ecology and Agriculture and Life Sciences must be selected by an honors committee within their college. To qualify for the Biology and Society honors project, students must have an overall Cornell cumulative grade-point average not lower than 3.50, have formulated a research topic, and have found a project supervisor (with a Cornell appoint-

HIST 282 Science in Western Civilization (also Science and Technology Studies 282)
Spring. 4 credits. P. Dear.
For description, see HIST 282.

[S&TS 233 Agriculture, History, and Society: From Squanto to Biotechnology
Fall. 4 credits. Not offered 1997-98. M. Rossiter.]

[S&TS 332 From Hippocrates to HMO’s: An Introduction to the History of Medicine
Summer. 4 credits. J. Harkness.

S&T 355 Computers: From Babbage to Gates
Fall. 4 credits. M. Dennis.

S&T 390 Science in the American Polity: 1800-1960 (also GOVT 308)
Fall. 4 credits. M. Dennis.
For description, see S&TS 390.

S&T 433 Comparative History of Science
Spring. 4 credits. M. Rossiter.

S&T 444 Historical Issues of Gender and Science (also Women’s Studies 444)
Fall. 4 credits. M. Rossiter.
For description, see S&T 444.

2. Philosophy of Science

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)
Spring. 4 credits. May be used to meet the philosophy of science requirement if not used to meet the core course requirement.
For description, see PHIL 286.

PHIL 381 Philosophy of Science: Knowledge and Objectivity (also Science and Technology Studies 381)
Fall. 4 credits. Limited to 30 students. R. Boyd.
For description, see PHIL 381.

3. Sociology of Science

B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)
Fall. 4 credits. Prerequisite: two semesters of social science or humanities and one year of introductory biology. Limited to 75 students. May be used to meet the sociology of science requirement if not used to meet the core course requirement. C. Cussins.
See Core Courses for description.

B&SOC 342 Sociology of Science (also Science and Technology Studies 442 and City and Regional Planning 442)
For description, see S&TS 442.

HSS 246 Major Determinants of Human Behavior (also PAM 201)
Fall. 3 credits.

[R SOC 208 Technology and Society
Fall. 3 credits. Not offered 1997-98.]

[SO 434 The Sociology of Reproduction (also Women’s Studies 435)
Spring. 4 credits. Not offered 1997-98.
For description, see SOC 434.]
BIOBM 330 Principles of Biochemistry, Individual Instruction
Fall or spring. 4 credits.

BIOBM 331 Principles of Biochemistry, Lectures
Fall. 4 credits. (2 credits if taken after Biological Sciences 231.)

NS 262 The Cell and the External World
Spring. 3 credits.

2. Ecology

BIOES 261 Ecology and the Environment
Fall. 4 credits.

3. Genetics and Development

BIOGD 281 Genetics
Fall, spring, or summer. 3 credits.

BIOGD 282 Human Genetics
Spring. 3 credits. (2 credits if taken after Biological Sciences 281.)

PL BR 225 Plant Genetics
Spring. 4 credits. Offered alternate years.

4. Evolutionary Biology

BIOES 278 Evolutionary Biology
Spring. 4 credits.

5. Microbiology

BIOMI 290 General Microbiology
Lectures
Fall, spring, or summer. 3 credits.
Prerequisites: BIOMI 101-102 and 103-104 and CHEM 104 or 208, or equivalent.
Recommended: concurrent registration in BIOMI 291.

6. Neurobiology and Behavior

BIONB 221 Neurobiology and Behavior I: Introduction to Behavior
Fall. 3 or 4 credits (4 credits with discussion and written projects). Not open to freshmen.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology
Spring. 3 or 4 credits. (4 credits with discussion and written projects). Not open to freshmen. Limited to 20 students.

7. Botany

BIOPL 241 Introductory Botany
Fall. 3 credits. Prerequisite: one year of introductory biology or permission of instructor.

8. Physiology and Anatomy

BIOAP 214 Biological Basis of Sex Differences
Fall. 3 credits. Not offered 1997-98.

BTRY 215 Introduction to Statistical Methods
Fall. 3 credits.

BTRY 601 Statistical Methods I
Fall. 4 credits.

CRP 320 Introduction to Statistical Reasoning for Urban and Regional Analysis
Fall. 3 credits.

ECON 319 Introduction to Statistics and Probability
Fall or summer. 4 credits. Prerequisites: Economics 101-102 and Mathematics 111-112.

ILRST 210 Statistics: Statistical Reasoning
Fall and spring. 4 credits.

PSYCH 350 Statistics and Research Design
Fall. 4 credits.

SOC 301 Evaluating Statistical Evidence
Fall. 4 credits.

III. Core Courses

B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)
Fall. 4 credits. Prerequisite: two semesters of social science or humanities and one year of introductory biology or permission of instructor. Limited to 75 students. C. Cussins. Critical thinking about the diverse influences shaping the life sciences. Topics include evolution and natural selection, heredity and genetic determinism, biotechnology and reproductive interventions. We interpret episodes, past and present, in biology in light of scientists' historical location, economic and political interests, use of language, and ideas about causality and responsibility. Readings, class activities, and written assignments are designed so that students develop interpretive skills and explore their own intellectual and practical responses to controversies in biology and society.

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)
Spring. 4 credits.

For description, see PHIL 286.

IV. Themes

A. Natural Science Issues/Biology Elective (two courses). Select from the list of B&SOC approved Natural Science Issues courses or choose course(s) with intro biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTO, FOOD, HDFS, NS, NTRES, PL BR, PL PA, PSYCH, VTMED.

ASTRO 202 Our Home in the Solar System
Spring. 3 credits.

[BIOAP 214 Biological Basis of Sex Differences (also Biology and Society 214 and Women's Studies 214)]
Fall. 3 credits. Not offered 1997-98.

For description, see BIOAP 214.]
[BIOES 275 Human Biology and Evolution (also Anthropology 275 and Nutritional Sciences 275)] Fall. 3 credits. Offered alternate years. Not offered 1997-98.

BIOPL 247 Ethnobiology Fall. 3 credits.

[HDFS 347 Human Growth and Development: Biological and Behavioral Interactions (also Biology and Society 347 and Nutritional Sciences 347)] Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent, and Human Development and Family Studies 115 or Psychology 101. Offered alternate years. Not offered 1997-98.

HDFS 370 Experimental Psychopathology Spring. 3 credits.

NS 222 Maternal and Child Nutrition Spring. 3 credits.

NS 361 Biology of Normal and Abnormal Behavior (also Psychology 361) Fall. 3 credits. For description, see NS 361.

NTRES 201 Environmental Conservation Spring. 3 credits.

Examples of biology electives

AN SCI 300 Animal Reproduction and Development Spring. 3 credits.

NS 331 Physiological and Biochemical Bases of Human Nutrition Spring. 3 credits.

B. Humanities/Social Science elective (two courses)

Courses listed earlier as social science/humanities foundation courses (2.B.) are particularly appropriate as social science/humanities electives. However, a single course cannot be used to meet both requirements. Additional courses that are recommended as social science or humanities electives are:

Examples of social science electives

ARME 464 Economics of Agricultural Development Spring. 3 credits.

ANTHRO 211 Nature and Culture Spring. 3 credits.

[BIOES 673 Human Evolution: Concepts, History, and Theory (also Anthropology 673)] Fall. 3 credits. Not offered 1997-98. For description, see BIOES 673.

CRP 480 Environmental Politics Spring. 4 credits.

CRP 451/551 Environmental Law Fall. 4 credits.

[HDFS 241 History of Childhood in the United States Spring. 3 credits. Not offered 1997-98.]

[HDFS 258 The Historical Development of Women as Professionals, 1800 to the Present (also Women’s Studies 238 and History 230) Fall. 3 credits. Limited to 120 students. Not offered 1997-98.]

HSS 315 Human Sexuality Spring. 3 credits.

HSS 325 Health Care Services and the Consumer Fall. 3 credits. Offered alternate years.

HSS 330 Ecology and Epidemiology of Health Spring. 3 credits.

HSS 335 Contemporary Issues in Women’s Health Fall. 3 credits.

HSS 634 Health Care Organization—Providers and Reimbursement Fall. 3 credits.

HSS 688 Long-Term Care and the Aged: Alternative Health and Social Services Delivery Systems Spring. 3 credits.

NS 245 Social Science Perspectives on Human Nutrition Fall. 3 credits.

NS 457 National and International Food Economics (also Economics 374) Spring. 3 credits.

NTRES 400 International Environmental Issues Fall. 4 credits.

PSYCH 326 Evolution of Human Behavior Fall. 4 credits.

R SOC 201 Population Dynamics (also Sociology 205) Spring. 3 credits.

R SOC 205 Rural Sociology and International Development Spring. 3 credits.

R SOC 324 Environment and Society Spring. 3 credits.

[R SOC 490 Society and Survival Fall. 3 credits. Not offered 1997-98.]

Examples of humanities electives

NTRES 407 Religion, Ethics, and the Environment Spring. 4 credits.

PHIL 241 Ethics (by petition for breadth requirement) Spring. 4 credits.

PHIL 368 Global Climate and Global Justice (also Government 468) Fall. 4 credits.

[PHIL 681 Philosophy of Science (also Science & Technology Studies 681) Spring. 4 credits. Not offered 1997-98. For description, see PHIL 681.]

[S&T&S 626 Workshop on Law, Science, and Technology (also GOVT 626) Spring. 4 credits. Enrollment limited. Permission of the instructor required. Not offered 1997-98.]

C. Senior Seminars

BIO G 467 Seminar in the History of Biology (also Biology & Society 447, History 415, and Science & Technology Studies 447) Summer. 4 credits. For description, see BIO G 467.

BIO G 469 Food, Agriculture, and Society (also Biology & Society 469 and Science & Technology Studies 469) Spring. 3 credits. For description, see BioG 469.

BIOES 661 Environmental Policy (also Biology & Society 461 and Agriculture and Life Sciences 661) Fall, spring. 6 credits. For description, see BIOES 661.

[CEH 444 Housing for the Elderly: A Service Learning Experience Spring. 3 credits. Not offered 1997-98.]

[HDFS 470 Advanced Experimental Psychopathology Fall. 3 credits. Not offered 1997-98.]

HDFS 473 Schizophrenia Fall. 3 credits. Permission of instructor required.

[HDFS 610 Processes in Human Development Spring. 3 credits. Not offered 1997-98.]

HDFS 660 Social Development Spring. 3 credits. Permission of instructor required for undergraduates.

[HDFS 685 Seminar on “Critical Issues in Human Development: Research and Reality Spring. 3 credits. Not offered 1997-98. Permission of instructor required for undergraduates.”]

HSS 335 Contemporary Issues in Women’s Health Fall. 3 credits.

HSS 625 Health Care Services: Consumer and Ethical Perspectives Fall. 3-4 credits. Permission of instructor required. If using this course as a senior seminar, B&SOC majors must take it for 4 credits by writing a major paper. Enrollment limited—preference given to HSS students.

HSS 631 Managed Health Delivery Systems: Primary-Ambulatory Care Spring. 3 credits.

NS 349 Geriatric Nutrition Fall. 3 credits.

NS 421 Nutrition and Exercise Spring. 2-3 credits.

[R SOC 408 Human Fertility in Developing Nations (also Biology & Society 404)] Spring. 3 credits. Not offered 1997-98. For description, see R SOC 408.

[R SOC 418 Population Policy (also Biology & Society 414)] Spring. 3 credits. Not offered 1997-98. For description, see R SOC 418.]
write an honors thesis. The project must begin during the first semester. At the end of the first semester, a letter grade will be assigned and the advisers, in consultation with the Director of Undergraduate Studies, will evaluate whether or not the student should continue working on an honors project. Students who do not complete the honors honors program for the second semester will receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

Applications and information are available in the Biology and Society office, 275 Clark Hall.

Cognitive Studies Program

J. Halpem (computer science), B. Lust (human development and family studies, modern languages and linguistics), codirectors. C. Cardie, R. Constable, B. Donald, J. Halpem, D. Huttenlocher, R. Rubinfeld, R. Zabih (computer science); A. Hedge (design and environmental analysis); J. Dunn, J. Novak, R. Ripple, D. Schrader (education); R. Canfield, S. Ceci, B. Koslowski, B. Lust, M. Potts, S. Rossiter, G. Suci, E. Wethington (human development and family studies); J. Russo (Johnson Graduate School of Management), J. Bowers, A. Cohn, M. Diesing, J. Hair, W. Harbert, H. Hodes, B. Lust, J. Novak, R. Ripple, D. Schrader (education); J. Halpem (computer science), B. Lust (human development and family studies); J. Russo (Johnson Graduate School of Management), J. Bowers, A. Cohn, M. Diesing, J. Hair, W. Harbert, H. Hodes, B. Lust, J. Novak, R. Ripple, D. Schrader (education).

The undergraduate concentration in Cognitive Studies is designed to enable students to engage in a structured program directly related to the scientific study of cognition and the mind. The concentration provides a framework for the design of structured, supervised programs of study in this growing interdisciplinary field. Such programs of study serve as complements to coursework in a single discipline as represented by an individual department. It is considered crucial that students gain a strong background in their major, independent of their work in the concentration. The Cognitive Studies Program faculty have designed five structured "tracks" that offer students different ways of satisfying the concentration. In addition, students are always able to construct their own programs of study subject to approval by their concentration adviser. In all cases, however, it is expected that students in the concentration will take Cognitive Studies 101, Cognitive Studies 201, and three courses at the 300 or 400 level in at least two departments. Even though only five courses are required to complete the concentration, we expect that students interested in cognitive studies will often end up taking more, and we encourage them to do an independent research project (COGST 470). The five tracks are as follows:

Students may take 3–5 credits per semester up to a maximum of 8 credits in B&SOC 499, Honors Project. Students should note that B&SOC 499 is to be taken in addition to those courses that meet the regular major requirements. The student and the project supervisor must reach clear agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of the first semester, a letter grade will be assigned and the advisers, in consultation with the Director of Undergraduate Studies, will evaluate whether or not the student should continue working on an honors project. Students who do not complete the honors program for the second semester will receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors. Applications and information are available in the Biology and Society office, 275 Clark Hall.
cation systems, or the linguistic constraints that help tailor text-based communication. They will come to see how the functional architecture of human memory guides the presentation and use of information in a wide array of settings. They will also learn how design constraints on computer hardware and software interact with human capacities and biases.

The Cognitive Studies in Context track consists of the following required courses:

- COGST 101, Introduction to Cognitive Science
- COGST 201, Cognitive Science in Context
- Laboratory Explorations of Cognitive Science in Ecological Settings.

In addition, three more upper-level approved courses in Cognitive Studies areas will normally be expected. The other four tracks are structured and customized curriculum. In all of the following, COGST 101 and COGST 201 are required and a set of three additional courses would be selected. Please note, many of these courses have substantial prerequisites.

2. Perception and Cognition

This track focuses on psychological, computational, and neurobiological approaches to the interface between perception and cognition. Students will develop a grasp of the continuum between sensory impressions and complex thought.

- COGST 101, Introduction to Cognitive Science
- COGST 201, Cognitive Science in Context
- COM S 462, Robotics and Machine Vision
- BIOND 326, The Visual System
- PSYCH 309, Development of Perception and Representation
- PSYCH 316, Auditory Perception
- PSYCH 418, Psychology of Music
- PSYCH 412, Laboratory in Cognition and Perception
- PSYCH 416, Modeling Perception and Cognition
- PSYCH 419, Neural Networks Laboratory

3. Language and Cognition

This track focuses on the representation, processing, and learning of language, as well as its role in cognition and culture. Students will acquire skills and knowledge in formal and applied linguistic theory, psycholinguistic experimentation, and computational modeling techniques.

- COGST 101, Introduction to Cognitive Science
- COGST 201, Cognitive Science in Context
- COM S 411, Programming Languages and Logic
- LING 203, Introduction to Syntax and Semantics
- LING/PHIL/COGST 270, Truth and Interpretation
- LING 301–302, Phonology I & II

4. Cognition and Information Processing

This track focuses on how the mind (or a computer) can encode, represent, and store information. Students will develop an understanding of concepts, categories, memory, and the nature of information itself.

- COGST 101, Introduction to Cognitive Science
- COM S 211, Computers and Programming
- COM S 212, Structure and Interpretation of Computer Programs
- COM S 472, Foundations of Artificial Intelligence
- COM S 473, Practicum in Artificial Intelligence
- PHIL 262, Philosophy of Mind
- PHIL 362, Philosophy of Mind
- PSYCH 309, Development of Perception and Representation
- PSYCH 311, Introduction to Human Memory
- PSYCH 412, Laboratory in Cognition and Perception
- PSYCH 413, Information Processing: Conscious and Non-conscious
- PSYCH 414, Comparative Cognition
- PSYCH 415, Concepts, Categories, and Word Meanings
- PSYCH 416, Modeling Perception and Cognition
- PSYCH 417, The Origins of Thought and Knowledge

5. Cognitive Neuroscience

This track focuses on neurobiological and computational approaches to understanding how perception and cognition emerge in the human brain. Students will acquire knowledge of what neural structures subserve what perceptual/cognitive processes, and how they interact.

- COGST 101, Introduction to Cognitive Science
- COGST 201, Cognitive Science in Context
- COM S 410, Data Structures
- COM S 401, Programming Languages and Software Engineering
- PSYCH 328, Biopsychology of Learning and Memory
- PSYCH 395, Introduction to Sensory Systems
- PSYCH 416, Modeling Perception and Cognition
- PSYCH 419, Neural Networks Laboratory
- LING 303–304, Syntax I & II
- LING 309–310, Morphology I & II
- LING 319–320, Phonetics I & II
- LING 325, Pragmatics
- LING 350/COGST 270, Representing Language: Knowledge Taught and Untaught
- LING 403, Introduction to Applied Linguistics
- LING 409, Psycholinguistics of Second Language Reading
- LING 421–422, Semantics I & II
- PHIL 332, Philosophy of Language
- PSYCH 215/LING 215, Psychology of Language
- PSYCH 370/LING 370, Language and Cognition
- PSYCH 415, Concepts, Categories, and Word Meanings
- PSYCH 416, Modeling Perception and Cognition
- PSYCH 436/LING 436/HDFS 436, Language Development
- PSYCH 425, Cognitive Neuroscience
- PSYCH 440, The Brain and Sleep

Students in any major of the College of Arts and Sciences are eligible to apply for any of the above versions of the concentration as well as to construct their own. Independent majors and College Scholars may also apply. Students from other colleges may apply, but colleges vary in their procedures for formal recognition of this concentration (contact the Cognitive Studies office for details). To enter the concentration formally, the student should consult with a member of the Cognitive Studies Undergraduate Concentration Committee (see below), who will assist the student with selection of a concentration advisor with expertise in the student's main areas of interest.

In addition to assisting in and approving the student's selection of courses, the concentration advisor serves as a general source of information about the field of cognitive studies, relevant resources around the university, and job and graduate school opportunities. Often, the advisor can help the student develop independent research experience.

A Cognitive Studies undergraduate laboratory and computer facility is available for all students with a Cognitive Studies concentration. This facility will help link resources from different laboratories across the Cornell campus as well as providing a central location for developing and conducting experimental research in cognitive studies.

Students who complete the concentration requirements will have their concentration in Cognitive Studies officially represented on their transcript. In addition, students who have made very substantial progress toward completing the requirements for the concentration will be eligible for enrollment in the Graduate Proseminar in Cognitive Studies during their senior year (COGST 773–774).

Concentration Application Procedures. The selection of courses will be individually tailored according to the student's interests. The Cognitive Studies Program faculty have designed five structured "tracks" (listed above) that offer students different ways of satisfying the concentration. In addition, students are always able to construct their own programs of study subject to approval by their concentration advisor. In all cases, however, it is strongly expected that students in the concentration will take COGST 101, COGST 201, and approved courses at the 400 level.

The student must gain approval for the selection of courses from his or her concentration advisor. The courses selected must form a coherent cluster that makes sense to both the adviser and the student. To be admitted to the concentration, the student must submit this Plan of Study to the Cognitive Studies undergraduate faculty committee for final approval.

Independent Research. The concentration encourages each student to be involved in independent research that bears on research issues in cognitive studies, if possible. COGST 470 is available for this purpose. It is recommended that students report on their research activities in an annual undergraduate forum. The Undergraduate Concentration Committee is committed to helping students find an appropriate research placement when needed.
 Initial inquiries concerning the undergraduate concentration should be made to the Cognitive Studies Program coordinator, Sue Wurster, cogst@cornell.edu, 255-6431, who will provide application materials and set up a meeting with a relevant member of the Undergraduate Concentration Committee.

The Committee for Undergraduate Concentration in Cognitive Studies consists of: Ramin Zahib, computer science, 5-8413, 4119C Upson Hall, RDZ@cs.cornell.edu; Draga Zec, linguistics, 5-0728, 217 Morrill Hall, DZ17@cornell.edu; Jason Stanley, philosophy, 5-6601, 216 Goldwin Smith, JCS72@cornell.edu; Beena Khurana, psychology, 5-6434, 222 Uris Hall, BK14@cornell.edu

Graduate Minor
For information, consult the program office (255 Uris Hall, 255-6431, cogst@cornell.edu or the director of graduate studies, Carol Rosen 255-0722, cgr1@cornell.edu).

Courses
Cognitive Studies

COGST 101 Introduction to Cognitive Science (also COM S 101, LING 170, PHIL 191, PSYCH 102)
Fall. 3 credits. M. Spivey-Knowlton. This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: language, categorization, memory, vision, and action.

COGST 201 Cognitive Science in Context: Laboratory Explorations of Cognitive Science in Ecological Settings (also PSYCH 201)
Fall or spring. 4 credits. Prerequisites: Introduction to Cognitive Science COGST 101 or written permission of the instructor. Fall: B. Halpem and staff. Spring. D. Field and staff.
A laboratory-oriented course designed to teach the theory and techniques of cognitive science in relation to the full range of both present and anticipated-future activities in the workplace, the classroom, and in everyday life. Lecture time is used to present laboratory exercise results, to supplement laboratory topics, and for discussion of primary research papers. State of the art computing, display (visual, auditory, and other perceptual/sensory systems), digital communication, and simulation approaches, including virtual reality models when relevant, are used to apply cognitive science principles and concepts to the analysis, exploration, and direct testing of human-machine interfaces that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real-life settings such as fixed and mobile offices, libraries, laboratories, point-of-sale locations, Internet and World Wide Web communications, manufacturing, storage and distribution facilities and systems, on-site maintenance and repair procedures, and personal and group transportation vehicles and systems.

COGST 301 Cognitive Studies in Context: Advanced Laboratory Investigations
Fall or spring. 4 credits. Staff. Designed for students who successfully complete COGST 201. This course offers intensive investigations into one of the topic modules covered in COGST 201. All students must have prior approval from the Cognitive Studies office before registering for this course.

COGST 470 Undergraduate Research in Cognitive Studies
Fall or spring. 1-4 credits. S-U grades optional. Prerequisite: permission of major adviser; written permission of Cognitive Studies faculty member who will supervise the research and assign the grade. Hours to be arranged. Cognitive Studies faculty.
Experience in planning, conducting, and reporting independent laboratory, field, and/or library research in an interdisciplinary area relevant to cognitive studies.

PHIL 270 Truth and Interpretation (also LING 270 and COGST 270)
Spring. 4 credits. J. Stanley and M. Diesing.
In this course, with the use of classic papers in the philosophy of language and linguistics, we will motivate and introduce the basic concepts behind the project of giving a rigorous theory of meaning for natural language. Our goal will be to understand how philosophers and linguists have used concepts such as reference and truth to explain linguistic content. We will also discuss how issues of learnability and language processing raise constraints for this project.

Computer Science

COM S 211 Computers and Programming
Fall or spring. 3 credits.

COM S 212 Structure and Interpretation of Computer Programs
Fall or spring. 4 credits.

COM S 280 Discrete Structures
Fall or spring. 4 credits.

COM S 381 (or 481) Introduction to Theory of Computing
Fall. 3 or 4 credits.

COM S 410 Data Structures
Fall or spring. 4 credits.

COM S 411 Programming Languages and Logics
Fall. 4 credits. Not offered every year.

COM S 462 Robotics and Machine Vision
Spring 1997. 3 credits. Not offered every year.

COM S 463 Robotics and Machine Vision Lab
Spring 1997. 2 credits. Not offered every year.

COM S 472 Foundations of Artificial Intelligence
Fall. 3 credits.

COM S 473 Practicum in Artificial Intelligence
Fall. 2 credits.

COM S 482 Introduction to Analysis of Algorithms
Spring. 4 credits.

COM S 486 Applied Logic (also Mathematics 486)
Fall or spring. 4 credits.

Education (College of Agriculture and Life Sciences)

EDUC 210 Psychology of Learning and Memory
Fall. 3 credits.

EDUC 212 Psychological Foundations of Education
Spring. 2-3 credits.

EDUC 311 Educational Psychology
Fall. 3 credits.

EDUC 402 Knowing and Learning in Science and Mathematics
Fall. 4 credits.

EDUC 472 Philosophy of Education
Fall. 3 credits.

Human Development and Family Studies (College of Human Ecology)

HDFS 115 Human Development
Fall or summer. 3 credits.

[HDFS 334 The Growth of the Mind
Spring. 4 credits. Not offered 1997-98.]

HDFS 344 Infant Behavior and Development
Fall. 3 credits.

HDFS 347 Human Growth and Development: Biological and Behavioral Interactions
Spring. 3 credits.

HDFS 436 Language Development (also Psychology 436 and Linguistics 436)
Spring. 4 credits.

HDFS 438 Thinking and Reasoning
Fall. 3 credits.

[HDFS 439 Cognitive Development: Infancy through Adolescence
Spring. 3 credits. Not offered 1997-98.]

Linguistics

LING 101 Theory and Practice of Linguistics
Fall, spring or summer. 4 credits.

LING 115 Language and Culture
Spring. 3 credits.

LING 201 Introduction to Phonetics and Phonology
Spring. 4 credits.

LING 203 Introduction to Syntax and Semantics
Fall. 4 credits.

LING 204 Language, Mind, and Brain
Fall. 4 credits. Not offered 1997-98.

LING 301-302 Phonology I, II
Fall and spring. 4 credits each term.

LING 303-304 Syntax I, II
Fall and spring. 4 credits each term.

LING 309 Morphology I
Spring. 4 credits.

LING 310 Morphology II
Fall. 4 credits. Not offered 1997-98.
LING 319-320  Phonetics I, II
Fall. 4 credits each term.

[LING 325  Pragmatics
Spring. 4 credits. Not offered 1997-98.]
[LING 334  Non-Linear Syntax
Fall. 4 credits. Not offered 1997-98.]
LING 350  Representing Language: Knowledge Taught and Untaught
(also COGST 350)
Fall. 4 credits.

[LING 370  Language and Cognition (also Psychology 370)
Spring. 4 credits. Not offered 1997-98.]
[LING 400  Semiotics and Language (also Comparative Literature 410)
Spring. 4 credits. Not offered 1997-98.]
LING 401  Approaches to Language Typology I
Fall. 4 credits.
LING 402  Approaches to Language Typology II
Spring. 4 credits.
LING 421-422  Semantics I, II
Fall and spring. 4 credits each term.
LING 436  Language Development (also Psychology 436 and HDFS 436)
Spring. 4 credits.

[LING 450  Mathematical Methods for Linguistics
Fall. 4 credits. Not offered 1997-98.]

Mathematics

[MATH 481  Mathematical Logic (also Philosophy 431)
Spring. 4 credits. Not offered 1997-98.]
MATH 483  Intensional Logics and Alternatives to Classical Logics
(also Philosophy 436)
Fall. 4 credits.
MATH 486  Applied Logic (also Computer Science 486)
Spring. 4 credits.

Neurobiology and Behavior (Division of Biological Sciences)

BIONB 221  Neurobiology and Behavior I: Introduction to Behavior
Fall. 3, 4, or 5 credits.
BIONB 222  Neurobiology and Behavior II: Introduction to Neurobiology
Spring. 3 or 4 credits.
BIONB 326  The Visual System
Spring. 4 credits.
BIONB 329  Biopsychology of Learning and Memory (also Psychology 332)
Spring. 3 credits.
BIONB 396  Introduction to Sensory Systems (also Psychology 396)
Spring. 3 or 4 credits.
BIONB 421  Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and 631)
Fall. 3 or 4 credits.
BIONB 424  Neuroethology (also Psychology 424)
Spring. 3 credits.
BIONB 492  Sensory Function (also Psychology 492)
Spring. 3 or 4 credits.

[BIONB 496  Bioacoustic Signals in Animals and Man
Spring. 3 credits. Not offered 1997-98.]

Philosophy

PHIL 231  Introduction to Formal Logic
Fall. 4 credits.
PHIL 261  Knowledge and Reality
Spring. 4 credits.
PHIL 262  Philosophy of Mind
Fall. 4 credits.
PHIL 286  Science and Human Nature
(also Science and Technology Studies 286)
Spring. 4 credits.
PHIL 318  Twentieth-Century Philosophy
Spring. 4 credits.
PHIL 331  Formal Logic
Spring. 4 credits.
PHIL 332  Philosophy of Language
Fall. 4 credits.
PHIL 361  Metaphysics and Epistemology
Fall. 4 credits.
PHIL 381  Philosophy of Science: Knowledge and Objectivity
(also Science and Technology Studies 381)
Fall. 4 credits.

[PHIL 382  Philosophy and Psychology
4 credits. Not offered 1997-98.]
[PHIL 389  Philosophy of Science: Evidence and Explanation
4 credits. Not offered 1997-98.]
[PHIL 431  Deductive Logic (also Mathematics 481)
4 credits. Not offered 1997-98.]
[PHIL 433  Philosophy of Logic
4 credits. Not offered 1997-98.]
PHIL 436  Intensional Logic (also Mathematics 483)
4 credits.

[PHIL 437  Problems in the Philosophy of Language
Spring. 4 credits. Not offered 1997-98.]
PHIL 461  Metaphysics
Spring. 4 credits.

Psychology

PSYCH 205  Perception
Spring. 3 credits.
PSYCH 209  Development
Spring. 4 credits.
PSYCH 214  Issues in Cognitive Psychology
Fall. 3 credits.
PSYCH 215  Psychology of Language
Spring. 3 or 4 credits.
PSYCH 305  Visual Perception
Fall. 4 credits.

[PSYCH 309  Development of Perception and Representation
Fall. 3 credits. Not offered 1997-98.]
[PSYCH 311  Introduction to Human Memory
Spring. 3 credits. Not offered 1997-98.]

PSYCH 316  Auditory Perception
Fall. 3 or 4 credits.
PSYCH 332  Biopsychology of Learning and Memory (BIONB 328)
Spring. 3 credits.
PSYCH 342  Human Perception: Applications to Computer Graphics, Art, and Visual Display
Fall. 3 credits.
PSYCH 361  Biopsychology of Normal and Abnormal Behavior (also Nutritional Sciences 361)
Fall. 3 credits.

[PSYCH 396  Introduction to Sensory Systems (also BIONB 396)]
Spring. 3 or 4 credits. Not offered 1997-98.

PSYCH 412  Laboratory in Cognition and Perception
Spring. 4 credits.
PSYCH 413  Information Processing: Conscious and Non-conscious
Spring. 4 credits.

[PSYCH 414  Comparative Cognition
Spring. 3 credits. Not offered 1997-98.]
PSYCH 415  Concepts, Categories, and Word Meanings
Fall. 4 credits.

[PSYCH 416  Modeling Perception and Cognition
Spring. 3 credits. Not offered 1997-98.]
[PSYCH 417  The Origins of Thought and Knowledge
Fall. 4 credits. Not offered 1997-98.]
PSYCH 418  Psychology of Music
Spring. 3 or 4 credits.

[PSYCH 425  Cognitive Neuroscience
Fall. 4 credits. Not offered 1997-98.]
PSYCH 436  Language Development (also Linguistics 436, HDFS 436 and COGST 436)
Spring. 4 credits.

[PSYCH 492  Sensory Function (also BIONB 492)]
Spring. 3 or 4 credits. Not offered 1997-98.

Graduate Courses and Seminars

The following courses and seminars are generally for graduate students only. However, some may be appropriate for advanced undergraduates. The director of the concentration must approve an undergraduate’s use of any of these for satisfying the concentration requirements.

COGST 773-774  Proseminar in Cognitive Studies I and II (also Com S 773/774; Ling 773/774; Phil 773/774; Psy 773/774)
Fall. B grade; spring: S-U only. 4 credits. T 1:25-2:40. Staff.
The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar will provide a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that comprise the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty from the field will introduce the theoretical and methodological issues that underlie the field.
and its relation to Cognitive Studies; in addition, they will introduce various lab students in which active research is being conducted in their field at Cornell.

The proseminar will include suggestions from faculty in each field for further advanced interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It will conclude (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice.

Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade will be assigned in the fall semester, and an S-U grade will only be assigned in the spring semester.

**COGST 600/700 Graduate Seminars**

**EDUC 614 Epistemological Development and Reflective Thought**
Fall. 3 credits.

**EDUC 714 Moral Development and Education**
Spring. 3 credits.

**College Scholar Program**

L. Abel, director, 55 Goldwin Smith Hall, 255–3386.

The College Scholar program is described in the introductory section of Arts and Sciences.

**COLLS 297 Independent Study**
Fall or spring. 1–4 credits. Prerequisite: permission of program office.

**COLLS 499 Honors Research**
Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

---

**East Asia Program**

140 Uris Hall

East Asian studies at Cornell is led by thirty-five faculty members from five colleges, who participate in a program of research and teaching on the civilizations and cultures of East Asia. Courses are offered through various departments in most of the humanities and social science disciplines, as well as in the fields of business, regional planning, international and comparative labor relations and rural sociology. Language courses in Mandarin, Cantonese, Korean, and Japanese are offered, in addition to the Full-year Asian Language Concentration (FALCON) in Japanese and Mandarin. Undergraduates major in the Department of Asian Studies and concentrate on the language and culture of one East Asian country, while graduate students may major in M.A. or M.A./M.A. degrees in East Asian studies, a dual M.B.A./M.A. degree, or an M.A./Ph.D. degree in a discipline such as agricultural economics, anthropology, city and regional planning, government, history, history of art, linguistics, literature, rural sociology, or sociology. A variety of fellowships, travel grants, awards, and assistantships are available for graduate students concentrating on East Asia.

The formal program of study is enriched by a variety of extracurricular activities, including a Japanese and Chinese language house, film series, career workshops, art exhibits, and numerous lectures, symposia and performances related to East Asia. The Wason Collection in Olin Library is a comprehensive collection of books on East Asia in Western languages, Japanese, Chinese, and Korean. The Mary Rockwell Galleries of the Herbert F. Johnson Museum of Art have an excellent collection of East Asian art.

---

**Freshman Writing Seminars**

For information about the requirements for freshman writing seminars and descriptions of seminar offerings, see the John S. Knight Writing Program section, and consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in late October for the spring term.

**Human Biology Program**

Human biology integrates the methods and theories of many disciplines, such as biological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology, into a comprehensive study of biological diversity in Homo sapiens. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The program of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology program is of particular relevance to undergraduate students in premedical and prenursing programs, biological anthropology, nutrition, human development, ecology and systematics, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students with a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics related to human evolution and biological diversity.

Human biology is not a major but a curriculum of study that provides majors in various departments with a program for selecting elective courses that deal with the biology of the human species. Students in their junior year may develop a program of study in human biology while majoring in a number of different departmental fields.

**Basic Requirements**

The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and physical diversity of the human species. Adjustments may be made in these requirements, depending upon the student’s academic background and affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (Biological Sciences 101–105 plus 102–105 or 105–106 or Biological Sciences 107–108 offered during the eight-week Cornell Summer Session); one year of general chemistry (Chemistry 103–104 or 207–208 or 215–216); one year of college mathematics (Mathematics 111–112 or 105–106 or 111–105); one course in genetics (Biological Sciences 281 or 282); one course in biochemistry (Biological Sciences 231, 330 or 331). It is recommended that students planning graduate study in biological anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty adviser in human biology for help in selecting appropriate courses.

Elective courses shall be taken that will enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may also fulfill requirements for the major.

Courses should be selected that also provide sufficient exposure to the integration of basic anatomical and physiological sciences with the behavior of individuals and groups within the context of evolutionary theory and ecology. The courses below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are

---

**SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES 543**
organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty adviser representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisers in his or her department who is listed as faculty in human biology to be their principal adviser, or he or she may have an adviser in the department of the major and seek the advice of a human biology faculty adviser in matters pertaining to satisfaction of the requirements. In certain cases a faculty adviser may represent both the major and the curriculum of study in human biology.

Independent Major Program

L. Abel, director, 55 Goldwin Smith Hall, 255-3386.

The Independent Major Program is described in the introductory section of Arts and Sciences.

IM 351 Independent Study

Fall or spring. 1-4 credits. Prerequisite: permission of the program office.

IM 499 Honors Research

Fall or spring. 1-8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

Intensive English Program

305 Morrill Hall

This noncredit, nondegree program provides full-time intensive English language instruction as well as academic, social, and cultural orientation to the United States and its institutions. The aim of the program is for participants to acquire proficiency in the language in order to pursue goals in English for academic, business, professional, or personal purposes.

Programs are offered both fall and spring semesters and in the six-week summer session (from late June to early August). Participants receive a minimum of 20 hours of classroom instruction weekly in speaking, listening, reading, writing, and grammar, which are taught at all levels from low intermediate through very-high advanced. Applicants must be at least 17 years of age, hold the equivalent of a high school diploma, and have had some previous study of English.

Students who have gained full admission to or who are already registered in degree-granting programs at Cornell should consult the section "Modern Languages" for information regarding courses in English for Academic Purposes (series ENGLP).

The Intensive English Program is administered by the Department of Modern Languages, Cornell University, Morrill Hall, Ithaca, New York 14853-4701, U.S.A. Information and application materials are available directly from the program by writing to the above address, calling 607-255-4863, or faxing 607-255-7691. Internet e-mail is CUEP@cornell.edu. Web page is http://dml.cornell.edu/languages/IEP/cueip.html.

International Relations Concentration

Matthew Evangelista, director

Integral to international relations is a focus on global issues and processes and an understanding of their impact on particular countries or geographic regions. Cornell's several undergraduate colleges and many departments offer courses that provide a strong grounding in the field as well as an opportunity to study more than 60 languages.

The concentration in international relations provides a curricular structure for undergradu-
The program has grown out of the conviction that Judaic civilization merits its own comprehensive treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the field of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges. The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, the interests of which are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the Hebrew Bible; medieval and modern Hebrew literature; ancient, medieval, and modern Jewish history; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

Courses Offered

JWST 105-106 Elementary Modern Hebrew I and II (also NES 101-102) 105 fall; 106 spring. 6 credits. S. Shoer.

JWST 197 Introduction to Near Eastern Civilization (also NES 197 and RELST 197) # Fall. 3 credits. D. Owen.

JWST 201-202 Intermediate Modern Hebrew I and II (also NES 201-202) 201 fall; 202 spring. 4 credits. N. Scharf.

JWST 223 Introduction to the Bible (also NES 223 and RELST 223) # Spring. 3 credits. C. Baker.

JWST 239 Cultural History of the Jews of Spain (also COMP LIT 239, NES 239, RELST 239 and SPAN LIT 239) # Fall. 4 credits. R. Brann.

JWST 248 Introduction to Classical Jewish History (also RELST 248 and NES 248) # Fall. 3 credits. Staff.

JWST 252 Modern European Jewish History 1798-1948 (also HIST 252) Spring. 4 credits. V. Caron.

Study Abroad

IR Concentrators are strongly encouraged to study abroad to bring a practical dimension to their expertise in international issues. Those who choose this option will find the requirements for the concentration highly compatible with study abroad.

All courses used to fulfill the concentration requirements must be taken for a letter grade. Transcripts will reflect successful completion of the requirements for the concentration. In addition, students will receive a special certificate signed by the faculty coordinator of the international relations concentration. Students interested in pursuing the concentration should discuss it with their faculty advisor. To enroll and for further information, contact Christoph Kunkel, Administrative Coordinator, IRC, at the Mario Einaudi Center for International Studies, 170 Uris Hall (255-8943/272-1417/cmke5@cornell.edu) or contact the director, Prof. Mathew Evangelista (Government), (255-8672/mae10@cornell.edu).

Center for International Studies

See Interdisciplinary Centers, Programs, and Studies.

Program of Jewish Studies

D. I. Owen, director (Ancient Near Eastern and Biblical History and Archaeology), L. Adelson (German-Jewish Literature and Culture), C. Baker (Judaism and Christianity in Late Antiquity), R. Brann (Judeo-Arabic Studies), D. Brenner (German-Jewish Literature and Culture), V. Caron (Modern French and European-Jewish History), M. Diesing (Yiddish Language and Linguistics), N. Farman (French Holocaust Literature), P. Hyams (Medieval Jewish History), D. LaCapra (Holocaust Studies), M. Litvak (Modern History of the Middle East), D. Polachek (Holocaust Studies), R. Polenberg (American-Jewish History), J. Porte (American-Jewish Writers), D. S. Powers (Arabic and Islamic Studies), G. Rendsburg (Biblical and Semitic Studies), N. Scharf (Hebrew Language), D. Schwarz (Anglo-Jewish Literature), G. Shapiro (German-Jewish History and Culture), S. Shoer (Hebrew Language), M. Steinberg (German-Jewish History and Culture), Y. Szekely (Judaica Bibliography), J. Zorn (Biblical Archaeology)

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976.
John S. Knight Writing Program

The director of the John S. Knight Writing Program is Jonathan Monroe, associate professor in the Department of Comparative Literature and George Elliott Reed Professor of Writing and Rhetoric. Katherine Gottschalk, senior lecturer in the Department of English, is the Walter C. Teagle Director of Freshman Writing. The program's offices are in 159 Goldwin Smith Hall, 255-4061.

The John S. Knight Writing Program helps to coordinate the teaching of writing for undergraduates in six of the university's schools and colleges (the School of Industrial and Labor Relations and the colleges of Agriculture and Life Sciences; Architecture, Art, and Planning; Arts and Sciences; Engineering; and Human Ecology). The program administrators writing seminars for freshmen and upperclass students, tutorial writing classes, and seminars in the teaching of writing. More than thirty academic departments and programs participate in the program.

Advanced Writing Seminars

For upperclass students, the program collaborates with the Department of English in offering English 288-89, "Expository Writing." This course helps students write with more confidence and skill in all disciplines, while provoking inquiry into particular areas of study, forms or uses of writing, or topics intimately related to the written medium. Students may choose among a variety of sections focusing on such themes as "Writing about the Social World," "Writing in the Humanities," "Issues and Audiences," "Understanding the News," and "The Languages of Science."

Freshman Writing Seminars

For freshmen the program offers the freshman writing seminars—more than 125 different courses in the humanities, social sciences, expressive arts, and sciences. Through introductory work in a particular field of study, seminars help students write good English expository prose—prose that, at its best, is characterized by clarity, coherence, intellectual force, and stylistic control. All seminars pursue this common aim through small classes, with a maximum of seventeen students, and adherence to a program-wide set of guidelines:

- Seminars require at least six—and at most twelve—formal writing assignments on different topics, totaling a minimum of thirty pages. (Some of the 30-page total may include major drafts.)
- A minimum of two of the required essays (see above) are developed through several stages of revised drafts under the instructor's guidance so that the revisions stand as substantially improved essays.
- All seminars spend ample classroom time on work directly related to writing.
- Reading assignments in the course subject are kept under 75 pages per week to permit regular, concentrated work on writing.
- All students meet in at least two individual conferences with the instructor.
- Offerings change from semester to semester. Each term's freshman writing seminars are described in a brochure available from college registrars.

To ensure that students will enjoy the benefits of small writing classes, freshman writing seminars are limited to no more than seventeen students. Instead of pre-enrolling in their writing courses, students request placement in one of five writing seminars by filling out ballots available from their college registrars. Over ninety percent receive one of their top three choices. In the fall, students may change their writing seminars at the Freshman Writing Seminar Exchange, and in the spring, students may change their writing seminars at the University Course Exchange. Changes can also be made at special Freshman Writing Seminar add/drop sessions held during the first two weeks of each semester.

The colleges and the school served by the program accept freshman writing seminars in fulfillment of their individual graduation requirements in categories referred to variously as "freshman writing," "oral and written expression," and the like. The program does not decide whether students may graduate: it makes courses available. Individual colleges and schools administer their own graduation requirements.

Currently, most undergraduate students are required to take two freshman writing seminars. Architecture majors, however, need only one. Hotel students fulfill their require-
ment through Hotel Administration 165, which should be taken with Hotel Administration 265 during the first two semesters at Cornell.

Agriculture and Life Sciences students can take freshman writing seminars or choose from among a variety of other courses to fulfill their requirement.

All students who score "4" or "5" on the Princeton Advanced Placement Examination in English receive three credits. Such credits are awarded automatically, no application to the John S. Knight Writing Program or the Department of English is necessary. How these credits may be applied to freshman writing or other distribution requirements depends on the student's college and score. All students who score "5," except Architecture majors, may apply their three credits towards the writing requirements of their college.

Of students who score "4," only Agriculture and Life Sciences students and Industrial and Labor Relations students may apply their three credits towards the writing requirements of their college. Students should always consult their college registrars to be certain that they understand their writing requirements.

Students who have already taken a freshman writing seminar, or who score "4" or "5" on the Princeton AP exam, or "700" or better on the English Composition or CEEB tests, may enroll, space permitting, in the following upper-level freshman writing seminars:

- English 270, 271, or 272.

Although there are no exemptions from college writing requirements, some students may fulfill all or part of their college's writing requirement through transfer credits or writing-course substitutions.

For work done at other institutions to be accepted as equivalent to freshman writing seminars, students should demonstrate that they have done a reasonably equivalent amount of writing in a formal course. (It is not sufficient to write, for example, one thirty-page term paper.) Students in the College of Engineering and the College of Arts and Sciences must file an "application for transfer evaluation" to request writing credit for such courses; students in other colleges should consult their college registrars.

In unusual circumstances, upper-level students may petition to use a Cornell writing course other than a freshman writing seminar to satisfy part of their writing requirement. The John S. Knight Writing Program must approve all such petitions in advance.

For information about the requirements for freshman writing seminars and descriptions of seminar offerings, consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in late October for the spring term.

Teaching Writing

Each summer and fall, the program offers instruction in the teaching of writing to new staff members in the freshman writing seminars and some other instructors. Teaching Writing I, offered in the summer, is primarily a course for graduate students; the same course is offered in the fall as Teaching Writing II. The program also sponsors a summer apprenticeship program for a limited number of graduate students, and a summer seminar for faculty members interested in the teaching of writing.

Writing Workshop

The John S. Knight Writing Program offers An Introduction to Writing in the University for freshmen (or transfer students needing writing credit) through the Writing Workshop. This course is designed for students who have had little training in composition or who have serious difficulty with writing assignments.

Writing 137 and 138 are graded S-U only, and students receiving a grade of S are granted credit toward their college writing requirements. Students who think this course might be appropriate including non-native speakers of English scoring less than 600 on the Test of English as a Foreign Language (TOEFL), should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The workshop also offers a Walk-In Service (see below) to help students with problems in essay writing. The director is Joe Martin, senior lecturer in the Writing Workshop. The workshop offices are in 174 Rockefeller Hall, 255-6349.

The Walk-In Service

Through the Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Walk-In Service has tutors available during the academic year in 174 Rockefeller and north- and west-campus residential areas. The director is Mary Gilliland. For information contact the Writing Workshop, 174 Rockefeller Hall, 255-6349.

WRT 137-138, 134 An Introduction to Writing in the University

137, fall, 138, spring, 134, summer.
3 credits each term. Each section limited to 12 students in the fall and spring, 6 students in the summer. S-U grades only.
Prerequisite: permission of instructor.

This writing seminar is designed for students who need more focused attention to order to master the expectations of academic writing. The course emphasizes the analytic and argumentative writing and critical reading essential for university-level work. With small classes and with weekly student/teacher conferences, coursework is shaped to respond to the needs of students in that particular class.

WRT 139-239 Special Topics in Writing

Spring 139, undergraduate students only; 239, graduate students only. 3 credits. S-U grades only. Cannot fulfill any writing or distribution requirements. Prerequisite: permission of instructor.

These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work, and instruction is in weekly tutorials. Interested students should come to 174 Rockefeller for more information.

Latin American Studies

190 Uris Hall

D. Castillo, director; M. J. Dudley, associate director; L. Beneria, R. Blake, D. Block, C. Castillo-Chávez, M. L. Cook, D. Cruz de Jesús, and S. E. Dozier.

The Latin American Studies Program encourages and coordinates faculty and student interests in Latin America. A variety of special lectures, films, and seminars supplement the regular course offerings. Graduate students may pursue a minor in Latin American Studies, while majoring in the field of their choice.

Undergraduate Concentration

Undergraduate students may fulfill a Latin American Studies Concentration by completing a minimum of 15 credits in Latin American Studies courses combined with language proficiency in Quechua, Spanish, or Portuguese.

Latin American courses are offered in the College of Agriculture and Life Sciences, the College of Architecture, Art, and Planning, College of Arts and Sciences, College of Human Ecology, and the School of Industrial and Labor Relations.

For further information and a current course listing, students should contact the program office at 255-3345 or 190 Uris Hall.

Latin American Studies Program

434 Rockefeller Hall

The Latin American Studies Program is an interdisciplinary academic program that focuses on the contributions, concerns, and welfare of those persons of Latino origin who reside in the United States. It includes support for historical, linguistic, literary, social, economic, and political studies of this diverse group of Americans. To this end the program objectives are (1) to expand the available course curriculum by providing both undergraduate and graduate courses pertaining to Latino subject matters; (2) to enlarge the size of the Latino faculty at Cornell through permanent appointments; (3) to enhance the Latino academic environment on campus through support of such activities as lectures, conferences, seminars, exhibits, and research activities.

Undergraduate Concentration

The program's undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Latinos in the United States. To complete an undergraduate concentration in Latin American Studies, students must earn at least 15 credits including LSP 201/205: Latinos in the United States (offered each spring semester), and at least four other courses from the course list. Students should make an attempt to achieve breadth and depth in the concentration and should include courses at the 300 and 400 level. Students pursuing the concentration must meet with the LSP Advisor and file an application with the Latin American Studies Program office.

Resource Center

The Latino Studies Program Resource Center in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The Resource Center holds and media material pertinent to U.S. Latino issues and also provides a meeting space for more than 25 Latino student organizations.
Courses

LSP 201/SOC 265 Latinos in the United States
Spring. 4 credits variable.

LSP 202/SPAND 200 Spanish for Bilinguals
Fall and spring. 3 credits.

LSP/SPANL 210 Introduction to Latino Studies
4 credits variable.

LSP/RSOC 220 Sociology of Health and Ethnic Minorities
Fall. 3 credits.

LSP/ANTHRO 221 Anthropological Representation: Ethnographies on Latin Culture
3 credits.

LSP/ENGL/SPANL 241 Introduction to Chicano/a Poetry and Politics
Spring. 3 credits.

LSP/ENGL/SPANL/COML 243 Poetry and Politics in the Americas
4 credits.

LSP/SPANL 246 Contemporary Narratives by Latina Writers
Spring. 3 credits.

LSP/SPANL 246 Spanish in the United States
4 credits.

LSP/ANTHRO 377 The United States
4 credits.

LSP/ENGL 393 Survey in U.S. Latina/o Literature
Spring. 4 credits.

LSP/SPANL 396 Modern Latino Prose Fiction
4 credits.

LSP/ENGL 442 Testimonial Narratives: U.S. Latinos at War
4 credits.

LSP 420/421 Independent Study
Permission of instructor. 2–4 credits variable.

LSP/ANTHRO 660 Latino Language, Ideology, and Practice
4 credits.

LSP/ENGL 696 Writing Resistance: U.S. Minority and Third World Prisoner Discourse

Law and Society

P. R. Hyams, director, 119 Stimson Hall, 255–8515, prh@cornell.edu; R. Breiger (sociology), C. Carmichael (comparative literature), D. A. Dunning (psychology), G. Hay (economics), P. Hyams (history), S. Jasanoﬀ (science and technology studies), M. Katzenstein (government), R. Miller (philosophy), M. B. Norton (history), R. Polenberg (history), D. Powers (Near Eastern studies), J. Rabkin (government), A. Ruten (government)

The Law and Society Program offers an interdisciplinary concentration for undergraduates who are interested in the law from the perspectives of the social sciences and the humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology. In addition, undergraduates in the College of Arts and Sciences can major in law and society through the Independent Major Program. Students who wish to graduate with a concentration in law and society should consult the director of the program or one of the advisers listed above to plan a coherent program of study. Admission to the concentration has to be approved by the director of the program. Such a program should ordinarily include at least four courses from the following list. Particular attention is drawn to GOVT 313 and PSYCH 265, which past students have often taken. Other courses may be substituted with the approval of the advisor. Inquiries can be directed to: Mary Newhart, Administrative Assistant, 119 Stimson Hall, 255–8515, mj3@cornell.edu.

B. Martin.

[WOMNS 621 Lesbian, Gay, Bisexual Studies (also GERST 621)]
B. Martin.

Medieval Studies

Undergraduates interested in Medieval Studies have an opportunity to take courses in the following areas of instruction: medieval Hebrew, Arabic, and Latin; Old English, Middle English, Old Irish, and Middle Welsh; Old Occitan (Provencal) and Old French; medieval Spanish and Italian; Old Saxo, Old High German, Middle High German, Gothic, and Old Norse; Old Russian and Old Church Slavonic; comparative literature; medieval archaeology, art, and architecture; medieval history; Latin paleography; medieval philosophy; musicology; comparative Slavic linguistics, comparative Romance linguistics, and comparative Germanic linguistics.

The field of Lesbian, Bisexual and Gay Studies is devoted to the interdisciplinary study of the social construction of sexuality. LGB Studies is founded on the premise that the social organization of sexuality is best studied from the perspectives offered by those positions that have been excluded from established cultural norms.

In addition to offering a graduate minor, the field of LGB Studies now offers an undergraduate concentration, which is administered under the auspices of the Women's Studies Program and which consists of four courses from the list below. Although most of the courses in LGB Studies (including those on men) will probably fall within the umbrella of the Women's Studies Program and hence be crosslisted with it, not all of the courses in Women's Studies are sufficiently focused enough on the social construction of sexuality per se to be part of the LGB Studies concentration. In order to quality for the concentration, courses must devote a significant portion of their time to sexuality and to questioning the cultural and historical institution of exclusive heterosexuality. Students selecting their four courses from the LGB Studies subset must identify their concentration as either LGB Studies or Women's Studies; they cannot double-count their credits and thereby use the same courses for both concentrations.

Students interested in the LGB Studies concentration should contact the Lesbian, Bisexual and Gay Studies Office in 379 Uris Hall.

Lesbian, Bisexual and Gay Studies

ARTS AND SCIENCES - 1997-1998

550
Undergraduates who want to undertake an independent major or a concentration in Medieval Studies should consult the director of the program, 259 Goldwin Smith Hall, 255-8545, medievalst@cornell.edu.

Information for prospective graduate students is contained in the catalog of the Graduate School, in a brochure on Medieval Studies available from the field coordinator, and at Cornell's site on the World Wide Web: http://www.arts.cornell.edu/medieval.

Graduate Seminars
Courses in various aspects of medieval studies are offered each year in numerous cooperating departments, including Asian Studies, Classics, Comparative Literature, English, German Studies, History, History of Art, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian Literature and by the Society for the Humanities. An up-to-date listing of courses and their descriptions is available at the Medieval Studies office, 259 Goldwin Smith Hall.

Modern European Studies Concentration

Susan Tarrow, coordinator

Students from any college may choose an undergraduate concentration in Modern European Studies to complement any major in any college. The purpose of the concentration is to provide a coherent structure for students with an interest in interdisciplinary study in the field of European studies.

The concentration has three tracks: European politics, economics and society; modern European history; and European culture. The requirements for the concentration are:

1) Competence in at least one modern European language, Romance, Germanic or Slavic (i.e., completion of a 300-level course or equivalent with a grade of at least B-, or demonstration of an advanced level of competence in an oral proficiency interview test where available).

2) Completion of at least one course in each of the three areas listed below:

   a) European Politics, Society and Economics

      Anthr 350 Anthropology of Europe
      Econ 367 Comparative Economic Systems: East and West
      Econ 370 Socialist Economies in Transition
      Govt 325 Eastern European Politics
      Govt 332 Western European Politics
      Govt 333 Government and Politics of the Former Soviet Union
      Govt 342 The New Europe
      Govt 350 Comparative Revolutions
      Soc 366 Transitions from State Socialism
      Soc 410 Comparative Societal Analysis

   b) Modern European History

      Hist 253 Russian History Since 1800
      Hist 283 Europe in the Technological Age
      Hist 290 Twentieth-Century Russia and the Soviet Union
      Hist 355 Nineteenth-Century European Intellectual History
      Hist 354 Twentieth-Century European Intellectual History
      Hist 362 European Cultural History 1815-1870
      Hist 363 European Cultural History 1870-1945
      Hist 383 Europe 1900-1945
      Hist 384 Europe 1945-68
      Hist 385 Europe in the Twentieth-Century 1968-1992

   c) Humanities

      Any general course dealing with modern Europe (19th and 20th centuries) in one of the following departments: Comparative Literature, English, German Studies, History of Art, Music, Philosophy, Romance Studies, Theatre Arts. Examples of such courses include:

      Arth 260 Introduction to Art History: The Modern Era
      Arth 361 The Social History of Nineteenth-Century European Painting
      Arth 362 Impressionism and Society
      COML 202 Great Books
      COML 364 The European Novel
      Music 108 Bach to Debussy
      Music 274 Opera
      Music 383 Music of the Nineteenth Century
      Phil 212 Modern Philosophy
      Thetr 241 Introduction to Western Theatre I
      Thetr 322 Russian Drama and Theatre

   Under certain conditions, it may be possible to substitute other courses for those listed above.

3) Three additional courses in any of the three areas.

   a) Courses in European and comparative politics, anthropology, sociology, women's studies, and related courses in the School of Hotel Administration, the College of Agriculture and Life Sciences, and the School of Industrial and Labor Relations.

   b) Courses in modern European history (post-1789).

   c) Courses in (post-1789) English and European literatures, comparative literature, semiotics, fine arts, architecture, music, philosophy, film and theatre arts, and women's studies.

Only two courses may be used to satisfy requirements for both the major and the concentration. Courses satisfying the breadth and distribution requirements in the College of Arts and Sciences, however, may be applied to the concentration. Students completing a research project under the European Summer Research Program will receive a special commendation. All concentrators are encouraged to participate in the Language House Program, and to spend a semester or more in a program of study in Europe. Courses taken abroad may be applied to the concentration if they are approved for Cornell credit.

Undergraduates in the College of Arts and Sciences can major in European Studies through the Independent Major or College Scholar programs.

Departmental advisers include: J. Borneman (Anthropology); C. Otto (Architecture); L. Abel (College Scholars, Independent Majors); S. Christopherson (CRP); G. Fields (Economics); D. Schwarz (English); I. Ezergailis (German Studies); J. Pontusson (Government); S. Christopherson (Sociology); M. Suner (Linguistics); C. Rosen (Modern Languages); N. Zaslaw (Music); S. Tarrow (Romance Studies); G. Gliban (Russian Literature); D. Stark (Sociology); D. Bathrick (Theatre Arts)

For a list of relevant courses and seminars, and any further information, contact Susan Tarrow, coordinator of the Modern European Studies Concentration, at the Institute for European Studies, 120 Uris Hall (telephone 255-7929).

Religious Studies

The program in Religious Studies is designed to meet the needs of three classes of students: those seeking interesting courses on religious topics as free electives or to fulfill distribution requirements; those desiring a more systematic exposure to the study of religion as a major component of their liberal arts experience; and those planning to pursue advanced academic or religious work in religious studies or allied disciplines or subdisciplines (e.g., history of religions, anthropology, religion and literature, religion and psychology, ethics, or theology, as well as certain geographical area studies). To all these students the program offers an opportunity to acquire a fuller understanding and appreciation of one of the most fundamental aspects of human thought and behavior.

The Major in Religious Studies

To graduate as a major in Religious Studies a student must (1) complete with letter grades the program's two core courses, Religious Studies 101 ("Understanding the Religions of the World") and Religious Studies 449 ("History and Methods of the Academic Study of Religion"); and (2) complete with letter grades eight additional courses approved for the major, at least four of them at the 300 level or above. The following specifications of this second requirement are designed to promote breadth, depth and depth (2b) of study.
A student is expected to prepare a brief faculty adviser early on. A current list of important for a prospective major to select a program in Religious Studies, it is especially recommended. Most courses approved for the major are under 2a and 2b.

This area of Religious Studies should be taken with care and consideration. Although not as firmly rooted in literary traditions, these courses are at least as important as those found in other religious studies programs. Students should be aware that many additional courses dealing with Buddhism, such as "Indian Buddhism" (Asian Studies 354) or "Japanese Buddhism" (Asian Studies 359), are required to develop an appropriate depth along a different dimension.

No more than one of the courses chosen to meet requirement 2a may be used to satisfy requirement 2b.

The language in the kind of focused study envisioned under 2b, a student will be expected to attain proficiency in a language other than English to gain access to relevant sources, primary or secondary. For example, a knowledge of Greek or Latin might be required for the study of Christianity (as well as Greek or Roman religions); Hebrew or Arabic for Judaism; Sanskrit or Hindi for Hinduism; or Chinese or Japanese for Buddhism. Religious phenomena like shamanism or totemism, though less firmly rooted in literary traditions, have generated substantial bodies of important scholarship in French and German, and an undergraduate major concentrating in this area of Religious Studies should be equipped to make independent use of such material. Courses used to satisfy this foreign-language proficiency requirement may not be applied to the course requirements described under 2a and 2b.

Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences; a comprehensive up-to-date list of these courses is maintained at the office of the Religious Studies Program, 259 Goldwin Smith Hall.

Given the multidisciplinary character of the program in Religious Studies, it is especially important for prospective majors to select a faculty adviser early on. A current list of advisers is available from the program director. Once an adviser has been selected, a student is expected to prepare a brief statement outlining his or her intended course of major study (including study of an appropriate foreign language) and to file it with the program director for review by the faculty committee responsible for overseeing the program.

The Major with Honors in Religious Studies

To be eligible for honors in Religious Studies, a student must maintain a GPA of 3.0 overall and 3.3 in courses other than language courses used to satisfy requirements for the major. In addition, he or she must enroll in Religious Studies 490 or 491 (Directed Study) and Religious Studies 495 (Honors Thesis), usually in the fall and spring of the senior year, respectively. Each course carries four credits but only the first may be counted as one of the eight additional courses required for the major. Religious Studies 490, 491, and 495 are supervised by cooperating faculty members assigned to individual honors students or small groups of honors students to help them complete substantial independent projects. These projects will be evaluated by the Religious Studies Honors Committee, which is responsible for awarding honors and determining the degree of honors awarded.

Courses Approved for the Major Sponsored by Religious Studies

This course provides an introduction to the academic study of religion through a survey of the major religions of the world. In each tradition covered, we study the different formulations of religious experience, expression, knowledge, and (where relevant) salvation, the dynamics of tradition formation and canon development, and the presentation of ideas about the human-divine relationship. While the lectures in the course are presented by the professor, guest speakers representing each of the major traditions will help students understand the category of "experience." Students will read primary and secondary sources pertaining to the traditions covered in class, and complete a semester-long project involving hands-on research and field study on a given religious tradition.

(RELST 111 Biblical Law (also Comparative Literature 111)) Spring. 3 credits. C. Cannamell. For description, see COM L 111.

(RELST 130 The Search for the Historical Jesus (also Near Eastern Studies 130)) Summer. 3 credits. S. Saggiard. Who was Jesus? What did he really say and do? In this course we are concerned with the ways in which scholars approach these questions and the often startling answers they obtain. We examine the social, political, economic and religious environments in which Jesus operated to provide a context for critical readings of the gospels and other early Christian texts. We then reconstruct the essential features of the original Jesus movement, which we compare and contrast with Cynic philosophy, the Greco-Roman gender system, the historical and practices of the early Church, and the social patterns and religious philosophies of small-scale societies.

(RELST 131 Elementary Pali (also Pali 131)) Fall. 3 credits. J. Gair. For description, see Modern Languages, PALI 131.

(RELST 150 Introduction to American Religion (also Sociology 150)) Fall. 3 credits. P. Becker. For description, see SOC 150.

(RELST 197 Introduction to Near Eastern Civilization (also Near Eastern Studies 197, Jewish Studies 197)) Fall. 3 credits. D. Owen. For description, see NES 197.

(RELST 201 Issues in Catholic Thought Spring. 3 credits. E. Ondrako. This course will explore fundamental dynamics for the development of Catholic Christian thought from the New Testament to the present. The students will investigate the historical and rational grounds of Catholic thought in the ideas of several thinkers from the Eastern and Western traditions, such as John Chrysostom, Augustine, Thomas Aquinias, Bonaventure, J. H. Newman, K. Rahner, Y. Congar, Paul VI and John Paul II. The course will include the main lines of thought from Vatican II. Since each historical era uncovers what it thinks to be new evidence and proposes new questions, the student will be expected to master the principal lines of thought from the past and critically utilize these arguments as they bear upon the contemporary era. The format will be lectures and discussion.

(RELST 202 The Greek New Testament (also Classics 202, Near Eastern Studies 220)) Spring. 3 credits. A. Gade. For description, see NES 213.

(RELST 213 Introduction to the Qur'an (also Near Eastern Studies 213)) Spring. 3 credits. Not offered 1997-98.

(RELST 214 Historical Issues in Christian Thought (also Philosophy 214)) Spring. 4 credits. Not offered 1997-98.

Fall. 4 credits. K. McGowan.
For description, see ART H 580.

Courses Approved for the Major Sponsored by Other Units
Additional courses offered by cooperating departments may also be approved for the major in Religious Studies. For details see the program director, Jane Marie Law, 259 Goldwin Smith Hall.

Russian and East European Studies Major

J. Bomerman (Anthropology); G. J. Staller (Economics); S. Beck (Field and International Studies Program); I. Ezerigalis, D. Batrkh (German Studies); V. Bunce, M. Evangelista, S. Tarrow (Government); P. Holquist; W. M. Pintner (History); U. Bartenbrenner (emeritus, Human Development and Family Studies); P. Carden, G. Gibian, N. Pollak, S. Senderovich, G. Shapiro (Russian Literature); W. Browne, S. Paperno (Slavic Linguistics); D. Stark (Sociology)

The major in Russian and East European studies has the following requirements:

1) Proficiency in Russian or an Eastern European language with one additional advanced (300-level) language or literature course, OR qualification in an Eastern European language and qualification in another language useful for research in the area.*

*These requirements, in the case of some languages, may require study abroad or coursework completed at another institution.

2) At least one course relating to Russia or Eastern Europe, at the 200 level or above, in four of the following five departments: Government, Economics, History, Russian Literature and Sociology. Appropriate courses offered in other departments may be substituted for one of the above courses with the consent of the major adviser.

3) At least three additional courses at the 300 level or above, all from one of the following three departments: Government, History (within the History Department courses may be at the 250 level or above), or Russian Literature. One of the three courses must be at the 400 level or above. The three courses must be approved by the major adviser in the department of concentration.

The student will complete the honors project by a date set by the major in Russian and East European Studies Program. Students should keep their committee members informed as their work progresses. Students will meet together with their whole honors committee to discuss the draft of the thesis or project and make recommendations for revision. When the project is completed, the committee will decide whether the project deserves honors, and, if so, after reviewing their academic record, will recommend students for a Bachelor of Arts cum laude, magna cum laude, or summa cum laude. The committee will also assign a grade for the honors research course.

Courses

[COM L 337 Modern and Contemporary Theatre (also Theatre Arts 335)]
Spring. 4 credits. Not offered 1997-98.

[COM L 367 The Russian Novel (also Russian Literature 367) #]
Fall. 4 credits.

[COM L 381 Marxist Cultural Theory (also German Literature 381 and Government 372)]
4 credits. Not offered 1997-98.

[COM L 385 Reading Nabokov (also Russian Literature 385 and English 379)]
Fall. 4 credits. Limited to 25.

[COM L 389 Modern Literature in Poland, Czechoslovakia, Hungary, and Yugoslavia (also Russian Literature 389)]
Fall. 4 credits. Not offered 1997-98.

[COM L 425 The Jew’s Body (also Comparative Literature 625, German Studies 422/622 and Jewish Studies 422/622)]
Spring. 4 credits. Readings will be primarily in English, though knowledge of another language (such as Hebrew and Yiddish or languages of the European Diaspora, such as German, Italian, French, Russian, Polish, etc.) could be helpful in certain contexts.

RUSSL 411  Early Nineteenth-Century Literature
Not offered 1997–98.

RUSSL 412  Russian Romanticism
Spring. 4 credits.

RUSSL 413  Russian Realism
Fall. 4 credits. Also open to advanced undergraduates with permission of instructor. Not offered 1997–98.

RUSSL 414  The Tradition of Russian Poetry
Spring. 4 credits. Not offered 1997–98.

RUSSL 415  Gogol

RUSSL 416  Russian Drama and Literature (also Theatre Arts 622)
Fall. 4 credits. Not offered 1997–98.

RUSSL 417  Russian for Russian Specialists
633, fall; 634, spring. 4 credits each term.

RUSSL 418  Modern Russian Literary Criticism
Spring. 4 credits. Not offered 1997–98.

RUSSL 419  Bakhtin
Spring. 4 credits.

RUSSL 420  Russian Intellectual History
S HUM 404 Trauma and Captivity from Cervantes to Garcia Márquez (also Spanish Literature 404)
Fall. 4 credits. Limited to 15 students. Limited to graduate students and qualified undergraduates. M.A. García. The psychoanalytical notion of trauma comes to the fore in the narratives of Cervantes through the repetitive reenactment of his ordeal as a captive of Maghrebi corsairs in Algiers. Our seminar will survey the effects of captivity in Cervantes, from his famous "Captive's Tale," in Don Quijote I, to the stories of human bondage and delusions explored by his novelas. No other age resembles more the early modern Mediterranean world, described by Cervantes, than the twentieth-century with its random imprisonments and assassinations for dissenting political views. Paying particular attention to the erotic-political connections surfacing in these fictions, we will compare Cervantes' approach with contemporary texts and films that deal with torture and kidnapping in Latin America. Selections include works by Cervantes, Dorfman, García Márquez, Sábato, and Luisa Valenzuela. Theoretical readings on trauma and torture may be drawn from texts by Barthes, Foucault, Craciano, Feiman, and Scarry. Among others. The course will be conducted in English. Special arrangements will be made for students wishing to read the texts in Spanish.

S HUM 405 Freud and Since: Trauma and the Object (also English 424/624)
Fall. 4 credits. Limited to 15 students. M. Jacobus. Freud's and Klein's writings redefine trauma as the loss of the object. We will explore the implications of this redefinition for the evolution of psychoanalytic theory in England and France, asking questions such as: how does psychoanalysis make sense of traumatic events? We will also compare Cervantes' approach with contemporary texts and films that deal with torture and kidnapping in Latin America. Selections include works by Cervantes, Dorfman, García Márquez, Sábato, and Luisa Valenzuela. Theoretical readings on trauma and torture may be drawn from texts by Barthes, Foucault, Craciano, Feiman, and Scarry. Among others. The course will be conducted in English. Special arrangements will be made for students wishing to read the texts in Spanish.

S HUM 406 Trauma and Memory
Fall. 3 credits. Limited to 15 students. P. Ramadano. In this seminar we will try to bring together important philosophical concepts of memory (Plato, Aristotle, St. Augustine, Nietzsche) and Freud's analysis of trauma in order to provide a better understanding of traumatic memory that includes both perspectives. With Derrida we will also explore the psychoanalytic coexistence of trauma and memory. With the help of the course we will be able to understand memory.
S NUM 409 The Pathological Public Sphere (also English 457/657)
Fall. 4 credits. Limited to 15 students.
Limited to graduate students and seniors with permission of instructor. Seniors must submit a 2-3 page statement on related or preparatory courses taken and reasons for choosing seminar. Deliver to room 212 A.D. White House by 8/28/97. M. Seltzer.

An interdisciplinary examination of the shifting understandings of the social and collective conditions of the subject, from the later nineteenth century to the present. More exactly, an account of the ways in which spectacles of public violence and pathology have come to provide one of the most powerful ways of keeping visible the possibility of the shared social spaces of the public sphere itself, albeit a way of conserving that possibility in markedly negative or aversive form. What this amounts to is the formation of what might be called the pathological public sphere. Readings will include literary, sociological, and psychological accounts of "the crowd," "mass culture," and the "pulses in modern psychoanalytic theory will include Freud, Group Psychology and the Analysis of the Ego, Laplanche, Life and Death in Psychoanalysis, Zizek, For They Know Not What They Do: Enjoyment as a Political Factor, and Borch-Jacobsen, The Freudian Subject, in anthropological/sociological work, Canetti, Crowds and Power, Theweleite, Male Fantasies, Habermas, The Structural Transformation of the Public Sphere, and in literary/visual arts, novels (among others, T. Swift, Krabbe, Harris), and films including Pandora's Box, The Vanishing, True Romance.

S NUM 410 Politics and Trauma: From Revolution to Transgression
Fall. 3 credits. Limited to 15 students. S. Stewart.

How does the nineteenth-century opposition of reform and revolution get rewritten into the twentieth century as the opposition of patriarchy and transgression? This seminar will trace the psychoanalytic theory of the (male) democratic subject through this transformation. It will begin with Freud, especially his cultural writings on his founding myth of democratic subjectivity as the killing of the primal father. Freud's work, as well as his feminist critics, will comprise the largest part of the course. Subsequent readings will include the theorists of German Social Democracy, Benjamin, Schmitt, Lacan, Bersani, and Felman.

S NUM 412 Theory, Pathology, Treatment (also German Studies 411)
Fall. 4 credits. Limited to 15 students. B. Martin and C. Miller.

In keeping with the Society of the Humanities theme, "Why Trauma, Why Psychoanalysis," this course is designed to examine not only psychoanalytic histories but alternative approaches to the conceptualization of "trauma," "childhood," and intervention. The course will be team-taught. Biddy Martin, professor of German studies, will explore the constructions of "trauma," "childhood," and "play" in the history of psychoanalytic work on children. Carol Maxwell Miller, a clinical psychologist, will discuss the effects and treatment of trauma from several current theoretical perspectives and provide an overview of ongoing research. It is our

S NUM 418 The Sexual Child (also English 401/601)
Spring. 4 credits. Limited to 15 students. B. E. Hanson.

With respect to children, Americans today have what we might call a pedophilic imagination. The sexual child, as an emblem of trauma, has become the focus of moral panics from every point on the political spectrum—panics about cultural phenomena as various as child pornography, single-parent motherhood, the Roman Catholic priesthood, access to the Internet, and gay studies curricula. But what is it a child? What does it mean to love or desire a child? How might we construe child sexuality beyond the dominant, largely Freudian paradigm of Trauma? Who promotes the idea of child sexuality and why? How has it been constructed through narrative and visual imagery? This course offers a political, historical, and rhetorical analysis of the language of trauma that has developed around the sexual child in the past century. Readings for the course will include theoretical texts on child sexuality, trauma, and the debate over "false memory" (Sigmund Freud, James Kincaid, Judith Lewis Herman, Frederick Crews); we will also do close readings of literary and visual texts, from Lewis Carroll's Alice books to Stanley Kubrick's film The Shining, and Sally Mann's erotic photographs of children.

S NUM 419 The Trauma of the Conquest
Spring. 3 credits. Limited to 15 students. Some knowledge of psychoanalysis is required. M. Hernandez.

All sorts of consequences, factual and ideological, seem to derive from the traumatic Westernization of the Andean world. The application of psychoanalysis to the understanding of the trauma of the conquest of the Incas may allow for new narratives of the event and a deeper comprehension of its consequences. The seminar also offers a chance to review the psychoanalytic concept of trauma and the value of its application.

S NUM 420 Objects, Lost and Found (also German 420/620)
Spring. 4 credits. Limited to 15 students. M. Jacobus.

Psychoanalysis has grown to literature from its inception. Approaching literary and aesthetic questions by way of the legacy of Freud and Klein, we will ask how criticism can engage productively with central concepts in British and Continental object relations theory. We will focus on the reading of specific literary "objects."

S NUM 421 Electronic Art, Cultural Memory, Baroque Theory (also English 434/634)
Spring. 4 credits. Limited to 15 students. Students should have a confident grasp of electronic art and/or early modern culture. T. Murray.

The course will analyze the "interface" between recent projects in video and the electronic arts (from installation to the World Wide Web) and the trajectory of early modern culture. How should we read the attraction and resistance of electronic art to early modern precedents of utopia, colonialism, passion, light, and space? Is it coincidental that so many video and electronic artists have turned their attention to consider the traumatic consequences of the new early modern technologies of printing, science, art, and colonialism? Does the turn to the
Baroque shed light on our own society's ambivalent response to electronic art and its digital machineries developed in an uncertain age of rapid societal transformation, erosion of identity and rational boundaries, suspicion of the-parser with a special caused by epidemic and natural catastrophe? We will consider video and electronic artists such as Juan Downey, Thierry Kuntzel, Esther Parada, Gary Hill, Peter Greenaway, Derek Jarman, Keith Piper, Bill Viola, Yves Van Duvall, Francesc Torres, Tony Oursler, Lynne Hershenow, and Steve Fagin. The seminar will also consider essays on visualization and the Baroque by such writers as Gilles Deleuze, Julia Kristeva, Raymond Bellour, Louis Marin, Rosalind Krauss, Mieke Bal, Christine Buci-Glucksmann, D. N. Rodowick.

S HUM 422 The Age of Anxiety
Spring. 3 credits. Limited to 15 students. General knowledge of psychoanalytic and/or critical theory recommended. J. Stonebridge.

South Asia Program
The South Asia Program coordinates research, teaching, and special campus events relating to Bangladesh, India, Pakistan, Nepal, and Sri Lanka. The program faculty includes members from a variety of disciplines, including agricultural economics, agricultural engineering, anthropology, architecture, art, city and regional planning, communication, comparative religion, ecology and systematics, economics, English, environment, history, history of art, human ecology, industrial and labor relations, international agriculture, linguistics, literature, rural sociology, and science, technology, and society. Undergraduates with a special interest in the region may major in Asian studies with a South Asia concentration, or complete a South Asia concentration with any other major. Graduate students may pursue the M.A. degree in Asian studies with a concentration in South Asia.

Southeast Asia Program

Southeast Asian studies at Cornell is included within the framework of the Department of Asian Studies. Nineteen full-time core faculty members in the colleges of Arts and Sciences, Business and Public Administration, and Agriculture and Life Sciences participate in an interdisciplinary program of teaching and research on the history, culture, and societies of the region stretching from Burma through the Philippines. An additional 18 lecturers and other faculty provide language and area instruction on Southeast Asia. Courses are offered in such fields as agricultural economics, anthropology, Asian studies, economics, finance, government, history, history of art, linguistics, music, and rural sociology. Instruction is also offered in a wide variety of Southeast Asian languages: Burmese, Cambodian, Cebuano (Bisayan), Indonesian, Javanese, Tagalog, Thai, and Vietnamese, for which Foreign Language Area Studies Fellowships are available to U.S. citizens. Intensive instruction in Indonesian is offered in the Full-Year Asian Language Concentration (FALCON) which covers the beginning and intermediate levels. An intensive advanced Indonesian language program is held from June through August in Indonesia each summer. The formal program of study at Cornell is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar and concerts of the Gamelan Ensemble. The George McT. Kahin Center for Advanced Research on Southeast Asia is also the site for public lectures and other activities related to this area. The John M. Echols Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on this subject in America.

Undergraduates may major in Asian studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asia studies by completing 18 credits of coursework. Students interested in exploring these opportunities should consult the director, Southeast Asia Program, 180 Uris Hall.

PhD Program in Asian Studies
Fellows, visiting scholars, and graduate students from the United States and the region are accepted to pursue advanced research at Cornell. Asian studies graduate students may pursue the M.A. degree in Asian studies with a concentration in Southeast Asia, South Asia, or East Asia, or the Ph.D. degree in an interdepartmental program. The degree requirements are flexible, allowing students to design their study according to their research interests. Advanced seminar courses are held throughout the academic year, and the department organizes an annual seminar and colloquium program. The program also serves as a regional office for the Association for Asian Studies, and it organizes an annual conference for graduate students and faculty in Asian studies. The department also offers a summer institute for graduate students in East Asia, which includes seminars, workshops, and field trips. The program has a strong focus on gender, sexuality, politics, and society, and it encourages interdisciplinary approaches to the study of Asia.

PhD Program in South Asian Studies
The South Asia Program at Cornell is a multidisciplinary program that offers graduate students the opportunity to pursue advanced research in the history, culture, and societies of South Asia, which includes the countries of Bangladesh, India, Pakistan, Nepal, and Sri Lanka. The program is committed to fostering a diverse and inclusive intellectual community that values difference, promotes critical thinking, and encourages the development of new perspectives on the region.

The program offers a comprehensive curriculum that includes coursework in a variety of disciplines, such as history, anthropology, economics, linguistics, literature, and social sciences. Students have the opportunity to work closely with faculty members from across the campus, including members of the colleges of Arts and Sciences, Business and Public Administration, and Agriculture and Life Sciences.

Students interested in exploring these opportunities should consult the director, Southeast Asia Program, 180 Uris Hall.

Statistical Science Department
The university-wide Department of Statistical Science coordinates undergraduate and graduate study in statistics and probability. A list of suitable courses can be found in the section, "Interdisciplinary Centers, Programs, and Studies," in the front of this catalog.

Women's Studies Program

Introduction to the Program
Women's Studies is an interdisciplinary program that seeks to deepen understanding of women's lives, cultures, and history, in all their complex multiplicities. Transformative as well as additive, women's studies challenges us to re-examine much of what we think we already know by providing an intellectual—and critical—framework through which to view the many interconnections among gender, knowledge, and power. Thus, central to the curriculum in women's studies are such overarching notions as these:

(a) that definitions of gender—including those that privilege exclusive heterosexuality—are not natural or universal but are instead social constructions that vary across time and place, serve political ends, and have ideological underpinnings;

(b) that systems of gender inequality interact with other social inequalities, including those of class, race, ethnicity, sexual preference, and Western vs. non-Western cultures; and

(c) that even the most current knowledge derived from the humanities, social sciences, and natural sciences is not as impartial, objective, or neutral as has traditionally been thought but instead emerges out of particular historical and political contexts.

Although all Women's Studies courses except writing seminars count toward the major, they do not all satisfy distribution requirements or count toward the total hours required in Arts and Sciences; if a course is cross-listed with another Arts and Sciences department, be sure to check with college offices about whether it will satisfy distribution or our requirements for Arts and Sciences.

Program Offerings
The Women's Studies Program offers an undergraduate major, an undergraduate concentration, and a graduate minor. Undergraduate students in the College of Arts...
and Sciences who want to major in women's studies can apply directly to the program. Undergraduate students in other colleges at Cornell will need to work out special arrangements and should speak to the Director of Undergraduate Studies (DUS) in Women's Studies.

The Undergraduate Major

The questions posed by feminist inquiry cannot be answered from within any single discipline or even from a simple combination of two or more disciplines. For that reason, the women's studies major provides students with a basic groundwork in the interdisciplinary field of women's studies and then requires each student to construct an advanced and individually tailored program of study on a topic, in a discipline, or in a combination of disciplines of special interest to the student alone.

Rather than specifying a particular sequence of required courses for each and every student, the women's studies major gives students a starting point in women's studies, an active advisory system to help them shape a curriculum, and an ongoing impetus to reflect on their entire program of undergraduate study.

In designing their major, students should keep in mind that there are not many graduate programs offering a degree in women's studies itself. Accordingly, undergraduates wishing to major in women's studies should talk at length with a faculty member about how to design a program of study that will best qualify them for entry into either a job or a postgraduate degree program when they leave Cornell. To give one example of what needs to be considered in designing a major: Undergraduates who might want to do graduate study within a discipline will need to develop a certain level of disciplinary specialization at the undergraduate level. This can be done either by supplementing the women's studies major with a carefully selected cluster of courses in that discipline or by pursuing a double major.

Requirements for a Women's Studies Major

1. Prerequisite courses: Before applying to the major, the student must complete any two Women's Studies courses with a grade of B- or better. Some suggested entry-level courses for 1997–98 include: 206, 210, 234, 263, 269, 273, 277, and 285. These courses would count both as prerequisites and as part of the women's studies major. Freshman writing seminars, in contrast, would count as prerequisites but not as part of the major.

2. Required course work:
   a. A minimum of 36 credits in women's studies is required for the major. No course in which the student has earned less than a C- can count toward these 36 credits. Although there is no single women's studies course that is required of all majors, every major must complete a program of study that is both graduated in difficulty and interdisciplinary in scope—a program, in other words, that reflects both the breadth and depth of women's studies scholarship. This program of study must be developed in consultation with the student's adviser in women's studies and must include advanced seminars at the 300 level or above.
   b. Students may count up to three courses outside women's studies toward the major if those courses are approved by the student's women's studies adviser as constituting a meaningful component of the student's women's studies curriculum. To facilitate the coordination of a women's studies major with other majors in the college, students may also count toward the major up to three courses that are simultaneously being counted toward a second major.

3. The Honors Program: To graduate with honors, the major in women's studies must complete a senior thesis under the supervision of a women's studies faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative grade point average of 3.0 in all coursework and a 3.5 average in all courses applying to their women's studies major. Students interested in the Honors Program should consult the Director of Undergraduate Studies (DUS) late in the spring semester of their junior year or very early in the fall semester of their senior year for more information about the Honors Program, see WOMNS 400 and the "Guidelines For a Senior Honors Thesis" available in the Women's Studies Program office.

The Women's Studies Concentration

Undergraduate students in any college at Cornell can concentrate in Women's Studies in conjunction with a major defined elsewhere in the university. The concentration consists of four courses in Women's Studies completed with a grade of D- or above, no more than two of which can come from a single discipline and none of which should overlap with the major. Freshman writing seminars cannot be included within the four required courses. Students wishing to concentrate in Women's Studies should see the DUS.

The LBG Concentration

Women's Studies serves as home to the Lesbian, Bisexual, and Gay Studies Program, which offers an undergraduate concentration as well as a graduate minor. The LBG undergraduate concentration consists of four courses. The Women's Studies courses that may be used to fulfill the LBG concentration are 210, 262, 277, 321, 355, 376, 377, 413, 433, 450/650, 465, 465/665, and 466. For a complete listing of all courses that will fulfill this concentration please see the LBG Studies Program office.

WOMNS 104 FWS: Whose Families?

Spring. 3 credits. M. B. Norton.

Today the term "family values" appears frequently in the media. Traditional family values are being destroyed, commentators claim, by (take your pick): divorce, abortion, the gay-lesbian rights movement, wage-earning mothers, teenage out-of-wedlock births, violence and sex on television and in the movies, rap music, you name it. The list seems endless. This seminar will first identify and analyze contemporary texts discussing the seeming decline in "family values." It will then read and analyze historical works. Finally, students will explore the experience of their own families by examining documents and/or interviewing relatives, primarily parents and grandparents, to place "common knowledge" into concrete historical and personal contexts, and to familiarize students with the process of rigorous analysis.

WOMNS 105 Feminine and Masculine Ideals in Japanese Culture (also Asian Studies 105)

Fall and spring. 3 credits. Staff.

In its long history, Japanese culture has developed a large number of role models—the aristocrat, poet-priest, warrior, entertainer, "salary man," and "education mama" and idealized them in its literature and art. Using these ideals as its subject matter, the seminar will give students practice in reading texts closely, analyzing ideas, and writing various types of papers. Through studying Japanese concepts of femininity and masculinity, the students will not only explore a new culture but will also gain new perspectives on their own cultures.

WOMNS 106 FWS: Women and Writing (also English 105)

Fall and spring. 3 credits. Staff.

What is a woman? How does she confront her personal experience? Does she play a special role in history? To what extent does society, or in our understanding of language and literature? This course will explore the relationship between women and writing. We will discuss writings by and about women, debate our attitudes toward feminism, and analyze the relevance of these questions to our own written work. Individual sections will emphasize different aspects of the relationship between women and writing. Which section to choose would depend on your own interest in exploring how women appear in private or autobiographical writings, historical contexts, and/or literary works. Further information on specific sections is available in the freshman writing seminar office. Textual overlap is kept to a minimum so that students can take more than one Women and Writing seminar during their time at Cornell.

WOMNS 107 FWS: Women Living on the Edge (also Society for the Humanities 106)

Fall. 3 credits. S. Olov.

This seminar about women confronting state power and terror in Soviet Russia, Nazi Europe, and the American South during slavery and segregation will focus on how they have portrayed themselves, or have been portrayed, in fiction, nonfiction, poetry, and film. We will analyze these portrayals from rhetorical, moral, and historical perspectives, paying special attention to how they are presented and how they are received. Our writing will mostly be analytic. Materials will include a report smuggled out of a Soviet labor camp by women political prisoners in the '70s; Anne Frank's Diary and testimonies by Holocaust survivors; Laura Jane Look's Book of a Slave Girl Written by Herself; Bette Davis's film Watch on the Rhine; and our interview with a Russian dissident.

WOMNS 109 FWS: Gendered Imaginations in African History and Literature (also History 109)

Fall. 3 credits. A. R. Greene.

In this course, we will explore and write about the many worlds of African history,
culture, and society throughout texts composed by African oral historians and contemporary African fiction writers. Texts include the oral tradition, SUNDIALTA, and the historical novel, SHAKA, as well as writings by Chinua Achebe, Buchi Emecheta, Flora Nwapa, who use their novels to engage in an intense debate about the role that women and men play and continue to play in the societies in which they live.

WOMNS 167 FWS: Masculinity in Light of Feminism (also Anthropology 167) Fall. 3 credits. A. Villarejo. What is masculinity? What is male domination, and what is its relationship with masculinity? What are the possibilities for reforming or even radically transforming the gendered power relations of male domination, and what would the impact be upon masculinity? This course examines both what masculinity and male domination are and how they might be transformed through an exploration of anthropological literature on masculinity cross-culturally and feminist critiques of masculinity and male domination.

WOMNS 178 FWS: Desire (also English 178) Fall. 3 credits E. Hanson. In this course we will discuss some of the literary methods of articulating "these pleasures which we slightly call physical," to borrow a phrase from Colette. We will begin with the theory that sexual desire has a history, even a literary history, and we will examine some of its most influential modes: Platonic, Christian, decadent, psychoanalytic, and feminist. Because this is a course in lesbian and gay studies, we will focus on homosexuality almost every week, but we will also discuss hysteria, mysticism, madness, masochism, gender-bending, pornography, and psychoanalytic and feminist perspectives. Course objectives will be achieved through lectures, readings, films, class discussions, and personal experiences.

WOMNS 210 Introduction to Feminist Theory Fall. 4 credits. A. Villarejo. This course introduces students to critical approaches in feminist scholarship to the cultural, social, and political situation(s) of women. Particular attention will be paid to the conceptual challenges and dangers posed by attempts to study women without taking account of relations between race, class, and gender in ideological and social formations. Readings will draw on work in various disciplines and will include literary texts and visual images.

WOMNS 214 Biological Basis of Sex Differences (also Biological Sciences 214 and Biology and Society 214) 3 credits. Prerequisite: one year introductory biology. Limited to non-biology majors and freshmen, sophomore, and junior biology majors; majors may register only with permission of the instructor. Offered alternate years. Not offered 1997-98. Next offered Fall 1998-99. J. Fortune.

WOMNS 234 Gender in Early Modern Europe (also History 234) # Spring. 4 credits. Sophomore seminar. Enrollment limited to 20 students. R. Weil. An inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?

WOMNS 238 The Historical Development of Women as Professionals, 1800-Present (also Human Development and Family Studies 258, American Studies 258, and History 238) # Spring. 3 credits. Not offered 1997-98. J. Brumburg.

WOMNS 244 Language Use and Gender Relations (also Linguistics 244) Spring. 4 credits. S. McConnell-Ginet. This course explores connections between language (use) and gender (sex) systems, addressing such issues as the following: How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women's and men's roles affect their language use, their relation to language change? What is meant by sex, gender? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and general women's studies and feminist theory.

WOMNS 249 Feminism and Philosophy (also Philosophy 249) Fall. 4 credits. J. Whiting. An historical introduction, using literary as well as philosophical texts, to views about the nature of women and their position in society—from the ancient debate (between Plato and Aristotle) about whether men and women are by nature suited to different activities, to contemporary debates between "sameness" and "difference" feminists. Texts will include Anaxagoras, Aristotle, Rousseau, Wollstonecraft, Engels, and various twentieth-century authors (such as Virginia Woolf, Carol Gilligan, Catherine MacKinnon, and Sarah Houl gland).

WOMNS 251 Twentieth-Century Women Novelists (also English 251) 4 credits. Not offered 1997-98. S. Samuels.

WOMNS 253 Interpreting Melodrama and the Woman's Film (also English 253) Spring. 4 credits. Students must be free to attend regular screenings of films and videos. Lab fee $25.00. Priority given to Women's Studies and English majors. Limited to 20 students.

With some attention to melodrama's roots in nineteenth-century fiction and theatre and in twentieth-century women's fiction and popular Freudianism, we will work to define Hollywood's melodrama as both a genre and a way of viewing the world. Psychoanalytic and feminist analyses of melodrama will help us pose larger questions about gender and culture, about gendered spectatorship, about the relation of these films to American culture, about Hollywood's changing constructions of "woman," the "maternal," and the "feminine," and questions about desire, pleasure, fantasy, and ideology in relation to the melodramatic heroine. Required weekly, evening screenings of such films as Stella Dallas, Now, Voyager, Mildred Pierce, The Woman, Imitation of Life, and Gaslight and Picnic. Regular critical readings, frequent viewing questions, two longer essays, no exam.

WOMNS 259 Introduction to Feminist Political Thought (also Government 368) Spring. 4 credits. Not offered 1997-98. N. Hirschmann.

This course will provide a general introduction to feminist political thought, surveying various current issues and methodologies. The course will combine analysis of women's historical political thought and the relationship of feminism to the discipline of political science; readings by contemporary feminist theorists, and consideration of what theory can contribute to practical issues such as hazing, pornography, prostitution, racism, sexuality, and sexual harassment.

WOMNS 273 Women in American Society, Past and Present (also History 273) # Spring. 4 credits. M. B. Norton. A survey of women's experiences in America from the seventeenth-century to the present. Among the topics to be discussed are women's familial roles, the changing nature of household work, racial and ethnic differences in women's experiences, the movement for women's rights for women, and contemporary feminism.
ARTS AND SCIENCES - 1997-1998

WOMNS 277 Social Construction of Gender (also Psychology 277)  
Fall. 3 credits. Limited to 240 students.  
S. Bem.  
Psychology/Women's Studies 277 is an interdisciplinary course that addresses two broad questions: 1) how an individual's gender and sexuality are constructed; and 2) how hidden assumptions or "lenses" embedded in our social institutions, cultural discourses, and individual psyches perpetuate mental assumptions of the course is that social science has worried too much about difference per se and too little about how even our most neutral-looking institutions invisibly transform difference into disadvantage. Although some attention is given to biological perspectives, the course emphasizes the cultural and psychological processes whereby the historically contingent comes to appear as the natural. Among some of the many topics discussed in the importance of looking at biology in context, the parental "instinct," androcentrism in law, sexual orientation cross-culturally, androgyne, the intersections of gender and race, sexual harassment, egalitarian relationships, gender-liberated child-rearing, and homophobia.

WOMNS 279 Lesbian Personae (also English 279)  
Fall. 3 credits. Not offered 1997-98.  
E. Hanson.

WOMNS 285 Introduction to Sexual Minorities (also HDFS 284)  
Fall. 3 credits. Prerequisite: One social science course. Sections TBA.  
R. Savin-Williams.  
This course introduces students to theories, empirical scholarship, public policies, and current controversies with lesbian, gay, bisexual, transgender, sexual questioning, and other sexual minority populations. The major focus is on historical, social, development, lifestyles, and communities with additional emphasis on ethnic, racial, gender, and class issues. Requirements include reaction papers to the readings.

WOMNS 305 Emotion, Gender, and Culture (also Anthropology 305)  
4 credits. Not offered 1997-98.  
B. J. Isbell.

WOMNS 307 African-American Women in Slavery and Freedom (also History 303 and Africana Studies 307)  
Historical exploration of African-American women from a sociopolitical perspective. Topics include: slavery, freedom, sexuality, labor, family, gender cross-racially that begins with the African background and ends at 1900.

WOMNS 321 Sex and Gender in Cross-Cultural Perspective (also Anthropology 321)  
Fall. 4 credits. Staff.  
An introduction to the study of sex roles cross-culturally and to anthropological theories of sex and gender. The course examines the relative positioning of the sexes in social, political, economic, ideological, cultural, and biological aspects of culture; we emphasize the diversity in gender and prospects for change around the world. In addition to lectures and films or videos, participants will work in small discussion sections (maximum enrollment of eight) to prepare several practical field exercises, short papers and critical assessments of other course materials.

WOMNS 341 Ethical Theory (also Philosophy 341)  

WOMNS 344 Male and Female in Chinese Society and Culture (also Anthropology 344)  

WOMNS 348 The Female Literary Tradition: Wollstonecraft to Woolf (also English 348)  

WOMNS 349 Readings in Feminist Literary Theory (also English 349)  

WOMNS 353 Feminism: State and Public Policy (also Government 353)  

WOMNS 355 Decadence (also English 355)  
Fall. 4 credits. E. Hanson.  
"My existence is a scandal," Oscar Wilde once wrote, summing up in an epigram the effect of his carefully cultivated style of perversity and paradox. Through their valorization of aestheticism and all that was considered artificial, unnatural, or morbid, the so-called "decadents" of the late-nineteenth century sought to free the pleasures of beauty and sexual desire from their more conventional ethical moorings. Although we will focus on Oscar Wilde, we will also read works by Charles Baudelaire, Paul Verlaine, J.-K. Huysmans, Renee Vivien, Leopold von Sacher-Masoch, Walter Pater, A.C. Swinburne, and Lionel Johnson. We will also consider historical, theoretical, and early medical texts on sexual inversion. Because this is a course in lesbian and gay studies, we will focus primarily on the various ways that decadence became a powerful trope for the articulation of homosexuality and other proscribed sexual pleasures. Topics for discussion will include androgyny and sexual inversion, sodomy and satanism, lesbianism and vampirism, cultural and linguistic degeneration, hysteria and paranoia, masochism and mysticism, chastity and sublimation, Catholicism and Hellenism, and dandyism and camp.

WOMNS 357 American Families in Historical Perspective (also History 359, American Studies 359 and Human Development and Family Studies 359)  
3 credits. Prerequisite: Human Development and Family Studies 150 or one 200-level social science or history course. Students in endowed units must register for Women's Studies 357 or History 359 or American Studies 359. Not offered 1997-98. Next offered 1998-99. J. Brumberg.

WOMNS 358 20th-Century Experimental Fiction by Women (also English 358)  

WOMNS 362 Global Perspectives on Gender  
Spring. 4 credits. N. Assie-Lumumba.  
The course will examine how forms of gender inequality have been shaped by historical and political forces and structured by differences in national histories. The class will be taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty directing the course, the class will consider such issues as cross-cultural perspectives on gender; the history of work and family life in different societies; the gendered division of labor in local, national, and international economies; the impact of colonialism, the organized efforts of women to define gender relations; the role of the state in constructing an engendered economy and policy.

WOMNS 363 Representations of Women in Ancient Greece and Rome (also Classics 363 and History 367)  
Spring. 4 credits. L. Abel.  
The task of this course is to analyze ancient Greek and Roman representations of women—some famous, some infamous, some nameless—within their historical and cultural contexts and the assumptions that underlie these representations. Using literary, historical, legal, and artistic sources (in translation) and examining the historiographical and methodological problems the use of such evidence poses, the class will assess the changing social conditions that relate to the roles, status, and images of women in antiquity. Among the topics considered are: myth and ideology, women's role in the family and society, views of the female body and female sexuality, the place of women in creative art.

WOMNS 366 Women at Work (also Industrial and Labor Relations: Human Resources 366)  
Spring. 3 or 4 credits. J. Farley.  
Various aspects of female occupational roles in twentieth-century United States. Historical, social, and legal factors that influence women's choice of careers, work socialization and training, and subsequent labor-market experience are considered. Working women's entry-level jobs, opportunities for advancement, and income are compared to men's.

WOMNS 368 Marriage and Sexuality in the Middle Ages (also History 368 and Religious Studies 368)  
Few topics generate heat so readily as gender relations and sexuality. Behind the current controversies lie decisions made in the first Christian centuries, and firm up in the course of the Middle Ages; these still affect all of us, believers and unbelievers alike. This course studies Western attempts to deal with the problem of sexuality up to about 1500. The class will first clarify the church's normative rules of law and theology. Armed with this framework, it will then turn to more specific topics, including homosexuality, prostitution, rape/abduction and sexuality in medieval literature. The goal is to be able to compare the ideal model with the reality, and thus to assess the product the medieval church passed on to Western culture and ourselves. No formal prerequisite, though some prior knowledge of medieval European history is desirable.
WOMNS 370 19th-Century Novel (also English 370) #
E. Hanson.

WOMNS 374 Nineteenth-Century American Women Writers (also English 374 and American Studies 374) #
Spring. 4 credits. I. Brown.
In this cross-cultural examination of nineteen­teenth-century American women writers, we will contrast a variety of nineteenth-century works of fiction, political/feminist manifestos, and slave narratives. We will investigate the ways in which these writers used their texts to construct culturally valuable and authentic selves. We will also consider tensions between "sentimental" idealism and political pragmatism, passionless femininity, and autonomy. Readings will include Louisa May Alcott's Behind a Mask, Anna Julia Cooper's A Voice from the South, Frances Harper's Iola Leroy, Harriet Beecher Stowe's The Ministers' Wooing, and Harriet Wilson's Our Nig.

WOMNS 376 Gay Fiction (also English 377) #
E. Hanson.

WOMNS 380 Gender, Ideology, and Culture (also Sociology 380) #
Spring. 4 credits. P. Becker.
This course will explore representations of women in popular culture, including images, narratives, and religious practices. We will examine the relationship between popular culture and ideology, and look at how women "read" popular culture. The aim of the course is to enable students to critically and analyze the effects of ideological representations of difference on personal identity, construction, status, and power relationships. Readings are drawn mostly from sociology of culture and cultural studies; most texts deal with popular culture and gender in the 19th and 20th centuries United States.

WOMNS 381 19th Century French Women Literature (also French Literature 381) #
Fall. 4 credits. Course conducted in French.
A. Berger.
While situating the works read within their specific historical and literary context, this course will attempt to address two sets of questions: 1) How does the inscription of literature as a Public Institution within a phallocentric cultural order affect women authors' status and writing strategies? 2) To what extent and at what levels does being a woman inform or shape the text produced? In what ways is literary writing concerned with sexual difference? Writers will include Stéphanie de Pellevé, George Sand, M. Desbordes-Valmore, Flora Tristan, and Rachilde.

WOMNS 384 History of Women and Unions (also Industrial & Labor Relations 384) #
Spring. 4 credits. J. DeVault.
This course will examine women’s participation in the U.S. labor movement in the nineteenth and twentieth centuries. The class will cover issues such as women workers’ relations with male-dominated union movements, the role of cross-class alliances of women in organizing women workers, and organizations with radical parties and organizations, problems faced by women union leaders and activists, racial and ethnic differences in organizing, and the impact of societal stereotypes and expectations.

WOMNS 400 Senior Honors Thesis
Fall and spring. 2–4 credits. For Women’s Studies seniors only. Permission of Women’s Studies faculty member required. Student must carry a GPA of 3.0 in all subjects and a 3.3 in Women’s Studies.
Staff.
Both the form of theses, and the nature and extent of contact between student and adviser, will depend on mutual agreement between the two. In one diagram, the student will write an essay of approximately 50 pages in length, drafted and revised in a series of carefully planned stages over the course of two semesters, with an outline expected on approximately Sept. 15th and a draft of the first chapter on approximately November 15th. An “R” grade will be assigned at the end of the fall semester and a letter grade on completion of the project at the end of the spring semester.

WOMNS 404 Women Artists (also History of Art 406) #
Fall. 4 credits. J. Bernstock.
This seminar will be devoted to a study of the work of women artists from antiquity to the present. The works of the most important women artists from each period will be studied in relation to prevailing issues and styles of roles in society. Readings by feminist critics are a major part of the course.

WOMNS 406 The Culture of Lives (also Anthropology 406) #

WOMNS 409/609 Misogyny and Its Readers (also Italian 409/609 and Comparative Literature 449/649) #

WOMNS 426 Undergraduate Seminar in Early American History (also History 426) #

WOMNS 427 Shakespeare: Gender, Sexuality, Cultural Politics (also English 427) #
B. Correll.

WOMNS 431 Scenes of Female Enlightenment (also English 431) #
M. Jacobus.

WOMNS 433 The Female Dramatic Tradition (also Theatre Arts 436) #

WOMNS 438 Female Adolescence in Historical Perspective, 1815–1960 (also Human Development and Family Studies 417 and History 458) #
Spring. 3 credits. J. Brunberg.
This seminar analyzes the changing nature of female adolescence in the United States is explored using nineteen­teenth-century primary sources available in the Department of Manuscripts and University Archives. Olin Library multidisciplinary readings and discussion sessions are designed to uncover the nature of women’s childhood, patterns of authority within the family, cultural attitudes toward sexuality, female friendships, courtship patterns, and rites of passage into adulthood.

WOMNS 444 Historical Issues of Gender and Science (also Science and Technology Studies 444) #
Fall. 4 credits. M. Rossiter.
This course is a one-semester survey of women’s role in science and engineering from antiquity to the 1990’s with special emphasis on the United States in the 20th century. Readings will include biographies and autobiographies of prominent women scientists, educational writings, and other primary sources as well as recent historical and sociological studies. By the end of the semester we should have attained a broad view of the problems that have faced women entering science and engineering in the past and those that still remain. There are no formal prerequisites for the course, although some knowledge of women’s history and the history of science would be helpful.

WOMNS 445 Nineteenth-Century Women Novelists (also English 445) #

WOMNS 447 Reading Freud: Gender, Race, and Psychoanalysis (also German Studies 447 and Comparative Literature 447) #

WOMNS 448/648 Boccaccio: Gender, Power, and the Sexual Text (also Italian Literature 445/645 and Comparative Literature 456) #
Fall. 4 credits. M. Migiel.
A study of the discourses about reading and sexual difference in Boccaccio’s Decameron. We will devote special attention to two questions: 1) What does it mean to carry out a feminist reading of a male-authored text? 2) How do the narrators of the Decameron rework earlier discourses about reading and sexual difference found in literary, historical, and philosophical material drawn from Italian, Old French, and Latin sources? All readings will be done in English translation; students who command the pertinent foreign languages may read texts in the original. An extra hour-long discussion section will be organized for students who read and speak Italian.

WOMNS 450/650 The Lenses of Gender (also Psychology 450/650) #
Spring. 4 credits. Permission of instructor required. Limited to 15 seniors and graduate students. No preregistration; interested students should attend the first class. Graduate students sign up for Women's Studies/Psychology 650. S. Benn.
This seminar analyzes the ideological, institutional, and psychological mechanisms that are responsible for the social reproduction of male power in Western—and especially American—culture. It is interdisciplinary, covering material from biology, history, anthropology, law, sociology, psychology, psychiatry, philosophy, and feminist theory. As much as the central focus of the seminar is on gender, it does not analyze gender in isolation, but looks also at
WOMNS 451 Women in Italian Renaissance Art (also Art History 450) §
Spring. 4 credits. Prerequisite: permission of instructor. C. Lazzaro.
This seminar examines representations of the Madonna and Child from the fourteenth and fifteenth centuries, the narrative scenes painted on tapestries and other domestic furniture, biblical and historical heroines such as Judith and Lucretia, portraits of patrician women and courtesans, and violence to women in a political context. It will investigate the contemporary ideas about motherhood, beauty, sexuality, social presentation, and gender roles in society that inform these representations. We will construct a critical framework for interpreting them in feminist art history and theory, particularly in the Italianate Renaissance. We will be concerned especially with how visual images are encoded with meaning, what kind of relationship can be established with their historical context, and how they convey social constructs and ideology.

WOMNS 458 Women, Men and the Law in Muslim Courts (also Near Eastern Studies 459) @ #
Fall. 4 credits. Prerequisite: Previous course within Islamic Studies helpful but not essential. J. Pierce.
This course examines relations between women and men by focusing on the manner in which an 18th-century community in the Muslim Middle East functioned through its court. By analyzing actual court cases, we will explore issues such as marriage and divorce, property rights, sexuality and its regulation, access to communal and domestic space, and the control of knowledge. We will be particularly interested in the question of whether normative codes of law (religious, state) were consistent with the individual's sense of moral worth and self-interest; hence we will also be concerned with relations between the individual and the community, and between the community and the state. Previous course work in Islamic studies is helpful but not essential.

WOMNS 459 Education in Africa and the Diaspora (also Africanas 458) @
Fall. 4 credits. N. Assie-Lumumba.
This course deals with theories and concepts of planned change for social development and their application to educational innovations geared to promoting equal opportunity based on gender, race, and class in Africa and the African Diaspora. The first part of the course will be concerned with the stages of innovations from their inception to their implementation, resistance, diffusion and impact of different social categories. The second part of the course will deal with concrete cases of educational innovations such as the creation of educational institutions and change in curriculum development and medium of instruction. Historical and contemporary cases of educational innovations will be presented and analyzed. The case studies include the development of Africana Studies as a discipline, the creation and expansion of historically black institutions such as Lincoln University in Pennsylvania, Tuskegee Institute in Alabama, Spelman College in Georgia, and the Westside Preparatory School in Chicago.

WOMNS 461 Feminist Epistemology (also Philosophy 461)
Fall. 4 credits. Prerequisite: K. Jones.
Many feminists recognize that the concepts of reason and objectivity have served the ideological function of maintaining oppressive social structures. It will then use these theories as a framework for examining how history and theory (particularly in the academic disciplines) have been self-undermining, casting into doubt the status of the critique itself. The course begins with this problem. We also examine feminist work on the social construction of gender and the role that "experience" has played in discussions of whether women are a social group.

WOMNS 464 Gender and Politics in the Roman World (also Classics 463 and History 463)

WOMNS 465 Feminist Theory/Lesbian Theory

WOMNS 466 Feminism and Gender Discrimination (also Government 466 and La Linguistica 466)
Fall. 4 credits. K. Abrams.
This course will introduce students to the major schools of feminist legal theory, including equality theory, difference theory, dominance theory, and anti-essentialism. It will then use these theories as a framework for examining several areas in which the law has attempted to address gender-specific injuries. These will include the workplace (sexual harassment, regulation of fertility, work/family conflict), and violence against women (rape, spousal abuse, pornography). The course will emphasize analysis and critique of present political and legal responses and formulation of alternative responses. Some previous exposure to legal materials (case law, statutes) is useful but not required.

WOMNS 467 Sexual Minorities and Human Development (also HDFS 464)
Fall. 3 credits. Limited to 15 students. Permission of instructor required. R. Savin-Williams.
The first half of the course covers topics of a fairly general nature regarding theoretical, research, and applied issues on sexual minorities in context. In the second half of the course, students determine the content through their selection of particular topics that interest them. The success of the course depends on students feeling personally engaged and committed to the course content. Because of the multidisciplinary nature of the course, it is hoped that students from a variety of backgrounds in disciplines, gender, sexual orientation, ethnicity, race, class, and religious affiliation will feel comfortable in the course.

WOMNS 468 Radical Democratic Feminisms (also Government 467)
Fall. 4 credits. A. M. Smith.
Radical democratic feminisms is an advanced feminist theory seminar. We will focus on contemporary political discourses that are influenced by socialist feminism, radical democratic pluralism, critical race theory and radical anti-racist and anti-heterosexist multiculturalism. The reading list will include works by Sheila Rowbotham, Joan Scott, Michele Barrett, Lynne Segal, Zillah Eisenstein, Frances Pox Piven, Barbara Ehrenreich, Jacqui Alexander, Chandra Talpade Mohanty, Judith Butler, Julia Epsteiin, Anne McClintock, Angela Davis, Alice Echols, Dangerous Bedfellows, Lisa Duggan, Nan Hunter, Anya Gluckman and Betsy Reed, Elizabeth Grosz, Elspeth Probyn, Katha Pollitt, Renata Salecl, Patricia J. Williams, Eileen Wels, Gayatri Spivak, Jeffrey Escoffier, Barbara Epstein and bell hooks. Students should have completed at least one course in feminist theory and at least one course in social theory or political theory before taking this course.

WOMNS 471 American Indian Women's Literature (also English 471)
Fall. 4 credits. K. Roberts.
Though a variety of genres—fiction, poetry, the nonfiction essay, and autobiography—as well as media other than writing, we will examine what it means and has meant to be an indigenous woman in North America. Although our focus will be on American Indian women in the United States, we will also consider the experiences of Canadian Native women. Beginning with early tribal histories as expressed in "as-told-to autobiographies," we will look at the ways in which women fit in their respective cultures, their roles in circumstances of their lives. The most famous Indian women—women such as Pocahontas and Sacajawea—have earned their places in American mainstream culture based on heroism enacted primarily to benefit non-Indians. How historically accurate are such portrayals and how representative are such women of other Native women? These and many other questions will guide us throughout the term.

WOMNS 475 Studies in the Twentieth Century (also English 475)

WOMNS 478 Family and Society in Africa (also Africana 478) @
Fall. 4 credits. N. Assie-Lumumba.
The family as a social institution is structured according to socioeconomic, historical, political, and cultural specificities. In this course, the topics to be discussed will include the concepts of nuclear and extended family, the planning and role of different age-groups and generations in the family, marriage and related issues, such as dowry, divorce, parenthood, childrearing, sex roles, and class differences. The course will also discuss the impact of industrialization and of westernization on the family in Third World countries. Examples will be drawn from urban and rural communities in industrial/urban and agrarian/non-western societies.
This course will examine the political, social, and cultural contexts of contemporary feminist theory. Students will study works by writers like Luisa Valenzuela (Argentina), Rigoberta Menchú (Guatemala), Helena Maria Viramontes and Gloria Anzaldúa (U.S.), and Simone de Beauvoir, Monique Wittig, Julia Kristeva, Jacques Lacan, Luce Irigaray, Jacques Derrida, and Helene Cixous. Taught in English. Not offered 1997–98. Next offered spring 1998–99.

D. Castillo.

This course will provide a sampler of novels and short stories by and about Latin American women. We will look at the question of self-construction and issues such as the social and political concerns involved in a specifically Latin American feminine identity. All works will be read in translation (Romance Studies students should read originals of the works from the Spanish). Authors may include writers like Luisa Valenzuela (Argentina) and Rigoberta Menchú (Guatemala), Helena Maria Viramontes and Gloria Anzaldúa (U.S.), and Simone Schwartz-Bart (Guadalupe).

WOMNS 499 Directed Study

Fall or spring. Variable credit. Prerequisites: one course in women's studies and permission of a faculty member of the Women's Studies Program Board. Staff.

WOMNS 500 Special Topics in Feminist Theory: An Interdisciplinary Graduate Course in Women's Studies

Fall. 4 credits. Offered every three years. Not offered 1997–98. K. March.

The purpose of this course is to expose graduate students to interdisciplinary approaches in Women's Studies and feminist theory to a variety of topics or questions. While many of our graduate courses train students in highly specialized areas of feminist theory, this course aims to teach students how to find common intellectual ground around a single topic from interdisciplinary perspectives without sacrificing the complexity of any disciplinary approach. The course is designed for graduate minors in Women's Studies and students with a specialized interest in feminist theory. Although it is not required, the course is strongly recommended for students obtaining a graduate minor in Women's Studies.

WOMNS 608 African-American Women (also History 608)

Spring. 4 credits. M. Norton.

This graduate seminar will examine contemporary feminist theory from the perspective of political theory. We will study the work of feminist theorists who work specifically within the discipline of political science, as well as the specifically political dimensions of work not generally considered political theory. Though particular readings and topics will change from year to year in response to the most recent literature, in general the course will focus on questions of epistemology and methodology as a way to explore a variety of issues of relevance to feminism as an academic, intellectual, and political enterprise.

WOMNS 671 Feminist Methods (also Rural Sociology 671)

WOMNS 685 Reconstructing the Era: Nineteenth-Century African American Women's Literature and Society (also English 685)

Fall. 4 credits. L. Brown.

In this course we will explore the expressions of postbellum ideology, women's culture, and family politics that influenced nineteenth-century African American women's literature. Our discussions of the texts and their social and intellectual impact will be grounded in intensive historical research. While reading such books as Emma Dunham Kelly's Four Girls at Cottage City, Susie King Taylor's Civil War Memoir, A. E. Johnson's The Hazel Family, and Frances Harper's recently discovered novelas (Mmi's Sacrifice and Trial and Triumph), students will refine their nineteenth-century research skills. In addition to working with federal census data, pension rolls, town histories, and lesser-known African American newspapers and periodicals, students will conduct extensive genealogical searches in order to reconstruct the worlds of the nineteenth-century novels we are reading. Contemporary analyses of the nineteenth-century literary tradition, biographies, and examples of methodological approaches by critics such as Claudia Tate, Frances Smith Foster, Hazel Carby, Elizabeth Ammons, Melba Boyd, and Ann duCille will complement the primary materials.

WOMNS 692 Hispanic Feminisms (also Romance Studies 692)

Fall. 4 credits. Taught in Spanish.

D. Castillo.

This seminar is designed to explore the interrelationship of feminist literary theory and the narrative production of the Hispanic world. In this inquiry, we will be developing feminist critical methodologies (based on readings of essays by thinkers such as Castellanos and Glanz) and developing strategies for possibilities of feminist criticism. Finally, we will study the ways in which feminist analyses of literature alter our readings of texts by men (Isacs, Cotázar, Onetti, García Lorca) as well as by women (Pardo Bazán, Tusquets, Valenzuela, Garro), and how they change our conception of criticism and the task of the critic.

WOMNS 699 Topics in Women's Studies

Fall or spring. Variable credits. Staff. Independent reading course for graduate students on topics approved in regularly scheduled courses. Students develop a course of readings in consultation with a faculty member in the field of Women's Studies who has agreed to supervise the course work.
ARTS AND SCIENCES - 1997-1998
