Focuses on both the economic analysis of unions and collective bargaining in our economy and the economic forces that affect collective bargaining. The method is to identify and conceptualize the structural determinants of relative bargaining power. On this basis, the course examines both the economic outcomes of collective bargaining and current bargaining trends in a variety of industries. Tentative theoretical analyses of unionism (neoclassical, institutionalist) are compared. The statistical techniques and empirical results are on the union effect on economic outcomes (wages, prices, inflation, profits, productivity, earnings inequality) are also evaluated. The effect of technology, corporate structures, and public policy on union bargaining power is outlined, and a number of case studies of collective bargaining in the private sector are reviewed.

A term paper is required.

ILRCB 783 Seminar in American Labor History

Spring. 3 credits. Permission of instructor. Staff.

A reading and research seminar for graduate students that focuses on selected topics in nineteenth- and twentieth-century labor history. The topic changes each semester.

ILRCB 790 ILR M.P.S. Program

Fall and spring. 1–9 credits. Staff. Supervised research only for those enrolled in the ILR M.P.S. program.

ILRCB 798 Internship

Fall and spring. 3 credits. Designed to grant credit for individual research under direction of a faculty member by graduate students who have been selected for an internship. All requests for permission to register for ILRCB 798 must be approved by the faculty member who will supervise the project.

ILRCB 799 Directed Studies

Fall and spring. Credit to be arranged. For individual research conducted under the direction of a member of the faculty.

ILRCB 980 Workshop in Collective Bargaining, Labor Law, and Labor History

Fall and spring. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only. Staff.

Designed to provide a forum for the presentation of current research being undertaken by faculty members and graduate students in the Department of Collective Bargaining, Labor Law, and Labor History, and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.

HUMAN RESOURCE STUDIES

ILRHR 266 Personal Computer Basics

Fall, spring, and summer. 2 credits. J. Farley.

Provides basic skills in the use of IBM personal computers (PCs) using the Windows environment. Course covers basic hardware terminology, fundamentals of Disk Operating System (DOS), Internet and Lcxis Nexis, Windows 95, Microsoft Excel, Access, and Powerpoint. Emphasis is placed on hands-on experience using examples demonstrating human resource issues and PC-based solutions. This course is a prerequisite to several advanced Human Resource Management electives.

ILRHR 363 Leadership Seminar for Fraternities and Sororities

Spring 1998. 2 credits. S-U only.

Permission of instructor. Staff.

Provide students with an opportunity to develop their leadership and management skills. The philosophy of the course is that fraternity and sorority houses are small businesses and the leadership must be able to manage and lead for them to succeed. The learning method will be "hands on" with participants working on weekly assignments that involve their application of lessons learned to their current job duties. Students will participate in role plays, class discussions, meetings with guest speakers and debriefing sessions where they report the results of their using the material obtained from class in their current situations.

ILRHR 366 Women at Work

Spring 1999. 3 or 4 credits. Prerequisite: ILRHR 260 or equivalent. J. Farley.

Various aspects of female occupational roles in twentieth-century United States. Historical, social, and legal factors that influence women's choices of careers, work socialization and training, and subsequent labor-market experience are considered. Working women's entry-level jobs, opportunities for advancement, and income are compared to men's.

ILRHR 458 International Human Resource Management

Spring 1999. 3 credits. Staff.

Will provide an examination of international human resource management issues in multinational enterprises. The course has two major objectives: to enhance understanding of key strategic and functional issues related to IHRM and to develop an analysis of practical IHRM issues in multinational enterprises. Will include topics such as strategic IHRM issues, cross-cultural management issues, coordination issues, and expatriate management.

ILRHR 460 Human Resource Strategies for Entrepreneurial Firms

Fall or spring. 4 credits. Open to juniors and seniors. ILR 260 or permission of instructor. Not offered 1998-99. L. Cyr, T. Welbourne.

This class utilizes a semester-long case study that focuses on human resource issues and strategies for growing, entrepreneurial firms. Students solve weekly dilemmas by integrating their knowledge of the functional areas of human resource management with general management, human resource strategy, entrepreneurship, accounting, marketing, public relations, and small business management. Creative solutions to problems are communicated to the class via role plays.
formal presentations, impromptu meetings, and class discussions. In addition to the semester-long case study, students work in teams to develop their own case of an existing company. The emphasis is on integration of concepts, application to real-life business situations, and acquisition of general management skills and knowledge.

ILRHR 468 Human Resources Management Simulation
Spring 1999. 2 credits. Limited to 30 juniors and seniors. Prerequisite: ILRHR 260 or equivalent. 7 weeks. W. Wasmuth.

Uses a simulation model of process and systems approach as means to enhance students' skills in strategic planning and managerial decision making. Attention will be given to the implications and effects of strategic human resources managerial and supervisory decisions and to their organizational performance indicators, including quality of work life, employee productivity, customer satisfaction, employee retention, internal control, and the bottom line. Each student will be assigned to a group (team) of five members and must be committed to the work of that group. An individual research paper is also required. Regular attendance is required.

ILRHR 469 Immigration and the American Labor Force
Fall 1998 and spring 1999. 3 credits.

Assesses the role that immigration policy plays as an instrument of human resource development in the United States. Immigration policy will be placed in an evolutionary context but primary attention will be given to the post-1965 revival of mass immigration. In addition to legal immigration, policies pertaining to border commuters, illegal immigration, "maquiladoras," refugees, asylees, and nonimmigrant workers are also examined. Comparisons are also made with immigration systems of other nations.

ILRHR 495 Honors Program
Fall and spring (year-long course). 3 credits each term.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 497-498 Internship
Fall and spring. 3 and 6 credits.

For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 499 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 560 Human Resource Management
Fall 1998 and spring 1999. 3 credits.

Open only to graduate students. Staff.

A survey course covering the major areas of the management of human behavior in work organizations. Consideration is given to such aspects of strategic and human resource planning, design and management of work teams, staffing, training and management development, compensation, and employee and labor relations. Emphasis is on the application of theory and research to the solution of personnel problems.

ILRHR 652 Research on Education Reform and Human Resource Policy
Spring 1999. not offered. 3 credits.

A research seminar and tutorial in which students conduct qualitative empirical research on a current topic that can inform education reform efforts or human resource policy. Members of the class will be taught how to access and analyze large longitudinal data sets in a way that addresses an issue important to education reform and then write the results up for submission to a journal. The topic in fall 1998 will be the effect of adolescent peer culture on learning.
as a "package" to be considered in totality and developed strategically. Considers variations in employee relations strategies, the motives of employers in establishing such strategies, and the effects of these strategies on relevant individual and organizational outcomes.

ILRHR 668 Staffing Organizations
Spring 1999 and fall 1999. 4 credits. Limited to 25 students. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics. M. Cavanaugh. This seminar provides an overview of the process by which organizations staff positions from pools of external and internal applicants. Will focus on theories, research, policies, and practices concerning attraction and selection for the most effective utilization of human resources. Topics covered in the course include: staffing strategy and context, measurement of staffing effectiveness, job/competency analysis and human resource planning, recruitment and job choice, initial and substantive external selection practices, and internal staffing procedures. Throughout the course, considerable emphasis will be placed on relevant legislation and court decisions, and practical application of relevant theory and past research.

ILRHR 669 Managing Compensation
Fall 1998 and spring 1999. 4 credits. Limited to 30 students. Prerequisites: ILRHR 260/560 or equivalent, ILRHR 266 and basic statistics or permission of instructor. R. Broderick, G. Milkovich. Focuses on managing employee compensation in contemporary organizations. The major objectives are: to examine the current state of compensation decision making, to examine how recent theoretical and research developments inform compensation decisions, and to offer an opportunity to develop competencies in making compensation decisions.

ILRHR 670 Seminar in Manufacturing
Spring 1999. 15 credits. R. Bart. Seminar in Manufacturing ("SIM") is designed to give students a basic understanding of the fundamentals of manufacturing, as well as a broad overview of current issues and trends. The 15-credit immersion format allows development of the linkage of manufacturing to other functions in the enterprise (Research & Development, marketing, corporate strategy, human resources, etc.). A highlight of SIM is that each student will visit more than 20 manufacturing facilities during the semester, representing diverse sets of products, processes, and manufacturing strategies. These visits include extended discussion sessions with management, and often union representatives, as well as a factory tour. These visits bring the "real-world" perspective to the course. SIM is built around five basic themes. The course format and allows each theme to be discussed in depth, and the inter-relationships between themes to be developed over the semester, giving students a broad understanding of how an enterprise functions.

ILRHR 690 Comparative Human Resource Management
Spring 1999. 3 credits. Prerequisites: ILRHR 260/560, or permission of instructor. Staff. Surveys human resource practices in two key regions of the world - Western Europe and the Pacific Rim. The focus is on HR issues related to management of professional and managerial work force, such as selection and staffing.

development, and appraisal and reward systems. Special attention is given to current changes and trends in the human resource management area (e.g., unification of Europe, transformation of Japanese firms). Implications for multinationals operating in these countries will also be discussed.

ILRHR 691 Human Resource Planning and Strategy
Spring 1999. 2 credits. Limited. Prerequisites: ILRHR 560 or equivalent, one course in statistics, and permission of instructor. L. Dyer. Covers the content of human resource strategies and the process of human resource planning. The emphasis is on developing human resource strategies that are integrated with firm business strategies. Covered are methods and techniques used to forecast and plan for organization structures and processes, workforce population, employee contribution, and employee morale. Much of the course is organized around cases and simulations in which students develop policy and program decisions for fictional organizations. Decisions are evaluated on the basis of their contributions to the organizations' human resource and business objectives.

ILRHR 692 Training the Displaced and Disadvantaged
Fall of spring. 3 credits. Prerequisite: permission of instructor. Not offered 1998-99. J. Bishop. Examines public and private efforts to lower unemployment and underemployment of displaced and disadvantaged workers. The seminar examines the scope of the problem, its causes, and why specific programs have worked and others have not. Topics covered will include training for displaced workers, rehabilitation of the disabled, job search training, tax credits for hiring, vocational training, literacy instruction, EEO, public service employment, assisting new business, and industrial policy. The seminar also investigates how the economy influences the ability of targeted training and job creation to achieve sustained reductions in unemployment and draws lessons from the experience of other societies.

ILRHR 693 Training and Development in Organizations
Spring 1999. 3 credits. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics or permission of instructor. M. Cavanaugh. Provides an overview of the various aspects of the training and development function in organizations. Will view training from both a systems and training cycle approach. Will discuss several aspects of training and development including how to determine whether training is needed, issues regarding the design of training programs, current training techniques, evaluation strategies, and management development practices. Throughout the course, considerable emphasis will be placed on practical application of relevant theory and past research.

ILRHR 694 Human Resource Information System Applications
Spring 1999. 4 credits. Limited to 22 students. Prerequisites: ILRHR 260/560 or equivalent, ILRHR 250 or at least the upper-level HRS elective; basic statistics, and permission of instructor. J. Boudreau. Explores the development, implementation, and management of computerized personnel
information systems and their use in human resource management. Theories and concepts relevant to the design and implementation of such systems are presented and used as the framework for hands-on experience with personal and mainframe computer systems. Students create and use applications of current popular human resource software to design their own applications and present them to the class. Where possible, student applications are based on field work in actual organizations.

[ILRHR 695] Education, Technology, and Productivity
J. Bishop.
The seminar investigates the nexus between the education and training occurring in schools and at the workplace and the technological progressiveness, productivity, and competitiveness of firms, individuals, and nations. We will investigate (1) how technological progress is changing the nature of work and what this implies for reform of education and training, (2) why United States productivity has increased so little in the past two decades, (3) how education and training contribute to the growth and competitiveness, (4) why educational achievement has declined, and (5) how the responsibility for education and training should be apportioned among individuals, firms, private nonprofit organizations, and government.

[ILRHR 697] Special Topics in Resource Studies
Fall or spring. 3 credits. Staff.
The areas of study are determined each semester by the instructor offering the seminar.

[ILRHR 698] International Human Resource Policies and Institutions
Fall. 3 credits. Not offered 1998-99.
J. Bishop.
A comparative study of human resource policies and institutions in Western Europe, North America, Japan, and East Asia (with special emphasis on math and science education and the effects of these institutions on productivity, growth, and equality of opportunity. The institutions studied include primary and secondary education, apprenticeship, employer training, and higher education. Data on the consequences of policies is presented and an effort made to understand how human resource policies and institutions have contributed to the rapid growth and low levels of inequality in Europe, Japan, and the Pacific Rim nations. Another focus of the course is understanding the causes of the low levels of achievement of American high school students relative to their counterparts abroad.

[ILRHR 760] Seminar in Human Resource Studies
Fall or spring. 3 credits. Prerequisites: ILRHR 560, ILRST 510/511, and ILRHR 669 and permission of instructor. P. Wright.
A "floating" seminar designed to give faculty and students an opportunity to pursue specific topics in detail, with an emphasis on theory and research. Topics vary from semester to semester. Interested students should consult current course announcements for details.

[ILRHR 765] International Compensation
Spring. 4 credits. G. Milkovich.
Seminar focuses on international developments in employee compensation. Will study recent research, theoretical developments and specific organizations practices in a wide variety of countries. Local national practices will be our principal focus along with expatriates and others. Almost everyone believes they pay, so we will be drawing upon research and theories from sociology, economics, psychology, and so on. Four operative terms are seminar, comparative, compensation, and organization. This is a seminar, so come to each session prepared to be an active player. Our focus is comparative, including research, theory, and practices in specific enterprises in different countries. Compensation includes all forms of pay including cash, benefits, allowances, and so on. Primary focus at the organization level of analysis.

[ILRHR 767] Human Resource Strategies for Entrepreneurial Firms
Fall. 4 credits. Open to graduate students only. ILRHR 550, equivalent, or permission of instructor. Not offered 1998-99.
T. Welbourne.
For course description, see [ILRHR 660.]

[ILRHR 769] Topics in Compensation Theory and Research
Fall. 4 credits. Prerequisite: ILRHR 669. G. Milkovich.
Examination of developments in theory, research, and practice related to compensation. Discussion emphasizes the relevance of theory and research to compensation decision making. Students examine compensation and reward-related theories and research from supporting disciplines such as economics, psychology, sociology, and organizational behavior and evaluate their relevance to employee, managerial, executive, and international compensation.

[ILRHR 790] ILR M.P.S. Program
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

[ILRHR 798] Internship
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

[ILRHR 799] Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

[ILRHR 960] Workshop in Human Resource Studies
Fall and spring. 2 credits. Enrollment limited to M.S. and Ph.D. candidates. S-U grades only. Staff.
The workshop is designed to provide a forum for the presentation and critical discussion of current research being undertaken by graduate students, faculty members, and invited guest in the field of human resource studies. All M.S. and Ph.D. candidates in the Department of Human Resource Studies are urged to enroll; candidates in other departments are cordially invited. Each participant will have an opportunity to benefit from the collective wisdom of the others in the formulation, design, and execution of his or her research, as well as to become current on the latest developments in the field.

Fall. 3 credits. P. Wright. Ph.D. candidates only.
Seminar is aimed at reading, understanding, and conducting research in HRM. Student should obtain thorough understanding of the current research in traditional areas of HRM such as validation, job analysis, EEO, selection, performance appraisal, compensation, and training, and should develop the skills necessary to evaluate, critique, and contribute to the literature on HRM.

Fall. 3 credits. P. Wright. Ph.D. candidates only.
Seminar is aimed at reading, understanding, and conducting research in SHRM. The course should enable students to obtain a thorough understanding of the current research in Strategic HRM, and to develop the skills necessary to evaluate, critique, and contribute to the literature on SHRM.

INTERNATIONAL AND COMPARATIVE LABOR

[IILRIC 333] Western Europe, the United States, and Japan in a Changing World Economy
Fall. 3 credits (1 additional credit may be arranged). Open to juniors and seniors. L. Turner.
Offers an introduction to the contrasting national trajectories and current political economies of Germany, Britain, France, Japan and the U.S. Emphasis will be on (a) cross-national differences and comparisons; and (b) the different capacities that contrasting institutions offer each society as it grapples with intensifying trade competition, domestic political conflict, and the need for production reorganization and "new industrial relations."

[IILRIC 337] Special Topics:
Fall. 3 or 4 credits. Staff.
Devoted to new topics in the field. The specific content and emphasis varies depending upon the interests of the faculty member teaching the course.

[IILRIC 339] The Political Economy of Mexico
Fall. 3 credits. Not offered 1998-99.
M. Cook.
Explores the range of challenges affecting contemporary Mexican politics, society, and economic development—from democratization to immigration to NAFTA. The course provides both an introduction to Mexican political economy for those with no prior background and an opportunity for students with more knowledge of Mexico to explore a research topic of greater depth.
ILRIC 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRIC 533 Western Europe, the United States, and Japan in a Changing World Economy
Fall. 4 credits. Graduate students. M. Turner.
See description for ILRIC 333. Graduate students attend class, take the midterm and submit an analytical research paper at the end of the semester.

ILRC 537 Special Topics
Fall or spring. 3 or 4 credits. Staff
Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

ILRIC 631 Comparative Labor Movements in Latin America (also Government 631)
Examines the historical development of labor movements in Latin America, their role in national political and economic development, and the impact of economic liberalization, authoritarianism, and democratization on contemporary labor organizations in the region. Countries examined will include but are not limited to Mexico, Brazil, Argentina, Chile, Peru, and Venezuela.

ILRIC 632 Revitalizing the Labor Movement: A Comparative Perspective
Fall. 4 credits. Graduate seminar open to seniors with permission of instructor only. L. Turner.
Examines contemporary efforts in advanced industrial democracies to reform industrial relations. The first half of the course will examine contemporary industrial relations reform efforts in the U.S., including innovative organizing strategies; worker councils and codetermination; the German backbench opposition; the United Kingdom; Brazil; Argentina; and France—the Auroux Laws of the 1980s and their effects; and Germany—the transformation of industrial relations in eastern Germany since 1989.

ILRIC 633 Labor, Industry, and Politics in Germany
Fall. 4 credits. Open to seniors with permission and graduate students. Not offered 1998-99. L. Turner.
Is the successful postwar "social partnership" model of organized capitalism in the Federal Republic of Germany viable in the 1990s? To answer this question, we will study the workings of the councils and codetermination, the rise of a strong postwar labor movement, the contemporary German version of social partnership, with an emphasis on current events and the new challenges for German industry and labor posed by German unification and the single European market.

ILRIC 635 Labor Markets and Income Distribution in Developing Countries
Spring. 3 credits. Prerequisite: ILRLE 240 or Economics 313 or permission of instructor. Not offered 1998-99. G. Fields.
A course analyzing who benefits how much from economic growth in developing countries and how income distribution would be affected by various public policies. Topics to be covered include: poverty, inequality, social welfare, and economic growth-theory and evidence; poverty profiles, earnings functions, and decompositions; employment, unemployment, wages, and labor markets; and an introduction to benefit-cost analysis, with application to the economics of education.

ILRIC 636 Comparative History of Women and Work (also Womens Studies 636)
Will explore the similarities and differences between different cultures' assumptions about the work of women as well as women's experiences in varying work circumstances throughout history. Beginning with theoretical pieces and overviews of the history of women and work, most of the course will consist of in-depth examinations of specific work situations or occupations across time and geography. Comparative examples will be taken from the United States, Europe, and the Third World.

ILRIC 637 Labor Relations in Asia
Spring. 3 credits. Permission of instructor required. S. Kuruvilla.
A comparative survey of the industrial relations systems of selected Asian nations such as Japan, Korea, Thailand, Malaysia, Singapore, Hong Kong, China, and several others. The emphasis is on economic development strategies and industrial relations policies in these countries. Industrial relations practices, the extent of union organization, and labor force demographics of these countries will be examined. The primary objective is to provide students with an introduction to industrial relations systems in Asia. The countries chosen are representative, but not exhaustive.

ILRIC 638 Labor, Free Trade, and Economic Integration in the Americas (also Government 630)
Spring. 3 credits. Limited. Open to seniors and graduate students; juniors by permission. Not offered 1998-99. M. Cook.
Analyzes the contemporary movements toward free trade and regional economic integration in the Western Hemisphere. Special attention is paid to labor's role in this process. Examines the origins and implications of the North American Free Trade Agreement (NAFTA) and looks at integration schemes in South America (Mercosur), Central America, and the Caribbean. At the hemispheric-wide initiatives. A research paper is required.

ILRIC 700 Research Seminar on Labor Markets and Economic Development
Fall or spring. 3 credits. Prerequisite: open to M.S. and Ph.D., students only. G. Fields.
Research seminar for students writing theses or dissertations on aspects of labor markets and economic development. Will address research questions, methodologies, and contributions in the areas of employment and unemployment, income and earnings, educational and human resource development, welfare economics, and economic growth. Numerous presentations and written papers will be required.

ILRIC 729 The Political Economy of Mexico
For course description, see ILRIC 339.

ILRIC 790 ILR M.P.S. Program
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

ILRIC 799 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

Other courses approved to fulfill ILRIC distribution:
ILRCB 304 Seminar in American Labor and Social History
Fall. J. Cowie.
For description, see the section, Human Resource Studies.

ILRHR 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives
Fall or spring. R. Batt.
For description, see the section, Human Resource Studies.

ILRHR 466 Comparative Human Resource Management
Fall. Staff.
For description, see the section, Human Resource Studies.

ILRHR 469 Immigration and the American Labor Force
Fall and spring. V. Briggs.
For description, see the section, Human Resource Studies.

ILRHR 656 International Human Resource Management
Spring. V. Pucik.
For description, see the section, Human Resource Studies.

ILRHR 690 Comparative Human Resource Management
Fall. Staff.
For description, see the section, Human Resource Studies.

ILRHR 698 International Human Resource Policies and Institutions
Spring. J. Bishop.
For description, see the section, Human Resource Studies.

ILRLE 444 The Evolution of Social Policy in Britain and America
Spring. G. Boyer.
For description, see the section, Labor Economics.

ILRLE 448 Topics in Twentieth Century Economic History: The Economics of Depression and the Rise of the Managed Economy
Fall. G. Boyer.
For description, see the section, Labor Economics.

ILRLE 640 Economic History of British Labor 1750-1940
Fall. G. Boyer.
For description, see the section, Labor Economics.

ILRLE 628 Cross-Cultural Studies in Organizational Behavior
Spring. Staff.

INTERDEPARTMENTAL COURSES

ILR 150 Freshman Colloquium
Fall. 1 credit. Open only to ILR freshman. S-U only. Staff.
This course is offered: a) to acquaint new freshman students with some of the issues and disciplines in the field of industrial and labor relations; b) to establish acquaintance among members and the ILR faculty and small, randomly assigned groups of students. The course includes a plant visit and several meetings early in the semester designed to introduce issues encountered in studying the employment relationship.

ILR 451 Science, Technology, and the American Economy
Spring 1999. 4 credits. V. Briggs.
The industrial revolution did not begin in the United States, but the nation became the world's first technological society. Attention will be given to the evolutionary confluence of science, technology, mathematics, religion, and capitalism in the formation of the U.S. economy, its institutions, and its labor force. Primary attention will be given to the post-World War II economic developments. The vantage point will be the linkage with employment, unemployment, income, and productivity considerations. Public policy issues (such as the employment impact of the computer, research and development policy, national defense influences, the "industrial revolution," savings and investment rates, labor force preparedness) will be explored. Critical concerns pertaining to environmental impacts, income polarization, and consumerism will also be examined.

ILR 452 Writing in Industrial and Labor Relations
Fall or spring. 3 credits. J. Farley.
Writing experience in reading of four or five books related to the term's theme in the field of industrial and labor relations and careful writing about them. Students will also have an opportunity to practice writing about the world of work for different audiences.

ILR 790 ILR M.P.S. Program
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

LABOR ECONOMICS

J. Abowd, chair; F. Blau, G. Boyer, R. Ehrenberg, F. Fields, R. Hutchens, G. Jakubson, L. Kahn, R. Smith

ILRLE 140 Development of Economic Institutions
Fall. 3 credits. Prerequisite for non-ILR students: permission of instructor. G. Boyer.
This course provides students with an understanding of the historical roots of the economic system currently dominant in Western Europe and the United States. The course will focus on (a) the process of European economic growth prior to 1914, (b) the effect of industrialization on labor in Great Britain, and (c) the historical evolution of economic thought from Adam Smith to J. M. Keynes.

ILRLE 240 Economics of Wages and Employment (also Economics 341)
Fall and spring. 3 credits. Prerequisites: Economics 101-102, Economics 313, or permission of instructor.
This course introduces students to several issues fundamental to an understanding of the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor force participation, and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

ILRLE 340 Economic Security (also Econ 457)
Spring. 3 credits. Prerequisites: ILRLE 240 or equivalent.
This course introduces students to several issues fundamental to an understanding of the labor market. Consider the social and economic effects of income security measures. Analyzes programs offering protection against economic loss due to industrial accident, temporary and permanent disability, illness, old age, premature death, and unemployment, as well as private efforts to provide security, and the problems of integrating public and private programs. Proposals for amending or modifying economic security measures are also considered.

ILRLE 348 The Economics of Unemployment (also Econ 453)
Fall. 4 credits. Prerequisite: ILRLE 240/540 or permission of instructor.
This course introduces students to several issues fundamental to an understanding of unemployment: the social costs; definitional questions and measurement problems; the patterns of unemployment; and the various types of unemployment, their causes, and the policies that can or have been pursued to alleviate unemployment. The course is designed for undergraduate and graduate students who have taken a survey course in labor economics or its equivalent.

ILRLE 441 Income Distribution (also Econ 458)
Fall. 4 credits. Prerequisite: ILRLE 240 or Economics 341. R. Hutchens.
Explores income distribution in the United States and the world. Topics to be covered include functions and size distributions of income, wage structure, income-generating functions and theories, discrimination, poverty, public policy and income distribution, and changing income distribution and growth. Students who have taken CEE 355 may not receive credit for 441.

ILRLE 442 The Economics of Employee Benefits (also Econ 456)
Fall. 4 credits. Prerequisites: ILRLE 240 or equivalent. F. Blau.
An in-depth treatment of the economics and financial management and administration of all employee benefits: health care, insurance, retirement income, family-care benefits, executive incentive plans, and other compensation provided as a service or contingent financial package to employees. Detailed international comparisons of health care and retirement systems are included.

ILRLE 444 Modern European Economic History
Spring. 4 credits. Prerequisite: ILRLE 240 or equivalent. G. Boyer.
An introduction to the economic development of Europe from 1500 to 1939. Topics covered include: the establishment of an institutional framework supporting economic growth in early modern Europe; the causes of the first industrial revolution in Great Britain; the effects of industrialization on workers' living standards; the spread of industrialization to the major continental powers—France, Germany, Austria-Hungary, and Russia; and the economic causes and effects of the First World War.

ILRLE 445 Women in the Economy (also Econ 457)
Fall. 4 credits. Prerequisite: ILRLE 240 or equivalent.
Examines the changing economic roles of women and men in the labor market and in the family. Topics include: a historical overview of changing gender roles; the determinants of the gender division of labor in the family; trends in female and male labor force participation; gender differences in occupations and earnings; and the consequences of women's employment for the family.

ILRLE 448 Topics in Twentieth Century Economic History: The Economics of Depression and the Rise of the Managed Economy (also Econ 458)
Spring. 4 credits. Prerequisites: ILRLE 240 or Economics 341. G. Boyer.
Topics covered include: the causes of the Great Depression in the United States; the economics of the New Deal; the causes of high unemployment in interwar Great Britain; the rise of Keynesian economics and the development of demand management policies in Great Britain and the United States after 1945.

ILRLE 495 Honors Program
Fall and spring (yearlong course). 3 credits each term.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 497-498 Internship
Fall and spring. 3 and 6 credits.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 499 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 540 Labor Economics
Fall. 3 credits. Prerequisites: Economics 101-102 or Economics 103 or equivalent. Required of graduate students majoring in or minorning in labor economics and M.I.T.R. candidates.
This course focuses on the labor market. This course covers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor force participation and its relation to
and labor market analysis in particular, can be usefully applied to analyze resource allocation decisions at universities. Among the topics covered are financial aid, tuition, admissions policies, endowment policies, faculty salary determination, the tenure system, mandatory retirement policies, merit pay, affirmative action, comparative worth, collective bargaining, resource allocation across and within departments, undergraduate versus graduate education, research costs, libraries, athletics, and "socially responsible" policies. Lectures and discussions of the extensive readings will be supplemented by presentations by Cornell administrators and outside speakers who have been engaged in university resource allocation decisions or have done research on the subject.

ILRLE 741 Applied Econometrics I
Fall. 4 credits.
Considers methods for the analysis of longitudinal data, that is, data in which a set of individual units are followed over time. The focus will be on both estimation and specification testing of these models. Will consider how these statistical models are linked to underlying theories in the social sciences. Course coverage will include panel data methods (including fixed vs. random effects models for both linear and non-linear systems) and, if time permits, duration analysis.

ILRLE 742 Applied Econometrics II
Spring. 4 credits.
Covers statistical methods for models in which the dependent variable is not continuous. It covers models for dichotomous response (including probit and logit) and polychotomous response (including ordered response and multinomial logit), various types of censoring and truncation (e.g., the response variable is only observed when it is greater than a threshold), as well as sample selection issues, etc. Will also include an introduction to duration analysis. Covers not only the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model.

ILRLE 744 Seminar in Labor Economics I (also Econ 641)
Spring. 3 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

ILRLE 745 Seminar in Labor Economics II (also Econ 642)
Fall. 3 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

ILRLE 746 Seminar in Labor Economics III (also Econ 643)
Spring. 3 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.
tions and of complex organizations in general, emphasizing authority relations, goals, the division of labor, bureaucracy, and organizational design.

ILROB 320 The Psychology of Industrial Engineering
Fall. 4 credits. T. Hammer.
A study of the human factors in the industrial engineering of work, workplaces, tools, and machinery. The course examines the aspects of individual and social psychology that operate in the work setting and that should be taken into account in the design of jobs. These include limitations of the human sensory system; individual difference in skills, abilities, motives, and needs; group dynamics; intrinsic motivation; job satisfaction; conflict.

ILROB 325 Organizations and Social Inequality (also SOC 322)
Spring. 3 credits. Limited. P. Tolbert.
Examines the central role that organizations in industrial societies play in allocating income, status, and other resources to individuals. A variety of theoretical explanations of social inequality will be examined, and the social policy implications of each will be considered. Class assignments are designed to develop students' general writing skills, as well as substantive understanding of different theories and approaches to the problem of inequality.

ILROB 328 Cooperation, Competition, and Conflict Resolution
Spring. 4 credits. Prerequisite: one course in social psychology or equivalent.
Staff
An examination of theory and empirical evidence relating to the resolution of interpersonal, intergroup, and international conflict. Specific attention is devoted to studying factors that contribute to the development of cooperative or competitive bonds between parties to a conflict. The following topics are studied: the availability and use of threat; the credibility, intensity, and consequence of threat; the escalation of conflict. Personality and situational factors that regulate conflict intensification are stressed.

ILROB 329 Organizational Cultures
Fall or spring. 3 credits. Prerequisite: one or more courses in organization. Staff
Reviews the concept of culture as it has evolved in sociology and anthropology, applying it to formal organizations in workplaces such as corporations and unions. The course first examines the nature of ideologies as sense-making definitions of behavior, concentrating on the cultural forms that carry these cultural messages, rituals, symbols, myths, sagas, legends, and organizational stories. Considerable attention will be given to rites and ceremonies as a cultural form in organizational life that consolidates many of these expressive forms into one. The course will examine types of ceremonial behavior such as rites of passage, rites of enhancement, and rites of degradation, including the role of language, gestures, physical settings, and artifacts in ceremonial behavior. The presence of subcultures and countercultures in organizational behavior will also receive attention, especially the part played by occupational subcultures in formal organizations.

ILROB 370 The Study of Work Motivation
Fall. 4 credits. Open to juniors and seniors. T. Hammer.
Designed to acquaint the student with the basic concepts and theories of human motivation with implications for job design and organizational effectiveness. Focus is on theories of worker motivation and on research approaches and results as these apply to the performance of individuals and groups in formal organizations. Readings are predominantly from the perspective of organizational psychology, supplemented by relevant contributions from experimental and social psychology. Each student will design, execute, and analyze a research study of his or her own.

ILROB 371 Individual Differences and Organizational Behavior
Fall or summer. 4 credits. Recommended: some acquaintance with the substance and methods of behavioral or social science. L. Gruenberg.
Examines personality from a comparative psychodynamic point of view. Social behavior, authority relationships, and work motivation are used to illustrate how various theories could be applied to understand behavior and experience in organizations.

ILROB 373 Organizational Behavior Simulation
Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Limited enrollment. R. Stern.
Basic principles of organizational behavior as studied through readings and participation in simulations. Simulations include traditional organizations and cooperatives. Games model executive decision making, running a company, assembly work, and cooperative decision making. Organizational design, decision making, conflict, cooperation, and power are the central topics of discussion. The contrasting bases of power in the organizations permits the study of the assumptions underlying organization structure and process.

ILROB 420 Contemporary Organizational Behavior: Approaches and Applications
Fall or spring. 3 credits. Prerequisites: ILR 170 and 171 (120 and 121).
Introduces students to contemporary applications of organizational behavior theory. Students will explore the frameworks of common and current organizational and managerial change interventions, review contemporary literature about them, and try to discover existing links between these processes and the theoretical OB literature. Specific topics will vary from year to year. For this year, applications include TQM, re-engineering, team development, learning organizations, world-class manufacturing, competing values frameworks, assessment instruments, and multiculturalism and diversity issues in the workplace.

ILROB 421 Regulating the Corporation
Spring. 4 credits. R. Stern.
Will examine public and private power from an organizational perspective. The resource-dependence approach to organization-environment relations provides a framework for interpreting government attempts at the regulation of corporate behavior. Topics will cover the structure and functioning of government regulatory agencies and corporate responses to regulation, including corporate strategy, change, and political influence.
ILROB 420 Organizational Politics and Institutional Change

Spring. 2 credits. Limited to juniors and seniors with permission of the instructor. Please see the instructor before the first class. S. Bacharach.

Will examine the market, cultural, political, and structural forces that change the organizational "rules of the game," how those changes affect individuals and organizations, and the distortions that occur as individuals and organizations attempt to adjust to a new unstable order. Issues to be examined include power, corruption, dealmaking, rationality, uncertainty, and competition. Course requirements include completing a major research paper and leading a class discussion.

ILROB 470 Group Processes

Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Permission of instructor. L. Lawler.

A review of theoretical approaches and selected research on group phenomena, including the formation of groups, the structure of group relations, and group performance. Specific topics include conformity and obedience, status and power relations, status, solidarity and commitment, the management of emotion, the emergence and change of microcultures, and the role of groups in networks and organizations.

ILROB 472 Applied Organizational Behavior

Fall. 3 credits. Prerequisites: ILROB 170 and 171. S. Bacharach.

Introduces students to intermediate theory of organizational behavior. It will specifically concentrate on teaching students to use organizational theories for analytical and applied purposes. Among the issues to be addressed are organizational structure, work processes, organizational politics, organizational design, job design, incentive systems, and quality-of-work-life programs.

ILROB 479 Technical Workers and the Social Organization of Research and Development

Spring. 3 credits. Prerequisite: ILROB 170, 171 or an introductory course in sociology or anthropology. Staff.

Examines the role of technical workers in the R&D process and seeks to impart an appreciation for the practical problems that arise when firms employ a significant number of scientists, engineers, and other technical workers. It is designed for students who have an interest in high-technology firms or who anticipate working for firms in which R&D plays an important role. The course brings relevant theoretical perspectives to bear on pragmatic issues surrounding technical innovation and the employment of scientists and engineers. Representative topics include: the organization of scientific and technical communities, the industrialization of research, the nature of scientific and technical work, strategies for fostering innovation, the careers of scientists and engineers, and the managerial problems characteristic of high-technology firms. Required reading includes a take-home midterm and a final paper.

ILROB 495 Honors Program

Fall and spring (yearlong course). 3 credits each term.

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 497-498 Internship

Fall and spring. 3 and 6 credits.

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 499 Directed Studies

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 520 Micro Organizational Behavior and Analysis

Fall or spring. 3 credits. Staff.

Survey of concepts, theories, and research from the fields of organizational and social psychology as these relate to the behavior of individuals and groups in organizations. Job attitudes, motivation, performance, leadership and power, group formation, perception, and organizational climate. A preliminary course for advanced work in organizational behavior.

ILROB 620 Theories of Organizational Change, Innovation, and Evaluation

Spring. 4 credits. Prerequisites: two organizational behavior courses at the 300 level, or advanced courses in sociology or psychology. W. Sonnenstuhl.

Examines the dynamics of individual, structural, and environmental factors operating in organizational change, in general, and in the implementation and use of innovations within formal organizations in particular. The role of evaluative research in assessing the effectiveness of the implementation of innovations and in determining organizational effectiveness are analyzed. Several case studies of organizational change in government, unions, and private industry are examined. The emphasis is on conceptual frameworks for analyzing organizational change and conducting evaluative research on innovations. Readings are interdisciplinary and include sociology, psychology, and political science.

ILROB 621 Organizational Diagnosis

Intervention and Development

Spring. 4 credits. Prerequisites: undergraduate, ILROB 170 and 171; graduate students, ILROB 410 or equivalent; and permission of instructor. L. Gruenfeld.

This applied course considers theories and techniques for the identification and improvement of organizational problems at the behavioral (micro) level. Methods for the implementation of change are evaluated in the light of several normative and descriptive theories of individual and group development and effectiveness. The course emphasizes both quantitative and qualitative data processing procedures.

ILROB 623 Micropolitics in Organizations

Spring. 3 credits. Prerequisites: ILROB 170 and 171. Limited, permission of instructor. S. Bacharach.

Examines micro-political processes in organizations. Neomachiavellian, Marxist, and Weberian approaches to organizational politics will be specifically analyzed. An attempt will be made to understand how the micro-political rules of organizational games are institutionalized in change. Among the ideas to be discussed are the institutionalization of ideology and specification of the relationships among power, tactics, and strategy. Interest groups and coalition politics will be examined in terms of conflict and bargaining. Other issues to be discussed include corruption, dealmaking, and competition. Examples will be drawn from both the private and public sectors. Seminar requirements will include an in-class presentation and a major paper and/or take-home final exam.

ILROB 624 Groups in Work Organizations

Fall. 4 credits. Permission of instructor required. L. Gruenfeld.

This is an experiential learning course designed primarily for advanced students who have a comprehensive background in the theory and methods of the behavioral sciences. Work group members study their roles and relationships to each other, the task, other work groups, and especially authorities. Students write a number of self-reflective papers in which they conceptualize their experiences and relate them to theory and method in organizational behavior and experience.

ILROB 625 Conflict, Power and Negotiation

Fall. 3 credits. Open to seniors and graduate students. Permission of instructor is required. Limited enrollment. F. Lawler.

Theoretical seminar adopts a power perspective on bargaining and collective conflict resolution. Examines how power relations and power processes affect the tactics people adopt in bargaining and also when power relations inhibit or promote conflict resolution. "Power" is viewed in the course as a capability, embedded in a social structure, and tactics are the action based on or using such power. The seminar gives overview of several theoretical approaches to conflict and bargaining (e.g., rational choice, cognitive, social exchange) and places the power perspective in this context.

ILROB 627 Leadership in Organizations

Spring. 3 credits. Prerequisites: two organizational behavior courses at the 300 level or advanced courses in sociology or psychology. L. Gruenfeld.

An examination of theories and research findings from the behavioral sciences that are relevant to leadership and the influence process in groups and organizations. Personality, situational factors, intergroup processes, interpersonal communication as well as motivation to lead and to follow will be discussed. The implications for leadership training, organization development, and action research are explored.

ILROB 628 Cross-Cultural Studies in Organizational Behavior

Spring. 3 credits. Limited. Permission of instructor before registering in course. L. Gruenfeld.

Designed for students interested in social psychological theory and research in international culture comparisons of behavior and experience in organizations. Variables such as power distance, individualism-collectivism, universalism-particularism and attitudes toward authority as well as work motivation will be examined. Upon completion of the readings and discussion of conceptual materials and consideration of several major international comparison studies, each student will prepare and present a paper on a topic of his/her own choice usually related to his/her country of origin (China, Japan, German, USA, etc.).
ILROB 629 Personality in Organization
Fall. 4 credits. Open to undergraduates with permission of instructor. L. Gruenfeld.
This advanced course considers psychodynamic theories of organizational diagnosis at the individual and group levels. Topics include leadership, power, authority, work motivation, intervention, and change. The topics are applied in small study groups. The professor's role is as consultant and resource person. Class members study and research their own behavior and present qualitative and quantitative findings to the class. Students are expected to have background and interest in both research methods and theory.

ILROB 670 Semester in Manufacturing
Spring. 15 credits. Open to master's and Ph.D. students in Industrial and Labor Relations with permission of instructor. Intended for students who want to work as professionals in a specific area with strong interest in the manufacturing industries. It is taught by an interdisciplinary faculty team from the College of Engineering, the Johnson School of Management, and the School of Industrial and Labor Relations. Course material will be based on plant visits and project work with local industry. Student participation will be in interdisciplinary teams with members representing the three colleges. Course content will concentrate on four major issues that need to be taken into consideration in the manufacturing environment: (1) the changing environment for product design; (2) rapid-response production systems; (3) organizational behavior and management; and (4) performance measurement.

ILROB 671 Organizations as Social Networks
Spring. 3 credits. Prerequisites: one or more courses in organizational behavior, sociology, psychology, anthropology, or political science. A course in statistics or research methods would be helpful. Increasing attention has been devoted to the idea that social networks are crucial for research in a variety of fields. In particular, organizational and inter-organizational structures may be analyzed as patterned relationships among individuals, groups, and even other organizations. Such networks can be strong predictors of a variety of social dynamics including attitude similarity, the diffusion of innovation, turnover, and the allocation of organizational resources. A variety of methods for collecting and analyzing network data including: graph theory, sociometry, clique detection, centrality analysis, block modeling, and the quadratic assignment procedures will be used. In addition to reading recent published research, this course will involve work with actual data sets and relevant computer programs.

ILROB 674 The Social Psychology of Behavior and Experience in Organizations
Fall 1996. 3 credits. Prerequisite: ILROB 170 and 171 or ILROB 520. L. Gruenfeld. Considers theories that seek to explain behavior at the individual, group, and organizational level. Work motivation, leadership, and the member composition and dynamics of groups will be discussed. The relationship among groups in the organization, including harmony and conflict among groups, will be evaluated.

ILROB 675 Cooperative Strategies for Improving Organizational Performance
Spring. 4 credits. Will concentrate on presentation and analysis of a series of case studies involving projects using cooperative strategies to improve organizational performance. Emphasis will be given to the various dimensions of work behavior and management and control of productivity and the quality of working life. Cases will be examined against a background of the research literature on improving organizational performance. Students will be responsible for a term paper.

ILROB 676 Systems of Labor Participation in Management
Fall. 4 credits. Prerequisites: senior standing and permission of instructor. Examines the theory and practice of labor participation in systems ranging from informal shop-level participation to self-management. Special emphasis is placed on socio-technical systems of job design and work restructuring that give workers control over the labor process. Attention is given to the major issues of program development and to participation in employee-owned firms.

ILROB 677 Methods of Observation and Analysis of Behavior Attitudes and Values in Work Groups and Organizations
Fall 1997 or spring 1998. 4 credits. Permission of instructor required. Considers qualitative and psychometrically precise and systematic research methods for the study of behavior in groups and organizations. Includes a workshop that is designed to improve teamwork with the use of on-line data generated by group members. Personality, leadership culture, and group dynamics are the major focus. Students will observe, record, and videotape group and individual behavior, which will be analyzed with the help of microcomputer programs, especially SYMLOG (a system for the multiple-level observation of groups) developed by Bales (1970, 1979). In addition to lectures and discussions of research papers, this course will also include a research project designed and executed by the students.

ILROB 678 Issues in Measurement in Research on Organizational Behavior
Fall. 4 credits. Concerns the study of tests and measures used to assess central variables in organizational behavior and related fields. Students will learn where to find measures suitable for their research purposes and will examine the theories that define what is being measured. The empirical information available about different measures—construction, reliability, and validity—and the ways in which the instruments have been used in research and practice.

ILROB 722 Advanced Micro Organizational Behavior
Spring. 3 credits. Prerequisites: ILROB 520 and permission of instructor. Examines the historical development of psychological theories of organizational behavior and contemporary issues in micro organizational research. The course will emphasize reading and analysis of primary source material.

ILROB 725 Analysis of Published Research in Organizational Behavior
Fall. 3 credits. Prerequisites: ILROB 520 and one year of statistics. An advanced research methods course that critically examines published research papers in the field of organizational behavior in terms of research design and method as well as theory.

ILROB 726 Selected Topics in Organizational Behavior
Fall. 3 credits. Prerequisites: ILROB 520 and permission of instructor. An advanced seminar that seeks to develop an interdisciplinary perspective on selected topics in organizational behavior. The topics themselves will change from year to year depending on participants' interests. Course content is designed to allow students and the instructor to jointly pursue significant scholarly inquiry into one or more arenas of organizational theory. Emphasis will be placed on exploring the relevance of tradition in related disciplines (anthropology, linguistics, philosophy, sociology, etc.) that may enrich our understanding of organizational life.

ILROB 727 Work and Industrial Conflict
Spring. weeks 7-14. 2 credits. A concentrated examination of the sociology of industrial conflict. The seminar focuses on classic formulations of conflict theory in sociology, then the social, political, economic causes of industrial conflict. Both individual
and collective forms of conflict expression are examined. Some discussion of the implications of various types of worker management of firms for industrial conflict will be included.

**ILROB 728 Theories of Motivation and Leadership**
Spring. 2 or 4 credits. Prerequisites: ILROB 570. Two independent but sequence-connected minicourses.

1. **Theories of Work Motivation.** 7 weeks. 2 credits.
- Course will provide an introduction to basic concepts of human motivation in general, with particular emphasis on the theories that explain and predict work motivation. Students will examine the empirical research that tests the validity of the theories and shows how and under what conditions different motivation models can be used in practice in work organizations.

2. **Theories of Leadership and Power.** 7 weeks. 2 credits.
- Several current microtheories of leadership and power and related research are examined. The disciplinary perspective employed is social organizational psychology and the level of analysis emphasized is action and experience of individuals in groups.

**ILROB 729 Organizational Change and Intervention**
Fall. 3 credits. Graduate students only; no exceptions.

This seminar is concerned with planned and unplanned change in organizations. It is designed to analyze theory in practice. Particular attention will be paid to the role of internal and external change agents. Class members will be encouraged to analyze contemporary changes such as mergers and acquisitions and work force reductions. Participants will submit weekly work force journals.

**ILROB 770 The Cultures of Work Organizations**
Fall. 3 credits. Open only to graduate students.

Considers both administrative and occupational cultures in the workplace. It takes an anthropological perspective, focusing on ideologies as the main ingredient of cultures but emphasizing the role of cultural forms. e.g., myths, stories, sagas, language, rites and ceremonies, and physical settings of meaning. It pays special attention to the place of subcultures and countercultures in the makeup of administrative culture and to organizations as a major source of subcultures. The role of the environment in which organizations are embedded, and its influence on workplace cultures, is also included. Forms of cultural leadership and approaches to reading and changing cultures are also considered.

**ILROB 773 Advanced Seminar in Cross-Cultural Studies of Organizational Behavior**
Fall. 3 credits. Permission of the instructor.

Considers theory and method for the study of cross-cultural and comparative style variables. Members participate in the conceptualization and conduct of a comparative research project.

**ILROB 776 Organizational Implications of World Class Manufacturing**
Fall. 4 credits.

Aimed at helping students develop an understanding of the complex social systems, and of the behavioral implications of new manufacturing initiatives. Live case studies are used to study the introduction of a variety of innovations in contemporary manufacturing firms, including manufacturing cells and teams, concurrent engineering, Total Quality Management, and Just-In-time material flow. Analyses emphasize the impact of such innovations on individuals' definitions and relationships, organizations communication requirements and patterns, group dynamics, leadership behaviors, labor relations, and human resource management systems. ILROB 776 is a core course in the Master of Engineering Manufacturing Option degree program.

**ILROB 777 Personality in Work Groups and Organizations**
Spring. 3 credits. Prerequisite: statistical methods and/or a course in research methods. Each student will administer, score, and statistically test theory-driven hypothesis. Staff.

Discusses several theories of personality and related research findings. The relationship of personality to work motivation and leadership and interpersonal behavior in groups (teams) in also considered. Methods of research including observational, peer report, and self report, as well as performance tests are studied.

**ILRST 211 Statistical Reasoning II**
Fall 1997. 3 credits. J. Bunge, T. DiCiccio, P. Velleman, M. Wells

Aimed at helping students develop an understanding of the complex social systems, and of the behavioral implications of new manufacturing initiatives. Live case studies are used to study the introduction of a variety of innovations in contemporary manufacturing firms, including manufacturing cells and teams, concurrent engineering, Total Quality Management, and Just-In-time material flow. Analyses emphasize the impact of such innovations on individuals' definitions and relationships, organizations communication requirements and patterns, group dynamics, leadership behaviors, labor relations, and human resource management systems. ILROB 776 is a core course in the Master of Engineering Manufacturing Option degree program.

**ILRST 310 Statistical Sampling**
Spring 1999. 3 credits. J. Bunge.

Theory and application of statistical sampling, especially in regard to sample design, cost, estimation of population quantities, and error estimation. Assessment of nonsampling errors. Discussion of applications to social and biological sciences and to business problems. Course includes an applied project.

**ILRST 311 Practical Matrix Algebra**
Spring 1999. 3 credits. J. Bunge.

Matrix algebra is a necessary tool for statistics courses such as regression and multivariate analysis and for other "research methods" courses in various other disciplines. One goal is to provide students in various fields of knowledge with a basic understanding of matrix algebra in a language they can easily understand. Topics include special types of matrices; matrix calculations; linear dependence and independence; vector geometry; matrix reduction (trace, determinant, norms); matrix inversion; linear transformation; eigenvalues; matrix decompositions; ellipsoids and distances; some applications of matrices.

**ILRST 920 Organizational Behavior Workshop**
Fall. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only.

This workshop is designed to provide a forum for the presentation of current research undertaken by faculty members and graduate students in the Department of Organizational Behavior and invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.
ILRST 313 Design and Analysis of Experiments  
3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 1998-99.
The statistical design and analysis of comparative experiments, including completely randomized, factorialized, randomized block, latin squares, and split-unit designs including crossover and repeated measures. Application of statistical design to research problems.  

ILRST 314 Graphical Methods for Data Analysis  
3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 1998-99.
Classical and recently developed graphical methods for analysis and display. Characteristics of effective and honest graphs with comparison of alternative methods for understanding data. Includes study of current computer programs and methods expected to be practical in the near future: graphing of univariate data, bivariate plots, multivariate data, graphical methods of data analysis; the specification of computational algorithms, and control of graphs, study of interaction between choice of display and underlying patterns.  

ILRST 410 Techniques of Multivariate Analysis  
3 credits. Prerequisite: ILRST 312 or equivalent. Not offered 1998-99.
Techniques of multivariate statistical analysis discussed and illustrated by examples from various fields. We emphasize application, but theory will not be ignored. Deviation from assumptions and the rationale for choices among techniques are discussed. Students are expected to learn how to thoroughly analyze real-life data sets using computer-packaged programs. Participants should have some knowledge of matrix notation. Topics include: multivariate normal distribution; sample geometry and multivariate distances; inference about a mean vector; comparison of several multivariate means, variances, and covariances; detection of multivariate outliers; principal components; factor analysis; canonical correlation analysis; discriminant analysis, and multivariate multiple regression.  

ILRST 411 Statistical Analysis of Qualitative Data  
Spring 1999. 3 credits. Prerequisite: two statistics courses or permission of instructor. M. Wells.
An advanced undergraduate and beginning graduate course. Includes treatment of association between qualitative variables, contingency tables; log-linear models; binary ordinal; and multinomial regression models, limit dependent variables.  

ILRST 499 Directed Studies  
For description, see the section. Collective Bargaining, Labor Law, and Labor History.  

ILRST 510 Statistical Methods for the Social Sciences I  
Fall and spring 1998, 1999. 3 credits.
J. Angellotti, P. Velleman.
A first course in statistics for graduate students in the social sciences. Descriptive statistics; probability and sampling distributions, estimation, hypothesis testing, simple linear regression and correlation. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.  

ILRST 511 Statistical Methods for the Social Sciences II  
Fall and spring 1998, 1999. 3 credits.
J. Angellotti, P. Velleman.
A second course in statistics that emphasizes applications to the social sciences. Topics include: simple linear regression; multiple linear regression (theory, model building, and model diagnostics); and the analysis of variance. Computer packages are used extensively.  

ILRST 610 Seminar in Modern Data Analysis  
3 credits. Prerequisite: two statistics courses or permission of instructor. Not offered 1998-99.
An advanced survey of modern data analysis methods. Topics include exploratory data analysis, data re-expression, philosophy of data analysis, robust methods, statistical graphics, computing-intensive methods, and diagnostics. Extensive outside readings cover recent and historical work. Participants should have some knowledge of multiple regression, including the use of matrices, and some experience using a computer.  

ILRST 611 Statistical Computing  
3 credits. Prerequisite: linear algebra, knowledge of a programming language, and statistics at least through multiple regression. Not offered 1998-99.
A survey of new aspects of statistical computing. Topics include: basic numerical methods, numerical linear algebra, nonlinear statistical methods, numerical integration and approximation, smoothing and density estimation. Additional special topics may include Monte Carlo methods, statistical graphics, computing-intensive methods, parallel computing, computer environments. Designed for graduate students in the statistical sciences and related fields interested in new advances. Students may be asked to write programs in a programming language of their choice.  

ILRST 612 Statistical Classification Methods  
3 credits. Prerequisite: ILRST 312 or equivalent, or permission of instructor. Not offered 1998-99.
An introduction to a variety of statistical techniques that assign objects to categories on the basis of observed characteristics of the objects. Course topics include (but are not limited to): discriminant analysis and its extensions and variations; nearest neighbor methods, classification and regression trees (CART); neural networks for classification; and estimation of error of classification rules.  

ILRST 613 Bayesian and Conditional Inference  
Spring 1999. 3 credits. Prerequisite: Graduate level courses equivalent to OR&IE 670 and OR&IE 651 or permission of instructor. M. Wells.
Covers the following topics: loss functions and utility theory; prior information and subjective probability, coherence, Bayesian inference, empirical Bayesian inference, robust Bayesian inference. Bayesian computations, ancillarity, conditional properties of statistical procedures, and Barnard-Nielsen's exact likelihood theory.  

ILRST 614 Structural Equations with Latent Variables  
Fall 1998. 3 credits. Prerequisites: ILRST 210, 211 or ILRST 510, 511 or equivalent.
M. Wells.
Provides a comprehensive introduction to the general structural equation system, commonly known as the "LISREL model." One purpose of the course is to demonstrate the generality of this model. Rather than treating path analysis, recursive and nonrecursive models, classical econometrics, and confirmatory factor analysis as distinct and unique, we will treat them as special cases of a common model. Another goal of the course is to emphasize the application of these techniques.  

ILRST 615 Expert Systems and Probabilistic Network Models  
3 credits. S-U only. Prerequisite: OR&IE 560 or an equivalent course in probability and statistics. Not offered 1998-99.
This is an interdisciplinary course for students with backgrounds in statistics, computer science, social sciences, and other related fields of applications such as medical, engineering, and social sciences. Topics include: components of expert systems, rule-based expert systems, probability-based expert systems, uncertainty measures, dependency models. Bayesian and Markov networks, propagation of uncertain-ties, learning structure from data, and examples of applications. Students will use computer software to gain experience.  

ILRST 712 Theory of Sampling  
3 credits. Prerequisite: calculus and at least one semester of mathematical statistics. Not offered 1998-99.
Sampling theory from the viewpoint of mathematical statistics. The first part of the course focuses on the classical or "design" approach; the second part attempts to narrow the gap between the theory and practice of regression analysis. We discuss classical methods as well as a recently developed general framework for assessing the sensitivity of the outputs to small changes in the input. Students are expected to be able to perform through analyses of real-life data using computer packages. Topics to be discussed include: role of variables in a regression equation, regression outliers and influential observations, robust regression, alternatives to least squares (e.g., LMS, LAV, IRLS) error-in-variables models, and generalized linear models.  

ILRST 714 Theory of Sampling  
3 credits. Prerequisite: calculus and at least one semester of mathematical statistics. Not offered 1998-99.
Sampling theory from the viewpoint of mathematical statistics. The first part of the course focuses on the classical or "design" approach; the second part attempts to narrow the gap between the theory and practice of regression analysis. We discuss classical methods as well as a recently developed general framework for assessing the sensitivity of the outputs to small changes in the input. Students are expected to be able to perform through analyses of real-life data using computer packages. Topics to be discussed include: role of variables in a regression equation, regression outliers and influential observations, robust regression, alternatives to least squares (e.g., LMS, LAV, IRLS) error-in-variables models, and generalized linear models.
Counting Processes with Statistical Applications

3 credits. Prerequisite: a course at the technical level of Math 572 and 574 or permission of instructor. Not offered 1998-99.

The statistical analysis of life history data is playing an increasingly role in the social, natural, and physical sciences. We will formulate and solve various practical problems in the statistical analysis of life history data using the modern theory of stochastic processes. We will examine the martingale dynamics for point processes relevant to life history data. Both parametric and nonparametric inference, and multiplicative intensity models will be considered. The large sample properties of the proposed procedures will be discussed in detail using recent extensions of functional central limit theorems for martingales.

Topics in Modern Statistical Decision Theory

Spring 1999. 3 credits. Prerequisite: courses equivalent to ORIE 651 or Math 571, and STATS 409 or ORIE 670.

J. Bunge.

Recent research has revealed vast territories of multivariate distributions.

Likelihood Inference

3 credits. Prerequisite: graduate courses equivalent to ORIE 670 and ORIE 670. Not offered in 1998-99.

In most statistical models, exact distribution theory for testing hypotheses or constructing confidence intervals is either unavailable or computationally cumbersome. Inferences are routinely performed by using large-sample approximations to the distributions of test statistics. This course provides a survey of some recent higher-order asymptotic approximations for likelihood-based methods of inference.

Statistical Consulting

Fall 1998, spring 1999. 2 credits. Prerequisites: Limited to graduate students. S-U only. M. Wells, A. Hadi.

A course in practical consulting on "real-world" statistical problems. Under the supervision of the instructor(s), students will hear problems presented by clients (usually faculty and graduate students from other fields) and will collaborate in proposing a statistical model, analyzing data, and interpreting results. Statistical computing will be used as needed.

Directed Studies

For description, see the section, Collective Bargaining, Labor Law, and Labor History.

Statewide

The following courses are open to participants in the Extension Division's statewide credit programs in labor studies and management studies. Extension offices are based in Buffalo, Albany, Rochester, Ithaca, New York City, and Long Island. These courses are not open to undergraduate or graduate students matriculated in the Ithaca ILR programs. Courses and course credits earned in Extension Division certificate programs are not automatically accepted as transfer credits or as a basis of admission to the resident ILR undergraduate and graduate programs in Ithaca. Student applications for course transfer are evaluated by the ILR school on an individual basis.

Managing Conflict

Fall or spring. 3 credits.

The purpose of this course is to provide students with the conceptual foundation to engage in further study of conflict management and conflict resolution. Having taken the course the students will 1) be able to identify and describe types of conflict; 2) be able to identify the various sources of conflict; 3) be able to apply a conceptual model of conflict to interpersonal, organizational, and international conflict situations; 4) be able to describe conflict situations in terms of social psychological aspects utilizing a "Person Perception" or "Attribution" theoretical orientation; 5) be able to identify their personal response styles to conflict.

Oral Skills for Conflict Management

Fall or spring. 3 credits.

This course emphasizes developing the oral communications skills required to successfully manage conflict both as a party to a dispute, and as a third party who is charged with helping to resolve a dispute. The course presents simulations as required to help the participants practice their skills.

The Nature of Conflict

Fall or spring. 3 credits.

The purpose of the course is to provide students with the conceptual foundation to engage in further study of conflict management and conflict resolution. Having taken the course the students will 1) be able to identify and describe types of conflict; 2) be able to identify the various sources of conflict; 3) be able to apply a conceptual model of conflict to interpersonal, organizational, and international conflict situations; 4) be able to describe conflict situations in terms of social psychological aspects utilizing a "Person Perception" or "Attribution" theoretical orientation; 5) be able to identify their personal response styles to conflict.

Workplace Negotiations

Fall or spring. 3 credits.

Will cover the theoretical practice of negotiation as it applies to workplace and business situations. Students will be exposed to theoretical models of negotiation and will participate in negotiation exercises. Students will be participating in two negotiation exercises and will be asked to write a paper on their negotiating position in each exercise. More weight will be given in grading to the student's ability to present a well thought-out rationale for positions and tactics than to the outcome of the negotiation itself.

Arbitration

3 credits. A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices of arbitration, the handling of materials in briefs or oral presentation, the conduct of an arbitration hearing, and the preparation of an arbitration opinion.

Public Sector Collective Bargaining

Fall or spring. 3 credits.

This course is designed as an introduction to collective bargaining in the public sector. The course examines the historical development of bargaining in public employment, the evolution of state and federal and bargaining theory and practices, as well as impact regulations on public employment in this sector. Special emphasis will be given to developing an understanding of the similarities and differences between public and private sector bargaining and how they have affected tactics and strategies employed by the parties.

Growth of American Business and Management History

Fall or spring. 3 credits.

The growth and cycles of American business enterprise produced significant changes in education, government, work, the family, the ethnic composition of the population, and the landscape. This course will examine the development of managerial practices, the relationship of management to the work force, and the social ramifications of capitalist expansion.

Public Sector Labor Law

3 credits. A survey and analysis of the New York State Public Employees Fair Employment Act is made as well as a comparison with other state laws covering public employees. The course will examine the extent to which the law protects and regulates concerted actions by employees in the public sector. The intent is to study and understand the law as written, but more importantly how it has been interpreted by the courts of New York State in its application. Major emphasis will be employee and employer rights, including recognition and certification, improper practices, strikes, grievances, and disciplinary procedures of the New York State Public Employment Relations Board.

Labor and the American Economy

3 credits. Will help the student understand how economic theories relate to the economic problems confronting American citizens in general and the American union member in particular. Emphasis will be placed on contemporary economic theories and how their proponents attempt to solve American economic problems.

Employment Practices Law

3 credits. Considers laws and regulations that impact directly on managers and employers. Students will examine issues and laws such as Equal Employment Opportunity, Employee Retirement Income Security Act, Federal Wage and Hour Laws, Occupational Safety and Health Act, unemployment laws and other topics. Students will focus on the practical aspects of laws and their impact on the workplace.

New York Workers' Compensation Law for Trade Unionists and Injured Workers

Fall or spring. 3 credits. There is a collective perception that the Worker's Compensation system in New York compounds an injustice faced by the American worker with Byzantine responses that lead to despair. Unions and injured workers' organizations believe that, if properly empowered, they can be just as effective as lawyers in looking after their injured colleagues' claims. This course is structured to meet both of these realities. We
will delve into every nook and cranny of New York Worker's Compensation law. The course will be entirely practical. Skills teaching, i.e., explaining how to present a case, decorum, ethics, and persuasiveness, are built into the course. Experts on how the system really works will also be used.

251 Principles and Practices of Management
Fall or spring. 3 credits.

252 Contract Bargaining
Fall or spring. 3 credits.

253 Contract Administration
Fall or spring. 3 credits.

254 Labor Law
Fall or spring. 3 credits.

255 Labor History
Fall or spring. 3 credits.

256 Dispute Resolution
Fall or spring. 3 credits.

257 Human Resource Administration
Fall or spring. 3 credits.

258 Organizational Behavior
Fall or spring. 3 credits.

259 Union Administration
Fall or spring. 3 credits.

262 Project Management
Fall or spring. 3 credits.

264 Contempory Labor Problems
Fall or spring. 3 credits.

266 Professional Writing: The Power of the Written Word in Business
3 credits.

267 Speaking and Listening for Business and the Professions
3 credits.

268 Organizational Communication
Fall or spring. 3 credits.

269 The Evolution of Work in America
Fall or spring. 3 credits.
**345 Health Hazards Identification and Evaluation in the Workplace**

Fall or spring. 3 credits.

Students will learn about the many work site health hazards including toxic chemicals, biological agents, radiation, and electromagnetic fields. Routes of exposure, acute and chronic health effects, and the bases of regulatory exposure limits such as TLV's and OSHA PEL's will be discussed. Basic hazard evaluation and information gathering techniques will familiarize students with available resources for evaluating work site conditions.

**346 Introduction to Industrial Hygiene: Hazard Evaluation and Control**

Fall or spring. 3 credits.

This course builds on the knowledge acquired in both the safety hazard and health hazard courses to provide students with greater mastery of hazard evaluation and control methods. (Students are encouraged to complete the health hazard and safety hazard courses before taking industrial hygiene.) It will provide practical, hands-on training in evaluating potential worksite hazards. Students will learn about environmental monitoring methods such as air sampling and become familiar with the commonly used equipment. They will also learn to interpret and evaluate monitoring data provided by professional testers.

**347 Safety Hazards Identification and Evaluation in the Workplace**

Fall or spring. 3 credits.

Safety hazards (as opposed to health hazards) generally involve harm of an immediate and sometimes violent nature; health effects include burns, electrical shock, broken bones, and the loss of limbs, eyesight, or hearing. With chemicals, the primary concern is their explosive, reactive, or flammable nature rather than with the toxic effects that are the focus of health hazard evaluation. Students will become familiar with site inspection and hazard identification methods and will learn about control techniques appropriate for a variety of work settings.

**364 Labor, Government, and Politics**

3 credits.

A survey of the ways the American political system affects labor and how organized labor affects the system through voting, political parties, and interest groups.

**367 Safety and Health in the Workplace**

Fall or spring. 3 credits.

To provide basic education and training in workplace safety and health. The course will focus on applicable federal and state laws, standards for safety and health, industrial hygiene, and such health concerns as asbestos, radon, and AIDS. Practical experience will be provided through workplace walk-through safety and health inspections and in use of industrial hygiene equipment that measure noise, temperature, humidity, airflow, and airborne toxics.

**FACULTY ROSTER**

Abowd, John M., Ph.D., U. of Chicago. Prof., Labor Economics

Angelotti, Jon E., MS candidate, Cornell U. Social Statistics

Bacharach, Samuel, Ph.D., U. of Wisconsin. Prof., Organizational Behavior

Blau, Francine D., Ph.D., Harvard U. Francis Perkins Prof. of Industrial and Labor Relations, Labor Economics

Boudreau, John W., Ph.D., Purdue U. Assoc. Prof., Human Resource Studies

Boyer, George R., Ph.D., U. of Wisconsin. Assoc. Prof., Labor Economics

Briggs, Vernon M., Jr., Ph.D., Michigan State U. Prof., Human Resource Studies

Burge, John A., Ph.D., Ohio State U. Assoc. Prof., Social Statistics

Cavanaugh, Marc A., U. of Minnesota. Asst. Prof., Human Resource Studies

Cook, Maria L., Ph.D., Univ. of Calif., Berkeley. Asst. Prof., Collective Bargaining, Labor Law, and Labor History

Crowe, Jeffrey R., Ph.D., U. of North Carolina—Chapel Hill. Visiting Asst. Prof., Collective Bargaining Labor Law and Labor History

DiCicco, Thomas J., Ph.D., U. of Waterloo. Assoc. Prof., Social Statistics

Dyer, Lee D., Ph.D., U. of Wisconsin. Prof., Human Resource Studies

Ehrenberg, Ronald, Ph.D., Northwestern U. Irving M. Ives Professor of Industrial and Labor Relations and Economics, Labor Economics

Farley, Jennie T., Ph.D., Cornell U. Prof., Extension

Fields, Gary S., Ph.D., U. of Michigan. Prof., Labor Economics

Hurd, Richard W., Ph.D., Vanderbilt U. Prof., Extension and Public Service

Hutchens, Robert M., Ph.D., U. of Wisconsin. Prof., Labor Economics

Jakubson, George H., Ph.D., U. of Wisconsin. Assoc. Prof., Labor Economics

Kuruvilla, Sarosh C., Ph.D., U. of Iowa. Assoc. Prof., Collective Bargaining, Labor Law, and Labor History

Lawler, Edward J., Ph.D., U. of Wisconsin at Madison. Prof., Organizational Behavior

Lipsky, David B., Ph.D., Massachusetts Inst. of Technology. Prof., Collective Bargaining, Labor Law, and Labor History

Milkovich, George, Ph.D., U. of Minnesota. Martin P. Catherwood Professor of Industrial and Labor Relations, Human Resource Studies

Pucik, Vladimir, Ph.D., Columbia U. Assoc. Prof., Human Resource Studies

Ross, Philip, Ph.D., Brown U. Prof., Collective Bargaining, Labor Law, and Labor History

Ruiz Quintanilla, S. Antonio, Ph.D., U. of Technology, Berlin. Lecturer, Human Resource Studies

Salvatore, Nicholas, Ph.D., U. of California at Berkeley. Prof., Collective Bargaining, Labor Law, and Labor History

Smith, Robert S., Ph.D., Stanford U. Prof., Labor Economics

Stone, Katherine J., Ph.D., Harvard U. Pro., Collective Bargaining, Labor Law and Labor History

Tolbert, Pamela S., Ph.D., U. of California. Assoc. Prof., Organizational Behavior

Wells, Martin T., Ph.D., U. of California at Santa Barbara. Assoc. Prof., Social Statistics

Wright, Patrick M., Ph.D., Michigan State U. Assoc. Prof., Human Resource Studies
LAW SCHOOL

ADMINISTRATION
Charles W. Wolfram, acting dean of the law faculty and professor of law
John A. Siliciano, associate dean for academic affairs and professor of law
Gary J. Simson, associate dean for faculty development and professor of law
Anne Lukingbeul, associate dean and dean of students
Richard D. Geiger, associate dean and dean of admissions
Harry B. Ash, assistant dean for development and public affairs
Charles D. Cranton, assistant dean for alumni and international affairs
Richard F. Robinson, assistant dean for administration and finance
Nan A. Colvin, registrar

LAW SCHOOL
The primary function of the Law School is to prepare attorneys for both public and private practice who will render the highest quality of ethical and professional service to their clients and who will further legal progress and reform. The curriculum is designed to prepare students for admission to the bar in all American states and territories. Ordinarily, a student who is admitted to the Law School must have a baccalaureate degree from an approved college or university. The course of study leading to the degree of Doctor of Law (J.D.) covers three academic years. Students may be admitted to a program of study leading to the degree of Doctor of Law "with specialization in international legal affairs." The Law School also offers to a limited number of students an opportunity to earn both a J.D. degree and an LLM degree in international and comparative law.

There are combined graduate degree programs with the Johnson Graduate School of Management, the Department of City and Regional Planning of the College of Architecture, Art, and Planning, the School of Industrial and Labor Relations, the graduate divisions in economics, history, and philosophy of the College of Arts and Sciences, and the Université de Paris I (Pantheon-Sorbonne), as well as a special opportunity for highly qualified undergraduates in the College of Arts and Sciences to register in the Law School during their senior year.

Each year the graduate program of the Cornell Law School admits a limited number of students, generally all from abroad. The LLM degree (Master of Laws, Legum Magister) and the J.S.D. degree (Doctor of the Science of Law, Jurisprudentiae Scientiae Doctor) are conferred. A small number of law graduates may also be admitted as special students, to pursue advanced legal studies without seeking a degree.

For further information, refer to the Law School catalog, which may be obtained from the Office of the Registrar, Myron Taylor Hall.

FIRST-YEAR COURSES

LAW 500 Civil Procedure
Fall and spring. 6 credits. K. M. Clermont, B. J. Holden-Smith, F. F. Rossi. An introduction to civil litigation, from commencement of an action through disposition on appeal, studied in the context of the federal procedural system. Also, a detailed consideration of federalism and ascertainment of applicable law; jurisdiction, process, and venue; and former adjudication.

LAW 502 Constitutional Law
Fall. 4 credits. K. A. Abrams, S. H. Shifrin, G. J. Simson. A study of basic American constitutional law, including judicial review, some structural aspects of the Constitution as developed particularly in light of the passage of the Civil War amendments, and certain of its rights provisions.

LAW 504 Contracts
Fall and spring. 6 credits. R. A. Hillman, K. V. W. Stone, R. S. Summers, W. F. Taylor. An introduction to the nature, functions, and processes of exchange, contract, and contract law. The course focuses on the predominant rules and principles governing contract and related obligation, including the substantive reasons underlying the rules and principles.

LAW 506 Criminal Law
Spring. 4 credits. S. P. Garvey, M. F. Stone. An introductory study of the criminal law, including theories of punishment, analysis of the elements of criminal liability and available defenses, and consideration of specific crimes as defined by statute and the common law.

LAW 508 Legal Methods
Fall and spring. 4 credits. S. P. Garvey, B. S. Williams and staff. Legal Methods is a full-year skills course designed to introduce first-year students to the techniques of research, analysis, and writing that are necessary in legal practice. Instruction in the spring semester focuses on legal research and the written communication of objective legal analysis. Students complete a series of research and writing assignments that develop and test their skills in these areas. Instruction in the spring quarter focuses on written and oral advocacy. In the context of a simulated civil or criminal trial, students complete the necessary research and then draft and rewrite a trial or appellate brief advocating their client's position on one or more legal issues. The spring semester culminates with a moot court exercise designed to introduce the students to the techniques and logistics of oral advocacy in a courtroom setting. Instruction occurs in small sections of approximately 30 students and in individual conferences. Each student receives extensive editorial and evaluative feedback on each written assignment.

LAW 512 Property
Spring. 4 credits. G. S. Alexander, P. W. Martin. An investigation of the law's protection of ownership, including the beginnings of property, legal and equitable estates, concurrent ownership, and public and private regulation of land use.

LAW 516 Torts
Fall. 4 credits. G. A. Hay, J. A. Henderson, Jr., S. J. Schwab, J. A. Siliciano. An introduction to the principles of civil liability in the tort field: intentional wrongs, negligence, and strict liability. Attention is also given to the processes by which tort disputes are handled in our legal system.

UPPERCLASS COURSES

LAW 602 Administrative Law: The Law of the Regulatory State
Fall or spring. 3 credits. R. S. Booth, C. R. Farina. An introduction to the constitutional and other legal issues posed by the modern administrative state. Topics will include: procedural due process, separation of powers, procedural modes of administrative policymaking; judicial review of agency action; the oversight and control relationships between agencies and Congress or the President. The course provides a working familiarity with the fundamentals of administrative procedure, as well as a larger inquiry into the role of agencies in our constitutional system—and the effect of legal doctrine on shaping that role.

LAW 603 Admiralty
2 credits. Not offered 1998-99. The law, applicable to the maritime shipping industry. The jurisdiction of the admiralty courts of the United States: death and injury of the various classes of maritime workers; maritime liens; the carriage of goods by general and by chartered ships; the principles of liability and its limitation that are peculiar to the admiralty law; salvage and general average; marine insurance; oil spills and marine pollution; and the principles governing collision.

LAW Advanced Civil Procedure
3 credits. Not offered 1998-99. A study of complex civil litigation involving multiple parties and multiple claims. Topics include joinder of parties and claims, impleader, interpleader, class actions, and intervention. There will be consideration of case management, the Civil Justice Reform Act of 1990, multidistrict transfers in the federal courts, and the use of alternative procedures for disposition of cases.
LAW 606 American Indian Law
Spring. 2 credits. Recommended prerequisite: Administrative Law and Public International Law. J. Tashuda. An examination of the primary themes and materials of the federal law concerning Native American tribes and individuals. The course devotes considerable attention to the historical development of law and policy in that area and to the present division of authority over Indian country, among federal, state, and tribal governments.

LAW 609 Antitrust Law
Spring. 3 credits. Students who have taken an antitrust course in the Paris program may take this course for 2 credits. G. A. Hay. A consideration of the basic antitrust rules enacted by Congress and amplified by the courts to protect competitive power. Price fixing, boycotts, and market allocation agreements among competitors, agreements between suppliers and customers, joint ventures, attempts to monopolize and monopolization, price discrimination, and mergers.

LAW 610 Banking Law and Regulation
Fall. 3 credits. J. R. Macey. The course begins by defining the roles that banks and other financial intermediaries play in the economy. It considers the claim that a specialized set of regulations governing the activities of financial intermediaries is justified by the special role banks occupy in society. In that context a variety of theoretical arguments about banking regulation are considered. The course then examines each of the major laws that govern banking activities against the background of the various regulatory theories discussed. Topics to be addressed include entry restrictions, growth and expansion of bank activities, regulation of the business of banking, expansion through the bank holding-company structure, branch banking, interstate banking, and regulation of failing or failed banks.

LAW 613 Bankruptcy
Fall. 3 credits. Prerequisite: students who have taken Debtor-Creditor Law are ineligible for this course. L. M. LoPucki. Selected topics in the law of bankruptcy. An overview of the various bankruptcy chapters and a detailed study of the bankruptcy provisions of most general applicability. The relationship between the rights of an Article 9-secured creditor and the bankruptcy trustee’s power to avoid liens. Related topics in the enforcement of money judgments and the law of fraudulent conveyance.

LAW 614 Business Combinations
Spring. 2 credits. J. J. Hanks, Jr. This course examines the principal business, legal, and accounting issues in the purchase and sale of publicly held businesses. Emphasis is placed on the negotiation, structuring, financing, and documentation of the most common type of combining transaction—the acquisition of a privately held company. Among the legal issues considered are the business and other reasons for selling or buying a business, the forms of business combinations, directors' duties, successor liability, securities regulation, tax, and antitrust. Additional issues surrounding acquisitions of publicly held companies (including hostile takeovers) are studied principally for comparison. The responsibilities of transactional lawyers to persons other than their clients are also discussed.

LAW 616 Commercial Law
Spring. 3 credits. G. H. Shiffs. An examination of the primary themes and materials of the federal law concerning commerce and other emerging technologies may also be covered.

LAW 617 Communications Law
Spring. 3 credits. A. Addis. This course examines the regulatory activity of the Federal Communications Commission. Primary attention is given to radio, broadcast television, and cable. Selected topics in common carriers, communications satellites, and other emerging technologies may also be covered.

LAW 618 Comparative Law
Fall. 3 credits. Prerequisite: basic common law. B. A. Rudden. The course tackles first the sources, structures, and assumptions common to the regulatory systems of continental Europe, Latin America, and some countries of the Far East, and then examines the enduring divisions of their private law. The course aims to demonstrate the utility of the comparative method by encouraging students to rethink their own laws in the light of other approaches. This enables students to see how problems may sometimes be solved by breaking the categories in which they are embedded in a given system, and thus to gain a better understanding of the reasons for the rules.

LAW 619 Conflict of Laws
Spring. 3 credits. G. J. Simson. A study of the methods used by courts to decide the applicable law in cases that, in their parties or events, involve more than one state or country. Attention to the due-process limitations on litigation, so state's obligations under the full-faith-and-credit clause to respect sister-state judgments, and conflicts between federal and state law.

LAW 620 Constitutional Law II: The First Amendment
Spring. 3 credits. S. H. Shiffrin. A comprehensive discussion of freedom of speech, press, and association. The free-exercise-of-religion clause and the establishment clause of the First Amendment are treated less extensively.

LAW 621 Constitutional Remedies
Fall. 2 credits. Not available to students who have taken Civil Rights Legislation. T. Eisenberg. Explores in depth the history and current status of 42 U.S.C.§1983, the major statutory vehicle for vindication of constitutional rights in civil cases.

LAW 622 Copyright
Spring. 3 credits. P. W. Martin. Copyright law has become increasingly important as the American economy has shifted from a predominantly manufacturing economy to an information economy. This course will provide students with a comprehensive overview of the U.S. copyright law. It will begin with coverage of the substantive and procedural requirements for qualifying for copyright protection, then will provide an in-depth study of the rights granted to authors under this law, the standards for judging copyright infringement, public policy limitations on the exclusive right of copyright (such as the fair use defense), and remedies available to successful litigants. Partly as an aid to understanding United States law better and partly because copyright law is of increasing international importance, the course will also provide some comparative and international copyright law components. In addition, current legislative initiatives affecting copyright law or copyright owners will be discussed.

LAW 623 Copyright and Digital Works
Fall and spring. 3 credits. Prerequisite: a prior course covering the basic elements of copyright law. Year-long offering. Limited enrollment. P. W. Martin. The application of copyright law’s basic elements or concepts—copyright, infringement, and fair use—along with associated remedies issues, to creative works encoded in digital form. The course will explore the major copyright issues posed by categories of digital works as software, databases containing factual and other public-domain content, multimedia materials, computer-generated or-assisted works, and audio recordings containing digital sampling. In addition the course will review the recent White Paper on Intellectual Property and the National Information Infrastructure and subsequent legislative proposals as a means of focusing on the Internet’s implications for both domestic and international copyright regimes.

LAW 624 Corporate Finance
3 credits. Prerequisite: Corporations. Limited enrollment. Not offered 1998-99. Course surveys various topics in corporate finance and their role in modern corporate law. Topics include valuation, capitalization vehicles (bonds, preferred and common stock), overall capital structure, and dividend policies, plus selected topics in mergers and acquisitions (e.g., appraisal rights). No previous study of finance required or expected.

LAW 625 Corporations
Fall or spring. 4 credits. J. R. Macey, F. S. McChesney. An introduction to modern American business corporation law. Topics include corporate organization and operation, the corporation as a legal entity, corporate control and management, state and federal rules governing the solicitation of proxies, fiduciary
duties of directors and controlling shareholders under state law, and antitrust and insider trading provision under the federal securities laws.

LAW 627 Criminal Procedure
Fall. 3 credits. J. H. Blume.
This course surveys the law of criminal procedure, with emphasis on the constitutional constraints that regulate the pretrial stage of the criminal process. More specifically, the course focuses on the law of interrogations and confessions, the admissibility of such evidence, and the right to counsel throughout all stages of the criminal process.

LAW 629 Current Topics at the Crossroads of Law and Finance (also NBA 551)
Spring. 3 credits. J. R. Macey, M. O'Hara.
Financial institutions of all kinds, whether they are formally known as insurance companies, banks, investment banks, mutual funds, or pension funds, invest money on behalf of clients in a wide variety of investment vehicles. This course will look at the way these financial institutions are treated from both a legal and an economic perspective. Emphasis will be placed on the intersections between modern financial theory and legal analysis. Topics to be covered include insurance, bank regulation and reform, securities markets, investment banking, and pensions.

LAW 630 Directed Reading
Fall or spring. 1 or 2 credits. A two-credit directed reading may also fulfill the second research requirement. Arrange directly with instructor See Law School Catalog. An examination of a topic through readings selected by arrangement between the instructor and an individual student or group of students (not exceeding eight).

LAW 633 Employment Law
Spring. 3 credits. J. S. Schwab.
Survey of major laws and programs affecting the employee-employer relationship other than laws regulating unions (covered in Labor Law). One major area covered is the common law relating to privacy, drug testing, and unjust dismissal in the workplace. That area is contrasted with major statutory programs such as worker's compensation, unemployment insurance, FLSA, OSHA, and ERISA. Antidis­crimination legislation may also be covered.

LAW 634 Entertainment Law
This course explores several areas within the broad field of entertainment law. Topics include contract law, labor, antitrust, the role of agents, personal and privacy rights, literary and music publishing, sound recordings, films, and television.

LAW 636 Environmental Law
Fall. 3 credits. J. J. Rachlinski.
The course surveys the major environmental laws, with a primary focus on federal statutes (CERCLA, RCRA, NEPA, the Clean Water Act, the Clean Air Act, and the Endangered Species Act) and comparable areas of law including criminal law, complex toxic tort law and insurance law. The course lays out the various governmental tools used to address the problem of environmental degradation and discusses the value of these tools. Special attention is paid to the economic, social, and political obstacles to efficient regulation of the environment.

LAW 640 Evidence
Fall or spring. 3 credits. S. D. Clymer, F. F. Rossi.
The rules of evidence in civil and criminal cases with emphasis on relevance, authentication, witnesses, experts, and hearsay. The course will focus on the Federal Rules of Evidence, with some attention to how they diverge from the common law.

LAW 641 Family Law
Spring. 3 credits. M. E. Price.
An examination of the ways in which law seeks to intervene in the family as an institution. Besides examining the usual matters surrounding the legal formation and dissolution of families, the course emphasizes issues relating to children and pressures for new legal definitions of the family arising from social changes.

LAW 643 Federal Courts
Spring. 4 credits. B. J. Holden-Smith.
An intensive examination of the federal courts and their constitutional and statutory role in the federal system. The relationship of the federal courts with the other branches of the federal government and with the states, and the relationship between state and federal law. Case-or-controversy problems, the allocation of jurisdiction between state and federal courts, federal question and diversity jurisdiction of the district courts, and limitations thereon. The course is strongly recommended for anyone planning a judicial clerkship.

LAW 644 Federal Income Taxation
Fall or spring. 4 credits. Limited enrollment. R. A. Green, T. Eisenberg. A basic course designed to develop understanding of tax concepts and ability to work effectively with the Internal Revenue Code, regulations, cases, and other tax materials.

LAW 645 History of the Common Law
A study of the development in England (with occasional digressions into Scotland) of the institutional and substantive law of the system known as the common law. Classes focus on the chronological development of the system, with particular attention to the law of real property and trespass writs. The course concerns events from the Norman Conquest in 1066 down to the period of the ready availability of Blackstone's Commentaries, circa 1780.

LAW 648 Injunctions
Fall. 3 credits. Limited enrollment. J. J. Barcelo III.
Focuses on the availability and use of the injunction: the substantive and procedural prerequisites for obtaining interlocutory and permanent injunctions, permissible scope and timing, and the duties of those enjoined. Special consideration is given to the use of the injunction as a remedial tool for federal courts in public law litigation. This course will include a substantial writing component in the form of several drafting exercises.

LAW 650 Insurance
Spring. 2 credits. J. A. Henderson, Jr.
Insurance is an increasingly important tool for the management of risk by both private and public enterprises. This course provides a working knowledge of basic insurance law: governing insurance regulation, risk classification, property, commercial, and liability insurance; and claims processes. The emphasis throughout the course is on the link between traditional insurance law doctrine and modern ideas about the function of private law.

LAW 652 International Business Transactions
Spring. 3 credits. J. J. Barcelo III.
An examination of the unique legal features of business transactions across national boundaries. Topics include trade in goods and services, technology licensing, and private commercial law in an international setting; international dispute settlement (litigation and arbitration); government regulation of imports and exports (trade policy); international antitrust; international agreements for the control and harmonization of national regulatory policy; and foreign investment.

LAW 653 International Commercial Arbitration
Spring. 2 credits. J. J. Barcelo III.
A study of arbitration as a dispute resolution process for international trade and business disputes. The course analyzes ad hoc and institutional arbitration, the authority of arbitral panels, enforcement of agreements to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, and enforcement of international arbitral awards. The course will give special attention to the international convention on the recognition and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. It will focus on commercial arbitration as an international phenomenon and not on arbitration under any particular national system.
LAW 655 International Human Rights  
Spring. 3 credits. M. B. Ndulo.  
This course explores the development and effectiveness of international legal rules governing the conduct of a state toward people within its jurisdiction. Topics include the substantive norms of human rights, and their philosophic basis; the mechanisms for protecting the right of human rights, such as the United Nations, specialized agencies, international human rights commissions, and domestic courts, and current issues such as the doctrine of humanitarian intervention, the status of indigenous peoples, and human rights during armed conflicts, illustrated where possible through case studies of current situations.

LAW International Protection of Intellectual Property  
This course studies intellectual property rights in the international system. A general introduction reviews the international protection of patents, trademarks, industrial design, and copyright. The starting and focal point is the Agreement on Trade-Related Aspects of Intellectual Property (TRIPS) adopted in the framework of the World Trade Organization (WTO). The international protection of intellectual property is studied through consideration of the TRIPS agreement and the several international conventions the observation of which is made mandatory for WTO Members by TRIPS. Also examined are issues of international court jurisdiction and applicable law in the area of intellectual property.

LAW 657 International Taxation  
Fall. 3 credits. Prerequisite: Federal Income Taxation. R. A. Green.  
This course examines the U.S. income tax treatment of foreign investment and business operations in the United States, as well as the treatment of U.S. investment and business operations abroad. The course focuses on international tax jurisdiction and on the methods by which the United States relieves international double taxation, both by statute and through income tax treaties.

LAW Labor Law  
A study of collective bargaining, including the process of union formation, legal regulation of strikes and other economic weapons, negotiation and enforcement of collective agreements, the duty of fair representation, the application of antitrust law to union activity, and the relationship between federal labor law and local laws regulating the employment contract.

LAW 664 Law and Medicine  
Fall. 3 credits. L. I. Palmer.  
This course considers legal issues related to medical care and biomedical science. Topics include constraints on access to health care, organization and financing of health services, promoting quality of care in hospitals and outpatient sites, fraud and abuse in clinical practice and biomedical research, dilemmas engendered by therapeutic applications of new technologies, and pathways to reform of the U.S. health care system. Teaching materials will comprise a law and medicine casebook, and scientific literature.

LAW 668 Lawyers and Clients  
Fall or spring. 3 credits. Satisfies the professional responsibility requirement. R. C. Cramton.  
The usual vantage point of the law student and the lawyer is one outside the system of law. Law is something we study, shape, use, attack, or act upon in one way or another. This vantage point is, however, a creation of law itself and makes an illusion. This course examines the boundaries of that illusion. It examines the content of the law that governs lawyers. Agency law, criminal law, tort law, civil procedure, and the codes of ethics. It examines the roles that the law creates for lawyers and the morality of those roles.

LAW 669 Legal Aspects of Foreign Investment in Developing Countries  
Fall. 3 credits. M. B. Ndulo.  
This course will study legal aspects of foreign investments in developing countries. The course will include the following topics: economic development and foreign capital; obstacles to investment; guarantees to investors and investment codes; nationalization; joint ventures; transfer of technology; establishment and recognition of foreign investment procurement, unification of trade law and settlement of disputes.

LAW Legislation  
This course explores various theories of legislation by studying how statutes become a source of public policy, how judges interpret them, and how lawyers draft them. Drafting exercises are used throughout the course to determine to what degree legislation can be used to reform law or to remedy particular social problems.

LAW 670 Patent and Trademarks  
Fall. 3 credits. Limited enrollment. D. Bordewick.  
Federal patent law. The course will primarily examine substantive and procedural issues commonly arising in patent infringement litigation. Particular attention will be given to the nonobviousness and novelty requirements; the patentability of living organisms, computer software, and surgical procedures; the intersection of patent and antitrust law; the extent to which patent issues are resolved by courts rather than by juries; the doctrine of equivalents; remedies for patent infringement; and defenses to patent infringement claims.

LAW 677 Private Justice: Arbitration and Other Forms of Alternative Dispute Resolution  
Spring. 4 credits. Limited enrollment. K. V. W. Stone.  
Arbitration has become a major aspect of legal practice in such fields as labor law, commercial law, securities law, family law, and other areas. This course will examine the development of a law of arbitration and the relationship between private arbitration and the judicial system. It will examine issues such as the enforceability of arbitration agreements, arbitral due process, judicial review of arbitration awards, and the effect of arbitration on statutory rights. It will also examine other forms of alternative dispute resolution, including mediation, small claims courts, and the new mandatory arbitration requirements of some federal and state judicial systems. The course focuses on the law of alternative dispute mechanisms and includes six simulation and problem solving sessions.

LAW 678 Products Liability  
Fall. 3 credits. J. A. Henderson, Jr.  
Applications of products-liability doctrine and theory to a variety of problems drawn from or closely approximating actual litigation. An overview of the relevant case law, statutes, and administrative regulations, including the new Restatement of Torts, Third: Products Liability.

LAW 680 Public International Law  
Fall. 3 credits. A. Addis.  
An introduction to the legal rules governing the conduct of states vis-a-vis other states, individuals, and international organizations, with reference to major events and issues. Topics include the nature, sources, and effectiveness of international law; the establishment and recognition of states; principles concerning state sovereignty, territory, and jurisdiction; the law of treaties; state responsibility; international environmental law; and human rights. Special attention will be given to the law governing the use of force.

LAW 681 Roman Law and Modern Civil Law Systems  
2 credits. H. Hausmaninger.  
Roman law has been the most influential legal system in Western legal history. The course will focus on selected areas of Roman property, contract, and tort law in order to demonstrate two basic aspects: (1) the distinctive characteristics of classical Roman law, which was largely jurisprudential law that was shaped by legal experts similar to modern law professors (as opposed to statutory or judge-made law); and (2) the continuing substantive and methodological influence of Roman law in modern civil law systems, including the major impact of Roman law on the unification process of European law. Roman case law will be studied in translation, compared with legal reasoning and solutions in contemporary European (e.g., German and French) legal systems. The course will also demonstrate a number of direct and indirect influences of Roman law on Anglo-American law.

LAW 682 Secured Transactions  
Fall. 3 credits. L. M. LoPucki. Jr.  
The course explores the use of security in commercial and consumer transactions. Specific subjects include creditor remedies, default, acceleration and cure, the creation and perfection of security interests, and priority among security interests and liens. The objective is to see secured credit as a system for lending and recovering money.

LAW 683 Securities Regulation  
Fall. 2 credits. J. J. Hanks, Jr.  
This course examines the federal system of regulation of the offering, sale and distribution of securities, including the Securities Act of 1933 and the Securities Exchange Act of 1934. Emphasis is placed on the structure, negotiation and consumption of securities transactions as part of the capital-raising process. The responsibilities of securities professionals are also reviewed.
LAW 684 Social and Cognitive Psychology for Lawyers
Fall. 3 credits. J. J. Rachlinski.
In their short history, cognitive and social psychology have produced a rich understanding of how human beings think and how they interact with each other. It should therefore come as no surprise that these two fields have a number of applications to law. This course will explore these applications. Examples include: what effect common errors in judgment have on tort and contract law; how the perception of risk affects societal demand for regulation in environmental law; how organizational and group decision-making processes affect corporate governance; how social norms about fairness impede or facilitate negotiation and dispute resolution; how biases in judgment influence litigation strategies; and what studies of conformity mean for the development of international human rights law. The goal of this course is to introduce students with interests in different areas of law to some general principles of human thought and social interaction that will be valuable to them in their future practice.

LAW 685 Sports Law
The course traces the development of sports law in the United States. Particular attention is given to the relationship of sports with antitrust and labor law. Contemporary issues involving arbitration, collective bargaining, amateur athletics, agents, torts, criminal law, and constitutional law are addressed.

LAW 686 Statistics and the Law
Spring. 3 credits. Not available to students with prior training in inferential statistics without permission of instructor.
Limited enrollment. F. S. McChesney.
An introduction to statistical methods most commonly used in the law today, which assumes no prior knowledge of statistics. The course builds sequentially from elementary notions of probability and distributions to sophisticated topics in inferential statistics, including hypothesis testing and multiple regression. The course is designed to teach traditional and electronic sources and formats and make efficient choices.

LAW 687 Supervised Teaching
Fall or spring. 1 or 2 credits. Arrange directly with instructor. See Law School Catalog.

LAW 688 Supervised Writing
Fall or spring. 1, 2, or 3 credits. A two- or three-credit supervised writing program may allow written work to satisfy formal writing requirement. Arrange directly with instructor. See Law School Catalog.

LAW 689 Taxation of Corporations and Shareholders
Spring. 3 credits. Prerequisite: Federal Income Taxation. R. A. Green.
This course examines the federal income taxation of corporate structure and transactions involving alterations in structure, including the rules governing incorporation, dividends, redemptions, liquidations, divisions, and reorganizations.

LAW 692 Trial Advocacy
Spring. 4 credits. Prerequisite: Evidence. Limited enrollment. F. F. Rossi.
This course is devoted to the study of the trial. Fundamental skills are taught in the context of challenging procedural and substantive law problems. Each stage of the trial is examined: jury selection, opening, objections, direct examination, cross-examination, impeachments, expert witnesses, trial memoranda, summation, and pretrial. In addition to exercises every week on a particular segment of a trial, the student will also do a full-day jury trial at the completion of the course. Video equipment is used to teach and critique student performance. There are several written assignments.

LAW 694 Trusts and Estates
Fall. 4 credits. G. S. Alexander.
The course examines the processes of gratuitous transfers of wealth and introduces the practice of estate planning. It surveys the basic law of property; succession, including wills and intestate succession; the law of trusts, powers of appointment, federal transfer taxation, and trust investment. Certain recurrent policy problems are considered. Also included are the problem of form of legal norms and the problem of collective constraints on private intention.

LAW 695 Trial Advocacy Seminar
Fall. 3 credits. F. F. Rossi.
This seminar is designed to teach students with prior training in trial practice how to present a defense. Students will practice the skills of trial advocacy by writing a brief and preparing a final oral argument. Written materials will include practice exercises, generated problems, and a range of resources for use in preparing a defense. The seminar will also examine the relationship between the common law and the substantive law of law. The seminar will explore the nature of law and narrative in the Bible from the perspective of ancient law and legal history. Topics include the nature of the law codes (e.g., hypothetical formulation versus statutory law), legal issues in the narratives of law, and the role of narrative in the biblical tradition. The seminar will also examine the relationship between the common law and the substantive law of law. The seminar will explore the nature of law and narrative in the Bible from the perspective of ancient law and legal history. Topics include the nature of the law codes (e.g., hypothetical formulation versus statutory law), legal issues in the narratives of law, and the role of narrative in the biblical tradition.
(e.g., law of adultery and women's rights), law and morality (e.g., Ten Commandments), law and religion (e.g., institutions guaranteed by the law but condemned by religious authorities) in the transformation of extralegal relations into legal ones (e.g., with the introduction of money), legal interpretation in antiquity (e.g., Sermon on the Mount), social factors in legal development (e.g., shame and guilt), and aspects of criminal, family, and private law (e.g., eye for an eye, inexcuse rules, and unjust enrichment).

**[LAW Children and the Law]**
Strategies for, and problems of, expanding constitutional and statutory protection of children's interests. Pervasive questions include: How do we determine the interest of the child? In what circumstances can we rely on the state to define and advance the child's interests? To what extent do parental rights limit state attempts to "help" the child? Can rights of children developed from rights adults enjoy ever suffice to protect the most basic interests of children? The case law covers the rights of children in adoption and custody proceedings, the rights of handicapped children, the rights of abused children, the procedural rights of children charged with delinquency, and the substantive limits on state interference with minors' liberty. A paper and two critiques are required.

**[LAW Constitutional Law and Politics]**
Spring. 3 credits. S. H. Shifrin.
The purpose of the seminar is to explore theories of freedom of speech and theories of equality. How are the ideas of freedom, equality, association, and community linked in doctrine, and how should they be linked? Neoconservative, liberal, radical, feminist, and Marxist writings are considered.

**[LAW Corruption Control]**
Spring. 3 credits. R. C. Goldstock.
This seminar examines the factors that facilitate and inhibit public or private corruption and analyzes the wide variety of criminal, civil, and nontraditional approaches designed to control corruption and to promote governmental and commercial integrity.

**[LAW Critical Race Theory]**
Spring. 3 credits. A. Addis.
This seminar will explore the relationship between critical understandings of the significance of race and legal interpretation. Of particular importance will be the examination of how societal values and customs, expressed in legal rules purporting to address racial issues, interact with and influence the law. The seminar examines the role of controversies and the concerns of justice for disadvantaged groups.

**[LAW Dispute Resolution Techniques]**
Spring. 3 credits. D. W. Plant.
A course offering students an opportunity to learn conflict management and dispute resolution techniques in negotiation, mediation, and arbitration of commercial disputes, usually in the intellectual property context. The course will be scheduled to take place on certain full weekends to be announced.

**[LAW Employment Discrimination]**
This seminar explores contemporary problems in equal-employment law. It focuses on legal issues involving Title VII, comparable worth, wrongful discharge, disability discrimination, age discrimination, and equal pay. Students are required to submit a paper as partial fulfillment of the requirements of the course.

**[LAW Empirical Studies of the Legal System]**
Spring. 3 credits. T. Eisenberg.
This seminar guides students in their own empirical studies of the legal process. Students derive research topics from a variety of empirical sources and design and run their own computer programs. Sample topics may include evaluating patterns of punitive damages awards, studying jurors' perceptions in death penalty cases, evaluating the success rates and burden of Title VII cases, and studying products liability cases.

**[LAW Ethnic Conflict and International Law]**
This seminar examines the status and rights of ethnic, racial, religious, and national groups under international law, and considers the role of international law in developing an adequate response to intercommunal conflicts in Europe, Asia, and Africa. Topics include the sources of nationalism and ethnic conflict, pertinent individual and group rights, principles of humanitarian law, and humanitarian intervention, the relationship between group identity and democracy, the role of international organizations in responding to ethnic conflict, and possible solutions to ethnic conflict, including secession, autonomy, and federalism.

**[LAW European Union Law]**
Fall. 3 credits. J. J. Barceló III.
The course will study the EU treaty, institutions, and lawmaking processes; the direct effect, supremacy, and reception of EU law in the member states, the development of the four freedoms (goods, services, persons, and capital) fundamental rights doctrine, protection of the environment, and the EU antitrust law.

**[LAW Family Law Seminar]**
Spring. 3 credits. B. Colapietro.
This course is designed to familiarize the student with the problems facing the practitioner in family law cases. Students participate in negotiating separation agreements, presenting oral arguments of motions or a trial summation, preparing a memorandum of law, and developing interviewing skills and client relationships. The philosophy of the family law practitioner and methods of dealing with clients involved in divorce, custody, and the like are covered. The emphasis is on method rather than substantive law.

**[LAW Federal Litigation Seminar]**
Spring. 3 credits. D. Dowd.
This seminar is designed for students genuinely interested in being litigators. We will explore the "real world" of civil litigation in federal court, focusing on the litigation of a lawsuit through termination by some means other than trial. Particular attention will be given to general rules; complaints; answers; document requests and responses thereto; venue motions; preliminary injunction motions; summary judgment motions; nonparty discovery; sanctions; FRCP 26 disclosures and requirements; attorney-client privilege issues; and case management procedures and orders. Throughout we will endeavor to determine how one rationally litigates before frequently disinterested judges pursuing their own agendas and against counsel evidencing little regard for the rules or the law.

**[LAW Feminism and Gender Discrimination]**
Spring. 3 credits. K. Abrams.
The seminar provides an introduction to feminist theory as it has emerged in legal scholarship and the social sciences. Several feminist legal theories are then used as a framework for analyzing a series of legal problems implicating gender. Among the problems discussed are sexual harassment, work-family conflict, divorce and child custody, surrogacy, abortion, rape, spousal abuse, and pornography.

**[LAW Foundations of Criminal Law]**
Fall. 3 credits. S. P. Garvey. Prerequisite: Criminal Law.
The purpose of this seminar is to examine various theoretical issues in substantive criminal law. Among the topics to be discussed are the justification (if any) for punishment, the relationship between theories of punishment and political theory; the moral limits on the authority of the state to criminalize conduct; theories of excuse and justification in the criminal law; and the role of emotion and reason in the criminal law.

**[LAW Foundations of Employment Law]**
This seminar studies labor markets to catalog ways they succeed and ways they fail, and assesses ways that labor market regulation attempts to correct market failure. Both labor law (regulation of unions) and employment law (regulation of the nonunion workplace) topics are covered. Specific topics include: internal labor markets and contingent workers; the decline of unions; policies underlying the National Labor Relations Act; the erosion of the employment-at-will doctrine; and regulation of health care and pensions. To add perspective, the seminar will attempt a comparative examination of labor law in selected legal systems of Canada, Japan, Germany, France, New Zealand, and Macedonia.

**[LAW Health Care Reform]**
Spring. 3 credits. H. R. Beresford.
This seminar will address the role of law in efforts to resolve problems of access, quality, and costs in health care. Regulatory market-based, professional and other models of reform will be evaluated. Materials will include a health law casebook and selected readings from medical and health policy sources. Students will prepare and present their seminar papers on self-selected topics.

**[LAW Immigration and Refugee Law]**
Fall. 3 credits. Prerequisite: Constitu­tional Law. S. W. Yale-Locher.
This course explores the evolving relationship between U.S. immigration policy and our national purposes. Immigration plays a central role in contemporary American life, significantly affecting our foreign relations, human rights posture, ethnic group relations, labor market conditions, welfare programs, public services, and domestic politics. It raises in acute form many of the most vexing problems that our legal system must address, including the rights of insular minorities, the concepts of nationhood and sovereignty, fair treatment of competing claimants for scarce...
LAW 733 Introduction to French Law
Spring. 3 credits. Prerequisite: not available to students with significant knowledge of civil law system. C. M. Germain.
Introduction to the French legal system from a comparative law perspective, with a focus on civil law methodology and French legal institutions. Topics studied include French law sources and authorities, such as legislation, court decisions, and scholarly writings; the relationship between French law and the European Union; the French court structure in civil, criminal, and administrative law matters and its major procedural features; and the organization of the legal profession.

LAW 742 Law and Mental Health Seminar
Fall. 3 credits. H. R. Beresford.
The seminar will explore issues at the interface of law and psychiatry. After an introduction to clinical and scientific aspects of mental illness, the seminar will address issues of autonomy, liberty, competency, coercion, and criminal responsibility as they relate to persons with disorders of behavior. Graduate students will write and present seminar papers on self-selected topics.

LAW 744 Law, Science, and Technology
Fall. 3 credits. Y. M. Cripps.
An examination of the interaction between legal principles and procedures and scientific research and development. Topics include the role of the law in regulating cloning, recombinant DNA research, surrogacy, and in vitro fertilization; plant breeders’ rights and the patentability of organic matter; judicial assessment of expert scientific evidence; and compensation for damage caused by scientific experiments and new technologies.

LAW 746 Lawyers and the Legal Profession
Spring. 3 credits. Recommended prerequisite: Lawyers and Clients, taken previously or concurrently. Satisfies the professional responsibility requirement. R. C. Creelman.
This seminar covers a wide range of issues relating to lawyers and the legal profession: the nature of professionalism; the organization of the legal profession; the lawyer in history and popular culture; the adversary ethic and its effect on lawyer behavior in both litigation and counseling settings; lawyer paternalism or subservience in the lawyer-client relationship; justice in the distribution of legal services; competition within the profession and with outside providers; and the role of legal education in forming the profession. Materials considered are drawn from law, moral philosophy, economics, and sociology. Novels, movies, and other works from popular culture will also be considered. Distinguished practitioners will participate in a number of seminar sessions.

LAW 757 Legal Information Systems
Fall. 3 credits. T. R. Bruce.
A comparative and international look at the organization and legal information systems as economic entities with particular importance to lawyers and their clients, and as phenomena that have a role in defining the activities and boundaries of lawyering. Why is one such database better than another, and what qualities such a fundamental analysis say about what lawyers do and think? What are the practice (and malpractice) implications of an array of differentially priced sources for legal information? What happens to the role of the lawyer when clients have equal or better access to the letter of the law? What is the boundary between legal information and legal advice? What combination of private and public actors provides the “best” system for distributing legal information? These questions, and others, will define our area of work. Such a discussion is particularly relevant at a time of major upheaval in the way these primary tools of the profession are defined, bought, and sold.

LAW 758 Media and Globalization
Spring. 3 credits. M. E. Price.
A comparative and international look at the laws regulating the information media, including broadcast, print, and electronic formats.

LAW 759 Organized-Crime Control
Fall. 3 credits. Prerequisite: Criminal Law. R. C. Goldstock.
This seminar discusses selected aspects of criminal procedure and civil remedies that are used to control sophisticated criminal syndicates. An in-depth examination of the various legal concepts and activities that are affected by, or that arise in, the context of organized crime. This seminar is designed to be a seminar in which students will explore and analyze the legal system as a whole.

LAW Principles and Particulars in Moral and Legal Theory (also PHIL 641)
To what extent do moral and legal decision making involve the application of general principles, and to what extent do they involve the application of particular principles? Are they complementary or do they interfere (perhaps irreparably) with one another? Moreover,
how is each related to the demands of justice? Can someone who denies that morality consists of a set of general principles give an adequate assessment of the sort of universality that justice seems to require? Does the blind application of principles lead to substantive injustice? This seminar, which will take contemporary readings of Aristotle's ethics as its point of departure, will focus on two related debates: first, the debate in contemporary ethics between those who emphasize the separation of general principles from particulars; and second, the debate in contemporary legal theory between those (often traditionalist) who emphasize the importance of "formal" principles and those (often progressivist) who emphasize "substantive" considerations. Readings from a variety of philosophical and legal sources will possibly include: John McDowell, Martha Nussbaum, Onora O'Neill, Ronald Dworkin, Martha Minow, Margaret Radin, G. A. Cohen, Cornel West, Robert Good and Duncan Kennedy.

**LAW 765 Selected Business Transactions Seminar**

Fall. 3 credits. Recommended prerequisites: Corporations. Z. J. Shulman. An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With respect to initial public offerings, the course will cover: the applicable statutory framework, pre-offering corporate preparations (such as the implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ or AMEX) and the transaction closing. Regarding mergers and acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale), public company transaction issues, antitrust matters and fiduciary concerns, fiduciary duties, and crucial legal aspects of the acquisition, such as letters of intent, successor liability, continuity of employees and non-competition agreements.

**LAW Separation of Powers**

3 credits. Prerequisite: Corporations. Z. J. Shulman and Administrative Law or permission of instructor. Not offered 1998-99.

The last fifteen years have witnessed more debate about the nature and consequences of "Separation of Powers" than we have seen since the Founding Era. This seminar examines the ways this concept is understood and used by modern judges, legislators, executive officials, and scholars to justify, or to attempt to modify, the distribution of power within contemporary American government.

**LAW Sovereignty, Self-Determination, and Secession**

This seminar examines the evolution and meaning of the concept of statehood, the legal nature of sovereignty, the formation, existence, and breakup of states, and the historical, political, and philosophical underpinnings of those rules. Topics include the conditions for statehood, territorial integrity, the status of territorial entities other than states, the international status of peoples and their right to self-determination, possible bases for a right to secession, the legal consequences of secession, and the use of force to separate or hold together an existing state. Special attention will be given to applying these concepts to contemporary events.

**LAW 768 The Supreme Court and the Death Penalty**

Fall. 3 credits. J. J. Blumberg.

This seminar will examine the role of the Supreme Court in modern capital punishment jurisprudence focusing on how, and to what extent, the Court's view of death penalty cases has changed in the last thirty years. Students will have the opportunity to write papers or assist in the research for and drafting of a petition for writ of certiorari or brief filed in the Supreme Court.

**LAW Tax Policy Seminar**

This seminar analyzes the tax policy goals of fairness, simplicity, and economic efficiency, and examines how well the present tax system satisfies these goals. Specific topics include: progressivity of the tax rate structure; use of the tax to promote social policies; tax legislative process; taxation of the family, comparison of income and consumption taxes.

**LAW The Religion Clauses of the First Amendment**

3 credits. Prerequisite: Constitutional Law. This course not available to students who have already taken Civil Liberties Clinic. Not offered 1998-99.

This course examines various issues relating to the First Amendment's establishment and free-exercise clauses. For the first part of the semester the seminar meets to discuss assigned readings. The later part is devoted to the presentation of seminar papers. Each student must submit a substantial paper on an approved topic and brief written critiques of two other students' papers.

**LAW 777 Theories of Property**

Fall. 4 credits. Prerequisite: Property. G. S. Alexander.

This seminar explores the various ways that people have conceived of, or understood, property. The course is both theoretical and interdisciplinary. They include readings on slavery and property, women and property, community interests in property, as well as classical theories (libertarian, utilitarian, Marxist).

**LAW 778 United Nations, Elections, and Human Rights**

Fall. 3 credits. M. B. Ndulu.

This seminar will focus on elections and human rights. Taking part in the conduct of public affairs is a basic human right increasingly prized by people throughout the world. Universally the right to take part in government is proclaimed and guaranteed by the Universal Declaration of Human Rights and the International Covenant of Civil and Political Rights, and recognized in many other treaties and declarations. Sometimes free and fair elections necessitate international assistance to countries to aid them in fulfilling elections as a human right and stand as an example of cooperation in establishing and strengthening the legal, technical and physical infrastructures necessary to carry out elections. This seminar will explore the international human rights principles relating to free and fair elections and the right to take part in government.

**LAW Voting and Political Participation**

3 credits. Recommended prerequisite: some previous experience with legal materials (case studies, statutes) will be helpful, but is not required. Not offered 1998-99.

This course will explore the meanings assigned to political participation in the American political system and examine a series of instances in which the law has been used to enhance, equalize, or otherwise regulate voting and other forms of political participation. The course will begin by investigating the problematic rationality of political participation, examining several arguments for participation and concluding the low probability that any participant's vote will have an effect on electoral outcomes. We will then use a brief survey of historical and contemporary denials of the franchise to shed further light on the meaning(s) of political participation. The second part of the course will turn to the question of legal regulation of the vote, examining the merits and scope of plurality democracy; the problem of apportionment resolution and created by the "one persons, one vote" rule; and efforts to facilitate minority political participation under the Constitution and the Voting Rights Act.

**CLINICAL COURSES AND EXTERNSHIPS**

All clinic courses and externships satisfy the second writing requirement. Limited enrollment.

**LAW 781 Capital Punishment Clinic**

Spring. 3 credits. J. H. Blumber, S. L. Johnson.

This course is taught as a clinic. Three or four cases from South Carolina will be worked on by students. These cases may involve the trial, state postconviction relief stage or the federal habeas corpus stage, depending on the vagaries of litigation and the needs of the South Carolina Center for Capital Litigation. Students will read the record, meet with counsel in drafting the initial pleading (an application for postconviction relief or a federal habeas petition), and/or may then assist in the preparation of briefs. Students are included in discussion regarding the necessary investigatory information and the thought process about the case. Some students will do investigative work.

**LAW 784 Government Benefits Clinic**

Fall or spring. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1, Legal Aid Clinic 2, or Legal Aid Clinic 3 (6 hours combined credit for both courses when combined with LA1, LA2, or LA3). B. Strom.

The course has both a substantive component, in which a broad conceptual understanding of a complex and controversial area of law and public policy is developed, and a live client clinical experience, in which those concepts can be applied in solving actual client problems. The substantive component of the course provides an introduction to government benefits law by examining various need-based benefit programs including Temporary Assistance to Needy Families (TANF), Supplemental Security Income (SSI), and Food Stamps. Case handling involves the representation of clients in government benefits cases (social security, public assistance, food stamps, unemployment insurance, Medicaid, ...
LAW 785 Government Benefits Clinic/Neighborhood Legal Services Externship
Fall or spring. 6 credits. This course is a combination of Government Benefits and the Neighborhood Legal Services Externship and either Legal Aid Clinic 1, Legal Aid Clinic 2, or Legal Aid Clinic 3 (6 hours combined credit for both courses when combined with LA1, LA2, or LA3). B. Strom.
The course is the same as Government Benefits except that the case-handling component involves handling cases for the Neighborhood Legal Services. See that description for additional details.

LAW 786 Judicial Externship
Fall. 4 credits. G. G. Galbreath. Students work as court judge. Work involves courtroom observation, conferences with the judge, research and writing memoranda, drafting decisions. The emphasis is on learning about judges, judicial decision-making process, and trials. There are weekly class meetings with readings and discussions of topics related to the externship experience.

LAW 790 Law Guardian Externship
Spring. 4 credits. J. M. Miner. Students will learn about the representation of children in abuse and neglect cases, juvenile delinquency proceedings, and PINS (Persons in Need of Supervision) cases through their placement at the Tompkins County Law Guardian office. Duties may include interviewing, investigating, drafting memoranda and motions; and assisting in trial preparation. Participants are required to attend the classroom component of Legal Aid 1 or 3 (see descriptions below).

LAW 791 Legal Aid Clinic 1
Fall or spring. 4 credits. On Thursdays, fall term, and Mondays, spring term of the second and third week of the term, LA1 will precede and follow the clinic. Classes are mandatory for all Legal Aid Clinic 1 students and all students in courses that include the LA1 classroom component. N. L. Cook (spring), G. G. Galbreath, J. M. Miner (spring), B. Strom.
Participants handle civil cases for low-income clients of the Legal Aid Clinic under the supervision of the clinic faculty. Students interview and counsel, investigate and analyze facts, prepare substantive and procedural law with facts in the context of actual representation; develop a strategy to handle clients' problems; identify and resolve professional responsibility issues; do legal writing; negotiate and settle cases; and represent clients at administrative hearings. Seminar classes seek to develop interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises.

LAW 792 Legal Aid Clinic 2
Fall. 4 credits. Prerequisite: Legal Aid Clinic 1 or a clinic course that includes the Legal Aid 1 classroom component. G. G. Galbreath, W. A. Kell, B. Strom, P. J. Williams. Students handle legal aid cases, participate in a courtroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic's clients in both federal and state courts.

LAW 793 Legal Aid Clinic 3
Spring. 4 credits. Prerequisite: Legal Aid Clinic 1 or a clinic course that includes the Legal Aid 1 classroom component. N. A. Cook, G. G. Galbreath, J. M. Miner, B. Strom. Students handle legal aid cases, participate in a courtroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic's clients in both federal and state courts.

LAW 794 Legislative Externship
Spring. 3 credits. B. Strom. The students work with the local New York State Member of Assembly. Work involves drafting legislation, tracking legislation for constituents, legal research and writing, responding to constituent requests that particularly require legal research or an explanation of law. The emphasis is on learning about legislative process, drafting of legislation, understanding the reasons for statutory ambiguity, and developing various skills. There are several informal meetings with the faculty supervisor during the semester with readings and group discussions related to the externship experience.

LAW 795 Neighborhood Legal Services Externship
Fall or spring. 4 credits. Requires simultaneous enrollment with Legal Aid Clinic 1, Legal Aid Clinic 2, or Legal Aid Clinic 3 (4 hours combined credit for both courses when combined with LA1 or LA2). B. Strom.
Along with case handling it includes a courtroom component. (See Legal Aid 1, 2, and 3 course descriptions.) The classes are devoted to the development of lawyering skills and issues related to professional responsibility and the role of an attorney. Cases involve the representation of clients of a legal services office, the Ithaca office of Neighborhood Legal Services (NLS). In addition, each student will meet periodically with the faculty supervisor for review of the placement experience.

LAW Public International Law Clinic
Fall. 3 credits. Prerequisites: Public International Law or International Human Rights. Not offered 1998–99. Students will prepare a memorandum and proposal for foreign governments and international organizations. The memorandum will be prepared in coordination with the Public International Law and Policy Group, a nonprofit organization that provides pro bono advice on issues of public international law to governments, NGOs, and international organizations. Possible subject areas include minority rights, border treaties, citizenship and nationality disputes, state succession issues, and war crimes.

LAW Religious Liberties Clinic
4 credits. Year-long offering. Not offered 1998–99. Students work in teams on cases provided by organizations that handle Establishment and Free Exercise Clause cases. All students do substantial research and memoranda writing, and some may draft portions of briefs. To help ensure that students have the opportunity to take a case to completion (or at least to the stage of litigation), the class is a full-year course, with students required to register for both semesters for a total of four credit hours and a grade at the end. Given the nature of litigation, demands on student time may be sporadic, and students should be prepared to do some work over intersession if court deadlines so require.

LAW 797 Small Business Clinic
Spring. 5 credits. W. A. Kell. Students will learn and apply a broad range of knowledge in business-related law, through participating in interdisciplinary teams of students assisting microenterprise entrepreneurs with legal and business needs, specifically child care programs. Faculty from the Law School, the Johnson School of Management, and College of Human Ecology will supervise teams of students from each of the above colleges and provide classroom teaching. Under such supervision, student teams will work autonomously to consult with and provide technical assistance to the child care entrepreneur. Critical questions include: what are the needs of small businesses for legal consultation in order to survive and thrive? How can professionals of different disciplines work together most effectively to assist small businesses, given the often interconnected nature of legal and business problems? What practices are most conducive to the creation of viable small businesses, enabling entrepreneurs to respond to often conflicting consumer needs for high quality (but affordable) services? Readings will be drawn from areas of contract, tort, property, employment, and administrative law, as well as areas of business planning, as well as to assist small businesses, given the often interconnected nature of legal and business problems? What practices are most conducive to the creation of viable small businesses, enabling entrepreneurs to respond to often conflicting consumer needs for high quality (but affordable) services? Readings will be drawn from areas of contract, tort, property, employment, and administrative law, as well as areas of business planning.

LAW 798 Women and the Law Clinic
Spring. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1. Legal Aid Clinic 3 (6 hours combined credit). J. M. Miner.
Students will represent women clients who have legal matters primarily in the family law area (divorce, custody, support, domestic violence). Students will also participate in the lawyering skills classroom component of Legal Aid 1 or 3. An additional class will focus on specific issues as the impact of substantive law on women, the impact of legal institutions on women, professional role development, feminist lawyering methods, and other topics related to women and the law.
NONPROFESSIONAL COURSE

GOVERNMENT 313 The Nature, Functions, and Limits of Law
Spring. 4 credits. Undergraduates only.

A general-education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of techniques for resolving conflicts and dealing with social problems. The course analyzes the roles of courts, legislatures, and administrative agencies in the legal process, considering also constitutional limits on their power and practical limits on their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process.

ADMINISTRATION
Robert J. Swieringa, dean
John A. Elliott, associate dean for academic affairs
Michael J. Hostetler, associate dean for executive education
Richard A. Highfield, associate dean for MBA programs and operations
Steven J. Sharratt, executive director of development
Daphne Atkinson, assistant dean for admissions
Harriet Peters, director of advising and student activities
Stephen F. Johansson, director of career services
L. Joseph Thomas, director of finance and executive education
Richard A. Highfield, associate dean for MBA programs and operations
Susan K. Salton, executive director of operations
Linda Johanson, managing editor, Cornell Enterprise, and publications coordinator
Rhonda Velazquez, assistant to the dean
Nancy A. Culligan, business manager and director of human resources
Catherine M. Davidson, managing editor, Cornell Enterprise, and publications coordinator
Linda Johanson, managing editor, Administrative Services Quarterly
Ann W. Richards, registrar and financial aid associate
Susan K. Salton, executive director of marketing and corporate communications

The Johnson Graduate School of Management prepares men and women for managerial careers in business. The school offers courses in many disciplines to provide potential managers with an understanding of the complexities of the professional world in which they will operate and of the organizations of which they will become a part.

A bachelor's degree or its equivalent is required for admission to the two-year program leading to the Master of Business Administration (M.B.A.) degree. Nearly half of the students have a background of undergraduate studies in arts and sciences, and about one-quarter in engineering. Five percent of the students begin their graduate training immediately after receiving their bachelor's degrees and the remaining 95 percent following work experience.

Combined degree programs allow highly qualified Cornell students to co-register in the school during their senior year, thereby earning a master's degree in less than the usual time.

The doctoral program, administered through the Graduate School, provides an advanced level of education in business for those who seek careers in teaching and research at leading universities.

More detailed information about these programs is available from the Office of Admissions and Student Affairs, Johnson Graduate School of Management, Sage Hall.

Students in other graduate programs and undergraduate students registered with the university are welcome in many classes. Since matriculated MBA students require certain courses for graduation, non-Johnson School students are not allowed to pre-enroll. During the first week of classes, registration of non-Johnson School students occurs on a space available basis.

UNDERGRADUATE ONLY

NBA 300 Entrepreneurship and Enterprise
Fall, spring. 3 credits. D. Ben Daniel.
This course provides a disciplined look at the entrepreneur and small business management. It deals with the formation and the acquisition of enterprises from the viewpoint of individuals who desire to become the principal owners. Reviews include legal and tax aspects, valuation techniques, organization forms, and venture-capital sources, as well as planning techniques necessary to launch a successful venture.

NBA 301 Entrepreneurship for Engineers
Spring. 3 credits. J. Nesheim.
This course is intended to introduce engineers to the new business startup process. Small teams will be formed to come up with an idea for a startup and create a business plan that can attract venture capital or other funding for the new enterprise. Guest lecturers are from successful high-technology companies. The course is led by instructors in Silicon Valley and Ithaca who created high-technology businesses.

COURSES FOR NON-JOHNSON SCHOOL STUDENTS

NCC 550 Financial Accounting
Fall, spring. 3 credits. Course intended for non-Johnson School students only.
Staff.
An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transactions analysis; the accounting cycle; financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure.

NCC 553 Marketing Management
Fall, spring. 3 credits. Course intended for non-Johnson School students only.
Staff.
The course addresses controllable and uncontrollable marketing variables that managers in multi-product firms face in today's business environment. Topics include customer behavior, product planning, promotion, advertising and promotion, pricing, and competitive strategy. This course is similar in content to the MBA core course NCC 503.

NCC 554 Management and Organizations
Fall, spring. 3 credits. Course intended for non-Johnson School students only.
Staff.
This course takes a resource-based approach to management by arguing that organizations should link their strategy to their internal resources and capabilities. This theme is developed by addressing: (1) the strategic value of internal resources and capabilities, (2) the role of human resources and organizational behavior in formulating and implementing strategy, and (3) the importance of structure and the design of organizations in formulating and implementing strategy. Included among the topics are: how firms create sustainable competitive advantage through internal resources and capabilities, what the best practices are for managing people, what effects best practices have on attitudes and behaviors, why putting the customer first is not necessarily best practice from a resource-based perspective, why organizational culture is central to organizational effectiveness, why the formal organizational chart and structure of an organization are important, how organizations innovate, how organizations change through rearchitecture and reengineering, what firms gain and lose through pursuing core competencies, and what firms gain through strategic alliances and networks. The course makes extensive use of case materials. This course is similar in content to the MBA core course NCC 504.

NCC 555 Managerial Finance
Fall, spring. 3 credits. Course intended for non-Johnson School students only.
Staff.
An introduction to business finance through theory and case studies. Topics include the capital-budgeting decision, portfolio theory, the asset-pricing models, capital structure, mergers and acquisitions, costs of capital, option pricing, and international finance. This course is similar in content to the MBA core course NCC 505.

NCC 558 Production and Operations Management
Spring. 3 credits. Course intended for non-Johnson School students only.
Prerequisites: NCC 501 or permission of the instructor.
Staff.
Operations management deals with the problems of producing and delivering goods and services, topics that are of strategic importance in almost every organization.
Production scheduling is a significant problem for manufacturing firms. Smooth work flow and quality control are important in banking operations; inventory control is crucial in large retail establishments; and proper task sequencing is a major problem in the construction industry. The course deals with those and other problems from a managerial viewpoint. The course is designed around managerial problems in the operations area. Students use case studies to improve skills in problem identification. This course is similar in content to the MBA core course NCC 508.

NCC 508 Managerial Operations
Spring. 2.5 credits. Johnson School core course. Enrollment limited. I. Robinson, M. Lojo.
Operations management deals with the problems of producing and delivering goods and services, topics that are of strategic importance in almost every organization. Production scheduling is a significant problem for manufacturing firms; smooth work flow and quality control are important in banking operations; inventory control is crucial in large retail establishments; and proper task sequencing is a major problem in the construction industry. The course deals with those and other problems from a managerial viewpoint. The course is designed around managerial problems in the operations area. Students use case studies to improve skills in problem identification.

NBA MANAGEMENT ELECTIVE COURSES

Accounting

NBA 500 Intermediate Accounting
Fall, spring. 3 credits. Prerequisites: NCC 500 or the equivalent. M. Nelson.
The course is based on the essential concepts and terminologies of financial accounting introduced in the accounting core course. Students learn to evaluate financial statements through the use of case studies drawn from actual corporate financial reports.

NBA 501 Accounting for Mergers and Consolidations
1.5 credits. Prerequisite: NBA 500 or permission of the instructor. Not offered 1998-99. R. Libby.
The course focuses on accounting problems related to equity financing, including equity restructurings, hybrid securities, intercorporate investments, consolidated reports, proforma statements for a merger prospectus, and other related financial reporting problems. The method of instruction is lecture with cases. Grading is based on two exams. First half of semester. Course continues in NBA 502, Advanced Accounting, offered second half of semester.

NBA 502 Managerial Cost Accounting
Fall, spring. 3 credits. Prerequisites: NCC 500, NCC 501, and NCC 502, or the equivalent. R. Bloomfield, R. Fillmore.
The course is designed both for those responsible for internal accounting information and those who use such information for decision making. Topics include budgeting, accumulating costs for product costing, activity-based costing, standard costs, the analysis of cost variances, cost estimation and prediction, cost-price-volume decisions, performance measurement, nonmanufacturing cost analysis, cost allocation, and transfer pricing. Instruction will be a mixture of lecture and case discussion. Student evaluation will be based on a midterm exam, a final exam, a project, and class participation.

NBA 503 Strategic Cost Management
The course focuses on the role of cost management and related issues in helping a firm compete successfully in the global market. Topics considered include activity-based costing, activity-based management, value chain analysis, the lean enterprise, confronting competition in an industry dominated by lean enterprises, re-engineering, process value analysis, identification of non-value-added activities and costs, targeting, Kaizen costing, continuous improvement, time-based competition, cost versus quality, and benchmarking. The course is almost entirely based on cases, many of them lean enterprises in Japan.
NBA 504 Taxation Affecting Business and Personal Decision Making
Spring. 1.5 credits. Prerequisite: NCC 500 or permission of the instructor. R. Bloomfield.
This course introduces students to the fundamental concepts and techniques of tax planning for individuals and businesses. Planning opportunities considered include changing the timing and nature of income, investments, and expenses; choosing an organizational form; constructing transactions that allow two or more parties to engage in tax arbitrage. The course also introduces tax research techniques and issues regarding tax compliance. Course continues with NBA 507.

NBA 505 Auditing
Spring. 3 credits. Prerequisite: NCC 500 or permission of the instructor. M. Nelson.
The course examines the process by which financial-accounting systems are audited. Topics include ethics, the meaning of audit reports, the legal liability of auditors, the study and evaluation of internal control systems, and various approaches for testing account balances. Problems, cases, and video simulations are used to illustrate concepts.

NBA 506 Business Analysis and Security Valuation
Spring. 1.5 credits. Prerequisite: NCC 500, NBA 500 (or concurrent enrollment) or permission of the instructor. S. Tasker.
This course develops a set of core skills essential to financial statement analysis. We will cover strategic ratio analysis, cash flow analysis, pro forma financial statements, financial modeling, credit analysis, bond rating and bankruptcy predictions, and firm valuation using discounted cash flow techniques. Emphasis is on practical applications. The course format is a combination of case studies and lectures. The lectures communicate subtler aspects of the material while the cases provide hands-on experience. There will be an exam.

NBA 507 Tax Implication of Mergers and Acquisitions and Other Special Topices
Spring. 1.5 credits. Prerequisite: NBA 504 or permission of instructor. R. Bloomfield.
This course examines special topics in tax planning for businesses, with particular emphasis on capital structure choices and reorganizations (mergers and acquisitions), and intra-entity transactions (transfer pricing issues). Readings include many current research papers examining how large corporations exploit their tax planning opportunities. Second half of semester.

NBA 508 Advanced and International Accounting
Spring, second half of semester. 1.5 credits. Prerequisites: NBA 501 or permission of the instructor. J. Elliott.
The course examines advanced topics in accounting for intercorporate investments, including leveraged buy-outs, international transactions and international subsidiaries, joint ventures, spin-offs, and other related financial reporting problems. The method of instruction is lectures mixed with cases. Grading will be based on two exams. Second half of semester. Continuation of NBA 501, Accounting for Mergers & Consol. (offered first half of semester).

Economics

NBA 520 Pricing and Strategy
This course extends material introduced in the core microeconomics course, where the focus is on pricing decisions. The course is taught very much like the core microeconomics course, where the focus is on pricing decisions. The course has a strong emphasis on case analysis, which is conducted using a variety of examples and discussion of current research papers and how they relate to the pricing decisions of the firm. Students will be encouraged to think creatively about the pricing decisions of the firm and how they relate to the pricing decisions of the firm.

NBA 524 Macroeconomics and International Trade
Fall. 3 credits. Prerequisite: NCC 502 or equivalent or permission of the instructor. R. Lind.
The course applies basic macroeconomic theory to such problems as inflation, unemployment, economic growth, and productivity and examines how those problems interact with international trade and finance. Students learn to be informed observers of national and international economic policies and discerning users of economic analyses and forecasts. A lecture/discussion format is used as the method of instruction.

Finance

NBA 540 Advanced Corporate Finance (Theory and Practice)
Fall. 3 credits. Prerequisite: NCC 506 or the equivalent. Students who took NBA 540 and/or NBA 548, 1.5 credit version, can not enroll in this course. H. Bierman.
This course is relevant for both investment banking and the treasuries of any operating corporation. Most class sessions are lecture-discussion, but there are several corporate finance cases. The topics include common stock, preferred stock, debt securities (duration, convexity, inverse floaters, bond refunding, term structure, swaps), hybirds, security design, weighted average cost of capital, basic capital structure issues, cash distribution policy, and the buy versus lease decision. The use of debt to add value, mergers and acquisitions, corporate restructuring, LBO's and MBO's and Merchant Banking are also covered.

NBA 541 Economic Evaluation of Capital Investment Projects
Spring. 3 credits. Prerequisite: NCC 506 or permission of the instructor. B. Swaminathan.
This course deals with the evaluation of capital investment projects under uncertainty. The first part of the course focuses on traditional capital budgeting techniques using the discounted cash flow approach. This involves the estimation of cash flows, the treatment of risk and discount rates, the role of inflation and taxes, and the use of single factor and multifactor asset pricing models in determining discount rates. The second part of the course focuses on the valuation of future investment opportunities in a firm using option pricing techniques. This includes issues such as flexibility options, options on real assets, evaluation of natural resource investments, and evaluation of new product investments. The methods of instruction are lectures, case discussion, spreadsheets, exercises, statistical exercises, and seminars by practitioners. Students are evaluated on the basis of midterm and final examinations, cases, and homework assignments.

NBA 542 Investments and Portfolio Analysis
Fall. 3 credits. Prerequisites: NCC 501 and NCC 502. H. Li.
This course covers the pricing of financial assets and instruments such as securities, bonds, options, and futures; the concepts of diversification, market efficiency, risk and return relationships for (portfolio) of securities. The approach balances rigorous and mathematical simplicity, but this is an essentially quantitative course. Students must be comfortable with statistics, regression analysis, and quantitative analysis as these tools will be routinely used from the beginning of classes. Students should also be
NBA 543 Financial Markets and Institutions

Fall, spring. 3 credits. Prerequisite: NCC 506. M. O'Hara, W. Bailey.

The course develops a framework for discussing financial intermediation. It analyzes the sources, uses, and pricing of funds in the economy and the various roles of banks and other financial intermediaries. Students explore the theory of commercial banking, study how central bank operations affect financial institutions, and learn when lending can be securitized and how such markets work. They also learn how the money market and the financial-futures markets are used to model economic theory.

NBA 544 Bank Management

The course provides an in-depth treatment of management issues in corporate banking. Topics include risk management, credit decisions and pricing, information problems, bank performance evaluation, international lending, and strategic planning. Students learn concepts through case studies and participate in a bank simulation exercise.

NBA 545 Corporate Finance

Fall. 15 credits. Prerequisite: NCC 506. J. Zender.

This half-semester course will cover some of the more advanced topics in the area of corporate finance, including executive compensation, corporate governance, and bankruptcy law. The course will include lecture-discussion sessions in which the main ideas and the existing evidence (i.e., the theory and the empirical) will be presented and discussed. Cases will be used to illustrate the importance and applicability of these ideas and to provide 'hands on' understanding of the material.

NBA 546 Introduction to Derivative Securities

Fall, spring. 3 credits. Prerequisite: NCC 506 (Finance Core) or permission of the instructor. R. Gukhal, H. Li.

The course introduces students to the pricing and hedging of derivative securities. The course briefly covers forward contracts, futures contracts, and swaps. The primary emphasis is on option contracts. Underlying assets include stocks, currencies, and commodities. Fixed income derivatives are covered in NBA 555. The method of instruction is partly lectures, supplemented by guest speakers. A midterm and a final exam comprise roughly half the grade, with the remaining half determined by assignments and class participation. The course is prerequisite for NBA 550, Advanced Topics in Derivative Securities.

NBA 547 Applied Financial Engineering

(also OR&IE 565)

Spring. 4 credits. Prerequisites: NCC 506, NBA 546, NBA 555, NBA 542, OR&IE 525, OR&IE 523, COM 511, permission of instructor. R. Jarjow.

This course is designed to integrate the students' coursework in engineering (computing, stochastic modeling) and finance (options/futures, investment theory) through the completion of a project. The course project will be undertaken via student groups. It will involve the implementation of a financial model to a real world problem. Problems will come from the real issues facing the financial industry. The implementation will include model formulation, computer programming, data collection, and data analysis. The course format will be a mixture of lectures by faculty, industry professionals and students (project presentations).

NBA 549 Managerial Finance Immersion

Spring. 10 credits. H. Biroman, S. Smith, S. Tasker.

This is a unique immersion course specifically designed for students planning to pursue finance careers in non-financial companies. Students interested in non-financial careers (including consulting) may wish to consider this course, but they should recognize that it is not specifically designed for this purpose. An objective of this course is to help students make more informed choices about how to launch their finance careers. The course will provide a high level of interaction with executives who work in the financial functions in a diverse collection of non-financial corporations. These interactions will take place on campus, and in the facilities of the participating companies. A conscious effort will be made to have a very diverse sample of industries and company sizes so that students can appreciate how the financial functions of a company are affected by the size of the company, its internal culture, and the economics and technology of the industries within which it operates.

NBA 551 Current Topics at the Crossroads of Law and Finance

Spring. 3 credits. M. O'Hara.

This course explores a series of selected topics that involve important issues in law and finance. The premise of the course is that financial institutions of all kinds, whether they are known as insurance companies, banks, investment banks, or pension funds, invest money and advise clients in a wide variety of settings. This agency relationship introduces a number of important dimensions to the intermediary-client relationship and this course will look at these issues from both an economic and legal perspective. Emphasis will be placed on the intersections between modern financial theory and legal analysis.

NBA 552 Cases in Corporate Finance

Spring. 3 credits. Prerequisites: NBA 506 or the equivalent. Recommended: NBA 540. Course is limited to second-year MBA's and Twelve-Month Option Students. Students who took NBA 523 and/or NBA 536, 1.5 credit version, can not enroll in this course. H. Biroman.

This course consists of discussions of corporate finance cases dealing with corporate financing. Case form groups will formally present one case and critique a second. This is in addition to the normal class sessions. The cases in this course deal with mergers, acquisitions, valuation, corporate restructuring, LBO's, MBO's, Merchant Banking and the financing of corporations. The material applies equally to careers in investment banking and managerial finance. The course does not deal with stock trading or the details of managing an investment banking firm. Several executives working in corporate finance will present cases.

NBA 554 International Finance

Fall, spring. 3 credits. Prerequisite: NBA 506. W. Bailey.

This course applies principles of finance to the international setting. International finance is different in two basic respects. First, the existence of multiple currencies adds risk to investment and financing decisions. Second, when corporations and portfolio investors cross international borders both problems and opportunities arise. We focus on these issues and highlight how finance theory can be extended to address them. We start with basic principles of international finance, then apply those principles to a variety of problems. The course helps students to understand the ideas and research results of international finance and to adapt what they learn to the practical problems that increasingly globalized business world beyond the classroom. The first part of the class outlines three basic themes: exchange rate volatility, barriers to international capital flows, and the value and importance of diversification. The second part of the class presents a variety of problems, examples, and applications from the three basic themes. These range from corporate finance applications of capital budgeting to portfolio management strategies. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

NBA 555 Fixed Income Securities and Interest Rate Derivatives

Spring. 3 credits. Prerequisites: NCC 506, NCC 501. R. Jarjow.

This course is designed to study the pricing, hedging, and risk management of fixed income securities and interest rate derivatives. Topics to be studied include: the term structure of interest rates, interest rate swaps (caps, floors, collars), the risk structure of interest rates, credit risk spreads, and corporate bond valuation. The method of instruction is lectures and discussion, with computer illustrations an integral part of the class content.

NBA 556 Immersion in Investment Banking

Spring. 10 credits. Prerequisite: NCC 506. H. Biroman, T. Dyckman, J. Hass, S. Tasker.

This course is specifically designed for those students planning to pursue careers in investment banking. The course is inappropriate for students interested in following a finance career in non-financial industry or non-finance careers (including consulting). This course is designed to meld the practical and theoretical aspects of the field. We will be expecting a great deal of interaction and discussion between students, the participating faculty, and visiting practitioners. While the course is designed to make its students more attractive as candidates for employment in the investment banking
profession, and we expect that some of the participating firms will be using their visits to identify candidates for summer internships, obtaining relevant summer internships remains the responsibility of the students.

**NBA 557 Case Studies in Venture Investment and Management**  
Fall, 2 credits. Prerequisites: NCC 500 and NCC 506 or concurrent enrollment. W. Thomas. A series of cases that focus on the venture capital investment process and on the subsequent management of such ventures. The primary perspective is that of the venture capitalist in assembling and evaluating information, preparing forecasts, assessing risks, developing and negotiating investment structure and terms, and deciding whether to invest. Cases also focus on management and financial problems and policy issues and the relationship between venture capitalists and entrepreneurs. The secondary perspective is that of the entrepreneur and the techniques and skills employed in managing growing enterprises. Presentations by venture capitalists and entrepreneurs will supplement student discussion and analysis of cases. Grades will be based on written reports, quality of classroom participation, and a final exam.

**NBA 558 Corporate Financial Policy**  
Fall, second half of semester. 1.5 credits. Prerequisite: NCC 506. J. Zender. The course will deal with frontier topics in corporate finance and investment strategy. The financial world is changing at an increasing pace. New financial products are coming to the markets, and the financial structure of many corporations is becoming more and more complicated. Corporate financial officers and investors (such as money managers) need to know the driving forces behind the financial products (debt, equity, and more complicated products) to understand the products themselves. Understanding these issues will enable us to estimate firm values more precisely. The course objective is to enable you to better analyze financial situations you may encounter in the future, as well as firms' valuation techniques.

**General Management**

**NBA 530 Entrepreneurship Lab**  
Fall, spring. 3 credits. Prerequisites: NBA 564 Entrepreneurship, or concurrent enrollment, or permission of the instructor. P. Sears. Students will team up with entrepreneurs in the greater Ithaca area on defined projects, which will be integral for the companies' operations, such as production planning, new product launches, or assessing organizational structure. The goal of the course is for students to gain firsthand experience to the application of functional knowledge in a start-up setting, while bringing real value to the host company.

**NBA 531 Startup Forum: Cornell Technologies with New Venture Potential**  
Fall. 1 credit. R. Holsten. The course will focus on research at Cornell, which may be a basis for new business ventures. It will address the fundamental ways in which university-based research differs from industrial research. Students will explore and critique the business potential of each concept.

**NBA 532 Venture Partnerships: Big Company and Emerging Company**  
Spring. 1.5 credits. P. Sears. The course will examine the role of the business development executive in managing partnerships between big companies and new ventures. Topics include setting growth targets, negotiating partnership agreements, managing expectations, licensing, and divestiture.

**NBA 559 The Venture Capital Industry and Private Equity Market**  
Spring. 5 credits. D. BenDaniel, J. Reyes. This course focuses on the industry from the practitioners' perspective. Topics include (1) an introduction to the private equity market focusing on the transactions that define the industry, its structure, participants, history and trends, (2) institutional private equity investing—now an increasingly important and dynamic part of the asset allocation mix, and (3) issues in private equity investing such as concentration in fewer, larger funds and the critical role of a new class of gatekeeper consultants for limited partners. The course is given jointly by Professor David BenDaniel and Jesse Reyes, Director of Research of Venture Economics Information Services.

**NBA 560 Business Law I (also ARME 320)**  
Fall. 3 credits. D. Grossman. The course introduces the basic tenets of law as they apply to businesses and their operations. Topics include personal property, contracts, agency, real property, and landlord-tenant concerns. Text readings and case studies are used. All students intending to be professional accountants are required to take the course, and it is strongly recommended for finance students.

**NBA 561 Business Law II (also ARME 321)**  
Fall. 3 credits. Prerequisite: NBA 560 or permission of the instructor. D. Grossman. The course examines business organizations and the principles of commercial law affecting businesses. Topics include secured transactions, bankruptcy, commercial-paper, antitrust, consumer-protection, security-regulation, and environmental-protection laws. Text readings and case studies are used.

**NBA 562 Estate Planning (also ARME 422)**  
Fall. 1 credit. D. Grossman. Fourteen sessions on the various aspects of estate planning. The law and use of trusts, the law of wills, federal and New York State estate and gift taxes, and probate procedures are covered.

**NBA 563 Initial Public Offerings and Acquisitions**  
Spring. 3 credits. Prerequisites: none. J. Shulman. An in-depth look at initial public offerings (IPOs) and acquisitions from a practitioner's point of view. Fall. The course will cover the applicable statutory framework, pre-offering corporate preparation (such as implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, pricing, selection of a trading forum (i.e., NYSE, NASDAQ or AMEX) and the consequences of going public. Regarding acquisitions, the course will explore financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale) and crucial aspects of acquisitions, such as letters of intent, continuity of employees, anti-takeover strategies, and non-competition agreements. Mr. Shulman is an attorney with experience in IPOs and acquisitions, and an adjunct professor at the Cornell Law School where he teaches a seminar course on this topic.

**NBA 564 Entrepreneurship and Enterprise**  
Fall, spring. 3 credits. D. BenDaniel. The course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate arbo and bankruptcy and work-outs, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing finance, operations, and human resource topics in the context of high-growth business ventures.

**NBA 567 Management Writing**  
Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, M. Hittelman. Students learn to write clearly and effectively by focusing on the writing processes as well as the finished product. Course topics include audience perspective, style, organization, strategy, and persuasion. The seminar-style class is seven weeks long and limited to fifteen students, who work on a different assignment every week. Students consider style, organization, tone, and clarity by critiquing each other's work in class.

**NBA 568 Oral Communication**  
Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, C. Rosen. NBA 568 focuses on improving the presentation skills of management students. The course covers the areas of speaking formats (impromptu, extemporaneous, manuscript), delivery, organization, visual aids, and question/answer. Student speeches constitute the bulk of class time, with each student presenting seven or eight speeches in the seven-week session. The small class size allows for significant individual attention. Students receive feedback from classmates and the instructor, and have the opportunity to review in tutorials the videotapes of most of their presentations.

**NBA 569 Management Consulting**  
Fall, spring. 4 credits. Dr. Adams. The course is case-study oriented and focuses on strategic consulting. It has multiple objectives. First, it provides students with the opportunity to understand the role of the consultant and to gain indirect experience in that role through dealing with a broad range of practical and real-world issues. Second, it helps students improve their analytic skills through practice with case studies. Third, it
provides students with information that they are unlikely to gain in other courses, as well as experience making group presentations and evaluating them. In addition, students are required to write a comprehensive analytic term paper.

NBA 570 Leadership in Management  
Spring. 1.5 credits. MBA students only. R. Peterson, CCL.  
This course is an extraordinary partnership with the Center for Creative Leadership (CCL) to provide MBA students with the self-awareness and interpersonal skills required to be effective leaders. Training will be provided by professional staff from the Center for Creative Leadership.

NBA 571 Cornell Management Simulation  
Fall. 1.5 credits. Restricted to second-year MBA students. J. Hass.  
This computer-based simulation is played by teams of four, self-selected students who make marketing, production, and finance decisions for one of five companies operating competitively in the same industry. After the first week, during which the rules of the simulation are explained and the software used by each team is demonstrated, the teams make weekly decisions (meeting at their own convenience). At the beginning of the simulation, each team writes a Strategic Intent paper and, before the results of the last decision have been determined, each team presents an in-depth analysis of its performance and its strategy for the future in a “Board of Directors” meeting. Letter grading. R. F. Lind.

NBA 572 Environment, Economics, and Management Policy  
Fall. 3 credits. Enrollment preference to Johnson School and other graduate students, others by permission. D. Chapman.  
Environmental protection and pollution controls are of major importance in the U.S. and OECD countries and are growing in importance in other countries. This course analyzes the economic rationale affecting business and public decision making. It investigates the success achieved in the U.S., and the important role that business has played in that success. Case studies review government-business cooperation, methods of analysis, and management strategy. The course concludes with business leaders presenting their past experiences and current challenges as judged by the class. The general goal of the course is to introduce future managers to the realistic process of successful environmental decision making.

NBA 573 Projects in Environmental Management  
Spring. 1.5 credits. A. McAdams.  
This project course of interdisciplinary teams focused on environmental issues faced by real world organizations: businesses, governmental agencies, not-for-profit institutions. The project teams are to establish a “contractual agreement” to achieve mutually agreed goals during the semester, with appropriate “milestones” to be completed at intermediate stages. Project outcomes will be provided to the host organization through a formal presentation and report at the end of the semester and result in formal case study of the issues involved. This course is taught jointly with Professor McAdams/Advanced Consulting course, NBA 575.

NBA 575 Field Projects  
Fall. 3 credits. J. Russell.  
The course is designed that top management business problems through a hands-on team project. Teams must identify what the central issues are and then determine the most appropriate tools and concepts to provide decision insight. Students also learn to approach business problems from a cross-functional perspective. Specific conceptual content includes: project management, power, politics, and personalities in work groups; managing in for-profit versus not-for-profit organizations; and organizational change. Field Projects is not classroom-based. Although there will be a few class sessions early in the semester, the course structure will revolve around readings and the coaching sessions as needed. The instructor team will contain one regular member of the Johnson School’s faculty, an experienced executive, and an administrator.

NBA 576 The World Geopolitical Environment of Business  
Fall. 3 credits. Letter/S/U optional grading. R. Lind.  
The geopolitical face of the world is changing at a pace that few could have envisioned even five years ago. The unification of Germany, the fall of communism and nation of sweeping economic restructuring in the former Soviet Union, the move toward democracy with market economies in eastern Europe, the movement of Europe toward a unified economy, and the inflated with reform and its implications in China are just a few of the many examples of the changing world environment of business. The course provides students with a view of those fast-paced worldwide changes. Topics covered will include developments in western and eastern Europe, the former Soviet Union, the Pacific Rim, Central and South America and the Middle East and the role and fate of developing countries and developing countries in the 21st century. Guest speakers include leading scholars from Cornell and other universities and leaders in business and government.

NBA 577 The Political, Legal, and Regulatory Environment of Business  
Spring. 3 credits. Letter/S/U optional grading. R. Schulze.  
The political climate, laws, regulations and government arrange infrastructure for infrastructure have a profound effect on the nature, operation, and profitability of business. Many of the most important business problems are directly related to the political and regulatory environment. The course examines the responses of government officials and regulatory agencies to the political environment. The course is the study of the political and the legal environment of business regulation, antitrust, and product liability. Guest speakers include legal scholars from throughout the university and business and government leaders.

NBA 578 Business Ethics  
Fall. 3 credits. R. Frank.  
Students examine actual situations in business, both in the United States and abroad, that involve ethical issues affecting individuals and organizations. They are challenged to decide on appropriate ethical positions.

NBA 579 Business Strategy  
Fall (first half). 2 credits. Enrollment limited to second-year MBA students only. S. Sokalski.  
A well defined strategy is essential for business success—specifying what the business is going, how it’s going to get there, and then providing a framework for making decisions along the way. Strategy is the responsibility of top executives of a company/business, and the ability to formulate effective strategy is one of the key skills that distinguishes general managers from functional managers. This course will focus on the process of effective strategy formulation from the perspective of the general manager of a business unit. This perspective also applies to consultants working for clients on business unit strategy. Corporate strategy and its interaction with business unit strategies will be discussed, as well as tools useful for industry and company analysis. The course consists of lectures by the instructor, readings, and cases selected to illustrate important strategic concepts and analytical building blocks. The course will draw heavily on the instructor’s experience developing strategy for numerous businesses at Comming (incorporated). Guest speakers from strategy consulting firms and also from industry will present their approaches to strategy, and the analytical tools they find most effective in working on business strategy. Students will gain experience, via assigned cases, in analyzing business problems/opportunities, using the strategic process to formulate effective business strategies, and in presenting their recommendations in written form and orally in class. A major case write-up and presentation in a mock board environment at the end of the course gives students an opportunity to play the role of strategy consultants working on a real case.

International Management

NBA 580 Strategies for Global Competitiveness  
Spring. 3 credits. A. McAdams.  
Initially, students explore the role of government in several private-market industrialized nations—Japan, France, Germany, the United Kingdom, and Italy—and how the United States might learn and use. They investigate the impact in each of those countries of government policies on the global competitiveness of the country’s firms. Special emphasis is given to differential policies appropriate to each of a range of industries, from the mature to the high tech (including computers, telecommunications, and electronics), and to stages of development in each economy. Possible lessons are then tested for less developed countries that might include Venezuela and Malaysia and newly emergent countries such as Singapore.
NBA 584 International Competitive Strategy
Fall and spring. 1.5 credits. Prerequisites: none. This course can be used to fulfill the strategy requirement. J. Katz.
Focuses on the development of competitive strategies in the global environment— including the identification of internationally relevant strengths and weaknesses, the movement and use of resources to gain competitive advantage, and strategies to confront competitors, both domestic and multinational.

NBA 585 Cross-National Management
Fall. Spring. 1.5 credits. Prerequisites: none. J. Katz.
Focuses on the differences in managerial style across countries and the development of skills with which to deal with those. Most of the material will be applicable to all countries, though two specific countries will be highlighted each semester.

NBA 586 Global Management Structures
Spring. 1.5 credits. Prerequisites: the permission of the instructor. J. Katz.
Focuses on the control, communication and coordination systems within multinational corporations. Design and development of appropriate systems, to ensure enactment of corporate strategy will be addressed.

NBA 587 International Mergers & Acquisitions
Spring. 1.5 credits. A. Rosenbloom.
This course covers issues relating to mergers and acquisitions in an international context. Topics include business due diligence, pricing and negotiation and other important topics from both the buy and sell side. The course will use both lecture and case formats. Students will be evaluated on the basis of group and individual written assignments. The instructor for the course is special partner & Co. Capital Corp, a New York City-based firm specializing in mergers and acquisitions. Patricof has offices in New York and Palo Alto, affiliates in London, Paris, Zurich, Madrid, and Munich and is part of Apax Partners, which includes Patricof & Co. Ventures, Inc., one of the world's largest international venture capital firms. He holds a bachelor's degree from Bucknell University, a master's degree from Columbia University, and a law degree from Cornell. He has taught a similar course at Columbia.

The course is offered in the first half of the semester. Beginning with the third meeting of the course, Mr. Rosenbloom will conduct the course via a video-teleconferencing link from New York City.

NBA 590 Managing in Developing Countries
Fall, first half of semester. 1.5 credits. Letter/S. J. Katz.
This class centers on the unique features of industrializing countries as hosts for multinational business operations. It is a case-based course; each day is spent discussing one or two cases. Topics include environmental variation and how to deal with it and concentrated national power structures and their management. We cover a large number of countries spread throughout the world. Students are responsible for providing in-class updates on the countries discussed, because while the case content remains valid, some of the facts presented about the countries are out-of-date. Grading is based on the country update presentation, a final case write-up, and class participation.

NBA 592 Experience in International Management
Spring, first half of semester. 1.5 credits. S-U grades only. J. Katz.
The objective of this course is to combine classroom sessions and an international study trip to give students a fuller understanding of differences in national industrial structures and national management styles. All students will attend six sessions (one per week for the last half of the semester) that will provide a theoretical background on business structures, management norms, and cross-cultural communication patterns in the countries that will be visited. Each student must then join one of the January study trips (Destinations to be announced in September). On the trips, students will be required to write a final paper integrating the material learned in the classroom with their experiences. The class will also have one debriefing meeting. NOTE: participation in a study is trip required to complete this course (fee charged).

Management Information Systems

[NBA 600 Database Management]
3 credits. Prerequisite: some knowledge of computing and systems, e.g., COM S 211. Not offered 1998-99. L. Orman.
The course introduces the design, use, and management of computerized databases. Topics include physical and logical data structures, design issues, and retrieval, maintenance, and security problems. Students design, create, and use databases using various database management systems.

NBA 601 Electronic Commerce
Fall, spring. 2 credits. Course will meet for the first nine weeks of the semester. L. Orman.
Electronic commerce is the use of information technology in conducting economic transactions and managing businesses over computer networks. It is a phenomenon that has captured the public attention because of its wide-ranging implications for businesses, markets, public institutions, and the general public. Electronic commerce involves a wide variety of cooperating technologies such as communications, networks, databases, expert systems, and multimedia. It also impacts a wide variety of managerial issues. Electronic commerce created a new emphasis on information technology and systems in management. It led to the development of new technologies and new combinations of existing technologies to support management. On occasion, it radically altered business practices and the role of management.
The students in this course will learn to conduct economic transactions and manage businesses on the Internet. All major technical and managerial issues will be covered through computer exercises on the Internet, and case studies and examples of businesses on the Internet.

NBA 612 Imaging and the Electronic Age
Fall. 3 credits. D. Greenberg.
The advances of computer graphics, computer processing power, network bandwidths and video compression technologies have brought the merger of the telephone, television and computer industries. The influence of these technologies have created paradigm shifts that will drastically change the way we communicate, how we are educated, the way we work, design, and in essence, how we will live in the next century. This course will start by presenting historical technological advances that created major paradigm shifts for communications. Advances in computer technology emphasizing the fundamentals behind the increases in processing power, video and computer graphics capabilities, and network transmission will be presented. The latter half of the course will cover the effect of these advances on several discipline-specific areas including photography and publishing, as well as the computer industry itself. One session will be devoted to the social and legal issues arising from these advances in electronic communication. The course will be especially tailored to a business school and industrial concerns and will have interactive live demonstrations at the state of the art laboratory of the Program of Computer Graphics. No prior knowledge in computer science is required.

NBA 614 Managing in the Information Age
Fall, first half of semester. 1.5 credits. A. McAdams.
This course explores a topic that is just beginning to emerge: the implications of the explosion of the Internet and interactive multimedia communications for the way managers think and manage. It will examine the origins of the Internet and some of the forces that have led to its rapid development. Noting along the way why and how it has "blindsided us" as Andy Grove of Intel and Bill Gates of Microsoft candidly state. The course will look at how information technology is being used today in pioneering applications in organizations of various kinds based in part on original case studies and on guest lecturers. Throughout the semester the student will be asked to identify new and innovative uses of modern information technologies. The course itself will evolve— even in real time— with the developments in the field.

NBA 615 Using Information Technology to Manage the Business
Fall. 1.5 credits (variable). S-U grades only. A. McAdams.
This course will rely on visiting speakers from several technology-based firms. The speakers will address how to manage the information technology function as a business and how to use IT to deal with business problems. Speakers will come from hardware companies, software companies, and other organizations dealing with large issues of managing the information technology function. There will be assignments, with student groups interacting with speakers, and a short paper at the end of the course. The course will meet approximately 10 times during the semester for up to two hours. H-P, Intel, and other firms have indicated an interest in being involved.
NBA 620  Marketing Research  
Fall. 3 credits. Prerequisites: NCC 501 and NCC 503, or the equivalent. V. Rao.

The course teaches students to identify information needs for developing marketing strategies and making tactical plans. They are introduced to up-to-date methods in research design and data collection, measurement, and analysis. They gain hands-on experience with such methods through problem sets and group projects. The discussion balances the viewpoint of researchers with that of managers who commission research.

NBA 621  Advertising Management  
Fall. 3 credits. Prerequisite: NCC 503. D. Stayman.

The course is designed to give students an understanding of the advertising and promotion management process. It covers the components of a successful advertising campaign and helps students develop an appreciation of the issues involved in advertising planning and decision making. They also learn how recent social-science findings and theory can facilitate advertising management.

NBA 622  Marketing Strategy  
Fall. 3 credits. Prerequisite: NCC 503. V. Rao.

The course balances theoretical and practical approaches to the development and evaluation of marketing strategies for multiproduct firms. It considers various environmental opportunities and constraints in developing and evaluating integrated marketing strategies for new and established products and services. Recent research results are applied to decisions on product-market boundary definition, resource allocation, product positioning, and competitive reactions. It includes selected current topics such as brand equity, acquisitions, and lead-user analyses. Students use case studies extensively to develop skills in strategy analysis and to enhance skills in assessing external threats and opportunities. They employ computer-based strategy simulations to evaluate the effects of competing strategies. Guest speakers from industry provide a view of the operational aspects of marketing strategy.

NBA 623  Models and Methods for New Product Development  

The successful introduction of new products requires careful planning and systematic screening and testing. This course covers models and methods that are useful to managers in the development (e.g., specification of products and services) and marketing of new products. Heavy emphasis is placed on the measurement of consumer preferences. Students are required to complete a group project, consisting of a measurement instrument, data collection (from at least 30 respondents) and data analysis, for a self-chosen product category. The method of instruction consists of a combination of lectures and discussion of cases and articles. Performance is evaluated primarily based on exams and the group project.

NBA 624  Immersion in Brand Management  
Spring. 15 credits. Prerequisites: NCC 500, 501, 502, 503 and 506. Restricted enrollment permission of the instructor required. This is a full-time program for the semester; students will not be able to take other courses concurrently. The course objective is to begin training students to think and act like brand managers, one of the best-trained and most upwardly mobile professionals in industry. It will provide students with a unique opportunity to begin internalizing the concepts, principles, and tools necessary to achieve success in brand management. While the course will focus on managing traditional consumer brands, high-tech products, services, and global branding will also be addressed. In-class methods will consist of: (1) academic and industry lectures; (2) on-site visits with marketing and manufacturing professionals; (3) case and project discussions and presentations; and (4) a brand management simulation. Course requirements will consist of: (1) extensive readings; (2) individual case write-ups and presentations; (3) group projects and presentations (including a capstone business plan development project); and (4) in-class exams. There will be considerable off-campus travel for field study. Note that this course is an approved substitute for both core courses, NCC 508 and NCC 504.

NBA 625  International Marketing  

International Marketing is designed to train students to take a domestic product and expand it into international markets successfully. Market selection, international market research issues, and international marketing strategies are all discussed. The term project (actually submitted in three parts throughout the term) requires that students choose some product and develop a plan for taking it abroad. The course text includes a series of short (1-3 page) cases that are used as the basis of discussion in each class. Therefore, class preparation is essential. Grading is based on the term project, the final, and class participation. Core marketing provides a useful background, but is not a prerequisite.

NBA 626  Consumer Behavior  
Spring. 3 credits. A. Isem.

Topics include factors that influence response to advertising of various kinds, purchase decisions, product perceptions, response to promotion, consumer satisfaction, and the basic methodologies for understanding consumer behavior.

NBA 627  Affect and Brand Equity  
Spring. 3 credits. A. Isem.

The course examines ways in which affect, or feelings, can play a role in processes related to brand equity. It focuses on the influence of affect on the development, change, and maintenance of brand perceptions and brand loyalty. Topics include brand loyalty, variety seeking, product categorization, judgment, decision making, and risk preference. Those six areas are important in choices related to brand equity and brand loyalty (e.g., choosing brand-name products or value-priced ones, staying with a brand or switching).

NBA 630  Policies for Marketing Channels  
Spring. 3 credits. Prerequisite: NCC 503. V. Kadiyali.

Marketing channels are analyzed as a chain of interdependent and interlocking organizations that produce and deliver goods and services to various types of consumers. We will look at various aspects of these relationships, such as efficiency, conflict, incentives and government intervention. Instruction consists of lectures, cases and guest speakers.

NBA 631  MARKSTRAT Simulation  
Fall, second half of semester. 1.5 credits. Prerequisite: NCC 503. V. Rao.

MARKSTRAT Simulation offers an opportunity for students to make various marketing strategy decisions in a realistic, dynamic, simulated, competitive environment. Students, working in teams, will manage a portfolio of a firm's products for several years (periods). They will learn how to make long term decisions (introduction of new products) and will deal with various cross-functional issues related to marketing (e.g., research and development, product design, and budgeting). Students will develop an initial strategy statement and strategic marketing plan for their firm.

NBA 633  Current Topics in Marketing  
Spring (first half). 1.5 credits. S-U grades only. V. Rao, D. Stayman, V. Kadiyali.

The marketing environment in which a business operates is subject to constant change; these changes are gradual in some cases, but sudden in most situations due to the developments in technology. To compete effectively, marketers need to be proactive and adapt their strategies to various anticipated changes. Examples of the changes in the environment include: consumers shopping in new and emerging channels (e.g., grocery shopping on the Internet and direct mail); emergence of new media for advertising and communication (e.g., World Wide Web); continuous introduction of new high-technology products and processes (e.g., products based on electronics and biotechnology); availability of mega-databases for targeting customers; and regulation. This course will present current thinking of how a business should and could adapt to significant environmental trends; an illustration is the need to look at markets pace transactions as opposed to traditional marketplace transactions. A majority of the topics will be introduced and presented by practicing managers in several relevant industries. A set of carefully selected articles in professional and academic journals will constitute background readings for the course. Each student will be required to write an analytical essay on the situation presented in the class and develop a short term paper on a course topic of interest.

NBA 635  Marketing Models  
Fall. 3 credits. Prerequisite: NCC 503. Not offered 1998-99. V. Kadiyali.

Students learn how to use mathematical models to solve marketing problems. The objective is to develop students' skills in evaluating marketing models and implementing them in management practice.
The objective of this short course is to expose MBA students to selected contemporary issues in the area of direct marketing. In addition to providing an overview of the direct marketing industry and trends in database technology, the course will address major strategic and tactical issues in the management of direct marketing. The discussion will mainly consider the perspective of a marketer interested in employing the opportunities in direct marketing as an integral element of the marketing mix for a product/service. It will also address appropriate ethical concerns with direct marketing. To acquire a flavor of various practices in the industry, students will visit one or two direct marketing firms in New York City or its vicinity toward the end of the course.

NBA 638 Analysis of Competitive Decision Making
Spring. 3 credits. Prerequisite: NCC 502. V. Kadiyali.

This course brings methods of management science to competitive decision making. Specifically, we will address issues relating to optimal competitive decisions for a firm interacting with current and potential rivals. We discuss how firms can use their choice of strategic decisions, best signal to rivals their intentions and degree of commitment to them. We also look at sustainability, flexibility, and correction of decision choices. Game theoretic perspectives are used to analyze these concepts. The dimensions of competitive strategy that we look at include product proliferation, R&D and patent policies, choice of compatibility with existing products, bundling of products, investing in capacity, vertical integration, choice of channels of distribution partners, pricing, and promotions. We also discuss problems caused in the optimal choice and implementation of firm strategies when information is imperfect. Specifically, we look at issues of moral hazard and adverse selection, and how these affect firm choices of strategies (e.g., pricing, choice of channel partners, etc.). Instruction includes lectures and cases.

NBA 639 Data-Driven Marketing
Spring. 3 credits. A. Ansari.

Data-Driven Marketing will introduce the future brand manager or marketing consultant to the use of market data to evaluate and construct pricing and promotional strategies. The course will introduce new sources of data available on product purchases and consumers' reactions to the marketing environment. The course focuses on the practical use of popular data sources. Approximately 70 percent of the course will cover panel data on high-volume consumer packaged goods, and 30 percent will be devoted to direct or "database" marketing. The goal of this course is to introduce these new data sources and provide a solid foundation for the development of analytic tools. Examples are drawn from the consumer packaged goods industry. This course makes intensive use of EXCEL and the WINDOWS computing environment. The data has been extracted and organized for use in EXCEL; this allows the student to concentrate on learning modeling tools without a large investment in computing or data manipulation methods.

Operations Management

NBA 641 Logistics and Manufacturing Strategy
Spring. 3 credits. Prerequisite: NCC 508, OR&IE 404, or permission of the instructor. L. J. Thomas.

The course is about strategic management of the values obtained from the material to the customer. Students discuss operations strategy issues that are important to both manufacturing and service. The course emphasizes written and oral communication skills. About a third of the classes are spent on case studies, with small groups presenting their analyses of them. There is one mid-term examination, but the majority of the grade is evaluated based on projects and class participation. There is an option of replacing some assignments with a "live case," a project with a local company.

NBA 644 Quality Management
Fall. 3 credits. Prerequisite: NCC 508 or permission of the instructor. Not offered 1998-99. L. Robinson.

The course uses the Malcolm Baldrige National Quality Award criteria in managing quality in both service and manufacturing environments. Topics include an external focus on identifying and satisfying the customer, an internal focus on process redesign and improvement (including bottleneck management and the just-in-time philosophy of eliminating waste), the strategic and competitive aspects of quality improvement, human-resource issues (such as worker participation, motivation and performance measurement, and worker teams), quality and design, and selected topics in statistical quality control (experimental design, acceptance sampling, and process control). Students should have a working knowledge of Lotus 1-2-3 or Excel software.

NBA 645 Product Development Practicum

This course centers on developing a major new product for the firm. It will involve training in creativity by a consulting firm and readings in product development. This course will provide the opportunity to learn from many different sources, consultants, faculty, and executives.

NBA 646 Service Operations
Spring. 3 credits. Prerequisite: NCC 508. M. Lojo.

This course addresses the unique aspects of managing service operations in contrast to manufacturing enterprises. Design, marketing, evaluation, and improvement techniques will be discussed. Types of services to be examined include consumer, professional, industrial, and not-for-profit, including government and volunteer-based services. The emphasis will be on high-end, knowledge-based services that play a critical role in our economy. Traditional operations management models will be applied to services, as well as theories based in other disciplines such as social psychology and economics.

NBA 650 Seminar in Manufacturing Management (also IR 670)
Spring. 15 credits. Enrollment limited. Permission of instructor required. J. Suwinski.

This is a full-time program for the semester; students will not be able to take other courses concurrently. The course is concerned with the integration of technological, human-resource, logistical, and financial considerations to produce a manufacturing enterprise that can respond quickly and effectively to market requirements. It will be taught by a team of faculty and industrial practitioners, and much of the student work will be team-oriented. There will be considerable off-campus travel for field study of a variety of manufacturing plants. Note that this course is an approved substitute for both the Production and Operations Management and Organizational Behavior core courses, i.e., NCC 504 and NCC 508. Johnson School students should complete NCC 508 before taking this course.

NBA 651 Employment Relations

The course will be offered over two full days and will consist of three parts: (1) an overview of U.S. labor unions and employment law and its effect on today's management, (2) a case analysis of what can lead a workforce to seek union representation to be able to bargain collectively, and (3) an examination of union-management productivity partnerships.

NBA 652 Integrating Product Design, Marketing, and Manufacturing
Spring. 1 credit. J. Bradley, J. Thomas.

The course will make the necessity of integrating product design, marketing and manufacturing for a firm's success apparent. Managerial tools and useful concepts that facilitate this integration will be introduced. Students will have the opportunity, through homework assignments or projects, to make a more in-depth foray into the course topics.

NBA 653 Strategic Alliances: Lessons from Experience
Spring. 1 credit. J. Suwinski.

A wide variety of strategic alliances are being used today as companies try to leverage their resources for competitive advantage. This course will cover various types of alliances, examining the strategic rationale and pros and cons of each major type of alliance. The primary focus of the course will be on joint ventures as a specific form of strategic alliance, where the success rate is less than 50%. The course will develop a set of principles that have contributed to success for Corning Incorporated. The course will be taught from the perspective of the general manager of a major business unit.

Behavioral and Organizational Science

NBA 663 Managerial Decision Making
Fall. 3 credits. J. Russo.

All managers make decisions, usually without the aid of formal tools. Much research has shown that such intuitive decisions produce common, predictable errors. The course uses the psychology of decision making to teach managers how to recognize the situations that most commonly lead to error and offers methods to overcome such errors. Specific applications include forecasting, pricing and promotion strategies, negotiations, the psychology of financial markets, and managerial risk taking.
This course is designed for students who see themselves in settings where they have to develop new processes and for students who must implement change in existing products or processes. We discuss major issues involved in managing the introduction of new technology, including communication, technology assessment, R&D strategy, and positioning. We examine how industries are transformed by new technologies and how innovations diffuse among firms. We also consider internal management issues, including decision topics as the structure of innovative organizations, the design of incentive and reward systems that foster risk taking, the way innovation champions manage the new-product development through cross-functional teams, and the role of executive leadership. The course uses a combination of readings, lectures, discussions, case analyses, and guest lectures.

**NBA 666 Negotiations**

Fall, spring. 3 credits. K. O'Connor. Negotiation is the art and science of securing agreements between two or more interdependent parties. The primary objective of this course is to understand the theory and processes of negotiation as it is practiced in a variety of settings. This course is designed to complement the technical and diagnostic skills learned in other courses at the Johnson School. A basic premise of the course is that while a manager needs analytical skills to develop optimal solutions to problems, a broad array of negotiation skills is needed for those solutions to be accepted and implemented. The course will highlight the components of an effective negotiation and teach students to analyze their own behavior in negotiations. The course will be largely experiential, providing students with the opportunity to develop their skills by participating in negotiations and integrating their experiences with the principles presented in the assigned readings and course discussions.

**NBA 667 Managing Intellectual Capital**

Fall. First seven weeks. 1.5 credits. B. Nelsen. As the twentieth century draws to a close, economies long based on manufacturing are giving way to those based on the management of information, the production of knowledge, and the provision of services. Hence, organizational profits will increasingly flow from intellectual rather than material capital. A firm's success will hinge upon the manager's ability to recognize and adapt to the unique challenges presented by managing intellectual capital. This course examines this shift in the business environment and its practical implications for managers. Topics addressed include (1) motivating and managing knowledge workers; (2) employee empowerment and self-managing teams; (3) organizational learning; and (4) leadership for innovation and creativity.

**NMI 500-502 Directed Reading and Research**

Fall, spring. 1, 2 or 3 credits. S-U grading only. Students undertake special-interest research under the supervision of faculty members. Registrations are limited to students who have the approval of their advisers and of the faculty members involved in the research.

**NMI 510 Multi-Cultural Work Environments**

Spring. 1 credit. S-U grading only. Restricted to Johnson School students. C. Rosen, B. Minn. NMI 510 is a 1-credit, S-U, independent study course that is open to students whose summer internships will be in a country other than that of their citizenship or prior work experience. The goal of the course is to promote an understanding of the cultural assumptions we bring to the work environment and the effects of cultural differences on organizational interactions and productivity. Registration for the course occurs in the spring semester prior to the internship, and grades are posted in the following fall semester after completion of the course project (a 10-page paper). Students may register for the course after obtaining an internship offer and completing the paperwork for the course instructors. International students will obtain and process work authorization forms with the International Students Office. See Charlotte Rosen (Malott 558) for further details about the academic and immigration requirements for NMI 510.

**DOCTORAL SEMINARS**

**NRE 502 Doctoral Seminar In Marketing**

3 credits. A. Auslie. This class is intended to introduce students to empirical research in marketing. There will be a strong focus on the historical development of econometric specifications of consumer choice models (with an emphasis on heterogeneity and issues of dynamic consumption patterns), and Bayesian methods in marketing. However, by the nature of the class, the content will to some extent be driven by the participants in the course. Teaching will be interactive, and each participant will be expected to present one of the papers studied to the rest of the class. Furthermore, each participant will be expected to replicate the results of one of the papers, requiring the participant to write the necessary code and briefly discuss their findings.

Enrollment is by consent of the instructor. Students are required to have completed a graduate level course in either mathematical statistics or econometrics, although this restriction may be waived in special cases. Students are welcome to sit in on parts of the class; for example, the section on Bayesian Methods will be broad enough that students from other areas may find the presentation useful.

**NRE 504 Doctoral Seminar in Accounting**

3 credits. Staff. The seminar provides a rigorous and integrative exposure to those aspects of the literature in accounting, behavioral economics, and psychology that are related to questions of accounting and auditing theory and research. This course is for Ph.D. students only.

**NRE 507 Doctoral Seminar: Affect and Cognition**

Fall. 3 credits. A. Isen. This course examines research on some of the ways affect influences such thought processes as memory, decision making (including risk taking), and problem solving (including creative problem solving). Applied topics relevant to management concerns (for example, organizational behavior and consumer behavior) as well as other theoretical and applied topics (among them medical decision making, social interaction, self-concept, and cognitive and affective development) are considered, depending on student interests. Courses in statistics and experiential design.

**NRE 509 Doctoral Seminar in Research Methods**

3 credits. Staff. The seminar concerns the fundamentals of scientific research: theory, research design, methods, and criticism. It is designed for doctoral students who wish to undertake research publishable in scholarly journals. Little or no scientific training in opportunity. Statistics will not be emphasized; however, familiarity with elementary statistical concepts and inference will prove useful. The course will cover: 1) the principles of theory building; 2) the process of various general research designs (laboratory and field experiments, surveys, interviews, participant observation, archival studies, simulations, and formal mathematical models); and 3) the structure of research papers and the review process.

**NRE 510 Ethnography in Organizations**

3 credits. B. Nelsen. This course is a comprehensive introduction to the philosophy and practice of fieldwork in an ethnographic tradition, with particular emphasis on conducting work in organizational settings. The course has four primary objectives: (1) to acquaint students with various philosophies and techniques for doing field research in organizational settings; (2) to provide students with an opportunity to engage in field research; (3) to provide students with an opportunity to develop unique insights into organizational settings, and contribute to the theoretical understanding of social phenomena in their field of study; (4) to provide a climate of social support throughout the student's field experience.
This course will cover topics in corporate finance and empirical asset pricing. The method of instruction is primarily presentations given by the students. The presentation and the final exam each comprise about half the grade.

**NRE 517 Doctoral Seminar in Information, Incentives, Games, and Contracts**

An introduction to game theory and information economics for a broad audience — those who will construct (or just consume) game-theoretic models in applied fields of management (including accounting, finance, marketing, and organizational behavior) and applied fields of economics (including industrial organization, labor economics, macroeconomics, and international economics). The course emphasizes applications at least as much as pure theory: each step in the theory is illustrated by applications from management and economics before the next step in the theory is introduced. The wide variety of applications shows that similar issues arise in different fields and that the same game-theoretic tools can be applied in each setting.

**FACULTY ROSTER**

Ainslie, Andrew, Ph.D., U. of Chicago. Asst. Prof., Marketing
Bailey, Warren B., Ph.D., U. of California at Los Angeles. Assoc. Prof., Finance
Babbes, George, Ph.D., U. of California at Berkeley. Asst. Prof., Marketing
BenDaniel, David J., Ph.D., Massachusetts Inst. of Technology. Don and Margi Berens Professor of Entrepreneurship
Berman, Harold, Jr., Ph.D., U. of Michigan. Nicholas H. Noyes Professor of Finance
Bloomfield, Robert J., Ph.D., U. of Michigan. Assoc. Prof., Accounting
Bradley, James R., Ph.D., Stanford U. Asst. Prof., Production and Operations Management
Conway, Richard W., Ph.D., Stanford U. Emerson Electric Co. Professor of Manufacturing Management. Prof., Information Systems
D'Souza, Julia, Ph.D., Northwestern U. Asst. Prof., Accounting
Dyckman, Thomas R., Ph.D., U. of Michigan. Ann Whitney Olin Professor of Accounting
Elliott, John A., Ph.D., Cornell U. Prof., Accounting, Associate Dean for Academic Affairs

Frank, Robert, Ph.D., U. of California at Berkeley. Goldwin Smith Professor of Economics, Ethics, and Public Policy, Prof., Economics
Greenberg, Donald P., Ph.D., Cornell U. Jacob Gould Schurman Prof., Computer Graphics, Prof., Management Information Systems
Guldhed, Reddy, Ph.D., Columbia U. Asst. Prof., Finance
Hass, Jerome E., Ph.D., Carnegie-Mellon U. Prof., Finance and Business Strategy
Haveman, Heather A., Ph.D., U. of California at Berkeley. Assoc. Prof., Organizational Behavior
Hilton, Ronald W., Ph.D., Ohio State U. Prof., Accounting
Isen, Alice M., Ph.D., Stanford U. S. C. Johnson Prof., Marketing, Prof., Psychology
Jarrow, Robert A., Ph.D., Massachusetts Inst. of Technology. Ronald P. and Susan E. Lyche Professor of Investment Management, Prof., Finance
Kadiyali, Vrinda, Ph.D., Northwestern U. Asst. Prof., Marketing and Economics
Lee, Charles M. C., Ph.D., Cornell U. Prof., Accounting
Li, Haitao, Ph.D., Yale U. Asst. Prof., Finance
Libby, Robert, Ph.D., U. of Illinois.
David A. Thomas Professor of Management, Prof., Accounting
Lind, Robert C., Ph.D., Stanford U. Prof., Economics, Marketing, and Public Policy
Lojo, Maureen P., Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Operations Management
McAdams, Alan K., Ph.D., Stanford U. Assoc. Prof., Managerial Economics
Mclain, John O., Ph.D., Yale U. Prof., Quantitative Analysis
Michaley, Roni, Ph.D., New York U. Assoc. Prof., Finance
Nelsen, Bonilyn, Ph.D., Cornell U. Asst. Prof., Organizational Behavior
Nelson, Mark W., Ph.D., Ohio State U. Assoc. Prof., Accounting, KMGP Peat Marwick Faculty Fellow
O'Connor, Kaitheen, Ph.D., Northwestern U. Asst. Prof., Management and Organizations
O'Hara, Maureen, Ph.D., Northwestern U. Robert W. Purcell Prof., Management, Prof., Finance
Orman, Levent V., Ph.D., Northwestern U. Assoc. Prof., Information Systems
Peterson, Randall S., Ph.D., U. of California at Berkeley. Asst. Prof., Management and Organizations
Rao, Vithala R., Ph.D., U. of Pennsylvania. Deane W. Malott Professor of Management, Prof., Marketing
Robinson, Lawrence W., Ph.D., U. of Chicago. Assoc. Prof., Operations Management
Sally, David F., Ph.D., U. of Chicago. Asst. Prof., Organizational Behavior
Smith, Seymour, Ph.D., U. of Chicago. Nicholas H. Noyes Professor of Economics and Finance
Stayman, Douglas M., Ph.D., U. of California at Berkeley. Assoc. Prof., Marketing
Swaminathan, Bhaskaran, Ph.D., U. of California at Los Angeles. Asst. Prof., Accounting
Tasker, Sarah, Ph.D., MIT. Asst. Prof., Accounting

Thomas, L Joseph, Ph.D., Yale U. Nicholas H. Noyes Professor of Manufacturing, Director, Executive Development Program
Waldman, Michael, Ph.D., U. of Pennsylvania. Prof., Economics
Winink, Dick R., Ph.D., Purdue U. Henrietta Johnson Louis Prof., Management, Prof., Marketing and Quantitative Methods

**Lecturers**

Highfield, Richard A., Ph.D., U. of Chicago. Sr. Lec. Economics, Associate Dean for MBA Programs and Operations
Katz, Jan, Ph.D., Massachusetts Inst. of Technology. Sr. Lec., International Business and Marketing
Matthews, Ronald W., Sr. Lec., Operations Management
Mink, Barbara E., M.A., Cornell U. Sr. Lec., Management Communications
Pike, Alan S., M.A., Cornell U. Sr. Lec., Coordinator, Management Communications
Suvinsksi, Jan H., Sr. Lec. in Operations Management

**Adjunct and Visiting Faculty**

Grossman, Dale A., J.D., American U. Sr. Lec., Tax and Business Law
Schuler, Richard E., Ph.D., Brown U. Prof. Economics, Prof. Civil & Environmental Engineering
Thomas, William, MBA, Harvard. Lec., Management
ADMINISTRATION
Cutberto Garza, director
Carole Bisogni, associate director for academic affairs
Gerald Combs Jr., director of graduate studies, Field of Nutrition

THE DIVISION
Nutritional Sciences draws upon the chemical, biological, and social sciences to understand the complex relationships among human health, nutritional status, food and lifestyle patterns, and social and institutional environments. Understanding these relationships includes the study of the metabolic regulation and function of nutrients, nutrient requirements through the life span, role of diet in reducing risk of chronic disease, nutritional quality of foods, and interventions and policies designed to promote nutritional health of individuals and populations.

The focus of this broad field of study at Cornell is the Division of Nutritional Sciences, which brings together specialists from many disciplines. The faculty are involved in undergraduate and graduate teaching, research, and extension of research-based knowledge throughout New York State, the nation, and the world.

The division is affiliated with both the College of Human Ecology and the College of Agriculture and Life Sciences. An undergraduate program in Nutritional Sciences is offered through the College of Human Ecology, and an undergraduate program, Nutrition, Food, and Agriculture, is offered in the College of Agriculture and Life Sciences. In 1997 a new undergraduate program in Human Biology, Health, and Society was established in the College of Human Ecology. Graduate study is administered through the Field of Nutrition, which includes faculty members throughout the university.

FACILITIES
Most of the faculty members of the division work in Savage Hall, Kinzelberg Hall, and Martha Van Rensselaer Hall. In addition to housing offices, classrooms, and seminar rooms, these buildings contain research facilities, specialized laboratories, a human metabolic research unit, and computer facilities. The division's Learning Resource Center in Martha Van Rensselaer Hall is used by students for individual study and for small group discussions. In addition to printed and audiovisual materials, the Learning Resource Center contains two computers enabling students to have access to specialized software. Savage Hall also has a graduate reading room.

UNDERGRADUATE PROGRAMS
The Division of Nutritional Sciences offers three programs leading to a B.S. degree:

Nutritional Sciences, College of Human Ecology: This program provides students with strong training in chemistry and biology and a strong foundation in the broad field of nutritional sciences. Students can prepare for a variety of career interests including medicine and other health careers, fitness and sports nutrition, nutrition counseling, clinical nutrition, dietetics, nutritional biochemistry, community nutrition, and nutrition education.

Nutrition, Food, and Agriculture, College of Agriculture and Life Sciences: This program is for students who desire strong training in human nutrition in combination with supportive course work in agriculture and the life sciences. Strong preparation in biology, chemistry, and math is required. Students in the Nutrition, Food, and Agriculture program supplement the nutrition curriculum with courses in such areas as food science, animal science, plant science, advanced biology, business and economics, education, and communication. Students can prepare for a variety of career interests through this program.

Human Biology, Health, and Society, College of Human Ecology: Established in 1997, this program is for students who want to acquire a strong foundation in biology and to explore human health issues from the perspectives of both biology and the social sciences. Students complete a rigorous curriculum in the natural sciences and then focus their studies on health issues of their choice through the wide array of courses offered in the College of Human Ecology. Students can explore such topics as gene expression and metabolism related to disease states; biological and social aspects of growth and development; and policies and programs influencing health.

THE CURRICULUM
Undergraduate students in these three programs complete the requirements of their colleges as well as the courses required by the program of their specific interests.

All three undergraduate programs offered by the division require a strong foundation in chemistry and biology, including introductory chemistry and biology, organic chemistry, biochemistry, and physiology. A minimum competency in college algebra is required with additional math and/or statistics required for some programs and career paths. Students in the Human Biology, Health, and Society major also complete a course in physics and two additional courses in advanced biology. All students complete the introductory course, Nutrition and Health: Concepts and Controversies (NS 115). The Nutritional Sciences major and the Nutrition, Food, and Agriculture program require the completion of four other core courses: Nutrition and Health: Concepts and Controversies (NS 115); Social Science Perspectives on Food and Nutrition (NS 245); Nutritional and Physicochemical Aspects of Foods (NS 345); Physiological and Biochemical Bases of Nutrition (NS 331); and Methods in Nutritional Sciences (NS 332). Students in these programs also must select a minimum of nine credits in advanced courses in nutritional sciences.

The Human Biology, Health, and Society major requires a minimum of six credits from courses that integrate biology and the social sciences as they examine health issues. In addition, students must also complete nine credits of advanced electives in courses focused on human biology, health, and society.

Undergraduate students in these three programs have a faculty adviser in the Division of Nutritional Sciences. Regular student-adviser conferences are required at least twice a year. Advisers help students plan their course schedules and can suggest opportunities for individual study or experiences outside the classroom.

For all three undergraduate programs, correct sequencing of biology, chemistry, and/or nutrition courses is very important. Students considering these programs should get detailed information about course requirements from the division's Academic Affairs Office, 309/335 MVR.

CAREER OPTIONS AND COURSE PLANNING
Requirements for the three programs are the minimum set of courses necessary for a bachelor's degree in these fields. Students should supplement the requirements with elective courses and other learning experiences that will prepare them for entry-level jobs or advanced study in their field(s) of interest. A summary of suggested areas from which students can choose electives for different career interests follows.

Medicine and Other Health Careers:
Recommended courses for pre-med students include calculus and two terms of physics. Specific information about medical school admissions requirements can be obtained from the university's Health Careers Office, 203 Barnes Hall. Students interested in other health careers should acquire specific information about the requirements for their interests. Courses of interest may include those related to the biological and social determinants of health, human growth, development, and behavior through the life course; interpersonal communications; advanced biology; sociology; psychology; and ethics.

Dietetics: Students who wish to work in the areas of clinical nutrition, nutrition counseling, sports nutrition, community nutrition, or food and nutrition management should complete
the academic requirements for The American Dietetic Association (ADA). Courses in foods, nutrition and disease, microbiology, management, statistics, and nutritional care are added to the courses required for the nutrition programs. For additional information about meeting ADA requirements see Anne Kendall, 3M5 MVR.

Exercise, Nutrition, and Health Promotion: Students should complete a course in physiology and a course in anatomy after introductory biology. Students can complete those Science Concentration at Ithaca College, which includes courses in kinesiology, exercise physiology, and biomechanics. Students who wish to apply to graduate schools to study physical therapy should complete a year of introductory physics; a course in statistics; a course in ethics; and three courses in psychology. Students should check the specific requirements for schools of interests. For information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office, 3O9 MVR.

Biomedical Research/Nutritional Biochemistry: Recommended electives include calculus, physics, genetics, advanced biology and chemistry, toxicology, and nutritional sciences courses related to the physiology, biochemistry, and metabolism of different nutrients and disease states.

Public Health and Community Nutrition: Recommended electives include courses in communications, education, human development, policy analysis and management, maternal and child nutrition, geriatric nutrition, nutrition and disease, and food economics.

Nutrition, Food, and Business: Recommended electives include courses in management, marketing, economics, communications, hotel administration, and food science.

Nutrition and Agriculture: Recommended electives include courses in food science, animal science, plant sciences, international agriculture, agricultural economics, biological sciences, and rural sociology.

International Nutrition: Recommended electives include courses in language, anthropology, agricultural economics, policy, economics, rural sociology, international agriculture, and nutritional sciences related to maternal and child health and problems of developing nations.

Biology and Behavior: Recommended electives include courses in psychology, human development, and neurobiology.

Food, Nutrition, and Health Policy: Recommended electives include courses in economics, sociology, government, policy analysis, and management.

SPECIAL EXPERIENCES

Undergraduates can enhance their experiences by participating in structured field experiences or study abroad. Academic credit can be earned for field experiences in a community agency, health-care facility, or business. The Urban Semester in the College of Human Ecology provides students an opportunity to study and gain field experience in New York City. All students intending to spend a term off campus in field experience or study abroad must plan their courses well in advance to be sure that all program requirements can be met.

INDEPENDENT STUDY ELECTIVES

Independent study courses (NS 400, 401, 402) can be used to obtain credit for more diverse or intensive experience than the classroom can offer, whether this involves laboratory work, library research, or field study. Any student interested in independent study should obtain the sponsorship of a faculty adviser and the approval of the associate director for academic affairs or consider applying to the honors program.

HONORS PROGRAM

The honors program, leading to a B.S. degree with honors, gives official recognition to students who have demonstrated excellence in their academic work and their capacity for independent study.

In addition to fulfilling the requirements for a major, students in the honors program take courses in designing and evaluating research, complete an original piece of research, and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact Michael Kazarinoff, 230 Savage Hall.

COURSES RECOMMENDED FOR NONMAJORS

Coursess in nutritional sciences can strengthen programs of study in biological sciences, biology and society, communications, food science, human development, human services, and other fields.

NS 115, Nutrition and Health: Concepts and Controversies, is open to all students. After NS 115, nonmajors with limited backgrounds in chemistry and biology may elect NS 247, Food for Contemproary Living; NS 262, Nutrients and Human Biology and Evolution; NS 306, Nutritional Problems of Developing Nations; NS 315, Obesity and the Regulation of Body Weight; NS 347, Human Growth and Development: Biological and Behavioral Interactions; NS 380, Integrating Food Systems and Human Nutrition Needs; NS 450, Public Health Nutrition: NS 457, National and International Food Economics. Nonmajors with strong backgrounds in chemistry and the biological sciences may consider NS 331, Physiological and Biochemical Bases of Human Nutrition, as well as many advanced nutritional sciences courses, such as NS 545 Physicochemical and Nutritional Aspects of Foods, NS 421, Nutrition and Exercise; and NS 441, Nutrition and Disease.

GRADUATE PROGRAMS

Graduate study is administered by the Field of Nutrition, a group of more than fifty faculty members from throughout the university who have a common interest in nutritional problems. In the M.S. and Ph.D. degree programs, students may specialize in animal nutrition, human nutrition, international nutrition, nutritional biochemistry, foods, or general nutrition. Research is emphasized in all graduate programs. Field experience may be a component of concentrations in community, international and public-health nutrition, and nutrition education.

The specialties and interests represented by faculty in the Field of Nutrition provide almost unlimited opportunity for graduate study. Cornell's extensive laboratory and agricultural facilities ensure that students interested in experimental nutritional have a wide range of choice and thorough training. As the largest faculty in the country devoted to the study of human nutrition, the field includes specialists in biochemical, metabolic, epidemiological, and sociocultural research. Opportunities to work with community and federal agencies are available to students interested in applied nutrition and public policy, and students in international nutrition are expected to conduct their theses research abroad.

For more information about the graduate program, interested persons may write for the brochure Graduate Study in Nutrition, available from the Director of Graduate Studies, Field of Nutrition, Cornell University, MVR Hall, Ithaca, New York 14853-4401, telephone (607)255-4410.

COURSES

NS 115 Nutrition and Health: Concepts and Controversies

Nutrition and Health: Issues, Outlooks, and Opportunities

Spring. 1 credit. Corequisite: NS 115. S-U only. Limited to freshmen and transfer students, 10 per section. TBA. D. Levitsky.

This course provides students enrolled in NS 115 individualized assistance in many skills used in NS 115 including using computers to analyze diets, using electronic mail, finding and using scientific references, and reviewing material presented in NS 115 lectures.

NS 120 Nutrition and Health: Issues, Outlooks, and Opportunities

Fall. 3 credits. S-U grades only. Limited to 120 freshmen, sophomores and juniors, others by permission of instructor. W 12:20. C. Bisogni.

A course for students interested in exploring careers in the broad fields of food, nutrition, and health. Experts representing different areas will discuss their work, focusing on current issues and trends as well as the requisite knowledge and skills. This course describes the many disciplines that are drawn upon in the solution of human problems related to food, diet, and health as well as the related intellectual and career opportunities. This is not an introductory nutrition course for nonmajors.
The course will focus on the relationships of toxicity. Paths of neutralization: effects on metabolism and gene expression, cellular outcomes of nutritional stimuli: the cell with the environment. Examples from presentation skills; the application of sensory influences on cuisine.

NS 222 Maternal and Child Nutrition
Spring. 3 credits. Prerequisites: NS 115 and a college biology course or permission of the instructor. S-U grades optional. Limited to 25 students. Preregistration is required in room 309 Martha Van Rensselaer Hall. Course sections limited to 32 students. Preregistration during course pre-registration required in 309 Martha Van Rensselaer Hall. Laboratory course or approval required. Fall. T 1:25-4:25; spring T 1:45-4:25 or R 9:05-12:05. A. Kendall
Emphasizes meal planning for healthy individuals using national nutrition standards; the development of food preparation and presentation skills; the application of sensory evaluation techniques; and nutritional and cultural influences on cuisine.

NS 265 Nutrients and Cells
Spring. 3 credits. Prerequisites: one semester of biology and chemistry. M WF 9:05-12:05. N. Noy
The course will focus on the relationships of the cell with the environment. Examples from three general areas will be considered: 1. Mechanisms of uptake of nutrients by bacterial and mammalian cells. 2. Intracellular outcomes of nutritional stimuli: effects on metabolism and gene expression, toxicity. 3. Pathways of neutralization: detoxification, secretion, DNA repair.

NS 275 Human Biology and Evolution
(also Biological Sciences 275 and Anthropology 275)
Fall. S-U grades optional, with permission of either instructor. Offered alternate years. See BIO SCI 275 for course description.

NS 300 Special Studies for Undergraduates
Fall or spring. Prerequisites: permission of instructor. S-U grades optional. DNS faculty.
Special arrangements to establish equivalency for courses not transferred from a previous major or institution. Students prepare a description of the study they want to undertake on a form available from the College Registrar's Office. The form, signed by both the instructor directing the study and the associate director for academic affairs, is filed at course registration or during the change-of-registration period.

NS 306 Nutritional Problems of Developing Nations
The course is designed for undergraduates interested in the nutritional problems of developing countries. Attention is given to the array of nutrition problems encountered, the causes of hunger and malnutrition, the epidemiology of the major nutritional problems affecting poor nations, the functional consequences of these problems on individuals and societies, and the types of programs that can be implemented to improve health and nutrition.

NS 315 Obesity and the Regulation of Body Weight (also Psychology 613)
This course is a multidisciplinary discussion of the causes, treatment, and prevention of obesity. Topics include the biopsychology of eating behavior, genetics of obesity, role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

NS 320 Introduction to Human Biochemistry
Fall. 4 credits. Prerequisites: one year college biology; one year college general chemistry; and CHEM 257 or 357-358; or permission of the instructor. S-U grades optional. M WF 10:10, sec F 11:15. W. Arion, P. Stover.
The principles of biochemistry are presented within the context of human health and disease. Metabolism of carbohydrates, lipids, proteins and selected micro-nutrients is taught from a perspective that emphasizes their role in supporting the structure and physiological functions of the body, including blood. The concepts of enzyme catalysis, enzyme regulation, hormone action and bioenergetics are incorporated within this framework. The fundamental concepts of eukaryotic DNA replication and gene expression are covered with reference to their importance in regulating metabolism and the impact of a changing nutrient environment.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits. Prerequisites: Biological Sciences 330 or 331 or equivalent. S-U grades optional. Lec M WF 10:10; disc, W or R. M. Sigman, C. McCormick.
This course examines the biochemical and physiological bases of human nutritional requirements. The instructors use an integrated approach to cover the digestion and metabolism of the nutrients (carbohydrates, proteins, lipids, vitamins, and minerals). Metabolic and chronic diseases that are related to nutrition are discussed throughout the semester. The discussion sections provide an opportunity to examine in greater depth selected topics covered in lecture.

NS 332 Methods in Nutritional Sciences
Fall and spring. 3 credits. Each section limited to 18 students. Prerequisites: NS 345, NS 331 preferred or concurrent registration. Laboratory peregistration during course peregistration required in room 309 Martha Van Rensselaer Hall. One evening prelim to be scheduled. Fall. Lec M 12:20, lab M W 12:20-4:00 or M W 6:30-9:00 or T R 10:10-1:10. Spring. Lec M 12:20, labs M W 12:20-4:00 or T R 10:10-1:10 or M W 6:30-9:30. J. T. Brenna, M. N. Kazazinoff.
Laboratory introduction to principles and analytical techniques of nutritional research. Emphasis is on analytical concepts and skills required to determine nutrient function and nutritional status of individuals. Topics include methods of nutrient, metabolite, and enzyme analysis in body fluids, and methods for assessing individual food intake and nutritional status.

NS 341 Human Anatomy and Physiology
Spring. 4 credits. Letter grade only. Prerequisites: college biology; NS 115 recommended. Limit 120. Lec M WF 12:20; lab W or R or F, 9:05-11:00 or 2:30-4:25. J-P. Habicht, W. J. Stimpel, R. M. Stipanuk.
Introduction to human anatomy and physiology with particular emphasis on aspects of relevance to nutrition sciences and medicine. All major organ systems will be covered. Laboratories will emphasize recognition, and description of anatomical structures and testing of physiological function with an emphasis on tests of nutritional and medical relevance.

NS 345 Nutritional and Physicochemical Aspects of Food
Spring. 3 credits. Prerequisites: organic chemistry or biochemistry. S-U grades optional. T R 1:25-2:40. B. Lewis, B. Parker.
A study of the nutritional, physical and chemical properties of foods including composition, food structure, enzymic and nonenzymic phenomena, and processing/preparation aspects. Issues related to food safety, regulation, and food composition data bases will also be discussed.

NS 346 Introduction to Physicochemical Aspects of Food—Lactating Women
Spring. 1 credit. Each section limited to 18 students. Limited to dietetics students in DNS. Prerequisites: NS 345 or concurrent registration: a college course in organic chemistry and permission of instructor during course registration (permission-of-instructor forms must be obtained from and returned to 309 MVR).
Laboratory exercises designed to illustrate principles related to food quality and ingredient functionality, and to introduce students to the analytical methodology associated with food evaluation.

**NS 347 Human Growth and Development: Biological and Behavioral Interactions (also Human Development and Family Studies 347 and Biology and Society 347)**
Spring. 3 credits. Prerequisites: Biological Sciences 101 or 109 or equivalent. Human Development and Family Studies 115 or Psychology 101 or equivalent. Offered alternate years. M W F 1:25. J. Haas, S. Robertson.
This course is concerned with the interrelationships between physical and psychological growth and development in humans, particularly during infancy. Intrinsic and extrinsic causes of variations in growth, including various forms of stimulation, are considered. In addition, the consequences of early growth and its variation for current and subsequent behavioral, psychological, and physical development are examined. The interaction between physical and behavioral or psychological factors is emphasized throughout the course.

**NS 361 Biology of Normal and Abnormal Behavior**
Fall. 3 credits. Prerequisites: Biological Sciences 101–102 and Psychology 101, or permission of the instructor. A fundamental knowledge of biology and psychology is essential. S-U grades optional. Limited to juniors and seniors. M W F 9:05.
B. Sturp.
A critical evaluation of biological factors thought to influence behavior and/or cognitive functioning. Biological, psychological, and societal influences will be integrated. Topics include nutrition and behavior, psychiatric disorders, developmental exposure to environmental toxins and drugs of abuse, and biopsychology of learning, memory, intelligence, and related cognitive disorders.

**NS 378 Food, Nutrition, and Service Management**
Fall. 3 credits. Prerequisites: NS 115, NS 247 or permission of instructor. T R 8:40–9:55. TBA.
The application of management principles and theory to foodservice operations and nutrition services is discussed. The systems concept of organization is used. Emphasis is placed on leadership development, decision making/problem solving related to procurement, production, distribution, and quality assurance in food services. Recipe and menu development projects show the interrelationships of nutrition, labor, equipment, and environmental concerns. Marketing strategies and implementation are discussed.

**NS 380 Integrating Food Systems and Human Nutrition Needs**
Spring. 2 credits. Prerequisites: NS 115 or Food 200 or An Sc. 100. Letter grade only. T R 8:40–9:55. G. Comb.
A student-centered course that employs case studies to address concepts linking human nutrition and health to those involving systems of food production and distribution. Student teams will investigate new and existing technological options within food systems to address domestic or international human nutrition needs.

**NS 398 Honors in Nutritional Sciences**
Fall. 1 credit. Limited to students admitted to honors program. S-U grades only. T 12:20. M. Kuzarainoff.
Research design. Analysis of research papers on selected topics.

**NS 400-401-402-403 Special Studies for Undergraduates**
Fall or spring. Credits to be arranged. S-U grades optional. Division faculty. For advanced independent study by an individual student or for study on an experimental basis with a group of students in a field of nutritional sciences not otherwise provided through course work in the division or elsewhere at the university. Students prepare a description of the study they want to undertake on a form to be signed by the instructor directing the study and the associate director for academic affairs. The form, available from the department office, is filed at course registration or within the change-of-registration period along with an add/drop slip in 145 MVR, College Registrar Office. To ensure review of the student's course of study, registration is required prior to the close of the current registration period along with an add/drop slip in 145 MVR, College Registrar Office. To request review before the close of the course, students should submit the special-studies form to the associate director for academic affairs as early as possible.

**NS 400 Directed Readings**
For study that predominantly involves library research and independent reading.

**NS 401 Empirical Research**
For study that predominantly involves data collection and analysis or laboratory or studio projects.

**NS 402 Supervised Fieldwork**
For study that involves both responsible participation in a community setting and reflection on that experience through discussion, writing, and reading. Academic credit is awarded for this integration of theory and practice.

**NS 403 Teaching Apprenticeship**
For study that includes assisting faculty with instruction.

**NS 421 Nutrition and Exercise**
This course will acquaint students with the interaction between nutrition, exercise, and athletic performance. Topics will cover the biological, psychological, and sociological aspects of nutrition in exercise performance. Students will learn nutritional counseling techniques in educating the recreational and professional athlete, coach, and trainer.

**NS 431 Mineral Nutrition and Chronic Disease**
Fall. 2 credits. Prerequisites: NS 331, AnSci 410, or permission of instructor. S-U grades optional. T R 11:15. C. McCormick.
We will evaluate the evidence that diet plays a role in osteoporosis and hypertension and whether iron status affects the development of heart disease and inflammation. A goal of the course is to review the data upon which recommendations for daily nutrient intakes are currently based. Class discussion of key research articles will be conducted and evaluated.

**NS 441 Nutrition and Disease**
Fall. 4 credits. Prerequisites: NS 331 and a human physiology course. S-U grades optional. M W F 10:10; F 8:00. V. Utermohlen.
Study of the anatomic, physiological, and metabolic abnormalities in acute and chronic illness, and the role of nutritional therapy in their prevention and care. Topics covered include: nutritional assessment, nutritional pharmacology, starvation, infection, trauma, cancer, diabetes mellitus, and renal, cardiovascular, pulmonary, skeletal, neurological, liver, and gastrointestinal disorders.

**NS 442 Implementation of Nutrition Care**
Fall. 3 credits. Prerequisites: NS 247, concurrent registration in NS 441 (or equivalent background in either course). S-U grades optional. Lee M W F 9:05. A. Kendall.
Development of skills necessary to implement nutrition care: nutrition screening, interviewing and counseling, dietary assessment; principles of medical nutrition therapy, menu planning for disease states, quality assurance.

**NS 450 Public Health Nutrition**
Spring. 3 credits. Prerequisites: NS 115, and one course dealing with population-level studies, e.g., NS 245, HDFS 150, PAM 201, PAM 303, RSOC 100, RSOC 200. M W F 11:15. R. Krassn, D. Pelleteri.
Public health nutrition is the major professional career track for nutritionists outside of dietetics. It deals with efforts to improve the diets and nutritional status of whole populations by working at community, state, and national levels. This course helps prepare students to work in public health nutrition by describing methods used in the assessment of nutrition problems, development of nutrition-related policies, and delivery of health, nutrition and food assistance programs.

**NS 451 Epidemiology and Health of Human Communities**
Fall. 3 credits. Prerequisite: one semester of statistics (can be taken concurrently). M W F 1:25. E. Frongillo.
Examines through a series of case studies the role of epidemiological investigation in understanding, assessing, and improving the health and nutrition of human communities and populations. Students will read, discuss, and integrate scientific research and public policy literature on specific topics of current interest. Emphasis is on the conceptualization of epidemiology as an ecological science that studies the interdependence and interaction of humans with their social, cultural, and physical environment. Intended for advanced undergraduates and graduate students with an interest in health, human biology, nutrition, or epidemiology.

**NS 457 National and International Food Economics (also Economics 374)**
Spring. 4 credits. Prerequisites: Econ 101 or CEH 110 and junior standing, or permission of instructor. S-U grades optional. M W F 9:05. E. Thorbecke.
Analysis of the world food economy. Review and analysis of the major economic factors determining the demand for food, the composition of food consumption, and nutritional intake; and the major economic factors affecting food production and supply. Evaluation of effectiveness of various policies and programs in alleviating poverty and malnutrition.
**NS 488 Applied Dietetics in Foodservice Systems**
Spring. 3 credits. Limited to 27 students. Prerequisites: NS 378, Micro 290. Laboratory preregistration during course preregistration is required in room 309. Martha Van Rensselaer Hall. White lab coat is required. Approximately $25.00 will be needed for special supplies/activities. Lec M W F 9:05; labs, M or T or W 1:30-6:00.

TBA. Students will gain experience in facility design, equipment selection, use, and care; job analysis and evaluation; human resources planning; management of financial resources, marketing, financial development, volume food production; computer-assisted management; employee training; available safety and sanitation standards and will develop other skills required to operate/manage a foodservice program. The application of quality management in food service operations and facility management is stressed. Laboratories will be arranged through Cornell Dining.

**NS 490 Honors in Nutritional Sciences**
Spring. 1 credit. Limited to students admitted to the division honors program. Students may register in NS 490 concurrently. M or F 2:30. M. Kazarinoff and Division faculty. Juniors (Mondays). Discussion of research opportunities in nutrition and orientation to research facilities. Delineation of honors research problems in consultation with faculty mentors. Seniors (Fridays). Workshop sessions on honors thesis and oral presentation preparation.

**NS 499 Honors Problem**
Fall and spring. Credits to be arranged. Open only to students in the division honors program. M. Kazarinoff and Division faculty. An independent literature, laboratory, or field investigation. Students should plan to spread the work over two or more semesters.

**NS 600 Special Problems for Graduate Students**
Fall or spring. Credit to be arranged. Limited to graduate students recommended by their chair and approved by the instructor in charge. S-U grades optional.

Emphasis on independent advanced work. Experience in research laboratories in the division may be arranged.

**NS 601 Proteins and Amino Acids (also Animal Science 601)**

**NS 602 Lipids (also Bio Sci 619)**
Fall. 2 credits. T R 11:15. A. Bensadoun. Advanced course on biochemical, metabolic, and endocrinological aspects of lipids, more specifically lipid transport. Topics covered include lipid methodology, structure of plasma lipoproteins, molecular biology and cell biology of apolipoproteins, lipoprotein receptors, lipid transfer factors, lipidic enzymes, and atherosclerosis.

**NS 603 Mineral Nutrition: Metabolic, Health, and Environmental Aspects (also An Sc 603)**
Fall. 2 credits. Letter grade only. Prerequisites: biochemistry, physiology, and nutrition. T 2:20-4:25. Offered alternate years, next offered 1998-99. X. G. Lei, G. F. Combs, Jr. Course emphasizes the metabolic roles and environmental impacts of mineral nutrition in animal, human, and food systems. Team-taught lectures include general biochemical and physiological aspects of mineral metabolism and specific mechanisms of gene expression, regulation and mammal health disorders associated with individual elements. Methodology and faculty of mineral research is also discussed.

**NS 604 The Vitamins (also An Sc 604)**
Fall. 2 credits. T R 10:10. G. Combs. Text-based discussion sessions on nutritional aspects of the vitamins, including recent developments in nutritional and biochemical interrelationships with other nutrients and metabolites.

**NS 607 Nutrition as an Integrating Discipline: Concepts and Paradigms**
Fall. 3 credits. Prerequisite: some prior coursework or experience in nutrition, or permission of instructor. M W F 10:10. M. Kazarinoff, J-P. Habicht, and division faculty.

An overview course for beginning graduate students in nutrition and related disciplines to introduce them to the full breadth of nutritional science disciplines, including quantitative and qualitative sciences. Also suitable for seniors as an integrating course. The course presents concepts and paradigms of molecular biology, biochemistry, clinical nutrition, epidemiology, anthropology, economics, program planning and administration, policy development, and ethics. This semester the course uses Vitamin A as the example. Emphasis will be placed on the integration of factual and conceptual knowledge to solve nutrition problems in human societies.

**NS 611 Molecular Toxicology (also Toxicology 611)**
Spring. 3 credits. Prerequisite: Toxicology 610 and a full-year 400-level course in biochemistry or equivalent. S-U grades optional. TBA. S. Bloom, R. Dietert. A study of fundamental biochemical mechanisms of absorption, transport, metabolism, and excretion of drugs, carcinogens, and toxicants. Emphasis on oxidative and conjugative pathways of metabolism and of environmental and nutritional factors that influence toxicant metabolism and disposition. Methods of evaluating in vivo and in vitro metabolism.

**NS 612 Methods of Assessing Physical Growth in Children**
Spring. 3 credits. Limited to graduate students and students who have permission of the instructor. A previous course in statistics required. S-U grades optional. Lec T 2:25; lab, R 1:25-4:25; disc T 2:15-3:05. J. Haas. A laboratory course to train students in methods and techniques used to assess the physical growth and development of children. The methods explored are those applicable for field, community, and clinical studies and cover anthropometry, body composition, skeletal age, maturity indicators, physical fitness, and energy expenditure.

**NS 614 Topics in Maternal and Child Nutrition**
Fall. 3 credits. Prerequisites: NS 331, and 222 or 347, Biological Sciences 311, and permission of instructor. T R 8:30-9:55. X. Rasmussen. Advanced course on the role of nutrition during pregnancy and lactation. Feeding and growth of infants and children in health and disease is considered. Critical evaluation of current literature is emphasized via lecture, discussion, and a term paper.

**NS 617 Teaching Seminar**
Fall or spring. 0 credit. Limited to division graduate students and students who have permission of the instructor. S-U only. C. Bisogni, D. Way. Individualized instruction focusing on development of teaching skills for guiding classroom learning in lecture, discussion, and laboratory settings. Preparation of content, presentation, and interaction techniques and evaluative methods are emphasized in relation to the student's specific teaching assignment. Videotape simulations provide opportunity for practice and analysis of teaching behaviors.

**NS 618 Teaching Experience**
Fall or spring. 0 credit. Limited to division graduate students and students who have permission of instructor. S-U only. C. Bisogni.

Designed to provide experience in teaching nutritional sciences by direct involvement in college courses under supervision of a faculty member. The aspects of teaching and the degree of involvement vary, depending on the needs of the course and the experience of the student.

**NS 619 Field of Nutrition Seminar (also Animal Science 619)**
Fall or spring. 0 credit. S-U only. M 4:00. Faculty and guest lecturers. Lectures on current research in nutrition.

**NS 620 Food Carbohydrates (also Food Science 620)**
Spring. 2 credits. Prerequisites: Biological Sciences 330 or equivalent. Letter grades only. Offered alternate years. T R 10:10. Not offered 1998-99. J. Brady, B. Lewis. A consideration of the chemistry of carbohydrates, including sugars and complex carbohydrates (starches, pectins, hemicelluloses, gums, cellulose, and glycoconjugates). Emphasis is on intrinsic chemistry, functionality in food systems, and changes occurring during food processing and storage.

**NS 626 Special Topics in Food**
Fall. 2 credits. TBA. B. Lewis. Current research related to basic concepts of foods, nutrition, and health issues.

**NS 631 Dietary Assessment**
Fall. 1 credit. 7 weeks only. Prerequisites: statistics and NS 331 or equivalent. Enrollment limited. R 2:30-5:30. D. Samuels. Study of methods and techniques for assessing dietary intakes at the individual and household levels.
**NS 635** Mechanisms of Metabolic Regulation and Mammalian Gene Expression (also BioBM 635)

Spring. 2 credits. Prerequisites: at least 4 credits of Biochemistry and Chem 358 or 360, or permission of instructor. Offered alternate years. Loc. M W F 9:05. M. N. Kazarinoff, N. Noy, P. Stover.

Molecular mechanisms by which sensory, hormonal, and nutritional inputs cause changes in enzyme activity in order to regulate metabolic transformations. Gene expression, protein modification, and allosteric effects will be emphasized using examples from mammalian systems. Identification and characterization of regulatory steps in metabolism will be considered from both theoretical and practical aspects.

**NS 636** Integration and Coordination of Energy Metabolism (also Biological Sciences 637)

Fall. 3 credits. Prerequisites: Biological Sciences 330 and 331, or equivalent. M W F 9:05. Not offered 1998-99.

The dynamics of energy metabolism in humans and higher animals are developed through characterizations of how the metabolic components support the structure and function of the individual tissues. Mechanisms that control and coordinate energy metabolism within and between organs are analyzed in the context of selected physiological and pathological stresses.

**NS 637** Epidemiology of Nutrition

Spring. 3 credits. Limited to graduate students. Prerequisites: Biometry 601 and concurrent registration in Biometry 602 or NS 641 or equivalent knowledge. Basic knowledge about the nutritional aspects of growth and development and about nutritional biochemistry. TBA. J-P. Habicht.

Course covers principles of nutritional epidemiology, impact assessment of nutrition intervention programs, and nutritional surveillance. Teaching principles of using nutritional information for decision making, including the levels of evidence about nutrition and health for making decisions. The course shows how the biochemistry and physiology of nutrition can be related to epidemiological assessment and research strategies.

**NS 638** Epidemiology of Nutrition Seminar

Spring. 3 credits. Reserved for graduate students planning field intervention studies, by permission of instructor. Prerequisite: NS 537. TBA. J-P. Habicht.

Covers the meta-analysis, design, measurement, and analytic issues involved in developing, implementing, and analyzing studies of field interventions with nutritional impact.

**NS 639** Epidemiology Seminar (also Statistics and Biometry 639)

Spring. 0-1 credit. Limited to graduate students planning field intervention studies, by permission of instructor. Contact P. Cassano 255-7551 for permission and credit information. S-U grades only. M 12:20. P. Cassano.

This course provides skills in the preparation and interpretation of epidemiological data by discussing current research topics and issues.

**NS 640** Social Science Theories in Nutrition

Fall. 3 credits. Limited to 20 graduate students. M W 2:30-3:40. J. Sobal.

Social science theories from sociology, psychology, anthropology, economics, political science, geography, and history that contribute to understanding food and nutrition will be examined. Examples of approaches, concepts, and methods from different disciplines will be discussed to understand how to apply social science theories to nutrition topics, issues, and problems.

**NS 641** Applied Regression Methods

Spring. 3 credits. Prerequisite: BTRY 601 or equivalent. M W F 11:15. E. Frongillo.

Second statistics course intended for graduate students who need to apply regression methodology in nutrition, health, epidemiology, human services, human development, program intervention, or related fields. The course covers the conceptual and statistical aspects of regression models for continuous, discrete, and time-to-event response variables with multiple covariates. Interpretation of parameters, confounding and interaction, and assessing fit are emphasized. An introduction to modeling complex observational data with multiple response variables is presented.

**NS 644** Community Nutrition Seminar

This seminar sponsored by the Cornell Community Nutrition Program focuses on research presentations in nutrition education and other areas of community nutrition. Cornell faculty and graduate students and outside invited speakers present research proposals, results from ongoing research, theoretical bases for research, program evaluations, and discuss current programs and issues in nutrition community. The format varies but always includes discussion by participants.

**NS 645** Nutrition Intervention in Communities: A Global Perspective

Spring. 3 credits. Limited to 25 graduate students with an interest in human nutrition and health and exceptional senior nutrition majors by permission. Prerequisite: NS 640. M W 12:25-2:40. C. Olson.

The goal of the course is to help students gain tools and develop conceptual frameworks for thinking critically about nutrition interventions in communities around the world. The course involves extensive reading, active involvement in class discussions and fieldwork.

**NS 646** Seminar in Physicochemical Aspects of Food

An introduction to physicochemical aspects of food, for graduate students who have had limited or no work in this area. The seminar uses the lectures of NS 545 as a basis for supplementary readings and review of research on selected topics.

**NS 660** Special Topics in Nutrition

Fall or spring. 3 credits maximum each term. Registration by permission of the instructor. Division faculty.

Designed for students who want to become informed in any specific topic related directly or indirectly to nutrition. The course may include individual tutorial study, experience in research laboratories, a lecture series on a special topic selected by a professor or a group of students, and/or selected lectures of another course already offered. Topics may be changed so that the course may be repeated for credit.

**NS 680** International Nutrition Problems, Policy and Programs

Fall. 3 credits. Prerequisite: permission of instructor. T R 11:15-12:30. M. Latham.

Designed for graduate students who want to learn about the important nutritional problems of developing countries. The major forms of malnutrition related to poverty and their underlying causes are discussed. Emphasis is placed on programs and policies that can assist poor countries and communities to improve their nutritional and health status.

**NS 681** Nutritional and Public Health Importance of Human Parasitic Infections

Fall. 2 credits. Prerequisites: graduate student status or permission of instructor. S-U grades optional. M 2:30-4:15. L. Stephenson.

Reviews the scientific evidence for relationships between human nutritional status and common human parasitic infections. Concentrates on malnutrition (protein-energy malnutrition, anemia) in developing countries. Parasitic infections emphasized are malaria, hookworm, ascars, schistosomiasis, and trichuriasis. Format is lecture-discussion.

**NS 682** Field Studies in International Community Nutrition

Fall. 1 credit. Graduate student status or permission of instructor required. Strongly recommended for graduate students doing field research. S-U grades only. Mainly audio-tutorial format. Available as independent study most semesters. TBA. L. Stephenson.

Reviews practical considerations in conducting field research in developing countries, including (1) seeking fundings, (2) experimental design issues, (3) choice of procedures, and (4) planning for and carrying out data collection. Also includes how to a) construct a C.V., b) write an abstract and prepare a clear 10-minute talk with legible slides (FASEB formation), and c) when, where, and how to publish research results. Extensive handouts. Lecture/demonstration/discussion.

**NS 685** Food and Nutrition Policy (also Agricultural Economics 685)

Spring. 3 credits. Prerequisite: introductory microeconomics, intermediate statistics (through multiple regression), or instructor's permission. M W 2:55-4:10. D. Sahn.

This course examines the role of government policy in alleviating poverty, food insecurity, and malnutrition in developing countries. Topics covered include methodologies for economic policy analysis of time use and food acquisition behavior, the "production" of nutritional outcomes, and the role of price policy and markets. Course readings draw largely on examples from Africa and Asia.
This option is designed for graduate students. Prerequisite: Chemistry 208 or 300, or Chemistry 208 and Physics 102 and Mathematics 112, or permission of instructor. S-U grades optional. Offered alternate years. T R 10:10. Not offered 1998-99. J. T. Brenna. See CHEM 628 for course description.

**NS 599 International Nutrition Seminar**
Fall and spring. No credit. No grades given. R 12:20-1:10. J. Haas, J-P. Habicht. This seminar series consists of presentations by Cornell faculty and graduate students, and by outside invited speakers. Speakers cover a range of topics which relate to nutritional problems, policy, and programs in the nonindustrialized countries.

**NS 699 Special Topics in International Nutrition**
Fall and spring. 3 credits maximum each term. Registration by permission of instructor. Faculty in Program in International Nutrition. This option is designed for graduate students, mainly those with a concentration in international nutrition, who wish to become familiar with some specific topic related to international nutrition that is not adequately covered in an existing course. It consists usually of tutorial study on an agreed topic. Because the topics change, the course may be repeated for credit.

**NS 700 Current Topics in Toxicology (also Toxicology 698)**
Fall or spring. 1-3 credits. S-U grades optional. TBA. Staff. A discussion of the most current developments in various areas of toxicological research and testing. Faculty and students will participate jointly in evaluating research findings and provide seminars and discussion of such material. For information regarding topic, instructor, and credit, contact the office of the Graduate Field of Environmental Toxicology.

**NS 702 Seminar in Toxicology (also Toxicology 702)**
Fall or spring. 1 credit. S-U grades only. F 12:20. Staff. The seminar program covers varied topics in biochemical, genetic, nutritional, veterinary, and regulatory toxicology, ecotoxicology, and environmental chemistry. Included are presentations of basic research studies, fundamental concepts, and research activities involving environmental problems of a toxicological nature. Presentations are given by speakers from Cornell and visitors.

**NS 703 Seminar in Nutritional Sciences**
Fall and spring. 1 credit. S-U grades only. T 12:20 or W 12:20. Division faculty. Presentations of original articles pertinent to the Nutritional Sciences. Students will learn how to make professional presentations and how to critique the presentations by others. In addition, students will learn how to read and interpret original articles published in a wide variety of journals.

**NS 707 Nutrition as an Integrating Discipline: Evaluation, Criticism, Application**
Fall. 3 credits. Prerequisites: advanced graduate standing and permission of the instructor. 2-hour class period per week plus discussion and workshop. M 1:25-3:20. Not offered 1998-99. M. Kazaninoff, K. Rasmussen. The goal of this course is to provide an integrative capstone learning experience for advanced graduate students with majors or minors in nutrition. Groups of students will focus on a series of special problems in nutrition drawn from those currently faced by nutrition professionals. Special problems may involve assuming the role of consultants, expert committee members or peer-reviewers who are charged with answering questions or formulating recommendations related to research, programs, or policies.

**NS 899 Master’s Thesis and Research**
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

**NS 999 Doctoral Thesis and Research**
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

- Thorbecke, Erik, Ph.D., U. of California. Prof.
- H. E. Babcock Professor of Economics and Food Economics.
- Utermohlen, Virginia, M.D., Columbia U. Assoc. Prof., Nutritional Sciences/Biochemistry, Molecular and Cell Biology.
Military instruction began at Cornell University in 1862 under the provisions of the Morrill Act of 1862. Since that time, officer education has been highlighted by the construction of Barton Hall in 1914. In 1868 and the establishment of a formal Reserve Officers Training Corps (ROTC) unit in 1917. The program continues to evolve with latest changes while placing an emphasis on the development of leadership and managerial skills. Throughout the years, Cornell's program of officer education has produced many outstanding civilian and military leaders. The programs of officer education allow the student to prepare for a commission as an officer in either the United States Army, Navy, Air Force, or Marine Corps. Each service program is headed by a senior military officer who also serves as a full professor on the Cornell faculty.

MILITARY SCIENCE

Lieutenant Colonel John M. Keefe, Engineer, United States Army, Professor of Military Science and Commanding Officer, U.S. Army ROTC Instructor Group

Captain Mark Coomes, Infantry, United States Army

Captain Karen Ward, Engineer, United States Army

United States Army ROTC Program

The primary objective of the Army Officer Education Program at Cornell is to commission the future officer leadership of the United States Army. Intermediate objectives are to provide students with an understanding of the fundamentals of responsibility, integrity, and self-discipline, as well as an appreciation of the citizen's role in national defense. The application of the decision-making process to a variety of situations is given major emphasis as a valuable aid in developing leadership potential.

These objectives are achieved through a program normally covering four years. A two-year program is available for those who qualify. The program includes specific courses in military science, more general academic subjects that assure a well-rounded education, practical training in leadership through participation in the Cadet Corps (including attendance at one five-week summer camp at an Army installation), and the opportunity to participate in a number of extracurricular activities. The combination prepares the student for commissioning and effective performance in the many branches of the Army. The student's academic major, military science classes and leadership laboratories for the purpose of commissioning assessments into the United States Army.

Requirements for Enrolling

Applicants must be citizens of the United States prior to being commissioned as lieutenants. (Noncitizens may enroll in selected portions of the program.) Students must meet the admission requirements. Overall sound mental and physical condition is essential, and students are required to undergo periodic physical fitness tests. Enrollment and continuation in the program is subject to the approval of the Professor of Military Science.

Enrollment in specific courses by students not formally enrolled in the program must be approved by course instructors. Contracted students must register for letter-graded military science classes and leadership laboratories for the purpose of commissioning assessments into the United States Army.

Four-Year Program

The Four-Year Program is open to students in their freshman year or, with the approval of military and university authorities, to sophomores in a five-year degree program. Veterans of the Armed Forces of the United States and students entering Cornell with AROTC credit from secondary or military schools (Junior Division AROTC) may receive advanced standing.

Under the Four-Year Program students enroll in the Basic Course (Mil S I and II) during the first two years, and the Advanced Course (Mil S III and IV) during the next two years. A total of twelve credits of military subjects is taken. In addition, academic-enrichment courses are required in such fields as written communications, computer science, and military history. All cadets attend a five-week camp, with pay, between the junior and senior years. All cadets participate in physical fitness training three days per week. Each year cadets are sent to the Army's Airborne School, Winter Survival School, and Air Assault Course, dependent upon the number of slots available and student standings within the ROTC program.

Basic Course (Mil S I and Mil S II)

Students in the first year of the Basic Course take one classroom course in military science in the fall and spring semesters, for which they receive academic credit depending upon their college. These courses include study of the U.S. organization for defense and principles and techniques of leadership and management.

Students also participate in leadership modules that include rappelling, orienteering, drill and ceremony, physical training, winter survival, rifle marksmanship, historical site visits, land navigation, interpersonal communication, and individual tactical training. These modules are designed to promote personal development and enrichment. While they do not receive academic credit for these activities, students may receive physical education credit. Typical freshman participation in Army officer education is 48 1/2 program-related hours.

During the fall of the second year, students take a two-credit course in American military history. The course will consist of instruction in three primary areas. The first section will develop the concept of the art and theory of modern warfare. It will analyze America's first attempt at war, the American Revolution, and end with the development of modern warfare under Napoleon Bonaparte. The second section will focus on America at war in the nineteenth century. Section three focuses on warfare in the twentieth century and concludes with the prospects of future actions for the military.

During the spring of the second year, students take a one-credit course in map reading and spend approximately two hours a week in practical leadership training, land navigation, and military skills. In the spring, students take a one-credit course in the basic principles of small organizations.

Advanced Course (Mil S III and Mil S IV)

The Advanced Course of the Four-Year Program is open to students who have successfully completed the Basic Course and are accepted by the Professor of Military Science for further enrollment. It is also open to students who have gained appropriate advanced standing through either successful completion of Basic Camp, a six-week summer training camp, or prior military training. Students entering the Advanced Course must have the equivalent of four academic semesters remaining at Cornell or another degree-granting institution. Students must pass required physical and aptitude tests. In addition, the past desire and the desire of each student is evaluated to determine potential for eventual commissioning.

When students are accepted for the Advanced Course or accept a scholarship, they execute a written contract with the U.S. government. Under terms of the contract, they agree to complete the Advanced Course and to accept a commission if tendered. Concurrently with the signing of the contract, students enlist in the United States Army Reserve for control purposes.

Classroom study in the Advanced Course includes one military science course each semester on such subjects as leadership and management, small-unit tactics, and command and staff organization and functions. The two hours a week of practical leadership training continues, and between the junior and senior years all cadets attend a five-week advanced summer camp conducted at a major Army installation.

Scholarships

Scholarships are awarded on the basis of merit and are available for two, three, or four years. AROTC scholarships are awarded each year to outstanding Basic Camp participants and students in the freshman and sophomore classes. Scholarships pay up to $16,000 toward tuition and mandatory fees. Scholar-
ship cadets and Advanced Course cadets also receive $150 a month for up to ten months a year. Scholarship cadets receive $450 per year to defray the cost of books.

**Commissioning**

All students who successfully complete the Advanced Course, including the advanced summer camp, are commissioned as second lieutenants in the United States Army Reserve or Regular Army upon graduation.

**Service Obligations**

ROTC graduates may serve on Active Duty, in the Army Reserve, or in the National Guard, depending upon the needs of the Army and the leadership abilities of the cadet.

Officers beginning active duty attend the Officer Basic Course (normally ten to sixteen weeks) of their assigned branch. Upon completion of the Officer Basic Course, they are released to reserve status. Some officers selected for reserve duty attend the Officer Advanced Course after graduation. ROTC graduates generally serve four years on active duty and four years in reserve status; however, some may serve eight years on reserve duty.

**Choice of Branch**

Cadets in the second year of the Advanced Course (normally the senior year) may specify the branch of the Army—such as Infantry, Armor, Field Artillery, Air Defense Artillery, Aviation, Corps of Engineers, Signal Corps, Military Police, Military Intelligence—in which they prefer to serve. They are notified in the spring, before commissioning, of the branch to which they are assigned. The likelihood of appointment in a chosen branch depends upon the student's academic and officer education performance, degree area, and the needs of the Army at that time.

**Graduate Study**

Active duty deferments, or educational delays, may be granted to individuals who want to attend graduate school at their own expense. Requests will be considered on the basis of needs of the service. Admission to graduate school is the student's responsibility.

**Benefits**

Each cadet in the Advanced Course (Mil S III and Mil S IV) receives $150 a month for up to ten months a year. While attending the advanced summer camp (between the junior and senior years), each cadet receives approximately $700 and an allowance for travel to and from camp. A cadet in the Two-Year Program receives the same payments as cadets in the Advanced Course and, in addition, receives approximately $700 and travel costs for summer Basic Camp attendance before entering the Advanced Course.

**Military Science Courses**

All cadets take one course and a leadership laboratory each semester in military science. The number of hours a week spent in the classroom varies from semester to semester, as does the credit received for each course.

**Freshman Year (Mil S I)**

**Mil S 101 United States Organization for Defense**

Fall. 1 credit. Required. Staff. Students examine the U.S. defense structure in terms of organization, mission, personnel, and relationships among military forces and between the military forces and branches and departments of the government. The U.S. Army force structure is examined at all levels. The complexities and magnitude of operating the defense organization are studied to provide a framework for subsequent instruction. Students develop skills in conducting oral and written presentations.

**Mil S 102 Leadership Theory**

Spring. 1 credit. Required. Staff. This course allows students to develop a basic understanding and appreciation of theories of social and organizational psychology and behavior as they apply to the military setting. Attention is given to leader types, the source and exercise of authority, and the impact of varying styles of leadership, resource management, motivation, and organization effectiveness. The student is introduced to the concepts of integrity, ethics, and professionalism. Classes on historical events and strategy will be presented.

**Sophomore Year (Mil S II)**

**Mil S 222 Small Organizational Operations/Land Navigation**

Spring. 1 credit. Required. Prerequisite: Mil S 102 or instructor approval. Staff. Students learn the basic principles of group dynamics at the level of the smallest military unit, the squad. Troop-leading procedures are introduced through case studies and role-playing exercises. Leadership theories introduced in Mil S 102 are examined in a variety of realistic settings. The practical application of behavioral theories is explored in the context of small military organizations. The course will also provide practical knowledge of the various forms of topographic representation. Students will use maps in terrain association and land navigation. Knowledge of topography is complemented by an orientation on significant environmental factors, physical, social, and climatic factors. Portions of the course offer experience in land navigation and orienteering.

**Mil S 321 Armed Conflict in Society**

Fall. 2 credits. Required. Staff. This course provides practical knowledge in American military History. It is primarily an overview course designed to provide an understanding of the art and nature of warfare and particularly how warfare has affected the United States. The course consists of three primary areas of instruction with an emphasis on American military history. The first area of instruction develops the concept of the art and theory of modern warfare. It analyzes America's first attempt at war, the American Revolution, and continues into the development of modern warfare under Napoleon Bonaparte. The second phase focuses on America at war in the nineteenth century. It places particular emphasis on the American Civil War and the strategy of annihilation versus the strategy of attrition. The final phase looks at warfare in the twentieth century and finishes with an analysis of the future of warfare for the military of the United States.

**Junior Year (Mil S III)**

**Mil S 331 Theory and Dynamics of the Military Team**

Fall. 2 credits. Required. Staff. After an initial introduction to techniques of presenting briefings, students are provided with a broad understanding of the principles and application of teamwork in military organizations. Particular emphasis is given to leadership responsibilities of the commander as the team coordinator. Additionally, students have an opportunity to develop an understanding of the roles and contributions of the various branches of the Army in support of the military team.

**Mil S 332 Leadership in Small-Unit Operations**

Spring. 2 credits. Required. Prerequisite: Mil S 331. Staff. This course provides an understanding of the nature of decision making and the tactical application of the military team. Through the use of conferences and extensive practical exercises, students develop familiarity with the factors influencing a leader's decisions and the process of planning, coordinating, and directing the operations of military units through operation plans and orders.

**Senior Year (Mil S IV)**

**Mil S 441 Contemporary Military Environment I**

Fall. 2 credits. Required. An overview of the functions, responsibilities, and interrelationships among small-unit leaders, the commander, and the staff. Detailed discussions focus on actions of small-unit leaders, communication skills, army operations, the logistical support of the army in the field, and the army training system.

**Mil S 442 Contemporary Military Environment II**

Spring. 2 credits. Required. A continuation of Mil S 441. Conferences and seminars examine the techniques of effective military leadership with special attention given to professionalism and ethical considerations in the armed forces during peacetime and armed conflict.

**Practical Leadership Training**

All Army Officer-Education Students

As with many laboratory periods, no credit is given, and participation is required for successful completion of the AROTC program. Students may receive physical education credit for the laboratory. Each semester, cadets register for the appropriate leadership laboratory, consisting of physical fitness training three times per week, two hours of military training each week, and one or two weekend training exercises per semester.

**Mil S I Leadership Laboratory I**

Fall. Spring. 0 credits. S/U. 0 credits. S/U. Mil S 151 Mil S 152

**Mil S I cadets meet for two hours each week to learn a variety of military skills including rappelling, first aid, drill and ceremonies, and weapons familiarization.**

**Mil S II Leadership Laboratory II**

Fall. Spring. 0 credits. S/U. 0 credits. S/U. Mil S 251 Mil S 252

Cadets meet for two hours each week as members of the cadet organization to.
participate in practical leadership exercises. Types of practical activities include rifle marksmanship, orienteering, drill and ceremonies, signal communications, physical fitness training, first aid, tactics and field exercises.

Mil S III Leadership Laboratory III
Fall. 0 credits. Spring. 0 credits. Required. S/U. Required. S/U.
Mil S 351 Mil S 352
Cadets meet for two hours a week and some weekends to prepare for a five-week summer camp that follows the junior year. Emphasis is on the development of individual skills in leadership techniques and practical skills. Cadets rotate through leadership positions to develop an ability to apply decision-making processes to a myriad of situations. Cadets also acquire technical expertise and proficiency in signal communications, physical fitness, drill and ceremonies, rappelling, orienteering, tactics, water survival, and other military skills.

Mil S IV Leadership Laboratory IV
Fall. 0 credits. Spring. 0 credits. S/U. Required. Required. S/U.
Mil S 451 Mil S 452
Senior cadets plan and operate the leadership laboratory programs for Mil S-III cadets. The development of planning and supervisory skills is emphasized. Cadets have an opportunity to practice leadership skills developed during previous ROTC training and summer camp experiences. Includes two to three hours a week devoted to physical fitness.

Mil S V Leadership Laboratory V
Fall. 0 credits. Spring. 0 credits. S/U. Required. Required. S/U.
Mil S 551 Mil S 552
A continuation of Leadership Lab IV expressly for those cadets who need additional leadership skill development as determined by the Professor of Military Science. Enrollment is by instructor approval only.

Professional Military Education (PME) Requirements
In addition to the ROTC classes and leadership laboratories above, a number of courses are required as part of the contracted student's academic program. These courses are offered by the university and round out the student's professional education. The PME component of the ROTC program requires at least one college course in each of the following areas: communication skills, military history, and an introduction to computers. These courses must be completed prior to graduation and commissioning. Courses that meet these requirements are approved by the Professor of Military Science.

NAVAL SCIENCE
Captain V. Lynch, United States Navy, Professor of Naval Science and Commanding Officer, Naval ROTC Unit
Lieutenant Colonel J. Mills, United States Marine Corps
Major R. Stickel, United States Marine Corps
Lieutenant S. Young, United States Navy
Lieutenant M. Vannoy, United States Navy

The objective of the Naval Officer Education Program is to prepare selected students for service as commissioned officers in the United States Navy or United States Marine Corps by supplementing their undergraduate education with instruction in essential concepts of naval science and training in military skills that demonstrate the qualities of leadership, integrity, and dedication to their country and the naval services. The program is compatible with most undergraduate major fields of study, including five-year baccalaureate degree programs on a case-by-case basis.

The objective is achieved through a broad program, normally covering four years, that combines specific courses in naval science and specified academic subjects to supplement weekly professional development sessions in which the practical aspects of naval science and leadership procedures are stressed. It also includes at least one summer-at-sea period.

Non-naval officer education students: Though the Navy–Marine Corps program has been designed to be a continuation of participating in the college's leadership programs, the Naval science courses are open to all students at Cornell as space limitations allow.

Requirements for Enrollment
An applicant for the Naval ROTC program at Cornell must be a citizen of the United States. Applicants must have reached their twentieth birthday by June 30 of the entering year and be less than twenty-seven years of age on June 30 of the calendar year in which they are commissioned. Waivers of the upper age limit may be available for applicants who have prior active duty military service. Applicants must also meet physical and medical requirements. Interested students can visit the Naval ROTC Unit in Barton Hall or contact their local recruiter.

Programs
There are two programs: the Scholarship Program and the College Program. They differ primarily in benefits to the student.

Scholarship Program
The Scholarship Program provides approximately one thousand scholarships in more than sixty universities nationwide to selected students who want to serve in the Navy or Marine Corps. Financial support is provided students during college preceding the award of the baccalaureate degree.

Benefits
The program offers scholarships that provide full tuition and are not need-based. While on scholarship, students also receive money for instructional fees, textbooks, nonconsumable supplies, and a $150-a-month stipend for a maximum of forty months.

Successful completion of the Scholarship Program leads to a commission in the Navy or Marine Corps Reserve. At Cornell University over 90 percent of NROTC students have a scholarship. Students entering NROTC without a prior scholarship award are entitled to compete for two- or three-year scholarships controlled by the Chief of Naval Education and Training.

Entering the Scholarship Program
There are three ways to enter the Scholarship Program:

First, by applying for the national competition each year. This process entails filling out and submitting an appropriate application, being interviewed, having a physical examination, and applying to, and being accepted by, one of the colleges or universities throughout the country that offers an NROTC program.

Second, by enrolling in the College Program at Cornell and being recommended by the Professor of Naval Science for a scholarship after at least one semester in the program.

Third, by entering through the Two-Year Scholarship Program.

College Program
There are two College Programs available. Both lead to a commission in the Navy or Marine Corps Reserve.

Each of these programs provides textbooks for naval science courses, uniforms, and a subsistence allowance of $150 a month from the beginning of the junior year.

The regular College Program is four years long. Academic requirements for students in this program are somewhat less than those for scholarship students, as specified in the curriculum section of this booklet.

The Two-Year College Program begins the summer before the junior year, when students attend a required program with pay at the Naval Science Institute in Newport, R.I.

Summer Training
Each summer, students in the Scholarship Program spend approximately four to six weeks on a Navy ship or with a naval activity anywhere in the world for on-the-job training. College Program students attend one summer training session of the same duration between the junior and senior years.

Active Duty Requirements
Scholarship midshipmen commissioned in the Navy or Marine Corps Reserve serve on active duty for a minimum of four years. College program midshipmen commissioned in the Naval or Marine Corps Reserve serve a minimum of three years. Specialized training such as aviation or nuclear power following commissioning adds additional active duty requirements in some cases.

Choice of Assignment
Graduates have an opportunity to request the duty they prefer upon graduation. These requests are given careful consideration, and every effort is made to assign the newly commissioned officer the duty of choice. Among the assignments available are duty on submarines, in naval aviation as either a pilot or naval flight officer, and on surface ships. Other specialties, such as medical service corps, may be available on a limited basis.

Marine Corps Options
The United States Marine Corps is an integral part of the Naval Services and is commanded by the Commandant of the Marine Corps. One-sixth of the NROTC scholarship students may be Marine selectees who will be designated Marine-option midshipmen. Upon successful completion of the program they will be appointed second lieutenants in the United States Marine Corps Reserve.
Marine-option midshipmen follow the same program as other NROTC midshipmen for the first two years. Beginning with the junior year, Marine-option midshipmen are taught Marine oriented courses by a Marine Officer Instructor. For the first summer training (after the junior year), Marine-option students travel to Quantico, Virginia, where they undergo six weeks of intensive training known as the USMC Officer Candidate School. Upon commissioning in the following year as second lieutenants, they are assigned to the Basic School at Quantico, Virginia. After the Basic School, the Marine officer is assigned duty in a variety of occupational fields. Among the duties available are Infantry, Aviation, Artillery, Tracked Vehicles, Engineers, Communications, Electronics, Supply, Administration, and Computer Science. The officer may serve on board naval vessels or at shore installations of the Marine Corps or Navy, in this country or overseas.

The Marine Corps has a postgraduate training system similar in objectives and organization to that of the Navy. Marine officers selected for aviation receive flight training at the Naval Aviation Base, Pensacola, Florida, along with their Navy counterparts.

**Curriculum**

A student has three categories of requirements to fulfill as a midshipman. The first of these requirements is a weekly naval professional development session each semester. The second requirement is a naval science course each semester. The last set of requirements consists of other required courses prescribed by the Navy to meet the growing need for more and better technically educated junior officers.

**Naval Professional Laboratories**

*Nav S 141-142, 241-242, 341-342, or 441-442*

All students in the program participate in one ninety-minute professional development session each week. The session is held from 2:30 until 4:00 on Wednesday afternoon. This period consists of both drill and professional information briefings. Students gain experience in actual leadership situations and at the same time learn the fundamentals of seamanship, military formations, movements, commands, discipline, courtesies, and honors.

During information briefings special emphasis is given to applied leadership as it relates to the administrative and managerial aspects of a Navy or Marine Corps officer's duties.

**Naval Science Courses**

All Navy and Marine midshipmen take one naval science course each semester during their freshman and sophomore years. Navy-option students continue to take a naval science course each semester during their junior and senior years. Marine-option students have slightly different curriculum requirements for their junior and senior years.

**Freshman Year (Navy and Marines)**

*Nav S 101 Fundamentals of Naval Science*

Fall. No credit.

A study of fundamental aspects of naval science, including its contributions to sea power, factors and different warfare communities involved in the physical development of naval forces, resources that must be managed, and prospects for the future. Naval uniforms, customs, and traditions are covered.

*Nav S 102 Sea Power and Maritime Affairs*

Spring. 3 credits.

Discussions examine the history of the Navy as a force in diplomacy and an instrument of U.S. foreign policy. Relationships between Congress and the military for determining the national defense policy are also explored. An integrated examination of current events and issues gives a historical perspective throughout the course.

*Nav S 157 Principles of Sailing*

Fall and spring. Physical education credit. Instruction in basic sailing skills and safety principles. Students sail small boats on Cuyuga Lake. Focus is on U.S. Navy Class B inshore skipper certifications.

**Sophomore Year (Navy and Marines)**

*Nav S 201 Organizational Behavior and Small Group Processes*

Fall. 3 credits.

The theme of the course is the "evolving role of the manager, organizational decision maker, and leader." The course will begin by briefly studying the theoretical principles of management and will progress through practical skills of managers and leaders. Lectures, reading assignments, films, and discussions should provide students with an excellent opportunity to wrestle with complex managerial and leadership issues. The goal of this course is for students to begin to develop a sound personal leadership philosophy that will enable them to more effectively accomplish assigned responsibilities leading men and women in today's demanding and increasing "hi-tech" naval environment.

*Nav S 202 Naval Ship Systems I (also Mechanical and Aerospace Engineering 101)*

Spring. 3 credits.

An introduction to primary ship systems and their interrelationship. Basic principles of thermodynamics, propulsion, mechanical operation, internal communications, electronics, ship structure, and other marine systems.

**Junior Year (Navy)**

*Nav S 301 Principles of Navigation (also Agricultural Engineering 305)*

Fall. 4 credits.

An introduction to the fundamentals of marine navigation emphasizing piloting and celestial navigation procedures. The course covers coordinate systems, chart projections, navigational aids, instruments, compass observations, time, star identification, use of the nautical almanac, tides and currents. Electronic navigation systems are discussed.

*Nav S 302 Naval Operations*

Spring. 3 credits.

The course covers the application of the nautical rules of the road and maneuvering board in order to avoid collisions at sea. Other aspects of naval ship operations that are introduced include visual and electronic communications methods, tactical disposition of forces, ship handling theory, and deck seamanship topics.

**Senior Year (Navy)**

*Nav S 401 Naval Ships Systems II (Weapons)*

Fall. 3 credits.

The principles and theories used in the development of naval weapons systems are examined. Initially, extensive study is made of detection systems, especially radar and sonar, followed by discussions of ancillary systems for computing, stabilizing, tracking, and weapons control and delivery.

*Nav S 402 Leadership and Ethics*

Spring. 3 credits.

A variety of topics important to the naval officer for both professional and managerial development are reviewed. The material is tailored for the midshipman to provide an understanding and appreciation of leadership and ethics in preparation for assignments in the naval service. Through the use of lectures, case studies, and role playing, the student will learn various aspects of Navy leadership and ethical decision-making. Marine-option students also take this course.

**Junior or Senior Year (Marine Options)**

*Nav S 310 Evolution of War*

Fall. 3 credits.

A study of warfare that examines the relationship of military strategy to geography, economics, sociology, technology, and national political realities and values; the evolution of warfare, including principles of war, weapons, and associated equipment; and the effects of nuclear weapons and guerrilla warfare on traditional concepts of national strategy.

*Nav S 410 History of Amphibious Warfare*

Spring. 3 credits.

The history of the development, theory, techniques, and conduct of amphibious operations from 490 B.C. to the present. Special emphasis will be on amphibious operations conducted in the central Pacific during World War II and the future of amphibious operations.

**Other Required Courses**

**Navy Option Scholarship Program**

To be eligible for a commission in the United States Navy, midshipmen must successfully complete all the requirements for a baccalaureate degree in any field of study offered by Cornell University and complete courses in the following subjects (specified courses to be approved by the Professor of Naval Science): American military affairs or national security policy (one semester) English (one year) calculus (one year) calculus-based physics (one year) computer science (one semester)

The calculus requirement must be satisfied by the end of the sophomore year and the physics requirement by the end of the junior year.

Although free choice of academic majors is permitted, students are encouraged to pursue majors in engineering and the physical sciences to meet the technological requirements of the modern Navy.
Navy Option College Program

Navy-option College Program students must complete one year of college-level study in mathematics, physical science, and English as a prerequisite for commissioning. The mathematics course must be completed by the end of the junior year; the physical science course by the end of the senior year. In addition, one term of computer science is required. College Program students who desire entry into the Navy-option Scholarship Program should fulfill all of the requirements applicable to Navy-option scholarship students to be eligible and competitive for a scholarship controlled by the Chief of Naval Education and Training.

Marine Option

Any midshipman, in either the Scholarship Program or the College Program, who completes all of Cornell University’s degree requirements in any academic major is eligible for a commission in the U.S. Marine Corps or U.S. Marine Corps Reserve. Marine-option students take the same naval science courses and naval professional laboratories as Navy-option students for the freshman and sophomore years. During the junior and senior years, Marine-option students have slightly different naval science course requirements than their Navy-option students counterparts. Two semesters of courses (a minimum of 3 hours each) in the subject area of American Military Affairs or National Security Policy are required. One semester of a modern foreign language must be completed.

Extracurricular Activities

The NROTC midshipman at Cornell is offered a broad range of activities, including sailing training and a comprehensive intramural sports program. Midshipmen participate in a myriad of social events, including the annual Navy/Marine Corps Birthday Ball.

DEPARTMENT OF AEROSPACE STUDIES

Colonel Larry L. Wheeler, United States Air Force, Professor of Aerospace Studies and Commander, Air Force ROTC Detachment 520
Captain Reid N. Orth, United States Air Force
Lieutenant Daniel P. McAllister, United States Air Force

The objective of the Air Force officer education program at Cornell is to prepare men and women for positions as officers in the United States Air Force. The program is designed to teach students about the mission, history and development of American air power. In both years, officership and military commitment, and students may withdraw at any time. For non-nursing students, entering Cornell from military schools may receive advanced standing, subject to approval by the Professor of Aerospace Studies. The Four-Year Program consists of General Military Courses (GMC) and Professional Officer Courses (POC). For scholarship candidates, the first year of the GMC carries no military commitment, and students may withdraw at any time. For non-scholarship candidates, both years of the GMC carry no military commitment, and students may withdraw at any time.

General Military Course

Students in General Military Courses (GMC) take a one-credit Aerospace Studies course each semester. During the freshman year, the student examines the organization and mission of the United States Air Force and the environment of the Air Force officer. In the sophomore year, the student studies the history and development of American air power. In both years, officership and professionalism within the United States Air Force are emphasized.

Students also spend 2 hours a week in a leadership laboratory. Leadership laboratory provides cadets with the opportunity to put into practice those skills they learn in their aerospace studies classes. These laboratories focus on the development of officer qualities through such activities as drill and ceremonies, group leadership problems, confidence-building exercises, and guest lectures. In addition, all students participate in summer leadership experiences and apply principles of leadership learned in the classroom.

Four-Year Program

The Four-Year Program is open to all qualified freshmen. Sophomores may also enter a condensed version of the four-year program after completing (at least) two semesters of Aerospace Studies courses. In a five-year program may enroll in their freshman, sophomore, or junior year. The Four-Year Program consists of General Military Courses (GMC) and Professional Officer Courses (POC). For scholarship students, the first year of the GMC carries no military commitment, and students may withdraw at any time. For non-scholarship cadets, both years of the GMC carry no military commitment, and students may withdraw at any time.

Professional Officer Course

The Professional Officer Courses (POC) provide a two-year advanced program of instruction. Students who are accepted for the POC must have successfully completed or validated the coursework to meet academic and physical standards. Each cadet accepted into the POC must sign an agreement to complete the program and accept, if offered, a commission in the United States Air Force upon graduation.

Classroom study in the POC is a 3-credit-hour course each semester. In the junior year, cadets study Air Force leadership and management at the junior officer level.

During the senior year, cadets study the elements of national security and the military’s role in American society. Leadership laboratory requires 2 hours a week in the junior and senior years. In leadership laboratory, cadets are exposed to advanced leadership experiences and apply principles of leadership learned in the classroom.

Two-Year Program

The Two-Year Program consists of the last two years (Professional Officer Courses) of the regular Four Year Program plus a six-week summer training course preceding enrollment. The Two-Year Program is open to all qualified students with two years of academic study remaining at Cornell (graduate or undergraduate) or at schools supported under a crosstown agreement. Applications are accepted from October through April of the academic year preceding the applicant’s planned entry into the program. Selectees are then required to complete a six-week summer training program at government expense.

Scholarships

The Air Force offers 4-year scholarships to high school seniors and 2- and 3-year scholarships to college students. Four-year scholarships are offered on a competitive basis in specified majors to high school seniors. Scholarship information can be obtained from a high school guidance counselor, from Air Force ROTC offices at Cornell (AFROTC phone number is 607–255–6004), from a local Air Force recruiter, or from AFROTC/RROO, Maxwell AFB, AL 36112–6663, 1–800–522–0033, extension 2093. The deadline for submitting a four-year scholarship application is December 1 of the year preceding the academic year in which a student wants to enter the program. Students should apply early.

Scholarships for 2 and 3 years. Applications for these scholarships should be made to the Professor of Aerospace Studies during the freshman or sophomore years of college. All selections are based on the student’s major, scores achieved on the Air Force Officer Qualifying Test, the student’s overall grade point average, and the recommendation of the Professor of Aerospace Studies. Scholarship amounts range from $2,000 per year to full tuition, fees and books, and provide a $150 monthly nontaxable allowance during the school year. Scholarships do not include the cost of room and board.

Benefits

All cadets in the advanced program (POC)—whether they are on scholarship or not—receive a $150-a-month, nontaxable subsistence allowance during the academic year. During the four- or six-week summer field training (see below), each cadet receives a pay allowance plus an allowance for travel to and from the field site. Textbooks and supplies required for Department of Aerospace Studies courses are provided.
All cadets are eligible to participate in AFROTC-sponsored field trips made to Air Force bases throughout the country as well as voluntary summer programs for professional development. Scholarship and advanced cadets (POC) are entitled to space-available travel on Air Force aircraft flying within the continental United States.

Field Training

There are two types of field training: a four-week course for cadets in the Two-Year Program and a six-week course for Two-Year Program applicants. Students in these programs normally attend field training between their sophomore and junior years.

Field training is designed to stimulate the development of military leadership skills through meaningful experiences. The curriculum consists of aircraft, aircrew, and survival orientation; junior officer training; physical training; small arms training; a social–actions program; and supplemental training. The six-week training program includes sixty hours of Air Force ROTC academic work that substitutes for the freshman and sophomore Aerospace Studies courses.

Cadets may also volunteer for one of many Advanced Training Programs. These programs include the Professional Development Program, Air Force Academy Free-Fall Parachute Training, the British Royal Air Force (RAF) Exchange Program, Research and Development Experiences, the Academy Soaring Program, and Army Airborne Training.

Commissioning Obligations

All students who successfully complete the AFROTC advanced program (POC) are awarded a baccalaureate degree, tendered a commission, and enter the Air Force as second lieutenants.

Second lieutenants commissioned in nonflying categories are required to serve on active duty for four years. Pilots are required to serve on active duty for eight years after completing flying training. Navigators serve six years after completing training.

Air Force Careers

The Air Force assigns new officers to a career field based on mission requirements, educational background, and officers’ preferences. Students in the engineering–scientific category may be assigned to practice in their specialty in research and development, communications, electronics, aeronautics, astronautics, the biological sciences, computer design and maintenance, meteorology, space, or other engineering and scientific fields. Graduates in the nontechnical category can anticipate assignments in manpower management, information management, logistics, law enforcement and investigation, intelligence, personnel, transportation, accounting and finance, and other career fields. They may use their educational backgrounds in positions of responsibility and be given the opportunity to further their development in leadership and management skills.

Any undergraduate major is suitable for those who are qualified and interested in becoming pilots or navigators. After completion of flying training, personnel are assigned to a specific type of aircraft.

Curriculum

Students in the Four-Year Program are required to take all courses listed below. Students in the Two-Year Program are required to take all of the courses listed for the junior and senior years. There are no prerequisites for any Aerospace Studies courses.

Freshman Year

Air S 161 Introduction to the Air Force Today I

Fall. 1 credit. This is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officerhood and professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followship experiences.

Air S 162 Introduction to the Air Force Today II

Spring. 1 credit. Continuation of Air S 161.

Sophomore Year

Air S 211 The Air Force Way I

Fall. 1 credit. This is a survey course designed to facilitate the transition from Air Force cadet to Air Force ROTC officer candidate. Featured topics include: Air Force heritage and leaders, Quality Air Force, an introduction to ethics and values, introduction to leadership, group leadership problems, and continuing application of communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with their first opportunity for applied leadership experiences discussed in class.

Air S 212 The Air Force Way II

Spring. 1 credit. Continuation of Air S 211.

Junior Year

Air S 331 Air Force Leadership and Management I

Fall. 3 credits. This course is a study of leadership, quality management fundamentals, professional knowledge, Air Force doctrine, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences. The interactive nature of these activities, giving students the opportunity to apply leadership and management principles of this course.

Air S 332 Air Force Leadership and Management II

Spring. 3 credits. Continuation of Air S 331.

Senior Year

Air S 401 National Security Affairs/Preparation for Active Duty I

Fall. 3 credits. This course examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officerhood, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structured course, continued emphasis is given to refining communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences, giving students the opportunity to apply the leadership and management principles of this course.

Air S 402 National Security Affairs/Preparation for Active Duty II

Spring. 3 credits. Continuation of Air S 401.

Leadership Laboratory Courses

All Air Force cadets spend 2 hours a week throughout the academic year in a leadership laboratory, for which no academic credit is given. Occasionally laboratories are held at times other than the normally scheduled period. All cadets are expected to participate in an evening formal dinner and to meet minimum physical fitness and weight standards each semester. Leadership lab is open to students qualified to compete for an Air Force commission.

Air S 141-142 Initial Military Experiences

Introduction to the responsibilities, life, and work of an Air Force officer. Basic knowledge of drill and ceremonies, military courtesies, and the wearing of the uniform. Field trip to a local military installation.

Air S 241-242 Intermediate Military Experiences

Develops skills in giving commands for drill and ceremonies. Introduction to the Air Force base environment in which the Air Force officer functions. Includes a look at career areas available based on academic majors. Students participate in leadership situations through military drills and ceremonies. Field trip to a local military installation.

Air S 341-342 Junior Officer Leadership

Cadets assume leadership responsibilities similar to those of a junior officer. Emphasis is on the importance of applying effective human relations skills in dealing with superiors, peers, and subordinates. Cadets also gain insight into the general structure and progression patterns common to selected Air Force officer career fields.

Air S 441 Advanced Leadership Experiences

Cadets assume command leadership responsibilities to operate a military organization. Cadets apply effective leadership and management techniques with individuals and groups and participate in self-analysis of leadership and managerial abilities.

Air S 442 Precommissioning Laboratory

Factors that facilitate transition from civilian to military life are reviewed. The need for military security, base services and activities, personal finances, travel regulations, and social obligations are introduced.
DEPARTMENT OF PHYSICAL EDUCATION AND ATHLETICS

ADMINISTRATION
Alan Gantt, director

COURSES
The courses and fees described in this catalog are subject to change or cancellation at any time by official action of Cornell University. For current fee information on physical education courses call 255-4286; for outdoor education courses, call 255-6415 (ext. 2). Enrollment in any course is limited by the space available. Other restrictions are included in the course description. Most courses are coeducational. The specific time and place of class meetings, as well as information about fees, are available at physical education course registration or may be found on "Bear Access," a package of information about fees, are available at Academic.html#Class. Additional course offerings may be listed at registration, as the curriculum is frequently reviewed and changed.

Aquatic Courses
Lifeguard Training
Fall and spring. Fee charged. Prerequisite: swimming test consisting of 500 yards, demonstrating three strokes, treading water without the use of hands, and retrieving a brick from seven feet of water. Three classes a week. An American Red Cross certification course. Certification is awarded in lifeguarding, first aid, and CPR skills and techniques. Certification is awarded in lifeguarding, first aid, and CPR upon satisfactory completion of the course.

Lifeguard Training Instructor
Spring. Fee charged. Prerequisite: current Red Cross certification card, written and skill tests in lifeguarding, first aid, and CPR techniques. Certification in lifeguarding, first aid, and CPR upon satisfactory completion of the course.

Scuba, Open-Water
Fall, spring, and summer (6 weeks). Fee charged. Program includes classroom work skill training in a pool and open-water training in Cayuga Lake. P.A.D.I. open water certification awarded upon satisfactory completion.

Scuba, Advanced Open-Water
Fall and spring. Fee charged. Advanced-level open-water training in Cayuga Lake. For those who have completed the open-water course.

Rescue Diver
Fall and spring. Fee charged. Advanced course for scuba divers. For those who have completed Advanced Open-Water Scuba certification and are interested in learning rescue and safety techniques.

Dive Master
Fall and spring. Fee charged. Advanced-level scuba course open only to those who have completed the Rescue Diver course. NOTE: This is a long, time-consuming course, which requires the student to be in good physical and swimming shape.

Specialty Scuba Diving
Fall and spring. Fee charged. Courses offered in the following specialty diving areas: navigation, search and recovery, night diving, deep diving, underwater photography, wreck, multi-level, boat, tropical fish identification and buoyancy control, and underwater naturalist.

Scuba Diving Trips
Spring. Fee charged. This course is offered during the spring intersession period. Scuba trips to various destinations such as the Bahamas. Locations change from year to year. See the information sheet at the registration table.

Swimming, Introduction to (ARC)
Fall, spring, and summer. (6 weeks). Instruction and practice in skills leading to passing the basic swimming proficiency test.

Swimming, Advanced Beginning (ARC)
Fall and spring. Ideal for all who have taken one term of Beginning Swimming, regardless of whether the test was successfully completed. Areas of special emphasis are the crawl stroke and rouvy breathing, back crawl, elementary backstroke, diving, treading water, and underwater swimming. The primary objective is to strengthen the student's confidence and competence.

Swimming, Intermediate (ARC)
Fall and spring. Practice of basic skills and five basic strokes: front crawl, back crawl, elementary backstroke, breaststroke, sidestroke.

Swimming, Advanced (ARC)
Fall and spring. Practice of nine strokes: front crawl, back crawl, elementary backstroke, breaststroke, inverted breaststroke, sidestroke, overarm sidestroke, trudgen, and butterfly.

Swimming Conditioning
Fall and spring. Prerequisite: good swimming ability. Introduction to, and practice of, different training methods. Final objective: to swim 2,500 yards during class period. Primarily a conditioning and not an instructional course.

Water Safety Instructor
Fall and spring. Fee charged. Prerequisite: passing of written and water tests, which are given on the first day. American Red Cross water safety instructor certification is awarded on satisfactory completion of the course. This is not a course for casual participant. Approximately 45 hours of work is required.

Water Safety Instructor Refresher Course
Spring. Fee charged. Selected sessions of the water safety instructor certification course.

Bowling Courses
Bowling
Fall and spring. Fee charged. For the beginning and intermediate bowler. Shoe rental is included in the fee.

Dance Courses
Develop flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with rhythmic clarity, body design, and fullness of feeling. Auditions are required for admission to some advanced courses, since they require the mental and physical ability to perform more-complex phrases in various styles.

African Dance
Fall and spring. Fee charged.

Ballet I
Fall and spring.

Ballet II
Fall and spring.

Ballet III
Fall and spring.

Ballroom Dancing
Fall and spring and summer. Fee charged. One class a week. Helen Newman Hall. Students and their partners must sign up at course registration.

Belly Dancing
Fall and spring. Fee charged. Belly dancing is an exciting Middle Eastern folk art that can help in the development of flexibility, body awareness, and overall body tone. The class will begin with warm-ups and continue with basic movements and rhythms while putting them together in dance to music of the Middle East.

Introduction to Swing Dance
Fall and spring. Fee charged. No partners are needed. Beginners can expect to develop significant capacity for enjoyment of two forms of swing dance: jitterbug and street boogie. Partners will be rotated throughout the course. Effort will be made at registration to equalize male and female ratios.

Latin Dance
Fall and spring. Fee charged. Partner sign-in required. This is an introductory course that will teach salsa, mambo, NYC style Latin and merengue. Emphasis on listening, feeling and expressing Latin rhythms with precise detail and technique.

Exploration in Movement (A & B)
Fall and spring.

Interactive World Dance
Fall and spring. Fee charged. This course consists of an interesting selection of popular, traditional dance forms that come from diverse cultures around the world. These include line, circle, set, trio, individual, and partner dances. No partner necessary.

Modern Dance I (also Theater Arts 124)
Fall and spring.
Modern Dance II (also Theater Arts 232)  
Fall, spring, and summer (6 weeks).

Modern Dance III (also Theater Arts 306)  
Fall and spring.

Modern Dance IV (also Theater Arts 308)  
Spring.

Equitation Courses  
Basic, Intermediate, Advanced  
Fall, spring, and summer (6 weeks). Fee charged.

All riding classes are held at the Cornell Equestrian Center located on Pine Tree Road near East Hill Plaza. Detailed information will be offered by the equitation staff at the registration sign-up table. Basic—never ridden. Intermediate I—completed basic with knowledge of walk/trot/canter; Intermediate II—walk/trot/canter with control over 2 courses. Advanced—strong jumping/dressage skills with experience hunting/showing/eventing. Students must fill out a release form to participate in any riding class.

First Aid/CPR Courses  
Emergency Response  
Fall and spring. Fee charged.

This advanced-level first aid course is the most comprehensive available without NYS certification. Study hours of training includes CPR for the Professional Rescuer and oxygen administration, as well as many of the first aid skills taught in a basic A.I.C. class. American Red Cross certification is valid throughout the United States and is accepted by many states as a Certified First Responder equivalent. Certification is valid for three years. This certification would be appropriate for camp, medical directors and those who work closely with pre-hospital medical staff.

NYS Emergency Medical Technician—Basic  
Two-semester course. Fee charged. 
This intensive 120-hour course is taught throughout both the fall and spring semesters. Course includes training in CPR for the Professional Rescuer, oxygen administration, airway management, fracture management, bleeding control, expanded patient assessment, spinal immobilization, medical anti-shock trousers, and defibrillation. Students will qualify for the NYS EMT Certification. Exam upon successful completion of this course. Rigid attendance and participation requirements are strictly enforced.

Fishing Courses  
Fly Fishing and Basic Flytting Techniques  
Fall and spring. Fee charged.

Learn the art of tying several of your own artificial flies while you learn the art of fly casting. Students must have a valid NYS fishing license and their own wader boots. All other materials provided.

Salt Water Fly Fishing  
Fall. Fee charged.

Learn the special techniques necessary for salt water fly fishing. This course includes 4 hours of classroom instruction and 4 days of fishing over fall break.

Fitness Courses  
Aerobic Dance  
Fall, spring, and summer (6 weeks). Fee charged.

A dance program designed to keep the cardiovascular system in top shape by making the body demand increased amounts of oxygen.

Body Sculpting  
Fall and spring. Fee charged.

Cardio Crazy  
Fall and spring. Fee charged.

The course is designed to acquaint the student with the various types of indoor aerobic training equipment, such as treadmills, stair machines, exercise cycles, and Nordic Traks. and to teach them to design a personal fitness program incorporating the equipment.

8 O’Clock Rock  
Fall and spring. Fee charged.

This class covers the best of the principles of weight training and the cardio training in the 8 O’Clock Rock Class.

Aerobic Instructor Training  
Fall and spring. Fee charged.

The course is designed to train the student to teach aerobics and prepare for the A.F.A.A. Primary Aerobics Instructors Certification Test.

Fitness and Conditioning  
Fall and spring.

Physical fitness program that embodies features of stretching exercises, weight lifting, and jogging. Students work on their individual training needs.

Jogging  
Fall and spring.

This course will cover running and stretching techniques. A conditioning program with the objective to develop the capacity to run three miles after 12 weeks of training.

Jogging Tours—Distance Running  
Fall and spring.

A course designed for the Intermediate Runner who can run an average of 3 miles in 30 minutes. Most tours will be 3-4 miles long and will go through campus and nearby countryside.

Triathlon  
Fall and spring. Fee charged.

Designed to acquaint students with the components of, and conditioning for, triathlon (running, swimming, and bicycling).

Wellness and Fitness  
Fall and spring. Fee charged.

“Here’s to a Healthier You”—A wellness experience for the busy student. This course will assess the student’s physical fitness status, blood cholesterol levels, and overall lifestyle health habits. Each student will receive an individual exercise prescription and have access to the Wellness Program fitness room in Helen Newman Hall. Lectures on nutrition and stress management are also presented. This course has been made possible through the generosity of the Bateman family in memory of Ms. Dorothy Bateman, Cornell’s first director of women’s sports and physical education (1920 to 1962).

Golf Courses  
Golf, Introduction to  
Fall and spring. Fee charged.

A PGA program of instruction is geared to all levels of experience and ability. The objective is to give beginners enough skill to play, and to give more-advanced players direction in their thinking, practice, and play, through thorough understanding of fundamentals. Equipment is furnished.

Golf, Recreational  
Fall and spring. Limited to students who are experienced golfers. Fee charged. Students must provide their own clubs. A minimum of ten rounds of nine holes each must be played to receive credit. Fee covers a semester’s membership.

Triathlon  
Fall and spring. Fee charged.

Introduction to gymnastics deals with a majority of the Olympic events. The course will focus upon beginner-level skills and is open to both male and female participants.

Ice Skating Courses  
Skating, Introduction to  
Fall and spring. For beginning to intermediate skaters. Fee charged. Students provide their own skates or rent them at Lynah Rink. Course will cover forward and backward skating, turns, and stops.

Figure Skating, Beginning, Intermediate, and Advanced Levels  
Fall and spring. Fee charged.

Instruction and practice in basic figure skating techniques: forward, backward, crossovers, turns, and spins. Students provide their own skates or rent them at Lynah Rink.

Martial Arts—Self-Defense Courses  
Boxing, Introduction to  
Fall and spring. Fee charged.

The course covers the basics of footwork, defensive, and offensive techniques. Skipping rope, shadow boxing, and heavy bag work will be taught as methods for individual aerobic conditioning.

Boxing, Thai  
Fall and spring. Fee charged.

A martial art system developed from the unique culture of Thailand is a blend of art, science, and sport.

Fencing, Introduction to  
Fall and spring. Fee charged. Includes warm-up exercises and offensive and defensive moves. Equipment furnished.

Fencing, Intermediate  
Spring. Fee charged. Prerequisite: Introduction to Fencing or the equivalent. Interclass competition is stressed. Equipment is furnished.

Fencing, Classical  
Fall and spring. Fee charged. Classical fencing is a martial art that uses the practice of the sword to cultivate self-mastery.

Judo, Introduction to  
Fall and spring. Fee charged.

Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

Judo, Intermediate  
Fall and spring. Fee charged.

Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

Karate, Introduction to  
Fall and spring. Fee charged. 
An beginning course taught by professional black belt instructors. Involves mastery of basic blocks, kicks, and punches.

Karate, Advanced  
Fall and spring. Fee charged. Open to those who have taken Basic Karate or the equivalent.
PHYSICAL EDUCATION AND ATHLETICS - 1998-1999

Kung Fu
Fall and spring. Fee charged.
Exploration of conditioning and fitness procedures used in the major martial arts, such as karate or judo. Covers circular movement for generating strong blocks, kicks, and punches.

Self-Defense and Empowerment for Women
Fall and spring. Fee charged.
Basic methods of physical protection for women.

Tae Kwon Do, Introduction to
Fall and spring. Fee charged.
A Korean martial art distinguished by emphasis on high and powerful kicks. Basic kicking, punching, and blocking are emphasized.

Tae Kwon Do, Intermediate
Fall and spring. Fee charged.
A Korean martial art distinguished by its emphasis on high and powerful kicks. Intermediate-level kicking, punching, and blocking are emphasized.

Tae Kwon Do, Advanced
Fall and spring. Fee charged.
A Korean martial art distinguished by its emphasis on high and powerful kicks. Advanced-level kicking, punching, and blocking are emphasized.

Tai Chi Chuan, Introduction to, and Intermediate
Fall and spring. Fee charged.
Introduction to Tai Chi, a system of graceful, exercises that aim at nurturing relaxation, deep breathing, and improved circulation.

Outdoor Education Program
See the brochure for the Cornell University Outdoor Education Program at registration for more information about courses.

Climbing Courses

Basic Rock-Climbing
Fall, spring, and summer. Fee charged.
Seven afternoons climbing inside on the Lindseth climbing wall.

Basic Rock-Climbing, for Women
Fall, spring. Fee charged.
Seven afternoons climbing inside on the Lindseth climbing wall taught by and for women.

Basic Rock-Climbing, for 25 and Over
Fall, spring. Fee charged. Non-credit course.
Four evenings climbing indoors on the Lindseth wall for people age 25 or older.

High Adventure 101
Fall, spring, and summer. Fee charged.
Six afternoons at local parks and wilderness areas, some classes on indoor Lindseth climbing wall.

Continuing Rock-Climbing
Fall, spring. Fee charged.
Seven afternoons of advanced climbing techniques on the Lindseth climbing wall.

Ice Climbing
Spring. Fee charged.
Four outings to local state parks and gorges.

Outdoor Top Roping
Fall, spring. Fee charged.
Two outings (nights) on the Lindseth climbing wall and two outings at local climbing areas.

Shawangunks Rock-Climbing
Fall, spring. Fee charged.
Four-day climbing camp at the Shawangunks.

Backpacking Courses

Natural History of the Finger Lakes
Fall, spring. Fee charged.
Two full weekends on the trail.

Southwest Backpacking
Spring. Fee charged.
Spring Break trip to the SW deserts and canyons.

Trail Maintenance
Fall, spring. Fee charged.
Work with the local trails club to support and maintain trail systems.

Wilderness Skills
Fall, spring. Fee charged.
Break trip focusing on wilderness travel and living skills.

Wilderness Survival Skills
Fall, spring. Fee charged.
Primal living skills taught in three classes and a weekend backpack trip.

Biking Courses

Bike and Hike
Fall, spring. Fee charged.
Four full days exploring local countryside.

Bike Repair, Beginning
Fall, spring. Fee charged. Non-credit.
Two evenings of hands-on repair work.

Bike Repair, Intermediate
Fall, spring. Fee charged. Non-credit.
One evening of hands-on repair work.

Mountain Biking
Fall. Fee charged.
Four full days exploring local countryside.

Canoeing Courses

Canoeing, Adirondacks
Fall. Fee charged.
Break trip explores the beauty of the Adirondacks via canoe.

Introduction to Paddling
Fall, spring. Fee charged.
A sampler of beginning canoeing and kayaking.

Canoe/Camping, Flatwater
Fall, spring. Fee charged.
Four full days paddling local waterways including an overnight.

Canoeing, Moving Water
Fall, spring. Fee charged.
Includes a full weekend of river paddling.

Caving Courses

Caving
Fall, spring. Fee charged.
Four days in the fall and two weekends in the spring in Pennsylvania caves.

Hiking Courses

Day Hiking
Fall, spring. Fee charged.
Day outings in the Finger Lakes Region.

Snowshoeing
Spring. Fee charged.
Day outings in the Finger Lakes Region.

Kayaking Courses

Whitewater Kayaking Day Trip
Spring. Fee charged. Non-credit course.
Day excursion for paddlers with basic skills.

Whitewater Kayaking
Fall, spring. Fee charged.
Includes a full weekend of whitewater paddling.

Pool Kayaking
Fall, spring. Fee charged.
Seven-session introduction to whitewater kayaking skills.

Sea Kayaking
Fall, spring. Fee charged.
Break trip exploring various coastal areas.

Outdoor Leadership

Wyoming Expedition
Summer. Fee charged.
Twenty-one day leadership and mountaineering expedition to the Wind River Mountains.

Outdoor Leadership
Spring. Fee charged.
Training course for outdoor education instructors.

Wilderness Emergency Care, Basic
Fall, spring, summer. (6 weeks). Fee charged.
Full weekend of wilderness first aid and CPR.

Wilderness Emergency Care, Advanced
Fall, spring. Fee charged. Non-credit.
Two evenings of specialized wilderness care.

Wilderness First Responder
Offered in January, over winter break. Fee charged.
Ten days of instruction and practical application of backcountry first aid. Participants earn CPR and First Responder certifications. Taught by SOLO Wilderness Medical Institute.

Skiing—Cross-Country Courses

Cross-Country Skiing, Basic
Spring. Fee charged.

Cross-Country Skiing, Intermediate
Spring. Fee charged.

Cross-Country Ski Day Touring
Spring. Fee charged.
Four full-day weekend outings. Emphasis on backwoods touring.

Telemark Skiing
Spring. Fee charged.
Four evenings at Song Mountain Ski Area.

Personal Growth Courses

Body-Mind
Fall and spring.
Activities are drawn from ancient Eastern practices as well as modern Western psychology, and are designed to give the student first-hand experience of the interaction between their own bodies and minds.

Explorations in Meditation
Fall and spring. Fee charged.
This course provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation. The methods serve to evoke the deep relaxation from which heightened awareness and creativity arise.
Tennis, Advanced
Fall and spring. Fee charged.
Advanced strokes and doubles play emphasized. Recommended for tournament players or those with previous team experience.

Tennis, Indoor-Recreational
Fall and spring. Fee charged.
Play is conducted at the new Reis Tennis Center. Players must have high school or college tournament experience or a rating of 3.5 or higher from the USTA. Matches are played in both doubles and singles. Equipment furnished. NO BLACK-SOLE SHOES ALLOWED ON COURTS!

Board Sailing (Wind Surfing)
Fall, spring, and summer (6 weeks). Fee charged.

Catamaran, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.

Learn unique skills necessary for sailing multi-hull catamarans.

Small-Boat Sailing, Competitive
Fall and spring. Fee charged.
Learn basic skills necessary to sail small sailboats and basic keelboats safely.

Small-Boat Sailing, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.

Swedish Massage
Fall, spring, and summer. Fee charged.
Learn to give a relaxing, stress-reducing Swedish massage. You will master the basic strokes of Swedish massage and learn about their application to the different parts of the body. Students will use oils and lotions as a part of their training.

Therapeutic Massage
Fall, spring, and summer. Fee charged.
Provides an experiential introduction to several types of massage. Included are Swedish, shiatsu, polarity, and sports massage. Class members will participate in group exercises and practice on each other during class time. All exercises and techniques can be done while wearing street clothing.

Yoga, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.
Fundamentals of hatha-yoga. Covers basic postures, breathing techniques, and deep relaxation. Introduces chanting.

Racket Sports Courses

Badminton, Introduction to
Fall and spring. Helen Newman Hall. Fundamental shots, scoring, and general play.

Badminton, Intermediate
Fall and spring. Helen Newman Hall. Review of fundamental shots, scoring, and general play.

Racquetball, Introduction to
Fall, spring, and summer. Fee charged. Instruction for beginners. Equipment is furnished. Protective eyewear required.

Squash, Introduction to, Intermediate
Fall, spring, and summer. Fee charged. Classes for intermediate level of play. Equipment is furnished. Protective eye wear required.

Tennis, Introduction to
Fall, spring, and summer. Fee charged. Basic skills taught include forehand, backhand, serve, and volley. Scoring methods taught.

Tennis, Intermediate
Fall, spring, and summer. Fee charged. Review basic strokes plus topspin and underspin. Doubles strategy emphasized.

Sailing Courses

Archery, Introduction to
Fall and spring. Fee charged. Two classes a week.
Instruction in the care of equipment: seven basic steps for shooting: scoring; practice shooting at twenty, thirty, and forty yards.

Pistol, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.
Instruction in use of pistol in the three modes of fifty-foot competitive target shooting−slow fire, timed fire, and rapid fire. Emphasis on safety and responsibility while firing.

Riflery
Fall and spring. Fee charged. Instruction and practice in the techniques of target riflery from various shooting positions.

Trap and Skeet
Fall, spring, and summer (6 weeks). Fee charged.
Includes lectures and shooting at the Trampkins County Rod and Gun Club range. Guns and shells are furnished.

Team Sports Courses

Basketball
Fall and spring. Fundamental drills in passing, shooting, and dribbling. Scrimmages each class session.

Ice Hockey, Introduction to
Fall and spring. Fee charged. Stick handling, passing, and shooting are stressed. Students provide their own skates and sticks; all other equipment is furnished.

Ice Hockey, Intermediate
Fall and spring. Fee charged. Prerequisite: Beginning hockey or previous participation in organized hockey. This course is designed for the intermediate hockey player. Advanced techniques taught include positioning, power play, penalty killing, and offensive and defensive attack. Each session emphasizes game situations and scrimmaging. Skates and hockey sticks must be supplied by the participants.

Soccer
Spring. Introduction to the game. Includes basic individual skills (passing, trapping, shooting) and team play and strategy.

Volleyball, Introduction to
Fall and spring. Fundamentals of hall handling, serves, defensive blocks, and position play are stressed. Classes will scrimmage.

Volleyball, Intermediate
Fall and spring. Offensive and defensive team strategy is emphasized in class scrimmages.

Weight Training Courses

Trotter Circuit Training
Fall and spring. Fee charged. Students will gain a working knowledge of the basic principles of Trotter selectorized weight lifting equipment. Emphasis on principles of weight training, circuit training, intensity training, and program design.

Principles of Weight Training
Fall and spring. Fee charged. Introduces the proper use of Olympic weights for improving physical condition and muscular strength. Instruction with focus on the relation between high-rep light weight lifting, low-rep heavy lifting, and the development of bulk, strength, and endurance.

Independent Study

Independent Study
Fall and spring. Independent study is designed for those who have difficulty fitting any of the regularly scheduled courses into their academic program. Class activities will be based on personal fitness programs. A term paper is required. Permission to enter this program must be granted by the program director.
The School of Continuing Education and Summer Sessions provides a wide variety of educational opportunities beyond the degree-granting programs of the university. These programs serve virtually all age groups in a great variety of formats and time frames. For information about the following programs write B20 Day Hall, Ithaca, New York 14853-2801; call 607/255-4987; e-mail cusce@cornell.edu, or fax 607/255-9697; unless indicated otherwise below. You may also visit us on the Web at http://www.sce.cornell.edu/.

**ADMINISTRATION**
- Glenn C. Altschuler, dean
- Alicia C. Dowd, media manager
- Judith K. Eger, director, special programs
- Abby H. Eller, director, Cornell University Summer College
- Christine Holmes, special programs coordinator
- Ralph Janis, director, Cornell's Adult University
- Charles W. Jenney, Jr., associate dean, and director, Cornell University Summer Session
- Joseph Lindner, computing director
- Cathy M. Pace, registrar
- Diane E. Sheridan, director, finance and administration

**CORNELL UNIVERSITY SUMMER SESSION**
The Cornell University Summer Session provides unique and unusually attractive opportunities for study and recreation at a time when the Cornell campus and the Finger Lakes region of central New York are at their loveliest and the Ithaca weather is at its best. Participants may choose from a wide spectrum of courses scheduled during three-, eight-, and six-week sessions. Although admission is open to persons of all ages, the majority of summer session participants are matriculated Cornell students. Classes meet daily and are usually kept small to foster a close association between students and teachers.

**SUMMER COLLEGE PROGRAMS FOR HIGH SCHOOL STUDENTS**
High school sophomores, juniors, and seniors attend regular university courses through Cornell University Summer College and may earn college credit. They also explore career options through specially designed workshops. Students live in residence halls, become familiar with campus life, and attend seminars describing the college admissions process. The program is designed to help ease the transition from high school to college. For information call 607/255-6203; e-mail summer_college@cornell.edu; or fax 607/255-8942.

**CORNELL'S ADULT UNIVERSITY**
Cornell's Adult University (CAU) offers week-long noncredit courses on campus for adults and families during the summer. During the fall, winter, and spring, there are weekend seminars, week-long domestic programs, and international study tours. Developed and led by distinguished members of the Cornell faculty, all programs are inspired by the belief that learning never ends and that one of the roles of a great university is to provide a bridge between traditional formal education and informal, noncredit study. For information, write Cornell's Adult University, 626B Thurston Avenue, Ithaca, New York 14850-2400; e-mail cauinfo@cornell.edu; fax 607/254-4482; or call 607/255-6260.

**DISTANCE LEARNING**
The School of Continuing Education and Summer Sessions offers courses through distance learning. Instructional materials for these courses may be presented on the World Wide Web, video tapes, and/or CD-ROMs. Students interact with the instructor and other students by phone or e-mail. Assignments and examinations are completed within a scheduled session, just as in on-campus courses, but students have the option of beginning study prior to the start of the session.

**EXTRAMURAL STUDY**
Cornell undergraduate or graduate students whose studies have been interrupted may find it appropriate to resume their studies by taking classes on a part-time basis. Area residents may take courses on a part-time basis by registering as extramural students. Those interested may enroll in almost any course offered in the fall and spring terms if they receive the instructor's written approval. Another offering, the Visitor's Program, allows adults to attend classes in many divisions of the university on a space-available basis at a reduced charge. In this program, no credit is given, and no record is kept of attendance or performance. Visitors are required to obtain written permission from the instructor.

**WINTER SESSION**
Cornell undergraduate and graduate students, as well as employees and area residents, can earn three to four credits between the fall and spring semesters by enrolling in the winter session. This quiet time on campus allows students to enjoy generally smaller classes and to concentrate on intensive study. Winter-session students may enroll in scheduled courses or design individualized study with a faculty member.

**CONTINUING EDUCATION INFORMATION SERVICE**
This service provides free information, counseling, and referral to people who have been out of school for several years and want to resume their education. It also provides information about short courses, workshops, professional updates, and executive programs offered by the university to people inside and outside Cornell.

**SUMMER COURSE ROSTER**
The Cornell University Summer Session offers a wide variety of courses. The list that follows includes those courses that are usually offered every summer. The list is not exhaustive; many new courses or courses offered only occasionally are not listed. For complete information, contact the Summer Session Office. The summer session catalog is published in February. A preliminary course roster is available beginning in late November and current course offerings are listed and updated on the Web from November through June.

**Africana Studies**
- AS&RC 205 African Civilizations and Culture

A program in African languages is also offered. Consult the department for a complete listing.

**Agricultural, Resource, and Managerial Economics**
- ARME 220 Introduction to Business Management
- ARME 221 Financial Accounting
- ARME 320 Business Law I

**Anthropology**
- ANTHR 101 Introduction to Anthropology
- ANTHR 257 American Indians in Film

**Archaeology**
- ARKEO 100 Introduction to Archaeology
- ARKEO 319 Underwater Archaeology
- ARKEO 361 Summer Program in Etruscan Archaeology at La Piana

Other field study opportunities are usually available through this department.

*SUMMER COURSES*
NEW YORK STATE COLLEGE OF VETERINARY MEDICINE

ADMINISTRATION
Donald F. Smith, dean
Robert O. Gilbert, associate dean for clinical programs and professional service
Douglas D. McGregor, associate dean for research and graduate education
Hollis N. Erb, secretary of the college
Katherine M. Edmondson, assistant dean for learning and instruction
Gene R. Wheeler, assistant dean for administrative services
Gloria R. Crissey, college registrar
Carol S. Peterson, director of financial aid
Joseph A. Piekunka, director of admissions
John E. Saidla, director of continuing education

DEPARTMENT CHAIRS
Anatomy: C. Farnum
Clinical Sciences: M. White
Diagnostic Laboratory: D. Lein
Microbiology and Immunology: R. Avery
Pathology: B. Cooper
Pharmacology: G. Sharp
Physiology: J. Wootton

THE COLLEGE
The College of Veterinary Medicine offers a professional program that requires four years of full-time academic and clinical study of the normal and abnormal structure and function of the animal body and the diagnosis, treatment, and prevention of animal disease.

Graduates of the college receive the Doctor of Veterinary Medicine (D.V.M.) degree, which is recognized by licensing boards throughout the world. Graduates generally enter private practice, academia, or become engaged in one of the increasing number of other biomedical activities.

Admission requires a minimum of three years of college work, including specific prerequisite courses and experience. Applications must be filed approximately one year before the proposed matriculation date. The competition for admission is keen, since there are many more qualified applicants than can be admitted.

Graduate programs in veterinary research and postdoctoral training in clinical specialties are open to Doctors of Veterinary Medicine and some highly qualified holders of baccalaureate degrees and lead to the degree of Master of Science or Doctor of Philosophy.

More detailed information is contained in the Catalog of the College of Veterinary Medicine, which may be obtained by writing to the college.

Note: 500- and 600-level courses are open only to veterinary students except by written permission from the dean and associate dean.

The College of Veterinary Medicine has revised its professional curriculum; the new course requirements apply to the class that matriculated in the fall of 1993 and to subsequent classes. Courses in the revised professional curriculum are designated with the prefix "VTMED," and consist of two categories of courses: foundation courses and distribution courses.

The Professional Curriculum

FOUNDATION COURSES
In foundation courses I, II, III, IV, and V (VTMED 510, 520, 521, 530, 540, 550, and 551), students work in small groups under the guidance of a faculty tutor. Case-based exercises are used to facilitate the understanding of basic science concepts within the context of clinical medicine. On average, three to four 2-hour tutorial sessions are scheduled each week. These are complemented by lectures, laboratories, and discussion sessions or other organized learning opportunities specific to the individual course. Faculty are available to respond to questions that arise as a result of the case-based exercises.

Tutorial sessions and all other organized learning programs are usually scheduled during the mornings, thereby reserving the afternoons for independent study. By situating learning in a clinical context, students are better able to integrate material from the basic and clinical sciences, and are encouraged to develop an understanding of the clinical reasoning process from the beginning of the curriculum. The tutorial-based educational format creates an atmosphere that supports student learning.

More information is contained in the Catalog of the College of Veterinary Medicine, which may be obtained by writing to the college.

Note: Courses listed in brackets [ ] are approved courses that are not offered during the 1998-99 academic year.

VTMED 510 The Animal Body (Foundation Course I)
Fall. 12 credits. Limited to first-year veterinary students. Letter grades only.
S. S. Suarez (course leader) and others. This course is designed to enable students to understand the principles of veterinary anatomy at the gross, microscopic, and ultrastructural levels. Developmental anatomy is emphasized to the extent that it reflects determination of adult form and species differences. Radiologic and related imaging techniques are used throughout the course to assist in the understanding of normal structural anatomy. Understanding of the anatomic basis of common surgical procedures is achieved during the various dissection procedures. The course is based on tutorials with significant emphasis on practical laboratories. Lectures and modules complement student learning.

VTMED 517 Animals, Veterinarians, and Society: Part A (Foundation Course VIIa)
Fall. 1 credit. Limited to first-year veterinary students. Letter grades only. A fee of approximately $10 is charged for the course guide. J. E. Saidla (course leader) and others. This course is the correlate for VTMED 510 The Animal Body. This is a laboratory-based course that teaches the physical examination of four species (dog, cat, cow, and horse). The class is divided into smaller groups and each group meets for two hours each week during the first eleven weeks. The skills of auscultation, percussion, palpation, and observation are taught along with clinically related diagnostic procedures.

VTMED 520 Genetics and Development (Foundation Course II)
Fall and spring. 8 credits. Limited to first-year veterinary students. Prerequisite: VTMED 510 The Animal Body. Letter grades only. R. A. Levine (course leader) and others. This course emphasizes cellular and genetic control mechanisms operating during mammalian development and adulthood. Four basic processes—cell proliferation, cell movement, cell differentiation, and morphogenesis—are essential to all living systems but may be regulated differently in embryonic and mature cells and tissues. Tutorial cases are used to initiate explorations of the mechanisms that regulate these processes in embryonic, normal adult, and transformed (cancer) cell populations. Tutorial sessions are complemented by lectures, laboratories, minicase discussions, and modules.

VTMED 521 Neuroanatomy and Clinical Neurology
Spring. 3 credits. Limited to first-year veterinary students. Letter grades only. A. de Lahunta. Fundamentals of functional neuroanatomy and diseases of the nervous system are taught so that each student is competent in the diagnosis of clinical neurologic disorders of domestic animals. This is a vertically integrated course that includes dissection of the central nervous system of the dog, the anatomic basis for the diagnosis of diseases of the nervous system, and the differential diagnosis of those diseases. Clinical cases with pertinent lesions are demonstrated with each system. Films and videotapes of clinical patients are used to demonstrate the clinical signs produced by the various diseases. Slides of gross and microscopic lesions are used to emphasize the clinical and neuroanatomic relationships and to stress characteristic features of representative conditions.
This course is the correlate for VTMED 531 Function and Dysfunction, Part II. This course provides for understanding the importance of the medical record, the diversity of clients, employees, and society in general, and a session on alternative medicine and its various practices. Students will be expected to critically read and evaluate clinical studies and journal articles is also provided.

**VTMED 540 Host, Agent, and Defense (Foundation Course IV)**

Fall. 12 credits. Limited to second-year veterinary students. Prerequisite: VTMED 531 Function and Dysfunction, Part II. Letter grades only. J. T. Blue (course leader) and others.

This course is divided into six sections: the host response, intracellular environment, extracellular environment, somatic environment, and surrounding environment. Using this approach, students develop an understanding of the host response to insult; a familiarity with groups of important pathogens; an understanding of how pathogens manipulate the host and how the host defends itself against attacks; and an understanding of the roles played by the external environment and human intervention in the epidemiology of infectious organisms.

**VTMED 547 Animals, Veterinarians, and Society: Part D (Foundation Course VId)**

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VTMED 547 Host, Agent, and Defense. Letter grades only. D. M. Ainsworth (course leader) and others.

This course is the correlate for VTMED 540 Host, Agent, and Defense. This course will emphasize maintaining health in both individuals or populations of animals and humans. Topics will include animal bites, nosocomial infections, rabies control, animal disease control, and the role of the USDA and APHIS in regulatory functions.
VTMED 563 Small Animal Medicine
Fall, spring, winter, and summer.
4 credits. Required course open to second-semester third- and all fourth- year veterinary students; not open to others. Letter grades only. S. C. Barr, S. A. Center, J. F. Randolph, K. W. Simpson, (coordinator).
The Small Animal Medicine Service is structured to provide supervised clinical experience in the practice of companion small animal medicine. The course is conducted in the Small Animal Clinic of the Companion Animal Hospital. Students interact directly with clients presenting their pets for primary or referral medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plans to the clients and provide follow-up care and management of these patients.

VTMED 564 Small Animal Surgery Service
Fall, winter, spring, and summer.
4 credits. Required of all third- and fourth- year veterinary students; not open to others. Letter grades only. E. J. Trotter (coordinator) and small animal surgery faculty.
A clinical service rotation, this course exposes the student to the practice of surgery under hospital conditions. Students participate in the diagnostic techniques; planning of therapy; and daily care of dogs, cats, and exotic species under the direction of a faculty veterinarian. Students assist experienced surgeons in the operating room and, with house-officer supervision, are responsible for patients undergoing elective ovariohysterectomy or castration. Client communications and the basics of efficient practice are also emphasized.

VTMED 565 Ambulatory Medicine Service
Fall, winter, spring, and summer.
4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. C. L. Guard (coordinator) and others.
A clinical service rotation in which students accompany ambulatory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prevention, and routine procedures such as castration and dehorning. With appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled work, students participate in diagnostic and medical and surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

VTMED 566 Large Animal Medicine Service
Fall, winter, spring, and summer.
4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. C. Rebhun (coordinator) and others.
Students assigned to this service will assist the faculty and house staff of the Large Animal Medicine service in the diagnosis and care of patients admitted to the service. It is hoped that students working on this service will acquire knowledge and skills in history taking, physical examination, election and completion of appropriate ancillary tests, diagnosis, treatment and patient care. Daily rounds and discussions are used to monitor patient progress and further educate students.

VTMED 567 Large Animal Surgery Service
Fall, winter, spring, and summer.
4 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. P. Hackett (coordinator) and others.
This clinical rotation is structured to provide supervised clinical experience in the practice of large animal surgery. Under the direction of faculty and house staff, students participate in the diagnosis, surgical treatment, and care of patients presented to the Large Animal Clinic. Training through patient care is supplemented by formal rounds and didactic instruction.

VTMED 568 Anesthesiology Service
Fall, winter, spring, and summer.
3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. D. Gleed, J. W. Ludders (coordinator), P. F. Moon and others.
This course is designed to provide clinical experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in selecting suitable anesthetic techniques for patients in the Veterinary Medical Teaching Hospital and then implement those techniques under the supervision of residents and faculty. The goal is for students to learn the skills necessary to perform safe anesthesia in a modern veterinary practice.

VTMED 569 Dermatology Service
Fall, winter, spring, and summer.
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. H. Miller (coordinator) and others.
During this clinical rotation, students participate in the diagnosis and management of skin disorders in small and large animals. Patients are examined by appointment and through consultation with other hospital services.

VTMED 570 Ophthalmology Service
Fall, winter, spring, and summer.
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. C. Riis (coordinator), Rebhun, Kern.
This course combines clinical experience with beginning skills in diagnostic ophthalmology. Students learn how to apply the ophthalmic diagnostic tests. The feeling of performing a good ocular examination is the goal of this rotation. Confidence in using direct and indirect ophthalmoscopes, slit lamps, tonometers, gonioscopy, and conjunctival cytology, and surgery comes with practice introduced in this rotation. Students are required to review the introductory orientation videotapes in the Autotutorial Center entitled "Ocular Examination" before the start of the rotation. This rotation provides surgical experience and consultations. A high percentage of the consultations are referral cases that usually challenge the service. Adequate routine case material is presented to prepare most students for practice.

VTMED 571 Pathology Service
Fall, winter, spring, and summer.
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. B. A. Summers (coordinator) and others.
This course involves the hands-on diagnostic necropsies of most mammalian species that are presented to the pathology necropsy room and of avian species that are admitted to the avian and aquatic animal medicine necropsy room. Students work in groups of three to five for the two-week rotation. Necropsies are performed under the guidance of pathology faculty and residents. Students prepare written reports of necropsies performed, review microscopic hematology and cytology slides, perform urinalyses, and discuss case studies.

VTMED 572 Radiology Service
Fall, winter, spring, and summer.
2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. N. L. Dykes (coordinator) and others.
A two-week clinical rotation in the Radiology Section of the Veterinary Medical Teaching Hospital. Students will use radiographic, CT, ultrasonographic, and nuclear medicine imaging techniques to evaluate animal patients under treatment in the Veterinary Medical Teaching Hospital. With guidance of radiology faculty and technical staff, students obtain and interpret radiographic and ultrasonographic studies. Two 3-hour laboratory sessions are given to allow hands-on experience in patient positioning and radiographic technique. An autotutorial teaching film file is used to familiarize students with radiographic examples of common diseases of large and small animal species. Small-group discussions are scheduled to present and discuss current cases. Radiation safety aspects regarding the veterinary practitioner are emphasized.

VTMED 573 Fourth-Year Seminar
Fall and spring. 1 credit. Required of all fourth-year veterinary students. First-, second-, and third-year students and all staff members are also invited and encouraged to attend. S-U grades only. F. H. Fox, chair of the Senior Seminar Committee.
The aim of this course is to give the student the responsibility and opportunity of selecting and studying disease entity on the basis of a case or series of cases or to give the student the responsibility and opportunity of conducting a short-term clinically-oriented research project under the direction of a faculty member. In either case, an oral report will be presented at a weekly seminar. A written report will also be submitted at the time of the seminar. All participants are encouraged to foster an atmosphere in which discussion, exchange of ideas, and the airing of controversial opinions might flourish.

DISTRIBUTION COURSES
Distribution courses comprise 30 percent of the curriculum and are usually scheduled during the first half of each spring semester. During the first two years, many of the
distribution courses are oriented to the basic sciences. During years three and four, students have additional distribution course offerings from which to choose. Some will emphasize clinical specialties, whereas others will integrate basic science disciplines with clinical medicine and will be co-taught by faculty representing both areas. Students from different classes have the opportunity to take many of these courses together.

Grades: Grading options for distribution courses are either letter or S-U.

VTMED 601 Anatomy of the Carnivore
Spring. 3 credits. Letter grade. Prerequisite: VTMED 510 The Animal Body or permission of instructor. Letter grades only. C. E. Farmum
Carnivore anatomy is studied by detailed regional and systematic gross dissection of the cat, with comparison to the dog. Student dissection is supplemented with prosections, radiographs, and exercises focusing on surgical approaches. There are opportunities for dissection of other carnivores, such as the ferret and the skunk. The laboratory lectures augment the laboratory dissection, and introduce the student to functional morphological comparative features in the Order Carnivora. Students do an independent research project on the carnivore of their choice, and make an oral presentation on this to the class.

VTMED 602 Anatomy of the Horse
Spring. 3 credits. Letter grade. Prerequisite: VTMED 510 The Animal Body or permission of instructor. M. S. Hackett
This course is organized as a traditional anatomy course that relies primarily on students learning the anatomy of horses through hands-on dissection laboratories augmented by lectures and highlighted by clinical correlations. An understanding of anatomy that provides the foundation for surgery and is directly relevant to clinical practice will be emphasized in the regional approach to dissection. Structural-functional correlations that are unique or important in the horse will be the main emphasis of most lectures. Microscopic anatomy will be integrated into the course in selected areas to lay a foundation for the later study of pathology or when it reinforces concepts of structure and function that are difficult to understand by a study of the gross anatomy alone (i.e., hoof). Student dissection cadavers will be supplemented by skeletal materials, radiographs, models, preserved pre-dissected specimens and fresh specimens when they are available.

VTMED 603 Anatomy of the Ruminant
Spring. 3 credits. Letter grade. Prerequisite: VTMED 510 The Animal Body or permission of the instructor. M. S. Hackett
The regional anatomy of several ruminant species will be covered using dissection laboratories, lectures, and large-group discussions. Functional consequences of structural modifications and anatomical features directly relevant to clinical practice will be emphasized. Microscopic anatomy will be correlated with gross anatomy when appropriate to relate structure to function and to provide a foundation for later study in pathology. Student dissection material will be supplemented by skeletal materials, radiographs, models, pre-dissected specimens, and postmortem specimens. Students will be required to complete an independent study project on a relevant subject of their choice.

VTMED 604 Comparative Anatomy: Pattern and Function
Spring. 3 credits. Letter grades. Prerequisite: VTMED 510 The Animal Body. L. A. Mitchell
The goal of this course is to remove the confusion surrounding anatomical variability among amniote species (mammals, birds, and reptiles). This is accomplished by reducing the anatomy of major organ systems in each species to a foundation and relating the differences to functional and historical considerations. Six major systems will be explored (integumentary, locomotor, neurosensory, cardiorespiratory, digestive, and urogenital) in a variety of species as available.

VTMED 606 Advanced Clinical Neurology
Spring. 1 credit. Letter grade. Prerequisite: VTMED 521 Neuroanatomy and Clinical Neurology. A. deLahunta
The objective of this course is to further the experience and confidence of the student in the diagnosis and clinical handling of neurological disorders. It continues their correlation of anatomy, physiology, and pathology in the diagnosis of diseases of the nervous system and the understanding of their pathogenesis. Neurological disorders that are not covered in the foundation course will be considered here. The course is entirely based on case examples that are presented on videotapes or 16mm film and slides.

VTMED 607 The Literature and Subject Matter of Natural History
Spring. 1 credit. prerequisites: VTMED 521 Neuroanatomy and Clinical Neurology. R. E. Evans
This course is an introduction to classic and current literature. Materials relating to the earth sciences and the biology of plants and animals from around the world will be shown and discussed. Students will be required to show and discuss a book that concerns natural history in a country of their choice. A recommended text for this course is The Cambridge Illustrated Dictionary of Natural History by R. J. Lincoln and G. A. Boxshall, 1990.

VTMED 608 Anatomy and Histology of Fish
Spring. 2 credits. Minimum enrollment: 5; maximum enrollment: 10. Veterinary students or written permission of the instructor. S-U or letter grade. P. R. Bowser
This course provides an overview of the diversity of anatomy and histology of fish. Students will participate in lecture, discussion and laboratory exercises to review the major organ systems. Extensive use of library resources for assigned readings will be expected. Each student will prepare a term project and make one oral presentation.

VTMED 610 Introduction to Avian Biomedicine
Spring odd-numbered years. 2 credits. Letter grade. Minimum enrollment: 10; maximum enrollment: 60. G. V. Kollias
An introduction to avian biology for veterinary students. The course will include lectures and laboratories involving avian evolution, anatomy, physiology, and ecology. Emphasis will be on the development of a strong foundation in avian biology that will be applied in VTMED 616 Diseases of Birds and VTMED 652 Avian Medicine and Surgery.
Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is an advanced course in the comparative pathology of aquatic invertebrates and vertebrates commonly used as laboratory animals. The material presented will consist of discussions of the diseases of aquatic animals as well as extensive use of the microscope to examine the histopathology associated with these diseases. The course is taught by an invited faculty of twelve individuals who are leaders in their respective fields of aquatic animal medicine.

VTMED 615 Veterinary Medicine in Developing Nations

The primary objective of this lecture course is to make the student aware of the most important areas of research in contemporary parasitology. Lectures will focus on a broad range of parasites, with an emphasis on those of medical importance. Recently published research articles and reviews will be used as the basis to explore the issues of host invasion, evasion of host defense mechanisms by parasites, vaccination against parasitic infections, chemotherapy, drug resistance, vector biology, and molecular diagnosis. Biological processes especially well understood through work on parasites, such as RNA editing and GPI-anchor biosynthesis and structure, will be covered in detail.

VTMED 616 Diseases of Birds
Spring. 2 credits. Second-, third-, and fourth-year veterinary students. Enrollment 10 minimum; 80 maximum. S. Naqi and G. V. Kollis.

This course is designed to introduce second- and third-year veterinary students to a basic and practical knowledge of the most common infectious and non-infectious diseases affecting a variety of avian species. The course will emphasize the latest diagnostic and control approaches. The course format will be a combination of didactic lectures and discussions.

VTMED 618 Adaptation of Animals to the Environment

The course will examine the physiological adaptations of animals to their environment in addition to methods of acclimatization to novel environments. The course will focus on environmental parameters that exist in harsh environments and include heat, cold, altitude and xeric conditions. Thus the physiological mechanisms of thermoregulation in marmalins, birds and ectotherms will be examined together with their responses to low food and water availability. The knowledge obtained will help in understanding the consequences of translocation of both wild and domestic animals and provide a rational basis for animal husbandry and the provision of appropriate habitats for zoological gardens. The degree of environmental adaptation will also be examined in terms of animal production from a basic science standpoint.

VTMED 619 Pathogenesis of Viral Disease

Course content and objectives: the course will focus on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spread between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory and urogenital systems. The basic principles of virus taxonomy, structure and replication will be included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from recent current literature, the text, Nathanson's Viral Pathogenesis, 1997, and Field's Virology, third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.

VTMED 620 Molecular Biology and Immunology of Host-Parasite Interactions (also VTM 702)

This primary objective of this lecture course is to make the student aware of the most important areas of research in contemporary parasitology. Lectures will focus on a broad range of parasites, with an emphasis on those of medical importance. Recently published research articles and reviews will be used as the basis to explore the issues of host invasion, evasion of host defense mechanisms by parasites, vaccination against parasitic infections, chemotherapy, drug resistance, vector biology, and molecular diagnosis. Biological processes especially well understood through work on parasites, such as RNA editing and GPI-anchor biosynthesis and structure, will be covered in detail.

VTMED 622 Foreign Infectious Diseases of Animals

This course describes the etiology, pathogenesis, clinical signs, gross pathology, differential diagnosis, methods of spread, reservoir hosts, and control of foreign animal diseases that resemble indigenous infectious diseases and present serious economic threats to the United States.

VTMED 625 Osteoarthritis

This course provides a basis at the molecular, cellular, and tissue levels for understanding the functional changes of articular joints. It includes a description of a diarthroidal joint and the detailed composition and metabolism of bone, articular cartilage, ligaments, meniscus, capsule, and synovium. The interrelationship of synovium, synovial fluid, joint lubrication, articular cartilage, simple biomechanical considerations, and enervation are described to address joint function. A comprehensive discussion of the osteoarthritides that inextricably are associated with hip dysplasia in dogs serves as a basis for the etiopathogenesis of this disease. Osteoarthritides in joints of cats, dogs, horses, pigs, sheep, and cows also are discussed in detail as is osteochondritis.

Consideration also is given to infectious arthritis and also human joint diseases such as gout and pseudo-gout. The role of pain receptors, a brief discussion of therapy such as the role of nonsteroidal anti-inflammatory drugs, glucocorticoids, and mention of possible corrective surgery procedures are included.

VTMED 626 Epidemiology of Infectious Diseases
Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Enrollment maximum 8. H. Mohammed and others.

This course will provide an introduction to epidemiologic methods used in the infectious disease investigations. The importance of surveillance systems in detecting modern epidemics and in the development of effective disease prevention and control strategies will also be discussed. An emphasis will be placed on understanding the relationships between the host, the agent and the environment as they relate to disease causation. The course will explore contemporary epidemiologic methods applicable to old diseases that remain real or potential problems, newly emerging infectious diseases, and nosocomial infections. Selected infectious diseases will be discussed to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and groups of animals. The students will have the opportunity to apply these methods to thinking about actual disease problems and write an epidemiologic report that might lead to a publication in a peer reviewed scientific journal.

VTMED 627 Diseases of Antiquity
Spring, distribution periods A and B only. 1 credit. Open to all veterinary students. Letter grade option only. J. Saillie.

This is a study of 30 human and animal diseases that have had profound effects on the course of human history from the beginning of recorded time through about 1920 AD. This course combines aspects of literature, medicine, and history and explores the interactions between demographics, commerce, imperialism, medical care, the environment and disease. Folk superstitions and religious views are considered in context with each illness and simultaneously occurring world events.

VTMED 630 Clinical Biostatistics for Journal Readers

The student will become familiar with the statistical methods commonly used in veterinary clinical articles and will be able to recognize obvious misuse of those methods.

VTMED 631 Clinical Diagnostic Parasitology
Fall and spring. 5 credits. Limited to third- and fourth-year veterinary students. S-U grades only. D. D. Bowman and M. K. Frongillo.

This course will provide a chance to perform diagnostic parasitology methods using samples obtained from ongoing clinic cases. Students will attend eight one-hour sessions as they rotate through the ambulatory, community practice, and pathology rotations. In the ambulatory service (four sessions with students), diagnostics will concentrate on the laboratory examination of samples from large animal cases that have been observed during the prior week. In the Community Practice
VTMED 632 Senior Seminar
Fall and spring. 1 credit.  S-U grade. R. O. Gilbert.
Attendance at fourteen of the senior seminar sessions presented during the academic year constitutes acceptable completion of this course.

VTMED 633 Introduction to Nontraditional Companion and Laboratory Animals
Spring. 1 credit. No minimum or maximum enrollment. Letter grade only. J. E. Saidla (course leader) and others.
This course is both laboratory and lecture based and deals with a wide variety of nontraditional species that might be brought into a small animal practice other than a dog or cat. These can be either companion or laboratory animals and include rodents, lagomorphs, other small mammals, reptiles, amphibians, birds, fish, goats, sheep, potbellied pigs, primates, and llamas.
Instruction in restraint and handling, breeding, husbandry, and general management information is provided for each species. This is followed, where practical, by laboratory sessions for observation, restraint, and physical examination.

VTMED 634 Introduction to Large Animal Ambulatory Practice
Fall, winter, spring, and summer. 1 credit. For first- and second-year veterinary students. Letter grade: C. L. Guard (coordinator). This course introduces veterinary students to primary care large animal ambulatory practice and herd health management through direct exposure to the Large Animal Ambulatory and Production Medicine Clinic Service of the Veterinary Medical Teaching Hospital. Students observe and assist with restraint, examination and routine treatment of animals, and communication with clients. Successful completion requires satisfactory participation during five days of clinical service.

VTMED 635 Introduction to the Professional Literature
Spring. 1 credit. Minimum enrollment: 6; maximum: 10. For second- and third-year veterinary students. Letter grade: D. F. Smith. This course introduces veterinary students to the professional and biomedical literature, including development of critical reading skills. Students will become familiar with the broad range of professional and biomedical literature and will be encouraged to develop a rigorous approach to journal and scientific article review. Secondary emphasis is on developing skills in library and bibliographic search techniques.

VTMED 637 Introduction to Community Practice Service
Fall, spring, and summer. 1 credit. W. E. Hombuckle.
This course allows veterinary students to primary care small animal clinical practice through direct exposure to the Community Practice Service of the Veterinary Medical Teaching Hospital. Students observe and assist with restraint, examination and routine treatment of pets, and communication with clients. Successful completion requires satisfactory participation during ten half-days of clinical service.

VTMED 638 Physiological Nutrition
Spring. 1 credit. Minimum enrollment: 10; maximum: 50. For second-year veterinary students, others by permission of instructor. A. J. Reynolds.
This course will provide information on the evaluation and formulation of rations for large and small animals. These concepts will be applied in discussion on the nutrition requirements of these animals during maintenance, gestation, lactation, growth, stress, and aging. The course is recommended for veterinary students who do not have a strong background in ruminant, equine, canine, and feline nutrition. This course, or its equivalent, will be necessary for comprehension of clinical nutrition concepts in Foundation Course V.

VTMED 639 Veterinary Dentistry (Distribution Course)
Spring. 1 credit. Limited to second-, third-, and fourth-year students. Letter grade only. J. E. Saidla.
This is an introductory-level course in small animal dentistry. It is a laboratory course that meets for two hours, twice a week for 16 sessions. Basic concepts and practical topics in dental nomenclature, dental anatomy, oral/dental examination, routine dental care including prophylaxis, recordkeeping, genetics and breed differences, feline-specific dental disease, occlusion, orthodontics, endodontics, restorative dentistry, and orthodontics are presented. Basic instrumentation and materials used in dentistry are stressed. The class will use prepared specimens for all sessions.

VTMED 640 Veterinary Aspects of Captive Wildlife Management (Distribution Course)
Spring, even years. 2 credits. Letter grade: G. V. Kollias. This course will concentrate on principles of captive wildlife management, both clinical and nonclinical. Students will be challenged to learn and integrate a variety of disciplines that are essential to successfully managing wildlife in a captive or semi-free-ranging environment. These disciplines include but are not limited to species-specific (1) behavior and behavioral requirements, (2) nutritional requirements and problems, (3) natural history, (4) zoonotic, and toxicological problems, (5) manual restraint and anesthesia, (6) preventive medicine, and (7) legal and ethical issues.

VTMED 641 Approaches to Problems in Canine Diseases
The course consists of 105-minute discussion/lecture periods a week for seven weeks. In the eighth week, students will work through cases in canine infectious diseases using a specifically designed computer software program. The letter grade will be obtained entirely from the result of a written examination given in the final period. The course will emphasize the approach to clinical medical problems generally and infectious diseases specifically. The overall objective is to give future small animal practitioners skills in the approach to clinical problems with specific emphasis placed on history taking, clinical signs and examination skills, assessment of clinicopathology data and diagnostic materials (radiographs, ultrasounds), treatment plans, and prevention. The course expands knowledge gained in Foundation Course IV and under the instruction of a clinical faculty member is aimed at facilitating the use of that knowledge into the practical skills of managing clinical cases encountered in practice. A basic level of computer literacy is advised but not required.

VTMED 642 Management of Fluid and Electrolyte Abnormalities
Students will focus on clinical manifestations and the pathophysiological mechanisms associated with fluid, electrolyte, and metabolic acid-base disturbances in domestic animals. The course is divided into segments dealing with salt and water imbalances, potassium abnormalities, metabolic acidosis, metabolic alkalosis, and mixed acid-base disturbances.

VTMED 643 Fundamental Aspects of Embryo Transfer
This course provides an introduction to the theory and practice of embryo transfer in domestic animals. Topics include background, advantages and disadvantages, superovulation, embryo culture techniques, embryo manipulation, registration of offspring, import and export, and related topics in assisted reproductive technologies. Students are exposed to practical techniques of embryo transfer in cattle, small ruminants, horses, and swine. The course consists of lectures, demonstrations, and laboratory classes during which students practice techniques of embryo recovery, evaluation, handling, and transfer.

VTMED 644 Techniques in Equine Surgery
Winter. 1 credit. Prerequisite: VTMED 602 Anatomy of the Horse. Limited to third- and fourth-year veterinary students. S-U grades only. C. L. Guard (coordinator) and other large-animal surgeons.
This course consists of five laboratories performing surgical procedures on ponies and cadaver specimens. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with some specialized surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for students planning surgical practice after graduation. This course is offered during a one-week period over winter intersession.
VTMED 645 Techniques in Food Animal Surgery
Winter. 1 credit. Prerequisite: VTMED 603 Anatomy of the Ruminant. Limited to third- and fourth-year veterinary students. S-U grades only. S. L. Fubini (coordinator) and other large-animal surgeons.
This course consists of five laboratories performing surgical procedures on sheep, calves, cattle, and adult cattle. It is the intent of this course not to make the students proficient in these procedures but to familiarize them with surgical techniques and to make them more enlightened referring practitioners. The course, therefore, is intended for those students anticipating food animal practice after graduation. This course is offered during a one-week period over winter intercession.

VTMED 646 Llama Tutorial
Fall, spring, and summer. 1 credit. Limited to third- and fourth-year veterinary students. S-U grade. M. C. Smith.
This autotutorial or group tutorial course covers common problems of llamas and alpacas. Each week, participants will be provided with a brief case description and a set of sample study questions. Reference will be made to textbooks, journal articles, videos, and (if available) a teaching llama to assist students in finding the answers to the questions efficiently. Grading is based on an oral exam.

VTMED 647 Poisonous Plants
Fall. 1 credit. All years, students from other colleges by permission of the instructor. S-U grade. R. Hillman and M. Smith.
Field trips demonstrate toxic plants growing in natural or cultivated settings. Lectures address economically important poisonous plants native to the United States. Information presented includes plant identification, natural habitat, toxic principles, clinical signs of toxicity, and prevention of poisoning in animals. Some of the major toxic principles found in plants and considered in detail in the course are nitrates, cyanide, oxalates, photodynamic agents, alkalis, and mycotoxins.

VTMED 648 Clinical Management of Native Wildlife
Fall, spring, and summer (credit given for fall). 1 credit. All years. Letter grade. Enrollment not to exceed 42 students per semester. G. Kollias and staff.
This course introduces veterinary students to primary native wildlife care and to wildlife issues that face practicing veterinarians on a daily basis. Students are responsible for the assessment, physical examination, and medical care of native wildlife presented to the Veterinary Medical Teaching Hospital by the public and local wildlife rehabilitators. Student activities are directly supervised and assessed by faculty wildlife clinicians on a daily basis. Successful completion of the course requires 40 hours of satisfactory supervised participation per semester in the clinic. Clinic times will be appropriately scheduled throughout the semester. Students are required to submit three case summaries before the end of the semester.

VTMED 649 Introduction to Equine Practice
Spring. 0.5 credit. All years. Enrollment no minimum; maximum 18. R. Hackett and C. Collyer.
This is an introductory course in equine husbandry intended for students with little or no experience working with horses. Lecture topics will include horse breeds and colors, housing facilities and management, and overview discussions of the racing, showing, and breeding industries. Laboratories will emphasize basic equine handling and restraint as well as feeds and bedding.

VTMED 650 Veterinary Parasitology (Large Animal)
Spring. Offered alternate years. 1 credit. All students. Letter grade. D. Bowman.
This course provides a basic introduction to large animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis will be given to parasites representative of significant disease processes or of significant economic importance to veterinarians, clients, and producers. The course will elaborate on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced through examples of each of the different groups of organisms.

VTMED 651 Veterinary Parasitology: Small Animals
Spring (Jan.-Feb. — 4 weeks, Apr.-May — 4 weeks). 1 credit. Letter grade only. All years. D. Bowman.
This course provides a basic introduction to small-animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis will be given to parasites representative of significant disease processes or of significant clinical importance to veterinarians and pet owners. The course will elaborate on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced through examples of each of the different groups of organisms.

VTMED 652 Avian Medicine and Surgery
Spring (Mar.-May — 8 weeks even years, or as advertised). 2 credits. Third- and fourth-year veterinary students. Enrollment: minimum, 20; maximum, 80. Letter grade only. G. Kollias and others.
This course is designed to introduce third- and fourth-year veterinary students to the principles and practice of clinical avian medicine and surgery. The course will be taught in a basic didactic lecture and discussion format with laboratories that will reinforce concepts presented in the lectures.

VTMED 653 Advanced Equine Lameness
This course is designed to help students understand the methodology and to develop the manual skills required for lameness examination. Emphasis will be on developing diagnostic skills. Specifically, the student will be expected to develop proficiency in the identification of clinical characteristics associated with recognized lamenesses in order to localize the portion of the lameness. Teaching aids will include video modules outlining various gait abnormalities. In addition, horses with specific gait abnormalities will be available for physical, radiographic, and ultrasonographic examination.

VTMED 654 Current Therapy in Equine Reproduction
This course will cover aspects of physiology and therapy of equine reproduction. The purpose of the course is to prepare the student for equine broodmare practice.

VTMED 655 Production Animal Theriogenology
This course deals with specific reproductive conditions of production animals as well as reproductive management of production units. Content includes reproductive biology of production animals, economic considerations, and medical and surgical approaches to management of reproductive disorders. Laboratory sessions are tailored to acquisition of specific skills fundamental to the practice of theriogenology of production animals. Emphasis is on dairy cows.

VTMED 656 Special Problems in Equine Medicine
This course is intended for students who plan to or may enter equine practice. In-depth study of important diseases, review of recent literature, health management, and hands-on procedures or demonstrations will be the core of this course.

VTMED 657 Disorders of Large Animal Neonates
Spring. 1 credit. Enrollment: minimum, 10; maximum, 100. All years. D. Ainsworth.
The common medical problems of foals and calves, with emphasis placed on the neonatal period, are discussed. Specific topics examined in detail include disorders affecting the respiratory, gastrointestinal, and musculoskeletal systems. Students will also spend several hours in the neonatal intensive care unit providing medical care of hospitalized patients under staff supervision.

VTMED 658 Small Animal Orthopedic Surgery
This course is essentially a laboratory course utilizing immature models (Sawbones) and appropriate orthopedic equipment. Working in pairs, students perform a variety of surgical techniques for both the external and internal fixation of fractures under the direct supervision of board certified orthopedic surgeons. No live animals are used. Canine bone models provide an appropriate and inexpensive alternative to live animals. Utilizing these
VTMED 659 Equine Soft Tissue Surgery
Spring (Jan.-Feb.—4 wks). 1 credit. Enrollment: minimum: 6; maximum: 21. Third- and fourth-year veterinary students. Letter grades. R. Hackett and others. This course, intended for students anticipating equine practice, after graduation, will build upon material presented in the foundation courses to provide supplemental instruction in surgical disorders of the horse. Lectures will be case-based and emphasize those disorders likely to be encountered in equine practice (colic, traumatic injuries, dentistry, upper respiratory tract disorders, pre-purchase examination). Laboratories will emphasize those diagnostic and therapeutic procedures in which an entry-level equine practitioner should be competent.

VTMED 661 Surgical Pathology
Spring, summer, fall. Variable: 1-2 credits. For second-, third-, and fourth-year veterinary students. Letter grades. B. A. Valentine. This two-week course (approximately eight hours per day for 2 credits) will provide hands-on experience in the Surgical Pathology Service of the Department of Pathology. Students will assist in tissue selection and sample submission and in trimming and preparing tissue for sectioning with residents and the attending pathologist. They will examine tissue specimens histologically, propose diagnoses, and discuss their interpretations.

VTMED 662 The Bottom Line
Fall and spring. 1 credit. S-U grades only. R. Lewis. This course provides case analysis of material submitted to the necropsy service. Gross and microscopic lesions for each disease/condition are emphasized and correlated with relevant anatomy and experiments. When appropriate, pathogenetic mechanisms, epidemiology, etiology, prevention, and treatment are placed on biological behavior, patient management, and client relations. Format will include lectures, journal club discussions, demonstrations, and seminars.

VTMED 663 Wildlife Pathology
Spring. 1 credit. Enrollment limited to veterinary students. Letter grades. J. King. This course introduces students to common and important lesions of wild species of animals. The etiology and pathogenesis of diseases of importance to wildlife are discussed. Slide presentations of lesions are made, and they are discussed by an experienced pathologist.

The nature and causes of diseases of wild rabbits, opossums, squirrels, deer, certain waterfowl, and some other species are presented. Emphasis is on epizootiology, etiology, pathogenesis, diagnosis, lesions, and effect on populations. Laboratory experience is provided in specimen collection and necropsy techniques. Guest lectures are provided on ecology and population dynamics by members of the Department of Natural Resources.

VTMED 665 Medical and Surgical Problems of Dairy Cattle—Emphasis on the Individual Animal

VTMED 666 Small Animal Clinical Ophthalmology
Spring (Feb.-Mar.—4 wks). 1 credit. Enrollment: minimum: maximum. Third- and fourth-year veterinary students. Letter grades. H. J. Harvey. This course will discuss common clinical problems in small animals. Emphasis will be placed on biologic behavior, patient management, and client relations. Format will include lectures, journal club discussions, demonstrations, and seminars.

VTMED 667 Special Problems in Small Animal Medicine
Spring. 2 credits. Enrollment minimum: 10; maximum: 40. Third- and fourth-year veterinary students. K. Simpson and others. During the 4-week course, students will work through cases in small animal medicine. The course consists of a 50-minute weekly discussion period. The focus will be on the medical problems associated with cases using historic, clinical, clinical pathologic, and pathologic findings to elucidate basic pathophysiologic principles of disease. The overall objective is to give future small animal practitioners skills in the approach to clinical problems with specific emphasis placed on history-taking, clinical signs and examination skills, assessment of clinical pathologic data and diagnostic materials (radiographs, ultrasounds), treatment plans, and prevention. The course will be designed to be held in Foundation Course V and, under the instruction of a clinical faculty member, is aimed at facilitating the use of that knowledge into the practical skills of managing clinical cases.

VTMED 668 Practice Management
Spring. 2 credits. Limited to third- and fourth-year veterinary students. The number of sections will be determined by the enrollment. Letter grades. J. E. Saidla. Course participants form a veterinary group for the purpose of detecting and discussing the practice problems in small animal practice in a small group environment, in class and in the student practice. Topics include management, human resource management, maintenance of standards, marketing, and merchandising, building and maintaining clients, practice growth, finances, computing systems and information management, money management, legal issues and insurance, professional relations and responsibility, and maintaining an acceptable quality of life, including stress management. The managers of three area veterinary practices will speak to the group about their very different successful practices, concentrating on management and organizational skills.

VTMED 669 Sheep and Goat Medicine
Spring, 8 weeks. 1 or 1.5 credits. (Lectures only: 1 credit; lectures plus laboratory: 1.5 credits). S-U grading. Third- and fourth-year veterinary students; others by permission of instructor. M. Smith. This course will present basic information on the diagnosis, treatment, and prevention of common and important diseases in sheep and goats. Topics covered will include basic information on the effects of drugs on autonomic organs and treatment plans, and prevention.

VTMED 670 Drug Handling in the Body
Spring. 0.5 credit. Maximum enrollment: 60. For second-, third-, and fourth-year veterinary students. Letter grade. R. A. Cerione and G. A. Weiland. This course will provide an in-depth consideration of the pharmacological principles of administration, adsorption, distribution, metabolism, and elimination of drugs. Emphasis will be placed on the conceptual basis of the pharmacokinetic considerations in the therapeutic use of drugs. The course will build on the pharmacological and physiological principles learned in Foundation Course III.

VTMED 671 Autonomic Pharmacology
Spring. 0.5 credit. Maximum enrollment: 80. For second-, third-, and fourth-year veterinary students. Letter grade. G. A. Weiland. This course will provide an in-depth consideration of the pharmacological and physiological principles of autonomic pharmacology. The course will focus on the cellular, molecular, and regulatory systems mechanisms will be emphasized. The course will explore in more detail the fundamental pharmacological and physiological principles of the effects of drugs on autonomic organs covered in Foundation Course III.

VTMED 672 Antimicrobial Drug Therapy in Veterinary Medicine
Spring. 1 credit. For second-, third-, and fourth-year DVM students. Letter grade. W. S. Schwark. This course will be an introduction to the use and importance of antimicrobial drugs used in veterinary practice. The course will build on fundamental pharmacological and microbiological principles covered in Foundation Courses I and IV and will consider antibacterial agents, antifungal agents, antiparasitic agents, and antiviral drugs from the point of view of unique pharmacokinetic properties, indications for clinical use, and potential toxicities as the basis for rational use.

VTMED 673 Growth Factor-Coupled Signal Transduction
Spring, even-numbered years. 0.5 credit. Letter grade. R. A. Cerone. This course will provide basic information on the regulation of cell growth and differentiation. The emphasis will be on the
signal transduction pathways that are responsible for translating growth factor binding at the cell surface into nuclear responses and mitogenesis. The course should complement cases covered in Foundation Course C. This course will tie together the biochemical pathways underlying cell growth with biological processes such as wound healing and disease states such as cancer.

[VTMED 674 Physiology and Pharmacology in the Understanding and Treatment of Diabetes]
This course will cover the basic causes of the manifestations of diabetes, signal transduction mechanisms controlling insulin secretion and insulin action, and the principles underlying current and potential future treatment for this group of diseases. The course will stress the value of basic research into cellular and molecular mechanisms for the treatment and cure of disease.

[VTMED 675 Fundamental Principles of Vertebrate Central Nervous System Pharmacology]
Spring, even-numbered years. 0.5 credit. Enrollment: 6 minimum; maximum open. Second-, third-, and fourth-year veterinary students. Letter grade. L. M. Nowak.
This course will include up-to-date knowledge of physiological and pharmacological aspects of the main central nervous system neurotransmitter receptors and provide a basis for rational understanding of the drugs used during surgery and in treatment of neurological diseases.

[VTMED 676 Clinical Ophthalmology]
This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and theriogenology and might include housing, facilities, manure management, and employee education. Data analysis, disease and productivity monitoring, and evaluation of deviations from targeted performance are used to plan cost-effective interventions or corrections, followed by continued surveillance to monitor their effect. Students will be introduced to the software currently used in dairy management. Local dairy herds will serve as additional laboratories for class projects.

[VTMED 677 Dairy Production Medicine]
Fall. 2 credits. Enrollment: 6 minimum; maximum 12. Third- and fourth-year veterinary students. Letter grade. C. Guard.
This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and theriogenology and might include housing, facilities, manure management, and employee education. Data analysis, disease and productivity monitoring, and evaluation of deviations from targeted performance are used to plan cost-effective interventions or corrections, followed by continued surveillance to monitor their effect. Students will be introduced to the software currently used in dairy management. Local dairy herds will serve as additional laboratories for class projects.

[VTMED 678 Small Animal Theriogenology]
Spring (Feb.-Mar.—4 wks). 0.5 credit. Third- and fourth-year veterinary students. R. Gilbert.
This is a distribution course in a lecture-based format designed to complement the knowledge gained in the theriogenology component of Foundation Course V, Animal Health and Disease. Content includes discussion of breeding management, infectious and non-infectious causes of infertility and pathology of the male and female reproductive tracts, their diagnosis and management. The emphasis of the course will be on conditions affecting dogs and cats, but some conditions of other common pet species will be discussed.

[VTMED 679 Clinical Pharmacology]
This course is offered after Blocks I-V and formal exposure to pharmacology coursework is completed. The course is designed to familiarize students with the clinical setting and utilizing ongoing cases in the teaching hospital as a teaching tool. Pharmacological concepts are emphasized, with a focus on the rationale for drug choice, alternative drug choices available, pharmacokinetic considerations, and potential drug interactions/toxicities. This course is offered at the time students are about to embark on their clinical rotations. It is designed to emphasize practical aspects of pharmacology in the clinical setting, utilizing basic concepts obtained during formal coursework. The onus will be placed on the student to explain/rationalize drugs employed in clinical cases in the teaching hospital.

[VTMED 680 Behavior Problems of Horses]
Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. S-U option. K. A. Houpt.
The goal of this course is to give veterinary students the ability to treat the behavior problems of horses. History-taking, counseling, diagnosis, follow-up,ights of cooperation with the referring veterinarian, prevention of behavior problems, training techniques of value to the practitioner, and socialization of foals will be presented.

[VTMED 681 Behavior Problems of Small Animals]
Spring. 1 credit. Prerequisite: one semester of veterinary curriculum. S-U exclusive. K. A. Houpt.
The goal of this course is to give veterinary students the ability to treat the behavior problems of dogs and cats. History-taking, counseling, and follow-up methods will be presented. Each student will have the opportunity to participate in three cases. Behavioral and pharmacological treatments for behavior problems will be presented.

[VTMED 682 Topics in Veterinary Emergency and Critical Care Medicine]
Spring. 1 credit. Open to 3rd and 4th year veterinary students; all others need instructor approval. P. W. Nathanielsz.
This course will provide an introduction to emergency and critical care medicine. It is designed to have 1-2 topics per week. An introductory seminar will present basic information on the topic(s) at the beginning of the week; students will receive 1-2 case scenarios with homework questions and a two hour group discussion will occur later in the week. Although most of the cases will be based on small animal cases, the same principles will apply to both large animal and small animal cases; the same principles will apply to both large animal and small animal situations. Relevant topics include: trauma stabilization, emergency fluid therapy, cardiac and pulmonary emergencies, nutritional support, common toxicology problems, emergency surgical procedures (chest tubes, tracheotomies), and basic and advanced cardiopulmonary resuscitation. When two courses (i.e. section "A" and "B") are offered in the same year, different topics will be covered in the two courses.

[VTMED 684 Thermal Regulation and Exercise (also BioS 713)]
Fall. 1 credit. Offered alternate years. Next offered fall 1999. Letter grade. D. Robertshaw.
An examination of the competing demands on the body of exercise and heat exposure with particular emphasis on the cardiopulmonary system and integration of thermoregulatory reflexes.

[VTMED 685 Physiology of Pregnancy]
This course is presented in lecture fashion, with weekly assignments consisting of one major reference per lecture related to that week's work to review. Subjects covered are placental function, fetal growth, central nervous system development, fetal breathing, biotransformations in maternal and fetal physiology, parturition, and adaptations to newborn life.

[VTMED 689 Fundamentals of Ruminant Digestion]
This course is designed for the student with little or no previous course work in ruminant digestive physiology. It will consist primarily of lectures surveying the functional aspects of: control of feed intake; salivation; reticulorumen motility, including rumination and eructation; microbial flora and fauna; fermentation in reticulorumens (digestion of carbohydrates, proteins and fats); ruminal gas formation; absorption of short-chained fatty acids; special features of ruminal nitrogen metabolism; passage of nutrients to lower tract; and a brief consideration of the functions of oronasal, abomasal, small and large intestines. Emphasis will be on the differences of the ruminant digestive processes from those of the simple-stomached animals.

[VTMED 690 Molecular and Genetic Basis of Inherited Disorders in Animals and Application to Clinical Medicine]
Spring, every other year. 2 credits. All years. Enrollment: 5 minimum; maximum 20. For second-, third-, and fourth-year veterinary students. Letter grade. R. D. Robertshaw.
This course introduces the molecular basis of inherited diseases in domestic animals. Topics include several inherited metabolic defects causing systemic malfunctions: muscle, bone abnormalities; retinal degeneration; failure of the immune systems. Techniques to characterize genes and mutations. Use of molecular techniques for diagnosis and prevention. Use of molecular tools for the treatment of disease. Open to 3rd and 4th year veterinary students.

[VTMED 691 Bovine Reproductive Management]
Fall. 3 credits. Limited to 8 students. S-U only. P. Daels, C. Guard.
This course will be available to junior students during the fall semester. Students must be enrolled in Dr. Daels's herd management course. The objectives are to give training in modern herd-level reproductive
management and develop technical skills involved in fertility evaluation of dairy cows. Each student will be responsible for a subset of the dairy herd and take charge of all aspects of the reproductive management of these animals. Students will be expected to follow procedures of the reproductive management on a daily basis and will meet three times per week with the instructor to evaluate progress and discuss clinical findings. There will be required reading material and formal meetings (1 per month) to discuss progress and specific topics.

[VTMED 692 Current Concepts in Reproductive Biology]
Fall. 3 credits. First-, second-, and third-year veterinary students or appropriate undergraduate/graduate training. 5-8 grades optional.LEC, 2 hours each week; disc, 2 hours each week; T R 10:10-12:05. Not offered 1998-99. J. Fortune, R. Butler, and staff.

This is a team-taught survey course in reproductive physiology and endocrinology. Lectures by a number of reproductive biologists on various aspects of male reproductive function (endocrine regulation, testis function, spermatogenesis, and sperm physiology/function); female reproductive function (endocrinology, ovarian development and function, oocyte physiology/function); pregnancy; parturition, puberty; and reproductive technology. Student participation in the form of discussions and/or presentations.

[VTMED 695 Genetic Basis of Eye Diseases]

This course covers the topic of the molecular and genetic basis of inherited eye diseases in domestic and laboratory animals. It is aimed at the professional student in the veterinary curriculum, but is open to graduate level students. The course will be given in a combination seminar format, with students leading and actively participating in discussions. The students are expected to do assigned and independent outside research, both for the class discussions and for the paper.

[VTMED 696 Fundamental Principles and Anesthetic Techniques for Small Animal Practice]

This course is designed for the veterinary student with interest in small animal practice. It will consist of lectures, case discussions, and anesthetic protocol development for routine and complicated cases. Subjects covered in the course will include: management of anesthesia for elective surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, treatment of respiratory complications, treatment of cardiovascular complications, cardiopulmonary resuscitation, and post-anesthetic management.

While fundamental concepts and advancements in anesthesia will be utilized in this course, a practical application for use in private practice will be a major objective.

[VTMED 697 Fundamental Principles in Anesthetic Techniques for Equine or Mixed Animal Practice]
Spring. 1 credit. Enrollment: 15 minimum; maximum open. Third-, and fourth-year veterinary students. C. Short.

This course is designed for the veterinary student with interest in equine or mixed animal practice. It will consist of lectures, case discussions, and anesthetic protocol development for routine and complicated cases. Subjects covered in the course will include: management of anesthesia for elective surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, treatment of respiratory complications, treatment of cardiovascular complications, cardiopulmonary resuscitation, and post-anesthetic management.

While fundamental concepts and advancements in anesthesia will be utilized in this course, a practical application for use in private practice will be a major objective.

[VTMED 698 Special Projects in Veterinary Medicine]
Fall, winter, spring, summer. Variable credit. Letter grade. Tenure track faculty, College of Veterinary Medicine.

This course provides the opportunity for students to work individually with a faculty member to pursue an area of particular interest and, typically, not part of the established curriculum. Specific course objectives and course content are flexible and reflect the scope and academic expertise of the faculty.

[VTMED 699 Research Opportunities in Veterinary Medicine]
Fall, winter, spring, summer. Variable credit. Letter grade. Tenure track faculty, College of Veterinary Medicine.

This course provides the opportunity for individual students to work in the research environment of faculty involved in veterinary or biomedical research. Specific course objectives and course content are flexible and reflect the specific research environment.

[VTMED 700 Theriogenology Service]
Spring, 2 or 4 credits. Enrollment min./max. Third- and fourth-year veterinary students. R. O. Gilbert and others.

This clinical service rotation is offered to provide additional hands-on experience in all phases of theriogenology. Equine reproductive experience is gained in teasing, rectal palpations, ultrasound scanning, semen collection and evaluation, natural breeding, and artificial insemination. Additional techniques emphasized include taking and evaluating endometrial biopsies, endometrial culturing, and collecting and evaluating endometrial cytology smears. Bovine experience includes weekly trips to the slaughterhouse, where rectal-palpation findings can be compared to actual structures present in recovered tracts. Additional experience in rectal palpation is gained by following cyclic changes in assigned cows in the college dairy herd as well as by participating in herd-health palpations. Trips to the Department of Animal Science sheep and swine barns and research on breeding programs and provide experience in castration, docking, clipping milk teeth, and northing ears. Weekly seminars are presented on current topics in theriogenology.

[VTMED 701 Cardiology Service]

The purpose of this cardiology rotation is to provide the student with the opportunity to put into practice what they have learned in the foundation years. The management of the most common cardiac diseases will be emphasized including heart failure, arrhythmias, and secondary cardiac diseases. All species will be examined, large and small, although the majority will be small animals. Diagnostics including cardiovascular physical examination, electrocardiography, and echocardiography will be taught. The rotation includes clinical work, didactic teaching, and self-initiated digging for information. A written report concerning a clinical case study will be required for completion of this rotation.

[VTMED 702 Laboratory Animal Medicine]
Fall and spring. 2 credits. Enrollment min./max. Third- and fourth-year veterinary students. Letter grades. F. Quimby and others.

The practice of laboratory animal medicine requires a combination of veterinary, biological, and educational programs, clinical skills, knowledge of various species’ biologies, familiarity with research methodology, and acquaintance with state and federal regulations. This course is offered as a two-week introduction to that specialty. Students accompany laboratory animal veterinarians on clinical rounds of Cornell’s research animal housing and participate in laboratory diagnostic work. Review sessions are conducted on the biology, medicine, pathology, and husbandry of rodents, rabbits, and primates and on current legislation regulating the care and use of research animals. The course may include a field trip to the research animal facilities of Rockefeller University, the Cornell University Medical College, Marshall Farms, and the Laboratory of Experimental Medicine and Surgery in Primates.

[VTMED 703 Clinical Wildlife, Exotic, and Zoo Animal Medicine]
Fall, winter, spring, and summer. 2 credits. Enrollment min 2 per rotation/ max 2 per rotation. Third- and fourth-year veterinary students. Letter grades. G. V. Kollas and others.

This course introduces students to primary medical care of non-traditional pet species zoo animals and native wildlife. Students are responsible for the assessment, physical examination, and medical management of exotic animal species presented to the veterinary teaching hospital. Other opportunities available to assist in the development of clinical skills in wildlife, zoo and exotic animal medicine include the wildlife clinic cases, ongoing wildlife research and service projects, and trips to the Burnett Park Zoo. Successful completion of the course requires satisfactory participation during this 14-day clinical rotation.

[VTMED 704 Quality Milk]
Fall or spring. 2 credits. Enrollment min./max. Third- and fourth-year veterinary students. Letter grades. R. Gonzalez, D. Wilson and others.

This course covers the causes, diagnosis, treatment, and prevention of bovine mastitis. The role of management practices is stressed. The course includes lectures, readings.
discussions, laboratory exercises, and farm visits as part of the Quality Milk Promotion Services—New York State Mastitis Control Program.

VTMED 705 Special Opportunities in Clinical Veterinary Medicine
Fall, spring, and summer. Variable credits. Enrollment min./max. Third- and fourth-year veterinary students. S-U grades only.
This course provides opportunities for students after the end of Foundation Course V to explore professional areas not available through the regular curriculum. Blocks of two to four weeks are usually spent at other teaching hospitals, research laboratories, or zoological facilities. Student proposals are submitted to the associate dean for academic programs for review and approval. On-site supervisors of the block act as ex-officio faculty members and are required to evaluate each student formally.

VTMED 732 Veterinary Clinical Toxicology
Spring. 1.5 credits. Prerequisites: 2nd, 3rd or 4th year standing. S-U optional grading. The course is based on weekly quizzes, a final exam, a short paper and oral presentation. L. Thompson and K. Earnest-Koons.
This course will provide the veterinary student with a solid introduction to concepts and principles of toxicology and how they are applied in the clinical setting. Students will learn about specific common toxicants, clinical signs in affected animals and treatment protocols for the toxicants in question. Students will also gain an understanding of the clinical approach to suspected or unknown toxicoses, sample collection and handling, and resources available for clinical toxicologic problems. The course will be conducted with two one-hour lectures per week and one hour-long large group discussion per week. The class will meet two days per week, the first day for one hour and the second day for two hours. Grades will be based on weekly quizzes, a final exam, a short paper and oral participation.

VTMED 745 Dynamics of Dairy Herd Health and Management
Spring. 1 credit. Y. T. Grohn and L. D. Wamick.
Competitive pressure, increasing input costs, and comparatively stagnant milk and salvage values require dairy producers to become more efficient. The current trend of increasing herd size drives changes in management. Dairy cattle are handled in groups, although individual cow health and productivity fundamentally underpin the financial success of the dairy enterprise. Veterinarians are called upon to assess dairy producers not only in matters of herd health, but increasingly in matters of productivity and management decision making. Identifying opportunity areas to improve productivity and ultimately profitability requires modern veterinarians to recognize and solve complex and interdependent milk production, reproduction, and health issues. Until the advent of the new veterinary curriculum, biological systems were often taught in isolation. Yet there are research models that integrate the dynamic nature of dairy production, health, management, and economics through epidemiological and econometric lenses and represent the existence of such advanced research models, they have not been integrated fully into the curriculum. The goal of this course is to teach students they dynamic relationships of herd performance parameters with dairy herd health and management. This will be done with a combination of lectures and exercises using two computer simulation models. The following topics will be addressed: 1) how often production diseases occur and when, 2) how they are interrelated, 3) the impact of disease on milk production, reproductive performance, and risk of culling, and 4) how to use this information in production medicine.

The format of this eight-week course (two days per week) is a lecture one day and hands-on work with computer simulation models on the other day.

ANATOMY

VETA 600 Special Projects in Anatomy
Fall and spring. 1 credit per 2.5-hour period. By permission of the instructor. S-U grades only.

VETA 700 Predictions of Form or Phlogeny
Spring. 1 credit. By permission of the instructor. S-U optional grading. J. W. Hermanson.
Form and function are often discussed as a correlated entity in biology. This seminar group will start with the question, "Does form really predict function?" This will be addressed initially with respect to the analysis of paleobiology, but will then encompass examples of experimental functional morphology. In particular, there is a growing body of experimental data demonstrating that diverse functions can be achieved with nearly identical morphologies, and that the functional diversity may better be explained by behavior or environmental factors. Might these observations refute current theories about the origin of flight in extinct organisms (i.e., the cursorial or ground-up theory of flight versus the arboreal gliding theory of flight evolution)? Specific topics pursued will be selected by the participants in this course. Participation will be open to interested graduate students, advanced undergraduate students, and veterinary students.

CLINICAL SCIENCES

VETCS 664 Introduction to Epidemiology (Graduate)
Fall. 3 credits. Prerequisites: Statistics and Biometry 601 (College of Agriculture and Life Sciences) may be taken concurrently. S-U grades optional. H. N. Eb.
Lectures and discussion deal with the fundamentals of epidemiology. Current topics in epidemiology from the fields of nutrition, underlying the arboreal gliding theory of flight evolution? Specific topics pursued will be selected by the participants in this course. Participation will be open to interested graduate students, advanced undergraduate students, and veterinary students.

VETCS 665 Study Designs (Graduate)
Spring. 2 credits. Prerequisites: VETCS 664 and Statistics and Biometry 601 (College of Agriculture and Life Sciences). S-U grades optional. H. O. Mohammed.
Design and interpretation of cross-sectional, case-control, and cohort studies (including controlled clinical trial) are covered. Design issues will include study design, bias, and relative advantages and disadvantages.

The course objectives are: 1) know the difference between different types of epidemiologic study designs and relative advantages and disadvantages of each; 2) given a problem (usually a field situation), be able to design an appropriate epidemiologic study; 3) be able to effectively analyze and criticize published epidemiologic studies.

The course will consist of lectures on the principles of epidemiologic study design and related issues (sample size calculations, validity and precision, and identification and minimizing of bias), basic analysis of epidemiologic data; and discussion of published epidemiologic studies. These studies include observational cohort studies (prospective and retrospective), cross-sectional studies, case-control studies, and hybrid studies (ambidirectional, and other hybrid designs).

VETCS 666 Advanced Methods in Epidemiology (Graduate)
Fall. 3 credits. Prerequisites: VETCS 665 and Statistics and Biometry 602 (College of Agriculture and Life Sciences). S-U grades optional. M. W. F. 8:45-9:55. Y. T. Grohn.
Concepts introduced in VETCS 664 and VETCS 665 are further developed, with emphasis on statistical methods. Topics include interaction, effect modification, stratified analysis, matching and multivariate (logistic regression) methods, survival analysis, and strategies for the analysis of epidemiologic data.

VETCS 700 Pathophysiology of Gastrointestinal Surgery
Fall. every third year. 1.5 credits. Next offered fall 1998. S-U grades only. N. G. Ducharme.
Normal anatomy and physiology of the gastrointestinal system in carnivores, herbivores and ruminants will be presented initially. This will be followed by in-depth discussion of the pathophysiological mechanisms and sequelae of gastrointestinal obstructions including perforation injury, peritonitis, adhesions and short bowel syndrome.

VETCS 701 Pathophysiology of Orthopedic Surgery (Graduate)
Spring, every third year. 1.5 credits. Next offered spring 1999. S-U grades only.

[VETCS 702 Pathophysiology of Cardiopulmonary Surgery (Graduate)
Fall, every third year. Offered fall 1999. 1.5 credits. Prerequisite: VETCS 664 or equivalent. S-U grades only. R. P. Hackett, S. L. Fubini, N. G. Ducharme, H. J. Harvey.
Using lectures and group discussions, the objective of this course is to explain the pathophysiology of various cardiovascular diseases (cardiac arrest, cardiac arrhythmia under anesthesia) and thoracic disease (various forms of upper airway resistance). The emphasis is placed on understanding these mechanisms and outlining the surgeon's response to these.)

[VETCS 703 Surgical Principles and Surgery of the Integumentary System (Graduate)
Spring, every third year. Offered spring 1999. 1.5 credits. S-U grades only.
This course is designed for surgery residents and graduate students. It is largely discussion
format and examines surgical principles and surgery of the integumentary system.)

[VETCS 704 Pathophysiology of Urogenital Surgery (Graduate)]
Fall, every third year. 1.5 credits. S-U grades only. Not offered 1998-99.

[VETCS 705 Animal Pain and Its Control (Graduate)]
Spring 1999. 2 credits. By permission of the instructor. Letter or S-U option.

This course is open to interns, residents, graduate students, and postdoctoral associates to provide instruction in fundamental and applied concepts of animal pain. The emphasis will be on neurologic, cardiopulmonary, and endocrine responses to either noxious stimulation or pain due to injury and disease processes and the medications used for its control. The subject material will be covered by lectures, group discussions, and group evaluation of protocols to treat or prevent animal pain.

[VETCS 706 Pathophysiology of Neurologic Surgery (Graduate)]
Spring, every third year. 1.5 credits. S-U grades only. Next offered spring 2001.

[VETCS 707 Clinical Biostatistics (Graduate)]
Spring, alternate years. 2 credits. Letter grade only. H. N. Erb, Y. T. Grohn, H. O. Mohammed, J. M. Scarlett (coordinator).
The theory behind and interpretation of parametric and nonparametric statistical techniques commonly employed in clinical medicine will be explained. Students will analyze small data sets using a commercial statistical software package.

[VETCS 708 Epidemiology Seminar Series (Graduate)]
Fall and spring. 1 credit. S-U grades only. Epidemiology faculty.
Advanced theoretical and analytical epidemiologic concepts and techniques will be discussed.

[VETCS 710 Advanced Veterinary Anesthesiology I]
Fall and winter. 3 credits. Letter grade only. J. W. Casey, T. J. Reimers.
The content of the course is designed for preparation for the American College of Veterinary Anesthesiology Board Exam. However, the course is also suitable for residency training in other areas such as surgery and internal medicine. Speakers will be from both inside and outside the college. Topics will cover the basic sciences as they apply to anesthesiology such as physics and engineering, applied pharmacology, physiology and pathology. Clinically oriented lectures will also be given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

[VETCS 711 Advanced Veterinary Anesthesiology II]
Fall and winter. 1 credit. Third and fourth-year veterinary students, graduate students, interns, and residents. Prerequisites: VT MED 568 Veterinary Anesthesiology or permission from instructor. S-U grading. P. F. Moon (coordinator) and others.

For course description, see VETCS 710.

[VETCS 766 Graduate Research (Graduate)]
Fall, spring, and summer. Credit and hours to be arranged. By permission of the instructor. Letter grades only. J. M. Scarlett. This course enables students outside the section of Epidemiology to receive graduate research credits for projects with epidemiological components.

[VETCS 768 Master's-Level Thesis Research (Graduate)]
Fall or spring. 1-6 credits. S-U grading. Epidemiology faculty. This course enables graduate students in the Section of Epidemiology to receive graduate research credits for master's-level thesis research.

[VETCS 769 Doctoral-Level Thesis Research (Graduate)]
Fall or spring. 1-6 credits. S-U grading. Epidemiology faculty. This course enables students in the Section of Epidemiology to receive graduate research credits for doctoral-level thesis research.

[VETCS 799 Independent Studies in Epidemiology]
Fall and spring. 1-3 credits. H. N. Erb, Y. T. Grohn, H. O. Mohammed, J. M. Scarlett.
The purpose of this course is to investigate an epidemiologic topic with one of the instructors. It provides experience in problem definition, research design, and the analysis of epidemiologic data.

[DIAGNOSTIC LABORATORY]

[VETDL 700 Special Projects in Diagnostic Endocrinology (Graduate)]
Fall and spring. 1-3 credits. By permission of the instructor. Letter grades only. T. J. Reimers.
An independent study course. Students have the opportunity to research a particular topic in diagnostic clinical endocrinology of animals.

[VETDL 701 Special Projects in Infectious Diseases (Graduate)]
Fall and spring. 1-3 credits. By permission of the instructor. S-U grades optional. Diagnostic laboratory faculty. This course provides laboratory experience with attention to specific aspects of infectious disease problems.

[VETDL 702 Special Topics in Infectious Diseases (Graduate)]
Fall and spring. 1-3 credits. By permission of the instructor. S-U grades optional. Diagnostic laboratory faculty. The objective of this course is to offer a broad exposure to various aspects of infectious diseases.

[VETDL 703 Doctoral-Level Thesis Research (Graduate)]
Fall and spring. 6-9 credits. By permission of the instructor. S-U grades only. Diagnostic Laboratory faculty. Research leading to a Ph.D. degree.

[VETDL 704 Master's-Level Thesis Research (Graduate)]
Fall and spring. 1-3 credits. By permission of the instructor. S-U grades only. Diagnostic Laboratory faculty. Research leading to an M.S. degree.

[MICROBIOLOGY AND IMMUNOLOGY]

[VETMI 315 Basic Immunology (Undergraduate) (also Biological Sciences 306)]
Fall. 3 credits. Strongly recommended: basic courses in microbiology, genetics, and biochemistry. S-U optional. J. A. Marsh. A survey of immunology, with emphasis on the biological functions of the immune response.

[VETMI 320 Principles of Toxicology (Undergraduate) (also Biological Sciences 320 and Toxicology 320)]
Spring. 3 credits. Prerequisites: one year each of introductory biology and chemistry, with lab; one semester of organic chemistry lecture or waiver by instructor. S-U optional grading. T R 1:25-2:40. S. Penningroth, R. Dietert, and S. Bloom. An introduction to the interdisciplinary science of toxicology, drawing on material from biology, chemistry, ecology and pharmacology. Principles are illustrated by case examples, such as pesticide toxicity to wildlife reproduction and human health risk assessment at a Superfund hazardous chemical waste site. Chemical risk management is presented as a sociopolitical process involving the integration of scientific, economic and cultural factors.

Independent student projects include: toxicological profile and a team analysis of hypothetical "environmental risk scenarios." Periodic talks by toxicology faculty acquaint students with basic research in this interdisciplinary branch of Biological Science. This is an introductory level course in toxicology. Format: lecture supplemented by case examples. One field trip to a hazardous chemical waste site. Appropriate for non-majors seeking basic literacy in environmental and human toxicology. "Gateway course" for students interested in 400 and 600 level toxicology courses.

[VETMI 404 Pathogenic Bacteriology and Mycology (also BIOMI 404)]
Spring, odd-numbered years. 2 or 3 credits (3 credits with lecture and seminar). Prerequisites: BIOMI 290 and 291. J. A. Marsh. Strongly recommended. VETMI 515. Seminar is required of graduate students and open to undergraduates with permission of instructor. Seminar limited to 15 students. F. Tullson. This is a course in medical microbiology, presenting the major groups of bacterial and mycotic pathogens important to human and veterinary medicine. The emphasis of this course is infection and disease pathogenesis. Topics include disease caused by interactions of host, pathogen, and environment, including immunity to bacteria and fungi; and principles of antimicrobial therapy and drug resistance. A companion seminar addresses the current and classic literature related to microbial pathophysiology on the cellular and molecular level.

[VETMI 408 Viruses and Diseases I (also Biological Sciences 408)]
Spring, alternate years. 3 credits. Intended primarily for graduate and undergraduate microbiology majors. Prerequisites: Microbiology 290 and 291 (College of Agriculture and Life Sciences). Recommended: VETMI 315, Genetics 281. Letter grades only. J. W. Casey.
The course will cover basic concepts in virology with emphasis on virus-host interactions, strategies for gene regulation, and mechanisms of pathogenicity. Selected viral infections that result in immune dysfunction and neoplasia will be highlighted in the context of appropriate intervention to prevent or reduce the severity of diseases.

**VETMI 431 Medical Parasiology (Undergraduate)**
Fall, alternate years. Offered fall 1998. 2 credits. Prerequisites: zoology or biology. Letter grades only. D. D. Bowman.
A systematic study of arthropod, protozoan, and helminth parasites of public health importance, with emphasis on epidemiologic, clinical, and zoonotic aspects of these parasitisms.

**VETMI 605 Special Projects in Microbiology (Undergraduate)**
Fall and spring. Credit to be arranged. By permission of the instructor. Prerequisite: a good background in microbiology or immunology. Preferably, students should have background in pathogenic microbiology and immunology. S-U grades only. Microbiology staff.
The course normally provides an opportunity for the student to work in a research laboratory or carry out a special project under supervision.

**VETMI 700 The Biology of Animal Viruses (Graduate and Upper-level Undergraduate)**
Fall, odd-numbered years. 2 credits. Next offered fall 1999. Letter grade only. C. R. Parrish.
This course is a general introduction to the biology of animal viruses. A brief history of the concept and study of viruses, along with an overview and classification of the major viral groups, will be given. Topics include the structures of viruses and their components, viral nucleic acids and genome replication strategies, selected examples of gene regulation mechanisms, structural and nonstructural viral proteins, and the interactions between viruses and cells. Traditional and recent examples of methods for the genetic analysis of viruses will be given. Further topics include evolution, variation, and selection of virus strains over time and during infections of host animals; traditional and novel approaches to vaccine development; and antiviral chemotherapy.

**VETMI 701 Pathogenesis of Viral Diseases**
Spring alternative years. 2 credits. Letter grades only. C. R. Parrish.
Offered during the 8-week spring distribution period, January-March. Open to graduate students and advanced undergraduates with permission of instructor. Strongly recommended prerequisites: Immunology, Microbiology, Parasitology, and Virology.
The course content and objectives: the course will focus on the balance between host defense against viral infection and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spread between cells, disease mechanisms, and the role of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, reticuloendothelial, respiratory, and urogenital systems. The basic principles of virus taxonomy, structure and replication will be included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from relevant current literature, the textbook, Nathanson’s *Viral Pathogenesis*, 1997, and Field’s *Virology*, third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.

**VETMI 702 Molecular Biology and Immunology of Host-Parasite Interactions (Graduate) (also VTMED 620)**
Spring, even-numbered years. 2 credits. Letter grade or S-U option. E. J. Pearce. See description for VTMED 620.

**VETMI 705 Advanced Immunology (Graduate) (also Biological Sciences 705)**
Spring, even-numbered years. 3 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. Letter grades only. R. G. Bell (coordinator) and staff.
Coverage at an advanced level of molecular and cellular immunology.

**VETMI 706 Immunology Seminar Series (Graduate)**
Fall and spring. No credit. Required of all graduate students in the Field of Immunology. S-U grades only. Fall, E. Pearce; spring, R. Dietert.
Presentations of research investigations by Cornell faculty members, postdoctoral fellows, and graduate students in the Field of Immunology and by invited speakers from other institutions.

**VETMI 707 Advanced Work in Bacteriology, Virology, and Immunology (Graduate)**
Fall and spring. Credit to be arranged. By permission of the instructor. Letter grade or S-U option. Microbiology staff.
This course is designed primarily for graduate students with a good background in pathogenic microbiology and immunology. It may be elected by veterinary students who are properly prepared.

**VETMI 709 Laboratory Methods of Diagnosis (Graduate)**
Fall and spring. 1–3 credits by arrangement. By permission of instructor. Letter grade or S-U option. Microbiology staff.
Instructs and practices in the application of microbiological and serological methods for the diagnosis of disease.

**VETMI 710 Microbiology Seminar (Graduate)**
Fall and spring. 1 credit. Required of all graduate students in the Department of Microbiology and Immunology. S-U grades only. E. J. Pearce, C. R. Parrish.

**VETMI 719 Immunology of Infectious Diseases and Tumors (also Biological Sciences 706) (Graduate)**
Spring, alternate years. Next offered spring 1999. 2 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. S-U optional. R. G. Bell (coordinator) and staff.
Coverage at an advanced level of the immunology of diseases caused by selected bacterial, viral, protozoan, and helminthic parasites, and tumor immunology.

**VETMI 737 Advanced Work in Animal Parasitology (Graduate)**
Fall and spring. 1–3 credits by arrangement. For advanced undergraduate and graduate students. Letter grades only. D. D. Bowman and other faculty.
This course is intended for graduate students minoring in parasitology and for highly motivated veterinary students with interests in parasitology research.

**VETMI 770 Advanced Work in Avian Diseases (Graduate)**
Fall and spring. Credit to be arranged. By special arrangement with the instructor. Letter grades only. S. A. Naqi.

**VETMI 772 Advanced Work in Aquatic Animal Diseases (Graduate)**
Fall and spring. Credit to be arranged. By special arrangement with the instructor. S-U grades only. P. R. Bowser.

**VETMI 783 Seminars in Parasitology (Graduate)**
Fall and spring. 1 credit. Open to veterinary students, graduate students minoring in the field of parasitology, others by permission of the instructor. S-U grades only. D. D. Bowman.
This is a seminar series designed to acquaint students with current research in the field of parasitology. The range of topics is determined, in part, by the interests of those participating and may include such topics as the ecology of parasites, parasite systematics, immunoparasitology, and parasitic diseases of plants and animals, including humans.

**PATHOLOGY**

**VETPA 636 Wildlife Pathology**
Fall and spring. 2 credits. Open enrollment. Letter grade or S-U option.
This course introduces students to common and important lesions of wild species of animals. The etiology and pathogenesis of diseases of importance to wildlife are discussed. Slide presentations of lesions are made, and they are discussed by an experienced pathologist.
The nature and causes of diseases of wild animals, birds, and some other species are presented. Emphasis is on epizootiology, etiology, pathogenesis and diagnostic lesions. Experience is provided in specimen collection and necropsy techniques. Attendance at the weekly meetings is mandatory in the necropsy room for the presentation of fresh, wet tissue specimens and discussion by clinicians and pathologists as well as actual handling of the tissues (gloves provided) after the class.

**VETPA 637 Postmortem Pathology**
Fall and spring. 2 credits. Intended for veterinary students but open to others. Letter grade or S-U option.
A presentation of gross and microscopic lesions of diagnostic significance, employing color projection slides as illustrations. Emphasis on pathologic and differential diagnosis of a wide spectrum of viral, bacterial, parasitic, and other diseases.
VETPA 639 Autotutorial in Laboratory Animal Medicine and Science
Spring. 1-3 credits. Letter grade. F. W. Quimby.
This course is offered to individuals interested in pursuing various aspects of laboratory animal medicine and science in depth. A variety of resources are available to assist students in their research on a particular topic: the library of the Division of Laboratory Animal Medicine, including the autotutorial library; the university libraries; and special information collected from other institutions. Grades are determined on the basis of a paper, an oral presentation, or the creation of an audiovisual teaching aid, any of which may be selected by the student.

VETPA 641 Veterinary Clinical Immunology
Spring. 1 credit. Limited to veterinary students; others by permission of the instructor. Letter grades. R. M. Lewis.
This course examines the clinical aspects of fifteen specific diseases that are mediated by immunologic processes. Case material from the Teaching Hospital is used to illustrate presenting clinical signs, laboratory diagnostic methods, therapeutic approaches, and eventual outcome of each disease under discussion. Student participation in the informal case discussions is encouraged as a means of introducing students to the practice of veterinary medicine through case discussion and analysis. Training is also provided in the use of the college computerized biomedical information system and the hospital records system to develop a critical written case analysis, which serves as the basis for grading.

VETPA 750 Cancer Cell Biology (also Biological Sciences 750) (Graduate)
Spring, alternate years. 3 credits. Prerequisite: Biological Sciences 330 or 331 or equivalent. Recommended: graduate courses in biological sciences. Letter grade. J. L. Gruen (coordinator), R. A. Levine, B. U. Pauli, A. Yen.
This advanced graduate course will cover molecular, cellular, and genetic aspects of cancer. The course is divided into three sections. The first section will address tumor etiology, progression, and metastasis. Topics in this section will include causes of cancer, morphologic and genetic models of cancer progression, tumor angiogenesis, tumor invasion, and metastasis. The second section will discuss cell-matrix and cell-cell interactions in cancer. Topics will include the structure and function of the major matrix receptor integrin family of cell adhesion molecules, integrin interactions with the cytoskeleton, intracellular signaling pathways in cell-ECM interactions, integrin-mediated signaling in cellular growth regulation, changes of integrins in human tumors and metastasis, structure and function of cadherin family of cell-cell adhesion molecules, signaling mechanisms in cell-cell interactions in normal development and cancer. The third section will address the cell cycle. It will describe properties of the cell cycle and how its phases are measured, changes associated with cell transformation, and how oncogenes and tumor suppressor genes regulate cell proliferation, differentiation, and apoptosis.

VETPA 788 Seminar in Surgical Pathology
Fall and spring. 1 credit. Intended for residents. Third- and fourth-year veterinary students may attend. Letter grades only. B. A. Summers (coordinator) and others.
The major objective of this discussion and seminar course is to introduce the residents to the discipline of surgical pathology. Selected material from the Surgical Pathology Service is prepared in advance for independent review by the residents. The material is presented in a slide-seminar format by the residents under the review of the faculty. Emphasis is placed on pathogenesis, etiology, and pathologic descriptions of the lesions. In addition, appropriate guest lecturers cover specific areas of interest and special topics not encountered in the departmental service programs.

VETPA 796 Medical Primatology
Fall, alternate years. Not offered fall 1998. For residents and graduate students by permission of instructor. F. W. Quimby.
A survey of major diseases, medical care, and management techniques for all life stages of primates. Topics include physical examination, restraint anesthesia, housing, and management of various nonhuman primate species; bacterial, viral, and parasitic diseases; noninfectious diseases; infant and nursery care reproduction and behavioral considerations; and therapeutic.

PHARMACOLOGY
Lecture Courses
VETPR 470 Biophysical Methods (also A&E 470)
Spring. 3 credits. Prerequisites: by permission of the instructor only. Letter grading only. M. Lindau.
An overview of the diverse methods of modern biophysical experimental techniques used in the study of biophysical systems at the cellular and molecular level. Topics covered will include methods that examine both structure and function of biophysical systems, with emphasis on the applications of these methods to biological membranes. The course format will include assigned literature reviews by the students on specific biophysical topics and individual student presentations on these topics. The course is intended for students of the engineering, physics, chemistry, and biological disciplines who seek an introduction to biophysical experimental methods. A solid knowledge of basic physics, and of mathematics through the sophomore level is expected. Some knowledge of cellular biology is helpful but not required.

VETPR 610 Cellular and Molecular Pharmacology
Fall, odd-numbered years. 2 credits. By permission of the instructors. Letter grades or S-U option. G. A. Weiland and pharmacology faculty.
A graduate-level course surveying the molecular and cellular aspects of receptor mechanisms, signaling pathways, and effector systems. Topics covered include drug-receptor interactions; ligand- and voltage-gated ion channels; G protein pathways; growth factor signaling; lipid signaling; calcium; nutrient and nitric oxide signaling; and mechanisms of receptor-mediated effects on neural excitability, electrical pacemakers, muscle contraction and gene expression.

VETPR 611 Systems Pharmacology
Spring, even-numbered years. 2 credits. By permission of the instructors. Letter grades or S-U option. G. A. Weiland and pharmacology faculty.
A graduate-level course surveying system- and organ-related aspects of pharmacology. Topics covered include drug disposition; pharmacokinetics; autonomic pharmacology; central nervous system pharmacology; pharmacology of inflammation, allergy and platelet function; cardiovascular, gastrointestinal and endocrine pharmacology; and chemotherapy, including antimicrobial agents and cancer chemotherapy.

VETPR 615 Molecular Biophysics of Cell Dynamics (also A&E 615)
To be arranged. 3 credits. Prerequisite: graduate or senior level in science or engineering. Letter grade. W. W. Webb.
Physical mechanisms in cellular function: statistical thermodynamics of ion channel proteins, single channel recording, receptor signaling, molecular motility and mobility. Intracellular forces, spontaneous self-assembly of mesoscopic structures, molecular mechanisms of secretion, supramolecular mechanisms in memory and development.

VETPR 672 Protein Kinetics (also CHEM 672)
Spring. 4 credits. Prerequisite: CHEM 288 or 390, BIOM 331 (or equivalents) or permission of the instructor. Letter grade or S-U option. B. A. Baird.
Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include: protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; role of cell membrane receptors in regulating cellular activities.

VETPR 700 Calcium as a Second Messenger in Cell Activation
Spring, even-numbered years. 2 credits. By permission of the instructor. Lecture and laboratory. S. L. Baird.
Regulation of intracellular calcium and techniques for studying calcium movements and distribution in cells. Calcium channels and exchangers, calcium-binding proteins, and calcium stores. Phospholipidinositol turnover, release of calcium from intracellular stores, and activation of calcium influx. Calcium gradients and oscillations. Mechanisms of excocytosis and the proteins involved. Each topic will be introduced with a lecture followed by discussion of recent papers from the literature.

VETPR 701 Organ System Toxicology (also TOX 701)
Fall, even-numbered years. 1 credit. S-U grading. W. S. Schwark.
A minicourse on molecular mechanisms involved in chemical toxicity. Specific examples of toxicity in organ systems such as the nervous system, kidney, liver, respiratory tract, and cardiovascular system will be considered.
VETPR 703 Receptor-Ligand Interactions (also BIOM 790-02)
Fall, even-numbered years. 2 credits. By permission of the instructor. Letter grade or S/U option. R. E. Oswald, G. A. Weiland (coordinator).
The course covers both the practical and theoretical tools for the study of ligand-receptor interactions, emphasizing the quantitative and physical chemical aspects of receptor theory. Topics discussed are basic methods of radioligand binding assays, including separation and measurement of bound and free ligand; characterization of receptor function; analysis of receptor structure; thermodynamic basis of the binding; methods of analyzing equilibrium binding; equilibrium binding for complex binding mechanisms; and kinetics of simple and complex binding mechanisms.

VETPR 704 CNS Neuropharmacology: Mechanisms of Synaptic Transmission
Spring, odd-numbered years. 2 credits.
Maximum enrollment: 20 graduate students and undergraduate seniors by permission of the instructor. Letter grade or S/U option. L. M. Nowak.
This is a survey course in vertebrate central nervous system physiology and pharmacology, and focuses on mechanisms of neurotransmitter action at the membrane and cellular levels. Roles of selected neurotransmitters in normal and dysfunctional brains are covered. Topics are introduced in lectures and followed up in discussions of recent journal articles.

VETPR 705 Molecular Mechanisms of Receptor-G Protein Coupled Signaling
Spring, odd-numbered years. 2 credits. By permission of the instructor. Letter grade or S/U option. R. A. Cerione.
This course focuses on the mechanisms of action of GTP binding proteins. Several receptor-coupled signaling systems are examined, including adenylyl cyclase, vertebrate vision, phosphatidylinositol lipid turnover, receptor systems regulating various ion channels, and receptors involved in cell growth regulation.

VETPR 706 Growth Factor-Coupled Signaling (also BIOM 734)
Spring, odd-numbered years. 0.5 credits. By permission of the instructor. Letter grade or S/U option. R. A. Cerione.
General theme will be mitogenic signaling pathways. Receptor tyrosine kinases, src, ras, and ras-regulatory proteins will be covered.

VETPR 707 Protein NMR Spectroscopy (also BIOM 730)
The fundamentals of NMR will be presented and the student will acquire the tools necessary to establish an in-depth understanding of multidimensional, multinuclear NMR experiments. Application of the technique to proteins for assignment of resonances, determination of structure, and characterization of dynamics will be presented. Special approaches for applying solution NMR techniques to large proteins will be discussed.

VETPR 708 Lipid Second Messengers
Fall, even numbered years. 1 credit. Prerequisite: general biochemistry or permission of instructor. Lecture-discussion. Letter or S/U grading option. H. Alex Brown.
This course covers the biochemical pathways involved in the production of lipid second messengers. These pathways function as essential elements of cellular signal transduction cascades. Topics include pathways of phospholipid synthesis, regulation of major mammalian phospholipases by receptors linked through G-proteins and tyrosine kinase receptors to intracellular cascades, and subsequent metabolism of lipid products. The roles of lipids in regulating cell processes, such as membrane structure, exocytosis, cell cycle, and apoptosis, are topics for discussion following reviews of recent publications.

Special Projects and Research in Pharmacology
Fall, spring, and summer. 1–3 credits each topic. By arrangement with the instructor. Letter grade or S/U option. Pharmacology faculty. Independent study or research. These courses cover a variety of topics related to the research interests of the faculty.

VETPR 711 The Role of Calcium in Stimulus-Secretion Coupling
C. M. S. Fewtrell.

VETPR 713 Mechanisms of Growth-Factor Action
R. A. Cerione.

VETPR 714 Central Nervous System Neurotransmitters
L. M. Nowak.

VETPR 718 Structure-Function of the Nicotinic Acetylcholine Receptor
R. E. Oswald.

VETPR 724 The Control of Hormone Secretion
G. W. G. Sharp.

VETPR 730 Graduate Research in Pharmacology
1–10 credits. This course is offered by individual faculty members in the Department of Pharmacology for graduate students undertaking research toward M.S. or Ph.D. degrees.

Directed Readings in Pharmacology
Fall, spring, and summer. 1–3 credits each topic. By arrangement with the instructor. Letter grade or S/U option. Pharmacology faculty. Reading and discussions. These courses are offered to small groups or to individual students.

VETPR 742 Receptor Mechanisms
G. A. Weiland.

VETPR 745 Biochemical Neuropharmacology
G. A. Weiland.

VETPR 747 Amino Acid Neurotransmitters
L. M. Nowak.

VETPR 748 Stimulus-Secreton Coupling
C. M. S. Fewtrell.

VETPR 750 Cell Calcium
C. M. S. Fewtrell.

VETPR 755 Calcium in the Control of Hormone Secretion
G. W. G. Sharp.

VETPR 760 Advanced Topics in Pharmacology
Pharmacology faculty.

PHYSIOLOGY

VETPH 346 Introductory Animal Physiology (also BIOAP 311) (Undergraduate)
Fall. 3 credits. Prerequisites: one year of college-level biology, chemistry, and mathematics. S/U by permission. E. R. Loew. M W F 11:15.
A general course in animal physiology emphasizing principles of operation, regulation, and integration common to a broad range of living systems from the cellular to the organismal level. Structure-function relationships are stressed along with underlying physical-chemical mechanisms.

VETPH 628 Graduate Research in Animal Physiology (Graduate) (also BIO S 719)
Fall and spring. Variable credit. Prerequisite: written permission of section chairperson and staff member who will supervise the work and assign the grade. S/U grades optional. Similar to Biological Sciences 499 but intended for graduate students who are working with faculty members on an individual basis.

VETPH 720 Special Problems in Physiology (Graduate)
Fall and spring. By permission. Laboratory work, conferences, collateral readings, and reports. Adapted to the needs of students.

VETPH 811 and 812 Advanced Physiology Methods I & II (also BIO S 811 and 812 (Graduate)
Fall and spring. 2 credits each. Enrollment limited. Prerequisites: graduate student status or permission of course coordinator. S/U grades only. P. Nathanielis. This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

FACULTY ROSTER

Aquire, Gustavo D., Ph.D., U. of Pennsylvania.
Alfred H. Caspary Professor, Clinical Sciences
Anneworth, Dorothy M., Ph.D., U. of Wisconsin-Madison. Assoc. Prof., Clinical Sciences
Antczak, Douglas F., Ph.D., U. of Cambridge (England) Dorothy Havemeyer McConville Professor of Microbiology and Immunology
Appel, Max J., Ph.D., Cornell U. Prof. Emeritus, Microbiology and Immunology
Appleton, Judith A., Ph.D., U. of Georgia. Assoc. Prof., Microbiology and Immunology
Avery, Roger J., Ph.D., U. of Newcastle-upon-Tyne (England). Prof. Emeritus, Microbiology and Immunology

"
The College of Arts and Sciences—composed of those departments that comprise the humanities and the arts, the basic sciences, mathematics and computer science, and the social sciences and history—is a community of about 4,000 undergraduates and 600 faculty members. The college emphasizes individual choice and responsibility, imaginative curricula, and development of critical thinking and writing. The college is also a graduate school and research center attracting faculty whose research and scholarly and creative writing are found in the various academic faculties and who bring to all their students the profound and applied and professional studies beyond what one undergraduate college alone can offer. Students may draw upon the knowledge and facilities of the other undergraduate colleges at Cornell to supplement their studies. Abundant variety and outstanding quality among many fields, including interdisciplinary fields, give the college its distinctive character. The richness of the curriculum is extraordinary; there is no course that all students must take, and there are nearly two thousand from which they may choose. By choosing courses each semester, students design their own education. They strike a balance between developing known interests and exploring new subjects. They sharpen their verbal and quantitative skills. They also come to understand more thoroughly the Western tradition and learn something about the non-Western world and its peoples. An education in the liberal arts means honing one's critical capacities, learning more about oneself in nature and culture, and gaining real experience with views of the world radically unlike one’s own. All this is highly individual, and the college relies on each student and faculty adviser to select sensible, challenging, and appropriate courses.

Yet the faculty believes that each student's education should have certain common qualities. These include familiarity with several different ways of knowing that are reflected in the natural sciences, in the social sciences, and in those achievements of intellect and imagination that are the focus of the humanities and the arts. In addition to these general areas of knowledge, students study foreign languages, acquire effective writing and quantitative skills, and concentrate on one particular field to develop, as fully as possible, the powers of imaginative and critical thinking. To accomplish these objectives, the college has certain requirements for graduation.

Summary of Basic College Requirements for Graduation

1) Freshman Writing Seminars: two courses. (See John S. Knight Writing Program. p. 563.)

2) Foreign language: proficiency in one language or qualification in two. (See below.)

3) Distribution requirements. (See below.)

4) Breadth requirement. (See below.)

5) Major. (See below.)

6) Electives: four or five courses (at least 15 credits) in courses not used to fulfill other requirements and not in the major field.

7) Residence: eight full-time semesters, unless student completes all other requirements in fewer than eight semesters and meets the additional criteria to accelerate graduation. (See below under "Acceleration.")

8) Minimum number of courses: thirty-four courses. A two-credit course counts as half a course; a six-credit language course counts as one and one-half courses; a one-credit course does not count toward this requirement. (See below under "Courses and Credits.")

9) Credits: a total of 120 academic credits, of which 100 must be taken in the College of Arts and Sciences. (See below under "Non-credit courses.")

10) Physical education: completion of the university requirement (two one-credit courses). Please note that physical education credit does not count toward graduation or toward the 12-credit minimum required for good academic standing each semester. (See p. 13.)

11) Application to graduate. (See below under "Graduation.")

Foreign Language Requirement

The faculty considers competence in a foreign language essential for an educated person. Studying another language helps students understand language itself, our fundamental intellectual tool, and more fully opens another culture for exploration. The sooner a student acquires competence, the more useful it will be. Hence, work toward the foreign language requirement should be undertaken in the freshman and sophomore years. Courses in foreign languages and/or literature are taught in the College of Arts and Sciences by the following departments: Africana Studies and Research Center, Asian Studies, Classics, German Studies, Modern Languages, Near Eastern Studies, Romance Studies, and Russian Literature. The language requirement may be satisfied in one of two ways:

1) by attaining proficiency in one language or

2) by attaining qualification in two languages.

Proficiency

Proficiency may be attained in some languages by passing an intermediate (usually 200-level) Cornell course (or Chinese or Japanese 161). Some introductory language courses are taught at the 300- or 400-level (for example, Near Eastern Studies 333–334); these do not confer proficiency. Proficiency can also be earned by examination. A score of 4 or 5 on an AP language exam earns three credits but does not carry with it proficiency. However, a student who received a score of 4 or 5 on an AP language exam can earn proficiency and an additional three credits by scoring high enough on the CASE (Cornell Advanced Standing Examination), which is given during orientation week. On the other hand, a score of 4 or 5 on an AP literature exam in French, German (German offers a combined language/literature exam), or Spanish earns proficiency, as well as three credits. Such students should also take the CASE to see if they can earn an additional three credits. Students with appropriate scores on Cornell Language Placement tests or SAT II examinations are also eligible to take the CASE (see chart below).

Qualification

Qualification may be attained in any of the following ways:

1) Three years of high school study in any one language gives qualification in that language. No demonstration of competence is necessary. Note, however, that this route to qualification does not guarantee entrance into an intermediate level course. Students who want to continue studying the language must be placed in the appropriate course by an examination. Being placed below the intermediate level does not cancel the qualification.

2) Passing the requisite Cornell course: 102, 123, or 134 in most languages taught by the Department of Modern Languages: Chinese 110, 112, or 114; Japanese 160; Korean 102 or 110, Near Eastern Studies 102 or 122 in Hebrew, 112 in elementary Arabic; Classics 103 or 104 in Greek, 106 or 107 in Latin; 152 in Sanskrit; AS&RC 154 in Swahili.

Note: Except in the case of Sanskrit, completion of language sequence 131–132 does not constitute qualification.

3) A score of 600 in French, 580 in German, and 590 in Italian or Spanish on the SAT II taken in high school or a score of 56 or higher on the appropriate Cornell LP (Language Placement) test. Students may earn a score of 56 on the placement test at the end of a course numbered 122 (second semester of the introductory sequence) and consequently attain qualification without taking 123, the third semester of the introductory sequence. However, with a score of 56, it may be worthwhile to take 123.

4) By departmental or (when no placement test is available) individual examination at Cornell.

Requirements for Graduation

1) Freshman Writing Seminars: two courses. (See John S. Knight Writing Program, p. 563.)

2) Foreign language: proficiency in one language or qualification in two. (See below.)

3) Distribution requirements. (See below.)

4) Breadth requirement. (See below.)

5) Major. (See below.)

6) Electives: four or five courses (at least 15 credits) in courses not used to fulfill other requirements and not in the major field.

7) Residence: eight full-time semesters, unless student completes all other requirements in fewer than eight semesters and meets the additional criteria to accelerate graduation. (See below under "Acceleration.")

8) Minimum number of courses: thirty-four courses. A two-credit course counts as half a course; a six-credit language course counts as one and one-half courses; a one-credit course does not count toward this requirement. (See below under "Courses and Credits.")

9) Credits: a total of 120 academic credits, of which 100 must be taken in the College of Arts and Sciences. (See below under "Non-credit courses.")

10) Physical education: completion of the university requirement (two one-credit courses). Please note that physical education credit does not count toward graduation or toward the 12-credit minimum required for good academic standing each semester. (See p. 13.)

11) Application to graduate. (See below under "Graduation.")

Foreign Language Requirement

The faculty considers competence in a foreign language essential for an educated person. Studying another language helps students understand language itself, our fundamental intellectual tool, and more fully opens another culture for exploration. The sooner a student acquires competence, the more useful it will be. Hence, work toward the foreign language requirement should be undertaken in the freshman and sophomore years. Courses in foreign languages and/or literature are taught in the College of Arts and Sciences by the following departments: Africana Studies and Research Center, Asian Studies, Classics, German Studies, Modern Languages, Near Eastern Studies, Romance Studies, and Russian Literature. The language requirement may be satisfied in one of two ways:

1) by attaining proficiency in one language or

2) by attaining qualification in two languages.

Proficiency

Proficiency may be attained in some languages by passing an intermediate (usually 200-level) Cornell course (or Chinese or Japanese 161). Some introductory language courses are taught at the 300- or 400-level (for example, Near Eastern Studies 333–334); these do not confer proficiency. Proficiency can also be earned by examination. A score of 4 or 5 on an AP language exam earns three credits but does not carry with it proficiency. However, a student who received a score of 4 or 5 on an AP language exam can earn proficiency and an additional three credits by scoring high enough on the CASE (Cornell Advanced Standing Examination), which is given during orientation week. On the other hand, a score of 4 or 5 on an AP literature exam in French, German (German offers a combined language/literature exam), or Spanish earns proficiency, as well as three credits. Such students should also take the CASE to see if they can earn an additional three credits. Students with appropriate scores on Cornell Language Placement tests or SAT II examinations are also eligible to take the CASE (see chart below).

Qualification

Qualification may be attained in any of the following ways:

1) Three years of high school study in any one language gives qualification in that language. No demonstration of competence is necessary. Note, however, that this route to qualification does not guarantee entrance into an intermediate level course. Students who want to continue studying the language must be placed in the appropriate course by an examination. Being placed below the intermediate level does not cancel the qualification.

2) Passing the requisite Cornell course: 102, 123, or 134 in most languages taught by the Department of Modern Languages: Chinese 110, 112, or 114; Japanese 160; Korean 102 or 110, Near Eastern Studies 102 or 122 in Hebrew, 112 in elementary Arabic; Classics 103 or 104 in Greek, 106 or 107 in Latin; 152 in Sanskrit; AS&RC 154 in Swahili.

Note: Except in the case of Sanskrit, completion of language sequence 131–132 does not constitute qualification.

3) A score of 600 in French, 580 in German, and 590 in Italian or Spanish on the SAT II taken in high school or a score of 56 or higher on the appropriate Cornell LP (Language Placement) test. Students may earn a score of 56 on the placement test at the end of a course numbered 122 (second semester of the introductory sequence) and consequently attain qualification without taking 123, the third semester of the introductory sequence. However, with a score of 56, it may be worthwhile to take 123.

4) By departmental or (when no placement test is available) individual examination at Cornell.
Placement in Language Courses and Advanced Placement Credit

Placement into language courses and advanced placement credit are separate results of examinations.

Placement

Entering students who have had two or more years of high school study in a language who have been awarded credit for language work at another college or university or who are native speakers, bilingual, or have spoken the language at home, may enroll in a course in the same language only after being placed by examination. The placement exam may have been taken in high school (SAT II, taken after the last course, or AP, if the score was 4 or 5) or at Cornell (LP test). Students may, but need not, retake a language test if a year or more has passed since last taking it. Being placed into a 200-level course does not earn credit toward the degree. Credit is earned only for high school work equivalent in level to language courses numbered 200 and above at Cornell.

Placement Tests and Advanced Placement Credit

The type of test depends upon the language and the student's level of achievement:

1) Eight languages offer scheduled placement and advanced standing tests at the beginning of each semester: Chinese, French, German, Italian, Japanese, Korean, Russian and Spanish. The schedule is available from the Department of Modern Languages, 203 Morrill Hall; it is also posted on the Web at: http://dml.comell.edu/html/place/testschedule.html. Please note that the advanced standing examination in French, German, Italian, Russian, and Spanish is called the CASE: Cornell Advanced Standing Examination. Eligibility for the CASE may be determined from the placement tables below. In Russian only, all students seeking placement take the CASE.

Native speakers of Spanish who have completed their secondary education in a Spanish-speaking country do not take the CASE. For these students, the Spanish program offers a walk-in service, the Native Language Accreditation for Spanish, in the third week of September and the first week of February. Students interested in this service should contact either David Cruz de Jesus or Eleanor Dozier in 323 Morrill Hall. Spanish-English bilinguals who do not fit the definition of "native speakers," and whose test scores make them eligible, should take the CASE.

2) Arabic: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

3) Greek, Ancient and Modern: departmental examination, Department of Classics, 120 Goldwin Smith Hall.

4) Hebrew: departmental examination, Department of Near Eastern Studies, 360 Rockefeller Hall.

5) Latin: departmental examination, Department of Classics, 120 Goldwin Smith Hall.

6) Other languages: consult the list of contact persons, available from the Department of Modern Languages, 203 Morrill Hall; it is also posted on the Web at: http://dml.comell.edu/html/place/contacts.html

* Students who have a score of 65 of higher on the LPI, or 690 or higher on the SAT II, or an AP score of 4 or 5 may enroll in Italian 201 or 203 without taking the CASE.

* Students who have a score of 65 of higher on the LPS, or 690 or higher on the SAT II, or an AP score of 4 or 5 may enroll in Spanish 200, 201, 203 or 213 without taking the CASE.
Language Requirement Exemptions and Substitutions

Outright waivers of the requirement are never granted. However, if appropriate, alternative courses are arranged. Legitimate requests for exemptions require evidence of inability to learn foreign languages in a classroom setting. Most students provide documentation of learning disabilities relating to foreign language acquisition (e.g., an auditory processing problem) to Joan Fisher in the Office of Equal Opportunity, 234 Day Hall, 255-3976. Other students who may never have been tested for a disability reveal it through repeated and dedicated but vain attempts in formal language courses. A poor grade in a Cornell introductory language course or taking the LP exam repeatedly and unsuccessfully are not adequate evidence.

Students who wish to request a substitution for the normal requirement should meet with Dean Waitbridge, associate director, Office of Admissions, 172 Goldwin Smith Hall. If Dean Waitbridge determines that the request has merit, the student then meets with the Language Substitution Review Committee in the Department of Modern Languages. This committee makes the final decision for or against a substitution. If a substitution is allowed, it then works with the student on selection of substitute courses.

Distribution Requirements

In satisfying the distribution requirements, students become acquainted with a broad range of subject matter and points of view in the college and liberal arts and sciences, and they explore areas that may be entirely new to them. Although students may complete the requirements over the eight semesters, they can take advanced courses in many subjects they find intriguing only if they have previously completed the introductory prerequisites.

Students must take a total of nine courses (of three or more credits each) for the distribution requirements: four courses from Groups 1 and 2 below, at least two of which are from Group 1 and at least one of which is from Group 2 (for example, one chemistry, one physics, one geology, and one mathematics); five courses from Groups 3 and 4 below, with at least two in each group and two in the same department (for example, one course in sociology, one in history, one in history of art, and two in theater arts).

1. Physical and Biological Sciences

In fulfilling the science distribution requirement, students must take at least one course from the primary list of courses and may select additional courses from the supplementary list.

Primary list:

Astronomy: all courses except 233
Chemistry: all courses
Geological Sciences: all courses
Physics: all courses

Biological Sciences: all courses except 152, 200 (unless permission of the associate director is obtained, 208, 209, or 367). The following courses are especially suitable for the distribution requirement because they have no prerequisites: 101–104, 105–106, 107–108, 109–110, 154, 170, 184, 192, 202, 207, 212, 240, 241, 264 plus 260, 275. Note that introductory biology can count for distribution only when completed as a two-semester sequence: 105–110, 105–106, or 101 and 103 plus 102 and 104, or 104–107–108, or a combination of the first term of one sequence and the second term of another.

Supplementary list:

Animal Science: 100, 150, 212
Anthropology: 101, 208, 275, 371, 390, 474, 490
Applied and Engineering Physics: 110
Biological and Society: 301
Entomology: 212
Food: 200
Materials Science and Engineering: 277
Natural Resources: 201, 210, 301
Nutritional Science: 115
Plant Breeding: 225
Plant Pathology: 301
Psychology: 223
Soils, Crops, and Atmospheric Sciences: 131, 231

2. Quantitative and formal reasoning

Biometry and Statistics: 215
City and Regional Planning: 320
Computer Science: 100, 211, 212
Economics: 319, 320, 321
Industrial & Labor Relations: 210, 211
Linguistics: 216
Mathematics: all courses except 101 and 109
Operations Research & Industrial Engineering: 115
Philosophy: 231, 331, 431, 436
Physics: 205, 209, 210
Psychology: 350
Sociology: 301

If students choose two courses from this list to satisfy part of the distribution requirement, those two courses may not have significant overlap. For example, students may not choose two beginning courses in statistics.

Under exceptional circumstances and upon petition, certain Cornell courses not listed above under Group 2 (courses such as those appearing on the following auxiliary list) may be used to satisfy the requirement in quantitative and formal reasoning. The petition should provide a persuasive rationale both in terms of the student’s course of study and in terms of meeting the goals of the requirement.

Auxiliary list: Agricultural Economics 310; Agricultural Engineering 151; City and Regional Planning 321; Industrial and Labor Relations 312; Linguistics 421, 450; Psychology 472–473 (a sequence of two two-credit courses which may count only in its entirety as one course).

3. Social sciences and history

American Studies: 101, 102, 201, 202, 320
Anthropology: all courses except 101, 208, 275, 371, 390, 451, 452, 453, 454, 474, 490
Archaeology: 100, 201, 202, 203, 204, 263, 275, 317, 353, 355, 362, 370, 405, 409, 458, 493, 494
Asian Studies: courses in Asian anthropology, economics, government, history, linguistics, or sociology

Biological and Society: 301, 342, 407, 427
City and Regional Planning: 100, 101

Cognitive Studies: 101, 201
Economics: all courses except 317, 318, 319, 320, 321
Engineering: 250, 292

Government: all courses

History: all courses

Linguistics: all courses except 131, 132, 251, 252, 315, 316

Near Eastern Studies: 244 and all other courses in Near Eastern archaeology and history

Religious Studies: 150, 203, 239, 244, 248, 251, 257, 258, 263, 264, 265, 320, 322, 335, 345, 350, 365, 368, 393, 442, 443, 451, 459

Sociology: all courses

4. Humanities and the arts

African Studies: 202, 210, 211, 265, 285, 303, 304, 310, 422, 425, 432, 435, 450

American Studies: 101, 102, 201, 202, 324
Anthropology: 290, 451, 452, 453, 455

Archaeology: 100, 221, 309, 351, 352, 357, 380, 423, 434, 435, 520, 629

Asian Studies: 208, 211, 212, 215, 218 and other courses in Asian art, literature, religion, or culture

Biological and Society: 205, 206

Classics: courses at the 200-level and above in Classical civilization, art, and archaeology; Classical languages at the 200-level and above

Comparative Literature: all courses

English: all courses at the 200-level and above

French Literature: all courses

German Studies: all courses

History of Art: all courses

Italian Literature: all courses except 205
Music: one course of at least three credits, excluding musical performance, organizations, and ensembles. If a student chooses to satisfy part of the distribution requirement with more than one music course, an acceptable sequence may include four credits in musical performance, organizations, or ensembles combined with introductory, theory, or history and culture courses. (Students may count performance credits as only one course toward distribution.)

Near Eastern Studies: courses in Near Eastern civilization or literature, including 244 and language courses at the 200-level and above.

Philosophy: all courses except 191 and courses in logic

Russian Literature: all courses

Science and Technology Studies: 205, 206, 286, 381, 384, 389, 390, 481, 681

Spanish Literature: all courses

Theatre, Film and Dance: all 3- or 4-credit courses at the 200-level or above except technical production studios

Restrictions on Applying Courses to the Distribution Requirements

1) Advanced Placement Credit and Credit from Other Institutions

Students may apply up to two courses of approved advanced placement or transfer credit towards distribution requirements in Groups 1 and 2 (physical/biological sciences and quantitative/formal reasoning), as long as they take at least one course from the primary list in science at Cornell. Transfer credit applied to distribution in Group 2 (quantitative/formal reasoning) must be in mathematics or computer science, it may not be in other quantitative subjects, for example, statistics or logic.

Students may apply no advanced placement or transfer credit from other institutions toward satisfaction of the distribution requirements in Groups 3 and 4 (social sciences/history and humanities/arts).

Students who transfer to the college from another institution or who enter through the Mid-Year Freshman Program are under the above rules for advanced placement credit, but are eligible to have credit for coursework taken at their previous institution count towards all distribution requirements. Transfer students receive a detailed credit evaluation when they are accepted for admission.

2) Freshman writing seminars may not count towards any distribution requirement.

3) No single course may satisfy more than one distribution requirement. However, students may count courses in their major towards distribution. Courses offered or cross-listed by their major department may not be counted towards any distribution category beyond the usual category of the major department itself. For example, a history major may not count a course cross-listed between history and a literature department towards distribution in the humanities.

Breadth Requirements

Students must include in their undergraduate curricula at least one Arts and Sciences course that focuses on an area or a people other than those of the United States, Canada, or Europe, and one course that focuses on an historical period before the twentieth century. (Arts and Sciences courses about Native American cultures may count toward the geographic breadth requirement if they focus on the cultures themselves and not on interaction with European cultures.) Courses that satisfy the geographical breadth requirement are marked with a @ when described in this catalog. Courses that satisfy the historical breadth requirement are marked with a #. Many courses satisfy both requirements, and students may choose to take courses to satisfy both. Students may also apply Cornell courses conferring proficiency in a non-Western language toward the geographical breadth requirement and use courses satisfying distribution, major, or elective (but not writing) requirements in satisfaction of either of the breadth requirements. They may not apply advanced placement or credit awarded by examination or, for students matriculating as freshmen (with the exception of students entering through the Mid-Year Freshman Program), transfer credit to either of the breadth requirements.

The Major

In their last two years, students devote roughly one-half their course-taking to acquiring depth and competence in a major subject. The choice of major does not define a student's intellect or character or lead directly to a lifetime's occupation, although it sometimes does some of each. By majoring, students focus and develop their imaginative and intellectual capacities on a subject they find especially interesting.

Most departments and programs specify certain prerequisites for admission to the major; they are found in the department and program descriptions on the following pages. Students may apply for acceptance into the major as soon as they have completed the prerequisites. To apply, they take a copy of their transcript to an appointment with the director of undergraduate studies in their prospective major. Students must be accepted into a major before the beginning of the junior year. A department or program may refuse admission into the major if the applicant's performance does not meet established standards. A transfer student may not apply advanced placement or credit awarded by examination or, for students matriculating as freshmen (with the exception of students entering through the Mid-Year Freshman Program), transfer credit to either of the breadth requirements.

Available majors

Majors are offered by each of the departments. There are also majors in American studies, archaeology, biology and society, religious studies, Russian and East European studies, and women's studies.

Some students want to pursue an interest that cannot be met within an area major. They may plan, with the help of their faculty adviser, an independent major that includes courses from several departments. See "Independent Major Program," below, under "Special Academic Options."

Double Majors

Only one major is required for graduation. Some students choose to complete two majors. No special permission or procedure is required; students simply become accepted into both majors and find an adviser in each department. Both majors will be posted on the official transcript.

Electives

Of the 54 courses and 120 credits required for graduation, almost one-third are free electives. How students use these electives frequently makes the difference between an ordinary and a truly interesting curriculum. Students must complete at least four courses and at least 15 credits offered outside the major field and not used to fill another requirement. AP credits not otherwise used may be used to fulfill elective requirements. Students may group electives to form a concentration separate from their major or even apply them to a second major. Some simply choose to explore a variety of subjects, while others develop a concentration in one particular department or subject outside Arts and Sciences to gain practical training or specialized knowledge.

Residence

The College of Arts and Sciences is primarily a residential college for students who devote their energy and spirit to full-time study. The faculty believes that integrated, full-time study for a defined period is essential for intellectual and creative development and best prepares people for citizenship and careers.

Consequently, eight semesters of full-time study in the College of Arts and Sciences are integral to earning the A.B. degree. Even if the minimum requirements can be met in fewer semesters, the faculty of the college expects students to take advantage of the resources of the university for eight full terms and obtain as rich and advanced an education in the liberal arts and sciences as possible.

Transfer students from other institutions must spend a minimum of four semesters on the Cornell campus in Ithaca enrolled in the College of Arts and Sciences. Transfers from other colleges at Cornell must spend four semesters on campus in Ithaca as students in the Internal Transfer Division or in the college.

Approved study abroad, SEA Semester, Urban Semester, and Cornell-in-Washington are considered semesters of residence, but not as semesters on the Cornell campus. Nonetheless, students may spend no more than two semesters on such programs and must be on campus during their last semester.
Transfer students, both from other institutions and from other colleges at Cornell, must spend at least four semesters in the college on campus in Ithaca.

Ninth term
Students who can graduate in eight semesters should do so. If a worthy academic plan for a full ninth or tenth semester is approved, the student enrolls in the college as a special student for the additional work. Such a status allows enrollment in a full schedule of courses for full tuition and full use of campus resources, but allows financial aid only from loans or outside sources. Students who need only a part-time schedule of courses in a ninth or tenth term in order to graduate should complete the outstanding courses as part-time students paying pro-rated tuition. Students may spend a ninth term with Cornell aid only with permission of the dean of seniors or the Committee on Academic Records. Such permission is normally granted only to:

1. Students who have been ill or have an exceptionally compelling academic plan.
2. Students attracted late to a field with a hierarchical curriculum (for example, physics).
3. Students who were academically under-prepared for the curriculum at Cornell and needed to begin with a lighter schedule of courses than normal. (See Dean Turner, Academic Advising Center, 55 Goldwin Smith Hall, about this option.)

Part-time study
Students in good academic standing may take a personal leave of absence and enroll in the Division of Continuing Education, but such semesters of part-time study do not count as terms of residence and credits from such semesters may not be used to reduce the terms of residence.

Part-time study in special circumstances
The college and university support students (with aid available as best they can) to make full-time study possible. Rarely and occasionally, however, extraordinary but non-financial personal, academic, or medical circumstances make becoming a part-time student necessary and appropriate. Students in good academic standing who face extraordinary situations or who have documented disabilities may petition the Committee on Academic Records for part-time status and proration of tuition in the college. Students requesting part-time status should discuss their situation with Dean Walbridge if their reason is a documented disability that, under the Americans with Disabilities Act, requires appropriate accommodations. Otherwise, students should meet with the dean of their class.

Part-time study in final semester
Students may complete their degrees as part-time students in fewer than eight semesters of full-time residence only if:

1) They have completed all requirements by the end of the sixth or seventh term, met the criteria for accelerated graduation, and are remaining to complete study beyond what is required for the degree.
2) They have received permission to accelerate, but have been forced to drop or delay a course for reasons beyond their control.
3) They are writing an honors thesis in the eighth semester and can complete all degree requirements by taking two additional courses, one of which is the thesis itself. They must register for the thesis and at least one additional course.

In all cases, approval of the dean of seniors must be sought in the semester prior to the part-time semester and the student must be enrolling for no more than 8 credits.

Courses and Credits

Counting courses and credits
Students must complete at least 34 courses to graduate—that is, an average of four courses during each of six semesters and five courses during each of two semesters. A three- or four-credit course counts as one course; a two-credit course counts as a one-half course. Single-credit courses do not count as part of the 34 except in certain cases when they form a part of a series and two in the same series can be aggregated to count as one-half course (certain offerings in the Departments of Music and of Theatre, Film and Dance). Three one-credit courses do not aggregate to count as one course. A six-credit language course counts as 1 1/2 courses, while the summer Falcon Programs in Asian languages count as ten credits and 2 1/2 courses each. Archaeology and geology fieldwork for more than six credits count as two courses each. Biology 281 counts as 1 1/2 courses. Other five- or six-credit courses count as one course. AP exam scores that result in an award of 3 or 4 credits count as one course; those in language that result in 6 credits count as 1 1/2 courses; those in biology that result in 6 credits count as two courses; those that result in an award of 8 credits count as two courses.

Students must also complete 120 credits, 100 of which must be from courses taken in the College of Arts and Sciences. Liberal arts courses approved for study abroad during a semester or academic year of full-time study (not summer study) and courses taken in certain off-campus Cornell residential programs may be counted toward the 100 credits required within the college and also toward the required 34 courses. Credits earned in other colleges at Cornell, or in any subject at U.S. institutions other than Cornell, do not count as part of the 100 nor, for students matriculating in Fall 1994 or after, do advanced placement credits count as part of the 100. The only exceptions for courses (usually no more than three) that certain departments accept from other colleges at Cornell as fulfilling major requirements and for no more than two courses that an advisor accepts as part of a completed and established cross-college, inter-disciplinary concentration.

Using courses towards more than one requirement
A course may fulfill more than one college requirement, under the following conditions:

1) A course may be used to fulfill a distribution requirement and also a major requirement.
2) A one-semester course in foreign literature (not language) that is acceptable
Advanced placement credit
See p. 5. Advanced placement credit counts as part of the 120 credits and 34 courses required for the degree. It does not count as part of the 100 credits required in Arts and Sciences, since application to distribution requirements is restricted, as explained above under Distribution.

Summer session credit
A student may earn credit toward the degree by completing courses in Cornell’s summer session or by petitioning to take summer courses at other colleges. Students should consult their advisers regarding summer study plans.

Credit for summer courses not taken at Cornell must be approved by the appropriate Cornell department. Approval forms and information are available in the Academic Advising Center, 55 Goldwin Smith Hall and from Robin Perry, Office of Admissions, 172 Goldwin Smith Hall. Credit earned in summer courses other than those at Cornell will not count toward the 100 credits required in the college (including summer or orientation programs abroad) and may be applied only to part of the Group 1 and 2 distribution requirements. Transcripts from other institutions must be sent to Robin Perry, 172 Goldwin Smith Hall.

Entering students who want to receive credit toward the degree for courses completed during the summer before matriculation in a summer session away from Cornell should obtain approval forms as soon as possible and have transcripts sent to Robin Perry, 172 Goldwin Smith Hall, during the summer before matriculation. Credits completed in Cornell summer sessions will be awarded automatically.

Summer session at Cornell or elsewhere does not count toward the eight-semester residence requirement.

Transferring credit earned away from Cornell while on leave of absence
Students may petition to transfer credits from other accredited institutions for work completed while on leave of absence. Petitions are approved by the department and 172 Goldwin Smith Hall. The relevant department will decide whether the course is comparable in quality to Cornell courses. Credit approved for transfer counts as part of the 120 required for graduation and as part of the 34 course credits required for the degree. It does not count among the 100 credits required in Arts and Sciences and cannot be used toward graduation in fewer than eight semesters. Its application to distribution and breadth requirements is restricted as described above under Distribution.

Transferring credit (for transfer students from another institution or from another Cornell college)
Transfer students must successfully complete at least 60 credits and 16 courses at Cornell; they must be in residence in the college for four regular semesters (summer session does not count toward the residence requirement). The college evaluates credit earned either at another school or college at Cornell University or at another accredited institution of collegiate rank, including advanced placement credit awarded by those colleges, and determines the number of credits and courses the student may apply toward the various requirements for the Bachelor of Arts degree at Cornell. Evaluations of transfer credits are normally provided when students are notified of their admission.

Physical Education
See “University Requirements for Graduation,” p. 13. The college does not count physical education credit toward the 120 credits required for graduation, but twelve credits required for good academic standing each semester.

SPECIAL ACADEMIC OPTIONS

Degree Programs
The following five programs allow students to work toward more than one degree or to alter the regular college or major requirements.

Independent Major Program
The Independent Major Program allows students to design their own interdisciplinary majors to pursue a subject that cannot be found within an established major. Proposals for an independent major must be equivalent in breadth, breadth of the independent major, well suited to the student’s academic preparation, and consistent with a liberal education. Proposals must also be supported by a faculty adviser and are assessed by a board of faculty members. Independent majors substitute for established majors, but students must still satisfy all the other requirements for the baccalaureate degree. Students should contact the director of the Independent Major Program, Academic Advising Center, 55 Goldwin Smith Hall, for further information. Deadlines for submitting independent major proposals are listed below on the calendar supplement for the College of Arts and Sciences.

College Scholar Program
The College Scholar Program frees up to forty students in each class from the usual college requirements for a degree and allows them to design their own curricula. It is meant to serve students whose interests and talents would benefit from a little more academic freedom than other students have, who demonstrate exceptional promise, and who show the maturity to plan and carry out, with the help of their adviser, a well-designed program of studies. College Scholars do not all design the same kind of program: some, for instance, pursue diverse interests, while others integrate a variety of courses with a common theme.

College Scholars must complete 120 credits of course work (100 in the college), 34 courses, and, unless they receive permission from the program to accelerate, eight full terms of undergraduate study. They must complete the physical education requirement. All College Scholars must complete a senior project. They are not required to complete or fulfill the general education requirements, although members of the College Scholar Advisory Board believe that the spirit of the college requirements is a good one.

Each applicant to the College Scholar Program is asked to write an essay, which is due the last Wednesday in April of the freshman year. Mid-year freshmen apply by that date in their first spring semester in the college. Students should contact the Academic Advising Center.
Double-Degree Program with Other Colleges

The Dual-Degree Program enables especially ambitious students to pursue programs of study in two colleges. Dual-degree candidates may earn both a Bachelor of Arts degree from the College of Arts and Sciences and (1) a Bachelor of Science degree from the College of Engineering or (2) a Bachelor of Fine Arts degree from the Department of Art in the College of Architecture, Art, and Planning or (3) a Bachelor of Science degree in urban and regional studies from the Department of City and Regional Planning in the College of Architecture, Art, and Planning or (4) a Bachelor of Science degree in architectural history from the Department of Architecture in the College of Arts and Sciences and the first year of the Master's of Engineering program should apply no earlier than the ninth semester.

Double Registration with and Early Admission to Professional Schools

Registration in the senior year of the College of Arts and Sciences and the first year of Cornell Law School, Cornell Medical College, or the Johnson Graduate School of Management is permitted for exceptionally well-prepared students who have earned 105 credits before the start of the senior year and have been accepted by one of the above-named professional schools may be permitted to register simultaneously in the college and in one or another of these professional schools during the seventh and eighth terms. They earn the A.B. degree after the first year of professional school.

Students with eight or fewer credits and two or fewer courses to complete may apply to enter the Master of Engineering program during (but no earlier than) the eighth semester; double-degree students may enter this program no earlier than the ninth semester. They earn the bachelors degree(s) after one semester of graduate school.

Students interested in the joint program with the Law School or the Graduate School of Management, or in early admission to the Master of Engineering program should apply to the relevant program. Students interested in the joint program with Cornell Medical College must contact the health careers coordinator, 203 Barnes Hall. All candidates should confirm their eligibility with the dean of seniors, Academic Advising Center, 55 Goldwin Smith Hall.

Teacher Education in Science and Mathematics

Students at Cornell may pursue teaching credentials in biology, chemistry, earth science, general science, mathematics, and physics. Teacher Education in Science and Mathematics (TESM) is a university program jointly conducted by the departments of education and mathematics. Although TESM offers options for undergraduate and graduate study, most students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching degree (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates, usually during their sophomore year.

For more information, contact the TESM student support specialist at 255-9255 or the program coordinator, D. Trumbull, 255-3108.

Special-Interest Options

The following options do not alter the college's requirements but enable students to pursue special interests within the usual programs.

Informal Minors

Some students organize electives within a discipline or department. Such informal minors can be developed with the help of the departmental directors of undergraduate studies, but are not noted on the transcript.

Concentrations

Established interdisciplinary concentrations, described in the pages following the descriptions of the departments and their curricula, provide structures for organizing electives. Completed concentrations are noted on the transcript.

Independent Study

Independent study affords students the opportunity to pursue special interests or research not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the independent course, must agree to provide continuing supervision of the work. Students must prepare a proposal for independent study (proposal forms are available in the Academic Advising Center, 55 Goldwin Smith Hall). In one semester students can earn up to six credits with one instructor or up to eight credits with more than one instructor.

Undergraduate Research Program

An excellent way to benefit from being an undergraduate at a research university and at Cornell in particular is to become an apprentice in on-going faculty research. About 400 students participate each year in creating new knowledge and earn independent study credit for what they learn and contribute. They sharpen their critical and creative abilities and can test their interest in pursuing a research career. Sometimes they publish their work.

The Undergraduate Research Program gathers information about research opportunities in most disciplines of the liberal arts and sciences, guides students in finding further opportunities—both on campus and elsewhere, and both during the academic year and during the summer—helps students prepare for research and present themselves as candidates for apprenticeships. Other students locate research opportunities independently through faculty whose courses they have audited through their major departments, or through published materials.

The Cornell Undergraduate Research Board, an undergraduate organization, conducts an annual open house to help students get started in research and an annual forum at which undergraduates present their work.

Students interested in this program should see Dean Williams, Academic Advising Center, 55 Goldwin Smith Hall.

Language Study

FALCON (Full-Year Asian Language Concentration). FALCON allows students who are interested in the Far East to study Chinese, Indonesian, or Japanese exclusively for one year. They gain proficiency in the language and familiarity with the culture.

Students who are interested in the Far East should be aware of the opportunities here to pursue rapid and thorough beginning studies on campus with the objective of studying abroad later—in China, Japan, or Southeast Asia. Students interested in this program should contact the Department of Modern Languages, 203A Morrill Hall (607-255-4298; e-mail: falcon@cornell.edu).

Language House Program

Language House Program

A complement to classroom cultural and linguistic instruction, the Language House Program combines residential and academic opportunities for developing and practicing conversational skills in French, German, Italian, Japanese, Mandarin Chinese, Russian, and Spanish. It helps prepare students who plan to study abroad and helps return to students share their cultural experiences while further increasing their language skills.

Students interested in this program should see Academic Administrator Daniel Evert, 136 Goldwin Smith Hall.

Prelaw Study

Law schools neither require nor prefer any particular program of study; they do seek students with sound training in the liberal arts and sciences. It is important that students plan a program in which they are interested and do well. Beyond that, students are advised to take courses that will develop their powers of precise, analytical thinking and proficiency in writing and speaking.

The college offers a concentration in law and society. Students should work toward completion of this concentration because they find it interesting, not because they believe it will convince law schools of their interest.

The adviser for students in the College of Arts and Sciences who are applying to law school is Dean Cox, Office of Admissions, 172 Goldwin Smith Hall.

Premarked Study

The breadth and depth afforded by a liberal arts education are invaluable for people who plan medical careers, whether they intend to practice or go into research. Such training has a profound effect on the doctor's usefulness to patients, and it affords the flexibility of mind that is needed for major research undertakings. Medical and dental schools do not prescribe or even prefer a particular major; they do, however, require particular undergraduate courses, and most students are well advised to begin chemistry in their freshman year. Students who are interested in medical careers are urged to visit the Health Careers Office, 203 Barnes Hall.
The adviser for students in the College of Arts and Sciences who are planning careers in medicine is Dean Turner, Academic Advising Center, 55 Goldwin Smith Hall.

Off-Campus Programs

Many students find it important to their majors or to their overall academic programs to study off campus or abroad for one or two semesters. When it makes academic sense, the college encourages its students to pursue such studies and grants credit toward the degree for work satisfactorily completed.

Study Abroad

All students planning to study abroad apply through Cornell Abroad; please see the All students planning to study abroad apply for one or two semesters. When it makes academic sense, courses specially designed for foreigners.

The college encourages wherever possible study at foreign institutions alongside their degree candidates rather than study in self-contained programs that offer courses specially designed for foreigners. The primary goals of this educational immersion are to learn firsthand the modes of inquiry, methods of analysis, and educational values of higher education offered to students of another country and to involve students in social relationships with peers who may hold new and unexpected range of social attitudes.

Many students go abroad to pursue work in their majors. Focused academic work in an appropriate institution abroad can prepare students for advanced study or honors work in the final semesters of work in Ithaca.

The college advocates study abroad that enables students to become competent enough in another language to experience daily life, develop social relationships, and accomplish formal course work in that language. Students who intend to study abroad in a country where the host language is not English must demonstrate a serious commitment to learning the language through course work before studying abroad; proficiency in the language is generally the prerequisite. At least one area studies course or one course in the history, culture, economics, politics, or social relations of the country of destination must be part of every student's preparation for study abroad.

Students planning to study abroad need solid academic credentials to do so productively and successfully. The college requires a minimum overall GPA of 3.0 for all Cornell course work and good academic standing in the semester immediately before going abroad.

Study abroad is possible during the sophomore or junior years or during the first semester of the senior year. Study abroad in the final semester is rarely approved.

Important steps to prepare for study abroad include:

- substantial progress with college distribution requirements;
- admission to a major and a faculty adviser in the major;
- clear academic agenda for study abroad;
- appropriate study of the country or region of destination, especially language study.

Study abroad can earn up to 15 liberal arts and sciences credits per semester of full-time course work as long as the curriculum abroad is consistent with that of the college. A maximum of 10 credits is awarded for each trimester of study outside the scope of the liberal arts and sciences may earn non-Arts credits. Students must carry a full course-load as defined by the host institution. Students may spend up to two semesters abroad. Only those who complete all required credits and continue study of the host language while abroad. Only in exceptional circumstances will the college approve programs which, in non-English speaking countries, provide no language training.

All courses taken abroad will appear on the Cornell transcript and grades earned are reported in the system of the host institution. Grades earned through course work abroad do not, however, become part of the Cornell GPA.

Students who transfer to Cornell must complete a minimum of four semesters of residence on campus in Ithaca and may not study abroad during one of those four semesters.

Applications to study abroad must have the support of a faculty adviser in the major and the approval of Dean Terrell in the Academic Advising Center, 55 Goldwin Smith. Although students investigate options for study abroad and submit final applications through the Cornell Abroad office, Arts and Sciences applicants submit to the college an essay describing the academic rationale for study abroad, an outline of prospective courses to be taken and any other relevant materials.

Summer Residential Programs in Archaeology

During the summer months students may participate in a Cornell-sponsored archaeological project. In recent years the program has organized archaeological projects in Central America, Greece, Israel, Italy and New York State. Students should contact the Archaeology Program for information about the sites currently available.

Marine Science

Shoals Marine Laboratory is a seasonal field station that offers a variety of courses and experiences designed to introduce undergraduates to the marine sciences. The laboratory is located on Appledore Island, six miles off the Maine/New Hampshire coasts. Students should contact the Division of Biological Sciences for further information.

Cornell-in-Washington

The Cornell-in-Washington program offers students from all colleges within the university an opportunity to earn full academic credit for a semester in Washington, D.C. Students take courses from Cornell faculty, conduct individual research projects, and work as externs. The Cornell-in-Washington program offers two study options: 1) studies in public policy, and 2) studies in the American experience. The program also offers unique externship opportunities: students serve as externs in a federal agency, congressional office, or non-governmental organization and take part in a public policy or humanities seminar. They define and carry out individual research projects under the supervision of Cornell faculty. Potential externships are arranged through, and approved by, the Cornell-in-Washington program. For further information, see p. 19 or inquire at 471 Hollister Hall, 255-4000. Students who wish to study in Washington during their final semester must petition the college for permission to do so; they should first consult with the dean of seniors, Academic Advising Center, 55 Goldwin Smith Hall, 255-5004.

Fieldwork

Sometimes it is appropriate for students to include fieldwork as part of their major. A three-member faculty committee helps the student plan the project, arranges for ongoing supervision, and evaluates the project at the end of the term. Fieldwork almost always involves writing a long paper or several short ones, as well as practical experience. Application for fieldwork must be presented in advance to the Committee on Academic Records for approval. A maximum of 15 credits in fieldwork may be earned. For further information students should contact an advising dean in 55 or 172 Goldwin Smith Hall.

ADVISING

The following advisers and offices provide academic advising or information on college procedures and regulations.

Faculty Advisers

All new students are assigned a faculty adviser. The adviser helps students plan programs of study and advises them about ways to achieve their academic goals. Advisers may also help students with study or personal problems or may direct them to other offices on campus where help is available. Academic difficulties may frequently be solved or avoided if students and advisers recognize problems early. Advisers and new advisees meet first during orientation week to discuss course selection. New students are encouraged to see their advisers again early in the term, before it is too late to drop courses, to discuss their academic program and to become better acquainted. Advisers and advisees meet at least once each semester to discuss courses for the following year. Students who advise wish to petition for an exception to college rules.

Student Advisers

Each freshman is supplied with a list of student advisers who provide information about the college's requirements, courses, and instructors and about life at Cornell.
REGISTRATION AND COURSE SCHEDULING

Major Advisers
After acceptance into a major, students are assigned a major adviser, a faculty member in the major department, with whom they make many of their most important academic decisions at Cornell. The adviser eventually certifies the completion of the major. The major adviser should be consulted by the student about all academic plans, including honors, study abroad, acceleration, and graduate study. The adviser's support is especially important if a student petitions for an exception to the requirements for the degree.

Academic Services
The Academic Advising Center, 55 Goldwin Smith Hall, 255–5004 and the Office of Admissions, 172 Goldwin Smith Hall, 255–4833, offer resources for faculty and student advisers and for students themselves and their parents. Advising deans are available to help students define their academic and career goals and to help with special academic options and exceptions to college rules.

Lynne S. Abel—255–5004
Thak Chaloemtiarana—255–4833
Gerry Cox—255–4833
Ken Gabard—255–5004
Lawrence Lamphere—255–4833
Maria S. Terrell—255–5004
Janice Turner—255–5004
Peggy Walbridge—255–4833
Marilyn Williams—255–5004

Enrollment in Courses in the College of Arts and Sciences

New Students
During orientation week, new students attend briefings and other informational meetings, meet with faculty advisers, and sign into courses.

Continuing Students
Continuing students select and schedule up to five courses during the semester prior to the one in which the courses will be taken. Students who do not "pre-register" during the designated period may have difficulty securing places in the courses they most want. Before signing into courses, students plan their programs and discuss long-range goals with their faculty advisers. In addition, all students are welcome to discuss programs and plans with an advising dean in the Academic Advising Center, 55 Goldwin Smith Hall, or the Office of Admissions, 172 Goldwin Smith Hall. At the beginning of each term, students find their schedules and confirm the accuracy of their records on "Just the Facts."

Limits on Numbers of Courses and Credits
To meet the 34-course requirement, students must normally take four courses during each of six semesters and five courses during each of two semesters. To meet the 120-credit requirement, students must average 15 credits per semester. (AP credit and/or summer credits may reduce the numbers of courses and credits.)

Minimum number of credits per semester
To maintain good academic standing as a full-time student, students must enroll in at least twelve credits per semester; if for compelling personal or academic reasons students need to carry fewer than twelve credits, they should consult their faculty adviser and an advising dean. Permission is by petition only; it is freely given for first-semester students.

Maximum number of credits per semester
First-term freshmen must petition to register for more than eighteen credits; other students may register for more than eighteen credits only if their previous term's average was a 3.0 or higher. No more than twenty-two credits may be taken in a regular semester without permission of the Committee on Academic Records. Students who fail to receive approval for excess credits from the committee run the risk of having only 18 credits for the semester count toward the degree.

Attendance
Attendance in classes is a matter between students and their instructors. If a student cannot attend classes because of illness or family crisis, the Academic Advising Center will notify instructors at the request of the student or the family. Nonetheless, the student must arrange to make up examinations or other work with each instructor. A student who will be absent because of religious holidays or athletic competitions must discuss arrangements for making up work with his or her instructors well in advance of the absence. A student who must miss an examination must also consult with the professor in advance. Alternative arrangements are at the discretion of the instructor.

Adding and Dropping Courses
After course enrollment (pre-registration), students may not adjust their schedules until after the third week of classes, unless (1) the instructor approves; (2) the student's graduation date will be recalculated; (3) a student to withdraw for a highly unsatisfactory reason must consult an advising dean. Students not requesting a leave and failing to register for a term will be withdrawn from the college. The Committee on Academic Records may require a student to withdraw for a highly unsatisfactory academic record.

Withdrawals
A withdrawal is a permanent severance from the university and from status as a degree candidate. Students planning to withdraw should consult an advising dean. Students not requesting a leave and failing to register for a term will be withdrawn from the college. The Committee on Academic Records may require a student to withdraw for a highly unsatisfactory academic record.

Transferring within Cornell (Internal Transfer)
Internal transfer from one college or school at Cornell into another is attractive for many students whose interests have changed. Students who want to transfer should discuss their eligibility with a counselor in the new school or college.
In some cases, students who want to transfer into the College of Arts and Sciences may transfer directly. In other cases, they may be referred to the Internal Transfer Division. During the term immediately preceding transfer into the College of Arts and Sciences, students should select at least 12 credits of courses in the College of Arts and Sciences with a B average and without any grades of Incomplete, any S-U grades (unless only S-U grades are offered for that particular course), or any grades of "P." Satisfying this minimum requirement does not, however, guarantee admission. Admission to the college is based on consideration of the student’s entire record at Cornell and the high school record, not just the work of one semester. Interested students should see Dean Lamperee, 172 Goldwin Smith Hall.

ACADEMIC STANDING

Students are in good academic standing for all terms if they successfully complete at least 12 degree credits by the end of the term and receive no more than one D and no F or U grades. If a student completes only three courses, all of which have more than 12 credits each, in addition, students are expected to make acceptable progress toward satisfying requirements for the degree, and to earn grades of C (not C-) or better in at least 100 of any credits for the degree. Courses listed above under "Noncredit courses" do not count towards good academic standing.

Academic Actions

Students who are not in good academic standing will be considered for academic action by the Committee on Academic Records or by one of the deans of the college.

Warning

Any student who fails to maintain good standing will, at a minimum, be warned. The warning may be given by an advising dean or by the Committee on Academic Records. A warning is posted on a student's unofficial college transcript but is not reported to the university registrar and does not appear on official transcripts.

Required leave of absence

A student in serious academic difficulty may be required by the Committee on Academic Records to take a leave of absence, normally for a full year. Usually, but not always or necessarily, the Committee on Academic Records warns students before suspending them. Before being allowed to return and reregister in the college, students must describe what they did on leave and how they resolved their problems and submit a plan for completing the degree. In some cases the students will be required to furnish evidence that they are ready to return before being allowed to reregister in the college. Students who request to return in less than a year must present to the committee exceptionally strong evidence of their readiness to return. "Required leave" and the date are posted on the student's transcript.

Required withdrawal

The Committee on Academic Records may dismiss a student from the college because of a highly unsatisfactory record for one term or for failure to make satisfactory overall progress in grades, credits, or the require-

ments of the major. This action expels the student permanently from the college. "Required withdrawal" and the date are posted on the student’s transcript.

Students being reviewed for academic action are urged to present evidence that will help explain their poor academic performance. Students may appeal a decision or action of the committee if they have new relevant information. They must consult an advising dean about appealing.

Forgery on Forms

Forging signatures or credentials on college forms is an academic offense; sometimes it constitutes academic fraud. In all cases of forgery on academic forms, the effect of the forged documents shall be negated. Students may then petition properly to do whatever they attempted to do improperly. Such incidents will be recorded in the Academic Integrity Hearing Board confidential file for forgery. If a student forges more than once or if the forgery would advance the student's academic standing unfairly or fraudulently or if, for any other reason, the situation requires some response, the Academic Integrity Hearing Board might make a different recommendation, such as a notation on the student’s transcript, suspension, or dismissal.

GRADE REPORTS

Letter Grades

See Grading Guidelines, page 12.

S-U Grades

The S-U (satisfactory-unsatisfactory) option allows students to explore unfamiliar subjects or take advanced courses in subjects relatively new to them without being under pressure to compete with better prepared students for grades. Students must select their grading option during the first three weeks of the term (virtually no exceptions to this deadline are granted). A grade of S is equivalent to a grade of C- or higher; a grade of U, which is equivalent to any grade below C-, is a failing grade equal to an F. S means the student receives the credit specified for the course. U means no credit is given. A few courses in the college are graded exclusively S-U; in that case, the final grade appears on the transcript as SX or UX.

Courses that will count toward satisfaction of major requirements should not be taken for an S or U grade unless the department grants permission. Students may elect the S-U option in courses used to satisfy the distribution, language, and elective requirements, provided that such courses do not also count toward major requirements or serve as prerequisites for admission to the major. Students are advised to use the S-U option sparingly if they intend to apply to graduate school or for transfer to another college. There is no limit on the number of courses each term for which students may elect the S-U grade, but within the 120 credits required for the degree, a minimum of 80 credits must be in courses for which a letter grade was received.

Grades of Incomplete

A grade of incomplete signifies that a course was not completed before the end of the term for reasons beyond the student's control that are acceptable to the instructor. Students must have substantial (more than 50%) equity in the course; that is, they must be able to complete the remaining work without further registration and must have a passing grade for the completed portion. When a grade of incomplete is reported, the instructor submits a form stating what work must be completed, when it must be completed, and the grade earned if the work is not completed by that date. When a final grade is reported, it is recorded on the official transcript with an asterisk and a footnote explaining that this grade was formerly an incomplete.

Students must resolve any incompletes with their instructors before graduation.

R Grades

R designates two-semester or year-long courses. The R is recorded on the student's transcript at the end of the first term. The grade recorded at the end of the second term evaluates the student's level of performance in the course for the entire year. The total of credits earned for the whole course is listed each term.

Grade Reports

Students should periodically check their courses and grades on "Just the Facts" to be sure that they are recorded correctly.

Class Rank

The college does not compute class rank.

GRADUATION

Application to Graduate

In the first semester of their senior year, students complete an application to graduate so that the college can check each student’s plan for fulfilling college requirements. This process is intended to help seniors identify problems early enough in the final year to make any necessary changes in course selection to satisfy those requirements. Meeting graduation requirements is the student’s responsibility. Problems that are discovered, even late in the final term, must be resolved by the student before the degree can be granted.

Degree Dates

There are three degree dates in the year: May, August, and January. Students who plan to graduate in August may attend graduation ceremonies in the preceding May. Students graduating in January are invited to a special recognition ceremony in December; they may also attend graduation ceremonies in the following May.

The Degree

The College of Arts and Sciences grants only one degree (no matter what the student's major): the A.B. (or B.A.). A.B. is the abbreviation of the Latin name for the degree, "Artium Baccalarius," or translated into English, B.A., "Bachelor of Arts."
Honors

Dean's List

Inclusion on the Dean's List for academic excellence is an honor bestowed by the dean of the college semester by semester. The criteria are to identify and include about the top 30 percent of students, are subject to slight change from semester to semester, and are available in the Academic Advising Center, 55 Goldwin Smith Hall.

Bachelor of Arts with Honors

Almost all departments offer honors programs for students who have demonstrated exceptional ability in the major and who have completed original independent research. The honors programs are described by individual departments in the following sections. The degree of Bachelor of Arts with honors will be conferred upon students who, in addition to having completed the requirements for the degree of Bachelor of Arts, have elected to complete the honors program in their major and have been recommended for honors by their major department, the Independent Major Program, or the College Scholar Program. Concentrations do not offer honors programs.

Bachelor of Arts with Distinction

The degree of Bachelor of Arts with distinction in all subjects will be conferred upon students who have completed the requirements for the degree of Bachelor of Arts, if they have met the following requirements by the end of their final semester:
1. completed at least 60 credits while registered in regular sessions at Cornell;
2. ranked in the upper 30 percent of their class at the end of the seventh semester, or next-to-last semester for transfers and accelerants;
3. received a grade below C- in no more than one course;
4. received no failing grade;
5. maintained good academic standing, including completing a full schedule of at least 12 credits, in each of their last four terms; and
6. have no Incompletes remaining on their records.

CALENDAR SUPPLEMENT

All of the dates in the university calendar at the front of this volume apply to all Cornell students. Listed below are some additional dates that are of importance for students in the College of Arts and Sciences.

ADMINISTRATION

ANTHROPOLOGY

The range and complexity of the field of anthropology requires active collaboration between the student and a faculty adviser in developing an individualized program of study. To enter the anthropology major, a student must pass one course in each of the two broad introductory areas of anthropology: "Nature and Culture" and "Culture and History" listed below under the heading "Introductory Courses." Provisional acceptance into the major is possible before completing these courses, with permission from the Director of Undergraduate Studies in anthropology. When students first enter the major, they work with their adviser to develop a preliminary program of study built around their own interests and goals.

In the first semester of the junior year, the student and adviser formalize a concentration reflecting the special interests of the student and select a set of courses from those listed below as a program of study. Once the concentration is developed, they submit the plan to the Anthropology Curriculum Committee for comment and advice. Examples of possible concentrations are Latin American ethnology, contemporary identity politics, nature and culture in human history, prehistory of the Americas, anthropology and literature, anthropology and social change, ethnomusicology, anthropology and the arts.

AMERICAN STUDIES

See under Special Programs and Interdisciplinary Studies.

ANTHROPOLOGY

Anthropology is one of the most diverse disciplines in the university. Spanning human evolution, the development and heterogeneity of language and culture, human history, and the diversity of cultures past and present, the field offers students an opportunity to build a program that utilizes a variety of approaches and addresses basic issues about human origins and human life, and maintains a commitment to understanding social life and using this understanding to improve society. Anthropology is an ideal "liberal arts" major. It also serves as a major that, when well designed by the student with their adviser, prepares students for a wide range of professional careers, e.g., law, medicine, foreign service, social services, and business, among others.

Courses for non-majors: Anthropology welcomes non-majors into many of its courses. Unless prerequisites are explicitly stated, 200- and 300-level courses do not have formal prerequisites and can be taken by students without prior experience in anthropology. Such students are welcome in these upper-level courses. For additional information to assist non-majors and students from other colleges in selecting anthropology courses, see the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/).

The Major

The college offers a number of interdisciplinary programs described in the section following the departmental program descriptions.

AFRICANA STUDIES MAJOR

See under Special Programs and Interdisciplinary Studies.

AKKADIAN

See under Department of Near Eastern Studies.

Courses and Departments

SPECIAL PROGRAMS AND AREAS OF CONCENTRATION

See under Special Programs and Interdisciplinary Studies.

-INCOMPLETES
The plan must include a minimum of eight courses in anthropology (including an Anthropology Seminar or seminar) totaling 32 credit hours. When warranted, the adviser is free to approve up to two cognate courses from other departments totaling up to eight credit hours to fill this eight-course requirement. Students may revise their program of study in consultation with their adviser as they move through their studies. Our goal is to provide a close and supportive advising relationship and a strong and coherent structure for the student's major.

In their senior year, anthropology majors are required to take a Senior Seminar. These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboratively the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus, the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

Study abroad and off-campus study programs: The Department of Anthropology encourages students to consider a semester of study abroad or off-campus study developed as an integral part of the student's major concentration and has designated Professor Viranjini Munasinghe as the Anthropology Study Abroad adviser.

The Cornell-Nepal Study Program: The Cornell-Nepal Study Program is a joint program of Cornell University and Tribhuvan University, the national university of Nepal. Qualified juniors, seniors, and first-or second-year graduate students work with faculty from both universities to prepare for and undertake field research projects in Nepal. Students receive 15 credits per semester; students may enroll for either fall or spring semester, or for the entire year. Admission is through Cornell Abroad. For further information, consult David Holmberg or Kathryn March in the Department of Anthropology.

Other anthropologically-relevant study abroad options, using existing Cornell Abroad and off-campus options, can be worked out in consultation with the major adviser, the Anthropology Study Abroad adviser, and Cornell Abroad.

Honors

Honors in anthropology are awarded for excellence in the major, which includes overall grade point average and completion of an honors thesis. Anthropology majors interested in the Honors Program should consult the chair of the Honors Committee in their junior year. To qualify for entrance into the Honors Program, a student must have at least a 3.0 GPA overall and 3.3 GPA in the major, and the consent of a faculty member in anthropology who will guide the honors thesis. After applying to the program and being admitted as a candidate by the Honors Committee, the student will conduct research and write a thesis. This thesis will be evaluated by the faculty research adviser and two other faculty members. Honors (i.e., cum laude, magna cum laude, or summa cum laude) are awarded based on the quality of the thesis and the student's overall record. Honors candidates must consult their major adviser about the honors program early in their junior year.

While working on the thesis during the senior year, students should make use of the Senior Seminar as a place to develop the ideas for their thesis. In addition, students may enroll in Anthropology 483 (fall or spring) "Honors Thesis Research." To complete the thesis, students must enroll in 491 (fall or spring) "Honors Thesis Write-up." Only Anthropology 483 may count toward hours for completion of the anthropology major requirements. The credit hours for these courses are variable, grades for these courses are given by the adviser, and they are based on performance during thesis research and writing.

Any honors candidate whose research directly involves working with human subjects must receive approval for the project from the Cornell University Committee on Human Subjects.

Special Programs and Facilities

Collections: The department has an extensive collection of archaeological and ethnological materials housed in the anthropology collections. A limited number of students can make arrangements to work with the collections.

Library: The library houses some of the most extensive collections of materials on the ethnology of Southeast Asia, South Asia, East Asia, and Latin America to be found anywhere in the United States. The biological anthropology laboratory (McGraw 865) houses an extensive collection of materials for teaching purposes, including 1) human skeletal remains, 2) articulated skeletal and cranial casts of primates, and 3) casts of important fossils in the human lineage.

Independent Study: Specialized individual study programs are offered in Anthropology 497. Topics in Anthropology, a course open to limited number of juniors and seniors who have obtained consent and supervision of a faculty member. Undergraduates should note that many 600-level courses are open to them by consent of the instructor.

Colloquia: The Department of Anthropology holds colloquia almost every week of the semester on McGraw 215. Faculty members from Cornell and other universities participate in discussions of current research and problems in anthropology. Students are encouraged to attend.

For more complete information about the anthropology major, see the Director of Undergraduate Studies, pick up a copy of the major brochure (which includes descriptions of the courses not offered during 1998–99), or visit the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/).

I. Introductory Courses

A. Nature and Culture:

ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind

Fall. 3 credits. M. Small. The evolution of humankind is explored through the fossil record, studies of the biological differences among current human populations, and a comparison with our closest relatives, the primates. This course investigates the roots of human biology and behavior with an evolutionary framework. Fee for lab usage and maintenance, $5.

ANTHR 103 The Scope of Anthropology

Spring. 1 credit. Prerequisite: concurrent enrollment in or prior completion of Anthropology 101 or Anthropology 102. S-U grades only. Staff.

This course is intended for majors or prospective majors in anthropology. Each week a different member of the faculty in anthropology at Cornell will make a presentation on the nature of their work within the field and discuss their interests with students. The course is meant to introduce the range of approaches found in anthropology and help students in planning future course work.

ANTHR 202 Early People: The Archaeological and Fossil Record (also Archaeology 203)

Spring. 3 credits. T. Volman.

A survey of the archaeological and fossil record of human evolution. Contributions by researchers from a variety of disciplines are highlighted, as are the discoveries that have enlivened the study of human evolution for more than a century. Critical evaluation of evidence and interpretation will be stressed. Demonstrations and films supplement the lectures.

ANTHR 211 Nature and Culture

ANTHR 275 Human Biology and Evolution (also Biological Sciences 275 and Nutritional Sciences 275)

Fall. 3 credits. S-U grades optional, with permission of instructor. Offered alternate years.

ANTHR 100 Introduction to Archaeology (also Archaeology 100)

Fall. 3 credits. J. Henderson.

A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate the varied methods and interpretive frameworks anthropologists use to construct them. This course can serve as a platform for both Archaeology and Anthropology undergraduate majors.

ANTHR 102 Introduction to Anthropology: The Comparison of Cultures

Spring. 3 credits. T. Bestor.

An introduction to cultural anthropology through ethnographies, or the descriptive accounts of anthropologists. Through readings and lectures, students acquaint
themselves with a number of cultures from several parts of the world. The cultures range in forms from prehistoric to small-scale tribal societies to those of state societies. Throughout the course, we attempt to make sense of exotic cultures in their own terms. Attention is focused on variation in cultural patterns as they are expressed in social, economic, and ritual practices. In this encounter, the principles of anthropology as a comparative enterprise that poses distinct cultural systems in relief will be developed. Fiction, films, and exercises supplement the formal anthropological materials.

ANTHR 103 The Scope of Anthropology
Spring. 1 credit. Prerequisite: concurrent enrollment in or prior completion of Anthropology 101 or Anthropology 102. S/U grades only. Staff.
For course description, see section I.A.

ANTHR 200 Cultural Diversity and Contemporary Issues
Fall. 3 credits. J. Borneman.
This course will introduce students to the meaning and significance of forms of cultural diversity for understanding contemporary issues. Drawing from films, videos, and selected readings, students will be confronted with different representational forms that portray cultures in various parts of the world and they will be asked to examine critically their own prejudices as they influence the perception and evaluation of cultural differences. We shall approach cultures holistically, assuming the inseparability of economies, kinship, religion, and politics, as well as interconnections and dependencies between world areas (e.g., Africa, Latin America, the West). Among the issues considered: "political correctness" and truth; nativism and ecological diversity; race, ethnicity, and sexuality; sin, religion, and war; global process and cultural integrity.

[ANTHR 202 Interpretive Archaeology (also Anthropology 202)] Fall. 3 credits. Not offered 1998-99.

[ANTHR 204 Ancient Civilizations (also Anthropology 204)] Fall. 3 credits. Not offered 1998-99.

ANTHR 215 Stone Age Art (also Archaeology 215)
Fall. 3 credits. T. Volman.
When did "art," however defined, appear during the human career, how was it produced and for what purposes? These are some of the questions we will investigate through a survey of the discovery, validation, analysis, and interpretation of the earliest art. The course will cover a variety of finds from the Old World, including the well-known cave art of southwestern France and northern Spain, and also consider portable art and decoration. The contributions of new analytical techniques and interpretive approaches are highlighted.

II. Honors and Independent Study

ANTHR 483 Honors Thesis Research
Fall or spring. Credit and hours to be arranged. Prerequisite: consent of the Honors Committee. Staff.
Independent work under the close guidance of a faculty member selected by the student.

ANTHR 481 Honors Thesis Write-up
Fall or spring. Credit and hours to be arranged. Staff.

ANTHR 487 Topics in Anthropology
Fall or spring. Credit and hours to be arranged. Intended for undergraduate students only. Staff.
Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course.

III. Anthropology Major Senior Seminars

In the senior year, anthropology majors are required to take a Senior Seminar. These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboratively the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

ANTHR 489 Anthropology Senior Seminar
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: Anthropology majors only. Fall, D. Holmberg; spring, V. Munasinghe.
This course is a synthesis of each student’s undergraduate concentration in the major. In collaboration, the instructor and the students will develop a series of topics representing the interests of the students. Students will be required to read extensively and present topics.

IV. Nature and Culture

Thinking about nature and culture and their interaction is central to contemporary anthropology. The courses in this section present a biological and evolutionary perspective on behavior, focus on the interplay between nature and culture, and discuss the controversies surrounding these relationships between these dimensions of human life.

[ANTHR 208 The Evolution of Human Motion]

[ANTHR 344 Male and Female in Chinese Culture and Society (also Women's Studies 344)]
Fall. 4 credits. Not offered 1998-99.

ANTHR 370 Environmental Archaeology (also Anthropology 370 and Archaeology 370/670)
Fall. 4 credits. Prerequisite: two previous courses in Archaeology or permission of instructor. T. Volman.
A survey of selected topics in paleoenvironmental analysis and reconstruction, with emphasis on how they inform interpretations of the archaeological record. The course ranges broadly from a general consideration of human ecology and the role of environment in culture change to detailed study of specific techniques and approaches.

[ANTHR 371 Human Paleontology (also Biological Sciences 371)] Fall. 4 credits. Not offered 1998-99.

[ANTHR 390 Primate Behavior and Ecology]

[ANTHR 409 Approaches to Archaeology (also Anthropology 609 and Archaeology 409/609)]

[ANTHR 475 Evolutionary Theory and Human Behavior (also Anthropology 675)]

[ANTHR 490 Primates and Evolution]

V. Human History and Archaeology

Archaeology tells the story of human origins, the invention of farming and settled life, the rise of complex social institutions and technologies, and the viewworlds of the past, while also teaching field and laboratory methods for uncovering the human past.

ANTHR 203 Early People: The Archaeological and Fossil Record (also Archaeology 203)
Fall. 4 credits. T. Volman.
For course description, see section I.A.

ANTHR 215 Stone Age Art (also Archaeology 215)
Fall. 3 credits. T. Volman.
For course description, see section I.B.

[ANTHR 317 Stone Age Archaeology (also Archaeology 317)]
Fall. 4 credits. Not offered 1998-99.

ANTHR 355 Ancient Mexico and Central America (also Archaeology 355)
Spring. 4 credits. J. Henderson.
A survey of the history and prehistory of ancient Mexico and Central America from earliest times through the Spanish invasion, with emphasis on the Aztec and Maya civilizations. Specific topics include: the transition from hunting and gathering to settled farming; the development of complex urban societies; and the development of trade and other mechanisms that linked societies throughout the region. How to make use of historical and ethnographic information on post-contact societies of the region to enrich archaeological interpretation of ancient peoples is a general theme.

ANTHR 370 Environmental Archaeology (also Anthropology 670 and Archaeology 370/670)
Fall. 4 credits. Prerequisite: two previous courses in Archaeology or permission of instructor. T. Volman.
For course description, see section IV.

[ANTHR 371 Human Paleontology (also Biological Sciences 371)] Fall. 4 credits. Not offered 1998-99.

ANTHR 405 Archaeological Research Design (also Anthropology 605 and Archaeology 405/605)
Spring. 4 credits. Prerequisite: permission of instructor. J. Henderson, T. Volman.
Archaeological practice demands careful definition of research objectives and appropriate strategies before excavation or other fieldwork begins. Critical information lies in
the arrangement and association of objects and structures, this context should be a basic concern of any field investigation, particularly when it is destroyed by excavation. This course relies on case studies to illustrate how surveys, excavations, and analytical techniques must be tailored to solving specific problems. A seminar especially recommended for undergraduate majors and graduate archaeologists but open to anyone with a serious interest in archaeology.

ANTHR 409 Approaches to Archaeology (also Anthropology 609 and Archaeology 409/609)  Spring. 4 credits. Not offered 1998–99.

ANTHR 456 Mesoamerican Religion, Science, and History  @ Fall. 4 credits. Not offered 1998–99.

ANTHR 458 Archaeological Analysis (also Anthropology 658 and Archaeology 458/658)  @ Spring. 4 credits. Not offered 1998–99.

ANTHR 493 Seminar in Archaeology (also Archaeology 493)  @  Fall. 4 credits. Not offered 1998–99.

ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also Archaeology 494)  @  Spring. 4 credits. Not offered 1998–99.

VI. Anthropological Thought and Method

As a form of inquiry, anthropology has a long and complex history and utilizes a wide variety of theories and methods. In this section, topics in the history of anthropological thought and a wide variety of anthropological approaches are presented, along with courses focused on the design of anthropological research projects.

ANTHR 215 Stone Age Art (also Archaeology 215)  @  Fall. 3 credits. T. Volman.

For course description, see section I.B.

ANTHR 291 Filming Other Cultures (also Anthropology 691 and Theatre Arts 291/691)  @  Spring. 3 credits. Limited to 20 students. Preference given to students who have taken either Anthropology 102 or Theatre Arts 174. Fee for film screening and maintenance, $35. R. Ascher.

Shortly after the first films were screened, their makers saw in motion pictures a promise for greater understanding among peoples. Was the promise fulfilled? In this discussion course, responses to this question are examined through the study of short, representative films and related readings. The discussions are framed and informed by ideas from anthropology and film studies. For example, we consider: aesthetics, ethics, and responsibility in filming and editing; connections between sound—or lack of it—and image; the treatment of film as a product of Euroamerican culture; cultural assumptions in camera movements, film color, and film pace; indigenous people's presentations of themselves and Euroamerican representations of others, and the moving line that separates fiction from non-fiction films. For one meeting each week, two students, in cooperation with the instructor, are responsible for leading the discussion.

ANTHR 306 Ethnographic Description  Fall. 4 credits. Not offered 1998–99.

ANTHR 324 Anthropology Amongst the Disciplines  Fall. 4 credits. J. Siegel.

ANTHR 362 Democratizing Society: Participation, Action, and Research (also Anthropology 662)  Fall. 4 credits. D. J. Greenwood.

ANTHR 368 Marx: An Overview of His Thought (also Anthropology 668)  Spring. 4 credits. T. Turner.

ANTHR 400 The Craft of Anthropology: Ethnographic Field Methods  Fall. 4 credits. V. Santiago-Irazuzeta.

ANTHR 405 Archaeology Research Design (also Anthropology 605 and Archaeology 405/605)  Spring. 4 credits. Prerequisite: permission of instructor. J. Henderson, T. Volman.

For course description, see section V.

ANTHR 412 Contemporary Anthropological Theory  Spring. 4 credits. B. Lambert.

A survey of the assumptions anthropologists make concerning the nature of society and culture and the explanations they have proposed for social behavior, values, belief systems, and ritual. Problems of social continuity and change will be addressed by way of theories of process, conflict, and transaction. Problems of cross-cultural understanding will be explored through interpretative and structural studies of symbolism, ritual, mythology, concepts of the person, and cultural logic. Examples will be drawn from Western and non-Western societies, past and present.

ANTHR 420 Development of Anthropological Thought  Fall. 4 credits. Limited to 15. A. T. Kirsch.

ANTHR 453 Visual Anthropology  Spring. 4 credits. Enrollment is limited by appropriate space for showing work. S–U grades only. Fee for printing and maintenance, $20. R. Ascher.

The expression of ideas about the human condition through original drawings, graphics, paintings, photographs, cinema, sculpture, and video that take person as subject. Writing can be combined with visual expression, as, for example, in concrete poetry or photographic essays. Projects must conform to two general guidelines: (1) the student must have prior knowledge of the medium chosen or concurrent course work in it, and (2) the project must be one that can be developed throughout the course and benefit from its particular setting. In the first half, the creative work of others is studied. For example, we read Spiegelman's MAUS and view films made by both anthropologists and the people whom they visit. The second half is devoted to hour-long progress reports and full discussions of the work of others in the course.

ANTHR 458 Archaeological Analysis (also Anthropology 658 and Archaeology 458/658)  @  Spring. 4 credits. Not offered 1998–99.

ANTHR 474 Laboratory and Field Methods in Human Biology (also Biological Sciences 474)  Spring. 5 credits. Prerequisite: one year of introductory biology or Anthropology 101 or permission of instructor by preregistration in E231 Corson. Limited to 16 students. Offered alternate years. K. Kennedy.

Practical exercises and demonstrations of modern approaches to the methodology of physical anthropology. Emphasis on comparative human anatomy, osteology, description of skeletal and living subjects, paleopathology, skeletal maturation, and relevant field techniques for the archaeologist and forensic anthropologist. This course includes the dissection of a profused non-human primate.

ANTHR 487 Field Research Abroad  Fall or spring. Credit to be arranged. Intended for undergraduate students only.

ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also Archaeology 494)  @  Spring. 4 credits. Not offered 1998–99.

ANTHR 495 Classic Theorists Seminar  Spring. 4 credits. Limited to 15 students. A. T. Kirsch.
This seminar will concentrate on the writings of Freud, Durkheim, and Weber, major figures in the shaping of contemporary social science. In particular, our concern will be how the works of these three classic theorists contributed to the development of holistic anthropological perspectives as well as to a variety of specialized developments such as "culture and personality" studies, "structural-functional" analysis, and "cultural-symbolic" studies.

VII. Understanding Cultures

Anthropologists examine the diversity of human behaviors, social relationships and structures, economies, political and legal orders, worldviews, logics, languages, symbols, myths, and religions among the many other means human beings invent to create and reproduce social life around the world. Anthropologists work from a holistic perspective to account for differences and similarities across cultures. Anthropologists also take societies and local sociocultural systems as the object of analysis. They collect data primarily through ethno­graphic fieldwork, that is, months or years of participating in and observing of the societies they study. Anthropologists see inherent linkages between the practical and the meaningful dimensions of human existence.

A. Anthropological Approaches to Economy, Society, Law, and Politics

The courses below take as their starting point what are usually defined as the social, political, legal, and economic practices and structures of human life and show how they are shaped culturally and how they shape culture.

ANTHR 217 Ethnicity, Identity, and the State

ANTHR 305 Emotion, Gender, and Culture (also Women's Studies 305) @

ANTHR 313 Anthropology of the City @

ANTHR 321 Sex and Gender in Cross-Cultural Perspective (also Anthropology 621 and Women's Studies 321/631) @
Fall. 4 credits. K. March.
An introduction to the study of sex roles cross-culturally and to anthropological theories of sex and gender. The course examines various aspects of the place of the sexes in social, political, economic, ideological, and biological systems to emphasize the diversity in gender and sex-role definition around the world.

ANTHR 322 Kinship and Social Organization @

ANTHR 326 Economic Anthropology @
Fall. 4 credits. Not offered 1998-99.

ANTHR 328 Conflict, Dispute Resolution, and Law in Cultural Context @

ANTHR 380 State, Nation, and Everyday Life

[ANTHR 426 Ideology and Social Reproduction @
Spring. 4 credits. Not offered 1998-99.]

[ANTHR 460 Culture and International Order
Fall. 4 credits. J. Borneman.
This course focuses on the interplay of culture, understood in the broadest anthropological sense, with international order. We will examine how different models of linguistic categorization are replicated by and interact with one another at the level of culture and the international (or world) system. By bringing together research from different disciplines and time periods, this seminar will hope to explore how an anthropological perspective can inform the study of international order, and, conversely, how an awareness of transnational and transcultural processes can open up more fruitful areas of anthropological research.

[ANTHR 470 Anthropology, Theory, Politics, Performance (also Government 470)
Fall. 4 credits. Not offered 1998-99.]

[ANTHR 479 Ethnicity and Identity Politics: An Anthropological Perspective
Fall. 4 credits. Not offered 1998-99.]

[ANTHR 481 Sex, Money, and Power: Topics in Kinship Theory
Fall. 4 credits. Not offered 1998-99.]

ANTHR 485 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America (also Anthropology 685) @
Spring. 4 credits. B. Fajans (shell). Latin America is characterized today as a region of widespread yet diverse forms of mobilization that appear to be in constant transformation. The "Mad Mothers" of Argentina, indigenous environmentalists, liberation theologists, revolutionaries, ethnic leaders, gay activists, and urban squatters are challenging historicity, engaging in cultural innovation, and articulating in diverse ways with the state and national cultures. This seminar will chart a course between theoretical texts on power and mobilization and examples of ethnography/historical cases of social movements.

B. Interpretive Approaches in Cultural Anthropology

These courses stress symbolic or textual approaches to human society. They take as their object of analysis structures of meaning in such diverse areas as performance and text, myth and religion, views of the self, gender, and the sociology of knowledge. These same topics arise in many of the area-focused courses as well (Section D), but take center stage in the following courses.

ANTHR 291 Filming Other Cultures (also Anthropology 691 and Theatre Arts 291/691) @
Spring. 4 credits. Limited to twenty students. Preference given to students who have taken either Anthropology 102 or Theatre Arts 474. Fee for film screening and maintenance, $25. R. Ascher.
For course description, see section VI.

ANTHR 320 Myth, Ritual, and Symbol (also Religious Studies 320) @
Spring. 4 credits. J. Borneman.
This course examines how systems of thought, symbolic forms, and ritual practice are formulated and expressed in primarily non-Western societies. It focuses on anthropological interpretations of space, time, cosmology, myth, classificatory systems (such as color, totems, food, dress, kinship), taboo, sacrifice, witchcraft, sorcery, and rites of passage (birth, initiation, marriage, death). It will examine both the roles of specialists (soruit mediums, curer, priests, ascetics, etc.) and nonexperts in producing these cultural forms.

ANTHR 322 Magic, Myth, Science, and Religion (also Religious Studies 322) @
Fall. 3 credits (4 by arrangement with instructor). Limited enrollment. A. T. Kirsch.
Surveys various classic anthropological perspectives on the role of religion as a cultural system in human life. Magic, myth, and ritual as cultural markers of and solutions to endemic contradictions, tensions, and transitions are explored. We will ponder the role of science as cultural system and the present state and future prospects for religion in the "modern" and "post-modern" world.

ANTHR 379 Culture, Language, and Thought
Fall. 4 credits. Not offered 1998-99.

ANTHR 406 The Culture of Lives (also Women's Studies 406) @
Spring. 4 credits. K. March.
This seminar will look at persons, lives, cultures and methods in anthropological life history materials. Throughout the seminar we will attend to the evolution of interest in, forms of, and uses for life history materials in anthropology, with special attention to differences in men's and women's lives and life (representations).

ANTHR 408 Gender Symbolism (also Women's Studies 408) @
Spring. 4 credits. K. March.
This seminar explores the propositions that gender is (1) not a collage of cultural universals, but nevertheless is elemented to the construction of the construction of and (2) is not simply or transparently about the sexes, but still is integral to the construction of self and society. We will look at various cultures of gender, the processes and concomitants of their formation, and the place of the people who live and believe in them. In particular we will try to look beyond Western constructions of mutually exclusive, hierarchically related, and universally applied gender.

ANTHR 417 Person, Gender, and Song (also Women's Studies 416) @

ANTHR 432 Culture and Performance, and Performing Culture @

ANTHR 453 Visual Anthropology
Spring. 4 credits. Enrollment is limited by appropriate space for showing work. S.U. grades only. Fee for film screening and maintenance, $20. R. Ascher.
For course description, see section VI.

ANTHR 456 Mesoamerican Religion, Science and History @
Fall. 4 credits. Not offered 1998-99.

ANTHR 460 Culture and International Order
Fall. 4 credits. J. Borneman.
For course description, see section VII.A.
Anthropology constructs its theories in the knowledge about particular places. The systems and thus depends integrally on anthropology are welcome in these courses. Students without prior experience in reference to key anthropological questions. In this course, we will examine, with a critical eye, the production of authoritative representations of and about other people's lives. In this course, we will examine, within the larger national context.

**ANTHR 221 Anthropological Representation: Ethnographies on Latino Culture (also Latino Studies Program 221)**  
Fall. 3 credits. V. Santiago-Irazary. Representation is basic to anthropology. In translating cultures, anthropologists produce authoritative representations of and about other peoples' lives. In this course, we will examine, with a critical eye, the production of representations about U.S. Latino cultures as these are embodied in anthropological texts. Issues to be explored include the relation between the ethnographer and the people s/he is studying, the contexts in which ethnographic texts are produced, and the way they may position different cultural groups within the larger national context.

**ANTHR 230 Cultures of Native North America (also Native American Studies 303)**  
Fall. 4 credits. B. Lambert. A survey of the principal Eskimo and American Indian culture areas north of Mexico. Selected cultures will be examined to bring out distinctive features of the economy, social organization, religion, and worldview. Although the course concentrates on traditional cultures, some lectures and readings deal with changes in native ways of life that have occurred during the period of European-Indian contact.

**ANTHR 303 Asians in the Americas: A Comparative Perspective (also Asian American Studies 303)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 316 Power, Society, and Culture in Island Southeast Asia (also Asian Studies 314)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 333 Ethnology of the Andean Region (also History 333)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 335 Subsistence, Polity, and Worldview in Mainland Southeast Asia (also Asian Studies 335)**  
Spring. 4 credits. Limited to 12 students. Prior course work in Anthropology or Asian Studies encouraged but not required. A. T. Kirsch. A survey of the peoples and cultures of Mainland Southeast Asia from prehistoric to contemporary times. The course examines the social-cultural implications of the subsistence forms found in the region: foraging, swidden horticulture, irrigated rice cultivation, capitalistic developments, and current trends toward a globalized economic order. We examine how these subsistence forms relate to sustainable population size, societal complexity, and forms of governance ranging through "bands" societies, "galactic politics" and contemporary "nation-states." The grounding of these forms of subsistence, governance, and social organizations in indigenous and supra-national religious values and worldviews is of special concern in the course.

**ANTHR 336 Change and Continuity in the Pacific Islands (also History 336)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 337 Gender, Identity, and Exchange in Melanesia (also History 337)**  
Fall. 4 credits. J. Fajans. Anthropologists working in Melanesia (a group of islands in the Western Pacific) have contributed significantly to the development of anthropological thinking in gender studies, concepts of person and identity, and ritual and economic aspects of exchange. This course will introduce students to the concepts of anthropology through the intensive study of a particular culture area. Readings will include classic works, explorers' accounts, literature from the region, and contemporary anthropological studies.

**ANTHR 339 Peoples and Cultures of the Himalayas (also History 339)**  
Fall. 4 credits. K. March. A comprehensive exploration of the peoples and cultures of the Himalayas. Ethnographic materials on the regions in which they live date back to the early 1800s and the region is still open for continued research. The course will introduce students to the concepts of modernity, nationalism and ethnic identity through the intensive study of two contemporary societies: the Sherpa and the Gurung. Readings will include classic works, explorers' accounts, literature from the region, and contemporary anthropological studies.

**ANTHR 343 Religion, Family, and Community in China (also History 343)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 344 Male and Female in Chinese Culture and Society (also Women's Studies 344)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 345 Japanese Society (also History 345)**  
Fall. 4 credits. T. Bester. A survey of the patterns of social structure and cultural identity in contemporary Japan, including ethnographic perspectives on family, community, individualism, social and economic organization; and public culture.

**ANTHR 350 Topics in the Anthropology of Europe (also European Studies 350)**  

**ANTHR 355 Ancient Mexico and Central America (also Archaeology 355)**  
Spring. 4 credits. J. Henderson. For course description, see section V.

**ANTHR 377 The United States (also Latin American Studies 377)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 433 Andean Thought and Culture (also History 433)**  

**ANTHR 443 Religion and Ritual in Chinese Society (also Religious Studies 443)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 444 Japanese Social Organization (also History 444)**  

**ANTHR 445-446 Cornell Gamelan Ensemble (also Music 445-446)**  

**ANTHR 446-447 Ethnology: Anthropology of Island Southeast Asia (also History 446-447)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 450 Seminar in Archaeology (also Archaeology 450)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 477 Ethnology of Island Southeast Asia (also History 477)**  
Fall. 4 credits. Not offered 1998-99.

**ANTHR 493 Seminar in Archaeology (also Archaeology 493)**  
Fall. 4 credits. Not offered 1998-99.

**BIOPL 247 Ethnobiology (also Biology 247)**  
Fall. 3 credits. D. Bates.

**BIOPL 348 The Healing Forest (also Biology 348)**  

**BIOPL 442 Current Topics in Ethnobiology (also Biology 442)**  
Spring. 4 credits. S. Greene.

**HIST 255 Cultures and Ecology in Precolombian Africa (also History 255)**  
Fall. 4 credits. S. Greene.

**HIST 391 Riot and Revolution in 19th-Century Africa (also History 391)**  
Spring. 4 credits. S. Greene.

**HIST 407 The Colonial Encounter (also History 407)**  
Spring. 4 credits. M. Hatch.

**MUSIC 100 Popular Music in America (also Music 100)**  
Fall. 3 credits. M. Hatch.

**MUSIC 245 Gamelan in Indonesian History and Cultures (also Music 245)**  
Fall or spring. 3 credits. M. Hatch.

**MUSIC 445-446 Cornell Gamelan Ensemble (also Music 445-446)**  
445 fall. 446 spring. 1 credit. Prerequisite: permission of instructor. M. Hatch.

**MUSIC 604 Ethnomusicology: Areas of Study and Methods of Analysis (also Music 604)**  
Spring. 4 credits. M. Hatch.

**VIII. Graduate Seminars**

The graduate program in anthropology is described in much greater detail in the Graduate Program brochure which is available through the Director of Graduate Studies. This document is also found on the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/). The seminars described immediately below pertain to the program in socio-cultural anthropology. For information about graduate study in archaeology and biological anthropology, see the Anthropology Department web page.

A core set of seminars is required of all graduate students in socio-cultural anthropology. Anthropology 600, 601, and 602. Anthropology 603 is strongly recommended. These courses are open to graduate students from other related fields. This sequence, and the graduate curriculum in general, is premised on the idea that anthropology is best defined as the comparative study of human social life. This definition resists institutional pressures in the academy to distinguish social science from humanistic or cultural studies and scholarly from more worldly applications. Our most important method, ethnography, is at once scientific and humanistic; disciplinary aspirations refuse to view cultural interpretation and analytic explanation as separable.
values. Furthermore, theory in anthropology is directly related to practice in the world whether in relation to research or more action-oriented pursuits. Consequently, the core sequences as well as most other courses for graduate students are oriented explicitly toward subverting an ideological construction of social life as separable into cultural and social (or political-economic) domains.

ANTHR 600 Proseminar: Culture and Symbol
Fall. 6 credits. D. Holmberg.
This course focuses on an appreciation of symbolic, expressive, and representational forms and processes both as producers and products of social activities. Through the study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiotics, etc., we will investigate how identity and meaning are linked to the practical exigencies of social life. While emphasizing aspects of the discipline generally associated with cultural anthropology, the course will endeavor to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interrelated phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlin, among others, as well as contemporary theories are given careful attention.

ANTHR 601 Proseminar: Social Organization
Spring. 6 credits. T. Turner.
This course focuses on linkages between culture and social institutions, representations and practices. The nature of these linkages is debated from strongly contesting points of view in social theory (structuralist, poststructuralist, utilitarian, hermeneutic, Marxist). Unlike debates in critical theory where the form of contestation has been mainly philosophical, in anthropology, these issues have developed in ethnographic analyses. The course briefly surveys kinship theory and economic anthropology with a focus on imperialism and general issues in social theory. Discussion of attempts to develop dialectical syntheses around the notion of “practice” follows. The issues addressed in this section carry over into the next, colonialism and post-colonialism, in which poststructuralist readings of history are linked to the practical exigencies of social life. Furthermore, theory in anthropology is directly related to practice in the world whether in relation to research or more action-oriented pursuits. Consequently, the core sequences as well as most other courses for graduate students are oriented explicitly toward subverting an ideological construction of social life as separable into cultural and social (or political-economic) domains.

ANTHR 602 The Practices of Anthropology
Fall. 4 credits. D. Greenwood.
The course builds on the foundation of the proseminars but broadens the concept of anthropological practices to include issues about the relations between theory and method, practice/theory relationships, the ethnography of anthropological practices themselves, the construction and critique of the concept of “participant observation,” and a consideration of “ethicals practices” in anthropology. The centerpiece of the seminar is the connection between the students’ own intellectual and existential commitments and their anthropological “practices” and between these and their own emerging research projects.

[ANTHR 603 Research Design
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 604 Praxis and Culture
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 605 Archaeological Research Design (also Anthropology 405 and Archaeology 405/405S)
Spring. 4 credits. Prerequisite: permission of instructor. J. Henderson.
T. Volman.
For course description, see Anth 405, section VI.
[ANTHR 607 Special Problems in Anthropology
Fall or spring. Credit and hours to be arranged. Intended for graduate students only. Staff.
Independent reading course in topics not covered in regularly scheduled courses.
Students select a topic in consultation with the faculty member who has agreed to supervise the course work.
[ANTHR 609 Approaches to Archaeology (also Anthropology 409 and Archaeology 409/409S)
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 610 Language and Myth
Fall. 4 credits. Not offered 1998-99.]
[ANTHR 614 Reading in the Ethnographic Tradition (1800-1900)
Fall. 4 credits. Not offered 1998-99.]
[ANTHR 615 Reading Contemporary Ethnographies (1950-1980)
Fall. 4 credits. Not offered 1998-99.]
[ANTHR 616 Cultural Production of the Person
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 619 Anthropological Approaches to the Study of Buddhism in Asia
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 621 Sex and Gender in Cross-Cultural Perspective (also Anthropology 321 and Women’s Studies 321/631)
Fall. 4 credits. Time to be arranged. Graduate section of Anthr 321. K. March.
For course description, see Anth 321, section VII-A.
[ANTHR 629 Chinese Ethnology
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 632 Andean Symbolism
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 635 Southeast Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course in topics not covered in regularly scheduled courses.
Students select a topic in consultation with the faculty member who has agreed to supervise the course work.
[ANTHR 636 Cognition and Classification
Fall. 4 credits. Not offered 1998-99.]
[ANTHR 637 Theorizing Social Movements, Human Rights and Democracy in Latin America
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 639 The Feminine Symbolic
Spring. 4 credits. Not offered 1998-99.]

ANTHR 641 South Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course in topics not covered in regularly scheduled courses.
Students select a topic in consultation with the faculty member who has agreed to supervise the course work.
[ANTHR 645 Japanese Ethnology
Fall. 4 credits. Not offered 1998-99.]
[ANTHR 647 Death of the Father
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 648 Marriage and Death
Fall. 4 credits. Not offered 1998-99.]
[ANTHR 649 Narrative and the Analysis of Culture
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 653 Myth Onto Film (also Theatre Arts 321 and Program 660)
Fall. 4 credits. Not offered 1998-99.]
[ANTHR 655 East Asian Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course in topics not covered in regularly scheduled courses.
Students select a topic in consultation with the faculty member who has agreed to supervise the course work.
[ANTHR 656 Maya History
Fall. 4 credits. Not offered 1998-99.]
[ANTHR 658 Archaeological Analysis (also Anthropology 458 and Archaeology 458/458S)
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 660 Latino Languages, Ideology and Practice (also Latino Studies Program 660)
Spring. 4 credits. V. Santiago-Tiriraju.
Hispanic ethnic identity in the U.S. is often categorized around the use of Spanish and the issues this raises in an English-dominant society. Drawing from anthropological studies on language as a signifying practice, this course will explore how language is a sign overarching the identity of Latinx people in the U.S. Topics to be explored include linguistic diversity and change, language as an instrument of accommodation and resistance, language maintenance and shift, culturally specific linguistic ideologies, and institutional applications of language.

ANTHR 662 Democratizing Society: Participation, Action, and Research (also Anthropology 362)
Fall. 4 credits. D. J. Greenwood.
For description, see ANTHR 362, Section VI.
[ANTHR 663 Action Research
Spring. 4 credits. Not offered 1998-99.]
[ANTHR 665 Topics in Native American Societies and Cultures
Spring. 4 credits. B. Lambert.
This seminar is intended for undergraduate and graduate students in any field who are prepared to undertake independent research in American Indian Studies. I am particularly interested in how materials from Native American cultures can be used to help solve problems of general anthropological significance and in the contributions Native Americans have made to anthropological and sociological knowledge as teachers and
researchers. However, students will be encouraged to pursue their own interests and will be expected to discuss and work in progress with other members of the seminar. A reading list will be developed to provide a shared background for discussions.

ANTHR 670 Environmental Archaeology
(also Anthropology 370 and Archaeology 370/670)
Fall. 4 credits. Prerequisite: two previous courses in archaeology or permission of instructor. T. Volman.
For course description, see Anthr 370, section IV.

ANTHR 673 Human Evolution: Concepts, History and Theory (also Biological Sciences 673)
Fall. 4 credits. Prerequisite: one year of introductory biology, Anthropology 101, or permission of instructor. Offered alternate years. K. Kennedy.
The historical background of present-day concepts of man’s evolutionary variations and adaptations in space and time is surveyed. The formation of biological anthropology as an area of specific inquiry within the social and biological sciences is reviewed. Students select their own topics within a broad range of readings in the history of Western concepts of reading origins, diversity, and place in nature.

ANTHR 675 Evolutionary Theory and Human Behavior (also Anthropology 478)

ANTHR 680 Theory and Ethnography in the Anthropology of Southeast Asia
Fall. 4 credits. Not offered 1998-99.

ANTHR 682 Perspectives on the Nation (also Asian American Studies 682)

ANTHR 685 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America
Spring. 4 credits. R. J. Bevel.
For course description, see Anthr 485, section VII.A.

ANTHR 690 Ritual and Myth: Structure, Process, Practice

ANTHR 691 Filming Other Cultures (also Anthropology 291 and Theatre Arts 291/691)
Spring. 4 credits. Fee for film screening and maintenance, $35.
For description, see Anthropology 291 and Theatre, Film and Dance 291. Graduate students who register in this course attend the meetings of 291. In addition, they write in-depth studies of one or more films in consultation with the instructor.

ARABIC AND ARAMAIC
See under Department of Near Eastern Studies.

ARCHAEOLOGY
See under Special Programs and Interdisciplinary Studies.

ASIAN AMERICAN STUDIES
See under Special Programs and Interdisciplinary Studies.

ASIAN STUDIES
The Department of Asian Studies encompasses the geographical areas of East Asia, South Asia, and Southeast Asia and offers courses in most of the disciplines of the social sciences and the humanities. Asian studies courses through the 400 level (ASIAN is the prefix) are taught in English and are open to all students in the university. Some of these courses may be counted toward majors in other departments; others fulfill the humanities distribution requirement. Courses listed under Asian Studies offered through other departments may fulfill distribution requirements in history, social sciences, and arts.

The Major
The applicant for admission to the major in Asian studies must have completed at least one area studies course selected from among those listed under the Department of Asian Studies and must receive permission for admission to the major from the director of undergraduate studies. The student must have received a minimum grade of C in this course and in all other courses counted toward the major.
A student majoring in Asian studies is required to complete two courses at the 200 level (a minimum of 6 credits with a grade of C or better) in one of the Asian languages offered at Cornell. The major consists of at least 30 additional credits (which may include up to 6 credits of foreign language study) selected by the student in consultation with his or her adviser from among the courses listed under the Department of Asian Studies and numbered 250 and above. Majors in Asian studies normally specialize in the language and culture of one country and often choose an additional major in a traditional discipline.

Honors
To be eligible for honors in Asian studies, a student must have a cumulative grade average of A- in all Asian area courses, exclusive of language study only, and must successfully complete an honors essay during the senior year. Students who wish to be considered for honors should apply to the director of undergraduate studies during the second term of their junior year. The application must include an outline of the proposed project and the endorsement of a faculty adviser. During the first term of the senior year the student does research for the essay in conjunction with an appropriate Asian studies course or Asian Studies 401. Students of China, Japan and Southeast Asia must also complete Asian Studies 611, 612 or 613 respectively. By the end of the first term the student must present a detailed outline of the honors essay and have it approved by the faculty sponsor and the director of undergraduate studies. The student is then eligible for Asian Studies 402, the honors course, which entails writing the essay. At the end of the senior year, the student has an oral examination (with at least two faculty members) covering both the honors essay and the student’s area of concentration.

Concentration in South Asia Studies
A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in South Asia Studies by completing at least 12 credits of course work in South Asian studies, including Asian Studies 215 (Introduction to South Asia) and four courses or seminars at the intermediate or advanced levels, two of which may be South Asian language courses.
Students taking a concentration in South Asian studies are considered members of the South Asia Program and will have an adviser from the program faculty. (This adviser will be for the student’s concentration and is not a substitute for a student’s academic adviser in his or her major.)
One South Asian graduate course may be taken for the concentration with consent of both the instructor and the adviser. The same applies for one South Asia-related course with a research paper on a South Asian subject. Additional courses may be added if offered with comparable South Asia content.

Concentration in Southeast Asia Studies
A candidate for the Bachelor of Arts or Bachelor of Science degree at Cornell may take a concentration in Southeast Asia studies by completing 18 credits of course work. A recommended plan would include Asian Studies 208 and four courses at the intermediate or advanced stage, two of which could be a Southeast Asian language. Students taking a concentration in Southeast Asia Studies are members of the Southeast Asia Program and are assigned an adviser from the program faculty. Such students are encouraged to commence work on a Southeast Asian language either at the 10-week intensive courses offered by the Southeast Asia Studies Summer Institute or by studying for one semester at IRK Malik, Indonesia; Khon Kaen University, Thailand; and Hanoi University, Vietnam. Fellowships are available for undergraduates through the Cornell Abroad Program.

Intensive Language Program (FALCON)
For those students desiring to accelerate their acquisition of a Chinese or Indonesian, Cornell offers a full-time intensive language program, the Full-Year Asian Language Concentration (FALCON). FALCON students spend six hours a day, five days a week, for periods of up to a full year studying only the language and thus are able to complete as many as twelve hundred hours of
supervised classroom and laboratory work in one year. For further information, students should contact the FALCON Program Office, Department of Modern Languages, 414 Morrill Hall (telephone: 607/255-6457; e-mail: FALCON@cornell.edu).

Study Abroad
Cornell is a member of the Inter-University Center for Chinese Language Study in Taipei and a member of the Council on International Educational Exchange offering study in China at Peking University and Nanjing University. These centers offer intensive training in both spoken and written forms of the languages. The Kyoto Center for Japanese Studies (KCJS) is an undergraduate program for students who want to spend one or two semesters in Japan studying both language and culture. Cornell is a class-A member of the American Institute of Indian Studies, which offers fellowships in India for intensive language study in Hindi, Bengali, and Tamil. Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, cosponsor an academic semester or year in Nepal.

Other opportunities include a junior year abroad at Jawaharlal, in Indonesia, or at the School of Oriental and African Studies, University of London. Many other options for study in Asia exist, including in Indonesia, Thailand, and Vietnam through the Council for International Educational Exchange. Undergraduates should consult Cornell Abroad; graduate students should inquire at the East Asia Program, the South Asia Program, or the Southeast Asia Program offices.

General Education Courses

ASIAN 208 Introduction to Southeast Asia @
Spring. 3 credits. T. Chaloemtaranarat. This course is for anyone curious about the part of Asia with the most diversity; it defines Southeast Asia both as a region and as a set of nation-states that have emerged since 1945 (Burma, Brunei, Cambodia, Indonesia, Laos, Malaysia, Philippines, Singapore, Thailand, and Vietnam) and as a larger cultural world extending from southern China to Madagascar and Polynesia. Students will find a serious, organized introduction to a variety of disciplines and topical approaches to this region, including geography, linguistics, history, religion, and ideology, anthropology, marriage and family systems, music, literacy and literature, art and architecture, agriculture, industrialization and urbanization, politics and government, warfare and diplomacy, ecological and human degradation, business and marketing. The course aims to teach both basic information and different ways of interpreting that information.

ASIAN 211 Introduction to Japan @
Fall. 3 credits. B. de Bary. An interdisciplinary introduction to Japanese society and its history especially designed for students not majoring in Asian Studies. The first part of the course focuses on the historical changes in Japanese society from the eighth century down to the nineteenth century; the second part analyzes modern society from a variety of perspectives. It also addresses the question of how Japan is represented in the U.S. mass media. Guest lecturers from five or six different fields offer their opinions on Japanese history, culture, and politics.

ASIAN 212 Introduction to China @
Spring. 3 credits (4 credits with a special project, consult instructor for information). Staff. An interdisciplinary introduction to Chinese culture especially designed for students not majoring in Asian Studies.

ASIAN 215 Introduction to South Asian Civilization @
Fall. 3 credits (4 credits with a special project; consult instructor for information). D. Gold. An interdisciplinary introduction to the culture and history shared by India and other states of South Asia. Designed for students not majoring in Asian Studies. Guest lecturers will provide the perspective of their disciplines to the general themes of the course: cultural diversity and the role of tradition in contemporary life.

ASIAN 218 Introduction to Korea @
Fall. 3 credits. Y. Kim. An interdisciplinary introduction to Korean history and culture, including geography, ethnography, philosophy, religion, political economy, government, music, and art (sculpture, architecture, and painting), with an overview of Korean history from the Three Kingdoms Period to the present, focusing on the March 1, 1919, Independence Movement, the Korean War, the 1960 Student Revolution, the 1980 Kwangju Massacre, and other events.

Asia—Literature and Religion Courses

The following courses are taught entirely in English and are open to any Cornell student.

ASIAN 250 Introduction to Asian Religions (also Religious Studies 250) @ #
Spring. 3 credits. D. Boucher. A survey of the major religious traditions of India, China, and Japan, focusing on Vedic ritual and Brahmanism, Indian, Chinese, and Japanese Buddhism; the native Chinese traditions of Confucianism and Taoism, and Shinto, Confucianism, and the new religions in Japan. Emphasis will be on the great traditions of these cultures, with frequent reference to the differing realms of popular religions.

ASIAN 277 Meditation in Indian Culture
Spring. 3 credits. D. Gold. This course probes the truths behind traditional claims of the priority of internal practice in Indian traditions. We will examine both practices themselves—techniques of meditation and contemplation, religious ways of using intellect, forms of chant and ritual—and the dynamics through which these have left a wider mark on South Asian civilization. These dynamics include not only the evident reverberations of practice in philosophical reflection and socioreligious institutions, but also wide-ranging processes of stylization, elaboration, and popularization found throughout South Asian culture. In order to get a sense of the experiences treated in classical religious texts, students will be expected to experiment with some basic meditation practices. At least as important for the work of the course (and much more important for the grade) will be the ways in which students simulate these practices within larger South Asian world views as suggested by doctrines, rituals, iconic forms, and literary texts. To keep the interaction between internal practice and external activity central, we will examine both Hindu and Buddhist sources, consistently examining the ways in which similar practices are given distinct shapes by the two religious traditions.

ASIAN 291 Classical Indian Narrative (also Classics 291) @ #
Spring. 3 credits. Not offered 1998-99. C. Minkowski. Reading in translation from the principal story collection of ancient India. Sources will include the Vedas, the Sanskrit epics, the Buddhist Jatakas, the Kathasaritasagara, the Pancatantra, and related collections. Attention will be given to comparisons with Greek narrative, and to the diffusion of Indian narratives into the world’s literature.

ASIAN 311 Modern Korean Culture and Literature @
Spring. 4 credits. Y. Kim. A survey of the literature of the Post-Liberation period (1945-present), with an emphasis on the development of modern Korean poetry and its relation to the intellectual history of this time. Students will read major poetic texts of each period in English translation as well as writings on cultural movements and major arguments in intellectual history.

ASIAN 313 Japanese and Asian Film (also Theatre Arts 313 and Comparative Literature 313) @
Spring. 4 credits. Not offered 1998-99. B. de Bary. The course will explore the relationship between thematic and formal concerns of Japanese film and narratives of modern Japanese history dealing with such issues as the nature of the Meiji Restoration, the rise of Taisho commodity culture, the Pacific War, postwar reconstruction, postmodernity and “new nationalism.” Weekly analyses of specific films will be accompanied by readings that provide historical context and pose relevant interpretive and theoretical questions, particularly those of gender and cultural difference. Study of works by Onn, Mizoguchi, Kurosawa, and Naruse will constitute the introductory portions of the course, followed each year by a series featuring recent works of contemporary directors.

ASIAN 347 Tantric Traditions (also Religious Studies 347) @ #
Fall. 4 credits. D. Gold. This course treats the development of tantric traditions in the Indian subcontinent and beyond. Philosophical, iconographic, cultic, and visionary dimensions of tantra will be discussed. We study different Hindu and Indo-Tibetan traditions, with some attention also paid to tantric developments in East Asian Buddhism.

ASIAN 348 Indian Devotional Poetry
ARTS AND SCIENCES - 1998-1999

[ASIAN 351] The Religious Traditions of India (also Religious Studies 351) @ #
A survey of the relationships between the main currents of Indian religion. The course will first focus on the Hindu tradition and its holistic worldview within the context of the caste system. It will then describe the rise of Jainism and Mahayana Buddhism, as well as Hindu and Buddhist Tantrism, as religious phenomena reflecting the emergence of individualism.

[ASIAN 354] Indian Buddhism (also Religious Studies 354) @ #
A survey of Buddhist tradition in India from the life of the Buddha through the formation of the early schools, to the development of the Mahayana and the emergence of tantric Buddhism. Topics to be considered will include Buddhist thought and practice, the nature of reality and human understanding, and the importance of compassion and emptiness. Attention will be paid to the institutional identity and social function of the Buddhist movements in classical India.

[ASIAN 355] Japanese Religions (also Religious Studies 355) @ #
Fall. 4 credits. J. M. Law.
This course addresses the complexity of religion in Japanese history through a focus on the dominant ideological system of Japanese religious practice and thought—that system commonly referred to as Shinto. In this course, we are interested in understanding the general methodological issues surrounding tradition formation, continuity, change, and revision. The Shinto case reveals the complexity of a given religious system which simultaneously serves as both a cultural ideology and a path for individual spiritual cultivation. A study of Shinto allows us to develop the intellectual frameworks for understanding the dynamics of religious traditions in societies. We will explore the Shinto tradition by looking at 1) the means by which a central study of Shinto human suffering and spiritual liberation, and the importance of compassion and emptiness. Attention will be paid to the institutional identity and social function of the Buddhist movements in classical India.

[ASIAN 373] Twentieth-Century Chinese Literature @ #
A survey of the principal works in English translation, the course introduces fiction, drama, essays, and poetry of China beginning with the Republican era and continuing up to the present in the People's Republic and Taiwan, with an emphasis on social and political issues and literary theory.

[ASIAN 374] Chinese Narrative Literature @ #
Spring. 4 credits. E. Gunn.
Selected works in classical Chinese fiction are read in translation. Major novels, such as The Dream of the Red Chamber and Water Margin, are emphasized.

[ASIAN 375] Japanese Poetry and Prose @ #

[ASIAN 376] Modern Japanese Literature: From Meiji through the Pacific War (also Comparative Literature 369) @ #
Fall. 4 credits. D. Boucher.
We will read Japanese works of fiction, poetry, and critical theory written from the Meiji Restoration into the Showa Period. The course will take up such issues as modernization and the contradictory forces of discovery, imperialism and the non-Western novel, the politics of visibility, gender and representation, and Japanese colonialism. We will consider how writings of critics like Karatani, Fuji, and Layon have complicated modernist schemas of literary development. We will also attempt to explore what Nagahara Yutaka has called the "phenomenology of discrimination" in relation to Japanese literary texts, pursuing contradictions between egalitarianism and discrimination in the legacy of Meiji Enlightenment thought. Reading of non-Japanese (other Asian, as well as African, American, and European) texts raising pertinent theoretical perspectives will be integrated into the course work.

[ASIAN 377] Japanese Tales of Love, War, and the Supernatural @ #
Spring. 4 credits. Alternates with ASIAN 375. K. Brazell.
The romantic adventures of the Shining Prince Genji, the battles of 12th-century samurai clans, the ghosts and demons of folklore, and the adventures of Saikaku's men and women who "loved love" are still very much alive in modern Japanese mass culture—in films, comic books, commercials, TV programs, and video games. This course will survey the original tales (in English translation) to introduce students to this rich array of literature. We will explore some of the changes in the representations of sex and gender, death and dying, and supernatural forces that occurred between the 19th and the 20th centuries. There are no prerequisites.

[ASIAN 383] Introduction to the Arts of China
See ART H 380 for description.

[ASIAN 390] The Sanskrit Epics @ #
Spring. 4 credits. C. Minkowski.
Readings in translation from the two Sanskrit epics, the Mahabharata and the Ramayana, supported by a study of the reception of the epics in later Indian imaginative literature. Attention will also be given to comparative theories of the epic in ancient Indo-European languages.

[ASIAN 393] Images of Humanity in Medieval China (also History 393) @ #
See HIST 393 for description.

[ASIAN 395] Classical Indian Philosophical Systems (also Classics 395 and Religious Studies 395) @ #
Fall. 4 credits. Prerequisite: some background in philosophy or in classical culture. C. Minkowski.

[ASIAN 406] Contemporary Literary Criticism in Korea
Spring. 4 credits. Y. Kim.
A survey of literary criticism and theory from the liberation in 1945 to the 1990s, including the KAPF (engagement movement of nationalism) versus belletristic movement, new criticism, nationalism based upon realism, grass-roots literature movements, postmodernism and the heteroglossia of critical theories. Major arguments of each of these movements will be covered. Also covered will be current movements in Korean literary criticism influenced by the globalized industry of critical theories, including deconstruction, postmodernism, poststructuralism, postcolonialism, cultural studies, feminism, and new historicism.

[ASIAN 411] Chinese Performing Arts @ #
The course will survey drama, music theater, and film in twentieth-century China. Some material will require knowledge of Chinese.]
ASIAN 415 Virtual Orientalisms and the Representation of Japan # Spring. 4 credits. B. de Bary. See RELST 415 for description.

ASIAN 422 Islam in China and Southeast Asia (also Near Eastern Studies 453 and SHUM 449) # Fall. 4 credits. J. Armijo-Hussein. At present the world's Muslim population is estimated to be 1 billion. And although many people equate Islam with Arabs, the majority of the faithful actually live in the Arab Middle East. This course will concentrate on the history of the three Muslim communities spread across Southeast Asia and China: their early history and development, as well as recent movements throughout the region to both revive and strengthen Islam. We will be concentrating on large Islamic communities including those in Malaysia, Philippines, Brunei, Cambodia, Myanmar, Vietnam, and Thailand. The issues we will be addressing include: the changing role of women in Muslim communities; the recent revival of Islamic education; and the increasing use of Islam as a political force. We will also examine the common belief that Islamic movements are inherently anti-Western, anti-democratic, and anti-modern.

ASIAN 423 The Role of Women in Islamic Societies (also Near Eastern Studies 457 and SHUM 423) @ # Spring. 4 credits. J. Armijo-Hussein. Islam is often perceived as a religion inherently oppressive of women, and yet throughout the Muslim world today, it is often the most highly dedicated Muslim women who are the most active supporters of Islamic movements. This course will begin with a survey of early Islamic history, including the important role played by women in the development of the mystical traditions within Islam, and will focus on close readings of Islamic texts. The role of women in Muslim societies will then be surveyed over time and place. As the vast majority of Muslims live outside the Arab Middle East, emphasis will also be placed on the Muslim societies of sub-Saharan African, Western Europe, Central Asia, the Sub-Continent, Southeast Asia and China. Other topics will include the role of education, the changing political and religious significance of the veil, and the depiction of women in popular literature and culture.

[ASIAN 440] Meditation Schools of East Asian Buddhism (also Religious Studies 440) @ # Spring. 4 credits. Prerequisite: ASIAN 250 or equivalent. Not offered 1998-99.

ASIAN 441 Mahayana Buddhism (also Religious Studies 441) @ # Spring. 4 credits. D. Boucher. By reading successive examples of Mahayana Buddhist literature, we will study the formation and evolution of the ideal of the bodhisattva; the understanding of transcendentnal wisdom and the concept of emptiness; and the workings of both the conscious and subconscious mind in the course of spiritual practice. We will include discussion of major philosophical schools, as well as issues of social setting and popular religious practice, in both India and East Asia.

ASIAN 449 History and Methods of the Academic Study of Religion (also Religious Studies 449) # Spring. 4 credits. J. M. Law. See RELST 449 for description.

[ASIAN 460] Indian Meditation Texts (also Religious Studies 460) @ # Spring. 4 credits. Not offered 1998-99. D. Gold. Because texts that record visionary experience, prescribe the practice of contemplation, and present enigmatic utterances are highly valued in Indian tradition, they need to be taken seriously by students of Indian and world civilization. Yet the special problems of interpretation that they present have often caused meditation texts to be passed over in embarrassed, sometimes reverent silence. In this course we will draw on approaches from literary criticism, anthropology, and religious studies to explore a number of the problems to which these texts give rise: In what ways are the apparent differences in experience presented in meditation texts shaped by different cosmologies and ritual practice? Do different literary genres have particular religious implications? What are the relations between convention and experience in the creation of the texts? Readings will be drawn from the Upanishads, devotional verse in the vernaculars, and the classical meditation manuals of Hinduism and Buddhism. Some attention may be given to Indian Sufi materials. No knowledge of Indian languages is required.

ASIAN 463 Readings in Hindi and Urdu Literature @ Spring. 4 credits. D. Gold. Selected topics in Hindi and Urdu literature, with readings in the original, discussions in Hindi-Urdu and English. May be repeated for additional credit with consent of instructor.

ASIAN 470 The Japanese Noh Theater and Modern Dramatists (also Comparative Literature 470 and Theater Arts 470) @ # Fall. 4 credits. Alternates with ASIAN 471. K. Brazell. Several weeks will be spent studying the literary, performance, and aesthetic aspects of the noh theater. Emphasis will be on noh as a performance system, a total theater in which music, dance, text, costume, and props all interact to create the total effect. Then attention will turn to modern theater people who have reacted to noh in some creative way. Choice of dramatists will depend partly on student interests but will probably include Yeats, Brecht, Britten, Claudel, Grozowski, and Mishima. All readings may be done in English translation.

[ASIAN 471] Japanese Theatre (also Theatre Arts 471) @ Fall. 4 credits. Alternates with ASIAN 470. Not offered 1998-99. K. Brazell. A study of traditional forms of Japanese theater. Topics will include ritual and theatre, noh and kyogen, kabuki, and the puppet theatres, and contemporary theatrical use of the traditional forms. Special emphasis will be placed on dramaturgy, acting styles, performance aesthetics, and theories of performer training.

ASIAN 481 Translation and Identities Fall. 4 credits. N. Sakai.

[ASIAN 483] Internationalism, Nationalism, and Modern Japanese Discursive Space @ Fall. 3 credits. Not offered 1998-99. N. Sakai. The late 19th century marks an important transitional period: nation-states formed in Britain, France, Japan, Germany, the United States, and elsewhere sought to become imperial powers, and "internationalism" virtually collapsed. Focusing on Japanese examples but not excluding other cases, we will study the discursive spaces of modern national subjectivity with a view to the problems of ethnicity, colonialism, imperial sexism, violence, historical memory, post-coloniality and academic knowledge. A major critical paper will be required.

ASIAN 496 Tokugawa Literature and Thought @ Spring. 4 credits. N. Sakai. An introduction (in English translation) to literary, theatrical, and intellectual works of the Tokugawa period (1600-1868). We will examine the characteristics of early Tokugawa literary and theatrical works and see how different they are from the literary works of the later Tokugawa period. We will also read the philosophical and philological works on the classics by writers such as Oguru Sorai and Motoori Norinaga to understand the ways contemporary Japanese intellectuals understood cultural activities and culture during the Tokugawa period.

Asia—Graduate Seminars
For complete descriptions of courses numbered 600 or above, consult the director of graduate studies.

ASIAN 601 Seminar: The Philippines (also Government 652) Fall. 3—4 credits. B. Anderson. This reading seminar will focus on the major scholarly works dealing with the modern social history, politics, cultures, and economic problems of the twice-colonized Philippines. The framework will be provided by theories of colonialism, nationalism, and decolonization, and by the literatures of the later Tokugawa period. Other parts of Southeast Asia and Latin America.

ASIAN 602 Southeast Asia Seminar: Topic TBA Spring. 4 credits. Staff.

ASIAN 605-606 Master of Arts Seminar in Asian Studies 605, fall; 606, spring. 2—4 credits. Staff.

ASIAN 607-608 The Plural Society Revisited (also Government 653) Spring. 4 credits. 607 may be taken independently for credit; 607 is a prerequisite for 608. B. Anderson. See GOVT 653 for description.

ASIAN 609 Modern Japanese Studies: The Formation of the Field in History and Literature (also History 609) Fall. 3 credits. J. V. Koschmann. See HIST 659 for description.

ASIAN 611 Chinese Bibliography and Methodology Spring. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. C. d'Orban.

ASIAN STUDIES 375
ASIAN 612 Japanese Bibliography and Methodology
Fall. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. F. Kotas.

ASIAN 613 Southeast Asian Bibliography and Methodology
Fall. 1 credit. Prerequisite: permission of instructor. A. Riedy.

This course is designed to instruct students in methods of identifying and locating sources for the study of Southeast Asia. Emphasis will be on the practical aspects of using various types of bibliographical tools to identify both primary and secondary sources in Southeast Asian and Western languages. Electronic databases and online services as well as traditional printed resources will be covered. Relevant areas of library science will be explained as necessary. Required of honors students and Master of Arts candidates. No foreign language competence is required but a reading knowledge of at least one Southeast Asian language or other Asian language (especially Chinese or Japanese) and a major European language (especially French, Spanish, or Dutch) is highly desirable.

[ASIAN 621-622 South Asia Seminar: Topic to be announced 621, fall; 622, spring. 4 credits. Not offered 1998-99.]

ASIAN 623-624 Topics in South Asia
623, fall; 624, spring. 1 credit. Staff.
A series designed to introduce as well as enhance and build on students’ knowledge of various topics of importance to South Asia (Bangladesh, India, Nepal, Pakistan, and Sri Lanka). Weekly lectures will survey contemporary themes in South Asian scholarship where visiting scholars and members of the Cornell community will discuss a multidisciplinary range of issues. These may include science and nation building; ritual power and resistance; tribal communities and the environment; industrial and agrarian relations; gender and the media; and economic liberalization. A short essay will be required at the end of the course.

A graduate seminar designed to introduce students to theoretical writings about, and related to, translation, conceived both as a linguistic exercise and as a broader field of cultural activity; will include the practice of translation. Limited to graduate students by permission of instructor; must have skill in Classical Chinese, French, or Vietnamese sufficient to begin translating.]

ASIAN 676 Southeast Asian Research Training Seminar
Fall or spring. 3-4 credits. Staff.

ASIAN 701-702 Seminar in East Asian Literature
701, fall; 702, spring. 1-4 credits. Staff.

ASIAN 703-704 Directed Research
703, fall or spring; 704, fall or spring. 1-4 credits. Staff.

Honor Courses

ASIAN 401 Asian Studies Honors Course
Fall or spring. 4 credits. Intended for seniors who have been admitted to the honors program. Staff. Supervised reading and research on the problem selected for honors work.

ASIAN 402 Asian Studies Honors: Senior Essay
Fall or spring. 4 credits. Prerequisite: permission of instructor. A. Riedy.

ASIAN 403-404 Asian Studies Supervised Reading
Fall, spring, or both. 1-4 credits. Prerequisite: permission of instructor. Open to majors and other qualified students. Intensive reading under the direction of a member of the staff.

Literature in Chinese

CHLIT 213-214 Introduction to Classical Chinese @ Fall, 213; spring, 214. 3 credits each term. Staff.
Prerequisite: qualification in Chinese or permission of instructor. May be taken concurrently with Chinese 101-102, 201-202, 301-302. T. L. Mei.

CHLIT 420 T’ang and Sung Poetry @ Spring. 4 credits. Prerequisite: permission of instructor. T. L. Mei.

CHLIT 421-422 Directed Study
Fall or spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff.

CHLIT 423 Readings in Chinese Literature
Fall. 4 credits. T. Leshan.

CHLIT 424 Readings in Literary Criticism
Fall or spring. 4 credits. Prerequisite: reading knowledge of Chinese. T. L. Mei.

CHLIT 426 History of the Chinese Language (also CHIN 403) @ Fall. 4 credits. Prerequisite: reading knowledge of Chinese. T. L. Mei.

CHLIT 605 Seminar in Chinese Fiction and Drama
Spring. 4 credits. Prerequisite: permission of instructor. Staff.

CHLIT 610 Chinese Cultural Criticism
Fall. 4 credits. E. Gunn.

CHLIT 621-622 Advanced Directed Reading: Chinese Historical Syntax 621, fall; 622, spring. 2-4 credits. Prerequisite: permission of instructor. Staff.

Chinese Language

See language courses in the Department of Modern Languages.

FALCON Program—Chinese

Literature in Japanese

JPLIT 406 Introduction to Classical Japanese @ Spring. 4 credits. Prerequisite: permission of instructor. N. Sakai.

JPLIT 421-422 Directed Readings 421, fall; 422, spring. 2-4 credits. Prerequisite: for JPLIT 421, Japanese 402 or equivalent; for JPLIT 422, Japanese 421 or equivalent. Staff.

JPLIT 612 Seminar in Medieval Genres Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. K. Brazell.

This seminar will explore medieval literary genres in terms of the contemporary religious, social, political, and aesthetic discourses. Readings will be in classical and modern Japanese as well as in English.

JPLIT 613 Seminar in Tokugawa Culture and Thought: Otherness, Text, and Body Spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1998-99. N. Sakai.

Graduate-Level Reading Courses

JPLIT 621 Advanced Readings in Pre-Modern Japanese Narrative Literature Fall or spring. 2-4 credits. Prerequisite: permission of instructor. Not offered 1998-99. K. Brazell.

[JTPLT 623] Advanced Readings in Pre-Modern Drama
Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Not offered 1998–99. K. Brazell.

[JTPLT 624] Advanced Readings in Modern Japanese Literature
Spring. 2–4 credits. Prerequisite: permission of instructor. Offered alternate years. N. Sakai.

Japanese Language

See language courses in the Department of Modern Languages.

FALCON Program—Japanese

Indonesian Language

See language courses in the Department of Modern Languages.

FALCON Program—Indonesian

Literature in Korean

[KRKLIT 405] Readings in Korean Literature
Fall. 4 credits. Not offered 1998–99.

[KRKLIT 406] Korean Literature Translation Workshop
Spring. 2–3 credits. Prerequisite: Korean 301–302 or equiv.; permission of instructor. Not offered 1998–99.

Vietnamese

[VTLLIT 222–223] Introduction to Classical Vietnamese
222, fall; 223, spring. 3 credits. Prerequisite: qualification in Vietnamese or permission of instructor. K. Taylor.
This is the first semester of a two-semester sequence of courses introducing students to Han (Classical Chinese as used in the Vietnamese language) and Nom (vernacular Vietnamese character writing). Students will learn to read Han and Nom texts, mostly from the 17th through 19th centuries, including historical records, prose writings, and poetry.

Sanskrit

[SANSK 131–132] Elementary Sanskrit
131, fall; 132, spring. 4 credits each term. Not offered 1998–99.

An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.

[SANSK 251–252] Intermediate Sanskrit
132, spring. 3 credits each term. Prerequisite: Sanskrit 132 or equivalent. A. Nussbaum, fall; C. Minkowski, spring.
Readings from the literature of classical Sanskrit. Fall: selections from the two Sanskrit epics, the Mahabharata and the Ramayana. Spring: more selections from the epics and selections from either Sanskrit story literature or from Sanskrit dramas.

Astronomy Club. The club has access to the guidance of a faculty member. Regular observing and astrophotography at Fuertes Observatory on campus and conducts research projects in the upperclass years. Faculty members on independent study projects under the guidance of a faculty member. Interested students are encouraged to become members of the undergraduate Cornell Astronomy Club. The club has access to the Fuertes Observatory on campus and conducts regular observing and astrophotography sessions. All students are invited to visit the Space Sciences Building, see the exhibits on display there, and consult a faculty member about career plans or choice of courses.

The Major
The purpose of the major in astronomy is to provide in-depth knowledge and education about the nature of the universe. Astronomy relies heavily on preparation in physics and mathematics. Consequently, many courses in these fields are included as prerequisites.

In preparation for the major, a student would normally elect the introductory physics sequence Physics 112-213-214 or 116-217-218 and the complementary pathway in mathematics, Mathematics 311-122-221-222 or 191-192-293-294 (or equivalent).

Students who anticipate undertaking graduate study are urged to elect the honors physics sequence Physics 116-217-218-318-327 if possible. The sophomore seminar Astronomy 235 “Topics in Astronomy and Astrophysics” will provide an introduction to current research in astronomy and astrophysics for prospective majors, but is not required of students who elect to major in astronomy after the sophomore year. Students are also urged to acquire computer literacy.

Acceptance to the major will first be considered after completion of three semesters of introductory physics and mathematics and in general will require a GPA of 3.20 in physics and mathematics courses.

The major requirements stress the importance of building a strong preparation in physical science. The following upper level courses are normally required:

- Physics 314 or 318, 316, 323 or 327, 341 and 445
- Mathematics 421 and 422 (or equivalent, e.g. A&EP 321-2)
- Astronomy 410, 431, and 432

Students interested in planetary studies may substitute one or more appropriate advanced courses upon consent of the major adviser or may pursue a major under the Astronomy 235 "Applications in Astronomy and Astrophysics” program. Students are also encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level. Advanced seniors may enroll in astronomy graduate courses with the consent of the instructor. Students are also encouraged to work with faculty members on independent study projects under the course Astronomy 440 or to apply to a variety of programs at Cornell, Arecibo, and elsewhere that offer undergraduate research assistantships. Nearly all undergraduate majors and concentrators become involved in research projects in the upperclass years. Students whose interest in astronomy is sparked somewhat late in their undergraduate career are encouraged to discuss possible paths with the Director of Undergraduate Studies in Astronomy.

Honor's. A student may be granted honors in astronomy upon the recommendation of the Astronomy Advisers Committee of the astronomy faculty.

Double majors. A double major in astronomy and another subject is possible in many circumstances. However, the set of courses used to fulfill the requirements for each major must be completely independent.
ASTRO 106 Essential Ideas in Relativity and Cosmology
Summer. 3 credits. Prerequisites: high school algebra and trigonometry. Einstein's special and general relativity, which brought about a fundamental change in our conceptual understanding of space and time, will be studied. Correspondence to, and conflicts with, common sense will be pointed out. Applications to various areas will be studied: in special relativity—space travel, equivalence of mass and energy, nuclear fission and fusion, and thermodynamic processes in the sun; in general relativity—motion of light and particles in curved space-time, cosmological models, and the question of whether the universe is open or closed.

ASTRO 107 An Introduction to the Universe
Summer. 4 credits. Identical to Astronomy 105 except for the addition of the afternoon laboratory.

ASTRO 109 Freshman Writing Seminar: Questions in Astronomy
Spring. 3 credits. This class, an introduction to critical, logical thought, will present the basics of the scientific method, how science works in practice, and some simple tests of evidence. We will discuss the evolution of repeatable data into natural law and ideas into accepted theories. Historical illustrations will be drawn from the Copernican Revolution, the Big Bang Theory, and the search for Extraterrestrial Intelligence. We will also examine pseudosciences such as astrology and ufology, compare them to their scientific counterparts, and demonstrate that they consistently fail to meet rigorous scientific standards. Students will be asked to write logical criticism of items in the news and assigned readings from Carl Sagan's Demon-Haunted World and James Burke's "Connections," and design and report on their own small scientific experiments.

ASTRO 195 Observational Astronomy
Fall. 3 credits. Limited to 20 students.
This course provides a "hands-on" introduction to observational astronomy intended for liberal arts students at the freshman and sophomore level. High school mathematics is assumed, but no formal prerequisites. The course objective is to teach how we know what we know about the Universe. The course is set up with 2 lectures and 1 evening laboratory per week. Not all of the evening sessions will be used. Planned exercises include 5 or 6 observational labs (star gazing with binoculars and small telescopes, telescopic observations and CCD imaging of star clusters, nebulae and the planets), solar observations (including observations of the Milky Way Galaxy), plus a selection of exercises from the following: construction and use of simple instruments such as optical spectroscopes, and sun dials, experiments in planetary cratering, collection and study of micrometeorites, computer simulations of planetary orbits and the effects of obliquity on planetary weather; and cosmological explorations using data from the Hubble Space Telescope available on the World Wide Web.

ASTRO 201 Our Home in the Universe
Fall. 3 credits. Assumes no scientific background. Course intended for freshmen and sophomores. R. Giovanelli, M. Haynes.
A general discussion of our relation to the physical universe and how our view of the universe has changed from ancient to modern times. Several main themes are covered over the course of semester: (1) our view of the night sky from the ancient Greeks to the Hubble Space Telescope, (2) the death of stars and the formation of black holes, (3) dark matter and the structure of galaxies and (4) the origin, evolution, and fate of the universe. We present a nonmathematical introduction to these subjects and discuss uncertainties and unresolved issues in our understanding.

ASTRO 202 Our Home in the Solar System
Spring. 3 credits. Prerequisite: some background in science is required. Course intended for freshmen and sophomores. J. Bell.
This writing course is designed to develop an understanding of our home planet as a member of a diverse and fascinating family of objects in our solar system. Discussion will center on how studies of other planets and satellites have broadened our knowledge and perspective of Earth, and vice versa. We will study, debate, and write critically about important issues of science, ethics, and public policy that have emerged from this new found perspective. Topics to be discussed include global warming, nuclear winter, the impact threat, and the searches for extrasolar planets and extraterrestrial intelligence. Our exploration of these and other topics will be up-to-date, interactive, and quite possibly controversial.

ASTRO 211 Astronomy: Stars, Galaxies, and Cosmology
Fall. 4 credits. Intended for engineering and physical sciences freshmen and sophomores. Prerequisite: introductory calculus or coregistration in Mathematics 111 or 191. J. Houck.
The formation and evolution of normal stars, supernovae, pulsars, quasars, and black holes. The interstellar medium. Cosmology and the structure and evolution of galaxies.

ASTRO 212 The Solar System: Planets, Satellites, and Rings
Spring. 4 credits. Intended for first and second year engineering and physical sciences students. Prerequisite: introductory calculus or coregistration in Mathematics 111 or 191; some knowledge of classical physics (mechanics and thermodynamics). P. Nicholson.
An introduction to the solar system, with emphasis on the application of simple physical principles. Topics will include the Sun, nucleosynthesis of the elements, radioactive elements, the planets and planetary interiors, greenhouse models of planetary atmospheres, orbital mechanics and resonances, interrelations between meteorites, asteroids and comets, the jovian planets, icy moons and ring systems, and the search for extra-solar planets.

ASTRO 233 Topics in Astronomy and Astrophysics
Fall. 2 credits. Prerequisites: Physics 112 and 213, Mathematics 112 and 221, or permission of instructor. Intended for sophomores planning to major in astronomy or related fields. M. Haynes, D. Lai.
A seminar course on selected topics in astronomy and astrophysics designed for prospective astronomy majors. Content will vary from year to year, but will include topics from the fields of planetary, galactic, and extragalactic research.

ASTRO 280 Space Exploration
Fall. 3 credits. S. Squyres.
This course provides an overview of space science, with particular emphasis on the solar system, and a detailed examination of a few selected objects, including the planet Mars, the satellites in the outer solar system, and comets. The focus is on methods of collecting information and especially on spacecraft and space missions. Topics will include the design and limitations of instruments. Ethical and political questions associated with space exploration will be discussed. Intended for students with an interest in science, technology, and associated policy issues. No special background in physical sciences, math, or engineering is assumed.

ASTRO 290 Relativity and Astrophysics
Spring. 4 credits. Prerequisites: freshman physics and calculus; knowledge of geometry. J. Wasserman.
This course provides a geometrically based introduction to special and general relativity, followed by consideration of astrophysical applications. Included will be discussion of tests of Einstein's theory of space, time, and gravitation, physics of white dwarfs, neutron stars, and black holes; introduction to modern cosmology.

ASTRO 299 Search For Life in the Universe
Spring. 4 credits. Prerequisites: two courses in any physical science subject or permission of instructor. J. Cordes, Y. Terzian.
The contents of the universe will be surveyed. Theories of cosmic and stellar evolution, and of the formation and evolution of planetary systems, planetary atmospheres and surfaces will be reviewed. Questions regarding the evolution of life and the development of technology will be discussed. Methods to detect extraterrestrial life with emphasis on radio telescopes and associated instrumentation will be presented. Hypothetical communication systems will be developed and discussed.

ASTRO 331 Climate Dynamics (also SCAS 331)

ASTRO 332 Elements of Astrophysics
Spring. 4 credits. Prerequisites: calculus and Physics 213. Physics 214 strongly recommended. R. Giovannelli, D. Lai.
An introduction to astronomy, with emphasis on the application of physics to the study of the universe. Physical laws of radiation, Distance, size, mass, and age of stars, galaxies; and the universe; stellar energy sources and nucleosynthesis. Supernovae, pulsars, and black holes. Galaxies and quasars. Introduction to cosmology. The structure and evolution of planets and of the solar system. Mainly intended for freshmen in science, engineering and science education, interested in astronomy and astrophysics.

ASTRO 410 Experimental Astronomy
Fall. 4 credits. Prerequisites: Physics 214/8 (or 310 or 360), Physics 323/7 (or co-registration) or permission of instructor. J. Cordes, P. Goldsmith, J. Houck.
Observational astrophysics. Major experiments will involve techniques in CCD (charge-coupled-device) imaging, optical photometry, optical spectroscopy, radiometry, radio
spectroscopy and radio astronomy. The experiments involve use of the Hartung-Boothroyd Observatory's 24-inch telescope, a laboratory 2-element radio interferometer, and a radio telescope mounted on top of the Space Sciences Building. The laboratory covers the fundamentals of using astronomical instrumentation and data analysis as applied to celestial phenomena: asteroids, normal stars, supernovas, globular clusters, planetary nebulae, the interstellar medium, OH masers, and galaxies.

**ASTRO 431 Introduction to Astrophysics and Space Sciences I**

Fall. 4 credits. Prerequisites: mathematics above the 200 level and physics above the 300 level, co-registration in Physics 341 and 443 is recommended. D. Li.

A systematic development of modern astrophysical concepts for physical science majors. Stellar structure and evolution, stellar atmospheres, compact objects (white dwarf, neutron star and black hole), planets and brown dwarfs. Current research problems in these areas will be introduced along the way. The emphasis will be on using fundamental physics principles to explain astronomical phenomena. A variety of physics, including elements of general relativity, nuclear physics, solid state physics and fluid mechanics, will be introduced or reviewed in a quick, practical fashion and put into use in solving astrophysics puzzles. At the level of *Astrophysical Concepts* by Harwit.

**ASTRO 432 Introduction to Astrophysics and Space Sciences II**

Spring. 4 credits. Prerequisite: Astronomy 341 or permission of instructor. D. Chernoff.

This course is divided into two broad topics: the astrophysics of the interstellar medium and cosmology. The interstellar medium section will cover thermal equilibrium and radiative transport in HI regions, atomic gas regions, and molecular clouds. The cosmology section will include expansion of the universe, metrics, Friedmann equations, dark matter, cosmological tests, the early universe, and the cosmological production of the elements.

**ASTRO 434 The Evolution of Planets**

Spring. 4 credits. Not offered 1998-99. An introduction to the physical and chemical processes that have been active in altering the environments of planets and satellites from their original to their present state. Theories of the formation of the solar system are revealed with special emphasis on chemical differentiation of the primeval solar nebula. A critical assessment is made of how well the various hypotheses account for the clues left in the meteorite record and how well they explain the current environments of the planets and satellites. The main ideas about the formation and evolution of terrestrial planets, satellite systems, and asteroids are considered in detail. Some specific topics included are the history of the earth-moon system, the probable evolution of Jupiter's Galilean satellites, and the comparative histories of Venus, Earth, and Mars.

**ASTRO 440 Independent Study in Astronomy**

Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Recommended: familiarity with the topics covered in Astronomy 332, 431, or 434. Individuals work on selected topics. A program of study is devised by the student and instructor. Students need to fill out an independent study form, have it signed by the instructor, file the form in the department office, 510 Space Sciences Building.

**ASTRO 485 Atmospheric and Ionospheric Physics (also ELE E 485)**

Fall. 3 credits. Prerequisites: Physics through 214 or equivalent, introductory chemistry, introductory differential equations. P. G. Gershman, D. Farley. The structure and dynamics of the middle atmosphere and the ionosphere are surveyed. Topics include energy balance and thermal structure, global circulation patterns, waves that carry energy from the lower atmosphere to the upper atmosphere, ionization, production and loss of charged particles, coupling of the neutral atmosphere with electric fields, charged particle transports. Observation techniques, including radar and in situ instruments, will be discussed. Comparisons with other planets will be made.

**ASTRO 490 Senior Seminar Critical Thinking**

Spring. 3 credits. Not offered 1998-99. Critical thinking in scientific and nonscientific contexts, with a focus on developments of classical logic and rhetoric, including standards of evidence. Case studies will include examples of competing hypotheses in the history of science, as well as examples from borderline science and medicine, religion, and politics. Stress will be laid on creative generation of alternative hypotheses and their winnowing by critical scrutiny. Topics will include the nature and history of the universe, the nature of reality, the possibilities of life on other planets, and artificial intelligence.

**ASTRO 509 General Relativity**

Fall. 4 credits. E. Flanagan. For description, see PHYS 553.

**ASTRO 510 Applications of General Relativity**

Spring. 4 credits. E. Flanagan. For description, see PHYS 554.

**ASTRO 511 Physics of Black Holes, White Dwarfs, and Neutron Stars (also PHYS 513)**

**ASTRO 516 Galactic Structure and Stellar Dynamics**

Fall. 4 credits. D. Chernoff. This course is an introduction to the study of the structure of galaxies via the laws of modern physics. Topics include the observed kinematics and spatial distribution of stars in the vicinity of the Sun, shapes and properties of stellar orbits, the gravitational N-body problem, collisional relaxation in stellar systems, spiral structure, galaxy classification and evolution, and cosmological results in galaxy formation.

**ASTRO 520 Radio Astronomy**

Fall. 4 credits. Not offered 1998-99. Radio astronomy telescopes and electronics, antenna theory, observing procedures and data analysis; concepts of interferometry and aperture synthesis.

**ASTRO 523 Signal Modeling, Statistical Inference, and Data Mining in Astronomy**

Spring. 4 credits. J. Cordes.

The course aims to provide tools for modeling and detection of various kinds of signals encountered in the physical sciences and engineering. Data mining and statistical inference from large and diverse databases will also be covered. Experimental design is to be discussed. Basic topics covered include: probability theory; Fourier analysis of continuous and discrete signals; digital filtering; matched filtering and pattern recognition; spectral analysis; Karhunen-Loeve analysis; wavelets; parameter estimation; optimization techniques; Bayesian statistical inference; deterministic, chaotic, and stochastic processes; image formation and analysis; maximum entropy techniques. Specific applications will be chosen from current areas of interest in astronomy, where large-scale surveys throughout the electromagnetic spectrum and using non-electromagnetic signals (e.g., neutrinos and gravitational waves) are ongoing and anticipated. Applications will also be chosen from topics in geophysics, plasma physics, electronics, artificial intelligence, expert systems, and genetic programming. The course will be self-contained and is intended for students with thorough backgrounds in the physical sciences or engineering.

**ASTRO 525 Techniques of Optical/Infrared and Submillimeter Astronomy**

Spring. 4 credits. Not offered 1998-99. Optical/infrared and submillimeter telescopes and instrumentation will be discussed and related to current research in these fields. Special emphasis will be on detector elements, instrument design and construction, data analysis and observational strategies. This course is intended for students with a thorough understanding of undergraduate physics.

**ASTRO 530 Astrophysical Processes**

Spring. 4 credits. Not offered 1998-99. Thermal and nonthermal radiation processes encountered in studies of stars, the interstellar and intergalactic media, galaxies and quasars. Fundamentals of radiative transfer, bremsstrahlung, synchrotron radiation, and Compton scattering will be covered, as well as spectral line transfer, gas heating and cooling, and topics in atomic and molecular spectroscopy. These topics will be discussed within the framework of astrophysical situations, such as star formation, interstellar gas and dust clouds, jets, active galactic nuclei, clusters of galaxies and cosmology.

**ASTRO 555 Theory of the Interstellar Medium**

Spring. 4 credits. Not offered 1998-99. Global theories of the interstellar medium and mass and energy exchange between the different phases. The role of shock waves and energetic outflows in the thermal equilibrium and ionization state of gas in the galaxy. Basic astrophysical fluids and plasmas.
Galactic dynamics. Observations techniques, current problems and results.

ASTRO 560 Theory of Stellar Structure and Evolution (also Physics 667)
Fall. 4 credits. I. Wasserman.
An observational overview; hydrostatic equilibrium, equilibrium equations, and convective energy transport; nuclear burning; solar neutrinos; rotation and magnetic fields; stellar seismology, brown dwarfs; pre-main sequence contraction.

[ASTRO 570 Physics of the Planets]
Fall. 4 credits. Not offered 1998-99.
An introductory survey of planetary science with an emphasis on the application of physical principles. Planetary dynamics, including satellite orbits, tidal interactions, resonances, and ring dynamics. An introduction to the theory of planetary interiors, gravitational fields, heat sources, and rotational mechanics. Physics and chemistry of planetary atmospheres, including radiative transfer, convection, and thermal structure. Important observational results, including those of ground-based optical, infrared, radio, and radar astronomy, as well as those made by spacecraft, will also be discussed.

[ASTRO 571 Mechanics of the Solar System (also Theoretical and Applied Mechanics 673)]

ASTRO 579 Celestial Mechanics
Fall. 3 credits. J. Burns.
For description, See T&AM 672.

ASTRO 590 Galaxies and the Universe
Spring. 4 credits. R. Giovanelli, M. Haynes.

[ASTRO 599 Cosmology (also Physics 599)]
Fall. 4 credits. F. Goldsmith.
This course is intended to provide a detailed theoretical development of current ideas in cosmology. Topics will include observational overview, growth of irregularities, galaxy formation, the big bang cosmology, recombination, nucleosynthesis; very early universe, symmetry breaking, inflationary scenarios. At the level of Peebles, Principle of Physical Cosmology.

[ASTRO 620 Seminar: Advanced Radio Astronomy]
Spring. 2 credits. Prerequisites: some background in extragalactic astronomy and/or radio astronomy suggested. Open to advanced undergraduates by permission of instructor. Not offered 1998-99. Selected topics in observational cosmology at radio wavelengths including: redshift surveys, gas stripping mechanisms, rotation curves and the distributions of mass and light, large scale structure, peculiar motions, atomic and molecular studies at high redshift, the Sunyaev-Zel'dovich effect, evolution of radio luminosity function, and the cosmic microwave background.

[ASTRO 621 Seminar: Planetary Radar Astronomy]
Spring. 3 credits. Prerequisites: intended for graduate students and upper-level undergraduates in astronomy, engineering, and geology. A good background in undergraduate mathematics and physics is required. D. Campbell.
The application of radar to the study of the surfaces of planets, planetary satellites, asteroids, and comets. Topics covered will be target detectability and the specification of the needed antennas, transmitters, and receiving systems, data processing techniques, imaging techniques including delay-Doppler imaging, synthetic aperture radar (SAR) and interferometric SAR; target characterization from cross section, scattering laws and polarization measurements; results from earth-based and spacecraft radar observations of Mercury, Earth, the Moon, Mars, the satellites of Jupiter, the rings of Saturn, asteroids, and comets.

ASTRO 640 Advanced Study and Research
Fall or spring. Credit to be arranged. Guided reading and seminars on topics not currently covered in regular courses. Students need to register in the department office, 510 Space Sciences Building.

ASTRO 652 Advanced Atmospheric Dynamics (also SCAS 652)
Spring. 3 credits. Offered alternate years. For description, see SCAS 652.

[ASTRO 660 Cosmic Electrodynamics (also Applied and Engineering Physics 608)]

ASTRO 671 Seminar: Planetary Science
Fall. 3 credits. J. Veizerka, S. Squyres.
An informal series of lectures discussing the techniques used to obtain and interpret spacecraft and earth-based remote sensing data to the planets and smaller bodies in the solar system. Intended for graduate students and seniors. The emphasis this year will be on the exploration of Mars, with a particular focus on the new results from Pathfinder and Mars Global Surveyor.

[ASTRO 673 Seminar: Planetary Atmospheres]
This course will deal with motions in planetary atmospheres. Among the topics to be discussed are the Venus general circulation, dust and water transports on Mars, alternating of the rings of Saturn, and cometary (compositional layering in the outer planets)

[ASTRO 690 Seminar: Computational Astrophysics (also Physics 680)]
Spring. 3 credits. Prerequisites: working knowledge of FORTRAN. Not offered 1998-99. S. Teukolsky.
A course designed to familiarize graduate students with numerical techniques for solving diverse problems in astrophysics. Numerical methods discussed in the course will include solving ordinary and partial differential equations, linear algebra and eigenvalue problems, Monte Carlo techniques, fast Fourier transforms, etc. In contrast to traditional numerical analysis courses, the flavor of the course will be "how-to", rather than theoretical. No theorems will be proved. Students will be allotted computer time to solve, both individually and in small teams, assigned numerical exercises. Text: Numerical Recipes by Press, Teukolsky, Vetterling, and Flannery.

[ASTRO 699 Seminar: Problems in Theoretical Astrophysics (also Physics 665)]
Fall. 2 credits. Not offered 1998-99.
An informal seminar that will examine "New Directions in Astrophysics." The participants will discuss neutrino astronomy, LIGO (the gravitational wave observatory), high energy gamma rays and cosmic rays, laboratory searches for dark matter, and the future of optical, radio, and infrared astronomy, both on the ground and in space. The seminar is open to all graduate students.

ASTRO 699 Seminar: Theoretical Astrophysics (also Physics 665)
Spring. 2 credits. P. Goldsmith.
A seminar for graduate students that will address the issues of molecular clouds in the Milky Way and infrared and radio-wavelength observations of gas and dust in these regions. We will emphasize information about physical conditions in dense clouds that allows us to understand how star formation occurs in these regions, and how this process in turn affects molecular clouds and their subsequent evolution. We will touch on topics of astrophysics, chemistry, condensed radiative molecular processes, gas-grain interactions, and a number of topics related to observations of the magnetic field in dense clouds and its effects.

BIological Sciences
C. Walcott, director (169 Biotechnology Building, 255-5042); J. J. Doyle, associate director and director of undergraduate studies (200 Stimson Hall, 255-5233); B. E. Cornelia, biology center coordinator (Biology Center, 216 Stimson Hall, 255-3358); B. S. Stewart, registrar (200 Stimson Hall, 255-6859).

Biology is a popular subject at many universities for a variety of reasons: it is a science that is in an exciting phase of development, it prepares students for careers in challenging and appealing fields such as human and veterinary medicine, environmental sciences, and biotechnology; and it deals with the inherently interesting questions that arise when we try to understand ourselves and the living world around us. Many of the decisions we face today deal with the opportunities and problems that biology has put before us.

The major in biological sciences at Cornell is offered by the Division of Biological Sciences.
ensures that students will be provided with the most advanced information and perspectives, and affords opportunities for students to participate in research.

The Standard Major
The chemistry major at Cornell provides a great deal of flexibility and prepares students for a large variety of career options. In recent years, chemistry majors have gone on to graduate study in chemistry, medicine, law, and business management, as well as directly into positions with chemical, pharmaceutical, and other industrial companies. A major in chemistry can also provide the basis for work in related areas such as molecular biology, chemical physics, geochemistry, chemical engineering, materials science, solid state physics, and secondary education. The required courses for the major can be completed in three years, leaving the senior year open for advanced and independent work under the supervision of a professor. The courses are arranged as a progression, with some (including mathematics and physics) prerequisite to those that are more advanced. During the first year, a student should normally register for general chemistry (preferably Chemistry 215–216 although Chemistry 207–208 or 206–208 is acceptable), mathematics, a freshman writing seminar, a foreign language if necessary, or physics. Chemistry 215–216 is aimed at those students with good preparation and a strong interest in chemistry. Students who do not know if their preparation is adequate should consult the instructor. In the second year a student should complete calculus and take physics and organic chemistry (Chemistry 359–360 is preferred to Chemistry 357–358). The second-year laboratory courses include 300, Quantitative Chemistry and 301, Experimental Chemistry I. Chemistry 389–390, Physical Chemistry I and II, and Chemistry 302–303, Experimental Chemistry II and III, should be completed in the third year. Chemistry 410 should be completed in the third or fourth year. Advanced work in chemistry and related subjects can be pursued in the fourth year and in the earlier years as well. The opportunity for independent research is also available. All students with questions about the major are encouraged to consult the chair of the Department of Chemistry or the chair’s representative. Entering students who are exceptionally well prepared in chemistry may receive advanced placement credit for Chemistry 207.

Prerequisites for admission to a major in chemistry are (1) Chemistry 215–216; 300 or 207–208; 300; or 211–208, 300; or 206, 208, 300; (2) Physics 207 or 112; and (3) Mathematics 111 or 191. Students are not encouraged to undertake a major in chemistry unless they have passed those prerequisite courses at a good level of proficiency. The minimum additional courses that must be completed for the standard major in chemistry are listed below.

1) Chemistry 301–302–303, 359–360 (357–358 may be substituted), 389–390, and 410
2) Mathematics 112, 213, or 122, 221–222; or 192–293–294
3) Physics 208

Potential majors electing to take Mathematics 213 are strongly urged to do so in their sophomore year to avoid scheduling conflicts with Chemistry 389 in their junior year.

The sequence described above is a basic program in chemistry that students can extend substantially in whatever direction suits their own needs and interests. Those going on to do graduate work in chemistry should recognize that these requirements are minimal and should supplement their programs, where possible, with further courses such as Chemistry 405, 605, 606, 666, 680, and 681. Even students not planning graduate work in chemistry should consider advanced work in physics and mathematics, courses in the biological sciences, and advanced work in chemistry as possible extensions of the basic program.

Honors. The honors program in chemistry offers superior students in the standard major an opportunity to study independently in seminars and to gain additional experience by engaging in research during the senior year. It is particularly recommended to those who plan graduate work in chemistry. Prospective candidates should complete the introductory organic chemistry and prerequisite courses to those that are more advanced by the end of the junior year, although failure to have completed those courses in the junior year does not in itself disqualify a student from the honors program. Completion of the program at a high level of performance leads to the degree of Bachelor of Arts with honors in chemistry. Students will be admitted to the program by invitation of the department, with selection based on superior cumulative average, including chemistry grades, and good performance in a prior research program.

Prospective candidates should discuss their plans with advisers by March 1 of their junior year; participants are notified by early January of their senior year. To be awarded honors, candidates must show outstanding performance in at least 8 credits of undergraduate research such as is offered in Chemistry 421, 433, 461, or 477. In addition, the writing of a thesis in the honors seminar (Chemistry 498) is expected.

The Alternative Major
The alternative major is a flexible program that provides core coverage of chemistry around which students can design a program to meet their own career goals. Requirements consist of a core program along with four additional courses chosen by the student. One of the four must be in chemistry at the 300 level or above; the other three may be in another field but should represent a cohesive plan and must be approved by a departmental committee. Students who select the alternative major are not eligible for the Honors Program.

The Core Program for the Alternative Major
1) Chemistry 215–216, 300 (or 207–208, 300; or 211, 208, 300; or 206, 208, 300); 257, 287, 289, and 410 (Chem 357–358 or 359–360 can be substituted for Chem 257, and Chem 389–390 can be substituted for Chem 287, thereby fulfilling the requirement for an additional 300-level chemistry course)
2) Mathematics 111–112, or 111, 122, or 191–192
3) Physics 207–208; or 112, 213
Additional Courses for the Alternative Major

Possible plans for the remaining three courses might include programs in Biochemistry, Biology; Physics; Computer Science; Polymers; Materials Science; Science; Technology, and Society; History and Philosophy of Science and Technology; Business and Management; Economics; Education, and others.

Premedical students and those interested in pursuing double majors might find the alternative major particularly attractive. The course requirements for admission to the alternative major are the same as those for the standard major.

Program for Science Teachers

Chemistry majors who wish to become teachers will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7-12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students integrate some 7-12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7-12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7-12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7-12) science. Interested students apply to the program during their sophomore or junior years. If accepted, students will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7-12) science. Interested students apply to the program during their sophomore or junior years. If accepted, stu

Additional information is available from Susie Slack, 424 Kennedy Hall, 255-9255 or Prof. Deborah Trumbull, 426 Kennedy Hall, 255-3108.

Laboratory Course Regulations

Students registered for laboratory courses who do not appear at the first meeting of the laboratory will forfeit their registration in that course.

Students and members of the teaching staff are required to wear safety goggles and lab aprons in all chemistry laboratories. Close-toed footwear is required (no sandals). Students are reminded to take their goggles and lab aprons to the first laboratory session. Those who fail to cooperate with the safety program will be asked to leave the laboratories.

Students are required to pay for glassware and any other items broken or missing from their laboratory desks at the close of each semester. Students who fail to inventory their desks at the appointed time in the presence of their instructor are charged a $10 fee in addition to charges for any breakage.

Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

Preliminary examinations for all courses may be given in the evening.

[CHEM 105 The Language of Chemistry]

Fall. 3 credits. This course contributes to meeting the College of Arts and Sciences "Physical and Biological Sciences" (Group 1) distribution requirement, as well as satisfying the C.A.L.S. physical science requirement of one course in chemistry.

J. Meinwald.

In his autobiography, A. Kornberg (Nobel Laureate in Medicine, 1959) wrote, "much of life can be understood in rational terms if expressed in the language of chemistry. It is an international language, a language for all time, a language that explains where we came from, what we are, and where the physical world will allow us to go." Through careful examination of a few milestone investigations of naturally occurring biologically important compounds (such as the antimalarial quinine, bombykol, and the sperm attractants of algae), the principles of chemistry to which Kornberg refers will be developed. Methods of analyzing chemical problems will be emphasized, rather than the memorization of specific results or formulas. There will be an opportunity for students, working in small groups, to prepare and present short reports on topics of particular interest at the interface between chemistry and biology.

[CHEM 106 Strategies in Science: The World of Chemistry]

Spring. 3 credits. This course contributes to meeting the College of Arts and Sciences "Physical and Biological Sciences" distribution requirement (Group 1) as well as satisfying the C.A.L.S. physical science requirement of one course in chemistry.

S-U or letter grades. Lecs, M W F 1:25. Prelims: 1:30-9 p.m., March 2, April 6.

D. A. Usher.

A general appreciation of chemistry in the world which will highlight for nonscientists the way the scientific method works. Using several case studies, the course will focus not only on what modern chemistry has accomplished, but more generally on how scientists think and how they function. Selected topics include (a) the chemistry of food, food additives, and the effect of diet on health; (b) drugs and medicines; (c) air and water pollution, pesticides, herbicides, acid rain, and other environmental chemistry; (d) the chemistry of plastics, polymers, and other modern materials; (e) the chemistry of taste and smell, including flavors, perfumes, and cosmetics; and (f) biotechnology and genetic chemistry. Other topics to be discussed are the role of chemistry in other fields. Emphasis is on topics such as solid-state materials, periodic trends, and specific classes of compounds, such as polymers.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry 207 by demonstrating competency in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall.

[CHEM 211 Chemistry for the Applied Sciences]

Fall or spring. 4 credits. Recommended for those students who intend to take only one term of chemistry. Enrollment limited. Prerequisites: high school chemistry or permission of instructor. Corequisite: a calculus course at the level of Mathematics 111 or 191. Lecs: M W F 12:20. Lab: fall and spring, M T W R F 1:25-4:25. Prelims: 7:30-9 p.m., Sept. 24, Oct. 22, Nov. 19, Feb. 18, March 16, April 20. Fall: F. J. DiSalvo; spring: D. B. Zax.

Important chemical principles and facts are covered with the objective of understanding the role of chemistry in other fields. Emphasis is on topics such as solid-state materials, periodic trends, and specific classes of compounds, such as polymers.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry by demonstrating competency in the advanced placement examination given at Cornell. Students will be asked to leave the laboratory if they do not fulfill the requirements of the departmental examination given at Cornell before classes start in the fall.

[CHEM 215-216 General and Inorganic Chemistry]

215. Fall. 4 credits. Enrollment limited. Recommended for students who intend to specialize in chemistry or in related fields. Prerequisites: good performance in high school chemistry and physics and in mathematics SAT.

Corequisite: a calculus course at the level of Mathematics 111 or 191 for students who have not taken high school calculus. Prerequisite for Chemistry 216: Chemistry 215. Lecs: M W F 12:20; lab, T R or F 1:25-4:25. Prelims: 7:30-9 p.m., Oct. 6, Nov. 12, Feb. 18, March 16, April 20. Fall: R. Hoffmann; spring: S. Lee.

An intensive systematic study of the laws and concepts of chemistry, with considerable emphasis on quantitative aspects. Second term includes systems of inorganic chemistry. Laboratory work covers qualitative analysis, transaction metal chemistry, and spectroscopic techniques.

[CHEM 206 Introduction to General Chemistry]

Fall or summer. 4 credits. Enrollment limited. Recommended for students who have not had high school chemistry and for those needing a less intensive course than Chemistry 207 or 208. Lecs, M T W R F 11:15-12:15, lab, T R or F 8:00-11:00; or M W or F 1:25-4:25. Prelims: 7:30-9 p.m., Oct. 6, Nov. 12, D. Y. Sogah.

An introduction to general chemistry, with emphasis on important principles and facts. Chemistry 206 covers much of the same material as Chemistry 207 but places an increasing emphasis on chemical equilibrium and introduction to chemical kinetics, but does so at a slower pace.
We will examine this intriguing mode of communication as it applies to a wide variety of species ranging from bacteria to insects and mammals, including humans. Essential concepts of organic chemistry and biology will be introduced and illustrated. Each student will be expected to prepare a term paper, and there will be an opportunity for oral presentation of some of these papers for class discussion.

CHEM 251 Introduction to Experimental Organic Chemistry
Fall, spring, or summer. 2 credits. Recommended for non-chemistry majors. Prerequisites: CHEM 206 or 216; and Mathematics 111–112 and Physics 208, or permission of instructor. Prerequisite for Chemistry 257: CHEM 251 or 256. CHEM 257 is only a three-credit course, it does not provide a practical route to satisfying medical school requirements. Lecs, M W F 9:10-11:15. Prelims. 7:30–9:00 p.m., March 4, April 15.

CHEM 257 Introduction to Organic and Biological Chemistry
Spring. 3 credits. Recommended for non-chemistry majors. Prerequisite: CHEM 251. Lec, R 11:15; lab, M T W R or F 1:25–4:25, or T or R 8–11. Prelims. 7:30–9:00 p.m., Fall: Nov. 5, Spring: April 13. Fall: S. Russo; spring: S. Russo.

CHEM 258 Introduction to Experimental Physical Chemistry
Spring, fall, or summer. 3 credits. Prerequisite: one year of high school chemistry, CHEM 206 or 207, or permission of instructor. Not offered 1998-1999. Organisms communicate with one another in nature chiefly by means of chemical signals. We will examine this intriguing mode of communication as it applies to a wide variety of species ranging from bacteria to insects and mammals, including humans. Essential concepts of organic chemistry and biology will be introduced and illustrated. Each student will be expected to prepare a term paper, and there will be an opportunity for oral presentation of some of these papers for class discussion.

CHEM 259-260 Introductory Physical Chemistry Laboratory
289, fall, 290, spring. 2 credits each term. Lecs: fall, R 8:00 a.m.; spring, R 8:00 or 9:05. Lab: fall, M T 1:25–4:25; spring, M T W R 1:25–4:25. Fall: T. Carrick; spring: T. Carrick.

Quantitative and qualitative methods basic to the experimental study of physical chemistry.

CHEM 300 Quantitative Chemistry
Fall. 2 credits. Prerequisite: CHEM 208, or Chemistry 216 or advanced placement in chemistry - Lec, R 10:10; lab, M T W R F 12:20–4:25 or T 8–12. Prelim. 7:30–9:00 p.m., Oct. 22, Nov. 17.

J. M. Burlitch
Volumetric, spectrophotometric, and potentiometric methods are emphasized. Techniques are learned by analysis of knowns and then are used on unknowns. Lectures and problem sets stress the relationship between theory and applications.

CHEM 301 Experimental Chemistry I
Spring. 4 credits. Prerequisites: CHEM 300, and 357, or 359. Lec, M W F 8:00; 2 labs, M T W R 9:00–10:15 or T R 8–11 or T R 1:25–4:25. G. W. Coates.

An introduction to the techniques of synthetic organic chemistry. A representative selection of the most important classes of organic reactions will be explored in the laboratory. The theoretical basis for these reactions and for the separation techniques used will be discussed in the lectures.

CHEM 302 Experimental Chemistry II
Fall. 4 credits. Enrollment limited; preference given to chemistry majors. Prerequisite: Chemistry 301. Lecs, M W F 9:05; 2 labs, M W 1:25–4:25, T R 8–11 or T R 1:25–4:25. TBA.

Instrumental methods of analysis, including UV, IR and AA spectroscopies and gas chromatography. The design of experiments is stressed.

CHEM 303 Experimental Chemistry III
Spring. 4 credits. Each lab limited to 11 students. Prerequisites: Chemistry 302, 389, 390; coregistration in the latter is permitted. Lecs, M W F 9:05; 2 labs, M W 1:25–4:25, T R 9:00–12 or T R 1:25–4:25. H. D. Abruna.

An introduction to experimental physical chemistry, including topics in calorimetry, spectroscopy and kinetics. The analysis and numerical simulation of experimental data is stressed.

CHEM 357-358 Organic Chemistry for the Life Sciences
357, fall or summer, 358, spring or summer. 3 credits each term. Prerequisite for Chemistry 357: Chemistry 206 or 216 or advanced placement; recommended: concurrent registration in CHEM 251 or 300. Prerequisite for Chemistry 358: Chemistry 357 or permission of the instructor. Lecs, M W F 9:05 or 10:10, optional rec may be offered. Prelims. 7:30–9:00 p.m., Sept. 24, Oct. 9, Nov. 17, Feb. 18, March 16, April 20.

B. K. Carpenter; spring: J. C. Clardy.

A rigorous and systematic study of organic compounds, their structures, the mechanisms of their reactions, and the compounds synthesized in nature and in the laboratory.

CHEM 389-390 Physical Chemistry I and II
389, fall, 390, spring. 4 credits each term. Prerequisites: Mathematics 213 or, ideally, 221-222, Physics 208; Chemistry 208 or 216 or permission of instructor. Prerequisite for Chemistry 390: Chemistry 389. Lecs, 389: M W F 10:10; rec M or W 1:25 or T 9:05. Lecs, 390: M W F 10:10; prelims: 7:30–9:00 p.m., 399: Oct. 1, Nov. 3, Dec. 1. 390: Fall, March 16, April 20. Fall: M. Hines; spring: S. Russo. 390: B. Widom.

The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, kinetic theory, statistical mechanics, and quantum chemistry.

CHEM 391 Physical Chemistry II (also CHEM E 391)
Spring. 4 credits. Enrollment limited to engineering students only. Prerequisites: Mathematics 293; Physics 112, 213; Chemistry 208 or 216 or permission of instructor. Prerequisite for Chemistry 391: Chemistry 389. Lecs, M W F 9:05; rec M 1:25 or T 9:05; prelims: 7:30–9 p.m., March 9, Apr. 13, B. Anton.

The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, kinetic theory, statistical mechanics, and quantum chemistry.

CHEM 404 Entrepreneurship in Chemical Enterprise
Spring. 1 credit. Enrollment open to seniors, others with permission of the instructor. Enrollment may be limited. T, T 3:00–4:30. B. Ganem.

Designed to acquaint students having a technical background in chemistry with the problems of planning, starting, and managing a new scientifically oriented business venture, the course will consist of six weekly 90-minute meetings focusing on case studies and assigned reading, as well as outside lectures by entrepreneurs in the chemical, pharmaceutical, and biotechnology industries. Topics will include new technology evaluation and assessment, business formation, resource allocation, management development, as well as manufacturing and sales issues.
CHEM 405 Techniques of Modern Synthetic Chemistry
Spring. 3 or 6 credits. Enrollment limited. Prerequisites: Chemistry 302 and permission of instructor. To receive three credits, student is required to perform a minimum of three two-week experiments. Six credits will be given for three additional experiments. Completion of five exercises in elementary glass-blowing will count as one experiment. Lab time required: 16 hours each week, including at least two 4-hour sessions in one section (M W 1:25). First meeting will be at 1:30 on first class day of semester.LEC, first week only, at time to be arranged. Not offered 1998–99. J. M. Burlitch.
The synthesis of complex organic, organometallic, and inorganic molecules are carried out with emphasis on the following techniques: vacuum line, high pressure, high-temperature solid state, inert atmosphere, nonaqueous solvents, radioactive labeling, sol-gel, photochemical and electrochemical methods, solid phase peptide synthesis, and polymer synthesis. Elementary glassblowing.

CHEM 410 Inorganic Chemistry I
Fall. 4 credits. Prerequisites: Chemistry 358 or 360, and 287 or 390. Lec., M W F 11:15. Prellins: 7:30–9:00 p.m., Sept. 24, Oct. 22, Nov. 19. R. C. Fay.
A systematic study of the synthesis, structure, bonding, reactivity of inorganic compounds, organometallic complexes, and solid state species.

CHEM 421 Introduction to Inorganic Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 303 and 389–390, or Chemistry 287–288, and Chemistry 289–290 with an average of B– or better, or permission of instructor. Selected faculty.
Research in inorganic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 433 Introduction to Analytical Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 303 and 390 with an average of B– or better or permission of instructor. Selected faculty.
Research in analytical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 461 Introduction to Organic Chemistry Research
Fall or spring. 2–4 credits. Prerequisites: Chemistry 302 and 358 or 360 with a grade of B– or better or permission of instructor. Selected faculty.
Research in organic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 477 Introduction to Physical Chemistry Research
Fall or spring. 2–4 credits. Prerequisite: Chemistry 300 with an average of B– or better or permission of instructor. Selected faculty.
Research in physical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 498 Honors Seminar
Spring. No credit. Admission to standard chemistry majors only by departmental invitation. Additional prerequisites or corequisites: outstanding performance in either (1) two coherent 4-credit units of research in a course such as Chemistry 421, 433, 461, or 477; or (2) one 4-credit unit in a course such as Chemistry 421, 433, 461, or 477 and summer research equivalent to at least 4 credits in the same subject. W 2:30–4. J. Meinwald.
Informal presentations and discussions of selected topics in which all students participate. Individual research is on advanced problems in inorganic chemistry other than organic chemistry, given by distinguished visitors and faculty members.

CHEM 600–601 General Chemistry Colloquium
600, fall; 601, spring. No credit. Required of all graduate students except those majoring in organic or inorganic chemistry. Juniors and seniors are encouraged to attend. R 4:40. Fall: J. H. Freed; spring: J. H. Freed.
A series of talks representative of all fields of current research. Selection of subject under the guidance of a faculty member, culminating in a written report.

CHEM 602 Information Literacy for the Physical Scientist
An introduction to physical science information research methods, including use of paper and electronic resources. With the continued information explosion, much time can be wasted and important information missed unless an efficient information research strategy is developed. This course demonstrates the use of library and information resources as a method to start and critically evaluate the success of research projects. Text: *Journal Literature of the Physical Sciences* by Alice Leffer Primack and Chemical Information Sources by Gary Wiggins.

CHEM 605 Advanced Inorganic Chemistry I: Symmetry, Structure, and Reactivity
Fall. 4 credits. Prerequisite: Chemistry 389–390 or equivalent or permission of instructor. Lec., M W F 11:15. R. C. Fay.
Selected topics in structure, bonding, and reactivity of inorganic compounds with emphasis on main group elements at the level of Chemistry of the Elements by Greenwood and Earnshaw. Group theory applications: hybrid orbitals, molecular orbitals, molecular vibrations, and ligand field theory; at the level of Cotton’s Chemical Applications of Group Theory.

CHEM 606 Advanced Inorganic Chemistry II: Synthesis, Structure, and Reactivity of Coordination Compounds, and Bioinorganic Chemistry
Synthesis, structure, and reactivity of coordination compounds and organometallic complexes. Bonding models, structure, and reactivity, including the elucidation of mechanisms. Readings at the level of Purcell and Kotz’s *Inorganic Chemistry*, and Jordan’s *Reaction Mechanisms of Inorganic and Organometallic Systems*.

CHEM 607 Advanced Inorganic Chemistry III: Solid-State Chemistry
Spring. 4 credits. Prerequisite: Chemistry 605 or permission of instructor. Lec., M W 1:15. F. J. DiSalvo.

CHEM 608 Organometallic Chemistry
Synthesis, structure, and reactivity of organotransition metal complexes. Current literature is emphasized, and background readings are at the level of Collman, Hefedus, Finke and Norton’s *Principles and Applications of Organotransition Metal Chemistry*.

CHEM 622 Chemical Communication
For description, see BIONB 623.

CHEM 625 Advanced Analytical Chemistry I
Spring. 4 credits. Prerequisite: Chemistry 288 or 390 or equivalent. Lec., M W F 9:05; occasional prellins W 7:30 p.m. C. F. Wilcox.
The application of molecular spectroscopy to chemical problems. Topics in infrared, NMR, and mass spectroscopy are discussed.

CHEM 627 Advanced Analytical Chemistry II
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 390 or equivalent; but Chemistry 793 or equivalent would be helpful. Lec., M W F 12:20. Not offered 1998–99. D. B. Zax.
Modern techniques in nuclear magnetic resonance. Little overlap is expected with Chem 625, as this course will focus on more general questions of experimental design, understanding of multipulse experiments, and aspects of coherent averaging theory. Example to be taken from both liquid and solid-state NMR. May also be of interest to other coherent spectroscopists.

CHEM 628 Trace Element and Isotopic Analysis (also Nutritional Sciences 690)
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 288 or 390, or Chemistry 208 and Mathematics 112, or permission of instructor. Offered alternate years. Lec., T R 10:10. Not offered 1998–99. J. T. Brenna.
Modern trace, micro, and surface methods of analysis, including atomic spectrometry, solids mass spectrometry, high precision isotope ratio techniques, microscopic, microprobe, and electron spectroscopy. Applications to biological and solid state problems.

CHEM 629 Electrochemistry
Fundamentals and applications of electrochemistry. Topics will include the fundamentals of electrode kinetics, electron transfer theory, the electrical double layer, diffusion,
and other modes of transport. A wide range of techniques and their application as well as instrumental aspects will be covered.

CHEM 650-651 Organic and Organometallic Chemistry Seminar
650, fall; 651, spring. No credit. Required of all graduate students majoring in organic or bioorganic chemistry. Juniors and seniors are encouraged to attend. M 4:30. D. B. Collum.

A series of talks representative of all fields of current research interest in organic and organometallic chemistry, given by research associates, faculty members, and distinguished visitors.

CHEM 665 Advanced Organic Chemistry
Fall. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisites: Chemistry 253 or 458 or 560, and 590 or equivalents or permission of instructor. Lecs., M W F 12:20. D. B. Collum.

A survey of reaction mechanisms and reactive intermediates in organic chemistry.

CHEM 666 Synthetic Organic Chemistry
Spring. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisites: Chemistry 665 or permission of instructor. Lecs., T R 10:10-11:25. B. Ganem.

Modern techniques of organic synthesis; applications of organic reaction mechanisms and retrosynthetic analysis to the problems encountered in rational multistep synthesis, with particular emphasis on modern developments in synthesis design.

CHEM 668 Chemical Aspects of Biological Processes
Fall. 4 credits. Prerequisite: Chemistry 560 or equivalent. Lecs., T R 8:40-9:55. J. P. Begley.

A representative selection of the most important classes of enzyme-catalyzed reactions will be examined from a mechanistic viewpoint. The course will include the chemical basis of enzymatic catalysis, techniques for the elucidation of enzyme mechanism, cofactor chemistry, and the biosynthesis of selected natural products. The application of chemical principles to understanding biological processes will be emphasized.

CHEM 670 Fundamental Principles of Polymer Chemistry
Fall. 4 credits. Prerequisite: Physical Chemistry 389/390 and Organic Chemistry 359-360 or equivalent or permission of instructor. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymers is required. Lecs., T R 10:00-11:15. C. W. Coates.

This course emphasizes general concepts and fundamental principles of polymer chemistry. The first part of the course deals with general introduction to classes of polymers, molecular masses and their distributions, and a brief survey of major methods of polymer synthesis—radical, step growth,ionic, group transfer, Ziegler-Natta and metathesis polymerization methods—with emphasis on kinetics and mechanisms rather than on structure. The second part deals with characterization and physical properties. These include: solution properties—solubility and solubility parameters, solution viscosity, molecular weight characteristics [gel permeation chromatography, viscometry, light scattering, osmometry], bulk properties—thermal and mechanical properties; and structure-property relationships. The discussions will focus on chemistry rather than engineering of polymers.

CHEM 671 Synthetic Polymer Chemistry (also Material Science and Engineering 671 and Chemical Engineering 675)
Spring. 4 credits. Prerequisite: Chemistry 359-360 or equivalent or permission of instructor; recommended: Knowledge of material covered in Chemistry 670 will be useful but not required. Materials Science and Engineering 620. Lecs., T R 8:30-9:40. D. Y. Soong.

Modern concepts in synthetic polymer chemistry. The application of organic synthetic methods to the development of new polymers and copolymers and the control of their architecture. Topics include chain and step-growth polymerizations, reactions of polymers, block and graft copolymers, dendrimers and star polymers. A broad spectrum of applications from recent literature will also be discussed.

CHEM 672 Protein Kinetics
Fall. 4 credits. Primarily for graduate students with interest in biophysical chemistry. Prerequisite: Chemistry 288 or 390, BIORN 331, or equivalents or permission of instructor. Lecs., M W F 10:10. B. A. Baird.

Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include: protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; role of cell membrane receptors in regulating cellular activities.

CHEM 677 Chemistry of Nucleic Acids
Spring. 4 credits. Primarily for graduate students. Prerequisites: Chemistry 358 or 360, and 590 or equivalents. S-U grades only. Lecs., T 11:10-12:20. D. A. Usher.

Properties, synthesis, reactions, and biochemical reactions of nucleic acids.

CHEM 678 Statistical Thermodynamics
Fall. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 390 or equivalent. Lecs., M W F 10:10. B. Widom.

CHEM 681 Physical Chemistry I
Fall. 4 credits. Prerequisites: Chemistry 288 or 390, Mathematics 213 and Physics 208; or equivalents. Not offered 1998-99.

An introduction to the principles of quantum theory and statistical mechanics, atomic and molecular spectra, and elementary valence theory. At the level of Quantum Chemistry, by Levine.

CHEM 686 Physical Chemistry of Proteins

Chemical constitution, molecular weight, and structural basis of proteins; thermodynamic, hydrodynamic, optical, spectroscopic, and electrical properties; protein and enzyme reactions; statistical mechanics of helix-coil transition in biopolymers; conformation of biopolymers; protein folding.

CHEM 700 Baker Lectures
Fall, on dates to be announced. No credit. Distinguished scientists who have made significant contributions to chemistry present lectures for periods varying from a few weeks to a full term. This year’s lecturer: Prof. John Brauman, Stanford University.

CHEM 701-702 Introductory Graduate Seminar in Analytical, Inorganic, and Physical Chemistry
701, fall; 702, spring. No credit. Required of all first-year graduate students majoring in analytical, inorganic, physical, theoretical, and biophysical chemistry. Not offered 1998-99.

CHEM 716 Special Topics in Advanced Inorganic Chemistry (Bonding in Molecules)
Spring. 3 credits. Prerequisite: some exposure to (or a course in) quantum mechanics. A good undergraduate physical chemistry course may be sufficient, while Physics 795 or Chemistry 793 or Chemistry 794 are at a substantially higher level than what is needed. Lecs., M W F 12:20. Not offered 1998-99. R. Hoffman.

The purpose of this course is to build a qualitative picture of the bonding in all molecules, including organic, inorganic, organometallic systems and extended structures (polymers, surfaces and three-dimensional materials). The approach uses molecular orbital theory to shape a language of orbital interactions. Most quantum mechanic ideas needed will be taught along the way, the course is specifically directed at organic, inorganic, and polymer chemists who are not theoreticians.

CHEM 745 Physical Polymer Science I (also Chemical Engineering 745)

CHEM 762 Special Topics in Organic Chemistry: Fundamentals of Polymer Chemistry
Fall. 4 credits. Prerequisite: Physical Chemistry 389-390 and Organic Chemistry 359-360 or equivalent or permission of instructor. Primarily for graduate and advanced undergraduate students. Lecs., T R 8:30-10:00. Not offered 1998-99.
Introduction to polymer physical chemistry. Kinetics and mechanisms of Polymerization methods: Ionic, radical, step-growth and group transfer polymerization. Polymer Stereochemistry. Solution properties: Molecular weight characterization and polymer size elution. Mechanical and Thermal Properties. Structure-Property Relations. The discussions will focus on chemistry rather than engineering of polymers and examples will be taken from current literature.)

**CHEM 765 Physical Organic Chemistry I**
Fall. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 665 or permission of instructor. Lecs, M W F 10:10. C. F. Wilcox. Application of computational and experimental techniques to studies of organic reaction mechanisms and the properties of reactive intermediates.

**[CHEM 766 Physical Organic Chemistry II**
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 765 or permission of instructor. Not offered 1998-99.)

**CHEM 774 Chemistry of Natural Product and Combinatorial Chemistry**
Spring. 3 credits. Prerequisites: Chemistry 360 and BIOM 330 or equivalent. Lec, T R 10:10-11:30. T. P. Begley. Combinatorial chemistry has revolutionized the way organic chemists think about structure-function studies on biological systems and the design of inhibitors. This course will explore the design, synthesis, screening, and use of natural (i.e., peptide, protein, nucleic acid, carbohydrate) and unnatural (i.e., totally synthetic) libraries.

**CHEM 780 Chemical Kinetics and Molecular Reaction Dynamics**
Fall. 4 credits. Prerequisite: Chemistry 681 or permission of instructor. Lecs, T R 10:10-11:25. H. F. Davis. Principles and theories of chemical kinetics and molecular reaction dynamics. Topics include potential energy surfaces, transition state theory, and statistical theories of unimolecular decomposition. Depending on class interest, the course will also include special topics such as surface reactions and photochemistry.

**[CHEM 782 Special Topics in Biophysical and Bioorganic Chemistry**
Spring. 3 credits. Lecs, T R 11:15. Not offered 1998-99. Topics vary from year to year.)

**CHEM 788 Macromolecular Crystallography (also BIOM 738)**
Spring. 3 credits. S-T grades optional. Prerequisite: permission of instructor. Offered alternate years. Lecs, M W F 10:10. Not offered 1998-99. S. A. Ellick, A. Kapustin. Lectures briefly cover the fundamentals of crystallography and focus on methods for determining the 3-dimensional structures of macromolecules. These include crystallization, data collection, multiple isomorphous replacement, molecular replacement, model building, refinement, and structure interpretation.)

**[CHEM 789 X-ray Crystallography**
Spring. 4 credits. Prerequisite: Chemistry 288 or 390 or permission of instructor. Offered alternate years. Lecs, M W F 10:10. Not offered 1998-99. J. Claridy. A beginning course in the applications of X-ray crystallography to chemistry. Topics include symmetry properties of crystals, diffraction of X-rays by crystals, interpretation of diffraction data, and refinement of structures. The chemical information available from a diffraction experiment is stressed, and practical aspects are incorporated.)

**CHEM 791 Spectroscopy**
Fall. 4 credits. Prerequisite: Chemistry 793 or Physics 443 or equivalent. Lecs, T R 8:40-9:55. J. H. Freed. Principles of one- and two-dimensional magnetic resonance spectroscopies. Topics will include time-domain versus frequency-domain spectroscopy, multiple pulse and double resonance techniques, two-dimensional coherence spectroscopy, quantum spin-echo spectroscopy, and spin-relaxation. At the level of Slichter's Principles of Magnetic Resonance, 3rd Edition.

**CHEM 792 Molecular Collision Theory**
Spring. 4 credits. Lecs, T R 10:10-11:25. G. S. Ezra. The concepts and methods of scattering theory are described with particular emphasis on applications to problems of chemical interest. At the level of Child's Molecular Collision Theory and Taylor's Scattering Theory.

**CHEM 793 Quantum Mechanics I**
Fall. 4 credits. Prerequisites: Chemistry 390, coregistration in A&EP 321 or equivalents or permission of instructor. Lecs, M W F 11:15. G. S. Ezra. Schrodinger's equation, wave packets, uncertainty principle, WKB theory, matrix mechanics, orbital and spin angular momentum, exclusion principle, perturbation theory, variational principle. At the level of Cohen-Tannoudji's Quantum Mechanics.

**CHEM 794 Quantum Mechanics II**
Spring. 4 credits. Prerequisites: Chemistry 793 or equivalent or the equivalent of coregistration in Physics 432 and Mathematics 422 or permission of instructor. Lecs, T R 10:10-11:25. R. Loring. Quantum structure of atoms and molecules. Time-dependent phenomena in quantum mechanics and light/matter interaction. Molecular spectroscopy. Group theory. At the level of Weissbluth's Atoms and Molecules, Levine's Quantum Chemistry, and Sakurai's Modern Quantum Mechanics.

**CHEM 796 Statistical Mechanics**
Spring. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 678 and 793 or equivalent. Lecs, T R 8:30-9:55. R. Loring. Statistical mechanics of systems of interacting molecules. Structure and thermodynamics of classical liquids. Phase transitions and critical phenomena. Inhomogeneous fluids. Introduction to non-equilibrium statistical mechanics. Students are presumed to have taken a course in statistical thermodynamics at the level of the first twelve chapters of Statistical Mechanics, by McQuarrie.

**CHEM 798 Special Topics in Physical Chemistry (Chemical Bonding in Polymers, Surfaces and the Solid State)**
Spring. 4 credits. Prerequisite: Chemistry 605, or 681, or 793, or Physics 443, or the equivalent. Lecs, T R 10:10-11:25. R. Hoffmann. The qualitative aspects of the electronic structure and chemical bonding on extended one-, two-, and three-dimensional systems will be discussed, in a way accessible to a wide range of inorganic and organic chemists, and to engineers and physicists as well.

**CHINESE**
See Language Courses under Languages and Linguistics.

**FALCON Program (Chinese)**
J. Wheatley, 416 Morrill Hall, 255-9301.

**CLASSICS**
Cornell University has long recognized the importance of studying the civilizations of ancient Greece and Rome. Particularly in an age of increasing specialization, study of the Classics is widely viewed as an excellent means of acquiring a liberal education; at Cornell, we are deeply interested in the continuing humanistic values contained in the literature of the ancient world and in gaining a fuller understanding of these important cultures and their imprint upon subsequent ages.

The Department of Classics at Cornell is one of the oldest and largest in the country. With nineteen faculty members, together with professors of related interests in the departments of History, Philosophy, Comparative Literature, History of Art, Modern Languages, Linguistics, and Near Eastern Studies and in the Archaeology, Medieval Studies, and Religious Studies programs, the range of instruction available is very large, including not only the traditional study of language, literature, and ancient history, but also newer developments in the field, such as comparative study of Mediterranean civilizations and modern literary theory.

Although Classics, like other areas of humanistic study, does not aim at providing specific preprofessional training, over the years Classics majors from Cornell have gone on to a wide variety of careers: in law, teaching, medicine, diplomacy, management, educational administration, government, and many others.

The department offers courses in Bronze Age and Classical archaeology and is active in field projects in Classical lands. It sponsors archaeological excavations at Halai in Greece, which serves as a field training school for
Cornell undergraduate and graduate students. On campus there are also collections of ancient artifacts, reproductions of ancient sculpture, and one of the few laboratories in the world to concentrate on the tree-ring dating of ancient monuments from Greece, Cyprus, and neighboring lands as they were during the period extending from approximately 3000 B.C. to the 6th century C.E. In addition to the required courses in language and literature, the major includes related courses intended to give breadth and exposure to the other disciplines within the field and to enrich the student's study of the original languages. Since the influence of the Greco-Roman world extended far beyond antiquity, a related course could well focus on some aspect of the classical tradition in a later period. Students select related courses in consultation with their advisors or the DUS.

**Related Subjects**

The field or scope of the subject "Classics" is the interdisciplinary study of Greek and Roman antiquity, comprising Greek and Latin literature, language, and linguistics; ancient philosophy; history, archaeology and art; history, papyrology; epigraphy; and numismatics. It covers the ancient Mediterranean and neighboring lands as they were during the period extending from approximately 3000 B.C.E. to the 6th century C.F. In addition to the required courses in language and literature, the major includes related courses intended to give breadth and exposure to the other disciplines within the field and to enrich the student's study of the original languages. Since the influence of the Greco-Roman world extended far beyond antiquity, a related course could well focus on some aspect of the classical tradition in a later period. Students select related courses in consultation with their advisors or the DUS.

**Honors**

Candidates for the degree of Bachelor of Arts with honors in Classics, Greek, Latin, or Classical civilization must fulfill the requirements of the appropriate major study as given above and must also successfully complete the special honors course 472. Credit for the honors course may be included in the credits required for the major. Students who wish to become candidates for honors must have a cumulative average of B+ in the major. In consultation with the Standing Committee on Honors the students should choose an honors adviser by the end of their sixth semester. By the second week of their seventh semester they should submit an outline of their proposed honors work to the Standing Committee and to the adviser(s). The thesis will be written under the supervision of the honors adviser(s) chosen by the student. Honors advisers will submit recommendations to the Standing Committee on Honors. The Committee will read all honors theses and will determine the level of departmental honors. A copy of each successful honors thesis will be filed with the department.

**Independent Study**

Independent study at the 300 level may be undertaken by undergraduates upon completion of one semester of work at the 300 level. 200-level independent study may be undertaken only in the case of documented schedule conflict upon application to the DUS.

**Study Abroad**

Cornell participates in the Intercollegiate Center for Classical Studies in Rome. The department offers freshman writing seminars on a variety of topics. Consult John S. Knight Writing Seminar Program brochures for times, instructors, and descriptions.

**Classical Civilization**

Those who major in Classical Civilization must complete (a) qualification in Latin and Greek or proficiency in either; (b) Classics 211 or History 265, Classics 212 or History 266, and Classics 220, plus 5 courses selected from those listed under Classical civilization. Classical archaeology, Ancient Philosophy, Latin, and Greek; and c) 3 courses in related subjects (see below) selected in consultation with the adviser.

**Placement in Latin, Ancient Greek, and Modern Greek**

Placement of first-year students in Latin, ancient Greek, and modern Greek courses is determined by an examination given by the Department of Classics during orientation week or by arrangement with the director of undergraduate studies.

**Freshman Writing Seminars**

The department offers freshman writing seminars on a variety of topics. Consult John S. Knight Writing Seminar Program brochures for times, instructors, and descriptions.

**Classical Civilization**

**CLASSICS 100 Word Power: Greek and Latin Elements in the English Language**

Spring. 3 credits. I. Hohendahl. This course gives the student with no knowledge of the classical languages an understanding of how the Greek and Latin elements that make up over half our English vocabulary operate in both literary and scientific English usage. Attention is paid to how words acquire their meaning and to enlarging each student's working knowledge of vocabulary and grammar.

**CLASSICS 102 Bioscientific Terminology**

3 credits. Not offered 1998-99; next offered 1999-2000. Staff. A study of the Greek and Latin word elements that combine to form most of the specialized terms in the biological sciences. The student who learns the meanings of these elements and the rules of word formation can usually recognize the basic meaning of many unfamiliar words in that field. This skill is especially valuable for pre-medical, pre-dental, pre-veterinary students, and for those in other
health science fields, as well as for students who would like to broaden their general vocabulary.

CLASS 211 The Greek Experience  
Fall. 3 credits. Limited to 50 students. F. Ahl.  
An introduction to the literature and thought of ancient Greece. Topics will include epic and lyric poetry, tragedy and comedy, and historical, political, philosophical, and scientific writings. Some attention will also be given to the daily life of ordinary citizens, supplemented by slides of ancient art and architecture.

CLASS 212 The Roman Experience  
Spring. 3 credits. Limited to 100 students. D. Mankin.  
An introduction to the civilization of the Romans as expressed in their literature, religion, and social and political institutions.

CLASS 217 Initiation to Greek Culture  
Fall. 4 credits. Limited to 18 students. This course is intended especially for freshmen (a few exceptionally motivated sophomores or upperclassmen may be accepted). Apply in writing to the chair, Department of Classics, 120 Goldwin Smith Hall. P. Pucci and L. S. Abel.  
Knowledge of Greek or Latin is not necessary, since all texts are in translation. What is necessary is the willingness to participate in three one-hour seminars each week and also a supplementary one-hour (occasionally two-hour) session, during which the class will participate in workshops with specially invited guests.

CLASS 218 Initiation to the Classical Tradition: Strange Voyages  
Spring. 4 credits. See Classics 217 for more. D. Shanzer.  
The theme is travel and the depiction of the World. The Here and Now, the Hereafter (Heaven, Purgatory, and Hell), and Other Worlds. Readings (in part selections) will include the Odyssey, the Aeneid, the Gospel of Nicodemus, Lucian, Saint Brendan's Voyage, Dante's Inferno, Chesterton's Man Who Was Thursday, C. S. Lewis's Out of the Silent Planet, and M. Arowood's Handmaid's Tale.

CLASS 223 The Comic Theater (also Comparative Literature 223 and Theatre Arts 223)  
Spring and summer 1999. 3 credits. J. Rusten.  
The origins of comic drama in ancient Greece and Rome, and its subsequent incarnations especially in the Italian renaissance (Commedia erudita and Commedia dell'arte), Elizabethan England, seventeenth-century France, the English Restoration, and Hollywood in the thirties and forties. Chief topics will be: the growth of the comic theatrical tradition and conventions; techniques and themes of comic plots (trickster, parody, farce, caricature); and the role of comedy in society. All readings in English.

CLASS 231 Ancient Philosophy (also Philosophy 211)  
Fall. 4 credits. C. Brittain.  
For description, see PHIL 211.

CLASS 236 Greek Mythology (also Comparative Literature 236)  
Fall 1998 and summer 1999. 3 credits. Limited to 200 students. D. Mankin.  
A survey of Greek myths, with emphasis on the content and significance of the myths in Mediterranean society, including the place of myth in Greek life and consciousness; the factors and influences involved in the creation of myths; and the use of myths for our understanding of Greek literature, religion, and moral and political concepts.

CLASS 237 Greek Religion and Mystery Cults (also Religious Studies 237)  
Greek religion constitutes one of the essential features of ancient Greek civilization and distinguishes it from later Western civilization. Since religion permeates Greek culture, including the major art forms (epic poetry, tragedy, comedy, architecture, painting, and sculpture), the course will investigate the interaction of religion with these forms—an investigation that is fruitful both for the understanding of Greek religion and the forms themselves, some of which, like tragedy, originated in cult. A representative variety of cults and their history will be studied with special emphasis on mystery cults, such as the Eleusinian mysteries of Demeter and Persephone, the Great Gods of Samothrace, and Bacchic rites.

CLASS 238 The Ancient Epic and Beyond  
We will move, Odyssey-like, to the West—beginning with Homer's Iliad (and including the British poet Christopher Logue's "account" of the opening books) and Odyssey, we will continue in the Hellenistic and Augustan eras with Apollonius of Rhodes' Argonautica and Virgil's Aeneid. A violent shift in space and time will have us conclude with two New World maritime epics: Herman Melville's Moby Dick and Derek Walcott's Omeros.

CLASS 268 A History of Rome from Republic to Holy City (also History 268)  
Spring. 4 credits. Open to freshmen. J. Ginsburg.  
For description, see HIST 268.

CLASS 291 Classical Indian Narrative (also Asian Studies 291)  

CLASS 303-304 Independent Study in Classical Civilization, Undergraduate Level  
363, fall; 304, spring. Up to 4 credits.

CLASS 323 Greek and Roman Mystery Cults and Early Christianity (also Religious Studies 333)  
Fall. 4 credits. A previous course in Classics (civilization or language) or Religious Studies 101 is recommended. K. Clinton.  
A study of the controversial question of religious continuity between paganism and early Christianity. After a brief survey of classical mystery cults and Hellenistic religion, the course will focus on such Hellenistic cults as the mystery cults of Isis, Bacchus, and Arts and the Great Mother and on the distinctive features that contributed to their success. Discussion of Christian liturgy and beliefs to determine what Christianity owed to its pagan predecessors and to isolate the factors that contributed to its triumph over the "rival" pagan cults of late antiquity.

CLASS 345 The Tragic Theater (also Comparative Literature 344 and Theatre Arts 345)  
Tragedy and its audiences from ancient Greece to modern theater and film. Topics: origins of theatrical conventions; Shakespeare and Seneca; tragedy in modern theater and film. Works studied will include: Aeschylus' Agamemnon; Sophocles' Oedipus Tyrannus, Philoctetes; Euripides' Alcestis, Helen, Iphigeneia in Aulis, Orestes; Seneca's Thyestes, Trojan Women; Shakespeare's Julius Caesar, Titus Andronicus, Oedipus; Strindberg's The Father; Durrenmatt's The Visit; Bergman's Seventh Seal; Cacoyannis' Iphigenia.

CLASS 363 Representations of Women in Ancient Greece and Rome (also History 367 and Women's Studies 363)  
Analysis of ancient Greek and Roman representations of women—some famous, some infamous, some nameless—within their historical and cultural contexts and the assumptions that underlie these representations. Using literary, historical, legal, and artistic sources (in translation) and examining the historiographical and methodological problems the use of such evidence poses, the class will assess the changing social conditions that relate to the roles, status, and images of women in antiquity. Among the topics considered are: myth and ideology, women's role in the family and society, views of the female body and female sexuality, the place of women in creative art.

CLASS 382 Greeks, Romans, and Victorians (also Comparative Literature 382)  
Fall. 4 credits. F. Ahl.  
This course explores the nineteenth-century (and especially Victorian English and Irish) poets, dramatists, and to a lesser extent, novelists, present Greco-Roman antiquity. The varied influences of Vergil and Homer, Seneca and Sophocles, Plautus and Aristophanes, Horace, and Greek lyric poetry will be discussed in selected works of Thomas More, Shelley, Byron, Swinburne, W. S. Gilbert, Oscar Wilde, and the pre-Raphaelites and Victorian poets.

CLASS 390 The Sanskrit Epics (also Asian Studies 390)  
Spring. 4 credits. C. Minkowski.  
For description, see ASIAN 390.

CLASS 395 Classical Indian Philosophical Systems (also Asian Studies 395 and Religious Studies 395)  
Fall. 4 credits. Prerequisite: some background in philosophy or in classical Indian culture. C. Minkowski.  
For description, see ASIAN 395.
An undergraduate seminar examining the relationship between gender and politics in the late Roman Republic and early Empire. Does a broader definition of politics and an understanding of the various forms political activity in ancient Rome might allow a place for women in Roman political life? What role does gender have in Roman political discourse and ideology? Why do issues such as family, marriage, and sexuality become subjects of political debate and legislation?

CLASS 480 Roman Society and Politics under the Julio-Claudians (also History 473)

This course examines several of the important social and political changes in Roman society under Augustus and his successors, the Julio-Claudians. Topics to be investigated include Augustus's consolidation of power through political and social revolution, the Augustan attempt to regulate family life and social relations by legislation, the relation of the emperor Tiberius with the members of the old ruling class, the growth of the imperial bureaucracy and the new opportunities for social mobility, the political opposition to Claudius and Nero, Nero's cultural and provincial policy, and the manipulation of the imperial cult. All readings will be in English.

CLASS 711-712 Independent Study for Graduate Students in Classical Civilization
711, fall; 712, spring. Up to 4 credits.

Greek

CLASS 106 Elementary Latin
Fall. 3 credits. Prerequisite: 101 or equivalent. Staff. A continuation of Classics 105, using readings from various authors.

CLASS 107 Intensive Latin
Spring and summer. 6 credits. Staff. Prepares students in one term for 200-level Latin.

CLASS 108 Latin in Review
Fall. 4 credits. Prerequisite: placement by departmental examination. E. Hohendahl. This course will accommodate students who place too high for beginning Latin, but not high enough for intermediate.

CLASS 205 Intermediate Latin
Fall and spring. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. J. Reed.

CLASS 206 Latin Drusus
Spring. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. H. Kolias.

CLASS 207 Catullus
Fall. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. H. Kolias.

CLASS 208 Roman Drama: Seneca
Spring. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. J. Reed.

CLASS 209 Latin in Review
Fall. 4 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. F. Mankin.

CLASS 216 Vergil
Spring. 3 credits. Prerequisite: Classics 106, 107, 108, or one term of 200-level Latin. H. Kolias.

CLASS 227-228 Independent Study in Latin, Undergraduate Level
227, fall; 228, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict.

CLASS 312 Latin Undergraduate Seminar: Ovid's Amores
Fall. 4 credits. Prerequisite: two terms of 200-level Latin or permission of instructor. M. Landon.

CLASS 314 The Augustan Age
4 credits. Prerequisite: two terms of 200-level Latin or permission of instructor. Not offered 1998-99.

CLASS 315-316 Independent Study in Latin, Undergraduate Level
315, fall; 316, spring. Up to 4 credits.

CLASS 317 Roman Historiography
Spring. 4 credits. Prerequisite: one term of 300-level Latin or permission of instructor. J. Ginsburg.
[CLASS 328 Latin Undergraduate Seminar] #
Spring. 4 credits. Prerequisite: two terms of 200-level Latin or permission of instructor. Not offered fall 1998.

CLASS 341 Latin Prose Composition
Fall. 4 credits. Prerequisite: one term of 200-level Latin or permission of instructor. J. Ginsburg.

CLASS 411 Advanced Readings in Latin Literature #
Fall. 4 credits. Not offered fall 1998.

CLASS 412 Advanced Readings in Latin Literature #
Spring. 4 credits. Not offered spring 1999.

CLASS 441 Advanced Latin Prose Composition
Fall. 4 credits. For graduate students Only those undergraduates who have completed Latin 341 and have permission of the instructor may enroll. D. Shanzer.

CLASS 555 Graduate Proseminar
Fall. 1 credit. H. Pelliccia and staff. Graduate students will be introduced to the tools, techniques, and methods of Classical scholarship.

CLASS 603 Later Latin Literature #

CLASS 679 Graduate Seminar in Latin: Epistolography
Fall. 4 credits. J. Ginsburg.

CLASS 680 Graduate Seminar in Latin: Catullus
Spring. 4 credits. D. Mankin.

CLASS 751-752 Independent Study for Graduate Students in Latin
751, fall; 752, spring. Up to 4 credits.

Classical Art and Archaeology

CLASS 220 Introduction to Art History: The Classical World (also History of Art 220) #
Fall. 4 credits. J. Coleman. An overview of the art and archaeology of the Greek and Roman world. The sculpure, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the late empire.

CLASS 221 Minoan-Mycenean Art and Archaeology (also Archaeology 221 and History of Art 221) #
Spring. 3 credits. J. Coleman. The birth of civilization in Greece and the Aegean islands during the Bronze Age. The main focus is on the rise and fall of Minoan Crete and Mycenaean Greece, with consideration given to the nature and significance of Aegean interactions with Egypt, the Near East, and Anatolia.

CLASS 232 Archaeology in Action I (also Archaeology 232 and History of Art 224) #
Spring. 3 credits. Prerequisite: permission of instructor. Not offered fall 1998-99. P. I. Kuniholm.

CLASS 233 Archaeology in Action II (also Archaeology 233 and History of Art 225) #
Spring. 3 credits. Prerequisite: permission of instructor. P. I. Kuniholm.
For description, see Art H 225.

CLASS 309 Dendrochonology of the Aegean (also Archaeology 305 and History of Art 309)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm.
For description, see Art H 309.

CLASS 319 Art in the Daily Life of Greece and Rome (also History of Art 319) #
Spring. 4 credits. A. Ramage.
For description, see Art H 319.

CLASS 320 The Archaeology of Classical Greece (also History of Art 320)

CLASS 322 Greeks and Barbarians (also History of Art 328) #
Spring. 4 credits. Prerequisite: Classics 220 or 221, or permission of instructor. J. Coleman.
A study of the archaeological and other evidence for the interaction between Greek civilization and the peoples of the eastern and western Mediterranean from the thirteenth to the fourth centuries B.C.E. The course will focus on Greek relationships with Egypt, Phoenicia, Cyprus, Anatolia, and Italy in the post-Bronze Age period.

CLASS 323 Painting in the Greek and Roman World (also History of Art 323) #

CLASS 325 Greek Vase Painting (also History of Art 325) #
For description, see Art H 325.

CLASS 326 Greek Cities and Towns (also History of Art 326) #
Ancient Greek cities and towns from an archaeological perspective. Topics include the city in its geographical setting, the development of the fortified city, town planning, the Classical house and household, official and religious life versus private life, the territory and boundaries of cities and towns, regional states and leagues, warfare between cities and regions, and roads and sea routes. Examples will mostly be drawn from Athens/Attica and central Greece. Two short oral presentations, presented after consultation in written form, and a final examination.

CLASS 327 Greek and Roman Coins (also History of Art 327) #
For description, see Art H 327.

CLASS 329 Greek Sculpture (also History of Art 329) #
An examination of ancient Greek sculpture, both three-dimensional and two-dimensional, from the Archaic to the Hellenistic period. Aspects of the works studied include: technological advances, changing ideology of the sculptors, regionalism of styles, and taste of individual patrons.

CLASS 350 Arts of the Roman Empire (also History of Art 322) #
Fall. 4 credits. A. Ramage.
For description, see Art H 322.

CLASS 352 The City of Athens from Theseus to Justinian (also Archaeology 352 and History of Art 352) #
Spring. 3 credits. M. Landon.
A detailed survey of the architectural development of the city of Athens from the Bronze Age to the 6th century A.D. The principal monuments will be examined against a broad historical and cultural background, with special attention to both Athenian society and the development of Greek art and architecture as a whole.

CLASS 357-358 Independent Study in Classical Archaeology, Undergraduate Level
357, fall; 358, spring. Up to 4 credits.

CLASS 423 Ceramics (also Archaeology 423 and History of Art 423) #
4 credits. Prerequisite: permission of instructor. Not offered 1998-99. Staff.

CLASS 430 Seminar on the Bronze Age Architecture of Asia Minor (also Archaeology 425 and History of Art 425) #
For description, see Art H 425.

CLASS 432 Sardis and the Cities of Asia Minor (also Archaeology 432 and History of Art 432) #
For description, see Art H 434.

CLASS 434 The Rise of Classical Greece (also Archaeology 434 and History of Art 434) #
4 credits. Recommended: Classics 220 or 221, History of Art 220 or 221, or permission of instructor. Not offered 1998-99. P. I. Kuniholm.
For description, see Art H 434.

CLASS 435 Seminar on Roman Art and Archaeology (also Archaeology 435 and History of Art 427) #
For description, see Art H 427.

CLASS 629 The Prehistoric Aegean (also Archaeology 434) #

CLASS 630 Seminar in Classical Archaeology (also Archaeology 520 and History of Art 520) #
For description, see Art H 520.

CLASS 721-722 Independent Study for Graduate Students in Classical Archaeology
721, fall; 722, spring. Up to 4 credits.
Greek and Latin Linguistics

CLASS 421 Greek Comparative Grammar (also Linguistics 451) #
4 credits. Prerequisite: thorough familiarity with the morphology of classical Greek. Not offered 1998-99.
The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

CLASS 422 Latin Comparative Grammar (also Linguistics 452) #
Fall. 4 credits. Prerequisite: thorough familiarity with the morphology of classical Latin. A. Nussbaum.
The prehistory and evolution of the sounds and forms of Classical Latin as reconstructed by comparison with the other Indo-European languages.

CLASS 424 Italic Dialects (also Linguistics 454) #
Fall. 4 credits. A. Nussbaum.

CLASS 425 Greek Dialects (also Linguistics 455) #
A. Nussbaum.

CLASS 426 Archaic Latin (also Linguistics 456) #
A. Nussbaum.

CLASS 427 Homeric Philology (also Linguistics 457) #
Spring. 4 credits. Prerequisite: ability to read Homeric Greek. A. Nussbaum.
The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a Kunstraume: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.

CLASS 429 Mycenaean Greek (also Linguistics 459) #
4 credits. Prerequisite: thorough familiarity with the morphology of Classical Greek. Not offered 1998-99.
A. Nussbaum.

Sanskrit

CLASS 131-132 Elementary Sanskrit (also Linguistics 131-132 and Sanskrit 131-132) #
131, fall; 132, spring. 4 credits each term.
C. Minkowski.
An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.

CLASS 251-252 Intermediate Sanskrit (also Linguistics 251-252 and Sanskrit 251-252) #
251, fall; 252, spring. 3 credits each term.
Prerequisite: Classics 132 or equivalent.
C. Minkowski.
Readings from the literature of Classical Sanskrit. Fall: selections from the two Sanskrit epics, the Mahabharata and the Ramayana. Spring: more selections from the epics, and from other Sanskrit story literature or from Sanskrit dramas.

CLASS 403-404 Independent Study in Sanskrit, Undergraduate Level
403, fall; 404, spring. Up to 4 credits.
C. Minkowski.

CLASS 703-704 Independent Study for Graduate Students in Sanskrit
703, fall; 704, spring. Up to 4 credits.
C. Minkowski.
Also see Classics 291, 390, and 395 (Classical Civilization listings).

Honors Courses

CLASS 472 Honors Course: Senior Essay
Fall and spring. 8 credits. An adviser must be chosen by the end of the student's sixth semester. Topics must be approved by the Standing Committee on Honors by the beginning of the seventh semester. See "Honors." Classics front matter.

COMPARATIVE LITERATURE

W. J. Kennedy, chairman (141 Goldwin Smith), C. Arroyo, director of undergraduate studies (295 Goldwin Smith), J. Monroe, director of graduate studies (145 Goldwin Smith); G. Gibian, director of the senior essay colloquium (236D Goldwin Smith, 255-8347); M. Arroyo, A. Caputi (Emeritus), D. Castro, W. Cohen, J. Culler, B. deBary, D. Grossvogel (Emeritus), P. Heldenhain, W. Holdeim (Emeritus), N. Melas, N. Sakai, J. Porte, L. Waugh.
The Department of Comparative Literature provides a broad range of courses in European as well as non-European literatures. Courses variously stress significant authors, themes, problems, styles, genres, historical periods, and theoretical perspectives. In cooperation with related departments in the humanities, the departmental offerings reflect current interdisciplinary approaches to literary study: hermeneutics, semiotics, deconstruction, cultural criticism, Marxism, reception aesthetics, feminism, psychoanalysis.

The Major
The major enables students to develop an integrated knowledge of Western literature, to strengthen their reading and writing abilities, and to prepare for careers demanding analytical, interpretive, and evaluative skills. Prospective majors should consult with the director of undergraduate studies. After declaring a major, a student may choose an adviser from the department's faculty. The requirements for the major are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests. The specific contours of such a program are worked out in consultation with the student's adviser.

Requirements for the Major
1) Five courses in Comparative Literature at the 200-level and above, including the core course listed below. A student may include up to two literature courses from other departments.
2) One core course in Comparative Literature (for 1997-98 Comparative Literature 411 (spring)) to be taken by all majors in their junior or senior year. At the discretion of the department, students may enroll in core courses in both their junior and senior years.
3) Five courses in literature and other areas of the humanities at the 200 or higher level, to be taken in one or more foreign literature departments. Texts must be read in the original language. A student may offer one language course (conversation, composition, etc.) towards fulfilling the language requirement.
4) An honor's essay (Comparative Literature 493) of roughly fifty pages, to be written during the senior year under the direction of a faculty member, preferably from within the department, who has agreed to work in close cooperation with the student. Students are urged to begin research on their thesis topic during the summer preceding their senior year.
The department also encourages:
1) a program that includes broad historical coverage (e.g., Comparative Literature 201-202: Great Books); intensive study of a single genre (e.g., Comparative Literature 363-364: The European Novel, Comparative Literature 365: Contemporary Fiction); analysis of problems in literary theory (e.g., Comparative Literature 302: Literature and Theory, Comparative Literature 416: Subject to Translation). Beginning in 1998-99, the department will offer a number of strongly recommended 200-level courses designed to acquaint undergraduates with the discipline: Comparative Literature 203: "Introduction to Comparative Literature," as well as broading introductory courses in World Fiction (Comparative Literature 204) and World Poetry (Comparative Literature 205), with emphasis on the nineteenth and twentieth centuries.
2) a second foreign language, especially for students interested in graduate work in literature.

Honors
A student who completes the requirements for the major is eligible for the degree of Bachelor of Arts with honors in comparative literature. The department bases its decision on the student's achieving grades of at least B+ in the senior essay and in course work for the major, and on overall academic performance at Cornell.
Freshman Writing Seminars
Most 100-level courses may be used toward satisfying the freshman writing seminar requirements. See "John S. Knight Writing Program" for a full description of the freshman seminar program.

Courses

**COM L 201–202 Great Books**
201: Fall, 202: Spring. 4 credits. Comparative Literature 201 and 202 may be taken independently of each other. COM L 202 also offered summer 1998. Fall: W. Kennedy, spring: B. Maxwell.

A reading each semester of seminal texts that represent and have shaped Western culture and hence form an essential part of the student's intellectual equipment. By analyzing, interpreting, and evaluating, students will develop critical reading abilities.

**COM L 201**: Selections from the Bible, Homer, Dante, Rabelais, Shakespeare, and others.

**COM L 202**: World literature of the last 300 years, emphasizing the response to European worldwide expansion first in the colonizing countries, then in the colonized. The persistence of certain themes (such as slavery, monstrosity, overreaching, coercion, and vengeance) will be a central concern in many of the texts studied. A certain amount of attention will be given to an examination of differing ideological perspectives on the notion of "Great Books." Readings chosen from texts by Shakespeare, Defoe, Swift, Voltaire, Goethe, Mary Shelley, Balzac, Poe, Melville, Marx, Flaubert, Conrad, Kipling, Brecht, Woolf, Cézanne, Tuttuola, Brathwaite, Naipaul, and Ammaah.

**COM L 203 Introduction to Comparative Literature**
4 credits. Not offered 1998–99. Staff. The course is intended to answer the question persistently asked by undergraduates: "What is comparative literature, anyway?" The format of the course is designed to acquaint prospective majors, or interested undergraduates generally, with the range and variety of the field by having the members of the department take turns in presenting those aspects which reflect the range of their expertise and their methods of teaching. Each faculty member will give a manageable reading assignment; of the two meetings each week, the first will generally take the form of a lecture; the second will be a discussion of the assigned text.

**COM L 204 Global Fictions**
Spring. 4 credits. N. Melas. An introduction to the enormously rich field of the novel. From the astonishingly modern fiction to emerge from the medieval and post-medieval Far East to both Eurocentric and Third World Literature of the twentieth century. Translated into names, our roster would include people from Lady Murasaki to Vladimir Nabokov — and beyond. We shall be reading some shorter and longer fictions which have been generally considered milestones in the history of the novel and the novella, including works by Cervantes, Defoe, Austen, Flaubert, Henry James, Joyce, Kafka, and Borges and/or "essential" writers not covered in the more advanced novel courses.

**COM L 205 Introduction to Poetry, Chiefly Modern**

Unlike Comparative Literature 207, 205 is intended to be a survey that concentrates largely (but of course not exclusively) on foreign poetry. The course will cut across historical periods and poetic genres, from conventional "strict" genres of the sonnet-variety to forms more nearly associated with our own times: free verse, "the prose poem," etc. Difficult as it may be to avoid poets on the order of Shakespeare, Goethe, and Keats, we propose to focus on the practitioners of the craft from Baudelaire, Whitman, Hopkins, Mallarme, and Rilke on down.

**COM L 206 Introduction to Literary Criticism**
Spring. 4 credits. Staff. More advanced undergraduate seminars naturally tend to focus on contemporary literary theory; after all, it is essential for students of literature to be well-informed about contemporary theoretical debates, methodologies, and problems. But literary theory and criticism did not begin with the structuralist revolution of the 1960s, and it is also essential for students to understand earlier developments — many of which still have the power to provoke and inspire. Critical historicization should begin at home, with an awareness of how different the forms, practices, institutions and politics of literary criticism have been, and this course will thus introduce students to the pre-1960 debates. We will examine the historical evolution of key terms now more or less taken for granted as part of critical vocabulary, and we will pay particular attention to the (relatively recent) history of literature itself as a category of study. Critics and theorists will be chosen from among Plato, Aristotle, Cicero, Horace, and Augustine; Renaissance and neo-classical critics such as Spenser, Dryden, and Dr. Johnson; Enlightenment, Romantic and post-Romantic theorists such as Kant, Hegel, Schiller, Coleridge, Wilde, and Pater; and such major twentieth-century figures as Heidegger, Bataille, Sartre, Benjamin and A. Richards. No prior knowledge of the subject will be assumed, and all texts will be read in English.

**COM L 208 Shakespeare and the 20th Century (also ENGL 208)**
Fall. 4 credits. Not offered 1998–99. W. Cohen. What is the relationship between the plays of Shakespeare in their own time and the various ways they have functioned in modern culture? We will compare selected works of Shakespeare with their adaptations in fiction, theater, film, the educational system, government, and popular culture. The discussion of each play will be organized around one or more critical approaches. The course as a whole will attempt to provide a systematic introduction to the contemporary study of literature and culture.

**COM L 215 Comparative American Literatures**
Fall. 4 credits. B. Maxwell. Twentieth-century writing from Canada, the United States, the Caribbean, and Latin America. A heretofore neglected perspective will encourage thinking about and across cultural, linguistic, and national demarcations. This course proposes that a question put by the poet William Carlos Williams — "How do we fools know or care?"— finds its counter-statement in words from Africa, passed on by the novelist Paul Marshall. "Once a great wrong has been done, it never dies. People speak the words of peace, but their hearts do not forgive. Generations perform ceremonies of reconciliation but there is no end." Countering the literature of amnesia and baseless optimism, the works that we will read cannot forget, and decline to forgive, the historical traumas that so bitterly flavor them. Our concern largely will be with understanding the aesthetic means and strategies that certain writers use to perform ceremonies not bent on reconciliation. Readings (in English) will include Joy Kogawa, Obsession; Sheila Watson, The Double Hook; Hubert Aquin, The Explanation; Jean Toomer, Cane; William Faulkner, Absalom, Absalom!; Wilson Harris, The Palace of the Peacock; Edward Kamau Brathwaite, X/Se SELF and Trench Town Rock; Mariano Azuela, The Underdogs; Jose Donoso, Curfew; and Eduardo Galeano, The Book of Embraces and selections from the work of John Sanford, Rosario Castellanos, Clarice Lispector, and Juan Gelman.

**COM L 223 The Comic Theater (also CLASS 223 and THEATR 223)**
Fall. 3 credits. Not offered 1998–99. For description, see Classics 223.

**COM L 236 Greek Mythology (also CLASS 236)**
Fall. 3 credits. Limited to 200. (Also offered summer '98). D. Mankin. For description, see Classics 236.

**COM L 239 Cultural History of the Jews of Spain (also NES 239, JWST 239, REL. ST. 239 and SPAN L 239)**

**COM L 302 Literature and Theory (also ENGL 302/602)**
Fall. 4 credits. J. Culler. Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings from Barthes, Derrida, Foucault, J. Butler, B. Johnson, and others. No previous knowledge of literary theory is assumed.

**COM L 304 Europe and its Others: An Introduction to the Literature of Colonialism**
Fall. 4 credits. N. Melas. Through an examination of selected works from the literature of the nineteenth century to the modern period, mainly written in English and French, the course will explore the problems and possibilities, imperialism presented for narration, both in the literature of imperialism and the literature against imperialism. Topics will include transcultural (de)formation of identity, exoticism and internationalism, racial romance, cultural pressures on reading and interpretation, and the powers and pitfalls of Orientalism. Probable authors: Hagedorn, Stevenson, Conrad, Ngugi, Camus, Conde, Achebe, Duras, Saleh. All readings available in English.

**COM L 305 Irony: An Introduction**
Fall. 4 credits. Not offered 1998–99. Staff. Oscar Wilde suggested that all bad poetry is sentimental. Was he being ironic? Irony is an aspect of literature (and everyday life) that is very common and of fundamental importance but misunderstood and even distrusted. This course will confront the theory and politics of irony. Our approach will be historical,
philosophical, and literary but will never lose sight of practical questions that students
necessarily face: must we—or can we—mean what we say? How can we analyze irony in a
text? How can we analyze performance, a drag queen ironic? Texts about irony—or ironic texts—to be studied will include Plato, Meister Eckhart, Teresa of Avila, John of the Cross, and expressions of silence and the ineffable in our times.

C. M. Carmichael.
Analysis of small sections of well-known material for in-depth discussion.

G. Waite.
For description, please see Theatre Arts 329.

R. Brann.
For description, please see Near Eastern Studies 339.

**COM L 335 The Modern and Contemporary Theatre (also THETR 335)** Fall: 4 credits. R. Schneider.
For course description, please see THETR 335.

A. R. Parker.
Works by such writers as Molliere, Congreve, Goethe, Schiller, Kleist, Shelley, Byron, Büchner, Ibsen, and Chekhov.

B. deBary.
For description, please see Asian Studies 363.

M. Steinberg.
For description, please see History 362.

**COM L 353 European Cultural History (also Hist 363)** Fall: 4 credits. M. Steinberg.
For course description, please see History 363.

E. Hanson.
For description, please see English 355.

**COM L 356 Renaissance Literature** Spring: 4 credits. W. Kennedy.
An introduction to Renaissance literary texts with some attention to cultural backgrounds and intellectual history. Readings from Machiavelli, Erasmus, Rabelais, Shak, Cervantes and others.

**COM L 358 Literature and Religion: Western Mysticism (also RomS 358, Rel. St. 358)** Spring: 4 credits. C. Arroyo.
Analysis of some canonical texts of western mysticism toward a systematic view of their
common features (a semiotics of the mystic text). Readings include: excerpts from the Bible, Plotinus, Pseudo-Dionysius, Bernard of Clairvaux, Ibn Arabi of Murcia, The Zohar, Meister Eckhart, Teresa of Avila, John of the Cross, and expressions of silence and the ineffable in our times.

**COM L 362 The Culture of the Renaissance II (also ENGL 325, HIST 364, MUS 390, ART H 351 and Rel. St. 362)** Fall: 4 credits.
C. Kaske, W. J. Kennedy.
Members of various departments will lecture on Luther, Michelangelo, Edmund Spenser, Cervantes, Copernicus, Galileo, Monteverdi. Guest lecturers will include Peter Dear, History; Esther Dotson, History of Art; and Rebecca Harris-Warrick, Music. Lectures and discussion will introduce different methods of interpretation and of historical analysis. Written requirements: two short papers and a final take-home examination.

**COM L 363-364 The European Novel** Fall, Spring: 4 credits. Comparative Literature 363 and 364 may be taken independently of each other.

**363: From Boccaccio to Goethe.** Survey of the history of the novel from its origins to the end of the eighteenth century. The new genre of Humanism and the medieval romances of chivalry. Ambiguities derived from the lack of the word “novel.” Different steps in the conquest of realism. The novel and intellectual history in different epochs: character and structure in the novels and contemporary philosophical views on man, cosmos, gender, and social classes. Readings include Boccaccio’s Fiammetta, G. Pico’s Lazarillo de Tormes; Cervantes’s Don Quixote; Mme de Lafayette’s La Princesse de Clèves; Defoe’s Robinson Crusoe; Horace Walpole’s The Castle of Otranto; and Goethe’s Sorrows of Young Werther. As well as a short package containing theoretical statements about the genre from Gidalhi Cintio to Goethe. All texts read in English.

**364: From Stendhal to the present** (in translation). Close reading of novels from the 19th and 20th centuries: Stendhal’s The Red and the Black; Flaubert’s Madame Bovary; Dostoevsky’s Crime and Punishment; Joyce’s Portrait of the Artist as a Young Man; Kafka’s The Metamorphosis; and Kundera’s The Unbearable Lightness of Being. Study of the changing ways of representing recurring themes: the role of the creative imagination; the city and country; rebellions and revolutions; communities and solidarity; dominant groups and minorities (social, ethnic, religious, psychological); introspection, sexual and political revolution; and the motive of resentment. Readings (in translation) chosen from the following: Robert Walser, Smaragd and The Walk; Franz Kafka, The Trial.

**COM L 367 The Russian Novel (also RUSS L 367)**

Fall. 4 credits. G. Gibian.

For description, please see Russian Literature 367.

**COM L 368 Visual Culture and Social Theory (also GOVT 375 and ART H 370)**

Fall. 4 credits. Not offered 1998-99.

S. Buck-Morss.

For description, please see Government 375.

**COM L 375 Chekhov (also RUSS L 373)**

Fall. 4 credits. S. Senderovich.

For course description, please see Russian Literature 373.

**COM L 385 Reading Nabokov (also RUSS L 385, ENGL 379)**

Fall. 4 credits. Enrollments limited to 25.

G. Shapiro.

For course description, please see Russian Literature 385.

**COM L 387 Interpretation and/as Violence**

Staff.

This course is a response to the approach of the human sciences to violence, in its relation of antiquity to the present, of identity and historical event. Themes to be considered include: 1) theories of psychology, destiny, and difference; 2) the new and mass entertainment; 3) the retreat to the interior as a site of psychological exploration and artistic innovation; 4) feminine culture and the New Woman; 5) spaces of the demimonde (the culture of courtesans, sapphism 1900); 6) identity and technological innovation. Short critical texts will be read in relation to well-known authors of the period such as Max Nordau, Zola, Huysmans, Rilke, Colette, and Proust. Requirements will include short oral presentations and a term paper.

**COM L 396 German Film (also GERST 396 and THEAT 396)**

Spring. 4 credits. Prerequisite: some knowledge of film.

E. Rosenberg.

For description, please see Theatre Arts 396.

**COM L 400 History and Memory: Virtual Nations, Artificial Groups and the Historical Event (also SOC HUM 406 and NSES 490)**

Fall. 4 credits. Enrollments limited to 15.

R. Khanna.

For course description, please see Society for Humanities 406.

**COM L 404 History into Fiction: Nazis and the Literary Imagination (also ENGL 404 and GERST 414)**

Fall. 4 credits. Not offered 1998-99.

E. Rosenberg.

For description, please see ENGL 404.

**COM L 408 Gilles Deleuze and the Philosophy of the Virtual (also SOC HUM 417)**

Spring. 4 credits. Enrollments limited to 15.

E. Kaufman.

For course description, please see Society for Humanities 417.

**COM L 409 Genius and Madness in German Literature (also GER ST 428)**

Fall. 4 credits. Prerequisite: some background in German literature.

E. Rosenberg.

For course description, please see GER ST 428.

**COM L 410 Semiotics and Language (also LING 400 and FR ROM ST 400)**

Spring. 4 credits. Prerequisite: some background in semiotics.

For description, please see Linguistics 400.

**COM L 411 The Short Novel from Flaubert to James and the Present**

E. Rosenberg.

Discussion of some ten authors who excelled in the form of the novella and whose names are thus up to a point "given": in addition to Flaubert, writers like Conrad, Tolstoy, Mann, Kafka, Joyce, Faulkner, Marquez, Morrison. One or more each week or week and a half, but not in canonical order; e.g., Conrad's *Heart of Darkness*, Kafka's *Penal Colony*, and Osick's *The Shawl*.

Beginning with Homer's *Iliad*, this course will inquire into the monumental transformation of death into immortality in the literary composition. How do death's negations become fiction's triumph? We will pay particular attention to the fate of this procedure when its subjects are no longer heroic warriors but slaves and women. How do colonial domination and gender difference alter the aesthetic procedures and assumptions underlying commemoration and literacy immortality? In addition to death and language, we will consider such themes as the relation of antiquity to the present, of identity to its dissolution and of politics to culture.

**COM L 417 Faust (also GER ST 417)**

Fall. 4 credits. H. Deinert.

For course description, please see German Studies 417.

**COM L 419-420 Independent Study**

419, fall; 420, spring. Variable credit.

For description, please see Language and Linguistics 419 and 420 may be taken independently of each other. Applications available in 145 G.S.

**COM L 421 Approaches to Discourse (also LANG 420)**

Spring. 4 credits. H. Tao.

For course description, please see LANG 420.

**COM L 424 Early Modern Paradise (also SOC HUM 404)**

Spring. 4 credits. Enrollment limited to 15.

M. Douethi.

For course description, please see Society for Humanities 404.

**COM L 425 Marx, Freud, Nietzsche (also GER ST 415, GOVT 473)**

Spring. 4 credits. G. Waite.

For course description, please see German Studies 415.

COM L 429  Readings in the New Testament (also NES 429, REL ST 429 and ENGL 429)  Fall. 4 credits. Limited to 30 students. J. P. Bishop. Close readings of representative texts from the New Testament in modern scholarly editions, with the help of appropriate introductory and specialized commentary. The focus for 1997 will be on Acts and the letters of Paul. All readings will be in English, but repeated reference to the Greek original will be made. Graduate students and undergraduates from other colleges who are interested in the material should not feel inhibited from enrolling. The approach will be primarily exegetical, that is, we will try to find out what the texts say and what they mean by what they say. Thus we can hope to stay open to scholarly and religious issues alike.

COM L 445  Nabokov vs. Sartre (also RUS L 425)  Spring. 4 credits. S. Senderovich. For course description, please see Russian Literature 425.

COM L 449  Misogyny and Its Readers (also COM L 649, ITAL L 409/609, WM ST 409/609)  Fall. 4 credits. M. Migiel. For course description, please see Italian Literature 409.

COM L 452  Renaissance Humanism (also COM L 652)  Spring. 4 credits. Enrollment limited to 15. W. Kennedy. A reading and discussion of key texts by Renaissance humanists in Italian, French, English and other European literatures from the fourteenth to seventeenth centuries.

COM L 455  Caribbean Literature (also AFRICANA 465)  Fall. 4 credits. Enrollment limited to 15. A. Adams. For description, please see Africana Studies 455.

COM L 463  Decadence, Degeneration and the 19th-Century Imaginary  Spring. 4 credits. W. Hope. Through critical reading of French, British and German prose fiction as well as examples of medical, anthropological and philosophical thought, we shall examine the social significance of discourses of disease, decadence and degeneration from the late eighteenth century to the early twentieth. How are questions of bodily pathology related to the construction of "national" bodies? How does perversion emerge at the core of theories of heredity and genealogy that traverse Europe's colonial scenes? What is the relationship between symptoms and texts, between sickness and subversion, in the mapping of gender, class, race and sexuality onto the body? The course material will include readings from Jean-Jacques Rousseau, Alexandre Dumas fils, Edgar Allan Poe, Honoré de Balzac, Arthur Schopenhauer, Friedrich Nietzsche, Sigmund Freud, Rémy de Gourmont, Havelock Ellis, Radclyffe Hall and Thomas Mann. Students may read in the original language or in translation.

COM L 472  Poetry of the 1990s (also ENGLISH 408, SPAN L 472, and GER ST 472)  Fall. 4 credits. Enrollment limited to 15 students. J. Monroe. Where is poetry now? Where is it heading as we move toward the twenty-first century? What is its current situation in light of the historic changes that have occurred since 1989? Exploring how contemporary poetry is responding to a new era of altered expectations and redefined boundaries, a time of renewal and redeftnition, we will track the principal issues, directions, figures, and forces shaping the process of poetry's unfolding in the twentieth century's final decade. Materials will be drawn from a wide variety of forms and contexts, including movies, literary journals, general circulation magazines, and anthologies, as well as individual poetry collections.

COM L 480  Baudelaire in Context (also COM L 680)  Spring. 4 credits. J. Culler. A study of Les Fleurs du Mal in the context of various nineteenth- and twentieth-century discourses: The Romantic lyric (Hugo, Lamartine, Desbordes-Valmore), romantic satanism, debates about prostitution, and twentieth-century accounts of Baudelaire as the founder of modern poetry or the poet of the city.

COM L 493  Senior Essay  Fall and spring. 8 credits. Hours to be arranged individually in consultation with the director of the Senior Essay Colloquium. Approximately fifty pages to be written over the course of two semesters in the student's senior year under the direction of the student's adviser. An "R" grade will be assigned on the basis of research and a preliminary draft completed in the first semester. A letter grade will be awarded on completion of the second semester.

[COM L 649] Misogyny and Its Readers (also COM L 449, ITAL L 409/609, WM ST 409/609)  Fall. 4 credits. M. Migiel. For course description, please see Comparative Literature 409.

COM L 652  Renaissance Humanism (also COM L 452)  Spring. 4 credits. W. Kennedy.

COM L 656  Aesthetic Theory: The End of Art (also GER ST 656)  Spring. 4 credits. P. Gilgen. For course description, please see German Studies 656.
COM L 657 Seminar in Dramatic Theory (also THETR 637)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
R. Schneider.
For description, please see Theatre Arts 637.

COM L 664 Literature and the Uncanny (also GER ST 656)
Fall. 4 credits. A. Schwarz.
For course description, please see German Studies 656.

COM L 671 Transnational Imaginaries: Globalization and Culture
Fall. 4 credits. N. Melas.
The term “globalization” has become ubiquitous in recent years as the primary conceptual frame and material basis for understanding contemporary transnationalism. It evokes a brave new borderless world in which politics, culture, and social formations are no longer necessarily congruent nor primarily beholden to national boundaries thus making neocolonial domination easier to see and harder to combat. It triumphantly or despairingly announces the end of history when space precedes time as the measure of human experience, and that experience exceeds the grasp of aspects of our understanding of culture—both in its ethnographic and humanist guises—and of the categories through which we apprehend and analyze it. The question of the mutation of culture in globalization is most often framed either in terms of the prospects for global culture and its inverse, a regeneration of resistant and hybrid localism, or in terms of the global reach of chiefly U.S. popular culture through the media.

While considering these issues, this seminar will focus on how globalization is represented, or rather imagined, particularly in cultural texts (chiefly theory, literature, and film) marginal to the centers of power. In addition to providing a critical survey of some of the most influential texts and debates on the subject of globalization, this seminar will also attempt a re-evaluation and re-appropriation of the notion of “imagination” and the pivotal role it plays in claims for cultural resistance. Authors may include Amin, Wallerstein, Hall, Myoshi, Harvey, Robertson, Appadurai, Agamben, Walcott, Brennan, Jameson, Glissant, Mies.

COM L 674 Contemporary Poetry and Culture: 1966-1998 (also ENGL 679 and GERST 674)
Spring. 4 credits. J. Monroe.
The redrawing of cultural and political boundaries underway since the late 1980’s has made it possible to conceive of the poetry of the Cold War era with a degree of closure unimaginable only a few years ago. In light of this changed situation, we will focus on the second half of the post-1945 period—the thirty years extending from 1968 to the present—with particular attention to the past two decades. Exploring issues of emerging and evolving national and ethnic identities for a poetry of the present moment in light of the recent past, we will consider dominant modes as well as alternative practices; canon formation, gender, and multiculturalism; the roles of the publishing industry, popular culture, creative writing programs, and new computer technologies in shaping reading habits and writing communities.

COM L 675 After the Divide: German Critical Theory of the Seventies and Eighties (also GERST 675 and HIST 675)
Fall. 4 credits. Not offered 1998-99.
P. Hohendahl.
For description, please see German Studies 675.

COM L 680 Baudelaire in Context (also COM L 481)
Spring. 4 credits. J. Culler.
For course description, please see Comparative Literature 481.

COM L 685 Althusser and Lacan (also GER ST 686, FR LIT 623)
Spring. 4 credits. Enrollment limited to 12.
G. Waite.
For course description, please see German Studies 686.

COM L 689 Adorno’s Aesthetic Theory (also GER ST 689)
Fall. 4 credits. P. Hohendahl.
For course description, please see German Studies 689.

COM L 699 German Film Theory (also GERST 699 and THETR 699)
Fall. 4 credits.
D. Bathrick.
For description, please see Theatre Arts 699.

COMPUTER SCIENCE
The Department of Computer Science is affiliated with both the College of Arts and Sciences and the College of Engineering. Students in either college may major in computer science. For details, visit our World Wide Web site at http://www.cs.cornell.edu/Info/Ugrad.

The Major
CS majors take courses in algorithms, data structures, logic, programming languages, scientific computing, systems, and theory. Electives in artificial intelligence, computer graphics, computer vision, databases, multimedia, and networks are also possible. Requirements include:
• four semesters of calculus (MATH 111-112 (or 112-221-222 or 191-192-293-294)
• two semesters of introductory computer programming (COM S 100 and 211 or 212)
• a seven-course computer science core (COM S 222, 280, 314, 381, 410, 414, and 482)
• two 400+ computer science electives, totaling at least 6 credits
• a computer science project course (COM S 433, 415, 418, 433, or 473)
• a 3+ credit mathematical elective course (ORIE 270, MATH 300+, TAM 300+, etc.)

• two 300+ courses that are technical in nature and total at least six credits
• a three course specialization in a discipline other than computer science. These courses must be numbered 300-level or greater and total at least nine credits.

The program is broad and rigorous, but it is structured in a way that supports in-depth study of outside areas. Intelligent course selection can set the stage for graduate study and employment in any technical area and any professional area such as business, law, or medicine. With the advisor, the computer science major is expected to put together a coherent program of study that supports career objectives, and is true to the aims of liberal education.

Admission
The prerequisites for admission to the major are:
1) Completion of Computer Science 100-211 (or 212-280)
2) Completion of Mathematics 111-122-221 or Mathematics 191-192-293
3) A 2.75 grade-point average in all computer science and mathematics courses
4) Acceptance by the department’s admissions committee

After admission, students are expected to maintain at least a 2.75 grade-point average in their major courses. Any grade below C– in a core course or related elective is not acceptable.

Honors. To qualify for departmental honors a student must have:
• maintained a cumulative GPA of 3.5
• completed 8 credit hours of COM S course work at or above the 500 level
• completed 6 credit hours of COM S 490 research with a COM S faculty member, spread over at least two semesters and obtaining grades of A- or better.

Note: Honors courses may not be used to satisfy the COM S 400+ elective requirement, the COM S project requirement, the math or technical electives, or the minor. See the COM S undergraduate website for more information on eligibility: http://www.cs.cornell.edu/Info/Ugrad.

Courses
For complete course descriptions, see the computer science listing in the College of Engineering section.

COM S 099 Fundamental Programming Concepts
Fall, summer. 2 credits. S-U grades only. No prerequisites.

COM S 100 Introduction to Computer Programming
Fall, spring, or summer. 4 credits. During the fall semester, two versions of COM S 100 (COM S 100a and COM S 100b) are available as described in the computer science listing in the College of Engineering.

COM S 101 Introduction to Cognitive Science (also COGST 101, LING 170, and PSYCH 102)
Fall. 5 credits.
COM S 113 Introduction to C  
Fall, spring. 1 credit. Prerequisites: COM S 100 or equivalent programming experience. Credit is granted for both COM S 113 and 213 only if 113 is taken first. S-U grades only.

COM S 114 Unix Tools  
Fall, spring. 1 credit. Weeks 1-4. Prerequisite: COM S 100 or equivalent programming experience. S-U grades only.

COM S 130 Creating Web Documents  
Fall. 3 credits.

COM S 201 Cognitive Science in Context Laboratory: Explorations of Cognitive Science in Ecological Settings (also COGST 201 and PSYCH 201)  
Fall. 4 credits. Prerequisite: Introduction to Cognitive Science PSYCH 102, COGST 101, COM S 101, or written permission of the instructor. Limited to 24 students. Dis: and demos, M W 10:10, lab, M or W 1:25-4:25, plus additional hours to be arranged. B. Halpern and staff.

COM S 202 Transition to Java  
Fall, spring. 1 credit. Weeks 1-4. Prerequisites: COM S 100; COM S 212 recommended.

COM S 211 Computers and Programming (also ENGRD 211)  
Fall, spring, or summer. 3 credits. Prerequisite: COM S 100 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.

COM S 212 Structure and Interpretation of Computer Programs (also ENGRD 212)  
Fall, spring. 4 credits. Prerequisite: COM S 100 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.

COM S 213 C++ Programming  
Fall, spring. 2 credits. Prerequisite: COM S 211 or 212 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.

COM S 222 Introduction to Scientific Computation (also ENGRD 222)  
Spring, summer. 3 credits. Prerequisites: COM S 100 and (MATH 222 or MATH 294).

COM S 280 Discrete Structures  
Fall or spring. 4 credits. Prerequisite: COM S 211 or 212 or permission of instructor.

COM S 314 Introduction to Digital Systems and Computer Organization  
Fall, spring. 4 credits. Prerequisite: COM S 211 or 212, or equivalent.

COM S 381 Introduction to Theory of Computing  
Fall, summer. 4 credits. Prerequisite: COM S 200 or permission of instructor.

COM S 400 The Science of Programming  
Spring. 4 credits. Prerequisite: COM S 280 or equivalent. Not offered every year; semester to be announced.

COM S 410 Data Structures  
Fall, spring, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor.

COM S 411 Programming Languages and Logics  
Fall. 4 credits. Prerequisites: COM S 410 or permission of instructor. Not offered every year; semester to be announced.

COM S 412 Introduction to Compilers and Translators  
Spring. 3 credits. Prerequisites: COM S 314, 381, and 410. Corequisite: COM S 413.

COM S 413 Practicum in Compilers and Translators  

COM S 414 Systems Programming and Operating Systems  
Fall, summer. 3 credits. Prerequisite: COM S 314 or permission of instructor.

COM S 415 Practicum in Operating Systems  
Fall. 2 credits. Prerequisite: COM S 410. Corequisite: COM S 414.

COM S 417 Computer Graphics and Visualization (also ARCH 374)  
Spring. 3 credits. Prerequisite: COM S 211 or 212.

COM S 418 Practicum in Computer Graphics (also ARCH 375)  
Spring. 2 credits. Prerequisite: COM S 211 or 212.

COM S 421 Numerical Analysis  
Fall. 4 credits. Prerequisites: MATH 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.

COM S 432 Introduction to Database Systems  
Fall. 3 credits. Prerequisites: COM S 211 or 212 and COM S 410. Recommended: COM S 213 or strong programming skills in C, C++, or Java.

COM S 433 Practicum in Database Systems  
Fall. 2 credits. Corequisite: COM S 432.

COM S 444 Distributed Systems and Algorithms  
Fall. 4 credits. Prerequisites: COM S 414 or permission of instructor. Not offered every year; next offered fall 1999.

COM S 472 Foundations of Artificial Intelligence  
Fall. 3 credits. Prerequisites: COM S 211 or 212, and COM S 280 or equivalent.

COM S 473 Practicum in Artificial Intelligence  
Fall. 2 credits. Prerequisites: COM S 211 or 212, and COM S 280 or equivalent. Corequisite: COM S 472.

COM S 481 Introduction to Theory of Computing  
Fall. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481. A faster-moving and deeper version of COM S 381. Corequisite transfers between COM S 381 and 381 (in either direction) are encouraged during the first few weeks of instruction.

COM S 482 Introduction to Analysis of Algorithms  
Spring, summer. 4 credits. Prerequisites: COM S 410 and COM S 381 or 481, or permission of instructor.

COM S 486 Advanced Logic (also MATH 486)  
Fall or spring. 4 credits. Prerequisites: MATH 222 or 294, COM S 280 or equivalent (such as MATH 332, 432, 434, 481), and some course in mathematics or theoretical computer science.

COM S 490 Independent Reading and Research  
Fall or spring. 1-4 credits.

COM S 501 Software Engineering: Technology and Technique  
Fall. 4 credits. Prerequisite: COM S 410 and knowledge of the C programming language.

COM S 514 Intermediate Computer Systems  
Fall or spring. 4 credits. Prerequisites: COM S 414 or permission of instructor.

COM S 515 Practicum in Systems  
Fall or spring. 1-2 credits. Co-requisite: COM S 514.

COM S 516 High-Performance Computer Architecture  
Spring. 4 credits. Prerequisite: COM S 314 required. COM S 412 or 414 highly recommended. Not offered every year; semester to be announced.

COM S 519 Engineering Computer Networks  
Fall. 4 credits. Prerequisites: COM S 214, 314, and 410, or permission of instructor.

COM S 522 Computational Tools and Methods for Finance  
Spring. 4 credits. Prerequisites: programming experience (C or FORTRAN), MATLAB, some knowledge of numerical methods, especially numerical linear algebra. Not offered spring 1999. NBA 555 is a suitable alternative.

COM S 561 System Concepts  
Fall. 3 credits. Prerequisite: open to students enrolled in the COM S Ph.D. program.

COM S 611 Advanced Programming Languages  
Fall. 4 credits. Prerequisites: graduate standing or permission of instructor.

COM S 612 Compiler Design for High-Performance Architectures  
Spring. 4 credits. Prerequisites: COM S 514 and 412, or permission of instructor.

COM S 613 Concurrent Programming  
Spring. 4 credits. Prerequisites: COM S 414 or permission of instructor. Not offered every year; semester to be announced.

COM S 614 Advanced Systems  
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor.

COM S 618 Principles of Distributed Computing—Message Passing  
Spring. 4 credits. Prerequisites: mathematical maturity and some basic knowledge of distributed systems. Offered in even-numbered years.
COM S 619 Principles of Distributed Computing—Shared Memory
Spring. 4 credits. Prerequisites: mathematical maturity and some basic knowledge of distributed systems. Offered in odd-numbered years.

COM S 621 Matrix Computations
Fall. 4 credits. Prerequisites: MATH 411 and 431 or permission of instructor.

COM S 622 Numerical Optimization and Nonlinear Algebraic Equations
Spring. 4 credits. Prerequisite: COM S 621. Offered in odd-numbered years.

COM S 624 Numerical Solution of Differential Equations
Spring. 4 credits. Prerequisite: previous exposure to numerical analysis, mathematical analysis including Fourier methods, and differential equations. Offered in even-numbered years.

COM S 626 Computational Molecular Biology
Spring. 4 credits. Prerequisites: familiarity with linear programming, numerical solutions of ordinary differential equations and non-linear optimization methods.

COM S 631 Multimedia Systems
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor.

COM S 632 Advanced Database Systems
Spring. 4 credits. Prerequisite: COM S 432/433 or permission of instructor.

COM S 634 Machine Learning
Spring. 4 credits. Prerequisites: undergraduate-level understanding of algorithms and Mathematics 221 or equivalent.

COM S 671 Introduction to Automated Reasoning
Fall. 4 credits. Prerequisite: graduate standing and COM S 611 or permission of instructor.

COM S 672 Advanced Artificial Intelligence
Spring. 4 credits. Prerequisites: COM S 472 or permission of instructor.

COM S 674 Natural Language Processing
Spring. 4 credits. Prerequisites: COM S 472 or permission of instructor. Not offered every year; semester to be announced.

COM S 676 Reasoning About Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in even-numbered years.

COM S 677 Reasoning About Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in odd-numbered years.

COM S 681 Analysis of Algorithms
Fall. 4 credits. Prerequisite: COM S 381 or 481, or permission of instructor.

COM S 682 Theory of Computing
Spring. 4 credits. Prerequisite: (COM S 381 or 481) and (COM S 482 or 681), or permission of instructor.

COM S 686 Logics of Programs
Spring. 4 credits. Prerequisites: COM S 481, COM S 682, and (MATH 481 or MATH/COM S 486).

COM S 709 Computer Science Colloquium
Fall, spring. 1 credit. S-U grades only. For staff, visitors, and graduate students interested in computer science.

COM S 713 Seminar in Systems and Methodology
Fall, spring. 4 credits. Prerequisites: graduate course employing formal reasoning, such as COM S 600, 611, 615, 619, 671, a logic course, or permission of instructor. Not offered every year; semester to be announced.

COM S 715 Seminar in Programming Refinement Logics
Fall, spring. 4 credits. Prerequisite: permission of instructor.

COM S 717 Topics in Parallel Architectures
Fall. 4 credits. Prerequisite: COM S 612 or permission of instructor. Not offered every year; semester to be announced.

COM S 719 Seminar in Programming Languages
Fall, spring. 4 credits. Prerequisite: COM S 611 or permission of instructor. S-U grades only.

COM S 722 Topics in Numerical Analysis
Fall, spring. 4 credits. Prerequisite: COM S 621 or 622 or permission of instructor. Not offered every year; semester to be announced.

COM S 729 Seminar in Numerical Analysis/ACRI
Fall, spring. 1–4 credits (to be arranged). Prerequisite: permission of instructor. S-U grades only.

COM S 754 Systems Research Seminar
Fall, spring. 1 credit.

COM S 772 Seminar in Artificial Intelligence
Fall, spring. 4 credits. Prerequisite: permission of instructor.

COM S 773/774 Proseminar in Cognitive Studies I & II (also COGST, PHIL, LING, and PSYCH 773/774)
Fall and spring. 4 credits.

COM S 775 Seminar in Natural Language Understanding
Fall, spring. 2 credits.

COM S 789 Seminar in Theory of Algorithms and Computing
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only.

COM S 790 Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. Letter grade only. Independent research or Master of Engineering project.

COM S 890 Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Master of Science degree research.

COM S 990 Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Doctoral research.

ECONOMICS

The study of economics provides an understanding of the way economies operate and an insight into public issues. The department offers a broad range of undergraduate courses in such fields as money and banking international and comparative economics, econometrics, theory, history, growth and development, and the organization, performance, and control of industry.

Social Science Distribution Requirement
The microeconomics distribution requirement can be fulfilled with any of the following:
- Economics 101, Economics 301, or Economics 313.

The macroeconomics distribution requirement can be satisfied with any of the following:
- Economics 102, Economics 302, or Economics 314.

The Major
Prerequisites
Economics 101 and Math 111 (or equivalents, with approval of the director of undergraduate studies), all with grades of C or better.
Economics 301 with a grade of C or better substitutes for 101; Economics 302 with a grade of C or better substitutes for 102.

Requirements
Eight courses listed by the Department of Economics at the 300 level or above, or approved by the student's major adviser, all with grades of C- or better.

These eight courses must include:
1. Economics 313 and 314.
2. Economics 321 or Economics 319 and 320.
3. at least 3 courses from the following:
   - Economics 318, 320, 322-98, 467.

Economics 301 with a grade of B or better substitutes for both 101 and 313; Economics 302 with a grade of B or better substitutes for both 102 and 314.

If Economics 321 is applied toward the major, neither 319 nor 320 can be applied.

Economics 263, 599, and 499 cannot be counted toward the eight-course requirement.

An honors program is currently being offered. Students should consult the director of undergraduate studies before May of their junior year for more information.

Students planning graduate work in economics and business are strongly encouraged to prepare themselves well in mathematics and econometrics. These students are strongly encouraged to enroll in Economics 319-320 rather than Economics 321.

Courses
ECON 101 Introductory Microeconomics
Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102.

Explanation and evaluation of how the price system operates in determining what goods are produced, how goods are produced, and who receives income, and how the price system is modified and influenced by private organizations and government policy.

ECON 102 Introductory Macroeconomics
Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102.

Analysis of aggregate economic activity in relation to the level, stability, and growth of national income. Topics discussed may include the determination and effects of unemployment, inflation, balance of payments, deficits, and economic development, and how these may be influenced by monetary, fiscal, and other policies.

ECON 263 International Economics
Spring and summer. 4 credits. Prerequisite: Economics 101-102 or equivalent.

This course surveys international economics in one semester. First, it surveys the sources of comparative advantage, and it analyzes commercial policy and the institutional aspects of the world trading system. Second, it discusses exchange rates, and it studies theories of balances of payments adjustments. This course is intended primarily for government majors who are comfortable with a less technical approach to international economics. (Cannot be applied to the economics major.)

ECON 301 Microeconomics
Fall. 4 credits. Prerequisite: calculus. Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 101 and 315. (Can replace 315 only with grade of B or better). This course covers the topics taught in Economics 101 and 313. An introduction to the theory of consumer and producer behavior and to the functioning of the price system.

ECON 302 Macroeconomics
Spring. 4 credits. Prerequisite: Economics 301.

Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 102 and 314. This course covers the topics taught in Economics 102 and 314. (Can replace 314 only with grade of B or better). An introduction to the theory of national income determination, unemployment, growth, and inflation.

ECON 307 Introduction to Peace Science (also CRP 495.18 and Introduction to Peace Science)
Winter session. 4 credits. Prerequisites: Economics 101–102 or permission of instructor.

Introduction to the theories of and research on conflict resolution. Topics include conflict, its role and impact on society; theories of aggression and altruism; causes of war; game theory; conflict management procedures and other analytical tools and methods of peace science; alternatives to war.

ECON 313 Intermediate Microeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.

The pricing process in a private enterprise economy are analyzed under varying competitive conditions, and their role in the allocation of resources and the functional distribution of national income is considered.

ECON 314 Intermediate Macroeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.

The theory of national income and determination and economic growth in alternative models of the national economy is introduced. The interaction and relation of these models to empirical aggregate economic data is examined.

ECON 317 Intermediate Mathematical Economics I

Introduction of calculus and matrix algebra; problems of maximization of a function of several variables. Economic examples are used to illustrate and teach the mathematical concepts.

ECON 318 Intermediate Mathematical Economics II

Advanced techniques of optimization and application to economic theory.

ECON 319 Introduction to Statistics and Probability
Fall. 4 credits. Prerequisites: Economics 101–102 and Mathematics 111–112.

This course provides an introduction to statistical inference and to principles of probability. It includes descriptive statistics, principles of probability, discrete and continuous distributions, and hypothesis testing (of sample means, proportions, variance). Regression analysis and correlation are introduced.

ECON 320 Introduction to Econometrics
Spring. 4 credits. Prerequisites: Economics 101–102, 319, or equivalent.

Introduction to the theory and application of econometric techniques. How econometric models are formulated, estimated, used to test hypotheses, and used to forecast; understanding economists' results in studies using regression model, multiple regression model, and introduction to simultaneous equation models.

ECON 321 Applied Econometrics
Fall, spring and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.

This course provides an introduction to statistical methods and principles of probability. Topics to be covered include analysis of data, probability concepts and distributions, estimation and hypothesis testing, regression, correlation and time series analysis. Applications from economics are used to illustrate the methods covered in the course.

ECON 322 American Economic History #
Fall. 4 credits. Prerequisites: Economics 101–102 or equivalent.

Problems in American economic history from the first settlements to early industrialization are surveyed.

ECON 324 American Economic History #
Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent.

A survey of problems in American economic history from the Civil War to World War I.

ECON 324A American Economic History #
Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent. Instructor's permission required.

Same material as Economics 324, seminar limited to 12 students.

ECON 331 Money and Credit
Fall. 4 credits. Prerequisites: Economics 101–102 and 314.

A systematic treatment of the determinants of the money supply and the volume of credit. Economic analysis of credit markets and financial institutions in the United States.

ECON 333 Financial Economics
Spring. 4 credits. Prerequisites: Economics 313 and 314.

The theory and decision making in the presence of uncertainty and the practical aspects of particular asset markets are examined.

ECON 335 Public Finance: The Microeconomics of Government
Fall. 4 credits. Prerequisites: Economics 101–102 and 313, or their equivalent, and one semester of calculus.

The role of government in a free market economy is analyzed. Topics covered include
public goods, market failures, allocation mechanisms, optimal taxation, effects of taxation, and benefit-cost analysis. Current topics of an applied nature will vary from term to term.

**ECON 336 Public Finance: Resource Allocation and Fiscal Policy**
Spring. 4 credits. Prerequisites: Economics 101-102, 313 or their equivalent and one semester of calculus.
This course covers the revenue side of public finance and special topics. Subjects covered include the federal debt, the budget, and government programs and transfers, as well as problems like local public goods, health care, education, the hierarchy of governmental structure, plus a variety of applied problems.

**ECON 341 Labor Economics**
For description, see ILRLE 240.

**ECON 351 Industrial Organization I**
Fall. 4 credits. Prerequisite: Economics 313 or its equivalent.
This course examines markets with only a few firms (i.e., oligopolies), and the primary focus will be the strategic interactions between firms. Topics include static competition in oligopolies, cartel and other forms of collusive behavior, competition between firms producing differentiated products, entry behavior, R&D behavior, and government interventions in oligopoly industries (e.g., antitrust laws).

**ECON 352 Industrial Organization II**
Spring. 4 credits. Prerequisite: Economics 313 or its equivalent.
This course primarily focuses on the pricing decisions of firms. The course does not consider the strategic response of other firms to these pricing decisions. The pricing decisions include price discrimination, commodity bundling, pricing a product line and pricing a durable good. In addition to pricing decisions, the course will consider topics associated with private information such as adverse selection, signaling and moral hazard. Numerous theoretical models are presented and empirical results are discussed.

**ECON 361 International Trade Theory and Policy**
Fall. 4 credits. Prerequisites: Economics 101-102 and 313.
This course surveys the sources of comparative advantage. It studies commercial policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

**ECON 362 International Monetary Theory and Policy**
Spring and summer. 4 credits. Prerequisites: Economics 101-102 and 314.
This course surveys the determination of exchange rates and theories of balance of payments adjustments. It also explores open economy macroeconomics, and it analyzes some of the details of foreign exchange markets, balance of payments accounting, and the international monetary system.

**ECON 371 Economic Development**
Spring. 4 credits. Prerequisites: Economics 313 or equivalent.
Study of the processes sustaining accelerated economic growth in less-developed countries. Trade-offs between growth, welfare, and equity; the legacy of colonialism; relevance of history and economic theory; problems of capital formation, economic planning and international specialization; and the interaction of industrialization, agricultural development, and population change are emphasized.

**ECON 372 Applied Economic Development**
Fall or spring. 4 credits. Prerequisite: Economics 101-102. Not offered 1998-99.
This course examines several special topics in the economics of developing countries. Among the topics covered recently are the concepts of development and underdevelopment, the debate over development economics, the peasant household and its place in the world economy, the debt crisis, the state vs. market debate and the role of the state in economic development, and the question of sustainable development.

**ECON 375 Field Research**
For description, see ILRLE 250.

**ECON 381 Industrial Organization I**
Fall. 4 credits. Prerequisite: Economics 313 or its equivalent.
For description, see ILRLE 240.

**ECON 382 Industrial Organization II**
Spring. 4 credits. Prerequisite: Economics 313 or its equivalent.
For description, see ILRLE 240.

**ECON 384 Economics of Health Care, Education, and the Environment**
Fall or spring. 4 credits. Prerequisite: Economics 101-102 or permission of instructor.
History of the changing structure of American capital market, changing role of government) and the various responses of business organizations and entrepreneurs to those challenges.

**ECON 3884 Historical Theory and Policy**
For description, see ILRLE 240.

**ECON 399 Readings in Economics**
Spring. 4 credits. Prerequisite: Economics 313 or equivalent.
Independent study.

**ECON 404 Economics and the Law**
Fall. 4 credits. Prerequisite: Economics 101.
An examination, through the lens of economic analysis, of legal principles drawn from various branches of law, including contracts, torts, and property. Cases are assigned for class discussion; in addition, there are several writing assignments.

**ECON 408 Production Economics and Policy**
For description, see ARME 608.

**ECON 409 Environmental Economics and Policy**
For description, see ARME 451.

**ECON 413 Economics of Consumer Demand**
For description, see CEH 613.

**ECON 415 Price Analysis**
For description, see ARME 415.

**ECON 416 Intertemporal Economics**
This course is intended for advanced economics majors who are especially interested in economic theory. Topics to be covered: (a) review of the one good Ramsey model of optimal savings and accumulation; conditions for intertemporal efficiency in production; comparative dynamics and sensitivity analysis; (b) some earlier models of capital accumulation; the roles of present value and internal rate of return in guiding investment decisions; (c) growth, exhaustible resources; pollution and conservation; discussion of the trade-offs facing a society.

**ECON 417 History of Economic Analysis**
Spring. 4 credits. Prerequisites: Economics 101-102 or permission of instructor.
Early writings in economics and their relationship to current economic analysis and policy issues, for example, ancient and medieval philosophers on justice in exchange; mercantilist arguments for trade protection; early theories about the effect of monetary expansion (D. Hume); the role of the entrepreneur (Gattillan); and general competitive equilibrium (the Physicocrats).

**ECON 419 Economic Decisions under Uncertainty**
Fall. 4 credits. Prerequisites: Economics 313 and 319. Not offered 1998-99.
This course provides an introduction to the theory of decision making under uncertainty with emphasis on economic applications of the theory.

**ECON 420 Economics of Family Policy—Adults**
Economics 420 and 421 together, count as one course for the Economics major. For description, see CEH 320.

**ECON 421 Economics of Family Policy—Children**
Economics 420 and 421 together, count as one course for the Economics major. For description, see CEH 321.

**ECON 423 The Economics of Infrastructure and a Sustainable Environment**
For description, see CEE 423.

**ECON 425 Economic History of Latin America**
Spring. 4 credits. A survey of changing economic institutions and policies from pre-Columbian to modern times.

**ECON 426 History of American Enterprise**
Spring. 4 credits. Prerequisites: Economics 101-102 or equivalent.
History of the changing structure of American business from 1800 to the present, with major emphasis upon developments after the Civil War. The focus of the course will be the changing structure of challenges (for example, the rise of unions, development of a national capital market, changing role of government) and the various responses of business organizations and entrepreneurs to those challenges.

**ECON 430 Policy Analysis: Welfare Theory, Agriculture, and Trade**
For description, see ARME 630.

**ECON 432 Health Economics and Policy**
For description, see CEH 632 or PAM 653.

**ECON 435 Information and Regulation**
For description, see CEH 653.

**ECON 440 Analysis of Agricultural Markets**
Economics 440 and 441 together, count as one course for the Economics major. For description, see ARME 640.

**ECON 441 Commodity Futures Markets**
Economics 440 and 441 together, count as one course for the Economics major. For description, see ARME 641.

**ECON 444 Modern European Economic History**
For description, see ILRLE 444.

**ECON 445 Topics in Microeconomics**
Fall. 4 credits. Prerequisites: Economics 313.
This is a course of economic theory designed for upperclass undergraduates. Course contents may vary from year to year. Issues that may be examined include (1) How can economic activities be efficiently organized through the market mechanism? Why is the presence of many traders essential to efficiency? (2) What can be done if the indivisibility in production processes becomes an important hindrance to competitive pricing? (3) How can economic planning be decentralized efficiently? This course serves two purposes: (1) to introduce concepts that are novel to undergraduates and relevant to public policy but require only a modicum of analytic tooling up, and (2) to illustrate the deductive approach of modern economic analysis—how to define concepts unambiguously, how to form propositions in clear-cut fashion, and how to follow up logical implications sequentially to the conclusion.

[ECON 446 Topics in Macroeconomic Analysis—Is Keynesianism Dead? Fall or spring. 4 credits. Prerequisites: Economics 314. Not offered 1998–99. The coverage of this course may vary from term to term. Presently the content of the course deals with the range of criticisms against Keynesian theory by the New Classical Economics, alias the Equilibrium School, alias the Rational Expectations School. Despite the fact that almost all intermediate macroeconomic textbooks are Keynesian in perspective, clearly Keynesian economics is currently at bay. We shall review critically, critiques to Keynesian theory.]

ECON 448 Housing Economics
For description, see CEH 648.

ECON 450 Resource Economics
For description, see ARME 450.

ECON 451 Economic Security
For description, see ILRF 340.

ECON 452 The Economics of Unemployment
For description, see ILRF 348.

ECON 454 The Economics of Health Care
For description, see ILRF 440.

ECON 455 Income Distribution
For description, see ILRF 411.

ECON 456 The Economics of Employee Benefits
For description, see ILRF 441.

ECON 457 Women In the Economy
For description, see ILRF 442.

ECON 458 Topics in Twentieth Century Economic History
For description, see ILRF 448.

ECON 459 Economic History of British Labor 1750–1940
For description, see ILRF 640.

ECON 460 Economic Analysis of the Welfare State
For description, see ILRF 642.

ECON 461 The Economics of Occupational Safety and Health
For description, see ILRF 644.

ECON 462 Labor in Developing Economies
For description, see ILRIC 332.

ECON 464 Economics of Agricultural Development
For description, see ARME 464.

ECON 465 Food and Nutrition Policy
For description, see ARME 665.

ECON 466 Economics of Development
For description, see ARME 666.

ECON 467 Game Theory
Fall. 4 credits. Prerequisites: Economics 513 and 519.

This course studies mathematical models of conflict and cooperation in situations of uncertainty (about nature and about decision makers).

ECON 468 Economic Problems of Latin America
Spring. 4 credits. Prerequisites: Economics 101–102.

Current topics include, international debt, capital flight, economic integration, stabilization programs, etc.

ECON 469 The Economy of China
Fall. 4 credits. Prerequisites: Economics 101–102 or permission of instructor.

Examines the development of the Chinese economy and the evolution of China's economic system since 1949.

ECON 471 The Economics of the Former Soviet Union and of Central Europe: From Central Planning to Markets
Fall. 4 credits. Prerequisites: Economics 313 and 314.

The course will introduce first the basic features of a centrally planned economy and proceed to consider the most important example: the rise and fall of the Soviet Union. Secondly, the analysis will be extended to what used to be known as "Eastern Europe" (e.g., Czechoslovakia, Hungary, Poland). From this necessary historical background, the course will proceed to current attempts to move away from Socialist central planning and its legacies to market economy, privatization, and independence.

ECON 472 Comparative Economic Systems: East and West
Fall. 4 credits. Prerequisites: Economics 101–102.

The course will develop first a framework for studying economic systems and national economies and present three simple stylized systemic models: capitalist market, socialist market, and central planning. Secondly, the course will consider economic goals to be achieved (such as growth, stability, and productivity) and introduce quantitative measures used in the evaluation of the performance. Thirdly, comparative studies of selected national economies representing the models will be carried out.

ECON 473 Economics of Export-led Development
Spring. 4 credits. Prerequisites: Economics 313, 314, or permission of instructor.

This course will examine the phenomenon of export-led development from both the theoretical and empirical points of view. Concentration will be on experiences within the West Pacific Rim.

ECON 474 National and International Food Economics
For description, see NS 457.

ECON 475 The Economy of India
Fall. 4 credits. Prerequisite: Economics 101–102 or equivalent background.

This course will present the major economic and development problems of contemporary India and to examine the country's future economic prospects. It will, however, be our aim to discuss these problems in their proper historical perspectives. Hence, the course will start with a brief outline of the social and political history of India. It will then turn to a more detailed account of the economic history of India in two stages.

ECON 499 Honors Program
Fall and spring. 8 credits. Prerequisites: Economics 313, 314, 321 (or 319–320). Consult the Director of Undergraduate Studies for details. Interested students should apply to the program in the spring semester of their junior year.

Graduate Courses and Seminars

ECON 609 Microeconomic Theory I
Fall. 4 credits.

Topics in consumer and producer theory.

ECON 610 Microeconomic Theory II
Spring. 4 credits.

Topics in consumer and producer theory, equilibrium models and their application, externalities and public goods, intertemporal choice, simple dynamic models and resource depletion, choice under uncertainty.

ECON 613 Macroeconomic Theory I
Fall. 4 credits.

ECON 614 Macroeconomic Theory II
Spring. 4 credits.

ECON 616 Applied Price Theory
Spring. 4 credits.

The course emphasizes the applications of the principles of price theory to a variety of problems taken from concrete, practical settings.

ECON 617 Intermediate Mathematical Economics I
Fall. 4 credits. Prerequisites: Calculus II and intermediate linear algebra.

The course will cover selected topics in Matrix algebra (vector spaces, matrices, simultaneous linear equations, characteristic value problem), calculus of several variables (elementary real analysis, partial differentiation, convex analysis), classical optimization theory (unconstrained maximization, constrained maximization).
ECON 618 Intermediate Mathematical Economics II
Spring. 4 credits.
A continuation of Economics 617, the course develops additional mathematical techniques for applications in economics. Topics covered could include study of dynamic systems (linear and nonlinear difference equations, differential equations, chaotic behavior), dynamic optimization methods, optimal control theory, stochastic methods, and an introduction to partial differential equations.

ECON 619 Econometrics I
Fall. 4 credits. Prerequisites: Economics 319-320 or permission of instructor. This course gives the probabalistic and statistical background for the meaningful application of econometric techniques. Topics to be covered are (1) probability theory, probability spaces, random variables, distributions, moments, transformations, conditional distributions, distribution theory, and the multivariate normal distribution, convergence concepts, laws of large numbers, central limit theorems, Monte Carlo simulation; (2) statistics: sample statistics, sufficiency, exponential distributions. Further topics in statistics will be covered in Economics 620.

ECON 620 Econometrics II
Spring. 4 credits. Prerequisite: Economics 619. This is a continuation of Economics 619 (Econometrics I) covering (1) statistics: estimation theory, least squares methods, method of maximum likelihood, generalized method of moments, theory of hypothesis testing, asymptotic test theory, and nonnested hypothesis testing and (2) econometrics: the general linear model, generalized least squares, specification tests, instrumental variables, dynamic regression models, linear simultaneous equation models, nonlinear models, and applications.

ECON 639 Public Political Economy (also OE 528)
Spring. 4 credits. Prerequisite: Economics 313 or equivalent. Designed as part of the core curriculum for MPA students in Cornell's Institute for Public Affairs, this course emphasizes the application of economic concepts and methods in the identification, formulation, administration and evaluation of public policy. It is open to all students with a policy interest who have met the prerequisite.

Topics covered include the intrinsic nature of goods and services, decreasing cost of production, externalities and congestion, attributes and government regulation essential for an effective market; the efficient role of government in non-market resource allocation methods, methods for internalizing the demand for public goods, efficient public decision-making, the supply of public services and raising revenue through taxes and user-fees. Particular emphasis will be placed on the interactions between efficiency and equity in resolving conflicts over public good provision, including defining jurisdictions for the provision of particular services. Examples will emphasize methods for provision of infrastructure services: physical (transportation, utilities, tele-information); human-capital (education and R&D) and biological (renewable resources, species diversity and the environment).
ECON 736 Public Finance: Resource Allocation and Fiscal Policy
The course covers the revenue side of public finance. Methods of business control, including antitrust, price regulation, entry regulation, and international taxation. Emphasis will be on the economic effects on business, and on the economics of selecting and evolving the method of control.

ECON 747 Economics of Evaluation (also Industrial and Labor Relations 647)
Fall. 4 credits. Prerequisites: Economics 609-610 and 619.
This course surveys equilibrium concepts for non-cooperative games. We will cover Nash equilibrium and a variety of equilibrium refinements, including perfect equilibrium, proper equilibrium, sequential equilibrium and more! We will pay attention to important special classes of games, including bargaining games, signalling games, and games of incomplete information. Most of our analysis will be from the strict decision-theoretic point of view, but we will also survey some models of bounded rationality in games, including games played by automata.

ECON 751 Industrial Organization and Regulation
Fall. 4 credits. This course focuses primarily on recent theoretical advances in the study of industrial organization. Topics covered include market structure, non-linear pricing, quality and durability, location selection, advertising, repeated games, collusion, entry deterrence, managerial incentives, switching costs, and government intervention. These topics are discussed in a game-theoretic context.

ECON 755 Rivalry and Cooperation
Fall. 4 credits. Prerequisites: Economics Graduate Core or instructor's permission. Not offered 1998-99.
In standard models, economic interaction is impersonal. Agents respond to price signals and measure their own welfare not in relative but in absolute terms; and cooperative behavior emerges only when it coincides with narrow self-interest. This course will explore the details of rivalry and cooperation in an effort to synthesize broader views of economic interaction. Topics will include the effect of concerns about relative income on wage rates, consumption, savings, and regulation; the effect of concerns about fairness on prices and wages; the conditions that foster trust and cooperation; and the role of positional competition in the distribution of economic rewards.

ECON 757 Economics of Imperfect Information
Spring. 4 credits. Prerequisites: Economics 609-610 and 619.
The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered will vary from year to year, subjects such as markets with asymmetric information, signalling theory, sequential choice theory, and record theory will be discussed.

ECON 758 Issues in Latin American Development
Fall. 4 credits. Not offered 1998-99. The topics include: "informal sector" (or multi-part labor markets), evolving capital markets (particularly the market for short-term, domestic currency denominated public sector debt, privatization, etc.). The emphasis will be placed on the impact of these institutional (or structural) changes on economic growth.

ECON 761 International Economics: Trade Theory and Policy
Fall. 4 credits. This course surveys the sources of comparative advantage. It analyzes simple general equilibrium models to illustrate the direction, volume, and welfare effects of trade. Topics in game theory and econometrics as applied to international economics may be covered.

ECON 762 International Economics: International Finance and Open Economy Macroeconomics
Spring. 4 credits. This course surveys the determination of exchange rates and theories of balance of payment adjustments. It explores open economy macroeconomics by analyzing models of monetary economies. Topics in monetary economics and econometrics as applied to international economics will be covered.

ECON 770 Topics in Economic Development
For description, see ARME 667.

ECON 771 Economic Development and Development Planning
Spring. 4 credits. Reviews the existing literature on the determinants of economic growth and the interaction between growth and income distribution through the process of economic development. A general equilibrium approach to development is taken. Computable general equilibrium models, based on social accounting matrices, are used to explore the performance of a variety of developing countries. Among the topics explored are: impact of structural adjustment and stabilization policies on growth, equity and internal and external equilibrium; sectoral interrelationship and interdependence through the growth process. Critical review and evaluation of national, sectoral and regional development models built for such developing countries as India, Brazil, Indonesia and Ecuador.

ECON 772 Economics of Development
Spring. 4 credits. Prerequisites: first-year graduate economic theory and econometrics. Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.

ECON 773 Economic Development
Fall. 4 credits. Prerequisites: Economics 609 and 620.
The course is concerned with theoretical and applied works that seek to explain economic development, or lack thereof, in countries at low-income levels. Specific topics vary each semester.

ECON 774 Economic Systems
Spring. 4 credits. This course deals with economic systems, with the formerly centrally planned economies, and with the economies in transition.
ENGLISH

The Department of English recommends that students prepare themselves for the English major by taking at least one introductory course. Freshmen interested in majoring in English are encouraged to take one or more of the following freshman seminars: The Reading of Fiction (English 270), The Reading of Poetry (English 271), Introduction to Drama (English 272). These courses concentrate on the skills basic to the English major and to much other academic work—responsive, sensitive reading and lucid, forceful writing. As freshman seminars, English 270, 271, or 272 will satisfy one-half of the College of Arts and Sciences freshman seminar requirement. They are open to all second-term freshmen and are also open, as space permits, to first-term freshmen with scores of 700 or above on the CEEB College Placement Test, English composition or literature, or 4 or 5 on the CEEB Advanced Placement Examination in English, as well as to students who have completed another freshman seminar.

English 201 and 202, which together constitute a two-semester survey of major British writers, though not required are strongly recommended for majors and prospective majors because they afford the kind of overview and introduction to authors, periods, and literary genres that helps students make more informed choices of advanced courses. The American Literary Tradition (English 275), Creative Writing (English 280 or 281), and the Essay in English (English 295) are also suitable preparations for the major.

Course Requirements

English majors are required to complete, with passing letter grades, six credits of foreign language study in courses for which qualification is a prerequisite. These courses should be in the literature of the foreign language. (Advanced Placement credit DOES NOT fulfill this requirement, nor does the study of foreign literature in translation.) Majors are urged to complete this requirement by the end of their sophomore year, and those who enter Cornell without sufficient preparation should begin their language study at once.

Besides fulfilling the English Department language requirement, each major must complete with passing letter grades at least 36 credit hours in courses approved for the major. All English courses numbered 300 and above are approved for the major. In addition, all 200-level English courses except freshman seminars (English 270, 271, and 272), courses in creative and expository writing (English 280, 281, 288, and 289), and those courses which state that they are intended for nonmajors are approved for the major, but a student may use no more than four 200-level courses in accumulating the 36 credits required to complete the major.

English majors may use the same courses to satisfy both College of Arts and Sciences distribution requirements and English major requirements.

Of the 36 credits required to complete the major, 12 credits (three courses) must be taken in literature originally written in English before 1800. Students may count toward the English major a maximum of 12 credits in courses in literature or creative writing, at the 300 level or above, given by such departments as Comparative Literature, Theatre, Film & Dance, Classics, Romance Studies, German Studies, and Russian, or other academic units and programs such as the Africana Studies and Research Center, the Society for the Humanities, Asian American Studies, and Latino Studies. Double majors may count courses at the 300 level or above taken in their other major toward these 12 credits if such courses are approved by their English department adviser as relevant to their program of study.

The Major in English with Honors

Second-term sophomores who have done superior work in English and related subjects are encouraged to seek admission to the department's program leading to the degree of Bachelor of Arts with Honors in English. Following an interview with the chair of the Honors committee, qualified students will be admitted provisionally to the program. During their junior year, these students must complete at least one Honors seminar (English 491 or 492) and are encouraged to take an additional 400-level English course in the field in which they plan to concentrate. On the basis of work in these and other English courses, a provisional honors candidate is expected to select a thesis topic and secure a thesis adviser by the end of the junior year. A student who has been accepted by a thesis adviser becomes a candidate for honors rather than a provisional candidate.

During the senior year, each candidate for Honors in English enrolls in a one-year-long tutorial (English 493 and 494) with the faculty member chosen as thesis adviser. The year's work culminates in the submission of a substantial scholarly or critical essay to be judged by at least two members of the faculty.

More information about the program may be found in the brochure for honors candidates available in the English office.

Courses for Nonmajors

For students not majoring in English, the department makes available a variety of courses at all levels. Some courses at the 200 level are open to qualified freshmen, and all of them are open to sophomores. Courses at the 300 level are open to sophomores, juniors, and seniors and to others with permission of the instructor. The subject of courses at the 400 level for nonmajors will vary from topic to topic, and permission of the instructor is required.

Freshman Writing Seminars

As part of the Freshman Writing Program, the Department of English offers many one-semester courses concerned with various forms of writing (narrative, biographical, expository), with the study of specific areas in English and American literature, and with the relationship of literature to other disciplines. Course requirements may be found in the Freshman Writing Program offerings may be found in the Freshman Writing Program listings, available from college registrars in August for the fall term and in November for the spring term.

Freshman Writing Seminars Recommended for Prospective Majors

ENGL 270 The Reading of Fiction

Fall, spring, each summer 3 credits. Each section limited to 17 students. Freshman Writing Seminar. Recommended for prospective majors in English. This course explores a variety of English fiction, with an emphasis on the short story and novel. Students will write critical essays on English, American, and continental authors who flourished between 1870 and the present, such as Joyce, Woolf, James, Lawrence, Tolstoy, Kafka, Fitzgerald, Faulkner, Rhys, Welter, Salinger, and Morrison. Instructors may include the reading of a novel. This course does not satisfy requirements for the English major.
This course is designed to increase the student's ability to understand and write about poetry. Readings will be drawn from the major periods, modes, and genres of poetry written in English. This course does not satisfy requirements for the English major.

ENGL 272 Introduction to Drama
Fall, spring. 3 credits. Each section limited to 17 students. Freshman Writing Seminar. Students in this seminar study plays, older and newer, in a variety of dramatic idioms and cultural traditions. A typical reading list might include works by Sophocles, Shakespeare, Molière, Chekhov, Brecht, Miller, Williams, Beckett, and O'Casey. Course work consists of writing and discussion and the occasional viewing of live or filmed performances. This course does not satisfy requirements for the English major.

Expository Writing

ENGL 288-289 Expository Writing
Fall and spring. 3 credits. Each section limited to 16 students. Students must have completed their colleges' freshman writing requirements or have permission of the instructor. S. Davis and staff. English 288-89 offers guidance and an audience for students who wish to gain skill in expository writing. Each section provides a context for writing defined by a form or use of exposition, a disciplinary area, a practice, or a topic intimately related to the written medium. Course members will read in relevant published material and write and revise their own work regularly, while reviewing and responding to each other's. Because these seminar-sized courses depend on members' full participation, regular attendance and submission of written work are required. Students and instructors will confer individually throughout the term. English 288-289 does not satisfy requirements for the English major.

Section 1—Speech Acts and the First Amendment—Schweber, H.
Section 2—Writing about Women, Anger, and Culture—White, H.
Section 3—Into the Wild—Dougherty, J.
Section 4—Reading the News, Understanding the Media—Tarr, P.
Section 5—The Reflective Essay—Boehm, A.
Section 6—Minding the Body—Boehm, A.
Section 7—Issues and Audiences—LeGendre, B.
Section 8—Writing in the Electronic Age—Davis, S.
Spring 1999: To be announced.
See English department Course Offerings for full fall and spring section descriptions.

ENGL 281 Reading as Writing
Spring. 4 credits. Course limited to 15 students. Prerequisite: permission of the instructor on the basis of a writing sample (critical/interpretive prose). Students will learn to think of themselves as readers of their own work and revising in the light of other readers' responses to it. Course members will work with a fairly small number of texts and build sustained essays from shorter (written) "readings" of them. The texts (tentatively): Marilynne Robinson's Housekeeping, poems of Wordsworth, poems and stories of Poe, Vladimir Nabokov's Lolita, Doris Lessing's Memoirs of a Survivor, and J. M. Coetzee's Waiting for the Barbarians. Students will present their work to the group at various stages of composition and develop a portfolio of well-crafted prose for submission at the end of the term. With the help of a few theorists of reading and literary reception, they will also pay attention to the ways in which both critical readers and creative writers "rewrite" the texts they read. This is a course for English majors and nonmajors who wish to extend their mastery of critical and interpretive prose and their understanding of what they do when they write it. It will be advantageous for students planning to write honors theses in English or another discipline.

ENGL 286 Philologic Fictions
Fall. 4 credits. Course limited to 15 students. Prerequisite: permission of the instructor on the basis of a writing sample (critical/interpretive prose). Students will learn to think of themselves as readers of their own work and revising in the light of other readers' responses to it. Course members will work with a fairly small number of texts and build sustained essays from shorter (written) "readings" of them. The texts (tentatively): Marilynne Robinson's Housekeeping, poems of Wordsworth, poems and stories of Poe, Vladimir Nabokov's Lolita, Doris Lessing's Memoirs of a Survivor, and J. M. Coetzee's Waiting for the Barbarians. Students will present their work to the group at various stages of composition and develop a portfolio of well-crafted prose for submission at the end of the term. With the help of a few theorists of reading and literary reception, they will also pay attention to the ways in which both critical readers and creative writers "rewrite" the texts they read. This is a course for English majors and nonmajors who wish to extend their mastery of critical and interpretive prose and their understanding of what they do when they write it. It will be advantageous for students planning to write honors theses in English or another discipline.

ENGL 287 Autobiography: Theory and Practice
Spring. 4 credits. A. Boehm. In this nonfiction prose-writing seminar we explicate canonical autobiographies as models of rhetoric to be imitated in weekly writing assignments.

ENGL 380 The Art of the Essay
Fall. 4 credits. Limited to 15 students. Interested students must submit one or more pieces of recent writing (prose) to Prof. L. Fukundiny before the beginning of the term, preferably at preregistration.

ENGL 383 Narrative Writing
Fall, spring, 3 credits. Each section limited to 15 students. Previous enrollment in English 280 or 281 recommended. Prerequisite: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, S. Vaughn; sec. 2, D. McColl; sec. 3, M. McCoy. Spring: D. McColl, L. Herrin, M. Koch. The writing of fiction; study of models; analysis of students' work.
ENGL 480-481 Seminar in Writing
Fall: 480; spring 481. 4 credits each term. Each section limited to 15 students. Students are encouraged to take English 280 or 281 and at least one 300-level writing course. Prerequisites: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, L. Herrin; Sec. 2, S. Vaughn. Spring: M. McCoy, S. Vaughn. Independent study; those who have already gained a basic mastery of technique. Although English 480 is not a prerequisite for 481, students normally enroll for both terms and should be capable of a major project—a collection of stories or poems, a group of personal essays, or perhaps a novel—to be completed by the end of the second semester. Seminars are used for discussion of the students' manuscripts and published works that individual members have found of exceptional value.

Courses for Freshmen and Sophomores

These courses have no prerequisites and are open to freshmen and non-majors as well as majors and prospective majors. Students may take up to four 200-level courses for credit toward the English major.

Introductions to Literary Studies

ENGL 201-202 The English Literary Tradition
201: Fall. 4 credits. Open to undergraduates who have completed the freshman writing requirement. English 201 is not a prerequisite for 202. This course may be used as one of the three pre-1800 courses required of English majors. G. Teskey. An introduction to the study of English literature, examining its historical development and many of its highest achievements. Works to be read include Sir Gawain and the Green Knight; selections from Chaucer's Canterbury Tales and Spenser's Faerie Queene; Shakespeare's Henry IV, Part I and King Lear; poems by Jonson, Donne, and Herbert; and selections from Milton's Paradise Lost. Spring. 4 credits. F. Bogel. A survey of English literature from the late seventeenth century to the early twentieth century, including poetry and some prose works from the Restoration and eighteenth century, the Romantic period, the Victorian period, and Modernism. Lectures and discussion sections.

ENGL 204 Mostly Poems and Stories
Spring. 4 credits. F. Bogel. Introduction to the pleasures of close reading, with special emphasis on analyzing the forms, structures, and rhetorical dynamics that characterize poems, prose narratives, and drama and contribute to their appeal. The syllabus will include works from older as well as more recent periods. This semester, we are likely to study poems by (among others) William Shakespeare, Robert Herrick, John Keats, Robert Browning, Christina Rossetti, Sylvia Plath, Ted Hughes, and Elizabeth Bishop; stories by Isabel Allende, Flannery O'Connor, James Baldwin, Toni Cade Bambara, and Beth Nugent; and such novels as Austen's Pride and Prejudice and Morrison's The Bluest Eye.

ENGL 208 Shakespeare and the Twentieth Century (also Comparative Literature 208)
Spring. 4 credits. B. Correll. What is the relationship between Shakespeare's plays in their own time and the various ways they have functioned in modern culture? We will compare selected works of Shakespeare with their adaptations in fiction, theater, film, the educational system, government, and popular culture. The discussion of each play will be organized around one or more critical approaches. The course as a whole will attempt to provide a systematic introduction to the contemporary study of literature and culture.

ENGL 227 Shakespeare
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. (Majors and nonmajors, see also ENGL 327.) G. Teskey. A survey of Shakespeare's career as a dramatist and in particular of his development in the genres of comedy and tragedy. The course serves as an introduction to the major in English.

Major Genres and Areas

ENGL 203 Major Poets
Spring. 4 credits. R. Gilbert. Intensive reading in the work of eight to ten poets chosen to represent important periods and modes of poetry. Poets to be studied may include William Shakespeare, (the sonnets), Andrew Marvell, Alexander Pope, John Keats, Emily Dickinson, Robert Browning, Gwendolyn Brooks, and Seamus Heaney.

ENGL 205 Readings in English Literature
To be offered 1999-2000.

ENGL 206 Readings in English and American Literature
Spring. 4 credits. S. Wong. Students with this course is intended for non-majors. Two lectures and one discussion section each week. P. Sawyer. Covers literature since the nineteenth century. A typical reading list will include novels by Austen, Emily Bronte, Hardy, James, Faulkner, and Morrison; poems by Keats, Browning, Hopkins, Frost, and Plath; plays by Wilde and Stoppard.

ENGL 207 Readings in Modern Poetry
Fall. 4 credits. D. Fried. This course will sample the vast array of poetic modes and forms employed over the past century and a half, with primary emphasis on the work of British and American poets. Our focus in the course will be on the poems themselves: how they feel, sound, look, mean, and behave. Lectures, discussions, and written assignments will emphasize both the craft of writing poetry and the discipline of reading it with understanding and appreciation. No previous study of poetry required.

ENGL 209 Introduction to Cultural Studies
Fall. 4 credits. B. Correll. Ads, advice columns, TV talkshows, music videos, films, and more bombard our thoughts and senses with their encoded messages. This course will look at the relationships between literature and culture and introduce students to the kinds of cultural forms we encounter in our everyday lives and to some of the critical work that has been written about them. Examples will come from a range of texts, both "high" and "low," contemporary and historical. The course will follow a lecture-discussion format.

ENGL 210 Medieval Romance: The Voyage to the Other World
Spring. 3 credits. This course is intended for nonmajors. C. Kaske. The course will survey some medieval narratives concerned with representative voyages to the other world or with the impinging of the other world upon ordinary experience. The syllabus will normally include some representative Old Irish other world literature: selections from The Mabinogion; selections from the Lais of Marie de France; Chretien de Troyes's Erec, Yeun, and Lancelot; and the Middle English Sir Gawain and the Green Knight. We will finish by looking at a few later other world romances such as selections from J. R. Tolkien. All readings will be in modern English. Requirements: three brief (two to three typed pages) papers and a final exam designed to test the students' reading.

ENGL 253 The Modern Novel
Fall. 4 credits. J. Ashton. In this course we will read some of the most famous and groundbreaking novels of the 20th century, asking, among other things, what makes them "modern." Works will include Joseph Conrad's The Secret Agent, Virginia Woolf's Mrs. Dalloway, Richard Wright's Native Son, Gertrude Stein's Ida, Ralph Ellison's Invisible Man, Thomas Pynchon's The Crying of Lot 49, Angela Carter's The Infernal Desire Machines of Dr. Hoffman, and several others.

ENGL 255 African Literature

ENGL 260 Introduction to American Indian Literatures (also American Studies 260)
Fall. 4 credits. K. Shanley. An introduction to Native American literatures, we read a variety of genres—novels, short fiction, autobiography, oral tradition, oral traditions—spanning Indian publications through the last two centuries. Issues arising from the texts include aesthetics of orality and literacy, cultural change and survival, colonial identity politics, mythic histories, worldviews and ideologies, and contemporary tribal sovereignty. A goal of the course is to read historical American contexts through the eyes of Native American texts.

ENGL 262 Asian American Literature (also Asian American Studies 262 and American Studies 262)
Fall. 4 credits. S. Wong. This course will introduce students to a range of writing by Asian Americans and to some critical issues concerning the production and the reception of Asian American texts. In reading through selected works of prose, poetry, and drama, we will be asking questions about the relation between literary forms and the sociohistorical context within which they take on their meanings, and about the historical formation of Asian American identities.
values of humanistic and scientific studies in and Thoms Huxley's debate over the relative beginning in the 1880s with Matthew Arnold interactions—both collaborative and conflic-
problems through our analysis of stories, and literature. We will address these Cultures” argument in contemporary debates some of the consequences of the “Two relationship between facts and values, background to Snow’s claims in debates from British novelist C. P. Snow characterized the 1950s (also American Tradition (also American Studies 275) Fall and spring. 4 credits. B. Maxwell; spring, H. Spillers. The fall of Scottish national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a special background in literary history is assumed. Authors studied will include Henryson, Dunbar, Anonymous (the Scottish Ballads), Hume, Burns, Scott, Hogg, Stevenson, and Grassic Gibbon.

ENGL 287 Literature and Science Spring. 4 credits. J. Ashton. In a 1959 lecture entitled “Two Cultures,” British novelist C. P. Snow characterized the relationship between the disciplines of science and literature as one of cultural difference. In this course we will explore some of the background to Snow’s claims in debates from the late 19th and early 20th century over the relationship between facts and values, objectivity and subjectivity, logic/rationality and the imagination. We will also examine some of the consequences of the “Two Cultures” approach to contemporary debates over what is and isn’t, what should and shouldn’t be, the relationship between science and literature. We will address these problems through our analysis of stories, novels, and short essays that explore the interactions—both collaborative and conflictive—between science and literature, beginning in the 1880s with Matthew Arnold and Thomas Huxley’s debate over the relative values of humanistic and scientific studies in the college curriculum, and ending with the very recent debates over “cultural relativism” sparked by sociobiologist Edward O. Wilson’s claims for the coevolution of genes and culture in Consilience: The Unity of Knowledge (1998).

ENGL 295 The Essay in English Fall. 4 credits. Prerequisite: completion of freshman seminar requirement. This course may be counted as one of the three pre-1800 literature courses required of English majors. L. Fakundy. What is an essay and what is it for? How does it work as prose discourse, as a text of the self? Impelled by such generic questions and others raised by Montaigne’s French Essais (1586), this course explores the invention of the essay in English during the sixteenth and seventeenth centuries and its flowering in the periodicals and magazines of the eighteenth and nineteenth centuries. Readings include selections from the work of Bacon, Orwell, Swift, Addison, Johnson, Franklin, Goldsmith, Lamb, Hazlitt, Irving, and DeQuincey. Essays by earlier writers are matched rhetorically and/or thematically with readings from more recent practitioners including Dubois, Woolf, Orwell, Welty, Baldwin, Selzer, Ozick, Achebe, Didion, S. Naipaul, Dillard, Sanders, and others. This is a course for students interested in reading essays and thinking about the genre and the way it evolves, what it does, and how it works. No special background in literary history is assumed.

ENGL 298 Ethics and Literature Spring. 4 credits. S. Mohanty. This introductory and multicultural course draws on novels, films, short philosophical works, and stories from a variety of cultures to explore basic ethical issues and problems. It focuses on what matters to us and why, examining how these texts formulate some of the familiar questions that haunt our daily lives: How do I act, where I live? Am I being fair to her? Am I being fair to myself? Why should I think about the welfare of others? What kind of a life should I try to live? Readings from Plato and Nietzsche to Toni Morrison and Nadine Gordimer from the Bhagavad Gita to contemporary feminist and antiracist stories, films, and videos. No formal training in philosophy or literary analysis will be presumed. Lecture-discussion. Two papers and several short written assignments.

Special Topics

ENGL 263 Studies in Film Analysis Fall and spring. 4 credits. Enrollment limited to 20 students. Preference given to English majors. L. Bogel. Fall: Special topic: Interpreting Hitchcock. Through detailed analysis of at least twelve of Hitchcock’s major films—from British silents such as The Lodger and the British talkies of the 30’s (The Thirty-Nine Steps) to the early 40’s work in Hollywood (Spellbound, Notorious), and major American films of his late period (Rear Window, The Birds)—we will consider Hitchcock as a major technical and stylistic innovator in the history of cinema. As text- and psychoanalytic and feminist approaches to study, his films invite questions about film language, the ethics of spectatorship, and the nature of desire and sexuality. Frequent short essays and viewing exercises encourage students to engage through their writing the course’s critical concerns. Students must be free to attend regular evening screenings and video showings of the films once or twice a week. Lab fee.

Spring: Special topic: Interpreting Melodrama and the Woman’s Film of the 40s and 50s. With some attention to melodrama’s roots in nineteenth-century fiction and theater and in twentieth-century women’s fiction and popular Freudianism, we will work to define Hollywood’s melodrama as both a genre and a way of viewing the world. Psychoanalytic and feminist analyses of melodrama will help us pose larger questions about gender and culture, about gendered spectatorship, about the relation of these films to American culture, about Hollywood’s changing constructions of “woman,” the “arty film,” and the “woman writer,” and questions about desire, pleasure, fantasy, and ideology in relation to the melodramatic heroine. Required weekly, evening screenings of such films as: Picnic, Nove, Voyager; Rebecca, Mildred Pierce, The Women, Imitation of Life, Gilda, Leave Her to Heaven, Gaslight. Regular critical readings, frequent viewing questions, two longer essays, no exam. Students must be free to attend regular evening screenings and video showings of the films once or twice a week. Lab fee.

ENGL 268 The Culture of the 1960s Spring. 4 credits. P. Sawyer. This course argues that the 1960s helps define the 1990s, but that as we look back, the 1990s help define the 1960s. Were the Sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an empassioned critique that changed American society? What can the experiences of young “boomers” contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, war, the counterculture, the New Left, and the woman’s movement. Texts will include The Autobiography of Malcolm X, The Electric Kool-Aid Acid Test, Dispatches, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, manifestos, and memoirs. The term paper will explore students’ special interests.

ENGL 277 Folklore and Literature Fall. 4 credits. A. Lurie. An introduction to British and American folklore: folk speech and slang, rhymes, riddles, jokes, ballads, songs, legends, fairy tales, ghost stories, and customs and festivals; plus reading of British and American poetry and fiction that uses these forms and themes. Students will also learn how to collect and analyze contemporary folklore.

ENGL 279 American 1920s: Literature and Culture (also American Studies 291) 4 credits. To be offered 1999-2000.

ENGL 289 African American Literature (also Women’s Studies 279) 4 credits. To be offered 1999-2000.
Courses at the 300 level are open to sophomores, juniors, and seniors and to others with the permission of the instructor.

**ENGL 301 Mind and Memory**
Spring. 4 credits. D. Ackerman.
Creativity is the attribute of the mind that enables us to make new combinations from often-familiar information, to perceive analogies and other linkages in seemingly unlike elements, to seek for syntheses. As is true of all learning, creativity is dependent upon memory—a memory that is genetic and social as well as personal and experiential. This course will explore the nature of creativity in science and art, indicating the differing requirements for discovery in the disparate disciplines while demonstrating the commonality that underlies the creative process and binds (say) physicist or mathematician to poet, composer, visual artist.

The opening sessions will be concerned with the crucial role of memory in learning, discovery, and spiritual insight for all humans, and will make reference to recent scientific research into the complex nature of the human brain, including its intimate connections with the rest of the body. Following this introduction, the course will rely on weekly guests from as many disciplines in the arts and sciences as possible, faculty members who will discuss (for interested undergraduates, whatever field they may be preparing to enter) the process underlying their research, or their work as creative or performing artists. The guests will be asked to speak of their goals, the problems they have faced, and what they have learned from their disappointments as well as their achievements.

Members of the course are encouraged to enroll in another course or be engaged in an activity (research or artistic production or performance) in which the insights gained in this class can be applied or tested. To further abet the active participation so necessary to learning, students will be asked to keep a journal, one that summarizes their understanding of, and response to, each presentation by a guest lecturer—this journal that will serve as a continuing record of their experiences as members of the course, and that will become the basic resource for an essay, to be submitted at the semester’s end, that will give their carefully considered assessment of the applicability of what they have learned in this course to that second course or activity, to their own mental processes, and to the future they propose for themselves.

**ENGL 311 Old English (also English 611)**
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill.
This course will provide a grounding in the Old English language and precede the reading of some major texts in poetry, such as The Wanderer and The Battle of Maldon. No previous knowledge of Old or Middle English is required or expected. There will be both a mid term and a final exam, plus oral reports. Students will be encouraged to follow their own interests. Graduate students will be expected to do a substantial paper, or other research exercise.

**ENGL 312 Beowulf (also English 612)**
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. One semester’s study, or the equivalent, of Old English is a prerequisite. T. Hill.
A close reading of Beowulf. Attention will be given to relevant literary, cultural, and linguistic issues.

**ENGL 319 Chaucer**
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.
This course will begin with the study of the major Canterbury Tales, and some of Chaucer’s minor works, such as The Book of the Duchess. All works will be read in Middle English, but ample time will be devoted to learning the language, for it is impossible to read Chaucer as a poet without Middle English. There will be lectures on Chaucer’s life, society, literary and religious content. There will be take home mid- and end-of-term exams, and student presentations.

**ENGL 320 Literature of the English Renaissance (1500-1660)**
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. B. Adams.
Verse and prose (principally non-dramatic) from More to Milton, including selected works of Skelton, Wyatt, Surrey, Sidney, Spenser, Marlowe, Shakespeare, Jonson, Donne, Herbert, Bacon, Marvell, Suckling, Lovelace, Burton, and Browne. Contexts (political, social, intellectual, religious) as well as texts.

**ENGL 321 Spenser and Malory**
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. I. Kaske.
Two works of the mid-sixteenth century, covering about half of Malory’s Morte d’Arthur and half of Spenser’s Faerie Queene. A study of the romance genre, and the development of Arthurian romance from the Middle Ages to the Renaissance.

**ENGL 326 Medieval and Renaissance Theatre (also Theatre Arts 332 and Comparative Literature 332)**
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. J. E. Gainor.
For complete description, see Theatre Arts 332.

**ENGL 327 Shakespeare**
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Limited to 25 majors. G. Teskey.
For both non-majors and majors in English who wish to encompass the reading and small-class discussion of some ten representative plays in the work of a single semester.

**ENGL 328 The Bible**
Spring. 4 credits. G. Teskey.
An introduction to the Bible as what William Blake called “the great code of art.” The King James (Authorized) Version (1611) will be used.

**ENGL 329 Milton**
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. G. Teskey.
An introduction to the life, poetry, and thought of John Milton, the most important English poet after Shakespeare.

**ENGL 330 Restoration and Eighteenth-Century Literature**
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. N. Saccamano.
Close reading of texts in a variety of genres (poetry, fiction, drama, autobiography) will be guided by such topics as the nature of satire, irony, and mock-forms; the languages of the ridiculous and the sublime; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagination. Works by such writers as Rochester, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

**ENGL 333 The Eighteenth-Century English Novel**
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Bogel.
A study of form and theme in the British novel tradition. The course focuses on representative novels mostly from the eighteenth century, paying close attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction; romance, realism, satire, and the gothic; heroic and mock-heroic modes; sentiment, sensibility, and sexuality; race and gender; and the forms and uses of narrative. Readings may include Behn’s Oroonoko, Defoe’s A Journal of the Plague Year, Richardson’s Clarissa, Fielding’s Joseph Andrews, Gleaner’s Memoirs of a Woman of Pleasure, Johnson’s Rasselas, Walpole’s The Castle of Otranto, Sterne’s Tristram Shandy, Mackenzie’s The Man of Feeling and Austen’s Pride and Prejudice.

**ENGL 335 European Drama 1600–1900:**
Molière to Ibsen (also Comparative Literature 336)
well as at subsequent readings that take issue
with or illuminate his arguments, theories, and
mode of analysis. Alongside the case-
histories, we will explore The Interpretation of
Dreams and some of the influential readings
of the dream-text to which it later gave rise.
We will also read Freud's writings on literature
and art, including "Delusion and Dream" in
Jensen's Gradiva (his extended reading of a
novel), along with his writings on daydream-
ing, telepathy, negativity, and the uncanny.
We will end with his response to the First
World War in Beyond the Pleasure Principle
and his thoughts about culture in Civilization
d and its Discontents. The emphasis will be on
what Freud's writing offers for literary and
cultural studies, and on the ways in which his
ideas were both shaped by and shaped
nineteenth-century European literary culture.

ENGL 350 The Modern Tradition I
1890-1930
Fall. 4 credits. D. Schwartz.
Critical study of major works by Hardy,
Conrad, L. P. Hartley, Woolf, Eliot, Yeats,
Hopkins, Wilde, Wallace Stevens and others.
While the emphasis will be on close reading
of individual works we shall place the authors
and works within the context of literary and
intellectual developments. The course will seek
to define the development of literary modernism
(mostly but not exclusively in England), and
relate literary modernism in England to that in
Europe and America as well as to other
intellectual developments. We shall be
especially interested in the relationship
between modern literature and modern
painting and sculpture: on occasion, we shall
look at slides.

ENGL 351 The Modern Tradition II
Spring. 4 credits. S. Siegel.
This course will consider the relation of
modernists' literary expression to the violence
and ideological upheavals of the first half of
the century. Readings will include Imagist
and Surrealist Manifestos, the social and
political writings of the Bloomsbury Group;
the emergence and elaboration of dream
theory, psychoanalysis, and literary Expres-
sionism. Readings will include T. E. Hulme,
 Ezra Pound, and Wyndham Lewis. Lytton
Strachey, Virginia, T. E. Moore; Freud, Jung,
and Winnicott; Yeats, Lady Gregory, and Shaw.

[ENGL 353 Postcolonial Literature: Caribbean literature
To be offered 1999-2000.]

[ENGL 355 Decadence (also Comparative Literature 355 and Women's Studies 365)
4 credits. To be offered 1999-2000.]

[ENGL 356 Postmodernist Fiction
4 credits. To be offered 1999-2000.]

[ENGL 361 Early American literature
also American Studies 361)
Fall. 4 credits. This course may be used
as one of the three pre-1800 courses
American literature and culture from the
1630's to 1830's, including some of the
following: poems of the Puritans
(Withrow, Bradford, Bradstreet, Rowlandson,
Taylor, Cotton Mather; also study of the
witchcraft phenomenon); Edwards and
Franklin, Jefferson, Calvin Coolidge,
Ruskin's Kelroy; selections from Irving's
Sketchbook; the writing of William A pests; the
poetry of Bryant; a novel by James Fenimore
Cooper: the early work of Emerson and
Hawthorne.

[ENGL 362 The American Renaissance
also American Studies 362)
4 credits. To be offered 1999-2000.]

[ENGL 363 The Age of Realism and
Naturalism (also American Studies 363)
Spring. 4 credits. J. Goldsby.
Literary history tells us that realism and
naturalism were the newer movements that
demerged in American fiction at the turn of
the 19th century. Cultural histories of the era
tell us social ideals about what constituted
the "real" and the "natural" were debated by
Americans as they coped with the revolution-
ary changes that turned their worlds upside
down between the Civil and First World Wars.
This course moves between these two
accounts in order to appreciate the varied
styles and issues that comprised the literature
of American realism at the turn of the 19th
century. Principal authors may include:
Charles Dickens, Stephen Crane,
Theodore Dreiser, William Dean Howells,
Henry James, Mark Twain, and Edith Wharton.

[ENGL 364 American Literature
Between the Wars (also American Studies 364)
4 credits. To be offered 1999-2000.]

[ENGL 365 American Literature Since
1945 (also American Studies 365)
Fall. 4 credits. B. Maxwell.
An American Studies approach to the literature
of 1945-1960, the early Cold War period of
"perpetual crisis and the garrison-prison state"
(Harold Laswell). Themes will include fear,
glamour, domestic life, integration, the "white
ego, addiction, loyalty, bureaucracy, and
do the disposition in the United States of the
legacies of the Depression and of World War II.
Fiction by Saul Bellow, Nelson Algren,
Ann Petry, Ralph Ellison, Tillie Olsen,
and Jack Kerouac (among others); collateral
readings in memoir (Hellman), sociology
(Mills), social psychology (Frickson,
Adorno and Horkheimer), history (Holstädter),
aesthetics (Greenberg), politics (Kennan,
Arendt), feminism (Friedan), and self-
advertisement (Mailer). Some attention to
bop, poetry, painting, film noir, political
speeches, stand-up comedy, and magazine
writing will be included. (Note: This course is
different from the Spring 1998 version of
Engl 365.)

[ENGL 366 The Nineteenth-Century
American Novel (also American Studies 366)
Fall. 4 credits. D. McColl.
A study of American fiction in its first
flowering. This course will include such
major works as Hawthorne's The Scarlet Letter,
Melville's Moby-Dick, James's The Portrait of a
Lady, and Mark Twain's Adventures of
Huckleberry Finn.

[ENGL 370 The Nineteenth-Century
English Novel (also Women's Studies 370)
Spring. 4 credits. E. Hanson.
The course offers a survey of canonical British
novels of the nineteenth century. Victorian
novels are notorious for their marriage plots,
narratives that presume that marriage or
suicide is the only fate appropriate for the
heroines; nevertheless, the best of these novels
offer rich insights into the psychology and
social condition of women, as well as
complex meditations on the social dynamics of sex. We will discuss the relationship of gender to language and literary forms, to reading and writing as a practice, to the politics of marriage and family life, to capital and property, and to the rhetoric of love and sexual desire. We will focus on a few of the most memorable heroines of the period as they appear in the novels of Jane Austen, Charlotte and Emily Bronte, William Makepeace Thackeray, George Eliot, and Thomas Hardy.

ENGL 371 American Poetry to 1950 (also American Studies 371)
Fall. 4 credits. R. Gilbert.
From its inception in the 17th century, American poetry in English has appeared strikingly different in form, language, and substance from that of other traditions. In this course we'll try to identify some of the qualities that have distinguished American poetry as a whole, while also focusing on the distinctive traits of a number of important individual poets. Figures to be studied will include Walt Whitman, Emily Dickinson, Robert Frost, Ezra Pound, T. S. Eliot, Langston Hughes, and Marianne Moore. Readings will be among the selected texts for the spring term.) The course is designed for majors, but will be open to all interested students.

ENGL 372 English Drama to 1700 (also Theatre Arts 372)
4 credits. To be offered 1999-2000.

ENGL 373 English Drama from 1700 to the Present (also Theatre Art 373)
4 credits. To be offered 1999-2000.

ENGL 374 Nineteenth-Century American Women Writers (also Women's Studies 374 and American Studies 374)
# Spring. 4 credits. Staff.
In this cross-cultural examination of nineteenth-century American women writers, we will contrast a variety of nineteenth-century works of fiction, political/feminist manifestos, and slave narratives. We will investigate the ways in which these writers used their texts to construct culturally valuable and authentic selves. We will also consider tensions between "sentimental" idealism and political pragmatism, passionless feminism and expressed sexuality, restrictive domesticity and dangerous but vital autonomy. Readings will include works by authors such as Louisa May Alcott, Lydia Maria Child, Kate Chopin, Sui Sin Far, Margaret Fuller, Pauline Hopkins, Sarah Winnemucca Hopkins, Frances Harper, Harriet Beecher Stowe, and Harriet Wilson.

ENGL 375 Survey in African American Literature to 1917 (also American Studies 375)
Fall. 4 credits. J. Goldsby.
This course survey the first half-century of African American novel production (1853-1912), with these as our founding propositions: what prompts African American authors to embrace the novel as a specific mode of expression in these years? How do they incorporate the major traditions of American novel writing (e.g., romanticism, sentimentalism, realism, naturalism, and modernism) into their aesthetic vocabularies? And how do the social fictions they produce not only require but inspire these writers to invent narrative strategies that challenge the conventions of the novel as such? Authors will include Frederick Douglass, William Wells Brown, Harriet Wilson, Charles Chesnutt, Pauline Hopkins, and James Weldon Johnson.

ENGL 376 Survey in African American Literature: 1918 to present
Spring. 4 credits. H. Spillers.
This course will select its readings from the genres of poetry, drama, fiction, and non-fiction produced by Black American writers within the period of the Harlem Renaissance, to the present. Readings will include poems by Harlem Renaissance poets, the poets of African-American modernism, i.e., Gwendolyn Brooks and Robert Hayden, and some of the poetry of the Black Arts Movement of the 60s, by way of Leroi Jones/Imamu Baraka's and Larry Neal's Black Fire; plays by Lorraine Hansberry, Ed Bullins, and August Wilson; non-fictional and fictional writings by Malcolm X, Martin Luther King, Nella Larsen, Jean Toomer, Zora Neale Hurston, Toni Morrison, and Nate Mackey. (Cane, The Autobiography of an Ex-Colored Man, Passing, The Autobiography of Malcolm X, Letter from an Birmingham Jail, Black Boy, Invisible Man, Flight to Canada, Oxdering Tides, Middle Passage, Jazz, and The Bedouin Hornbook will be among the selected texts for the spring term.) The course is designed for majors, but will be open to all interested students.

ENGL 377 Gay Fiction (also Women's 376)
4 credits. To be offered 1999-2000.

ENGL 378 Reading Nabokov
Fall. 4 credits. G. Shapiro.
For complete description, see Russian literature 385.

ENGL 381 Reading as Writing
See complete course description in section headed Expository Writing.

ENGL 382-383 Narrative Writing
See complete course description in section headed Creative Writing.

ENGL 384-385 Verse Writing
See complete course description in section headed Creative Writing.

ENGL 386 Philosophic Fictions
See complete course description in section headed Expository Writing.

ENGL 388-389 The Art of the Essay
See complete course description in section headed Expository Writing.

ENGL 390 Autobiography: Memoir, Memory, and History
4 credits. To be offered 1999-2000.

ENGL 391 Irish Studies: Since the Eighteenth Century
4 credits. To be offered 1999-2000.

ENGL 393 Survey in U.S. Latino/a Literatures (also LSP 393)
Fall. 4 credits. B. V. Olguin.
This course seeks to introduce students to the growing body of literature across time, space and genre (poetry, fiction, theater, performance art, testimonial narrative) that is being produced by the various Latino/a communities that have maintained or recently established a strong presence in the "United States of America." Concurrent with our study of literature as belles lettres the course will examine how Latino/a authors of various heritages—Chicano (Mexican American), Puerto Rican, Cuban American, Dominican American, Salvadoran American and "Mixed-Blood"—converge and diverge as they explore issues of race and class, gender and sexuality, as well as ideology, identity and culture in general. For example, what is the relation of a given text to the history of the Latino group to which the author belongs? How do the various literary forms and formats deployed by Latino/a authors interact with particular historical exigencies such as the various Black, Native American and Latino Civil Rights Movements? What, for instance, is the significance of Spanish, Caló, Nahuatl, English and various forms of bilingualism and multilingualism in Chicano and "Nuyorican" verse in the 1960s? Furthermore, how are various paradigms of cultural nationalism revisited in subsequent eras by Latinas and Latinos? How is popular culture manifested in these texts, and what types of ideological statements are being made by these representations? What do these authors reveal about the limits of various sociological models of analysis such as notions of acculturation, assimilation, accommodation? What does post-modernism offer U.S. Latinos, or should this question be inverted? And, in general, how are various power relations-articulated along gender, race, class and culture-negotiated? Authors examined include Julia Alvarez, Lorna Dee Cervantes, Junot Díaz, Cristina García, Oscar Hijuelos, CherríMoraga, Willie Perdomo, Miguel Piñero, Tomás Rivera, Esmeralda Santiago, Helena Maria Viramontes, and others.

ENGL 394 Topics in American Indian Literature (also American Indian Studies 394 and American Studies 394)
4 credits. To be offered 1999-2000.

ENGL 395 Video: Art, Theory, Politics (also Theatre Arts 395)
Fall. 4 credits. T. Murray.
The course will offer an overview of video art, alternative documentary video (which often incorporates styles of "video art") and new digital art over roughly the past thirty years. It will analyze four phases of video: 1) the development of video image in its earliest turn away from television; 2) video's relation to performance art and installation; 3) video's incorporation in film through experiments in technology; 4) digital art's transformation of video. Screenings will incorporate early political and feminist video, (from Art Farm, Chip Lord, Martha Rosler, Joan Jonas, Lynn Harshman, and Paper Tiger TV, etc.), conceptual video of the 80's and 90's (Woody Vasulka, Thierry Kunzeld, Mary Lucier, Bill Viola, Gary Hill, Steve Fagin, etc.), and gay and multicultural video of the 90's (Muntadas, Juan Downey, the Yemonotos, Jerry Tartaglia, Richard Fung, Prathna Parmar, Marlon Riggs, Keith Piper, etc.). Secondary theoretical readings on postmodernism, video theory, multiculturalism, and documentary will provide students with a cultural and political context for the discussion of video style, dissemination, and reception.

Courses for Advanced Undergraduates
Enrollment in courses at the 400 level is generally limited by prerequisite or permission of the instructor.

ENGL 402 Literature as Moral Inquiry
4 credits. To be offered 1999-2000.
ENGL 404 History Into Fiction: Nazis and the Literary Imagination (also Comparative Literature 404 and German Studies 414) 4 credits. To be offered 1999–2000.

ENGL 405 The Politics of Contemporary Criticism Fall. 4 credits. S. Mohanty.
An introduction to some of the major issues in contemporary criticism and theory, with primary focus on such questions as: What is a literary or cultural text? What is interpretation and who are its limits? What views about knowledge, society, and politics underlie particular critical strategies and methodological choices? Drawing on representative essays and books from a variety of critical schools and schools of criticism to deconstruct, marxism, and feminism, we will examine the competing claims of the various positions and focus on the implications of answers to the above questions in actual literary texts. Readings from C. B. Brooks, Jacques Derrida, Michel Foucault, Hans-Georg Gadamer, Sandra Harding, Fredric Jameson, Toni Morrison, Barbara Hermann Smith, Charles Taylor, and Richard Rorty, among others. Two papers and a weekly journal.

ENGL 406 Native and Nation (also Society for the Humanities 419) Spring. 4 credits. D. Moore.
For complete description, see Society for the Humanities 419.

ENGL 408 Poetry of the 1990s (also Comparative Literature 472, German Studies 472, and Spanish Literature 472) Fall. 4 credits. J. Monroe.
For complete description, see Comparative Literature 472.

ENGL 409 The Poetics of Virtuality (Society for the Humanities 421) Spring. 4 credits. M. L. Ryan.
For complete description, see Society for the Humanities 421.

ENGL 413 Middle English (also English 613) Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill.
This course surveys the literature of later medieval England, beginning with the cultural, literary, and linguistic collapse of standard Old English and proceeding to the age of Chaucer and perhaps a bit beyond. Readings will move through chronicles, hondylies, lyrics, and acknowledged literary masterpieces such as The Owl and the Nightingale, the works of the Pearl poet, selections from Piers Plowman, and other poems from the “aliterative revival.”

ENGL 416 Chaucer and the Politics of Love Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. W. Wetherbee.
The course will be organized around a reading of Chaucer’s great narrative poem Troilus and Criseyde, in the context of late-medieval English social and sexual politics. Readings will include classical and medieval love-lyric and romance; Ovid’s Art of Love; and medieval theorists of sexual and romantic love. Requirements for the course will include some practice in reading Chaucer aloud, one or two in-class presentations, two short writing exercises and a term-paper.

ENGL 417 Early Medieval Archaeology and Literature (also ENGL 517, ARCHEO 417, & ARCHEO 617) Spring. 4 credits. Permission of the professor is required, and the number of students will be limited to fifteen. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.
The seminar will concentrate on the development of Iron Age societies to Early Christan communities in Ireland, England, and Scandinavia. The written records will be Beowulf and Bede’s Ecclesiastical History of England, and the Sagas of Grettir the Strong and Egil from Scandinavia. All students will prepare oral reports, and there will be a take-home midterm and final. Graduate students will be expected to do substantial research on their oral reports, and/or a research paper.

ENGL 422 The Victorian and Edwardian Theatre (also Theatre Arts 435) Fall. 4 credits. J. E. Gainer.
For complete description, see Theatre Arts 435.

ENGL 423 Seventeenth-Century Lyric Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Not open to sophomores. B. Correll.
The study of seventeenth-century English poetry, major and minor, male and female, secular and religious, and the questions such study raises: What is the connection between lyric poetry and the conditions and conflicts of the seventeenth century? How did the writing and publishing change in the period? How did women writers claim voices and change lyric poetry? What is the relationship between love poetry and religious lyric? Why did poets write about country houses, dead children, compasses, and coins? As our readings and seminar discussions will show, seventeenth-century poets were both products and producers of their culture. We will also read critical approaches to seventeenth-century poetry.

ENGL 425 Elizabethan and Jacobean Drama (also ENGL 625) Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. B. Adams.
Major comedies, tragedies, and tragicomedies by Shakespeare’s principal contemporaries: Christopher Marlowe, John Lyly, Thomas Kyd, Ben Jonson, John Marston, John Webster, Thomas Middleton, John Fletcher, John Ford, and others.

ENGL 427 Studies in Shakespeare: Gender, Sexuality, Cultural Politics Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. B. Correll.
The seminar will focus on Shakespeare’s drama and poetry and examine questions of gender and sexuality in their historical context. Texts will include The Rape of Lucrece, Twelfth Night, The Merchant of Venice, Measure for Measure, The Taming of the Shrew, The Winter’s Tale, Antony and Cleopatra, Coriolanus, The Sonnets. Discussions will address many issues: cross-dressing, masculine identity, the situation of women, royal politics, market economies, sumptry law, anti-theatrical pamphlets. Students will also be introduced to representational critical approaches and debates in Shakespeare studies (feminist, new historical, queer, post-structuralist, psychoanalytic) and will write a critical research paper.

For complete description, see Comparative Literature 429.

ENGL 432 Studies in the 18th Century: The Development of Print Culture Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. B. Adams.
This course will examine some of the ways that print technology and especially the marketing of books for an expanding public of readers affected literary practice and theory in eighteenth-century England. We will mostly focus on eighteenth-century literature of various genres—especially satire, the novel, and the periodical essay—but we will also study some recent work that addresses the legal, social, and cultural issues associated with print culture. Examples of questions we will explore: When is literature first considered to be intellectual property, how does the legal definition of an author as the “owner” of a literary text affect ownership of writers to their works and their readers? Is there a connection between the new poetic category of “creative genius” and the new legal and economic category of intellectual property? How does the designation of printed books for an expanding reading public enable questions of aesthetic pleasure and “taste” to become dominant criteria of literary judgment? What is the relationship between “serious” and “popular” literature in print culture? How does the more widespread availability of books in print challenge traditional notions of “cultural literacy” (especially as identified with university education) as well as what counts as “literature” (especially as compared to the novel)? How do writers obtain cultural authority when writing becomes a paid profession? As we address these issues, we will also explore some of the political implications of print culture that were first significantly addressed in England by Puritan revolutionaries in relation to the public status of the Bible. Authors will include Milton, Dryden, Defoe, Swift, Pope, Richardson, Johnson, and Young.

ENGL 433 The Invention of Humanity: Passion and Experience in the 17th and 18th Century 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. To be offered 1999–2000.

ENGL 437 Fictions of Apartheid and the Development of Print Culture Fall. 4 credits. To be offered 1999–2000.

ENGL 438 Libertines and License (also French Literature 74) Spring. 4 credits. R. Parker.
The course will follow the progress of the libertine chiefly through a number of eighteenth- and early nineteenth-century English and French plays, novels, poems and graphic works, with particular interest in the aesthetic conventions and cultural contexts for representing the performance of intellectual, political, social and erotic excess, and transgression. Works in translation where appropriate) by such writers and artists as
Julia Kane, David Edgar, Timberlake and Thatcherism and its aftermath will be by the Fringe, and the political impact of The Royal Court Theatre, Wertenbaker, Edward Bond, and Peter Shaffer.
The contemporary scene in English theatre, Loesser and Burrows's Royal Shakespeare Company, the role played (Arcadia, Rosencrantz and Guildersdale are Dead), Bess Churchill (and its source, stories by Damon Runyon; Girls), A close reading of some seven or eight Molnar's Hammerstein's integral to this complex theatrical form. problems and opportunities of interpretation analyze musical drama and how to handle the give a historical basis to the course, but the A chronological approach will assignments.

[ENGL 444] The Novels of George Eliot Fall. 4 credits. C. Chase. Written under the name "George Eliot" by Mary Ann Evans between 1857 and 1878, Middlemarch; Adam Bede, Daniel Deronda and George Eliot's other novels are at the heart of the literary tradition in English. Eliot's first novel was the first deliberate practice of Realism, which she had defined and praised in a review of Ruskin's Modern Painters. Eliot's novels reveal the complex emotional and formal structures of realist fiction. How does literary invention, fiction, come to feel like history? And in what ways do women and men into a world come to seem real, like Dorothea or Gwendolen Harleth or Maggie and her brother Tom? In this course we will study the construction and style of several major novels and explore some recurrent fantasies or mechanisms that energize them. Writing requirements for the course will be two papers of ten pages each, with required revisions, and some shorter informal writing assignments.

[ENGL 454] American Musical Theatre (also Music 490 and Theatre Arts 454) Spring. 4 credits. Prerequisite: English 272 or Theatre Arts 240-41. S. McMillin. A close reading of some seven or eight leading examples of the American musical, together with their sources, from Showboat to South Pacific. A chronological approach will give a historical basis to the course, but the primary concern will be learning how to analyze musical drama and how to handle the problems and opportunities of interpretation integral to this complex theatrical form. Readings will include Rogers and Hammerstein's Carousel and its source, Molnar's Liliom; the Gershwin's Porgy and Bess and its source, Dubose Heyward's novel Porgy; Loesser and Burrows's Guys and Dolls, and its source, stories by Damon Runyon; Bernstein's West Side Story and its source, Romeo and Juliet.

[ENGL 459] Contemporary British Drama Fall. 4 credits. S. McMillin. The contemporary scene in English theatre, with special attention to Tom Stoppard (Arcadia, Rosencrantz and Guildersdale are Dead), Harold Pinter (The Homecoming, Mountain Language, Moonlight), and Caryl Churchill (Vinegar Tom, Cloud Nine, Top Girls), along with plays also by such writers as Julia Kane, David Edgar, Timberlake Wertenbaker, Edward Bond, and Peter Shaffer. The importance of the Royal Court Theatre, the effect of the National Theatre and The Royal Shakespeare Company, the role played by the Fringe, and the political impact of Thatchersm and its aftermath will be important considerations.

[ENGL 466] James on Film Spring. 4 credits. D. Fried. Study of selected films adapted from Henry James's novels will necessarily involve close reading of the novels as well as examination of script-play form, narrative in film and fiction, and larger questions of the expectations of moviegoers and readers. James's aspirations as a dramatist, his writings on theater and photography, and controversies about the interpretation of the novels will also be important in exploring how James's stories have been retold by filmmakers. The aim of the course is not to determine whether James has been justly served by the movies, but to take up the challenge of adapting his novels for film as an occasion for a detailed scrutiny of the conventions and resources peculiar to film and to prose fiction. Recurrent issues will include authorship and authority, point of view, levels of representation, visual, auditory, and character, literary and filmic allusion, and relations between literature and the other arts. Works and films may include Daisy Miller, The Turn of the Screw, The Innocents, Washington Square, The Heiress, The Bachelors, The Portrait of a Lady, and The Wings of the Dove. A thorough episode-by-episode study of the Ulysses. We shall place Ulysses in the context of Joyce's canon of Irish culture, and literary modernism. We shall explore the relationship between Ulysses and other experiments in modernism especially painting and sculpture—and show how Ulysses redefines the concepts of epic, hero, and reader. We shall discuss how Ulysses raises major issues in literary study and tests various critical and scholarly approaches. Such a self-conscious inquiry into theories and methods should prepare students to confront other complex texts. No previous experience with Joyce is required.

[ENGL 470] Studies in the Novel: Reading Joyce's Ulysses Spring. 4 credits. D. Schwarz. A thorough episode-by-episode study of the art and meaning of Joyce's Ulysses. We shall place Ulysses in the context of Joyce's canon of Irish culture, and literary modernism. We shall explore the relationship between Ulysses and other experiments in modernism—especially painting and sculpture—and show how Ulysses redefines the concepts of epic, hero, and reader. We shall discuss how Ulysses raises major issues in literary study and tests various critical and scholarly approaches. Such a self-conscious inquiry into theories and methods should prepare students to confront other complex texts. No previous experience with Joyce is required.

[ENGL 473] American Indian Autobiography Fall. 4 credits. K. Shanley. Since first contact with Indigenous Americans, Europeans have been fascinated by the cultural differences between themselves and Native peoples. Within European American thought, the symbol of the "Indian" has known a wide range of applications, from culturally "other" to evolutionarily early European selves. That European fascination and Native Americans' need to tell "their side of the story" of American history have given rise to an immense body of Native American "autobiographies," often written in collaboration with European Americans. In this course we will survey a geographical and historical variety of Native American autobiographies and life stories, ranging in the United States produced entirely by American Indians to texts that have undergone extreme alteration from the telling of the tale to the production of the book by its non-Indian editor. We will consider a wide range of issues raised by the texts—e.g., what is autobiography? What are Native attitudes toward the natural world, the roles of men and women in indigenous societies, and colonial and (post)colonial circumstances?

[ENGL 474] Contemporary African American Poetry Fall. 4 credits. Limited to 15 students. Admission by permission of instructor only. K. McClure.

African American poetry, like African American literature in general, has always served two masters, the artistic and the political. We will begin with the canonical works of Gwendolyn Brooks, Robert Hayden, and Amiri Baraka. three of America's most distinguished poets. From there we will read widely in contemporary African American poetry, including Mari Evans, Audre Lorde, Rita Dove, Ai, Nathaniel Mackey, Michael Harper, Lucille Clifton, Sonia Sanchez, and Ethelbert Miller. To increase our acquaintance with "black" poetry, all students will be asked to present a poet not included on our shared reading list. Clearly, one cannot understand African American poetry without appreciating the crucial historical and political movements that undergird it, including the assimilationist movement of the early 1940s and 1950s, the Black Aesthetic movement of the 1960s and 1970s, and the new "jazz" poetry aestheticism in the 1990s. Still, whatever the decade, African American poets have continued to define their identity as either Americans or displaced Africans, using their considerable talent to explain the vexations of being both black and despised. The poetry—like all art—that is truly contemporary—often seems too slippery, too present, and too difficult for the tentative critic. And yet poems like "The Middle Passage" in the 1950s, "In the Mecca" in the 1970s, and "A Dark and Splendid Mass" in the 1990s are essential evocations, ones that astonish us with their craft, their irrefutable wisdom, and their depth of feeling. Students will be expected to do extensive research and to write a substantial term paper.

[ENGL 480-481] Seminar in Writing Fall. 480; spring 481. 4 credits. See complete description in section headed Creative Writing.

[ENGL 490] Chicana Renaissance (also Latino Studies 490 and Women's Studies 488) Spring. 4 credits. B. V. Olguin.

This course examines the work of Chicana writers and visual artists from the early 1980s to the present. Students will examine the
various revisions of the masculinist cultural nationalist paradigms proposed by their male counterparts in the 1960s and 1970s, and more importantly, the unique and varied embodied poetics that distinguish the Chicana Renaissance. In response to the famous query “Can the subaltern speak?” we will consider how Chicanas are reconstructing their subaltern spaces through a polyphony of styles and discourses. We will examine, for example, how Chicana artists, writers (and even critics) appropriate and revivify various popular myths such as the Three Marias: popular cultural forms such as chisme; and even more standard forms of discourse such as the bildungsroman. Throughout this survey, we will be attentive to explicated elements of the “Chicana aesthetic” that have revitalized Chicana/o and U.S. Latina/o literatures in general. In examining how various Chicana authors politicize the body, the domestic sphere, and the nation, we will also consider the inevitable impact these discourses have had on feminist discourses throughout the U.S. and Latin America. Authors include Alma Vilamur, Berenice Zamora, Cherríe Moraga, Gloria Anzaldua, Sandra Cisneros, Evangelina Vigil-Piton, Roberta Fernandez, Helena Maria Viramontes, Rosemary Castacalos, Amalia Mesa-Baines, Judith Baca, Esier Hernandez, and others.

ENGL 491 Honors Seminar I
Fall. 4 credits. Open to students in the Honors Program in English or related, or by permission of instructor.

Women’s Writing: Revolution and Romance. M. Jacobus.
The period of the French Revolution and its aftermath was an especially rich one for women writers, stimulating them to participate in its politics, its arguments about women’s sexualities and rights, its anxieties and terrors. Women became travelers in unprecedented numbers, reading and writing more novels than ever before. This course looks at first- and second-generation women novelists (and some poets) of the period, focusing on the tensions between political and romantic concerns. We will read feminist writings, including Mary Wollstonecraft's autobiographical fiction and travel book, Elizabeth Inchbald's novel of female education and conflict, A Simple Story, and Mary Hays's confessional novel, The Memoirs of Emma Courtney. We will look at two novels spawned by the Revolution, Charlotte Smith's Desmond and a critique of 1790s feminism, Amelia Opie's Adeline Mowbray. Alongside this radical tradition and its assessment, we will read gothic novels by Anne Radcliffe (The Romance of the Forest) and Jane Austen (Manfield Park) which respond to the romance of the past and the threat of change. Maria Edgeworth's Irish fiction, Castle Rackrent and Emmui, focuses on changes in England's relation to its colonial neighbour, while Claire de Duras' Ondine, a novel of French post-Revolutionary race-relations, suggests how melancholia and race become intertwined. We will also read later novels such as Mary Shelley's Frankenstein, Mathilda, and The Last Man, which engage with the Romantic fascination with science, monstrosity, incest, solitude, politics, and plague from the perspective of a second-generation Romantic woman writer.

ENGL 492 Honors Seminar II
Spring. 4 credits. Open to students in the Honors Program in English or related, or by permission of instructor.

Section I: Modern American Poetry (also American Studies 492). R. Gilbert.
A close consideration of six significant poets of the last fifty years: Elizabeth Bishop, Robert Lowell, John Ashbery, A. R. Ammons, Adrienne Rich, Rita Dove. We will examine individual poems as well as published collections, trace the shape of each poet's career, and map the shifting relations between self, world, history and language reflected in their poems. Intensive reading in poetry, with some prose as well. In addition, supplementary reading in other contemporary poets may be assigned to help provide a literary context. Several short papers and a longer project; one or two in-class presentations.

Section II: Twentieth Century Women Writers of Color (also Asian American Studies 492). S. Wong.
This course will explore a range of writings—novels, stories, poems, essays—by American women writers of color in the twentieth century. We will look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region and class. Readings may include works by Joy Harjo, Leslie Marmon Silko, Sandra Cisneros, Gloria Anzaldua, Theresa Hak Kyung Cha, Sigrid Nunez, Jamaica Kincaid, Maxine Hong Kingston, and Gwendolyn Brooks. Course requirements will include class presentations, short responses to the readings, and a longer research essay.

ENGL 493 Honors Essay Tutorial I
Fall or spring. 4 credits. Prerequisites: senior standing and permission of Director of the Honors Program.

ENGL 494 Honors Essay Tutorial II
Fall or spring. 4 credits. Prerequisites: English 493 and permission of Director of the Honors Program.

ENGL 495 Independent Study
Fall or spring. 2-4 credits. Prerequisites: Permission of departmental adviser and director of undergraduate studies.

Courses Primarily for Graduate Students

Permission of the instructor is a prerequisite for admission to courses numbered in the 600s. These are intended primarily for graduate students, although qualified undergraduates are sometimes admitted. Undergraduates seeking admission to a 600-level course should consult the instructor. The list of courses given below is illustrative only; a definitive list, together with course descriptions and class meeting times, is published in a separate department brochure before course enrollment each term.

Graduate English Courses for 1998–99

Fall

ENGL 600 Colloquium for Entering Students

Spring

ENGL 602 Literature and Theory (also English 302, Comparative Literature 302, and Comparative Literature 622)

ENGL 611 Old English (also English 311)

ENGL 619 Chaucer

ENGL 628 Elizabethan and Jacobean Drama (also English 425)

ENGL 632 Studies in the 18th Century: Colonialism and 18th-century Literature

ENGL 639 Studies in Romanticism: Writers of the 1790s

ENGL 646 Studies in Victorian Literature: Narrative Technique and Gendered Identities

ENGL 653 On Art and Eros: Ruskin, Pater, Wilde

ENGL 664 American Poetry, 1910-1930

ENGL 668 Bloomsbury and the Beginnings of British Modernism

ENGL 673 The American 1890s

ENGL 676 Testimonio (Testimonial Narrative) in the Americas

ENGL 695 Race, Colonialism, and Contemporary Theory

ENGL 780.1 MFA Seminar: Poetry

ENGL 780.2 MFA Seminar: Fiction

ENGLISH 415
FRENCH LANGUAGE AND LINGUISTICS
See under Languages and Linguistics.

FRENCH LITERATURE
See under Department of Romance Studies.

FRESHMAN WRITING SEMINARS
For information about the requirements for freshman writing seminars and descriptions of seminar offerings, see "Special Programs and Interdisciplinary Studies" at the end of the Arts and Sciences section of this catalog and consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in November for the spring term.

GEOPOLITICAL SCIENCES
As an intercollege unit, the Department of Geopolitical Sciences has degree programs in both the College of Arts and Sciences (B.A. degree) and the College of Engineering (B.S. degree).

We live on a planet with finite resources and a finite capacity to recover quickly from human-induced environmental stresses. It is also a powerful planet, with geologic hazards such as earthquakes and volcanic eruptions that alter the course of history with little prior warning. As the human population grows, understanding the earth and its resources becomes progressively more important for both future policy makers and ordinary citizens. Because the human need to understand the earth is so pervasive, we provide our students with a broad and solid minimal set of required courses plus room to explore more specialized topics with well-chosen electives within and outside the department. The Geopolitical Sciences Major prepares students for advanced study in geology, geophysics, geochemistry and geobiology; and careers in mineral and petroleum exploration or in environmental geology. Alternatively, it is a valuable major for a pre-law or pre-med program or in preparation for a career in K-12 education.

In addition to course work, students learn by outdoor field work and involvement in the vigorous research programs of the department. Facilities include equipment for processing seismic signals and digital images of the earth's surface, instruments for highly precise isotopic and element analyses, and extensive libraries of earthquake records, satellite images, and exploration seismic records. High-pressure, high-temperature mineral physics research uses the diamond anvil cell and the Cornell High Energy Synchrotron Source (CHESS). Undergraduates have served as field assistants for faculty members and graduate students in Argentina, British Columbia, the Aleutian Islands, Scotland, Switzerland, Tibet, and Barbados. Undergraduates are encouraged to participate in research activities, frequently as paid assistants.

The Department of Geopolitical Sciences is the core department in a new intercollege program in the Science of Earth Systems (SES). In the College of Arts and Sciences, this program can be taken as a separate major administered by the Department of Geopolitical Sciences (described in more detail in the Interdisciplinary Centers, Programs, and Studies section at the front of this catalog). The Geopolitical Sciences major emphasizes the structure, composition and evolution of our planet, while the SES major is more concerned with currently active processes on and near the earth's surface where the interactions of water, life, rock and air produce our planetary environment. The SES major is for students interested in careers in atmospheric, hydrological and ocean sciences, environmental chemistry (biogeochemistry), and environmental geophysics.

The Major
The prerequisites for admission to a major in geopolitical sciences in the College of Arts and Sciences are two two-semester sequences in mathematics and physics, MATH 111-112 or MATH 191-192 and PHYS 207-208 or PHYS 112-213, or their equivalents, and a semester course in chemistry, such as CHEM 207 or 211. GEOL 101 or GEOL 201 followed by GEOL 102 or GEOL 104 are strongly recommended, but a student with a strong foundation in mathematics and science may be accepted as a major without completion of an introductory sequence.

Majors take GEOL 210 and GEOL 214, the five 300-level core courses listed below, 6 credits of additional course work from geological sciences courses numbered 300, 400, or 600, plus an additional course in either computer science or history. Majors in an intermediate-level course in biological science, mathematics, chemistry, or physics. In addition, an requirement for an advanced outdoor field experience may be met by completing one of the following 4 credit options:

- GEOL 491-492 (Undergraduate Research, 2 credits each) with a significant component of field work;
- GEOL 491 or 492 based on field observations obtained in GEOL 212 (Caribbean Field Trip, 2 credits) or GEOL 417 (Field Mapping in Argentina, 3 credits) for a combined 4-credit minimum;
- GEOL 437 (Geophysical Field Methods, 3 credits) plus at least 1 credit of GEOL 491 or 492 using geophysical techniques from GEOL 434; or
- Act approved outdoor field course taught by another college or university (4 credit minimum).

Core Courses
GEOL 326 Structural Geology
GEOL 355 Mineralogy
GEOL 356 Petrology and Geochemistry
GEOL 375 Sedimentology and Stratigraphy
GEOL 388 Geophysics and Geotechnics
Prospective majors should consult R. W. Kay, director of undergraduate studies, or another faculty member as early as possible for advice in planning a program. Students majoring in geological sciences may attend the department seminars and take advantage of cruises, field trips, and conferences offered through the Department of Geopolitical Sciences.

Courses offered at the 100 and 200 level are open to all students. Certain 300- and 400-level courses in geology also may be of particular interest to students of chemistry, biology, ecology, and physics. Students are encouraged to inquire about courses that interest them at the department office in Snee Hall.

Honor. An honors program is offered by the Department of Geopolitical Sciences for superior students. Candidates for honors must maintain an overall 3.0 grade-point average, a cumulative average of 3.5 in the major, and complete an honors thesis (Geological Sciences 491 or 492). Students interested in applying should contact the director of undergraduate studies during the second semester of the junior year.

COURSES

Freshman and Sophomore Courses

Geopolitical Sciences

GEOL 101 Introductory Geopolitical Sciences
Fall, spring, or summer. 3 credits. Fall: W. B. Travers; spring: J. M. Bird; summer: W. Bruce.

Designed to enhance an appreciation of the physical world. Natural environments, surface features, dynamic processes such as mountain belts, volcanoes, earthquakes, glaciers, and river systems are emphasized. Interactions of the atmosphere, hydrosphere, biosphere, and lithosphere (Earth System Science). Water, mineral, and fuel resources; environmental concerns. Field trips in the Ithaca region.

GEOL 102 Evolution of the Earth and Life (also Bio G 170)
Spring, summer. 3 credits. Spring: J. L. Cline.

GEOL 104 The Sea: An Introduction to Oceanography (also BIO ES 154)
Spring, summer. 3–4 (4 credits with lab section) credits. Spring: C. H. Greene, W. M. White; summer. L. Godfrey.

A survey of the physics, chemistry, geology, and biology of the oceans for both science and non-science majors. Topics include: sea floor spreading and plate tectonics, marine sedimentation, chemistry of seawater, ocean currents and circulation, the oceans and climate change, ocean ecology, coastal processes, marine pollution, and marine resources.
GEOL 105 Writing on Rocks (Freshman Seminar)
Fall. 3 credits. J. Chiment.
See Freshman Seminar Handbook for description.

GEOL 106 Vertebrate Fossil Preparation
Spring. 1 credit. Prerequisites: one introductory geology course or concurrent enrollment, class size is limited. J. Chiment.
A laboratory-oriented course that will expose students to techniques of vertebrate fossil preparation. Roughing-out and fine preparation of large specimens in solid matrix will be covered, as well as screen washing and microscope techniques for the recovery of micro-vertebrate remains. Specialized scanning techniques will be discussed.
The class will meet for one hour each week for the first six weeks of the semester. Students will be assigned to an individual or group project requiring two hours of participation each week for the remainder of the semester.

GEOL 107 How the Earth Works
Fall. 1 credit. J. L. Cisne.
A user-friendly introduction to the workings and interior of solid earth, ocean, atmosphere, and life as they relate to understanding ongoing global change.

GEOL 108 Geology and Society
Spring. 1 credit. May be taken concurrently with or after GEOL 101, 102, 104, 111, or 201. T. F. Jordan.
Intended for students who are curious about the composition and processes of our planet, the forces that shape and change it, and the role of geology in society. Prerequisites: one introductory course in geology or permission of instructor.

GEOL 109 Dinosaurs
Fall. 1 credit. J. L. Cisne.
An introductory survey course for anyone interested in dinosaurs. Lectures examine the fossil evidence and illustrate how various geological and biological disciplines contribute to understanding dinosaurs and their world.

GEOL 111 To Know the Earth and Build a Habitable Planet
Fall. 3 credits. J. M. Bird.

GEOL 122 Earthquake! (also ENGR 122)
Fall. 3 credits. L. D. Brown.
The science of natural hazards and strategic resources is explored. Techniques for locating and characterizing earthquakes, and assessing the damage they cause; methods of using sound waves to image the earth's interior to search for strategic materials; the historical importance of such resources. Seismic experiments on campus to probe for groundwater, the new critical environmental resource.

GEOL 123-124 Science of Earth Systems Colloquium (also ABEN 120-121, SCAS 101-102 and SES 101-102)
For description, see the Science of Earth Systems section in "Interdisciplinary Centers, Programs, and Studies," in the front part of the catalog.

GEOL 125 Global Environment (also ENGR 125)
Fall. 3 credits. W. M. White, L. A. Derry.
Wise environmental management requires an understanding of natural chemical interactions. Examines natural chemical cycles among atmosphere, hydrosphere, lithosphere, and the solid Earth; the impact of man's activity on them, including the greenhouse effect, ozone hole, acid rain, and water pollution. Laboratory sessions include environmental chemical analysis and computer simulation.

GEOL 200 Art, Archaeology, and Ancient Civilizations (also GEOL 372, ARTH 200, ENGL 285, ENGR 185, PHYS 200)
Spring. 3 credits. R. Kay.
An interdisciplinary course on the use of techniques of science and engineering in cultural research. Applications of physical and physiological principles to the study of archaeological artifacts and works of art. Historical and technical aspects of artistic creation. Analyses by modern methods to deduce geographical origins, and for exploration, dating and authentication of cultural objects. Does not meet liberal studies distribution requirement for Engineering.

GEOL 201 Introduction to the Physics and Chemistry of the Earth (also ENGRD 201)
Spring. 3 credits. Prerequisites: Mathematics 191 and Physics 112.
L. M. Cahiles.
Formation of the solar system: accretion and evolution of the earth. The rock cycle: radioactive isotopes and the geological time scale, plate tectonics, rock and minerals, earth dynamics, mantle plumes. The hydrologic cycle: runoff, infiltration, groundwater flow, contaminant transport. Weathering cycle: chemical cycles, CO2, (weathering), rock cycle, controls on global temperature (CO2, or ocean currents), oil and mineral resources.

GEOL 203 Natural Hazards and the Science of Complexity
Fall. 3 credits. Prerequisites: 1 calculus course. D. L. Turcotte.
Studies of natural hazards; earthquakes, volcanic eruptions, floods, hurricanes, tornadoes, severe storms, wildfires, meteor impacts. Applications of the science of complexity to natural hazards; fractals, chaos, and self-organized criticality.

GEOL 210 Introduction to Field Methods in Geological Sciences
Fall. 3 credits. Prerequisites: GEOL 101, 201, or permission of instructor. Weekly field sessions. A weekend field trip. S. Mahlburg Kay.
The methods by which rocks are used as a geological database. Field methods used in the construction of geologic maps and cross sections; systematic description of stratigraphic sections. Field and laboratory sessions on Saturday mornings until Thanksgiving. One additional lecture during the first week, one weekend field trip to eastern New York.

GEOL 212 Caribbean Field Trip (January)
Fall. 2 credits. Prerequisite: permission of instructor. Enrollment limited to 15.
Approximate cost $1100. L. D. Brown.
A multidisciplinary look at earth science and environmental issues presented in the Yucatan Peninsula of Mexico. Base for operations will be the Centro Ecologico Akumal, located on the Caribbean coast south of Cancun. This coast and its associated reef epitomizes the conflict between ecological preservation and economic development on an international scale. Excursions may include visits to Merida, a historic Spanish town which lies above the buried impact structure that many believe resulted in the death of the dinosaurs: ruins at Chichen Itza, Mayapan, Coba, and Tulum associated with the rise and fall of Mayan culture; and wildlife (monkeys, jaguars, crocodiles) preserves where recent geological studies have found evidence that the fall of the Mayans may have been triggered by climate change. The field trip will feature snorkel tours of reefs and lagoons as well as the cenotes (sinkholes) that characterize this classic karst landscape.
Weekly lectures during the semester will provide background; field trip tentatively scheduled for January 1999.

GEOL 213 Marine and Coastal Geology
Summer. 2 credits. Prerequisites: an introductory course in geology or permission of instructor; Staff.
A special one-week course offered at Cornell's Shoals Marine Laboratory (SML), on an island near Portsmouth, New Hampshire. For more details and an application, contact the SML office, G14 Stimson Hall. Estimated cost for 1998 (including tuition, room, board, and ferry transportation) is $895.

GEOL 214 Western Adirondack Field Course
Spring. one week at the end of the semester. 1 credit. Prerequisite: GEOL 210 or equivalent, or permission of instructor. W. A. Bassett.
Field mapping methods, mineral and rock identification, examination of Precambrian metamorphic rocks and lower Paleozoic sediments, talc and zinc mines.

Junior, Senior, and Graduate Courses
Of the following, the core courses GEOL 326, SCAS 355, 356, 357, and SES 398 may be taken by B.A. candidates who have successfully completed GEOL 201 or the equivalent and by B.A. candidates who have completed GEOL 101 or the equivalent, or who can demonstrate to the instructor that they have adequate preparation in mathematics, physics, chemistry, biology, or engineering.

GEOL 302 Evolution of the Earth System (also SES 332 and SCAS 302)
For description, see the Science of Earth Systems section in "Interdisciplinary Centers, Programs, and Studies," in the front part of the catalog.

GEOL 321 Introduction to Biogeochemistry (also SES 321, NTRES 321)
Fall. 4 credits. Prerequisites: college level chemistry, plus a course in biology and/or geology. L. A. Perry, J. Yavitt.
Control and function of the Earth's global biogeochemical cycles. The course begins with a review of the basic inorganic and organic chemistry of biologically significant elements, and then considers the biogeochemical cycling of carbon, nutrients, and metals that take place in soil, sediments, rivers and the oceans. Topics include weathering, acid-base chemistry, biogeochemical cycles, and the uses of isotopic tracers, and mathematical models. Interactions between global biogeochemical cycles and other components of the Earth system are discussed.

**GEOL 326 Structural Geology**
- Spring. 4 credits. Prerequisite: GEOL 101 or 201, or permission of instructor. R. W. Allmendinger.
- Nature and origin of deformed rocks at microscopic to macroscopic scales, with emphasis on structural geometry and kinematics. Topics include stress, strain, rheology, deformation mechanisms, mineral structures, faulting, folding, and structural families.

**GEOL 355 Mineralogy**
- Fall. 4 credits. Prerequisite: GEOL 101 or 201 and Chem 207 or permission of instructor. S. Mahlburg Kay (Fall only).
- Examination of minerals by hand-specimen properties and optical microscopy. Geological setting, classification, crystal structures, phase relations, chemical properties, and physical properties of minerals. X-ray diffraction is introduced. Independent research project.

**GEOL 356 Petrology and Geochemistry**
- Spring. 4 credits. Prerequisite: GEOL 355, R. W. Kay.
- Principles of phase equilibrium as applied to igneous and metamorphic systems. Description, classification, chemistry, origin, regional distribution, and dating of igneous and metamorphic rocks. Geochemical distribution of trace elements and isotopes in igneous and metamorphic systems. The petrological evolution of the planets.

**GEOL 375 Sedimentology and Stratigraphy**
- Fall. 4 credits. Prerequisite: GEOL 101 or 201, J. L. Cisne.

**GEOL 388 Geophysics and Geotectonics**
- Spring. 4 credits. Prerequisite: Mathematics 208, 213, or equivalent. B. L. Jackson.
- Global tectonics and the deep structure of the solid earth as revealed by investigations of earthquakes, earthquake waves, the earth's gravitational and magnetic fields, and heat flow.

**GEOL 411 Satellite Remote Sensing in Geosciences**
- Fall. 3 credits. Prerequisite: permission of instructor. B. L. Jackson.
- Instruction in satellite remote sensing, image processing, geographic information systems (GIS) and analysis of digital elevation models, using advanced computer workstations, via participation in current research on earthquakes, glaciers, and tectonics.

**GEOL 417 Field Mapping in Argentina**
- Summer. 3 credits. Prerequisites: GEOL 210 and 326; Spanish desirable, but not required. S. Mahlburg Kay.
- Modern techniques of geologic mapping applied in the region of San Juan, Argentina, including fieldwork and folded sedimentary rock units of the Andean Precordillera (San Juan River section), intensely deformed Precambrian metamorphic rocks of the Pampean Ranges (Piedra Paba), and shallow-level silicic intrusives (Cerro Blanco-Ullum).

**GEOL 423 Petroleum Geology**
- Fall. 3 credits. Recommended: GEOL 326. Offered alternate years. W. B. Travers.
- Introduction to hydrocarbon exploration and development. Exploration techniques, including well logs, fluid pressures, seismic-reflection methods, gravity, and magnetic measurements to map subsurface structures and stratigraphy. Petroleum origin and migration. Dispersal systems and depositional patterns of petroleum reservoirs. Economics of exploration, leasing, drilling and production. Estimates of petroleum reserves, including tar sands and oil shales.

**GEOL 434 Reflection Seismology**
- Spring. 4 credits. Prerequisites: Mathematics 192 and Physics 208, 213, or equivalent. L. D. Brown.
- Fundamentals of subsurface imaging by multichannel seismic reflection techniques as used in oil exploration and geohydrological investigations. Covers survey design, acquisition, analysis, processing and interpretation in both 2D and 3D. Includes discussion of related techniques such as seismic-refraction analysis, tomographic inversion, vertical seismic profiling, shear wave exploration and ground penetrating radar. Lab is keyed to state-of-the-art seismic processing, modeling and interpretation software from LandMark.

**GEOL 437 Geophysical Field Methods**
- Fall. 3 credits. Prerequisites: PHYS 213 and MATH 192 or equivalents, or permission of instructor. L. D. Brown.
- Introduction to the use of geophysical methods to examine the earth's interior. Exploration for minerals and energy resources. Applications of geophysical methods to environmental problems. Field surveys carried out at the beginning of the semester are analyzed in a series of weekly follow-up meetings during the semester wherein the results are analyzed and interpreted. A field companion to GEOL 456, which is recommended but not required prior to this course.

**GEOL 445 Geohydrology (also ABEN 471 and CEE 431)**
- Fall. 3 credits. Prerequisites: Mathematics 294 and 215 202. W. Brutsaert.
- L. M. Cathles, Y.-Y. Parlange, T. S. Steenhuis.

**GEOL 447 Geophysics and Geotectonics**
- Spring. 3 credits. Corequisite: GEOL 356 or equivalent. Offered alternate years. B. L. Jackson.
- Introduction to field methods of geophysical exploration, especially as applied to environmental problems. Emphasis on seismic ground penetrating radar, gravity, and magnetic techniques. Field surveys carried out at the beginning of the semester are analyzed in a series of weekly follow-up meetings during the semester wherein the results are analyzed and interpreted. A field companion to GEOL 456, which is recommended but not required prior to this course.

**GEOL 454 Advanced Mineralogy**
- Spring. 3 credits. Prerequisite: GEOL 355 or permission of instructor. Offered alternate years. W. A. Bassett.
- Crystallography and crystal chemistry of minerals and the methods of their study. X-ray diffraction, optical methods, computer simulation of crystal structures. Emphasis on effects of high pressures and temperatures with implications for understanding of earth's interior.

**GEOL 455 Geochemistry**
- Fall. 4 credits. Prerequisites: Chemistry 207 and Mathematics 192 or equivalent. Offered alternate years. Not offered 1998-99. W. M. White.
- The Earth from a chemical perspective. Formation of the elements; cosmochemistry; chemical evidence regarding the formation of the Earth and Solar System; trace-element geochemistry; isotope geochemistry; geochronology; geochemical thermodynamics and kinetics; chemical evolution of the crust. mantle, and core; weathering and the chemistry of natural waters; chemistry of rivers and the oceans; hydrothermal systems and ore deposition.

**GEOL 458 Volcanology**
- Spring. 3 credits. Corequisite: GEOL 356 or equivalent. Offered alternate years. R. W. Kay and W. M. White.

**GEOL 462 Marine Ecological Processes**
- Spring. 3 credits. Limited to 75 students. Prerequisite: BIOES 261. Offered alternate years. C. Harrell, C. H. Greene.
- Lectures and discussion focus on current research in broad areas of marine ecology with an emphasis on processes unique to marine systems. A synthetic treatment of multiple levels or organization in marine systems including organismal, populational, community, ecosystems, and evolutionary biology. Examples are drawn from all types of marine habitats, including polar seas, temperate coastal waters, and tropical coral reefs.
GEOL 475 Special Topics in Oceanography
Spring, summer. 2-5 var. credits. Prerequisites: GEOL 104 or BIO ES 154, and permission of instructor. C. H. Greene. Undergraduate instruction and participation in advanced areas of oceanographic research. Topics will change from term to term. Contact instructor for further information.

GEOL 476 Sedimentary Basins: Tectonics and Mechanisms
Fall. 3 credits. Prerequisite: GEOL 375 or permission of instructor. T. E. Jordan. Subsidence of sedimentary basins from the point of view of plate tectonics and geomechanics. Interactions of subsidence, sediment supply, and environmental characteristics in development of stratigraphic sequences. Stratigraphic characteristics of active-margin, passive-margin, and cratonic basins. Geophysical and stratigraphic modeling and interpretation of stratigraphy. Modern and ancient examples.

GEOL 478 Advanced Stratigraphy
Fall. 3 credits. Prerequisite: GEOL 375 or permission of instructor. Offered alternate years. Not offered 1998-99. T. E. Jordan. Modern improvements on traditional methods of study of ages and of genetic relations among sedimentary rocks, emphasizing 3-D relationships. Techniques and applications of sequence stratigraphy at scales ranging from beds to entire basins. Physical correlation, dating techniques, and time resolution in sedimentary rocks. Physical controls on the stratigraphic record. Numerical modeling.

GEOL 479 Paleobiology (also BIOES 479)
Fall. 3 credits. Prerequisites: one year of introductory biology for majors and either BIOES 274, 373, GEOL 375, or permission of instructor. Offered alternate years. W. Allmon. A survey of the major groups of organisms and their evolutionary histories. Intended to fill out the biological backgrounds of geology students and the geological backgrounds of biology students concerning the nature and significance of the fossil record for their respective studies.

GEOL 481 Senior Survey of Earth Systems
Fall. 3 credits. Limited to seniors majoring in geological sciences. J. M. Bird. Survey course that integrates undergraduate course work, intended to enhance overall understanding of geological sciences. Emphasis on current models of earth's dynamic systems (e.g., global climate change; mantle evolution). Guest lecturers; synthesis and review literature; scientific literature readings; discussions; student presentations.

GEOL 491-492 Undergraduate Research
Fall, spring. 1-4 credits. Staff. (B. L. Jacks and R. W. Kay, coordinators) Introduction to the techniques and philosophy of research in the earth sciences and an opportunity for undergraduates to participate in current research projects. Topics chosen in consultation with, and guided by, a staff member. A short written report is required, and outstanding projects are prepared for publication.

GEOL 500 Design Project in Geohydrology
Fall, spring. 3-12 credits. An alternative to an industrial project for M.Eng. students choosing the geohydrology option. May continue over two or more semesters. L. M. Cathles. The project may address one of many aspects of groundwater flow and contamination, and must involve a significant geological component and lead to concrete recommendations or conclusions of an engineering nature. Results are presented orally and in a professional report.

GEOL 502 Case Histories in Groundwater Analysis
Spring. 4 credits. L. M. Cathles. Groundwater flow in a specific area, such as a proposed nuclear-waste disposal site, analyzed in depth. Geological and resource data on the area are presented early in the course. Then the material is analyzed by students working in teams or as individual analysis teams. Each student makes a weekly progress report and writes part of a final report. Results are presented in a half-day seminar at end of term.

GEOL 622 Advanced Structural Geology I
Spring. 3 credits. Prerequisites: GEOL 326 and permission of instructor. Offered alternate years. Not offered 1998-99. R. W. Allmendinger. Stress-strain theory and application. Advanced techniques of structural analysis. Topics include finite and incremental strain measurement; microstructure, preferred orientation, and TEM analysis; pressure solution and cleavage development, and experimental deformation. Applications to deformation of unconsolidated sediments, brittle and brittle-ductile deformation of supracrustal strata, and ductile deformation of high-grade metamorphic rocks. Kinematic analysis of shear zones and folds in these regimes.

GEOL 624 Advanced Structural Geology II
Spring. 3 credits. Prerequisites: GEOL 326 and permission of instructor. Offered alternate years. W. Allmendinger. Geometry, kinematics, and mechanics of structural provinces. Concentration on thrust belts, rift provinces, or strike-slip provinces. Techniques of balanced cross sections.

GEOL 628 Geology of Orogenic Belts
Spring. 3 credits. Prerequisite: permission of instructor. J. M. Bird. A seminar course in which students study specific geologic topics of an orogenic belt selected for study during the term. The course is intended to complement GEOL 681.

GEOL 634 Advanced Geophysics I: Fractals and Chaos in Geology and Geophysics
Spring. 3 credits. Prerequisite: GEOL 388 or permission of instructor. Offered alternate years. Not offered 1998-99. D. L. Turcotte. Definitions of fractal sets and statistical fractals, scale invariance, self-affine fractals, multifractals, applications to fragmentation, seismicity and tectonics, petroleum distribution and reserves, ore grade and tonnage, drainage networks and landscapes, and floods and droughts. Definitions of chaos and self-organized criticality, renormalization groups, diffusion limited aggregation and percolation clusters, wavelet transforms, applications to mantle convection, the earth's dynamo, and distributed seismology.

GEOL 636 Advanced Geophysics II: Quantitative Geodynamics
Spring. 3 credits. Prerequisite: GEOL 388 or permission of instructor. Offered alternate years. D. L. Turcotte. Stress and strain in the earth, elasticity and flexure, heat transfer, gravity, fluid mechanics, rock rheology, faulting, chemical geodynamics, flow in porous media.

GEOL 651 Analysis of Biogeochemical Systems
Spring. 3 credits. Prerequisite: MATH 293 or permission of instructor. Offered alternate years. Not offered 1998-99. L. A. Derry. Dynamics of biogeochemical systems. Kinetic treatment of biogeochemical cycles. Box models, residence time, response time. Analytical and numerical solutions of model systems. Eigen-analysis of linear systems. Feedback and nonlinear cases, problems of uncertainties in natural systems. Modeling software such as Stella II and Matlab; applications to current research of participants or from recent literature.

GEOL 656 Isotope Geochemistry
Spring. 3 credits. Open to undergraduates. Prerequisite: GEOL 455 or permission of instructor. Offered alternate years. Not offered 1998-99. W. M. White. Nucleosynthetic processes and the isotopic abundances of the elements. Geochronology and cosmochemistry using radioactive decay schemes, including U-Pb, Rb-Sr, Sm-Nd, K-Ar, U-series isotopes, and cosmogenic isotopes such as 14C and 3He. Use of radiogenic and stable isotopes in hydrology and their application to study of the evolution of the crust and mantle. Isotopic evidence regarding the formation of the Earth and the Solar System. Stable isotopes and their use in geothermometry, ore petrogenesis, paleontol­ogy, and the global climate system.

GEOL 681 Geotectonics
Fall. 3 credits. Prerequisite: permission of instructor. J. M. Bird. Theories of orogenesis, ocean and continent evolution. Kinematics of lithospheric plates. Rock-time assemblages of modern oceans and continental margins, and analogs in ancient orogenic belts. Time-space reconstructions of specific regions. Problems of dynamic mechanisms—corollaries and evidence from crustal features.

GEOL 695 Computer Methods in Geological Sciences
Fall, spring. 1-3 credits. L. Brown, B. L. Jacks. Independent research projects using state-of-the-art computational resources in the Department of Geological Sciences. Possibilities include: image and seismic processing, seismic and geometric modeling, GIS, use of interpretational workstations for 3D seismic and satellite imagery; modeling fluid flow through complex media.

GEOL 700-799 Seminars and Special Work
Fall, spring. 1-3 credits. Prerequisite: permission of instructor. Staff. Advanced work on original investigations in geological sciences. Topics change from term to term. Contact appropriate professor for more information.
The Department of German Studies offers students a wide variety of opportunities to explore the literature and culture of German-speaking countries, whether as part of their general education, a major in German Studies or a double major involving another discipline, preparation for graduate school or an international professional career. Courses are offered in English translation as well as in German; subjects range from medieval to contemporary literature and from film and visual culture to intellectual history, music, history of psychology, and women’s studies.

The department’s offerings in English begin with a series of Freshman Writing Seminars introducing various aspects of German literature (the fairy-tale and romantic narratives, twenty-first-century writers such as Kafka, Hesse, Mann, Brecht), issues in mass culture and modernity, problems of German national identity, and cinema and society. A variety of courses in English translation is also offered on the 300- and 400-level, exploring such topics as the Faust legend, aesthetics from Kant to Heidegger, Freud and his legacy, opera from Mozart to Strauss, the German novel, political theory and cinema, the Frankfurt School, and feminist theory. It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

Students wishing to begin German at Cornell enroll in GERLA 121-122 in the Department of Modern Languages. Those successfully completing this sequence, and those who place into the 200-level, may pursue further language study in that department or begin with the literature and cultural studies tracks in German Studies. The beginning sequence of 200-level courses in German Studies, with readings and discussion in German, is designed to provide further grounding in the language as well as to introduce German literature (GERST 202) and cultural studies (GERST 220). (Beginning in spring 1998, GERST 201 and GERLA 203 were replaced by GERST/GERLA 200.) More advanced courses introduce majors and other qualified students to a broad variety of literary and cultural topics in German-speaking countries.

### Advanced Standing

Students with an AP score of 4 or better are automatically granted three credits in German. Students with an AP score of 4 or better, an LPG score of 65 or higher, or a SAT II score of 680 or higher must take the CASE examination for placement in courses above GERST/GERLA 200. Students coming to Cornell with advanced standing in German and/or another subject are encouraged to consider a double major and to discuss the options with the director of undergraduate studies as early as possible.

### The Majors

The department offers two options for the major: German literature/culture and German area studies, the latter a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, to acquaint them with German culture, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines. For both majors, there is a wide variety of courses co-sponsored with other departments (Literature, Government, History, Music, Theatre, Film, and Dance; Women’s Studies).

The department encourages double majors and makes every effort to accommodate prospective majors with a late start in German. Students interested in a major should consult the director of undergraduate studies, Inta Ezergailis, 178 Goldwin Smith Hall.
from German Studies and at least one additional member.

Honors essay: During the first term of their senior year, students determine the focus of their honors essay through an appropriate course or in independent study under the direction of their advisors. During the second term they complete an honors essay, which will be evaluated by the committee.

Determination of honors: An oral examination concludes the process. Honors will be determined by the essay, the exam, and grades in the major.

Freshman Writing Seminar

The following courses may be used to satisfy the freshman writing seminar requirement:

GERST 109 From Fairy Tales to the Uncanny: Exploring the Romantic Consciousness
Fall or spring. 3 credits. B. Buettner, P. Gilgen, and staff.

GERST 111 Workshop in German Studies
Fall. 3 credits. H. Deinert.

GERST 130 Metropolis, Modernity, and Mass Culture: The Roaring Twenties, German-style
Fall or spring. 3 credits. B. Buettner, P. Gilgen, and staff.

GERST 150 Imagining Germany/s
Fall or spring. 3 credits. B. Buettner, P. Gilgen and staff.

GERST 151 Kafka, Hosse, Brecht, and Mann
Spring. 3 credits. H. Deinert.

GERST 175 Cinema and Society
Fall or spring. 3 credits. G. Waite and staff.

GERST 180 Towards the Nat.Citizen: Writing and New Communication Technologies
Fall and spring. 3 credits. B. Buettner and staff.

Courses Offered in German

GERST 200 Contemporary Germany (also GERLA 200)
Fall and spring. 3 credits. Prerequisite: qualification in German (LPG score of 56-64 or SAT II score of 580-670 or GERLA 122). Fulfills the Arts and Sciences language proficiency requirement and can be used in partial fulfillment of the Arts and Sciences humanities distribution requirement. Staff.

An intermediate language course designed to provide an introduction to modern German culture and literature while students develop language proficiency. Students examine issues that shape German society, literature, and thought as reflected in short stories, poems, socio-cultural and political texts, video, and audio materials. Selected themes include "Beyond the Wall: German Unification," "Germany: a Multi-cultural Society?", "Speaking and Identity," and "Musikszene." Oral and written work and individual and group presentations develop accurate and idiomatic expression. Successful completion of the course enables students to continue with more advanced courses in language, literature and culture. This course replaces GERST 201 and GERLA 203.

GERST 202 Exploring German Literature
Fall or spring. 3 credits. Prerequisite: GERST/GERLA 200, GERLA 203 or permission of instructor. Taught in German. Can be used in partial fulfillment of the humanities distribution requirement. B. Buettner and P. Gilgen.

In this intermediate course, we will read and discuss a number of works belonging to different literary genres by major German-speaking authors, such as Kafka, Walser, Brecht, Mann, Frisch, Dürenmatt, Bachmann, and others. We will explore questions of subjectivity and identity in modern society, of human existence as existence in language, and of the representation of history in literary texts. Activities and assignments in this course will focus on the development of reading competency in different literary genres, the use of accurate and idiomatic expressions, the expansion of students' German vocabulary, and the systematic review of select topics in German grammar.

GERST 220 Was ist deutsch?
Spring. 3 credits. Taught in German. Prerequisite: one German course at the 200 level. B. Buettner.

Questions of German identity have always raised difficult issues—both for Germans themselves and for others. These issues are again taken center stage as Germans redefine themselves in a reunited Germany. How has the concept of "Germanness" evolved? How do past perceptions of identity impinge on the present? Through selections from film, literature, art, and music we will explore this particularly German question.

GERST 301 Scenes of the Crime: Germany Mystery and Detective Fiction
Fall. 4 credits. Prerequisite: GERST 202, or 220, or GERLA 204, or equivalent. Taught in German. P. Gilgen.

An exploration of German crime, detective, and mystery writing in texts ranging from the eighteenth century to contemporary fiction. Authors to be studied may include: Kleist, E. T. A. Hoffmann, Kafka, Dürenmatt, Handke, Schatten, Susskind. This course aims at improving proficiency in aural and reading comprehension, as well as speaking and writing skills, with emphasis on vocabulary expansion, advanced grammar review, and stylistic development. Recommended for students interested in a combined introduction to literature and high-level language training. This course may be counted toward the requirement for 300-level language work in the major.

GERST 307 Modern Germany

GERST 315 From Dawn Song to Requiem: Introduction to German Poetry

GERST 342 The New Europe (also GOVT 342)

GERST 353 Kleist #

GERST 354 Schiller #
Spring. 4 credits. Prerequisite: GERST 202 or permission of instructor. Texts in German, seminar discourse in German and English. H. Deinert.

He grew up in poverty and remained poor most of his life. He wanted to study theology but his sovereign forced him into law, then military medicine. His first drama made him a household word overnight, and penniless fugitive. A poorly paid professor of history at Jena he succumbed to pneumonia and remained in precarious health for his remaining fifteen years. Yet when he died at forty-five he left a legacy of poetry and drama, of historical, aesthetic and political writings riddled in impact and lasting influence only by his contemporary Goethe. We will examine his major works against the background of revolutionary turmoil in Europe and the Americas.

GERST 357 Major Works of Goethe [1749-1832] #

GERST 365 Austrian Literature

Courses in English Translation

It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

GERST 320 Postwar German Novel

GERST 330 Political Theory and Cinema (also COM L 330, GOVT 370 and THETR 329)

GERST 374 Opera and Culture (also MUSIC 374 AND ITALL 374)

GERST 378 German Aesthetic Theory: From Kant to Hegel #

GERST 383 German Literature of the Twentieth Century

GERST 396 German Film (also COM L 396 and THETR 396)

GERST 398 The Poetic and the Political: A Look at Some German Women Writers
Fall. 4 credits. In English translation. There may be additional sessions to accommodate those who want to work on their spoken German. I. Ezergailis.

"If one does not read the most complex poetic text, one risks not knowing how to read the newspaper, but being read by it." (Helene Cixous) Is there such a thing as the "purely" poetic? What does it mean for poetry and poetic prose to touch on the political? What does it mean to a woman writer? We will examine some of these questions through a careful reading of texts by selected German women writers. The texts are mainly from the twentieth century, with a few earlier ones.
GERST 403 The Afro-Europeans (also S HUM 403)
For description, see S HUM 403.

GERST 408 Uncanny Communities (also S HUM 408)

GERST 409 Spinoza and Virtual Ideology
(also S HUM 409)
For description, see S HUM 409.

GERST 413 Women around Freud (also COM L 412 and WOMNS 413)

GERST 415 Marx, Freud, Nietzsche (also COM L 425 and GOVT 473)
Spring. 4 credits. G. Waite.

GERST 414 History into Fiction: Nazis and the Literary Imagination (also ENGL 404, COM L 404, and NES 404)

GERST 410 Senior Seminar
Fall. 4 credits. Taught in German. A. Schwarz.

GERST 410 Introduction to Medieval German Literature I

GERST 410 Introduction to Medieval German Literature II

GERST 412 German Literature from 1770 to 1848

GERST 417 Faust: Transformations of a Myth (also COM L 417)
Fall. 4 credits. Reading knowledge of German required. Taught in English. Several required screenings outside of class. H. Deinert.

GERST 418 Thomas Mann

GERST 428 Genius and Madness in German Literature (also COM L 409)
Spring. 4 credits. Taught in English. A. Schwarz.

Aristotle, Goethe, Kant, Hoffmann, Kleist, Foucault, Felman, Buchner, Nietzsche, Freud, Mann, Musil, Jelinek, Kafka.

Course in Latvian and Baltic Literature
GERST 377 Baltic Literature (also RUSSL 377)
Spring. 4 credits. In English translation. I. Ezergailis.
Estonia, Latvia, and Lithuania have created a rich literary tradition since the beginning of a written indigenous culture in the 19th century. We will read dramas from each of these literatures, selected for their quality, importance, and the availability of acceptable translations, representing, as much as possible, writers from the pre-Soviet independence period, those writing under Soviet rule, and émigrés.

Graduate and Advanced Undergraduate Courses
GERST 405 Introduction to Medieval German Literature I

GERST 406 Introduction to Medieval German Literature II

GERST 447 Reading Freud: Gender, Race, and Psychoanalysis (also COM L 447 and WOMNS 447)

GERST 451-452 Independent Study
451, fall: 452, spring. 1-4 credits each term. Prerequisite: permission of instructor.

GERST 472 Poetry of the 1980s (also COM L 472)

GERST 492 The Advance of Humanism: Aspects of the European Enlightenment

GERST 496 Theorizing the Public Sphere (also COM L 496 and HIST 496)

GERST 498 German Literature in Exile
Spring. 4 credits. Taught in German. I. Ezergailis.
The Nazi rise to power forced many Germans and Austrians—among them intellectuals, writers, and artists—into exile in the U.S., the Soviet Union, England, Mexico, and elsewhere. Writers found exile particularly hard, since in most cases they no longer had a readership and were separated from the language in which they wrote. The literary production of authors like Thomas Mann, Else Lasker-Schüler, Bertolt Brecht, Robert Musil, Anna Seghers, Alfred Döblin, and Nelly Sachs reflect both this historical context and the personal trauma of those years. We will read some of the texts of these writers while also thinking more generally about the condition of exile and its various effects.

GERST 600 Special Topics in Feminist Theory (also ANTHR 600 and COM L 600)

GERST 608 Modern/Postmodern (also COM L 608)

GERST 615 Jews in German Culture Since 1945 (also JWST 615)

GERST 621 Issues in Gay and Lesbian Studies (also WOMNS 621)
GERST 624 Seminar in Medieval German Literature II

GERST 626 Nuremberg
Fall. 4 credits. Prerequisite: permission of instructor. Anchor course for the 10th century. A. Groos.
An introduction to Nuremberg in the late fifteenth and sixteenth centuries, with emphasis on its significance as an early modern urban center. Topics include the city's development and social structure, pre- and post-Reformation attempts to fashion its image and history, public spectacle and imperial entries, literary and artistic humanism (Celtis and Dürer), social order and social conflict (Fastnachtspiel), anti-Semitism, constructions of gender and marginal figures. The last part of the course will deal with the reception of early modern Nuremberg from Goethe through the Romantics, including Wagner.

GERST 627 Baroque (also COM L 626)

GERST 629 The Enlightenment

GERST 630 Classicism and Idealism
Spring. 4 credits. Texts in German. Anchor course. P. U. Holzendorf.
An introduction to some of the major poetic and philosophical texts generally considered to be part of the period of German Classicism (1785-1805), while at the same time giving reasons to call into question notions of periodization of the canon, particularly as they have excluded women and lower social classes. In addition to the basic problem of the appropriation of classic antiquity at a time marked by the transition to bourgeois modernity, special consideration will be given to the emergence of modern aesthetic theory as well as its impact on literary production and reception. Specifically the seminar will focus on the problem of subject formation in the context of modernity as it is expressed in the concept of "Bildung." Special emphasis will be placed on the gendering of the concept. Readings will be taken from the works of Goethe, Herder, Humboldt, Kant, Moëtz, and Schiller among others. While the main focus of the seminar will be on primary texts, we will also consider contemporary criticism on the concept of Classicism and its problems.

GERST 634 German Romanticism

GERST 635 The Gates to Modernity: From Karlbad to the 1848 Revolution

GERST 637 19th-Century Fiction: The Realist Project
Spring. 4 credits. Anchor course. A. Schwarz.
Examination of programmatic concepts of Poetic Realism in literature and theory. Special focus on the relationship between aesthetic theory and literary production (Hegel, Vischer, Schopenhauer, Nietzsche). The course will discuss the tension between the "prosaic" and "poetic" by investigating the status of topics such as "love," "adventure," and domesticity; suburban and garden spaces; the aestheticization of "work" and the "reality" of industrialization. Further attention will be paid to artistic developments that anticipate literary periods such as Naturalism, Expressionism and the Avant-garde. Questions of rationalism, science, and generic issues will be discussed in comparison to European developments of Realism. The seminar will also focus on contemporary reevaluations of the Realist project: in relation to psychoanalysis, narrative theory, and current theories of memory, community, and spatial structures (architectonic or mnemonic). Authors include: Hegel, Vischer, Tieck, Keller, Dreiste-Hülshoff, Freytag, Fontane, Schmidl, Meyer, Raabe, Nietzsche, Freud.

GERST 647 German Literature from 1949 to 1989: Questions about Identity

GERST 650 Culture in the Weimar Period

GERST 652 Culture in Germany 1933-1945

GERST 653 Opera (also COM L 655 and MUSIC 678)

GERST 656 Aesthetic Theory: The End of Art (also COM L 656)
Spring. 4 credits. P. Gilgen.
The course investigates the emergence of aesthetics as its own discipline at the end of the eighteenth century. In a first phase, we will examine the rationalist articulation of aesthetics in Baumgarten's work and the empiricist theory of taste, particularly Burke's *A Philosophical Enquiry*. Drawing on the findings of two traditional Kantian critiques of judgment (1790) inaugurated a preoccupation in German philosophy around 1800 with the philosophical status of the beautiful and of art. Especially in Romantic theory and practice, art was meant to provide a solution to the philosophical dilemmas in the wake of Kant's critical philosophy. But already in Hegel's *Phenomenology of the Spirit*, and more explicitly in the *Encyclopaedia of the Sciences of Aesthetics*, art lost this elevated position via his philosophy. Taking this observation as a guiding thread, the main part of the course is structured around in-depth readings of Kant, Schiller, Schelling, Schlegel, Novalis, Hoffmann, and Hegel. Further readings will include writings by contemporary philosophers and theoreticians—such as Derrida, Lyotard, De Man, Adorno, and Danto—whose work on aesthetics takes its starting point from the philosophical issues surrounding the emergence of aesthetic theory only to transcend these historical confines and formulate contemporary positions on the status of the aesthetic. The following questions will be addressed: What are the conditions for the move from the subjective judgment of taste (Kant) to objective beauty (Romantics, Hegel)? How is the relation of art and nature redefined in the Romantic? What is the relation of aesthetic theory and the history of art? Is philosophy the end of art?

GERST 660 Visual Ideology (also COM L 660 and THETR 660)

GERST 661 After the City: From Metropolis to Electropolis (also ARCH 338/638 and COM L 661)

GERST 663 Nietzsche and Heidegger (also COM L 663)

GERST 664 Freud and the Fin de siècle

GERST 666 Ingeborg Bachmann

GERST 667 "Minor" German Literatures?

GERST 668 Literature and the Uncanny (also COM L 664)
Fall. 4 credits. A. Schwarz.
An analysis of the relationship between literature and the uncanny phenomena such as ghosts, doubles, and automatons. Discussion of varying figurations and effects of the "uncanny" on narrative and social structures in texts ranging from the late 18th to the early 20th century. Special focus on questions of spatiality, sociality, gender, trauma, and communities. Primary authors include: Freud, Heidegger, Benjamin, Hoffmann, Goethe, Tieck, Stifter, Hawthorne, Keller, Hoffmannsthai, Kafka, Rilke.

GERST 671 Postcolonial Theory and German Studies

GERST 672 Wagner (also Music 674)
Spring. 4 credits. A. Groos.
This seminar will focus on the operas and theoretical writings of Wagner in the period from Die Feen (1834) to Tristan und Isolde (1861), examining the composer's struggle to transcend contemporary genre expectations and establish himself in the forefront of German operatic practice. Although discussion will center around representatives from the apprentice opera (Die Feen, *Das Liebesverbot, Rienzi*) and first long-term successes (Der fliegende Holländer, Tannhäuser, Lohengrin), and especially Tristan, the scope of the sessions can be extended according to group interest to other contemporary opera composers (Wagner, Schumann, Spohr, Floetow, etc.).

GERST 674 Contemporary Poetry and Culture: 1968-1993 (also COM L 674, ENGL 697 and SPAN L 674)

GERST 675 After the Divide: German Critical Theory of the Seventies and Eighties (also COM L 675 and HIST 675)

GERST 679 Bertolt Brecht in Context (also COM L 679 and THETR 679)

GERST 685 Gramsci and Cultural Politics (also COM L 685 and GOVT 685)

GERST 686 Althusser and Lacan (also COM L 686, GOVT 685, and FRLIT 623)
Spring. 4 credits. Enrollment limited to twelve. G. Waite.
This graduate seminar takes up the old 'dialogue' or 'confrontation' between Marxism and psychoanalysis, as it continues in our 'post-linguistic' and 'post-communist' era, by studying selected works of Louis Althusser and Jacques Lacan. In general, the seminar has two obvious tasks: to compare and
contrast these two seminal but not equally influential, and perhaps not equally significant thinkers. In specific, we will study such topics as: the nature of their friendship (Lukács's influence on Althusser's published work as a 'one way street,' including the latter's unrequited attempt to elicit explicit response from the former); the role of Lacanian concepts in Althusser's private self-analysis; points of common interest (Spinoza, Kant, Hegel, Marx, Freud, and epistemology); the parallel between the 'return to Marx' and the 'return to Freud'; their modes of interpretation and argumentation; the relationship between 'philosophical psychoanalysis' and 'symptomatic reading,' the question whether 'ideology is (the) unconscious'; their critiques of Marxism, Stalinism, and capitalism; the concept of 'structure' and the nature of their influence.

**ARTS AND SCIENCES - 1998-1999**

**HIST 605 European Culture and**

**HIST 400 Seminar in Later 19th-Century**

**HIST 379 The First World War**

**HIST 363 European Cultural History**

**GOVT 332 Modern European Politics**

**GOVERNMENT**

Government is what Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on systematic, some on applications. Some engage in creative reading of great political philosophy, while others analyze the behavior of power-wielders and publics in this and other societies.

Government is divided into four subfields: U.S. politics, comparative politics (other nations), political theory (philosophy), and international relations (transactions between nations).

To accommodate new courses or course changes, a supplementary announcement is prepared by the department. Before enrolling in courses or registering each term, students are requested to consult the current supplement listing courses in government, available in 125 McGraw Hall.

**LING 645 Gothic**

Spring. W. Harbert.

**LANG 501 Teaching Second Languages**

Fall. J. Linolf.

**Linguistics**

**Modern Languages**

**GOVERNMENT**

To be admitted to the major, a student must pass two government courses. To complete the major, a student must (1) pass two of the introductory government courses (Government 111, 131, 161, 181); (2) pass an additional course in one of the remaining subfields (American government, comparative politics, political theory, or international relations). This course may be any course offered in the government department, including introductory courses, upper-level courses or seminars. Students are strongly advised to take at least one course in each of the four subfields; (3) accumulate an additional 28 credits of government course work at the 200-level or above; (4) complete at least one seminar-style course in government which may be applied toward the 28 credits. These courses include those numbered 400XX to which students are admitted by application only; (5) accumulate 12 credits in upper-level courses in related fields (such as anthropology, economics, history, psychology, and sociology). Upper-level courses are usually courses numbered at the 200-level. Students are strongly advised to consult with their major adviser to choose appropriate courses. All courses of related courses must be approved by the major adviser, or the director of undergraduate studies. (6) all courses used to fulfill a government major must be passed with a letter grade.

To summarize, a total of 10 government courses and 3 additional courses (12 credits) of upper-level related courses are required to complete the major.

**Cornell-in-Washington Program.** Government majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

**Study Abroad in Geneva.** French, history, and government majors, or other students with a commitment to international experience, may study abroad in Geneva, Switzerland. Geneva is an excellent and appropriate location for students with an interest in international affairs, as many international organizations maintain offices there, among them the United Nations, the Red Cross, the Headquarters of the World Health Organization, the International Labor Organization, the International Telecommunications Union, the World Intellectual Property Organization, the European Nuclear Research Center, and the Ecumenical Center at Grand-Saconnex. Cornell students enroll full-time in the University of Geneva and affiliated schools, including the Graduate School of International Studies (HEI) and the Development Studies Institute, where they take year-long courses, studying with Swiss and international students. They can choose classes in many subjects, including literature, economics and other social sciences, law, theology, psychology, education, architecture, physical education, and French language, civilization and history.

The University of Geneva offers four consecutive three-week language and civilization summer courses beginning in mid-July, which prepare students for the mandatory French exam given in early October. Cornell students must attend the last of these sessions, from mid-September to early October, but earlier sessions are recommended for students who need additional language preparation.

Interested students can participate in internships at international organizations, and qualified participants may be able to work under the direction of officials on research studies that are of mutual interest.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of French 204 or 213, or its equivalent in an advanced credit or placement by the Cornell C.A.S.E. examination. Students should plan to study abroad for the entire academic year. Students interested in the study abroad program in Geneva should contact the Cornell Abroad office (474 Uris) for further information.

**European Studies Concentration.** Government majors may elect to group some of their required and optional courses in the area of European studies, drawing from a wide variety of courses in relevant departments. Students are invited to consult Professors P. Katzenstein, J. Pontusson, and Tarrow for advice on course selection and foreign study programs.

**Model European Community Simulation.** Undergraduates with an interest in the European Union, public affairs or debating may participate in an annual European Union simulation held, on an alternating basis, in
April at SUNY Brockport or in January in Brussels. The simulation provides an opportunity for participants, representing politicians from the members states, to discuss issues and resolutions of current concern to the EU.

To prepare for the simulation, a two-credit course is offered by the Government department each year (Government 431 or Government 432). Participation in the simulation is open only to those who register for this course. Anyone interested in participating or finding out more information should contact the Institute for European Studies at 120 Uris Hall, 255-7592.

**International Relations Concentration.**
See the description under "Special Programs and Interdisciplinary Studies."

**Honors.** In their junior year, Government majors with a G.P.A. of 3.30 in all subjects may join the honors program, which involves a sequence of special courses in the junior and senior year. Application to the honors program will be made in the late spring of the sophomore year and application forms will be available in 125 McGraw Hall. The courses comprising the honors sequence (honors courses) are described below. Students may be admitted to the honors program in the junior or senior year only with the special permission of the Director of Undergraduate Studies.

**Introductory Courses**
Students registering for introductory courses should register for the lecture only. Sections will be assigned during the first week of class. Introductory courses are also offered during summer session.

**GOVT 111 Introduction to American Government and Politics**
Fall and summer. 3 credits. T. J. Lowi.
An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

**GOVT 131 Introduction to Comparative Government and Politics**
Fall and summer. 3 credits. V. Bunce.
This course provides a survey of the institutions, political processes, and policies of contemporary states. It focuses on the conditions for and workings of democracy. Looking at Western Europe, we will analyze institutional variations among liberal democracies, and their political implications. We will then probe the origins of democracy in Western societies and the reasons why communism and other forms of authoritarian rule have prevailed elsewhere. Finally, we will explore the impetus behind and the obstacles to democratization in the Third World and the erstwhile Communist Bloc. Throughout this survey, problems of democracy will be related to problems of economic development, efficiency, and equality.

**GOVT 161 Introduction to Political Philosophy #**
Spring. 3 credits. J. Kramnick.
A survey of the development of Western political thought from Plato to the present. Readings from the works of the major theorists. An examination of the relevance of their ideas to contemporary politics.

**GOVT 181 Introduction to International Relations**
Spring and summer. 3 credits. M. Evangelista.
An introduction to the basic concepts and practice of international politics.

**Freshman Writing Seminars**

**GOVT 100 Freshman Seminars**
Fall, spring, or summer. 3 credits.
Seminars will be offered in fall, spring, and summer terms. Consult the listings for the Freshman Seminar Program in the section "Special Programs and Interdisciplinary Studies;" the supplement issued by the department, and the Freshman Seminar booklet for course descriptions and instructors.

**Major Seminars**

**GOVT 400 Major Seminars**
Fall or spring. 4 credits.
These seminars, emphasizing important controversies in the discipline, cap the majors' experience. This preference in admission is given majors over nonmajors and seniors over juniors. Topics and instructors change each semester. To apply, students should pick up an application in 125 McGraw Hall during the course selection period the semester before the seminar is given.

The following courses are open to sophomores, juniors, and seniors without prerequisites unless otherwise indicated.

**American Government and Institutions**

*Government 111* is recommended.

**GOVT 121 Economic Growth and Democratic Legitimacy**

**GOVT 302 Social Movements in American Politics (also American Studies 302)**
Fall. 4 credits. Not offered 1998-99.

**GOVT 303 Introduction to American Political Parties**

**GOVT 305 Atomic Consequences: The Incorporation of Nuclear Weapons in Post-War America**
Spring. 4 credits. M. Dennis.
For description, see S&TS 350.

**GOVT 308 Science in the American Polity 1800-1980**

**GOVT 309 Science in the American Polity**
Spring. 4 credits. M. Dennis.
For description, see S&TS 391.

**GOVT 310 Power and Poverty in America**
Fall. 4 credits. E. W. Kelley.
Despite egalitarian democratic rights, the United States remains a stratified society conscious for great disparities in the allocation of income and wealth. The purpose of this class is to investigate these disparities, both empirically and normatively, and to assess the impact of government upon them. Topics for discussion will include: what do we mean by distributional inequality and by the demand for greater egalitarianism? What is the extent of inequality and of poverty in America today? How does one establish minimum standards for distributinal justice? Is the United States currently on the policy road toward achieving that minimum standard? What is the array of federal welfare programs presently available and what is their effect? What reforms or changes are currently on the political agenda? Can we imagine a society somewhat like that in the United States achieving a very different distribution of educational and occupational outcomes as described by race, income, class, and language spoken by parents?

**GOVT 311 Urban Politics**
Spring. 4 credits. M. Shefer.
The major political actors, institutions, and political styles in large American cities: mayors, city councils, bureaucracies, ethnic and racial minorities, urban machine politics and the municipal reform movement. The implications of these political forces for policies pertaining to urban poverty, homelessness, and criminal justice.

**GOVT 313 The Nature, Functions, and Limits of Law**
Fall. 4 credits. Undergraduates only.
A general education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of varied techniques for resolving conflicts and dealing with social problems. The roles of courts, legislatures, and administrative agencies in the legal process is analyzed, considering also the constitutional limits on their power and practical limits of their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process. Students are expected to read assigned materials before each class and to be prepared for participation in class discussion.

**GOVT 316 The American Presidency (also American Studies 316)**
Fall. 4 credits.
Analysis of the politics of the presidency and the executive branch with emphasis on executive-legislative relations, executive branch policymaking, and the problems of the modern presidency.

**GOVT 317 Campaigns and Elections**
Fall 4 credits.
This course examines campaigns and elections, focusing primarily on national elections in the United States. Topics include the relationship between elections and the economy, the weaknesses of a one political party system, voter turnout, individual voting decisions, negative campaigning, and the noncompetitiveness of congressional elections. We examine several theories that explain these phenomena, focusing in particular the theory of rational choice. Course requirements include one or two papers based on original analysis of election survey data.

**GOVT 318 The American Congress**

**GOVT 320 Public Opinion and Public Choice**
Spring. 4 credits. Prerequisite: Government 111 or permission of the instructor. W. Mebane.
A fundamental paradox in democracy is the fact that a government the people control will
only rarely be a government that does what the people want. This is not to say that government NOT by the people is better (it's usually worse). This course explores this paradox by discussing the answers given by the concept of public opinion and the formal theory of social choice. We encounter the paradox in several American political institutions, including elections, legislatures, and bureaucracy.

**GOVT 324 Legal Reasoning and Legal Adaptation: A Comparison of Amerindian and Talmudic Law**
Spring. 4 credits. J. Rabin.
Legislatures may change old laws to reflect new preferences, but much American law is still adapted to modern challenges by judges invoking old precedents and principles, particularly in fields like family law, the law of contracts, and the law of torts. Talmudic law, which rests on much older principles and precepts, and cannot fall back on new legislation to justify change in the modern world, must also be adapted to new circumstances. The rabbinic authorities who seek to apply this law often invoke similar kinds of reasoning as does, but under peculiar constraints. This course, an unusual venture in comparative law, will focus on characteristic modes of reasoning in each system, rather than attempting any systematic survey of differences. Readings will include selections from ancient texts as well as modern decisions and contemporary commentaries. No previous background is required.

**GOVT 327 Civil Liberties in the United States**

**GOVT 328 Constitutional Politics: The United States Supreme Court**

**GOVT 353 Feminism Movements and the State (also Women's Studies 353)**
Fall. 4 credits. M. Katzenstein.
This course focuses on women's activism and the American state. The subject emphasis and format (lecture, sections, tutorials) of this course changes each year and is announced on the first day of class. Active class discussion and extensive writing will be encouraged whatever the particular format of this coming year's class organization. Interested students should pre-register in order that we may estimate possible class number, but final admission to the class is contingent on application to be completed at the first meeting of the class.

**GOVT 401 Introduction to Science and Technology Policy (also S&T 431)**

**GOVT 402 Public Opinion and Mass Political Behavior**

**GOVT 405 Government and the Economy (also GOVT 705)**
Fall. 4 credits. E. W. Kelley.
What would Adam Smith and Karl Marx consider the causes of such problems as stagnation, unemployment, and the threat of protectionism, the growth of massive public and private sector bureaucracies, and excessive government regulation? What suggestions would they make about remedies? How can we evaluate both their suggestions, and their evidence? Is representative democracy itself part of the problem? Can Woodrow Wilson, Thomas Jefferson, or Grant McConnell help us understand the effects of legislative behavior on economic transactions? This course will use selected works of Smith, Marx, Durkheim, Wilson, and more recent authors like Mancur Olson, Bendix, and McConnell. Substantive focus will be on classical political economy; the development of the state; the rise of professions, guilds, and labor unions, regulation and the increased delegation of public authority to private groups. Methodological focus will be on the ways of evaluating both discursive and quantitative evidence for the factual and causal claims of the authors read.

**GOVT 406 Politics of Education (also GOVT 706)**
Spring. 4 credits. E. W. Kelley.
Education is simultaneously America's biggest business and the institutional process through which skills and values are passed on to the next generation. This course deals with conflicts about, and the politics of, education as they occur at national, state, and local levels. What (including values) will be taught and to whom; who will benefit from formal education, and who will be left out? The course will focus on the ways of evaluating both discursive and quantitative evidence for equal opportunity to obtain meaningful competencies and jobs.

**GOVT 407 Law, Science, and Public Values (also S&T 407)**

**GOVT 409 Racial Prejudice and Political Intolerance**

**GOVT 413/613 Finance, Federalism, and Politics**

**GOVT 427 The Politics of Environmental Protection in America**

**GOVT 428 Government and Public Policy: An Introduction to Analysis and Criticism**
Fall. 4 credits. T. J. Lowi.
Government 428 concentrates on history and criticism of U.S. policies and the politics associated with them. Particular attention given to the origins and character of the regulatory state and the welfare state.

**GOVT 429 Government and Public Policy: An Introduction to Analysis and Criticism**
Spring. Open to undergraduates. 428 and consent of instructor are required for 429. (T. J. Lowi).
Government 429 is an opportunity to pursue further the research begun in 428.

Comparative Government
Government 131 is recommended.

**GOVT 251 The Politics of Economic Life**
Fall. 4 credits. J. Kirshner.
Who gets what, and why? This course will address basic questions about how politics shapes the nature of our economic existence. Is capitalism fair? Does it matter if it is? Is inflation really a bad thing? How does discrimination survive in a market economy?

Is US economic policy dictated by events in the East Coast or in East Asia? Through a consideration of alternate approaches, analytical techniques, and practical problems, this course is designed to acquaint students with the means to evaluate the relatively simple but profoundly important forces that shape our daily lives.

**GOVT 252 Contemporary Palestinian Society (also NES 299)**

**GOVT 325 Eastern Europe**

**GOVT 332 Modern European Politics**
Spring. 4 credits. D. Schirmer.
The course gives an introduction to politics and political systems in Western Europe. It starts with a brief history of the formation of the nation state and the establishment of democratic rule. It continues with the modes and structures of political conflict and explores political culture, party systems, and electoral systems, the roles of interest groups and social movements, and the mass media. It then turns to a discussion of parliament and government. The main countries studied include Britain, France, Germany, and Italy. This course will examine the political dimensions guiding the comparison will be conflict vs. consent, federalism vs. centralism, parliamentary vs. presidential systems, and majority vs. proportional representation. The course will conclude with a discussion of minority-majority relations and the problem of democratic inclusion.

**GOVT 333 Government and Politics of the Former Soviet Union**
Spring. 4 credits. V. Bunce.
This course will present an overview of the transition from authoritarianism in post-Soviet Russia, with particular emphasis on distinguishing transitions from left-wing authoritarianism in Latin America, Southern Europe, and Asia. The course will cover: (a) the origins and role of perestroika and communist reformism in the post-Stalin era; (b) the systemic and individual factors which led to the crisis in the Communist Party and the collapse of the Soviet Union; (c) the institutional, ideological, and individual context of Russian politics in the post-coup era; (d) the problems of the development of a "civil society" in the post-communist context, with particular emphasis on the development of a multi-party system, finding new sources of social solidarity in a system still psychologically dependent on Leninist ideology, market reform in a collapsing command economy, and the particular problems of resurgent nationalism and state-building in the post-communist context.

**GOVT 334 Political Economy of East Asia**
This lecture course examines East Asian political economy in historical and comparative perspective. Central questions include: Why have Japan, South Korea, and Taiwan developed so rapidly in the postwar era? Can we identify an East Asian mode of development? What does the region's growth mean for other countries and for the international economy? Are Southeast Asian countries following a similar trajectory today? Particular topics include Japanese colonialism, industrial policy and its critics, domestic political consequences of rapid growth, political
corruption, US-Japan economic conflict, and recent attempts at political-economic liberalization.)

[GOVT 335 America in the World 4 credits. Not offered 1998-99.]

[GOVT 336 Postcommunist Transitions Fall. 4 credits. B. Greskovits. This course will compare economic and political developments since the collapse of communism in Eastern Europe and the former Soviet Union. Primary emphasis will be placed on the relationship between democratization and the transition to capitalism, with some mention paid as well to nationalism and for the new states in the region) state-building. Cases examined in greatest detail will vary by year, but will always be multiple such as to encourage comparative observations and generalizations.

[GOVT 340 Latin American Politics Spring. 4 credits. H. Schams. This is the introductory course to the politics of Latin America. The main purpose is to view the region in a conceptual and comparative perspective. Country cases will be introduced in order to understand the fundamental historical processes as well as to explain the significance of competing theoretical frameworks that have shaped the debate in the field. The course will focus on the political economies of the region in order to analyze the role of groups and classes under different political regimes and contrasting strategies of development.

[GOVT 341 Modern European Society and Politics (also SOC 341) Fall. 4 credits. S. Tarrow. Since the French and industrial revolutions, modern Europe has served as the major source of innovation and stability, freedom and imperialism, war and peacemaking, capitalism and socialism, the rule of law and state terror, modernity and its critics. Even the 50-year long division of Europe by the Cold War could not destroy the continent’s common, but contradictory heritage. This interdisciplinary core course in Modern European Studies will serve as an introduction to European society and politics. Topics include European identity and nationalism, cycles of revolution and reaction, stratification and mobility, law and violence, and war and peaceful alliances. The course will end with a historical introduction to the European Union. (May be taken separately, or in sequence with Government 342; The New Europe, which focuses on the EU.) Should the amount of qualified student demand permit it, a section will be organized in French.

[GOVT 342 United Germany in the New Europe Spring 4 credits. P. Katzenstein. German unification in 1990 and the accelerating movement toward European integration have created new political conditions for our understanding of German and European politics. The end of the Cold War has brought forth old fears about the domination of Europe by an unpredictable German giant. Alternatively, these changes have also fueled new hopes for Germany and Europe as models of political pluralism in a more peaceful and prosperous world. This course will thus reflect on two kinds of politics: the specter of the “Germanization” of Europe and the vision of the “Europeanization” of Germany.

[GOVT 343-345 State, Society, and Language in Ancient Egypt (also NES 368/369) 4 credits each term. M. Bernal. This course is concerned with state and society in Pharaonic Egypt 3400-300 BCE. This will be combined with an introduction to Middle Egyptian, the official language of the Middle Kingdom 2000-1750 BCE and accepted as the “classical” language thereafter. This is a two semester sequence course. In the fall semester (Govt 343) we shall study the Egyptian state and society through secondary materials; in the spring (Govt 345) we shall be reading primary sources concerned with everyday life, official reports and adventures abroad. Students registering for Govt 345 must have completed Govt 343.)

[GOVT 344 Government and Politics of Southeast Asia 4 credits. Not offered 1998-99.]

[GOVT 349 Political Role of the Military 4 credits. Not offered 1998-99.]

[GOVT 350 Comparative Revolutions 4 credits. Not offered 1998-99.]

[GOVT 356 Enlarging the New Europe: Labor, Business, and Politics (also ILRIC 337) Fall. 3 credits. E. Iankova. This advanced undergraduate seminar will examine the role of labor and business in the processes of European integration, with a special emphasis on processes of enlargement. We will examine the political involvement of labor and business in the four major waves of the European integration: 1975, Britain, Denmark and Ireland; 1980s—Greece, Spain and Portugal; 1995—Austria, Finland and Sweden; and the accession negotiations with Estonia, Poland, Hungary, the Czech Republic, Slovenia and Cyprus, scheduled to begin in spring 1998. The seminar will explore how the European Union’s enlargement is shaping social partnership at the Euro-level and domestically, among governments, employer associations and labor unions, that contribute importantly to the formulation of industrial and social policy in the European Union, the European Union’s member countries, and in the formerly communist countries of central and eastern Europe.

[GOVT 358 Modern History of the Middle East: Changing Politics, Society, and Ideas Fall. 4 credits. J. Rosenberg. For description, see NES 390.

[GOVT 415 Race, Gender, and Organization Spring. 4 credits. M. Katzenstein and J. Repetto. Taking the military as our “case,” we will explore how organizations confront diversity and how “diversity” influences the way organizations function. We will consider competing accounts of the history of race desegregation comparing these theories with the course of gender integration and with the issue of gays and lesbians in the military. How does difference affect cohesion? In which ways are norms of masculinity integral to the tasks the military performs? The theoretical readings for the course will draw on the rich literature on military and civil society as well as on organizational culture including the newer critiques of organizational theory. Students who wish to write a research paper on comparative cases outside the U. S. or on organizations other than the military will be encouraged to do so. Readings include works by Janowitz, Moskos, Nalty, Enloe, Schein, and the Segals, among others.

[GOVT 431 Model European Union Spring. 2 credits. J. Pontusson. This two-credit course is designed to prepare students to participate in the annual Model European Union Simulation held, on an alternating basis, at SUNY Brockport and in Brussels. The simulation provides an opportunity for participants, representing politicians from the member states of the European Union, to discuss issues and resolutions of current concern to the EU. The preparatory course introduces students to the EU, the country that the Cornell team will represent, and the issues to be discussed at the simulation. A substantial part of travel costs for the Cornell team will be paid by the Institute for European Studies, and course enrollment will be restricted by budgetary considerations. Students enrolled in this course are required to write a research paper.

[GOVT 432 The Politics of Economic Liberalization in the Developing World Fall. 4 credits. H. Schams. What drives the current processes of economic liberalization taking place in most of the developing world? What kinds of constraints and opportunities do governments embarked upon such policy reform face? What types of factors account for their success or failure? What is the relationship between the international dimension of this phenomenon and the domestic political conditions? This seminar addresses these questions by examining the interplay of domestic and international ideas, local and foreign actors, and national and transnational institutions which take part in these processes. The course focuses extensively on, but is not limited to, Latin America.

[GOVT 433 Politics and Society in Modern Italy 4 credits. Not offered 1998-99.]

The course focus is how Japan shapes and is shaped by the international environment, with particular emphasis on the post-cold war era. Our approach will be both thematic and institutional. Topics to be discussed include US-Japan trade friction, Japan's investment and ODA in Southeast Asia, and cultural politics and notions of a New Asian Identity.

[GOVT 440 The Political Economy of Market Reform (also GOVT 630)] Spring. 4 credits. H. Schamis and B. Greskovits.

This seminar is open to advanced undergraduate and graduate students. It addresses the political economy of market reform in East-Central Europe and Latin America. Specifically, we will study the relatively fast collapse of state socialism versus the long decline of import-substituting industrialization, and their respective legacies upon new economic and political systems. We will focus on the role of major agents in the transformation process—the international system, coalitions of interest groups, political (especially state) institutions, and ideologies. Throughout the semester, we will examine the emerging market societies in the east and the south in comparative fashion.

[GOVT 445 Stalinism as Civilization] Fall. 4 credits. P. Holquist. See History 478 for description.

Intended for students with some background in comparative politics, this seminar explores differences among advanced industrial countries with respect to social welfare and the distribution of income and opportunity. Why is the welfare state so much more generous in some countries than in others, and what are the implications of these differences? Is there a trade-off between social equality and economic competitiveness? How does globalization affect the ability of national governments to provide for social welfare? The discussion will focus on the US and Western Europe.

[GOVT 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also Comparative Literature 454, History 454)] 4 credits. Not offered 1998-99.

**Political Theory**

Government 161 is recommended.

**GOVT 260 Social and Political Philosophy (also Philosophy 260)** Fall. 4 credits. F. Neuhaus. See Philosophy 242 for description.

**GOVT 366 American Political Thought from Madison to Malcolm X (also History and American Studies 366)** Fall. 4 credits. I. Kramnick.

A survey of American political thought from the eighteenth century to the present. Particular attention will be devoted to the persistence of liberal individualism in the American tradition. Politicians, pamphleteers and poets will provide the reading. The professor offers insightful historical and social context.

**GOVT 368 Global Climate and Global Justice (also Philosophy 368)** 4 credits. Not offered 1998-99.

**[GOVT 369 Introduction to Feminist Political Thought (also Women's Studies 269)]** 4 credits. Not offered 1998-99.

**[GOVT 375 Visual Culture and Social Theory (also ART H 370 and Comp. Lit. 368)]** 4 credits. Not offered 1998-99.

**GOVT 377 Concepts of Race and Racism** Spring. 4 credits. A. M. Smith.

This course examines race and racism from a political theory perspective. We will discuss the different types of racism: traditional racism, "new racism," or cultural racism, scientific racism and contemporary hybrid racism. We will then examine the politically ambiguous "ethnicity theory." In the second half of the course, we will consider the works by Marable on African American political economy, women of color feminist theorists; native American theorists; Takaki on Asian American labor history; and Hero on Latinos/Latinas and American politics. Although we will discuss American multicultural history in some detail, our primary focus will be on an investigation of these works' theoretical foundations.

**GOVT 461 Interpreting Race and Racism** Fall. 4 credits. A. M. Smith.

This seminar is an advanced undergraduate course based on classic and contemporary social and political theory texts. We will explore the historically specific and antagonistic construction of race, and we will focus on the complex and contradictory ways in which racializing formations are defined in terms of class, gender and sexuality. Our reading list will include Frantz Fanon, Stuart Hall, Hortense Spillers, Edward Said, Aijaz Ahmad, Coco Fusco, Homi Bhabha, James Baldwin, Robin Kelley, Chandra Talpade Mohanty, Audre Lorde, Toni Morrison, David Roediger and Vron Ware. Seminar participants should have already completed GOVT 161 or equivalent courses in other departments before the course begins. Class size will be limited.

**GOVT 462 Modern Political Philosophy** Fall. 4 credits. R. Miller.

For description, see PHIL 346.

**GOVT 469 Limiting War (also Phil 369)** Spring. 4 credits. H. Shue.

An examination of the ethical issues underlying choices about national and international security, concentrating on decisions about possession and use of specific types of weapons: weapons of mass destruction (nuclear, chemical, and biological), precision-guided munitions, and landmines. Should nuclear weapons be used to deter chemical and biological weapons, or does non-proliferation of the latter require abolition of the former? Can the distinction between combatants and non-combatants be maintained in an era of high-tech warfare? What, if anything, is special about landmines?

**GOVT 473 Marx, Nietzsche, Freud (also German Studies 415)** Spring. 4 credits. G. Waite.

For description, see German Studies 415.

**GOVT 474 Community, Nation, and Morality** Spring. 4 credits. R. Miller.

For description, see PHIL 446.

**International Relations**

Government 181 is recommended.

**GOVT 294 Global Thinking (also Philosophy 294)** Spring. 4 credits. No prerequisites; intended for freshmen and sophomores. Fulfills geographical distribution requirement. H. Shue.

The analysis taught in this course is global in two different respects: international subjects and interdisciplinary methods. We look in detail at questions raised by one of the most important and most difficult issues facing international society: what, if ever, should other nations unilaterally or multilaterally intervene militarily into ethnic conflicts like those in Bosnia and Rwanda in this decade? Both of these recent cases, one in Europe and one in Africa, raise fundamental questions about the kind of world we are constructing for the 21st century. To what extent is the system of nation-states we now have either desirable or unavoidable? Does every ethnic group have a right to a self-determining and sovereign state? When is the use of military force morally justified? Should trials for war crimes or crimes against humanity be routinely held after military conflicts? These
and other ethical questions need to be answered in light of the best available knowledge about the political dynamics of foreign interventions and the changing international legal regime, bringing together political science and ethics. The course is team-taught by leading faculty researchers from the three fields listed.

**GOVT 380 The Politics of Modern Germany**

Fall. 4 credits. D. Schirmer.

"Learning from History" in the sense of "learning from politics" is one of the basic modes of political modernization. Thus, structures and functioning of German postwar politics are inseparably tied to interpreting the causes of the political instability of the Weimar Republic and the rise of Nazism. Therefore, the course will employ the interpretation of history as a general framework for the introduction into German politics. Topics will include the constitutional concept of the Grundrecht (basic law), the political culture, the electoral and party systems, parliament and government, interest groups and Germany's liberal corporatism, and the federal system. We will also try to evaluate to which degree German politics have been transformed by the process of unification.

**[GOVT 382 International Relations of East Asia](#) 4 credits. Not offered 1998-99.**

**[GOVT 383 Theories of International Relations](#) 4 credits. Not offered 1998-99.**

**GOVT 385 American Foreign Policy**

Spring. 4 credits. R. McDermott.

This course will provide an overview of the history of American foreign policy, concentrating on the period between 1914 and the present. Various theoretical approaches to the study of American foreign policy will be covered, including international, domestic and individual levels of analysis. These interpretations will be used to examine events including: the First World War and the League of Nations; the rise of American hegemony; various crises of the Cold War, including the U-2 crisis, the Suez and Berlin crises, and the Cuban missile crisis; and the Korean, Vietnamese and Gulf Wars. Emphasis will be placed on security as opposed to economic foreign policy issues.

**GOVT 386 The Causes of War**

Spring. 4 credits. C. Way.

Review of the theoretical literature on the causes of war and sources of peace. Application of theories to case studies of specific wars and consideration of different proposals for preventing war. Topics include contrasting explanations for the origins of World War I and II; the democratic peace; and the prospects for military conflict in the post-Cold War era.

**GOVT 387 Political Psychology in International Relations**

Fall. 4 credits. R. McDermott.

This course provides a survey of how social and cognitive psychology are used in the study of international relations. This course will cover various methodologies, including psychobiography and experimental and survey research. It will also cover several theoretical approaches, including recent work in neuroscience and evolutionary psychology. These theories and methods will be applied to topics including risk taking, leadership, group dynamics, and the influence strategies of the media. Particular attention will be placed on the interaction of emotion, cognition and behavior in processes of judgment and decision making.

**[GOVT 388 International Political Economy](#) 4 credits. Not offered 1998-99.**

**GOVT 389 International Law**

Fall. 4 credits. J. Rabin.

Is international law a pious delusion, helpless in the face of real power? Or is public policy becoming so entangled in international standards that international law is now eroding national sovereignty? This course will survey the theoretical foundations and general history of international law since the 17th century to highlight what is new in the doctrines and institutions by which it operates in the contemporary world. The course will give special attention to the relation between international and U.S. law and to the workings of international law in particular fields—including environmental and human rights protection, trade regulation and control of terrorism.

**[GOVT 391 Chinese Foreign Policy](#) 4 credits. Not offered 1998-99.**

**[GOVT 392 International Relations of the Middle East (also NES 395)](#) 4 credits. Not offered 1998-99.**

**[GOVT 393 Introduction to Peace Studies (also SOC 393)](#) 4 credits. Not offered 1998-99.**

**[GOVT 394 Comparative Foreign Policy](#) 4 credits. Not offered 1998-99.**

**[GOVT 395 Palestinian Nationalism (also NES 398)](#) 4 credits. Not offered 1998-99.**

**[GOVT 475 The Politics of International Monetary and Financial Relations](#) 4 credits. Not offered 1998-99.**

**[GOVT 477 Rational Choice Approaches to International Relations](#) 4 credits. Not offered 1998-99.**

**[GOVT 482 International Relations of East Asia](#) 4 credits. Not offered 1998-99.**

**[GOVT 483 The Military and New Technology (also S A T S 483)](#) Fall. 4 credits. J. Reppy.**

In conventional wisdom, military organizations are seen paradoxically both as inflexible institutions and as proponents and consumers of rapid technological change. In this seminar we will examine changes over time in the attitude of the military toward new technology and analyze competing explanations for these changes. Readings will include Michael Howard, *War and European History*, John Ellis, *The Social History of the Machine Gun*, and Donald MacKenzie, *Inventing Accuracy: An Historical Sociology of Nuclear Missile Guidance.*

**[GOVT 489 International Law and Regime Development](#) 4 credits. Not offered 1998-99.**

**[GOVT 491 Conflict, Cooperation, and Norm: Ethical Issues in International Affairs](#) 4 credits. Not offered 1998-99.**

**Honors Courses**

Late each spring a limited number of sophomore majors are admitted to the honors program, their work to begin the following fall. Application forms and a full description of the program may be obtained in 125 McGraw Hall.

**GOVT 493 Studying Politics: The Junior Honors Seminar**

Fall and spring. 3 credits. F. G. S. Spring. 2 credits. F. S. Tarrow. S. Tarrow. R. Bensel.

The seminar will meet twice weekly under the supervision of a senior faculty member with numerous classes being led by other members of the department faculty. The seminar will survey the broad range of what we mean by "the study of politics" and the various methods we enlist to carry out the study. The seminar will be writing intensive, requiring probably at least five papers.

**GOVT 494 Honors Seminar: Thesis Clarification and Research**

Fall. 4 credits. E. Sanders.

Each student works individually with a faculty member. The student initiates the tutorial by interesting a faculty member in his or her likely thesis project and by submitting to the director of undergraduate studies a form outlining the general area the thesis will treat and bearing the faculty tutor's signature. This form is due the third week of class. The tutorial culminates in a ten-to-fifteen-page paper setting forth the central questions to be addressed by the thesis, the state of existing knowledge regarding those questions, and why they matter.

**GOVT 495 Honors Thesis: Research and Writing**

Spring. 4 credits. Limited to students who have successfully completed Government 494. Students continue the work of the preceding semester typically with the same faculty tutor. Research on the thesis is completed and writing begun. The tutorial culminates in a thesis of some sixty to eighty pages. The grade for the tutorial is determined by the faculty tutor, while the degree of honors (if any) awarded the thesis is decided by a committee of faculty members established for that purpose.

**Independent Study**

Independent study, Government 499, is a one-on-one tutorial which is arranged by the student with a faculty member of his or her choosing. Government 499 is open to government majors doing superior work, and it is the responsibility of the student to establish the research proposal and to find a faculty tutor. Applicants for independent study must present a well-defined program of study that cannot be satisfied by pursuing courses in the regularly scheduled curriculum. No more than 4 credits of independent study may count toward fulfillment of the major. Students who elect to continue taking this course for more than one semester must select a new theme or subject each semester. Credit can be given only for work that results in a satisfactory amount of writing. Emphasis is on the capacity to subject a body of related readings to analysis and criticism. Keep in mind that independent study cannot be used to fulfill the seminar requirement. The
application form for Independent Study is available in 125 McGraw Hall and must be completed at the beginning of the semester in which the course is being taken.

GOVT 499 Readings Fall or spring.
Fall or spring. 1-4 credits.

Graduate Seminars

Qualified undergraduates are encouraged to apply for seminars listed with 600 course numbers but may only register with the permission of the instructor. Students may consult the supplement that lists graduate courses, available in the department office.

Field Seminars

GOVT 603 Field Seminar in American Politics
Spring. 4 credits. M. Shefter and J. Rabkin.
The basic issues and institutions of American government and the various subfields of American politics are introduced. The focus is on substantive information and theoretical analysis and problems of teaching and research.

GOVT 606 Field Seminar in International Relations
Spring. 4 credits. P. Katzstein and R. McDermott.
A general survey of the literature and propositions of the international relations field. Criteria are developed for judging theoretical propositions and are applied to the major findings. Participants will be expected to do extensive reading in the literature as well as research.

GOVT 607 The Western Political Tradition: A Survey
Fall. 4 credits. B. Jacobs.
An introduction to political theory through a reading of selected classics in political thought from Plato to Marx.

Methodology

GOVT 601 Scope & Methods of Political Analysis
Fall. 4 credits. W. Mebane.
This course introduces the major analytical approaches used in contemporary political science research. We touch on broad philosophical issues concerning the nature of theory and inference, the practices of cultural and historical interpretation, and the relevance of moral values and political commitments. Several kinds of research designs, including comparative case study and quasi-experimentation, are briefly examined. The basic analytical ideas involved in statistical methods such as sampling and regression analysis are introduced, as are the basic concepts of the theory of collective choice and the elementary methods of applied game theory.

GOVT 602 Field Seminar in Political Methodology
Spring. 4 credits. J. Cowden.
This course provides an introduction to some of the quantitative methods used in the social sciences. Topics we shall discuss include: elementary probability theory, random variables, functions of random variables, and sampling distributions, concepts of inference, including point estimation, confidence intervals, and hypothesis testing; bivariate regression, and multiple regression.

GOVT 605 Comparative Methods
Spring. 4 credits. J. Pontusson.
This seminar provides a survey of different methodological approaches to the study of comparative politics: single case studies, comparative case studies based on Millian logic, qualitative comparative analysis, and a variety of quantitative methods. Substantive works will be used to illustrate each approach. Throughout, the discussion will emphasize methodological issues that are common to all forms of comparative inquiry.

GOVT 608 Normative and Interpretive Methodologies
Spring. 4 credits. A. M. Smith and staff.
This course will present various normative and interpretive methodological approaches to issues in political science. Though the specific focus of the course will vary depending on the interests of the instructor, the general orientation of the seminar will be to expose students to the role of heuristic techniques and qualitative criticism in political analysis. This course will fulfill departmental requirements for the second methodology course.

GOVT 610 Formal Theory and Modelling

GOVT 611 The Political Economy of American Development, 1860-1900

GOVT 612 American Political Development II: Social Movements and State Expansion in the Twentieth Century

GOVT 613/413 Finance, Federalism, and Politics

GOVT 615 State and Economy in Comparative Perspective

GOVT 616 Politics, Markets, and the Middle Classes

GOVT 620 The United States Congress
Spring. 4 credits. R. Bensel and W. Mebane.
The United States Congress will be examined: first, as a "closed system" in which institutional arrangements decisively apportion political power; and, second, as the product of electoral and social forces outside the institution. Emphasis will be placed on the historical relationship between institutional growth and state formation, parliamentary rules as both arrangements within which the "rational choices" of legislators are played out and as deliberate, constructions and allocations of political influence, and the use of legislative behavior as evidence in the analysis of fundamental principles of politics. Because the literature on the lower chamber is generally more rich, the House of Representatives will receive greater attention than the Senate.

GOVT 623 The Politics of Courts

GOVT 628 Bureaucracy and Law
Fall. 4 credits. J. Rabkin.
Traditionally, American have feared "bureaucracy" as the enemy of "law," while Europeans have respected orderly administration as the best guarantee of legality. Yet today even Americans tend to scorn "lawyers" and admire "managers" and the federal court system boasts of its improvements in case-flow and system "management." Is this growing up or just getting more confused? This course offers an overview of classic political theories that still frame debates about bureaucracy and law. It will also survey relevant U.S. legal doctrines and practices in comparative perspective. It will conclude with some speculation on why U.S. practices in this area are being copied in other countries—while generating continuing dispute in the U.S.

GOVT 629 Cleavages and Coalitions in Contemporary American Politics

GOVT 703 Political Economy
Fall. 4 credits. R. Bensel and J. Kirshner.
This course will undertake a general survey of the classical and modern theories of political economy. The works of Smith, List, Marx, Weber, Keynes, Shumpeter, Hayek, and Friedman, among others, will be studied and placed within the context of the history and evolution of the thought, practice, and method of the field.

GOVT 705/405 Government and the Economy
Fall. 4 credits. E. W. Kelley.
See GOVT 405 for description.

GOVT 706 The Politics of Education
Spring. 4 credits. E. W. Kelley.
See Govt 406 for description.

Comparative Government

GOVT 630 The Political Economy of Market Reform
Spring. 4 credits. H. Schamis and B. Greskovits.
This seminar is open to advanced undergraduate and graduate students. It addresses the political economy of market reform in East-Central Europe and Latin America. Specifically, we will study the relatively fast collapse of state socialism versus the long decline of import-substituting industrialization, and their respective legacies upon new economic and political systems. We will focus on the role of major agents in the transformation process—the international system, coalitions of interest groups, political (especially state) institutions, and ideologies. Throughout the semester, we will examine the emerging market societies in the East and the South in comparative fashion.

GOVT 632 Politics and Society in Western Europe
Spring. 4 credits. D. Schimmer.
The cause for the return of civil society in Western European political discourse is twofold. First, it is a consequence of the almost utopian character this once sober concept acquired when it was adopted by the Eastern European civic movements in the final days of the state socialist regimes. Second, it responds to the crisis of the European welfare state. Both account for a renewal of a republicanism that draws philosophically on Hannah Arendt’s idea of the constitution of freedom and historically on the French and American revolutions as examples of the self-constituting power of collective action, thus putting the civil society at the center of a theory of democracy. The course will evaluate current civil society discourses in Western Europe with respect to underlying concepts of republicanism and democracy. It will use American and Eastern European civic society discourses as a backdrop and, thus, reconstruct the modifications the concept underwent while traveling back and forth between Western Europe, the United States, and Eastern Europe.

**GOVT 653 European Party Systems and Political Change**

**GOVT 634 Genetic Engineering: Politics and Society in Comparative Perspective**
Spring. 4 credits. S. Hilgartner. See NAS 645 for description.

**GOVT 638 Latin American Political Economy**

**GOVT 639 Studying Political Culture**

**GOVT 642 Comparative Political Economy: East and Southeast Asia**

**GOVT 645 Chinese Politics**

**GOVT 648 Political Economy of Change: Rural Development in the Third World**

**GOVT 652 Southeast Asia Seminar: The Philippines (also Asian Studies 601)**
Fall. 4 credits. B. Anderson. The reading seminar will focus on the major scholarly works dealing with the modern social history, politics, cultures, and economic problems of the twice-colonized Philippines. The framework will be provided by theories of colonialism, nationalism, and decolonization, and by comparisons with other parts of Southeast Asia and Latin America.

**GOVT 653 The Plural Society Revisited (also Asian Studies 602 and 607)**

**GOVT 655 Gender, Politics and Welfare Policies in Europe and the U.S. (also GOVT 442)**

**GOVT 656 Comparative Political Economy**
Fall. 4 credits. J. Pontusson and C. Way. While exploring selected topics in the comparative political economy of advanced industrial societies, this seminar seeks to delineate “political economy” as a subfield of political science. At the level of theory, our goal is to bridge two research traditions, one concerned with micro-economic issues (industrial organization, industrial policy, competitiveness) and the other concerned with macro-economic issues (wage bargaining, fiscal and monetary policy), and to explore what a synthesis of these research traditions might look like. At the level of methodology, we seek to bridge and integrate qualitative and quantitative approaches to comparative political economy. Students are expected to have some prior exposure to quantitative analysis (e.g., Government 601).

**GOVT 657 Comparative Democratization**

**GOVT 660 Social Movements and Contentious Politics (also SOC 660)**
Spring. 4 credits. S. Tarrow. This is a research seminar on the relationships among politics, organized social movements, and periods of mass mobilization like those that swept through Western Europe and the U.S. in the 1960s and in Eastern and Central Europe today. The course begins with a theoretical introduction to major approaches to social movements and collective action, concentrating on the factors that induce masses of people to adopt disruptive forms of collective action. It moves from there to a historical section focusing on cycles of protest in the recent and not-so-recent past. It continues with case materials that illustrate a series of theoretical problems in the study of movements and collective action—particularly that of the relationship between protest and reform. Students will write term papers on particular cycles of protest and reform.

**GOVT 692 The Administration of Agricultural and Rural Development**
Spring. 4 credits. N. Uphoff. For description, see INTAG 603.

**Political Theory**

**GOVT 683 Political Theories of Power**

**GOVT 684 Contemporary Democratic Theory**

**GOVT 665 American Political Thought: From Madison to Malcolm X**
Fall. 4 credits. I. Kramer. This seminar will trace developments and tendencies in American political thought from the Eighteenth Century to the present. It will examine individual thinkers, like Jefferson, Calhoun or Dewey, movements like Anti-Federalism, Social Darwinism and Progressivism, and themes of political culture like racism, sexism, class policies, and religion. It is intended to provide students with a basic familiarity with American history.

**GOVT 681 Modern Social Theory I**

**GOVT 670 Modern Social Theory II**

**GOVT 671 Graduate Seminar in Feminist Political Theory**

**GOVT 674 Theory and Practice of Nationalism**
Fall. 4 credits. B. Anderson. This course will be devoted to the comparative study of the rise and transformation of nationalism, according to different theoretical and philosophical traditions. The relationship of nationalism to questions of race, gender, class, and time will also be discussed on the basis of both theoretical and empirical studies.

**GOVT 675 Gramsci and Cultural Politics (also German Literature 685)**

**GOVT 676 Theories of Governmentality**
Fall. 4 credits. A. M. Smith. An advanced social and political theory seminar for graduate students that focuses on Foucauldian and post-structuralist theories of regulation and social control. Featured theorists will include Michel Foucault, Jacques Derrida, Judith Butler, Ernesto Laclau, Mike Davis, Thomas Dunn, Bob Jessop, Nikolas Rose, Colin Gordon and Elaine Scarry. Seminar participants should have acquired a substantial background in the political theory tradition, and should have completed Government 663 or an equivalent course in other departments, before taking this course.

**GOVT 678 Classics in Political Thought: Adam Smith and David Hume**
Fall. 4 credits. J. Lomnaco. Using Habermas’ work on the public sphere and Foucault’s work on governmentality as initial orientation points, the seminar will examine the full range of Hume and Smith’s work as fundamentally addressed to a political problem: the problem of conduct, both individual and collective, in civil society. To a perhaps unprecedented degree, civil society presented itself to Hume and Smith as not underwritten by any providential guarantor; consequently, how social and political order emerged out of nothing more than the conduct and interactions of individuals on the immanent plane of civil society became an issue of the first theoretical and practical importance. This task was all the more urgent because, for Hume and Smith, individuals were irredently prone to opinions, passions, delusions, superstitions and antinomian claims of inspiration that could lead to the kinds of devastating conflicts that led to the rise of the state. These two foremost thinkers of what is now called the Scottish Enlightenment will be studied in relation both to their contemporary scene and to long-term discursive traditions like reason of state, modern natural jurisprudence, and the ideology of polities.

**GOVT 679 Althusser and Lacan**
Spring. 4 credits. G. Waite. See German Studies 686 for description.

**International Relations**

**GOVT 681 Politics of Transnationalism**
Spring. 4 credits. S. Tarrow. With the globalization of the world economy and media and the diffusion of new international organizations and institutions, economists, political scientists and sociologists have been asking whether the monopoly of the nation-state over international society is eroding. Such erosion could be part of the explanations for the mobility of capital and employment, the diffusion of transnational movements, and for the apparent inability of states to control identity politics within and contagion from without. The central questions of this course are whether something resembling a transnational society is developing and what are the effects of transnational movements on the state.
ARTS AND SCIENCES - 1998-1999

[GOVT 682] International Relations of the Middle East

[GOVT 683] Foreign Policy Analysis

[GOVT 685] International Political Economy
Spring. 4 credits. J. Kirshner.
An exploration into a range of contemporary theories and research topics in the field of international political economy. The seminar will cover different theoretical perspectives and a number of substantive problems.

[GOVT 686] International Strategy

[GOVT 687] International Environmental Policy

[GOVT 688] Political Economy and National Security
Fall. 4 credits. J. Kirshner.
This seminar considers the relationship between economics and national security. Specific topics will change from year to year, but will typically include the following: the economic foundations of power, economic coercion, the economic roots of conflict, and the ways in which structural changes in the international economy shape and limit state authority.

[GOVT 689] International Security Politics
Fall. 4 credits. R. McDermott.
This course will provide an overview of theoretical and research topics in the area of international security policy. This course will cover several theoretical perspectives, including rational choice and psychological approaches to the study of security issues. These perspectives will be used to examine various substantive topics including war and deterrence, balance of power, alliance politics, domestic constraints on foreign policy and military strategy. Less attention will be paid to issues involving economic cooperation and sanctions.

[GOVT 691] Normative Elements of International Relations

[GOVT 694] Research Design and Grant Writing

Independent Study
This course is NOT open to undergraduates. Undergraduates wishing to conduct supervised study should register for Government 499.

[GOVT 799] Independent Study
Fall or spring. 4 credits.
Government 799 is a course of individualized readings and research for graduate students. Topics, readings, and writing requirements will be designed through consultation between the student and the instructor. Graduate students in government who are looking to use this as an option to fulfill their course requirements should check with their chairs to be certain that the program of study is acceptable for this purpose. Applications must be completed and signed by the instructor and by the chairs of their special committees. They are available from, and must be returned to, the graduate assistant in 125 McGraw Hall.

HISTORY
The popularity of history among Cornell students is due to its usefulness as preparation for graduate, professional, or law school and for any career that requires critical thinking and good writing; the reputation of the faculty; the specific topic; the discipline. A wide variety of introductory and advanced courses is offered. The department is particularly strong in ancient, medieval, and modern European history; in American, Latin American, and Asian history; and in the history of science.

The Major
To complete the history major, a student must fulfill the requirements listed below:

1. Take 9 history department courses (for either 3 or 4 credits each), completing all of them with a grade of C or better. (Courses taken for entry may count towards fulfilling the major.)
2. Of the total 9 courses:
   a) 4 must be outside of American history and
   b) 3 must be in history before 1800.

Courses used to fulfill Requirement (1) above may also be used to fulfill Requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill Requirement (2b). A course before 1800 in a field other than American history can be used toward fulfillment of both Requirements (2a) and (2b).

3. Of the total 9 courses, one must be a 400-level seminar. History 400 may be used to fulfill this requirement. Appropriate 400-level seminars may be used to fulfill Requirements (2a) and (2b).

Honors
The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take the Honors Prospective Society (History 400) plus an additional 400-level seminar, preferably during their junior year, and complete 10 courses in history (for 3 or 4 credits each). During the second term of sophomore year or early in junior year, interested students should speak to a faculty member or faculty advisor about the honors program.

Before the beginning of senior year, the candidate presents in conversation or in writing a thesis proposal to an appropriate member of the faculty. The faculty member who approves the proposal ordinarily becomes the thesis supervisor. If for any reason it is necessary to change supervisors, this arrangement should be confirmed no later than the fourth week after the beginning of the candidate's senior year.

Honors candidates should register in History 401, Honors Research, with their supervisors. Any exceptions to this must be approved by the Honors Committee. History 401 is a 4-credit course that permits honors candidates to conduct research and to begin writing the honors essay. At the end of the first semester of the senior year, as part of the requirements for History 401, the student submits to the supervisor a ten-to-fifteen page overview, or, alternatively, a preliminary draft of some part of the thesis along with an outline of the whole and meets with a committee consisting of the student's supervisor and one other department member who will eventually serve as a reader of the thesis. That committee then recommends whether the student may proceed to enroll in History 402, Honors Thesis, during the fall semester of the senior year. History 402 is a 4-credit course that permits honors candidates to complete the honors essay and to demonstrate their understanding of the ways in which the themes explored in the thesis fit into a larger historical context.

The completed thesis is evaluated by three readers, including the two faculty members who administered the preliminary oral interview in December.

The text of the honors essay may not exceed sixty pages except by permission of the chair of the honors committee and the student's supervisor. Two copies are due during the third or fourth week of April. In May each honors candidate is given an oral examination administered by the supervisor; examination focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, eighteenth-century science, nineteenth-century America). To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a 3.5 cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral examination.
Cornell-in-Washington Program. History majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

Honors and research courses

Course Numbering System
100-level courses are very general introductory courses (like 151-152, 190-191) and freshman writing seminars.
200-level courses come in two kinds: seminars or lecture courses. Neither kind has prerequisites and both admit freshmen.
200-level seminars (which are identified by the name “seminar” in the title) are similar to freshman writing seminars, except that there is greater emphasis on subject matter and less on writing.
200-level lecture courses cover a relatively broad geographical area, period of time, or subject.
300-399-level courses may have specified prerequisites or deal with more-specialized subjects than do those numbered 250-299.
Admission of freshmen varies from course to course and is indicated in the course descriptions.
400-499 are upper level undergraduate courses.
600-699 and 700-799 are graduate level courses.

Comparative History
HIST 274 Foodways: A Social History of Food and Eating #
Spring. 4 credits. S. L. Kaplan.
An interdisciplinary examination of the validity of the adage “man is what he eats.” Among the topics: food and nutrition, food and social structure, the politics of food control, food and modernization, taste making, and food in religion and literature. Cases will be drawn widely across space and time, from Pharaoh’s Egypt to the 1990s.

HIST 360 Early Warfare, East and West #
A study of the principal modes of warfare found both in the East and the West from ancient times up to the eighteenth century. Tactical evolution and the impact of innovations are stressed, but attention is also paid to the general social and cultural background and the role of nonmilitary factors.

HIST 380 Social History of Western Technology #
For description, see History of Science.

HIST 393 Images of Humanity in Medieval China (also Asian Studies 393) @ @
Fall. 4 credits. Prerequisite: any course on premodern China or Chinese religions, or permission. Not offered 1998-99. C. Peterson.

HIST 405 Population and History #

HIST 409 Seminar on Work in Europe and America #
Fall. 4 credits. Prerequisite: permission of instructor. S. L. Kaplan.
A comparative study of the meaning of work in different societies from premodern times to the present. Emphasis on the “representations” of work of the actors themselves who worked, as well as of those who for various critical reasons did not work. The seminar will examine not only ideology but also the organization, practice, and physical place of work. It will explore theory as well as “cases,” and draw on anthropological and sociological as well as historical materials.

HIST 432 The City in History: Europe and America #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99. S. Blumin.
Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe and in modern Europe and America. Individual research projects.

HIST 451 Lord and Peasant in Europe: A Seminar in Social History #

HIST 454 The Herodotean Moment: The Uses and Abuses of “Western Civilization” (also Government 454)
Fall. 4 credits limited to 20 students. Prerequisite: permission of instructor. Not offered 1998-99. J. Najemy, M. Bernal.
The basic premise of the seminar is that the concept of “Western civilization” is a problematic one in need of critical and historical analysis. The course will examine the evolution and transformation of this concept from antiquity to the twentieth century by focusing on selected moments (and texts in which they are represented) of actual and/or perceptual encounters with other civilizations. It will also inquire into the political uses and abuses of the idea of the West, and the literary, psychological, and anthropological dimensions of the idea’s history. Readings include selections from Herodotus’ Histories, Virgil’s Aeneid, Augustine’s City of God, The Song of Roland, Petrarch, Pico, Machiavelli, Montesquieu, Flaubert, Shelley’s Hellas, Arnold, Hegel’s Philosophy of History, James Mill’s History of British India, and, from secondary critical literature, Tzvetan Todorov’s The Conquest of America and Edward Said’s Orientalism.

HIST 250 Technology in Society (also Engineering General Interest 250, Electrical Engineering 250, and Science and Technology Studies 250)
Fall. 3 credits. R. Kline.
For description, see ENGRG 250.

HIST 281 Science in Western Civilization (also Science and Technology Studies 281) #
Fall. 4 credits. History 281 is not a prerequisite to 282. P. R. Dear.
This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show science as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of “science” as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. 281 runs chronologically up to the death of Isaac Newton and focuses on the cultural traditions of Christian Europe and its selective appropriation of a Greek heritage.

HIST 282 Science in Western Civilization (also Science and Technology Studies 282) #
Spring. 4 credits. History 281 is not a prerequisite to 282. P. R. Dear.
This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show science as a cultural phenomenon. Changing perceptions of nature and human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of “science” as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. This course covers the eighteenth, nineteenth, and early twentieth centuries.

HIST 287 Evolution (also Biology: General Courses 207; Science and Technology Studies 287)
Fall. 3 credits. Not offered 1998-99. P. R. Dear.
For description, see BIO G 207.

HIST 292 Inventing the Power and Information Societies (also Engineering General Interest 292, Electrical Engineering 298, and Science and Technology Studies 292)
Spring. 3 credits. R. Kline.
For description, see ENGRG 298.

HIST 380 Social History of Western Technology #
Studies in the interaction between technological changes and social changes in Western Europe and America since the eighteenth century. Readings and lectures will deal both with instances of social transformation that
accompanied technological changes and with the role of technology in social thought and cultural expression. Special attention to three periods: Britain during the Industrial Revolution, America in the nineteenth century, and America during the Vietnam War.]
HIST 304 American Culture in Historical Perspective, 1880-1980 (also American Studies 304)  
Fall. 4 credits. M. Kammen.  
An introduction to American Studies and the study of American culture. Emphasis upon relationships between mass culture, popular culture, and high culture; and on the question of American exceptionalism (distinctiveness). Special attention also to the situation of subcultures and regions, to the changing role of entertainment in relation to leisure, the media, ethnicity (pluralism), the decorative and popular arts.

[HIST 309 The U.S. and the Third World  
This course examines the development of American relations with Asia, Africa, Latin America, and the Middle East, with particular emphasis on the post-WWII period. Connections between domestic factors in the United States and American foreign policy will be emphasized.]

[HIST 311 The Structure of American Political History (also American Studies 311)  
Examines the course of American politics from the eighteenth century to the Gilded Age, focusing on the development of American political culture, the nature of decision making, and the role of interest groups, political parties, and political elites in shaping our political history.]

[HIST 312 The Structure of American Political History  
A continuation of History 311 but can be taken independently. Examines the course of American politics from the 1890s to the present, focusing on the massive transformation of American political life in the late nineteenth and twentieth centuries in response to industrialism and urbanization, the depression and the international crises from the 1930s to the 1960s.]

[HIST 313 U.S. Foreign Relations, 1750-1912  
Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 1998-99; next offered fall 1999. W. LaFeber.  
Examines the development of the U.S. continental and global empires by analyzing policy and policymakers from Benjamin Franklin to Woodrow Wilson. Emphasis is placed on domestic events that shaped foreign policy. In conjunction with Hist. 313, a special course, 301, for discussion and guided research will be offered.]

[HIST 314 History of American Foreign Policy, 1912 to the Present  
Spring. 4 credits. T. Borstelmann.  
Students examine the emergence of the United States as a world power in the twentieth century. The course focuses on the domestic sources of foreign policy and the assumptions of the major policymakers (Wilson through Clinton). Important themes include the American response to a revolutionary world since 1912, the role of American racial views in the making of foreign policy, and the increasingly dominant role of the president in the making of U. S. foreign policy.

[HIST 316 American Political Thought: From Madison to Malcolm X (also Government 366)  
Fall. 4 credits. I. Kramnick.  
For description, see GOVT 366.]

[HIST 318 American Constitutional Development  
Fall. 4 credits. Not open to freshmen. R. Polenberg.  
Major issues in constitutional history. Topics include: the drafting of the Constitution; the Bill of Rights; the Marshall era; the crises caused by secession; the rise of substantive due process; Holmes, Brandeis, and freedom of speech; the Roosevelt "revolution"; civil liberties and civil rights in modern America; the right of privacy; the contemporary Supreme Court.]

[HIST 319 The Frontier in American Thought and Culture  

[HIST 321 Colonial North America to 1763  
Fall. 4 credits. M. B. Norton.  
A survey of European settlement in North America and the Caribbean, emphasizing the interactions within and between Indian and African, economic development; gender relations; religious and political change; and the impact on the colonies of internal and external conflicts.]

[HIST 324 Varieties of American Dissent, 1880-1900 (also American Studies 324)  
Fall. 4 credits. N. Salvatore.  
The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course will explore the varieties of economic, political, and cultural dissent in America between 1880 and 1990, and will examine how understanding dissent in its specific historical context illuminates major aspects of American life and culture.

[HIST 325 Age of the American Revolution, 1763-1815  
Spring. 4 credits. M. B. Norton.  
An examination of the process by which the thirteen English colonies became an independent and united nation, with emphasis on political thought and practice, social and economic change, and cultural development. Attention will be paid to the impact of the American Revolution on women, Blacks, and Indians as well as on white males.]

[HIST 326 American Political Thought: From Madison to Malcolm X (also Government 366)  
Fall. 4 credits. I. Kramnick.  
For description, see GOVT 366.]

[HIST 327 American Frontier History Before 1850  
An overview of European exploration and colonization in North America, life on different colonial-Indian frontiers, and territorial expansion by the United States. Topics include the ideological and material frameworks of expansionism, the political and social dimensions of interethnic and imperial rivalry, and the formation of U.S. Indian and land policies. Themes of human migration, commercial development, and environmental change are emphasized.]

[HIST 328 American Frontier History: The West since 1850  
An examination of the American West, both as place and myth, from the mid-nineteenth century to the present. Conquest of Indian territories, class and ethnic struggles, frontier ideology, and western politics are among the topics. The course comparatively studies agricultural, mining, and range societies. The role of government and science in transforming western environments is closely explored, toward an understanding of recent farm, energy, and other land-use policies in the West.]

[HIST 329 Indians, Settlers, and Slaves in the Early South (also American Indian Studies 329)  
History of the American South from the sixteenth century to the early nineteenth century with an emphasis on intercultural relations. Topics include colonization of the region by Spain, England, France, and the United States, American Indian adaptation and resistance, the evolution of slavery, African American relations with European and Indians, and the role of racial ideology and ethnic identity in the formation of the South as a distinct section of the United States.]

[HIST 330 The Age of Jackson, 1815-1850 (also American Studies 330)  

[HIST 331 The American Civil War and Reconstruction 1850-1877 (also American Studies 331)  
Fall. 4 credits. J. Silbey.  
An analysis of the factors leading up to the breakup of the Union, the impact of the war in North and South, and the problems of reconstruction and reconciliation of the seceded states.]

[HIST 332 The Urbanization of American Society: 1860-1860 (also American Studies 332)  
America was born in the country and moved to the city. This course examines the transformation of America from a rural to a rapidly urbanizing society and culture, from the first European settlements to the era of the Civil War. It is also a history of the city itself, as a human community, and as a crucible of cultural contact and change.]

[HIST 333 The Urbanization of American Society: 1860-2000 (also American Studies 333)  
America was born in the country and moved to the city. This course examines the transformation of America from the urbanizing society and culture of the mid-nineteenth century to the thoroughly metropolitan nation of the present (and future). It is also a history of the city itself, as a human community, a crucible of cultural contact and change, and a focus of public policy.]
ARTS AND SCIENCES - 1998-1999

HIST 335 African-American History from Slavery to Freedom #
Fall. 4 credits. Letter only.
M. Washington.
Introductory course on African-Americans from 1619 to 1865. Emphasis will be on life in bondage, the free black communities, and racism. Other topics include African cultural heritage, the slave trade, religion, the family, and the black freedom struggle.

HIST 336 Capitalism and Society in Developing America, 1607-1877 (also American Studies 336) #
Fall. 4 credits. S. Blumin.
An examination of American society in the context of capitalist development, and of capitalism as a social phenomenon. The transformation of pre-industrial colonies into an industrializing nation; the development of social classes; the emerging ethos of free enterprise.

HIST 337 Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840-2000 (also American Studies 337)
Spring. 4 credits. S. Blumin.
An examination of American society in the context of capitalist development and of capitalism as a social phenomenon. The rise of corporate capitalism; class, "mass", and the ethos of enterprise in twentieth-century American society.

HIST 340 Recent American History, 1925-1960
Spring. 4 credits. Not open to freshmen.
R. Polenberg.
Topics include the Sacco-Vanzetti case; radicalism and reform in the New Deal; Franklin Roosevelt and World War II; the Holocaust and the atomic age; the Cold War and civil liberties; individualism and conformity in the 1950s.

HIST 341 Recent American History, 1960 to the Present
Spring. 4 credits. Not open to freshmen.
Topics include the Supreme Court and civil rights, Kennedy, Johnson, and social reform; the Vietnam War and Watergate; politics and the presidency from Carter to Clinton; and class, race, and ethnicity in modern America.

HIST 345 The Intellectual and Cultural Life of Nineteenth-Century Americans (also American Studies 345 and Religious Studies 345) #
Fall. 4 credits. R. L. Moore.
An examination of the development of cultural and intellectual diversity in the United States. Particular emphasis will be placed on religious pluralism.

HIST 346 The Modernization of the American Mind (also American Studies 346)
R. L. Moore.
American thought and culture from 1890 to the present. Emphasizes the intellectual impact of major political and economic events and the adaptation of social ideas and values to new conditions.

HIST 359 American Families in Historical Perspective (also American Studies 359, HDFS 359, and Women's Studies 357)
Spring. 3 credits. Prerequisite: HDFS 150 or one 200-level social science or history course. S-U grades optional. Human ecology students must register for HDFS 359. Not offered 1998-99. J. Brunnge. For description, see HDFS 359.

HIST 375 The African-American Workers, 1865-1910: The Rural and Urban Experience (also ILR 365) #
Fall. 3 credits. Prerequisite: juniors and seniors, or permission of instructor. Not offered 1998-99. N. Salvatore. For description, see ILR 365.

HIST 376 The African-American Workers, 1910-the present: Race, Work, and the City

HIST 411 Undergraduate Seminar in American Political History
Fall. 4 credits. Prerequisite: permission of instructor. W. LaFeber and J. Silbey.

HIST 412 Undergraduate Seminar in Asian American History (also Asian American Studies 412)
Spring. 4 credits. M. Jung.
A reading and research seminar that will cover various topics in Asian American history.

HIST 414 Motivations of American Foreign Policy
Fall. 4 credits. Prerequisite: permission of instructor. W. LaFeber.
Topic for Fall 1998: obtaining consensus in a democracy for U.S. foreign policy during the Cold War and after.

HIST 418 Undergraduate Seminar in the History of the American South

HIST 419 Seminar in American Social History (also American Studies 419)
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99. N. Salvatore.
This undergraduate seminar will focus this semester on the social and cultural dimension of the urban black experience in the decades following World War II. A research paper is required.

HIST 421 Undergraduate Seminar in American Cultural History (also American Studies 421)
Spring. 4 credits. Prerequisite: permission of instructor. M. Kammen.
The emergence of popular, middlebrow, and mass culture in the U.S., along with the discourse among cultural critics concerning all three in relation to traditional high culture. The underlying context will concern the changing uses of the historical past in twentieth-century American and conflicting attitudes toward cultural taste levels in a democratic society.

HIST 426 Undergraduate Seminar in Early American History (also Women's Studies 426) #

HIST 429 Undergraduate Seminar in Indians of Eastern North America (also American Indian Studies 429)
Fall. 4 credits. Not offered 1998-99.
D. Usner.
A seminar examining the history of Native Americans in the eastern woodlands from colonial times to the present. The cultural and economic participation of Indians in the evolution of frontier societies will be examined. Major topics include fur-trade networks, political relations, removal, and the persistence of Indian communities in eastern states.

HIST 432 The City: History and America #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
S. Blumin.
Reading and listening to individuals who have written on or about the city in their own lives of work.

HIST 433 Reform in Antebellum America
An examination of American society from 1830 to 1860 through the eyes of people attempting to bring change. The emphasis will be on individuals, such as William Lloyd Garrison, Abby Kelly Foster, and Horace Bond. The course will also emphasize issues such as slavery, temperance, Indian removal, and public education.

HIST 440 Undergraduate Seminar in Recent American History
Spring. 4 credits. Prerequisite: permission of instructor. R. Polenberg.
Topic: freedom of speech, censorship, and the Supreme Court.

HIST 442 Religion and Politics in American History: From J. Winthrop to R. Reed (also American Studies 442 and Religious Studies 442)
Fall. 4 credits. Prerequisite: permission of instructor. R. L. Moore.
A reading and research seminar concerned with popular culture in nineteenth-century America (publications, performances, and audiences).

HIST 458 Female Adolescence in Historical Perspective (also Women's Studies 438 and Human Development and Family Studies 417) #
Spring. 3 credits. Prerequisite: permission of instructor. J. Brunnge. For description, see HDFS 417.

HIST 484 Seminar in the History of American Labor: Race, Work, and the City (also ILR 304)
Fall. 4 credits. Open to juniors and seniors only with the permission of the instructor. Not offered 1998-99. N. Salvatore.
For description, see ILR 304.

HIST 486 Seminar on the 1960s
Fall. 4 credits. T. Borstelmann.
This course will explore the issues and developments of the most turbulent and significant decade in recent U.S. history. Major topics will include the civil rights movement, the Kennedy and Johnson administrations, the Vietnam War, the anti-war
movement, the counterculture, the women's liberation movement, the media, and the Nixon administration. A substantial research paper will be required.

HIST 500 Undergraduate Research Seminar (also American Studies 500) Fall and spring. 8 credits each term. S. Blumen and others. Offered in Cornell-in-Washington Program. An intensive research and writing experience utilizing the extensive resources of Washington, D.C.

[HIST 521 Seminar in American Cultural Studies (also American Studies 521)] Fall. 4 credits. Not offered 1998-99. M. Kammen. The focus will be the relationship between government and culture in historical perspectives. After three contextual sessions devoted to the 19th-century background, we will mainly be concerned with the period from the 1930s to the present. Several comparative sessions will be devoted to government as a patron of culture in other societies. A research paper is required.

[HIST 607 Writing Seminar on African-American Women] Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99; next offered 1999-2000. M. Washington. This course is designed for students actively engaged in a writing project on African-American women's history. Students must have already done the research and most of the reading for their papers prior to enrollment. Reading and class discussion will focus on style, methodology, and theory. An extensive research paper is due at the end of the semester.

HIST 608 African-American Women Spring. 4 credits. Prerequisite: permission of instructor. Letter only. M. Washington. A reading and discussion topics seminar focusing on the experiences of African-American women in nineteenth-century America, including the Caribbean. Topics include women and labor, abolitionism, women's rights, sexuality and race relations, education and racial uplift, black women's literature, marriage and family.

HIST 610 Afro-American Historiography Fall. 4 credits. Letter only. M. Washington. Reading and discussion course focusing on the way historians write and interpret the Black experience in America. Students will be concerned with individual historians, various schools of thought, and historical approaches.

HIST 618 Seminar in American Cultural History Spring. 4 credits. R. L. Moore. A reading and research seminar concerning selected topics in nineteenth-century America.

HIST 624 Graduate Seminar in American Indian History (also American Indian Studies 624) Spring. 4 credits. D. Usner. This seminar examines, through a selected series of major topics and problems, the historical study of North American Indians. Various approaches in history—together with anthropology, political science, folklore, and other disciplines—are explored. Emphasis is placed on current interpretations and directions.

HIST 626 Graduate Seminar in the History of American Women (also Women's Studies 626) Spring. 4 credits. M. B. Norton. A reading and research seminar intended primarily for graduate students. Major works in American women's history will be carefully scrutinized, and each student will prepare a lengthy research paper.

[HIST 640 Graduate Seminar in Recent American History] Fall. 4 credits. Prerequisite: permission of instructor. R. Polenberg. A graduate research seminar that will examine American legal and constitutional history.

[HIST 663 Seminar in American Labor History (also ILRCB 763)] Fall. 3 credits. Prerequisites: graduate students only. Not offered 1998-99. N. Salvatore. For description, see ILRCB 783.

HIST 710 Colloquium in American History Spring. 4 credits. Required of all first-year graduate students in United States history. M. Kammen. Examination of major approaches, periods, issues, and modes of interpreting American history. Readings include recent "classics" of American scholarship from diverse subfields and genres.

HIST 711 Graduate Seminar in American History Fall and spring. 8 credits each term. S. Blumen and others. Enrolled in Cornell-in-Washington Program. An intensive research and writing experience utilizing the extensive resources of Washington, D.C.

HIST 715 Writing Seminar on African-American Women Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99; next offered 1999-2000. M. Washington. This course is designed for students actively engaged in a writing project on African-American women's history. Students must have already done the research and most of the reading for their papers prior to enrollment. Reading and class discussion will focus on style, methodology, and theory. An extensive research paper is due at the end of the semester.

HIST 720 History of Women in America Fall. 4 credits. Prerequisite: permission of instructor. M. Kammen. A reading and research seminar intended primarily for graduate students. Major works in American women's history will be carefully scrutinized, and each student will prepare a lengthy research paper.

HIST 724 Graduate Seminar in American Indian History (also American Indian Studies 624) Spring. 4 credits. D. Usner. This seminar examines, through a selected series of major topics and problems, the historical study of North American Indians. Various approaches in history—together with anthropology, political science, folklore, and other disciplines—are explored. Emphasis is placed on current interpretations and directions.

HIST 726 Graduate Seminar in the History of American Women (also Women's Studies 626) Spring. 4 credits. M. B. Norton. A reading and research seminar intended primarily for graduate students. Major works in American women's history will be carefully scrutinized, and each student will prepare a lengthy research paper.

[HIST 740 Graduate Seminar in Recent American History] Fall. 4 credits. Prerequisite: permission of instructor. R. Polenberg. A graduate research seminar that will examine American legal and constitutional history.

[HIST 763 Seminar in American Labor History (also ILRCB 763)] Fall. 3 credits. Prerequisites: graduate students only. Not offered 1998-99. N. Salvatore. For description, see ILRCB 783.

HIST 770 Colloquium in American History Spring. 4 credits. Required of all first-year graduate students in United States history. M. Kammen. Examination of major approaches, periods, issues, and modes of interpreting American history. Readings include recent "classics" of American scholarship from diverse subfields and genres.

Latin American History

HIST 201 Seminar: Immigration and Ethnicity in Twentieth-Century U.S. Spring. 4 credits. Seminar designed for undergraduates but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. M. C. Garcia. This seminar will look at immigration to the United States in the twentieth century, highlighting the experiences of several groups as case studies. We will analyze the "push/pull" factors that compelled people to come to the United States; the nature of cultural and structural assimilation; nativist movements; the evolution of U.S. immigration policy; the formation of ethnic identity in U.S. society. Attention will be given to current issues such as immigration reform, bilingual education; and the multiculturalism debate.

HIST 260 Introduction to U.S. Latino History, Part I (also Latino Studies Program 260) Spring. 4 credits. M. C. Garcia. This course introduces students to the history of Latinos in the United States. We will focus specifically on the history of Chicanos (Mexican Americans) and Central Americans. Part II of this course, History 261, focuses on the history of Puerto Ricans, Cubans, and Dominicans in the U.S. (students are not required to take both courses). Among the topics that will be addressed are: historical immigration patterns and the "push/pull" factors that compelled migration to the United States; the social and political events that shaped the evolution of these Latino communities; the role of cultural identity, race, class, and gender in shaping experience; the role of foreign policy in formulating immigration policy.

HIST 295 Colonial Latin America Fall. 4 credits. M. Roldán. Survey of Latin America from the rise of pre-Columbian civilizations through the European conquest, the establishment of the Spanish and Portuguese colonial societies, imperial rivalries in the New World, the background of the independence movements, and the achievement of political independence.

HIST 296 Latin America in the Modern Age Spring. 4 credits. T. Holloway. Survey of the Latin American nations from independence to the present. Major themes include the persistence of neocolonial economic and social institutions, the development of nationalist and populist politics, revolutionary movements of the twentieth century, and United States–Latin American relations.

HIST 347 Agrarian Societies in Latin American History Spring. 4 credits. T. Holloway. The development of rural patterns of wealth, status, and power, focusing on the role of country people in the larger society. Topics include disruption of the conquest, evolution from encomienda to hacienda, rise of plantation agriculture and export enclaves, decline of Indian communities, peasant protest, and land reform and development programs of the recent past.

HISTORY 437
438  ARTS AND SCIENCES - 1998-1999

With some historical background, the course focuses on the twentieth century. Topics include the import-substituting growth model, contradictions leading to military rule 1964-1985, transition to competitive politics, debt, ecology, regional and social disparities. Some comparisons are made to other Latin American countries.

[HIST 424 Art and Politics in Twentieth-Century Latin America] Fall. 4 credits. Prerequisite: permission of instructor. M. Roldan.

This seminar will examine how the intersection of art and politics shaped culture, ideology, and identity in Latin America from the Mexican Revolution to the dictatorships of the late twentieth century. Topics may include the muralism and the Mexican Revolution, the artist as muse and activist (Frida Kahlo); working class and immigrant revolution; the artist as muse and activist (Frida Kahlo); working class and immigrant ideology, and identity in Latin America from the origins up to 1964-1985, transition to competitive politics, debt, ecology, regional and social disparities. Some comparisons are made to other Latin American countries.

This seminar focuses on historical patterns, and comparisons will be made among units, in a search for underlying and overarching themes.

[African History]  

[HIST 255 Cultures and Ecology in Precolonial Africa] Fall. 4 credits. S. E. Greene.

This course will examine the history of Africa, from the origins of human kind to 1800 by focusing on a number of controversial issues about the African past. Why did human kind emerge in Africa? Why did the ancient Egyptians? What “race” were they and is this important anyway? If so, why? How did the ecological environments of the past shape African cultures and their history? What role did women play in early African societies and what can this information tell us about how human societies have operated from time immemorial? What role did the slave trade play in influencing the current economic position of Africa and race relations in the U.S. today?

Southern African history from foundations to union, or from the earliest human inhabitants to 1910. Major themes will include the peopling of southern Africa, interaction and change among the San, Khoekhoi, and Bantu-speaking peoples, the arrival and expansion of Europeans, African state systems, and the economic transformation of the 1870s and 80s leading to the South African war and union.

The beginning of the nineteenth century witnessed the rapid and often times forceful expansion of Islam in West Africa, the end of the Atlantic slave trade, the transformation of the Zulus from a small, inconsequential people to the largest and most powerful ethnic group in South Africa, and the wild fire spread of Swahili as a lingua franca in east and central Africa. This course explores these revolutionary changes and the upheavals that accompanied them as Africa remade itself to face the modern era. Lectures, readings and discussions will focus on the causes and consequences of these events and their significance for understanding contemporary Africa.

[HIST 407 The Colonial Encounter] Spring. 4 credits. Prerequisite: permission of instructor. S. Greene.

The course examines the way colonizer and colonized influenced the culture, history, and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself as well as both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, Netherlands) with the states they colonized in Africa and Asia where this linkage challenged at different times in different places pre-existing understandings of self, country, and culture, as well as notions about the other.

This course will examine the history of gender relations in Africa during the precolonial and colonial periods. Among the questions to be explored: what was the nature of gender relations in precolonial Africa; how were these relations affected by the entrance of Islam, the Atlantic slave trade, and other changes that affected particular African societies; what factors influenced the nature and extent of that impact; how did African men and women define gender and sexual identities and how did particular historical forces such as colonialism and the entrance of Christianity and Islam affect these identities?

[Asian History]  

[HIST 190 Introduction to Asian Civilizations] Spring. 4 credits. C. Peterson, D. Wyatt.

An introduction to the distinctive cultures of China, India, Japan, and Southeast Asia that features an intensive examination of selected topics and periods of particular significance in the history of each.

The history of Asia-Pacific from the nineteenth century to the present, focusing on relations of China, Japan, and Southeast Asia with each other and with the West.

[HIST 230 Seminar in History and Memory: The Asia-Pacific War] Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1998-99. J. V. Koschmann.

This seminar will examine what is at stake when the fighting between Japan and its former enemies in the Pacific during World War II is remembered, memorialized, and (re)constructed as historical narrative by Japanese, Americans and others. By exploring the legacies of such events and processes as the Rape of Nanking, live testing of biological and chemical warfare agents, sexual slavery, incendiary bombings of Hiroshima and Nagasaki, the seminar will offer an opportunity to reflect in a more general way on the politics of historical representation and memory.

[HIST 243 Seminar: China and the West before Imperialism] Spring. 3 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. C. Peterson.

What accounts for the first great passion for things Chinese in the West (from the sixteenth to the nineteenth centuries) followed by the hostility characteristic of imperialism? This seminar explores this question relying heavily on original sources to trace the China vogue in thought, literature and art and comparing the Western image with the realities of China of that day.

[HIST 244 Seminar: History of Slam and Thailand] Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. D. Wyatt.

An examination of the long history of the central position of the Indochina Peninsula, based on close reading of the primary sources (in translation).

[HIST 293 History of China up to Modern Times] Fall. 4 credits. C. A. Peterson.

A survey of the principal developments in the history of China from the earliest times to the eighteenth century that also undertakes a topical introduction to Chinese culture and civilization, in part by the use of visual materials.

A survey that concentrates on the rise of the last imperial dynasty in the seventeenth and eighteenth centuries, the upheavals resulting from domestic rebellions and foreign imperialism in the nineteenth century, and the eighteenth-century efforts to achieve political unity and commercial expansion.

[HIST 297 Japan Before 1600] Fall. 4 credits. J. Piggott.

This course explores Japan before 1600 from a variety of perspectives. Analysis of primary sources including linguistic experiences compared with those of other societies around the globe. History 297 is a good introduction to issues of premodern...
historical study and to the general study of East Asia. Graduate students or more advanced undergraduates who would like to do a research project should register for History 497.

HIST 298 State, Society, and Culture in Modern Japan @ Spring. 4 credits. J. V. Koschmann. A survey of Japan from early-nineteenth century to the present, which attempts to connect the political, socio-economic, and imaginative realms of modern Japanese life so as to achieve a complex view of modern Japanese society. Pays particular attention to the changing situation of women and women's movements, Japan's relations with Asia and the U.S., and problems of historical representation and consciousness. Readings will include Japanese works in translation as well as secondary sources.

HIST 322 Taming the Samurai: Warrior History in Japan @ Spring. 4 credits. J. Piggott. This course explores the role of the samurai at various epochal moments in Japan, and the effects samurai-centered governance has had on culture throughout the early modern era. This is a very much a hands-on course in which writing and analysis are emphasized—students will do extensive analysis of primary sources, write a critical book review, and write a final essay. Graduate students are welcome but should register for History 522 after consultation with the instructor.

HIST 360 Early Warfare, East and West @ Spring. 4 credits. Not offered 1998-99. C. A. Peterson. For description see Comparative History.

HIST 393 Images of Humanity in Medieval China (also Asian Studies 393) @ Fall. 4 credits. Permission required. Not offered 1998-99. C. A. Peterson.

HIST 395 Southeast Asia to the Eighteenth Century @ Fall. 4 credits. Not offered 1998-99; next offered 1999-2000. D. Wyatt. A survey of the earlier history of Southeast Asia, concentrating particularly on regional movements of economic, social, cultural, and political change and using, to the extent possible, readings in translated primary sources.

HIST 396 Southeast Asian History from the Eighteenth Century @ Spring. 4 credits. Not offered 1998-99; next offered 1999-2000. A survey of the modern history of Southeast Asia with special attention to the formation of modern states (colonial as well as national), changing economic and social structure, and consciousness. Primary texts will be read in translation whenever feasible.

HIST 420 Japan in the Year 1000: The Tale of Genji in Historical Perspective @ Fall. 4 credits. Prerequisite: permission of instructor. J. Piggott. The tale of Genji is a classic of premodern Japanese literature that provides readers a broad view into Japan's courtly society at a time when many of the elements of Japan's classical tradition were taking form. Additional primary source readings and secondary sources probe the countryside beyond the capital as well. Previous study of premodern Japan is advised.

HIST 448 Family and Gender Relations in Premodern Japan @ Spring. 4 credits. Prerequisite: permission of instructor. J. Piggott. An inquiry into structures of family and gender in the classical and medieval periods. Themes will include kinship and family organization, state formation, and gender construction. Those interested in comparative perspectives are encouraged to enroll. "Breadth" reading, primary source materials, and comparative reading placing Japan in an East Asian context will be emphasized. Previous study of premodern Japan and East Asia is recommended.

HIST 466 Kings and Shoguns @ Spring. 4 credits. Not offered 1998-99; next offered 1999-2000. J. Piggott. The turn of the fourteenth century witnessed epochal changes in Japan as structures of monarchy, court-Bakufu relations, land-holding, judiciary, international relations, and popular culture were deeply affected by the failure of Go-Daigo Tenno's royal restoration. Core readings of the seminar will include portions of the martial epic, the Taiheiki, and other materials from which insights into these transformations can be drawn. Previous work in Japanese history, especially History 322, is recommended.

HIST 489 Seminar in Modern Japanese History @ Fall. 4 credits. Prerequisites: History 298 or equivalent. Not offered 1998-99, next offered 1999-2000. J. V. Koschmann.

HIST 492 Undergraduate Seminar in Medieval Chinese History @ Spring. 4 credits. Prerequisite: History 190, 293, 360, or permission of instructor. C. A. Peterson. Topic for spring 1999: the intellectual and cultural life of Chinese literati including an examination of their careers, literary output, and private lives.

HIST 493 Problems in Modern Chinese History (also History 693) @ Fall. 4 credits. Prerequisite: History 294 or permission of instructor. Not offered 1998-99; next offered 1999-2000. S. Cochran. Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

HIST 495 Asian Kingship and State Formation @ Fall. 4 credits. Prerequisite: previous coursework in Asian history and consultation with the instructor. Not offered 1998-99; next offered 1999-2000. J. Piggott. The seminar will explore kingship and state formation in comparative perspective. Readings will include theoretical and ethnographic work on societies across the globe, East and West. In addition to participating in discussion focused on core readings, seminar members will undertake research projects targeting societies of their choice. Students with an interest in the history of preindustrial societies, political and cultural anthropology, and religion will find the seminar stimulating.

HIST 497 Colloquium in Premodern Japanese History @ Fall. 4 credits. J. Piggott. Explores the premodern civilization of Japan from a variety of historical perspectives. Students will attend History 297 lectures and participate in a special weekly colloquium.

HIST 499 Problems in Modern Chinese History (also History 694) @ Spring. 4 credits. Prerequisite: History 294 or permission of instructor. Not offered 1998-99; next offered 1999-2000. S. Cochran. This course gives each student an opportunity to select one research topic and work on it throughout the semester. Knowledge of Chinese is not required, but background in Chinese studies is needed.

HIST 588 Seminar in Modern Korean History Spring. 4 credits. Prerequisite: a course on East Asian history or equivalent. J. V. Koschmann. Designed primarily for graduate students in East Asian Studies who specialize in Chinese and/or Japanese history but need for comparative or other purposes to develop a familiarity with the main problems and contours of modern Korean history. Readings will be selected primarily from English-language works on Korea from the 1870s through the post-World War II era, including Japanese colonial policy and practice in Korea, the Korean War, and the postwar history of the Republic of Korea.

HIST 598 Colloquium in Modern Japanese History Spring. 4 credits. J. V. Koschmann. For graduate students only. Students will attend lectures and do the reading for History 298, participate in a special weekly colloquium, and write a seminar paper.

HIST 609 Modern Japan Studies: The Formation of the Field in History and Literature (also Asian Studies 609) Fall. 4 credits. Not offered 1998-99; next offered 1999-2000. J. V. Koschmann and N. Sakai. The course will provide both a historical introduction to and critical analysis of the constitution of modern Japan studies as a "field" of postwar academic inquiry. While reading texts particularly influential in the early and contemporary formation of the field, we will consider such questions as the relationship between "Japan" as object of area studies discourse and "Japan" as represented in American journalism, popular culture, and politics. Interdisciplinary and team-taught, the course will aim to introduce students to a range of methodologies and approaches developed in historical and critical works, problematizing assumptions in each case. Possibilities for cross-disciplinary research (along lines recently undertaken in areas such as feminist criticism and cultural studies, for example) will also be explored.

HIST 691 Chinese Historiography and Source Materials Spring. 4 credits. Prerequisite: permission of instructor. C. Peterson.
[HIST 693 Problems in Modern Chinese History (also History 493)]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99; next offered 1999-2000. S. Cochran. Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

[HIST 694 Problems in Modern Chinese History (also History 499)]

[HIST 695 Early Southeast Asia: Graduate Proseminar]
Fall. 4 credits. D. Wyatt. Introduction to the history of Southeast Asia for graduate students.

[HIST 696 Modern Southeast Asia: Graduate Proseminar]
Spring. 4 credits. Not offered 1998-99; next offered 1999-2000. Introduction to the modern history of Southeast Asia for graduate students. Students will be expected to attend the lectures and complete the readings for History 396, and they will meet separately as a group to further explore selected topics.

[HIST 791 Seminar in Medieval Chinese History]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99. C. A. Peterson.

[HIST 792 Seminar in Medieval Chinese History]

[HIST 795 Seminar in Modern Southeast Asian History]
Fall. 4 credits. Permission of the instructor. Not offered 1998-99.

[HIST 796 Seminar in Southeast Asian History]
Spring. 4 credits. Prerequisite: reading knowledge of relevant languages. D. Wyatt.

[HIST 797 Seminar in Japanese Thought]
Fall. 4 credits. Prerequisite: reading knowledge of Japanese and permission of instructor. J. V. Koschmann.

[HIST 798 Seminar in Japanese Thought]

Near Eastern History

[HIST 254 Islamic History: 600-1258 (also Near Eastern Studies 257 and Religious Studies 257)]

[HIST 317 Islamic History: The Age of Ibn Khaldun (also Near Eastern Studies 356)]
Spring. 4 credits. Prerequisite: NES 257 or equivalent. D. Powers. For description, see NES 356.

[ исторические дисциплины HIST 372 Introduction to Islamic Law (also History 652, Near Eastern Studies 351/651, Religious Studies 350)]
Fall. 4 credits. Enrollment is limited to 25 students. Not offered 1998-99. D. Powers. For description, see NES 351.

[ исторические дисциплины HIST 460 Seminar in Islamic History: Muhammad and the Rise of Islam (also Near Eastern Studies 418 and Religious Studies 418)]
Fall. 4 credits. Not offered 1998-99.

[ исторические дисциплины HIST 461 Seminar in Islamic History 600-750 (also History 671, Near Eastern Studies 451 and 650, and Religious Studies 451)]

[ исторические дисциплины HIST 652 Introduction to Islamic Law (also History 372, Near Eastern Studies 351/651, Religious Studies 350)]
Fall. 4 credits. Enrollment is limited to 25 students. Not offered 1998-99. D. Powers. For description, see NES 351.

Ancient European History

[HIST 151 Introduction to Western Civilization]
Fall. 4 credits. S. Pohl. A survey of European history from Antiquity to the Renaissance and Reformation. Important themes will include the influence of ancient culture on medieval society; the development of Christianity; the development of and conflict between secular and ecclesiastical governments, religious reform movements, and the rise of lay spirituality. Specific topics to be covered include European encounters with the non-European, the culture and role of minority groups within European society, and the roles of women. Emphasis is placed on close readings of primary works, including literary and visual sources.

[HIST 228 Seminar: War and Peace in Greece and Rome]
Spring. 3 credits. Not offered 1998-99. B. Strauss. A study of war and peace in the ancient Mediterranean world in light of modern theories and international relations. The course will test the validity of modern theories against ancient models and will ask what the ancient experience can contribute to modern theory and practice. Case studies include the Peloponnesian War, the Second Punic War, Alexander's conquests, and the defense of the Roman Empire.

[HIST 232 Seminar: Eyewitness to War in the Ancient World]
Fall. 3 credits. Not offered 1998-99. B. Strauss.

A study of ancient soldier-historians who participated in the campaigns about which they later wrote. Topics include historiography, autobiography, prose style.

Readings include selections from Thucydides, Xenophon, Julius Caesar, Josephus. Ammianus Marcellinus as well as, for comparative purposes, modern soldier-historians.

[HIST 265 Ancient Greece from Homer to Alexander the Great]
Spring. 4 credits. Open to freshmen. Not offered 1998-99. B. Strauss. A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius—its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy, and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture.

[HIST 268 A History of Rome from Republic to Holy City]
Spring. 4 credits. Open to freshmen. J. Ginsburg. A survey of Rome and its empire from the beginning to late antiquity. This course will explore the development of Rome's Mediterranean empire and its political, social and economic consequences; the constitutional and social struggles of the late Republic; the transition from Republic to Principate; society and state under the Caesars; the nature and limits of governing a world empire; the interaction of pagans, Christians and Jews in the Roman world.

[HIST 367 Representations of Women in Ancient Greece and Rome (also Classics 363 and Women's Studies 363)]

[HIST 452 The Tragedy of Classical Athens, 462-404 B.C.]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99. B. Strauss. The nature of Athenian democracy, society, and culture in the "golden age" of Athens. The course will examine the influence of Athenian political life on the great tragedies of the age and the influence of tragedy on the Athenians' conception of their character and history. Readings from Herodotus, Thucydides, Aeschylus, Sophocles, Euripides, Aristophanes, Plato, Aristotle and Plutarch.

[HIST 453 Crisis of the Greek City-State, 415-336 B.C.]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99; next offered 1999-2000. B. Strauss. The fortunes of the city-state and citizen in an age of uncertainty. The focus is on Athens with some attention paid to the wider Greek world. Topics include the nature of Athenian politics, Athenian society, cultural change, and war between the city-states, crisis as a historical concept, and anthropology and ancient Greek. Readings in translation include Thucydides, Sophocles, Euripides, Aristophanes, Plato, Aristotle, Demosthenes, and Xenophon.
aspects of political, social and cultural life in 16th- and 17th-century Europe, exploring shifts in gender relations, the problem of social control, the effect of religious conflict on the power of the state and its contested boundaries with other institutions of elite and popular religion, and the encounter of European missionaries with other cultures. Students will engage with major historiographical interpretations of the period, as well as with the close reading of primary sources."

HIST 234 Seminar: Gender in Early Modern Europe (WOMNS 234) 
Spring. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. R. Weil.

An inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?

HIST 257 English History from Anglo-Saxon Times to 1485 
Fall. 4 credits. Not offered 1998-99; next offered 2000-01. P. Hyams.
A survey of the government, social organization, and cultural and religious experience of the English people. Particular stress is laid on land settlement, the unification of the realm, the emergence of state institutions such as Parliament, and changes in economic organization (manors, towns and commerce). The approach will be comparative within a context of contemporary European developments. The course offers students who wish to work on their writing skills an opportunity to do so, especially in the second paper.

HIST 259 The Crusades # @
A lecture course examining the Crusading Movement and the Societies that produced it from the eleventh century to the fall of the mainland Kingdom of Jerusalem in 1292. The historical themes this generates are almost unlimited. The course will cover both the Christian and Muslim history of the Medieval West, the confrontation of this culture with those of the Mediterranean and Islam, and what is perhaps the cradle of Western Colonialism. The very concept of "Crusade" itself is problematic today and will continue to cast its shadow on U.S. dealings with the Middle East. The sometimes spectacular readings allow students to choose from a very wide range of paper topics, and enjoy an excellent introduction to every aspect of the long-gone world of the Middle Ages.

HIST 262 The Middle Ages: An Introduction and Sample (also Religious Studies 265) 
A survey of medieval civilization from ca. 500 to ca. 1300 dealing with religious, intellectual, political, and economic developments in Western Europe.

HIST 264 The High Middle Ages 
A survey of medieval civilization 1100-1400, dealing with political, economic, religious, and intellectual developments in Western Europe. Special attention will be paid to the interaction of different kinds of history and to the historian's understanding of literature and its use as a primary source. Lectures and class discussions.

HIST 275 Authority and Resistance in Europe, 1400-1600 
Spring. 4 credits. S. Pohl.
A lecture course examining the political, cultural and social transformations between 1400 and 1600 through an exploration of aspects of state formation and ecclesiastical order, social and religious protest and deviant behavior. Important issues are the relationship between attempts of governments to impose order and the social practice of governing, questions of popular cooperation and resistance, and the role of the Church in this process. Specific topics to be covered include the Protestant Reformations and the emergence of confessional churches, law and crime, the peasant rebellions and the early modern witch hunts. Students will be introduced to primary works of this period, including literary and visual sources, and to major historiographical controversies.

HIST 284 The Age of Reform in Western Europe (1400-1600) 
Fall. 4 credits. Not offered 1998-99.
An exploration of the efforts to reform church and society in the fifteenth and sixteenth centuries. Major topics include the strengths and weaknesses of the medieval church, the theological controversies among Lutherans, Calvinists, Anabaptists, and Roman Catholics, the social foundations of reforming and dissenting movements, and the success and failure of Protestant and Catholic Reformations.

HIST 286 State and Society in the Iron Century (1560-1660) 
A survey of the conflicts which convulsed the continent of Western Europe between 1560 and 1660, focusing on the French Wars of Religion, the Dutch War of Independence, The Thirty Years War, and peasant uprisings in France and Germany. The course will examine the sources and outcomes of conflict, the role of religion in politics, and the social impact of warfare. Particular emphasis will be placed on the capabilities and limitations of different state structures in mobilizing resources, waging war, and repressing dissent.
This course will explore the crises of political, religious, and epistemological authority that plagued Early Modern Europe and seventeenth centuries. We will examine the political and cultural impact of the Protestant Reformation, the nature of Tudor despotism and Stuart absolutism, the construction of a rhetoric of political dissent around issues of sexuality and corruption, competing understandings of the social order and social control, the Puritan Revolution and the invention of liberalism. Emphasis on close reading of primary sources, from autobiography and drama to political theory.

[HIST 349 Early Modern England #
This course will provide an overview of the early modern period from the sixteenth to the eighteenth centuries. We will examine the political, social, and cultural developments that characterize this period, including the rise of absolutism, the Reformation, the Scientific Revolution, and the Enlightenment. Emphasis will be placed on the intellectual and cultural developments that shaped the early modern period, including the works of thinkers such as Thomas Hobbes, John Locke, and Voltaire.]

[HIST 350 The Italian Renaissance #
An exploration of the cultural, political, and social changes that occurred in Italy during the Renaissance. We will examine the development of Italian art, literature, and music, as well as the political and social contexts in which these developments took place. Emphasis will be placed on the works of artists such as Leonardo da Vinci, Michelangelo, and Raphael, and on the political figures of the period, such as the Medici family and the papacy.]

[HIST 351 Machiavelli #
This course will focus on the life and works of Niccolò Machiavelli, a key figure in the development of modern political thought. We will examine Machiavelli's works, including The Prince, as well as his influence on later political thinkers. Emphasis will be placed on the political and intellectual context in which Machiavelli lived, and on the ways in which his ideas continue to shape political thought today.]

[HIST 356 Marriage and Sexuality in Medieval Europe (also Religious Studies 368, Women's Studies 368) #
Few topics generate as much interest as gender roles and relations, sexuality. The course will focus on the history of gender roles and sexuality in medieval Europe, and the ways in which these roles and relations have been shaped by cultural, social, and political factors. Emphasis will be placed on the lives of women and men in medieval society, and on the ways in which they have been studied by historians.]

[HIST 365 Medieval Culture, 400--1150 (also Religious Studies 365) #
Fall. 4 credits. Prerequisite: History 263 or permission of instructor. Not offered 1998--99; next offered 1999--00. J. J. John.
The course will focus on the development of medieval culture, from the fall of the Roman Empire to the early modern period. We will examine the role of religion in shaping medieval society, and the development of the feudal system. Emphasis will be placed on the works of poets such as Chaucer and Dante, and on the role of women in medieval society.

[HIST 366 Medieval Culture, 1100--1300 #
Spring. 4 credits. Prerequisite: History 264 or permission of instructor. Not offered 1998--99; next offered 1999--00. J. J. John.
The course will focus on the development of medieval culture, from the rise of the capetian kings to the decline of the medieval period. We will examine the role of religion in shaping medieval society, and the development of the church. Emphasis will be placed on the works of poets such as Christine de Pisan and Christine de Pizan, and on the role of women in medieval society.

[HIST 369 The History of Florence in the communal period through the age of Dante, 1250-1350 #
This course will focus on the history of Florence from the communal period through the age of Dante, 1250-1350. We will examine the political, social, and cultural developments that characterized this period, including the rise of the Medici family and the decline of the republican government. Emphasis will be placed on the role of culture and ideas in shaping the course of Florentine history.

[HIST 377 Gender in Early Modern Europe (also Women's Studies) #
An inquiry into the ways in which masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this society? How did gender roles shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?

[HIST 405 Population and History #
For description, see Comparative History.]
We will consider the changing and fiercely contested notions of property, political authority, and the family. How in this context did imperial and economic expansion, the fate of customary methods of conflict resolution in a time of increasing legal centralization, and the relationship between cultural and legal change. We shall approach these issues by examining, among other things, the development of criminal procedure, the role of rulers, contested notions of criminal responsibility, and the self-presentation of defendants. The course emphasizes close readings of primary works, including trial documents and literary sources.

### HIST 446 Law, Crime and Society in Europe, 1400-1700

Spring. 4 credits. Prerequisite: permission of instructor. S. Pohl.

This intensive reading seminar focuses on Germany, England, France, and Italy and concentrates mainly on the social and legal treatment of crimes of violence. Throughout the course, we shall consider the differences and similarities between common law and continental legal systems. Major issues to be covered include the role of criminal justice, the fate of customary methods of conflict resolution in a time of increasing legal centralization, and the relationship between cultural and legal change. We shall approach these issues by examining, among other things, the development of criminal procedure, the role of rulers, contested notions of criminal responsibility, and the self-presentation of defendants. The course emphasizes close readings of primary works, including trial documents and literary sources.

### HIST 447 Crusaders and Chronicles

Fall. 4 credits. Not offered 1998-99; next offered 2000-01. P. Hyams.

An intensive reading seminar offering a natural progression from History 259 The Crusades. It will examine contemporary accounts of the crusading movement in English translation. The twin goals are to follow select themes of crusading history to a deeper level than is possible in History 259 and to study medieval historiography through whole chronicles and other primary sources.

### HIST 451 Lord and Peasant in Europe: A Seminar in Social History

### HIST 458 The Representation of Eros in the Italian Renaissance

### HIST 472 Politics and Culture in Eighteenth-Century England

Between 1660 and 1800 England experienced imperial and economic expansion, the English Enlightenment, and the threat of Revolution abroad and at home. How in this context did people interpret and imagine the nature of the social order, political authority, and the family? We will concentrate on themes of emerging and fiercely contested notions of property, political commitment, and violence, Empire, slavery, and the market.

### HIST 481 The English Revolution

Between 1640 and 1660, England experienced two decades of civil war and revolution and embarked on a fascinating series of attempts to reorganize political and religious life. Women and the lower classes emerged as actors on the political stage, radical religious sects flourished, and the nature of authority was questioned in both the family and the state. This course will explore the political, cultural, religious and social dimensions of the English Revolution, using mostly primary sources.

### HIST 487 Household and Family in Late Medieval and Early Modern Europe

What was the pre-modern household? Was it an economic unit, a residential entity, a legal construct, an emotional body, or a patriarchal tool? This seminar is an introduction to the methodologies and controversies of current historical research on the household and family. Topics will include the nature of kinship, property rights and inheritance customs, variations in household structure, the economic context and demographic implications of household formation patterns, and power relations inside and outside of the household.

### HIST 496 Theorizing the Public Sphere (also Comparative Literature 496 and German-Studies 496)

For description, see GERST 496.

### HIST 651 Old English Literature in Its Historical Context (also English 710)

P. Hyams, D. T. Hill.

This graduate course, cross-listed with English 710, might equally be known as "Anglo-Saxon England: History and Literary Context." It studies the written sources for major questions of Anglo-Saxon history in their literary and cultural context. It concentrates on important texts extant in both Latin and Old English. Comparison can illuminate the resources and intentions of writers, compilers, and copyists, the literary and linguistic culture of England, and the ways in which historians might most fruitfully study such texts. Bede's Ecclesiastical History, and Battle of Maldon and Aelfric's Colloquies, and selections from the Anglo-Saxon chronicle, Beowulf, laws, homilies and wisdom literature are all likely to come under scrutiny. One goal is to reclaim for European religious history a corpus of material that historians neglect because it is in Old English.

### HIST 653 England—Britain—Europe in the Middle Ages

This graduate seminar tentatively explores the coming move from the study of medieval English history to that of the British Isles and its inhabitants within the wider context of Europe and Western Christendom. Readings will mostly be representative original sources. The precise texts and topics studied will depend on the interest of the students and the participation of faculty. The seminar will certainly allow for a critical examination of existing literature on the general and cultural history of England, Scotland, Ireland and Wales.

### HIST 666 Seminar in Medieval History

### HIST 688 Licit and Illicit Violence in the Sixteenth and Seventeenth Centuries

An inquiry into the varieties of violence in early modern Europe. We will examine both those forms of violence which the authorities prohibited (murder, witchcraft, the feud) and those forms which they themselves employed (warfare, inquisition, execution). We will also examine other overt forms of violence which though ‘merely’ psychic (black magic) or even spurious (the myth of Jewish ritual murder) powerfully influenced the lives of everyday women and men. The central themes of the seminar are the technologies and legitimation of violence—how, why, against and for whom violence was justified and exercised.

### Modern European History

#### HIST 152 Introduction to Western Civilization (1600 to the end of World War II)

Spring. 4 credits. R. L. Moore and M. Steinberg.

This course offers a comparative perspective on the development of modern states, societies, and cultures in Europe and North America. Religious and Scientific Revolutions in early modern Europe; European expansion and conquest; Enlightenment and Revolution; liberalism, capitalism, and communism; the politics of race slavery, and the new imperialism; the World Wars and the Holocaust; the Cold War; the modern and the post-modern in European and American culture.

#### HIST 217 Seminar: Totalitarianism

Orill of the distinguishing features of the twentieth century is the rise of a qualitatively new political project, one that produced massive violence and fundamentally reordered the societies it operated upon. Totalitarianism seeks to explain these developments as related to the emergence of a certain political ethos and the development of particular state...
tools. This seminar will first examine totalitarianism as a concept through a reading of classic studies on this phenomenon, and then test the concept’s applicability in a range of case studies (especially Stalinist Russian and Nazi Germany, but including also Fascist Italy and Maoist China) and see how it operated in a variety of spheres (aesthetics, politics, economic policies, state measures for the population, repressive policies). This course is designed primarily for sophomores, to accommodate students with historical issues and methodologies and to develop their writing abilities.

**HIST 220 The French Experience: An Introduction (also French Literature 224)**
Fall. 3 credits. S. Kaplan and M. Greenberg.
An examination of French society culture and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy, its fashion, its cathedrals and cinemas. Looking attentively at texts, images and contexts from selected moments in the seventeenth, eighteenth, nineteenth, and twentieth centuries, we will attempt to unravel some of the defining enigmas of the French experience. Two lectures/week in English and one section (one section conducted in English, one in French). Readings available both in French and English translation.

**HIST 223 Seminar in Modern European Political History**
Fall. 4 credits. W. Pinter.
The origin and development of the fundamental social, political, economic, and cultural institutions that have determined the nature of contemporary Russian society.

**HIST 227 History of Zionism and the Birth of Israel (also Jewish Studies 290; Near Eastern Studies 290)**
Spring. 4 credits. V. Caron.
This course will examine the history of Zionism as an ideology and political movement from its origins in the nineteenth century to the present. Attention will be paid to situating Zionism within the context of modern Jewish, European, and Middle Eastern History. Topics will include: the ideological foundations of Zionism; the role of Theodor Herzl and the rise of political Zionism; the Balfour Declaration; the development of the Yishuv and Zionism as a cultural identity for Diaspora Jewry; the British mandate; the Arab-Zionist encounter; Zionist responses to the Holocaust; and Zionism and contemporary Israeli society.

**HIST 228 Europe in the Technological Age**
Spring. 4 credits. J. Weiss.
An introduction to politics, culture, and technology in contemporary Europe. In the sections on politics a survey of party systems and their interactions with social movements is followed by examinations of post-Communist constitution and political structures, the New Germany, and the European Union. The section on European culture pays special attention to the European press and electronic media as shapers and reflectors of cultural values. A section on the struggle over the control of the past deals with tensions and conflicts in European national memories. In the section on Nationalism and ethnicity, political and cultural approaches are combined in consideration of the wars in former Yugoslavia as well as less violent conflicts between nationalists and members of ethnic minorities elsewhere in Europe. The section on technology deals with the design of products and processes as a cultural phenomenon, making cross-national comparisons of some of the social, cultural, and institutional influences on engineering performance.

**HIST 285 From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1492-1789 (also Near Eastern Studies 245; Jewish Studies 253)**
Fall. 4 credits. J. Weiss.
This course will examine the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. We will examine the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics will include: the impact of the Spanish Expulsion of 1492; religious, intellectual, and socio-economic dimensions of the Marrano dispersion, including Lurianic Kabbalah and the messianic movement of Shabbetai Zevi; the establishment of Jewish communities in the West; the end of the “Golden Age” of Polish Jewry and the rise of Hasidism; the changing economic and political role of Jews in the 17th and 18th centuries; and the impact of the Enlightenment.

**HIST 290 Twentieth-Century Russia and the Soviet Union**
Spring. 4 credits. B. Holquist.
An introductory lecture course spanning the last years of the Russian Empire and the first years of the post-communist present as well. Geographically, it focuses on the Russian heartland and the non-Russian areas of the Soviet Union. The course will explore the roots and consequences of the Russian Revolution; the nature and evolution of Leninism, Stalinism and Soviet communism; the entrenchment of reform of the post-Stalinist system; and the legacy of communism for the region’s new regimes. Students are introduced to a wide variety of historical materials, including documents, essays, memoirs, literature and film.

**HIST 291 Modern European Jewish History, 1789-1948 (also Jewish Studies 252)**
Jewish life in Europe experienced a profound transformation as a result of the process of Jewish emancipation which began at the end of the eighteenth century. While emancipation offered Jews unprecedented social, economic and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course will examine the ways in which Jewish and non-Jewish society responded to these new developments from the eighteenth century Enlightenment to the post-World War II era. Topics will include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation, the development of modern antisemitism; the rise of Zionism and the creation of the state of Israel; the modernization of Eastern European Jewry; the impact of mass immigration; and the Nazi era.

**HIST 353 Nineteenth-Century European Intellectual History**
The focus is on social and cultural thought in France, Germany, and England. Topics include reactions to the French Revolution and industrialization; the definition of conservative, liberal, and radical perspectives; and the relation between literature and social thought. Readings include Tocqueville, Mill, Hegel, Marx, Flaubert, Dostoevsky, Nietzsche, and Durkheim.

**HIST 354 Twentieth-Century European Intellectual History (also Comparative Literature 340)**
This course examines significant currents in twentieth-century thought in France, Germany, and England. Topics include the varieties of existentialism, the development of the social sciences, psychoanalysis, the modern novel, structuralism, and poststructuralism. Readings include Weber, Freud, Heidegger, Sartre, Camus, Woolf, Foucault, and Derrida.

**HIST 355 The Old Regimes: France in the Seventeenth and Eighteenth Centuries**
A systematic examination of the social structure, economic life, political organization, and collective mentalities of a society that eclipsed all others in its time and then, brutally and irreversibly, began to age. France, in European perspective, from the wars of religion through the age of Voltaire.

**HIST 356 The Era of the French Revolution and Napoleon**
Spring. 4 credits. S. Kaplan.
A study of the failure of the traditional system, its dismantling and replacement in France, and the international consequences. Focus will be on the meaning of the revolutionary experience, the tension between the desires to destroy and to create, and the implications of the Revolution for the modern world.

**HIST 357 Survey of German History, 1648-1890**
Fall. 4 credits. Open to freshmen with permission of instructor. Not offered 1998-99; next offered fall 1999. I. Hull.
An examination of the social, political, intellectual, and diplomatic history of the German states from the devastation of the Thirty Years’ War, through absolutism, the bourgeois revolution of 1848, the struggle for unification, to the beginning of the modern industrial state.

**HIST 358 Survey of German History, 1890 to the Present**
An examination of the "German problem," that is the political, cultural, economic and other causes of modern Germany's extreme violence and volatility from 1890 through 1945, and of the consequences thereof on the divided Germany of 1945 to 1989, and on the new German state since 1989.

[HIST 362 European Cultural History, 1750-1870 (also Comparative Literature 352)]

The course will focus on the making of middle-class culture, society, and imagination from the Enlightenment through the French Second Empire. There will be three units with national and thematic focus: Germany in the period of Enlightenment, emancipation, and the bureaucratization of death; Jewish life in Second Empire France. Primary readings (including novels, paintings, and operas) will be considered along with contemporary historical and theoretical readings.

[HIST 383 European Cultural History, 1870-1945 (also Comparative Literature 383)]
Fall. 4 credits. M. Steinberg.

This course will focus on problems of modernity, identity, and ideology in comparative European contexts. We will address the politics and culture of German nationalism, French urbanism and religious revival, the cultural origins of psychoanalysis, technological culture (including film), and the cultural origins and dynamics of fascism. As in 382, primary materials (including Wagner, Nietzsche, George Eliot, Freud, Benjamin and Alfred Hitchcock) will be considered along with recent theoretical work.

[HIST 370 History of the Holocaust (also Jewish Studies 353)]
Fall. 4 credits. Each student must enroll in a section. V. Caron.

This course will analyze the meaning of the Holocaust from three vantage points: that of European history; that of Jewish history; and that of those states and religious institutions that shared the responsibility of having stood by in silence. Topics include: the evolution of modern anti-semitism; the role of anti-semitism in the Nazi ideology and program; the bureaucratic atrocity of death; Jewish life in ghettos and concentration camps; the fate of Jews in occupied Europe and the question collaboration. Jewish political behavior under duress; the responses of the Western allies and the Churches; contemporary interpretations of the Holocaust and the meaning of evil.

[HIST 379 The First World War: Causes, Conduct, Consequences]
Fall. 4 credits. Open to freshmen with permission of instructor. P. Holquist and I. Hull.

This course examines the longterm and immediate political, social, and cultural causes of World War I, its catastrophic prosecution, and its revolutionary consequences. Recurring themes are: the building of nation-states, the diplomatic arena and military systems of the nineteenth and twentieth centuries, mass mobilization, the development of mass violence, and the emergence of millenarian visions of the future.

[HIST 380 Social History of Western Technology]

For description see History of Science.

[HIST 383 Europe, 1900-1945]
Spring. 4 credits. J. Weiss.

An investigation of the major developments in European politics between 1900 and the end of the Second World War. Emphasis on the rise and fall of democratic political systems and their alternatives. Topics include the transformation of liberalism and socialism, the transforming effects of war and depression, the dynamics and diplomacy of fascism, the European response to the economic and ideological influence of America and the Soviet Union, the changes in Eastern Europe during the interwar years, and the interaction between politics and social structure.

[HIST 384 Europe, 1945-1968]

A political and social history of Europe between the fall of fascism and the political crises of 1968. Emphasis on the comparative study of the elaboration of democratic institutions and ideologies. Topics include the origins and course of the Cold War in Western and Eastern Europe, Gaullism and Christian Democracy, the emergence of welfare states, liberal-democratic and Communist culture, the end of colonial empires in the West, opposition movements in Eastern Europe, and the general upheaval of 1968.

[HIST 385 Europe in 20th Century: 1958-1990]
Fall. 4 credits. J. Weiss.

The major political developments in Europe between the upheavals of 1968 and the collapse of Communist regimes. Topics will include the effects of economic turmoil in 1973-1974; the response to terrorism; regionalist movements; new ethnic minorities and their opponents; Socialist governments in southern Europe; the arrival of democracy in Spain, Portugal, and Greece, new dynamics in the European Community; the rise of Thatcherism; the war scare of the 1980s; and the final phase of the Cold War.

[HIST 405 Population and History]

For description, see Comparative History.

[HIST 406 The People in the French Revolution]

The Revolution was nothing if not a mass event. Mass action played a critical part in shaping its course. The "re-invention" of France affected the population down to each village and demanded decisions from virtually every adult. This course will focus on the people as actors: their collective memory, their ideologies, their repertoire of intervention, the formation of a popular political culture. It will examine the encounters between the people (in their multiple incarnations) and the revolutionary elites who sought to articulate and appropriate the Revolution. A theme will be the tension between the ambitions to achieve liberty and equality.

[HIST 409 Seminar on Work in Europe and America]
Fall. 4 credits. S. L. Kaplan.

For description see Comparative History.

[HIST 417 History of Jews in Modern France (also Jewish Studies 446; French Literature 413)]
Spring. 4 credits. Prerequisite: permission of instructor. V. Caron.

This course will explore the integration of Jews into French society from the French Revolution to the present. Topics will include: the debate over Jewish emancipation during the Enlightenment, the French Revolution, and the Napoleonic era; the processes of religious and social assimilation; the rise of antisemitism and the Dreyfus Affair; Jewish responses to antisemitism; the immigrant challenge and refugee crisis of the 1930's; the Vichy era and Jewish resistance during World War II; and the reconstruction of the French Jewish community since 1945.

[HIST 435 Collective Action and Politics in Modern Europe]

For description, see GOVT 435.

[HIST 441 Seminar in the European Enlightenment]

[HIST 451 Lord and Peasant in Europe: A Seminar in Social History]

[HIST 456 Seminar in European Cultural History]

[HIST 457 Seminar in European Fascism]

[HIST 459 Antisemitism and the Crisis of Modernity: From the Enlightenment to the Holocaust (also Jewish Studies 454)]

This course will examine the role of antisemitism in nineteenth and twentieth century European ideological, political and socioeconomic developments. Attention will be paid to the way in which antisemitism illuminates the underside of European history, allowing us to see how anti-Jewish intolerance and prejudice become embedded in the worldviews of significant sectors of the European population, culminating in the Holocaust. Topics will include: the Christian roots of antisemitism and the extent to which modern antisemitism marks a break with the medieval past, the politicization of antisemitism by both Left and Right; the role of antisemitism in socioeconomic conflicts linked to the rise of capitalism; Jewish responses to antisemitism; antisemitism in the nazi and Fascist revolutions; and contemporary interpretations of antisemitism.

[HIST 462 Popular Culture in European History]
Spring. 4 credits. S. L. Kaplan.

An examination of the origins, practices and meanings of popular culture throughout Europe from the Middle Ages to the era of the French Revolution. After considering the various ways in which "culture" and "popular" can be construed, the seminar will focus on the specific manifestations of popular culture, its various languages and gestures, and its complex relations with the dominant/elite cultures.
HIST 467 Seminar in Modern European Political History
Permission of instructor required. J. Weiss.*

HIST 474 Topics in Modern European Intellectual History
Fall. 4 credits. Prerequisite: permission of instructor.

HIST 476 Social and Cultural History of Contemporary Europe
Fall. 4 credits. Not offered 1998-99.

The “other Europe”: language, culture, and nation among the minority peoples of Europe: A comparative investigation of the development of the cultural and historical identity of non-dominant European ethnic groups and their relation to the formation and policies of European national states: the Basques, the Welsh, the Catalans, the Bretons, the Occitans, Romansh, and others. The course will combine historical, literary, and sociolinguistic approaches.

HIST 477 Seminar on the Politics of the Enlightenment
S. Kaplan.

An inquiry into the historical origins of European (especially French) political, social, and economic thought, beginning in the 1680s, at the zenith of Louis XIV’s absolutism, and culminating in the French Revolution a century later. Emphasis is on the relation of critical theory to actual social, economic, religious, and political conditions. An effort is made to assess the impact of enlightened thought on the eighteenth-century world and to weigh its implications for modern political discourse. Readings in translation from such authors as Bayle, Montesquieu, Voltaire, Rousseau, Diderot, and others as well as from modern scholarly and polemical literature.

HIST 488 Seminar in Late Nineteenth-Century European Imperialism
Spring. 4 credits. Prerequisite: permission of instructor. I. Hull.

This seminar examines the theories of the “second wave” of European imperialism and then compares the imperial experiences of Great Britain, France, and Germany. It focuses on the imperialist powers, and on the (often unintended) consequences of their colonial involvements. Of special concern are the transformation of nationalism into imperialism, and the effects on the European powers themselves of their experiences of applied racism and the commission of mass violence in their colonies.

HIST 490 Empire, State, and Nation in Russian and Soviet History
Fall. 4 credits. Not offered 1998-99.
P. Holquist.
The Russian Empire represented a distinct type of empire, and the USSR provided a specific paradigm of nation-building. Among the topics treated in this course: how the heterogeneous Russian Empire was conceived and administered; the emergence of competing models of political organization (ethno-nationalism; federalism; pan-Islamic and pan-Turkic movements); the USSR’s attempts to reintegrate many former areas of the Empire, and the consequences of such Soviet policies, both in the life of the USSR and their legacy for post-communist states. Readings will include historical treatments as well as theoretical readings on forms of political organization.

HIST 605 Graduate Seminar in European Cultural and Intellectual History
Fall. 4 credits. M. Steinberg.
In 1998 the seminar will function as a companion course to History 363. Admission is open to graduate students and, by application to the instructor, to seniors. All participants will be required to attend the lectures in History 363. The seminar readings will focus on the primary readings in History 363 (Nietzsche, Wagner, Eliot, Freud) and will add to them literary and theoretical texts on the themes of subjectivity, ideology, and psychoanalysis.

HIST 635 The Gates to Modernity: From Karlsbad to the 1848 Revolution (also German Studies 635)
For description, see GER ST 635.*

HIST 661 Graduate Seminar in Twentieth-Century German History

HIST 672 Seminar in European Intellectual History
Fall. 4 credits. Not offered 1998-99.
D. LaCapra.*

HIST 673 Seminar in European and Intellectual History
Fall. 4 credits. Not offered 1998-99.
D. LaCapra.*

HIST 674 Graduate Seminar in German History, 1770-1918

HIST 675 After the Divide: German Critical Theory of the Seventies and Eighties (also Comparative Literature 675 and German Studies 675)
For description, see GER ST 675.*

HIST 678 Seminar in Modern European Social History

HIST 750 European History Colloquium
Fall and spring. 4 credits, each term. Kaplan, Holquist (fall); Kaplan, Weiss (spring).
A research colloquium designed for European history graduate students. The colloquium will offer a forum for students to present papers and to discuss the work of visiting scholars.

Honors and Research Courses
Note: History 301–302 are not regular courses for which students may sign up at will. They are personal arrangements between an instructor and a particular student. Students must first gain the consent of a particular instructor to work with them.

HIST 301 Supervised Reading
Fall or spring. 2 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 302 Supervised Research
Fall or spring. 3 or 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 400 Honors Proseminar
Fall. 4 credits. Limited to 12 students. For prospective honors candidates in history. Prerequisite: permission of a member of the Honors Committee is required to register. M. Kammen.
An exploration of major approaches to historical inquiry, analysis, and presentation. Ways of thinking about history along with research methods and organization of the results will be considered by reading and discussing a variety of historical works. Substantive readings will be drawn from several time periods and diverse cultural areas. There will be one paper during the semester, and a longer final paper which explores the work of a major historian or school of historical writing.

HIST 401 Honors Guidance
Fall or spring. 4 credits. Prerequisites: History 400 and permission of instructor. Staff.

HIST 402 Honors Research
Fall or spring. 4 credits. Prerequisites: History 400 and permission of instructor. Staff.

HIST 703-704 Supervised Reading
703, Fall; 704, Spring. 4 credits each term. Limited to graduate students. Prerequisite: permission of instructor. Staff.

HIST 709 Introduction to the Graduate Study of History
Fall. 4 credits. Required of all first-year graduate students. T. Borstelmann, V. Koschnik.*
The course is designed to introduce entering graduate students to crucial issues and problems in historiography that cut across various areas of specialization.

HISTORY OF ART
The Department of the History of Art provides a broad range of introductory and advanced courses in Western (European and American) and non-Western art (East and Southeast Asian, African), from antiquity to the present.
The Major
Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, Baroque, modern (Europe and U.S.A.), Southeast Asia, China, Japan, and Africa. Additionally, majors practice a range of art historical methods and interpretative strategies, including connoisseurship, dendrochronology, feminism, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is encouraged strongly.

Requirements for the Major
Prospective majors should consult the director of undergraduate studies. Students wishing to major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. One of the two courses required for entry into the major must be at the 200-level, and one must emphasize material either predominantly before 1800 or outside Europe/U.S.A. These two courses are prerequisites for the major and may be counted toward fulfillment of the major requirements. The major in the history of art requires 44 credits, 30 at the 300-level or above. The core requirements: requires proseminar; one 400-level area seminar; two courses in art outside Europe/U.S.A.; three courses in art predating 1800 (ancient, medieval, or Renaissance/Baroque). Majors must choose at least two courses from different categories. In addition to the 44 credits, majors are required to take two courses, approved by their advisers, in areas related to the history of art.

Honors
To become a candidate for the degree of Bachelor of Arts with honors in the history of art, a student must have a cumulative average of B+ for all courses taken in the department and in all arts and sciences courses. Application to write an honors thesis should be made to the director of undergraduate studies during the second term of the junior year. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student's transcript. In the senior year the honors candidate will include in his/her course load, History of Art 600 and 601. These courses address the research and writing of the senior thesis under the direction of the student's project adviser.

Course Numbering System

500-level courses are seminars primarily for graduate students.

Freshman Writing Seminars
For Freshman Writing Seminar offerings in the History of Art, see the John S. Knight Writing Program's special brochure. These courses may be used as freshman electives but not to satisfy the distribution requirement.

Courses

ART H 202 Survey of European Art: Renaissance to Modern #
Summer only. 3 credits. Staff. The major traditions and movements in western European art from the Renaissance to the Modern period. Painting, sculpture, and architecture with an emphasis on painting.

ART H 220 Introduction to Art History: The Classical World (also Classics 221) #
Fall. 4 credits. Each student must enroll in a section. J. Coleman. An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of Constantine the Great.

ART H 221 Minoan-Mycenaean Art and Archaeology (also Classics 221 and Archaeology 221) #
Spring. 3 credits. J. Coleman. For description, see Classics 221.

ART H 224 Archaeology in Action I (also Classics 232 and Archaeology 232) #

ART H 225 Archaeology in Action II (also Classics 233 and Archaeology 233) #
Spring. 3 credits. Prerequisite: permission of instructor. P. I. Kuniholm. Objects from the Classical, Hellenistic, and Roman periods are "dug" out of Cornell basements, identified, cleaned, restored, catalogued, and photographed and are considered in their appropriate historic, artistic, and cultural contexts.

ART H 230 Introduction to Art History: Monuments of Medieval Art (also Religious Studies 230) #
Spring. 4 credits. Each student must enroll in a section. R. G. Calkins. An introduction to the approaches to art history through a study of selected works of art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

ART H 245 Introduction to Art History: Renaissance and Baroque Art #
Fall. 4 credits. Each student must enroll in a section. K. Barzman. A survey of major works of European painting, sculpture, and architecture from 1400 to 1700. The focus is on preeminent artists, workshop methods, style, meaning, patronage, and the function of art in a range of social contexts. The course also covers the methods of art history currently practiced in Renaissance and Baroque studies. Weekly section meetings are required.

ART H 260 Introduction to Art History: The Modern Era
Spring. 4 credits. Not open to students who have taken History of Art 261. Each student must enroll in a section. J. F. Bernstein. A discussion of the most important developments in art from 1780 to the present. The emphasis is on major movements and artists such as Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol).

ART H 261 Introduction to Art History: Modern Art
Summer only. 3 credits. Staff. An introduction to early modern art as it developed between the French Revolution and World War I. Both European and American movements are examined, including Romanticism, Impressionism, Post-Impressionism, Cubism. Units are organized around central figures such as Mary Cassatt, Edgar Degas, Thomas Eakins, and Vincent van Gogh. Lectures are supplemented with discussions of methods of inquiry, including source criticism and feminism, fundamental to interpreting works of art.

ART H 280 Introduction to Art History: Approaches to Asian Art @ #
Fall. 3 credits. K. McGowan. Arranged according to selective focus and emphasis rather than broad chronological survey, this course introduces students to the varied responses of the Asian artist in diverse social, geographical and historical contexts. Indian miniature paintings, Japanese prints, high-fired ceramics from Thailand and Vietnam, Indonesian textiles and jewelry, Javanese shadow-puppet theater, and Balinese ritual and performance traditions will be explored. A number of class sessions will meet in the Herbert F. Johnson Museum of Art.

ART H 309 Dendrochronology of the Aegean (also Classics 309 and Archaeology 309)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm. Participation in a research project of dating modern and ancient tree-ring samples from the Aegean and Mediterranean. Supervised reading and laboratory work. A possibility exists for summer fieldwork in Greece and Turkey.

ART H 319 Art in the Daily Life of Greece and Rome (also Classics 319) #
Spring. 4 credits. A. Ramage. Classical art is well reflected in the small items of daily life that are neglected frequently in the standard histories. This course looks at the making and decorating of household items in Greece and Rome in a variety of materials from clay to metal. The links between the commissions of the state and the tastes of the people are examined through their material culture.

ART H 320 The Archaeology of Classical Greece (also Classics 320) #
ART H 322 Arts of the Roman Empire (also Classics 350) #
Fall. 4 credits. A. Ramage.
The visual arts in the service of the first world state. The role of architecture, painting, and sculpture of the Etruscan and Republican period but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered, along with the official presentations of the emperors.

ART H 323 Painting in the Greek and Roman World (also Classics 323) #

ART H 325 Greek Vase Painting (also Classics 325) #
A stylistic and iconographical approach to an art in which the Greeks excelled. The course will be arranged chronologically from the early (eleventh century B.C.), anonymous beginnings to the "personal" hands of identifiable masters of the fifth and fourth centuries B.C. Styles of cities other than Athens will be stressed.

ART H 326 Greek Cities and Towns (also Classics 326) #

ART H 327 Greek and Roman Coins (also Classics 327) #
The varied issues of Greek cities and the Roman state are examined. Coins are considered as art objects as well as economic and historical documents. The changes in design, value, and metals from the origins of coinage to the late Roman period are studied. Lectures, student presentations, and work with the actual examples.

ART H 328 Greeks and Barbarians (also Classics 328) #
Spring. 4 credits. J. Coleman.
For description, see CLASS 322.

ART H 329 Greek Sculpture (also Classics 329) #
For description, see CLASS 329.

ART H 332 Architecture in the Middle Ages (also Architecture 382, Religious Studies 332) #
Fall. 4 credits. R. G. Calkins.
A survey of medieval architecture from the Early Christian period to the Late Gothic (A.D. 300-1500). Considerable emphasis will be placed on the development of structural systems and upon the form, function, and meaning of important medieval buildings.

ART H 333 Early Medieval Art and Architecture #
Sculture, painting, and architecture in the period from the late antique through the Carolingian era (A.D. 300-900). The evolution of the early Byzantine tradition will also be considered.

ART H 334 Romanesque Art and Architecture #
The painting, manuscript illumination, sculpture, and architecture of the eleventh and twelfth centuries, primarily in France, England, and Spain. Particular attention will be paid to the art of the Pilgrimage Roads, the manifestation of specific regional styles, the problems of Byzantine influence, the significance of the art of the church treasures, and the factors that brought about the transition to the early Gothic.

ART H 335 Gothic Art and Architecture (also Religious Studies 335) #

ART H 336 Prelude to the Italian Renaissance (also Religious Studies 336) #

ART H 337 The Medieval Illuminated Book (also Religious Studies 337) #
Fall. 4 credits. R. G. Calkins.
A study of selected major examples of medieval illuminated manuscripts from between A.D. 300 and 1500. Facsimiles of major manuscripts such as the Lindisfarne Gospels, the Book of Kells, and the Hours of Mary of Burgundy will be examined. Students will write a research paper on a manuscript of their choice. Two lectures, plus a session each week in the Rare Book Room.

ART H 341 Flemish Painting (also Religious Studies 342) #
An examination of Flemish painting in the 15th century, with emphasis on the works of Robert Campin, Jan van Eyck, Roger van der Weyden, Hugo van der Goes, Hans Memling, and ending with Jerome Bosch. Issues of the social, economic, and devotional context will be discussed as they pertain to the particular development of Northern Realism and Symbolism during this century.

ART H 343 Italian Renaissance of the Fifteenth Century #
Fall. 4 credits. C. Lazzaro.
This course examines the artistic production of the fifteenth century in its social and cultural context. The new style, which was developed in Florence in the early century and spread to other city-states in Italy, is examined in the context of the newly developed class, the increased wealth of the merchant, urban class, and the new role of family in society.

ART H 344 Italian Renaissance of the Sixteenth Century: Leonardo, Michelangelo, and Raphael #
Spring. 4 credits. C. Lazzaro.
This course focuses on the three great artists of the late fifteenth and sixteenth century, Leonardo, Michelangelo, and Raphael. It examines each as a thinker as well as an artist, through their own writings together with their works of painting, sculpture, and architecture. It also analyses the contemporary constructions of the artist as genius and as courtier in the biographies and other writings about them.

ART H 345 Rome, Florence, and Venice in the Sixteenth Century #
This course examines the distinctive cultural identities and their visual representation of three city-states in sixteenth-century Italy: Rome, Florence, and Venice. A papal state, a republic turned duchy ruled by the Medici dynasty, and an oligarchic republic, they had in common a "civic society,* a social and intellectual elite of both rulers and patricians joined by a shared classical culture. Artistic models and mythological figures from classical antiquity provided a universal visual language, which was modified by local artistic traditions and histories. The course examines the images and symbols of each state; center of power, including St. Peter's, the Vatican, and their patron Saint Peter in Rome, the Piazza Signoria and San Lorenzo complex in Florence, and the piazzas of San Marco and the Doge's palace in Venice; government-sponsored propagandistic works of sculpture, wall painting, architecture, and spectacle in the buildings and squares, issues of church and state relations, and in Florence of civic and dynastic ideas of the state; and also the role of private collections and commissions (of portraits, allegorical paintings, palaces, and gardens) in establishing cultural identity. The course discusses works of some of the major artists of the sixteenth century, including Michelangelo, Raphael, Bronzino, and Titian, but focuses on topics and issues, which are examined through class lectures, discussions, weekly readings, and term paper.

ART H 346 Renaissance Art in Northern Europe: The Sixteenth Century #
Spring. 4 credits. Prerequisites: History of Art 245, 341, 351 or permission of instructor. S. Reiss.
This course will examine the painting, graphic arts, and sculpture of Northern Europe in the sixteenth century. Principal emphasis will be on art produced in the Netherlands and Germany. Topics to be considered include patronage and audiences in different regions of Northern Europe, the importance of fifteenth-century traditions, the impact of Italian art, and the development of specifically northern forms of artistic expression in religious and secular art, including landscape, portraiture, and genre painting. Among the themes we will explore are constructions of gender and representations of women in Northern Renaissance art, attitudes to peasants and the urban lower classes, the impact of the Protestant Reformation and iconoclasm, and the development of the art market in the North. Artists to be considered include Bosch, Bruegel, Düer, and Grünewald.

ART H 350 The Culture of the Renaissance I (also History 361 and Comparative Literature 361) #

ART H 351 The Culture of the Renaissance II (also Comparative Literature 355, History 354, Music 390, Religious Studies 362, English 325) #
For description, see COM L 362.
ART H 352 The City of Athens from Theseus (also Classics 352 and Archaeology 352) #
Spring. 3 credits. M. Landon.
For description, see CLASS 352.

ART H 353 Art and Death in Europe: 1250–1600 #
Fall. 4 credits. S. Reiss.
This course will explore rituals, images, and monuments associated with death and dying in late medieval and early modern Europe. Topics to be considered include cultural attitudes towards death, the impact of the Black Death, the relation between death and eroticism, funeral rituals, and, especially, tomb sculpture and mortuary structures in Italy, France, the Netherlands, Germany, England, and Spain.

[ART H 355 Art as Spectacle: The Italian Baroque (also Religious Studies 355) #]
K. Barzman.
This course casts the Italian Baroque as a society of spectacle. Lectures and discussions will focus on frescoes, public sculpture, architecture, and the reorganization of urban space in Italian cities from the end of the Council of Trent (1563) through the papacy of Clement XII (1730). Emphasis will be placed on the forms of address intended to guide and impress the viewer, and on the various institutions and individuals served by this kind of cultural production. Artists covered include Bernini, Borromini, Caravaggio, Carracci, Gaulli, Cortona, and Tiepolo.

ART H 358 Religion and Images Across the Early Modern World (also Religious Studies 360) #
Spring. 4 credits. K. Barzman.
This course will look at the religious use of images from the fourteenth through the eighteenth centuries. It will take a cross-cultural perspective, focusing on Italy, France, the Low Countries, Spain, and Spanish colonial South America and Meso-America. The emphasis will be on major iconographic themes (e.g., the Passion of Jesus, Eucharistic imagery, the miraculous interventions of Mary and the saints) and on the incorporation of images in rituals of devotional practice revolving around marriage, birth, illness, death, and the salvation of the soul. We will concentrate on works ranging from anonymous production to the masterpieces of early modern artists (including Giotto, van Eyck, Dürer, Grünewald, Caravaggio, Rubens, Ribera, and Murillo.)

ART H 360 Painting and Everyday Life in Nineteenth-Century America (also American Studies 360) #
L. L. Meixner.
Nineteenth-century American painters often constructed images of "exceptionalism," DeTocqueville's term for the social harmony and material abundance he considered unique to the New World. Embedded in these icons of national cohesion, however, were signs of race, class, and political conflict that we will decode through interdisciplinary methods. Our topical units include New England portraiture, commodification, Hudson River landscape and corporate (railroad) patronage, images of African-Americans and Reconstruction, images of Native Americans, the West, and Manifest Destiny. Through these, we will challenge the assumption that American art celebrated democracy, and consider more conflicted attitudes. Our key artists include John S. Copley, George Caleb Bingham, Winslow Homer, Mary Cassatt, and Thomas Eakins. Our readings include art historical texts and others by Poe, Emerson, and Whitman.

[ART H 361 The Social History of Nineteenth-Century European Painting #]
L. L. Meixner.

[ART H 362 Impressionism and Society #]
L. L. Meixner.
This course discusses French Impressionism as it relates to nineteenth-century public life. Chief artists include Manet, Cassatt, Morisot, Degas, Pissarro, Monet, Seurat, Toulouse-Lautrec, and Van Gogh. Images are interpreted as cultural products of the Third Republic, with special attention to the effects of urbanism, middle-class leisure, and industry on the public body. Overarching issues of class, gender, and power in modern Paris will be addressed through the writings of Baudelaire, Benjamin, Pollock, Jameson, and Zola.

ART H 365 Art from 1940 to 1990 #
J. E. Bernstock.
Major artists and movements in the United States since 1940, beginning with Jackson Pollock and Abstract Expressionism, and continuing through recent developments in art. Attention is devoted to the critical reception that artists have received and to artists' statement themselves.

ART H 370 Visual Culture and Social Theory (also Government 375 and Comparative Literature 368) #
A. Villier.
S. Buck-Mors.
For description, see Government 375.

ART H 371 Architectural History of Washington, D.C. #
Fall or spring. Variable credit. Only for students in the Cornell-in-Washington program. Only for non-architecture majors.
P. Scott.
A historical and critical survey of the architecture of Washington. Attention will be given to the periods, styles, architects, and clients—public and private—of the notable buildings and to the urban space of the nation's capital. The vocabulary of architectural analysis and criticism will be taught.

ART H 378 Art in African Culture and Society (also ASARC 310) #
S. Hassan.
For description, see ASARC 310.

ART H 380 Introduction to the Arts of China (also Archaeology 380 and Asian 383) #
Fall. 4 credits. A. Pan.
This course is an overview of the art and culture of China, from the Neolithic period to the twentieth century. We begin with an inquiry into the meaning of national boundaries and the controversy of the Han Chinese people, which will help us identify the scope of Chinese culture. Pre-dynastic (or prehistoric) Chinese culture will be presented through both legends about the origins of the Chinese, and scientifically excavated artifacts. Art of the dynastic and modern periods will be presented in light of contemporaneous social, political, geographical, philosophical, and religious contexts. Students will work directly with objects in the Herbert F. Johnson Museum of Art.

ART H 395 The House and the World: Architecture of Asia @ #
Spring. 4 credits. K. McGowan.
In many Asian societies, houses are regarded as having a life force or a vitality of their own. This course will examine the role of the house as a living organism in Asia, a symbol of the cosmos encapsulated. Houses also function in many societies as storerooms for material and immaterial wealth, artifacts such as textiles, jewelry, sculptures, and masks function within the house as ancestral heirlooms, conveying their current essence of life force, the power from which serving to blend with the vitality of the house. This accumulation of energy can be conferred upon the inhabitants, or it may exist as a quiet reservoir of power, distinct from its occupants. The indigenous architectural traditions of India, Vietnam, Thailand, Indonesia, and the Philippines will be examined. By studying the inhabited spaces of others, divining their technologies of construction and their applied symbologies, students will be provided with powerful tools for examining the visual skills and sensibilities of other cultures. "The House and the World" will serve as the metaphor for these discoveries.

ART H 396 The Arts of Southeast Asia @ #

Seminars
Courses at the 400 and 500 level are open to upperclass students, majors, and graduate students. All seminars involve the writing and presentation of research papers. Enrollment is limited to 15 students. Permission of the instructor is required. Students may repeat courses that cover a different topic each semester.

ART H 400 Preseminar for Art History Majors: The History and Practice of Art History
Fall. 4 credits. Prerequisite: History of Art majors only. Enrollment is limited.
C. Lazzaro.
This seminar examines the history of the discipline of art history and focuses on the various approaches and methods of its practitioners. We begin with the early history of the discipline, but concentrate on the twentieth century and the concerns with style, iconography, social history, and the post-structuralist theories of the last decades.

ART H 401 Independent Study
Fall or spring. 2-4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member. Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.
ART H 402 Independent Study
Fall or spring. 2-4 credits. May be repeated for credit. Prerequisite: permission of instructor. Limited enrollment. Available classes will meet in the Johnson Art Museum Study Gallery. Not offered 1998-99. Staff.
This seminar will utilize the resources of the Johnson Art Museum and is designed to give students with a strong art history background the opportunity to work closely and directly with original objects from the museum's major collections. The course will focus on the broad issue of art and connoisseurship and will address critically the question of what determines quality in the work of art. Topics to be covered in the weekly sessions will include methods of attribution, fakes and forgeries, technique and media, restoration and conservation. Some sessions will involve the curatorial staff of the museum. Frequent reports and a significant final paper will be required of all participants. Enrollment is limited, and permission of the instructor is necessary before the first meeting. Students interested in this course should indicate so by notifying the department directly at the time of pre-registration.

ART H 423 Ceramics (also Classics 423 and Anthropology 432) #

ART H 424 Sardis and the Cities of Asia Minor (also Archaeology 432 and Classics 423) #
A. Ramage.

ART H 425 Seminar on the Bronze Age Architecture of Asia Minor (also Classics 430 and Archaeology 418) #
4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
P. L. Kuniholm.
The course will cover major architectural building programs from Neolithic Catal Hüyük, Beyselultan, to the final phases of Troy and Hissite Bogazköy. The art and archaeology of these civilizations will be taken into account when relevant. Reading knowledge of German useful.

ART H 427 Seminar on Roman Art and Architecture (also Classics 435 and Archaeology 435) #
4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
A. Ramage.

ART H 433 The Rise of Classical Greece (also Classics 434) #
The art and architecture of the Greek dark ages. Topics include: site reports, pottery, metalworking, the introduction of the alphabet, the beginnings of coinage, and links with Anatolia and the Near East.

ART H 441 Medieval Art in Washington Collections #

ART H 448 Studies in Sixteenth-Century European Art #
Spring. 4 credits. C. Lazzaro.
Topic for spring 1999: Constructing the Self in the Sixteenth Century. This seminar examines portraits, self-portraits, autobiographies, and biographies, as well as treatises on etiquette and behavior. In this society, "civility," the mark of class distinction, was conveyed through bearing, gesture, manners, and speech, as well as social organization and artistic interests, all of which are evident in both visual and verbal representations of individuals.

ART H 450 Women in Italian Renaissance Art (also Women's Studies 451) #
4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
C. Lazzaro.
This seminar examines representations of the Madonna and Child from the fourteenth and fifteenth centuries, the narrative scenes painted on chests and other domestic furniture, biblical and historical heroines such as Judith and Lucretia, portraits of patrician women and courtesans, and violence to women in a political context. It will investigate the contemporary ideas about motherhood, beauty, sexuality, social presentation, and gender roles in society that inform these representations. We will discuss the existing critical frameworks for interpreting them in feminist art history and theory (particularly in Renaissance studies). We will be concerned especially with how visual images are encoded with meaning, what kind of relationship can be established with their historic context, and how they convey social constructs as ideology.

ART H 451 Prints of the Fifteenth through the Seventeenth Century #
4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
C. Lazzaro.
This seminar has several aims: to introduce students to prints—the techniques, styles, and issues of connoisseurship—and to the major printmakers of the period, including Marcantonio Raimondi, Dürer, and Rembrandt; to give students first-hand experience with works of art in the Herbert F. Johnson Museum; and to consider the social and cultural issues raised in the medium of prints and through their unique visual language. These issues include the social hierarchies of class and gender (including witches), moral concerns and superstition, the construction and transmission of notions of antiquity and classicism, and the representation of the urban and rural environment. Students will give brief presentations on prints in the collection and longer ones of their own research projects on these and related topics.

ART H 456 Seminar in Baroque Art #
4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
K. Barzman.
This seminar will examine the historical circumstances within which academies of art emerged in Western Europe, with particular attention to official academies of state and their role in the cultural politics of absolutism.

We will also focus on academic debates about art and representation, the codification of programs of study, various practices other than formal study promoted within academies (e.g., drawing after the nude model); the effects of these forms of discipline on social relations among artists, between artists and patrons; and works of art themselves as expressions of academic discourse on truth, nature, the body, and (ultimately) the body politic. Topics may also include the transformation of academies as training programs for professional and amateur artists from the sixteenth through twentieth centuries.

ART H 457 The Sexed Body in Western Art (also Women's Studies 457) #
Fall. 4 credits. K. Barzman.
This course examines the mapping of sex onto bodies in Western art, and compares representational practices that have been said to divide "the pornographic" from "legitimate" representations of "the nude." Readings range from Genesis to Freud and Foucault; images, from "Old Master" paintings to film, video, and performance art.

ART H 461 Fin-de-siecle Cultures in Europe, England, and America #

ART H 462 Topics in Early Modernism #
Fall. 4 credits. Prerequisite: permission of instructor. Auditing is not permitted. Not open to freshmen or sophomores. Not offered 1998-99. L. L. Meixner.

ART H 463 Studies in Modern Art #
4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
J. F. Bernstock.

ART H 464 Studies in Modern Art #
Spring. 4 credits. Prerequisite: Art History 365 and permission of instructor. Auditing is not permitted. J. F. Bernstock.
Topic for 1999: Pop Art Criticism. This seminar will focus on criticism of pop art since the early sixties—how it has changed and how it has affected the public's reception of the works of art.

ART H 466 Women Artists (also Women's Studies 404) #
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
J. F. Bernstock.
This seminar will be devoted to a study of the work of women artists from antiquity to the present. The works of the most prominent women artists from each period will be studied in relation to the changing roles of women in society. The artists to be studied include Jennifer Bartlett, Artemisia Gentileschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger.

ART H 476 Seminar in American Art #

ART H 481 Art of the Tang Dynasty (also Classics 418) #
Fall. 4 credits. A. Pan.
This seminar examines art and culture of the Tang dynasty, one of China's golden ages, by focusing on new archaeological discoveries and important museum objects. The course is...
ART H 490 Art and Collecting: East and West

Fall. 4 credits. K. McGowan.

This seminar will consider in detail the relationship between art and society in China after the collapse of Imperial power. The focus will be on the development in the art of painting, particularly painting of the contemporary period, but other art forms that had a large impact on the formation of a modern viewpoint will be examined and discussed. Background lectures will cover the earlier landscape tradition, the rise of the literati culture, and the development of critical theories about the arts of painting, calligraphy, and poetry. Seminar topics will investigate the impact of Western thought on Chinese aesthetics, the role of photography and the wood-block print medium in changing the perceptions of the West about China, the response of the Chinese artists to the political upheavals of the early twentieth century, the artists in the service of the state, and the arts since the end of the Cultural Revolution. Weekly readings and class discussion expected, with a final research paper to be developed for presentation.

ART H 494 Feminist Theory and the History of Art

Seminar participants will examine the impact of feminist theory on art historical practice. Based on critical analysis of texts from the early 1970s to the present, we will consider the range of methods employed, the discursive traditions to which they belong (e.g., liberal, Marxist, psychoanalytic, poststructuralist), the relative merits of the methods, and the interpretive problems they present. At the graduate level, some additional meetings and work required.

ART H 520 Seminar in Classical Archaeology (also Classics 630 and Archaeology 520)

ART H 531 Problems in Medieval Art and Architecture (also Religious Studies 531)

Spring. 4 credits. Prerequisite: permission of instructor. R. G. Calkins.

Topic for spring 1999: Archaeology of the Book. A detailed investigation of the methods and procedures of examining medieval illuminated manuscripts. Emphasis will be on understanding the hand written book as a functioning object: its production, decoration, use, and reception. Students will conduct research on a facsimile of a medieval manuscript amongst those housed in the Rare and Manuscript Collections, Kroch Library. Discussions, reports on readings and presentations of research paper in class.

ART H 540 Seminar in Renaissance Art

ART H 549 Problems in Interpretation in Italian Renaissance Art

This seminar will examine assumptions about meaning and how meaning is produced in Renaissance art. Various interpretative strategies will be examined, among them iconographic, semiotic, feminist, and psychoanalytic, within a specifically Renaissance literary, intellectual, and social context. Texts by Panofsky and critical discussions of them, Baxandall, Bryson, and others will be read and discussed with reference to particular works of art. The seminar is intended primarily for graduate students in all areas of the history of art and those in other disciplines with an interest in the Italian Renaissance. Senior History of Art majors with background in the Italian Renaissance are also welcome.

ART H 555 Baroque Ephemera and Public Performance

SprinC. 4 credits. Prerequisite: permission of instructor. K. Barzman.

This course explores the means by which "baroque" systems of display constitute virtual realities—the hyper-real of early modern and modern spectacle, with its dazzling forms of address intended to engender awe and to guide individuals and corporate bodies to specific ends. Media will include painting, sculpture, architecture, film, and staged events (parades, executions, etc.) within which subjects enter the field of spectacle.

ART H 571 African Aesthetics (also AS&RC 503)

For description, see AS&RC 503.

ART H 580 Problems in Asian Art (also Asian Studies 602 and Religious Studies 580)

Spring. 4 credits. Prerequisite: permission of instructor. K. McGowan.

Topic for spring 1999: Water: Art and Politics. This seminar will focus on the significance of water—economic, religious, political, social—and its role in the art and architecture of Mainland and Island Southeast Asia. While India and China can be seen to provide aquatic themes and patterns for transformation, the emphasis in this course will be on local ingenuity, how technologies of water use and control at ancient sites in Southeast Asia can be seen to shape vivid visual symbologies, past and present.

ART H 591-592 Supervised Reading

Fall or spring. 8 credits. Prerequisite: permission of instructor. K. McGowan.

ART H 600 Honors Work

Fall or spring. 8 credits. Intended for senior art history majors who have been admitted to the honors program. Basic methods of art historical research will be discussed and individual readings assigned, leading to the selection of an appropriate thesis topic.

ART H 601 Honors Work

Fall or spring. 8 credits. Prerequisite: History of Art 600. The student under faculty direction will prepare a senior thesis.

LINGUISTICS

Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences, and much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics and linguistic colleagues in the Departments of Modern Languages and other departments span many of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning; historical linguistics, the study of language change over time; sociolinguistics, the study of language's role in social and cultural interactions; and applied linguistics, which relates the results of linguistic research to problems of bilingual education, second-language learning, and teaching.

Studying linguistics is not a matter of studying many languages. Linguistics is a theoretical discipline with ties to such areas as cognitive psychology, philosophy, logic, computer science, and anthropology. Nonetheless, knowing particular languages (e.g., Spanish or Japanese) in some depth can enhance understanding of the general properties of human language. Not surprisingly, then, many students of linguistics owe their initial interest to a period of exposure to a foreign language, and those who come to linguistics by some other route find their knowledge about languages enriched and are often stimulated to embark on further foreign language study.

Students interested in learning more about linguistics and its relationship to other disciplines in the humanities and social sciences are encouraged to take Linguistics 101, which is a prerequisite for most other courses in the field, or one of the freshman writing seminars offered in linguistics (on topics such as metaphor, American Sign Language, and the science of language). Linguistics 101 or equivalent or permission of instructor. Most 100- and 200-level courses have no prerequisites and cover various topics in linguistics (e.g., Ling 118 Varieties of Human Language, Ling 216 Mathematical Linguistics) or focus on the linguistics of a particular geographic region or historical development of particular languages (e.g., Ling 217 History of the English Language, Ling 230 Introduction to Southeast Asian Languages and Linguistics). Some of these courses also fulfill the breadth requirements.

Tales and discussions about linguistics are offered through the Undergraduate Linguistics Forum and the Cornell Linguistic Circle. These meetings are open to the university public and anyone wishing to learn more about linguistics is most welcome to attend.

The Major
For questions regarding the linguistics major, contact Professor Molly Diesing (212 Morrill Hall, 255-8635, md20@cornell.edu).

The prerequisite for a major in linguistics is the completion of Linguistics 101 and either Linguistics 201 or 203. The major has its own language requirement, which should be completed as early as possible: qualification in two languages other than English, one of which must be either non-European or non-Indo-European. With approval of the department's director of undergraduate studies, this requirement may be waived (i.e., reduced to the normal arts college language requirement) for students taking the cognitive studies concentration or a double major.

The other requirements for the linguistics major are as follows:

1) Linguistics 201 (Introduction to phonetics and phonology) or Linguistics 203 (Introduction to syntax and semantics), whichever one was not taken as a prerequisite to the major
2) Linguistics 314 (Historical)
3) Three of the following five courses, one of which must be either Phonology I or Syntax I:
   Linguistics 301 (Phonology D)
   Linguistics 303 (Syntax D)
   Linguistics 309 or 310 (Morphology I or II)
   Linguistics 319 (Phonetics D)
   Linguistics 421 (Semantics D)
4) A course at or beyond the 300 level in the structure of English or some other language, or a typological or comparative structure course such as Linguistics 401, 402, or Field Methods (Linguistics 600).
5) One additional linguistics course for at least 4 credit hours, which may be a course with significant linguistic content in a related field.

Honors. Applications for honors should be made during the junior year. Candidates for admission must have a 3.0 (B) average overall and should have a 3.2 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors will complete an honors thesis and take a final oral examination in defense of it. The thesis is usually written during the senior year but may be begun in the second term of the junior year when the student's program so warrants. The oral examination will be conducted by the honors committee, consisting of the thesis advisor and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. Linguistics 493 and 494 may be taken in conjunction with thesis research and writing but are not required.

General Linguistics
Fees: Depending on the course, a small fee may be charged for photocopied texts for course work.

Freshman Writing Seminars
LING 100 Language, Thought, and Reality
For descriptions, see freshman writing seminar brochure.

LING 101 Theory and Practice of Linguistics
Fall or spring. 4 credits each term. M. Diesing.
An introductory course designed to provide an overview of the science of language, especially its theoretical underpinnings, methodology, and major findings. The course focuses on the basic analytic methods of several subfields of linguistics including phonetics, phonology, morphology, syntax, semantics, language variation, language change, and psycholinguistics.

LING 118 Varieties of Human Language
Fall. 3 credits. Not offered 1998-99.
Language diversity has a place in our complex world. Whether spoken by a handful of speakers or by hundreds of millions, each language manages the same tasks of communication and fits in with its social environment. Language identification, literacy, and multilingualism are among the issues touched on.

LING 170 Introduction to Cognitive Science (also Cognitive Studies 101, Computer Science 101, Philosophy 191, and Psychology 102)
For description, see COGST 101.

LING 201 Introduction to Phonetics and Phonology
Spring. 4 credits. Prerequisite: Linguistics 101 or equivalent or permission of instructor. A. Cohn.
An introduction to the study of human speech sounds and how they pattern in languages. The first part of the course will focus on phonetics: the production, acoustics, and perception of speech, with attention to both the common and the less common sounds of the world's languages. The second part of the course will focus on phonology: how human language sounds pattern across languages, with an emphasis on the rules that govern these patterns and their possible representation.

LING 203 Introduction to Syntax and Semantics
Fall. 4 credits. Prerequisite: Linguistics 101 or equivalent or permission of instructor. C. Brisson.
This course focuses on language as a system of knowledge that enables native speakers to create and interpret the structures of their language. Part of the course will consider issues of syntactic structure, such as the order of constituents, the hierarchical organization of grams, and syntactic universals. The other part of the course will focus on meaning and interpretation, addressing such issues as the role of context, how information is structured, and how it is encoded in the syntax.

LING 212 Language and Culture
We often assume that there is a close relationship between differences in language and cultural variation. This course focuses on that relationship, beginning with an examination of the linguistic relativity hypothesis.
which poses a link between basic properties of languages and crosscultural differences in world view. We also examine potential cultural determinants of variation in language: pronouns and honorific systems, systems of ritual and taboo in language, and the impact of narrative organization on grammar. Special attention is paid to "extreme" forms of language: invented languages from Esperanto to Klingon; glossolalia and trance languages; language games and secret languages.

[LING 215/715 Psychology of Language (also Psychology 215)]
For description, see PSYCH 215.

[LING 216 Mathematical Linguistics]
A. Zucchi.
The course is an introduction to the mathematical concepts and techniques most frequently used in theoretical linguistics.

[LING 244 Language and Gender (also Women's Studies 244)]
Spring. 4 credits. For non-majors or majors. S. McConnell-Ginet.
This course explores connections between language (use) and gender/sex systems, addressing such questions as the following: How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women's and men's roles affect their language use, their relation to language change? What is meant by sexist language? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and general women's studies and feminist theory.

[LING 246/546 Minority Languages and Linguistics]
W. Harbert, W. Browne, V. Cantens, M. Diesing, and M. Butler.
This course examines minority languages from linguistic, social, and political perspectives. Topics discussed include language death, language maintenance, bilingualism, language contact, official status, and related issues. Languages considered may be Spanish in the U.S., Celtic languages, African languages, Yiddish, and others, depending on the special interests of the instructors.

[LING 264 Language, Mind, and Brain]
Fall. 4 credits. For non-majors or majors.
Prerequisite: a basic course in linguistics and/or psychology is desirable. J. Bowers.
An introductory course that emphasizes the formal structure of natural language and its biological basis. The following topics are covered: the formal representation of linguistic knowledge, principles and parameters of universal grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language acquisition. The course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics that concentrates on the formal principles that govern linguistic knowledge, along with some discussion of their biological realization and their use in perception and production.

[LING 270 Truth and Interpretation (also Cognitive Studies 270 and Philosophy 270)]
For description, see PHIL 270.

[LING 301-302 Phonology I, II]
301, fall; 302, spring. 4 credits each term.
Prerequisites: Linguistics 101 or equivalent; for Linguistics 302, Linguistics 301 or permission of instructor. D. Zec.
301 provides a basic introduction to phonological theory. The first term of the course focuses on basic principles of phonology: patterns of sounds, and their representations. In the second half, the nature of syllable structure and feature representations are explored. 302 provides further refinement of the issues investigated in 301, focusing in particular on metrical theory, Lexical Phonology, autosegmental phonology, and Prosodic Morphology.

[LING 303-304 Syntax I, II]
303, fall; 304, spring. 4 credits each term.
Prerequisites: for Linguistics 303, Linguistics 203; for Linguistics 304, Linguistics 303 or permission of instructor. C. Collins.
303 is an introduction to syntactic theory, with emphasis on the classical theory of transformational grammar. 304 is an advanced course, surveying recent syntactic models and dealing with such issues as the nature of syntactic representation, levels of representation, principles of universal grammar, and the relation of syntax and semantics.

[LING 306 Functional Syntax]
Fall. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. Not offered 1998-99.
A general survey of syntactic theories that highlight grammatical function and reveal its role in discourse structure.

[LING 309 Morphology]
Spring. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. V. Carstens.
A general survey course, focusing on the relationship of meaning and form in morphology and introducing techniques of morphological analysis. Research on form-meaning questions is discussed.

[LING 310 Morphology II]
Fall. 4 credits. Prerequisite: Linguistics 203 or permission of instructor. Not offered 1998-99.
Staff.
Considers recent discussions in morphological theory, in particular the relationship of morphology and syntax.

[LING 314 Introduction to Historical Linguistics]
Spring. 4 credits. Prerequisite: Linguistics 201 or permission of instructor. J. Whitman.
A survey of the basic mechanisms of linguistic change, with examples from a variety of languages.

[LING 319 Phonetics I]
Fall. 4 credits. Prerequisite: Linguistics 201 or permission of instructor. J. Watkins.
Provides a basic introduction to the study of phonetics. Topics to be covered include anatomy and physiology of the speech production apparatus, transcription and production of some of the world's sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, stress and intonation.

[LING 320 Phonetics II]
Spring. 4 credits. Prerequisite: Linguistics 319 Not offered 1998-99.
A. Jongman.
This course is a continuation of Phonetics I and provides a more detailed survey of some areas in acoustic and articulatory phonetics. Topics include feature theory, vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, coarticulation, theories of speech production, and prosody. In addition, a number of "hands-on" projects will be part of the course.

[LING 325 Pragmatics]
Fall. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. S. McConnell-Ginet.
An introduction to the study of such topics as speech acts, presupposition, deixis, implicatures, and conversational strategies.

[LING 344 Non-Linear Syntax]
Fall. 4 credits. Prerequisite: Linguistics 305 or equivalent. Not offered 1998-99.
C. Rosen.
Analyses of some twenty diverse languages are examined with the aim of building a formal account of the syntactic constructions existing in the world's languages, and discerning universals that delimit this inventory. Non-linear theory, designed for comparative work, depicts constructions in the abstract, not imagining them as arrays of elements in space. Simultaneously it studies the morphosyntactic systems that relate constructions to their linear realizations.

[LING 350 Representing Language: Knowledge Taught and Untaught (also Cognitive Studies 350)]
Fall. 4 credits. J. Gair.
This course will deal with some of the discoveries made in modern linguistics that reveal some fundamental properties of human language and the special human capacity for it, as well as some of the still unsettled questions about it. It will also trace some of the paradigm shifts that have occurred within linguistics, and consider some of the ways in which language has been represented, both within the scientific enterprise and outside of it, by contrasting what is known with what is popularly believed to be true. Projected topics will include: inattention vs. language as socio-cultural; language variability and Universal Grammar, language change and relatedness of languages; the question of correctness.

[LING 370 Language and Cognition (also Psychology 370)]
Spring. 4 credits. Prerequisite: Linguistics 101 or 264 or Psychology 215, or permission of one of the instructors. Not offered same years as Psychology 416.
Examination of current research on selected topics on language from both linguistic and psychological perspectives. Topics may include: universal grammar and language acquisition, prosodic parsing, word recognition, sentence production, aphasia, and schizophrenia.

[LING 390 Independent Study In Linguistics]
Fall or spring. 1-4 credits variable.
Prerequisite: Linguistics 101 or permission of instructor. Staff.
ARTS AND SCIENCES - 1998-1999

Independent study of linguistics topics not covered in regular curriculum for undergrads.

**LING 401 Approaches to Language Typology I**
Fall. 4 credits. Prerequisite: Linguistics 101 or equivalent. Not offered 1998-99. C. Rosen.
Study of a basic question of contemporary linguistics: in what ways do languages differ, and in what ways are they all alike? Efforts to formalize universals of syntax and to characterize the total repertory of constructions available to natural languages. Common morphological devices and their syntactic correlates. Emphasis on systems of case, agreement, and voice.

**LING 402 Approaches to Language Typology II**
Spring. 4 credits. Prerequisite: a course in syntax. C. Collins.
A seminar on topics focusing on the interaction between linguistic theory and crosslinguistic variation. Topics for 1998: syntactic properties interacting with rich inflection.

**LING 403 Sociolinguistics**
Fall. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. M. Meyerhoff.
The principal work of linguistics is to describe, analyze, and understand the regularities of language systems. How then, are we to deal with irregularities and variability when they are observed in language? This course will introduce and discuss the most significant issues in the study of language variation, and it will examine some of the methodologies that have been developed to study variation in language use. We will consider the observable interactions between linguistic variables and social factors (e.g., age, sex, ethnicity) and review the main generalizations about these factors that sociolinguistics has arrived at in the last three decades. Some of the problems associated with the quantification and measurement of non-linguistic variables will be discussed and we will evaluate the various ways researchers have dealt with these problems.

**LING 404 Ethnolinguistics**
Spring. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. Not offered 1998-99. J. Wolff.
This course will be an introduction to the study of pidgins and creoles and the issues surrounding them both in and beyond linguistics. Topics covered will include: the genesis of pidgins and creoles; classification of pidgins and creoles; creoles and language universals; creoles and sociolinguistic variation; a module on Saramaccan Creole English, autologistic language planning issues; sociological issues; Black English.

**LING 413 Topics in Historical Linguistics #**
Fall. 4 credits. Prerequisite: Linguistics 314 (formerly 410) or permission of instructor. Not offered 1998-99. W. Harbert and C. Rosens
Examinations of recent research illustrating a variety of productive and innovative approaches to problems in historical linguistics. Readings centered on phonological and morphological evolution in the Romance and Germanic families. Students carry out guided research projects.

**LING 421-(422) Semantics I, II**
421, spring. [422. 4 credits each term. Prerequisites: for Linguistics 421, Linguistics 203; for Linguistics 422, Linguistics 421 or permission of instructor. Spring: M. Diesing.
421: An introduction to the semantics of natural language. The course starts from basic foundational questions concerning the nature of meaning and the empirical domain of semantic theory, and then considers semantic and logical theories and their application to the investigation of the structure of natural languages. The course will include a study of pidgin and creole languages and the various ways researchers have been able to describe, analyze, and understand the properties of these languages. Some of the problems associated with the quantification and measurement of non-linguistic variables will be discussed and we will evaluate the various ways researchers have dealt with these problems. The course will also include a seminar in which students will present their own ongoing research and discuss it with their colleagues. Individual topics will be chosen on the basis of interest, experience, and possible future research plans.

**LING 426 Language Development (also Cognitive Studies 436, Human Development and Family Studies 436, and Psychology 436)**
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HDFS 633/Ling 700/PSYCH 600, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. Offered alternate years. B. Lust.
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition in phonology, morphology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of universal grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/LING 450/PSYCH 437).

**LING 450 Lab Course: Language Development (also Cognitive Studies 450, and Psychology 437)**
Spring. 2 credits. Prerequisite: concurrent enrollment in Cognitive Studies 450/LING 450/PSYCH 437. B. Lust.
This laboratory course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies research labs and will meet once a week in group format. It will include several structured modules dealing with topics covered in the course, COGST/LING/PSYCH 436: Language Development. They will include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods in order to test hypotheses.

**LING 493 Honors Thesis Research**
Fall. 4 credits. Staff. May be taken before or after Linguistics 494, or may be taken independently.

**LING 494 Honors Thesis Research**
Spring. 4 credits. Staff. May be taken as a continuation of, or before, Linguistics 493.

**LING 600 Field Methods**
Spring. 4 credits. Prerequisites: Linguistics 201 and 203 or permission of instructor. V. Carstens.
Selected topics in current field methodology.

**LING 601 Topics in Phonological Theory**
Spring. 4 credits. Prerequisites: Linguistics 301 and one higher-level course in phonology. A. C. Miller.
Selected topics in current phonological theory.

**LING 602 Topics in Morphology**
Fall. 4 credits. Prerequisites: Linguistics 301 or 303 or permission of instructor. D. Zec.
Selected topics in current morphological theory.

**LING 604 Research Workshop**
Fall. 4 credits. S-U grade only. Prerequisite: three or more semesters of graduate study in linguistics. V. Carstens.
Participants will present their own ongoing research and discuss it with their colleagues. Individual topics will be chosen on the basis of interest, experience, and probable focus of dissertation research.

**LING 607 Twentieth-Century Approaches to Language**
Fall. 4 credits. Prerequisite: at least one course in linguistics or permission of instructor. Offered alternate years. Not offered 1998-99. L. Waugh, M. Bernal.
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition in phonology, morphology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of universal grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/LING 450/PSYCH 437).

**LING 608 Discourse Analysis (also Comparative Literature 618)**
Spring. 4 credits. Prerequisites: Linguistics 304 or permission of instructor. J. Bowers.
Examination of recent developments in syntactic theory, including "minimalist" approaches to phrase structure, derivations/representations and the nature of economy conditions, and parametric differences.

**LING 616 Syntax III**
Fall. 4 credits. Prerequisite: Linguistics 304 or permission of instructor. J. Bowers.
Examination of recent developments in syntactic theory, including "minimalist" approaches to phrase structure, derivations/representations and the nature of economy conditions, and parametric differences.
LING 632 Seminar in First-Language Acquisition: Cross-linguistic Studies of the Acquisition of Anaphora (also Cognitive Studies 633 and Human Development and Family Studies 633) Fall. 1-4 credits. Prerequisite: Linguistics 436 or equivalent or permission of instructor. Not offered 1998-99. B. Lust. This seminar will review and critique current theoretical and experimental studies of the first-language acquisition of anaphora, with a concentration on insights gained by cross-linguistic study of this area. The seminar will focus on relating current developments in linguistic theory regarding anaphora to current experimental research on first-language acquisition of anaphora. Attention will also be given to the development of research proposals.

LING 637 Experimental Research for Language Scientists Fall. 4 credits. Not offered 1998-99. S. B. Staff. A detailed study of experimental procedures for carrying out research in linguistics, especially in the areas of applied linguistics, phonetics, and language acquisition. Quantitative and qualitative research methods are considered.

LING 648 Speech Synthesis by Rule Spring. 4 credits. Prerequisite: Linguistics 301, 319, or permission of instructor. Offered alternate years. S. Hertz. Investigates the nature of the acoustic structure of speech synthesis, using speech as a tool for exploring this structure. A particular acoustic model will be proposed, developed, and motivated by considering the relationship between phonological and acoustic structure, speech timing, phonetic universals, coarticulation, and speech perception. The primary tool for investigation will be the Delta System, a powerful software system for investigating phonology and phonetics through speech synthesis. The course is meant for graduate students and advanced undergraduates students in linguistics, but may also be of interest to students in psychology/psycholinguistics, computer science, and cognitive studies.

LING 700 Seminar Fall or spring, according to demand. Credit to be arranged. Seminars are offered according to faculty interest and student demand. Topics in recent years have included subject and topic, Montague grammar, speech synthesis, lexicography, classical and autonomous phonology, Japanese sociolinguistics, relational grammar, semantics and semiotics, and others.

LING 701-702 Directed Research 701, fall; 702, spring, 1-4 credits. Hours to be arranged. Staff.

LING 773-774 Proseminar in Cognitive Studies I, II (also Cognitive Studies 773-774, Computer Science 773-774, Philosophy 773-774, Psychology 773-774) Fall. R grade; spring 5-U only. 4 credits. Staff. This year-long seminar is intended to provide graduate students with an interdisciplinary introduction to the study of knowledge, its representation, acquisition, and use.

LINGUISTICS 455

LING 622-624 Old Irish I, II 622, fall; 624, spring. 4 credits each term. Prerequisite for 624: 623 or permission of instructor. Not offered 1998-99.

LING 625 Middle Welsh Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99. W. Harbert. Stuocs will develop a reading knowledge of Middle Welsh through reading prose and poetic texts with emphasis on prose tales, including the Mabinogion.

LING 627 Advanced Old Irish

Chinese

CHIN 427 Structure of the Chinese Language @ Fall or spring. 4 credits. Prerequisite: proficiency in Chinese or permission of instructor. Not offered 1998-99. H. Tao. This course is an introduction to the structure of Chinese and to general issues related to Chinese linguistics. Special attention will be paid to Chinese discourse and pragmatics and to general questions of language use.

English

LING 217 History of the English Language # Spring. 4 credits. W. Harbert. This course explores the development of the English language from its Indo-European beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old English, Middle English, Standard English, dialects, and World Englishes.

LING 311 The Structure of English: Demystifying English Grammar Spring. 4 credits. C. Collins. Do you suffer from grammatical insecurity? In foreign language classrooms, do you find yourself at a loss because you don’t know how grammatical terminology applies to English? This course will make English grammar accessible and comprehensible to native speakers who want to understand how the language they use so easily works. In addition to standard grammatical notions, the course will consider dialectal variation, matters of style, how sentence structure conveys viewpoint, and other discourse phenomena.

LING 455

French

The Major

The French major has three separate tracks: the literature track, the area studies track, and the linguistics track. The linguistics track is described here; for the literature and area studies tracks, see the description under Romance Studies. The major in French linguistics is designed to give students proficiency in the oral and written language and to develop skills in the linguistic analysis of French.
While prospective majors should try to plan their programs as far ahead as possible, no student will be refused admission merely because of a late start. It is even possible for a student to begin French and/or linguistics at Cornell and become a major. Students are admitted to the major in French linguistics by the director of undergraduate studies of the Department of Romance Studies, Professor Jacques Béreauot, but will be guided by their individual advisers.

The French Linguistics Major

To be admitted to the major, students should have completed Linguistics 101 and French 200, 205, or 213 (or their equivalents) by the end of the sophomore year. It is expected that all students in the major will also take either French 220, 221, or 222, preferably by the end of the sophomore year.

To complete the major, a student must:

1) Acquire a sound degree of competence in French. This competence is demonstrated by the successful completion of French 312 (or its equivalent) or by the passing of a special examination. Typically, students in the major will have taken 312 by the end of their junior year.

2) Take six courses in French, Romance, and general linguistics (in addition to Linguistics 101). These courses will include at least one course concerning the history of French (e.g., Romance Linguistics 321, French 629 [listed under Romance Studies]), one course concerning the structure of French (e.g., French 405, 408, 410, Linguistics 323), and one other course in French linguistics.

3) Take two courses (preferably a sequence) in some allied area, for example, (a) French literature and civilization, (b) psycholinguistics, (c) philosophy of language, (d) French history, culture, music, or history of art or architecture. (This requirement may be waived for students who are double majors in other fields.)

Honors. The honors program encourages well-qualified students majoring in French linguistics to do independent study work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not practically possible in the case of course papers.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 429–430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

[FRDML 408 Linguistic Structure of French I]
Fall. 4 credits. Prerequisite: qualification in French and Linguistics 101 or Linguistics 400, or permission of instructor. Offered alternate years. Not offered 1998–99. W. Harbert.

A synchronic study and analysis of modern French, with emphasis on its phonology and morphology.

[FRDML 410 Linguistic Structure of French II: Semantics, Pragmatics, and Discourse Analysis]
Fall. 4 credits. Prerequisite: qualification in French. Offered alternate years. Not offered 1998–99. L. Waugh.

A synchronic study and analysis of modern French, with emphasis on semantics, pragmatics, and discourse analysis.

[FRDML 700 Seminar in French Linguistics]
Spring, according to demand. Credit to be arranged.

Seminars are offered according to faculty interest and student demand. Topics in recent years have included current theories in French phonology, current theories in French syntax, and semantics of French.

[LING 232 The French Language Today (also French 232)]

This course will cover a wide variety of topics relating to the Yiddish language and Yiddish culture, including the structure of Yiddish, the history of the Yiddish language, Yiddish in America (the Yiddish revival, the role of the Yiddish press, etc.), Yiddish as a minority/dying language, and the influence of Yiddish on present-day American English. No previous knowledge of Yiddish required.

[LING 15–16 Old Norse]
315, fall; 316, spring. 4 credits each term. E. Johansson.

Old Norse is a collective term for the earliest North Germanic literary languages: Old Icelandic, Old Norwegian, Old Danish, and Old Swedish. The richly documented Old Icelandic will be the center of attention, and the purpose is twofold: the student will gain (a) knowledge of an ancient North Germanic language, important from a linguistic point of view, as well as (b) access to the medieval Icelandic (and Scandinavian) literature.

315. The structure of Old Norse (Old Icelandic), phonology, and morphology, with reading of selections from the Prose-Edda, a 13th-century narrative based on the Eddaic poetry. 316. Extensive reading of Old Norse texts, among them selections from some of the major Icelandic: family sagas: Njal's saga, Grettis saga, and Egils saga, as well as the whole Hrafnkel's saga.

[LING 441 Introduction to Germanic Linguistics]
Fall. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. Not offered 1998–99.

Survey of major issues in historical Germanic linguistics.

[LING 645 Gothic]
Spring. 4 credits. Prerequisite: Linguistics 101. Offered alternate years. W. Harbert.

Linguistic structure of Gothic, with extensive reading of Gothic texts.

[LING 646 Old High German, Old Saxon]

Linguistic structure of Gothic, with extensive reading of Gothic texts.

[LING 649 Structure of Old English]
Fall. 4 credits. Prerequisite: Ling 441. Offered alternate years. Not offered 1998–99. W. Harbert.

Linguistic overview of Old English, with emphasis on phonology and syntax.

Greek

[LING 451 Greek Comparative Grammar (also Classics 421)]
Fall. 4 credits. Prerequisite: thorough familiarity with the morphology of classical Greek. Not offered 1998–99. A. Nussbaum.

The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

This course surveys the history, structure, and use of the modern Germanic languages (English, German, Dutch, Afrikaans, Swedish, Danish, Icelandic, Norwegian, Faroese, and Yiddish).

LING 241 Yiddish Linguistics (also Jewish Studies 271)
Fall. 4 credits variable. Prerequisite: Linguistics 101 or permission of instructor. M. Diesing.

This course will cover a wide variety of topics relating to the Yiddish language and Yiddish culture, including the structure of Yiddish, the history of the Yiddish language, Yiddish in America (the Yiddish revival, the role of the Yiddish press, etc.), Yiddish as a minority/dying language, and the influence of Yiddish on present-day American English. No previous knowledge of Yiddish required.
A survey of the dialects of ancient Greek through the reading and analysis of representative epigraphical and literary texts.

LING 457 Homeric Philology (also Classics 427) #
Spring. 4 credits. Prerequisite: ability to read Homeric Greek. A. Nussbaum. The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a Kunstsprache: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.

LING 459 Mycenaean Greek (also Classics 429) #
4 credits. Prerequisite: thorough familiarity with the morphology of Classical Greek. Not offered 1998-99. A. Nussbaum. An introduction to the epigraphy, language, and content of the Linear B tablets with special attention to their implications for Greek historical grammar and dialectology.

Hungarian

LING 427 Structure of Hungarian (also Hungarian 427)
Fall. 4 credits. Prerequisite: Ling 101 or equivalent. Offered alternate years. W. Browne. Survey of phonology, morphology, and syntax of this non-Indo-European language. Topics to be stressed include vowel harmony, consonant assimilation; definite and indefinite conjugations, possessives, verb prefixes, causatives; focus, word order, clause types, movement, intonation.

Indo-European

LING 131-132 Elementary Sanskrit (also Classics 131-132 and Sanskrit 131-132)
Not offered 1998-99. For description, see SANSK 131-132.

LING 251-252 Intermediate Sanskrit (also Classics 251-252 and Sanskrit 131-132) @ #
For description, see SANSK 131-132.

LING 460 Sanskrit Comparative Grammar
Spring. 4 credits. Prerequisite: reasonable familiarity with the morphology of Classical Sanskrit. A. Nussbaum. A survey of the historical phonology and morphology of Sanskrit in relation to the Indo-Iranian and Indo-European comparative evidence.

LING 617-618 Hittite
617, fall; 618, spring. 4 credits each term. Prerequisites: for Linguistics 617, permission of instructor; for Linguistics 618, Linguistics 617 or permission of instructor. Not offered 1998-99.]

LING 619 Rigveda

LING 631 Comparative Indo-European Linguistics

LING 635-636 Indo-European Workshop
635, fall; 636, spring. 4 credits each term. Prerequisite: permission of instructor. Not offered 1998-99. A. Nussbaum. An assortment of subjects intended for students with previous training in Indo-European linguistics: problems in the reconstruction of Proto Indo-European, topics in the historical grammars of the various IE languages, reading in historical linguistic analysis of texts, and grammatical sketches of "minor" IE languages.

Italian

ITALA 403 Linguistic Structure of Italian
Fall. 4 credits. Prerequisites: Linguistics 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 1998-99. C. Rosen. Survey of Italian syntax, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modalis, clitics, reflexive constructions, agreement, impersonal constructions, causatives.

ITALA 404 History of the Italian Language
Spring. 4 credits. Prerequisites: Linguistics 321 and either Italian 201, 203, or equivalent. Offered alternate years. Not offered 1998-99. C. Rosen. Overview of Italian and its dialects from the earliest texts to the present day. Emergence of the standard language. External history and sociolinguistic circumstances.

Japanese

LING 404 Linguistic Structure of Japanese (also Japanese 414)
@
Fall. 4 credits. Prerequisites: Japanese 102 or permission of instructor and Linguistics 101 or equivalent introductory course in linguistics. Offered alternate years. Not offered 1998-99. J. Whitman. Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

LING 411 History of the Japanese Language (also Japanese 410)
@ #
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1998-99. J. Whitman. An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

Korean

LING 430 Structure of Korean (also Korea 430)
Spring. 4 credits. Offered alternate years. Not offered 1998-99. J. Whitman. Intensive examination of the syntax and phonology of a non-Indo-European language with the objective of testing principles of current linguistic theory. No previous knowledge of Korean required.

Latin andItalic

LING 452 Latin Comparative Grammar (also Classics 422)
Fall. 4 credits. Prerequisite: thorough familiarity with the morphology of classical Latin. A. Nussbaum. The prehistory and evolution of the sounds and forms of classical Latin as reconstructed by comparison with the other Indo-European languages.

LING 454 Italic Dialects (also Classics 424) #
Fall. 4 credits. A. Nussbaum. The phonology and morphology of Faliscan, Oscan, and Umbrian studied through the reading of epigraphical texts. Attention to the relations of these languages to Latin and the question of proto-Italic.

LING 456 Archaic Latin (also Classics 426) #
Fall. 4 credits. Prerequisite: reading knowledge of Latin. Not offered 1998-99. A. Nussbaum. Reading of epigraphic and literary preclassical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy; the rudiments of Latin historical grammar, and aspects of the development of the literary language.

Romance

LING 321-322 History of the Romance Languages (also Lang 321-322) #
321: fall; 322: spring. 4 credits each term. Prerequisites: Linguistics 101 or equivalent and qualification in any Romance language. Offered alternate years. C. Rosen.

LING 323-324 Comparative Grammar of the Romance Languages (also Lang 323-324)
323, fall; 324, spring. 4 credits. Prerequisites: Linguistics 101, or equivalent and qualification in any romance language. Offered alternate years. Not offered 1998-99. C. Rosen. Concise survey of romance syntax, covering the salient constructions in six languages with equal attention to their historical evolution and their current state. Grammatical innovation and divergence in a typological perspective.

Russian and Slavic

LING 417-[418] History of the Russian Language (also Russian 401-402) #
417, spring; 418B. 4 credits each term. Prerequisites: for Ling 417, permission of instructor for Ling 418. Ling 417 or equivalent. Offered alternate years. W. Browne.
Phonological, morphological, and syntactic developments from Old Russian to modern Russian.

[LING 443-444] Linguistic Structure of Russian (also Russian 403-404)
443, fall; 444, spring. 4 credits each term. Prerequisites: for Linguistics 443, Linguistics 101 and permission of instructor; for Linguistics 444, Linguistics 443 or equivalent. Offered alternate years. Not offered 1998-99. W. Browne.

A synchronic analysis of the structure of modern Russian. Linguistics 443 deals primarily with morphology and its relation to syntax and 444 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.

[LING 671-672] Comparative Slavic Linguistics (also Russian 651-652)
671, fall; 672, spring. 4 credits each term. Prerequisites: for Linguistics 671, Russian 601 taken previously or simultaneously or permission of instructor; for Linguistics 672, Linguistics 671 or permission of instructor. Offered alternate years. Not offered 1998-99. W. Browne.

Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.

[RUSSA 601] Old Church Slavic
Fall. 4 credits. This course is prerequisite to Russian 602. Offered alternate years. Not offered 1998-99. W. Browne.

Grammar and reading of basic texts.

[RUSSA 602] Old Russian Texts

Grammatical analysis and close reading of Old Russian texts.

[RUSSA 700] Seminar in Slavic Linguistics

Topics chosen according to the interests of staff and students.

South Asian

[LING 341] India as a Linguistic Area (also Lang 341)
Spring. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. Not offered 1998-99. J. Gair.

A basic introduction to the linguistic and sociolinguistic character of the subcontinent, with special attention to cross-linguistic family influences and convergence.

[LING 440] Dravidian Structures (also Lang 440)

A comparative and contrastive analysis of the structures of several Dravidian languages.

[LING 442] Indo-Aryan Structures (also Lang 442)
Fall. 4 credits. Prerequisite: Linguistics 101 or permission of instructor. Not offered 1998-99. J. Gair.

Typological discussion of the languages of the subfamily. Specific topics and emphasis may vary depending on the interest of the students.

Southeast Asian

[LING 230] Introduction to Southeast Asian Languages and Linguistics (also Lang 230) @
Fall. 3-4 credits variable. For non-majors or majors. Not offered 1998-99: A. Cohn. J. Wolff.

This is a survey of the languages of Southeast Asia. The goal of this course is to expose students to Southeast Asia as a linguistic area and introduce them to the rich language diversity of the region. It includes three main parts: 1) sociolinguistic and ethnolinguistic issues of language and politics, language and culture, and language use; 2) language structures and typological patterns of the area's languages; 3) historical linguistics, genetic relations between languages, as well as the linguistic effects of language contact and linguistic evidence for prehistory.

[LING 653-654] Seminar in Southeast Asian Linguistics
653, fall; 654, spring. 4 credits each term. Prerequisite: Linguistics 303 or permission of instructor. Linguistics 653 is not a prerequisite for 654. Not offered 1998-99.

Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.

[LING 655-656] Seminar in Austronesian Linguistics
655, fall; 656, spring. 4 credits each term. Prerequisite: Linguistics 101, 110, or permission of instructor. Linguistics 655 is not a prerequisite for 656. Not offered 1998-99.

Descriptive and comparative studies of Malayo-Polynesian languages.

[LING 657-658] Seminar in Austroasiatic Linguistics
657, fall; 658, spring. 4 credits each term. Prerequisite: Linguistics 101, 110, or permission of instructor. Not offered 1998-99.

Descriptive and comparative studies of Austroasiatic languages.

Spanish

The Major

The major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in the linguistic analysis of Spanish. (For the major in Spanish literature see the description under Romance Studies.) Satisfactory completion of the major should enable students to meet language requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, or to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake pre-professional training for graduate study in law, medicine, business, etc. Students interested in a Spanish major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult the director of undergraduate studies for Spanish linguistics, Professor Margarita Suter (218 Morrill Hall).

The Core

All majors will work out a plan of study in consultation with their advisers. Previous training and interests as well as vocational goals are taken into account when the student's program of courses is determined. Spanish 201 and 204 or 212 (or equivalent) are prerequisite to entering the major in Spanish. All majors normally include the following core courses in their programs:

1) Spanish 315-316-318
2) Spanish 311 and 312 (or equivalent)

Spanish majors have great flexibility in devising their programs of study and areas of concentration.

The Linguistic Option

Spanish linguistics, for which the program normally includes at least 20 credits, and at least 8 additional credits in general or Spanish linguistics (such as 366, 405, 407, 408, and others). (Linguistics 101 is recommended before entering this program.) The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

Honors. Honors in Spanish may be achieved by superior students who wish to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty engaged in Spanish literature or linguistics to supervise their work and direct the writing of their honors essays (see Spanish 429-430).

LING 366 Spanish in the United States (also SpanD 366, SpanRom 366, and Latino Studies Program 366)
Spring. 4 credits. Prerequisite: some knowledge of Spanish. M. Suñer.

Examination of major Spanish dialects in the United States from a linguistic perspective. Contrast with the standard language. Borrowing, interference, and code switching. Syntactic, morphological, and phonological characteristics. Sex-related phenomena.

LING 407 Grammatical Structure of Spanish I (also SpanD 407 and SpanRom 407)
Spring. 4 credits. Prerequisite: proficiency in Spanish or permission of instructor. Not offered 1998-99. M. Suñer.

This course seeks to equip the advanced student or the future language professional with practical insights into problem areas for foreign language learners with the aid of linguistic descriptions. The intent is to narrow the gap known to exist between the knowledge that a native speaker has and the incomplete one that a foreign language learner possesses.

LING 408 Grammatical Structure of Spanish II (also SpanD 408 and SpanRom 408)

Survey of Spanish morphology using contemporary theoretical models to highlight hidden patterns and generalizations. Topics may vary according to students' interests, but may include major clause types, word order possibilities, negation, agreement, and null categories.
c) (Concentration in Operations Research) five additional courses from iii) and iv) below, of which at least one is from iii) and three are from iv)

iii) Mathematics courses numbered 500 or above

iv) courses in Operations Research and Industrial Engineering, typically from 320-361 (excluding 350) and/or out of 431-472.

d) (Concentration in Economics) An appointed committee of the Department of Mathematics has recently developed and submitted a plan for a concentration in economics. The plan is available in the Mathematics Department office and on the World Wide Web homepage (http://math.cornell.edu). It is expected that, perhaps after some revision, this plan will be approved and adopted in Fall 1998. Meanwhile, students interested in the concentration are encouraged to put together a suitable individual program with the major advisor, using this plan as an example or guideline.

These four alternatives do not exhaust the possibilities. A mathematics major interested in a concentration in a subject different from those above may develop a suitable individual program in consultation with the major advisor.

5) One course dealing with mathematical models. Any course from outside mathematics with serious mathematical content and dealing with scientific matters, provided the course has not been used toward satisfying the previous requirement, e.g., Physics 208, 213, or 217 (but not 112 or 207), or Computer Science 211 (if Computer Science option not used above). Students may consider courses from biology, chemistry, economics, and other fields; they should consult their advisor.

A course may be counted toward the mathematics major only if a grade of C- or better is received for that course.

Major advisers can alter these requirements upon request of an advisee, provided the intent of the requirements is met.

Honors Program

The Department of Mathematics awards honors (cum laude) and high honors (magna cum laude and summa cum laude) to graduating mathematics majors who have demonstrated outstanding ability in the major program.

The awards are determined by the Mathematics Major Committee in the latter part of the semester prior to graduation. Normally, one requirement for honors is participation in the Honors Seminar (Math 401) for one semester, or independent study at a high performance level. The committee will also be looking for excellent performance in mathematics courses, particularly in challenging courses at the 400-level or beyond. Students interested in honors should consult their major advisers concerning suitable courses.

To be considered for high honors, a student usually will be expected to write a Senior Thesis, and present it orally to the department.
This project is carried out during the senior year under the supervision of a member of the Mathematics Department faculty. Students interested in high honors should consult their major advisers and the Mathematics major director during the second semester of their junior year.

**Teacher Education in Agriculture, Mathematics and Science (TEAMS)**

Students at Cornell may pursue teaching credentials in biology, chemistry, earth science, general science, mathematics, and physics. TEAMS is a university program jointly conducted by the Departments of Education and Mathematics. Although TEAMS offers options for undergraduate and graduate study, most students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates. Students who complete their undergraduate studies and their student teaching are eligible for provisional teaching certification from the State Education Department, effective for five years. Students completing the graduate program can earn the master's degree required for permanent certification.

For more information, contact the TEAMS Student Support Specialist at 255-9255 or the program coordinator, D. Trumbull (Education) 255-3894.

**Distribution Requirement**

Virtual all mathematics courses can be used to satisfy the Quantitative and Formal Reasoning part of the Distribution Requirements. Explicit exceptions are noted in the beginning of the Arts and Sciences section of the Courses of Study.

**Basic Sequences**

**Precalculus**

**Description**

1) Algebra and trigonometry to prepare students for calculus
   
   Mathematics 109 or EDUC 005

2) Algebra, analytic geometry, elements of calculus
   
   MATH 111

**Special-Purpose Sequences**

**Mathematics Course Numbers**

1) Finite mathematics and calculus for biology majors
   
   MATH 105-106

2) Other possible finite mathematics and calculus sequence

**Courses with Overlapping Content**

Because the department offers many courses with overlapping content, students must choose their courses carefully to ensure that they will receive credit for each course they take. Listed below are groups of courses with similar content. Students will receive credit for only one of the courses in each group.

106, 111, 191, 193
112, 122, 192
191, 221, 222, 223, 224, 293
221, 223, 231, 294
332 and 432
550 and 456
321 and 420

**Fees**

In some courses there may be a small fee for computer lab use or for photocopying materials to be handed out to students.

**Summer Courses**

A list of mathematics courses usually offered every summer can be found in the School of Continuing Education and Summer Sessions section of this catalog. Students interested in taking summer courses in mathematics should consult the Mathematics Department (255-4013). A tentative summer listing may be available as early as October.

**Undergraduate Course Offerings**

Foundation courses: 105, 106, 109, 111, 112, 121, 122, 191, 192, 193, 213, 221, 222, 223, 224, 293, 294
world, and beautiful, in that it represents a breathtaking attempt of the human mind to capture the infinitely large and the infinitely small.

These courses seek to provide basic understanding, technical skills and sample applications in various fields for the very broad range of students who take them. Topics are studied (as appropriate) by analytic, numerical and graphical methods. These courses usually have several sections with small-group processing. (See the Supplement to the Course and Room Roster.)

MATH 111 Calculus
Fall, spring. 4 credits. Prerequisites: Mathematics 109 or three years of high school mathematics, including trigonometry. Functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic and exponential functions. Applications of differentiation, including graphing, max-min problems, tangent line approximation, implicit differentiation, logarithmic applications to the sciences. The mean value theorem. Antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus, substitution in integrals, curve analysis. Graphing calculators will be used, and their pitfalls will be discussed, as applicable to the above topics.

Mathematics 111 can serve as a one-semester introduction to calculus or as part of a 2-semester sequence in which it is followed by Mathematics 112 or 122.

MATH 112 Calculus
Fall, spring. 4 credits. Prerequisites: Mathematics 106 or 111 with a grade of C or better. Those who do well in Mathematics 111 should take 122 instead of 112, unless they plan to continue with 213.

Integration: applications, including volumes and arc length: techniques of integration, approximate integration with error estimates, improper integrals, differential equations (separable variables, initial conditions, systems, some applications). Infinite sequences and series: definition and tests for convergence, power series, Taylor series with remainder. Parametric equations.

MATH 121 Honors Calculus
Fall. 4 credits. Prerequisite: three years of high school mathematics with average grade of A- or better, or permission of the department.

This is a first-semester course in calculus intended for students who have been quite successful in their previous mathematics courses. The syllabus for the course is quite similar to that of Mathematics 111; however, the approach is more theoretical and the material will be covered in greater depth.

MATH 122 Honors Calculus
Fall, spring. 4 credits. Prerequisite: one semester of calculus with a high performance or, permission of the department. Students planning to continue with Mathematics 213 are advised to take 112 instead of this course.

Differentiation and integration of elementary transcendental functions, if the techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems. The approach is more theoretical than in Mathematics 112.

MATH 150 From Space to Geometry
Fall. 3 credits. Over the centuries mathematicians have interpreted the concept of "space" in numerous ways. This course will survey some of these approaches from the time of Euclid to the later perspective of non-Euclidean systems. We will evaluate the impact of these viewpoints on such concepts as distance, angle measurement, straightness and curvature, dimension, and surface. We will make and analyze models to get a feel for the concepts and to assess the relevance of various approaches to geometry.

MATH 171 Statistical Theory and Application in the Real World
Fall, spring. 4 credits. Prerequisites: high school mathematics. This introductory statistics course will discuss techniques for analyzing data occurring in the real world and the mathematical and philosophical justification for these techniques. Topics include population and sample distributions, central limit theorem, and statistical theories of point estimation, confidence intervals, and testing hypotheses, the linear model, and the least squares estimator. The course concludes with a discussion of tests and estimates for regression and analysis of variance (if time permits). The computer will be used to demonstrate some aspects of the theory, such as sampling distributions and the Central Limit Theorem. In the lab portion of the course, students will learn and use computer-based methods for implementing the statistical methodology presented in the lectures. (No previous familiarity with the computer is presumed.)

MATH 101 Elementary Logic and Formal Proof

The course will explore, from an elementary viewpoint, several topics selected by the instructor from the following list: sets and relations, mathematical induction, cardinal numbers and the notion of infinity, formal and informal proofs and their roles in mathematics and computer science, introduction to mathematical logic, applications of formal logic to world problems and puzzles. The course is designed for liberal arts students, including those who may be "math-averse." Rather than providing a systematic treatment of formal logic, it attempts to instill an appreciation for mathematics and its uses, as well as some of the important methods by which intuitive notions are developed into precise mathematical statements.

MATH 191 Calculus for Engineers
Fall. 4 credits. Prerequisite: three years of high school mathematics, including trigonometry.

Plane analytic geometry, differential and integral calculus, and applications. This course is restricted to engineering students who have had no previous successful experience with calculus. Students who have had such experience but wish a first-semester calculus course should take MATH 193.

MATH 192 Calculus for Engineers
Fall, spring. 4 credits. Prerequisite: Mathematics 191 or 193.

Methods of integration, polar coordinates, complex numbers, infinite series. Introduction to physical vectors and calculus of functions of several variables.

MATH 193 Calculus for Engineers
Fall, spring. 4 credits. Prerequisite: three years of high school mathematics including trigonometry, plus some knowledge of calculus.

Plane analytic geometry, differential and integral calculus, and applications. Mathematics 193 covers essentially the same topics as 191, but is designed for students with some previous successful experience with calculus.

MATH 213 Calculus
Fall, spring. 4 credits. Prerequisite: Mathematics 111, 122, or 192. Vectors, vector-valued functions, line integrals. Multivariable calculus, multiple integrals. First- and second-order differential equations with applications. Introduction to numerical methods, series solutions of differential equations, elementary partial differential equations. The course is designed for students who wish to master the basic techniques of calculus, but whose major will not require a substantial amount of mathematics.

MATH 221 Linear Algebra and Calculus
Fall, spring. 4 credits. Prerequisite: two semesters of calculus with a grade of B or better, or permission of instructor. Linear algebra and differential equations. Topics include vector algebra, linear transformations, matrices, linear differential equations, as well as an introduction to proving theorems. This course is especially recommended for students who plan to major in mathematics or in a strongly mathematics-related field.

MATH 222 Calculus
Fall, spring. 4 credits. Prerequisite: Mathematics 221.

Vector differential calculus, calculus of functions of several variables, multiple integrals. This course is especially recommended for students who plan to major in mathematics or in a strongly mathematics-related field.

MATH 223 Honors Linear Algebra and Calculus
Fall. 4 credits. Prerequisites: two semesters of calculus with a grade of A- or better, or permission of instructor. Vectors, matrices and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems; quadratic forms, extremum, and manifolds; multiple and iterated integrals. Mathematics 223-224 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses.

MATH 224 Honors Linear Algebra and Calculus
Spring. 4 credits. Prerequisites: Mathematics 223.

Vector fields; line integrals; differential forms and exterior derivative; work, flux, and

*See the list of courses with overlapping content at the end of the introduction.
Density forms, integration of forms over parametrized domains; Green's, Stoke's, and divergence theorems.

**MATH 231 Linear Algebra**
Spring. 5 credits. Prerequisite: Mathematics 111 or equivalent.*

Vectors, matrices, and linear transformations, affine and Euclidean spaces, transformation of matrices, and eigenvalues.

**MATH 281 Deductive Logic (also Philosophy 331)**
Fall. 4 credits.

For description, see PHIL 331.

**MATH 293 Engineering Mathematics**
Fall, spring. 4 credits. Prerequisites: Mathematics 102 plus a knowledge of computer programming equivalent to that taught in Computer Science 100.*

**MATH 294 Engineering Mathematics**
Fall, spring. 4 credits. Prerequisite: Mathematics 293.*

Introduction to partial differential equations, Fourier series, and boundary value problems, with applications. Matrix theory and linear algebra, inner product spaces. May include computer use in solving problems.

**MATH 321 Applicable Analysis**
Fall. 4 credits. Prerequisites: Mathematics 294, or 221 and 222, or 213 and 231.

Graduate students who need mathematics extensively in their work and who have had solid courses in calculus and complex variables should take Mathematics 615–616. With less preparation they should take Mathematics 420 (or 32D-422—f23).* (This course was formerly MATH 421 and has a substantial overlap with MATH 420.)

A survey of some of the mathematical techniques that are of primary use in applications to the physical sciences and engineering. The primary mathematical tool explored in harmonic analysis, including Fourier Series, Fourier Integral, Laplace Transform. The applications will be principally to boundary value problems for ordinary and partial differential equations. Moderately advanced mathematics will be used but explained as the course progresses at an elementary level. Much of the formal mathematical material will be covered in applied courses (e.g., uniform convergence, dominated convergence, complete orthonormal sets) will be thoroughly explained in the course and at the working level.

**MATH 332 Algebra and Number Theory**
Fall. 4 credits. Prerequisites: Mathematics 221, 231, or 294.*

Various topics from number theory and modern algebra, usually including most of the following: Primes and factorization, Diophantine equations, congruences, quadratic reciprocity, continued fractions, rings and fields, finite groups, introduction to arithmetic of the Gaussian integers, and quadratic fields. Motivation and examples for the concepts of abstract algebra are derived primarily from number theory and geometry.

**MATH 336 Applicable Algebra**
Spring. 4 credits. Prerequisites: Mathematics 221, 294, or 231.*

An introduction to concepts and methods of abstract algebra and number theory that are of importance in science and engineering. Applications of the theory to concrete problems will be stressed. The course treats mathematical topics usually selected from the following list: elementary number theory and congruences, groups, fields, partially ordered sets, lattices, graph theory, Boolean algebras, finite machines and languages. Applications discussed usually include at least some of the following: cryptography, primality testing, elementary coding theory, enumeration problems, fast Fourier transform, difference equations. Additional topics and applications may be chosen by the instructor.

**MATH 356 Groups and Geometry**
Spring. 4 credits. Prerequisites: Mathematics 221–222, or Mathematics 293–294.

Groups were invented in the nineteenth century as the set of symmetries of an algebraic or geometric object, and this viewpoint is a central one in modern mathematics. This course studies Euclidean and non-Euclidean (especially hyperbolic) geometry in terms of the groups of symmetries of the relevant spaces. Prior knowledge of groups is not a prerequisite. One aim is to give students experience in modern algebra and geometry (including the geometry of complex numbers) and a sense of the unity of mathematics before they take the 400-level courses. Special care is taken in learning to write proofs. Groups of transformations. Subgroups and cosets. Homomorphisms and isomorphisms. Orbits and fixed points. Frieze groups and wallpaper groups and associated tessellations of the Euclidean plane. Geometry and trigonometry of the hyperbolic plane. Tessellations of the hyperbolic plane.

**MATH 401 Honors Seminar: Topics in Modern Mathematics**
Spring. 4 credits.

This course is a participatory seminar primarily aimed at introducing senior and junior mathematics majors to some of the challenging areas of modern mathematics. The seminar will help students develop research and expository skills in mathematics, which is important for careers in any field that makes significant use of the mathematical sciences (i.e., pure or applied mathematics, physical or biological sciences, business and industry, medicine). The content will vary from year to year.

**MATH 403 History of Mathematics**
Fall. 3 credits. Not offered 1998–99.

The content of these discussions, projects, and oral and written reports. The purpose of this course is for students to step back and to form an overview of the mathematics they have learned.

**MATH 408 Mathematics in Perspective**
Spring. 4 credits. Prerequisite: consent of instructor (intended for senior mathematics majors and other students with strong mathematics backgrounds).

The purpose of this course is for students to step back and to form an overview of the mathematics they have learned.

**MATH 411 Introduction to Analysis**
Fall, spring. 4 credits. Prerequisite: Mathematics 222 or 293–294. Students who need measure theory and Lebesgue integration for advanced probability courses should take Mathematics 413–414 or audit the first few weeks of Mathematics 621. Undergraduates who plan to attend graduate school in mathematics should take 413–414.

An introduction to the theory of functions of real variables, stressing concepts and a logical development of the subject rather than applications. Topics include Euclidean spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, and the Riemann integral. Students who wish to continue study of theoretical analysis upon completion of Mathematics 411 may take, for example, Mathematics 418.

**MATH 413-414 Honors Introduction to Analysis**
413, Fall, 414, Spring. 4 credits each. Prerequisite for 413: Mathematics 222 or 293–294. Prerequisite for Mathematics 414: Mathematics 413.

This sequence, designed for honors students, provides an introduction to the theory of functions of real variables, stressing a rigorous logical development of the subject rather than applications. Topics include metric spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, Fourier series, Riemann and Lebesgue integrals, calculus in several variables, and differentiable forms.

**MATH 418 Introduction to the Theory of Functions of One Complex Variable**
Spring. 4 credits. Prerequisite: Mathematics 222 or 294 or 213. May be offered only in alternate years.

A rigorous introduction to complex variable theory. Complex numbers. Differential and integral calculus for functions of a complex variable, including Cauchy's theorem and the calculus of residues. Elements of conformal mapping.

**MATH 420 Applicable Analysis**
Fall, spring. 4 credits. Prerequisites: high level of performance in Mathematics 294; or 221 and 222; or permission of instructor. Graduate students who need mathematics extensively in their work and who have had solid courses in calculus and complex variables should take Mathematics 615–616. With less preparation they should take Mathematics 420 (or 32D)–422–423.* Ordinary differential equations in one and higher dimensions: qualitative, analytic, and

*See the list of courses with overlapping content at the end of the introduction.
numerical methods, with physical applications. Some important partial differential equations (heat equation, wave equation, and vibrating membrane) and their connections with Fourier series and the Laplacian. Vector calculus and Stokes Theorem with applications to electromagnetism. Mathematics 420 has substantial overlapping content with Mathematics 321, but more strongly emphasizes the mathematical properties of solutions of ordinary differential equations and the approximation to such solutions by numerical and computer methods.

MATH 422 Applicable Analysis
Fall, spring. 4 credits. Prerequisite: Mathematics 420 or 321
Complex variables, Fourier transforms, Laplace transforms. Additional topics may include: An introduction to generalized functions. Applications to partial differential equations.

MATH 423 Applicable Analysis
Spring. 4 credits. Prerequisite: Mathematics 420 or 321; however, students who have not taken 422 should talk to the instructor before taking this course. Normed vector spaces. Elementary Hilbert space theory. Projections. Fredholm’s alternative. Eigenfunction expansions. Applications to elliptic partial differential equations and to integral equations.

MATH 425 Numerical Solutions of Differential Equations
Spring. 4 credits. Prerequisites: Mathematics 222 or 294, one course numbered 300 or higher in mathematics, or permission of instructor.

MATH 427 Introduction to Ordinary Differential Equations
Fall. 4 credits. Prerequisite: Mathematics 222 or 294, or permission of instructor.
Covers the basic existence, uniqueness, and stability theory together with methods of solution and methods of approximation. Topics include singular points, series solutions, Summ-Liouville theory, transform methods, approximation methods, and application to physical problems.

MATH 428 Introduction to Partial Differential Equations
Spring. 4 credits. Prerequisite: Mathematics 222 or 294, or permission of instructor.
Covers the basic existence, uniqueness, and stability theory together with methods of solution and methods of approximation. Topics include singular points, series solutions, Summ-Liouville theory, transform methods, approximation methods, and application to physical problems.

MATH 431-432 Introduction to Algebra
431, fall; 432, spring. 4 credits each. Prerequisite: Mathematics 221 or 231. Prerequisite for Mathematics 432: Mathematics 431 or 433, or permission of instructor. Undergraduates who plan to attend graduate school in mathematics should take 433-434.*
431: An introduction to linear algebra, including the study of vector spaces, linear transformations, matrices, and systems of linear equations; quadratic forms and inner product spaces; canonical forms for various classes of matrices and linear transformations; determinants. 432: An introduction to various topics in abstract algebra, including groups, rings, fields, factorization of polynomials and integers, congruences, and the structure of finitely generated modules over Euclidean domains together with application to canonical forms of matrices.

MATH 433-434 Honors Introduction to Algebra
433, fall; 434, spring. 4 credits each. Prerequisite: Mathematics 221 or 231. Prerequisite for Mathematics 434: Mathematics 433 or permission of instructor.
Honors version of Mathematics 431-432. Mathematics 433-434 will be more theoretical and rigorous than 431-432 and will include additional material such as multilinear and exterior algebra.

MATH 436 Applications of Abstract Algebra
Spring. 4 credits. Prerequisites: Linear algebra (MATH 231 or higher). Familiarity with elementary algebra or number theory such as MATH 352 would also be helpful.* The course is intended for students who would like to learn modern algebra and its applications outside of mathematics. There will be at least as much emphasis on applications as the relevant modern algebra. Frequently, the applications involve or were made possible by the advent of computers. Students who already know the modern algebra covered in the course may still find the applications to be of interest. Specific topics will be chosen by the instructor. The algebra typically includes items drawn from: elementary number theory, polynomials and ring theory, monoids and group theory, real closed fields, algebraic combinatorics, Groebner bases, algebraic geometry, field theory. The applications and related topics typically include: computer complexity theory, coding theory, encryption, discrete and fast Fourier transform, primality testing, factorizing integers and polynomials, root counting and isolation, solving systems of polynomial equations, formal language theory and automata.

MATH 436 and 438 may overlap in choice of material. Where they overlap, the coverage in MATH 436 will be of greater depth appropriate to a 400-level course. Students cannot get credit for both MATH 436 and MATH 438.

MATH 441 Introduction to Combinatorics
Fall. 4 credits. Prerequisites: Mathematics 221, 231, or 294. Not offered 1998-99.

MATH 442 Introduction to Combinatorics
Spring. 4 credits. Prerequisites: Mathematics 221, 231, or 294. Not offered 1998-99.

MATH 451 Euclidean and Spherical Geometry
Fall. 4 credits. Prerequisite: Mathematics 221 or 231 or permission of instructor. Topics from Euclidean and spherical (non-Euclidean) geometry. A non-lecture, seminar-style course organized around student participation.

MATH 452 Classical Geometries
Spring. 4 credits. Prerequisites: Mathematics 221 or its equivalent. This is an introduction to hyperbolic, spherical, and projective geometry—the classical geometries that developed as Euclidean geometry was better understood. For example, the historical problem of the independence of Euclid's fifth postulate is understood when the existence of the hyperbolic plane is realized. Straightedge (and compass) constructions and stereographic projection in Euclidean geometry can be understood within the structure of projective geometry. Topics in hyperbolic geometry include models of the hyperbolic plane and relations to spherical geometry. Topics in projective geometry include homogeneous coordinates and the classical theorems about conics and configurations of points and lines. Optional topics include principles of perspective drawing, finite projective planes, orthogonal Latin squares, and the cross ratio.

MATH 453 Introduction to Topology
Fall. 4 credits. Prerequisites: Mathematics 411 and 221, or permission of instructor. Basic point set topology, connectedness, compactness, metric spaces, fundamental group. Application of these concepts to surfaces such as the torus, the Klein bottle, the Moebius band.

MATH 454 Introduction to Differential Geometry
Spring. 4 credits. Prerequisites: Mathematics 222 or 294, plus at least one mathematics course numbered 300 or above. Mathematics 453 is not a prerequisite. Differential geometry of curves and surfaces. Curvature, geodesics, differential forms. Introduction to n-dimensional Riemannian manifolds. This material provides some background for the study of general relativity, connections with the latter will be indicated.

*See the list of courses with overlapping content at the end of the introduction.

**See the list of courses with overlapping content at the end of the introduction.
applicable topics to be chosen from among
In general, this course will cover various
[MATH 455 Applicable Geometry
Topics include combinations, important
similar topics. Computational aspects of
crystallographic patterns, projections and
Emphasis is on diverse applications and on
procedures in various settings.
[MATH 474 Basic Stochastic Processes
Spring. 4 credits. Prerequisite: Mathematics
Topics are discussed: the structure of colleges and
and lambda-calculus reduction strategies. Topics in
Applications to expert systems and program
MATH 490 Supervised Reading and Research
Fall, spring. 1–6 credits. Supervised research by arrangement with individual professors. Not applicable for material currently available in regularly scheduled courses.
[MATH 472 Statistics
Spring. 4 credits. Prerequisite: Mathematics
Classical and recently developed statistical procedures are discussed in a framework that emphasizes the basic principles of statistical inference and the rationale underlying the choice of these procedures in various settings. These settings include problems of estimation, hypothesis testing, large sample theory.
[MATH 471 Basic Probability
Fall. 4 credits. Prerequisite: Mathematics 221. May be used as a terminal course in basic probability. Intended primarily for those who will continue with Mathematics 472.
Topics include combinations, important probability laws, expectations, moments, moment-generating functions, limit theorems. Emphasis is on diverse applications and on development of use in statistical applications. See also the description of Mathematics 671.
[MATH 481 Mathematical Logic (also Philosophy 431)
Spring. 4 credits. Prerequisite: Mathematics 471 and knowledge of linear algebra such as taught in Mathematics 221. Some knowledge of multivariate calculus helpful but not necessary.
Classical and recently developed aspects of logic are discussed: the structure of colleges and universities, jobs and tenure, professionalism, alternative teaching strategies.
[MATH 482 Topics in Logic (also Philosophy 432)
Spring. 4 credits. Prerequisite: Mathematics 481. Elements of group theory. The rotation group and its representations.
[MATH 483 Intensional Logic (also Philosophy 433)
Fall. 4 credits. Prerequisite: one logic course from the Philosophy Department at the 200 level or higher, one logic course from the Philosophy Department at the 300 level or higher, or permission of the instructor.
For description, see PHIL 432.
[MATH 497 Mathematical Logic (also Philosophy 587)
Fall. 4 credits. Prerequisite: Mathematics 483.
[tips]
MATH 486 Applied Logic (also Computer Science 486)
Spring. 4 credits. Prerequisites: Mathematics 222 or 294; Computer Science 280 or equivalent (as taught as Mathematics 352, 452, 471, and 481), and some additional course in mathematics or theoretical computer science. Propositional and predicate logic, compactness and completeness by tableaux, natural deduction, and resolution. Equational logic. Herbrand Universes and unification. Rewrite rules and equational logic. Knuth-Bendix method and the congruence-closure algorithm and lambda-calculus reduction strategies. Topics in Prolog, LISP, ML, or Nuprl. Applications to expert systems and program verification.
MATH 490 Supervised Reading and Research
Fall, spring. 1-6 credits. Supervised research by arrangement with individual professors. Not applicable for material currently available in regularly scheduled courses.
[MATH 470 Professional Level and Mathematics Education Courses
[MATH 500 College Teaching
Fall. Weeks 1-8: 1 credit. Among the topics covered: basic topics about teaching, such as how to plan recitations, how to prepare lesson plans for lectures, exam design and grading, syllabus planning. Also discussed: the structure of colleges and universities, jobs and tenure, professionalism, alternative teaching strategies.
[MATH 503 History of Modern Mathematics
Spring. 4 credits. Prerequisites: undergraduate algebra and analysis.
Topics in the history of modern mathematics at the level of F. Klein's *Erlanger Programm* and the Kipka-Smale theorem. Generalized functions (Schwartz distributions). Fourier series and Fourier integrals. Saddle point method. Linear operators. Differential operators and integral operators, the equations and eigenvalue problems connected with them and the special functions arising from them. Elements of group theory. The rotation group and its representations.
[MATH 507 Dynamical Systems
Fall. 4 credits.
MATH 518 Smooth Ergodic Theory
Spring. 4 credits.
MATH 618-620 Partial Differential Equations
Fall, spring. 4 credits each.
Basic theory of partial differential equations.
MATH 621 Measure Theory and Lebesgue Integration
Fall. 4 credits.
Measure theory, integration, and Lp spaces.
MATH 622 Applied Functional Analysis
Spring. 4 credits.
Basic theory of Hilbert and Banach spaces and operations on them. Applications.

MATH 628 Complex Dynamical Systems
Various topics in the dynamics of analytic mappings in one complex variable, such as: Julia and Fatou sets, the Mandelbrot set, Mate-Sad-Sullivan’s theory on structural stability. Local theory, including repulsive cycles and the Yoccoz inequality, parabolic points and Ecalle-Voronin invariants, Siegel discs and Yoccoz’s proof of the Siegel Brjuno theorem. Quasi-conformal mappings and surgery. Sullivan’s theorem on non-wandering domains, polynomial like mappings and renormalization, Shishikura’s construction of Herman rings. Puzzles, tableaux and local connectivity problems. Thurston’s topological characterization of rational functions, the spider algorithm, and mating of polynomials.

MATH 631-632-634] Algebra
631, fall; 632, spring; 634, spring. 4 credits each. 634 not offered 1998-99. Expected to be offered 1999-2000. 631: finite groups, field extensions, Galois theory, rings and algebras, tensor and exterior algebra. 632: Wedderburn structure theorem, Brauer group, group cohomology. 634: Dedekind domains, primary decomposition, Hilbert basis theorem, local rings.

MATH 649 Lie Algebras
Fall. 4 credits.

MATH 650 Lie Groups

MATH 651 Introductory Algebraic Topology
Spring. 4 credits.
Fundamental group and covering spaces. Homology theories for complexes and spaces.

MATH 652-653 Differentiable Manifolds

MATH 652-653-654] Algebra
631, fall; 632, spring; 634, spring. 4 credits each. 634 not offered 1998-99. Expected to be offered 1999-2000. 631: finite groups, field extensions, Galois theory, rings and algebras, tensor and exterior algebra. 632: Wedderburn structure theorem, Brauer group, group cohomology. 634: Dedekind domains, primary decomposition, Hilbert basis theorem, local rings.

MATH 661 Geometric Topology
Fall. 4 credits.
An introduction to some of the more geometric aspects of topology and its connections with group theory. Possible topics: surface theory, 3-manifolds, knot theory, geometric and combinatorial group theory, hyperbolic groups, hyperbolic manifolds.

MATH 662 Riemannian Geometry

MATH 671-672 Probability Theory
671, fall; 672, spring. 4 credits each. Prerequisite: a knowledge of Lebesgue integration theory, at least on the real line. Students can learn this material by taking parts of Mathematics 611-612 or 621. Prerequisite for Mathematics 672: Mathematics 671.

MATH 674 Introduction to Mathematical Statistics
Spring. 4 credits. Prerequisites: Mathematics 671 or permission of instructor. Topics include an introduction to the theory of point estimation, consistency, efficiency, sufficiency, and the method of maximum likelihood. Convexity and basic concepts of decision theory are introduced. Concepts of sequential methods may be discussed.

MATH 681 Logic
Spring. 4 credits.
Basic topics in mathematical logic, including propositional and predicate calculus, formal number theory and recursive functions; completeness and incompleteness theorems. Other topics as time permits.

MATH 711-712 Seminar in Analysis
711, fall; 712, spring. 4 credits each.

MATH 713 Functional Analysis
Spring. 4 credits.
Topological vector spaces. Banach and Hilbert spaces, Banach algebras. Additional topics to be selected by instructor.

MATH 715 Fourier Analysis

MATH 717 Applied Dynamical Systems

MATH 722 Topics in Complex Analysis
Spring. 4 credits. Not offered 1998-99. Selections of advanced topics from complex analysis, such as Riemann surfaces, complex dynamics, conformal and quasiconformal mapping. Course content varies.

MATH 728 Seminar in Partial Differential Equations

MATH 731-732 Seminar in Algebra
731, fall; 732, spring. 4 credits each.

MATH 735 Topics in Topology
Fall. 4 credits.
Selection of advanced topics from algebraic topology, and algebraic geometry. Course content varies.

MATH 737 Algebraic Number Theory
Fall. 4 credits.
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 740 Homological Algebra
Spring. 4 credits.

MATH 751-752 Seminar in Topology
751, fall; 752, spring. 4 credits each.

MATH 753-754 Algebraic Topology
753, fall; 754, spring. 4 credits. 754 not offered 1998-99. The continuation of 651. Cohomology, cup products, Poincare duality, higher homotopy groups, fiber bundles, fibrations, vector bundles, characteristic classes, K-theory, spectral sequences, cohomology operations.

MATH 757-758 Topics in Topology
757, fall; 758, spring. 4 credits each.

MATH 761-762 Seminar in Geometry
761, fall; 762, spring. 4 credits each.

MATH 765-766 Differential Geometry
765, fall; 766, spring. 4 credits each. 766 not offered 1998-99.
MATH 781-782 Seminar in Logic
functions of ordinals and higher type objects. Hierarchies. Recursive

MATH 783 Model Theory
Basic results in finite and tree automata, including the algebraic approach to these topics. Buchi automata, with applications to computational theory and decidability problems. Rabin automata and their applications to decidability problems, boolean algebras, linear orderings, topology. Applica­tions of automata theory to theoretical computer science in modal and temporal logic and concurrency.

MATH 784 Recursion Theory
Computability theory and decidability topics. Buchi automata, with applications to computational theory and decidability problems. Rabin automata and their applications to decidability problems, boolean algebras, linear orderings, topology. Applications of automata theory to theoretical computer science in modal and temporal logic and concurrency.

MATH 785 Automata Theory

MATH 786 Proof Theory
Computability theory and decidability topics. Buchi automata, with applications to computational theory and decidability problems. Rabin automata and their applications to decidability problems, boolean algebras, linear orderings, topology. Applications of automata theory to theoretical computer science in modal and temporal logic and concurrency.

MATH 787 Set Theory

MATH 788 Topics in Applied Logic
This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automaton theory proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), non-standard analysis. The student is expected to be familiar with the standard results in graduate level mathematical logic.

MATH 790 Supervised Reading and Research
This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automaton theory proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), non-standard analysis. The student is expected to be familiar with the standard results in graduate level mathematical logic.

MATH 791-792 Seminar in Logic
This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automaton theory proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), non-standard analysis. The student is expected to be familiar with the standard results in graduate level mathematical logic.

MATH 793 Model Theory
This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automaton theory proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), non-standard analysis. The student is expected to be familiar with the standard results in graduate level mathematical logic.

MATH 794 Recursion Theory
This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automaton theory proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), non-standard analysis. The student is expected to be familiar with the standard results in graduate level mathematical logic.
LANG 412 Second Language Assessment
Spring. 4 credits. Prerequisite: permission of instructor. G. Appel.
Teachers are actively and continuously involved in second language learning and performance. To make responsible and valid decisions about students, courses, and programs, an understanding of the nature of second language assessment is necessary. In this course we will treat concepts, processes, and practices fundamental to language evaluation, such as proficiency, placement; evaluating written tests (portfolios, journals, observations, interviews, reporting results (scores, scales, profiles).

LANG 414 Second Language Acquisition I
Fall. 4 credits. Prerequisite: permission of instructor. Y. Shirai.
A survey of the quantitative and qualitative research literature on the acquisition of second, and additional languages, among the adult population. Research carried out in both experimental and natural settings will be considered. Topics include: learner errors; and errors analysis; contrastive analysis hypothesis; developmental and variability patterns in the acquisition of syntax, phonology and morphology, including the potential effects of typological and formal universals; pragmatics and discourse, the lexicon, social and cognitive factors in acquisition, communication and learning strategies; theories of second language acquisition.

LANG 415 Second Language Acquisition II
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1998–99. Y. Shirai.
This course will examine various issues in second language acquisition research that is particularly relevant to foreign language teaching and learning. Topics covered will include: the role of input (listening/reading) vs. output (speaking/writing); implicit vs. explicit learning; negative vs. positive evidence (including the role of error correction); affective factors (motivation, anxiety); individual differences; teachability hypothesis and syllabus construction; the structure of second language proficiency.

LANG 420 Approaches to Discourse (also Comparative Literature 421)
Spring. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, sociology, anthropology, or literary analysis, or permission of instructor. H. Tao.
Learning another language entails using that language—that is, being able to create and understand discourse in that language. Interdisciplinary studies demonstrate that there are patterns of language use above the sentence level in ordinary conversation and other types of spoken interaction as well as in written texts of various sorts. This course will introduce the various discourse approaches to language from the fields of anthropology, sociology, cognitive psychology, literary analysis, linguistics, and philosophy and focus on the major insights that have proven to be most helpful in understanding second language learning and language use. The topics to be covered include: narrative structure, conversation structure, rhetorical structure, information flow in discourse, and language and social interaction.

LANG 425 Corpora and Applied Linguistics
Fall. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, sociology, anthropology, or literary analysis, or permission of instructor. H. Tao.
This course introduces the foundations of studies of language based on large quantities of natural language data, the utility of large corpora for language learning and teaching, and the computational skills needed to carry out applied linguistics research based on language corpora. It will be conducted in both lecture and lab session formats. Topics include: the creation of corpora, coding and tagging of corpora, monolingual vs. parallel corpora, native vs. learner corpora, corpora and language pedagogy, corpora and discourse pragmatics, special issues in East Asian language corpora, corpora and lexicon and grammar.

LANG 440 Semiotics and Texts (also Comparative Literature 440 and French Romance 440)
Spring. 4 credits. Prerequisites: at least one course in linguistics, psychology, anthropology, sociology, literary analysis, or permission of instructor. L. Waugh.
This course is focused on semiotics as it relates to the construction, function, and interpretation of texts of various sorts. Based on the work of Roman Jakobson and Charles Sanders Pierce and their followers, basic issues will be discussed: different definitions of the sign, structure vs. use of signs, nature of meaning, semiotics of grammar, visual and auditory texts, relation between representation and interpretation, issue of arbitrariness vs. motivation, metaphor as a basic principle of textual design, nature of reasoning, and textual basis of knowledge and beliefs. Specific issues will be addressed such as: differences between literary, scientific, and journalistic texts; special nature of poetic texts; translation between texts; other topics to depend on the interests of the students in the course.

LANG 501 Teaching Second Languages
Fall. 3 credits. Note: this course will count as out-of-college credit for College of Arts and Sciences undergraduates. J. Lantolf and staff.
This course is designed primarily for graduate teaching assistants in the Department of Modern Languages who have no prior experience in the teaching of foreign and second languages. It is also open to others interested in language teaching methodology. The course has a general component relevant to the teaching of all second languages as well as a language-specific component tailored to the pedagogical needs of particular languages. Topics include: observing and reflecting upon the language classroom; principles and research in second-language learning; teaching grammar, pronunciation, and vocabulary; teaching reading, writing, and speaking; teaching for proficiency; discourse and language functions; materials preparation, the task-based syllabus, lesson plans; evaluation and testing, student errors and teacher feedback, portfolios, discrete point and integrative tests; learner attitude, aptitude, motivation, and individual differences; learning strategies; individual and small group activities and collaborative learning; culture in the language classroom, and the role of technology in the language classroom.

LANG 609 SLA and the Asian Languages
Fall. 4 credits. Prerequisite: Linguistics 414–415 or permission of instructor. Not offered 1998–99. Y. Shirai.
This course will survey the literature on the acquisition of Asian languages both in first and second language. We will mainly focus on Japanese, Korean, Chinese (Mandarin/ Cantonese), but other languages (Thai, Malay, Vietnamese, Burmese, Tagalog, etc.) may be dealt with, depending on faculty/student interest.

LANG 610 SLA and the Western Languages
Spring. 4 credits. Prerequisite: LANG 414–415 or permission of instructor. J. Lantolf.
An in depth study of the research literature on second language acquisition which focuses on Spanish, French, and German. Special focus will be on the European Science Foundation Project and Canadian French immersion research, as well as on the experimental research carried out on the three languages. Topics include, morphosyntax, phonology, discourse and pragmatics, the lexicon, and sociolinguistic variables.

LANG 700 Seminar
Fall or spring, according to demand. Credit to be arranged. Staff.
Seminars are offered according to faculty interest and student demand. Topics for 1998–99: Grammaticalization and Second Language Acquisition, Input Processing, Hypothesis, Discourse Approaches to Second Language Acquisition.

LANG 701–702 Directed Research
701, fall; 702, spring. 1–4 credits. Hours to be arranged. Staff.

Courses in general linguistics taught by members of the department
LING 319 Phonetics I
Fall. 4 credits. Prerequisite: Linguistics 201 or permission of instructor. J. Watkins.
For description, see Linguistics.

LING 325 Representing Language, Knowledge Taught and Untaught (also Cognitive Studies 350)
Fall. 4 credits. J. Gair.
For description, see Linguistics.

LING 405 Sociolinguistics
Fall. 4 credits. Prerequisite: Linguistics 101, 110, or permission of instructor. M. Meyerhoff.
For description, see Linguistics.

LING 607 Twentieth-Century Approaches to Language
Fall. 4 credits. Prerequisite: at least one course in linguistics or permission of instructor. Not offered 1998–99. M. Bernal, L. Waugh.
For description, see Linguistics.

LING 608 Discourse Analysis (also Comparative Literature 618)
For description, see Linguistics.
Relevant Courses Cross-Listed From Other Departments

LANG 215 Psychology of Language (also Linguistics 215 and Psychology 215) For description see Psychology.

LANG 379 Culture, Language and Thought (also Anthropology 379) Not offered 1998-99. For description see Anthropology.

LANG 436 Language Development (also Human Development and Family Studies 436, Linguistics 436 and Psychology 436) For description see HDFS 436.

LANG 450 LAB: Language Development (also Cognitive Studies 450, Human Development 450, Linguistics 450, and Psychology 437) For description see HDFS 450.

LANG 633 Seminar in First-Language Acquisition: Cross-linguistic Studies of the Acquisition of Anaphora (also Human Development 633 and Linguistics 633) For description see HDFS 633.

Language courses and courses about particular languages, language families, language groups Courses in foreign literatures as well as certain language courses are taught in the following departments.

Africana Studies and Research Center: Swahili
Asian Studies: Chinese, Japanese, Korean, Sanskrit, Vietnamese
Classics: Greek, Latin
German Studies: German
Near Eastern Studies: Akkadian, Arabic, Egyptian, Hebrew, Sumerian, Ugurtic
Romance Studies: French, Italian, Spanish
Russian Literature: Russian

The Full-year Asian Language CONcentration (FALCON Program) offers intensive instruction in Chinese, Japanese, or Indonesian to students wishing to gain fluency in the language in a single year.

Fees A small fee may be charged for photocopied texts for course work in the courses listed below.

Bengali
See also courses listed in this section under South Asian Languages.

BENG 121-122 Elementary Bengali
121, fall, 122, spring. 4 credits each term. Prerequisite: for Bengali 122, Bengali 121 or examination. D. Sudan.
The emphasis is on basic grammar, speaking, and comprehension skills; Bengali script will also be introduced.

BENG 201-202 Intermediate Bengali Reading @
201, fall, 202, spring. 3 credits each term. Prerequisites: for Bengali 201, Bengali 122 or examination; for Bengali 202, Bengali 201 or examination. D. Sudan.
Continuing instruction in grammar with attention to speaking and reading skills.

BENG 203-204 Intermediate Bengali Composition and Conversation @
203, fall, 204, spring. 3 credits each term. Prerequisites: for Bengali 203, Bengali 122 or examination; for Bengali 204, Bengali 203 or examination. D. Sudan.
Continuing instruction in grammar with attention writing skills.

BENG 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. D. Sudan.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BENG 303-304 Bengali Literature I, II
303, fall; 304, spring. 4 credits each term. Prerequisites: Bengali 203-204 or equivalent. D. Sudan.
An introduction to noted Bengali writers. Selections of works by Rabindranath Tagore and Abinidanir Tagore and short stories by Bonaphul will be covered. The course will be devoted to reading these works and developing literary criticism and creative writing in Bengali.

Burmeese
See also courses listed in this section under Southeast Asian Languages.

NOTE: Contact S. Tun in Morrill Hall 405 before classes begin for placement or other testing and organizational information.

Burmese Conversation Practice
103, fall, 104, spring. 2 credits each term. Prerequisites: for Burmese 104, Burmese 103 and Burmese 121. May not be taken alone. Must be taken simultaneously with Burmese 121-122. Satisfactory completion of Burmese 104/122 fulfills the qualification portion of the language requirement. S. Tun.
Additional drills, practice and extension of materials covered in Burmese 121 and 122. These courses are designed to be attended simultaneously with Burmese 121-122 respectively, allowing students to obtain qualification within a year.

BURM 121-122 Elementary Burmese
121, fall; 122, spring. 4 credits each term. Prerequisite: for Burmese 122, Burmese 121. May be taken alone or simultaneously with Burmese 103-104. Satisfactory completion of Burmese 104/122 fulfills the qualification portion of the language requirement. S. Tun.
A thorough grounding is given in all language skills. Listening, speaking, reading, and writing.

BURM 123 Continuing Burmese
Fall. 4 credits. Prerequisite: Burmese 122. Satisfactory completion of Burmese 123 fulfills the qualification portion of the language requirement. S. Tun.
Continuing instruction in conversational and reading skills, to prepare students for 200-level courses.

BURM 201-202 Intermediate Burmese Reading @
201, fall or spring; 202, fall or spring. 3 credits each term. Prerequisites: for Burmese 202, Burmese 122; for Burmese 202, Burmese 201. S. Tun.
Continuing instruction in Burmese, with emphasis on consolidating and extending conversational skills, and on extending reading ability.

BURM 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. S. Tun.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BURM 301-302 Advanced Burmese @
301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for Burmese 301, Burmese 202 or permission of instructor, for Burmese 302, Burmese 301. S. Tun.
Continuing instruction in conversational and literary skills, but with special emphasis on reading. Students encounter various genres and styles of written Burmese. Readings will include articles on current events, and either several short stories or a novel. Focus is on developing reading skills, particularly vocabulary development, consolidating and expanding grammar, and appreciating stylistic and cultural differences.

BURM 303-304 Advanced Burmese II
303, fall or spring; 304, fall or spring. 3 credits each term. Prerequisite: for Burmese 303, Burmese 202 or permission of instructor; for Burmese 304, Burmese 303. S. Tun.
This is a course for students who have good conversational ability in Burmese and some familiarity with Burmese culture, but who need to strengthen reading skills and further enrich their vocabulary. Students will, in consultation with the instructor, be able to select reading materials. There will also be an opportunity for those who need it, to strengthen listening skills, through the study of current films, TV and radio programs in Burmese.

BURM 401-402 Directed Individual Study
401, fall; 402, spring. 2-4 credits variable each term. Prerequisite: permission of instructor. S. Tun.
This course is designed to accommodate the needs of advanced or specialized students and faculty interests. Topics of reading and...
NOTE: Testing for placement, except for those with near-native abilities (particularly those schooled in a Chinese setting up until the age of about 12) takes place in registration week, before classes begin. Time and place will be posted on the Chinese bulletin board opposite Morrill 416. Students with some Chinese schooling who want to obtain 3 or 6 credits for their proficiency will be tested at the beginning of the second week of classes. Again, the time and place will be announced.

CHIN 101-102 Elementary Standard Chinese ('Mandarin')
101; fall; 102; spring. 6 credits each term.
Prerequisite: for Chinese 102, Chinese 101 or equivalent. Since each section is limited to 15-18 students, students missing the first two class meetings without a university excuse are dropped so others may register.
No student will be added after the second week of classes. Satisfactory completion of Chinese 102 fulfills the qualification portion of the language requirement. Staff.
A course for beginners or those who have been placed in the course by examination. The course gives a thorough grounding in conversational and reading skills. Students with some facility in the spoken language (because Chinese is spoken at home) but who do not read characters should take 109-110. Students who read Chinese, but who speak 'dialects,' such as Cantonese or Amoy, should consult with the staff before enrolling.

CHIN 109-110 Beginning Reading and Writing (Standard Chinese)
109; fall; 110; spring. 4 credits each term.
Prerequisites: for Chinese 109, basic conversational Chinese ('Mandarin'), if in doubt, take the placement examination; for Chinese 110, Chinese 109 or equivalent. Students who complete Chinese 110 normally continue with Chinese 209 and 210. Because of high demand for this course, students missing the first two meetings without a university excuse are dropped so others may register. Satisfactory completion of Chinese 110 fulfills the qualification portion of the language requirement. F. Lee Mehta.
This course is intended primarily for students who speak some Chinese (e.g., at home), but who have had little or no formal training. The focus is on characters, reading comprehension, standard grammar, and reading aloud with standard Chinese ('Mandarin') pronunciation.

CHIN 111-112 Beginning Cantonese (Spoken)
111; fall; 112; spring. 3 credits each term.
Prerequisite: for Chinese 112, Chinese 111 or equivalent. Chinese 111-112 only fulfills the qualification portion of the language requirement if the student can also demonstrate a comparable reading ability. Staff.
A course in conversational standard Cantonese (as spoken in Hong Kong and Canton) for beginners. Students need not have a Mandarin background to take this course, but those with elementary reading skills will also be introduced to Cantonese (character) writing.

CHIN 113-114 Beginning Reading for Cantonese Speakers
113; fall; 114; spring. 3 credits each term.
Prerequisite: everyday conversational ability in Cantonese. Completion of 114 satisfies the qualification portion of the language requirement. Staff.
This course is intended primarily for students who speak some Cantonese (e.g., at home), but who have had little or no formal training in writing. The focus is on characters, reading comprehension, standard grammar, and reading aloud with Cantonese pronunciation.

CHIN 201-202 Intermediate Standard Chinese ('Mandarin')
201; fall or summer; 202; spring or summer. 4 credits each term.
Prerequisites: for Chinese 201, Chinese 102 with a grade of C+ or above or equivalent; for Chinese 202, Chinese 201 or equivalent. Satisfactory completion of Chinese 201 fulfills the proficiency portion of the language requirement. Staff.
Continuing instruction in written and spoken Chinese with particular emphasis on consolidating basic conversational skills and improving reading confidence and depth.

CHIN 209-210 Intermediate Reading and Writing
209; fall; 210; spring. 4 credits each term.
Prerequisites: for Chinese 209, Chinese 110 or equivalent; Chinese 210, Chinese 209. Satisfactory completion of 209 fulfills the proficiency portion of the language requirement. After completing 210, students may only take 400-level courses in Chinese. Staff.
Continuing focus on reading and writing for students with spoken background in standard Chinese; introduction of personal letter writing and other types of composition.

CHLIT 213-214 Introduction to Classical Chinese
For description see Asian Studies.

[CHIN 215 Mandarin for Cantonese Speakers]
Fall or spring. 3 credits each term. Not offered 1998-99.

CHIN 300 Directed Studies
Fall or spring. 1-4 credits variable.
Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

CHIN 301-302 High Intermediate Chinese
301; fall; 302; spring. 4 credits each term.
Prerequisites: for Chinese 301, Chinese 202 or equivalent; for Chinese 302, Chinese 301. Staff.
Continuing instruction in spoken Chinese and in various genres and styles of written Chinese.

[CHIN 303-304 Advanced Mandarin Conversation]
303; fall; 304; spring. 1 credit each term.
Prerequisite: Chinese 201-202 or equivalent or permission from instructor. S-U grades only. Not offered 1998-99. Staff.
Conversation and reading practice for students who wish to maintain language skills. Guided conversation and oral composition and translation. Corrective pronunciation drills.

CHIN 411-412 Advanced Chinese: Fiction, Reportage, Current Events
411; fall, 412; spring. 4 credits each term.
Prerequisites: for Chinese 411, Chinese 302 or equivalent; for Chinese 412, Chinese 411. Q. Teng.
Reading, discussion, and composition at advanced levels.

[CHIN 413-414 Advanced Chinese: Focus on Current Events]
413; fall; 414; spring. 3 credits each term.
Prerequisites: for Chinese 413, Chinese 412 or equivalent or permission of instructor; for Chinese 414, Chinese 413. S-U grades only. Not offered 1998-99. Reading and discussion, with a focus on current events. One of the goals of this course is to build reading confidence and speed. The content will partially be determined by student need and interest.

[CHIN 425 Special Topics]
Fall or spring, according to demand. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
A number of different topics in advanced Chinese language, advertised the previous semester, will be offered under this title to accommodate the needs of advanced or specialized students, and take advantage of faculty interests. Topics include: correspondence and composition, excerpts from classical novels, Peking opera, comedy routines, etc. May be repeated for credit.

CHLIT 426 History of the Chinese Language
For description see Asian Studies.

[CHIN 427 Structure of the Chinese Language]
Fall or spring, according to demand. 4 credits. Prerequisite: proficiency in Chinese, or permission of instructor. Not offered 1998-99. H. Tao.
This course is an introduction to the structure of Chinese and to general issues related to Chinese linguistics. Special attention will be paid to Chinese discourse and pragmatics and general questions of language use.

FALCON (Full-year Asian Language CONCen trata tion)
For full information, brochures, etc., see the FALCON secretary 414 Morrill Hall (e-mail: falcon@cornell.edu).
CHIN 160 Introductory Intensive Mandarin

Summer only. 8 credits. Completion of 160 fulfills the qualification portion of the language requirement. Staff.

Introduction to spoken and written Mandarin. Lectures on linguistic and cultural matters, intensive practice with native speakers, and laboratory work. Students who complete this course with a grade of at least B are normally eligible to enroll in Chinese 201.

CHIN 161-162 Intensive Mandarin @

161, fall, 162, spring. 16 credits each term. Prerequisites: for Chinese 161, Chinese 160 or equivalent or permission of instructor, for Chinese 162, Chinese 161. Satisfaction of instruction of Chinese 161 fulfills the proficiency portion of the language requirement. Staff.

Czech

CZECH 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Dutch

DUTCH 121-122 Elementary Dutch

121, fall or summer, 122, spring or summer. 4 credits each term. Prerequisite: permission of instructor. M. Briggs.

Intensive practice in listening, speaking, reading, and writing basic Dutch in meaningful contexts. The course also offers insight into Dutch language, culture, and society.

DUTCH 203 Intermediate Composition and Conversation

Spring. 3 credits. Prerequisite: qualification in Dutch or permission of instructor. M. Briggs.

Improved control of Dutch grammatical structures and vocabulary through guided conversation, compositions and reading, drawing on all Dutch-speaking cultures.

DUTCH 204 Intermediate Composition and Conversation

Fall. 3 credits. Prerequisite: Dutch 203 or permission of instructor. M. Briggs.

This course aims to emphasize written and oral application of accurate, idiomatic Dutch. Reading of authentic material of newspapers, literature, and history, with emphasis on the students' interests and specializations. Taught in Dutch.

DUTCH 300 Directed Studies

Fall or spring. 1–4 credits variable. Prerequisite: proficiency in Dutch or permission of instructor. M. Briggs.

Individualized advanced Dutch studies. This course aims to provide students with individualized programs which can be anything from advanced mastery in any or all skills to the mastery of Dutch for research. Literature history in support of all disciplines. Taught in Dutch.

English

See Intensive English Program.

English for Academic Purposes

ENGLF 205 English as a Second Language

Fall. 4 credits. Prerequisite: placement by examination. S. Schaffzin.

An all-skills course emphasizing listening and speaking, with some writing practice. Students also meet individually with the instructor.

ENGLF 206 English as a Second Language

Spring. 3 credits. Prerequisite: ENGLF 205 or placement by examination. S. Schaffzin.

Designed for those who have completed ENGLF 205 and who need further practice, particularly in writing. Individual conferences are also included.

ENGLF 209 English as a Second Language

Fall or spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.

Practice in classroom speaking and in informal conversational English techniques for gaining information. Students also practice giving informal presentations. Individual conferences with the instructor supplement class work.

ENGLF 210 English as a Second Language

Spring. 1 credit. Prerequisite: permission of instructor. M. Briggs.

Academic writing with emphasis on improving vocabulary use, and grammatical structure. Frequent individual conferences supplement class work.

ENGLF 211 English as a Second Language

Fall, spring, or summer. 3 credits. Prerequisite: placement by examination. D. Campbell.

Practice in academic speaking. Formal classroom discussion techniques and presentation of information in various forms. Individual conferences supplement class work.

ENGLF 212 English as a Second Language

Spring. 3 credits. Prerequisite: permission of instructor. Enrollment is restricted to 12 on a first-come, first-served basis. D. Campbell.

Research paper writing. For the major writing assignment of this course, the students must have a real project that is required for the graduate work. This can be a thesis proposal, a pre-thesis, part of a thesis, such as the literature review or discussion section; a paper for another course or a series of shorter papers (with permission of the other instructor); or a paper for publication. Time limitations make it difficult to deal with work over 20 pages in length. Course work involves practice in paraphrase, summary, the production of cohesive, coherent prose, vocabulary use, and grammatical structure. Frequent individual conferences are a necessary part of the course. Separate sections for Social Sciences/Humanities and for Science/Technology.

ENGLF 213 Written English for Non-Native Speakers

Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.

Designed for those whose writing fluency is sufficient for them to carry on regular academic work but who want to refine and develop their ability to express themselves clearly and effectively. Individual conferences supplement class work.

Freshman Writing Seminar

ENGLB 215-216 English for Later Bilinguals

For description, see freshman writing seminar brochure.

French

See also courses listed in this section under Romance Languages.

For information on language placement contact Irene Daly (404A Morrill, 255-0721) and for transfer credit, contact Colette Waldron (403 Morrill Hall, 255-0702). For literature and advanced language courses and information on the literature and area studies tracks of the French major, and on study abroad, see Romance Studies.

French Major

The French major has three separate tracks: the literature track, the area studies track, and the linguistics track. The linguistics track is described here; for the literature and area studies tracks, see the description under Romance Studies. The major in French linguistics is designed to give students proficiency in the oral and written language and to develop skills in the linguistic analysis of French.

While prospective majors should try to plan their programs as far ahead as possible, no student will be refused admission merely because of a late start. It is even possible for a student to begin French and/or linguistics at Cornell and become a major. Students are admitted to the major in French linguistics by the director of undergraduate studies of the Department of Romance Studies, Professor Jacques Béraud, but will be guided by their individual advisers.

The French Linguistic Major

To be admitted to the major, students should have completed Linguistics 101 and French 213 (or its equivalent) by the end of the sophomore year. It is expected that all students in the major will also take either French Literature 220 or 221, preferably by the end of the sophomore year.

To complete the major, a student must:

1) acquire a sound degree of competence in French. This competence is demonstrated by the successful completion of French 312 (or its equivalent) or by passing a special examination. Typically, students in the major will have taken 312 by the end of their junior year.

2) take six courses in French, Romance, and general linguistics. These courses will include at least one course concerning the history of French (e.g., Lang 321, listed under Romance Languages, below), one course concerning the structure of French
The goal of French 122 is to build on the language skills that students have previously studied in French 121. Students who have studied French 121 and have an LPP score of 56–64 or SAT II 600–680. Satisfactory completion of French 123 fulfills the proficiency portion of the language requirement. C. Waldron, I. Daly.

French 123 is an all-skills course designed to improve pronunciation, oral communication, and reading ability, to establish a groundwork for correct writing, and to provide a substantial grammar review. The approach in the course encourages the student to see the language within the context of its culture.

**FRDML 200 Intermediate Reading and Writing**
Fall or spring. 3 credits. Prerequisite: qualification in French (French 123, LPP score 56–64, or SAT II 600–680). Satisfactory completion of French 200 fulfills the proficiency portion of the language requirement. S. S. Hnin Tun.

Study of the language in different text types, prose and poetry, articles on current events, and a contemporary novel. Discussion of texts with emphasis on vocabulary development, grammar review and expansion, and appreciation of stylistic levels and cultural differences. Students have the opportunity to select reading material and work on their areas of interest. Taught in French.

Special section at 9:05: "French Through Food." A. Grandjean-Levy. Texts ranging from classic literature to newspaper articles, videos, films, and presentations by students, provide the basis for writing assignments and class discussions. Themes and emphases may vary from section to section. Taught in French.

**FRLIT 221 Modern French Literature**
For description, see Romance Studies.

**FRDML 232 The French Language Today (also Linguistics 232)**

**FRDML 300 Directed Studies**
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**FRROM 301 Advanced French I**
For description, see Romance Studies.

**FRDML 305 French through Film**
Fall and spring. 4 credits. Prerequisite: Q++ on CASE exam, or French 213, or permission of instructor. A. Grandjean-Levy. Analysis of French televised news broadcasts and other media, discussion with native speakers, and numerous related activities place the student at the heart of today's France. Flexible, individualized approach allows each student to perfect language skills and pursue individual interests.

**FRLIT 312 Advanced French II**
For description, see Romance Studies.

**FRDML 405 Contemporary Theories of French Grammar**
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1998–99. C. Waldron. Analysis of French contemporary films and related readings. Used as a means of studying the language. Particular emphasis on the culture and historical context as it relates to French contemporary society. Additionally, guest speakers will provide enrichment on selected topics.

**FRDML 408 Linguistic Structure of French I**
Fall. 4 credits. Prerequisites: qualification in French and Linguistics 101 or Linguistics 400. Prerequisite: permission of instructor. Offered alternate years. Not offered 1998–99. Staff. A synchronic study and analysis of modern French, with emphasis on its phonology and morphology.
[FRDML 410 Linguistic Structure of French II: Semantics, Pragmatics, and Discourse Analysis
Fall. 4 credits. Prerequisite: qualification in French. Offered alternate years. Not offered 1998-99. L. Waugh. A synchronic study and analysis of modern French, with emphasis on semantics, pragmatics, and discourse analysis.]

FRDML 630 French for Reading—Graduate Students
Spring only. 3 credits. Limited to graduate students. Staff. Designed for those with little or no background in French, this course's primary aim is to develop skill in reading French. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. Some flexibility in selecting texts according to fields of interest is offered.

[FRDML 700 Seminar in French Linguistics
Spring, according to demand. Credit to be arranged. Not offered 1998-99. Seminars are offered according to faculty interest and student demand. Topics in recent years have included current theories in French phonology, French discourse and pragmatics.]

German
For literature and culture courses see German Studies.
The German and German Area Studies Major
See German Studies for description of the major and for information on study abroad.

GERLA 121 Elementary German I
Fall or spring. 4 credits. Intended for students with no prior experience in German or with a language placement test (LPG) score below 37, or an SAT II score below 370. G. Lischke, D. McGraw and staff.
Elementary German I is designed to familiarize students with basic vocabulary and structures so they can communicate about everyday life. Videos and audio tapes facilitate listening comprehension and insight into German culture. Daily practice in section provides the opportunity to learn vocabulary and structures.

GERLA 122 Elementary German II
Fall or spring. 4 credits. Prerequisite: German 121; LPG score 37-44, or SAT II 370-450. Students who obtain an LPG score of 56 or above after German 122 attain qualification and may enter a 200-level course, otherwise, successful completion of German 123 is required for qualification. G. Lischke, D. McGraw and staff.
Elementary German II, the second semester of elementary German, presupposes that students have not yet learned narrative past, subjunctive, passive or dependent word order. Topics include travel, free time, work and the media, including TV, newspaper, film and fiction. There is also discussion of a timeline of key events in Germany from 1917-1989.

GERLA 123 Continuing German
Fall or spring. 4 credits. Limited to students who have previously studied German and have an LPG score 45-55 or SAT II 460-570. Satisfactory completion of German 123 fulfills the language qualification requirement. Staff.
German 123 is a course on the beginning intermediate level. Students will further develop their language proficiency by communicating about broadly cultural topics and themese. To provide each student with a maximum opportunity for speaking in German and getting as much help and feedback as possible, much of the work in class will be done in pairs and/or small groups.

GERLA 200 Contemporary German (also GERST 200)
Spring. 3 credits. Prerequisite: qualification in German (LPG score of 56-64 or SAT II score of 580-670 or Gerla 123). Successful completion of German 200 fulfills the Arts and Science language proficiency requirement and can be used in partial fulfillment of the Arts and Sciences international requirement. G. Appel, G. Valk, B. Buettner and staff.
An intermediate language course designed to provide an introduction to modern German culture and literature while students develop language proficiency. Students examine issues that shape German society, literature and thought as reflected in short stories, poems, socio-cultural and political texts, video and audio materials. Selected topics will include "Beyond the Wall: German Unification," "Germany: A Multi-cultural Society?" "Speaking and Identity," emphasize accurate and idiomatic expression. Successful completion of the course enables students to continue with more advanced courses in language, literature, and culture. This course replaces GERLA 203 and GERST 201.

GERST 202 Exploring German Literature
For description, see German Studies.

GERST 204 Intermediate Conversation and Composition
Fall or spring. 3 credits. Prerequisite: German 203 or Gerst 201, or German/Gerst 200, or placement by examination (placement score and CASE). Staff.
Emphasis on improving oral and written expression of idiomatic German. Enrichment of vocabulary and appropriate use of language in different conversational contexts and written genres. Language consists of readings in contemporary prose, articles on current events, videos, and group projects. Topics include: awareness of culture, dependence of meaning on perspective, interviews with native German speakers, German news broadcasts, reading German newspapers on the www., and projects on German Expressionist painters at the Johnson Museum.

GERST 205 Business German I
Fall. 3 credits. Prerequisite: qualification in German (German 123 or an LPG score of 56-64 or an SAT II score between 580-670). Successful completion of GERST 205 fulfills the language proficiency requirement. G. Lischke.
Learn German and understand German business culture at the same time. This is a German language course that, at the same time, examines the German economic structure and its major components: industry, trade unions, the banking system, and government. Participants will learn about the business culture in Germany and how to behave in a work environment, Germany's role within the European Union, the dual education system, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage and a Business German textbook.

GERST 206 Business German II
Spring. 3 credits. Prerequisite: proficiency in German (Gerst 205, 203, Gerst 201 or placement by examination (placement score and CASE)). G. Lischke.
This course is a continuation of Gerst 205, however students without previous knowledge of Business German are welcome. This is a German language course that, at the same time, examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants will learn about the business culture in Germany and how to behave in a work environment, Germany's role within the European Union, the role of the German Bundesbank, the importance of trade and globalization, and current economic issues in Germany. The materials consist of authentic documents from the German business world, TV footage and a Business German textbook. At the end of the course, the external Goethe Institut exam "Deutsch für den Beruf" will be offered.

GERST 220 Was ist deutsch?
For description, see German Studies.

[GERST 237 The Germanic Languages (also Linguistics 237)

GERST 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

GERST 301 Mystery and Detective Fiction
For description, see German Studies.

GERST 303 Advanced Conversation and Composition
Fall or spring. 4 credits. Prerequisite for German 303: GERST 204, GERST 202, GERST 220, or placement by examination (CASE). G. Valk.
Further enrichment of vocabulary and emphasis on improving students' oral and written style. Study of the language of different text types, including journalistic and literary texts. Discussion of current events provides insight into the historical, political and social-issues of German-speaking countries. Individual and group projects provide an opportunity for each student to pursue his her field of interest and share it with the class.

[GERST 304 Advanced Conversation and Composition
Spring. 4 credits. Prerequisite: German 303 or placement by examination (CASE). Not offered 1998-99.]
GERLA 305 German in (Con)Text (also German Studies 305)
Fall. 4 credits. Prerequisite: GERLA 204, Gerst 202, Gerst 220, or placement by case exam. G. Appel.
In this course we will consider language as an activity that mediates all aspects of our social and cultural lives. Therefore, we will examine how German is used to create and reflect human relationships in a range of critical domains and the social relationships that arise in them. Taught in German. Recommended for students interested in high-level language training as well as in the topics to be covered. This course may be counted toward the requirement for 400-level language work in the German major.

GERLA 306 Zeitungsdeutsch
Spring. 4 credits. Prerequisite: German 304 or equivalent. G. Lischke.
Analysis of various German daily and weekly newspapers, magazines and German TV with special emphasis on stylistic differences in journalism and discussion of current events. Students have the opportunity to research material for class presentation, lead discussions and share their interests/special fields with the group.

GERLA 404 Modern German Syntax
Spring. 4 credits. Prerequisite: German 304 or equivalent. G. Lischke.
An analysis of selected theoretical syntactic models to problems in the syntax of modern German.

GERLA 606 Topics in Historical Germanic Phonology
The development of the sound system from Proto-Germanic to its daughter languages.

GERLA 607 Topics in Historical Germanic Morphology
Fall. 4 credits. Prerequisite: Ling 441. Not offered 1998–99. Staff.
The Germanic verbal system and its Indo-European origins.

GERLA 608 Topics in Historical Germanic Syntax
A diachronic and comparative investigation of syntactic processes in the older Germanic languages.

GERLA 631-632 Academic German I and II
631, fall; 632, spring. 3 credits each term. Limited to graduate students. Prerequisite: for German 632, German 631 or equivalent. D. McGraw.
Intended primarily for beginners with little or no previous German knowledge. Emphasis in 631 on acquiring basic German reading skills. Emphasis in 632 on development of the specialized vocabulary of student's field of study.

Modern Hebrew
See listings under Near Eastern Studies.

Hindi
See also courses listed in this section under South Asian Languages.

HINDI 101-102 Elementary Hindi-Urdu
101, fall; 102, spring. 6 credits each term. Prerequisites: for Hindi 102, Hindi 101 or equivalent. C. Fairbanks.
A semi-intensive course for students without prior experience in Hindi-Urdu or a closely related language. A thorough grounding is given in all language skills: listening, speaking, reading, and writing. Students who have had exposure to Hindi-Urdu or a closely related language in the home or otherwise should generally take Hindi 109–110. Check with instructor regarding placement.

HINDI 109-110 Accelerated Elementary Hindi-Urdu
109, fall; 110, spring. 3 credits each term. Prerequisite for Hindi 110: Hindi 109 or equivalent. C. Fairbanks.
An entry-level sequence for students with some prior exposure to Hindi-Urdu or a closely related language. This course sequence will provide a thorough grounding in all the language skills: listening, speaking, reading, and writing. Completion of this sequence, including satisfactory performance on an examination given at the end of Hindi 110, will constitute a level of performance equal to that of the 101–102 sequence, and will thus be considered to fulfill qualification for the language requirement plus eligibility for 200-level Hindi-Urdu courses. Check with instructor regarding placement.

HINDI 201-202 Intermediate Hindi Reading @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Hindi 201, Hindi 102; for Hindi 202, Hindi 201 or permission of instructor. Not offered 1998–99. C. Fairbanks.

HINDI 203-204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Hindi 203, Hindi 102; for Hindi 204, Hindi 203 or permission of instructor. C. Fairbanks.
The course sequence will cover the conversational aspect of the language. In 204, video materials are used and emphasis is on the conversational aspect of the language. In 204, the focus shifts to reading skills and the main text used is a popular novel.

HINDI 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. C. Fairbanks.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

HINDI 301-302 Advanced Readings in Hindi Literature @
301, fall; 302, spring. 4 credits each term. Prerequisites: for Hindi 301, Hindi 201 or equivalent. C. Fairbanks.
Selected readings in modern Hindi literature.

HINDI 303-304 Advanced Composition and Conversation @
303, fall; 304, spring. 4 credits each term. Prerequisites: for Hindi 303, Hindi 204 or equivalent, for Hindi 304, Hindi 303 or equivalent. C. Fairbanks.

HUNGARIAN

HUNGR 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Not offered 1998–99. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

HUNGR 427 Structure of Hungarian (also Linguistics 427)
Fall. 4 credits. Prerequisite: Ling 101 or equivalent. Offered alternate years. W. Browne.
For description, see Linguistics.

Indonesian

See also courses listed in this section under Southeast Asian Languages.

For students who have completed Indonesian 121–122–125 or its equivalent there is the option of a one-semester program in Malang, East Java, during the junior year. The program combines a variety of cultural and artistic options with area course work and advanced language study. Complete information is available through Cornell Abroad.

Students who have completed a minimum of 18 credits or the equivalent are eligible to apply for a summer program in the Advanced Indonesian Abroad Program. Further information is available through Professor John Wolff (307 Morrill Hall, 255–0733).

INDO 121-122 Elementary Indonesian
121, fall; 122, spring. 4 credits each term. Prerequisite: for Indonesian 122, Indonesian 121. Staff.
A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

INDO 123 Continuing Indonesian
Fall. 4 credits. Prerequisite: Indonesian 122 or equivalent. Satisfactory completion of Indonesian 123 fulfills the qualification portion of the language requirement. Not offered 1998–99. J. Wolff and staff.
Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings and sharpens listening skills.

INDO 203-204 Intermediate Composition and Conversation
203, fall; 204, spring. 3 credits each term. Prerequisites: for Indonesian 203, Indonesian 123; for Indonesian 204, Indonesian 203 or permission of instructor. Not offered 1998–99. J. Wolff and staff.
ITALA 121-122 Elementary Italian
121, fall, 122, spring. 4 credits each term.
Prerequisite: for Italian 122, Italian 121 or equivalent. Intended for beginners or students placed by examination. At the end of Italian 122, students who score 56 or higher on the LPI attain qualification and may enter the 200-level sequence; otherwise, Italian 123 is required for qualification. C. Rosen, P. Swenson.

A thorough grounding in all the language skills: listening, speaking, reading, and writing. Language practice is in small groups. Lectures cover grammar and cultural information.

ITALA 123 Continuing Italian
Fall, spring, or summer. 4 credits. Limited to students who have previously studied Italian and have an LPI score 45-55 or SAT II 460-580. Satisfactory completion of Italian 123 fulfills the qualification portion of the language requirement. Staff. Italian 123 is an all-skills course designed to improve speaking and reading ability, to establish a groundwork for correct writing, and to provide a substantial grammar review.

ITALA 203-204 Intermediate Composition and Conversation
203, fall or spring; 204, fall or spring. 3 credits each term. Prerequisites: for Italian 203, qualification in Italian; for Italian 204, 203 or equivalent. K. Bättig. Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

Note: Students placed in 200-level courses also have the option of taking courses in introductory literature; see separate listing under Italian 201 for description of this course, which may be taken concurrently with the Italian 203-204 language courses described above. The introductory literature courses are offered by the respective literature departments, and the 203-204 language courses by the Department of Modern Languages.

ITALA 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

ITALA 313 Advanced Italian: Language in Italy
Fall, spring, or summer. 3 credits. Prerequisite: Italian 204 or equivalent or permission of instructor. Italian 313 is not prerequisite to Italian 314 and may be taken after Italian 314. P. Swenson.

Further development of all skills. Readings and discussions center on two themes: (1) contemporary Italian life and (2) the Italian language, its origins, evolution, and present state, including the role of the dialects. Emphasis on vocabulary building and awareness of stylistic levels.

ITALA 314 Advanced Italian: Language and Social Issues
Fall. 3 credits. Prerequisite: Italian 204 or equivalent. Italian 313 is not prerequisite to Italian 314 and may be taken after Italian 314. S. Stewart.

Further development of all skills, with emphasis on self-expression. Content: evolution and crisis in Italian politics, values, and national identity against the background of European unification. Social movements, issues, and attitudes, especially as reflected in the mass media.

ITALA 403 Linguistic Structure of Italian
Fall. 4 credits. Prerequisites: Linguistics 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 1998-99. C. Rosen.

Survey of Italian grammar, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modals, clitics, reflexive constructions, agreement, impersonal constructions, causatives.

ITALA 404 History of the Italian Language
Spring. 4 credits. Prerequisites: Linguistics 321 and either Italian 201, 203, or equivalent. Offered alternate years. Not offered 1998-99. C. Rosen.

Overview of Italian and its dialects from the earliest texts to the present day. Emergence of the standard language. External history and sociolinguistic circumstances.

ITALA 631 Readings in Italian Opera
Libretti
Spring. 2 credits. For graduate students only. Prerequisite: permission of instructor. Offered concurrently with appropriate seminars in the Department of Music. Not offered 1998-99.

Japanese
For literature courses see Asian Studies.

JAPAN 101-102 Elementary Japanese
101, fall; 102, spring. 6 credits each term. Prerequisite for Japanese 102: Japanese 101 or placement by the instructor during registration. Intended for beginners or for those who have been placed in the course by examination. Y. Nakashishi-Whitman and staff.

A thorough grounding is given in all the language skills at beginning level: listening, speaking, reading, and writing.

JAPAN 123 Accelerated Introductory Japanese
Fall. 6 credits. Prerequisite: placement by the instructor at beginning of semester. Not offered 1998-99. Y. Shirai and staff.

Accelerated training in listening, speaking, reading, and writing for students who have already acquired a limited facility in Japanese through residence in Japan or brief formal study, but who require additional training to qualify for admission to Japanese 102. Attend Japanese 101 lectures. Offered if enrollment is sufficient.

JAPAN 141-142 Beginning Japanese at a Moderate Pace
141, fall; 142, spring. 4 credits each term. Y. Shirai and staff.

Beginning-level training in listening, speaking, reading, and writing. This series of 'Moderate Pace' courses provides an alternate choice for students who find it difficult to schedule the more intensive 101-102 sequence into their schedules. Can be followed by the 241-242 sequences.

JAPAN 201-202 Intermediate Japanese
201, fall and summer, 202, spring and summer. 4 credits each term. Prerequisites: for Japanese 201, Japanese 102 or placement by the instructor during registration. For Japanese 202, Japanese 201 and 203 or placement by the instructor during registration. Y. Katagiri.
JAPAN 203-204 Intermediate Japanese Reading I 203, fall, 204, spring. 2 or 3 credits each term. Prerequisites: for Japanese 203, Japanese 102, Japanese 142 or placement by the instructor during registration. For Japanese 204, Japanese 203 or placement by the instructor during registration. Y. Kawasaki.

Reading of elementary texts emphasizing practical materials, with development of writing skills.

Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command.

JAPAN 251-252 Elementary/Intermediate Japanese 251, fall; 252, spring. 4 credits each term. Prerequisites: for Japanese 251, Japanese 160 or placement by instructor during registration period; for Japanese 252, Japanese 251, 102 or placement by instructor during registration period. Y. Nakanishi-Whitman.

Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command. Provides an alternate choice for students who find it difficult to schedule the more intensive Japanese 201/203 or 202/204 courses into their schedules. MBA students, engineering students, hotel school students, arts college students, and others. Also highly recommended for those with prior background in the language who are weak in the more complex and difficult grammar patterns.

JAPAN 401-402 Oral Narration and Public Speaking 401, fall; 402, spring. 2 credits each term. Prerequisite: Japanese 301 or placement by the instructor during registration; for Japanese 402, Japanese 401 or placement by the instructor during registration. N. Nakada.

Instruction in making and delivering socially appropriate and effective speeches, with emphasis on both the construction of discourse and Japanese patterns of oral delivery.

JAPAN 403-404 Advanced Japanese Reading I 403, fall; 404, spring. 4 credits each term. Prerequisite: Japanese 304 or permission of instructor.

Section I: Area of Humanities. Cannot be used for distribution. K. Selden. Reading of selected modern texts with emphasis on expository style.

Section II: Area of Economics and Social Science. Cannot be used for distribution. Y. Kawasaki. Reading of selected modern texts with emphasis on expository style.

JPLIT 406 Introduction to Classical Japanese For description see Asian Studies.

JAPAN 410 History of the Japanese Language (also Linguistics 411) Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1998-99. J. Whitman.

An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

JAPAN 414 Linguistic Structure of Japanese (also Linguistics 404) Fall. 4 credits. Prerequisites: Japanese 102 or permission of instructor and Linguistics 101 or equivalent introductory course in linguistics. Offered alternate years. Not offered 1998-99. J. Whitman.

Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

JAPAN 421-422 Directed Readings 421, fall; 422, spring. Credit to be arranged. Limited to advanced students. Prerequisite: placement by the instructor during registration. K. Selden.

Topics are selected on the basis of student needs.

JAPAN 551-552 Intermediate Japanese for Business School Students 551, fall; 552, spring. 4 credits each term. Prerequisites: for Japanese 551, Japanese 160, and permission of instructor or placement by instructors during registration period; for Japanese 552, Japanese 551, 102, or placement by instructors during registration. Y. Nakanishi-Whitman.

Training in listening, speaking, reading, and writing for students who have already acquired a basic oral proficiency. Course times are arranged to accommodate those in the MBA program, but the material is oriented toward any student. Particularly suited to students who find it difficult to schedule the more intensive 201/203 or 202/204 courses into their schedules.

FALCON (Full-year Asian Language Concentration) Summer only. 8 credits. R. Sukle and staff.

This is the first term of the Japanese FALCON Program. It is a full-time, nine-week course; the degree of intensity does not allow students to take other courses simultaneously. Formal application must be made to the program, but admission is open to all students, not just those students intending to take the fall and spring terms of FALCON. The course is an introduction to Japanese from absolute beginning level, in speaking as well as rudimentary reading and writing. There are three small interactive classes per day conducted entirely in Japanese and one lecture in English. Two hours during the day are required language labs. Additional preparation time in the language lab is necessary in the evenings. Students completing this course can move smoothly in the academic year into Japanese 251-252 or 551-552. These can be followed the following year by Japanese 351-352 or Japanese 555-556, respectively.

JAPAN 160 Introductory Intensive Japanese Summer only. 8 credits. R. Sukle and staff.

This is the first term of the Japanese FALCON Program. It is a full-time, nine-week course; the degree of intensity does not allow students to take other courses simultaneously. Formal application must be made to the program, but admission is open to all students, not just those students intending to take the fall and spring terms of FALCON. The course is an introduction to Japanese from absolute beginning level, in speaking as well as rudimentary reading and writing. There are three small interactive classes per day conducted entirely in Japanese and one lecture in English. Two hours during the day are required language labs. Additional preparation time in the language lab is necessary in the evenings. Students completing this course can move smoothly in the academic year into Japanese 251-252 or 551-552. These can be followed the following year by Japanese 351-352 or Japanese 555-556, respectively.

JAPAN 161-162 Intensive Japanese (FALCON) 161, fall; 162, spring. 16 credits each term. Admitted by FALCON staff; for Japanese 161, Japanese 160 or Japanese 102 at Cornell, or placement prior to beginning of fall term by FALCON staff; for Japanese 162, Japanese 161, or placement prior to beginning of spring term by FALCON program. Students must apply formally to the program (applications available from FALCON secretaries, 414 Morrill Hall). Admission is open to undergraduate students from Cornell or from elsewhere, provided the applicant has the necessary prerequisites or is able to place into this level.
Work on spoken and written Japanese from intermediate into advanced level. This is a full-time program and a full academic load; the demands of the program do not normally permit students simultaneously to take other courses. With the sequence 160-161-162 a student can, in one calendar year complete as much Japanese as would be in three or more years of part-time study in many academic programs. This course also serves to fulfill the language requirement for the MA in Asian Studies and the joint MBA/MA in Asian Studies.

**Javanese**

See also courses listed in this section under Southeast Asian Languages.

**JAVA 131-132 Elementary Javanese**
131, fall; 132, spring. 3 credits each term. Prerequisite: for Javanese 132, Javanese 131 or equivalent. This language series (131-132) cannot be used to satisfy the language requirement. Not offered 1998-99. J. Wolff and staff.

An elementary language course for those who have had no previous experience in the language.

**JAVA 133-134 Continuing Javanese**
133, fall; 134, spring. 3 credits each term. Prerequisites: for Javanese 133, Javanese 132 or equivalent; for Javanese 134, Javanese 133 or equivalent. Satisfactory completion of Javanese 134 fulfills the qualification portion of the language requirement. Not offered 1998-99. J. Wolff and staff.

An intermediate conversation and reading course.

**JAVA 203-204 Directed Individual Study**
203, fall; 204, spring. 3 credits. Prerequisites: for Khmer 203, Khmer 102; for Khmer 204, Khmer 203. Staff. Continuing instruction in spoken and written Khmer.

**KHM ER**

See also courses listed in this section under Southeast Asian Languages.

**KMER 203-204 Intermediate Composition and Conversation**
203, fall, 204, spring. 3 credits each term. Prerequisites: for Khmer 203, Khmer 102; for Khmer 204, Khmer 203. Staff. Letter writing and other forms of composition.

**KMER 300 Directed Studies**
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**KMER 301-302 Advanced Khmer**
301, fall; 302, spring. 4 credits each term. Prerequisites: for Khmer 301, Khmer 202 or equivalent; for Khmer 302, Khmer 301. Staff.

Continuing instruction in spoken and written Khmer; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

**KMER 401-402 Directed Individual Study**
401, fall; 402, spring. For advanced students. 2-4 credits each term. Prerequisite: permission of instructor. Staff. Various topics according to need.

**Korean**

**Fees.** A small fee may be charged for photocopied texts for course work.

**KOREA 101-102 Elementary Korean**
101, fall; 102, spring. 6 credits each term. Satisfactory completion of Korean 102 fulfills the qualification portion of the language requirement. H. Diffloth and staff.

Covers basics of speaking, reading, and writing. Introduces Hangul writing system and grammar.

**KOREA 109-110 Elementary Reading**
109, fall, 110, spring. 3 credits each term. Prerequisite: permission of instructor. Satisfactory completion of Korean 110 fulfills the qualification portion of the language requirement. H. Diffloth and staff.

This course is for students who have spoken some Korean in the home, but whose reading and writing skills are limited or nonexistent. If in doubt about eligibility, see instructor.

**KOREA 201-202 Intermediate Korean**
201, fall, 202, spring. 4 credits each term. Prerequisites: for Korean 201, Korean 102 or permission of instructor; for Korean 202, Korean 201. Satisfactory completion of Korean 201 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.

Covers the basics of speaking, reading, and writing at the intermediate level. Introduces some reading and writing with Chinese characters.

**KOREA 209-210 Intermediate Reading**
209, fall, 210, spring. 4 credits each term. Prerequisites: for Korean 209, Korean 110 or permission of instructor; for Korean 210, Korean 209 or permission of instructor. Satisfactory completion of Korean 209 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.

An intermediate level of reading comprehension and writing course for students who have acquired basic oral proficiency. Introduces some reading and writing with Chinese characters. If in doubt about eligibility, see instructor.

**KOREA 300 Directed Studies**
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. H. Diffloth.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**KOREA 301-302 Advanced Korean**
301, fall; 302, spring. 4 credits each term. Prerequisites: for Korean 301, Korean 202 or placement by instructor; for Korean 302, Korean 301 or placement by instructor. H. Diffloth and staff.

Reading of advanced texts, including newspapers and Chinese character material, together with advanced use of the spoken language.

**KOREA 430 Structure of Korean (also Linguistics 430)**

**Latin**

See listings under Classics.

**Nepali**

See also courses listed in this section under South Asian Languages.

**Study Abroad in Nepal**
Cornell and the central campus of the Nepalese national university—Tribhuvan—at Kirtipur, Kathmandu, co-sponsor an academic year in Nepal. North American students study and live with Nepalese students who come from outside the Kathmandu Valley to Tribhuvan University. Students may participate in one or two semesters. Courses are offered both at Tribhuvan University and at the Cornell-Nepal Study Program House adjacent to the university. All courses are officially taught in English. A five-week, in-country orientation program includes classes in intensive Nepali conversation, cultural orientation programs, and a ten-day field trip and trek. Semester course offerings include Nepali language (Tibetan and/or Newari languages also possible), contemporary issues in Nepalese studies, field research design and methods in sociology/anthropology and ecology/environment, and guided field research.

Juniors and seniors in good academic standing from any major field may participate. Students must have a desire to study on the other side of the world, to participate in a multicultural program, and to undertake rigorous field research. No experience in Nepal is necessary, and instruction is in English; but some prior Nepali language study is strongly recommended. Students interested in the study abroad in Nepal program should consult with the Cornell Abroad office (474 Uris Hall) for further information.
Nepal 101-102 Elementary Nepali
101, fall; 102, spring. 6 credits each term. Prerequisite: for Nepali 102, 101 or examination. S. Oja.
Intended for beginners. The emphasis is on basic grammar, speaking and comprehension skills, utilizing culturally appropriate materials and texts. Devanagari script for reading and writing is also introduced.

Nepal 160 Intensive Nepali
Summer only. 10 credits. Intended for beginners. Offered alternate years. S. Oja.
Emphasis will be on the spoken language, in dialogues, exercises, and conversation practice. In addition, however, special attention is given to assisting students to develop vocabularies and abilities appropriate to their unique professional needs. Reading and writing practice use both colloquial and scholarly materials in the Nepali (Devanagari) script.

Nepal 201-202 Intermediate Nepali
Conversation @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Nepali 201, Nepali 102 or examination; for Nepali 202, Nepali 201 or examination. S. Oja.
Intermediate instruction in spoken grammar and verbal comprehension skills, with special attention to developing technical vocabularies and other verbal skills appropriate to students' professional fields.

Nepal 203-204 Intermediate Nepali
Composition @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Nepali 203, Nepali 102 or examination; for Nepali 204, Nepali 203 or examination. S. Oja.
A systematic review of written grammar and reading comprehension, with special attention to the technical vocabularies, necessary writing skills, and published materials typical of advanced students' professional fields.

Nepal 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. S. Oja.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Nepal 301-302 Advanced Nepali
501, fall; 302, spring. 3 credits each term. Prerequisite: Nepali 204 or permission of instructor. S. Oja.
Reading of advanced texts, together with advanced drill on the spoken language.

Quechua

Quechua 131-132 Elementary Quechua
131, fall; 132, spring. 3 credits each term. Prerequisite: qualification in Spanish. This language series (131-132) cannot be used to satisfy the language requirement. L. Morató-Peña.
A beginning conversation course in the Cuzco dialect of Quechua.

Quechua 133-134 Continuing Quechua
133, fall; 134, spring. 3 credits each term. Prerequisites: for Quechua 133, Quechua 131-132 or equivalent; for Quechua 134, Quechua 133 or equivalent. Satisfactory completion of Quechua 134 fulfills the qualification portion of the language requirement. L. Morató-Peña.
An intermediate conversation and reading course. Study of the Huarochoi manuscript.

Quechua 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. L. Morató-Peña.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Quechua 301-302 Advanced Quechua
501, fall; 302, spring. 3 credits each term. Prerequisite: Quechua 131-132 or instructor's approval. S. Oja.

Quechua 303-304 Advanced Composition and Conversation @
303, fall; 304, spring. 4 credits each term. Prerequisites: for Portuguese 303, Portuguese 204 or equivalent; for Portuguese 304, Portuguese 303 or equivalent. J. Oliviera.

Romance Languages

Linguistics 321-322 History of the Romance Languages (also Linguistics 321-322) #
321, fall; 322, spring. 4 credits each term. Prerequisites: Linguistics 101 or equivalent and qualification in any Romance language. Offered alternate years. C. Rosen.

Linguistics 323-324 Comparative Grammar of the Romance Languages (also Linguistics 323-324)
323, fall; 324, spring. 4 credits each term. Prerequisites: Linguistics 101, 110, or equivalent and qualification in any Romance language. Offered alternate years. Not offered 1998-99. C. Rosen.
Concise survey of Romance syntax, covering the salient constructions in six languages with equal attention to their historical evolution and their current state. Grammatical innovation and divergence in a typological perspective.}

POLISH

POLISH 131-132 Elementary Polish
131, fall; 132, spring. 3 credits each term. Prerequisite: for Polish 132, Polish 131 or equivalent. This language series (131-132) is not sufficient to satisfy the language requirement. Offered alternate years. Staff.
Covers all language skills: speaking, listening comprehension, reading, and writing.

POLISH 133-134 Continuing Polish
133, fall; 134, spring. 3 credits each term. Prerequisites: for Polish 133, Polish 132 or equivalent; for Polish 134, Polish 133 or equivalent. Satisfactory completion of Polish 134 fulfills the qualification portion of the language requirement. Offered alternate years. Not offered 1998-99.
An intermediate conversation and reading course.

POLISH 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. W. Browne.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Portuguese

See also courses listed in this section under Romance Languages.

PORT 121-122 Elementary Portuguese
121, fall; 122, spring. 4 credits each term. Intended for beginners. Students may attain qualification upon completion of 122 by achieving a satisfactory score on a special examination. J. Oliviera.
A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

PORT 203-204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Portuguese 203, Portuguese 122 or permission of instructor; for Portuguese 204, Portuguese 203 or permission of instructor. J. Oliviera.
Conversational grammar review with special attention to pronunciation and the development of accurate and idiomatic oral expression. Includes readings in contemporary Portuguese and Brazilian prose and writing practice.

PORT 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. J. Oliviera.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Language Series (131-132)

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Spanish

LANG 321-322 History of the Romance Languages (also Linguistics 321-322) #
321, fall; 322, spring. 4 credits each term. Prerequisites: Linguistics 101 or equivalent and qualification in any Romance language. Offered alternate years. C. Rosen.
Russian

For literature courses and information about study abroad, see Russian Literature.

The Russian Major

See Russian Literature.

Russian Studies Major

See "Special Programs and Interdisciplinary Studies," which follows the department listings.

RUSSA 103-104 Conversation Practice
103, fall; 104, spring. 2 credits each term. Must enroll in one section of 103 and one section of 121, in the fall; and one section of 104 and one section of 122 in the spring. L. Paperno.

RUSSA 121-122 Elementary Russian
121, fall or summer; 122, spring or summer. 4 credits each term. May be taken alone and qualification will be achieved with satisfactory completion of 121-122-123, or may be taken concurrently with 103-104 and qualification will be achieved at completion of 122-104. S. Paperno, V. Tsimberov and staff.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing. Course materials include clips from original Russian films and TV programs.

RUSSA 123 Continuing Russian
Fall. 4 credits. Limited to students who have previously studied Russian or been placed by department. Satisfactory completion of Russian 123 fulfills the qualification portion of the language requirements. V. Tsimberov, S. Paperno, L. Paperno.

A course designed to prepare students for study at the 200 level. Passing this course is equivalent to qualification. Authentic Russian materials are used: TV, books, etc.

RUSSL 201-202 Readings in Russian Literature
For description see Russian Literature.

RUSSA 203-204 Intermediate Composition and Conversation
203, fall, or summer; 204, spring or summer. 3 credits each term. Prerequisites: for Russian 203, qualification in Russian (Russian 123 or placement by department); for Russian 204, Russian 203 or equivalent. L. Paperno, S. Paperno, V. Tsimberov.

Guided conversation, composition, reading, pronunciation, and grammar review, emphasizing the development of accurate and idiomatic expression in the language. Course materials include video clips from an original Russian feature film.

RUSSA 205-206 Reading Russian Press
205, fall; 206, spring. 2 credits each term. Prerequisite: qualification in Russian (Russian 123 or placement by department). Both semesters must be taken in order to satisfy the proficiency level for the language requirement. This course cannot be used to satisfy the humanities requirement. Staff.

Reading unabridged articles on a variety of topics from current Russian periodicals.

Note: Students placed in the 200-level courses also have the option of taking courses in introductory literature; see separate listings under Russian 201 and 202 for descriptions of these courses, any of which may be taken concurrently with the 203–204 and 205–206 language courses described above. The introductory literature courses are offered by the Department of Russian Literature, and the 203−204 and 205–206 language courses by the Department of Modern Languages.

RUSSA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

RUSSA 303–304 Advanced Composition and Conversation
303, fall; 304, spring. 4 credits each term. Prerequisites: for Russian 303, Russian 204 or equivalent; for Russian 304, Russian 303 or equivalent. L. Paperno, S. Paperno, V. Tsimberov.

Writing, reading, and conversation: viewing and reading authentic language materials; current Russian films (feature and documentary), newspapers, TV programs, and other materials are used.

RUSSA 305–306 Directed Individual Study
305, fall; 306, spring. 2 credits each term. Prerequisite: placement by the department. Staff.

This course is intended for students with special needs (e.g., children of Russian immigrants who speak Russian at home) that cannot be met by any other Russian course.

RUSSA 309-310 Advanced Reading
309, fall; 310, spring. 4 credits each term. Prerequisites: for Russian 309, Russian 204; for Russian 310, Russian 309 or equivalent. L. Paperno.

The purpose of the course is to teach advanced reading skills. The weekly reading assignment is 20–40 pages of unabridged Russian prose, mostly (non-fiction) of the 20th century. The reading is conducted entirely in Russian and is centered around the content of the assigned selection.

RUSSA 401-402 History of the Russian Language (also Linguistics 417-418)
# 401, spring; #402 4 credits each term. Prerequisites: for Russian 401, permission of instructor; for Russian 402, Russian 401 or equivalent. Offered alternate years. W. Browne.

Phonological, morphological, and syntactic developments from Old Russian to modern Russian.

[RUSSA 403-404 Linguistic Structure of Russian (also Linguistics 443-444)
403, fall; 404, spring. 4 credits each term. Prerequisites: for Russian 403, Linguistics 101 and permission of instructor, for Russian 404, Russian 403 or equivalent. Offered alternate years. Not offered 1998–99. W. Browne.

A synchronic analysis of the structure of modern Russian. Russian 403 deals primarily with morphology and its relation to syntax and 404 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.]

RUSSA 601 Old Church Slavic
Fall. 4 credits. This course is prerequisite to Russian 602. Offered alternate years. Not offered 1998–99. W. Browne.

Grammatical analysis and close reading of Old Russian texts.

RUSSA 633-634 Russian for Russian Specialists
633, fall; 634, spring. 2 credits each term. Prerequisites: four years of college Russian. For graduate and advanced undergraduate students. S. Paperno.

The course is designed for students who specialize in an area of Russian studies requiring fine active control of the language. Fine points of syntax, usage, and style are discussed.

[RUSSA 651-652 Comparative Slavic Linguistics (also Linguistics 671-672)
651, fall; 652, spring. 4 credits each term. Prerequisites: for Russian 651, Russian 601 taken previously or simultaneously or permission of instructor, for Russian 652, Russian 651 or permission of instructor. Offered alternate years. Not offered 1998–99. W. Browne.

Sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.]

[RUSSA 700 Seminar in Slavic Linguistics
Offered according to demand. Variable credit. Not offered 1998–99. Staff. Topics chosen according to the interests of staff and students.]

Sanskrit

See listings under Asian Studies and Linguistics: Indo-European. See also courses listed in this section under South Asian Languages.
Serbo-Croatian

[SEBCR 131-132 Elementary Serbo-Croatian]
131, fall; 132, spring. 3 credits each term. Prerequisite for Serbo-Croatian 132: Serbo-Croatian 131 or equivalent. This language series (131-132) is not sufficient to satisfy the language requirement. Offered alternate years. Not offered 1998-99. W. Browne. Covers all language skills: speaking, listening, reading, and writing.

SEBCR 133-134 Continuing Serbo-Croatian
133, fall; 134, spring. 3 credits each term. Prerequisite for Serbo-Croatian 133, Serbo-Croatian 132 or equivalent; for Serbo-Croatian 134, Serbo-Croatian 133 or equivalent. Satisfactory completion of Serbo-Croatian 134 fulfills the qualification portion of the language requirement. Offered alternate years. W. Browne. An intermediate conversation and reading course.

SEBCR 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Sinhala (Sinhalese)

See also courses listed in this section under South Asian Languages.

SINHA 101-102 Elementary Sinhala
101, fall; 102, spring. 6 credits each term. Prerequisite: for Sinhala 102, Sinhala 101 or equivalent. Staff. A semi-intensive course for beginners. A thorough grounding is given in all of the language skills: listening, speaking, reading, and writing.

SINHA 160 Intensive Sinhala
Summer only. 10 credits. Intended for beginners. Offered alternate years. Emphasis is on the spoken (colloquial) language, the writing system is introduced and used to present all Sinhala materials, with additional reading practice with colloquial materials. A foundation is laid for later study of the written language (literary Sinhala).

SINHA 201-202 Intermediate Sinhala Reading @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Sinhala 201, Sinhala 102; for Sinhala 202, Sinhala 201 or equivalent. Staff.

SINHA 203-204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Sinhala 203, Sinhala 102 or permission of instructor; for Sinhala 204, Sinhala 203 or equivalent. Staff.

SINHA 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

South Asian Languages

[LANG 341 India as a Linguistic Area (also Linguistics 341)]
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99. J. W. Gair. A basic introduction to the linguistic and sociolinguistic character of the subcontinent, with special attention to cross-linguistic family influences and convergence.

[LANG 440 Dravidian Structures (also Linguistics 440)]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99. J. W. Gair. A comparative and contrastive analysis of the structures of several Dravidian languages.

[LANG 442 Indo-Aryan Structures (also Linguistics 442)]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99. J. W. Gair. Typological discussion of the languages of the subfamily. Specific topics and emphasis may vary depending on the interest of the student.

Southeast Asian Languages

[LANG 230 Introduction to Southeast Asian Languages and Linguistics (also Linguistics 230)] @
Fall. 3-4 credits variable. For non-majors or majors. Not offered 1998-99. A. Cohn, J. Wolff. This is a survey of the languages of Southeast Asia. The goal of this course is to expose students to Southeast Asia as a linguistic area and introduce them to the rich linguistic diversity of the region. It includes three main parts: 1) sociolinguistic and ethnolinguistic issues of language and politics, language and culture, and language use; 2) language structures and typological patterns of the area's languages; 3) historical linguistics, as well as the linguistic effects of language contact and linguistic evidence for prehistory.

[LANG 653-654 Seminar in Southeast Asian Linguistics (also Linguistics 653-654)]
653, fall; 654, spring. 4 credits each term. Prerequisite: permission of instructor. Language 653 isn't a prerequisite for Language 654. Not offered 1998-99. Staff. Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.

[LANG 655-656 Seminar in Austronesian Linguistics (also Linguistics 655-656)]
655, fall; 656, spring. 4 credits each term. Prerequisite: for 655, permission of instructor; for 656, Language 655. Not offered 1988-99. J. Wolff. Descriptive and comparative studies of Malayo-Polynesian languages.

[LANG 657-658 Seminar in Austrasiatic Linguistics (also Linguistics 657-658)]
657, fall; 658, spring. 4 credits each term. Prerequisite: permission of instructor. Not offered 1998-99. Staff. Descriptive and comparative studies of Austrasiatic languages.

Spanish

See also courses listed in this section under Romance Languages.

For advanced Spanish language and literature courses and information on study abroad, see Romance Studies.

The Major

The major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in the linguistic analysis of Spanish. (For the major in Spanish literature see the description under Romance Studies.) Satisfactory completion of the major should enable students to meet language requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, or to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake pre-professional training for graduate study in law, medicine, business, etc. Students interested in a Spanish major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult the director of undergraduate studies for Spanish linguistics, Professor Margarita Surer.

The Core

All majors will work out a plan of study in consultation with their advisers. Previous training and interests as well as vocational goals are taken into account when the student's program of courses is determined. Spanish 201 and 204 or 212 (or equivalent) are prerequisite to entering the major in Spanish. All majors normally include the following core courses in their programs:

1) Spanish 315-316-318
2) Spanish 311 and 312 (or equivalent)

Spanish majors have great flexibility in devising their programs of study and areas of concentration.

The Linguistic Option

Spanish linguistics, for which the program normally includes at least 20 credits, and at least 8 additional credits in general or Spanish linguistics (such as Spanish 366, 405, 407, 408, and others). (Linguistics 101 is recommended before entering this program.) The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

Honors.

Honors in Spanish may be achieved by superior students who want to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty engaged in Spanish literature or linguistics to supervise their work and direct the writing of their honors essays.

Important information about registration for Spanish classes

The Spanish Program offers a number of elementary and intermediate courses to satisfy the needs of students with various educational backgrounds; students are urged to register for the appropriate level so as to start the semester in the right class. Students with two
SPAND 101 Basic Course I
Summer only. 6 credits. Prerequisite: no Spanish. Not offered 1998-99.
This course is intended for students with absolutely no experience in Spanish. (Spanish 123 and 203 are usually offered in the summer concurrently with 101 for students with prior experience.) Spanish 101 provides a thorough grounding in all language skills. Language practice in small groups. Lectures cover grammar, reading, and cultural information.

SPAND 112 Elementary Spanish: Review and Continuation
Fall. 4 credits. Prerequisite: LPS score 57-44. M. Rice.
This course is designed for students who have taken some Spanish and who have a placement score of 37-44 or SAT II 370-450. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken Spanish 121 may enroll for this course. As part of the final exam, students take the LPS and, according to their score, may place into Spanish 123 (score below 56) or receive qualification (56 or above), and placement into the 200-level courses.

SPAND 121-122 Elementary Spanish
121, fall; 122, spring. 4 credits each term. Prerequisite: for Spanish 122, Spanish 121. N. Maldonado-Mendez and staff.
This course is intended for students with no experience in Spanish. (Students who have previously studied 2 or more years of Spanish are not eligible for 121 unless they have an LPS score lower than 37 or SAT II lower than 370.) The course provides a thorough grounding in all language skills. Language practice in small groups. Lectures cover grammar, reading, and cultural information. Evening prelims.

SPAND 123 Continuing Spanish
Fall, spring, or summer. 4 credits. Prerequisite: Spanish 112, Spanish 122, or an LPS score 45-55 or SAT II 460-580. M. K. Redmond and staff.
An all-skills course which requires daily preparation before class and active student participation in class. Includes researching cultural topics of the student's choice, oral presentations, grammar review, audio tapes, video, journal and essay writing, speaking in small groups and authentic readings.

SPAND 200 Spanish for English/Spanish Bilinguals (also Latino Studies Program 202)
Fall or spring. 3 credits. Prerequisite: LPS score 56-64, or SAT II 590-680. Not available to students who have taken Spanish 203 or 213.

SPAND 203 Intermediate Composition and Conversations I
Fall, spring, or summer. 3 credits. Prerequisite: Spanish 123, LPS score 56-64, or SAT II 590-680. Not available to students who have taken Spanish 213.

SPAND 204 Intermediate Composition and Conversations II
Fall or spring. 3 credits. Prerequisite: Spanish 203, 213, CASE placement, or permission of instructor. This course, or its equivalent, is required for admission to the Cornell Abroad program. D. Cruz de Jesus.
An advanced-intermediate course designed for students who want to go beyond the basic language requirement, and further broaden their knowledge of the language and related cultures, as well as improve their comprehension and communication skills. This course guides students to take greater command of their own language learning process to optimize their continued progress. Includes a strategic focus on specific problems in listening and reading comprehension, and in accurate writing and speaking.

SPAND 205 Spanish Translation
Summer. 4 credits. Prerequisite: proficiency in Spanish. J. Routier-Pucci.
The objective of the course is to learn to translate from Spanish into English and in so doing, to investigate the various technical, stylistic and cultural difficulties encountered in the translation process.

SPAND 213 Intermediate Spanish for the Medical and Health Professions
Fall or spring. 3 credits. Prerequisite: qualification in Spanish (Spanish 123, LPS score 56-64, or SAT II 590-680) or permission of instructor. Students who have taken Spanish 203 or 200 should speak to the instructor. A. Tio.

SPAND 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

SPAND 310 Advanced Conversation and Pronunciation
Spring. 3 credits. Prerequisite: Spanish 204 or equivalent. Not offered 1998-99. Z. Iguina.
A conversation course with intensive oral practice obtained through the production of video programs. Study of the fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. Weekly pronunciation labs.

SPAND 366 Spanish in the United States (also Latino Studies Program 366, Linguistics 366 and SPANR 366)
Spring. 4 credits. Prerequisite: some knowledge of Spanish. M. Suher.
Examination of major Spanish dialects in the United States from a linguistic perspective. Contrast with the standard language. Borrowing, interference, and code switching. Syntactic, morphological, and phonological characteristics. Sex-related phenomena.

SPAND 407 Grammatical Structure of Spanish I (also Linguistics 407 and SPANR 407)
Spring. 4 credits. Prerequisite: proficiency in Spanish or permission of instructor. Not offered 1998-99. M. Suher.

SPAND 408 Grammatical Structure of Spanish II (also Linguistics 408 and SPANR 408)
Spring. 4 credits. Prerequisites: Linguistics 101 and proficiency in Spanish or permission of instructor. Offered alternate years. Not offered 1998-99. M. Suher.

SPAND 630 Spanish for Reading
Spring. 3 credits. Limited to graduate students. J. Routier-Pucci.
Designed for those with little or no background in Spanish and little exposure to written Spanish, this course primarily aims to develop skill in reading Spanish. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. The types of texts to be covered will be based on the interests of the students in the course.

SPAND 660 Latino Languages, Ideology and Practice (also Anthropolgy 660 and Latino Studies Program 660)
Spring. 4 credits. V. Santiago-Irizarry.
For description, see Anthropology.

SwaHili
See listings under Africana Studies and Research Center.

Swedish

SWED 121-122 Elementary Swedish
121, fall; 122, spring. 4 credits each term. Prerequisite: for Swedish 122, Swedish 121 or equivalent. L. Tranvik.
The aim of this course is to develop skills in listening, speaking, reading and writing within Sweden's cultural context. Interactive computer programs are used in these courses.

SWED 123 Continuing Swedish
Fall. 4 credits. Prerequisite: Swedish 122 or equivalent. L. Tranvik.
Development of skills in spoken and written Swedish within Sweden's cultural context.
SWED 203 Intermediate Swedish
Spring. 3 credits. Prerequisite: Swedish 123 or permission of instructor. L. Trancik.
Intermediate to advanced level instruction utilizing audio-visual material and text to enhance language comprehension.

SWED 204 Advanced Swedish
Fall. 3 credits. Prerequisite: Swedish 203 or permission of instructor. Taught in Swedish. L. Trancik.
Emphasis on improving oral and written expression of Swedish, including vocabulary, readings in contemporary prose, treatment of specific problems in grammar, and presentation of videos and films.

SWED 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. L. Trancik.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Tagalog
See also courses listed in this section under Southeast Asian Languages.
TAG 121-122 Elementary Tagalog
121, fall; 122, spring. 4 credits each term. Prerequisite: for Tagalog 122, Tagalog 121. Staff.
A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

TAG 123 Continuing Tagalog
Fall. 4 credits. Prerequisite: Tagalog 122 or equivalent. Satisfactory completion of Tagalog 123 fulfills the qualification portion of the language requirement. Not offered 1998-99. J. Wolff and staff.
Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings; and sharpens listening skills.

TAG 205-206 Intermediate Tagalog @
205, fall; 206, spring. 5 credits each term. Prerequisites: for Tagalog 205, Tagalog 123 or equivalent; for Tagalog 206, Tagalog 205 or equivalent. Satisfactory completion of Tagalog 205 fulfills the proficiency portion of the language requirement. Staff.
This course develops all four skills: reading, writing, speaking, and comprehension.

TAG 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Thai
See also courses listed in this section under Southeast Asian Languages.
THAI 101-102 Elementary Thai
101, fall; 102, spring. 6 credits each term. Prerequisite: for Thai 102, Thai 101 or equivalent. Intended for beginners or students placed by examination. N. Jagacinski.
A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

THAI 201-202 Intermediate Thai Reading
201, fall; 202, spring. 3 credits each term. Prerequisites: for Thai 201, Thai 102; for Thai 202, Thai 201 or equivalent. N. Jagacinski.

THAI 203-204 Intermediate Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Thai 203, Thai 102; for Thai 204, Thai 203. N. Jagacinski.

THAI 301-302 Advanced Thai @
301, fall; 302, spring. 4 credits each term. Prerequisite: Thai 202 or equivalent. N. Jagacinski.
Selected readings in Thai writings in various fields.

THAI 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. N. Jagacinski.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

THAI 303-304 Thai Literature
303, fall; 304, spring. 4 credits each term. Prerequisite: Thai 302 or equivalent. N. Jagacinski.
Reading of significant novels, short stories, and poetry written since 1850.

THAI 401-402 Directed Individual Study
401, fall; 402, spring. 4 credits each term. For advanced students or students with special problems or interests. Prerequisite: permission of instructor. N. Jagacinski.

Ukrainian
UKRAN 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Urdu
See listings under Hindi.

Vietnamese
See also courses listed in this section under Southeast Asian Languages.
VIET 101-102 Elementary Vietnamese
101, fall; 102, spring. 6 credits each term. Prerequisite: for Vietnamese 102, Vietnamese 101 or equivalent. Intended for beginners or students placed by examination. Satisfactory completion of Vietnamese 102 fulfills the proficiency portion of the language requirement. T. Tranviet.
A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

VIET 201-202 Intermediate Vietnamese
201, fall; 202, spring. 3 credits each term. Prerequisites: for Vietnamese 201, Vietnamese 102 or equivalent; for Vietnamese 202, Vietnamese 201. T. Tranviet.
Continuing instruction in spoken and written Vietnamese.

VIET 203-204 Intermediate Vietnamese Composition and Reading @
203, fall; 204, spring. 3 credits each term. Prerequisite: permission of instructor only. T. Tranviet.
Designed for students and "native" speakers of Vietnamese whose speaking and listening are at the advanced level, but who still need to improve writing and reading skills.

VIET 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. T. Tranviet.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

VIET 301-302 Advanced Vietnamese @
301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for Vietnamese 301, Vietnamese 202 or permission of instructor; for Vietnamese 302, Vietnamese 301. T. Tranviet.
Continuing instruction in spoken and written Vietnamese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

VIET 401-402 Directed Individual Study
401, fall; 402, spring. 2–4 credits variable each term. Prerequisite: permission of instructor. Intended for advanced students. T. Tranviet.
Various topics according to need.

Welsh
[WELSH 411 Readings in Modern Welsh (also Linguistics 238)
Fall. 3 credits. Prerequisite: permission of instructor. Not offered 1998-99. W. Harbert.
Topics are selected on the basis of student needs.]

WELSH 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. W. Harbert.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

MODERN LANGUAGES AND LINGUISTICS

MUSIC
M. Scattereday, chair; S. Tucker, director of undergraduate studies (218 Lincoln Hall, 255-3423); R. Harris-Warrick, director of graduate studies (312 Lincoln Hall, 255-7141); M. Bilson, X. Bjerk, D. Borden, D. Conn, L. Coral, T. Folan, M. Hatch, K. Hester, J. Hsu, J. Kelln, F. Murray, J. Peraino, D. Rands, A. Richards, R. Riley, D. Rosen, R. Sierra, S. Stuckey, J. Webster, D. Yearley, N. Zaslaw
Two options are available to the student in planning to major in music. Each carries the requirement for a major concert or solo performance, and for further information, apply to the director of the department.

**Option I** presupposes some musical background before entering Cornell. Prerequisites for admission to the major are: completion of Music 152 and 154, at the latest by the end of the sophomore year (the freshman year is preferable), with an overall grade of B- or better in each course. For further information, apply to the director of undergraduate studies.

The requirements for the Bachelor of Arts degree with a major in music under Option I comprise the following:

1. in music theory: Music 251, 252, 253, 254, 351, 355, and one of the following: Music 451, 452, 453, 454, 455, 456.
2. in music history: sixteen credits in courses numbered 381 or above listed under Music History Courses for Majors. At least three of these courses must be drawn from the four-course sequence Music 381-384.
3. in performance: four semesters of participation in a musical organization or ensemble sponsored by the Department of Music (Music 331 through 346 and 421 through 448).

**Option II** presupposes considerable musical study before entering Cornell. Prerequisites for admission into the Option II program are: previous acceptance as an Option I major and satisfactory completion of Music 252 and 254, normally by the end of the sophomore year. Students must apply to the department for formal acceptance as an Option II major. An Option II major concentrates in one of the three areas listed below. For Option II in performance, exceptional permission must be demonstrated, in part by a successful solo recital before the end of the sophomore year. The requirements for the Bachelor of Arts degree with a major in music under Option II are:

1. completion of all the requirements for Option I, except as noted below, and
2. in addition:
   a) in performance:
      (1) the requirement for four semesters of participation in a musical organization or ensemble is waived (but such majors are expected to participate actively in chamber and other ensembles sponsored by the department);
      (2) sixteen credits in individual instruction in the student's major instrument, or voice, earned by taking Music 325-326 throughout the junior and senior years.
   b) in theory and composition or in history: twelve additional credits in this area of concentration at the 300 level or above, of which either four may be earned in Music 301 or 302 when taken on a credit/no credit basis. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. In the senior year the candidate enrolls in Music 401-402 with the chair of the honors committee as instructor. Candidates will be encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities, culminating in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. A comprehensive examination administered by the candidate's committee is held not later than May 1. The level of honors conferred is based primarily on the candidate's performance in the honors program, and secondarily on the candidate's overall record in departmental courses and activities.

**Distribution Requirement**

College of Arts and Sciences students may apply either one or two Music Department courses toward the distribution requirement in Group 4 (humanities and the arts). Neither freshman seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least 3 credits, and it may not be in musical performance (Music 321-322, 323-324) or in organizations and ensembles (Music 351 through 346 and 421 through 448).

If two music courses are counted for distribution, they must total at least 6 credits, and at least one of these courses must be academic, not performance-oriented. The second "course," however, may comprise either up to 4 credits earned in performance (Music 321-322, 323-324) or up to 4 credits earned in organizations and ensembles (Music 331 through 346 and 421 through 448), but not both.

**Facilities**

**Music Library.** The Music Library, in Lincoln Hall, has an excellent collection of standard research tools. Its holdings consist of approximately one hundred-twenty thousand books, periodicals, and scores and forty-five thousand sound and video recordings. Particularly noteworthy are the collections of opera from all periods; twentieth-century scores and recordings; a large microfilm collection of Renaissance sources, both theoretical and musical; and a collection of eighteenth-century chamber music. In addition, the Department of Rare Books, in the Kroch Library, houses a collection of early printed books on music and musical manuscripts.

**Concert Halls.** The Department of Music sponsors more than one hundred concerts annually. Cornell's principal concert halls are Bailey Hall Auditorium (about 2,000), Alice Statler Auditorium (about 900), Sage Chapel...
Rehearsal Spaces. The orchestras and bands rehearse in Ithaca Hall, Barnes Hall, and Barton Hall; the Jazz Ensembles, Gamelan, and Chamber Ensembles rehearse in Lincoln Hall; and the choral ensembles are quartered in Sage Chapel. Eleven practice studios in Lincoln Hall are available for individual practice by pianists, vocalists, and instrumentalists.

Twenty-two grand pianos and eight upright or studio pianos are housed in Cornell's offices, classrooms, and rehearsal spaces. In addition, our Center for Keyboard Studies includes two concert grand pianos (Steinway and Mason & Hamlin), two eighteenth-century fortepiano replicas (copies of Johann Andreas Stein and Anton Walter), an original Broadwood grand piano from 1827, and an 1824 Conrad Graf fortepiano replica, one Dowd and one Hubbard harpsichord, and a Challis clavi-chord. Barnes Hall houses a chamber organ by Derwood Crocker, a large Aeolian Skinner Organ is located in Sage Chapel, and there is a Helmuth Wolff tracker organ in Anabel Taylor Chapel.

Digital/ Electronic Equipment. A Macintosh Master studio is available for graduate student use (hours to be arranged) and occasional independent study use. The software used is Performer, Mosaic, Finale, and several Opcode patch editor/librarians. The instruments include a Yamaha KX38 MIDI Controller keyboard, a Yamaha TX802 FM synthesizer, an E-Mu Proteus XR, a Casio FZ 10M sampler and various other synthesizers. In addition, there are two MIDI work stations with additional instruments, including a Korg M1 synthesizer and an Akai S900 sampler.

Freshman Seminars

MUSIC 111 Sound, Sense, and Ideas
Section I—Words and Music. Spring. 3 credits. B. Harris-Warrick.
In speaking, writing and even thinking about music, we rely on language to express the structure and meaning of a complex nonverbal art. This seminar will explore relationships between words and music. We will look at works of many periods and styles by Dowland, Handel, Mozart, Gershwin, the Beatles, and others. The readings will offer a wide context for thinking and writing about music.

Section II—Unsworth's Fiddler, or The Musician's Misery. Fall and spring. 3 credits. G. Moulsedale.
The musician in Barry Unsworth's novel Sacred Hunger is an Irish fiddler named Sullivan. He works on a slave ship, playing reels and jigs to "exercise" the slaves. Sullivan is happy to play, but he doesn't like his work. This seminar will explore the origins of the slaves' chains clanging on the deck spoils his music. From the myth of Orpheus to the career of "Shine" pianist David Helfgott, the figure of the suffering musician is a common one. In this seminar, we will consider the association between musical repertories and occasions; and, as a means of marking a character—even non-musicians—in film and literature. Musics studied may include jazz, "hurtin' songs," and the late Renaissance lament, while texts and films may include fiction by Wagner, Shine, The Seventh Veil, and Farinelli.

Section III—Classical Music: Famous First Performances. Fall and spring. 3 credits. S. Day.
Several works in the classical concert-hall and operatic repertory had notorious circumstances surrounding their premiere performance. In this seminar we will become familiar with the historical background of a given work's inception, and consider the obstacles implicated in the act of "reconstructing" original context. Assignments will help us develop astute listening and clear writing. Repertoire may include Handel's Water Music, Haydn's Farewell Symphony, Beethoven's Symphony No. 9, Berlioz's Symphonie Fantastique, Bizet's Carmen,DVork's New World Symphony, Ravel's Bolero, and Stravinsky's Rite of Spring: we will also interview a contemporary composer and attend the premiere performance of one of his/her works.

MUSIC 115 Popular Musics Today
Fall. 3 credits. Not offered 1998-99.

Introductory Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

MUSIC 100 Elementary Music: Reading and Notation
Fall or spring, weeks 2-5. 1 credit.
Prerequisite: concurrent enrollment in any three-credit course in music and permission of instructor. D. Conn.
This four-week course, given at the beginning of each term, will fulfill the requirement of basic pitch and rhythm and reading skills needed for introductory courses (except 101 and 103) and 200-level courses with prerequisites. The material covered in this course is no longer part of Music 105.

MUSIC 101 The Art of Music
Fall. 3 credits. 1-hour disc to be arranged. M. Hatch.

MUSIC 103 Introduction to the Musics of the World
Fall. 3 credits. 1-hour disc to be arranged. No previous training in music required. J. Peraino.
Exploration of musical genres from selected regions of the world. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

MUSIC 105 Introduction to Music Theory
Fall or summer, spring. 3 credits. Plus two hours to be arranged. Experience in reading music is highly recommended.
Fall, S. Tucker, spring, D. Yearsley.
An elementary, self-contained introduction to music theory emphasizing fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads; basic concepts of tonality; extensive listening to music in various styles; analysis of representative works of Bach, Mozart, Haydn and Beethoven.

MUSIC 106 Introduction to Music Theory
3 credits. Prerequisite: Music 105 with grade of B- or better. Limited to 20 students. Not offered 1998-99.

MUSIC 107 Hildegard to Handel
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. R. Harris-Warrick.
The music of Western Europe from the Middle Ages through the Baroque period. Starting from Gregorian chant and the monophonic works of Hildegard von Bingen (celebrating her 900th birthday this year), this course will survey composers and repertories such as the troubadours, the Notre Dame School, Renaissance sacred polyphony, madrigals, the dance-suite, concertos, cantatas, and will end in the early 18th century with works by Vivaldi, Bach, and Handel.

MUSIC 108 Mozart to Minimalism
Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. N. Zadkine.
A survey of Western art music in many genres from the second half of the 18th century to the present. Composers whose music will be studied include Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Berlioz, Chopin, Wagner, Verdi, Liszt, Brahms, Mahler, Debussy, Strauss, Stravinsky, Bartók, Ives, Webern, Messiaen, Copland, Bernstein, Carter, Stocky, and Siern.

MUSIC 201 Diction for Oral Presentation
Fall or spring. 1 credit. Prerequisite: permission of instructor. J. Kellock.
Introduction to the uses of the International Phonetic Alphabet for pronunciation of English, French, German, and Italian. Open to singers and non-singers. Assignments will vary according to musical experience. Singing students will be expected to perform their assignments. Students taking voice lessons for credit (321a–322a) must take Music 201 by the end of the third semester of lessons.

Music Theory

Students contemplating the music major are strongly advised to take Music 151, 152, 153, and 154 in the freshman year; in any case Music 152 and 154 must be completed no later than the end of the sophomore year. Students contemplating Option II must complete Music 252 and 254 by the end of the sophomore year.

MUSIC 151 Tonal Theory I
Fall. 3 credits. Prerequisites: admission by departmental placement exam and concurrent enrollment in or previous credit for Music 153, or equivalent. Intended for students expecting to major in music and other qualified students. E. Murray.
Detailed study of the fundamental elements of tonal music: rhythm, scales, intervals, triads; melodic principles and 2-part counterpoint; diatonic harmony and 4-part voice leading in root position and first inversion; analysis of phrase and period structure.
MUSIC 152 Tonal Theory II
Spring. 3 credits. Prerequisites: Music 151 and 153 or equivalent, and concurrent enrollment in or previous credit for Music 154. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 152 is required for admission to the music major. E. Murray.
Continued study of voice leading and harmonic progression, including diatonic modulation; analysis of binary and ternary forms.

MUSIC 153 Musicianship I
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 151. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 153 is required for admission to the music major. E. Murray.

MUSIC 154 Musicianship II
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 152. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 154, and failure in none of the individual musicianship components of the course, are required for admission to the music major. E. Murray.

MUSIC 239 Introduction to Improvisational Theory
Fall. 2 credits. Prerequisite: permission of instructor. Intended for performers in "jazz" and related styles. K. Hester.
Tonal, modal, and blues harmonic resources, and the formal structures in which they are embodied. Development of improvisational skills and creation of spontaneous compositions.

MUSIC 251 Tonal Theory III
Fall. 3 credits. Prerequisites: Music 152 and 154 or equivalent, and concurrent enrollment in Music 253. J. Webster.
Continuation of diatonic and introduction to chromatic harmony; species counterpoint; composition in small forms.

MUSIC 252 Tonal Theory IV
Spring. 3 credits. Prerequisites: Music 251 and 253 or equivalent, and concurrent enrollment in Music 254. J. Webster.
Study of and composition in larger forms, including sonata form; systematic study of chromatic harmony, voice-leading, and modulation; composition in chromatic style.

MUSIC 253 Musicianship III
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 251. 2 hours TBA. J. Webster.

MUSIC 254 Musicianship IV
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 252. 2 hours TBA. J. Webster.

MUSIC 351 Materials of Twentieth-Century Music
Fall. 3 credits. Prerequisite: Music 252 and 254 or equivalent, and concurrent enrollment in Music 353. R. Sierra.
Introduction to some of the techniques of twentieth-century music, including extended tonality, modes, twelve-tone technique, set theory and new approaches to form and rhythm. Analysis of representative works by Debussy, Bartok, Webern, Hindemith, Schoenberg, Stravinsky, and others.

MUSIC 353 Musicianship V
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 351. 2 hours TBA. R. Sierra.

MUSIC 451 Counterpoint
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1998-99. S. Stucky.
Composition in the polyphonic vocal style of the late Renaissance.

MUSIC 452 Topics in Music Analysis
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1998-99. J. Webster.
A survey of important analytical approaches to tonal music, including thematic motivic relations, phrase-rhythm, large-scale paragraph construction, structural-tonal voice-leading, and relations among the movements in a multimovement work.

MUSIC 453 Introduction to Improvisational Theory
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. K. Hester.
Study and performance of tonal, modal, and blues harmonic resources; introduction to the formal structures in which these resources are embodied. Includes ear training, work at the keyboard, composing short pieces, and analyzing selected representative works of popular music and African-American art music from 1940 to 1970.

MUSIC 454 Composition
Fall. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1998-99.

MUSIC 455 Conducting
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1998-99.
Fundamentals of score reading, score analysis, rehearsal procedures, and conducting technique; instrumental and choral contexts.

MUSIC 456 Orchestration
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. E. Murray.
Orchestration based on nineteenth- and twentieth-century models.

Music in History and Culture

MUSIC 221 History of Rock Music
Spring. 3 credits. No previous training in music required. J. Pernaiu.
This course examines the development and cultural significance of rock music from its origins in blues, gospel, and Tin Pan Alley up to present-day genres of alternative rock and hip hop.

MUSIC 222 A Survey of Jazz
This course will trace the evolution of jazz historically from its African roots to the current diverse spectrum of improvisational styles that form popular, Neo-classic, and innovative contemporary jazz music.

MUSIC 245 Gamelan in Indonesian History and Cultures
Fall or spring. 3 credits. Permission of instructor. No previous knowledge of musical notation or performance experience necessary. M. Harris.
An introduction to Indonesia through its art. Elementary techniques of performance on the Javanese gamelan; a general introduction to Indonesian history and cultures, and the socio-cultural contexts for the arts there. Several short papers and one longer research report are required.

MUSIC 261 Bach and Handel
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1998-99. D. Yeatsley.

MUSIC 262 Haydn and Mozart
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1998-99. N. Zaslav.
Music for courts, theaters, churches, concerts, dancing, marching, public and private ceremonies, and domestic use by two extraordinarily different musical personalities who were friends, explored in its historical and socio-cultural contexts.

MUSIC 263 Beethoven
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. J. Webster.
A survey of Beethoven's life, works, and influence. While the primary focus will be his musical style and its development, the course will also cover social-cultural factors and the psychology and reception of genius.
Music History Courses for Majors and Qualified Non-Majors

Prerequisite: Music 152 or permission of instructor. Intended primarily for music majors, these courses investigate selected topics and repertories from each period in some detail. Each course includes readings, oral and written papers, and analyses.

*See the list of courses with overlapping content at the end of the introduction.

Music History Courses (also Gerst 374 and Itala 374)

Spring. 4 credits. Prerequisite: any three-credit music course or proficiency in German or Italian. Not offered 1998-99. A. Groos.

Music History Courses (also Gerst 374 and Itala 374)

Spring. 4 credits. Prerequisite: any three-credit music course or proficiency in German or Italian. Not offered 1998-99. A. Groos.

MUSIC 301 Music in Western Europe to 1700

R. Harris-Warrick.
Western European music from the Middle Ages to the early Baroque, including Gregorian chant, secular monophony, the development of polyphony, the birth of opera, and the rise of independent instrumental music.

MUSIC 382 Music of the Eighteenth Century

J. Weber.
Music in Western and Central Europe and North America from Bach, Handel and Vivaldi to Haydn and Mozart, including comic and serious opera, church music, concert music, and social music.

MUSIC 383 Music of the Nineteenth Century

Fall. 4 credits. D. Rosen.
A chronological survey of nineteenth-century music from Beethoven through Puccini including reference to its cultural and historical context.

MUSIC 384 Music of the Twentieth Century

Spring. 4 credits. S. Stucky.
Movements, schools, and styles in "classical" music from the turn of the century to the present. Extensive listening and reading assignments for historical breadth; detailed attention to representative works for analytical depth.

MUSIC 388 Historical Performance Practicum

M. Bilson.
The study of 18th- and 19th-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.

MUSIC 398-399 Independent Study in Music History

Spring, fall; 399, spring. 4 credits. Prerequisite: Music 382 and permission of instructor. Staff.
Advanced study of various topics in music history. Students enrolling in Music 398-399 participate in, but do not register for, an approved 200-level music history course and, in addition, pursue independent research and writing projects.

MUSIC 410 Music and Monstrous Imaginings (also S HUM 410)

Fall. 4 credits. Permission of instructor. A. Richards.
See S HUM 410 for description.

MUSIC 411 Improvisation, Music, History (also S HUM 411)

Spring. 4 credits. Permission of instructor. A. Richards.
See S HUM 411 for description.

MUSIC 489 African American Music Innovators (also AS&RC 489)

Fall. 4 credits. Permission of instructor. Not offered 1998-99.

MUSIC 490 American Musical Theatre (also English 454)

Spring. 4 credits. S. McMillen.
See English 454 for description.

MUSIC 492 Music and Queer Identity

Spring. 4 credits. Prerequisite: Music 152 or permission of instructor. Not offered 1998-99. J. Peraino.
Throughout history music has been associated with "otherness" in Western cultures. This course examines how and why music encodes "queerness" by focusing on various musical genres (such as opera, disco, women's music, country) and composer/musicians (such as Franz Schubert, Judy Garland, David Bowie) that have become significant for various lesbian and gay communities. The course will also examine the reasons behind the general popularity of queer-coded but "straight-identified" performers such as Elvis Presley, Prince, and Michael Jackson.

MUSIC 493 Women and Music (also W O M W N S 438)

Spring. 4 credits. Prerequisite: Music 152 or permission of instructor. J. Peraino.
This course introduces the students to a critical examination of women's participation in Western European and American musical traditions. The course will focus on the various subject positions and critical perspectives that women hold in examples of music and writings about music. Of primary importance will be the concepts of "objective" vs. "subjective" approaches to the topic of the week. Topics will include Approaches to History and Criticism, Women Composers, Women Performers, Women as Objects, Women's Music, Drag and Androgyny, and Women as Listeners. Students will be asked to keep a journal of their reactions to the readings, listening assignments, and class discussions, and to write "objective" and "subjective" formal papers.

MUSIC 501-502 Improvisation, Music, History (also S HUM 501-502)

Fall or spring. 4 credits. Credit to be arranged. Prerequisite: permission of instructor. D. Borden.
Limited to honors candidates in their senior year. Staff.

Honors Program

MUSIC 401-402 Honors in Music

Fall, spring. 4 credits each term. Limited to honors candidates in their senior year. Staff.

Digital Music and New Media

MUSIC 120 Learning Music through Digital Technology

Fall or spring. 3 credits. Enrollment limited. Prerequisite: permission of instructor. D. Borden.
This course uses selected commercially available technological resources to produce live music. The student is expected to master the Macintosh computer, several music software programs, and several synthesizers using MIDI. The ability to read music is helpful but not necessary. There are no papers to write; homework is presented in three classroom concerts. The final is a live presentation of the student's final project in a concert open to the public.
MUSIC 100 Learning Counterpoint through Digital Technology
Spring. 3 credits. Enrollment limited. Prerequisite: 152 and permission of instructor. D. Borden.
This course is a study of traditional contrapuntal techniques from the fourteenth century to the present, with emphasis on invention and fugue. Synthesizers, samplers, MIDI, and music software will be covered. There are three classroom concerts, some analysis and a final public concert.

MUSIC 391 Media Arts Studio I (also THTTR 391, ART 391, ARCH 391)
Fall. 3 credits. Permission of instructor. See THTTR 391 for description.

MUSIC 392 Media Arts Studio II (also THTTR 392, ART 392, ARCH 392)
Spring. 3 credits. Permission of instructor. See THTTR 392 for description.

MUSIC 420 Introduction to MIDI Techniques
Spring. 4 credits. Permission of instructor. D. Borden.
This course is an introduction to MIDI for students who are already at an advanced level in music composition. Three composition projects will be completed in collaboration with film, dance, and computer animation students.

MUSIC 620 Introduction to MIDI Techniques

Musical Performance
Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, and some brass and woodwind instruments to those students advanced enough to do college-level work in these instruments. Lessons are available by audition only. They may be taken either without credit or, through Music 321a-322a, with credit. Other instruments may sometimes be studied for credit outside Cornell, but also by audition only (see Music 321h-322h). Cornell does not offer instruction at the beginner's level.

Lessons for beginners. The Music Department can recommend outside teachers for those who wish to begin studying voice or an instrument. No credit is available for beginning instruction.

Auditions. Auditions are held at the beginning of each term for lessons for advanced students. Contact the Department of Music office (104 Lincoln Hall) for information.

Fees. The fee for a one-half hour lesson weekly, without credit, is $150 per term. For a one-hour lesson (or two half-hour lessons) weekly, without credit, the fee is $300. The fee in Music 321c-322c for a one-hour lesson (or two half-hour lessons) for credit is $225 per term. All fees are non-refundable once lessons begin, even if the course is subsequently dropped.

Scholarships. Music majors receive a scholarship equal to the lesson fee listed above. Members of the department-sponsored organizations and ensembles may, with the permission of the director of the organization, receive a scholarship of up to $150 of the Cornell fee for the type of lessons chosen during the term. (These scholarships are intended only for lessons in the student's primary performing medium.) Scholarships forms, available in the Music Department office, are to be returned to the office within the first three weeks of classes.

Practice rooms. Practice-room fees for twelve hours weekly are $50 per term and for six hours weekly are $40 per term for a room with a piano. Practice-room fees for twelve hours weekly are $25 per term and for six hours weekly are $15 per term for a room without a piano. The fee for the use of the pipe organ is $90 for twelve hours weekly and $40 for six hours weekly. All fees are non-refundable.

Earning credit. For every 4 credits earned in Music 321c-322c, the student must have earned, or currently be earning, at least 3 credits in another music course (excluding freshman seminars, Music 321-322, 331 through 346, 323-324, or 421 through 448). These 3 credits must be earned prior to, or simultaneously with the first 2 credits in 321c-322c; they cannot be applied retroactively. Transfer credit for appropriate study taken elsewhere may be used to satisfy this requirement with the approval of the department.

Lessons taken outside Cornell. Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of Music 321h-322h and contact the Music Department office.

MUSIC 321c-322c Individual Instruction in Voice, Organ, Harpsichord, Piano, Strings, Woodwinds, and Brass
Prerequisite: advanced students may register only after a successful audition with the instructor, usually scheduled during the first week of classes, and will receive credit only as described under "Earning credit," above. Students may register for this course in successive years. Students, at the sole discretion of the instructor, earn credit for a one-hour lesson (or two half-hour lessons) weekly accompanied by an appropriate practice schedule.

MUSIC 321a-322a Individual Instruction in Voice
321a, fall; 322a, spring. 2 credits each term. Prerequisite: successful audition during registration. Music 201 must be taken by the end of the third semester of lessons. Limited enrollment. Attendance at weekly studio class required for all credit students. The Vocal Coaching Program offers noncredit lessons to members of the choral ensembles.

MUSIC 321b-322b Individual Instruction in Organ
321b, fall; 322b, spring. 2 credits each term. Prerequisite: successful audition. D. Yearsley.

MUSIC 321c-322c Individual Instruction in Piano
321c, fall; 322c, spring. 2 credits each term. Prerequisite: successful audition. M. Bilson, X. Bjorken and staff.

MUSIC 321d-322d Individual Instruction in Harpsichord
321d, fall; 322d, spring. 2 credits each term. Prerequisite: successful audition. D. Yearsley.

MUSIC 321e-322e Individual Instruction in Violin or Viola
321e, fall; 322e, spring. 2 credits each term. Prerequisite: successful audition. Not offered 1998-99. Staff.

MUSIC 321f-322f Individual Instruction in Cello
321f, fall; 322f, spring. 2 credits each term. Prerequisite: successful audition. Not offered 1998-99.

MUSIC 321g-322g Individual Instruction in Brass
321g, fall; 322g, spring. 2 credits each term. Prerequisite: successful audition. M. Scattereday.

MUSIC 321h-322h Individual Instruction outside Cornell
321h, fall; 322h, spring. 2 credits each term. Prerequisite: successful audition. Coordinator: D. Conn.

All the standard orchestral and band instruments, keyboard instruments, guitar and voice may, under certain conditions, be studied for credit with outside teachers. This course is available primarily for the study of instruments not taught at Cornell and for the use of those who for reasons of space cannot be admitted to Music 321c-322c. Prior approval and audition by a member of the faculty in the department is required, and credit may be earned only as described under "Earning credit," above. For information and a list of approved teachers, consult the department office, 104 Lincoln Hall.

MUSIC 321i-322i Individual Instruction in Woodwinds
321i, fall; 322i, spring. 2 credits each term. Prerequisite: successful audition. D. Conn.

MUSIC 323c-324c Individual Instruction in Advanced Counterpoint
323c, fall; 324c, spring. 4 credits each term. Open only to juniors and seniors majoring in music under Option II with concentration in performance and to graduate students. Option II majors whose courses must be taken outside Cornell may apply to the department for financial assistance toward the cost of lessons; $225 per semester will normally be awarded to such students and a larger amount may be awarded under certain circumstances. Music 323 is not a prerequisite to 324.

Musical Organizations and Ensembles
Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admission is by audition only (usually at the beginning of each semester), except that the Sage Chapel Choir and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than 8 credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit.

MUSIC 331-332 Individual Instruction in Composition
331, fall; 332, spring. 4 credits each term. Prerequisite: successful audition. C. Federspiel.

MUSIC 333-334 Individual Instruction in Theory
333, fall; 334, spring. 4 credits each term. Prerequisite: successful audition. C. Federspiel.

MUSIC 335 Individual Instruction in Accompanied Vocal Ensemble
335, spring. 6 credits. Prerequisite: successful audition. D. Yearsley.

MUSIC 421-422 Individual Instruction in Harpsichord
421, fall; 422, spring. 4 credits each term. Prerequisite: successful audition. D. Yearsley.

MUSIC 423-424 Advanced Individual Instruction
423, fall; 424, spring. 6 credits each term. Prerequisite: successful audition. D. Yearsley.
MUSIC 331-332 Sage Chapel Choir
331, fall or summer; 332, spring. 1 credit. No audition for admission. T. Folan.

MUSIC 333-334 Cornell Chorus or Glee Club
333, fall; 334, spring. 1 credit. Prerequisite: permission of instructor. Chorus (treble voices): W 5:15-7:15 p.m. plus 2 hours to be arranged. Glee Club (mens voices): W 7:30-9:30 p.m., plus 2 hours to be arranged. Fall, S. Tucker; spring, staff.

MUSIC 335-336 Cornell Symphony Orchestra
335, fall; 336, spring. 1 credit. Prerequisite: permission of instructor. W 6-8 p.m. K. Hester.

MUSIC 337 Wind Symphony
Fall. 1 credit. Prerequisite: permission of instructor. M W 4:45-6:30. M. Scatterday and D. Conn.

MUSIC 338 Symphonic Band
Spring. 1 credit. Prerequisite: permission of instructor. M W 4:45-6:30. D. Conn.

MUSIC 339-340 Cornell Jazz Ensembles
339, fall; 340, spring. 1 credit. Prerequisite: permission of instructor. W 6-6 p.m. K. Hester.

MUSIC 342 Wind Ensemble
Spring. 1 credit. Prerequisite: permission of instructor. M 7:30-9:30 and R 4:45-6:30. M. Scatterday.

[MUSIC 345-346 Introduction to the Gamelan @

Concentrated instruction for beginning students in elementary techniques of performance on the Indonesian gamelan. Music 245 is a 3-credit course that complements the instruction in gamelan by an introduction to Indonesian history and cultures.

MUSIC 421-422 Cornell Chamber Orchestra
421, fall; 422 spring. 1 credit. Prerequisite: permission of instructor. T 5-6 p.m. J. Hsu.

Study and performance of the chamber symphonies of Haydn, Mozart, and their contemporaries. For strings, woodwinds, and horns. More recent music may also be included in the spring.

MUSIC 437-438 Chamber Winds
437, fall; 438, spring. 1 credit each term. Prerequisites: enrollment in Symphonic Band, Wind Symphony or Wind Ensemble in the same semester as this course AND permission of instructor only. Fall, T R 4:45-6:30 p.m. Spring, T F 4:45-6:30 p.m. M. Scatterday, D. Conn.

A flexible instrumentation ensemble performing original woodwind, brass, and percussion music from Gabrieli brass choirs and Mozart serenades through more contemporary works such as Stravinsky's Octet or premieres of works. The ensemble will perform on wind symphony, symphonic band and wind ensemble concerts in addition to several chamber concerts throughout the year.

MUSIC 439-440 Experimental Lab Ensemble
439 fall; 440 spring. 1 credit each term. Permission of instructor. W 8:30-10:30 p.m. K. Hester.

MUSIC 441-442 Chamber Music Ensemble
441, fall; 442, spring. 1 credit. Prerequisite: permission of instructor. J. Hsu.
Study and perform chamber music works from duos to octets for pianists, string and wind players.

MUSIC 443-444 Chorale
443 fall; 444 spring. 1 credit each term. Prerequisite: permission of instructor. F 4:30-6:15 p.m. R. Riley.
Study and performance of selected choral music for mixed voices.

MUSIC 445-446 Cornell Gamelan Ensemble
445 fall; 446 spring. 1 credit each term. Enrollment limited. Prerequisite: Music 245 or 345-346, or permission of instructor. R 7:30-10:00 p.m. M. Hatch.
Advanced performance on the Javanese gamelan. Tape recordings of gamelan and elementary number notation are provided. Some instruction by Indonesian musicians is offered in most years.

MUSIC 447-448 Chamber Singers
447, fall; 448, spring. 1 credit each term. Prerequisite: permission of instructor. Plus 2 hours to be arranged. V. Shende.

Graduate Courses
Open to qualified undergraduates with permission of instructor.

MUSIC 601 Introduction to Bibliography and Research
Fall. 4 credits. M 1:25-4. L. Coral.
This course explores the nature of the bibliographic tools, both printed and electronic, needed to pursue research in music.

[MUSIC 602 Analytical Technique
A critical survey of various analytical methods in current use. Frequent analytical assignments and class presentations.

[MUSIC 603 Editorial Practice

[MUSIC 604 Ethnomusicology: Areas of Study and Methods of Analysis
Spring. 4 credits. Open to graduate students in anthropology, linguistics, psychology, sociology, and other cognate fields with permission of instructor. M. Hatch.
Major aspects of research into musical cultures of the world. Problems, theories, and methods, especially those affecting analytic terminology, transcription and analysis of sound events, and fieldwork.

[MUSIC 622 Historical Performance Practice
The study of 18th- and 19th-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.

MUSIC 653 Topics in Tonal Theory and Analysis
Spring. 4 credits. J. Webster.
Topic for 1999: Schenker.

[MUSIC 654 Topics in Post-tonal Theory and Analysis

[MUSIC 657-658 Composition
657, fall; 658, spring. 4 credits each term. F 1:25-4:00 p.m. plus 1 hour to be arranged. Fall, R. Sierra, S. Stucky; spring, S. Stucky.

MUSIC 674 German Opera (also German Studies 672)
Spring. 4 credits. A. Groos.
To see German Studies for description.

[MUSIC 677 Mozart: His Life, Works, and Times (also German 757)
Fall. 4 credits. Not offered 1998-99.

[MUSIC 680 Topics in Ethnomusicology

MUSIC 681 Seminar in Medieval Music
Fall. 4 credits. J. Perino.
Topic: Medieval Music and Intellectual History.

[MUSIC 684 Seminar in Renaissance Music
Fall. 4 credits. Not offered 1998-99.

[MUSIC 686 Seminar in Baroque Music
Fall, R. Harris-Warrick; spring, N. Zaslav. 4 credits.
Fall topic: Seventeenth-century opera, including Venetian opera, the tragedie en musique, opera-ballet, and early opera seria. Spring topic: Handel.

[MUSIC 688 Seminar in Classical Music

[MUSIC 689 Seminar in Music of the Romantic Era

MUSIC 690 Seminar in Music of the Twentieth Century
Fall. 4 credits. S. Stucky.
Topic: Lutoslawski.

[MUSIC 691-692 Historical Performance
691, fall; 692, spring. 4 credits each term. Prerequisite: permission of instructor. Hours to be arranged. M. Bilson.
Lessons on the major instrument with supplementary study and research on related subjects.

[MUSIC 693 Seminar in Performance Practice
Fall or spring. 4 credits. Not offered 1998-99.

MUSIC 697-698 Independent Study and Research
697, fall; 698, spring. Credit to be arranged. Staff.

[MUSIC 785-786 History of Music Theory
785, fall; 786, spring. 4 credits each term. Not offered 1998-99.

[MUSIC 787 History and Criticism
courses at the 200, 300, or 400 level that form A. Qualification in two Near Eastern

The precise sequence and combination of historical and literary analysis.

Any two Near Eastern Studies history or Near Eastern Studies courses. After consulting

The Major

The sequence and combination of courses chosen to fulfill the major is selected

NEAR EASTERN STUDIES

R. Brann, chair; K. Haines-Eitzen, Y. Halevi-Wise, D. I. Owen, (director of the Program of Jewish Studies); L. Peirce, D. Powers (director of Undergraduate Studies), G. Rendsburg (director of Graduate Studies), D. Ruggles, N. Scharf, S. Shohr, L. White, M. Younes, J. Zorn

Joint faculty: M. Bernal

The Department

The Department of Near Eastern Studies (360 Rockefeller Hall, 255-6275) offers courses in the archaeology, history, religions, languages, and literatures of the Near East. Students are encouraged to take an interdisciplinary approach to the religions and cultures of the region which has had an important impact on the development of antique, medieval, and modern civilization. The department's course offerings treat the Near East from the dawn of history to the present and emphasize methods of historical and literary analysis.

Distribution Requirements

Any two Near Eastern Studies history or Near Eastern Studies courses at the 200, 300 or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the social sciences/history. Any two Near Eastern Studies civilization or literature courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the humanities. NES 197, 198 or a 200-level survey course plus any other Near Eastern studies course will constitute a sequence to fulfill the distribution requirement in either social sciences/history or humanities, depending on the second course used in combination with 197, 198 (or a 200-level survey course). All 200 or 300-level language courses may fulfill the humanities requirement.

The Major

The precise sequence and combination of courses chosen to fulfill the major is selected in consultation with the student's advisor. All majors must satisfy the following requirements (no course may be used to satisfy two requirements; S-U options not permitted):

A. Qualification in two Near Eastern languages or proficiency in one.

B. Nine three- or four-credit NES courses, which must include the following:  
1. NES 197 or 198 (when NES 197-198 are not offered, students may substitute a 200-level survey course with the approval of the director of undergraduate studies).
2. Two 200-level NES survey courses, one whose chronological parameters fall within the period 3000 B.C.E to 600 C.E., and one whose chronological parameters fall within the period 600 C.E. to the present. The following are examples (a complete list can be obtained in the department office):

3000 B.C.E to 600 C.E.

NES 223, Introduction to the Bible
NES 263, Introduction to Biblical History and Archaeology
NES 248, Introduction to Classical Jewish History

600 C.E. to the present

NES 233, The Lyrics of Love and Death: Medieval Hebrew and Arabic Poetry in Translation
NES 257, Islamic History 600-1258
NES 258, Islamic History 1258-1914
NES 294, Modern History of the Near East

3. At least two NES courses at the 300 level or above (one of which may be NES 301, 302, 311, or 312).

Prospective majors should discuss their plans with the director of undergraduate studies before formalizing an interdisciplinary plan in the department. To qualify as a major, a cumulative grade average of C or better is required.

Honors. Candidates for the degree of Bachelor of Arts with honors in Near Eastern Studies must fulfill the requirements of the appropriate major study and enroll in the honors course, NES 499, in the fall and spring semesters of their senior year. For admission to the honors program, candidates must have a cumulative average of B+ or better and have demonstrated superior performance overall in Near Eastern Studies courses. After consulting with their major advisor, candidates should submit an outline of their proposed honors work to the department during the second semester of their junior year.

Study abroad. Near Eastern Studies majors may choose to study in the Near East during their junior year. There are various academic programs in the countries of the Near East that are recognized by the Department of Near Eastern Studies and that allow for the transfer of credit. Archaeological field work on Cornell-sponsored projects in the Near East may also qualify for course credit.

Freshman Seminar

NES 127 What's Love Got To Do With It? Marriage and Courtship in the Hebrew Bible
Fall and spring. 3 credits. Enrollment limited to 15. C. Smith. We will read selections from the Hebrew Bible (in translation) and examine the portrayal of courtship and marriage in its laws, poetry, and narratives.

NES 150 Discovering Islam
Spring. 3 credits. Enrollment limited to 15 students. D. Powers. Against the backdrop of Western stereotypes, we will explore Islamic society and culture from within, with special attention to prophecy and revelation, ritual practice, criminal law, the status of women, and the Islamic understanding of death and resurrection.

Language Courses

NES 101-102 Elementary Modern Hebrew I and II (also JWST 105-106)
Fall, 101; spring, 102. 6 credits each term. Prerequisite for NES 102: 101 or permission of instructor. Satisfactory completion of NES 102 fulfills the qualification portion of the language requirement. Enrollment limited to 15 students in each section.

S. Shohr.

Intended for beginners. This course provides a thorough grounding in reading, writing, grammar, oral comprehension and speaking. Students who complete the course will be able to function in basic situations in a Hebrew-speaking environment.

NES 111-112 Elementary Arabic I and II
111, fall; 112, spring. Enrollment limited to 15 in each session. 6 credits each term. Prerequisite for Arabic 112: Arabic 111 or permission of instructor. L. White.

The course provides a thorough grounding in all language skills: listening, speaking, reading, and writing. It starts with spoken Arabic and gradually integrates Modern Standard Arabic in the form of listening and reading texts. Emphasis will be on learning the language through using it in meaningful contexts. The student who successfully completes the two-semester sequence will be able to: 1) understand and actively participate in simple conversations involving basic practical and social situations (introductions, greetings, school, home and family, work, simple instructions, etc.); 2) read Arabic material of limited complexity and variety (simple narrative and descriptive texts, directions, etc.); 3) write notes and short letters describing an event or a personal experience. An important objective of the course is to familiarize students with basic facts about the geography, history, and culture of the Arab world.

NES 201-202 Intermediate Modern Hebrew I and II (also JWST 201-202)
201, fall; 202, spring. Enrollment limited to 15 students in each section. 4 credits each term. Prerequisites for NES 201, 102 or permission of instructor; for NES 202, 201 or permission of instructor. N. Scharf. A sequel to NES 101-102. Continued development of reading, writing, grammar, oral comprehension, and speaking skills. The course introduces Hebrew literature and Israeli culture through the use of texts and audio-visual materials.

NES 211-212 Intermediate Arabic I and II
211, fall; 212, spring. Enrollment limited to 15 students in each section. 4 credits each term. Prerequisites for NES 211, one year of Arabic or permission of instructor; for NES 212, 211 or permission of instructor. M. Younes, L. White.

A sequel to NES 111-112. Continued development of the four language skills through extensive use of graded materials on a wide variety of topics. Increasing attention will be given to developing native-like pronunciation and to grammatical accuracy, but the main focus will be on developing communication skills. The student who successfully completes 212 will be able to: 1) understand and express himself or herself in Arabic in situations beyond the basic needs; 2) read and comprehend written Arabic of
average difficulty. 3) write a letter, a summary of a report or a reading selection. An appreciation of Arabic literature and culture will be sought through the use of authentic materials.

NES 301-302 Advanced Modern Hebrew I and II (also JWST 301-302) @ 301, fall; 302, spring. Limited to 15 students. Prerequisite: NES 300 or NES 301. 4 credits each term. Prerequisite for NES 301: 202 or equivalent, with permission of instructor. Prerequisite for NES 302: 301 or equivalent, with permission of instructor. This sequence may be used to fulfill the humanities distribution requirement in literature. Limited to 15 students. N. Scharf. Advanced study of Hebrew through the analysis of literary texts and expository prose. This course employs a double perspective: language is viewed through literature and literature through language. Students will develop composition skills by studying language structures, idioms, and various registers of style.

NES 311 Advanced Arabic I @ Fall. 4 credits. Prerequisite: NES 212 or permission of instructor. Limited to 15 students. M. Younes. Students will be introduced to authentic, unedited Arabic language materials ranging from poems, short stories, and plays to newspaper articles dealing with social, political, and cultural issues. Emphasis will be on developing fluency in oral expression through discussions of issues presented in the reading selections. A primary objective of the course is the development of writing skills through free composition exercises in topics of interest to individual students.

NES 312 Advanced Arabic II @ Spring. 4 credits. Limited to 15 students. Prerequisite: NES 311, or permission of instructor. M. Younes. This course is a continuation of NES 311 using similar but more challenging materials. There will be more focus on the writing skills, the development of native-like pronunciation, and accurate use of grammatical structures than in NES 311. Each student will be required to make an oral presentation in Arabic on a topic of his/her choice and submit a written version of the presentation.

NES 333-334 Elementary Akkadian I and II (also NES 633-634) @ # 333, fall; 334, spring. 4 credits. Prerequisite: NES 332 or NES 333 or permission of instructor. Not offered 1998-99. D. I. Owen.

NES 337-338 Ugaritic I and II # 337, fall; 338, spring. 4 credits. Prerequisite: NES 336 or NES 332 or permission of instructor. Not offered 1998-99. D. I. Owen.

NES 416 Structure of the Arabic Language (also LING 416) @ Spring. 4 credits. Prerequisite: NES 112 or one year of Arabic. Not offered 1998-99. M. Younes.

NES 420 Readings in Biblical Hebrew Prose (also JWST 420, RELST 420) @ Spring. 4 credits. Prerequisite: one year of Hebrew, Biblical or modern. Course may be repeated for credit. G. Rendsburg. An advanced course in reading selected portions of the Hebrew Bible. Emphasis will be placed on the philological method, with attention to literary, historical, and comparative concerns.

NES 433 Introductory Sumerian I (also NES 631) @ # Fall. 4 credits each semester. Prerequisite: permission of instructor. D. Owen. This course will consist of an introduction to the Sumerian cuneiform script and grammar of the third millennium B.C.E. Readings in selected Sumerian economic, legal, and historical inscriptions, a basic introduction to Sumerian grammar and script, linguistic connections, and a survey and discussion of Sumerian civilization and culture. Students who have taken or plan to take Akkadian, Hebrew, or Ugaritic linguistics or are otherwise interested in the history of language should consider this course.

NES 434 Introductory Sumerian II (Also NES 632) @ # Spring. 4 credits each semester. Prerequisite: NES 433/631. D. Owen. Continued study of Sumerian grammar and syntax; further readings in selected Sumerian economic, legal, and historical inscriptions of the late third millennium B.C.E.; additional discussion of Sumerian civilization and culture.

NES 631 Introductory Sumerian I (also NES 433) @ # Fall. 4 credits. Prerequisite: permission of instructor. D. Owen. For description, see NES 433 under Near Eastern Languages.

NES 632 Introductory Sumerian II (also NES 434) @ # Spring. 4 credits. Prerequisite: permission of instructor. D. Owen. For description, see NES 434 under Near Eastern Languages.

NES 633-634 Elementary Akkadian I and II (also NES 333-334) @ 633, fall; 634, spring. 4 credits. Prerequisite: NES 632/333 or permission of instructor. Not offered 1998-99. D. Owen.

NES 637-638 Ugaritic I and II (also NES 337-338) @ 637, fall; 638, spring. 4 credits. Prerequisite: knowledge of another Semitic language (preferably Hebrew). Not offered 1998-99. G. Rendsburg.

Archaeology

NES 261 Ancient Seafaring (also ARKEO 275, JWST 261) @ Spring. 3 credits. Enrollment limited to 80 students. D. Owen. A survey of the history and development of archaeology under the sea. The role of nautical technology and seafaring among the maritime peoples of the ancient Mediterranean world—Canaanites, Minoans, Mycenaeans, Phoenicians, Hebrews, Greeks, and Romans—as well as the riverine cultures of Mesopotamia and Egypt. Evidence for maritime trade, economics, exploration and colonization, and the role of the sea in religion and mythology.

NES 263 Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, and RELST 264) @ # Spring. 3 credits. Enrollment limited to 50 students. Staff. A survey of the principal archaeological developments in Canaan/Palestine from the Neolithic period (ca. 9000 B.C.E.) to the Babylonian Exile (586 B.C.E.). Includes an introduction to archaeological methodology utilized in the reconstruction of ancient cultures in the area, as well as the basic bibliography of the field. Emphasis will be placed on the use of archaeological data for the understanding of some major problems in Israelite history and archaeology, such as the dating of the cultural milieu of the patriarchs, the dating and geographical setting of the Exodus and the Israelite conquest, and the origin and history of the Philistines. Recommended for students planning to participate in excavations in Israel.

Civilization

NES 157 Introduction to Islamic Civilization (also RELST 157, HIST 157) @ # Fall. 3 credits. D. Powers. This course will present a survey of Islamic history and culture from the seventh century until the Mongol sack of Baghdad in 1258, with special attention to theology, law, sufism, science, philosophy, and art.

NES 197 Introduction to Near Eastern Civilization (also JWST 197 and RELST 197) @ # Fall. 3 credits each term. Not offered 1998-99. D. Owen.

NES 234 Arabs and Jews: Cultures in Confluence and Conflict (also JWST 234, RELST 234, and COM L 234) @ # Fall. 3 credits. Not offered 1998-99. R. Brann.

NES 251 Introduction to Islam: Religion, Politics, and Society (also RELST 252) @ # Spring. 3 credits. Not offered 1998-99. A. Gade.

NES 281 Gender and Society in the Muslim Middle East (also RELST 281, WOMNS 281) @ Spring. 3 credits. Limited to 20 students. Not offered 1998-99. L. Peirce.

NES 291 Arab Society and Culture Fall. 3 credits. Enrollment limited to 25 students. M. Younes. The focus of this course is Arab society in the 20th century. We will start with a definition of the term "Arab" and address the issue of whether there is one or several Arab nations. This will be followed by a detailed examination of the following topics: the role of religion, history, and language in shaping modern Arab society; Arab identity and the development of Arab nationalism; the Arab-Israeli conflict; the conflict between secular and religious movements; the political systems of the different Arab countries; ethnic and religious groups; the distribution of resources (the super-rich and the destitute) and resulting conflicts; education; and finally the family and the status of women. No prior knowledge of Arabic is required.
Judaism as a religion and as a civilization in worship, and similar topics. Jewish civilization, sacrifice and prayer as modes of theological development culminating in monotheism, the role of the covenant, law and society, sacrifice and prayer as modes of worship, and similar topics. Jewish civilization is placed within the context of ancient civilizations (Canaan, Egypt, Babylon, Persia, Greece, Rome). Texts to be studied include selections from the Bible; the Apocrypha, the Dead Sea Scrolls, Josephus, and the Mishnah. All readings in English translation.

This course focuses on the development of Judaism from the apostle Paul through the 17th century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We will explore the origins of Christianity within the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the various controversies that occupied the church throughout its history. The course will draw upon primary literary sources (from biblical and liturgical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.

The active patronization of art, architecture, literature, and charitable works by Muslim women from the 12th century to the present was a sign of their public and personal power. This course will examine the means of female empowerment, ascribing it to family ties, the birth of male heirs, education, financial independence, etc., as well as its limitations in a world where the public institutions were run by men. It will particularly examine periods of change and the rise of self-conscious feminism in the modern age.

The course will examine the history of Zionism from the rise of Hasidism; the changing economic and political role of the Jews in the 17th and 18th centuries; and the impact of Enlightenment.

This course will examine the history of Christianity within the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the various controversies that occupied the church throughout its history. The course will draw upon primary literary sources (from biblical and liturgical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.
This course is concerned with state and society in Pharaonic Egypt 3400-300 BCE. It will be combined with an introduction to Middle Egyptian, the official language of the Middle Kingdom 2000-1750 BCE and accepted as the "classical" language thereafter. This is a two-semester sequence course. In the fall we shall study the Egyptian state and society through secondary materials; in the spring we shall be reading primary sources concerned with everyday life, official reports and adventures abroad.

NES 390 Modern History of the Middle East: Changing Politics, Society and Ideas (also GOVT 356, JWST 390)
Fall. 4 credits. J. Rosberg.
This introductory course is designed to acquaint students with the main political, social, and cultural trends that have shaped the modern and contemporary history of the Near East. While discussing developments in the region during the 19th and 20th centuries, the lectures will focus on such themes as modernization, nationalism, Islamic response, and Arab politics in global and regional contexts. The course does not presuppose any knowledge of Near Eastern languages.

NES 391 International Relations of the Ancient Near East, 3500-500 BCE (also GOVT 355)

NES 392 Religion and Politics in the Middle East (also RELST 393)

NES 395 International Relations of the Middle East (also GOVT 392)
Fall. 4 credits. Not offered 1998-99.

NES 451 Seminar in Islamic History: 600-750 (also HIST 461/671, NES 650, and RELST 451)
Spring. 4 credits. Enrollment limited to 25 students. Prerequisite: NES 257 or 258, or permission of instructor. Not offered 1998-99. D. Powers.

NES 453 Islam in China and Southeast Asia (also ASIAN 422)
Fall. 4 credits. J. Armijo-Hussein.
For description, see Asian 422.

NES 457 The Role of Women in Muslim Societies: Past, Present and Future (also Asian 423)
Spring. 4 credits. J. Armijo-Hussein.
For description, see Asian 423.

NES 459 Women, Men and the Law in Muslim Court (also WOMNS 458, RELST 459, HIST 457/657 and NES 459)
Fall. 3 credits. Prerequisites: previous course in Islamic Studies helpful but not essential. Enrollment limited to 20 students. Not offered 1998-99. L. Peirce.

NES 460 Seminar in Islamic History: 600-750 (also HIST 461/671, NES 655, and RELST 451)

NES 465 Introduction to Islamic Law (also NES 351, RELST 350, HIST 372/652)

NES 465 Women, Men and the Law in Muslim Court (also WOMNS 458, RELST 459, HIST 457/657 and NES 459)
Fall. 3 credits. Prerequisites: previous course in Islamic Studies helpful but not essential. Enrollment limited to 20 students. Not offered 1998-99. L. Peirce.

NES 485 Ottoman History: 1300-1600 (also HIST 446/646 and NES 358)

NES 488 International Relations of the Middle East (also GOVT 482)
Fall. 4 credits. Graduate seminar.
Undergrad seniors only with permission of instructor. Not offered 1998-99. S. Telhami.

Literature

NES 213 Introduction to the Qur'an (also RELST 213)

NES 223 Introduction to the Bible (also JWST 223 and RELST 223)

NES 227 Introduction to the Prophets (also JWST 227 and RELST 227)
Fall. 3 credits. Enrollment limited to 140 students. G. Rendsburg.
This course will introduce students to the period of Israel's history that produced the prophetic literature, ca. 1600-400 B.C.E., and to the study of Israel's prophets, with specific reference to theological and literary issues. Also included in the course is a discussion of several other texts (Book of Job, Psalm 137, etc.). Even though these stories fall outside the corpus of the biblical prophets, they react to the same issues and events.

NES 229 Introduction to the New Testament (also RELST 229 and JWST 229)
Fall. 3 credits. K. Haines-Eitzen.
This course provides a literary and historical introduction to the earliest Christian writings, most of which eventually come to be included in the New Testament. Through the lens of the gospel narratives and earliest Christian letters, especially those of Paul, the course will explore the rich diversity of the early Christian movement, from its Jewish roots in first century Palestine through its development and spread to Asia Minor and beyond. Careful consideration will be given to the political, economic, social, cultural, and religious circumstances that gave rise to the Jesus movement, as well as those that facilitated the emergence of various traditions of early Christian beliefs and practices.

NES 230 The Quest for the Historical Jesus (also RELST 231)

NES 236 Israel: Literature and Society (also JWST 236)
Fall. 3 credits. Y. Halevi-Wise.
A series of Israeli literary works in English translation, including novels, short stories, and poems will be read and analyzed. The course will also consider how Israeli literature reflects the clashes between ideology and reality, Eastern and Western cultures, and different sociopolitical structures in Israeli life.

NES 239 Cultural History of the Jews of Spain (also JWST 239, COM L 239, RELST 239, SPAN L 239)

NES 296 Gender, Sexuality, and the Body in Early Christianity (also RELST 297, WOMNS 296)
Spring. 3 credits. K. Haines-Eitzen.
Beliefs about gender, sexuality, and the human body were remarkably interwoven with political, religious, and cultural disputes in early Christianity. In this course we will explore the construction and representation of gender, sexuality, and the body in various forms of Christianity from the first century through the fourth. Asceticism and celibacy, veiling and unveiling, cross-dressing and gender, androgyny, marriage, childbirth, and homosexuality will be among the topics considered, and our sources will range from the New Testament, early Christian apocrypha, martyrologies, and Christian writings to Greek medical texts, Jewish midrash, Roman inscriptions, and Egyptian erotic and magical spells. Current interdisciplinary and theoretical studies on gender, ideology, sexuality, and power will aid us in developing our analytical approaches to the ancient materials.

NES 313 Classical Arabic Texts (also RELST 313)
Fall. 4 credits. Prerequisite: NES 311 or equivalent. D. Powers.
This course will be an advanced study of classical Arabic through a close reading of selected chapters of the Qur'an, together with the Qur'anic commentary (tafsir) and other relevant literature. Special attention will be given to grammar, syntax, and lexicography.

NES 339 Muslims, Christians, and Jews in Islamic Spain: Literature and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339)

NES 356 Readings in Ottoman Turkish
Spring. 4 credits. Prerequisite: knowledge of modern Turkish. Enrollment limited to 15 students. Not offered 1998-99. L. Peirce.

NES 400 Seminar in Advanced Hebrew (also JWST 400)
Fall and spring. 4 credits. Prerequisite: NES 302/JWST 302 or permission of instructor. Enrollment limited to 15 students. N. Scharf.
Continuation of work done in NES/JWST 302, with less emphasis on the study of grammar. We will read and discuss texts of cultural relevance, using articles published in Israeli newspapers and works by authors in each of the three principal genres: poetry, theater and novels. The course may be repeated for credit with permission of instructor.
The Program of Jewish Studies

The Program of Jewish Studies encompasses a broad spectrum of disciplines that includes civilization, history, language, literature, philosophy, archaeology and religion. The program offers students the opportunity to take a wide variety of courses in Jewish Studies whose subjects are not represented in the Department of Near Eastern Studies. Students interested in planning a program in Jewish Studies should consult with the director, Professor David I. Owen, 360 Rockefeller Hall. For complete listings and descriptions, see Program of Jewish Studies under "Special Programs and Interdisciplinary Studies."

JWST 105-106 Elementary Modern Hebrew I and II (also NES 101-102)
Fall, 105; spring 106. 6 credits each term. Enrollment limited to 15 students. S. Shor.

JWST 201-202 Intermediate Modern Hebrew I and II (also NES 201-202)
Fall, 201; spring, 202. 4 credits. Enrollment limited to 15 students. N. Scharf.

Philosophy

The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of thought while developing analytical skills that are valuable in practical as well as academic affairs. It affords the excitement and satisfaction that come from understanding and working toward solutions of intellectual problems. The curriculum includes offerings in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 100s or 200s is suitable for beginning study in the field. Sections of Philosophy 100 are part of the freshman writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (seventeen students at most) they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take Philosophy 101, but many students with special interests may find that the best introduction to philosophy is a 200-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to freshmen.

The Major

Students expecting to major in philosophy should begin their study of it in their freshman year.
or sophomore year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student's work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses are required for the major. They must include at least one course in ancient philosophy (Philosophy 210 or 211, or a course with a large component on Plato or Aristotle), at least one course in classical modern metaphysics and epistemology (Philosophy 212 or a course on the empiricists, the rationalists, or Kant), and a minimum of three courses numbered above 300. Students admitted to the major after fall 1990 will be required to take a minimum of six philosophy courses numbered above 200, and may not count more than one section of Philosophy 100 toward the major. A course in formal logic (e.g., Philosophy 231), while not required, is especially recommended for majors or prospective majors. Courses numbered 191-199 do not count toward the major.

Philosophy majors must also complete at least 8 credits of course work in related subjects approved by their major advisers. Occasionally majors may serve as teaching or research aids, working with faculty members familiar with their work.

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B- or better for all work in the College of Arts and Sciences and an average of B+ or better for all work in philosophy. In either or both terms of the senior year a candidate for honors enrolls in Philosophy 490 and undertakes research leading to the writing of an honors essay by the end of the final term. Honors students normally need to take Philosophy 490 both terms of their senior year in order to write a satisfactory honors essay. Philosophy 490 does not count toward the eight philosophy courses required for the major. Prospective candidates should apply at the philosophy department office, 218 Goldwin Smith Hall.

Fees
In some courses there may be a small fee for photocopying materials to be handed out to students.

Introductory Courses
These courses have no prerequisites; all are open to freshmen.

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

PHIL 100 Freshman Writing Seminars in Philosophy
Fall and spring. 3 credits. Consult the brochure listing freshman writing seminars prepared by the John S. Knight Writing Program.

PHIL 101 Introduction to Philosophy (by petition for breadth requirement)
Fall, M W F 9:05-9:55, N. Sturgeon; spring, M W F 9:05. 3 credits. J. Whiting.

This course will deal with a number of the central problems of philosophy, such as the existence of God, our knowledge of the external world, the mind-body problem, free will and the foundations of morality.

Spring. An introduction—using both historical texts (such as Plato's Socratic dialogues and Descartes' Meditations) and contemporary texts (e.g., David Hume, John Locke, Immanuel Kant). How can we determine the nature of persons and their relations to minds, bodies, the external world and one another. For example: Should we identify you with your mind or your body? (or, systems or neither?) If your body is a physical entity, and so subject to physical laws, how (if at all) can your will be free? What roles, if any, do your conceptions of yourself or other people's conceptions of you—as, for example, male or female—play in determining who or what you are? Is genuinely altruistic action possible? How (if at all) can we explain irrational action?

[PHIL 131 Logic, Evidence, and Argument
3 credits. Not offered 1998-99.]

PHIL 145 Contemporary Moral Issues

PHIL 191 Introduction to Cognitive Science (See Cognitive Studies 101)
Fall. 3 credits. T R 11-12.50-12.55. M. Spivey-Knowlton.

This course surveys the study of the mind-brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science.

The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

PHIL 201 Philosophical Problems
Fall. 4 credits. M W F 10:30-11:00. C. Ginot.

This course will discuss the following well-known puzzles: Zeno's paradoxes of motion (the Racecourse, the Arrow) and of plurality, the paradox of the heap, the paradox of the surprise examination, the prisoner's dilemma, Newcomb's problem, and the paradox of the liar. These puzzles present us with reasoning that is paradoxical in the sense that, although it seems clear that there must be something wrong with the reasoning, it is not easy to see what it is. Studying such puzzles is not only an intriguing exercise in itself but can show us interesting things about such basic concepts as those of space, time, motion, truth, knowl­edge, rational choice, and causation.

[PHIL 210 Ancient Thought #
4 credits. Not offered 1998-99.]

PHIL 211 Ancient Philosophy (also Classics 231)
Fall. 4 credits. T R 11-12.50-12.55. C. Brittain.

This course examines the origin and development of Western philosophy in Ancient Greece and Rome. We will study some of the central ideas of the Pre-Socratics, Socrates, Plato, Aristotle, and the Hellenistic philoso­phers (Epicureans, Stoics, and Sceptics). Questions to be considered include: What are the nature and limits of knowledge? How reliable is perception? What are the basic entities in the universe—animate forms or Aristotelian substances? Is moral knowl­edge possible? What is the nature of happiness and what sort of life will make people happy? Do human beings have free will? This course has no prerequisites.

PHIL 212 Modern Philosophy #

This course is an introduction to early modern philosophy (roughly, the period between 1640 and 1790). We will read and interpret five complete works which played a central role in the development of philosophical thought during this time. These works are: Descartes' Meditations, Berkeley's Principles, Leibniz's Monadology, Hume's Enquiry, and Kant's Kritik der Urteilskraft. We will see questions concerning the nature, justification, and limits of human knowledge.

The aim of the course is twofold. First, we will analyze and evaluate the arguments these philosophers offer in support of their respective positions. This will make it possible to understand what philosophical problems are, and how philosophical debates might illuminate them. Second, in exploring the arguments we will also learn about interpretation, about ways of approaching texts that were written centuries ago. This will help to see what changes and what remains the same in our understanding of philosophical problems.

[PHIL 213 Existentialism and Literature (also Comparative Literature 213)
4 credits. Not offered 1998-99.]

PHIL 214 Philosophical Issues in Christian Thought #

PHIL 231 Introduction to Deductive Logic
Fall. 4 credits. M W F 1:25-2:15. H. Hodes.

The logic of truth-functional connectives and the universal and existential quantifiers; analysis of English-statements in terms of a formal language; evaluation of deductive reasoning in terms of such an analysis.

PHIL 241 Ethics (by petition for breadth requirement)
Fall. 4 credits. T R 2:55-4:10. R. Miller.

Introduction to the philosophical study of major moral questions—for example: Are all values relative, or are there some objective moral values? Have we ever any good reason to care about the interests of other people? What sacrifices are required by our moral duties? What is the nature and basis of our moral duties? Do people have rights with which governments should not interfere, even to advance the general welfare? What inequalities are unjust? The course discusses general issues in moral philosophy, together with some of their implications for particular current moral controversies, such as the debates over abortion, reverse discrimination, and policies reducing economic inequality. Readings from major philosophers of the past, as well as contemporary sources.
PHIL 242 Social and Political Philosophy (also Government 260)
Fall. 4 credits. T R 1:25-2:40.
F. Neuhouser.
An introduction to the foundational texts of modern political theory, including Hobbes, Locke, Rousseau, and Rawls. Topics include the source of political legitimacy, why individuals are obligated to obey just laws, the limits of legitimate authority, and the nature of human freedom. Special attention will be paid to the justificatory role the social contract plays in political philosophy.

PHIL 243 Aesthetics

PHIL 244 Philosophy and Literature

PHIL 245 Ethics and Health Care
Fall. 4 credits. T R 11:40-12:55. K. Jones.
This course is an introduction to the ethical issues associated with contemporary medicine. No previous study of philosophy is presupposed. The course will have two lectures and one discussion section per week. Topics to be covered include: (1) The professional-patient relationship (including informed consent, medical confidentiality, medical paternalism, and trust). (2) Contemporary problems such as abortion and euthanasia. Beginning from these practical moral problems we will be led to investigate concepts such as illness, death, autonomy, quality of life and personhood. (3) Health care in a just society. We will consider competing conceptions of justice and arguments for entitlement to health care. Does justice require that all have access to basic health care? Does it require that all have access to approximately the same level of health care? What are the implications for access to health care resources by the requirement that we not discriminate on the basis of race or gender? In the course of investigating these topics, there will emerge questions about what ethics is, and whether or not ethical judgments can be objective. Thus, in addition to learning how to arrive at and defend ethical positions, we will reflect on the techniques and methods we use.

PHIL 246 Ethics and the World Environment
Spring. 4 credits. M W F 11:15-12:05.
N. Sturgeon.
Critical philosophical analysis of the conceptual frameworks in which policies affecting the environment are formulated and judged. Topics include the nature of ethics and the possibility of knowledge in ethics, the nature and extent of individual and social obligations to distant people: future generations, non-human animals and non-sentient things (e.g., the ecosystem); the origin of environmental problems and the range of options for their solution.

PHIL 247 Ethics and Public Life

PHIL 249 Feminism and Philosophy

PHIL 261 Knowledge and Reality

PHIL 262 Philosophy of Mind

PHIL 263 Religion and Reason
Spring. 4 credits. T R 10:10-11:25.
S. MacDonald.
What must (or could) God be like, and what reasons do we have for thinking that a being of that sort actually exists? What difference would (or could) the existence of God make to our lives? Religion and Reason examines the idea, common to several major world religions, that God must be an absolutely perfect being. What attributes must a perfect being have? Must it have a mind, be a person, care for human beings? Is the concept of a perfect being coherent? Is the existence of a perfect being compatible with the presence of evil in the world and the existence of human freedom? Does human morality depend in any important way on the nature or will of a perfect being? Is a perfect being among the things that actually inhabit our universe? The course approaches these questions with the tools and methods of philosophical reason and through readings drawn from both classic texts and contemporary philosophical discussion.

PHIL 270 Truth and Interpretation (also linguistics 270/Cognitive Studies 270)

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)
Spring. 4 credits. M W F 11:15-12:05.
R. Boyd.
Topic for 1998-99: Darwin, Social Darwinism, and Human Sociobiology. An examination of attempts in the biological and social sciences to offer scientific theories of human nature and human potential and to apply such theories to explain important social and psychological phenomena.

PHIL 294 Global Thinking (also Government 294)
H. Shue.
The analysis taught in this course is global in two different respects: international subjects and interdisciplinary methods. We will look in detail at questions raised by one of the most important and most difficult issues facing international society: when, if ever, should other nations unilaterally or multilaterally intervene militarily into ethnic conflicts like those in Bosnia and Rwanda in this decade? Both of these recent cases, one in Europe and one in Africa, raise fundamental questions about the kind of world we are constructing for the 21st century.
To what extent is the system of nation-states we now have either desirable or unavoidable? Does every ethnic group have a right to self-determining and sovereign state? When is the use of military force morally justified? Should trials for war crimes or crimes against humanity be routinely held after military conflicts? These and other ethical questions need to be answered in light of the best available knowledge about the political dynamics of foreign intervention and the changing international legal regime, bringing together political science, law, and ethics. The course is taught by leading faculty researchers from the three fields involved.

Intermediate or Advanced Courses
Some of these courses have prerequisites.

PHIL 299 The Philosophy of Plato
Spring. 4 credits. T R 8:40-9:55.
L. Ruebsche.

PHIL 310 Aristotle

PHIL 311 Modern Rationalism
Fall. 4 credits. T R 1:25-2:40.
Z. Szabo.
Rationalism is the philosophical doctrine that reason itself can be the ground for knowledge; it is opposed to empiricism which claims that all our knowledge must be grounded in experience. This course is an examination of philosophical systems of rationalist bent from the 17th and 18th centuries. Readings will include Descartes's Meditations; a large part of the Objections and Replies to the Meditations, Spinoza's Ethics and a few of Leibniz's smaller writings. The main focus of the course will be metaphysical: we will mainly discuss questions about substance, identity, and universals.

PHIL 312 Modern Empiricism
N. Sturgeon.
The major philosophical works of Locke, Berkeley, and Hume. Topics include knowledge and skepticism; thought and meaning; substance and causation, the interpretation of physical science, God, the role of philosophy.

PHIL 314 Ancient Philosophy: The World of Theory and the World of Ordinary Life

PHIL 315 Medieval Philosophy

PHIL 316 Kant
Fall. 4 credits. T R 10:10-11:25.
F. Neuhouser.
An introduction to Kant's main metaphysical and epistemological doctrines as presented in the Critique of Pure Reason, including: the nature of space and time, the justification of scientific knowledge, the nature of human reason and self-consciousness. Special attention will be paid to Kant's critique of traditional metaphysics and his attempt to establish a new metaphysics, grounded in practical reason, that establishes the existence of God, human freedom, and morality.

PHIL 317 Hegel

PHIL 318 Twentieth-Century Philosophy

PHIL 319 Philosophy of Marx

PHIL 331 Deductive Logic (also Mathematics 281)
Fall. 4 credits. M W F 2:30-3:20.
H. Hodes.
Review of derivations and truth-in-a-model: function-constants and identity; truth in non-fully-distinguished models; very basic set-theory; sets as the only mathematical objects; mathematical induction; soundness; completeness. Recommended previous course: Philosophy 231 or equivalent.
good, utilitarianism and its critics, and radical critiques of morality. Readings mainly from Hobbes, Butler, Hume, Kant, Sidgwick, Nietzsche, Bradley, and Rawls.

PHIL 346 Modern Political Philosophy (also Government 462)  
A study of the leading contemporary theories of justice, including the work of Rawls, Nozick, Gauthier and Scanlon. We will discuss rival views of the moral significance of economic inequality, the kinds of freedom that governments ought to protect, the kinds of values and convictions that are a proper basis for laws (as opposed to being private matters), the tension between unequal political influence and democratic rights, and the roles of community, virtue and group-loyalty in political justification. We will largely be concerned with the conceptions of freedom, equality, obligation and community underlying competing theories. We will also consider implications for specific political controversies, e.g., the nature of overtime, welfare programs and pornography.

PHIL 361 Metaphysics and Epistemology  
Color and color experience. The course will be concerned with the ontological status of "secondary qualities," especially colors, and the nature of our perceptual experience of them.

PHIL 362 Philosophy of Mind  

PHIL 363 Topics in the Philosophy of Religion  

PHIL 368 Global Climate and Global Justice (also Government 468)  

PHIL 369 Limiting War (also Government 469)  
An examination of ethical issues underlying choices about national and international security, concentrating on decisions about possession and use of specific types of weapons: weapons of mass destruction (nuclear, chemical, and biological), precision-guided missiles, and landmines. Should nuclear weapons be used to deter chemical and biological weapons, or does non-proliferation of the latter require abolition of the former? Can the distinction between combatants and non-combatants be maintained in an era of high-tech warfare? What, if anything, is special about landmines?

PHIL 381 Philosophy of Science: Knowledge and Objectivity (also Science and Technology Studies 381)  
Fall. 4 credits. W 7:30-10:00 p.m. R. Boyd.  
An examination of central epistemological and metaphysical issues raised by scientific theorizing: the nature of evidence; scientific objectivity; the nature of theories, models, and paradigms; and the character of scientific revolutions.

PHIL 382 Philosophy and Psychology  

PHIL 383 Choice, Chance and Reason  
(Epicureans, Stoics, and Sceptics). Insofar as time permits, we will also compare their solutions with more recent ones. For example, how does Protagoras’ alleged relativism compare with contemporary versions of relativism? How does Epicurus’ claim that all perceptions are true compare with Berkeley’s seemingly similar claims?

**Spring:** Ancient and modern scepticism are often thought to be quite different from one another. Hegel, for example, argues that ancient scepticism is more radical and profound than the Early Islamic and post-Cartesian scepticism. Many contemporary philosophers, on the other hand, think that modern scepticism is more radical than ancient scepticism. Descartes, by contrast, denies that his scepticism is novel at all. In his view, it is ‘reheated cabbage’, horrifyingly familiar. Who is right? We will focus on ancient scepticism, especially as it is described by Sextus Empiricus. But we will also compare his account of scepticism with Descartes. Insofar as time permits, we will also look at some of the following: Montaigne, Gassendi, and Hume; and more recent philosophers such as G.E. Moore and Barry Stroud.

**PHIL 416 Modern Philosophy #**

**PHIL 431 Mathematical Logic (also Mathematics 481)**

**PHIL 432 Topics in Logic (also Math 482)**
Spring. 4 credits. Prerequisites: one logic course either from the Mathematics Department or from the Philosophy Department at least at the 300-level, or permission of the instructor. M W F 2:30–3:20. H. Hodes. Topic for Spring 1999: Logic from an abstract viewpoint.

**PHIL 433 Philosophy of Logic**

**PHIL 436 Intensional Logic (also Math 486)**

**PHIL 437 Topics in the Philosophy of Language**

**PHIL 441 Contemporary Ethical Theory**

**PHIL 442 Ethics and Value Theory (also Society for Humanities 442)**
Spring. 4 credits. M 2:30–4:25 pm. C. Williams. We will philosophically explore the imagination, with particular attention to the notion of a point of view: what is involved in occupying a point of view, the extent to which we can imaginatively transcend our own (and the ways in which there may be limits to our success), and the role of imaginative exercise in aesthetic and moral experience. Our picture of imagination will stress the “virtual” moment of the imager, and partly contrasts with the traditional identification of imagining with image-making.

**PHIL 444 Contemporary Legal Theory (also Law 710)**

**PHIL 446 Topics in Social and Political Philosophy (also Government 474)**
Spring. 4 credits. T R 2:55–4:10. R. Miller. Topic for 1999: Community, Nation and Morality. Although the moral point of view is often taken to be one of special groups, actual political choices often express the choosers’ ties to a nationality, state, community, religion or racial or ethnic group. To what extent are such choices morally legitimate? Do such choices, expressing particular loyalties, conflict with universal moral principles, e.g., principles requiring equal respect for all? Our discussions will include such topics as: the role of community in liberalism and in critiques of liberal individualism; nationality and political community and their roles in individual identity, moral obligation and justice; multiculturalism, separatism, and group rights, including issues of race, gender and sexuality; the moral status of patriotism; justice and international inequality; the impact on individuals and minority groups of collective goals and shared convictions of the majority. Readings will include works by Taylor, Kymlicka, Waldron, David Miller, MacIntyre, Nagel, Guinier, Walzer and Nussbaum. The course will have a seminar format. It is intended for both advanced undergraduates and graduate students.

**PHIL 460 Metaphysics and Epistemology (also Society for the Humanities 444)**
Fall. 4 credits. M 2:30–4:30. K. Balog. In this seminar we will investigate a number of topics in contemporary metaphysics. The topics are the nature of metaphysical necessity, possible worlds, physicalism and dualism, scientific laws, personal identity, and free will. We will use the notion of a possible world to formulate a widely held doctrine, Physicalism, according to which everything that exists is what it is in virtue of the kinds of facts investigated by physics. We will examine whether physicalism is compatible with the existence of consciousness, personal identity, and free will.

**[Philosophy 461 Feminist Epistemology (also Women’s Studies 461)]**

**PHIL 462 Philosophy of Mind**
Fall. T R 2:55–4:10. S. Shoemaker; spring, W 4:30–6:30. K. Balog. 4 credits. Fall: Personal Identity. We will examine both a prominent version of the “psychological approach” to personal identity, that of Derek Parfit, and the recent challenge to this approach by advocates of the “biological approach” (the “animalist” view). Spring: In this seminar we focus on the nature and concept of consciousness, and its place in physical reality. We will be discussing some anti-physicalist arguments, according to which consciousness cannot be, or be realized by, physical states, and the physicalist rebuttals to these arguments. We will also be surveying physicalist theories of consciousness and the role of consciousness in the relationship between consciousness and intentionality. (Also Society for the Humanities 495.)

**PHIL 481 Problems in the Philosophy of Science**
Spring. 4 credits. T R 2:55–4:10. L. Ruttsche. The theories of twentieth-century physics—relativity (both special and general) and quantum mechanics—have enjoyed startling empirical success. They have provoked philosophical commentary equally startling. Some have argued that the special theory of relativity shows our universe to be changeless and timeless; others have argued that quantum mechanics makes possible a version of materialism. Is there any way to resolve the tension, or reveal logic to be empirical? This course will serve as an introduction to these and other philosophical issues raised by and for twentieth-century physical theories. Intended audience: advanced undergraduates and graduate students wishing an introduction to the philosophy of physics. No coursework in physics will be presupposed. Rather, relevant physical/mathematical notions—these being those necessary to pose and engage philosophical questions—will be introduced as needed. These notions should be accessible to anyone open-minded about the utility of formalism and acquainted with basic high school geometry (e.g., the Pythagorean theorem).

**PHIL 490 Special Studies in Philosophy**
Fall and spring. 4 credits. Open only to honors students in their senior year. See Honors description at front of Philosophy section.

**PHIL 611 Ancient Philosophy**

**PHIL 612 Medieval Philosophers**

**PHIL 619 History of Philosophy**

**PHIL 632 Philosophy of Language**

**PHIL 641 Ethics and Value Theory**

**PHIL 661 Theory of Knowledge**

**PHIL 662 Philosophy of Mind**
Fall, R 4:30–6:30 p.m. K. Jones; spring, M 4:30–6:30 p.m. J. Whiting. 4 credits. Fall: Topic: The Emotions. We begin by examining various answers to two inter-connected questions. “What is an emotion?” and “When, if ever, is an emotion justified?” Contemporary accounts of the nature of emotions can be seen as reacting to the view that emotions are mere feelings. Rejecting this view might lead one from emotionalism, or the view that emotions essentially involve evaluative beliefs. However, judgmentalism is vulnerable to apparent counter-examples and most contemporary accounts can be seen as a search for alternative ways of specifying the cognitive content of emotions. Our initial investigation into the nature of emotions will enable us to address more specific topics in the philosophy of emotions. Topics will be chosen from the following list: the role of self-interpretation in emotion, the claim that emotions are socially constructed, the role of emotions in ethical perception.
emotions and literature, emotions of self-assessment (such as pride, shame, and guilt), and particular emotions such as anger, bitterness, and jealousy.

**Spring**  Topic: Morality, Self, and Psychopathology. Philosophical accounts of personal identity typically aspire to a kind of universality; each account tends to represent itself as the (presumably uniquely) correct account, implying the falsity of its various rivals (e.g., psychological continuity theories implying the falsity of bodily continuity theories and vice versa). But the point is that we are dealing with selves, i.e., partially reflective entities. It is possible that different self-conceptions might yield different sorts of selves, some, for example, more and some less, bodily (or psychological) than others. We will examine this sort of "contingency of selfhood" both cross-culturally (looking, e.g., at non-Western conceptions of self and at the Buddhist ideal of self-dissolution) and psychopathologically (looking, e.g., at pathological configurations of self such as those involved in autism, schizophrenia, multiple-personality disorder, and eating disorders), treating the study of psychopathology as akin (for our purposes) to etiopathology. The idea is to see whether forms of selfhood (or subjectivity) that we take for granted and perhaps even view as inescapable are in fact contingent and optional. We can then ask what sorts of selfhood(s) are valuable (morally, aesthetically, or otherwise) to cultivate. This raises the difficult question of the point(s) of view from which we are to make such assessments.

**PHIL 663 Philosophy of Religion**

**PHIL 664 Metaphysics**
Fall, T 7:30–9:30 p.m., Z. Szabo; spring, M 4:30–6:30 p.m., C. Ginot. 4 credits.

Fall topic: Abstract entities. We will discuss recent and not so recent controversies about (i) the distinction between abstract and concrete entities, (ii) ways of categorizing abstracta, and (iii) reasons for affirming or denying the existence of abstracta of different types. Such debates are often conducted independently of each other within different areas of philosophy, we will try to bring some of the isolated conclusions together. Spring: The Philosophy of Action.

**PHIL 665 Metaphysics**

**PHIL 681 Philosophy of Science**
Spring. 4 credits. W 7:30–10:00. R. Boyd.

**PHIL 682 Philosophy of Social Science**

**PHIL 700 Informal Study**
Fall or spring. Credit to be arranged. To be taken by graduate students only in exceptional circumstances and by arrangement made by the student with his or her Special Committee and the faculty member who has agreed to direct the study.

**PHIL 773 Proseminar in Cognitive Studies (also Cognitive Studies 773, Linguistics 773, and Computer Science 773)**
Fall. 2 credits. Fall: R grade. For description, see COGST 773.

**PHIL 774 Proseminar in Cognitive Studies (also Linguistics 774)**
For description, see COGST 774.

---

**Related course in other department**

**German Studies 378**
German Aesthetic Theory from Kant to Hegel. P. Gilgen.

**PHYSICS**

The Department of Physics offers a full range of university-level work in physics, from general education courses for nonscientists to doctoral-level independent research. Major research facilities are operated by two component organizations, the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory of Nuclear Studies (LNS). LASSP carries out extensive research efforts in condensed-matter physics and in low-temperature physics. LNS operates a major high-energy-particle physics research facility at Wilson Laboratory, the Cornell electron-positron storage ring (CESR). Theoretical work is carried out in many fields of physics, including astrophysics. There is a full schedule of weekly research-oriented seminars and colloquia. Junior and senior students will find many opportunities for research participation and summer employment.

Introductory physics sequences are: 101–102, 207–208, and 112–213–214, or its honors version 116–217–218. In addition, there is a group of general-education courses, Physics 200 through 206, 209, 210. Physics 101–102, a self-paced autotutorial course, is designed for students who do not intend to take further physics courses and who do not have preparation in calculus. Physics 112 and 207 both require calculus (Mathematics 191 or 111), and additional mathematics is required for subsequent courses in the sequence. Physics 101–102 or 207–208 may be taken as terminal physics courses. The three-term sequence 112–213–214 or its honors version, 116–217–218, is recommended for engineers and physics majors. Physics 214 and 218 are placing an increasing emphasis on use of the computer for homework, laboratory exercises, and projects; some knowledge about computing, perhaps at the level of Computer Science 99 or 100, is desirable.

Courses beyond the introductory level that might be of interest to nonmajors include: Physics 316 (Modern Physics I), Physics 330 (Modern Experimental Optics), and Physics 360 (Electronic Circuits).

Advanced placement and credit are offered as outlined in "Advanced Placement of Freshmen," or students may consult Professor Rogers, the director of undergraduate studies as to whether students requesting transfer credit for physics courses taken at another college.

The Major

The major program is constructed to accommodate students who wish to prepare for professional or graduate work in physics as well as those who wish to complete their major program in the field of physics but have other post-graduation goals.

---

- For majors with concentrations outside physics, there will be wide variation in individual programs, arranged to best match the field of concentration.
- Students taking the honors sequence 116–217–218 are strongly encouraged to start with Physics 116. Exceptionally well-prepared students may be able to begin work at Cornell with Physics 217. Such students should come to the department office for advice in planning a course program.
- Physics electives include 360, 444, 454, 455, 480, 525, 553, 561, 572, the senior seminars 481–483, Astronomy 352 or 431–432, and A&EP 434.
- One semester of intermediate laboratory, listed here as 3x0, is required.
- Well-prepared sophomores wishing to take Physics 318 should consult the instructor before registering.
Students who wish to major in physics are advised to start the physics sequence in the first term of their freshman year. (Note that students who have had contact with introductory calculus may take Physics 112 with coregistration in Mathematics 191.) The major program can still be completed with a second term start, but flexibility in future course scheduling is reduced.

Prospective majors are urged to make an early appointment at the physics office for advice in program planning. Acceptance into the major program is normally granted upon completion of one year of physics and mathematics courses at Cornell with all course grades at the B-level or higher. The department office will give advice in the matter of selecting a major faculty adviser. Details of the major course program are worked out in consultation between the student and major adviser.

**Physics Core**

Common to all major programs is a requirement to complete a core of physics courses. In addition to the three-term introductory sequence (Physics 116-217-218), the core includes five upper-level courses—(a) the two-course sequence in modern physics (Physics 316-317), (b) at least three semester hours of laboratory work selected from Physics 310, 330, 360, 410, Astronomy 410, (c) an intermediate course in classical mechanics, and (d) an intermediate course in electromagnetism.

Accompanying these physics courses should be work in mathematics through at least Mathematics 402 and 422. Students following the professional/graduate school channel are expected to complete at least one additional year of applicable mathematics (Applied and Engineering Physics 321-322 or Mathematics 321/420-422).

In addition to the core, each physics major must complete 15 semester hours of credit in an area of concentration which has been agreed upon by the student and major faculty adviser.

**Concentration within Physics**

A student who wishes to pursue professional or graduate studies in a closely related field should follow a concentration within the field of physics. For those students with a strong secondary school preparation, the sequence Physics 116-217-218 is encouraged. Students are strongly encouraged to start the sequence with Physics 116, even if they qualify for advanced placement credit for Physics 112. Core courses in mechanics and electromagnetism will normally be Physics 318 and Physics 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course Physics 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who may follow the different sequences is the amount and level of physics and mathematics courses at Cornell with all course grades at the B-level or higher. The department office will give advice in the matter of selecting a major faculty adviser. Details of the major course program are worked out in consultation between the student and major faculty adviser.

**Concentration outside Physics**

The concentration will reflect the student's interest in some area related to physics. The array of courses that comprise the concentration must have internal coherence. The array will normally be worked out in conference with the major faculty adviser and must be approved by the adviser. Of the required 15 hours credit beyond the core, at least 8 credits must be in courses numbered above 300. Students have chosen to concentrate in such topics as chemical physics, astrophysics, natural sciences, history and philosophy of science, computer science, meteorology, or econometrics. A combined biology-chemistry concentration is appropriate for pre-medical students or those who wish to prepare for work in biophysics. Students interested in a career in the teaching of science should consider the Teacher Education in Science and Mathematics (TESM) program, which is administered by the Departments of Education and Mathematics and is described in detail in the College of Arts and Sciences section of this catalog. A concentration in "science education" would then typically include Education 402 and 403, both part of TESM, and two or more courses designed to broaden the student's background in general science and mathematics.

For students with concentrations outside physics, the core requirements in mechanics and electromagnetism can be appropriately met with Physics 314 and Physics 323, respectively.

Students with an astronomy concentration who might continue in that field in graduate school should use Astronomy 410, 431, 432 as part of the concentration; they are encouraged to use Physics 318 and 327 to satisfy the core requirements in mechanics and electromagnetism.

**Foreign Language Requirement**

Students interested in eventual graduate work in physics are advised to meet this College of Arts and Sciences requirement with work in French, German, or Russian.

**Honors**

A student may be granted honors in physics upon the recommendation of the Physics Advisers Committee of the physics faculty. There is no particular course structure or thesis requirement for honors.

**Double Majors**

Double majors including physics are possible and not at all uncommon. It should be noted, however, that if a student wishes to complete a major in physics as well as a major in one or more other subjects, any course used to satisfy a requirement of the second major may not be used also in satisfaction of any physics major requirement.

**Courses with Overlapping Content**

Because the department offers several courses with overlapping content, students should select courses carefully to meet the needs of their academic programs and to ensure credit for each course they take. Listed below are groups of courses with largely similar content. In general, students may receive credit for only one of the courses in each group.

**Course Prerequisites**

Prerequisites are specified in physics course descriptions to illustrate the requisite skills that students should have mastered. Students who wish to plan programs different from those suggested by the prerequisite ordering are urged to discuss their preparation and background with a physics adviser or with the instructor in the course. In many cases an appropriate individual program can be worked out without exact adherence to the stated prerequisites.

**Courses**

Listed days and times are not definite but are unlikely to change. Days and times will not be listed for 600-level courses.

**PHYS 101-102 General Physics**

PHYS 112 Physics I: Mechanics
Fall, spring. 4 credits. More analytic than Physics 111, intended for students who will be comfortable with a deeper, somewhat more abstract approach. Intended not exclusively for prospective physics majors. Prerequisites: a good secondary school physics course and familiarity with basic calculus. Corrective transfers between Physics 116 and Physics 112 (in either direction) are encouraged during the first few weeks of instruction. Lec, M W F 10:10–11:00. Fall, H. Tye; spring, R. Patterson. A more rigorous version of Physics 112, covering similar topics at the level of An Introduction to Mechanics, by Kleppner and Kolenkow.

PHYS 190 Supplemental Introductory Laboratory
Fall, spring. 1 credit. Times by arrangement with instructor. S-U only. Enrollment limited to students who have all of the following; (i) three transfer credits for introductory physics lecture material; (ii) a degree requirement of the laboratory component of that introductory course; (iii) approval of the director of undergraduate studies; (iv) permission of the lecturer of that course at Cornell. Enrollment limited.

A Physics 100 Substitution Form must be filed in 1122 CCL Fall with the physics department course coordinator. Students perform the laboratory component of one of the introductory courses (Physics 112, 213, 214) to complement the lecture-related course credit acquired elsewhere. Those wishing to take the equivalent of one of these introductory courses at another institution should receive prior approval from the director of undergraduate studies.

PHYS 200 Art, Archaeology, and Analysis (also Geology 200, Engineering 185, MSAE 285, Archaeology 285, and Art 372)
For description, see GEOl 200.

PHYS 201 Why the Sky Is Blue: Aspects of the Physical World
Fall. 3 credits. Lec, T R 2:55–4:10, rec, W 2:30–3:20 or W 3:35–4:25. A. Sadoff. This is a descriptive physics course aimed specifically at the non-science student. There is an emphasis on the ideas of modern physics where the approach is both historical and thematic. The methodology of science and the nature of evidence is emphasized. An overriding theme is the character of physical laws as shown through the great principles of symmetry and conservation. While there are a few computational problems assigned, the purpose is to help students to understand the concepts and to develop problem solving techniques. At the level of Physics for Poets by March.

PHYS 202 The World According to Physics—The Way Things Work
Summer 3-week session. 3 credits. Prerequisite: three years of high school mathematics, including trigonometry. M–F 10:00–12:00; laboratories 2 afternoons per week to be arranged. R. Lieberman. Intended to provide students majoring in fields outside the sciences with an appreciation for the familiar physical world surrounding them. Which falls faster, a pound of gold or a pound of feathers? What trajectory does a launched rocket follow? Why are the curves on highways banked? What actually keeps a satellite circling the earth—why doesn't it just fall down or fly away? Can you build a ship that runs off the heat found in the ocean? With an emphasis on problem solving, the course helps the student to develop skills transferable to other areas. Topics include Newton's basic laws of motion, trajectories, satellites, space travel, and the concepts of energy.

PHYS 203 Physics of the Heavens and the Earth—A Synthesis
Spring. 3 credits. Prerequisite: none; uses high school algebra and geometry. For nonscience majors. Lec, T R 2:55–4:10, sec W 2:30–3:20 or 3:35–4:25. H. Padmanabhan. This course shows how the unification of apparently distinct areas of physics leads to an explosion in the growth of our knowledge and understanding. The material is divided into three parts: the physics of motion on earth and motion in the heavens, showing how the two evolved separately, from the ideas of the ancient Greeks to the dynamics and telescopic discoveries of Galileo; the final melding of these two topics with Newton’s Universal Gravitation; an exploration of this “new” physics and its impact. There is an emphasis throughout on how do we know the laws? These are the stories of breakthroughs and brilliant insights made by fascinating people. Offering at the same time a humanistic perspective.

PHYS 204 Physics of Musical Sound
Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec M W F 9:05–9:55; or 11:15–12:05; two rec. and one lab each week. Evening exams. Fall, J. Rogers; spring, D. Fitchen.

PHYS 207 Relativity and Chaos
Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, T R 1:25–2:40; rec, M 2:30–3:20 or M 3:35–4:25. N. D. Mermin. We will examine two revolutionary fields of classical physics, one venerable and one relatively recent. The special theory of relativity will be developed, with a view to understanding how certain simple but apparently contradictory facts about light lead to extraordinary second-order effects; and the newer subject of “chaos” will be explored, with a view to seeing how extremely simple rules can lead to behavior of breathtaking complexity.

PHYS 210 Randomness in Classical and Quantum Physics
Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, T R 1:25–2:40; rec, M 2:30–3:20 or M 3:35–4:25. N. D. Mermin. We will examine two areas of physics where randomness plays a central role: the classical probability theory of gamblers, and its relation to subjects from the nature of coincidence to
the direction of the flow of time; and the quantum theory, which promotes randomness from a consequence of human ignorance to a fundamental aspect of the physical world, leading to Einstein's celebrated rejection of a dice-throwing God and his more disturbing complaint about "spooky actions at a distance."

PHYS 213 Physics II: Heat/Electromagnetism
Fall, spring, (summer 6-week sessions). 4 credits. Prerequisites: Physics 208, 214, and coregistration in the continuation of the mathematics sequence required for Physics 112 Lec, T R 9:05-9:55 or 11:15-12:05, 2 rec. each week and one 3-hour lab alternate weeks. Evening exams. Fall, J. Alexander; spring, P. Lepage.

Temperature, heat, thermal energy, electrostatics, behavior of matter in electric fields, DC circuits, magnetic fields, Faraday's law, Maxwell's equations, electromagnetic oscillations. At the level of Physics for Scientists and Engineers, by Serway. Laboratory covering these topics. Labs T R 1:25-4:25.

PHYS 214 Physics III: Optics, Waves, and Particles
Fall, spring, (summer, 6 week sessions). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: Physics 213 and coregistration in the continuation of the mathematics sequence. Lec, T R 9:05-9:55 or 11:15-12:05. Two rec. each week and one 3-hour lab alternate weeks. Evening exams. Fall, J., Sehna; spring, G. Dugan.

Physics of wave phenomena, electromagnetic waves, interference and diffraction effects, wave properties of particles and introduction to quantum physics. Course includes computer use in solving problems and labs. At the level of Physics for Scientists and Engineers, by Serway.

PHYS 216 Introduction to Special Relativity
Fall, spring, based upon preregistration. 1 credit. S-U only. Enrollment may be limited. Course will be completed within first four terms or 8 term. Co-registration in this course is a requirement for registration in Physics 217, unless the student has taken a relativity course at the level of Physics 116 or Astronomy 106. Prerequisites: Physics 112 or Physics 207 or permission of instructor. Lec, T R 8:00-8:50. Fall, R. Galik; spring, M. Small.

Introduction to Einstein's Theory of Special Relativity: Galilean and Lorentz transformations, the concept of simultaneity, time dilation and Lorentz contraction, the relativistic transformations of velocity, momentum and energy, and relativistic invariance in the laws of physics. At the level of An Introduction to Mechanics by Kleppner and Kolenkow or Space and Time in Special Relativity by Mermin.

PHYS 217 Physics II: Electricity and Magnetism (also A&EP 217)
Fall, spring. 4 credits. Enrollment may be limited. Open to students who have done very well in Physics 112 or 116 and in mathematics and who desire a more analytic treatment than that of Physics 213. Prospective physics majors are encouraged to select Physics 217. Prerequisites:

PHYS 317 Modern Physics II
Fall. 3 credits. Prerequisite: Physics 316. Lec, M W F 9:05-9:55, rec, T 2:30-3:20. P. Lepage.

Investigation of quantum phenomena, classical and quantum statistical mechanics, molecules; solid state physics; nuclear physics and radioactivity; elementary particle physics. At the level of Quantum Physics of Atoms, Molecules, Solids, Nuclei and Particles by Eisberg and Resnick.

PHYS 318 Analytical Mechanics
Spring. 4 credits. Prerequisites: Physics 116 or permission of instructor; Applied and Engineering Physics 321 or Mathematics 420. Intended for physics majors concentrating in physics or astronomy. Physics 314 covers similar material at a less demanding level. Lec, M W F 10:10-11:00; rec, F 2:30-3:20. P. Drell.

Newtonian mechanics of particles and systems of particles, including rigid bodies; oscillating systems; gravitation and planetary motion; moving coordinate systems; Euler's equations; Lagrange and Hamilton formulations; normal modes and small vibrations. At the level of Classical Dynamics by Marion and Thornton and Physics 318 Lecture Notes by Hand and Finch. Supplementary reading will be assigned.

PHYS 322 Intermediate Electricity and Magnetism
Fall. 4 credits. Prerequisites: Physics 208 or 214 (or equivalent) and Math 293 or 294 (or equivalent); coregistration in Applied and Engineering Physics 321 or Math 208 or 214 recommended. Intended for physics majors with concentration outside of physics or astronomy. Physics 322 covers similar material at a more analytical level. Lec, M W F 11:15-12:05, rec, F 2:30-3:20. G. F. Dugan.

Includes electro/magnetostatics, boundary value problems, electric and magnetic media, Maxwell's Equations, and electromagnetic waves, and sources of electromagnetic radiation.

PHYS 327 Advanced Electricity and Magnetism
Fall. 4 credits. Prerequisites: Physics 217/218 or permission of instructor; coregistration in Applied and Engineering Physics 321 or Mathematics 420. Intended for physics majors concentrating in physics or astronomy. Physics 323 covers similar material at a less demanding level.

Electro/magnetostatics-vector and scalar potentials, Laplace's Equation and boundary value problems, multipoles; radiation-solutions to Maxwell's Equations, energy momentum of radiation; electrodynamics in media; special relativity-transformations, four vectors, particle kinematics and dynamics, relativistic electrodynamics. At the level of Classical Electromagnetic Radiation, by Heald and Marion.

PHYS 330 Modern Experimental Optics
Fall. 4 credits. Enrollment limited. Prerequisite: Physics 214 or equivalent. Lec, M 2:30-3:20; Lab, T W 12:50-1:40; sec, F 3:35-4:25. A. Gaeta.

A practical laboratory course in basic and modern optics. The seven projects cover a wide range of topics from geometrical optics
to classical wave properties such as interference, diffraction and polarization. Each experimental setup is equipped with standard, off-the-shelf optics and opto-mechanical components to provide the students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. The students will also be introduced to digital imaging and image processing techniques. At the level of Modern Optics by Guenther.

**PHYS 341 Thermodynamics and Statistical Physics**  
Fall. 4 credits. Prerequisites: Physics 214 and Mathematics 294.LEC, M W F 10:10-11:00, rec, R 2:30-3:20. A. Sievers. Statistical physics, developing both thermodynamics and statistical mechanics simultaneously. Concepts of temperature, laws of thermodynamics, entropy, thermodynamic relations, free energy. Applications to phase equilibrium, solutions, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems; introduction to treatment of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac statistics with applications. Elementary transport theory. At the level of Fundamentals of Statistical and Thermal Physics, by Reif, or Introduction to Statistical Mechanics by Betts.

**PHYS 360 Electronic Circuits (also A&E EP 360)**  
Fall, spring. 4 credits. Prerequisites: Physics 208 or 213 or permission of the instructor. No previous experience with electronics assumed, however, the course moves quickly through some introductory topics such as basic DC circuits. Fall term is usually less crowded. LEC, M 2:30-4:25; labs, T R or W 1:25-4:25 (also evening labs M W 7:30-10:30 spring). Fall, J. Rogers. Analyze, design, build and experimentally test circuits used in scientific and engineering instrumentation (with discrete components and integrated circuits). Analog circuits: resistors, capacitors, operational amplifiers (linear amplifiers with feedback, oscillators, comparators), filters, diodes and transistors. Digital circuits: combinational (gates) and sequential (flip-flops, counters, shift registers) logic. Computer interfacing introduced and used to investigate digital to analog (DAC) and analog to digital conversion (ADC) and signal averaging. At the level of Microelectronic Circuits by Sedra.

**PHYS 400 Informal Advanced Laboratory**  
Fall, spring; (summer, 6 week session). Variable to 3 credits. (3 credits, NOT variable in summer.) Prerequisites: two years of physics or permission of the instructor. Lab T W 1:25-4:25. Fall, W. Ho; spring, D. Hartill. Experiments of widely varying difficulty in one or more areas, as listed under Physics 410, may be done to fulfill the student's special requirements.

**PHYS 410 Advanced Experimental Physics**  
Fall, spring. 4 credits. Limited to seniors by special permission. Prerequisites: Physics 214 (or 310 or 360) plus 318 and 327, or permission of instructor. LEC, M 2:30-4:25; lab T W 1:25-4:25. Fall, W. Ho; spring, D. Hartill. Selected topics in experimental concepts and techniques. About sixty different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, nuclear physics. The student performs three to six diverse experiments, depending on difficulty, selected to meet individual needs and interests. Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

**PHYS 443 Introductory Quantum Mechanics**  
Spring. 4 credits. Prerequisites: Physics 327 or 323; and Physics 316 and Applied and Engineering Physics 321 or Mathematics 420; coregistration in Physics 314 or 318; or permission of instructor. LEC, M W F 9:05-9:55, rec, R 3:35-4:25. S. Teukolsky. Introduction to concepts and techniques of quantum mechanics, at the level of An Introduction to Quantum Physics, by French and Taylor.

**PHYS 444 Nuclear and High-Energy Particle Physics**  
Spring. 4 credits. Prerequisite: Physics 443 or permission of instructor. LEC, M W F 9:05-9:55, rec, R 3:35-4:25. J. Rogers. Behavior of high-energy particles and radiation; elementary particles; basic properties of accelerators and detectors, general symmetries and conservation laws. At the level of Concepts of Particle Physics, by Gottfried and Weiskopf.

**PHYS 454 Introductory Solid-State Physics (also A&E EP 450)**  
Fall. 4 credits. Prerequisite: Physics 443, A&E EP 361. Chemistry 703, or permission of instructor. LEC, M W F 9:05-9:55. Computer lab: W or R 2:30-4:25. F. Wise. An introduction to modern solid-state physics, including crystal structure, lattice vibrations, electron theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, superconductivity, and defects. At the level of Introduction to Solid State Physics, by Kittel, and Solid State Physics, by Ashcroft and Mermin. (PHYS 455 Geometrical Concepts in Physics**  
Spring. 3 credits. Prerequisite: Physics 327 and at least coregistration in Physics 318 or permission of instructor. Usually offered every other spring. LEC, T R 10:10-11:25. Geometrical methods are an essential tool in modern theoretical physics and also provide deep insights into classical physics—electrodynamics, thermodynamics, mechanics, special and general relativity. This course will introduce basic concepts from topology and differential geometry, emphasize calculation methods and illustrate their utility by drawing examples from these areas of physics. In particular, we shall cover manifolds, differential forms, vector bundles, homotopy, homology and Lie groups. At the level of Geometrical Methods of Mathematical Physics by Schutz.

**PHYS 460 Computational Physics (also PHYS 680 and Astro 690)**  
Spring. 3 credits. S-U grades only. Prerequisites: the course assumes a good background in the standard "mathematical methods for physics," and the ability to write programs in Fortran or C. No previous knowledge of numerical analysis is assumed. LEC, T R 10:10-11:25. Staff. A course designed to familiarize students with numerical techniques for solving diverse problems in physics and astrophysics. The problems will be drawn from many different branches of physics, but the emphasis will be on common techniques of solution. Numerical techniques discussed in the course will include ordinary and partial differential equations, linear algebra and eigenvalue problems, Monte Carlo techniques, solving nonlinear equations, fast Fourier transforms, etc. In contrast to traditional numerical analysis courses, the flavor of the course will be "how-to," rather than theoretical. No theorems will be proved. Students will be expected to solve, both individually and in small teams, assigned numerical exercises. Text: Numerical Recipes: The Art of Scientific Computing, by Press, Teukolsky, Flannery, and Vetterling.

**PHYS 481-489 Special Topics Seminar**  
Offerings are announced each term. 2 and 3 credits. Limited to senior physics majors and those who receive permission of instructor. S-U grades only.

**PHYS 490 Independent Study in Physics**  
Fall or spring. Variable to 4 credits. Ordinarily limited to seniors. Prerequisite: permission required of professor who will direct proposed work. A copy of Request for Independent Study form must be filed with physics department course coordinator, 121 Clark Hall. Individual project work (reading or laboratory) in any branch of physics.

**PHYS 500 Informal Graduate Laboratory**  
Fall, spring; summer. Variable to 2 credits. By permission of instructor. Experiments of widely varying difficulty in one or more areas, as listed under Physics 510, may be done to fill student's special requirements.

**PHYS 510 Advanced Experimental Physics**  
Fall, spring, summer. 3 credits. Lab, T W 1:25-4:25. Fall, W. Ho; spring, D. Hartill. About sixty different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics and ionics, magnetic resonance, X-rays, low temperature, solid state, cosmic rays, nuclear physics. Students perform four to eight experiments selected to meet individual needs. Independent work is stressed. An optional lecture associated with Physics 410, M 2:30-4:25 is available. It includes lectures on techniques used in experiments in the advanced laboratory and on current research topics.

**PHYS 520 Projects in Experimental Physics**  
Fall, spring, summer. Variable to 3 credits. To be supervised by faculty member. Students must advise department course coordinator of faculty member responsible for their project. Prerequisite: Physics 510. Projects of modern topical interest that involve some independent development work by student. Opportunity for more initiative in experimental work than is possible in Physics 510.
**ARTS AND SCIENCES - 1998-1999**

[PHYS 525] Physics of Black Holes, White Dwarfs, and Neutron Stars (also Astronomy 511)

[PHYS 551] Classical Mechanics

Spring. 3 credits. Prerequisite: an understanding of classical mechanics at the level of books by K. Syman, J. B. Marion. Lec, T R 10:10–11:25, rec, R 1:25–2:15. L. Hand, Lagrangian and Hamiltonian formulation of classical mechanics, using modern methods, modern applications in nonlinear dynamics. At the level of Theoretical Mechanics of Particles and Continua, by Fetter and Walecka.

[PHYS 553–554] General Relativity (also Astronomy 509–510)

553, Fall; 554, Spring. 4 credits. Prerequisite: knowledge of special relativity at the level of Classical Mechanics, by Goldstein. Lec, T R 1:25–2:40. E. Flanagan. Physics 553 is a systematic introduction to Einstein’s theory, with emphasis on modern coordinate-free methods of computation. Topics include review of special relativity, modern differential geometry, foundations of general relativity, laws of physics in the presence of a gravitational field, experimental tests of gravitation theories. At the level of Gravitation, by Misner. Physics 554 is a continuation of 553 that emphasizes applications to astrophysics and cosmology. Topics include gravitational collapse and black holes, gravitational waves in cosmology.

[PHYS 561] Classical Electrodynamics

Fall. 3 credits. Lec T R 8:30–9:55. Sec M 2:30–3:20. V. Elser. Maxwell’s equations, electromagnetic potentials, electrodynamics of continuous media (selected topics), special relativity, radiation theory. At the level of Classical Electrodynamics, by Jackson.

[PHYS 562] Statistical Physics

Spring. 4 credits. Primarily for graduate students. Prerequisites: a good knowledge of quantum mechanics (at the level of Merzbacher), classical mechanics (at the level of Marion), and statistical mechanics (at the level of Reif). Lec, M W F 9:05–9:55. N. Ascroft. Microscopic or thermodynamic concepts including the laws of thermodynamics, thermodynamic functions, thermodynamic stability, and the thermodynamics of phase equilibria. Microscopic concepts including 1-, 2-, and N-particle quantum states; the macro-canonical, canonical and grand-canonical distributions; Bose-Einstein, Fermi-Dirac and Boltzmann statistics; the density-matrix. The microscopic-macroscopic connection. Applications include spin systems—the Ising and related models, strongly-correlated fluids, and lattice-gases, including distribution and correlation functions, thermodynamic perturbation theory and introduction to critical phenomena and the renormalization group. Dense Fermi- and Bose-systems, linear response of quantum and classical systems; transport properties and the Boltzmann equation. At the level of Statistical Mechanics (2nd edition) by Pathria and Statistical Mechanics of Phase Transition by Yeomans.

[PHYS 572] Quantum Mechanics I

Fall. 4 credits. Lec, M W F 11:15–12:05. D. Cassel. General principles of quantum mechanics, formulated in the language of Dirac. Systems with few degrees of freedom: hydrogen, including fine and hyperfine structure; the deuteron and neutron-proton scattering; helium. Theory of symmetries, perturbations and collisions will be developed to analyze phenomena displayed by these systems. At the level of Modern Quantum Mechanics by Sakurai. A knowledge of the subject at the level of Phys 443 will be assumed, but the course will be self-contained.

[PHYS 574] Quantum Mechanics II

[PHYS 599] Cosmology (also ASTRO 599)

For description, see ASTRO 599.

[PHYS 635] Solid-State Physics I

Fall. 3 credits. Prerequisite: Physics 545. A good undergraduate solid-state physics course, such as Physics 454. D. Ralph. A survey of the basics of the physics of solids: crystal structure, phonons, and electrons. Selected topics from semiconductors, magnetism, superconductivity, disordered materials, dielectric and optical properties, and mesoscopic physics. At level of Solid State Physics by Ashcroft and Mermin.

[PHYS 636] Solid-State Physics II

Spring. 3 credits. Prerequisite: Physics 635. J. Sethna. A continuation of Physics 635; magnetism, superconductivity, broken symmetries, elementary excitations, and other topics in quantum condensed matter physics not covered in Solid State Physics by Ashcroft and Mermin, such as topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory, disordered systems, Anderson localization and other metal insulator transitions.

[PHYS 645] High-Energy Particle Physics

[PHYS 646] High-Energy Particle Physics

Spring. 3 credits. Not offered 1998–99. Staff. Topics of current interest, such as high-energy electron and neutrino annihilation, and high-energy hadronic reactions. Lectures and reading material are at the level of Introduction to High Energy Physics, by Perkins.

**Note:** Only S-U grades will be given in courses numbered 650 or above.

[PHYS 651] Relativistic Quantum Field Theory I

Fall. 3 credits. S-U grades only. P. Arygrous. Topics to be covered include consequences of causality and Lorentz invariance, field quantization, perturbation theory, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and weak interactions.

[PHYS 652] Relativistic Quantum Field Theory II

Spring. 3 credits. S-U grades only. H. Tye. This course is a continuation of Physics 651 and introduces more advanced methods and concepts in quantum field theory. Topics include functional integral methods, quantization of non-abelian gauge theories, the renormalization group, dispersion relations, and spontaneous symmetry breaking. Applications to the electroweak theory and quantum chromodynamics are emphasized. At the level of An Introduction to Quantum Field Theory by Peskin and Schroeder.

[PHYS 653] Statistical Physics

Fall. 3 credits. Normally taken by graduate students in their second or later years. Prerequisites: Competence in the basic principles of quantum mechanics, statistical physics at the level of Physics 562, and thermodynamics. S-U grades only. C. Henley. Survey of topics in modern statistical physics: Dynamical statistical physics (kinetic theory, Boltzmann equation, hydrodynamics); theory of simple fluids; scaling theories and the renormalization group; phase transitions in disordered systems; pattern formation in nonlinear systems, percolation theory.

[PHYS 654] Theory of Many-Particle Systems

Spring. 3 credits. Prerequisites: Physics 562, 574, 635, 636, and 653. S-U grades only. Staff. Equilibrium and transport properties of microscopic systems of many particles studied at zero and finite temperatures. Formulations such as thermodynamic Green’s functions are introduced and applied to such topics as normal and superconducting Fermi systems, superfluidity, magnetism, insulating crystals.

[PHYS 661] Advanced Topics in High Energy Particle Physics

Fall. 3 credits. Prerequisites: Physics 652 S-U grades only. Not offered 1998–99. This course will present advanced topics of current research interest. Subject matter will vary from year to year. Some likely topics are two-dimensional conformal field theory with applications to string theory and condensed matter physics, applications of the electroweak theory, lattice gauge theory, mathematical methods (e.g. group theory), perturbative quantum chromodynamics.
anomalies and geometry, supersymmetry, current algebra, heavy quark physics, heavy quark symmetry and phenomenological issues beyond the standard model."

**PHYS 665** *Topics in Theoretical Astrophysics* For description, see ASTRO 699.

**PHYS 667** *Theory of Stellar Structure and Evolution (also Astro 560)* For description, see ASTRO 560.

**PHYS 670** *Instrumentation Seminar* Spring 2 credits. S-U grades only. J. Alexander. Conception, design, and performance of innovative instrumentation in condensed matter and elementary particle physics.

**PHYS 680** *Computational Physics (also Physics 480 and Astronomy 690)* For description, see PHYS 480.

**PHYS 681-689** *Special Topics* Offerings are announced each term. Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

**PHYS 690** *Independent Study in Physics* Fall or spring. Variable to 4 credits. Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only. Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

**POLISH**

See Language Courses under Modern Languages.

**PORTUGUESE**

See Language Courses under Modern Languages.

**PSYCHOLOGY**

The major areas of psychology represented in the department are perceptual and cognitive psychology, biopsychology, and personality and social psychology. These areas are very broadly defined, and the courses are quite diverse. Biopsychology includes such things as animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. Perceptual and cognitive psychology includes such courses as cognition, perception, memory, and psycholinguistics. Personality and social psychology is represented by courses in social psychology and personality (such as Psychology and Law, Judgment and Decision Making, and Social Construction of Gender), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department also emphasizes the statistical and logical analysis of psychological data and problems.

The Major

Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C+ or better. Provisional admission requires two such courses. To apply to the major and receive an advisor, a major application form may be obtained from the department office (211 Uris Hall).

Requirements for the major are:

1) a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisers, a range of courses that covers the basic processes in psychology (laboratory and/or field experience is recommended); and

2) demonstration of proficiency in statistics before the beginning of the senior year. (See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:

1) Perceptual and cognitive psychology

2) Biopsychology

3) Social, personality, and abnormal psychology

The following classification of Department of Psychology offerings is intended to help students and their advisers choose courses that will ensure that such breadth is achieved.  

3) Social, personality, and abnormal psychology: Psychology 128, 125, 275, 277, 280, 281, 325, 327, 328, 402, 404, 450, 481, 489, 491.

4) Other courses: Psychology 101, 199, 347, 350, 410, 440, 441, 470, 471, 472, 473, 475, 478, 479. The major adviser determines to which group, if any, these courses may be applied.

With the permission of the adviser, courses in other departments may be accepted toward the major requirements.

Fieldwork, independent study, and teaching. The department requires students to observe the following limits on fieldwork, independent study, and teaching:

1) Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.

2) An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

Statistics requirement. Proficiency in statistics can be demonstrated in any of the several ways listed below.

1) Passing Psychology 350.

2) Passing an approved course or course sequence in statistics in some other department at Cornell. The approved list of courses and sequences may change. It has usually included Sociology 301, and the sequences Education 352 and 353, and Industrial and Labor Relations 210 and 211. Requests that a particular course be added to this list may be made to Professor Gilovich for approval.

3) Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or sequence must be equivalent to at least 6 semester credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.

4) Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives notice at least one week before. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

Concentration in biopsychology. Psychology majors interested in psychology as a biological science can elect to specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology, the physical sciences, including at least introductory chemistry, and mathematics. Students will design with their advisers an integrated program in biopsychology built around courses on physiological, chemical, anatomical, and ecological determinants of human and nonhuman behavior offered by the Department of Psychology. Additional courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major after consultation between the student and his or her psychology adviser.

Concentration in personality and social psychology. Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their department, including statistics. To ensure a solid interdisciplinary grounding, students in the concentration will be permitted to include some major courses in sociology and related fields. Advisers will assist students in the selection of a coherent set of courses from social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced and graduate seminars, with the permission of the instructor.
Undergraduate honors program. The honors program is designed for those exceptionally able students who wish to pursue an intensive and independent program of research in psychology. Successful participation in this program serves as evidence of the student's facility in the two most important skills of an academic psychologist: the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to engage in creative research activity. All qualified students planning on a graduate education in psychology or other academic fields should consider the honors program seriously. The program offers most students the closest collaboration with a faculty member in the field of psychology. It is assumed that most students will do so while enrolled in Psychology 470 (Undergraduate Research in Psychology). A written report of the research is to be given to the chair of the honors committee (Currently Professor Field) toward the end of the last semester of the student's senior year. An oral defense of the thesis is then given before a committee of three faculty members, and the student presents his or her work in a public forum. Final honors standing (summa cum laude, magna cum laude, cum laude) is indicated on the student's diploma. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year.

A student may formally apply to the honors program at any time during the senior year provided that she or he is actively engaged in research. Applications should be given to Professor Field and should be made directly by the student.

Distribution Requirement

The distribution requirement in the social sciences is satisfied by any two courses in psychology with the exception of Psychology 225, 307, 322, 324, 326, 352, 350, 361, 396, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492.

Note: The Department of Psychology has listed all days and times for each course that we offer. If there should be changes in the days, times, or semester that a course is offered, we will post the necessary changes throughout the department and in the supplements of the Course and Time and Course and Room Rosters. Changes are also available on the World Wide Web site, http://comp94.psysh.cornell.edu

Courses

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry
Fall. 3 credits. Students who would like to take a discussion seminar should also enroll in Psychology 103. M W F 10:10. J. B. Maas.
The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made by others.

PSYCH 102 Introduction to Cognitive Science (also COG 101, COMS 101, LING 170, PHIL 191)
Fall. 3 credits. T R 11:40-12:55. M. Spivey.
This semester course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course covers primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles these disciplines in cognitive science. The second part of the course will focus on how these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

PSYCH 103 Introductory Psychology Seminars
Fall. 1 credit. Limited to 300 students. Prerequisite: concurrent enrollment in Psychology 101. Hours to be arranged. 12 different time options. J. B. Maas and staff.
A weekly seminar that may be taken in addition to Psychology 101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a term paper related to the seminar topic. Choice of seminar topics and meeting times will be available at the second lecture of Psychology 101.

PSYCH 201 Cognitive Science in Context Laboratory (also COG 201 and COM S 201)
Fall or spring. 4 credits. Prerequisite: Introduction to Cognitive Science PSYCH 102/COG 101/COM S 101 or written permission of the instructor. Limited to 24 students. Disc and demos, M W 10:10-11:00; lab, M W 1:25-4:25, plus additional hours to be arranged. Fall, B. Halpern and staff; spring, D. Field and staff.
For description, see Cognitive Studies 201.

PSYCH 205 Perception
Spring. 3 credits. Open to first-year students. Graduate students, see Psychology 605. T R 11:40-12:55. J. E. Cutting.
One of four introductory courses in cognitive psychology. Basic perceptual concepts and phenomena are discussed with emphasis on stimulus variables and sensory mechanisms. All sensory modalities are considered. Visual, auditory, and symbolic perception. A comprehensive introduction to sensory perception with the "how-to" of such research. Students will be given six to eight basic experiments to explore and tinker with. They will be encouraged to pose "what if" questions and eventually test them. The course promotes independent thinking, problem solving in an experimental setting, proposing and testing of one's own hypotheses, relating laboratory experience with the real world, and communication of scientific ideas through informal and formal writing and oral assignments. Be prepared for an interactive learning experience.

PSYCH 216 Cognitive Psychology Lab
Fall. 1 credit. Limited to 16 students. Prerequisite: concurrent enrollment in Psychology 214. Hours to be arranged. B. Khurana.
If you've ever wondered how humans manage to represent their visual world, why telephone numbers are seven digits long, why imagery works as a mnemonic device, why certain things are better remembered than others, whether bilinguals are disadvantaged relative to monolinguals, how children acquire knowledge of the world, how people make decisions...this laboratory is for you! A weekly lab meeting that encourages students to discover the scientist in themselves through the study of Cognition. Much of Cognitive Psychology takes place in the laboratory and this course allows students to become familiar with the "how-to" of such research. Students will be given six to eight basic experiments to explore and tinker with. They will be encouraged to pose "what if" questions and eventually test them. The course promotes independent thinking, problem solving in an experimental setting, proposing and testing of one's own hypotheses, relating laboratory experience with the real world, and communication of scientific ideas through informal and formal writing and oral assignments. Be prepared for an interactive learning experience.

PSYCH 215 Psychology of Language (also LING 215)
Spring. 3 or 4 credits (4-credit option involves term paper). Limited to 150 students. Graduate students, see Psychology 614. M W F 11:15. B. Khurana.
Various approaches to the study of language will be discussed. Basic concepts in how humans process different kinds of information such as visual, auditory, and symbolic will be introduced. These concepts will then be used to explore topics such as attention and consciousness, concept formation and representation, memory processes, and systems, imagery and cognitive maps, problem solving and reasoning, judgment and choice, language acquisition and comprehension, intelligence and creativity, and social cognition.

PSYCH 217 Personality Psychology
Spring. 3 or 4 credits. Prerequisite: concurrent enrollment in Psychology 217. Limited to 150 students. Graduate students, see Psychology 614. M W F 11:15. J. Sereno.
One of four introductory courses in cognitive psychology. Introduction to the psychological study of language. Covers research in spoken language comprehension and production, reading, and language acquisition.

PSYCH 218 Social Psychology
Fall. 3 credits. Limited to 150 students. Graduate students, see Psychology 614. M W F 11:15. M. Spivey.
One of four introductory courses in cognitive psychology. Introduction to the psychological study of social behavior. Covers research in social behavior and social perception. Social psychology. Provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and none has any prerequisites. Students may take any one of the courses or any combination of them (including all four). Courses may be taken in any order or simultaneously.
PSYCH 223 Introduction to Biopsychology Fall. 3 credits. M W F 10:10. No prerequisites. Can be used to satisfy the psychology major breadth requirement and as an alternative prerequisite for upper-level biopsychology courses. Students who would like to take a discussion/demonstration seminar should also enroll in Psych 224, a one hour per week one-credit section. M. J. Owren.

An introduction to psychology from a biological perspective, including both evolutionary and physiological approaches to behavior. Topics include the structure and function of the nervous system, genetic and biochemical models of behavior, hormones and behavior, biological bases of learning, cognition, communication, and language, and the ecological and evolution of social organization and social development.

PSYCH 224 Introduction to Biopsychology Seminar Fall. 1 credit. Sections with a maximum of 16 students in each. Prerequisites: concurrent enrollment in Psychology 223. Days and times TBA. M. J. Owren and staff.

A weekly seminar that may be taken in addition to Psychology 223 to allow and encourage "hands-on" involvement with some of the course material, including interactive computer programs and models to get a clearer picture of basic neuroanatomy, visits to the laboratories of biopsychology faculty, films, reading, writing, and discussion of course material. Students will be required at least one day in advance of each discussion to read and prepare for any written assignments equivalent to a 10-page paper.

This course examines the implications of psychological theory and methods for law and the criminal justice system. We concentrate on psychological research on legal topics (e.g., confession, eyewitness testimony, jury decision making, homicide, aggression, the prison system), social issues (e.g., death penalty, affirmative action), as well as on psychologists as participants in the legal system (e.g., assessing insanity and dangerousness and for expert testimony).

PSYCH 275 Introduction to Personality Psychology (also HD 260) Spring. 3 credits. Prerequisites: Psychology 101, HDPS 115, or permission of instructor. T R 10:10-11:25. C. Hazen.

An introduction to personality psychology, with an emphasis on personality development and contemporary research. Covers the major theories of personality, and explores several aspects of personality development (including genetic, biological, experiential and environmental factors), and methods for assessing personality.

PSYCH 277 Social Construction of Gender (also Women's Studies 277) Fall. 3 to 180 students. M W F 9:05-9:55. S. L. Bern.

Psychology/Women's Studies 277 is an interdisciplinary course that addresses two broad questions: 1) how an individual's gender and sexuality are constructed; and 2) how hidden assumptions or "lenses" embedded in our social institutions, cultural discourses, and individual psyches perpetuate male power and oppress women and sexual minorities. Three lenses in particular are emphasized: androcentrism, gender polarisation, and biological essentialism. A fundamental assumption of the course is that social science has worried too much about difference per se and too little about how even our most rigid-looking institutions invisibly transform difference into disadvantage. Although some attention is given to biological perspectives, the course emphasizes the cultural and psychological processes whereby the historically contingent emerges to appear as the natural. Among some of the many topics discussed are the importance of looking at biology in context, the parental "instinct," androcentrism in law, sexual orientation, gender and sexual identity, gender roles and relationships, gender-liberated child-rearing, and homophobia.

PSYCH 280 Introduction to Social Psychology Spring. 3 or 4 credits; the additional (or fourth) credit requires participation in a weekly, extra seminar co-taught by the professor. T R 1:25-2:40. T. D. Gilovich and D. T. Regan.

An introduction to research and theory in social psychology. Topics include processing of social information, social influence, persuasion, trust, social interaction and group phenomena. The application of social psychological knowledge to current events will also be discussed.

PSYCH 281 The Helping Relationship Fall. 3 credits. Limited to 60 students. C. Maxwell Miller.

This course provides an introduction to the theoretical and practical aspects of some basic elements of counseling. Students will develop an understanding of the most current research on the elements of counseling and basic theoretical foundations underlying different approaches. Students will be expected to acquire and demonstrate elementary helping skills. Through role-play, observation of videos, and in-class demonstrations, students will learn such skills as attending and active listening; they will also develop a capacity to recognize internal conflicts and cognitive distortions as well as the similarities between interactive and individual processes. Other topics include issues of transference and counter transference, the multi-axial dimensions of the DSMIV, defensive strategies as they appear in the DSMIV and ethical considerations and practice. While this course provides an introduction to the applied aspects of psychology, it does not prepare students to provide treatment of any sort.

PSYCH 292 Intelligence Spring. 4 credits. Prerequisites: one 200-level course in psychology. M W 11:15-12:05. Discussion in small groups on Friday at 11:15, 1:25 or 2:30. U. Neisser.

A scientific overview of the controversial issues that surround intelligence tests and what they measure. Topics include the history of testing, correlates of test scores, alternative approaches to mental ability, genetic and environmental contributions to diversity in intelligence, effects of schooling, worldwide IQ gains, cultural factors and group differences.

PSYCH 305 Visual Perception Fall. 4 credits. Limited to 20 students. Prerequisite: Psychology 205 or permission of instructor. M W F 11:15. J. E. Cutting.

A detailed examination of pictures and their comparison to the real world. Linear perspective in Renaissance art, photography, cinema and video will be discussed in light of contemporary research in perception and cognition.

PSYCH 307 Chemosensory Perception Spring. 3 or 4 credits; the optional (or fourth) credit is for an independent research project. Graduate students, see Psychology 607. Not offered 1998-99. T R 9:05. B. P. Halpern.

The course is a survey of human chemosensory function and chemosensory perception. The Socratic Method, whereby the instructor asks questions of the students, is used to cover topics such as chemosensory psychophysics, the roles of saliva in chemosensory perception, sensory, perceptual, and cognitive bases for the tastes and flavors of foods, and chemosensory function in neonates and the aged, preceded by concise examinations of relevant physiology and anatomy. Classroom discussion can increase, but not decrease, a student's final grade. The student will be expected to read, analyze, and discuss in class difficult original literature dealing with the subject matter of the course. Students are expected to come to each class having already done, and thought about, the assigned readings. In addition to the assigned readings, attendance at various seminar and colloquium series sponsored by Cornell departments, programs, or graduate fields (especially Psychology, Food Science, Chemistry, Neurobiology and Behavior, Nutrition, and Biophysics), and use of resources accessible via the Internet, is often relevant to the discussion. At the level of Tasting and Smelling, edited by G. R. Beauchamp and L. Bartoshuk, Sensory Science Theory and Applications in Foods, edited by H. T. Lawless and B. Klein; Psychological Basis of Sensory Evaluation, edited by R. L. McBride and H. J. H. MacFie.)
PSYCH 322 Hormones and Behavior (also BIONB 322)  
Spring. 3 credits. Two lectures plus a section in which students will read and discuss original papers in the field, give an oral presentation, and write a term paper. Limited to juniors and seniors. Prerequisites: Psychology 123 (previously Psych 123), or BIONB 221 or 222, or one year of introductory biology plus a course in psychology. S-U grades only. Graduate students see Psychology 722. M W F 11:15. F. Adkins Regan.  
A major focus of the course will be comparative and evolutionary approaches to the study of the relationship between reproductive hormones and sexual behavior in vertebrates, including humans. Also included will be hormonal contributions to parental behavior, aggression, stress, learning and memory, and biological rhythms.  

PSYCH 324 Biopsychology Laboratory (also BIONB 324)  
Fall. 4 credits. Limited to 20 juniors and seniors. Prerequisites: Psychology 123 or BIONB 221 or 222, and permission of instructor. T R 8:45-10:15. T. J. DeVoogd. Experiments designed to provide experience in animal behavior (including learning) and its neural and hormonal mechanisms. A variety of techniques, species, and behavior patterns are included.  

PSYCH 325 Experimental Psychopathology (also HDFS 370)  
Spring. 4 credits. Limited to sophomores, juniors, and seniors. Prerequisites: Psychology 101, HDFS 115, or Education 110; a course in statistics (e.g., Psych 350, Soc 301, Educ 352 or 353, Ag Ec 310 or equivalent). Staff. A research-based survey of the cognitive, emotional, and biological aspects of psychopathology across the life span. The major mental illnesses will be covered, including schizophrenia, anxiety disorders, affective disorders, and personality disorders as well as psychopathological disorders of childhood. Emphasis will be placed on the development of psychopathological theories and models of etiology, and intervention strategies. This course is intended to be a rigorous introduction to the scientific study of psychopathology and psychopathological development; minimal attention to psychotherapy.  

PSYCH 326 Evolution of Human Behavior  
Fall. 4 credits. Prerequisite: Psychology 123, or an introductory biology course, or an introductory anthropology course. Graduate students, see Psychology 626. M W F 11:15-12:20. B. F. Johnston. A broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics covered will vary but will include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior and organization, cooperation and altruism, sexual behavior, mating and marriage systems, aggression, warfare.  

PSYCH 327 Fieldwork in the Helping Relationship  
Fall, spring. 4 credits. Prerequisites: Psychology 325, HDFS 370 or concurrent registration in 325 or HDFS 370 with permission of instructor. S-U grades only. Students do not enroll in advance for this course. Field placement assignments are made during the first two weeks of the semester. Students who have already taken Psychology 325 or HDFS 370 must contact the instructor during the first week of the semester. Enrollment is limited by the fieldwork placements available. Fee. S U 12:20-1:10. Staff. This is a year-long lecture and discussion course. The year-long commitment is mandatory. Psychology 328 will be for students taking the course a second time. An "R" grade will be assigned in the fall semester, and a S-U grade will only be assigned in the spring semester. An introductory fieldwork course for students currently enrolled in or who have taken Psychology 325 or HDFS 370. Fieldwork placements include the school system, psychiatric institutions, halfway houses, and other mental health oriented facilities. In addition to fieldwork, weekly supervisory/seminar meetings are held to discuss fieldwork issues and assigned readings.  

PSYCH 328 Continuing Fieldwork in the Helping Relationship  
Fall, spring. 4 credits. Prerequisites: Psychology 325, 327, or HDFS 370 and permission of instructor. S-U grades only. May not be taken more than twice. Students do not enroll in advance for this course. Fee. S U $25 each semester. T R 12:20-1:10. Staff. Designed to allow students who have done fieldwork as part of Psychology 327 to continue their field placements or begin new field placements under supervision for academic credit. An "R" grade will be assigned in the fall semester, and a S-U grade will only be assigned in the spring semester.  

PSYCH 332 Biopsychology of Learning and Memory (also BIONB 332)  
Spring. 3 credits. Prerequisites: one year of biology and either a biopsychology class or BIONB 222. Limited to 60 students. Graduate students, see Psychology 632. M W F 11:15. T. J. DeVoogd. This course will survey the approaches that have been or are currently being used in order to understand the biological bases for learning and memory. Topics will include invertebrate, "simple system" approaches; imprinting, avian song learning, hippocampal and cerebellar function, and human pathology. Many of the readings will be from primary literature.  

Fall. 3 or 4 credits. The 4-credit option involves a term paper. Prerequisite: Psychology 101 or permission of instructor. Computer graphics recommended. Graduate students, see Psychology 642. M W F 11:40-12:55. D. J. Field. Our present technology allows us to transmit and display information over a variety of media. To make the most of these media, it is important to consider the limitations and abilities of the human observer. The course will consider a number of applied aspects of human perception with an emphasis on the display of visual information. Topics to be covered include: "Three-dimensional" display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and "visual" effects in film and television.  

PSYCH 347 Psychology of Visual Communication  
Spring. 3 credits. Limited to 15 students. Prerequisites: Psychology 101 and permission of instructor. R 10:10-12:05. J. B. Maas.  
An exploration of theories of education, communication, perception, attitude, and behavior change as they relate to the effectiveness of visual based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages.  

PSYCH 350 Statistics and Research Design  
Fall. 4 credits. Limited to 120 students. M W F 9:05-9:55. T. D. Gilovich. Acquaints the student with the elements of statistical description (mean, standard deviation, skew, central tendency, regression, variation, correlation, etc.) and, more importantly, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.  

PSYCH 361 Biopsychology of Normal and Abnormal Behavior (also NS 361)  
Fall. 3 credits. Prerequisites: limited to 50 students in psychology and 50 students in nutritional sciences. An introductory biology course and an introductory psychology course with permission of instructor. S-U grades only. Juniors and seniors only. M W F 9:05-9:55. B. J. Strupp.  
A critical evaluation of factors thought to underlie normal and abnormal behavior and/or cognitive functioning. Psychological, biological, and societal influences will be integrated. Topics include: (1) the psychobiology of learning and memory; (2) nutritional influences on behavior (cognition (e.g., sugar, food additives, choline); (3) cognitive dysfunction (e.g., amnesia, Alzheimer's disease); (4) developmental exposure to environmental toxins and drugs of abuse, and (5) psychiatric disorders (depression, eating disorders).  

PSYCH 396 Introduction to Sensory Systems (also BIONB 396)  
Spring. 3 or 4 credits (4 credits with term paper). Registration for the 4-credit option requires permission of instructor. Prerequisites: an introductory course in biology or biopsychology, plus a second course in neurobiology or behavior or perception or cognition or biopsychology. Students will be expected to have elementary knowledge of perception, neurophysiology, behavior, and chemistry. No auditors. Offered alternate years. Graduate students, see Psychology 696. Not offered 1998-99. M W F 10:10. B. P. Halpern. The course will be taught using the Socratic method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with both those characteristics of sensory systems that are common across living organisms and those sensory properties which represent adaptations of animals to particular habitats or environments. Classroom
discussion can increase, but not decrease, a student's final grade. There are two preliminary exams and a final exam. The principles and limitations of major methods used to examine sensory systems will be considered. General principles of sensory systems, and auditory, visual, and somesthetic systems are covered. One aspect of each system (e.g., localization of objects in space by sound, color vision, thermoreception) will be selected for special attention. Two or more textbooks and a course packet of reproduced articles will be used. An introduction to the physiology of hearing, 2nd edition by J. O. Pickles, Hearing, Physiological Acoustics, Neural Coding, and Psychophysics, by W. L. Gulick, G. A. Gescheider, and R. D. Frisina. The retina: An approachable part of the brain, by J. E. Dowling, Handbook of Physiology—the nervous system III. Sensory processes, edited by J. M. Brookhard and V. B. Mountcastle.

[PSYCH 402] Current research on psychopathology: Depression
Spring. 3 credits. Limited to 20 students. Prerequisite: Psychology 325 or HDF5 370 and permission of the instructor. M 1:25–4:25. Not offered 1998–99. Staff. Current research and theory on the nature and etiology of depression. Approaches from various perspectives (biological, psychological, socio-cultural) are considered. Minimal attention to psychotherapy and symptomatology.

[PSYCH 404] Psychopathology and the Family
Spring. 4 credits. Limited to 20 students. Prerequisite: Psychology 325 or HDF5 370 and permission of the instructor. M 1:25–4:25. Not offered 1998–99. Staff. This course will explore familial influences on the development of abnormal behavior. It will examine how psychological, biological, and cultural factors in a family might contribute to such disorders as anorexia nervosa, depression, sexual abuse, psychopathy, and psychosomatic illnesses. Emphasis will be placed on early childhood experiences in the family and their impact on the development of later psychopathology. The course will also discuss how the evolution of family structures in more recent times (e.g., the rise in day care and divorce) influences the individual. Family therapy approaches and techniques will also be examined.

[PSYCH 410] Undergraduate Seminar in Psychology
Fall or spring. 2 credits. Nonmajors may be admitted, but psychology majors are given priority. Hours to be arranged. Staff. Information on specific sections for each term, including instructor, prerequisites, and time and place, may be obtained from the Department of Psychology office, 211 Uris Hall.

[PSYCH 412] Laboratory in Cognition and Perception
Spring. 4 credits. Limited to 15 students. Prerequisites: Psychology 101, 103, and one course in cognition or perception is recommended. Graduate students, see Psychology 612. Not offered 1998-99. M W 2:55-4:10. D. P. Fiedler. A laboratory course is designed to introduce students to experimental methods in perception and cognitive psychology. Students will take part in a number of classic experiments and develop at least one independent project. Computers will be available and used in many of the experiments although computer literacy is not required. Projects will be selected from the areas of visual perception, pattern recognition, memory, and concept learning.

PSYCH 413 Information Processing: Conscious and Non-conscious
Spring. 4 credits. Prerequisites: at least one course in human experimental and permission of instructor, Psychology 350 or equivalent will be useful for evaluating empirical articles. R 10:10–12:35. B. Khurana. In the past decade or so, a not-so-quiet revolution has been taking place in the field of cognition regarding the problem of conscious mental computation. Data have come from patients with striking neuropsychological syndromes, i.e., the phenomenon of “blindsight” in which patients can respond to visual stimuli without the conscious experience of vision or the “amnesic” syndrome in which patients cannot interact learning and memory sans the awareness of the learning encounters. This signature of independent mental computations has also been amply demonstrated in normal individuals in laboratory settings. We will critically evaluate the theoretical worth and empirical justification of the distinction between “conscious” and “non-conscious” mental computations in normal and patient populations. Weekly readings will be from, but not limited to, topics such as visual processes, face recognition, explicit and implicit memory, language processing and social cognition. Students will be required to: (1) lead and parake in advanced level discussions of classic and current papers, (b) submit weekly summaries of the assigned readings, and (c) write a term paper on a topic of their interest. Students should be prepared to read extensively, think analytically, discuss cogently, and write succinctly.

PSYCH 414 Comparative Cognition
Spring. 3 credits. Prerequisites: Psychology 205, 209, 214, or permission of instructor. Graduate students, see Psychology 714. T R 11:40-12:55. M. J. Owren. This course examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include whether nonhumans behave intentionally, show concept and category learning, memory, and abstract thinking similar to that of humans, the role of social cognition in the evolution of intelligence, and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide a "window on the mind" will play a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman species is our specific focus throughout. The course will be a mix lecture and discussion, emphasizing the latter as much as possible.

PSYCH 415 Concepts, Categories, and Word Meaning
Fall. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. Graduate students, see Psychology 615. M 1:25–4:25. Not offered 1998-99. Staff. A consideration of what types of categories are psychologically important, of how they are represented and used through concepts, and of how concept structure and semantic structure are interconnected. Different models of concept structure and categorization processes are evaluated, as are models of conceptual change and concept acquisition. Other topics include: relations between concepts and broader knowledge representation systems such as scripts, mental models, and intuitive theories; relative roles of associative information and beliefs in concept structure; categorization in other species; neuropsychological aspects of comparisons of categorization systems across cultures; and comparisons of concept structures across different types of categories.

PSYCH 416 Modeling Perception and Cognition
Spring. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. M W F 11:15-12:05. Not offered 1998–99. M. Spivey-Knowlton. This course offers a survey of several computational approaches to understanding perception and cognition. We will explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis will be placed on how complex sensory information gets represented in these models, as well as how it gets processed. This course will cover computational accounts of language processing, language acquisition, visual perception, and visual development, among others. Students will complete a final project that applies a computational model to some perceptual/cognitive phenomena.

PSYCH 417 The Origins of Thought and Knowledge
Fall. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. Graduate students, see Psychology 717. M 1:25–4:25. Not offered 1998-99. Staff. An in-depth analysis of current theories concerning the growth of thought and knowledge in childhood. Several controversies will be discussed in detail, including: Are mental abilities organized in local domains or modules that have their own patterns of development, or is cognition a more general process? Do comparative studies with other species and evolutionary models provide any useful insights into cognitive development in humans? Are there qualitative restructuring of thought and knowledge with development, or is the process more continuous in nature? What restrictions should these developmental considerations place on models of thought and knowledge in adults?

PSYCH 418 Psychology of Music
Spring. 3 or 4 credits, depending on whether student elects to do an independent project. Prerequisites: junior or senior standing with major in psychology or music and some background in both, or permission of instructor. Graduate students, see Psychology 618. M W 2:55-4:10. C. L. Krumhansl.
Detailed analysis of topics in the psychology of music, including theories of consonance, perception of tonal-harmonic structure, memory for music, and effects of musical training. Emphasis given to experimental methodologies.

**[PSYCH 419] Neural Networks Laboratory**
Spring. 4 credits. Prerequisites: at least one course in biology or biological psychology, one year of calculus, and permission of instructor. Limited to 15 students. Graduate students, see Psychology 619. T R 2:55-4:10. Not offered 1998-99. C. D. Hopkins.

The course will take a hands-on approach to understanding the limitations and successful applications of neural networks to problems in cognitive and biological psychology. A variety of neural network architectures will be discussed and explored using computer simulations. Applications of networks to perceptual recognition and representation will be emphasized. We will consider the class of problems that different networks can solve and consider the accuracy with which they model real nervous systems. Students will complete weekly lab reports and develop one independent project demonstrating the application of a neural network to a problem discussed in the course.

**[PSYCH 420] Laboratory in Neuroethology (also BIONB 420-03)**
Spring. 1 credit. Prerequisite: BIONB 424 or Psychology 424 or equivalent. Permission of instructor required. Lab: M 12:20-5:00. Not offered 1998-99. C. D. Hopkins. Designed as a laboratory component for BIONB 424/Neuroscience 424, this course will illustrate principles of neuroethology: sensory processing, neuroanatomy, and behavioral analysis. Students will participate in six laboratory exercises scheduled throughout the semester. The laboratory will be open from 12:20 until 5:00 p.m. on Mondays and Wednesdays. Labs will be done in groups of two. Students in this course will learn the fundamentals of neuroethology, neuroanatomy, and behavior through a series of six laboratory exercises using electric fish, Drosophila, crayfish and Limulus; bats and moths.

**[PSYCH 422] Developmental Biopsychology**
Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as Psychology 123 or BIONB 221). Graduate students, see Psychology 622. M W F 9:05-10:55. Not offered 1998-99. B. L. Finlay.

We will discuss the relationship of the development and evolution of the brain to the development of behavior. Topics include how neurons are generated, find targets, and establish connections; the emergence of reflexive and complex behavior; how experience affects the developing brain; evolutionary perspectives on the development of perception, communication systems; and abnormal development.

**[PSYCH 424] Neuroethology (also BIONB 424)**
Spring. 3 credits. Prerequisites: BIONB 221 and 222. S-U grades optional for graduate students only. T 9:05-11:00. R 9:05-9:55. Classes will be held on T R at 9:05-11:00. Thursday’s class will run for one hour. Recitations will be scheduled in class. Not offered 1998-99. C. D. Hopkins.

In the 1950’s-1970’s ethologists attempted to understand the mechanisms of animal behavior through the use of comparative methods, evolutionary analysis, careful observations of animals in their native habitats, and clever experimentation. Now, with the explosion of knowledge and techniques in the neurosciences, many of the ethologist’s mechanisms are being explained in terms of neural systems. This course will review the current status of research in neuroethology, including: mechanisms of acoustic communication in insects and vertebrates; echolocation in bats and sound localization in owls; electroreception and electrocommunication; and visual processing. In addition, it will review studies of the neural systems involved in decision making, in initiating action, and in coordinating fixed acts. Assigned readings will include original articles from the scientific literature. A term paper on neuroethology will be required.

**[PSYCH 425] Cognitive Neuroscience**
Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as Psychology 123 or BIONB 221). Graduate students, see Psychology 625. M W F 9:05-9:55. Not offered 1998-99. B. L. Finlay.

We will study the relation between structure and function in the central nervous system. The importance of evolutionary and mechanistic approaches for understanding the human behavior and cognition will be stressed. The course will focus on issues in cognitive neuroscience: mechanisms of perception, planning, and the neuropathology of everyday acts involving complex cognitive skills such as recognition of individuals, navigation in the world, language, memory, and social interaction.

**[PSYCH 429] Olfaction and Taste: Structure and Function (also BIONB 429)**
Fall. 3 or 4 credits (4-credit option requires a term paper or research project). The research project can, but does not need to, study nonhuman vertebrates). Preference given to junior and senior psychology and biology majors and graduate students. Prerequisite: one 300-level course in biopsychology or equivalent. Graduate students, see Psychology 629. T R 9:05-11:00. Not offered 1998-99. B. P. Halpern.

The structural and functional characteristics of olfaction and taste will be explored by reading and discussing experimental papers in these areas. Structure will be examined at the light levels of electron microscopes as well as at the molecular level. Function will be primarily neurophysiological and biochemical aspects. The emphasis will be on vertebrates, especially air-breathing vertebrates in the case of olfaction, but there will be some coverage of invertebrate forms. At the level of Smell and Taste in Health and Disease, edited by T. V. Getchell, R. L. Doty, L. M. Bartoshuk, and J. B. Snow; The Neurobiology of Taste and Smell, edited by T. F. Finger and W. L. Silver.

**[PSYCH 431] Effects of Aging on Sensory and Perceptual Systems (also BIONB 421)**
Fall. 3 or 4 credits; the optional (or fourth) credit involves a term paper. Prerequisites: an introductory course in biology or psychology, plus a second course in perception or neurobiology or cognition or psychology. No auditors. Limited to 25 students. Graduate students, see Psychology 631. T R 10:10-11:25. B. P. Halpern.

A literature-based examination of postmaturation changes in the perceptual, structural, and physiological characteristics of somesthetic, chemosensory, visual, and auditory systems. Emphasis will be on human data, with non-human information included when especially relevant. Current developments in human sensory prosthetic devices, and in regeneration of receptor structures, will be examined. Brief written statements (by electronic mail) of questions and problems related to each set of assigned readings will be required at least one day in advance of each class meeting. This course will be taught using the Socratic Method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with the subject matter of the course. Students are expected to come to each class having already done, and thought about, the assigned readings.

**[PSYCH 432] Language Development (also HDFS 436, LING 436, and COG ST 436)**
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll under HDFS 633/LING 700/PSYCH 600, a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S-U grades optional. T R 2:55-4:10. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experiments in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available. (See CoG St. 450/ Ling 450 and Psych 437)

**[PSYCH 437] Lab Course: Language Development (also LING 450 and COGST 450) (in conjunction with HDFS/LING 436, Language Development)**
Spring. 2 credits. B. Lust.

This laboratory course will provide graduate students with an introduction to hands-on research experience in the Cognitive Studies Research Labs. This course is partially funded by a new National Science Foundation grant to Cornell’s Cognitive Studies program. "Interdisciplinary Approaches to the Scientific Study of Language Knowledge and Acquisition." This project is intended to involve
undergraduates in active research and to coordinate related subfields of several disciplines on a unified, laboratory-supported curriculum.

This course will include several structured modules dealing with topics covered in the survey course, HD/LING/PSYCH 436, Language Development. They will also train in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods in order to test hypotheses.

The course will meet once a week in group format. In addition, students will be given access to a research lab environment for independent work on assigned modules, and independent research, throughout the week, and throughout the term.

PSYCH 440 The Brain and Sleep
Fall. 4 credits. Prerequisites: at least Psychology 223 or BIONB 221. An additional course in biology, biopsychology or neurobiology is recommended. S-U grading option. Graduate students see Psychology 640. M W 8:40-9:55. H. S. Porte.

Taking a comparative evolutionary perspective, this course examines the neural events that instigate, maintain, and disturb the states and rhythms of sleep in various species. Emphasizing human data where possible, special topics will include sleep deprivation and the biological functions of sleep; sleep's putative role in learning and memory; biologically interesting deviations from normal sleep; the cognitive neuroscience of sleep.

PSYCH 441 Laboratory in Sleep Research
Spring. 4 credits. Prerequisites: Psychology 440 or comparable preparation, and permission of instructor during preregistration. Laboratory fee: $50. Graduate students, see Psychology 641. M W 7:30-10:30 p.m. H. S. Porte.

Emphasizing the neurobiology of sleep state, the course introduces the laboratory study of human sleep and its psychological correlates. Serving as both experimenter and subject, each student will learn the physical rationale and techniques of electroencephalography and other bioelectric measures of behavioral state. Using computerized data analysis, students will complete weekly laboratory reports and a collaborative term project.

Sleep recordings will be done during the day or evening when possible. In addition, overnight recording sessions are required.

PSYCH 450 The Lenses of Gender (also Women's Studies 450)
Spring. 4 credits. Limited to 15 seniors and graduate students. Prerequisites: 1) semester standing, with preference given to psychology majors and women's studies majors; 2) both a course related to gender and/or sexuality and a course related to clinical and/or personality psychology. Permission of instructor required. No preregistration. Interested students should attend first class. Letter grade only. Graduate students, see Psychology 650/Women's Studies 650. F 2:30-4:25. S. L. Beng.

The focus of this seminar is the intersection of gender and clinical psychology. Rather than surveying a broad array of topics more superficially or studying a single topic in very great depth, the seminar will take up several gender- and sexuality-related issues in moderate depth over the course of several weeks. Possible topics include depression, eating disorders, recovery of false memories, transgender, needs of lesbian and gay clients. Course requirements will likely include a final essay examination and a term paper or a class presentation.

PSYCH 470 Undergraduate Research in Psychology
Fall or spring. 1-4 credits. S-U grading option. Written permission from the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours to be arranged. Staff.

Practice in designing, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 471 Advanced Undergraduate Research in Psychology
Fall or spring. 1-4 credits. S-U grading option. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology. Hours to be arranged. Staff.

Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 472 Multiple Regression
Spring, weeks 1-7. 2 credits. Prerequisite: one solid semester of introductory statistics. Analysis of variance is helpful but not required. M W F 10:10. R. B. Darlington.

Uses and pitfalls of multiple regression in causal analysis, path analysis, and prediction. Emphasis on analyzing data collected under uncontrolled conditions. Includes colinearity, indicator variables, sets, adjusted and shrunken R^2, suppressors, hierarchical analysis, overcontrol, experimental design. Very little hand computation; uses MYSTAT computer program.

PSYCH 473 General Linear Model
Spring, weeks 8-14. 2 credits. Prerequisite: Psychology 472 or equivalent. M W F 10:10. R. B. Darlington.

Includes multivariate normal, MANOVA, and Hotelling's T^2. Variables and interactions are parameterized in linear models, in interaction models, in ANOVA and mixed models, in regression, and in ANCOVA. ANOVA, regression, ANCOVA, and MANOVA are discussed. Basic concepts of vector spaces are developed in the context of the analysis of variance. Students vote on topics to cover, choosing from the Department of Psychology.

PSYCH 474 Multivariate Analysis of Variance
Fall. 2 credits. Prerequisite: Psychology 473 or permission of instructor. R 10:10-12:05. R. B. Darlington.

Students vote on topics to cover, choosing from among nonparametric methods, time series, cluster analysis, multidimensional scaling, component analysis, factor analysis, MANOVA, canonical correlation, repeated measures, logistic regression, log-linear models, corrections for unreliability in regression, nesting, power analysis, influence analysis, and other topics. First class sketches all these topics before voting on course content.

[PSYCH 478 Psychometric Theory
Fall. 2 credits. Prerequisite: Psychology 472 or permission of instructor. Not offered 1998–99. R. B. Darlington.

Statistical methods relevant to the use, construction, and evaluation of psychological tests.

[PSYCH 479 Multisample Secondary Analysis

Statistical methods for analyzing and integrating the results of many independent studies on related topics.

PSYCH 481 Advanced Social Psychology
Fall. 4 credits. Limited to 20 students, by application. Senior psychology majors have priority. Graduate students, see Psychology 681. T R 10:10-11:25. D. T. Regan

Selected topics in social psychology are examined in depth with an emphasis on the relationship between experimental research and the development of theory. Readings will be mostly primary sources. Among the theoretical approaches to social behavior we may discuss are social comparison theory, cognitive dissonance, attribution processes and social judgment, dramaturgy and impression management, and evolutionary perspectives.

PSYCH 489 Seminar: Beliefs, Attitudes, and Ideologies
Fall. 4 credits. Prerequisite: admission is by application during the spring preregistration period. Seniors are given priority. M 2:30–4:25. D. J. Bern.

The seminar examines fundamental properties of beliefs and attitudes: how they are formed and changed, what functions they serve for the individual, and how they coalesce into belief systems or ideologies. Several specific ideologies are examined in detail: for example, the political ideologies of the American public, gender, sexual orientation, the ideological factors that promote anorexia in a society, the contrasting world-views of "pro-choice" and "pro-life" activists, the ideologies of psychology and science, and more. Participants write weekly commentaries on the readings in addition to a term paper examining a particular ideology.

PSYCH 491 Research Methods in Psychology
Spring. 4 credits. Enrollment limited to 25 students. Recommended concurrent permission of instructor, Psychology 350, experience in upper-division psychology courses, or graduate standing. Graduate students, see Psychology 691. T R 10:10-11:25. D. A. Dunning.

An intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course will focus on designing and conducting experiments, i.e., how to turn vague theories...
into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. Beyond learning methods of "correct" and rigorous experimentation, we will also discuss what makes a research study actually interesting. The course in addition, will cover experimental design, survey methods, and "quasi experiments." Students will concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.

**PSYCH 492 Sensory Function (also BIONB 492)**
Spring. 4 credits. Limited to 25 students. Prerequisite: a 300-level course in biopsychology, or BIOP 222 or BIOP 311, or permission of the instructors. Students are expected to have a knowledge of elementary physics, chemistry, and be behavior. S-U grades optional. Offered alternate years. Graduate students, see Psychology 692. Not offered 2000–2001. M W F 10:10. B. P. Halpem and H. C. Hand.

This course covers classical topics in sensory function such as vision, hearing, touch and balance, as well as some modern topics like sensory coding, location of stimulus sources in the normal development of sensory systems, and non-classical topics such as electrophysiology and internal chemoreceptors. Both human and nonhuman systems are discussed. In all cases the chemical, physical, and neural bases of non-classical sensory information are treated, and the processing of this information is followed into the central nervous system. This course will be taught using the Socratic method, in which the instructor asks questions of the students, and their answers will be discussed. Students will be expected to come to each class having read, thought about, and prepared to discuss, the assigned readings and other assigned information resources. Students will submit brief analyses of, and comments and questions on, all assignments by e-mail to the course's electronic mailing list a day before each class meeting. The mailing list will be distributed to all members of the class and to the instructors. In addition to these brief triweekly written exercises, a term paper in the form of a review article will be required.

**Advanced Courses and Seminars**

Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each term is determined by the needs of the students. A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Uris Hall). The following courses may be offered either term and carry 4 credits unless otherwise indicated.

**PSYCH 510-511 Perception**
**PSYCH 512-514 Visual Perception**
**PSYCH 518 Topics in Psycholinguistics**
**PSYCH 519-520 Cognition**
**PSYCH 521 Psychobiology**
**PSYCH 522 Topics in Perception and Cognition**
**PSYCH 523 Hormones and Behavior**

---

**PSYCH 524 Sex Differences in Brain and Behavior (also BIOP 626)**
Spring. 2 credits. Limited to 12 seniors and graduate students. Not offered 1998–99. Hours to be arranged. T. J. DeVoogel. A survey of the newly discovered animal models for sex differences in the brain. Topics include the role of steroids in brain development, whether hormones can modify the structure of the adult brain, and the consequences of such sex differences in anatomy for behavior.

**PSYCH 527 Topics in Biopsychology**
**PSYCH 535 Animal Behavior**
**PSYCH 541 Statistics in Current Psychological Research**
**PSYCH 580 Experimental Social Psychology**
**PSYCH 600 General Research Seminar**

Fall or spring. No credit.

**PSYCH 601 Computational Models of Language**
Spring. 4 credits. R 10:10–12:05. Prerequisites: consent of instructor. M. Spivey. This seminar will involve in-depth discussion of a range of computational approaches to language representation, processing, and acquisition. We will cover phrase-structure grammars, context-free grammars, connectionist models, statistical natural language processing, and dynamical systems, to name just a few. There will also be some hands-on experience writing models in a computer lab using the MATLAB programming environment.

**PSYCH 605 Perception (also Psychology 205)**

**PSYCH 607 Chemosensory Perception (also Psychology 307)**

**PSYCH 611 Introduction to Human Memory (also Psychology 311)**

**PSYCH 612 Laboratory in Cognition and Perception (also Psychology 412)**

**PSYCH 613 Obesity and the Regulation of Body Weight (also Nutritional Sciences 315)**
Spring. 3 credits. Limited to 30 students. Prerequisite: one course in psychology and one course in nutrition. Undergraduate students may register with permission of instructor. S-U grades optional. Offered alternate years. T R 1:30–3:30. Not offered 1998–99. D. A. Levitsky. This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

**PSYCH 614 Issues in Cognitive Psychology (also Psychology 214)**
Fall. 4 credits. M W F 10:10. B. Kuruana.

**PSYCH 615 Concepts, Categories, and Word Meaning (also Psychology 416)**

**PSYCH 618 Psychology of Music (also Psychology 418)**

**PSYCH 619 Neural Networks Laboratory (also Psychology 419)**

**PSYCH 622 Developmental Biopsychology (also Psychology 422)**

**PSYCH 625 Cognitive Neuroscience (also Psychology 425)**

**PSYCH 626 Evolution of Human Behavior (also Psychology 326)**
Fall. 4 credits. T R 2:55–4:10. R. E. Johnston.

**PSYCH 629 Olfaction and Taste: Structure and Function (also Psychology 429 and BIONB 429)**

**PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also Psychology 421 and BIONB 421)**
Fall. 4 credits. T R 10:10–11:25. B. P. Halpem.

**PSYCH 632 Biopsychology of Learning and Memory (also Psychology 332 and BIONB 328)**

**PSYCH 640 The Brain and Sleep (also Psychology 440)**
Fall. 4 credits. M W 8:40–9:55. H. S. Porte.

**PSYCH 641 Laboratory in Sleep Research (also Psychology 441)**

**PSYCH 642 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also Psychology 342)**

**PSYCH 650 The Lenses of Gender (also Psychology 450 and Women's Studies 450 and Women's Studies 650)**

**PSYCH 681 Advanced Social Psychology (also Psychology 481)**

**PSYCH 689 Seminar: Beliefs, Attitudes and Ideologies (also Psychology 489)**

**PSYCH 691 Research Methods in Psychology (also Psychology 491)**
Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade will be assigned in the fall semester, and a S-U grade only will be assigned in the spring semester.

**PSYCH 775 Proseminar in Social Psychology I**

Fall. 2 credits. Limited to 10 graduate students in social psychology. Hours to be arranged. D. A. Dunning, T. D. Gilovich and D. T. Regan

This is the first term of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasize social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.

**PSYCH 776 Proseminar in Social Psychology II**

Spring. 2 credits. Limited to 10 graduate students in social psychology. Hours to be arranged. D. A. Dunning, T. D. Gilovich and D. T. Regan

This is the second half of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasize social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.

**PSYCH 900 Doctoral Thesis Research in Biopsychology**

**PSYCH 910 Doctoral Thesis Research in Human Experimental Psychology**

**PSYCH 920 Doctoral Thesis Research in Social Psychology and Personality**

**Summer Session Courses**

The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses will be offered in a particular summer. Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

**PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry**

**PSYCH 123 Introduction to Biopsychology**

**PSYCH 128 Introduction to Psychology: Personality and Social Behavior**

**PSYCH 199 Sports Psychology**

**PSYCH 280 Introduction to Social Psychology**

**PSYCH 350 Statistics and Research Design**

**QUECHUA**

See Language Courses under Modern Languages.

**RELIGIOUS STUDIES MAJOR**

See under “Special Programs and Interdisciplinary Studies.”

**ROMANCE STUDIES**

The Department of Romance Studies (Mitchell Greenberg, chair) offers courses in French literature, Italian literature, and Spanish literature. In addition, the department’s program includes courses in the French and Spanish languages, French linguistics, Spanish linguistics, semiotics, and Francophone, Italian, and Hispanic culture. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

**French**

J. Béreauad, director of undergraduate studies; A. Berger, A. M. Colby-Hall, emerita; N. Furman, M. Greenberg, chair; D. I. Grossvogel, emeritus; R. Klein, P. Lewis, K. Long, J. Ngate, A. Beznece, S. Tarrow, M.-C. Vallois, L. R. Waugh.

**The Major**

The major in French is divided into three options: French Area Studies, French linguistics, and French literature. For a description of the linguistics option, see Modern Languages or Linguistics, French. The area studies and literature options are described below.

While prospective majors should try to plan their programs as far ahead as possible, especially if they intend to study abroad, no student will be refused admission merely because of a late start. Students wishing to major in French Area Studies or French literature should consult the director of undergraduate studies in the French section of the Department of Romance Studies, Professor Jacques Béreauad.

In view of the ongoing curriculum changes that will be implemented in 1999-2000, please see the Romance Studies undergraduate director. This consultation is especially important in order to know the sequence of courses that will follow the current choice of courses.

**The Literature Option**

The major in French, literature option, is designed to give students proficiency in the oral and written language, to acquaint them with French literature and culture, and to develop skills in literary analysis.

**Admission**

To be admitted to the major, students should have completed FRJUT 201, 220, or 221 plus 222 and FRDML 213 or its equivalent by the end of their sophomore year.

**For completion of the major, a student must:**

1. acquire a sound degree of competence in French language. This competence is demonstrated by the successful completion of French 301-312 or their equivalents, such as properly accredited study
abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).

(2) take six courses in French literature or civilization at the 300 level or above. These courses, selected in consultation with the student's major adviser, will include at least two pre-19th-century courses and at least one 400-level course.

(3) take two connected courses in one of the following related areas: literature, linguistics, comparative literature, history, history of art, music, government or another relevant discipline with a significant French component. Students who are double majors are exempted from this last requirement.

The French Area Studies Option

Admission

To be admitted to the major, students should have completed French Literature 201, 220, 221 or 224 plus French Language 213 or its equivalent by the end of their sophomore year.

For completion of the major, a student must:

(1) acquire a sound degree of competence in the French language. This competence is demonstrated by the successful completion of French 301–312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).

(2) take two courses in Romance Studies (literature or civilization) at the 300 level or above.

(3) take six courses at the 300 level or above in no more than three areas of interest such as—but not limited to—Africana studies, anthropology, comparative literature, French literature, economics, government, history, history of art, linguistics, music, theater arts, women's studies. Each area must be represented by at least two courses, and each course must have a significant French component. At least one of the six courses should be at the 400 level.

Administration of French Area Studies

Students are admitted to the major by the director of undergraduate studies in the French section of the Department of Romance Studies, but will be guided by their individual advisers. A copy of each student's program will be given to the director of undergraduate studies for approval and safekeeping.

Study Abroad in France

French majors or other interested students may study in France for one or two semesters during their junior year. Opting for one of several study abroad plans recognized by the departments of Romance Studies, Modern Languages, and Linguistics facilitates the transfer of credit. Information about these plans is available from the director of undergraduate studies for approval and safekeeping.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of FRDML 213 or its equivalent in advanced credit or placement by the Cornell CASE examination. The taking of FRROM 301 and/or 312 is, however, strongly recommended. Students interested in studying in France are encouraged to consider the special benefits offered by EDUCO, the program in Paris cosponsored by Cornell and by Duke University. EDUCO offers advanced students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program spend the year or the semester as fully matriculated students at the University of Paris VII and other institutions of higher learning in Paris, including the Institut d'Etudes Politiques (Sciences Po), selecting courses in many fields from the regular university course offerings. Students begin the academic year with an intensive three-week orientation into French history, society, and daily life. While it is possible to enroll in the EDUCO Program for one semester, admission will be given first to students planning to study abroad for the full academic year. EDUCO maintains a center in Paris with appropriate support staff. The resident director, chosen annually from the Cornell and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the center. This center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as informal gatherings.

Honors. The honors program encourages well-qualified students majoring in French literature or culture to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 429–430, but these independent study courses must be in addition to the courses that meet the minimum requirements for the major. At the end of the senior year, each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

Fees. Depending on the course, a small fee may be charged for copies of texts used in course work.

Language and Linguistics

Most language courses and French linguistics courses are offered by the Department of Modern Languages and the Department of Linguistics. Further language courses (conversation and advanced level), French 201 is divided into small sections and is conducted in French.

French 201 is divided into small sections and is conducted in French. French 201 is designed for students interested in improving their written and oral skills in French and also their literary proficiency. Texts have been chosen both for their literary merit and their manageable linguistic difficulty. Close scrutiny of the works and active class discussions will sharpen students' critical and analytical abilities. Different genres are covered (poetry, drama, and narrative prose), and the reading list may include authors such as Baudelaire, Beckett, Ionesco, Camus, Duras, Rimbaud and Sartre.

FRDML 200, 203 or 205. Conducted in French. J. Ngate.

FRROM 301 Advanced French I

Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRDML 213 or Q++ on the Cornell Advanced Standing Examination (CASE). Fall: J. Bereaud and staff; spring: I. Daly and staff.

FRROM 312 Advanced French II

Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRROM 301 or placement by the Cornell Advanced Standing Examination (CASE). Fall or spring: J. Bereaud and staff.

Continuation of work done in French 301. The objective of French 301 is to teach students to speak and write correct French. In French 312 students will be expected to have a richer, more idiomatic and hopefully elegant command of the language.

Formal study of grammar will be discontinued, and more attention will be devoted to the examination of texts and to oral presentations by students. Weekly papers as in French 301.

Literature

FRLIT 201 Introduction to Techniques of Reading French Literature

Fall or spring. 3 credits. Prerequisite: qualification in French (SAT II score of 600, LPF score of 56, or French 123). Fall, K. Long and staff; spring, N. Furman and staff.

French 201, like most other 200-level French literature courses, satisfies the language requirement by giving proficiency in French. Students with an SAT II score of 640 or more, or an LPF score of 50 or more, should take French 221.

French 201 is divided into small sections and is conducted in French. French 201 is designed for students interested in improving their written and oral skills in French and also their literary proficiency. Texts have been chosen both for their literary merit and their manageable linguistic difficulty. Close scrutiny of the works and active class discussions will sharpen students' critical and analytical abilities. Different genres are covered (poetry, drama, and narrative prose), and the reading list may include authors such as Baudelaire, Beckett, Ionesco, Camus, Duras, Rimbaud and Sartre.

FRLIT 220 French and Francophone Culture

Fall. 3 credits. Prerequisite: SAT II score of 640 and above, or LPF score of 60, or FRDML 200, 203, 205. Conducted in French. J. Ngate.

This course serves as an introduction to French Area Studies. It provides an overview of Francophone culture and society from 1945 to the present. Readings will include a
selection of articles dealing with issues of current concern in France: works by French and Maghrebi or African writers; poetry or drama; two films will also be discussed.

FRLIT 221 Modern French Literature
FALL OR SPRING. 3 CREDITS. PREREQUISITES: SAT II SCORE OF 640 AND ABOVE, OR LPF SCORE OF 60, OR FRDML 200, 203, OR 205. Conducted in French. Fall: N. Furman and staff; spring: J. Ngate and staff. This course, divided into small sections, is intended as an introduction to French literature of the modern period. Texts have been selected to reflect the centrality of their modernity to the traditional literary canon and with an eye to experimentation. The course considers literary genres (poetry, drama, the novel) as solicitations to read texts differently, at different speeds, with diverse claims on our attention. The course is designed to satisfy a general interest in modern French literature as well as to prepare students to pursue a French major in literature. Readings will include works by Balzac, Baudelaire, Sartre, Ionesco, Beckett, Proust, Duras.

FRLIT 222 Early Modern French Literature
FALL. 3 CREDITS. PREREQUISITE: FRLIT 201, 220, 221 OR PERMISSION OF THE INSTRUCTOR. REQUIRED OF ALL MAJORS, BUT NOT LIMITED TO THEM. CONDUCTED IN FRENCH. M. C. VALLOIS.

Study of the classic literature of seventeenth-century France (Corneille, Racine, Molière, Mme. de Lafayette, La Fontaine) and of eighteenth-century Enlightenment literature (Voltaire, Rousseau, Diderot, Beaumarchais). Special attention is paid to the ways in which these various works represent or deal with the shift from an aristocratic cultural code of values to modern bourgeois ideology and aesthetics. The course will also invite reflection on the status and centrality of female characters in classical and neo-classical French literature; it will attempt to trace the evolution from the classical tragic heroine to modern (but no less problematic) representations of women.

FRLIT 224 The French Experience: An Introduction
FALL. 3 CREDITS. M. GREENBERG AND S. KAPLAN.

An examination of French society, culture, and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals, and cinema. Looking attentively at texts, images, and contexts from selected moments in the eighteenth, nineteenth, and twentieth centuries, we will attempt to unravel some of the defining enigmas of the French experience, and at the same time reflect on the ways that French culture is manifested both in French and in English translation.

Note: Prerequisite for all 300-level courses in French literature: FRLIT 201, 220, 221, or the equivalent.

FRLIT 315 Modern European Literature and Culture (also COML 311 and RUSSL 311)
SPRING. 4 CREDITS. SPRING. CONDUCTED IN ENGLISH. G. GIBIAN.

For description, see Comparative Literature 311.

FRLIT 321 French Civilization I: History, Culture, and Cinema
FALL. 4 CREDITS. Conducted in French. J. BÉREAUD.

This course will investigate the past as it has shaped the present, focusing on some salient episodes that span 20 centuries of French history from the Roman occupation of Gaul to the events of May 1968. Three types of materials will be studied: a history text, documents of cultural significance (literature, art, popular culture) and a few films to help bring the past to life.

Students will select topics of personal interest for research and oral presentation in class. These topics could range from the investigation of historic figures such as Joan of Arc, Louis XIV or Napoléon to the effects of recent wars on the national psyche; from the art of the stained glass windows of the medieval cathedrals to the technological revolution that prepared the way for the first flight of the Supersonic Concorde in 1969.

FRLIT 322 French Songs
SPRING. 4 CREDITS. PREREQUISITE: FRDML 213. Conducted in French. J. BÉREAUD. "Everything in France ends in a song." The course will examine the truth of this old adage and study French songs as a reflection of the French experience. Various approaches will include: an overview of traditional folklore songs (typically pre-revolutionary), a study of certain genres: the "realist" and the "poetic" traditions, love songs, protest songs, drinking songs, children's songs, etc., a study of a few artists who have had a major influence in France after WWII such as F. Piaf, G. Brassens, L. Ferré, J. Brel. Students will be expected to give oral presentations on artists of their own choosing, and to write one short paper and one research paper on a major figure or a particular genre or period (sea shanties, songs of the "Front Populaire" or of World War II, French rap songs, etc.).

FRLIT 323 Francophone Fiction of the Maghreb
SPRING. 4 CREDITS. Conducted in French. S. TARROW.

The course will trace the development of francophone fiction in the Maghreb from the 1920s, when the French celebrated a century of colonial power in North Africa, through the violent struggles for independence to the post-colonial period and the current civil war in Algeria. Texts will be selected from the works of authors such as Tahar ben Jelloun, Rachid Boujedra, Albert Camus, Mohammed Dib, Assia Djebar, and others. In addition to reaching critical thinking and argumentation through short, but frequent, writing assignments.

FRLIT 333 Contemporary French and North African Literature
FALL. 4 CREDITS. Conducted in French. R. KLEIN.

This course is intended to introduce students to the work of some of the major figures in contemporary French literature, in writing published since the events of May 1968. A broad range of topics and issues will be examined, with particular attention to those that have transformed traditional academic disciplines. These topics will be selected not only with a view to their theoretical interest, but also with an eye to their quality and their French proce. Readings will include works by Levi-Strauss, Foucault, Cixous, Irigaray, Kristeva, Derrida, Barthes, Baudrillard.

FRLIT 349 Love and Hate in the Middle Ages (also FRLIT 649)
FALL. 4 CREDITS. PREREQUISITE: FRLIT 221 OR PERMISSION OF INSTRUCTOR. CONDUCTED IN FRENCH. K. LONG.

This course is designed to offer an introduction to medieval French literature and old French while tracing the invention and decline of courtly ideals and the rise of satirical misogyny. The basic tenets of courtly love and courtly poetics will be illustrated by selections from the Lais of Marie de France, the Chevalier au Lion de Chretien de Troyes, and the Roman de la Rose of Guillaume de Lorris. Satirical revision of the courtly ideal will be studied in selections from the Roman de la Rose of Jean de Meun, the lyric poetry of Rutebeuf, Charles d’Orleans, Francois Villon, and Christine de Pizan, as well as in medieval farces and fabliaux. Readings in old and medieval French.

FRLIT 381 Nineteenth-Century French Women Writers (also WOMNS 381)
SPRING. 4 CREDITS. Conducted in French. M. VALLOIS.

While situating the works read within their specific historical and literary context, this course will attempt to address two sets of questions: 1) How does the inscription of literature as a Public and Phallocentric cultural order affect women authors' status and writing strategies? 2) To what extent and at what levels does being a woman inform or shape the text produced? In what ways is literary writing concerned with sexual difference? Writers will include Mme. de Staël, George Sand, Flora Tristan, and Rachilde and others.

FRLIT 384 Reading Workshop: Prose Narratives
FALL. 4 CREDITS. Conducted in French. N. FURMAN.

The aim of this course is two-fold: it seeks, on the one hand, through careful readings of short stories to develop critical insights, methodological rigor, and analytical strategies; and on the other hand, to teach critical thinking and argumentation through short, but frequent, writing assignments.

FRLIT 398 Camus and His Contemporaries
FALL. 4 CREDITS. PREREQUISITE: FRENCH 221 OR PERMISSION OF INSTRUCTOR. CONDUCTED IN FRENCH. S. TARROW.

The course will examine Camus' major works of fiction together with selections from the work of such writers as J. P. Sartre, Simone de Beauvoir, André Malraux, Albert Memmi, Mohammed Dib, Assia Djebar, and others. In the context of a historical period marked by war—World War II, the Cold War, the Algerian War of Independence—we will discuss some of the debates Camus sparked among his contemporaries in France and North Africa, and examine the ways in which these debates continue to resonate among French intellectuals. Issues to be addressed will include the question of political commitment in literature; colonialism, racism, and their expression in literature; problems of identity, bilingualism, and audience.

FRLIT 399 Six French Poets
SPRING. 4 CREDITS. J. NGATE.

This introduction to modern French poetry will focus attention on six major figures: Baudelaire, Mallarmé, Verlaine, Valéry, Ponge, and Césaire. The aim of the course is to
familiarize the student with the principal texts, the major themes, and the dominant forms of the work of these six influential figures. Emphasis will be placed on the close reading and careful analysis of selected poems.

**FRLIT 405 Early Modern Paradise (also SHUM 404 and COML 424) #**
Fall. 4 credits. Conducted in English. M. Douehi.
For description, see Society for the Humanities 404.

**FRLIT 413 History of Jews in Modern France (also HIST 417 and JWST 446) #**
Spring. In English. Prerequisite: permission of instructor. V. Caron.
For description, see History 417.

**FRLIT 415 Giles Deleuze and the Philosophy of the Virtual (also SHUM 417) #**
Spring. 3 credits. Conducted in English. E. Kaufman.
For description, see Society for the Humanities 417.

**FRLIT 419-420 Special Topics In French Literature #**
419, Fall; 420, Spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff.
Guided independent study of special topics.

**FRLIT 429-430 Honors Work In French #**
429, Fall; 430, Spring. 8 credits. French is required. J. Ngaté.
Fall. 4 credits. Conducted in French. K. Long.
Spring. 4 credits. Conducted in English. K. Varghese.
For description, see FRLIT 436.

**FRLIT 435 Aime Cesaire #**
Fall. 4 credits. A reading knowledge of French is required. J. Ngaté.
A poet, a playwright, an essayist and a statesman, Aime Cesaire has been a major figure in the French-speaking world and beyond since the end of World War II. This course aims not only to analyze his work but also to explore the nature of his relationships with writers of various literary traditions.

**FRLIT 447 Medieval Literature #**
Spring. 4 credits. Prerequisite: French 221 or permission of instructor. Conducted in English. A. Colby-Hall.
This course is designed to give students facility in reading Old French and an appreciation of two major genres of medieval French literature: the epic and the theater.

**FRLIT 450 Monstrous Forms in Early Modern France (also FRLIT 650) #**
Spring. 4 credits. Conducted in French. K. Long.
In the Early Modern period, issues of gender, race, and species are all subsumed into studies of monstrosity. This course will explore the conjunction between this early "medicalization" of difference and its literary expressions, in the works of Ambroise Paré, François Rabelais, Michel de Montaigne and others. Most texts will be in French.

**FRLIT 468 Theater in Seventeenth-Century France (also FRLIT 668) #**
Spring. 4 credits. M. Greenberg.
This course will study the development and flowering of the theater in France in the seventeenth century. We will concentrate on reading the political, social and sexual implications of French Neo-Classicism as a reflection on and contestation of evolving Absolutism. This will allow us to analyze the insertion of Neo-Classical theater in its own period and to trace the influences of this theater in our contemporary subjective positionings.

**FRLIT 474 Libertines and License (also ENGL 453) #**
Spring. 4 credits. R. Parker.
For description, see English 438.

**FRLIT 482 Decadence, Degeneration, and the 19th-Century Imaginary (also COML 463) #**
Spring. 4 credits. T. Hope.
For description, see Comparative Literature 463.

**FRLIT 489 The French Lyric #**
Fall. 4 credits. Conducted in French. R. Klein.
This course will read closely a number of lyric poems that cluster around 1870, the year of the Commune. The aim will be to detect the echoes of that revolutionary upheaval, at the origin of modernity, in the formal and thematic details of poems by Mallarmé, Verlaine, Rimbaud. We will read some history of the Commune and some theory of the lyric subject, in order to try to understand, in more general terms, the forms of its evolution. But we will concentrate mostly on reading closely some great poems.

**FRLIT 607-608 Proseminar #**
607, Fall; 608, Spring. 2 credits each term.
N. Furman and staff.
Meeting every two weeks, the pro-seminar will be the place for sustained exchanges between graduate students, faculty, and visiting lecturers. Activities will include reading and discussion of seminal texts, chapters from dissertations and works in progress, articles and essays from visiting lecturers.

**FRLIT 623 Althusser and Lacan (also GERST 686, COML 686, GOVT 679) #**
Spring. 4 credits. G. Waite.
For description, see German Studies 686.

**FRLIT 639-640 Special Topics In French Literature #**
639, Fall; 640, Spring. 4 credits each term.
Staff.
Guided independent study for graduate students.

**FRLIT 649 Love and Hate in the Middle Ages (also FRLIT 349) #**
Fall. 4 credits. Prerequisite: FRLIT 221 or permission of instructor. Conducted in French. K. Long.
For description, see FRLIT 349.

**FRLIT 650 Monstrous Forms in Early Modern France (also FRLIT 450) #**
Spring. 4 credits. Conducted in French. K. Long.
For description, see FRLIT 450.

**FRLIT 668 Theater in Seventeenth-Century France (also FRLIT 468) #**
Spring. 4 credits. M. Greenberg.
For description, see FRLIT 468.

**Related courses in other departments #**
FRDML 200 Intermediate Reading and Writing I

FRDML 305 French through film

**Italian #**
M. Migiel, director of undergraduate studies.

The Major
Students who wish to major in Italian should choose a faculty member to serve as a major adviser; the general plan and the details of the student’s course of study will be worked out in consultation with the adviser. Italian majors are encouraged to take courses in related subjects such as history, art history, music, philosophy, anthropology, classics, linguistics, and other modern languages and literatures. While a major often occupies only the junior and senior years, it is wise for students to seek faculty advice about the major as early as possible.

Students who elect to major in Italian ordinarily should have completed Italian 201 by the end of their sophomore year. Exemptions can be made on the basis of an examination. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature. To acquaint themselves with the outlines of Italian literary history, and to develop some skill in literary analysis. To this end, students will be expected to complete successfully 32 credits of Italian literature courses at the 300 level or higher, with papers to be written in Italian or English. Required courses for the major are ITALL 303, 304, and a course on Dante. ITALL 402, History of the Italian Language, and 403, Linguistic Structure of Italian, may be counted toward the 32 credits required for the major (an introductory linguistics course is a prerequisite of ITALL 402 and 403).

Students majoring in Italian will also be expected to acquire competence in the handling of the language. That competence may be demonstrated by passing an oral and written examination to be arranged with the adviser.

Italian majors will also be required to complete successfully two courses in related fields (for example, Italian history, Italian art, Italian literature, literary theory).

Italian majors may study in Italy, generally during their junior year, under any of those study-abroad plans organized by American universities that allow the transfer of grades and credits.

To be eligible, students must have completed the first two years of their curriculum requirements and be in good academic standing.

**Literature #**
Most language courses and Italian linguistics courses are offered by Modern Languages and by Linguistics. Advanced language courses and all literature courses are listed below.

**ITALL 201-202 Introduction to Italian Literature #**
3 credits. Prerequisite: permission of instructor. ITALL 201 is not prerequisite to ITALL 202 or ITALL 205. Conducted in Italian. Fall, 202; spring, 201. M. Migiel and staff.
In this course, students will develop their language skills in Italian by reading, discuss-
ing, and writing about short works of fiction (twentieth-century short stories in ITALL 201; twentieth-century novels in ITALL 202).

**ITALL 409 Misogyny and Its Readers** (also ITALL 609, COM L 449/649, WOMNS 409/609)

Fall. 4 credits. M. Migiel.

Topic for fall 1998: Violence and rhetoric. This seminar will explore the following issues: how violence against women (physical, sexual, and psychological) is represented in literary, visual, and cultural narratives; how violence against women figures in the construction of gender identity; how violence gets encrypted; who speaks for a (silenced) woman; and how readers who attend carefully to literary, visual, and cultural narratives can evaluate the inscriptions of power in them. We will examine, among other things: selections from Ovid's *Metamorphoses* (especially the story of the rape of Philomele) and selections from Livy's *Early History of Rome* (the rape of Lucretia), retellings and rereadings of Ovidian myths (from Italian Renaissance lyric poets, to Shakespeare's *Titus Andronicus* and the *Rape of Lucrece* to contemporary feminist reappropriations of these stories); novellas from Boccaccio's *Decameron* (1349-51) and Marguerite de Navarre's *Heptameron* (1558); contemporary legal, historical, sociological, psychological, and linguistic studies of violence against women; Lila Rao Cavani, *The Night Porter* (*Il portiere di notte*, 1974); Dacia Maraini, *Voices* (*Voci*, 1994); the Clarence Thomas-Anita Hill Hearings (1991). The course will be conducted in English, and all texts will be available in English translation.

**ITALL 419-420 Special Topics in Italian Literature**

419, fall; 420, spring. 2-4 credits each term. Prerequisite: permission of instructor. M. Migiel.

Guided independent study of specific topics.

**ITALL 429-430 Honors in Italian Literature**

429 fall, 430, spring. 8 credits. Year-long course, R for fall semester; letter grade for spring semester. Limited to seniors. Prerequisite: permission of instructor. M. Migiel.

**ITALL 609 Misogyny and Its Readers** (also Italian 409, COML 449/649, WOMNS 409/609)

Fall. 4 credits. M. Migiel.

For description, see Italian Literature 409.

**ITALL 639-640 Special Topics in Italian Literature**

639, fall; 640, spring. 4 credits each term. M. Migiel.

---

**Romance Studies**

The Department of Romance Studies (Mitchell Greenberg, chair) offers courses in French literature, Italian literature, and Spanish literature. In addition, the department's program includes courses in French and Spanish linguistics, French linguistics, semiotics, and courses in French, Italian, and Hispanic culture. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

**Literature**

**ROMS 358 Literature and Religion:**

*Western Mysticism* (also COML 358 and RELST 358)

4 credits Spring. Conducted in English. C. Arroyo.

Analysis of some canonical texts of western mysticism towards a systematic view of their common features (a semiotics of the mystic text). Readings include: excerpts from the Bible, Plotinus, Pseudo-dionysius, Bernard of Clairvaux, Ibn Arabî, Santerecia, The Zohar, Meister Eckhart, Teresa of Avila, John of the Cross, and expressions of silence and the ineffable in our times.

**Spanish**

**The Major**

The major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skill in literary and linguistic analysis. Satisfactory completion of the major should enable students to meet language and literature requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, or to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake preprofessional training for graduate study in law or medicine. Students interested in a Spanish major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult the director of undergraduate studies in Spanish—Professor Kronik—who will admit them to the major and choose an adviser from the Spanish faculty. Spanish majors will then work out a plan of study in consultation with their advisers. Previous study and interests as well as vocational goals will be taken into account when the student's program of courses is determined.

SPANL 201 and SPAND 204 (or equivalent) are prerequisite to entering the major in Spanish. All majors will normally include the following core courses in their programs:

1) SPANL 311 and 312
2) SPANL 315, 316, and 318 (not necessarily in that order)

Spanish majors have great flexibility in devising their programs of study and areas of concentration. Some typical options of the major are:

1) Spanish literature, for which the program of study normally includes at least 20 credits of Spanish literature beyond the core courses. Literature majors are strongly encouraged to include in their programs courses in all the major periods of Hispanic literature.
2) A combination of literature and linguistics.
3) Either of the above options with a maximum of three (3) courses at the 300 level or above in other disciplines counted toward the major. Whichever option a student chooses, he or she is encouraged to enrich the major program by including a variety of courses from related fields or by combining Spanish with related fields such as history, philosophy, sociology, anthropology, art, music, Classics, English, comparative literature, and other foreign languages and literatures. The interdepartmental programs in Latin American Studies and Latino Studies sponsor relevant courses in a variety of areas.

The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

For the concentration in Spanish linguistics, see Department of Linguistics—Spanish.

**Study abroad in Spain.** Cornell, the University of Michigan, and the University of Pennsylvania cooperate in a Spanish program. Students enrolled in this program spend the first three weeks before the fall semester begins in a residential college located on the campus of the University of Madrid, where they take a course in Standard Spanish language and contemporary society and take advantage of special lectures and field trips in Madrid and Castile. This course carries three credits. In early October the program moves to Seville, where students enroll in as many regular classes at the University of Seville as their language competency and general education permit. Their academic work is supplemented by courses designed explicitly for the program by Seville faculty, as well as a seminar regularly offered by the resident director, who is chosen from the faculty of either Cornell, Michigan or Pennsylvania. The special courses normally include history of art and architecture, Spanish composition and syntax, and modern Spanish history. In Seville students live with selected families in "residencias," or in a few cases in "colegios mayores." Cornell-Michigan-Pennsylvania also maintains a center in Seville which is used by students for special seminars, tutorials, lectures, and informal gatherings.

Applicants are expected to have at least completed SPAN 204 prior to departure. Students are strongly encouraged to study abroad for the entire year rather than for one semester. Students interested in the study abroad program should consult with the Cornell Abroad office for further information.

**Honors.** Honors in Spanish may be achieved by superior students who want to undertake guided independent reading and research in an area of their choice. Students in the senior year select a member of the Spanish faculty to supervise their work and direct the writing of their honors essays (see Spanish 429-430).

**Fees.** Depending on the course, a small fee may be charged for film use or for copies of texts for course work.

**Language**

Most language courses and Spanish linguistics courses are offered by the Department of Modern Languages and the Department of Linguistics. Advanced language courses and all literature courses are listed below.

**Note.** Students placed in the 200-level courses have the option of taking language and/or literature courses; see listing under SPANL 201 for description of the literature course that may be taken concurrently with SPAN 203-204 (offered by Modern Languages).
SPANL 311 Advanced Composition and Conversation
Fall or spring. 4 credits. Prerequisite: SPANL 204 or 212 or equivalent. M. Stycos and staff.
Advanced language skills, developed through reading, grammar review, and intensive practice in speaking, writing, and translation. Analysis of present-day Spanish usage in a wide variety of oral and written texts.

SPANL 312 Advanced Composition and Conversation
Fall or spring. 4 credits. M. Stycos and staff.
Readings and class discussion will focus on the stylistic analysis of modern texts. Increased emphasis, through weekly essays, on students' development of an effective Spanish prose style.

SPANL 365 Spanish in the US (also LING 366 and LSP 366)
Spring. 4 credits. M. Suher.
For description, see Linguistics 366.

Literature

SPANL 201 Introduction to Hispanic Literature $
Fall or spring. 3 credits. Prerequisite: qualification in Spanish or permission of instructor. The course is divided into small sections and is conducted mainly in Spanish. (Fulfills both the language proficiency requirement and the humanities distribution requirement. The literature course that normally follows SPANL 201 is either 316 or 318.) J. Piedra and staff.
An intermediate course designed to improve Spanish skills through reading and discussion of contemporary literary works from Spain and Spanish America. Emphasis on the development of fluency in reading and of critical and analytical abilities. The cultural, sociological, and aesthetic implications of works by authors such as Borges, Cortázar, Fuentes, García Márquez, García Lorca, and Cela are considered.

SPANL 246 Contemporary Narratives by Latina Writers (also LSP 246)
Fall. 3 credits. L. Carrillo.
This course offers a survey of narratives by representative Latina writers of various Latino ethnic groups in the United States including Chicana, Chilena, Cuban, Dominican, and Puerto Rican. We will investigate the parallel development of a Latina perspective on personal, social, and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We will investigate these works as artistic attempts to deal with such issues as culture, language and bilingualism, family, gender, sexuality, and domesticity. We will account for regional distinctions and contributions. Readings will include works by Julia Alvarez, Gloria Anzaldúa, Elena Castro, Ana Castillo, Denise Chávez, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Nora Glickman, Nicholasa Mohr, Cherrie Moraga, Achy Obejas, Esmeralda Santiago, Ana Lydia Vega, and Helena María Viramontes.

SPANL 301 Hispanic Theater Production
Fall or spring. 1-2 credits. S-U only. Fall. A. Echevarría; spring, D. Castillo.
Students develop a specific dramatic text for practice in speaking, writing, and translation. The course will involve selection of an appropriate text, close analysis of the literary aspects of the play, and group evaluation of its representational value and effectiveness. All students will be involved in some aspect of production and will write a final paper as a course requirement. Credit will be variable according to the student's role in play production: a minimum of 50 hours of work is required for one credit; a maximum of two credits will be awarded for 100 hours or more of work.

SPANL 313 Approaches to Spanish Culture
Spring. 4 credits. Conducted in Spanish. C. Arroyo.
An examination of various aspects of the history and culture of Spain. Topics include: native and foreign interpretations of Spain; the origins of ethnic and linguistic differences; post-Civil War politics; nationalism and regionalism; contemporary Spanish society; the role of women; education; religion; literature, art and leisure activities.

SPANL 315 Renaissance Hispamianisms: Spain and the Americas #
Spring. 4 credits. Conducted in Spanish. M. A. Garces.
In Spain, the cultural revolution known as the Renaissance produced a glittering array of artistic works, which gave rise to the term "Golden Age." There was a "darker side" to the Renaissance, however, which juxtaposed the conquest of America with the establishment of the Inquisition and the expulsion of the Jews and later, of the Moriscos. The tale of these relations of exclusion and fascination, and domination and communication with the other is recapitulated by the literature of the period. Texts include Columbus, Cabeza de Vaca, Lazarillo de Tormes, the 20 de Octubre, San Juan de la Cruz, Guevara, María de Zayas, Lope de Vega, Calderón, and others.

Note: SPANL 316 and 318 can be taken in any order. Prerequisite: Spanish 201 or 4 years of high school Spanish or permission of instructor.

SPANL 316 Readings in Modern Spanish Literature
Fall or spring. 4 credits. Prerequisite: Spanish 201 or 4 years of high school Spanish or permission of instructor. Taught in Spanish. Fall: J. Kronik or J. R. Resina; spring: D. Ingenschay.
Readings and discussion of representative texts from Spain from the romantic period to the present. Bécquer, Galdós, Unamuno, García Lorca, Cela, and others.

SPANL 318 Readings in Spanish-American Literature @
Fall or spring. 4 credits. Fall: J. E. Paz-Soldán or M. Stycos; spring: J. E. Paz-Soldán, M. Stycos and staff.
Readings and discussion of representative texts of the nineteenth and twentieth centuries from Spanish America. Dario, Borges, Valenzuela, Cortázar, García Márquez, and others.

Note: The prerequisite for the following courses, unless otherwise indicated, is SPANL 315, 316, or 318 or permission of instructor.

SPANL 320 Perspectives on Latin America @
Spring. 3 credits. Conducted in English. D. Castillo.
This interdisciplinary, co-taught course will be offered every semester through the Latin American Studies Program. It is highly recommended for Latin American Studies Concentrators. Topics will vary by semester, but readings will always focus on current research in various disciplines and regions of Latin America. The range of issues addressed will include the economic, social, cultural, and political trends and transitions in the area. In the weekly meetings, instructors and guest lecturers will facilitate student discussions. Students are required to participate in all class discussions and write a research paper in their chosen focus area.

SPANL 321 The Puerto Rican Experience in the United States (also LSP 321)
Fall. 4 credits. Conducted in English. F. Acosta Belén.
An introduction to the historical and cultural experience of Puerto Rican migrants to the United States from the nineteenth century to the present. Special emphasis on migration patterns, changing demographics, national identity debates, and the cultural expressions of the Puerto Rican diaspora. Reading knowledge of Spanish is desirable.

SPANL 329 Between Fascination and Derision: The Dialectic of Catholic Religion in Spanish Drama (from Valle-Inclán to Almodóvar)
Spring. 4 credits. Conducted in Spanish. D. Ingenschay.
More clearly than any other, Spanish drama is replete with religious themes. When dramatic authors of the Franco era revolt against the patronizing influence of both Church and dictatorship, they do so with a mixture of fascination and derision (or, in Bataille's terms, of the holy and the profane), a mixture already apparent in the iconoclastic Avant-Garde of the 20s (Valle-Inclán, Lorca, Buñuel).
The course begins with a view of the religious 'dialectics' in Valle-Inclán's "Divinas palabras" and Lorca's "El pàlibico", focusing next on the religious ethics and aesthetics in the drama of the Franquist and post-Francoist era, ranging from exile and underground theater to the "crazy years" of "transición" and "movida" to the "post-movida" era of the 90s.

SPANL 332 The Modern Drama in Spanish America @
Fall. 4 credits. Conducted in Spanish. J. Kronik.
Representative plays of recent decades from several Spanish American countries, including Puerto Rican and Latin American writers, will be read closely and discussed. The tensions between vanguard experimentation and the expression of a Spanish American social identity will be studied in the light of modern currents such as the epic theater, the theater of the absurd, the theater of cruelty, and metatheater.

SPANL 330 Literature of Conquest (also SPANL 430)
Spring. 4 credits. M. A. Garcés.
This course examines the cultural and psychological impact of the "Discovery" on the literatures of the Old and the New World. In particular, we will take the Caribbean to the mestizaje of Ancient Mexico and the Andean regions of South America, we will explore the formation of an American discourse through a close reading of sixteenth- and seventeenth-century European and American texts. Reading selections may be drawn from Christopher Columbus, Pedro Mártir, Hernán Cortés, Bernal Díaz, Michel de Montaigne, Aztec and Maya Testimonies on the Conquest, Francisco de
The course may include a one credit optional study-trip to Peru, during which we will study various accounts of the traumatic encounter between Inkas and Spaniards in situ. To complement our vision of the Inka and Colonial Andean worlds, we will visit Cusco and Machu Picchu, as well as Inca and pre-Inka ruins, colonial churches and convents, museums and private collections of pre-Columbian art. Early registration for the course and study-trip recommended.

SPANL 363 The European Novel (also Comparative Literature 363)
Fall. 4 credits. C. M. Arroyo.
For description, see COM L 363.

SPANL 394 Trans-Atlantic Renaissance (also COM L 394) @ #
Spring. 4 credits. J. Piedra.
A comparative look, in English, at Renaissance masterpieces from Europe and Spanish America, according to the following themes: Mapping Strategies (Vespucci, Columbus); Epic Proportions (Camões, Silvestre de Balboa); Conciliatory Manners (Cortiglione); Spaniards, Suspicions (Nurpe, Lope, Bernardo de Mendoza); Literature (Montaigne, Torquemada); Dictatorial Blueprints (Machiaveli, Cortes); Shipwrecking States (Bernal); Cultural Imperatives (Montaigne, Inca Garcilaso); Suspicious Natures (Lope, Balboa); Conciliatory Manners (Castiglione, Machiavelli, Cortes); Shipwrecking States (Bernal); Cultural Imperatives (Montaigne, Inca Garcilaso). A study of the development of U.S. Latino literature and culture from colonial times to the present. Particular attention will be given to how gender, race, ethnicity, and class interact in the formation of individual, panethnic, and transnational Latino identities. Major writings and other forms of artistic expression by Cuban, Dominican, Mexican, and Puerto Rican authors will be discussed as well as issues of Spanish/English language use. Knowledge of Spanish required.

SPANL 498 Mallarmé in Latin America @
Fall. 4 credits. Conducted in Spanish. J. Paz-Soldán.
This course examines the literary production of the Andean region (Peru, Bolivia, and Ecuador). Taking as our point of departure the late nineteenth century, we will examine issues such as the socio-cultural heterogeneity of the region, which challenges the idea of a unified, modern nation-state; the tension of interethnic relations, and the emergence of indigenous cultural and political movements; the gendered violence of a male-dominated society, and contemporary challenges to this hegemonic structure. Although we will focus on novels, we will also see poems, essays and short stories to be included in the course. Authors to be studied include: Matto, Alcides and José María Arguedas, Icaza, Vargas Llosa, Bayly.

SPANL 419-420 Special Topics in Hispanic Literature
419. Fall; 420, spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff.
Guided independent study of specific topics. For undergraduates interested in special problems not covered in courses.

SPANL 429-430 Honors Work in Hispanic Literature
429. Fall; 430, spring. 6 credits. Year-long course. Grading by letter grades, lower grade in spring semester. Limited to seniors. Prerequisite: permission of instructor. Fall, J. Kronik; spring, D. Castillo.

SPANL 440 Medieval Spanish Literature @
Fall. 4 credits. Conducted in Spanish. C. Arroyo.
Reading from Mio Cid to Celestina. Emphasis on concepts (learned vs. popular, topos vs. personalismo, pro-anti-feminismo, courtly love) in European perspective. Cultural distance and "assimilation" through reading.

SPANL 450 Literature of Conquest (also SPANL 350) @ #
Spring. 4 credits. M. A. Garcés.
For description, see SPANL 350.

SPANL 482 U.S. Latino Culture and Literature (also LSP 482)
Fall. 4 credits. Conducted in Spanish. F. Acosta-Belén.
A study of the development of U.S. Latino literature and culture from colonial times to the present. Particular attention will be given to how gender, race, ethnicity, and class interact in the formation of individual, panethnic, and transnational Latino identities. Major writings and other forms of artistic expression by Cuban, Dominican, Mexican, and Puerto Rican authors will be discussed as well as issues of Spanish/English language use. Knowledge of Spanish required.

SPANL 498 Mallarmé in Latin America @
Fall. 4 credits. Conducted in Spanish. J. Paz-Soldán.
This course examines Latin American literature in the context of the visual and auditory culture of the second-half of the twentieth century, in which mass media such as photography and phonography and film have threatened writing’s "representational privilege" as a technology of information processing and storage. We will analyze how literature has sustained its visibility in this competitive media ecology, and how it is a wonderful tool to represent its own media multiplicity, the power of mass media fantasies to modify the individual’s subjectivity, and of the visual image to manipulate reality, the relationship between literature and popular culture and the marketplace; and the young writers’ unrelenting engagement with the new technologies of the information age. We will read authors such as Puig, Cortázar, Vargas Llosa, Cabrera Infante, Fuguet, and critics such as Sarlo, Monsivais, García Canclini, Nelly Richard, Benjamin, McAulahan, Baudrillard, Kühler.

SPANL 625 Latin American Literature/ Mass Media @
This course examines Latin American literature in the context of the visual and auditory culture of the second-half of the twentieth century, in which mass media such as photography and phonography and film have threatened writing’s "representational privilege" as a technology of information processing and storage. We will analyze how literature has sustained its visibility in this competitive media ecology, and how it is a wonderful tool to represent its own media multiplicity, the power of mass media fantasies to modify the individual’s subjectivity, and of the visual image to manipulate reality, the relationship between literature and popular culture and the marketplace; and the young writers’ unrelenting engagement with the new technologies of the information age. We will read authors such as Puig, Cortázar, Vargas Llosa, Cabrera Infante, Fuguet, and critics such as Sarlo, Monsivais, García Canclini, Nelly Richard, Benjamin, McAulahan, Baudrillard, Kühler.

SPANL 625 Latin American Literature/ Mass Media @

SPANL 639-640 Special Topics in Hispanic Literature
639. Fall; 640. spring. 2-4 credits each term. Staff.

SPANL 696 The Literary Construction of the City
Fall. 4 credits. Conducted in Spanish. J. R. Resina.
The seminar will be geared towards research and discussion around themes related to reading the city. Semiological and sociological approaches to the urban experience will be taken into consideration, but also, and fundamentally, the literary constitution of the city. A set of texts will constitute the core of the discussions, but each student will be responsible for designing a research project on a city or city aspect, and will be able to incorporate a text or texts to the common reading list. The geographical emphasis will be on Spanish and European cities, but there will be room for inclusion of study cases from other geographies in the student proposals.

See Language Courses under Modern Languages.

RUSSIAN

P. Carden, director of undergraduate studies [literature], 235 Goldwin Smith Hall, 255-8350; E. W. Browne, G. Gibian, N. Polliak, S. Senderovich, G. Shapiro

The Russian Major

Russian majors study Russian language, literature, and linguistics, emphasizing their specific interests. It is desirable, although not necessary, for prospective majors to complete Russian 121-122, 201-202, and 203-204 as freshmen and sophomores, since these courses are prerequisites to most of the junior and senior courses that count toward the major. Students may be admitted to the major upon satisfactory completion of Russian 122 or the equivalent. Students who wish to major in Russian should consult Professor Carden as soon as possible. For a major in Russian, students will be required to complete (1) 1 Russian 301-302 or 303-304 or the equivalent, and (2) 18 credits from 300- and 400-level literature and linguistics courses, of which 12 credits must be in literature in the original Russian.

Certain courses may, with the permission of the instructor, be taken for one additional hour's credit. Such courses will involve a one-hour section each week with work in the Russian language. These courses count one hour each of credit toward the 12 courses of Russian literature in the original language required for the major.

Study Abroad

Cornell is an affiliated institution with the Council on International Educational Exchange program for Russian language study at St. Petersburg State University. Cornell students also frequently attend the American Council of Teachers of Russian program in Moscow and other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from W. Browne, in the Department of Linguistics.

Honors

Students taking honors in Russian undertake individual reading and research and write an honors essay.

FEES

Depending on the course, a small fee may be charged for photocopied texts for course work.

Freshman writing seminar requirement.

The following courses will satisfy the freshman writing seminar requirement: Russian 103 and 104.
Russian and East European Studies

Major

See "Special Programs and Interdisciplinary Studies," which follows the department listings.

Russian Literature

P. Carden (director of undergraduate studies), 235 Goldwin Smith Hall, 255–8350.
G. Gibian, N. Pollak, S. Senderovich, G. Shapiro.

The Department of Russian Literature offers a variety of courses; some with readings in English translation, others in the original Russian, or both. The connection between Russian history, society, and literature is particularly close, so instruction and discussion in class often include a variety of topics, such as culture and intellectual history, as well as literature. Several courses are interdisciplinary, cosponsored with the departments of History, Economics, Government, Comparative Literature, etc. Students interested in majoring in Russian are strongly urged to take Russian 121–122 as soon as possible, preferably in their first year, or by their second at the latest. Russian 203–204, offered by the Department of Modern Languages, and Russian 201–202, offered by the Department of Russian Literature, complete basic language instruction and introduce students to literature. A further sequence of literature courses in Russian follows Russian 202.

For further information about courses and majors, see Modern Languages.

RUSSL 103 Freshman Writing Seminar: Classics of Russian Thought and Literature
Fall or spring. 3 credits. D. Anderson. Russian society has always seen its literature as having a russen important to the development of the nation. In this course we will examine Russian literature as it participates in the debate, whether Russia? We will look in particular at the conflict between the Slavophiles, those who thought Russia had its own unique destiny, and the Westernizers, those who thought Russia should look to the West for a model in its development. We will be reading such Russian authors as Turgenev, Dostoevsky, Herzen, and Solzhenitsyn in English translation. The course will examine the rhetorical means each author uses to make his argument. All reading is in English translation.

RUSSL 104 Freshman Writing Seminar: Nineteenth-Century Russian Literary Masterpieces
Fall or spring. 3 credits. Fall, N. Pollak; spring, P. Carden. This course will introduce students to a broad selection of the major short works of the Russian literary tradition. Our emphasis will be on what makes each work interesting as writing, what themes have been particularly interesting to Russians, and how we recognize the distinctive voice of each of the writers we are studying. Among the authors read are Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, and Chekhov. All reading is in English translation.

RUSSL 105 Freshman Writing Seminar: Twentieth-Century Russian Literary Masterpieces
Fall. 3 credits. Not offered 1998–99. Staff. We will read a selection of works from the major Russian literary movements of the twentieth century. The course will concentrate in part on important literary responses to the first Russian Revolution and Russian Civil War. Authors to be read include Zamyatin, Olesha, Zoshchenko and Vladimir. Readings in English translation.

RUSSL 201 Readings in Russian Literature #
Fall. 3 credits. [202 not offered spring 1999] Prerequisites: qualification in Russian. Open to freshmen, N. Pollak. These courses are designed as the initial courses students take after qualification in Russian and are conducted mainly in Russian. Considerable guidance is provided, however, and there is no presumption of fluency. The goal of the course is to introduce students to Russian literature in the original, to sample differing literary styles, and to accomplish both with minimal recourse to English class. Several short passages in Russian and English will be assigned. Readings from nineteenth- and twentieth-century masters of prose and verse such as Pushkin, Lermontov, Turgenev, Tolstoy, Chekhov, Babel, and Zoshchenko.

RUSSL 207 Themes from Russian Culture #
Spring. 3 credits. Not offered 1998–99. G. Shapiro. This course is based on lectures, discussions, and audio-visual presentations (slides, tapes, films). It includes within its scope various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought from its very beginnings through the eighteenth century. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country which plays a major role in the world today. Russian culture will be presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.

RUSSL 208 Themes from Russian Culture II
Spring. 3 credits. Not offered 1998–99. G. Shapiro. This course is based on lectures, discussions, and audiovisual presentations (slides, tapes, films). It includes various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought over the last two hundred years. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country that plays a major role in the world today. Russian culture will be presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.

RUSSL 303 Understanding Russia Today (also Govt 357)
Fall. 4 credits. Not offered 1998–99. G. Gibian and guest speakers. An interdisciplinary inquiry into Russian society and its history, present and future. An introduction for students not majoring in Russian studies, also a synthesis for those who are studying various aspects of Russia in separate disciplines. Organized into a variety of approaches to Russian language, culture, history, and literature. It aims to teach both basic information and different ways of interpreting that information. Topics will include: the land and the people; doing business in Russia; literary traditions and revolts; Russian national identity; nationalism; persistent cultural traits; religion, history; politics and government; relations with other nations, inside Russia and outside; Jews and Russians; folklore; social matters, customs, values; position of women; education; music; architecture; agriculture and industry; Russian maximalism; regionalism; the ecology, film, TV, theatre, journalism.

RUSSL 331 Introduction to Russian Poetry #
Fall. 4 credits. Prerequisites: Russian 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. S. Senderovich. A survey of Russian poetry with primary emphasis on the analysis of individual poems by major poets.

RUSSL 332 Russian Drama and Theatre (also Their 322)
Fall. 4 credits. Not offered 1998–99. N. Poliak. Selected topics. Discussion of a number of the most representative Russian plays of the nineteenth and twentieth centuries in chronological order. Introductions to the historical period, cultural atmosphere, literary trends, and crucial moments in the history of the Russian theater will be especially emphasized. Among the works we will be studying will be Gogol's Inspector General, Ostrovsky's The Storm, and Chekhov's The Cherry Orchard. All readings will be in English translation. Additional assignments in critical literature will be made for graduate students.

RUSSL 333 Twentieth-Century Russian Poetry

RUSSL 334 The Russian Short Story #
Fall. 4 credits. Prerequisites: Russian 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. N. Poliak. A survey of two centuries of Russian story telling. Emphasis on the analysis of individual stories by major writers, on narrative structure, and on related landmarks of Russian literary criticism.
Among the themes to be explored will be Rousseau’s whole of our human context is understood as a major philosophical tradition has conceived of education as encompassing the whole of our lives. What we should do or be is seen as the result of every choice we make. The whole of our human context is understood as a school in which we form ourselves. This all-encompassing vision of education has been embodied in the works of the great philosopher-fantasists who use the forms of fiction to explore the principal questions of education. In this course we will examine several key philosophical fantasies, among them Plato’s Republic, Rousseau’s Emile, and Tolstoy’s War and Peace. Our aim will be to understand how the discourse on education became a central part of our Western tradition.

RUSSL 367 The Russian Novel (also Comparative Literature 367) 
Fall. 4 credits. Also open to graduate students. Special discussion section for students who read Russian. G. Gibian. Sentimentalism, romanticism, realism, modernism. Novels and short stories by Gogol, Turgenev, Tolstoy, Dostoevsky, Chekhov, and others. Readings in English translation.

RUSSL 368 Russian Literature from 1917 to the Present 
Spring. 4 credits. Also open to graduate students. No prerequisites. There will be a special section for students who read Russian. G. Gibian. In translation. A survey of Russian literature focusing on the most important writers. Among the themes to be explored will be Russian Modernism, social command, socialist realism, the Thaw, dissident and emigre literature, post-modernism. Writers include Blok, Mayakovsky, Babel, Olesha, Platonov, Pasternak, Nabokov, Solzhenitsyn, the two Erofeevs, and contemporary women poets and short story writers.

RUSSL 369 Dostoevsky 
Fall. 4 credits. Not offered 1998-99.

RUSSL 373 Chekhov in the Context of Contemporary European Literature and Art (also Comparative Literature 373) 
Fall. 4 credits. S. Senderovich. Reading and discussion of Anton Chekhov’s short stories in the context of the European art of the short story and painting of that era. The course is designed for nonspecialists as well as literature majors. All reading is in English translation.

RUSSL 377 Baltic Literature (also German Studies 377) 
Spring. 4 credits. In English translation. J. Ezerigalis. For course description, please see German Studies 377.

RUSSL 379 The Russian Connection (also Comparative Literature 379) 
Spring. 4 credits. Not offered 1998-99. P. Carden. Our topic will be the development of a pedagogy of interconnection in European prose in the course of the 19th century, culminating in two major Russian novels: Tolstoy’s War and Peace and Dostoevsky’s The Idiot. Among other works we will read: Constant’s Adolphe, Sterndale’s Chartreuse of Parmns, and several short works relevant to the theme.

RUSSL 380 Dialogue in/as Text (also Comparative Literature 384) 
Spring. 4 credits. Not offered 1998-99. P. Carden. An examination of the principle of dialogue and dialectism as it appears in fictional discourse. Using the theories of Mikhail Bakhtin as a point of departure, we will examine the novel as a form of discourse beginning with Plato’s Phaedrus. Dostoevsky’s novels Notes from Underground, The Possessed, and The Brothers Karamazov will be discussed as dialogic, or polyphonic forms of discourse. Finally, we will discuss selected works of Gide, Sartre and Camus, who acknowledged their debt to Dostoevsky, to see if they are indeed polyphonic in [structure.]

RUSSL 385 Reading Nabokov (also Comparative Literature 385 and English 378) 
Fall. 4 credits. G. Shapiro. This course offers an exciting trip to the intricate world of Nabokovian fiction. After establishing himself in Europe as a distinguished Russian writer, Nabokov, at the outbreak of WWII, came to the United States where he reestablished himself, this time as an American writer of world renown. In our analysis of the Nabokovian artistic universe, we shall focus on his two splendid achievements as a Russian writer, The Defense (1930) and Despair (1954) (both in their English form), and then examine the two widely read novels that he wrote in Ithaca while teaching literature at Cornell—Lolita (1955) and Pnin (1957).

RUSSL 389 Contemporary Literature in Central and East Europe (also Comparative Literature 389) 
Fall. 4 credits. G. Gibian. The course this year will study developments in literature (and to some extent in other areas of culture) in Hungary, Poland, Slovakia, and the Czech Republic in the most recent periods. We shall focus on novels and short stories, but some consideration will also be given to drama and poetry. No knowledge of Eastern European languages is required. The reading will be done in English translation.

RUSSL 393 Honors Essay Tutorial 
Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year. Credit for the first semester will be awarded upon completion of second semester. For information, please see Director of Undergraduate Studies.

RUSSL 404 History and Nationality in Russia and Eastern Europe (also S Hum 404) 
Fall. 3 credits. Not offered 1998-99. G. Gibian. Ethnicity and nationality appear as the main forces behind the recent dramatic changes in Eastern Europe. The seminar addresses these issues in Russia, Czech Republic, and elsewhere. Students will develop a literary perspective and also in the context of rising ethnic and national consciousness throughout the world.

RUSSL 409 Russian Stylistics 
Spring. 4 credits. Also open to graduate students. Prerequisite: three years of Russian. S. Senderovich. A few steps beyond normative grammar. Introduction to the subtleties of idiomatic Russian on the levels of morphology, syntax, vocabulary, and phraseology. Introduction to the genres of live colloquial and written language. Development of writing skills through short assignments and their analyses. First notions of literary stylistics and their practical application.

RUSSL 425 Vladimir Nabokov vs. Jean-Paul Sartre (also COMP L 445) 
Spring. 4 credits. N. Poliak. Jean-Paul Sartre reviewed Nabokov’s Despair in 1938. Ten years later Nabokov returned the favor in his review of the English translation of Sartre’s La Nausée. The apparent tension between the two celebrated men of European letters of the twentieth century allows us to look at the works of both through the eyes of the other, to go into the problems of Existentialist philosophy, into Nabokov’s brand of it, and into responses to Sartre in Nabokov’s works. The latter gives an excellent yet unexplored approach to the poetic world of Vladimir Nabokov. Nabokov’s major response to Sartre occurred in the novel Pnin when written in Ithaca and largely about Cornell.

RUSSL 427 Russian Formalism (also Comparative Literature 427) 
Fall. 4 credits. Not offered 1998-99. N. Poliak. This is a course on Russian Formalism, a trend in literary interpretation that flourished in the 1910s and the first part of the 1920s. We will read the writings of such scholars as Tynianov, Eikhenbaum, Shklovsky, and Jakobson, as well as the works they studied. The course provides a historical examination of a school that gave rise to some of the most important movements in twentieth-century Western criticism—and in other disciplines, such as linguistics and anthropology. The course also provides both a look at classics of Russian prose and an approach to literature that has something to offer readers today. No knowledge of Russian is required.

RUSSL 430 Practice in Translation 
Spring. 4 credits. Prerequisites: proficiency in Russian or approval of instructor. Not offered 1998-99. W. Browne and S. Senderovich. A practical workshop in translation. documents, scholarly papers, literary works (prose and poetry). Translation mostly from Russian to English, partly from English to Russian. Attention to problems and development of skills.

RUSSL 431 Contemporary Russian Prose 
Spring. 4 credits. Prerequisites: Russian 301-302 or 303-304, and permission of instructor. This course may be counted towards the 12 credits of Russian literature in the original language for the Russian major. Graduate students may audit the course. Not offered 1998-99. Staff. This course is designed for graduate students with the way Russian prose has developed during the past forty years. Although the emphasis will be on comprehension of the text, we will also discuss literary structure, modern literary history, political problems, and the ways in which life in Russia is reflected in its literature. Authors to be read include Viktor Nekrassov, Yuri Kazakov, Alexander Solzhenitsyn, Varlam Shalamov, Abram Tertz (Andrei Sinyavsky), Vasily Aksenov, and Tatiana Tolstaya. This course is specifically intended for third- and fourth-year Russian majors.
The first decades of the twentieth century was a period of great literary and artistic achievements. It was marked by the breakthroughs in painting and sculpture of Malevich, Goncharova, and others. It continues with the breakthroughs in painting and sculpture of Andrei Bely, Blok, Remizov and others. It begins with the development of the avant-garde and the establishment of a compact with theater and the visual arts in which all the art forms break down the barriers to produce a new kind of art. During this period Russian artists and writers of the avant-garde continued their dominance for a time, now including the developing medium of film.

In this course we will read representative Russian texts by the major authors of the period and we will also investigate developments in the theater, the visual arts and film.

Graduate Seminars

[RUSSL 610] Graduate Seminar: Neglected Masterpieces of Short Russian Prose

[RUSSL 611] Supervised Reading and Research
Fall or spring. 2-4 credits. Prerequisite: permission of the department.

[RUSSL 617-618] Russian Stylistics
Fall. 4 credits. Not offered 1998-99.

[RUSSL 619] Seventeenth-Century Russian Literature
Fall. 4 credits. Not offered 1998-99.

[RUSSL 620] Twentieth-Century Russian Poetry
Spring. 4 credits. Open to advanced undergraduates with permission of instructor.

[RUSSL 621] Old Russian Literature

[RUSSL 622] Eighteenth-Century Literature

Baroque, Neo-Classicism, Enlightenment, Sentimentalism. Reading of representative texts of the major writers of the century: Trediakovsky, Lomonosov, Sumarokov, Novikov, Karamzin, etc. Main connections with nineteenth-century literature: roots, evolution, intertextuality.

[RUSSL 624] Russian Romanticism

A survey of concepts, themes, genres, and main individual contributions in Russian literature of the Age of Romanticism. The Age of Romanticism encompasses the first four decades of the nineteenth century.

Zhukovsky, Batiushkov, Pushkin, Baratynsky, Gogol, and Lermontov are the major representatives of this style and the most important period of Russian literature. The emphasis is on poetry, its historical and theoretical problems. It was, above all, the golden age of Russian poetry, which prepared and deeply influenced the following age of great Russian prose. Turgenev, Tolstoy, Dostoevsky, and Chekhov are full of allusions to the texts of the golden age and cannot be properly understood without it.

[RUSSL 625] Russian Realism
Fall. 4 credits. Not offered 1998-99.

A study of the development of psychological realism in Russian prose of the nineteenth century, with some attention to the poetic tradition. In addition to reading representative works, we will pay attention to the historical background of the period. We will approach the works through the critical writings of several important theorists, in particular those of Lydia Ginzburg.

[RUSSL 626] The Tradition of Russian Poetry

This course will examine a selection of poems that have been particularly important for the tradition of Russian literature in the nineteenth and twentieth centuries. Our focus will include critical and literary responses to these poems as well as close readings.

[RUSSL 627] Russian Formalism (also Comparative Literature 627)

See RussL 627 for course description.

[RUSSL 630] Gogol

Gogol's artistic career from his "Ukrainian" cycles to Dead Souls. We will examine representative works from each of the major divisions of Gogol's early work, in particular from his cycles Evenings on a Farm near Dikanka and Mirgorod, and will trace the writer's development toward his magnum opus, Dead Souls. Although some of the readings will be done in English to enable the class to cover a significant amount of material, the class work will be focused on close analysis of the Russian text.

[RUSSL 641] Bakhtin as Reader (also COMP L 641)

See COMP L 641 for course description.
[RUSSL 650 Russian Intellectual History  
S. Senderovich.  
Nineteenth- and twentieth-century selected topics. Taught mostly in English.]  

[RUSSL 669 Dostoevsky  
Fall. Also open to advanced undergraduates. Not offered 1998-99.  
G. Gibian and recent lecturers.  
Study of representative works from various periods of Dostoevsky’s life, including some articles, speeches, and parts of The Diary of a Writer against the context of nineteenth-century Western European and Russian literature. A variety of critical and scholarly approaches (from Russian Formalists to recent Western scholars) will be sampled and evaluated.]  

[RUSSL 671 Seminar in Nineteenth-Century Russian Literature  
Fall. 4 credits. Not offered 1998-99.  
P. Carden.  
Topic: War and Peace.]  

[RUSSL 672 Seminar in Twentieth-Century Russian Literature  
Fall. 4 credits. Open to advanced undergraduates. Not offered 1998-99.]  

[RUSSL 673 The Russian Nabokov  
Fall. 4 credits. Also open to advanced undergraduates. Not offered 1998-99.  
G. Shapiro.  
Vladimir Nabokov wrote much verse, several plays, numerous short stories, and nine novels in Russian before switching to English. He is a major Russian writer of the twentieth century. This seminar will examine his work in the context of modern Russian literature, concentrating in particular on the novels. Knowledge of Russian is highly desirable, but all the works discussed also exist in English translation.]  

[RUSSL 675 Russian Literature, 1917-1945  
Fall. 4 credits. Not offered 1998-99.  
This semester will focus on the achievements of Russian prose between the two World Wars. Among the authors whose works will be closely read and discussed, there are Babel, Olesha, Zoshchenko, Ilf and Petrov, Bulgakov, and Nabokov.]  

[RUSSL 676 Russian Literature, 1945-Present  
Spring. 4 credits. Not offered 1998-99.]  

[RUSSL 688 Russian Symbolism  
Fall. 4 credits. Not offered 1998-99.  
P. Carden.  
Around the trends in French culture represented by Baudelaire and Mallarmé crystallized into a new cultural movement, called in some of its aspects the Decadence and in others Symbolism. The new sentiments about the nature of art spread throughout Europe, drawing in England, the Scandinavian countries, Germany, and Russia. The first stirrings of Symbolism were in the ascendant in Russian cultural life and it remained the dominant force until 1910. Our task will be to study the phenomenon of Symbolism as it touched the arts in Russia, including not only literature, but dance, theater, and the visual arts. Because Symbolism was a movement that cut across national boundaries, we will study the seminal works of European art that created the climate in which Russian Symbolism was conceived and came to maturity.]  

[RUSSL 699 Russian Modernism  
P. Carden.  
We will be investigating the rich and innovative period of the avant-garde in Russia from 1910 to 1925. In addition to examining outstanding works in a variety of forms, we will look at the movements, social context, and ties to the European avant-garde. Among the writers whose works we will examine are Blok, Bely, Mayakovsky, Khlebnikov, Plisetskii, and Babel. We will examine theater through the Futurist performance piece, “Victory Over the Sun,” through Meyerhold’s productions of Mayakovsky’s plays and other experimental pieces, and through mass spectacles. We will discuss the film theories of Eisenstein and Dziga Vertov and see several of their films. In the visual arts we will be examining the experiments of Lutonov and Gorscharova, Malevich, Kandinsky, and Tatlin. We will also look at the photomontage of Rodchenko.]

See Language Courses under Modern Languages.

SCIENCE AND TECHNOLOGY STUDIES  

The Science & Technology Studies Major  
The major in Science & Technology Studies offers students wishing to pursue careers in law, public policy, health care, or management an opportunity to develop a full appreciation of the place of science and technology in society. The curriculum aims to further students’ understanding of the historical, social, political, and ethical aspects of science and technology and to enable students to participate effectively in policy debates and decision making in today’s world, issues at the intersection of the technical and social arise continually in professional practice, management, and research. Thus, the integrated approach of the STS major provides a strong foundation for careers in the professions, in public policy, and in management, as well as in research and teaching.

Themes of the Major  
Students in the STS major develop a program individually tailored to their particular interests. To give their coursework a coherent focus, students select a theme that draws together a group of related courses. Available themes include:

1. Science, Technology & Public Policy.  
Many of the most important policy issues of our time involve science and technology. This theme offers students an opportunity to gain a deep appreciation of the problems this situation raises in democratic societies. Through courses that survey the place of science in American politics and through courses that focus on such substantive issues as national technology policy or the politics of genetic engineering, this theme explores the tensions between expertise and democracy, the uses of scientific knowledge in making and legitimating policy, social movements that question technology and science, and contemporary debates over economics, innovation, and technology policy.

2. Technology, Culture, and Society.  
Students interested in this theme may examine the connections among technology and society by studying the manifold ways in which social groups (scientists, engineers, inventors, corporations, government agencies, and consumers) interact to construct technological artifacts and systems, and how the use of these artifacts and systems is related to social and cultural change. Areas of particular interest are computers and society, the military and technological change, gender and technology, biotechnology and society, and telecommunications.

By focusing on the relationship between scientific knowledge and political power, this theme offers unique insights into the making and implementation of environmental policy. Courses are available on such topics as American environmental politics, international environmental policy, science and the law, the history of agricultural science, and environmental communication. Students explore the causes and consequences of environmental controversies, the nature of risk and uncertainty in environmental issues, the roles of experts and the public in...
environmental decisions, and the challenges of global environmental policy.

4 History and Philosophy of Science and Technology. This theme provides students with an appreciation of science and technology in historical perspective and with an understanding of the philosophical problems posed by scientific knowledge. Courses available range from broad surveys to intensive studies of focused subjects. Students in this theme address such topics as the emergence of modern science; gender and science; the goal of achieving valid knowledge and the philosophical and institutional problems that this entails; the issues for history and philosophy of science raised by the new sociology of scientific knowledge; the relationship between knowledge, technology, and ethics; and the impact of major institutions—such as religion, medicine, the military, and the modern consumer economy—on the development of the sciences.

Beyond the four themes described above, S&TS majors may also create their own themes, carefully tailored to their particular interests. Examples might include "Computers, Innovation, and Society" or "Science, Technology, and Globalization."

Admission to the Major

Students intending to major in Science & Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes: (1) a one-page statement explaining the student's intellectual interests and why the major is consistent with the student's academic interests and goals; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling S&TS requirements; and (4) an up-to-date transcript of work completed at Cornell University (and elsewhere, if applicable).

Acceptance into the major requires completion of the following prerequisites: a) two introductory courses chosen from some combination of history, philosophy, sociology, or government; b) the science requirement of the College of Arts and Sciences; c) mathematics or computer science courses in fulfillment of the Arts College Group Two distribution requirement. Sophomores in the process of completing these prerequisites may be admitted to the major on a provisional basis. Further information and application materials are available at 275 Clark Hall (255-6047).

Requirements

S&TS majors must complete the following requirements:

1. Core courses: Science and Technology Studies majors will be required to take: (a) either S&TS 250 (Technology in Society) or S&TS 262 (Science in Western Civilization); and (b) S&TS 381 (Philosophy of Science: Knowledge and Objectivity) or S&TS 389 (Philosophy of Science: Evidence and Explanation) or S&TS 201 (What is Science? An Introduction to Social Studies of Science and Technology); and (c) S&TS 390 (Science in the American Polity: 1800-1960) or S&TS 391 (Science in the American Polity: 1960–now) or S&TS 442 (Sociology of Science).

2. Additional Science and Technology Studies Courses: Science and Technology Studies majors will be required to complete at least 21 credit hours of additional courses in Science and Technology Studies, subject to the following restrictions: (a) Breadth requirement: at least one course beyond the core courses in each of the three areas of concentration (history, philosophy, and social studies of science and technology); (b) Depth requirement: at least two courses in one area beyond the core courses and intended for advanced undergraduates or graduate students.

3. Science Requirement: in addition to the science requirement of the College of Arts and Sciences, Science and Technology Studies majors are required to take an additional two semesters of a natural science or engineering (including computer science). Mathematics sufficient to follow the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student's major adviser and should be related to the theme selected by the student.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected to do independent study and research, with faculty guidance, on issues in science and technology studies. Students who participate in the program should find the experience stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of the spring semester before their junior year. More information on the honors program is available from the S&TS undergraduate office at 275 Clark Hall (255-6047).

The Biology and Society Major

The Department of Science & Technology Studies also offers the Biology and Society major, which includes faculty from throughout the university. The Biology and Society major is ideally suited for students who wish to combine training in biology with exposure to perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing foundational training in basic biology, Biology and Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology and Society major is offered to students enrolled in the College of Arts and Sciences and the College of Human Ecology. Undergraduates in the College of Agriculture and Life Sciences can develop an approved sequence of courses to fit the Biology and Society curriculum under general studies. The major is coordinated for students in all colleges through the Biology and Society office. Students can get information, specific course requirements, and application procedures for the major from the office in 275 Clark Hall, 255-6042.

A full description of the Biology and Society major can be found in the Courses of Study section entitled Special Programs and Interdisciplinary Studies.

The Concentration in Science and Technology Studies

The concentration (or minor) in Science & Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The concentration is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from multiple disciplinary perspectives.

The S&TS concentration permits students to develop an individualized program of study closely related to their major field. For example, students might use the S&TS concentration to further explore issues related to their major, focusing on such topics as computers and society, gender and technology, science and law, biotechnology, science and politics, and environmental policy. By choosing courses in S&TS which fit their particular goals, students can tailor the concentration to provide breadth and depth in areas of special interest.

S&TS courses are organized into three areas: history, philosophy, and social studies of science and technology. To satisfy the requirements for the S&TS concentration, students must complete with letter grades a minimum of four courses selected from the course offerings listed for the major. At least one course should be chosen from the list of core courses. The remaining three courses should be chosen in consultation with an S&TS faculty adviser and must be drawn from at least two of the three areas. Interested students may obtain further information about courses by contacting the S&TS undergraduate office, 275 Clark Hall (255-6042).

Course Offerings

History

Social Studies of Science

Independent Study

History

S&TS 233 Agriculture, History, and Society: From Squanto to Biotechnology

Fall. 3 credits. M. W. Rossiter.

This course will survey the major themes in the development of agriculture and
For description, see ENGRG 250.

S&TS 281 Science in Western Civilization (also History 281) # Fall. 4 credits. Not offered 1998-99. For description, see HIST 281.

S&TS 282 Science in Western Civilization # Spring. 4 credits. For description, see HIST 282.

S&TS 287 Evolution (also History 287) Fall. 4 credits. For description, see BIO G 207.

S&TS 292 Inventing the Power and Information Societies (also Electrical Engineering 298 and Engineering 298 and History 292) Spring. 3 credits. For description, see ENGRG 298.

S&TS 355 Computers: From Babbage to Gates Fall. 4 credits. M. Price. Computers have not always been the ubiquitous beige boxes gracing our desktops in Victorian London. Charles Babbage attempted to build his analytical engine using brass gears and steel rods; and during World War II the Allied governments used sophisticated electro-mechanical and electronic "brains" to break Axis codes. Machines that once occupied entire rooms now travel in knapsacks. How did this technology, once considered esoteric and useful only to technical specialists, colonize industry, academia, the military, federal government, and the home? Using primary historical materials, including novels, films, archival documents and other texts we will follow computers from Babbage's Victorian dream of an analytical engine to the visions of contemporary moguls like Bill Gates whose goal is "information at your fingertips." We will explore not only how computer technology affects society, but how culture and politics enable and sustain the development of the machine. This is a course in the history and sociology of computers; a background in computer science is not required. (No technical knowledge of computer use is presumed or required.)

S&TS 433 International History of Science Spring. 4 credits. M. Rosser. A survey of the major scientific events and institutions in several foreign nations, including developing countries. The course covers the period 1660 to the present and gives some attention to who in each country becomes a scientist, who rises to the top, and who emigrates. Weekly readings and a research paper.

S&TS 444 Historical Issues of Gender and Science (also Women's Studies 444) Fall. 4 credits. Open to sophomores. Not offered 1998-99. M. W. Rosser. One-semester survey of women's role in science and engineering from antiquity to the 1980s, with special emphasis on the United States in the twentieth century. Readings will include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, we shall have attained a broad view of the problems that have faced women entering science and those that still remain.

S&TS 447 Seminar in the History of Biology (also Biology and Society 447, History 415, and Biological Sciences 467) Summer. 4 credits. Limited to 18 students. S-U grades optional. For description see Biology Sci (BIO G) 467.

S&TS 525 Seminar in the History of Technology (also History 525) Fall. 4 credits. R. Kline. Exploration of the history of technology in Europe and the United States from the eighteenth century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technological utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field will be considered in selecting the topics for the seminar.

S&TS 644 Topics in the History of Women in Science (also Women's Studies 644) Fall. 4 credits. M. W. Rosser. This is a one-semester graduate seminar on selected topics in the history of women and gender in science and technology, covering mostly the U.S. in the 20th century but broadly defined to include earlier periods and other countries. It seeks to acquaint advanced students with some of the best recent literature on this topic and to identify and explore possible new topics. Weekly readings and a research paper.

S&TS 680 Seminar in Historiographical Approaches to Sciences (also History 680) Fall. 4 credits. Not offered 1998-99. For description, see History 680.

S&TS 682 Topics in the Scientific Revolution (also History 682) Fall. 4 credits. Not offered 1998-99. For description, see HIST 682.

[S&TS 777 Science, Technology, and the Cold War Fall. 4 credits. Permission of instructor required for undergraduate students. Not offered 1998-99. M. Dennis. This graduate seminar will examine the historical transformation wrought in the organization and practice of the physical, biomedical, and environmental sciences since 1945. How did military and federal patronage affect the development of the sciences, the organization of the postwar university, and the armed services? Students will read contemporary historical materials and primary texts to understand the development of particular institutions, technologies, and individuals. In addition to participation in the weekly discussion, each student will prepare a research paper for presentation to the seminar.]

Philosophy

S&TS 205 Ethical Issues in Health and Medicine (also Biology and Society 205) Fall. 4 credits. For description, see B&SOC 205.

S&TS 206 Ethics and the Environment (also Biology and Society 206) Spring. 4 credits. For description, see B&SOC 206.

S&TS 286 Science and Human Nature (also Philosophy 286) Spring. 4 credits. For description, see PHIL 286.

S&TS 381 Philosophy of Science: Knowledge and Objectivity (also Philosophy 381) Fall. 4 credits. For description, see PHIL 381.

S&TS 681 Philosophy of Science (also Philosophy 681) Spring. 4 credits. For description, see PHIL 681.

Social Studies of Science

S&TS 201 What is Science? An Introduction to the Social Studies of Science and Technology Fall. 3 credits. J. Reppy. This course is not a science or engineering course. It is not an introduction to science and technology. It is a course which allows both science and non-science majors to reflect a little on the nature of science and technology as activities. How come science is so successful? Has it always been that way? How different really is science from other activities? How does a new invention come about?

In order to understand better what science is we will also look at what it is not. We will look at episodes of mainstream science, along with science from the X-Files. One week students may study what went on in the confirmation of Einstein's theory of relativity; another week we may hear about crop circles and parapsychology. Throughout, we will be looking at the infrastructure of science and technology—the bits that scientists, engineers, and their textbooks take for granted. No particular science or arts requirements are needed for this course. The materials are chosen so as to
be understandable by all. We will use a variety of media, including still images, video, and computer simulations.

S&TS 311 Sociology of Medicine
Spring. 4 credits. S. Hilgartner.

This course provides an introduction to the ways in which medical practice, biomedical technology, and the medical profession are embedded in society and shaped by social phenomena. Accountability to patients and the public, and struggles over the control of medical practice in a world where medicine is connected to gender, class, race, and personal autonomy are important overarching themes. We will examine the structure of the medical profession, medical training and professional socialization, the social organization of the hospital, and doctor-patient interactions. The course will also explore how biomedical knowledge and technology get produced, assessed, and introduced into clinical practice. Topics may include the intensive care unit, the training of surgeons, the regulation of pharmaceuticals, AIDS and breast cancer activism, genetic testing, and priority setting in biomedical science.

S&TS 324 Environment and Society
(also Rural Sociology 324 and Sociology 324)
Fall. 3 credits.
For description, see SOC 324.

S&TS 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also Government 305)
Spring. 4 credits. M. Dennis.

This course will explore the development of atomic weapons from early twentieth-century ruminations about super bombs in science fiction through the Manhattan Project, the postwar development of thermonuclear weapons and civil defense, and more recent plans for strategic defense. Our focus will expand to cover the lives of researchers at such institutions as Los Alamos during and after World War II as well as discussions of national politics. Other topics include the Nazi effort to develop an atomic bomb, the role of technical espionage during and after World War II, and the problems posed by the classification of technical knowledge. We will seek to understand how the bomb became part of American culture through the use of literature and film, as well as readings in primary historical documents and secondary analyses. In addition to class meetings, there is also a required screening session on W 7–10 p.m. in Uris media room b. Films will generally last less than two hours, but some are longer. Viewing the movies is an essential part of the course.

S&TS 352 Science Writing for the Mass Media (also Communication 352)
Fall. 3 credits. Not offered 1998-99.
For description, see COMM 352.

S&TS 360 Ethical Issues in Engineering (also Engineering 360)
Spring. 3 credits.
For description, see ENGR 360.

S&TS 390 Science in the American Polity, 1800-2000 (also Government 308)

How did America become a leading nation in scientific and technical research? This course charts the development of American science from its origins in gentlemanly societies in the early nineteenth century through the development of large-scale federally funded research or Big Science. Particular attention will be paid to the importance of government patronage in creating new social and intellectual spaces for research, the importance of medicine and the biomedical disciplines for the development of university-based research, the origins and expansion of research in corporations, and the role of war in the political economy of American science.

S&TS 391 Science in the American Polity, 1960–Now (also Government 309)
Spring. 4 credits. M. Dennis. This course reviews the changing political relations between science, technology and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for this course. Topics addressed will include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

S&TS 400 Components and Systems: Engineering in a Social Context (also Mechanical and Aerospace Engineering)
For description, see MAE 400.

S&TS 401 Biology and Society: The Social Construction of Life (also Biology and Society 301)
Fall. 4 credits.
For description, see B&SOC 301.

S&TS 406 Biotechnology and Law (also Biology and Society 406)
Fall. 4 credits. Staff.

S&TS 407 Law, Science and Public Values (also Government 407 and Biology and Society 407)
Fall. 4 credits. Not offered 1998-99.

S&TS 409 From the Phonograph to Techno (also Society for the Humanities 408)
Fall. 4 credits. Limited to 15. Permission of the instructor. T. Pinch.

In this seminar, we will treat music and sound and the ways they are produced and consumed as socio-cultural phenomena. We will be concerned to investigate specifically the way that music and sounds are related to technology and how such technologies and sounds have been shaped by and have shaped the wider society and culture of which they are a part. We will look at the history of sound technologies like the phonograph, the electronic music synthesizer, samplers, and the Sony walkman. Our perspective will be drawn from social and cultural studies of science and technology. Students will be encouraged to carry out a small original research project on their own favorite sound technology.

S&TS 427 Politics of Environmental Protection in America (also Government 427)
Fall. 4 credits. Not offered 1998-99. Staff.
An introduction to the distinctive feature of environmental protection in America, focusing particularly on the role of law, science, and citizen activism in public policymaking. Readings from law, political science, and policy analysis will examine the changing role of expert agencies, courts, public interest groups, Congress, and the states in environmental politics since the late 1960s. Case studies of specific environmental controversies (nuclear power, siting, pesticides, endangered species) will be used to explore the dominant public conceptions of risk and safety, regulatory costs and benefits, and the goals and instruments of environmental policy.

S&TS 442 The Sociology of Science
(also City and Regional Planning 442 and Biology and Society 342)
Spring. 4 credits. Staff.
A view of science less as an autonomous activity than as a social institution. We will discuss such issues as controversies in science, analysis of scientific text, gender and the social shaping of scientific knowledge.

S&TS 446 Public Communication of Science and Technology
Fall. 4 credits. Limited to 15. Prerequisite: COMM 352 or 360, ENGRG 350 or permission of instructor. Not offered 1998-99. B. Lewenstein.
For description, see COMM 466.

S&TS 467 Innovation: Theory and Policy
Fall. 4 credits. Open to upper-level undergraduates and interested graduate students. Prerequisite: Economics 102 or permission of the instructor. Not offered 1998-99. J. Reppy.

In this course we will study the innovation process (that is, the introduction of new technology into practice) through the critical analysis of selected theories of innovation and supporting empirical evidence. Economic theories will be contrasted to the insights to be found in science and technology studies. The focus will be on the context of interests and ideology in which the various theories have been framed and their differing implications for technology policy. Authors to be covered include Schumpeper, Solow, Scherer, Nelson and Winter and Bijker and Pinch.

S&TS 469 Food, Agriculture, and Society (also Biology and Society 469, and Biology General 469)
Spring. 3 credits.
For description, see BIO G 469.

S&TS 483 The Military and New Technology
Fall. 4 credits.
For description, see GOVT 483.

S&TS 490 The Integrity of Scientific Practice
Fall. 4 credits. S. Hilgartner.
Recent scandals over scientific fraud, debates about financial conflicts of interest, disputes about the use of human and animal subjects, and tensions over ownership of data have raised concern about integrity in science. In addition, changes in the American research system—from the emergence of new university-industry relationships to the growth of electronic communication—pose new questions about who owns and controls research. The course addresses practices that present problems of integrity in research (e.g., fraud, secrecy, commercialization). It also examines how scientific practices affect the structural integrity of science as an institution.
This course will cover a variety of possible approaches for science and technology studies. From another perspective, economics, as the most "scientific" of the social sciences, is itself a subject for study. Internal critiques by economists will be compared to external analyses in the science studies literature. Readings will include works on the epistemology and use of rhetoric in economics and on the "new economics of science," and examples of the use of economic analysis in the science studies literature.

[S&T S 493 Economics Meets Science Studies

This course will cover a variety of possible interactions between the disciplines of economics and science and technology studies. Economists (at least some economists) are interested in science and technology as important components in economic growth, while scholars in science studies often appeal to economic motives and institutions to explain behavior in the production of scientific and technological knowledge. We will explore ways in which economics can provide new questions and theoretical approaches for science and technology studies. We will use genetic engineering as a case to discuss some crucial issues in the relationships among science, technology, and politics: the political shaping of modern biology; the relationship between eugenics and molecular biology; the regulation of risks; the state and modern biotechnology; university-industry relationships; agriculture medicine; and biotechnology: the rise of bioethics; social movements, Green parties and technology: the socioeconomic impact of genetic engineering; the Third World and biotechnology; and the politics of the Human Genome Project. We discuss how society deals with high-impact technologies and explore the question of the adequacy of institutional and legal frameworks of contemporary "risk-society."

[S&T S 700 Special Topic 1: Science Studies and the Politics of Science
Fall. 4 credits. Prerequisites: S&T S 711 or permission of the instructor. Not offered 1998-99.]

Theoretical developments in science and technology studies have called attention to the contingent and socially embedded character of both knowledge claims and technological systems. Drawing on literature from several disciplines, this seminar explores the epistemological and political consequences of these findings for social and political studies of science. Issues and problems to be considered include trust and skepticism, political and legal agency, reflexive institutions, relativism and social action, science and norms, and the co-production of knowledge and social order.

[S&T S 700 Special Topic 2: Technology Transfer Issues
Spring. 4 credits. J. Reppy.]

The goal of this course is to develop a coherent analytical framework for analyzing technology transfer, using insights from economics, sociology and history, and to employ that framework to evaluate current policy issues. We will study the process of technology transfer in different contexts, ranging from intra-firm and intra-industry to technology transfer between civil and military sectors and between industrialized countries and LDCs. The readings will include a mix of theoretical writings and case studies.

[S&T S 711 Introduction to Science and Technology Studies (also HIST S 711)
Fall. 4 credits. P. Dear.]

This introductory course will provide students with a foundation in the field of science and technology studies. Using classic works as well as contemporary exemplars, seminar participants will chart the terrain of this new field. Topics for discussion include, but are not limited to: historiography of science and technology and their relation to social studies of science and technology; laboratory studies; intellectual properties; science and the state; the role of instruments; fieldwork; politics and technical knowledge; philosophy of science; sociological studies of science and technology; and popularization.

Independent Study

[S&T S 399 Undergraduate Independent Study
Fall or spring. 1-4 credits.]

Please apply in 275 Clark Hall.

[S&T S 699 Graduate Independent Study
Fall or spring. 2-4 credits.]

Please apply in 275 Clark Hall.

[S&T S 700 Special Topics
Spring. 3-4 credits.]

Related Courses in Other Departments

Students interested in sociology should consult the course lists of the other social sciences departments: the College of Arts and Sciences (including Anthropology, Economics, Government, and Psychology) and of these other departments: Organizational Behavior (College of Industrial and Labor Relations), Human Development and Family Studies (College of Human Ecology), and Rural Sociology (College of Agriculture and Life Sciences).
ARTS AND SCIENCES - 1998-1999

The Major
Requirements for general sociology: (1) 101 and any other 100-level or 200-level course (excluding Freshman Writing Seminar) with a 2.5 minimum grade-point average; (2) no later than the junior year, the 301 and 303 methods courses, and (3) the department at the 400 level or higher (391 is recommended); and (4) 20 additional credits in sociology, of which 6 may be taken in related departments on the approval of the student's major advisor. A list of pre-approved courses is maintained by the director of undergraduate studies, some of which are listed under "Related Courses."

Requirements for honors: Potential honor students are encouraged to begin taking the methods and statistics courses during their sophomore year and to take at least 2 credits of Sociology 491 Independent Study, during their junior year. Honors students take Sociology 495–496 during their senior year. Graduation with honors requires a cumulative average of 3.5 or higher at the end of Sociology courses and the successful completion of an oral defense of the honors thesis. Interested students should consult the director of undergraduate studies no later than the second semester of their junior year.

Supervised research. Qualified sociology majors and minors may participate with faculty members in conducting research. Such projects are usually initiated in one of two ways: the student may offer to assist the faculty member in an ongoing project, or the student may request that the faculty member supervise the execution of a project conceived by the student. In either case the student should enroll in Sociology 491. Interested students may direct inquiries to any faculty member.

Business and Organizational Studies Concentration
Sociology majors who wish to prepare for postgraduate study in professional schools (business, management, law) or graduate studies in any of the social sciences may elect to acquire a concentration in Business and Organizational Studies. This program provides Cornell students with training in organizational studies, economic sociology, and comparative societial analysis useful in a world increasingly shaped by economic and social forces of a truly global dimension. The required core courses in the concentration are: SOC 105: Introduction to Economic Sociology; SOC 215: Organizations: An Introduction, and a research-oriented honors seminar to be fulfilled as an independent study course (SOC 491) with faculty members affiliated with the concentration. Affiliated faculty include: Penny Becker, Mary C. Brinton, Shin-Kap Han, Michael M. Macy, Victor Nee, and David Strang. In addition to the required core courses, students may take five elective courses from the following list: SOC 217: Embedded Markets; SOC 220: Culture and Conflict in Organizations; SOC 311: Solidarity and Social Control; SOC 314/514: Gender and Work, and SOC 315: Business Organization for the 1990s; SOC 326: Social Policy, and SOC 370/570: Careers. Students completing the concentration receive a letter of recommendation from the Chair based on the cumulative work in the concentration. See Crystal Chapman in Uris 318 for additional information on the Business and Organizational Studies concentration.

Introductory Courses
SOC 101 Introduction to Sociology (also RS 101) Fall and spring. 3 credits. Fall. T. Hirsch, spring. P. Eberts. This course provides an introduction to theory and research in sociology. It demonstrates how the insights, theories, and methods of sociological analysis can be brought to bear on major issues of social life. A primary goal is to convey a sense of the manner in which sociologists formulate theories and how the collection and analysis of data are used to evaluate those theories. The course will provide "hands-on" experience in analyzing sociological issues. Students undertake guided research exercises that involve using computers to analyze actual data. No prior background is presumed; necessary skills are covered in class and section meetings.

SOC 102 Self and Society (also RS Soc 103) Fall. 3 credits. W. Burkard. An introduction to microsociology, focusing on social processes within small groups, including the family. Emphasis is on leadership, conformity, social influence, cooperation and competition, distributive justice, and micro analyses of interaction.

SOC 105 Introduction to Economic Sociology (also RS 105) Fall. 3 credits. W. Burkard. Modern social thought arose out of attempts to explain the relationship between economic development and the social transformations that gave rise to the contemporary world. Classical theorists such as Karl Marx and Max Weber to Karl Polanyi focused their writings on emergent capitalist economies and societies. Contemporary social theorists likewise have sought to understand the interaction between capitalism and the social forces reacting against and emerging from modern economic development. From exchange and rational choice theories to network and institutional theory, a central theme in contemporary social thought has been the relationship between the economy and society, economic action and social structure, rationality and fundamental social processes. This course provides an introduction to social thought and research seeking to understand and explain the relationship between economy and society in the modern era.

[SOC 115 Utopia in Theory and Practice] 5 credits. Not offered 1998-99. D. Strang. This course examines imaginings of the "ideal society" and efforts to realize them. We discuss the classic literary utopias, from Plato's Republic to More's Utopia to Bellamy's Looking Backward, and also the dystopias of Huxley and Orwell. We also examine social experiments like the nineteenth-century American intentional communities, various socialisms, and the design of contemporary political constitutions. Throughout, the emphasis is on theoretical questions: What leads people to conceive of particular social arrangements as ideal? How can we tell social structures that can work from those that cannot?

SOC 151 Families and the Life Course (also HDFS 151) Spring. 3 credits. E. Wethington. For description, see HDFS 151.

General Education Courses

SOC 201 Religion and Family in the U.S. (also RSOC 202 and RELST 203) Fall. 3 credits. P. Becker. This course will examine how two fundamental social institutions—religion and the family—are interlinked in American society. As recently as the 1950s, religious institutions were organized around the needs of one dominant family form, the male-breadwinner family with a stay-at-home mother. But since the 1950s, that family form is no longer statistically dominant or culturally normative. How have religious institutions adapted to new family forms? How do religious beliefs influence behavior within families, for example, the raising of children? How do religious groups foster ideals of family life or influence our beliefs about what are "good" families? How do people's family experiences and family values influence their participation in organized religion? What models of family life are religious groups organized around? We will begin to answer these questions by drawing on readings that explore the religion-family link in a variety of religious, ethnic, and social class contexts within the contemporary United States.

SOC 202 Population Dynamics (also RSOC 201) Spring. 3 credits. L. Williams. For course description, see RSOC 201.

SOC 203 Gender, Work, and Family (also Women's Studies 203) Spring. 3 credits. W. Burkard. The line that divides men and women is one of the deepest and most firmly entrenched in societies. Many people believe that gender differences are natural and thus unchangeable, but most sociologists argue these differences are created and maintained by culture and social relationships. In this course, we will explore the social construction and maintenance of gender differences and inequalities, focusing primarily on gender and family. Students of all levels (and genders) are welcome.

SOC 204 Race and Ethnic Relations Fall. 4 credits. Prerequisite: SOC 101, SOC 103, or R SOC 101. W. Burkard. This course focuses on race and ethnic relations in contemporary perspective. It examines the social and behavioral implications of attributions of race and ethnicity in small group interaction, the world of work, and the larger society. Topics: inequalities in income and employment, affirmative action, ethnic political mobilization, patterns of marriage and family formation.

SOC 206 International Development (also RSOC 205) Spring. 3 credits. P. McMichael. For course description, see RSOC 205.

SOC 209 Social Inequality (also RSOC 209) Spring. 3 credits. M. Brinton. This course examines the nature and processes of social inequality in industrial societies. The principal focus is on the contemporary United States, with some comparisons to other industrial societies with
different educational and class structures. Readings include theoretical and empirical materials on urban inequality and stratification along race, class, and gender lines. The course includes ethnographies of schools and workplaces as well as more quantitative research.

SOC 215 Organizations: An Introduction (also R SOC 290)
Fall. 3 credits. S. Han.
This is an introductory course in the study of organizations. We will start by taking a look at various examples of organizing, including a small gang in the neighborhood, General von Moltke’s Prussian army, a government agency, and an industrial corporation. These brief glimpses serve as exercises in looking behind and beyond diverse rhetoric for common patterns in organizational phenomena. We will consider these both from the inside and outside perspectives. The focus of the course is upon research scholarship, not the training of managers. Therefore critical analytical skills you will acquire are applicable to work in firms, government agencies, and nonprofit organizations.

SOC 217 Embedded Markets
This is a course designed for a wide range of students who are generally interested in organization perspectives on markets and businesses. The primary focus of the course is on modes of organizing. In particular, we will look at the ways in which economic actions are played out in social settings. Call that “embedded markets.” For example, what are the differences, if any, between the shops in the Pyramid Mall and the Commons? What kind of books do you find in small boutique bookstores vs. supermarket bookstores, or huge chains like Barnes and Noble or Borders? Basic conceptual frameworks will be provided. Yet the course will extensively use, and ask you to come up with, contemporary and local problems to illustrate the core issues.

SOC 220 Culture and Conflict in Organizations
How do the organizations we belong to shape us? What is organizational identity and how does it come about? How do cultural beliefs shape organizations? What kinds of organizing strategies strike us as legitimate and effective, and why? Organizations may be goal-directed problem-solvers, but they’re also locations for stiring and transmitting social facts, like the hierarchical relations among groups, and powerful ideas, including moral codes. Organizations may seem to evolve naturally, but are often targets of conflict and political conflicts of powerful outsiders. The first part of this course will examine theories of organizational culture and power; the second part will consist of case studies of organizations, businesses, religious denominations, little league teams, and social movement organizations.

SOC 222 Social Policy and Organization in Health, Education, and Welfare
This course explores how religion provides a basis for moral practice, political mobilization, and social identity in a modern society. The first part introduces basic issues—definitions of religion, the sociological approach to the study of religion, religion and modernity. In the main body of the course, we will read studies of specific religious groups and organizations in the contemporary United States—examining such questions as: “How does religion provide a basis for gender identity and gender norms?” “Who do religious groups and discussers contribute to public debate on issues ranging from economic justice to abortion?” “How do religious leaders mobilize citizens for social action in their communities?”

SOC 225 Latinos in the U.S. (also LSP 202 and R SOC 265)
Spring. 3 credits (4-credit option available). H. Velez.
Exploration and analysis of the Hispanic experience in the United States. An examination of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

SOC 290 Social Psychology of Interpersonal Relations
Fall. 3 credits. R. Walker.
The focus of this course is on the relationship between the individual and the social group. It will examine the way in which the individual’s behavior is shaped by, and in turn, how society influences individual behavior. Topics include formation of self, influence and conformity, and the emergence of racial and gender differences in status and power.

SOC 301 Evaluating Statistical Evidence
Fall. 3 credits. M. Clarkberg.
A first course in statistical evidence in the social sciences, with emphasis on statistical inference and multiple regression models. Theory is supplemented with numerous applications.

SOC 303 Design and Measurement (also HDFS 285)
Fall. 4 credits. Prerequisite: a course in sociology. E. Wethington.
Foundations of sociological analysis: issues arising from using humans as data sources; the quality of our primary data; methods of its collection; research designs in wide use and their limitations; pragmatic considerations in doing research on humans, organizations, communities, and nations.

SOC 309 The Sociology of Marriage (also SOC 509)
Spring. 3 credits. M. Clarkberg.
Contemporary debate on the nature of the family in the U.S. often assumes a simplistic decay of the “traditional marriage.” This course unpacks the myths and facts that undergird this model. We will overview the historical patterns of marriage in the United States, examine data on contemporary union formation and dissolution and their consequences, and explore various theoretical models of marriage and its decline.

SOC 310 Sociology of War & Peace
Fall. 3 credits. R. M. Williams, Jr.
Every human group, community, or society presents many examples of altruism, helping, cooperation, agreement, and social harmony. Each grouping or society also manifests numerous examples of competition, rivalry, opposition, disagreement, conflict, and violence. Both conflict and cooperation are permanent and common aspects of the human condition. Collective conflicts, especially wars and revolutions, are frequent and dramatic events. But “peace” and “war” are equally active social processes, not passive happenings. This course describes various commonly accepted but erroneous notions of the causes and consequences of war and deterrence. It deals with the major theories concerning the sources of war in international and intranational social systems. The last half of the course analyzes the modern techniques, and outcomes of efforts to restrict, regulate, and resolve international conflicts.

SOC 311 Solidarity and Social Control
What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How does the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We will explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communities, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.

SOC 313 Social Networks and Social Structure (also SOC 513)
A critical survey of theories and techniques of structural analysis in sociology, centering on the usefulness of social network analysis in providing integration of studies at different levels of generality. Applications in the areas of the sociology of organizations, community studies, social stratification, and dependence relations among nations. Emphasis on the mutual relevance of theories and operational research procedures.

SOC 315 Business Organization for Undergraduates
In the last two decades, American business organizations have undergone a revolution in form and process. Corporate downsizing has changed the face of American management, and altered white-collar career paths. Large
bureaucratic organizations are giving way to smaller firms that develop complex relations with each other rather than building from within. Japanese organizational styles and institutional reform strategies like Total Quality Management have become the buzzwords of the 1980s and 1990s. This course discusses the new forms of business organization (and their manifestation in other domains, such as education and healthcare) that mark a crucial shift in the world of work and the way it shapes people's lives.

SOC 322 Organizations and Social Inequalities (also ILR 325)
Fall. 3 credits. P. Tolbert.
For course description, see ILR 325.

SOC 324 Environment and Society (also ST&S 324 and RSOC 324)
Fall. 3 credits. M. Pfeffer.
For course description, see RSOC 324.

SOC 326 Social Policy (also SOC 526)
S. B. Caldwell.
The dramatic growth of the policy research sector as an institutional and intellectual force signals a changing relationship of social science to social policy in the United States. With an eye on that relationship, this course examines the development of social policy in selected areas, among them welfare, poverty, housing, crime, and health. The policy research sector itself—people, values, and institutions—is also surveyed.

SOC 340 Health, Behavior, and Health Policy
S. B. Caldwell.
This course examines the social contexts of physical and mental health, illness and medical care; its purpose is to explore the contributions of social science to health promotion and health policy. Topic areas include: social context of health, disease and illness; social organization of health services; use of health services; effectiveness of health service use, health protection and disease prevention; and national health care policies.

SOC 341 Modern Euro Society and Politics (also GOVT 341)
Fall. 3 credits. S. Tarrow.
For course description, see GOVT 341.

SOC 350 Comparative Revolutions
For description, see GOVT 350.

SOC 353 Knowledge and Society
Spring. 3 credits. C. Leuenberger.
This course will focus on the historical evolution of the sociology of knowledge as a theoretical paradigm and an empirical research field. We will examine the phenomenological origins of the sociology of knowledge and many of its central texts. We will study how these have been applied to such areas as personhood, interaction, religion, identity and the emotions. We will also consider epistemological questions that arise and will cover various theoretical and empirical approaches which have been influenced by the sociology of knowledge such as ethnomet hodology, conversation analysis and the sociology of science and technology.

SOC 354 Law and the Social Order
Spring. 4 credits. W. Burkard.
In what ways, if any, do laws and legal institutions make a difference to people who have disputes? How did lawyer-come-to-be a modern profession? How do business organizations deal with legal ambiguity in constructing symbols of compliance with laws? How do networks of interpretive communities structure the authority of law? By exploring selected topics in these, we seek to understand the distinctive contributions of sociology to the study of law and the social order.

SOC 358 Modes of Institutional Analysis (also SOC 558)
Multiple veto points and makes broad cross-class coalitions difficult to build. This course will examine the main types of institutional analysis active in contemporary social science.

SOC 370 Careers (also SOC 570)
Spring. 4 credits. S. Han.
By examining various career paths, we will consider the implications of career as a continuous process or as a sequence of positions. We will explore the differences and similarities across different career paths and lay out the patterns and structures of the career formation from a sociological point of view. We will also discuss the settings in which the career development takes place, giving some comparative attention to the ways of organizing careers in other societies.

SOC 371 Comparative Social Stratification (also RSOC 370)
Fall. 3 credits. T. Lyon.
For course description, see RSOC 370.

SOC 380 Gender, Ideology, and Culture (also WOMNS 380)
Spring. 4 credits. P. Becker.
This course will explore representations of women in popular culture, including images, narratives, and religious practices. We will examine the relationship between popular culture and ideology, and look at how women "read" popular culture. The aim of the course is to enable students to think critically and analyze the effects of ideological representations of difference on personal identity construction, status, and power relationships. Readings will cover a broad time span and a variety of intellectual approaches, including critical theory and cultural studies, and will center on the sociology of culture.

SOC 429 Culture and Agency (also SOC 529)
Spring. 3 credits. P. Becker.
This course will look at the development of sociological theory on questions of culture and agency. Starting with various reflection or materialist approaches to culture that decenter agency, we will then follow the development of theories that explicitly link culture to actors and events in an attempt to account for both social reproduction and social change. The readings will cover a broad time span and a variety of intellectual approaches, including critical theory and cultural studies, and will center on the sociology of culture.

SOC 437 Social Demography (also RSOC 437)
Fall. 3 credits. D. Guralik.
For course description, see RSOC 437.

SOC 438 Immigration and Ethnic Identity
R. G. Neel.
Immigration has been a central process in the peopling of American society. The early immigration to the United States involved primarily the migration and settlement of European national groups. Since 1965, the mix of immigration has shifted to include increasing diversity of ethnic groups, especially from Latin America and Asia. As American society moves into an era of increasing ethnic diversity, the issue of ethnic boundaries and identity become increasingly complex and problematic. This course seeks to examine the causes of international migration, the dynamics of immigrant incorporation into American society, and the making of new ethnic groups and identities.

SOC 444 Contemporary Research in Social Stratification
R. L. Berger.
Stratification and mobility as paired concepts, requiring mutual articulation. The interplay of structure (occupational groups, labor markets, organizational demographics, social classes) and process (tracking, career trajectories, socioeconomic attainment). Recently formulated log-linear models of mobility and structure provide a central focus of the course.

SOC 480/580 Identity and Interest in Collective Action
Fall. 4 credits. M. Macy.
This seminar examines the problem of collective action from alternative theoretical perspectives on centered on shared interests, the other on common identities. The former claims that groups are held together because the members are interdependent and thus benefit from cooperating in a common endeavor. Others argue that effective mobilization may depend on affective ties among participants who share a salient demarcation. We will explore this debate,
2. One of the following theatre courses:

**THETR 277** Video Production I
(offered alternate years, and summers) 3
OR

**THETR 377** Fundamentals of 16mm Filmmaking 4

3. Four courses (15-16 credits) in film offered by Theatre, Film & Dance as below, or by other departments (with consent of adviser):

**THETR 250** Fundamentals of Theatre Design/Technology 4

**THETR 280** Introduction to Acting 3

**THETR 250** Fundamentals of Design/Technology 4

**THETR 398** Directing I
(prerequisite: permission) 3

**THETR 377** Fundamentals of 16mm Design/Technology 4

**THETR 291** Video Projects
(offered alternate spring semesters) 3

**THETR 396** Directing II
(not offered 1998-99) 4

**THETR 392** Media Arts Studio II 3

**THETR 378** Soviet Film of 20s and French Film of 60s
(offered alternate spring semesters not offered 1998-99) 4

**THETR 379** Modern Documentary Film
(offered alternate spring semesters not offered 1998-99) 4

**THETR 383** Screenwriting 4

**THETR 386** Third Cinema
(not offered 1998-99) 4

**THETR 391** Media Arts Studio I 3

**THETR 392** Media Arts Studio II 3

**THETR 395** Video: Art, Theory, Politics 4

**THETR 396** German Film
(offered occasionally not offered 1998-99) 4

**THETR 413** Film and Performance
(not offered 1998-99) 4

**ASARC 435** African Cinema
(not offered 1998-99) 4

**THETR 473** Film and Spiritual Questions 4

**THETR 474** Jung, Film, and the Process of Self-Knowledge
(not offered 1998-99) 4

**THETR 475** Seminar in the Cinema I
(not offered 1998-99) 4

**THETR 476** Seminar in the Cinema II
(not offered 1998-99) 4

**THETR 477** Intermediate Film and Video Projects

**THETR 493** Advanced Film and Video Projects

**THETR 653** Myth onto Film

4. 15 credits of related coursework inside or outside of the Department of Theatre, Film & Dance (as approved by adviser). The courses chosen to fulfill this requirement should reinforce the student's particular interest in film, and will not necessarily be film courses per se. For example, a student interested in the psychology of film, or in ethnographic film, or in film vis-a-vis intellectual or social history, will be encouraged to choose "related course work" in those areas.

5. With a grade of less than C, a course cannot be used toward the concentration.

6. Course work in production cannot exceed twenty credit hours.

**Honors**

Students who have at the end of their junior year a GPA above 3.4 in their film concentration courses and an overall GPA above 3.0 may elect to work for honors in film during their senior year. They should consult their adviser on this matter during the spring of their junior year. Theses may be undertaken in film analysis, filmmaking and screenwriting.

**The Advanced Undergraduate Film Program**

The department offers advanced study in filmmaking to students who qualify on the basis of outstanding achievement in film studies and film production courses. Acceptance to the AUFP and admission to the advanced film production course (THETR 493) will be determined by a committee of film faculty in December of each year, based on applications from students who have a proposal (script or treatment) for a film or video project. Up to four of these students will also be selected to receive the Melville Shavelson Award to help fund their advanced film projects.

**Film Study Abroad**

The College of Arts and Sciences, through this department and in consort with a number of other colleges and universities, offers up to a full year of study at the Inter-University Center for Film and Critical Studies in Paris, France. The center's program is theoretical, critical, and historical. It is most useful to students pursuing a major in film studies and serves as an intensive supplement to their Cornell film courses. Fluency in French is required, and Theatre Arts 274 and 375 are prerequisites. Inquiries should be addressed to Professor Fredericksen, Cornell's liaison with the center.

**The Dance Program**

The dance program offers courses in dance technique, improvisation, composition, performance, and historical analysis of movement, and the history, theory, and criticism of dance. Technique courses include modern dance at four levels and ballet at three levels. Other dance forms, such as historical dances, Japanese Noh, Indian and Javanese, dance are offered on a rotating basis. Courses in African, jazz and ballroom dance, taken through the Physical Education program, supplement these offerings. Technique classes develop strength, flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with clarity of rhythm, body design, and expression. The more advanced courses require the ability to perform complex phrases in various styles. Students may earn up to eight academic credits (one each semester) in technique classes. Students may also satisfy the physical education requirement by taking dance technique classes in the dance program. The schedule for all dance technique classes is available in the main office of the Center for Theatre Arts. Students taking technique for academic credit must also register through their own colleges.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance classes is by audition. Students may receive one academic credit (S-U grades only) when performing in student-faculty concerts by registering for THETR 155.

**The Dance Major**

To be admitted to the major, students must have completed two technique courses in modern dance or ballet at level II or above, Theatre Arts 233 (Explorations in Movement and Performance) and Theatre Arts 210 (Beginning Dance Composition and Music Resources). It is also recommended that Theatre Arts 201 (Dance Improvisation), Theatre Arts 250 (Fundamentals of Theatre Design and Technology) and Music 105 (Introduction to Music Theory) be taken before the junior year. The following requirements are expected of the major.

**Prerequisites for the Major:**

THETR 210 Beginning Dance Composition and Music Resources

THETR 233 Explorations in Movement and Performance

Two technique courses in modern dance or ballet at level II or above

**Requirements for the Major:**

Music 105 Introduction to Music Theory (or substitute at the appropriate level) 3

ONE course in historical dance, jazz, a non-western form, folk dance, or ballroom dance 0-3

TWO semesters each of ballet and modern dance (in addition to the prerequisite) 4

THETR 155 Rehearsal and Performance 1

THETR 201 Dance Improvisation 3

THETR 250 Fundamentals of Design and Technology 4

THETR 310-311 Intermediate Dance Composition 8

THETR 312 Physical Analysis of Movement 3

THETR 314-315 Western Dance History 8

THETR 410 Advanced Dance Composition 4

THETR 418 Seminar in History of Dance (or other 400-level academic dance course) 4

THETR 491 Senior Project 4

Total 46-49

Students will be expected to perform in at least two concerts and to present at least two of their own dances, in addition to the senior project.

**Department Courses:**

See individual sections for: Freshman Writing Seminars; General Survey Courses; Theatre Studies; Acting; Directing; Playwriting; Design; Technology; Stage Management; Independent Study, Internships and Honors; Film; Dance.
**Freshman Writing Seminars**

**THETR 125 Deviance**
Fall and spring. 3 credits. R. Saunders
This class will explore the interplay among the performance of the abnormal, its audience, and society. Creative and analytical exercises will explore the social politics and functions of deviance, both conscious and involuntary. Representative texts will include the play *Ubu Ro* and the film *Trainspoting*.

**THETR 162 Beyond Bruce Lee: Martial Arts Films of Hong Kong**
Spring. 3 credits. C. Conceison.
"Kung-fu" films featuring Bruce Lee, Jackie Chan, and Jet Li will be viewed and discussed in terms of their impact domestically and internationally, and examined more deeply to explore their cultural and political significance. How do they define Chinese masculinity? How do they contribute to the effort to construct a narrative history for colonized Hong Kong? What do they reveal about Hong Kong's relationship with mainland China? We will follow these issues in light of the recent return of HK to Chinese governance.
Weekly film screenings will be required. Readings include background material in history and film theory, and both popular and scholarly articles on films and relevant issues. Papers will include the above topics, as well as a movie review and brief scene script. Films include "Dragon," "Rumble in the Bronx," "Once Upon a Time in China," "Lethal Weapon 4," and others.

**THETR 165 "A Devil's Haircut": Death, Dementia, and the Modern Drama**
Fall and spring. 3 credits. R. Bechtel
What makes death in one film or play movingly tragic and in another uproariously funny? Why is Hamlet a tragedy and *Weekend at Bernie's* a comedy? Similarly, what makes one character mad and another sane? When is behavior "normal" and when is it "abnormal"? This class will examine representations of death and dementia in a variety of contexts, focusing not only on how these effects are achieved, but how they operate either to reinforce or critique societal norms and structures of power. Some of the possible films and plays include Natural Born Killers, Death of a Salesman, and Endgame.
Writing assignments will include play analyses, film reviews, and a short dramatic scene.

**THETR 170 Truth and Meaning: How We Order Reality**
Fall and spring. 3 credits. E. Force
A crucial plot element in most narratives is "revealing the truth." What does this say about how we understand experience? How much of "the truth" must be revealed to the protagonist—or to us? What happens when someone doesn't know enough? What happens when what we find out doesn't look like truth? Beginning with *Hamlet*, which turns on the importance of knowing truth, we'll examine how truth and reality are organized. We'll continue with works that question the borders of acceptable truth, including: plays— *Waiting for Godot* and *Marisol*, a novella—*The Bridge of San Luis Rey*, and two no-person films. In writing assignments, we'll focus on treatments of truth: how it's identified, presented, supported, questioned, and used to draw conclusions.

**THETR 190 When a Girly Girl Meets a Manly Man: Gender & Tales of Love**
Fall. 3 credits. T. Rhys.
Romantic love remains one of the most persistent themes of popular entertainment. By examining selected plays and films that depict men and women in the search for love, we will explore questions of gender construction in popular culture.

**General Survey Courses**

**THETR 230 Creating Theatre**
Spring. 3 credits. Limited to 25 students.
D. Hall and faculty.
An introduction to theatrical production for the non-major. Students will develop a new critical perspective of the performing arts by examining the creation of theatre onstage and backstage through lectures, demonstrations, discussions with various faculty and staff at the Center for Theatre Arts, and by attending department productions. Some writing is required.

**THETR 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also English 301 and Music 372)**
Spring. 4 credits. Limited to 40 students.
For description, see English 301.

**THETR 430 Introduction to Theatre Management**
Fall. 4 credits. Limited to 15 students.
This class is designed to introduce students to the profession of theatre management. The class will be a project-oriented study of components of the field, such as marketing, fundraising, contracts, organizational structures, personnel management, accounting, and box office.

**Theatre Studies Courses**

**THETR 223 The Comic Theater (also Comparative Literature 223 and Classics 223)**
Spring. 3 credits. J. Rusten.
For description, see Classics 223.

**THETR 240 Introduction to World Theatre I #**
Fall. 4 credits. R. Schneider.
A survey of the roots of theatrical representation around the world from ritual practice to classical Greek and Roman theatre as well as Indian, Chinese, Japanese, African, and native performance. A charting of major developments in the theatre—playwriting, acting, staging, architecture—through the 17th century.

**THETR 241 Introduction to World Theatre II #**
Spring. 4 credits. R. Schneider.
A survey of the roots of theatrical representation around the world from ritual practice to classical Greek and Roman theatre as well as Indian, Chinese, Japanese, African, and native performance. A charting of major developments in the theatre—playwriting, acting, staging, architecture—through the 17th century.

**THETR 292 Russian Drama and Theatre (also Russian Literature 332)**
S. Senderovich.
See Russian Literature 322 for description.

**THETR 302 Medieval and Renaissance Theatre (also Comparative Literature 332 and English)**
Spring. 4 credits. Prerequisites. THETR 240 or permission of instructor. J. E. Gainor.
Besides the discussion of representative plays from these periods, this class may focus on questions such as the staging of medieval drama, the relation between the church and the community, and the ways in which historians and critics have interpreted the Renaissance, especially in light of class, race, and gender on stage as well as in the audience.

**THETR 333 European Drama 1660-1900: Moliere to Ibsen (also English 335 and Comparative Literature 336)**
Spring. 4 credits. R. Parker.
See English 335 for description.

**THETR 335 The Modern and Contemporary Theatre (also Comparative Literature 335)**
Fall. 4 credits. Prerequisites. THETR 240 or permission of instructor. R. Schneider.
A survey of the drama and its cultural contexts from the late nineteenth century to the present. This course will raise questions about modern as well as postmodern theories of performance and the role of theatre in society. It may also examine western style theatre in non-western settings.

**THETR 336 American Drama and Theatre (also English 336)**
Spring. 4 credits. Limited to 25 students.
Emphasis will be placed on the relationship among theatre, culture, and history.

**THETR 337 Contemporary American Theatre (also English 337)**
4 credits. Limited to 20 students.
A survey of American drama and theatre post-1960. Particular emphasis will be placed on plays by women and dramatists of color to explore questions of identity and theatrical responses to contemporary American culture.

**THETR 339 Theories and Techniques of 20th Century Western Theatre**
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
R. Schneider.
A look at Western performance across the 20th century emphasizing theatre theory and directing technique rather than drama. Beginning with symbolism, naturalism and the avant-garde we'll move on to explore Meyerhold, da-da, Brecht, Artaud, Happenings and performance art, Boal, theatre images, feminist theatre, multicultural theatre, theatre of AIDS, and other theatre issues and innovations. Students will engage in performance projects.

**THETR 345 The Tragic Theater (also Classics 345 and Comp. Literature 344)**
Spring. 4 credits. Limited to 40 students.
See Classics 345 for description.

**THETR 372 English Drama to 1700 (also English 372)**
Fall. 4 credits. Not offered 1998-99.
S. McMillin.
See English 372 for description.
THEATRE, FILM & DANCE 533

[THER 437A] English Drama from 1700 to the Present (also English 373)

S. McMillin.
See English 373 for description.

[THER 420] Brecht, Artaud, Mueller, Wilson (also German Studies 430 and Comparative Literature 430)

B. Dathrich.
See German Studies 430 for description.

[THER 424] Elizabethan and Jacobean Drama (also English 425)

Fall. 4 credits. Limited to 15 students.
B. Adams.
See English 425 for a complete description.

[THER 425] Introduction to Dramaturgy and Dramatic Criticism

J. E. Gainor.
What is dramaturgy? What does a dramaturg do? We will examine this position in the theatre in both historical and practical modes. The class will be primarily a practical, involving dramaturgical work on departmental productions, participation with student playwrights on new script development, and practice in the writing of dramatic criticism.

[THER 431] Theory of the Theatre and Drama (also Comparative Literature 433)

4 credits. Prerequisite: some theatre history and dramatic literature at the 300 level or permission of instructor. Not offered 1998-99.
J. E. Gainor.
A survey of dramatic theory and theories of theatrical representation from Aristotle to the present.

[THER 433] Dramaturgy: Play and Period (also English 435)

Fall. 4 credits. Not offered 1998-99.
J. E. Gainor.

[THER 435] Special Topics: The Victorian and Edwardian Theatre (also English 422)

Fall. 4 credits. Limited to 15 students. Prerequisite: permission of instructor.
J. E. Gainor.
An in-depth exploration of theatre and drama in England from the mid-nineteenth through early twentieth centuries. Topics will include melodrama, the social problem play, the popular stage, the conditions of theatrical production, and the impact of European theatre. Representative authors include Robertson, Pinero, Shaw, Wilde, Robins, Galsworthy, and St. John.

[THER 436] The Female Dramatic Tradition (also Women's Studies 433)

J. E. Gainor.
Is there a "female dramaturgy"? What is the female tradition in the theatre? The course will explore these questions through an investigation of texts by women dramatists, including Henrik Ibsen, Apha Behn, and Caryl Churchill, as well as by such critics as Sue Ellen Case and Jill Dolan.

[THER 438 East and West German Drama (also German Studies 438 and Theatre 448)

D. Bathrich.
Major historical and textual developments in German theatre from the end of World War II to the present. Leading dramatists from West and East Germany, Switzerland, and Austria (Brecht, Frisch, Durrenmatt, Weiss, Hochhuth, Muller, Braun, Kroetz, Handke, and others) will be treated in the light of the political events and aesthetic-dramaturgical traditions from which they emerge and with which they are taking issue.

[THER 439 Theatre of Commodities: Advertising, TV, and Performance (also Women's Studies 441/641)

Spring. 3 credits. R. Schneider and A. Villarejo.
This course will explore the employment of bodies and objects as representational emblems of value and desire in late capitalism. We will analyze the ways in which desire circulates through print advertising, television, and the avant-garde. We will examine socio-cultural constructions of the relationship between screen bodies and live bodies, especially as involves advertising and audience. We will explore conceptual and culturally inscribed spaces between notions of desire, fulfillment, deferral and value coding. Throughout, feminist analyses of gender construction and deployment in the realms of the market, popular culture, and "high" art will frame our inquiry. Finally we will ask questions about the problematic of interventionist tactics in art and popular culture relative to consumption and commodity aesthetics. The course will draw on Williamson, Marx, Benjamin, Freud, Irigaray, de Certeau, Bauchrillard, Dienst, Goldman, McClintock, Bordieu, Friedman, Haug, Lee, Fiske, Goffman, Lears, Murray, Taylor, and others as well as numerous print advertisements, television texts, and performance artworks.

[THER 445] Text Analysis for Production: How to Get from the Text onto the Stage

Fall. 4 credits. Prerequisite: THER 240 or THER 281 or THER 250 or THER 398, and permission of instructor. Limited to 15 students. B. Levitt.
This course examines the play as the central, essential source for production decisions made by the actor, the director, the designer and the dramaturg. Students "present" their conclusions about the performance of studied texts through project work as either an actor, director, designer or dramaturg, as well as through two to three papers.

[THER 454 American Musical Theatre (also English 470)

Spring. 4 credits. Prerequisite: ENGL 272 or THER 240 and 241 and ability to read music at the level of MUSIC 105.
S. McMillin.
See English 454 for description.

[THER 459] Contemporary British Drama (also English 459)

Fall. 4 credits. Limited to 15 students.
S. McMillin.
See English 459 for a complete description.

[THER 470] The Japanese Noh Theater and Modern Dramatists (also Asian Studies 470 and Comparative Literature 470)

Fall. 4 credits. Alternates with THER 471.
K. Brazell.
For description, see Asian Studies 470.

[THER 471] Japanese Theatre (also Asian Studies 471)

Fall. 4 credits. Not offered 1998-99.
K. Brazell.
For description, see Asian Studies 471.

[THER 600] Proseminar in Theatre Studies

Spring. 4 credits. Limited to Theatre Arts graduate students.
An introduction to the theory and methods involved in the study of the theatre. Attention will focus on pedagogy and the profession in Part I. Part II will explore current scholarly trends.

[THER 637] Seminar in Dramatic Theory (also Comparative Literature 638)

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
R. Schneider.
Topic varies each semester.

[THER 648] East and West German Drama: Post-1945 (also THER 438 and German Studies 438)

D. Bathrich.

[THER 660] Visual Ideology (also Comparative Literature 660 and German Studies 660)

G. Waite.
For description, see German Studies 660.

[THER 679] Bertolt Brecht in Context (also German Studies 679 and Comparative Literature 679)

4 credits. Requirements: seminar paper that will form the basis for an oral presentation for class discussion. Not offered 1998-99.
D. Bathrich.
See German Studies 679 for description.

[THER 703] Theorizing Film (also English 703 and French Lit 695)

Fall. 4 credits. Not offered 1998-99.
T. Murray.
See English 703 for description.

Acting

[THER 155] Rehearsal and Performance

Fall or spring. 1-2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the department's scheduled auditions. Students should add this course only after they have been assigned roles. S-U grades only.

The study, development, and performance of roles in departmental theatre or dance productions or the study and practice of directing as experienced in assisting faculty and guest directors.

THEATRE, FILM & DANCE 533
THETR 205 Rehearsal Workshop
Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production, and by permission of staff. This course will enable students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the class will depend on the needs of a particular production (history, choreography, textwork, dramaturgy, etc).

THETR 280 Introduction to Acting
Fall or spring. 3 credits. Each section is limited to 16 students. Preregistration and registration only through roster in the department office, Center for Theatre Arts Staff. An introduction to the actor's technique and performance skills, exploring the elements necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus will be on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

THETR 281 Acting I
Fall or spring. 3 credits. Each section limited to 14 students. Prerequisites: THETR 280 and audition. Registration only through roster in department office, the Center for Theatre Arts. 281 is restricted to sophomores and above. B. Levitt and S. Cole. Practical exploration of the actor's craft through improvisation and exercises in physical and psychological action. Scene study utilizing the plays of Williams, Inge, and Miller.

THETR 282 Standard American Stage Speech
Fall. 3 credits. Prerequisites: THETR 280 and permission of instructor. A. Van Dyke. An introduction to Standard American Stage Speech. We will study various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet (IPA) as a way to designate the vowel, diphthong, and consonant sounds of spoken English. The goal of this course is to learn speech for use in performing Shakespeare, Shaw, Chekov, Moliere, etc.

THETR 283 Voice and Speech for Performance
2 credits. Limited to 12 students. Primarily for department majors. Prerequisite: permission of instructor. Not offered 1988-99. Faculty registration only through department roster in the main office of the Center for Theatre Arts. Development of the speaking voice with additional emphasis on dramatic interpretation.

THETR 284 Speech and Dialects for Performance
Spring. 3 credits. Limited to 12 students. Primarily for department majors or advance undergraduate training program candidates. Prerequisites: THETR 281 and permission of instructor. A. Van Dyke. Development of speech and dialects in dramatic text.

THETR 287 Summer Acting Workshop
Summer. 3 credits. Limited to 16 students in a section. Not offered summer 1998. Levitt and staff. An introduction to the processes of acting. Practice in training techniques, rehearsal procedures, and methodology.

THETR 380 Acting II
Fall. 3 credits. Prerequisite: THETR 281 and audition. Limited to 12 students. S. Cole. A continuation of Acting I. Special consideration will be given to a physical approach to characterization utilizing the plays of Chekhov and Ibsen.

THETR 381 Acting III: Advanced Scene Study
Spring. 3 credits. Prerequisite: THETR 380 and audition. Limited to 10 students. R. Wilson. This course focuses on advanced problems in language and period style (movement, bows, curtsies, and period dances). Monologues and scenes will be drawn from these playwrights: Shakespeare and Moliere.

THETR 385 Advanced Studies in Acting Techniques
Spring. 3 credits. Prerequisites: THETR 281. Audition and permission of instructor. Limited to 10 students. Topic varies each semester. May be repeated for credit. B. Levitt. Topic for Spring 1999: this course will explore evolving and performing material from nonscripted texts. Material will be drawn from newspapers, novels, poetry, biography, auto-biography, and interviews. Examples will be drawn from monologists such as Spalding Grey; performance artists such as Karen Finlay; and writer/performers such as Anna Deavere Smith.

THETR 387 Movement for the Actor
3 credits. Prerequisites: THETR 281 and permission of instructor. Limited to 10 students. Not offered 1998-99. R. Wilson. Physical skills for the actor will be developed through work with LeCoq-based Neutral Mask corporeal mime, and physical acting techniques.

THETR 415 The History of Acting
Spring. 3 credits. Limited to 10 students. Prerequisites: THETR 380 and permission of instructor. S. Cole. A study of the art of acting in its historical and cultural context from the Greeks to the early 20th Century, with an emphasis on an analytical understanding of acting methodology in relation to social context. Lectures and film showings, with student papers and presentations required.

THETR 498 Fundamentals of Directing I
Fall. 3 credits. Limited to 10 students. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. D. Feldshuh. Focused, practical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student's awareness of why and how certain stage events communicate effectively to an audience. Each student will direct a number of exercises as well as a short scene.

THETR 499 Fundamentals of Directing II
Spring. 4 credits. Enrollment strictly limited. Prerequisites: THETR 280 and 388, and permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Recommended: THETR 250 and 281. Not offered 1998-99. D. Feldshuh. This course builds on the staging techniques learned in Fundamentals of Directing I. In this course each student will direct a series of projects and public presentations focusing on specific directorial challenges.

THETR 499 Practicum in Directing
Fall or spring. 1-4 credits. Prerequisites: THETR 240, 250, 280, 398, 498, and permission of instructor. D. Feldshuh. This course will allow the student who has completed the appropriate prerequisites the opportunity to direct a full presentation of theatre in conjunction with a faculty mentor. It may also involve an internship with a prominent director on campus or the opportunity to assistant direct a faculty or guest director.

Playwriting

THETR 348 Playwriting
Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. R. Wilson. Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals and write. The semester culminates in the completion of a twenty to thirty minute one-act play.

THETR 349 Advanced Playwriting
4 credits. Prerequisite: THETR 348 or permission of instructor. Not offered 1998-99. R. Wilson. A continuation of Theatre Arts 348, emphasizing advanced techniques and techniques in the completion of a full-length play.

THETR 497 Seminar in Playwriting
1-4 credits. Prerequisite: THETR 348 and 349 and permission of instructor. R. Wilson. This class is an extension of THETR 348 and 349. Students formulate a process for developing a full-length play, which they develop over the course of the semester. The class meetings are made up of discussions about the students' process and creative tactics, and reading of material generated by the playwrights.
Design, Technology, and Stage Management

Design

THETR 250 Fundamentals of Theatre Design and Technology
Fall and spring. 4 credits. Not open to first-term freshman. Limited to 12 students. Registration only through department roster in CTA 225. A minimum of one credit of Production Lab (THETR 151 or 251) is strongly recommended concurrently. K. Goetz, R. Archer, J. Johnson, C. Hatcher, C. Orr Brookhouse, and E. Intemann.

An introduction to design and technology in the theatre. Lectures, discussion, and project work introduce the principles of designing scenery, costumes, lighting and sound, and the technical process of realizing designs on stage. Students are required to purchase materials, which the instructors will specify (approximate cost: $40).

THETR 263 MiniCAD for the Theatre
Spring. 3 credits. Limited to 8 students. Prerequisite: permission of instructor. K. Goetz and selected theatre production faculty and staff. Students will utilize commercially available 3D modeling and rendering software to explore the process of designing scenery and lighting for the live theatre. MiniCAD, Strata StudioPro, and Photoshop will be the primary applications used. Familiarity with the Macintosh is helpful but not essential.

THETR 319 Music, Dance, and Light
Fall. 3 credits. Attendance at dance concerts and music concerts is required. E. Intemann and A. Fogelsanger, J. Morgenroth.

Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.

THETR 343 Costume History: From Fig Leaf to Vanity
Fall. 3 credits. Limited to 20 students. C. Orr Brookhouse.

Costume History will offer an overview of the history of clothing from the first signs of clothing to the early 20th century. It will investigate personal, social, religious, political, and regional reasons for why and how clothing evolved.

THETR 362 Lighting Design Studio I: Lighting in the Performing Arts
Fall. 4 credits. Prerequisite: THETR 250 or permission of instructor. Limited to 6 students. E. Intemann.

The theory and practice of lighting design as a medium for artistic expression. This course will explore the aesthetic and mechanical aspects of light and their application in the theatre. Artistic style and viewpoint will also be covered.

THETR 364 Scenic Design Studio
Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 250 and 340 or permission of instructor, K. Goetz. An exploration of the process of designing scenery for the live theatre. Projects will employ various media to explore dramatic use of architecture, the scenic space, and elements of interior design. Experience in theatre production and graphic skills is helpful but not essential. Students are required to purchase materials which the instructor will specify (approximate cost: $50.00).

THETR 366 Costume Design Studio
Spring. 3 credits. Students are required to purchase materials which the instructor will specify (approximate cost: $50.00). Limited to 10 students. J. Johnson.

Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style. May be repeated for credit.

THETR 368 Sound Design Studio
Spring. 4 credits. Limited enrollment to 6 students. Prerequisite: THETR 250 or 252 or permission of instructor. Students are required to purchase supplies (approximate cost $20.00). C. Hatcher.

The use of sound as a medium of design for the theatre: research and creation of the theatrical sound score, digital recording and basic audio engineering techniques with projects in post production studio engineering and live recording. Emphasis is on producing viable sound designs for live theatre events.

THETR 462 Lighting Design Studio II
Spring. 4 credits. Prerequisite: THETR 362 or permission of instructor. Limited to 6 students. E. Intemann.

This course concentrates on designing lighting for different genres in various venues, developing the lighting designer as a versatile artist. Personal style and artistic commitment will be stressed.

Technology

THETR 252 Technical Production Studio I
Fall. 3 credits. Limited to 6 students. D. Hall and J. Zornow.

Stage Lighting and Sound Technology: the practical aspects of lighting and sound technology including equipment setup, engineering, electrics, organization, recording techniques, and production paperwork will be explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of fifty hours for the semester.

THETR 254 Theatrical Make-up Studio
Fall. 3 credits. Students are required to purchase make-up kits which the instructor will provide (approximate cost $50.00). Limited to 12 students. Not offered 1998-99. J. Johnson.

Basic techniques of make-up for the stage including corrective, old age, and fantasy; use of prosthetics, wigs, hair and hairpieces.

THETR 256 Technical Production Studio II
Spring. 3 credits. Limited to 6 students. Prerequisite: THETR 250 or permission of instructor. Additional hands-on time in prop and paint shops required, to be discussed.

THETR 340 Theatrical Drafting and Technical Drawing Studio
Fall. 3 credits. Limited to 6 students. Prerequisite: THETR 250 or permission of instructor. E. Intemann.

Focus will be on the specialized entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

THETR 352 Themed Entertainment: The Technical Perspective
Fall. 3 credits. Limited to 12 students. R. Archer.

Exploration into the integration of art and science in today’s theme parks and interactive entertainment attractions. Papers, projects, and discussions will deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation.

THETR 354 Stagecraft Studio
Fall. 3 credits. A minimum of one credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. R. Archer.

An exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

THETR 356 Costume Construction Studio
Spring. 3 credits. A minimum of one credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. Lab fee of $25 to be paid in class. C. Orr Brookhouse.

A project lecture/discussion class in costume research, patterning, cutting, construction, and fitting.
The course will provide further experiences in the area of costume construction, particularly in the specialized area of patterning. Students will learn to make patterns by the method of draping on the form and will conclude the class by building a complete costume (from inside out) using that method of patterning.

Stage Management

THETR 153 Stage Management Production Laboratory I
Fall and spring. 1-2 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium Theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a dance theatre concert or as a stage manager for readings, Black Box lab productions, or S.L.T.C. under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 253 Stage Management Laboratory II
Fall and spring. 1-4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 254 Stage Management Laboratory III
Fall and spring. 1-4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 370 Stage Management Studio
Fall. 2 credits. Prerequisite: THETR 250 or 280. P. Lillard.

Introduction to the concepts and techniques of stage management as they relate to specific areas of production. Development of relevant communication skills and an understanding of the production process as experienced by a working stage manager or assistant stage manager. THETR 153, 253, and 353 complement this course.

THETR 453 Stage Management Laboratory IV
Fall and spring. 1-5 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.

Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager.

THETR 356 Costume Draping Studio
Fall. 3 credits. Prerequisite: THETR 356 or permission of instructor. J. Johnson.

The course will provide further experiences in the area of costume construction, particularly in the specialized area of patterning. Students will learn to make patterns by the method of draping on the form and will conclude the class by building a complete costume (from inside out) using that method of patterning.

THETR 153 Stage Management Production Laboratory I
Fall and spring. 1-2 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium Theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a dance theatre concert or as a stage manager for readings, Black Box lab productions, or S.L.T.C. under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 253 Stage Management Laboratory II
Fall and spring. 1-4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 254 Stage Management Laboratory III
Fall and spring. 1-4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard.

Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

THETR 370 Stage Management Studio
Fall. 2 credits. Prerequisite: THETR 250 or 280. P. Lillard.

Introduction to the concepts and techniques of stage management as they relate to specific areas of production. Development of relevant communication skills and an understanding of the production process as experienced by a working stage manager or assistant stage manager. THETR 153, 253, and 353 complement this course.

THETR 453 Stage Management Laboratory IV
Fall and spring. 1-5 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.

Practical experience in theatrical production as stage manager for a season production under the supervision of the faculty production manager.

THETR 151 Production Laboratory I
Fall and spring. 1-3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre. P. Lillard, S. Brookhouse, N. Cross, M. Meltz, J. Zomow, C. Orr Brookhouse.

This course provides practical experiences in theatrical production. Students can work on scenery, costumes, properties, lighting, or stage crew. No prerequisites or experience required.

THETR 251 Production Laboratory II
Fall and spring. 1-3 credits. Prerequisite: permission of instructor. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre. P. Lillard, S. Brookhouse, D. Hall, C. Hatcher, C. Orr Brookhouse, J. Zomow.

Practical experience in theatrical production, as a light board operator, sound board operator, sound technician, head dresser or scenery/props special project.

THETR 351 Production Laboratory III
Fall and spring. 1-3 credits. May be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Intemann, J. Zomow, C. Hatcher, J. Johnson, C. Orr Brookhouse.

Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager or assistant to a faculty or guest director or designer.

THETR 451 Production Laboratory IV
Fall and spring. 1-4 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, C. Hatcher, J. Johnson, E. Intemann, C. Orr Brookhouse.

Practical experience in theatrical production, in the position of designer, shop manager, technical director or sound engineer.

Independent Study, Internships and Honors

THETR 300 Independent Study
Summer, fall, or spring. 1-4 credits. Independent Study in the Theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 CTA.

THETR 403 Undergraduate Internship
Fall, spring, or summer. 1-3 credits. To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice prior to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the intern-ship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

THETR 495 Honors Research Tutorial
Fall or spring. 2-8 credits. Limited to Theatre Arts seniors only.

This course is the first of a two-semester sequence (the second is THETR 496). Up to eight credit hours and one grade will be given upon completion of the second semester. The Theatre Arts honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be a part of the honors program the student must maintain an average of 3.5 in departmental courses and an average of 3.0 in all courses. Students should consult with their advisers in their junior year if deciding to do honors. Admissions to honors is at the discretion of the departmental committee.

THETR 496 Honors Thesis Project
Fall or spring. 2-8 credits. Limited to Theatre Arts seniors only.

This course is the second of a two-semester sequence (the first is THETR 495). Up to eight credit hours and one grade will be given upon completion of the second semester. See THETR 495 for further information.

Film

THETR 274 Introduction to Film Analysis: Meaning and Value
Spring. 4 credits. Limited to thirty-five students. Note: this course is normally given in the fall; offered spring 1999, it will be offered next in fall 1999. D. Fredericksen.

An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Prospective film majors should enroll in their sophomore year.

THETR 275 Introduction to Film Theory
Spring. 4 credits. No prerequisites, strongly recommended for film majors. A. Villarejo.

This course provides an introduction to critical and theoretical approaches to film over the past century. It surveys questions of form, genre, aesthetics, narrative, spectatorship, industry, authorship, and apparatus through readings and weekly screenings of films key to these theoretical and critical formulations. The second half of the course will be devoted to the major theoretical trajectories of the past few decades in the humanities more generally and in their specific relations to cinema: structuralism and semiotics, Marxism, psychoanalysis, feminist theory, poststructuralism, postcolonial theory and queer theory.

THETR 277 Video Production I
Spring. alternate years and occasionally in summer. 3 credits. Limited to 12 students. Permission of instructor. Open to sophomores, juniors, and seniors. M. Rivlin.

A hands-on, beginning video production course using Super-VHS cameras and editing equipment. Students will learn camera lighting, sound recording, editing and digital
effects through a series of technical exercises. Students will develop two short, original video projects to be shown publicly at the end of the semester. A $100 equipment maintenance fee per student will be collected in class. Cost for videocassette approximately $50–100.

**THETR 291 Filming Other Cultures** *(also Thetr 691 and Anthropology 291/691)*
Spring. 4 credits. Limited to 20 students, with preference given to those who have taken either Anthropology 102 or Theatre Arts 274. Fee for screening and maintenance, $35. R. Ascher.

THETR 291 meets simultaneously with THETR 691 (ARCH 291/691). For topics and issues addressed, please see the description under Anthropology 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog's Where the Green Ants Dream, and, in consultation with the instructor, review films related to their special interests and major field of study.

**THETR 313 Japanese and Asian Film** *(also Asian Studies 313 and Comparative Literature 313)*

For description, see Asian 313.

**THETR 329 Political Theory and Cinema** *(also German Studies 330, Comparative Literature 330 and Government 370)*

For description, see German Studies 330.

**THETR 376 History and Theory of the Commercial Narrative Film**
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Offered alternate years. Prerequisite for film majors THETR 274. A. Villarreal.

Consideration of the broad patterns of narration in the history of the commercial narrative film. Emphases placed upon the early art of cinema, the means of narration, realism as an artistic style, the nature and functions of popular film, and the modes of modernist and post-modernist "art cinema" narration.

**THETR 376 History and Theory of Documentary and Experimental Film**
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 274. A. Villarreal.

A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film and video. Group projects and discussions will also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, including virtual and performative events.

**THETR 379 Modern Documentary Film**
Spring. 4 credits. Prerequisite: THETR 376 is strongly recommended but not required. Fee for screening expenses, $10 (this fee is paid in class). Offered alternate years, next offered spring 2000. D. Fredericksen.

An intensive consideration of canonical documentary films from 1945 to the present. Emphases upon the documentary film as an artistic form with a distinct history and set of theoretical questions, as a sociopolitical force, as an ethnographic medium within and without a filmmaker's culture, and as a televised medium of persuasion and expression.

**THETR 383 Screenwriting**
Spring. 3 credits. Prerequisites: THETR 274 and 377, and permission of instructor. Limited to 12 students. R. Wilson.

Exercises in various genres of screenwriting will be explored: the commercial narrative, documentary, experimental, and abstract. This class will culminate in the writing of a finished script for a ten to fifteen-minute film. Note: this class is an intensive writing experience that will demand a great deal of outside work.

**THETR 386 Third Cinema**
Spring. 4 credits. Prerequisite: previous course in film history or analysis helpful, though not mandatory. Not offered 1998–99. A. Villarreal.

This course explores postcolonial film and video through the rubric of "third cinema." We will investigate the diverse historical, national, political and generic commitments of films from Africa, South Asia, Latin America, the US and UK (Sembene, Ray, Brocka, etc.). Readings in film and postcolonial theory will guide our critical analyses of the films.

**THETR 391 Media Arts Studio I** *(also ART 391, ARCH 391, MUSIC 391)*
Fall. 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum THETR 377 or 277, or dance studio course, $500 (to be paid in class). Participation faculty include: M. Rivchin and B. Suber, THETR; S. Taft and S. Bowman, ART; K. Hubbell, J. Zissovice and G. Wilcox, ARCH; D. Borden, MUSIC.

A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film and video. Group projects and discussions will also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, including virtual and performative events.

**THETR 392 Media Arts Studio II** *(also ART 392, ARCH 392, MUSIC 392)*
Spring. 3 credits. Preference given to those who completed Media Arts Studio I. See THETR 391 for prerequisites. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin and B. Suber, THETR; S. Taft and S. Bowman, ART; K. Hubbell, J. Zissovice and G. Wilcox, ARCH; D. Borden, MUSIC.

A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film and video. Group projects and discussions will also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, including virtual and performative events.

**THETR 395 Video: Art, Theory, Politics** *(also English 490)*
Fall. 4 credits. T. Murray.

For description, see English 395.

**THETR 396 German Film** *(also Comparative Literature 396 and German Studies 396)*
Spring. 4 credits. Requirements: participation in class discussion, one paper, midterm, and final. Not offered 1998–99. D. Bat ENick. This course will explore German film from the Weimar and Nazi periods to the present in relation to the cultural and sociopolitical context of which it was a part. Readings and lectures will be devoted to formal and cultural developments historically as well as interpretative analysis of selected individual films.

**THETR 413 Film and Performance**
Spring. 3 credits. Prerequisite: at least one production course in 16mm film or video, and or at least one 300-level course in acting or directing. Permission of the instructors. Limited to 12 students. $50 maintenance fee to be collected in class. Not offered 1998–99. M. Rivchin and faculty.

**THETR 473 Film and Spiritual Questions** *(also Religious Studies 473 and College Scholar Seminar)*
Spring. 4 credits. Limited to 20 students. Offered alternate spring semesters; next offered spring 1999. D. Fredericksen.

The use of film as a medium for the expression of spiritual questions has a long and rich history, although little attention is given to this fact in contemporary film studies. This seminar will examine films and writings by filmmakers who are so inclined. Special attention will be given to the work of Andrej Tarkovsky, the Russian film director and theorist.

**THETR 474 Jung, Film, and the Process of Self-knowledge** *(also College Scholar Seminar)*
"Know thyself" is one of the oldest and most enduring imperatives of the human spirit, and a *raison d'être* for liberal studies. This seminar will trace the Jungian approach to this imperative and test its critical capacities with respect to films by Fellini (*8 1/2*), Bergman (*Persona*), and Roeg (*Walkabout*).

**[THETR 475 Seminar in the Cinema I]**

Fall. 4 credits. Limited to 20 students. Offered alternate years. Prerequisite: some analytic studies in film analysis. Not offered fall 1998; next offered fall 1999. D. Frederickson.

Topic for fall 1999: the films of Ingmar Bergman. An intensive consideration of Bergman's corpus, with emphasis upon the films of the middle and end of his career. As well, close attention will be given to the nature of the critical act and its relationship to biography, film history, and film theory.

**[THETR 476 Seminar in the Cinema II]**

**[THETR 477 Intermediate Film and Video Projects]**

Fall. 4 credits. Limited to 8 students. Prerequisite: THETR 277 or 277 as minimum; preference given to those who have taken THETR 383 (screenwriting), 396 (directing), or 413 (acting and directing for the camera), and permission of instructor. Equipment fee: $100 to be collected in class. Film projects costs: $300-1000; video $50-150. M. Rivchin.

16mm filmmaking and video skills course designed to increase the student’s knowledge and practice of cinematography, lighting, sync-sound filmmaking, and editing techniques; working with labs and sound houses; S-VHS and digital video camera; and both analog and non-linear (AVID) editing. Each student will write, direct, shoot and edit their own original short, sync-sound scene and one experimental project.

**[THETR 483 Advanced Film and Video Projects]**

Spring. 4 credits. Limited to 4-6 students, those selected to the Advanced Undergraduate Filmmaking Program by application in December. Prerequisite: THETR 277 or 277, and 477; recommended: 383 (screenwriting) and 398 (Directing 1). Equipment fee: $100. Project costs: $500-2000. M. Rivchin.

This is a third-level film production course for those students who have already written and proposed a dramatic narrative script, a documentary treatment, or an experimental or animation storyboard. Working in two production crews rotating as directors, cinematographers, and sound recordists; students may shoot in sync-sound, film, or video. Students will edit the films they write and direct, and will be individually responsible for editing and all completion costs of their projects, which will be screened publicly at the end of the semester.

**[THETR 653 Myth onto Film]**

**[THETR 674 Introduction to Film Analysis: Meaning and Value]**

Spring. 4 credits. Limited to 10 graduate students. D. Frederickson.

An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Graduate students who aspire to teach film at the undergraduate level are especially welcome. In addition to full participation in the work of THETR 274, graduate students will read and discuss Bordwell’s *Making Meaning: Inference and Rhetoric in the Interpretation of Cinema*.

**[THETR 699]**

Spring. 4 credits. Fee for film screening and maintenance. $35. R. Ascher. THETR 691 meets simultaneously with THETR 291/ANTRO 291/691. For topics and issues addressed, please see the description under Anthropology 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog’s *Where the Green Ants Dream*, and, in consultation with the instructor, review films related to their special interests and major field of study.

**[THETR 699 German Film Theory (also German Studies 699 and Comparative Literature 699)]**

This course examines critically major German film theories from the Weimar period to the present. Works by Balazs, Arnheim, Kracauer, Benjamin, Adorno, Horkheimer, Kluge, Syberberg, Koch, Elsaesser, and others will be discussed in relation to the context in which they emerge as well as current debates in film theory.

**Dance**

Classes in Ballet (THETR 123, 231, 304), Modern Dance (THETR 124, 232, 306, 308), Explorations (THETR 233), and the movement sections of Indian Dance (THETR 307, 317) are co-listed in the Department of Physical Education (PE) and the Department of Theatre, Film & Dance (THETR). Students may register for these classes either through PE in order to satisfy the university’s physical education requirement or through THETR for 0 or 1 academic credit, with a limit of 1 credit per semester and 8 credits total. Students may not get THETR and PE credit simultaneously for the same course.

**Technique**

These courses may be used to fulfill the technique class corequisite for THETR 201, 210, 310, 410, 411.

**[THETR 123 Ballet I (also Physical Education 423)]**

Fall. 0 or 1 credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.

**[THETR 124 Modern Dance I (also Physical Education 424)]**

Fall and spring. 0 or 1 credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Kovar and J. Morgenroth. Spring: J. Chu and J. Morgenroth.

The fundamentals of modern dance technique. Elementary dance movement phrases, with attention to rhythm, placement, and vitality of performance.

**[THETR 231 Ballet II (also Physical Education 431)]**

Fall and spring. 0 or 1 credit. Prerequisite: permission of instructor. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Chu. Spring: J. Morgenroth.

An intermediate ballet class with intermediate work in the areas of port de bras, adage and petite and grande allegro.

**[THETR 232 Modern Dance II (also Physical Education 432)]**

Fall and spring. 0 or 1 credit. Prerequisite: Modern Dance I or permission of instructor. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.

A continuation of Modern Dance I, for students with at least a year of dance training. Practice of longer dance phrases, with attention to clarity of design, rhythm, and expression.

**[THETR 304 Ballet III (also Physical Education 434)]**

Spring. 0 or 1 credit. Prerequisite: permission of instructor. May be repeated for credit. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.

Study and practice of classical ballet at an advanced level. Work is done on strengthening the body through harmonic muscular control combining Russian, Danish and American techniques.

**[THETR 306 Modern Dance III (also Physical Education 436)]**

Fall and spring. 0 or 1 credit. May be repeated for credit. Prerequisite: Modern Dance II or permission of instructor. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.

Advanced work with rhythm, placement, and phrasing for students who are prepared to refine technical skills of dancing. Students will be physically and mentally challenged by lengthy, complex phrases and will be expected to bring the instructor's material to life.

**[THETR 308 Modern Dance IV (also Physical Education 438)]**

Fall and spring. 0 or 1 credit. May be repeated for credit. Prerequisite: Modern Dance III or permission of instructor. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. Fall: J. Self. Spring: J. Chu.

A continuation of, and supplement to, THETR 306.
Composition, Improvisation, and Performance

THETR 155 Rehearsal and Performance
Fall and/or spring. 1-2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which the credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the dance program's auditions. Students may add this course only after they have been assigned roles. S-U grades only.

The study, development, and performance of roles in departmental dance productions.

THETR 201 Dance Improvisation
Fall. 3 credits. Limited to 12 students. Concurrent enrollment in a dance technique class at the appropriate level is required. Attendance at dance concerts is required. J. Self. When the body knows when, where, and how to move without prior direction, we call that improvisation. This course offers the possibility of "training" one's movement in instincts to respond with lightness, humor, grace, and spontaneity. Solo and group forms are covered. Includes some dance history.

THETR 210 Beginning Dance Composition
Fall and spring. 3 credits. Concurrent enrollment in THETR 212 and a dance technique class at the appropriate level is required. Attendance at dance concerts is required. J. Chu. Problems are defined and explored through class improvisations. Informal showing at end of semester.

THETR 211 Dance Movement Workshop
Summer. 3 credits. Limited to 15 students. For students with varied levels of training, including those with no experience. Not offered summer 1998. J. Kovar. Students explore new ways of moving and creating dances and prepare short studies each week based on material covered in class. Modern dance technique, improvisation, and composition are covered. Students observe and discuss the main concerns of contemporary performance from the artist's/performer's perspective. Viewings of films, videotapes, and live performances.

THETR 212 Music Resources for Dance Composition
Fall and spring. 1 credit. MUSIC 105 is recommended as a prerequisite but not required. Students may register in successive semesters, for a maximum of 4 credits. Attendance at dance concerts and music concerts is required.

A. Fogelsanger. Intended to expand choreographers' music vocabulary and skills through a survey of contemporary music for dance, the study of music and dance collaborations, and rhythm studies. Includes discussing and writing about concerts, recordings, and videotapes. May include rehearsing and performing music or dance. Syllabus varies depending on the students' experience.

THETR 223 Explorations in Movement and Performance (also Physical Education 440)
Fall. 0 or 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self. A physically demanding exploration into various movement realms. Specific subjects covered are gendered movement, erotic power, spiritual power, ritual and performance. Techniques include extensive use of breath, animal movement, improvisation, and group games. This course requires an eagerness to investigate the nature of movement and explore unfamiliar territory in movement.

THETR 310 Intermediate Dance Composition I
Fall and spring. 3 credits. Prerequisite: THETR 210. Concurrent enrollment in THETR 212 and a technique class at the appropriate level is required. Fall: J. Self. Spring: J. Chu. Intermediate choreographic projects will be critiqued in progress by faculty and peers. Consideration of design problems in costuming and lighting.

THETR 311 Intermediate Dance Composition II
Fall and spring. 3 credits. Prerequisite: THETR 310. Attendance at dance concerts is required. Concurrent enrollment in THETR 212 and a dance technique class at the appropriate level is required. Fall: J. Self. Spring: J. Chu. A continuation of THETR 310.

THETR 410 Advanced Dance Composition I
Fall and spring. 3 credits. Prerequisite: THETR 311. Concurrent enrollment in THETR 212 and in a technique class at the appropriate level. Attendance at dance concerts is required. Fall: J. Self. Spring: J. Chu. Students work on advanced choreographic problems, to be presented in performances. Work in progress will be critiqued by faculty on a regular basis.

THETR 411 Advanced Dance Composition II
Fall and spring. 3 credits. Prerequisite: THETR 410. Concurrent enrollment in THETR 212 and in a technique class at the appropriate level. Attendance at dance concerts is required. Fall: J. Self. Spring: J. Chu. A continuation of THETR 410.

THETR 491 Senior Project in Dance
Fall or spring. 4 credits. Prerequisite: THETR 410 or permission. This course is limited to senior dance majors only. Students who take this course will create a project in choreography and performance, dance film or video, dance pedagogy, or other appropriate area agreed upon with a member of the dance faculty. Senior projects that are to be performed must be presented within one of the three regularly scheduled department concerts.

History, Criticism, and Theory

THETR 307 Asian Dance and Dance Drama (also Physical Education 427)

This course is designed to give the student a practical working knowledge of Indian classical dance, specifically in the indigenous style of Odissi known as Odissi. The basic technique strengthens the body, develops grace, rhythmic expression, and dexterity that can benefit all forms of dance.

THETR 312 Physical Analysis of Movement

A critical survey of the history of classical ballet defining elements of classicism and determining why ballet is defined as classical. Texts, videotapes, and through live performance, the class will explore how ballet has perpetuated or confronted social issues of race, class, gender, sexuality, the body, and abuse.

THETR 314 Western Dance History I: Classical Ballet History as a Reflection of Western Ideology

A critical survey of the history of classical ballet defining elements of classicism and determining why ballet is defined as classical. Texts, videotapes, and through live performance, the class will explore how ballet has perpetuated or confronted social issues of race, class, gender, sexuality, the body, and abuse.

THETR 315 Western Dance History II: History of Modern Dance

This class will study the course of modern dance in the twentieth-century United States. We will examine each generation of dancers, starting with Isadora Duncan and ending with performers emerging today. Issues of gender, cultural identity, elitism, and democracy will be discussed.

THETR 317 Asian Dance II
0, 1 or 3 credits. Prerequisite: THETR 307 or previous training in Odissi Classical Dance. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Not offered 1998-99.

The continuation of THETR 307, Odissi Classical Dance. Emphasis is mainly on choreography as well as continuing to refine and perfect the basic techniques learned in the preliminary course. Meets twice weekly for movement classes; an extra class will be arranged to learn the art of makeup.

THETR 319 Music, Dance, and Light
Fall. 3 credits. Attendance at dance concerts and music concerts is required.

E. Intemann, A. Fogelsanger, J. Morgenroth.

Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.
THETR 418 Seminar in History of Dance
Spring. 4 credits. Attendance at dance performances is required. B. Suber. Topic for 1999: Digital Dance.

THETR 490 Senior Paper in Dance
Spring. 4 credits. Prerequisite: THETR 418. Senior standing. Attendance at dance concerts is required. Under faculty direction, the student will write a senior paper in dance history, criticism, or theory.

Tracks toward admission into the advanced undergraduate theatre program

Design, Technology, and Stage Management
Recommended for individuals interested in a Design, Technology, or Stage Management track:

THETR 250 Fundamentals of Theatre Design and Technology
THETR 151 and 251 Production Lab I and II (at least one credit of each)
Recommended for Scenic Design emphasis:
THETR 340 Theatrical Drafting and Technical Drawing Studio
THETR 351 Production Lab III (as Design Assistant)
THETR 355 Stagecraft Studio
THETR 364 Scene Design Studio
Upon admission to the program: THETR 451 Production Lab IV (at least 1 credit)
Recommended for costume design or costume shop management emphasis:
THETR 254 Theatrical Make-up Studio
THETR 351 Production Lab III (as Design Assistant)
THETR 356 Costume Construction Studio
THETR 360 Costume Design Studio I
Upon admission to the program: THETR 451 Production Lab IV (at least 1 credit)
Recommended for Lighting Design or costume shop management emphasis:
THETR 252 Technical Production Studio I
THETR 351 Production Lab III (as Student Electrician)
THETR 351 Production Lab III (as Design Assistant)
THETR 362 Lighting Design Studio I
Upon admission to the program: THETR 451 Production Lab IV (at least 1 credit)
Recommended for Sound Design emphasis:
THETR 251 Production Lab II (as Student Sound Technician)
THETR 252 Technical Production Studio I
THETR 351 Production Lab III (as Design Assistant)
THETR 368 Sound Design Studio
Upon admission to the program: THETR 451 Production Lab IV (at least 1 credit)
Recommended for Technical Direction emphasis:
THETR 252 Technical Production Studio I
THETR 256 Technical Production Studio II
THETR 340 Theatrical Drafting and Technical Drawing Studio
THETR 351 Production Lab III (as Assistant Technical Director)
THETR 356 Stagecraft Studio
Upon admission to the program: THETR 451 Production Lab IV (at least 1 credit)

Recommended for Stage Management emphasis:
THETR 253 or 353 Stage Management Lab II or III—two assignments
THETR 280 Introduction to Acting
THETR 370 Stage Management Studio
THETR 398 Fundamentals of Directing I
Upon admission to the program: THETR 453 Stage Management Lab IV

Directing
Recommended for individuals interested in a directing track:
THETR 151 and THETR 251 Production Lab I and II (at least 2 combined credits)
THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 389 Directing I
THETR 498 Directing II

Playwriting
Recommended for individuals interested in a playwriting track:
THETR 240/THETR 241 Introduction to Western Theatre (1 Semester ONLY)
THETR 250 Fundamentals of Design and Technology
THETR 280 Introduction to Acting
THETR 348 Playwriting
THETR 349 Advanced Playwriting
Students in the advanced undergraduate theatre program may also elect to take THETR 485 (Undergraduate Internship) in addition to or in place of one production assignment.

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES

Africana Studies and Research Center

The Africana Studies and Research Center is concerned with the examination of the history, culture, intellectual development, and social organization of Black people and cultures in the Americas, Africa, and the Caribbean. Its program is structured from an interdisciplinary and comparative perspective and presents a variety of subjects in focal areas of history, literature, social sciences, and African languages. African languages such as Swahili are consistently offered, while other languages, e.g., Mandinka and Yoruba are occasionally offered. African languages are also taught during summer/winter sessions.

The center offers a unique and specialized program of study that leads to an undergraduate degree through the College of Arts and Sciences and a graduate degree, the Master of Professional Studies (African and African-American), through the university’s Graduate School.

A student may major in Africana studies; however, another attractive alternative is the center’s joint major program. This program enables the student to complete a major in any of the other disciplines represented in the college while at the same time fulfilling requirements for a major in Africana Studies. This requires only a few more credits than is usually the case when one completes a single major course of study. Courses offered by the center are open to both majors and nonmajors and may be used to meet a number of college distribution requirements, including linguistic(temporal breadth (@) and geographical breadth (@) requirements, such as foreign language courses, seminars, languages (Mandinka, Swahili, Yoruba), expressive arts, humanities, social sciences, and history.

The center also brings distinguished visitors to the campus, sponsors a colloquium series, and houses its own library.

The Africana Major

The undergraduate major offers interdisciplinary study of the fundamental dimensions of the African-American and African experiences. Because of the comprehensive nature of the program, it is to the students’ advantage to declare themselves Africana majors as early as possible. The following are prerequisites for admission to the major:

Students should submit:
1) a statement of why they want to be an Africana studies major;
SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES 541

2) a tentative outline of the are of study they are considering (African or African-American) for the undergraduate concentration; and

3) a full transcript of courses taken and grades received.

The center's undergraduate faculty representative will review the applications and notify students within two weeks of the status of their request.

After acceptance as a major in the Africana Center, a student must maintain a cumulative average in the center's courses while completing the major program. The Africana major must complete 36 credits in courses offered by the center, to include the following core courses: AS&RC 205, 231, 290, and 422. Beyond the core courses, the student must take 8 credits of center courses numbered 200 or above and 15 credits numbered 300 or above. The program of an undergraduate major may have a specifically African focus.

Joint Majors

The center encourages joint majors in the Center's undergraduate courses and in other colleges. Joint majors are individualized programs that must be worked out between the departments concerned. The center's undergraduate faculty representative, Professor Adams, will assist students in the design and coordination of joint major programs. However, in any joint major program, the center will require at least 16 credits be taken in Africana studies courses, including AS&RC 290.

Double Majors

In the case of double majors (as distinct from joint majors) students undertake to carry the full load of stipulated requirements for a major in each of the two departments they have selected.

Certificate in African Studies

In conjunction with the Institute for African Development, the Africana Studies and Research Center administers an undergraduate Certificate in African Studies program. The certificate is offered as a minor concentration available to students in all of the undergraduate colleges at Cornell. Many of the courses in the program might be used to fulfill other course distribution requirements. By pursuing this certificate, students acquire an interdisciplinary understanding of Africa. After developing a foundation of knowledge on the culture, society, and development of Africa, the core course "Africa: The Continent and Its People," students pursue 15 credit hours in a humanities or development studies track or a combination of the two, including an additional core course, either "African Civilizations and Cultures" or "Contemporary African Development Issues." The requirements for the certificate are a minimum of 18 credit hours, including the core course. Students interested in the certificate program must contact Professor Adams (the center's undergraduate faculty representative) who will register them in the program and assign them a faculty adviser from their own college. The faculty adviser will be responsible for determining completion of the certificate requirements.

Hons. The honors program offers students the opportunity to complete a library research thesis, a field project in conjunction with a report on the field experience, or a project or experiment designed by the student. The requirements for admission to the honors program for all students, regular majors, joint majors, and double majors—are a B+ cumulative average in all courses and a B+ cumulative average in the center's courses. Each student accepted into the honors program will have an honors faculty committee consisting of the student's adviser and one additional faculty member, who is responsible for final evaluation of the student's work. The honors faculty committee will approve the thesis or project before May 1 of the student's junior year. The completed thesis or project should be filed with the student's faculty committee by May 10 of the senior year.

Distribution Requirement

Two Africana Studies and Research Center courses from each of a student's discipline group may be used in fulfillment of the following distribution requirements:

Humanities: AS&RC 202, 211, 211, 211, 222, 304, 422, 425, 450, 455, 525.

Freshman writing seminars: AS&RC 100.

Language Requirement

Courses in Mandinka, Swahili, and Yoruba may be used to satisfy the College of Arts and Sciences language requirement. Successful completion of the Mandinka or Yoruba series AS&RC/DMLL 121, 122, 123 provides qualification and study through 201 in either language provides proficiency. In Swahili, successful completion of AS&RC 131, 132, 133, and 134 provides qualification, and the addition of 201 provides proficiency. AS&RC majors are not required to take an African language, but the center recommends the study of one to complete the language requirement.

Courses

AS&RC 123 Sec 01 Continuing Yoruba
Fall. V. Carstens and staff. For description, see YORUB 123.

AS&RC 131 Swahili
Fall. 4 credits. Laboratory time to be arranged. A. Njani.
Beginner's Swahili. Part 1—Grammar for speaking, reading, and writing. Requires no knowledge of language. Swahili is spoken in East and Central parts of Africa.

AS&RC 132 Swahili
Fall. 4 credits. Prerequisite: Swahili 131. A. Njani.
Continued study of the basic grammatical formation of the language and the introduction of reading material ranging from songs to short stories, stories, and invariably used in this course to help develop the student's comprehension of the language.

Swahili tapes are highly utilized during all of these sequences.

AS&RC 133 Swahili
Fall. 4 credits. Prerequisites: Swahili 131 and 132. Language laboratory time to be arranged. A. Njani.

Advanced study in reading and composition.

AS&RC 134 Swahili
Spring. 4 credits. Prerequisite: Swahili 133. A. Njani.

In this course of the sequence more emphasis is placed on the development of reading ability and the acquisition of writing skills. Students are expected to read and comprehend selected Swahili stories and write compositions on chosen topics. Consideration is given to oral practice in the classroom.

AS&RC 171 Black Families and the Socialization of Black Children
Fall. 3 credits. Faculty. This course provides an examination of the evolution of the Black family from its roots in Africa, the evolution of family forms, the impact of social policy, and a consideration of the literature stressing family and child well-being. Among the major topics considered will be male/female relationships, childbearing and parental roles, the extended family, economic and health issues. The component of the course focusing on youth will primarily cover child and adolescent development.

AS&RC 172 The Education of Black Americans: Historical and Contemporary Issues
Spring. 3 credits. Faculty. This course will be devoted to the history of educating Black Americans. Considerable attention will be given to contemporary issues. The major topics of focus will include an examination of the debates concerning the type of the education needed, public and private schooling efforts, the Africana Studies movement, community control issues, busing, affirmative action, re-segregation debates and new initiatives in education including vouchers, and charter schools.

AS&RC 191 Africa: The Continent and Its People
Fall. 3 credits. L. Edmondson.
An introductory interdisciplinary course focusing on Africa's geographical, ecological, and demographic characteristics; indigenous institutions and values; the triple cultural heritage of Africa; the historical and contemporary significance of Africa; and are introduced to the predominant Swahili literary forms.

AS&RC 202 Swahili Literature
Fall. 4 credits. Prerequisite. Swahili 134. A. Njani.

Students gain mastery over spoken Swahili and are introduced to the predominant Swahili literary works.

AS&RC 204 History and Politics of Racialisation: A Comparative Study
Spring. 4 credits. A. Bekerie.

The primary focus of this course will be the historical and contemporary significance of racialisation in the United States and South Africa with regard to societal development and inter-relations. It will include an analysis
of the historical development of racialized barriers as an instrument of power and privilege. The ways with which racialization is used as an instrument of ideology to social status, cultural hierarchy and economic privilege. Particular emphasis will be given to the development and perpetuation of scientific racism in both places. The apparent success against Jim Crow form of racism in the United States and apartheid South Africa appears to transform racism into subtle and 'scientific' sphere. This transformation and its continued impact in perpetuating social inequality will be further analyzed.

AS&RC 205 African Cultures and Civilizations # 6
Spring. 3 credits. D. Ohadike.
This course is concerned with the peoples of Africa and the development of African cultures and civilizations from the earliest times to the present day. It focuses on the near modern civilizations of Africa south of the Sahara, and the ancient civilizations of Egypt and the Nile Valley, together with their contributions to the development of the major world civilizations. The course also deals with the socio-political organization of African societies, their kinship systems, cross-cutting ties, rites of passage, gender relations, arts (including music, dance, folklore, architecture, sculpture, painting, and body decoration).

AS&RC 210 Major Works of Black World Writing
Fall. 3 credits. A. Adams.
This course surveys classic texts by African American, Caribbean, and African writers. The focus is on literary texts by authors such as Langston Hughes, Toni Morrison, James Baldwin, Maryse Conde, and Chinua Achebe, with a view toward analyzing common experiences, references, themes, and literary strategies across the Black world. The works of fiction, poetry, and drama that constitute the central material of the course are supplemented by essays and biographies from other authors who have influenced the creative vision and the movement of the peoples of Africa and the Diaspora, e.g., W.E.B. DuBois and Marcus Garvey, Nelson and W. E. Burroughs.

AS&RC 231 African American Social and Political Thought
Spring. 3 credits. J. Turner.
This is an introductory course that will review and analyze the major theoretical and ideological formulations developed and espoused by African Americans in the struggle for liberation. This semester we will focus specifically on the political philosophy and historical significance of Malcolm X, and the way and movement of Marcus Garvey as the prime movers of nationalism and pan-Africanism among Black people in this century. Such themes as slave resistance, nationalism, Pan-Africanism, emigration, anti-imperialism, socialism and internal colonialism, and the political and social views of Black women will be discussed. Black political thought will be viewed in its development as responses to concrete conditions of oppression and resistance to the institution of slavery.

AS&RC 255 African American Literature in the Twentieth Century
Fall. 3 credits. A. Kemp.
This course provides an overview to major works in African American literature from 1900 to the 1980s. Focusing on significant moments in the tradition, the readings highlight literary movements, their advocates, and their detractors. Divided into four units, the literary works come from the Post-Reconstruction period, Harlem Renaissance, Social Realism, and Modernists of the 1930s and 1940s, and the Movement of the 1960s and 1970s, and the Womanist critiques from the mid 1970s through the 1980s. In addition to a range of periods and styles, this course includes a range of genres, such as the autobiography, poetry, essay, short story, drama, and novel.

AS&RC 271 Introduction to African Development (also CRP and Government 271) @
For description, see CRP 271.

AS&RC 280 Race, Power, and Privilege in the United States (formerly Racism in American Society)
Fall. 3 credits. D. Ohadike.
This course will be a topical treatment of the history and theory of racism in the United States. The course will begin with an examination together with the rise of theories of racism. From there we will examine the history of racial groups in America—African-Americans, Native Americans, Asian Americans, and the Hispanic groups. Particular attention will be given to the political economy of racism and the sociological and the psychological aspects of race relations in America, with specific reference to the differences and intersections of race, class, gender, and ethnicity.

AS&RC 283 History of Resistance Movements in Africa and the Diaspora @
Fall. 3 credits. D. Ohadike.
This course deals with the history of resistance and liberation movements in Africa, Brazil, the Caribbean, and the United States. It is concerned with the dialectical relationships between European domination and Black resistance. It examines the methods, strength, and complexity of Black resistance and liberation, and history of revolutionary classes in Africa and the Diaspora. It draws attention to the importance of unity and organization in resistance and then shows similarities, connections, and continuities in Black resistance. It demonstrates that African background helped to shape the nature of struggles for independence and civil liberties in the Caribbean, Brazil, and the United States.

AS&RC 290 The Sociology of the African-American Experience
This is an introductory course to the field of Africana Studies. It assumes a historical/sociological approach to the examination of the African-American experience. The course surveys the African beginnings of human kind and the classical role of Black people in world civilization and the making of early culture. The course treats issues in the humanities, social sciences, and history. This course is required for all undergraduate students majoring at the Africana Center.

AS&RC 304 African American Art
Spring. 3 credits. S. Hassan.
This course investigates the different forms of African American visual artistic traditions in relation to their historical origins and socio-cultural context from the early days of slavery to the present time. The course will start with an overview of African art and the experiences of the Middle Passage and slavery in relation to African American traditions in the decorative arts including: pottery, architecture, ironwork, quiltmaking, basketry. This is followed by a fine art survey starting with the eighteenth and nineteenth centuries continuing through the early twentieth-century Harlem Renaissance up to the present. Certain issues related to African American art and creativity such as "Improvisation," "Black Aesthetic," and "Pan Africanism" will also be explored. Slides, films, film strips will be used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

AS&RC 310 Art in African Culture and Society @
This course is a survey of the visual art and material cultural traditions of sub-Saharan Africa. It aims at investigating the different forms of visual artistic traditions in relation to their historical and sociocultural context. The symbolism and complexity of traditional African art will be explored through the analysis of myth, ritual, and cosmology. In-depth analysis of particular art forms will be used to examine the relationship of the arts to indigenous concepts of time, space, color, form, and sociopolitical order. New and contemporary art forms associated with major socioeconomic changes and processes of assimilation and acculturation will also be explored. These include tourist art, popular art, and elite art.

AS&RC 311 Government and Politics in Africa @
Fall. 3 credits. A. Mazrui.
Power and political participation in Africa. The colonial background and its political consequences. The pre-colonial continuities in the post-colonial politics. Ethnicity and allegiance in the African polity. The monarchical tendency in African political culture. From the warrior tradition to the military coup in the post-colonial era. From the elder tradition to presidential gerontocracy. From the sage tradition to intellectual meritocracy. Class versus ethnic politics. The one-party versus the multiparty state. Socio-cultural versus socio-economic ideologies. The gender question in African politics. The soldier and the state. The African political experience in a global context.

AS&RC 352 Pan-Africanism and International Politics
Spring. 3 credits. L. Edmondson.
Pan-Africanism addresses the shared experiences and aspirations of African people around the world, focused on a search for greater linkages and unifying meanings. Informed by an exploration of the racial factor in international relations, this course will examine Pan-African theories, ideologies, and movements, past and present, in their political, socio-economic, and cultural manifestations, focusing mainly on the African continent, the Caribbean, and Black America.

AS&RC 362 Global Perspectives on Gender
Spring. 4 credits. N. Assi-Lumumba.
The course will examine historical forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class will be taught by a rotating set of two faculty members from
different departments. Contingent on the particular faculty member directing the course, the class will consider such issues as cross-cultural perspectives on gender; the history of work and family life in different societies; the gendered nature of local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; the role of the state in constructing an engendered economy and policy.

AS&RC 380 African History: Earliest Period to 1800  
Fall. 3 credits. A. Bekerie.

As the second largest continent with vast and varying geographical and sociocultural conditions combined with recently established fact as an original home of human species, Africa provides rich and diverse oral and written early history. The course covers some of the major historical signposts from the origins of human species to 1800. Among the topics for discussion are: Historical Perspectives and Sources, The Nile River Cultural Complex, Berber, Carthage and Maghreb of North Africa, Upper Guinea and Western Sudan of West Africa, Cities of the East African Coast, and Great Zimbabwe and other sites of Southern Africa.

AS&RC 381 African History, 1800-Present  
Spring. 3 credits. D. Oladokun.

This is a survey of African history in the nineteenth and twentieth centuries. It deals with African evolutions in the nineteenth century: the ending of the slave trade and the politics of the abolition; European scramble and partition of Africa; resistance to European colonial conquest; African societies in the colonial period; the politics of decolonization; Neo-colonialism; the rise and decline of military regimes; African debt crisis; and conflict and reconciliation in Africa.

AS&RC 404 Afrocentricity: Paradigm and Critical Readings  
Fall. 4 credits. A. Bekerie.

What is Afrocentricity? It is a theoretical paradigm designed to study and interpret the histories and cultures of peoples of Africa and African descent by locating them at the center of their experiences. In other words, it is a method of knowing the life experiences of African peoples from the inside out. The course will examine—through the writings of Asante, Kete, Clarke, Jean, Myers, Amin, Mazrui, Gates, Appiah, Richards, Schlesinger and Thiongo—the conception and depth of the paradigm; its relevance in the production and utilization of knowledge; particularly emancipatory knowledge, the history of the paradigm, and the debate it generates among a wide range of thinkers and scholars.

AS&RC 410 African American Politics and Black Political Culture  
Fall. 3 credits.

The central thesis of African American politics has been its movements for political change and democratic access and human rights. This development since the seventeenth century is a crucial legacy. This course will conduct a closer study of African American political practice and theoretical analysis of the American political system. Implications of the political systems for power, and the nature of political participation by Black people will be analyzed. Critical historical stages in the process of Black politics will be examined. The development of electoral offices in federal and state-wide politics, and the significant urban political power bases giving rise to African American mayoral politics in critical industrial centers, as well as rural hamlets will center the course. Presidential politics—the Jesse Jackson campaigns; the New Democratic political formations including Black Republicans/conservatives will constitute the emphasis on contemporary events. The course will review the development of the literature in African American politics.

AS&RC 420 Public Policy and the African American Urban Community  

The socioeconomic conditions of the African American urban community will be the central focus of the course. Community development models will be explored in relationship to the social needs of the African American population. The changing configuration of internal organization of the African American community nationally will be examined.

AS&RC 422 African Literature  

With such great focus, both inside and outside Africa, on issues of Africa's "development," what place does "literature" take? Is African literature influencing or shaped by the mundane realities of daily living faced by African people? Or does African literature concern itself with philosophical ideas and ideals that transcend those realities to embrace the general human condition? Or, does it do both? The texts that we will be reading this course will be approached in terms of these issues of "African development" and "the universal human experience."

AS&RC 425 African American Performance Genres and Traditions  
Spring. 4 credits. A. Kemp.

This course introduces students to the various genres in African American verbal performance practices, including poetry, rap, sermons, drama, and the performance of self in every day life. Students will learn as well as observe, read, and write critical commentary on contemporary black performance. Performance is broadly defined to include performance of the self in every day life as well as formally staged productions. Thus, students will have the opportunity to observe performance of identity in a range of black social settings. Blending analysis and practice, we begin with everyday life performances and end with staged presentations of scenes from the African American theatrical repertoire.

AS&RC 435 African Cinema (also for the Humanities 435)  

This course offers an introduction to African cinema and filmmaking. It surveys historically the evolution of African cinema from its early days to the present. Through screening of selected African films, different trends within African cinema will be interpreted, such as, "Return to the Sources" and the rediscovery of the pre-colonial past; the "Social Realist" narrative and critique of post-independence Africa; reconstructing the story of colonialism from the perspective of the colonized; and the entertainment genre. Techniques, style, and aesthetics of African cinema will also be discussed. The course offers a unique opportunity of looking at African culture and society, and at issues of social change, gender, class, tradition, and modernization through African eyes.

AS&RC 451 Politics and Social Change in the Caribbean  
Fall. 4 credits. L. Edmondson.

A study of the historical, geopolitical, political, economic, and social (including racial and cultural) forces bearing on the domestic and international experiences of Caribbean societies. Special attention will be given to conflicting definitions and perceptions of the Caribbean, contending theories of Caribbean social structure and models of development; the continuing salience of struggles for change and transformation; prospects of regional integration; and Caribbean challenges to the global system, especially with regard to the region's relations with the United States and the region's position in the Third World in the context of the North-South cleavage.

AS&RC 455 Caribbean Literature  
Fall. 4 credits. A. Adams.

This course will examine the prose literature of the Caribbean islands. Through the reading of several novels and short stories from the various languages and cultural strains that comprise the Caribbean societies, students will study the points of commonality and the diversities within this literature. We will also examine the recurrence of certain historical, social, and cultural issues that have formed the multi-ethnic Caribbean peoples will be analyzed in their varying manifestations across the linguistic and other boundaries to uncover the underlying shared experience.

AS&RC 459 Education in Africa and the Diaspora  
Fall. 4 credits. N. Assié-Lumumba.

This course deals with educational innovations geared to promoting equal opportunity based on gender, race and class, in Africa and the African diaspora. After an introduction on the concepts of education and innovations and the states of innovation as planned change, the course will focus on concrete historical and contemporary cases of educational innovations. The case studies in the United States include the creation and expansion of historically black institutions such as Lincoln University, Spelman College, Tuskegee Institute (now Tuskegee University), and other schools in the South, and the Westside Preparatory School in Chicago. The African cases to be studied include African languages for instruction with a focus on a Nigerian case, Ujamaa and education for self-reliance in Tanzania, and the case of Cote d'Ivoire which adopted television as a medium of instruction.

AS&RC 468-469 Honors Thesis  
Hours to be arranged. 468, fall; 469, spring. Africana Center faculty.

For senior Africana Studies majors working on honors theses, with professional research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty. Permission of the AS&RC director of undergraduate studies is required.

AS&RC 475 Black Leaders and Movements in African-American History  
Fall. 4 credits. R. Harris.

Analyzes the personalities, ideas, and activities central to the struggle for African-American liberation from the eighteenth-century to the present. Examines theories of leadership and the structure of protest movements with the goal of understanding current leadership needs and trends among African Americans.
AS&RC 478 Family and Society in Africa
Fall. 4 credits. N. Assié-Lumumba.
The family as a social institution is structured according to socio-economic, historical, political, and cultural specificities. This is the frame in which the family in Africa and the African diaspora must be analyzed. The topics to be discussed in this course include the concepts of nuclear and extended family, the place and role of different age groups and generations in the family, marriage and its related issues, parenthood, childrearing, gender roles, class differences, and “family planning.” This course also deals with the impact of westernization, urbanization, and modern economy on the structure of the family in Africa as well as the legacy of African family values in the African diaspora with a focus on the African American case.

AS&RC 479 Women and Gender Issues in Africa
Spring. 4 credits. N. Assié-Lumumba.
There are two contrasting views of the status and role of women in Africa. One view portrays African women as dominated and exploited by society; according to another view women have a favorable social position in Africa: indigenous ideologies consider women to be the foundation of society, they are economically active and independent and they have an identity independent of men. In this seminar we will discuss the status and role of women in Africa historically as well as in the contemporary period. Among the topics to be covered are: women in non-westernized societies; the impact of colonial policies on the status of women; gender and access to schooling, participation in the economy and politics; women and the law; women and health issues; gender issues in southern Africa: womanism and feminism; the United Nations Decade of Women and the four World Conferences on Women (Mexico 1975, Copenhagen 1980, Nairobi 1985, and Beijing 1995).

AS&RC 483 History of African Political Thought
Fall. 4 credits. D. Ohadike.
The purpose of this course is to provide students with a thorough knowledge of the history of African political thought and ideologies, from ancient times to the present.

This course is divided into two broad sections: the first section looks at the history of African political thought and institutions in ancient and near modern times and explains the functioning of African communalism. It then goes on to show how western political thought in the nineteenth and early twentieth centuries influenced the development of such ideas as Uhuru, Negritude and African Humanism.

The second section examines the history of anti-colonial political thought. It explains why the colonial intelligentsia and radical African nationalists developed such political ideologies as African socialism, Lumumbism, and Nkrumahism. The course also looks at socio-political thought in African literature, and explores the contributions of African religious thought (like Kimbanguism and Tokosom) to the development of African political culture. Among the works of major African political thinkers to be studied are those of Casely Hayford, Leopold Sédar Senghor, Simon Kimbugu, Amilcar Cabral, Frantz Fanon, Kwame Nkrumah, Patrice Lumumba, Nnamdi Azikiwe, Julius Nyerere, Jomo Kenyatta, Nelson Mandela, and Steve Biko.

AS&RC 484 Politics and Social Change in Southern Africa
Spring. 4 credits. L. Edmondson.
This course focuses on the legacies of apartheid and the challenges of transformation toward a post-apartheid society in South Africa. Topical emphases include: the rise and decline of apartheid; the historical continuity of Black resistance against racism; women under, against, and after apartheid; South Africa's relations with its neighbors; geo-political, economic, and racial dimensions of the American connection; politics of negotiation and transition to majority rule; prospects for stability, democracy and equality; South Africa's new role in the African continental and global arenas. Instructor's lectures will be supplemented by films and class discussions.

AS&RC 498-499 Independent Study
Hours to be arranged. 498-fall; 499-spring.
For students working on special topics, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty.

AS&RC 501 Global Africa: Comparative Black Experience
Spring. 4 credits. A. Mazrui.
This seminar will address two diasporas in the Black experience. The diaspora of enslavement concerns slaves and descendants of slaves in both the Western and Eastern Diaspora. The diaspora of colonization concerns demographic dispersal as a result of colonialism. African-Americans are in their majority part of the Diaspora of Enslavement. Recent Algerian immigrants into France are part of the Diaspora of Colonization. Jamaicans and Trinidadians in Britain are part of a double diaspora—products of both enslavement and colonialism. The course will address these areas of Black comparison: Comparative Social Heritage; Race and Race Mixture in Four Traditions; Comparative Emancipation from Slavery; Comparative Liberation from Colonialism; Comparative Struggle for Civil Rights; The Gender Question in Global Africa; Comparative Quest for Global Equality.

AS&RC 502 Education and Development in Africa
Spring. 4 credits. N. Assié-Lumumba.
In the 1950s and 1960s, the human capital theory that emphasizes the importance of formal education for achievement of full productive potential of individuals and countries enjoyed a renewed popularity. African countries promoted educational expansion with the expectation that it would lead to socio-economic development. The initial euphoria, however, was followed by skepticism and then disillusion. Education began to be perceived even as a hindrance to development. This course examines the relationship between formal education and individual and national development. In this seminar, different paradigms of development including modernization and dependency theories and Third World Forum are presented with an emphasis given to the perceived and actual roles of education in individual and national development.

AS&RC 503 African Aesthetics
The goal of this course is to investigate in depth the principles of aesthetics and philosophy of African visual arts. The course will offer a critical survey of the different writings and the growing body of research on this relatively new area of inquiry. The objectives of the course are to review how African aesthetics has been studied to date, to provide a critical analysis of the different approaches to the subject and related issues, and to suggest future directions of research. In-depth analysis of particular African societies will be used to examine the relationship of arts and aesthetics to indigenous concept of time, space, color, form, and sociopolitical order. In addition, issues related to African aesthetics and arts such as style, gender, class, and social change will also be explored.

AS&RC 504 Political Change in Africa
Fall. 4 credits. A. Mazrui.
The study of Africa can be approached either dialectically (focusing on the tension between opposing forces) or thematically (focusing on themes as chapters of experience). This course will borrow from both these approaches. In their class assignments and examinations students are free to use either approach.

The first approach will explore the dialectic between continuity and change; tradition and modernity; dependency and foreign and indigenous influences; anarchy and order; political decay and political development; democracy and authoritarianism; socialism and capitalism. The thematic approach will examine African Nationalism; race consciousness Pan-Africanism; political parties and interest groups; executive power: ethnicity in politics; class-formation; civil-military relations; economic and cultural dependency; sub-regional and continental Pan-Africanism; crisis of the African state; and Africa in World Politics.

AS&RC 510 Historiography and Sources: The Development of African-American History
Spring. 4 credits. Prerequisite: upperclass or graduate standing or permission of instructor. R. Harris. Studies the way Black historians in particular have explained the African-American past. Examines the development of writing African-American history during the twentieth century. Seeks to determine the principles for interpreting African-American history. Acquaints participants with the methodologies and sources central to understanding the African-American experience.

AS&RC 530 Womanist Writing in Africa and the Caribbean
Spring. 4 credits. Not offered 1998-99. Next offered spring 2000. A. Adams. Theoretical essays on the nature, relevance, and articulation of feminist thought from African and Caribbean writers will complement literary texts. Gender issues, as manifested both at home and in emigrant situations abroad will be examined in texts by such writers as Sistren, Conde, Dangarembga, Aidoo, James-Vayer, Kincaid, W. Mandela. (Francophone works may be read in the original by individuals who so desire.)
Agriculture, Food, and Society Concentration

Agriculture, Food, and Society is an interdisciplinary concentration that is designed to introduce students to the study of agricultural and food issues from diverse perspectives within the liberal arts. The Agriculture, Food, and Society concentration seeks to make available to students a coherent program of study in which the role of agriculture in modern or prehistorical-historical and developed or developing societies can be understood in biological, social, scientific; and humanistic perspective. The concentration draws upon courses in several colleges—in particular, the Colleges of Arts and Sciences, Agriculture and Life Sciences, and Human Ecology.

The concentration is administered by a committee, the members of which are drawn from the faculty associated with the concentration. The members of this committee include faculty from each of the major colleges from which courses in the concentration are drawn. The work of the committee is supported administratively through the Biology and Society Major. The office of the Biology and Society Major (275 Clark Hall) also provides a central location for students to receive information about relevant course offerings, upcoming seminars and presentations, faculty interests, and so on.

Basic Requirements

The requirements for the Agriculture, Food, and Society concentration are designed to ensure a broad background in the biological, socioeconomic, and humanistic dimensions of agricultural and food issues. These requirements include a foundational course in biology; certain courses in the Africana Studies and Research Center, the Department of Theatre Arts, and the English Department; a course in American history, literature, and politics of the United States. The prerequisites are two courses from the following: American Studies 101, American Studies 102, English 275, English 268, Government 111, History 101, History 102. Students who contemplate becoming American Studies majors are encouraged to speak with the chair as early as possible to arrange for a major adviser.

In consultation with their advisers, American Studies majors elect, in addition to the prerequisites, 36 credits (or nine courses) of work in American history, American literature, and American government. Their work must include courses in all of the three large periods into which the nation's development can be divided (defined for the purposes of the program as colonial, nineteenth century, and twentieth century). Students must take no fewer than 4 courses before 1800. At least one of these courses must be in the period before 1876. Each student must also take one of the adviser-approved seminars at the 400 or 600 level. When the subject matter is appropriate, such a seminar may count toward the satisfaction of the period requirements.

Students divide their work among history, literature, and politics in whatever proportion serves their interests, so long as their advisers consider their programs to be well-balanced. No more than 18 credits may be in any one department.

Beyond the core basic requirements for the major, 8 credits of work in the history or literature or both of another culture are required; students are also encouraged to take at least 4 credits in American thought, society, or culture studies from another discipline such as anthropology, economics, history of art, or sociology. (This last 4-credit supplement may be satisfied outside the college.)

Courses in American history that will satisfy the 36-credit requirement are offered by the Department of History; those in American literature are offered by the Department of English, the Department of Theatre Arts, and the Africana Studies and Research Center. Those in American government are offered in the Department of Government.

Courses in American history that will satisfy the 36-credit requirement are offered by the Department of History; those in American literature are offered by the Department of English, the Department of Theatre Arts, and the Africana Studies and Research Center. Those in American government are offered in the Department of Government. Occasionally a course that fits an individual student's program may be offered elsewhere. Substitution will depend on the adviser's approval. Advisers determine which courses count for the interdisciplinary seminar.

Honor's. Candidates for honors must maintain an average of B+ in courses pertinent to the major. To be eligible for a degree with honors in American Studies, a student must in the senior year write an honors essay for American Studies 493, Honors Essay Tutorial, and take an oral examination in the declared area of special interest.

Cornell-in-Washington Program. American Studies majors may apply to the Cornell-in-Washington program to take courses and participate in a closely supervised externship during a fall or spring semester. For further information, see Interdisciplinary Centers, Programs, and Studies or inquire at 471 Hollister Hall, 255-4900.

[AM ST 101] Introduction to American Studies: American Revolution to the Beginning of the 20th Century

Fall. 4 credits. Not offered 1998-99.

G. Altschuler and D. McCall.

In this interdisciplinary course we will analyze American values and behavior as the intersection of culture, politics, literature, and society. Among the topics explored in the course will be the democratization of American society and politics, the formation of the middle class, the Civil War, the rise of industrialization, the Victorians and sexuality, the Pragmatist revolt against Formalism. Intensive examination of Hawthorne's The Scarlet Letter, Melville's Moby-Dick, James's Portrait of a Lady, and Mark Twain's Huckleberry Finn will help illuminate the relationship between literature and American values.

[AM ST 102] Introduction to American Studies: Progressive Era to the Present

G. Altschuler and D. McCall.

In this interdisciplinary course we will analyze American values and behavior as the intersection of culture, politics, literature, and society. Among the topics explored in the course will be the death of the West and the rise of the Western, the Roaring Twenties, the New Deal and Writers on the Left, the Great War, the ideology of anti-Communism, the Civil Rights Movement, Vietnam, the Reagan

Center for Applied Mathematics

The Center for Applied Mathematics administers a broadly based interdepartmental graduate program that provides opportunities for study and research over a wide range of the mathematical sciences. This program is based on a solid foundation in analysis, algebra, and methods of applied mathematics. The remainder of the graduate student's program is designed by the student and his or her Special Committee. For detailed information on opportunities for graduate study in applied mathematics, students should contact the Director of Graduate Studies of the Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall.

There is no special undergraduate degree program in applied mathematics. Undergraduate students interested in an application-oriented program in mathematics may select an appropriate program in the Department of Mathematics, the Department of Computer Science, or some department of the College of Engineering.

A listing of selected graduate courses in applied mathematics can be found in the description of the center in "Interdisciplinary Centers, Programs, and Studies."

Archaeology Program

A. Ramage (history of art), program director

Archaeology is an interdisciplinary field at Cornell, which is one of the few universities in the United States to offer a separate archaeology major. Program faculty members, affiliated with several departments, coordinate course offerings and help students identify opportunities for fieldwork, graduate study, and professional positions.

The Major

Prospective majors must complete Archaeology 100 or one of the basic courses as defined below before they will be admitted to the major. This initial course will not be counted toward the major requirements.

Because the major draws on the teaching and research interests of faculty from many departments to present a broad view of the archaeological process, interested students should discuss their course of study with a participating faculty member as early as possible. In some areas of specialization, intensive language training should be coordinated with other studies as early as the freshman year.

Once admitted to the major, students must take an additional 32 credits from the courses listed below, selected in consultation with a major adviser of their choosing. These courses should provide exposure to a broad range of archaeologically known cultures and the methods of revealing and interpreting them. Sixteen of the credit hours should be at the 300 level or above. At least two courses must be taken from each of categories B-E.

Courses basic to the discipline of archaeology are marked with the word "Basic" after the number of credit hours. It is recommended that majors who are planning to pursue graduate studies in archaeology should take at least two of the basic courses in each category. Further courses in languages and in geology are also recommended.

Honors. Honors in archaeology is awarded on the basis of the quality of an honors essay and the student's overall academic record. Prospective honors students should have a 3.5 grade point in the major and a 3.0 grade point overall. They should consult with the director of undergraduate studies before the beginning of the senior year. An honors essay is normally prepared in consultation with a faculty adviser during the senior year; students may enroll in Archaeology 481, fall; 482, spring for this purpose.

Fieldwork. Every student should gain some practical experience in archaeological fieldwork on a project authorized by his or her adviser. This requirement may be waived.
in exceptional circumstances. The Jacob and Hedwig Hirsch bequest provides support for a limited number of students to work at excavations sponsored by Cornell and other approved institutions.

The Concentration
Students in Cornell schools and colleges other than Arts and Sciences may elect a concentration in archaeology. To concentrate in archaeology, the student must complete five courses, all with a grade of C or better. The five courses must consist of either (1) Archaeology 100 and four other courses from categories B-D, at least three of which must be basic courses, or (2) five courses from categories B-D, at least four of which must be basic courses. Concentrators are encouraged to gain some fieldwork experience. They are eligible on the same basis as majors for Hirsch Scholarships in support of fieldwork.

Freshman Writing Seminars
For course descriptions, see the freshman writing seminar brochure.

A. Introductory Courses and Independent Study Courses

**ARKEO 100 Introduction to Archaeology (also Anthropology 100)**
Fall. 3 credits. Basic. J. Henderson.
A broad introduction to archaeology—the study of material remains to answer questions about the human past. Case studies highlight the variability of ancient societies and illustrate works archaeologists use to reconstruct them. This course can serve as a platform for both Archaeology and Anthropology undergraduate majors.

**ARKEO 202 Interpreting Archaeology (also Anthropology 202)**
T. P. Volman.
For description, see ANTHR 202.

**ARKEO 203 Early People: The Archaeological and Fossil Record (also Anthropology 203)**
Spring. 3 credits. Basic. T. P. Volman.

**ARKEO 204 Ancient Civilizations (also Anthropology 204)**
J. S. Henderson.

**ARKEO 215 Stone Age Art (also Anthropology 215)**
Fall. 3 credits. T. P. Volman.
For description, see ANTHR 215.

**ARKEO 317 Stone Age Archaeology (also Anthropology 317)**
Fall. 4 credits. Not offered 1998-99.
T. P. Volman.
For description, see ANTHR 317.

**ARKEO 400 Approaches to Archaeology (also Archaeology 400 and Anthropology 400/600)**
Spring. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 1998-99.
J. S. Henderson, T. P. Volman.
For description, see ANTHR 400.

**ARKEO 404 Seminar in Archaeology: The Archaeology of Human Origins (also Anthropology 494)**
T. P. Volman.
For description, see ANTHR 494.

**ARKEO 409 Approaches to Archaeology (also Archaeology 409 and Anthropology 409/609)**
J. S. Henderson, T. P. Volman.
For description, see ANTHR 409.

**ARKEO 409 Approaches to Archaeology (also Archaeology 409 and Anthropology 409/609)**
Spring. 4 credits. Basic. Prerequisite: permission of instructor. Not offered 1998-99.
J. S. Henderson, T. P. Volman.
For description, see ANTHR 409.

**ARKEO 481-482 Honors Thesis**
Fall and spring. 3 credits. S-U only. Prerequisite: admission to Honors Program.
The student, under faculty direction, will prepare a senior thesis.

**ARKEO 500 Individual Study in Archaeology and Related Fields**
Fall and spring. 3 credits. S-U only. Prerequisite: admission to Honors Program.
The student, under faculty direction, will prepare a senior thesis.

**LA 569 Archaeology in Preservation Planning and Design (also CRP 569)**
S. Baugher.
For description, see LA 569.

C. Old World Archaeology

**ARKEO 221 Minoan-Mycenaean Art and Archaeology (also Classics 221 and History of Art 221)**
Spring. 3 credits. Basic. J. Coleman.
For description, see CLASS 221.

**ARKEO 233 Archaeology in Action II (also History of Art 225 and Classics 233)**
Spring. 3 credits. Prerequisite: permission of instructor. P. I. Kuniholm.
For description, see ART H 225.

**ARKEO 263 Introduction to Biblical History and Archaeology (also NES 263, Jewish Studies 263, and Religious Studies 264)**
Spring. 3 credits. Staff.
For description, see NES 263.

**ARKEO 275 Ancient Seafaring (also Jewish Studies 261 and Near Eastern Studies 261)**
Spring. 3 credits. D. I. Owen.
For description, see NES 261.

**ARKEO 352 The City of Athens from Theseus to Justinian (also Classics 352 and History of Art 352)**
Spring. 3 credits. M. Landon.
For description, see CLASS 352.

**ARKEO 380 Introduction to the Arts of China (also History of Art 380)**
Fall. 4 credits. A. Pan.
For description, see ART H 380.

**ARKEO 417 Early Medieval Archaeology and Literature (also Archaeology 617, English 417 and 617)**
4 credits. Prerequisite: permission of instructor. Enrollment limited to 15 students. This course may be used as one of the three pre-1800 courses required of English majors. R. T. Farrell.
For description, see ENGL 417.

**ARKEO 425 Seminar on the Bronze Age Architecture of Asia Minor (also Art History 425 and Classics 432)**
4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
P. I. Kuniholm.

**ARKEO 432 Sardis and the Cities of Asia Minor (History of Art 424 and Classics 432)**
4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
A. Ramage.

**ARKEO 434 The Rise of Classical Greece (also History of Art 434 and Classics 434)**
Spring. 4 credits. Recommended: Classics 220 or 221 or History of Art 220 or 221, or permission of instructor. Not offered 1998-99.
P. I. Kuniholm.
For description, see ART H 434.

**ARKEO 435 Seminar on Roman Art and Archaeology (also Classics 435 and History of Art 427)**
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1998-99.
A. Ramage.
For description, see ART H 427.

**ARKEO 520 Seminar in Classical Archaeology (also History of Art 520 and Classics 630)**
P. I. Kuniholm.
For description, see ART H 520.

**ARKEO 617 Early Medieval Archaeology and Literature (also Archaeology 417, English 417 and 617)**
Spring. 4 credits. R. T. Farrell.
For description, see ENGL 417.

**ARKEO 629 The Prehistoric Aegean (also Classics 629)**
4 credits. For graduate students, and advanced undergraduates with permission of instructor. Not offered 1998-99; next offered 1999-2000.
J. E. Coleman.
For description, see CLASS 629.

**CLASS 220 Introduction to Art History: The Classical World (also History of Art 220)**
Fall. 4 credits. J. Coleman.
For description, see CLASS 220.

**CLASS 319 Art in the Daily Life of Greece and Rome (also History of Art 319)**
Spring. 4 credits. A. Ramage.
For description, see ART H 319.

**CLASS 322 Greeks and Barbarians (also History of Art 328)**
Spring. 4 credits. Prerequisite: Classics 220 or 221, or permission of instructor.
J. Coleman.
For description, see CLASS 322.
[CLASS 326] Greek Cities and Towns
(also History of Art 326) #
For description, see CLASS 326.

[CLASS 329] Greek Sculpture (also History of Art 329) #
For description, see CLASS 329.

CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also Religious Studies 333) #
Fall. 4 credits. A previous course in Classics (civilization or language) or Religious Studies 101 is recommended. K. Clinton.
For description, see CLASS 333.

ART H 322 Arts of the Roman Empire
(also Classics 350)
Fall. 4 credits. A. Ramage.
For description, see ART H 322.

[ART H 325] Greek Vase Painting
(also Classics 325) #
For description, see ART H 325.

[ART H 327] Greek and Roman Coins
(also Classics 327) #
For description, see ART H 327.

LA 292 Creating a Second Nature
Spring. 3 credits. Prerequisites: none. Anthropology 100, Archaeology 100, or Classics/History of Art 220 recommended. K. Gleason.
For description, see LA 292.

D. New World Archaeology

ARKEO 355 Ancient Mexico and Central America
(also Anthropology 355) #
For description, see ANTHR 355.

[ARKEO 463] Seminar in Archaeology
(also Anthropology 463) #
Fall. 4 credits. Not offered 1998-99.

[ANTHR 456] Mesoamerican Religion, Science, and History @
Fall. 4 credits. Not offered 1998-99.

[LA 360] Pre-Industrial Cities and Towns of North America
(also CRP 360)
For description, see LA 360.

E. Methodology and Technology

ARKEO 262 Laboratory in Landscape Archaeology
(also Landscape Architecture 262)
Spring. 3 credits. S. Baugher.
For description, see LA 262.

ARKEO 285 Art, Archaeology, and Analysis
(also Art 372, Engineering 185, English 185, Geology 200, MS&E 285, History of Art 200, NS&E 285, and Physics 200)
Spring. 3 credits. Basic. Does not meet liberal studies distribution requirements. Staff.
For description, see ENGR 185.

ARKEO 309 Dendrochronology of the Aegean
(also History of Art 309 and Classics 309)
Fall and spring. 4 credits. Limited to 10 students. Prerequisite: permission of instructor. P. I. Kuniholm.
For description, see ART H 309.

ARKEO 370 Environmental Archaeology
(also Archaeology 370 and Anthropology 370 and 670)
Fall. 4 credits. Prerequisite: two previous courses in archaeology or permission of instructor. T. P. Volman.
For description, see ANTHR 370.

ARKEO 405 Archaeological Research Design
(also Archaeology 605 and Anthropology 405/605)
Spring. 4 credits. Basic. Prerequisite: permission of instructor. J. S. Henderson, T. P. Volman.
For description, see ANTHR 405.

[ARKEO 423] Ceramics
(also History of Art 423 and Classics 423)
4 credits. Prerequisite: permission of instructor. Not offered 1998-99. Staff.

[ARKEO 458] Archaeological Analysis
(also Archaeology 658 and Anthropology 458/658) @
Spring. 4 credits. Prerequisite: one course in archaeology or permission of instructor. Enrollment limited to 15 students. Not offered 1998-99. J. S. Henderson.
For description, see ANTHR 458.

[ARKEO 601] Graduate Colloquium in Archaeology
4 credits. Open to graduate students and advanced undergraduates by permission of instructor. Not offered 1998-99. Staff. Faculty members of the Program in Archaeology and invited speakers will present summaries of the different aspects of archaeological analysis. Topics may include: lithics, ceramics, metallography, and neutron activation analysis, dendrochronology and other chronological techniques, settlement patterns, inscriptions, human and animal bones.

ARKEO 605 Archaeological Research Design
(also Archaeology 405 and Anthropology 405/605)
Spring. 4 credits. Basic. Prerequisite: permission of instructor. J. S. Henderson, T. P. Volman.
For description, see ANTHR 405.

ARKEO 670 Environmental Archaeology
(also Archaeology 370 and Anthropology 370 and 670)
Fall. 4 credits. Prerequisite: two previous courses in archaeology or permission of instructor. T. P. Volman.
For description, see ANTHR 370.

[ANTHR 371] Human Paleontology
(also Biological Sciences 371)
Fall. 4 credits. Prerequisite: one year of introductory biology. Anthropology 101, or permission of instructor. Not offered 1998-99. K. A. R. Kennedy.
For description, see ANTHR 371.

[ANTHR 474] Laboratory and Field Methods in Human Biology
(also Biological Sciences 474)

LA 261 Urban Archaeology
(also CRP 261)
Fall. 3 credits. S. Baugher.
For description, see LA 261.

Asian American Studies Program

The Asian American Studies Program is a university-wide academic program housed administratively within the College of Arts and Sciences. Its aim is to promote teaching, research, and educational activities related to Asian Americans and to serve as a resource to the campus and regional communities. The program's undergraduate courses, offered within the program and cross-listed with departments in various colleges, meet distribution requirements and count toward a concentration in Asian American Studies. The program does not offer a graduate course of study, but students can undertake graduate work in Asian American Studies within selected disciplines of the university.

Undergraduate Concentration

The program's undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Asians in America. The course of study stresses developments within the United States, but also underscores the transnational and comparative contexts of Asian America and the field's connections with African American, American Indian, Latino, and Women's Studies. Students must work with a faculty adviser from among the program's affiliated faculty and must complete at least fifteen (15) units of credits as follows: (a) AAS 110 and two (2) additional courses in Asian American Studies; (b) one (1) course in Africana, American Indian, Latino Studies, or Women's Studies*; and (c) one (1) course in East Asian, South Asian, or Southeast Asian Studies.* (*These courses must be approved by the student's faculty adviser, and they should address issues of race, gender, or the histories and cultures of Asian peoples.) Students must file an application for the concentration with the Asian American Studies Program.

Resource Center

The program's Asian American Studies Resource Center provides meeting space for the more than twenty-five undergraduate student organizations of the Cornell Asian Pacific Student Union and the graduate student Asian Pacific American Graduate Association. It also holds a modest print collection of books, periodicals, and newspapers; a current news clip file; a comprehensive data base of publications on Asian Americans since 1977; and a sizable collection of videotapes on the Asian American experience.

Research

The program encourages faculty and student research on Asian Americans by sponsoring guest lectures, conferences, film festivals, readings, and exhibits. It also funds research projects and student travel to conferences and research sites. The Asian American Studies Workshop is the program's principal research initiative, engaging some faculty students with invited faculty from other universities in a year-long intensive study of selected themes.
Courses

AAS 110 Introduction to Asian American Studies
Fall and spring. 3 credits.
Interdisciplinary, cross-cultural introduction to Asian American Studies focusing on contemporary issues. Major themes include: identity and stereotypes, gender, family, community, education, migration and labor, and anti-Asianism. Coverage will be given to both Hawaiian and the U.S. mainland, and to Asian Indians, Chinese Filipinos, Hawaiians, Japanese, Koreans, and Southeast Asians.

AAS 213 Asian American History
For description, see HIST 213.

AAS 303 Asians in the Americas: A Comparative Perspective (also Anthropology 303)
Spring. 4 credits.
The common perception of ethnicity is that it is "natural" and an inevitable consequence of cultural difference. "Asians" overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into their host societies and cultures. But, who are the "Asians"? On what basis can we label Asians an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course will examine the dynamics behind group identity and ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies will focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

AAS 262 Asian American Literature
For description, see ENGL 262.

AAS 412 Undergraduate Seminar in Asian American History (also History 412)
Spring. 4 credits.
For description, see HIST 412. A reading and research seminar that will cover various topics in Asian American history.

AAS 435 Asian American Images in Film
3 credits. Prerequisite: AAS 110 or permission of instructor. Not offered 1998-99.
Examination of images of Asians in American film and television productions within their historical and socio-cultural contexts. Use of film and media theory to assess the impact of those images on both Asian and non-Asian American viewers. Students will be challenged to create, in video or on paper, images that avoid stereotypes and depict more realistically the Asian American experience.

AAS 438 Immigration and Ethnic Identity
For description, see SOC 438.

AAS 467 Psycho-Social Issues in Asian American Identity
For description, see HDPS 467.

AAS 478 Self and Nation in Asian-American Literature (also English 478)
A study of the ways in which Asian American writers have constructed discourses of self and nation. Topics will include nationalism, feminism, identity politics, and theories of minority discourse. In our reading of selected works of protest, politics, and repressed identity, we shall be asking questions about the relation of these works to the moment of their production and reception and to the public, in which these textual representations engage with shifting cultural and political struggles. Writers under discussion may include: Carlos Bulosan, Theresa Hak Kyung Cha, Frank Chin, Jessica Hagedorn, David Henry Hwang, Maxine Hong Kingston, Joy Kogawa, David Mura.

AAS 492 Twentieth Century Women Writers of Color
Spring. 4 credits.
This course will explore a range of writing—novels, stories, poems, essays—by American women writers of color in the twentieth century. We will look at how these writing articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region, and class. Readings may include works by Joy Harjo, Leslie Marmon Silko, Sandra Cisneros, Gloria Anzaldua, Theresa Hak Kyung Cha, Sigrid Nunez, Jamaica Kincaid, Jane Hong Kingston, and Gwendolyn Brooks.

AAS 485 Independent Study
Fall or spring. 1–4 credits.
Topic and credit hours to be mutually arranged between faculty and student. Independent Study Forms must be approved by Asian American Studies Program Office.

Biology and Society Major

The Biology and Society major is ideally suited for students who wish to combine training in biology with exposure to perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing foundational training in basic biology, Biology and Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology and Society major, which involves faculty from throughout the university, is offered by the Department of Science & Technology Studies. Students in the College of Arts and Sciences and the College of Human Ecology are eligible for the major. In addition, undergraduates in the College of Agriculture and Life Sciences can develop an approved sequence of courses from the Biology and Society curriculum under general studies. The major is coordinated for students in all colleges through the Biology and Society office. Students can get information, specific course requirements, and application procedures for the major from the undergraduate records office in 275 Clark Hall, 255–6047.

Because the major is multidisciplinary, students must attain a basic understanding of the several disciplines it comprises. The curriculum includes courses in ethics, mathematics, statistics, history, physical anthropology, and social studies of science and biology; and basic biology (e.g., genetics and development: biochemistry and molecular-cell biology; ecology, evolutionary biology) as well as integrative courses offered through Biology and Society. In addition, majors are required to take a core course and must develop a theme: an intellectually coherent grouping of courses representative of their special interest in Biology and Society. Recommended themes in the Biology and Society major include biology, behavior, and society; biology and human population; biology and public policy; environment and society; agriculture, and society; and health and society. Students may also develop their own individually tailored themes (which in recent years have included topics such as biotechnology and society; and agriculture, environment, and society). In consultation with their faculty adviser, students select courses that meet the foundation and core course requirements so as to build a coherent theme. Sample curricula for the recommended themes and for several student developed themes are available in the Biology and Society office.

There are student advisers and faculty available (according to posted office hours or by appointment) in the Biology and Society offices, 275 Clark Hall or 278 Clark Hall, to answer questions and to provide assistance.

Admission to the Major
All students should have completed a year of college-level biology before submitting an application during their sophomore year. Juniors are considered on a case-by-case basis. Upper-division applicants should realize the difficulties of completing the major requirements in fewer than two years. The application includes (1) a one-page statement...
explaining the student's intellectual interests in the Biology and Society major and why the major is consistent with the student's academic goals and interests; (2) the theme the student wishes to pursue in the major; (3) a transcript of work completed at Cornell University and elsewhere, if applicable, current as of the date of application.

Acceptance into the major requires completion of the course sequence in introductory biology. Sophomores in the process of completing this prerequisite may be admitted to the major on a provisional basis. It is the student's responsibility to assure that final acceptance is granted upon satisfactory completion of the introductory biology sequence. Although only introductory biological science is a prerequisite for acceptance, students will find it useful to have completed some of the other requirements (listed below) by the end of their sophomore year, preferably in the first semester. Students who are considering the major may also find it beneficial to take *S&T 201 What is Science* in their freshman or sophomore year. Human Ecology students should also consult the current Human Ecology Guide and meet with the college advising coordinator, Kay Obendorf, 202 Martha Van Rensselaer Hall, 255–3151.

Major Requirements

1) Basic courses

A. Biological sciences 101–104 or 105–106 or 107–108 (prerequisite for admission to Biology and Society).

B. College calculus (one course)** Math 106, 111, 112 or any higher level calculus.

Recommended but not required: General chemistry (one year sequence) (prerequisite to biochemistry and other chemistry courses): Chemistry 103–104, 207–208, or 215–216.

2) Foundation Courses (should be completed by end of junior year).

A. Ethics: One course; B&SOC 205 (also S&T 205) or B&SOC 206 (also S&T 206)**

B. Social sciences/humanities foundation: Two courses; one from any two of the following subject areas: History of Science; Philosophy of Science; Sociology of Science; Politics of Science; and Science Communication.**

C. Biology foundation (Breadth requirement): three courses; one each from three of the following subject areas: Ecology (BIO ES 261); Evolutionary Biology (BIO ES 270), Biochemistry, Molecular and Cell Biology (BIO BM 231 or 330 or 331 or 333); Microbiology (BIO MI 290); Genetics and Development (BIO GD 281 or 282 or Plant Breeding 225); Neurobiology and Behavior (BIO NB 221 or 222); Botany (BIO PL 241); and Anatomy and Physiology (BIO AP 311 or NS 341 but NOT BIO AP 212).

D. Biology foundation (Depth requirement): One biology course for which one of the above (2.C.) is a pre-requisite.

E. Statistics: One course selected from MATH 171, ILR 210, BTRY 215, AG EC 310, EDUC 353, Soc 301, Psych 350, Econ 319, OR & IF 370, BTRY 601, CRP 320.

3) Core Course: (one course). Should be completed by end of junior year.

B&SOC 301 Biology and Society: The Social Construction of Life (also S&T 401), or Phil 286: Science and Human Nature (also S&T 280).

4) Theme (five courses that correspond to the theme selected by the student). These courses must be above the 100-level, at least 3 credit hours and taken for a letter grade. Choose these courses as follows:

A. Natural Science Issues/Biology Elective (two courses). Select from the list of B&SOC approved Natural Science Issues Courses or choose courses with introductory biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTR, FOOD, HDF5, NS, NTR5, PL, BR, PI, PA, PSYCH, VTMED.

B. Humanities/social sciences electives** (Two courses. Courses from the list of Senior Seminars may be used as theme electives if not used to meet another requirement).

C. Senior Seminar (One course taken senior year). Courses change yearly.

Students may petition to take a second statistics course (an advanced course, in sequence with the statistics course taken in the foundation) in place of the calculus requirement.

** Among the courses taken to meet the social sciences and humanities requirements (2.A, 2.B, 3, and 4.C), a minimum of two social science courses and two humanities courses must be chosen. History of science and philosophy of science courses may be counted toward the humanities requirement for the major.

Independent Study

Projects under the direction of a biology and society faculty member are encouraged as part of the program of study in the student's theme area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1–4 credits in Biology and Society 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S/U option. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology and Society office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented undergraduate students whose major is Biology and Society (B&SOC). Students who enroll in the honors program are expected, with faculty guidance, to do independent study and research dealing with issues in biology and society. Students who participate in the program should have the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career.

Biology and Society majors are considered for entry into the honors program at the end of the spring semester before their senior year. Application forms for the honors program are available in the Biology and Society office, 275 Clark Hall. The honors program is available to Biology and Society majors from the College of Arts and Sciences. Biology and Society majors in the Colleges of Human Ecology and Agriculture and Life Sciences must be selected by an honors committee within their college. To qualify for the Biology and Society honors project, students must have an overall Cornell cumulative grade-point average not lower than 3.30, have formulated a research topic, and have found a project supervisor (with a Cornell appointment) and a Biology and Society faculty member willing to serve as their project supervisor. Applications will be reviewed by a committee headed by the director of undergraduate studies, who will notify students directly of the outcome. Students will be permitted to register for the honors program only by permission of the department. More information on the honors program is available in the Biology & Society office, 275 Clark Hall (255-6047).

I. Freshman Writing Seminars

[B&S SOC 103 In the Company of Animals Fall. 3 credits. Not offered 1998–99]

II. Foundation Courses

A. Ethics (select one)

B&S SOC 205 Ethical Issues in Health and Medicine (also Science and Technology Studies 205)Fall. 4 credits. Limited to 150 students. Open to sophomores, juniors, and seniors. Prerequisites: none. 5 Hilgardes. In today's rapidly changing world of health and medicine, complex ethical issues arise in many contexts—from the private, interpersonal interactions between doctor and patient to the broad, mass-mediated controversies that make medicine into headline news. This course examines ethical problems and policy issues that arise in contemporary medicine, health care, and biomedical research. Tools for ethical analysis are applied to a variety of cases and fundamental questions in bioethics. Perspectives from social science, history, and law also inform the course. We will explore ethical questions that arise in a number of substantive contexts, including the doctor-patient relationship, medical decision making near the end of life, human experimentation, genetics and reproductive technology, public health, and the allocation of scarce resources.**
B&SOC 206 Ethics and the Environment (also Science and Technology Studies 286)
Spring. 4 credits. Limited to 60 students. Open to all undergraduates; permission of instructor required for freshmen. Staff.
We address how ethical analysis helps shape our responses to environmental problems. Case studies will help guide our assessments. You will be challenged to develop ethical solutions or approaches on your own and in groups. Major aims include: articulating the relationships between knowledge and values; exploring the ethical implications of different conceptions of “nature”; and distinguishing between ethics and economics, ecology, ideology, politics, and prudence or wisdom. A background in basic ecology OR environmental issues OR ethics is helpful.
R. Social Sciences/Humanities Foundation (2 courses, 1 from any 2 areas)

1. History of Science
BIOG 207 Evolution (also Science and Technology Studies 287 and History 287)
Fall. 3 credits. (May not be taken for credit after BIOES 378, Evolutionary Biology.) Staff.
For description, see BIOG 207.

HIST 282 Science in Western Civilization (also Science and Technology Studies 282)
Spring. 4 credits. P. Dear.
For description, see HIST 282.

S&T 233 Agriculture, History, and Society: From Squanto to Biotechnology
Fall. 4 credits. M. Rossiter.

S&T 355 Computers: From Babbage to Gates
Fall. 4 credits. M. Price.

[S&T 390 Science in the American Polity: 1800–1960 (also GOVT 308)]
For description, see S&T 390.

[S&T 433 Comparative History of Science
Spring. 4 credits. M. Rossiter.

[S&T 444 Historical Issues of Gender and Science (also Women's Studies 444)]
For description, see S&T 444.

2. Philosophy of Science
S&T 201 What is Science? An Introduction to the Social Studies of Science and Technology
Fall. 3 credits. J. Reppy.

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)
Spring. 4 credits. May be used to meet the philosophy of science requirement if not used to meet the core course requirement.
For description, see PHIL 286.

PHIL 381 Philosophy of Science: Knowledge and Objectivity (also Science and Technology Studies 381)
Fall. 4 credits. Limited to 30 students. R. Boyd.
For description, see PHIL 381.

3. Sociology of Science
B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)
Fall. 4 credits. Prerequisite: two semesters of social science or humanities and one year of introductory biology. Limited to 25 students. May be used to meet the sociology of science requirement if not used to meet the core course requirement. Staff.
See Core Courses for description.

B&SOC 342 Sociology of Science (also Science and Technology Studies 442 and City and Regional Planning 442)
Fall. 3 credits.

HSS 246 Determinants of Behavior (also PAM 201)
Fall. 3 credits.

R SOC 208 Technology and Society
Fall. 3 credits.

SOC 434 The Sociology of Reproduction (also Women's Studies 435)
Spring. 4 credits.
For description, see SOC 434.

S&T 201 What Is Science? An Introduction to the Social Studies of Science and Technology
Fall. 3 credits. J. Reppy.

S&T 311 The Sociology of Medicine
Spring. 4 credits. S. Hilgartner.

4. Politics of Science
[B&SOC 406 Biotechnology and Law (also Science and Technology Studies 406)]
Fall. 4 credits. Not offered 1998–99. Staff.

[B&SOC 407 Law, Science, and Public Values (also Government 407 and Science and Technology Studies 407)]
Fall. 4 credits. Not offered 1998–99.

S&T 391 Science in the American Polity: 1960–Now (also Government 309)
Spring. 4 credits. M. Dennis
For description, see S&T 391.

[S&T 427 Politics of Environmental Protection in America (also Government 427)]
Fall. 4 credits.
For description, see S&T 427.

5. Science Communication
COMM 260 Scientific Writing for Public Information
Fall or spring. 3 credits. Limited to 25 nonfreshman or graduate students per section. Prerequisite: any college-level writing course.

COMM 285 Communication in the Life Sciences
Spring. 3 credits. B. Lewenstein.

COMM 315 Introduction to Health Communication
Fall. 3 credits. C. Trumbo.

[COMM 352 Science Writing for the Mass Media (also Science and Technology Studies 352)]
Fall. 3 credits. Not open to freshmen. Limited to 25 students. Prerequisite: one college writing course. Not offered 1998–99. B. Lewenstein.
For description, see COMM 352.

COMM 421 Communication and the Environment
Spring. 3 credits. J. Shanahan.

[COMM 466 Communication of Science and Technology
Fall. 3 credits. Not offered 1998–99. B. Lewenstein.]

C. Biology foundation (breadth requirement): Three courses one from three of the following subject areas:

1. Biochemistry, Molecular and Cell Biology
BIOBM 330 Principles of Biochemistry, Individual Instruction
Fall or spring. 4 credits.

BIOBM 331 Principles of Biochemistry, Lectures
Fall. 4 credits. (2 credits if taken after Biological Sciences 231.)

NS 262 The Cell and the External World
Spring. 3 credits.

2. Ecology
BIOES 261 Ecology and the Environment
Fall. 4 credits.

3. Genetics and Development
BIOGD 281 Genetics
Fall, spring, or summer. 5 credits.

BIOGD 282 Human Genetics
Spring. 3 credits. (2 credits if taken after Biological Sciences 281.)

[PL BR 225 Plant Genetics
Spring. 4 credits. Offered alternate years. Not offered 1998–99.]

4. Evolutionary Biology
BIOES 278 Evolutionary Biology
Spring. 4 credits.

5. Microbiology
BIOMI 290 General Microbiology
Lectures
Fall, spring, or summer. 3 credits. Prerequisites: BIOMI 101–102 and 103–104 and CHEM 104 or 288, or equivalent. Recommended: concurrent registration in BIOMI 291.

6. Neurobiology and Behavior
BIONB 221 Neurobiology and Behavior I: Introduction to Behavior
Fall. 3 or 4 credits. (4 credits with discussion and written projects). Not open to freshmen.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology
Spring. 3 or 4 credits. (4 credits with discussion and written projects). Not open to freshmen. Limited to 20 students.
Examples of social science electives

ARME 464 Economics of Agricultural Development
Spring. 3 credits.

[ANTHRO 211 Nature and Culture @
Spring. 3 credits. Not offered 1998-99.]

BIOES 673 Human Evolution: Concepts, History, and Theory (also Anthropolgy 873)
Fall. 3 credits.
For description, see BIOES 673.

CRP 480 Environmental Politics
Spring. 4 credits.

[CRP 451/551 Environmental Law
Fall. 4 credits. Not offered 1998-99.]

HDFS 241 History of Childhood in the United States
Fall. 3 credits.

[HDFS 258 The Historical Development of Women as Professionals, 1800 to the Present (also Women's Studies 238 and History 238)
Fall. 3 credits. Limited to 120 students. Not offered 1998-99.]

HSS 315 Human Sexuality (also PAM 380)
Spring. 3 credits.

[HSS 325 Health Care Services and the Consumer (also PAM 381)
Fall. 3 credits. Offered alternate years. Not offered 1998-99.]

HSS 330 Ecology and Epidemiology of Health (also PAM 303)
Fall. 3 credits.

HSS 335 Contemporary Issues in Women's Health (also PAM 350)
Fall. 3 credits.

HSS 634 Health Care Organization (also PAM 657)
Fall. 3 credits.

HSS 688 Long-Term Care and the Aged: Alternative Health and Social Service Delivery Systems (also PAM 668)
Spring. 3 credits.

NS 457 National and International Food Economics (also Economics 374)
Spring. 3 credits.

NTRES 400 International Environmental Issues
Fall. 4 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

R SOC 201 Population Dynamics (also Sociology 205)
Spring. 3 credits.

R SOC 205 Rural Sociology and International Development
Spring. 3 credits.

R SOC 324 Environment and Society (also Science & Technology Studies 324 and Sociology 324)
Fall and summer. 3 credits.
For description, see R SOC 324.

[SOC 490 Society and Survival
Fall. 3 credits. Not offered 1998-99.]
Examples of humanities electives

NTRES 407 Religion, Ethics, and the Environment
Spring. 4 credits.

PHIL 241 Ethics (by petition for breadth requirement)
Spring. 4 credits.

PHIL 368 Global Climate and Global Justice (also Government 468)
Fall. 4 credits. Not offered 1998-99.

PHIL 681 Philosophy of Science (also Science & Technology Studies 681)
Spring. 4 credits.
For description, see PHIL 681.

C. Senior Seminars

BIO G 467 Seminar in the History of Biology (also Biology & Society 447, History 415, and Science & Technology Studies 447)
Summer. 4 credits.
For description, see BIO G 467.

BIO G 469 Food, Agriculture, and Society (also Biology & Society 469 and Science & Technology Studies 469)
Spring. 3 credits.
For description, see BIOG 469.

BIOES 661 Environmental Policy (also Biology & Society 461 and Agriculture and Life Sciences 661)
Fall, spring. 6 credits.
For description, see BIOES 661.

CEH 444 Housing for the Elderly (also PAM 375)
Spring. 3 credits.

[HDFS 466 Neurobiology of Personality and Psychopathy]
Fall. 4 credits. Not offered 1998-99.

HDFS 610 Processes in Human Development
Fall. 3 credits.

[HDFS 660 Social Development]

[HDFS 685 Seminar on “Critical Issues in Human Development: Research and Reality]

HDFS 690 The Social History of American Medicine
Spring. 3 credits.

HSS 335 Contemporary Issues in Women’s Health (also PAM 350)
Fall. 3 credits.

HSS 625 Health Care Services: Consumer and Ethical Perspectives (also PAM 652)
Fall. 3-4 credits.
Permission of instructor required. If using this course as a senior seminar, B&SOC majors must take it for 4 credits by writing a major paper. Enrollment limited—preference given to HSS students.

HSS 631 Managed Health Delivery System: Inpatient-Ambulatory Care (also PAM 656)
Spring. 3 credits.

[NS 349 Geriatric Nutrition]
Fall. 3 credits. Not offered 1998-99.

NS 421 Nutrition and Exercise
Spring. 2-3 credits.

[R SOC 408 Human Fertility in Developing Nations (also Biology & Society 404)]
For description, see R SOC 408.

R SOC 410 Population and Environment
Spring. 3 credits.

[R SOC 411 Population Policy (also Biology & Society 414)]
For description, see R SOC 411.

[S&T S 406 Biotechnology and the Law (also Biology & Society 406)]
Fall. 4 credits. Not offered 1998-99. Staff.
For description, see S&T S 406.

[S&T S 427 Politics of Environmental Protection in America (also Biology & Society 427 and Government 427)]
Fall. 4 credits. Not offered 1998-99. Staff.
For description, see S&T S 427.

S&T S 490 Integrity of Scientific Practice
Fall. 4 credits. S. Hilgartner.

S&T S 495 Genetic Engineering: Politics and Sociocultural Perspective (also Government 634)
Spring. 4 credits. S. Hilgartner.
For description, see S&T S 495.

V. Other Courses

B&SOC 375 Independent Study
Fall or spring. 1-4 credits. Prerequisite: must have written permission of faculty supervisor and Biology and Society major. Projects under the direction of a Biology and Society faculty member are encouraged as part of the program of study within the student’s concentration area. Application for research projects are accepted by individual faculty members. Students may enroll for 1-4 credits in Biology and Society 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S/U option. Students may elect to do an independent study project as an alternative to, or in advance of, an honors project. Application for faculty study, scholarly activities, and undergraduate opportunities are available in the Biology and Society office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

B&SOC 400 Undergraduate Seminar
Fall or spring. Variable credit. May be repeated for credit.
From time to time different seminars on topics of interest to undergraduates are offered. Topics and instructors are listed in the biology and society supplement issued at the beginning of each semester.

B&SOC 499 Honors Project
Fall and spring. 3-5 credits each term. Open only to Biology and Society students in their senior year.
Students who are admitted to the honors program are required to complete two semesters of honors project research and to write an honors thesis. The project must include substantial research and the completed work should be of wider scope and greater originality than is normal for an upper-level course.

Students may take 3-5 credits per semester up to a maximum of 8 credits in B&SOC 499, Honors Project. Students should note that B&SOC 499 is to be taken in addition to those courses that meet the regular major requirements. The student and the project supervisor must reach clear agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of the first semester, a letter grade will be assigned and the advisers, in consultation with the Director of Undergraduate Studies, will evaluate whether or not the student should continue working on an honors project. Students who do continue in the honors program for the second semester will receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

Applications and information are available in the Biology and Society office, 275 Clark Hall.

Cognitive Studies Program

Cognitive studies is comprised of a number of disciplines that are linked by a major concern with fundamental capacities of the mind, such as perception, memory, reasoning, language, and the organization of motor action. In the College of Arts and Sciences these disciplines are represented in the departments of Computer Science, Linguistics, Mathematics, Modern Languages, Biological Psychology, and Sociology. Elsewhere in the university they are represented in the Department of Human Development (College of Human Ecology), the Section of Neurobiology and Behavior (Division of Biological Sciences), the Department of Education (College of Agriculture and Life Sciences), and the Johnson Graduate School of Management.

The issues addressed in cognitive studies arise at several levels. At the broadest level are problems of characterizing such basic notions as “mind,” “knowledge,” “information,” and “meaning.” At a more specific level are questions regarding the abstract operating principles of individual components of the mind, such as those underlying visual perception, language ability, and understand-
Undergraduate Concentration

An interdisciplinary undergraduate concentration in Cognitive Studies is available to Cornell University undergraduates in the College of Arts and Sciences. Students from other colleges who seek such a concentration should discuss such possibilities with the Cognitive Studies office, which will provide information and contacts concerning such concentrations.

The undergraduate concentration in Cognitive Studies is designed to enable students to engage in a structured program directly related to the scientific study of cognition and the mind. The concentration provides a framework for the design of structured, supervised programs of study in this growing interdisciplinary field. Such programs of study serve as complements to coursework in a single discipline as represented by an individual department. It is considered crucial that students gain a strong background in their major, independent of their work in the concentration. The Cognitive Studies Program faculty have designed five structured “tracks” that offer students different ways of satisfying the concentration. In addition, students are always able to construct their own programs of study subject to approval by their concentration adviser. The courses listed under each track are Program suggestions. The student should consult with his/her Cognitive Studies adviser to develop a more customized curriculum. In some cases, students may want to combine or cross tracks.

In general, it is expected that students in the concentration will take COGST 101, a lab course such as COGST 201, and three courses at the 300 or 400 level in at least two departments. Even though only five courses are required to complete the concentration, we expect that students interested in cognitive studies will often take more, and we encourage them to do an independent research project (COGST 470) and a research workshop such as COGST 471. The five tracks are as follows. The first track involves a particular approach to the study of cognition. The other four tracks are structured around specific content domains and consist of sets of suggested course clusters. Please note that many of these courses have substantial prerequisites.

   Foundation issues in cognitive science are intimately relevant to real-world settings. The Cognitive Studies in Context track offers students the opportunity to learn and independently explore how theory and research on the mind can help us better understand how we use information in much of our daily activities, whether it be the workplace, the classroom, or any other aspect of everyday life. Students will come to better understand the cognitive ergonomics of such diverse settings as an aircraft cockpit, a quality control station an assembly line, or an anesthesia station in a surgical suite. They will come to better understand the perceptual constraints that help tailor the design of visual communication systems, or the linguistic constraints that help tailor text-based communication. They will come to see how the functional architecture of human memory guides the presentation and use of information in a wide array of settings. They will also learn how design constraints on computer hardware and software interact with human capacities and biases.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

   In addition, three more upper-level approved courses in Cognitive Studies areas will normally be expected.

2. Perception and Cognition

   This track focuses on psychological, computational, and neurobiological approaches to the interface between perception and cognition. Students will develop a grasp of the continuum between sensory impressions and concepts.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

   In addition, three more upper-level approved courses in Cognitive Studies areas will normally be expected.

3. Language and Cognition

   This track focuses on the representation, processing, and acquisition and learning of language, as well as its role in cognition and culture. Students will acquire skills and knowledge in formal and applied linguistic theory, psycholinguistic experimentation, and computational modeling techniques.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

   COGST 450/LING 450/PSYCH 457, Lab Course: Language Development

   COM S 411, Programming Languages and Logic

   LING 203, Introduction to Syntax and Semantics

   LING/PHEL COGST 270, Truth and Interpretation

   LING 301-302, Phonology I & II

   LING 303-304, Syntax I & II

   LING 309-310, Morphology I & II

   LING 319-320, Semantics I & II

   LING 325, Pragmatics

   LING 350/COG ST 350, Representing Language: Knowledge Taught and Untaught

   LING 403, Introduction to Applied Linguistics

   LING 409, Psycholinguistics of Second Language Reading

   LING 411-412, Semantics I & II

   PHIL 332, Philosophy of Language

   PSYCH 215/LING 215, Psychology of Language

   PSYCH 370/LING 370, Language and Cognition

   PSYCH 415, Concepts, Categories, and Word Meanings

   PSYCH 416, Modeling Perception and Cognition

   PSYCH 435/LING 436/HDFS 436/COGST 436, Language Development

4. Cognition and Information Processing

   This track focuses on how the mind (or a computer) can encode, represent, and store information. Students will develop an understanding of concepts, categories, memory, and the nature of information itself.

   COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science

   COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

   COGST 450/LING 450/PSYCH 457, Lab Course: Language Development

   COM S 211, Computers and Programming

   COM S 212, Structure and Interpretation of Computer Programs

   COM S 472, Foundations of Artificial Intelligence

   COM S 473, Practicum in Artificial Intelligence

   PHIL 262, Philosophy of Mind

   PHIL 362, Philosophy of Mind

   PSYCH 309, Development of Perception and Representation

   PSYCH 311, Introduction to Human Memory

   PSYCH 412, Laboratory in Cognition and Perception

   PSYCH 416, Modeling Perception and Cognition

   PSYCH 419, Neural Networks Laboratory

5. Cognitive Neuroscience

   This track focuses on neurobiological and computational approaches to understanding how perception and cognition emerge in the human brain. Students will acquire...
knowledge of what neural structures subserve what perceptual/cognitive processes, and how they interact.

COGST 101/COM S 101, LING 170 PHIL 191/PSYCH 102, Introduction to Cognitive Science

COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

COGST 328, Biopsychology of Learning and Memory

PSYCH 590, Introduction to Sensory Systems

PSYCH 416, Modeling Perception and Cognition

PSYCH 419, Neural Networks Laboratory

PSYCH 425, Cognitive Neuroscience

PSYCH 440, The Brain and Sleep

Students in any major of the College of Arts and Sciences are eligible to apply for any of the above concentration as well as to construct their own in collaboration with a Cognitive Studies Program adviser. Independent majors and College Scholars may also apply. Students from other colleges may apply, but colleges vary in their procedures for formal recognition of this concentration (contact the Cognitive Studies office for details). To enter the concentration formally, the student should consult with a member of the Cognitive Studies Undergraduate Concentration Committee (see below), who will assist the student with selection of a concentration adviser with expertise in the student’s main areas of interest.

In addition to assisting in and approving the student’s selection of courses, the concentration adviser serves as a general source of information about the field of cognitive studies, relevant resources around the university, and job and graduate school opportunities. Often, the adviser can help the student develop independent research experience.

A Cognitive Studies undergraduate laboratory and computer facility is available for all students with a Cognitive Studies concentration. This facility will help link resources from different labs on the Cornell campus as well as providing a central location for developing and conducting experimental research in cognitive studies.

Students who complete the concentration requirements will have their concentration in Cognitive Studies officially represented on their transcript. In addition, students who have made very substantial progress towards completing the requirements for the concentration will be eligible for enrollment in the Graduate Program in Cognitive Studies during their senior year (COGST 775-777).

Concentration Application Procedures.

Initial inquiries concerning the undergraduate concentration should be made to the Cognitive Studies Program coordinator, Sue Worster, cogst@cornell.edu, 255-6431, who will provide application materials and set up a meeting with a relevant member of the Undergraduate Concentration Committee.

To formally initiate the concentration in Cognitive Studies, a student must gain approval for a selection of courses from a concentration adviser (one of the Program faculty). The courses selected must form a coherent cluster that makes sense to both the adviser and the student. To be admitted to the concentration, the student must submit this Plan of Study to the Cognitive Studies undergraduate faculty committee for final approval.

Independent Research. The concentration encourages each student to be involved in independent research that bears on research issues in cognitive studies, if possible. COGST 470 is available for this purpose. It is recommended that students report on their research activities in an annual undergraduate forum. The Undergraduate Concentration Committee is committed to helping students find an appropriate research placement when needed.

The Committee for Undergraduate Concentration in Cognitive Studies consists of: Bart Selman, computer science, 5-5645, 4144 Upson Hall, selman@cs.cornell.edu; Draga Zec, linguistics, 5-0728, 217 Morrill Hall, DZ17@cornell.edu; Jason Stanley, philosophy, 5-6929, 216 Morrill Hall, Jason@cornell.edu; Michael Owren, psychology, 5-3855, 224 Uris Hall, MJ09@cornell.edu. The current Director of Undergraduate Studies is Draga Zec.

Graduate Minor.

For information, consult the program office (235 Uris Hall, 255-6431, cogst@cornell.edu or the director of graduate studies, Carol Rosen 255-0722, cr1@cornell.edu).

Courses

Cognitive Studies

COGST 101 Introduction to Cognitive Science (also COM S 101, LING 170, PHIL 191, PSYCH 102)

Fall. 3 credits. M. Spivey-Knowlton.

This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

COGST 201 Cognitive Science in Context Laboratory (also PSYCH 201 and COM S 201)

Fall or spring. 4 credits. Prerequisites: permission of the instructor or COGST 101/COM S 101/PSYCH 102. Applications will be accepted from second-semester freshmen, sophomores, and upperclassmen students majoring in psychology, linguistics, philosophy, or computer science.

Fall: limited to 24 students. Discussion and demonstrations W 10:10-11:00; lab M or W 1:25-4:25 plus additional time to be arranged by lab staff.

Spring: limited to 24 students. Discussion and demonstrations M 11:15-12:05; lab M 1:25-3:25 plus additional time to be arranged. D. Field and staff.

In this intensive course the principles and methods of cognitive science are applied directly to problems of the workplace and of everyday life. “Hands-on” experience with experiments is provided by state-of-the-art computing, display, and simulation techniques that focus on such topics as video communication, human-computer interaction, control of complex systems, use of the World Wide Web, etc. Class meetings are devoted to reviews of the literature on a given topic, discussions of upcoming laboratory exercises, and analysis of data. In laboratory sessions, smaller groups meet to carry out the experiments using the specialized equipment available (e.g., driving simulators, virtual reality, etc.).

COGST 450 Lab Course: Language Development (also LING 450 and PSYCH 437) (in conjunction with HDFS/PSYCH/LING 436, Language Development)

Spring. 2 credits. B. Lust.

This laboratory course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies Research Labs. This course is partially funded by a new National Science Foundation grant to Cornell's Cognitive Studies program, "Interdisciplinary Approaches to the Scientific Study of Language Knowledge and Acquisition." This project is intended to involve undergraduates in active research and to coordinate related subfields of several disciplines in a unified, laboratory-supported curriculum.

The course will include several structured modules dealing with topics covered in the survey course, HDFS/PSYCH/LING 436, Language Development. They will include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods to test hypotheses.

The lab course will meet once a week in group format. In addition, students will be given access to a research lab environment for independent work on assigned modules, and independent research throughout the week, and throughout the term.

COGST 470 Undergraduate Research in Cognitive Studies

Fall or spring. 1-4 credits. S-U grades optional. Prerequisite: permission of major adviser; written permission of Cognitive Studies faculty member who will supervise the research and assign the grade. Hours to be arranged. Cognitive Studies faculty.

Experience in planning, conducting, and reporting independent research in cognitive science, field, and/or library research in an interdisciplinary area relevant to cognitive studies.

COGST 471 Cognitive Studies Research Workshop

Fall or spring. Credits variable. Prerequisites: student must be enrolled in an independent research group (Interdisciplinary Cognitive Studies, e.g., COGST 470, or in a related department), or in honors thesis research in one of the departments relevant to Cognitive Studies. Staff (Interdisciplinary faculty from Cognitive Studies Program).

This course will provide a research workshop in which undergraduate students who are engaged in research in a particular area
relevant to cognitive science can meet across disciplines to learn and practice the essentials of research, using interdisciplinary approaches. In this workshop, students critique and discuss the existing literature in a field of inquiry, individual students present their research designs, methods and results from their independent research studies, debate the interpretation of their research results, and participate in the generation of new research hypotheses and designs, in a peer group of other undergraduate students involved in related research.

[LING 270] Truth and Interpretation (also COGST 270 and PHIL 270)
J. Stanley and M. Diesing.
In this course, with the use of classic papers in the philosophy of language and linguistics, we will motivate and introduce the basic concepts behind the project of giving a rigorous theory of meaning for natural language. Our goal will be to understand how philosophers and linguists have used concepts such as reference and truth to explain linguistic content. We will also discuss how issues of learnability and language processing raise constraints for this project.

LING 350 Representing Language: Knowledge Taught and Untaught (also COGST 350)
Fall. 4 credits. J. Gair.
This course will deal with some of the discoveries made in modern linguistics that reveal some fundamental properties of human language and the special human capacity for it, as well as some of the still unsettled questions about it. It will also trace some of the paradigm shifts that have occurred within linguistics and consider some of the ways in which language has been represented, both within the science of linguistics and outside of it, by contrasting what is known with what is popularly believed to be true. Projected topics will include: innateness vs. language as socio-cultural; language variability vs. universal grammar; language change and relatedness of languages; the question of correctness.

HDFS 436 Language Development (also COGST 436, LING 436 and PSYCH 436)
Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HDFS 633, LING 700, or PSYCH 600; a supplemental graduate seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, or linguistics. S/U grades optional. B. Lust.
This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/LING 450/PSYCH 457).

Computer Science
COM S 211 Computers and Programming
Fall or spring. 3 credits.
COM S 212 Structure and Interpretation of Computer Programs
Fall or spring. 4 credits.
COM S 280 Discrete Structures
Fall or spring. 4 credits.
COM S 381 (or 481) Introduction to Theory of Computing
Fall. 3 or 4 credits.
COM S 410 Data Structures
Fall or spring. 4 credits.
COM S 411 Programming Languages and Logics
Fall. 4 credits. Not offered every year.
COM S 472 Foundations of Artificial Intelligence
Fall. 3 credits.
COM S 473 Practicum in Artificial Intelligence
Fall. 2 credits.
COM S 482 Introduction to Analysis of Algorithms
Spring. 4 credits.
COM S 486 Applied Logic (also MATH 486)
Fall or spring. 4 credits.

Education (College of Agriculture and Life Sciences)
EDUC 210 Psychology of Learning and Memory
Fall. 3 credits.
EDUC 212 Psychological Foundations of Education
Spring. 2-3 credits.
EDUC 311 Educational Psychology
Fall. 3 credits.

Human Development (College of Human Ecology)
HDFS 115 Human Development
Fall or summer. 3 credits.
HDFS 266 Emotional Functions of the Brain
Fall. 3 credits. R. A. Depue.
[HDFS 334 The Growth of the Mind
Spring. 4 credits. Not offered 1998–99.]
[HDFS 344 Infant Behavior and Development
Fall. 3 credits. Not offered 1998–99.]
HDFS 347 Human Growth and Development: Biological and Behavioral Interactions
Spring. 3 credits.
HDFS 362 Human Bonding
Fall. 3 credits. C. Hazan.
HDFS 436 Language Development (also PSYCH 436 and LING 436)
Spring. 4 credits.
HDFS 438 Thinking and Reasoning
Fall. 3 credits.
[HDFS 439 Cognitive Development: Infancy through Adolescence
Spring. 3 credits. Not offered 1998–99.]

Linguistics
LING 101 Theory and Practice of Linguistics
Fall, spring or summer. 4 credits.
LING 170 Introduction to Cognitive Science (also COGST 101 and PSYCH 102)
Fall. 3 credits.
LING 201 Introduction to Phonetics and Phonology
Spring. 4 credits.
LING 203 Introduction to Syntax and Semantics
Fall. 4 credits.
LING 212 Language and Culture
LING 264 Language, Mind, and Brain
Fall. 4 credits.
LING 270 Truth and Interpretation (also COGST 270 and PHIL 270)
LING 301–302 Phonology I, II
Fall and spring. 4 credits each term.
LING 303–304 Syntax I, II
Fall and spring. 4 credits each term.
LING 309 Morphology I
Spring. 4 credits.
LING 310 Morphology II
Fall. 4 credits. Not offered 1998–99.
LING 319 Phonetics I
Fall. 4 credits.
LING 320 Phonetics II
LING 325 Pragmatics
Fall. 4 credits.
LING 334 Non-Linear Syntax
Fall. 4 credits. Not offered 1998–99.
LING 350 Representing Language: Knowledge Taught and Untaught (also COGST 350)
Fall. 4 credits.
LING 400 Semiotics and Language (also COM L 410)
LING 401 Approaches to Language Typology I
Fall. 4 credits. Not offered 1998–99.
LING 402 Approaches to Language Typology II
Spring. 4 credits.
LING 421 Semantics I
Spring (1999 only). 4 credits.
LING 422 Semantics II
Fall. 4 credits. Not offered 1998–99.
LING 436 Language Development (also COGST 436, PSYCH 436 and HDFS 436)
Spring. 4 credits.
LING 450 Lab Course: Language Development (also COGST 450 and PSYCH 437)
Spring. 2 credits.

Mathematics
MATH 281 Deductive Logic (also PHIL 331)
Fall. 4 credits.

Although suitable to entering graduate students, the proseminar is also open to advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An “R” grade will be assigned in the fall semester, and an S/U grade will only be assigned in the spring semester.

COM S 674 Natural Language Processing
Spring. 4 credits. Prerequisite: COM S 472 recommended.

COM S 676 Reasoning About Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered every year; next offered fall 1998. J. Y. Halpern.

COM S 677 Reasoning About Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered every year; next offered fall 1999. J. Y. Halpern.

COM S 775 Seminar in Natural Language Understanding
Fall and spring. 2 credits.

EDUC 611 Educational Psychology
Fall. 3 credits. Undergraduates admitted with permission from instructor. R. Ripple.

EDUC 614 Epistemological Development and Reflective Thought
Fall. 3 credits.

EDUC 714 Moral Development and Education
Spring. 3 credits.

HDFS 600/700 Graduate Seminars

LING 637 Experimental Research for Language Sciences
Fall. 4 credits. A. Jongman, J. Lantolf.

LING 700 Graduate Seminars

MATH 581 Logic

MATH 655 Mathematical Foundations of Computer Modeling and Simulation

MATH 684 Recursion Theory

MATH 688 Automated Theorem Proving

LANG 700 Seminar (Grammaticization and Second Language Acquisition)
Spring. 4 credits.

PHIL 700 Graduate Seminars

PSYCH 601 Computational Models of Language
Spring. 3 credits. Prerequisite: consent of instructor. M. Spivey.

PSYCH 676 Topics in Emotion
Spring. 4 credits. M. Owmern and C. Krumhansl.

College Scholar Program
L. Abel, director, 55 Goldwin Smith Hall. 255-3386.

The College Scholar program is described in the introductory section of Arts and Sciences.

COLLS 397 Independent Study
Fall or spring. 1-4 credits. Prerequisite: permission of program office.

COLLS 499 Honors Research
Fall or spring. 1-8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

East Asia Program
140 Uris Hall

East Asian studies at Cornell is led by thirty-five faculty members from five colleges, who participate in a program of research and teaching on the civilizations and cultures of East Asia. Courses are offered through various departments in most of the humanities and social science disciplines, as well as in the fields of business, city and regional planning, international and comparative labor relations, and rural sociology. Language courses in Mandarin, Cantonese, Korean, and Japanese are offered, in addition to the Full-year Asian Language Concentration (FALCON) in Japanese and Mandarin. Undergraduates major in the Department of Asian Studies and concentrate on the language and culture of one East Asian country, while graduate students may work toward an M.A. in East Asian studies, a dual M.B.A./M.A. degree, or an M.A./Ph.D. degree in a discipline such as agricultural economics, anthropology, city and regional planning, government, history, history of art, linguistics, literature, rural sociology, or sociology. A variety of fellowships, travel grants, awards, and assistantships are available for graduate students concentrating on East Asia.

The formal program of study is enriched by a variety of extracurricular activities, including a Japanese and Chinese language house, film series, workshops, art exhibits, and numerous lectures, symposia and performances related to East Asia. The Wason Collection in Olin Library is a comprehensive collection of books on East Asia in Western languages, Japanese, Chinese, and Korean. The Mary Rockwell Galleries of the Herbert F. Johnson Museum of Art have an excellent collection of East Asian art.

Freshman Writing Seminars
For information about the requirements for freshman writing seminars and descriptions of seminar offerings, see the John S. Knight Writing Program section, and consult the John S. Knight Writing Program brochure available from college registrars in August for the fall term and in late October for the spring term.

Human Biology Program
J. Haas (nutritional sciences), director, 211 Savage Hall, 255-8001; B. Finlay (psychology), J. Fortune (physiology/women’s studies), E. Frongillo (nutritional sciences), R. Johnston (psychology), K.A.R. Kennedy (ecology and systematics/anthropology), D. Levitsky (nutritional sciences), W. Nathaniel's (psychology), D. L. Pelletier (nutritional sciences), W. Provine (ecology and systematics/history), R. Robertshaw (physiology), S. Roberson (human development), R. Savin-Williams (human development), M. Small (anthropology).

Human biology integrates the methods and theories of many disciplines, such as biological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology, into a comprehensive study of biological diversity in Homo sapiens. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The program of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology curriculum is of particular relevance to undergraduate students in premedical and predentistry programs, biological anthropology, nutrition, human development, ecology and systematics, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students with a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics relating to human evolution and biological diversity.

Human biology is not a major but a curriculum of study that provides major departments with a program for selecting elective courses that deal with the biology of the human species. Students in their junior year may develop a program of study in human biology while majoring in a number of different departmental fields.

Basic Requirements
The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and physical diversity of the human species. Adjustments may be made in these requirements, depending upon the student's academic background and affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (Biological Sciences 101-103 plus 102-104 or 105-106 or Biological Sciences 107-108 offered during the eight-week Cornell Summer Session), one year of general chemistry (Chemistry 103-104 or 207-208 or 215-216); one year of college mathematics (Mathematics 111-112 or 105-106 or 111-105) one course in genetics (Biological Sciences 281 or 282); one course in biochemistry (Biological Sciences 151, 350 or 351). It is recommended that students planning graduate study in biological
anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty adviser in human biology for help in selecting appropriate courses.

Elective courses should be taken that will enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may also fulfill requirements for the major.

Courses should be selected that also provide sufficient exposure to the integration of basic anatomical and physiological sciences with the behavior of individuals and groups within the context of evolutionary theory and ecology. The courses listed below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty adviser representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisers in his or her department who is listed as faculty in human biology to be their principal adviser, or he or she may have an adviser in the department of the major and seek the advice of a human biology faculty adviser in matters pertaining to satisfaction of the requirements. In certain cases a faculty adviser may represent both the major and the curriculum of study in human biology.

International Relations Concentration

Matthew Evangelista, director
(mae@cornell.edu)

Integral to international relations is a focus on global issues and processes and an understanding of their impact on particular countries or geographic regions. Cornell's several undergraduate colleges and many departments offer courses that provide a strong grounding in the field as well as an opportunity to study more than 60 languages.

The concentration in international relations provides a curricular structure for undergraduate students with an interest in international law, economics, agriculture, trade, banking, organizations, and government service, and in cross-cultural affairs or education. Students can major in just about anything and in addition "concentrate" in international relations. They can major in a field that the concentration in international relations closely complements (for example, history, government, economics, or anthropology) or they can major in some very different subject, including the sciences, and use the concentration to develop a separate expertise. Some students design an independent major in some aspect of international relations or comparative social or cultural studies.

Course Requirements:

These requirements are designed to expose students to a broad range of perspectives in international relations while allowing them to tailor their course selections to specific interests. Courses throughout the university are grouped into four subject areas: 1) International Economics and Development; 2) World Politics and Foreign Policy; 3) Transnational Processes and Policies; and 4) Cultural Studies. Within these four subject areas, courses are also identified as "core" or "elective." Students must complete seven courses selected from the four groups according to one of two strategies. Option A emphasizes the politics and economics of international relations. Option B places greater emphasis on culture. In choosing either option, students should ensure that they acquire familiarity with more than one geographic region or country.

Option A:

• One core course from Groups 1, 2, and 4
• One elective from Groups 1, 2, 3, and 4

Option B:

• One core course from Groups 1, 2, and 4
• One elective from either Group 1 or Group 2
• One elective from Group 3 and Group 4, and one additional elective from Group 3 or Group 4

Students should take note that some courses have prerequisites. The list of courses here (for fall 1998 only) is representative but not complete. Many other courses throughout the university can qualify for the IR Concentration. For further information, contact the administrative coordinator or the director of the IRC (address below).

Course List Fall 1998

For Course List Spring 1999, contact IRC program in fall of 1998.

Group 1: International Economics and Development

Core:
- Econ 430 International Trade Policy (prerequisites: Econ 101–102)
- Econ 361 International Trade Theory (prerequisites: Econ 101–102–313)

Electives:
- Econ 425 Economic History of Latin America
- Econ 458 Topics in 20th Century Economic History
- Econ 469 The Economy of China
- Econ 471 Economy of the Former USSR and End Europe
- Econ 472 Comparative Economic Systems: East and West
- Econ 475 Economic Problems of India

Group 2: World Politics and Foreign Policy

Core:
- Govt 251 The Politics of Economic Life
- Govt 356/ILRIC 337 New Europe: Labor, Business and Politics
- Govt 405 Government and the Economy
- Govt 433 The Politics of Economic Liberalization in the Developing World
- ILRIC 333/337 Western Europe, U.S., and Japan in a Changing World Economy
- ILRIC 637 Labor Relations in Asia

Group 3: Economic Processes and Policies

Core:
- Econ 458 Economic History
- Econ 469 The Economy of China
- Econ 471 Economy of the Former USSR and End Europe
- Econ 472 Comparative Economic Systems: East and West
- Econ 475 Economic Problems of India

Electives:
- Govt 251 The Politics of Economic Life
- Govt 356/ILRIC 337 New Europe: Labor, Business and Politics
- Govt 405 Government and the Economy
- Govt 433 The Politics of Economic Liberalization in the Developing World
- ILRIC 333/337 Western Europe, U.S., and Japan in a Changing World Economy
- ILRIC 637 Labor Relations in Asia

Group 4: Transnational Processes and Policies

Core:
- Econ 458 Economic History
- Econ 469 The Economy of China
- Econ 471 Economy of the Former USSR and End Europe
- Econ 472 Comparative Economic Systems: East and West
- Econ 475 Economic Problems of India

Electives:
- Govt 251 The Politics of Economic Life
- Govt 356/ILRIC 337 New Europe: Labor, Business and Politics
- Govt 405 Government and the Economy
- Govt 433 The Politics of Economic Liberalization in the Developing World
- ILRIC 333/337 Western Europe, U.S., and Japan in a Changing World Economy
- ILRIC 637 Labor Relations in Asia

Group 5: Cultural Studies

Core:
- Hist 223 Modern European Political History
- Hist 230 History & Memory: Asian-Pacific War
- Hist 243 China & the West Before Imperialism
- Hist 244 History of Islam and Thailand
- Hist 293 History of China up to Modern Times
- Hist 295 Colonial Latin America
- Hist 353/370 History of the Holocaust
- Hist 379 The First World War
- Hist 414 Motivations of U.S. Foreign Policy

Electives:
- Hist 223 Modern European Political History
- Hist 230 History & Memory: Asian-Pacific War
- Hist 243 China & the West Before Imperialism
- Hist 244 History of Islam and Thailand
- Hist 293 History of China up to Modern Times
- Hist 295 Colonial Latin America
- Hist 353/370 History of the Holocaust
- Hist 379 The First World War
- Hist 414 Motivations of U.S. Foreign Policy

The Intensive English Program is administered by the Department of Modern Languages, Cornell University, 305 Morrill Hall, Ithaca, New York 14853–4701. U.S.A. Information and application materials are available directly from the program by writing to the above address, calling 607–255–4863, or faxing 607–255–7491. Internet e-mail is CUIEP@cornell.edu. Web page is http://dml.cornell.edu/languages/IEP/cuiep.html.
Group 3: Transnational Processes and Policies

[NO CORE]

Electives: B&Soc 461 Environmental Policy (1-year course)
Comm 426 Impact of Communication Technologies
Govt 294/ Phil 294 Global Thinking
Govt 389 International Law
Govt 469/ Phil 369 Limiting War
Govt 483/ S&TS 483 Technology
Intag 300 Perspectives in International Agriculture and Rural Development
NtRes 400 International Environmental Issues
BSoc 430 Migration and Population Distribution
BSoc 438 Social Demography

Group 4: Cultural Studies

Core: Anthr 200 Cultural Diversity and Contemporary Issues
Anthr 321/ Womm 321 Cross-Cultural Perspective
Anthr 324 Anthropology Amongst Disciplines
Anthr 400 The Craft of Anthropology
Anthr 460 Culture and International Order

Electives: Anthr 339 Peoples & Cultures of the Himalayas
Anthr 345 Japanese Society
AS&RC 191 Africa the Continent & Its People
AS&RC 290 The Sociology of the African-American Experience
AS&RC 451 Political and Sociological Change in the Caribbean
AS&RC 478 Family and Society in Africa
AS&RC 483 History of African Political Thought
Asian 208 Intro to Southeast Asia
Asian 215 Introduction to South Asian Civilization
Asian 481 Translation and Identities
Corn 153 European Cultural History 1870-1945
Corn 163 The European Novel
Corn 189 Contemporary Literature: Central/ Eastern Europe
Engl 455 Caribbean Literature
Hlst 151 Introduction to Western Civilization
Hlst 220 The French Experience: An Introduction
Hlst 281/ S&TS 281 Science in Western Civilization
Hlst 363 European Cultural History, 1870-1945
Hlst 478 Stalinism as Civilization
JWst 236/ Israel: Literature and Society
Nes 236 Society
Nes 157 Intro to Islamic Civilization
Nes 291 Arab Society and Culture

Language Requirement

IR Concentrators are expected to complete additional language study beyond the College of Arts and Sciences degree requirement. This study can be accomplished in one of two ways:
1) Two years of one foreign language (proficiency plus one course)
2) Two languages at proficiency

Study Abroad

IR Concentrators are strongly encouraged to study abroad to bring a practical dimension to their expertise in international issues. Those who choose this option will find the requirements for the concentration highly compatible with study abroad.

All courses used to fulfill the concentration requirements must be taken for a letter grade. Transcripts will reflect successful completion of the requirements for the concentration. In addition, students will receive a special certificate signed by the faculty coordinator of the international relations concentration. Students interested in pursuing the concentration should discuss it with their faculty advisor. To enroll and for further information, contact Anindya Saha, Administrative Coordinator, IRC, at the Mario Einaudi Center for International Studies, 158 Uris Hall (as87@cornell.edu) or contact the director, Prof. Mathew Evangelista (Government), (255-8672/mae10@cornell.edu).

Center for International Studies

See Interdisciplinary Centers, Programs, and Studies.

Program of Jewish Studies

D. I. Owen, director (Ancient Near Eastern and Biblical History and Archaeology), L. Adelson (German-Jewish Literature and Culture), R. Brann (Judeo-Arabic Studies), V. Caron (Modern French and European-Culture), J. Porte (American-Jewish Writers), Y. Halevi-Wise (Modern Hebrew Literature), R. Hoffmann (Holocaust Studies), P. Hyams (Medieval Jewish History), M. Steinberg (German-Jewish History and Culture), Y. Szekely (Judaeo-Arabic Bibliography), J. Zorn (Biblical Archeology)

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976. The program has grown out of the conviction that Judica civilization merits its own comprehensive and thorough treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the areas of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges. The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, whose interests are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the Hebrew Bible; ancient, medieval, and modern Hebrew literature; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

Courses Offered

JWST 105-106 Elementary Modern Hebrew I and II (also NES 101-102) 105 fall; 106 spring. 6 credits. S. Shoer. For description, see NES 101-102.

JWST 201-202 Intermediate Modern Hebrew I and II (also NES 201-202) 201 fall; 202 spring. 4 credits. L. Adelson. For description, see NES 201-202.

JWST 227 Introduction to the Prophets (also NES 227, RELST 227) Fall. 3 credits. G. Rendsburg. For description, see NES 227.

JWST 229 Introduction to the New Testament (also NES 229, RELST 229) Fall. 3 credits. K. Haines-Eitzen. For description, see NES 229.

JWST 236 Israel: Literature and Society (also NES 236) Fall. 3 credits. Y. Halevi-Wise. For description, see NES 236.

JWST 244 Introduction to Ancient Judaism (also NES 244, RELST 244) Spring. 3 credits. G. Rendsburg. For description, see NES 244.
SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES 563

JWST 253 From Medievalism to Modernity: The History of Jews in Early Modern Europe, 1452–1789 (also NES 245, HIST 285)
Fall. 4 credits. V. Caron.
For description, see NES 245.

JWST 261 Ancient Seafaring (also NES 261, ARKEO 275)
Fall. 4 credits. D. Owen.
For description, see NES 261.

JWST 263 Introduction to Biblical History and Archeology (also RELST 264, ARKEO 263 and NES 263) #
Spring. 3 credits. Staff.
For description, see NES 263.

JWST 271 Yiddish Linguistics (also LING 241)
Fall. 4 credits. M. Diesing.
For description, see LING 241.

JWST 290 History of Zionism & the Birth of Israel (also NES 290, HIST 267)
Spring. 3 credits. V. Caron.
For description, see HIST 267.

JWST 295 Introduction to Christian History (also NES 295, RELST 295)
Spring. 3 credits. K. Haines-Eitzen.
For description, see NES 295.

JWST 301-302 Advanced Modern Hebrew I and II (also NES 301-302) @
301 fall; 302 spring. 4 credits. N. Scharf.
For description, see NES 301-302.

JWST 353 History of the Holocaust (also HIST 370)
Fall. 4 credits. V. Caron.
For description, see HIST 370.

JWST 390 Modern History of the Middle East: Changing Politics, Society and Ideas (also NES 390, GOVT 358)
Fall. 4 credits. J. Rosberg.
For description, see NES 390.

JWST 400 Seminar in Advanced Hebrew (also NES 400)
Fall and spring. 4 credits. Enrollment limited to 15 students. N. Scharf.
For description, see NES 400.

JWST 420 Readings in Biblical Hebrew Prose (also NES 420, RELST 420)
Spring. 4 credits. G. Rendsburg.
For description, see NES 420.

JWST 446 History of Jews in Modern France (also HIST 417, FRLIT 413)
Spring. 4 credits. V. Caron.
For description, see HIST 417.

JWST 491-492 Independent Study—Undergraduate
Fall and spring. Variable credit. Staff.

JWST 494 Studies in the Novel: Reading Joyce's Ulysses (also ENG 470)
Spring. 4 credits. D. Schwarz.
For description, see ENG 470.

JWST 499 Independent Study—Honors
Fall and spring. Variable credit. Staff.

JWST 694 Joyce's Ulysses and the Modern Tradition (also ENG 670)
Spring. 4 credits. D. Schwarz.
For description, see ENG 670.

Courses Not offered 1998-99.

JWST 197 Introduction to the Near Eastern Civilization (also NES 197 and RELST 197)

JWST 223 Introduction to the Bible (also NES 223 and RELST 223)

JWST 239 Cultural History of the Jews of Spain (also COM L 239, NES 239, RELST 239, and SPAN L 239)

JWST 248 Introduction to Classical Jewish History (also RELST 248 and NES 248)

JWST 251 The Holocaust: The Destruction of European Jewry

JWST 339 Muslims, Christians, and Jews in Islamic Spain and Society (also NES 339/639, COM L 334, RELST 334, SPANL 339/699) @

JWST 342 Jewish Mysticism (also RELST 344 and NES 344) #

JWST 344 The History of Early Christianity (also NES 324, CLASS 344 and RELST 325)

JWST 346 Seminar in 19th-Century Jewish Intellectual History (also NES 347 and RELST 346)

JWST 347 Gender and Judaism (also WOMNS 347, RELST 343, NES 345)

JWST 352 The Transformation of European Jewry (also HIST 389)

JWST 428 Medieval Hebrew Biblical Exegesis (also NES 428, NES 624 and RELST 428)

JWST 435–436 Aramaic I & II (also NES 435–436) @

JWST 442 German Jewish Culture: From the Enlightenment to the Present (also GERST 442 and SHUM 442)

JWST 454 Anti-Semitism and the Crisis of Modernity: From the Enlightenment to the Holocaust (also HIST 435)

JWST 478 Jewish-American Writing (also ENGL 479 and AM ST 479)

John S. Knight Writing Program

The director of the John S. Knight Writing Program is Jonathan Monroe, professor in the Department of Comparative Literature and George Elliott Reed Professor of Writing and Rhetoric. Katherine Gottschalk, senior lecturer in the Department of English, is the Walter C. Teagle Director of Freshman Writing Seminars. The program's offices are in 159 Rhetoric. Katherine Gottschalk, senior lecturer

Currently, most undergraduate students are required to take two freshman writing seminars. Architecture majors, however, need...
only one. Hotel students fulfill their requirement through Hotel Administration 165, which should be taken with Hotel Administration 265 during the first two semesters at Cornell. Agriculture and Life Sciences students can take freshman writing seminars or choose from among a variety of other courses to fulfill their requirement.

All students who score "4" or "5" on the Princeton Advanced Placement Examination in English receive three credits. Such credits are awarded automatically; no application to the John S. Knight Writing Program or the Department of English is necessary. How these credits may be applied to freshman writing or other distribution requirements depends on the student’s college and score. All students who score "4" or "5" may fulfill all or part of their college's writing requirement. Students who need more focused attention to order to master the expectations of academic writing should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The workshop also offers a Walk-In Service (see below) to help students with problems in essay writing. The director is Joe Martin, senior lecturer in the Writing Workshop. The workshop offices are in 174 Rockefeller Hall, 255-6349.

The Walk-In Service

The Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Walk-In Service has tutors available during fall and spring in 174 Rockefeller and north- and west-campus residential areas. The director is Mary Gilliland. For information contact the Writing Workshop, 174 Rockefeller Hall, 255-6349.

WRIT 137-138, 134 An Introduction to Writing in the University

137: fall, 138: spring, 134: summer. 3 credits each term. Each section limited to 12 students in the fall and spring, 6 students in the summer. S-U grades only. Prerequisite: permission of instructor. This writing seminar is designed for students who need more focused attention to order to master the expectations of academic writing. The course emphasizes the analytic and argumentative writing and critical reading essential for university-level work. With small classes and with weekly student/teacher conferences, each section is shaped to respond to the needs of students in that particular class.

WRIT 139-239 Special Topics in Writing

Spring. 139, undergraduate students only: 239, graduate students only. 3 credits. S-U grades only. Cannot fulfill any writing or distribution requirements. Prerequisite: permission of instructor. These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work. Instruction is in weekly tutorials. Interested students should come to 174 Rockefeller for more information.

Latin American Studies

190 Uriss Hall

The Latin American Studies Program encourages and coordinates faculty and student interests in Latin America. A variety of special lectures, films, and seminars supplement the regular course offerings. Graduate students may pursue a minor in Latin American Studies, while majoring in the field of their choice.

Undergraduate Concentration

Undergraduate students may fulfill a Latin American Studies Concentration by completing a minimum of 15 credits in Latin American studies courses combined with language proficiency in Quechua, Spanish, or Portuguese. Latin American courses are offered in the College of Agriculture and Life Sciences; the College of Architecture, Art, and Planning; College of Arts and Sciences, College of Human Ecology; and the School of Industrial and Labor Relations.

For further information and a current course listing, students should contact the program office at 255-3345 or 190 Uriss Hall.

Latin American Studies Core Courses

Particular attention is drawn to the following courses that former students have taken to complete requirements for the undergraduate concentration or the graduate minor.

Other courses may be substituted with the approval of the advisor. It is strongly recommended that undergraduate concentrators take the interdisciplinary core course SPANL320/LASP 301 Perspectives on Latin America.

ANTHR 355 Archaeology of Mexico and Central America

ANTHR 485 & 685 Mothers, Priests, Rebels and Indian Chiefs: New Social Movement in Latin America

CRP 371 Cuba: Searching for Development Alternatives

ECON 425 Economic History of Latin America

ECON 365 Economic Problems of Latin America

GOVT 433 The Politics of Economic Liberalization in the Developing World

GOVT 443-630 The Political Economy of Market Reform

HIST 295 Colonial Latin America

HIST 296 Latin America in the Modern Age

HIST 347 Agrarian Societies in Latin American History

INTAG 402 Agriculture in Tropical America

INTAG 403 Traditional Agriculture in Developing Nations

SPANL 318 Readings in Spanish-American Literature

SPANL320/LASPS 301 Perspectives on Latin America

SPANL 332 The Modern Drama in Spanish America

SPANL 350 Literature of Conquest

SPANL 394 Trans-Atlantic Renaissance

SPANL 395 Modern/Contemporary Andean Literature

SPANL 498 Mallarmé in Latin America

SPANL 625 Latin American Literature/Mass Media
Latino Studies Program

434 Rockefeller Hall

The Latino Studies Program is an interdisciplinary academic program that focuses on the contributions, concerns, and welfare of those persons of Latino origin who reside in the United States. It includes support for historical, linguistic, literary, social, economic, and political studies of this diverse group of Americans. To this end the program objectives are (1) to expand the available course curriculum by providing both undergraduate and graduate courses pertaining to Latino subject matters; (2) to enlarge the size of the Latino faculty at Cornell through permanent appointments and visiting appointments; and (3) to enhance the Latino academic environment on campus through support of such activities as lectures, conferences, seminars, exhibits, and research activities.

Undergraduate Concentration

The program's undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Latinos in the United States. To complete an undergraduate concentration in Latino Studies, students must earn at least 15 credits including LSP 201/SOC 265: Latinos in the United States (offered each spring semester), and at least four other courses from the course list. Students should make an attempt to achieve breadth and depth in the concentration and should include courses at the 300 and 400 level. Students pursuing the concentration must meet with the LSP Advisor and file an application with the Latino Studies Program office.

Resource Center

The Latino Studies Program Resource Center in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The Resource Center holds print and media material pertinent to U.S. Latino issues and also provides a meeting space for more than 25 Latino student organizations.

Courses

LSP 201/SOC 265 Latinos in the United States
Fall. 4 credits variable.

LSP 202/SPAN 200 Spanish for Bilinguals
Fall and spring. 3 credits.

LSP/SPANL 210 Introduction to Latino Studies
4 credits variable.

LSP/RSOC 220 Sociology of Health and Ethnic Minorities
Fall. 3 credits.

LSP/ANTHRO 221 Anthropological Representation: Ethnographies on Latino Culture
Fall. 3 credits.

LSP/ENGL 241 Introduction to Chicano/a Poetry and Politics
3 credits.

LSP/ENGL 242 Chicano/a Film: Representations of La Raza
3 credits.

LSP/ENGL/COML 243 Poetry and Politics in the Americas
4 credits.

LSP/SPANL 246 Contemporary Narratives by Latina Writers
Fall. 3 credits.

LSP/HISTORY 260 Introduction to U.S. Latino History (Part I)
Spring. 4 credits.

LSP/HISTORY 261 Introduction to U.S. Latino History (Part II)
4 credits.

LSP/SPANL 321 Puerto Rican Experience in the U.S.
Fall. 4 credits

LSP/ENGL 266 Spanish in the United States
Spring. 4 credits.

LSP/ANTHRO 377 The United States
4 credits.

LSP/ENGL 393 Survey in U.S. Latina/o Literature
Fall. 4 credits.

LSP/ENGL 442 Testimonial Narratives: U.S. Latinos at War
4 credits.

LSP 420/421 Independent Study
Permission of instructor. 2—4 credits variable.

LSP/SPANL 482 U.S. Latino Culture and Literature
Fall. 4 credits.

LSP/ENGL 490 The Chicana Renaissance
Spring. 4 credits.

LSP/ENGL 492 Testimonial Narratives: U.S. Latinos at War
4 credits.

LSP 420/421 Independent Study
Permission of instructor. 2—4 credits variable.

LSP/SPANL 482 U.S. Latino Culture and Literature
Fall. 4 credits.

LSP/ENGL 696 Writing Resistance: U.S. Minority and Third World Prisoner Discourses
4 credits.

Law and Society

D. A. Dunning, director, 280 Uris Hall, 255-6931, phr3@cornell.edu, R. Breijer (sociology), C. Cermuchic (comparative literature), D. A. Dunning (psychology), G. Hay (economics), P. Hyams (history), S. Jasanoff (science and technology studies), M. Kates (government), R. Miller (philosophy), M. B. Norton (history), R. Powers (Near Eastern studies), J. Rabin (government), A. Rutten (government), H. Shue (Ethics and Public Life)

The Law and Society Program offers an interdisciplinary concentration for undergraduates who are interested in the law from the perspectives of the social sciences and the humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology. Students who wish to graduate with a concentration in law and society should consult the director of the program or one of the advisors listed above to plan a coherent program of study. Admission to the concentration has to be approved by the director of the program. Such a program should ordinarily include at least four courses from the following list. At least two of the courses should fall outside the student's major. Particular attention is drawn to GOVT 313 and PSYCH 265, which past students have often taken. Other courses may be substituted with the approval of the advisor. Inquiries can be directed to Mary Newhart, Administrative Assistant, 119 Stimson Hall, 255-8515, mjn3@cornell.edu.

Lesbian, Bisexual and Gay Studies

E. Hanson, director, undergraduate studies, spring; B. Anderson, D. Bern, S. Bern, A. Berger, J. Borneman, B. Correll, J. Culler, I. DeVault, N. Furman, J. E. Gainor, I. V. Hull, M. Jacobus, K. Jones, M. Katzenstein, K. March, B. Martin, director, graduate studies; S. McConnell-Ginet, T. Murray, M. B. Norton, J. Peraino, J. Piedra, R. Savin-Williams, R. Schneider, A. M. Smith, A. Villarejo, director, undergraduate studies; fall; R. Well

The field of Lesbian, Bisexual and Gay Studies is devoted to the interdisciplinary study of the social construction of sexuality. LBG Studies is founded on the premise that the social organization of sexuality is best studied from the perspectives offered by those positions that have been excluded from established cultural norms.

In addition to offering a graduate minor, the field of LBG Studies now offers an undergraduate concentration, which is administered under the auspices of the Women's Studies Program and which consists of four courses from the list below. Although most of the courses in LBG Studies (including those on men) will probably fall under the aegis of the Women's Studies Program and hence be crosslisted with it, not all of the courses in Women's Studies are sufficiently focused enough on the social construction of sexuality per se to be part of the LBG Studies concentration. In order to qualify for the concentration, courses must devote a significant portion of their time to sexual orientation and to questioning the cultural and historical institutions of exclusive heterosexuality. Students selecting their four courses from the LBG Studies subset must identify their concentration as either LBG Studies or Women's Studies; they cannot double-count their credits and thereby use the same courses for both concentrations.

Students interested in the LBG Studies concentration should contact the Lesbian, Bisexual and Gay Studies Office in 379 Uris Hall.

Courses

ANTHR 200  Cultural Diversity and Contemporary Issues
Fall. 3 credits. J. Borneman.
For description, see ANTHR 200.

ANTHR 321  Sex and Gender in Cross-Cultural Perspective (also WOMNS 321)
Fall. 4 credits. K. March.
For description, see WOMNS 321.

[ENGL 355  Decadence (also WOMNS 355)
E. Hanson.]

[ENGL 377  Gay Fiction (also WOMNS 376)
E. Hanson.]

E. Hanson.]

[ENG 703  Theorizing Film: Race, Nation and Psychoanalysis (also FRLIT 695)
T. Murray.]

[FRLIT 493  French Feminisms (also WOMNS 493)
N. Furman.]

[GERST 413  The Women Around Freud (also WOMNS 413)
B. Martin.]

GOVT 353  Feminist Movements and the State (also WOMNS 353)
Fall. 4 credits. M. Katzenstein.
For description, see GOVT 353.

[GOVT 362  Politics of Sexuality (also WOMNS 262)
A. M. Smith.]

GOVT 415  Race, Gender, and Organization (also WOMNS 415)
Spring. 4 credits. M. Katzenstein and J. Reppy.
For description, see GOVT 415.

[GOVT 467  Radical Democratic Feminisms (also WOMNS 468)
A. M. Smith.]

HDFS 284  Introduction to Sexual Minorities (also WOMNS 285)
Fall. 3 credits. R. Savin-Williams.
For description, see HDFS 284.

HDFS 464  Sexual Minorities and Human Development (also WOMNS 467)
Spring. 3 credits. R. Savin-Williams.
For description, see HDFS 464.
Undergraduates interested in Medieval Studies have an opportunity to take courses in the following areas of instruction: medieval Hebrew, Arabic, and Latin; Old English, Middle English, Old Irish, and Middle Welsh; Old Occitan (Provençal) and Old French; medieval Spanish and Italian; Old Saxon, Old High German, Middle High German, Gothic, and Old Norse; Old Russian and Old Church Slavonic; comparative literature: medieval archaeology, art, and architecture; medieval history; Latin paleography; medieval philosophy; musicology; comparative Slavic linguistics, comparative Romance linguistics, and comparative Germanic linguistics.

Undergraduates who want to undertake an independent major or a concentration in Medieval Studies should consult the director of the program, 259 Goldwin Smith Hall, 255-8545, medievalst@cornell.edu.

Information for prospective graduate students is contained in the catalog of the Graduate School, in a brochure on Medieval Studies available from the field coordinator, and at Cornell's site on the World Wide Web: http://www.arts.cornell.edu/medieval.

Graduate Seminars

Courses in various aspects of medieval studies are offered each year in numerous cooperating departments, including Asian Studies, Classics, Comparative Literature, English, German Studies, History, History of Art, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian literature and by the Society for the Humanities.

Undergraduates interested in Medieval Studies through the Independent Major or College Scholars programs.

Departmental advisers include: J. Borneman (Anthropology); C. Otto (Architecture); L. Abel (College Scholars, Independent Majors); S. Christopherson (CRP); G. Fields (Economics); D. Schwarz (English); I. Ezergailis (German Studies); J. Pontusson (Government); J. Weiss (History); M. Suner (Linguistics); C. Rosen (Modern Languages); N. Zaslaw (Music); G. Tarrow (German Studies); D. Bathrick (Theatre Arts).

For a list of relevant courses and seminars, and any further information, contact Susan Tarrow, coordinator of the Medieval Studies Concentration, at 259 Goldwin Smith Hall, 255-8545, medievalst@cornell.edu.

Religious Studies

For a list of relevant courses and seminars, and any further information, contact Susan Tarrow, coordinator of the Modern European Studies Concentration, at the Institute for European Studies, 245 Uris Hall (telephone 255-8545, e-mail srt2@cornell.edu).
The program in Religious Studies is designed to meet the needs of three classes of students: those seeking interesting courses on religious topics as free electives or to fulfill distribution requirements; those desiring a more systematic exposure to a specific study of religion as a major component of their liberal arts experience; and those planning to pursue advanced academic work in religious studies or allied disciplines or subdisciplines (e.g., history of religions, anthropology, religion and literature, religion and psychology, ethics, or theology, as well as certain geographical area studies). To all these students the program offers an opportunity to acquire a fuller understanding of one or more religious traditions, with a focus on the most fundamental aspects of human thought and behavior.

The Major in Religious Studies

To graduate as a major in Religious Studies, a student must complete the requirements described under 2a and 2b. Choice of language to fulfill this requirement is determined by the student in consultation with his or her adviser and is decided at the time the student enters the major.

Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences; a comprehensive up-to-date list of courses is maintained at the office of the Religious Studies Program.

Given the multidisciplinary character of the program in Religious Studies, it is especially important for a prospective major to select a faculty adviser early on. A current list of advisers is available from the program director. Once an adviser has been selected, a student is expected to prepare a brief statement outlining his or her intended course work for review by the faculty committee responsible for overseeing the program.

The Major with Honors in Religious Studies

To be eligible for honors in Religious Studies, a student must maintain a GPA of 3.0 overall and 3.3 in courses other than language courses used to satisfy requirements for the major. In addition, he or she must enroll in Religious Studies 495 ("Senior Honors Essay"). The fall and spring of the senior year. Each semester course carries four credits but only the first may be counted as one of the eight additional courses required for the major. Religious Studies 490, 491 ("Directed Study," in the fall and spring semester) are supervised by cooperating faculty members assigned to individual honors projects. Students must obtain permission from their honors committee at the end of fall semester to continue toward completion of the honors thesis. The final honors projects will be evaluated by the Religious Studies Honors Committee, which is responsible for awarding honors and determining the degree of honors awarded.

Courses Approved for the Major

The following courses are approved for Religious Studies majors. J. M. Law.

RELST 101 Understanding the Religions of the World
Fall. 3 credits. Required of Religious Studies majors. J. M. Law.

This course provides a dynamic introduction to the academic study of religion as an intellectual discipline through an overview of the world’s major religious traditions including Hinduism, Buddhism, Taoism, Confucianism, Shinto (in Japan), Judaism, Christianity, and Islam. The focus of this year’s course will be on religious personages—founders, reformers, and followers, and in some traditions, divine beings. For each religious system, we will focus on 1) the dynamics of founding and promulgation; 2) core rituals, myths, doctrines, and texts; 3) changing understandings of community and identity; and 4) conceptions of the human-divine relationship. To highlight our studies throughout the semester, we will explore how the themes of religious tradition get expressed through vibrant narratives—oral and written. Representative of many of the religious traditions that address the class to discuss their lives in relationship to their religious traditions, this work will include readings in primary source materials in translation and hands-on ethnographic work with local religious communities.

RELST 131 Elementary Pali (also Pali 131)
Fall. 3 credits. J. Gair.
For description, see Modern Languages, Pali 131.

RELST 150 Introduction to American Religion (also Sociology 150)
Fall. 3 credits. Not offered 1998-99.

RELST 495 Senior Honors Essay Fall or spring. 8 credits. Required for honors in Religious Studies. Staff.

RELST 531 Problems in Medieval Art and Architecture (also History of Art 531) \# Spring. 4 credits. R. G. Calkins. For description, see ART H 531.

Additional courses offered by cooperating departments may also be approved for the major in Religious Studies. For details see the program director, Jane Marie Law, 125 Rockefeller Hall or e-mail her at jm16@cornell.edu.

Russian and East European Studies Major

J. Bomerman (Anthropology), G. J. Staller (Economics), S. Beck (Field and International Studies Program); I. Ezerghalis, D. Batwirch (German Studies); V. Bunc, M. Evangelista, S. Tarrov (Government); P. Holquist, W. M. Pinker (History); U. Bunfenbrenger (emeritus, Human Development and Family Studies), P. Carden, G. Gibian, N. Pollak, S. Senderovich, G. Shapiro (Russian Literature); W. Browne, S. Paperno (Slavic linguistics).

The major in Russian and East European studies has the following requirements:

1) Proficiency in Russian or an East European language with one additional advanced (300-level) language or literature qualification in an East European language and qualification in another language useful for research in the area.*

   *These requirements, in the case of some languages, may require study abroad or coursework completed at another institution.

2) At least one course relating to Russia or Eastern Europe, at the 200 level or above, in four of the following five departments: Government, Economics, History, Russian Literature and Sociology. Appropriate courses offered in other departments may be substituted for one of the above courses with the consent of the major adviser.

3) At least three additional courses at the 300 level or above, all from one of the following three departments: Government, History (with the History Department courses may be at the 250 level or above), or Russian Literature. One of the three courses must be at the 400 level or above. The three courses must be approved by the major adviser in the department of concentration.

To apply for the major, students are directed to the Institute for European Studies (Slavic and East European Studies Program), 120 Uris Hall. Students should designate an adviser in the department whose branch of their work will be concentrated. Students are encouraged to study abroad and should discuss their plans with their advisers. For questions concerning the major or the Honors Program, students should consult with their major adviser or inquire at the Institute for European Studies.

Honors Program in Russian and East European Studies

I. Students entering the Russian and East European Studies Major Honors Program must have a cumulative average of at least 3.0, no grade below a B in courses connected with the major, and a cumulative average inside the major of at least 3.5. Students will form a special honors committee consisting of their major adviser and two other faculty members not necessarily from the Russian and East European area.

II. Honors candidates must complete an honors thesis project during the senior year. The topic should be developed and approved in consultation with their major adviser. Part of the research should include sources in Russian or an Eastern European language.

III. Students may earn a total of eight credits for the courses in the honors program and should register for the appropriate number in the department of their major adviser.

IV. Ordinarily, in the third term of the senior year, students will meet for one of two credits. Prerequisites will do independent research and reading in a particular area under supervision of their major adviser.

V. In the second term of the senior year students will complete the honors project by a date set by the Slavic and East European Studies Program. Students should keep their committee members informed of their progress. Students will meet together with their whole honors committee to discuss the draft of the thesis or project and make recommendations for revision. When the project is completed, the committee will decide whether the project deserves honors, and, if so, after reviewing their academic record, will recommend students for a Bachelor of Arts cum laude, magna cum laude, or summa cum laude. The committee will also assign a grade for the honors research course.

Courses

COM L 311 Modern European Literature and Culture (also RUSS L 311 and FRTL 315) Spring. 4 credits.

RUSL 393 Honors Essay Tutorial  
Fall and spring. 8 credits. Not offered 1998-99. 

RUSL 400 Reading the Great Tradition  
Fall. 4 credits. Not offered 1998-99.1 

RUSL 401-402 History of the Russian Language  
401, fall; 402, spring. 4 credits each term. Not offered 1998-99.1 

RUSL 403-404 Linguistic Structure of Russian  
403, fall; 404, spring. 4 credits. Not offered 1998-99.1 

RUSL 407-408 Russian Phonetics  
407, fall; 408, spring. Not offered 1998-99.1 

RUSL 409 Teaching Russian as a Foreign Language  
Fall or spring. 1 credit. 

RUSL 409 Russian Stylistics  
Fall. 4 credits. Not offered 1998-99.1 

RUSL 413-414 Advanced Conversation and Stylistics  
413, fall; 414, spring. 2 credits each term. 

RUSL 415 Postmodernist Russian Poetry  
4 credits. Not offered 1998-99.1 

RUSL 430 Practice in Translation  
Spring. 4 credits. 

RUSL 431 Contemporary Russian Prose  
Spring. 4 credits. Not offered 1998-99.1 

RUSL 432 Pushkin  
Spring. 4 credits. Not offered 1998-99.1 

RUSL 445 Batiushkov and Pasternak  
Fall. 4 credits. 

RUSL 460 Short Works of Tolstoy and Dostoevsky  
Spring. 4 credits. 

RUSL 491 Reading Course: Russian Literature in the Original Language  
Fall or spring. 1 credit. 

RUSL 492 Supervised Reading in Russian Literature  
Fall or spring. 1–4 credits each term. 

RUSL 498 Russian Symbolism  
4 credits. Not offered 1998-99.1 

RUSL 499 Research Modernism  
4 credits. Not offered 1998-99.1 

RUSL 600 Proseminar: Research Methodology in Russian Literature  
Fall. 4 credits. Not offered 1998-99.1 

RUSL 601 Old Church Slavonic  
Fall. 4 credits. Not offered 1998-99.1 

RUSL 602 Old Russian Texts  
Spring. 4 credits. Not offered 1998-99.1 

RUSL 603 Graduate Seminar: Neglected Masterpieces of Short Russian Prose  
Spring. 4 credits. Not offered 1998-99.1 

RUSL 661 Supervised Reading and Research  
Fall or spring. 2–4 credits. 

RUSL 671 Russian Stylistics I  
Not offered 1998-99.1 

RUSL 681 Russian Stylistics II  
Not offered 1998-99.1 

RUSL 691 Seventeenth-Century Russian Literature  
Fall. 4 credits. Not offered 1998-99.1 

RUSL 720 Twentieth-Century Russian Poetry  
Spring. 4 credits. Not offered 1998-99.1 

RUSL 815 Old Russian Literature  
Spring. 4 credits. Not offered 1998-99.1 

RUSL 822 Eighteenth-Century Russian Literature  
Spring. 4 credits. Not offered 1998-99.1 

RUSL 823 Early Nineteenth-Century Literature  
Not offered 1998-99.1 

RUSL 824 Russian Romanticism  
Spring. 4 credits. 

RUSL 825 Russian Realism  
Fall. 4 credits. Also open to advanced undergraduates with permission of instructor. Not offered 1998-99.1 

RUSL 826 The Tradition of Russian Poetry  
Spring. 4 credits. Not offered 1998-99.1 

RUSL 830 Gogol  
4 credits. Taught in Russian. Not offered 1998-99.1
Science of Earth Systems

The Science of Earth Systems (SES) is the study of the interactions between the atmosphere, oceans, biosphere, and solid Earth; these dynamic interactions control the global environment. The interdisciplinary approach of SES incorporates major components of geology, climatology, meteorology, atmospheres, terrestrial hydrology, biogeochemistry, and ecology into an integrated study of Earth as a complex system. Earth system science presents one of the outstanding intellectual challenges in modern science and is the primary foundation for the future management of our home planet.

The Major

The major in Science of Earth Systems emphasizes a rigorous, objective study of the Earth and its systems with broad preparation in basic sciences and mathematics, followed by the choice of an area of concentration for study in greater depth. The Science of Earth Systems program seeks to train students in a strong set of fundamental skills that will allow them to approach with quantitative rigor a wide range of questions about the Earth and its environment, and to adapt those skills rapidly to new areas of inquiry as they arise. The major in Science of Earth Systems is by nature interdisciplinary, and involves faculty from the College of Arts and Sciences, the College of Engineering, and the College of Agriculture and Life Sciences. In the College of Arts and Sciences the program is administered by the Department of Geological Sciences in collaboration with the Department of Astronomy and the Section of Ecology and Systematics in the Division of Biological Sciences.

The SES curriculum begins with a series of courses designed to provide preparation in fundamental science and mathematics necessary for a rigorous study of Earth Systems. This preparation is followed by a series of five core courses providing breadth and integration. An additional set of three intermediate to advanced courses are selected to provide depth and a degree of specialization.

Students in the College of Arts and Sciences choosing to pursue the Science of Earth Systems major are required to take the following courses: SES 101 or 102 (Colloquium); PHYS 207–208, CHEM 207–208, BIOSCI 101/102/104 (or 109–110), and MATH 111–112 (or 121–122, or 191–192). Two additional 3–4 credit hour courses in mathematics, physics, chemistry, or biology are required; these additional courses must require one or more of the basic courses listed above as a prerequisite. Examples include MATH 221, CHEM 257, BIOM 290, GEOL 201 may substitute for one of the two additional required courses. Mathematics at the level of MATH 221 or 293 is strongly recommended for all SES students, and those choosing areas of concentration in Atmospheric Sciences, Environmental Geophysics, or Hydrology should take MATH 222 or 294.

The four required SES core courses include the following:

SES 301 (ASTRON 331, SCAS 331) Climate Dynamics
SES 302 (GEOL 302, SCAS 332) Evolution of the Earth System
SES 321 (GEOL 321, NATRES 321) Biogeochemistry
SES 402 (ARHE 385) Mechanics in the Earth and Environmental Sciences

These courses are described in the section entitled “Interdisciplinary Centers, Programs, and Studies” at the beginning of the catalog. The fifth required core course is BIO S 261, Ecology and the Environment. Nine additional credit hours selected from 300- and 400-level courses approved by the SES Committee are required. These courses will ordinarily be organized around one of the SES areas of specialization. The areas of specialization currently include the following:

Climate Dynamics: the study of physical and chemical processes producing Earth’s weather and climate;

Ocean Sciences: the study of the biological, chemical, and physical processes at work in the ocean;

Hydrological Sciences: the study of the interactions of rock, water, snow, and ice on Earth’s land surfaces;

Biogeochemistry: study of element cycling near Earth’s surface and how organisms both mediate and benefit from these fluxes;

Environmental Geology and Geophysics: remote sensing, field and laboratory measurements of Earth’s surface and subsurface applied to the study of the environment, global change, and natural hazards;

Earth in Space: Earth’s ionosphere and exosphere, solar-terrestrial interactions, and earth as a planet.

Further information and applications contact B. Isacks, 255–207, bisisacks@cornell.edu or R. Kay, 255–3461, rkw6@cornell.edu. Also see the SES website at http://www.geo.cornell.edu/geology/ SES_arts.html for up-to-date information. Administrative offices are located at 2120 Snee Hall.
Society for the Humanities

Timothy Murray, Acting Director
Fellows for 1998–99
Anne Adams (Cornell University)
Lisa Cartwright (University of Rochester)
Brett deBary (Cornell University)
Milad Doucchi (Independent Scholar)
Gail Fine (Cornell University)
Brian Goldfarb (University of Rochester)
Eleanor Kaufman (Cornell University)
Ranjana Khanna (University of Washington)
Arthur Kroker (Concordia University)
David Moore (Cornell University)
Margaret Morse (University of California, Santa Cruz)
Trevor Pinch (Cornell University)
Annette Richards (Cornell University)
Marie-Laure Ryan (Independent Scholar)
Geoffrey Waite (Cornell University)
Christopher Williams (University of Nevada, Reno)
Reginald Woolery (Digital Artist)

The Society annually awards fellowships for research in the humanities. The Fellows offer, in line with their research, informal seminars intended to be exploratory or interdisciplinary. These seminars are open to graduate students suitably qualified undergraduates, and interested auditors. Students who want credit for a seminar should formally register in their own college. Persons other than those officially enrolled may attend as visitors with permission of the Fellow. The theme for 1998–99 is The Virtual: Old and New.

S HUM 402 Technology and (Dis)Ability

Fall. 4 credits. Limited to 15 students.
Permission of instructor. C. Cartwright and R. Goldfarb.
This seminar will examine legal, cultural, and historical ways of defining and understanding disability, and the impact of digital and other forms of assistive technologies on the lived experience and cultural understanding of people with disabilities. We will approach this interdisciplinary subject through theoretical, technical, and popular writings from the fields of education, health, law and ethics, advocacy, science and technology studies, and cultural studies. Part of the course will be devoted to online research and development of a Web-based resource on the topic of technology and disability. A few of the topics we will consider include assistive technologies, cochlear implants, prosthetics, and facilitated communication.

S HUM 403 The Afro-Europeans (also German Studies 403)

Spring. 4 credits. Limited to 15 students.
Permission of instructor. A. Adams.
As Afro-Germans, Afro-Dutch, "Afro-Saxons," Black British, Black Frenchmen, are becoming more self-aware and vocal, they are extending the concepts of "African Diaspora" and "European" simultaneously. While in some places Black communities of several generations' duration are recognized as part of the social, economic, and political fabric, other places have difficulty acknowledging that their populations are, and have long been, multi-racial. Using sources including mainstream and Black-community media, popular culture materials, and texts from social history, this course will explore the complexities of Black identity in the "European" communities.

S HUM 404 Early Modern Paradise (also Comparative Literature 424 and French Literature 405)

Fall. 4 credits. Limited to 15 students.
Permission of instructor. M. Doucchi.
This seminar will focus on the central role played by "Paradise" in a number of important 16th-century texts in the Early Modern Period. Texts will include readings in philosophy (Bayle, Spinoza, Leibniz, Arnauld), history (Huet), literature (Loredano), utopian thought (Bourignon, de Foigny), and spirituality (Binet, de Sales, Alacoque).

S HUM 405 ConflictingAppearances (also Philosophy 415)

Fall. 4 credits. Limited to 15 students.
Permission of instructor. G. Fine.
Appearances often appear to conflict: the wind appears cold to me, but not to you; honey sprays some people, but not to others; abortion seems right to some people but not to others. What if anything should we infer? Some philosophers favor a relativist solution, according to which all appearances are true, or false, or various combinations of true and false (without contradiction). Others favor a sceptical solution: we can't, or don't, know which if any of the appearances are correct. Yet others argue that both appearances are false: the wind, for example, is neither warm nor cold; especially properties like coldness and warmth don't exist at all or, if they do, they are subjective features of perceivers rather than objective features of the wind. We will focus on the solutions to the problem of conflicting appearances offered by various ancient philosophers such as Heraclitus, Protagoras and Democritus; Plato and Aristotle; and the Hellenistic philosophers (Epicureans, Stoics, and Sceptics). Insofar as time permits, we will also compare their solutions with more recent ones. For example, how does Protagoras' alleged relativism compare with contemporary versions of relativism? How does Epicurus' claim that all perceptions are true compare with Berkeley's seemingly similar claims?

S HUM 406 History and Memory: Virtual Nations, Artificial Groups, and the Historical Event (also Comparative Literature 400, Near Eastern Studies 490)

Fall. 4 credits. Limited to 15 students.
Permission of instructor. R. Khanna.
This course addresses how groups respond to traumatic events. While trauma is usually conceptualized in terms of an event, we will consider the prolonged trauma of colonialism. We will begin with some psychoanalytically and historiographically texts that introduce us to the functioning of memory, the process of individual mourning, responses to war, and the relationship between the individual and the group. Having come to some theoretical understanding about the traumatic event has individual and group consequences and therefore also how memory operates in response to historical events, we will study cultural and historical texts relating to Algeria, including paintings by Delacroix, Picasso, and Baya; early French colonial documents on assimilation and narratives of torture by Algerian women including legal testimony and trial records; and films by Pontecorvo, Djebar, and Dehane.

S HUM 408 Body Fictions

Fall. 4 credits. Limited to 15 students.
Permission of instructor. M. Morse.
This seminar addresses the incorporation and representation of collective and virtual bodies, drawing primarily on the domains of film and cyberculture, but also on religion, law, politics, literature, beauty culture, and sport. Gigantic bodies, crowds, masses, sentient networks, and artificial life are instances of collective embodiment studied in a wide variety of sources. The body conceived as a bounded and coherent entity with mass has socio-political implications that are set in question from the start.

S HUM 409 From the Phonograph to Techno (also Science & Technology Studies 405)

Fall. 4 credits. Limited to 15 students.
Permission of instructor. T. Finch.
In this seminar, we will treat music and sound and the ways they are produced and consumed as sociological phenomena. We will be concerned to investigate specifically the way that music and sounds are related to technology and how such technologies and sounds have been shaped by and have shaped the wider social, cultural, and economic conditions of which they are a part. We will look at the history of sound technologies like the phonograph, the electronic music synthesizer, samplers, and the Sony walkman. Our perspective will be drawn from social and cultural studies of science and technology. Students will be encouraged to carry out a small original research project on their own favorite sound technology.

S HUM 410 Music and Monstrous Imaginings (also Music 410)

Fall. 4 credits. Limited to 15 students.
Permission of instructor. A. Richards.
This seminar explores the limits of the imaginary in nineteenth- and twentieth-century culture, from theories of fantasy, imagination, and "monstrous imagining" (in freak shows, virtuosos, and illusionists. Focusing on visual, literary, and musical phantasmatologia, we will investigate the performance of the uncanny (Paganini and devilish technical feats, Meister and the Prince), the gendered imagination and artistic creation (pregnancy and invention), technologies of death and its representation (the guillotine and wax museum, magic lantern shows and automata). Novels by Radcliffe, Lewis, Shelley, instrumental music by C. P. E. Bach, Beethoven, Mendelssohn, Berlioz, opera by Mozart, Weber, Meyerbeer. Critical texts from Addison and Steele to Freud and Foucault.

S HUM 412 Spinoza and Virtual Ideology (also German Studies 409)

Fall. 4 credits. Limited to 15 students.
Permission of instructor. G. Waite.
"Every philosopher has two philosophies: his own and Spinoza's." This seminar takes up the challenge of Berkeley and Spinoza, investigating it critically in the context of contemporary virtualizations of "virtual reality." In Jameson's words, "The new world system, the ultimate third stage of capitalism is for us the absent totality." Spinoza's God in Nature, the ultimate (indeed perhaps the only) referent, the true ground of Being in our time." At the same time, however, in Lacan's formulation, God is thus not merely not dead, not merely Capitalism Triumphant, but (the unconscious
and therefore also ideology. Exploring the possibility of a premodern critique of postmodernity, we will focus on Spinoza’s Theologico-Political Treatise, along with selections from his writings related more explicitly to the concept of “the virtual.” The actual, “reality,” and “the real.”

We will read short texts by Spinoza’s contemporaries as well as more current critics and appropriators of Spinoza such as: Alibac, Althusser, Barthes, Deleuze, Carley, Giancotti, Irigaray, Karatani, Lacan, Macherey, Moreau, Matheron, Negri, Norris, Russell, Scruton, Strauss, Tozel, Wolfson, Yovel, Zizek.

In general, we will compare the neo-communist Althusserian tradition of Spinozists with the Straussian tradition of “Platonic political rationalism.” Critical anthologies used are The Cambridge Companion to Spinoza (ed. Garret) and The New Spinoza (ed. Montag and Stolze).

S HUM 415 Virtual Orientalism and the Representation of “Japan” (also Asian Studies 415)
Spring. 4 credits. Limited to 15 students. Permission of instructor. B. Delaney.
The seminar will examine the role of the virtual technologies in contemporary representations of Japan, as well as the proliferation of late-twentieth-century representations of Japan as a site of utopic or dystopic virtuality. As a society which did not experience the direct exercise of Western imperialist authority, Japan since the late nineteenth century has appeared in the Orientalist imagination as a hermetic integrity precluding both fascination and anxiety. Ambiguously represented as a culture of both the “crystallization” (the hyper-aesthetic) and the “sword” (the hyper-phallic), with the advent of what some have called “techno­orientalism,” Japan has increasingly become a preoccupation of technological and futu­rological imagination.

Interpreting Orientalism as a broadly based, though not monolithic, ensemble of representational and regulatory practices, this course will examine both resonances and dissonances between influential contemporary scholarly writings on Japan and widely circulating representations in “popular” culture, especially those produced in film, science fiction, video games, and fanzines.

S HUM 416 Scepticism: Old and New (also Philosophy 415)
Spring. 4 credits. Limited to 15 students. Permission of instructor. G. Fine.
Ancient and modern scepticism are often thought to be quite different from one another. Hegel, for example, argues that ancient scepticism is more radical and profound than Cartesian and post-Cartesian scepticism. Many contemporary philosophers, on the other hand, think that modern scepticism is more radical than ancient scepticism. Descartes, by contrast, denies that “his” scepticism is novel at all. In his view, it is “rehashed cabbage,” boringly familiar. Who is right? We will focus on ancient scepticism, especially as it is described by Sextus Empiricus. But we will also compare his account of scepticism with the scepticism of Descartes. In the latter we may permit, we will also look at some of the following: Montaigne, Gassendi, and Hume; and more recent philosophers such as G. E. Moore and Barry Stroud.

S HUM 417 Gilles Deleuze and the Philosophy of the Virtual (also Comparative Literature 408 and French 415)
Spring. 4 credits. Limited to 15 students. Permission of instructor. E. Kaufman.
This course will trace the concept of the virtual in the writings of the French philoso­pher Gilles Deleuze. We will also trace this line of thought by reading relevant work from some of Deleuze’s philosophical predecessors. This will be done through selective pairing of Deleuze’s work with that of other thinkers. So, for example, Deleuze’s Logic of Sense alongside Plato’s Republic, Deleuze’s Spinoza: Expressionism in Philosophy alongside Spinoza’s Ethics, and Deleuze’s Bergsonism alongside Bergson’s Matter and Memory. In addition, we will give particular attention to Deleuze’s study of Leibniz, The Fold: Leibniz and the Baroque, and to selected essays from some of Deleuze’s later writings.

S HUM 418 Digital Futures
Spring. 4 credits. Limited to 15 students. Permission of instructor. A. Kroker.
The seminar will examine key contributors in contemporary “new media” art to understanding the digital future. At a time when major technological changes seemingly numb perception and overwhelm traditional ethical perspectives, the seminar will focus on major issues in theory and art as ways of framing discussion of the new universe of clonal engineering, emergent senses, new codes, Web culture, and artificial intelligence. Beginning with leading European theorists, including Virilio, Baudrillard, and Deleuze and Guattari, the seminar will relate their insights on virtuality, old and new, to the diverse range of perspectives that make up technol­ogy and the American mind. The discussion of contemporary digital theory will be guided by the question of the “interface” of technol­ogy and culture. On the basis of this reflection, the seminar will then explore a range of contemporary new media artists in the areas of digital music, multimedia performance, virtual film and video, telepresence, artificial intelligence, and robotic performance art.

S HUM 419 Native and Nation (also English 406)
Spring. 4 credits. Limited to 15 students. Permission of instructor. D. Moore.
Shaped largely by Native American writers and critics, the seminar traces a literary politics of American identities, played out in canonical and non-canonical texts of the past two centuries. A discourse of “virtual reality,” derived from on-line Indian gaming controvers­ies, offers a useful frame to re-examine American literary history for representations by and of American Indians, African American­s, and successive waves of ethnic immigrants. We look at historical, ideological, and epistemological disjunctions in the nineteenth century (Apess, Whitman, Douglass, Thoreau, Emerson, Winnemucca, and others) and in the twentieth century (McCnicke, Faulkner, Kerouac, Morrison, Vizenor, Silko, Young Bear, and others), with extensive critical studies.

S HUM 420 Improvisation, Music, History (also Music 411)
Spring. 4 credits. Limited to 15 students. Permission of instructor. A. Richards.
Improvisation is the most immediate and evanescent form of musical utterance. While normative in many cultures, improvisation is largely figured as "virtual" within traditional discourses of European Art Music. This seminar will question the marginalization of improvisation in music histories, investigating changing notions of musical competence, genius, and the ways in which musicians and critics from the 18th to the 20th centuries have addressed the problems of comprehensibility and formal coherence raised by extemporized performance. We will focus on music (texts and performances) ranging from J. S. Bach to John Coltrane, and read theory and criticism of the period alongside contemporary historiography, dance and performance theory (Adorno, Dalbous, Turner, Schechner, Franko).

S HUM 421 The Poetics of Virtuality (also English 409)
Spring. 4 credits. Limited to 15 students. Permission of instructor. M. Ryan.
The electronic technology of virtual reality has been defined as an "immersive, interactive experience generated by a computer." In this seminar, we will examine the potential of various media to create experiences of immersion and interactivity, with special emphasis on print literature and electronic texts. The two types of experience will be related to two philosophical interpretations of the concept of virtuality: the virtual as fake, and the virtual as matrix of possibilities. Materials to be studied will include print fiction, electronic texts (including hypertext fiction), computer games, descriptions of VR projects, and theoretical texts about electronic culture. The course will encourage students to make maximal use of electronic resources.

S HUM 422 Imagination (also Philosophy 442)
Spring. 4 credits. Limited to 15 students. Permission of instructor. C. Williams.
We will philosophically explore the imagination, with particular attention to the notion of a point of view, what is involved in occupying a point of view, the extent to which we can imaginatively transcend our own (and the ways in which there may be limits to our success), and the role of imaginative exercise in aesthetic and moral experience. Our picture of imagination will stress the "virtual" movement of the imagery, and partly contrasts with the traditional identification of imagining with image-making.

S HUM 423 The Role of Women in Muslim Societies: Past, Present, and Future (also Asian Studies 422 and Near Eastern Studies 457)
Spring. 4 credits. Limited to 15 students. J. Armijo-Hussein.

S HUM 429 Race in Biomedical Constructions of Women (also Women's Studies 488)
Fall. 4 credits. Limited to 15 students. M. Murphy.

S HUM 430 Islam in China and Southeast Asia (also Asian Studies 422 and Near Eastern Studies 453)
Fall. 4 credits. Limited to 15 students. J. Armijo-Hussein.

S HUM 444 Metaphysics and Epistemology (also Philosophy 460)
Fall. 4 credits. Limited to 15 students. K. Balog.
**Southeast Asia Program**

Southeast Asia studies at Cornell is included within the framework of the Department of Asian Studies. Sixteen full-time core faculty members in the colleges of Arts and Sciences, Business and Public Administration, and Agriculture and Life Sciences participate in an interdisciplinary program of teaching and research on the history, culture, and societies of the region stretching from Burma through the Philippines. An additional thirty-seven lecturers and other faculty provide language and area instruction on Southeast Asia. Courses are offered in such fields as agricultural economics, anthropology, Asian studies, economics, finance, government, history, history of art, linguistics, music, and rural sociology. Instruction is also offered in a wide variety of Southeast Asian languages: Burmese, Chinese (Mandarin and Cantonese), Cambodian, Cebuano (Bisayan), Indonesian, Javanese, Tagalog, Thai, and Vietnamese, for which Foreign Language Area Fellowships are available to U.S. citizens. The formal program of study at Cornell is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar and concerts of the Gamelan Ensemble. The George Mct. Kahin Center for Advanced Research on Southeast Asia is also the site for public lectures as well as publication and outreach activities related to this area. The John M. Echols Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on this subject in America. Undergraduates may major in Asian studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asian studies by completing 18 credits of course work. Graduate students may pursue the M.A. degree in Southeast Asia Studies with a concentration in Southeast Asia. Undergraduates in Southeast Asian studies receive a doctorate in a discipline such as history, anthropology, or city and regional planning.

Additional information is available on the Internet at: [http://www.cinaudi.cornell.edu/southeastasia](http://www.cinaudi.cornell.edu/southeastasia)

**Statistical Science Department**

The university-wide Department of Statistical Science coordinates undergraduate and graduate study in statistics and probability. A list of suitable courses can be found in the section, "Interdisciplinary Centers, Programs, and Studies," in the front of this catalog.

---

**Women's Studies Program**

Kathy Abrams, acting director; J. E. Gainor, director of undergraduate studies; D. Castillo and M. B. Norton, director of graduate studies; L. Abel, K. Abrams, A. Adams, N. Assie-Lumumba, K. Barzman, P. Becker, S. Berin, L. Beneria, A. Berger, J. Bernstock, L. Bogel, Laura Brown, Lois Brown, J. Brumberg, C. Chase, B. Correll, I. Devault, J. Farley, S. Feldman, J. Fortune, N. Furman, J. Ginsburg, S. Greene, E. Hanlon, K. Haines-Eitzen, N. Hirschmann, M. Hite, D. Holmberg, F. Hyams, B. J. Isbelle, M. Jacobs, J. Jennings, K. Jones, M. Katzenstein, C. Lazzaro, K. March, C. A. Mutual, for which Foreign Language Area Studies Fellowships are available to U.S. citizens. The formal program of study at Cornell is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar and concerts of the Gamelan Ensemble. The George Mct. Kahin Center for Advanced Research on Southeast Asia is also the site for public lectures as well as publication and outreach activities related to this area. The John M. Echols Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on this subject in America. Undergraduates may major in Asian studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asian studies by completing 18 credits of course work. Graduate students may pursue the M.A. degree in Southeast Asian studies or pursue a Master of Professional Studies in another school with a concentration in Southeast Asian studies. Ph.D. students specializing in Southeast Asian receive a doctorate in a discipline such as history, anthropology, or city and regional planning.

Additional information is available on the Internet at: [http://www.cinaudi.cornell.edu/southeastasia](http://www.cinaudi.cornell.edu/southeastasia)

Inquiries for further information should be directed to the program office, 180 Uris Hall.
Director of Undergraduate Studies (DUS) in Women's Studies.

**The Undergraduate Major**

The questions posed by feminist inquiry cannot be answered from within any single discipline or even from a simple combination of two or more disciplines. For that reason, the women's studies major provides students with a basic groundwork in the interdisciplinary field of women's studies and then requires each student to construct an advanced and individually tailored program of study on a topic, in a discipline, or in a combination of disciplines of special interest to the student alone.

Rather than specifying a particular sequence of required courses for each and every student, the women's studies major gives students a starting point in women's studies, an active advisory structure to help them shape a curriculum, and an ongoing impetus to reflection about their entire program of undergraduate study.

In designing their major, students should keep in mind that there are not many graduate programs offering a degree in women's studies itself. Accordingly, undergraduates wishing to major in women's studies should talk at length with a faculty member about how to design a program of study that will best qualify them for entry into either a job or a postgraduate degree program when they leave Cornell. To give one example of what needs to be considered in designing a major: Undergraduates who might want to do graduate study within a discipline will need to develop a certain level of disciplinary specialization at the undergraduate level. This can be done either by supplementing the women's studies major with a carefully selected cluster of courses in that discipline or by pursuing a double major.

**Requirements for a Women's Studies Major**

1. **Prerequisite courses:** before applying to the major, the student must complete any two Women's Studies courses with a grade of B- or better. Some suggested entry-level courses for 1998-99 include: WOMNS 206, 210, 234, 244, 263, 269, 273, 277, and 289. These courses would count both as prerequisites and as part of the women's studies major. Freshman writing seminars, in contrast, would count as prerequisite courses but not as part of the major.

2. **Required course work:**
   a. A minimum of 36 credits in women's studies is required for the major. No course in which the student has earned less than a C- can count toward these 36 credits. Although there are not many graduate programs offering a degree in women's studies itself, there are many programs offering a degree in women's studies. Accordingly, undergraduates wishing to major in women's studies should talk at length with a faculty member about how to design a program of study that will best qualify them for entry into either a job or a postgraduate degree program when they leave Cornell. To give one example of what needs to be considered in designing a major: Undergraduates who might want to do graduate study within a discipline will need to develop a certain level of disciplinary specialization at the undergraduate level. This can be done either by supplementing the women's studies major with a carefully selected cluster of courses in that discipline or by pursuing a double major.

b. Students may count up to three courses outside women's studies toward the major if those courses are approved by the student's women's studies adviser as constituting a meaningful component of the student's women's studies curriculum. To facilitate the coordination of a women's studies major with other majors in the college, students may also count toward the major up to three women's studies courses that are simultaneously being counted toward a second major.

3. The Honors Program: to graduate with honors, the major in women's studies must complete a senior thesis under the supervision of a women's studies faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative grade point average of 3.0 in all coursework and a 3.5 average in all courses applying to their women's studies major. Students interested in the Honors Program should consult the Director of Undergraduate Studies (DUS) late in the spring semester of their junior year or very early in the fall semester of their senior year. For more information about the Honors Program, see WOMNS 400 and the "Guidelines For a Senior Honors Thesis" available in the Women's Studies Program office.

**The Women's Studies Concentration**

Undergraduate students in any college at Cornell can concentrate in Women's Studies in conjunction with a major defined elsewhere in the university. The concentration consists of four courses in Women's Studies completed with a grade of C- or above, no more than two of which can come from a single discipline and none of which should overlap with the major. In rare cases, the DUS may allow one class from within a student's major to count toward the requirements for the concentration. Students should not assume the waiver will be granted, and they must petition the DUS for this request before the beginning of their final semester of study. Freshman writing seminars cannot be included within the four required courses. Students wishing to concentrate in Women's Studies should see the DUS.

**The LBG Concentration**

Women's Studies serves as home to the Lesbian, Bisexual, and Gay Studies Program, which offers an undergraduate concentration as well as a graduate minor. The LBG undergraduate concentration consists of four courses. The Women's Studies courses that may be required to fulfill the LBG concentration are WOMNS 214, 244, 277, 289, 321, 353, 355, 376, 377, 413, 415, 427, 433, 450/650, 441/641, 465, 467, 468, 493, 621, 626, 654, and 656. For a complete listing of all courses that will fulfill this concentration please see the LBG Studies Program office.

**I. Courses**

**WOMNS 106** FWS: Women and Writing (also English 105)
Fall and spring. 3 credits. Staff. For description, see ENGL 105.

**WOMNS 107** FWS: Women Living on the Edge (also Society for the Humanities 106)

**WOMNS 109** FWS: Gendered Imaginations in African History and Literature (also History 109)

**WOMNS 167** FWS: Masculinity in Light of Feminism (also Anthropology 167)

**WOMNS 178** FWS: Desire (also English 178)

**WOMNS 190** FWS: When a Girly Girl Meets a Manly Man: Gender & Tales of Love (also Theatre, Film, and Dance 190)
Fall and spring. 3 credits. T. Rhys. For description, see THEETR 190.

**II. Courses**

**WOMNS 206** Gender and Society (also Rural Sociology 206)
Spring. 3 credits. B. Wejnert. For description, see R SOC 206.

**WOMNS 210** Introduction to Feminist Theory
Fall. 4 credits. A. Villarejo.

This course introduces students to critical approaches in feminist scholarship to the cultural, socioeconomic, and political situation(s) of women. Particular attention will be paid to the conceptual challenges and dangers posed by attempts to study women without taking account of relations between race, class, and gender in ideological and social formations. Readings will draw on work in various disciplines and will include literary texts and visual images.

**WOMNS 214** Biological Basis of Sex Differences (also Biological Sciences 214 and Biology and Society 214)
Fall. 3 credits. J. Fortune.

For description, see BIO AP 214.

**WOMNS 227** Men and Women in Modern America (also History 227)

**WOMNS 234** Gender in Early Modern Europe (also History 234)
Fall. 4 credits. R. Weil.
For description, see HIST 234.

**WOMNS 238** The Historical Development of Women as Professionals, 1800-Present (also Human Development and Family Studies 258, American Studies 258, and History 328)

**WOMNS 243** Inside-Out: The American Everyday Interior (also Design and Environmental Analysis 243)

J. Jennings.

WOMNS 285 Introduction to Sexual Minorities (also Human Development and Family Studies 285) Fall. 3 credits. S. Bem. For description, see HDFS 285.

WOMNS 296 Gender and Sexuality in Early Christianity (also Near Eastern Studies 296 and Religious Studies 297) Spring. 4 credits. K. Haines-Enzen. For description, see NES 296.

WOMNS 305 Emotion, Gender, and Culture (also Anthropology 305) # 4 credits. Not offered 1998-99. B. J. Isbell. Fall. 3 credits. B. Isbell.

WOMNS 321/621 Sex and Gender in Cross-Cultural Perspective (also Anthropology 321/621) @ Fall. 4 credits. K. March. For description, see ANTH 321/621.

WOMNS 341 Ethical Theory (also Philosophy 341) Spring. 4 credits. K. Jones. For description, see PHIL 341.

WOMNS 350 Women and Patronage in Islam (also Near Eastern Studies 350) Spring. 4 credits. D. Ruggles. For description, see NES 350.

WOMNS 353 Feminism: State and Public Policy (also Government 353) Fall. 4 credits. M. Katzenstein. For description, see GOVT 353.

WOMNS 362 Global Perspectives on Gender @ 4 credits. Not offered 1998-99. N. Assie-Lumumba. The course will examine how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class will be taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty directing the course, the class will consider such issues as cross-cultural perspectives on gender, the history of work and family life in different societies, the gendered division of labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; the role of the state in constructing an engendered economy and policy.

WOMNS 365 Topics in Social and Personality Development: The Psychological Development of Women (also Human Development and Family Studies 365) Spring. 3 credits. C. Raver. For description, see HDFS 365.

WOMNS 366 Women at Work (also Industrial and Labor Relations: Human Resources 366) Spring. 3 or 4 credits. J. Farley. For description, see ILLRHR 366.

WOMNS 370 19th-Century Novel (also English 370) Spring. 4 credits. E. Hanson. For description, see ENGL 370.

WOMNS 380 Gender, Ideology, and Culture (also Sociology 380) Spring. 4 credits. P. Becker. For description, see SOC 380.

WOMNS 400 Senior Honors Thesis Fall and spring. 2-4 credits. For Women's Studies seniors only. Permission of Women's Studies faculty member required. Student must carry a GPA of 3.0 in all subjects and a 3.3 in Women's Studies. Staff. Both the form of theses, and the nature and extent of contact between student and adviser, will depend on mutual agreement between the two. In one common scenario, the student will write an essay of approximately 50 pages in length, drafted and revised in a series of carefully planned stages over the course of two semesters, with an outline expected on approximately Sept. 15th and a draft of the first chapter on approximately November 15th. An "R" grade will be assigned at the end of the fall semester and a letter grade on completion of the project at the end of the spring semester.

WOMNS 404 Women Artists (also History of Art 468) Spring. 4 credits. J. Bernstock. For description, see ART H 466.

WOMNS 405/605 Domestic Television 4 credits. Not offered 1998-99. A. Villarejo. This course is a seminar on television as technology and cultural form, focusing on the domestic as a synonym for gendered value-creating, an axis of the international division of labor (and questions of television's dissemination and circulation), and a site for historical exploration. The course balances readings in television and cultural theory (Spigel, Dienst, Merck, Williams, Feuer, Modleski, Mellenberg, Trattner, Spivak and others) with close analysis of television as information, entertainment, furniture, technology, text, genre, flow, channel, and circuit of production of the commodity audience. Students may enroll in either undergraduate or graduate level with graduate students submitting a longer paper and doing supplementary readings.

WOMNS 406 The Culture of Lives (also Anthropology 406) @ Spring. 4 credits. K. March. For description, see ANTH 406.

WOMNS 408 Gender Symbolism (also Anthropology 408) Spring. 4 credits. K. March. For description, see ANTH 408.

WOMNS 409/609 Misogyny and Its Readers (also Italian 409/609 and Comparative Literature 449/649) Fall. 4 credits. M. Miglena. For description, see ITALIT 409/609.

WOMNS 415 Race, Gender and Organization (also Government 415) Spring. 4 credits. M. Katzenstein and J. Reppy. For description, see GOVT 415.

WOMNS 420 Race in Biomedical Constructions of Woman (also Society for the Humanities 420) Fall. 4 credits. M. Murphy. What is a woman? Is there such a thing as race? Using feminist theory and historical case studies, this course critically explores the cultural work of "race" in scientific constructions of "woman" in twentieth-century America. Race is deeply inscribed in the ways biomedicine conceives of and deals with women's bodies, both white women and...
women of color. We will unpack claims of a biological underpinning for both race and gender, and try to understand the ways race has been used to define difference amongst women. To give our conversations focus, we will read feminist theory on the relationships between race, gender, and difference against five historical case studies, which will include motherhood and eugenics, sexually transmitted diseases and AIDS, the politics of breast cancer, birth control and reproductive rights, and the feminist health movement.

WOMNS 427 Shakespeare: Gender, Sexuality, Cultural Politics (also English 427)  
Spring. 4 credits. B. Correll.  
For description, see ENGL 427.

[WOMNS 431 Scenes of Female Enlightenment (also English 431)  
M. Jacobus.]

[WOMNS 433 The Female Dramatic Tradition (also Theatre Arts 436)  

WOMNS 438 Female Adolescence in Historical Perspective, 1815-1960 (also Human Development and Family Studies 417 and History 458)  
Spring. 4 credits. J. Brumberg.  
For description, see HDFS 417.

WOMNS 441/442 Theatre of Commodities: Feminism, Advertising, T.V., and Performance (also Theatre Arts 439)  
Spring. 4 credits. A. Villarejo and R. Schneider.

This course will explore the employment of bodies and objects as representational emblems of value and desire in late capitalism. We will analyze the ways in which desire circulates through print advertising, television, and the avant-garde. We will examine socio-cultural constructions of the relationship between screen bodies and live bodies, especially as involves advertising and advertising. We will explore conceptual and cultural inscribed spaces between notions of desire, fulfillment, deferral, and value coding. Throughout, feminist analysis of gender construction and deployment in the realms of the market, popular culture, and "high" art will frame our inquiry. Finally, we will ask questions about the problematic of interventional tactics in art and popular culture relative to consumption and commodity aesthetics. The course will draw on Williamson, Marx, Benjamin, Freud, Irigaray, de Certeau, Baudrillard, Dienst, Goldman, McClintock, Bordieu, Friedman, Haug, Lee, Fisher, Goffman, Lears, Murray, Taylor and others as well as numerous print advertisements, television texts, and performance artwork.

[WOMNS 442 Feminist Politics and Policies in the United States and Western Europe (also Government 442)  
M. Katzenstein/U. Liebert.]

WOMNS 443 The Novels of George Eliot (also English 444)  
Fall. 4 credits. C. Chase.  
For description, see ENGL 444.

[WOMNS 444 Historical Issues of Gender and Science (also Science and Technology Studies 444)  
M. Rossiter.]

[WOMNS 447 Reading Freud: Gender, Race, and Psychoanalysis (also German Studies 447 and Comparative Literature 447)  

[WOMNS 448/449 Boccaccio: Gender, Power, and the Medieval Text (also Italian Literature 444/445 and Comparative Literature 450)  

WOMNS 450/455 The Lenses of Gender (also Psychology 450/455)  
Spring. 4 credits. S. Bern.  
For description, see PSYCH 450/455.

[WOMNS 451 Women in Italian Renaissance Art (also Art History 450)  
C. Lazarro.]

WOMNS 457 The Sexed Body in Western Art (also History of Art 457)  
Fall. 4 credits. K. Burman.  
For description, see ART H 457.

WOMNS 459 Education in Africa and the Diaspora (also Africana 460)  
Fall. 4 credits. N. Assie-Lumumba.  
For description, see ASR & RC 459.

[WOMNS 461 Feminist Epistemology (also Philosophy 461)  

[WOMNS 464 Gender and Politics in the Roman World (also Classics 463 and History 463)  

[WOMNS 465 Feminist Theory/Lesbian Theory  
C. A. Martin.]

[WOMNS 466 Feminism and Gender Discrimination (also Government 466 and Law 468)  

WOMNS 467 Sexual Minorities and Human Development (also Human Development and Family Studies 464)  
Spring. 4 credits. R. Savin-Williams.  
For description, see HDFS 464.

[WOMNS 468 Radical Democratic Feminisms (also Government 467)  

[WOMNS 471 American Indian Women's Literature (also English 471)  

WOMNS 478 Family and Society in Africa (also Africana 478)  
Fall. 4 credits. N. Assie-Lumumba.  
For description, see ASR & RC 478.

[WOMNS 479 Women and Gender Issues in Africa (also Africana 479)  
N. Assie-Lumumba.]

WOMNS 490 The Body in American Feminism (also Society for the Humanities 489)  
Spring. 4 credits. M. Murphy.  
This course traces the changing place of the body as a site of political struggle in the last three decades of American feminism. How has late-twentieth-century feminism engaged, in theory and practice, with the body? Of central concern will be the complexity of ways feminists have critiqued medical and technoscientific interpretations of women's bodies. We will investigate the troubled relation between the body and the question, "what is a woman?" We will also unpack how medical technologies have changed political valances in different feminisms. At stake in our explorations is how to critically engage the materiality of the body in an age of technoscience. Reading and interpreting feminist theory, health guides, movies, and manifestos from the late 1960's up until the present, we will take up these questions in three topics—the women's health movement, reproductive technologies, and cyborg feminism.

[WOMNS 491 Latin American Women Writers (also Spanish 492 and Comparative Literature 462)  
D. Castillio.]

WOMNS 495 Encountering Women's Studies: Perspectives from the Disciplines  
Fall. 4 credits. S. Greene.

What impact has women's studies had on pre-existing ways of thinking and knowing in such disciplines as history, psychology, sociology, linguistics? Readings and discussions will analyze the role of women's studies as it has challenged the disciplines and has in turn been challenged by scholars and non-scholars alike.

WOMNS 498 Chicana Renaissance (also English 490)  
Spring. 4 credits. B. Olguin.  
For description, see ENGL 490.

[WOMNS 499 Honors Seminar I: Women's Writing, Revolution and Romance (also English 491)  
Fall. 4 credits. M. Jacobus.  
For description, see ENGL 491.]

[WOMNS 500 French Feminisms (also French 493)  

WOMNS 496 Women and Music (also Music 493)  
Spring. 4 credits. J. Peraino.  
For description, see MUSC 493.

[WOMNS 499 Directed Study  
Fall and spring. Variable credit. Prerequisites: one course in women's studies and permission of a faculty member of the Women's Studies Program Board. Staff.]

[WOMNS 502 Education and Development in Africa (also Africana 502)  

[WOMNS 530 Womanist Writing in Africa and the Caribbean (also Africana 530)  
ARTS AND SCIENCES - 1998-1999

WOMNS 600 Special Topics in Feminist Theory: An Interdisciplinary Graduate Seminar in Women's Studies 4 credits. This course is open to graduate students and undergraduate seniors who have obtained permission of instructor. Not offered 1998-99. Next offered fall 1999-00. Staff. The purpose of this course is to expose graduate students to interdisciplinary approaches in Women's Studies and feminist theory to a variety of topics or questions. While many of our graduate courses train students in highly specialized areas of feminism theory, this course aims to teach students how to find common intellectual ground around a single topic from interdisciplinary perspectives without sacrificing the complexity of any disciplinary approach. The course is designed for graduate minors in Women's Studies and students with a specialized interest in feminist theory. Although it is not required, the course is strongly recommended for students obtaining a graduate minor in Women's Studies.

WOMNS 608 African-American Women (also History 608) Spring. 4 credits. M. Washington. For description, see HIST 608.

WOMNS 613 The Political Economy of Gender and Work (also City and Regional Planning 613) 3 credits. Not offered 1998-99. L. Brenner.

WOMNS 626 Graduate Seminar in the History of American Women (also History 626) Spring. 4 credits. M. B. Norton. For description, see HIST 626.

WOMNS 636 Comparative History of Women and Work (also Industrial and Labor Relations 636) Spring. 4 credits. I. DeVault. For description, see ILR 636.

WOMNS 644 Topics in the History of Women in Science (also Science and Technology Studies 644) Fall. 4 credits. M. Rossiter.

WOMNS 654 Queer Theory (also English 654) Spring. 4 credits. E. Hanson. For description, see ENGL 654.

WOMNS 656 Decadence (also English 655 and Comparative Literature 655) 4 credits. Not offered 1998-99. E. Hanson.

WOMNS 670 Feminist Political Theory (Graduate Seminar) (also Government 671) Spring. 4 credits. N. Hirschmann. For description, see GOVT 671.

WOMNS 699 Topics in Women's Studies Fall and spring. Variable credits. Staff. Independent reading course for graduate students on topics not covered in regularly scheduled courses. Students develop a course of reading and writing with a faculty member in the field of Women's Studies who has agreed to supervise the course work.

FACULTY ROSTER

For arts and sciences biology faculty see under "Division of Biological Sciences"

Abrams, Meyer H., Ph.D., Harvard U. Class of 1916 Professor of English Emeritus, English Department of English Emeritus. English 661 (also English 661)

Adelson, Leslie A., Ph.D., U. of Washington. Professor Emeritus, English

Albrecht, Andreas C., Ph.D., of Washington. Professor Emeritus, English

Alexander, James P., Ph.D., of Chicago. Associate Professor of Classics

Allender, Richard W., Ph.D., Stanford U. Professor Emeritus, English

Allmendinger, Richard W., Ph.D., of Chicago. Professor Emeritus, English

Ammons, Archie R., B.S., Wake Forest Coll. Associate Professor Emeritus, English

American Studies

Ambegaokar, Vinod P., Carnegie Inst. of Technology. Professor Emeritus, Physics

Ammons, Archie R., B.S., Wake Forest Coll. Associate Professor Emeritus, English

Amster, Barry T., Ph.D., of Chicago. Professor Emeritus, English

Anson, Warren, Ph.D., Harvard U. Associate Professor Emeritus, English

Aoki, Akira, Ph.D., of Chicago. Professor Emeritus, English

Argyres, Philip C., Ph.D., of Princeton. Assistant Professor Emeritus, English

Aronson, Isaac M., Ph.D., of Munich (Germany). Assistant Professor Emeritus, Political Science

Ascher, Robert, Ph.D., of California at Los Angeles. Professor Emeritus, Anthropology

Ashworth, Robert V., Ph.D., of Chicago. Professor Emeritus, Psychology

Ashton, Jennifer Ph.D., Johns Hopkins U. Associate Professor Emeritus, English

Assefa-Lumumba, Ndri, Ph.D., of Chicago. Associate Professor Emeritus, African Studies/Women's Studies

Austin, William W., Ph.D., Harvard U. Given Foundation Professor Emeritus, Music

Barad, Barbara Ph.D., Cornell U. Professor Emeritus, Chemistry

Baranzangi, Muawia, Ph.D., of California at Berkeley. Associate Professor Emeritus, Political Science

Barbosa, Dan, Ph.D., of Illinois. Professor Emeritus, Mathematics

Barzman, Karen-edta, Ph.D., Johns Hopkins U. Assistant Professor Emeritus, History of Art

Bassett, William A., Ph.D., Columbia U. Professor Emeritus, Geological Sciences

Basu, Kaushik, Ph.D., London School of Economics (England). Carl Marks Professor Emeritus, International Studies

Bathrick, David Ph.D., of Chicago. Professor Emeritus, German Studies/Theater, Film and Dance

Bauer, Simon H., Ph.D., of Chicago. Professor Emeritus, Philosophy

Becker, Penny Ph.D., of Chicago. Associate Professor Emeritus, Sociology

Begley, Tadgh P., Ph.D., California Inst. of Technology. Professor Emeritus, Chemistry

Bekete, Ayale, Ph.D., Temple U. Assistant Professor Emeritus, Africana Studies and Research Center

Bem, Daryl J., Ph.D., of Michigan. Professor Emeritus, Psychology

Benn, Sandra L., Ph.D., of Michigan. Professor Emeritus, Psychology

Benedict, James Ph.D., Columbia U. Professor Emeritus, History

Bennet, Lourdes, Ph.D., Columbia U. Professor Emeritus, City and Regional Planning/Women's Studies

Bensel, Richard Ph.D., Cornell U. Professor Emeritus, Government

Bereaud, Jacques, Doctorat d'Univ., of Lille (France). Professor Emeritus, Romance Studies

Berger, Anne Ph.D., of France. Professor Emeritus, Romance Studies

Berkelman, Karl Ph.D., Cornell U. Goldwin Smith Professor Emeritus, Physics

Holcombe, Donald F., U. of Illinois. Professor Emeritus, Physics/LASSP
Holdheim, W. Wilson, Ph.D., U. of Wisconsin. Emeritus, Physics/LASSP
Holloway, Thomas H., Ph.D., U. of Wisconsin. Professor Emeritus, History
Holmberg, Davis H., Ph.D., Cornell U. Professor Emeritus, Anthropology/Women's Studies
Holquist, Peter, Ph.D., Columbia U. Assistant Professor Emeritus, History
Hong, Yongmin, Ph.D., U. of California at San Diego. Associate Professor Emeritus, Economics
Hopcroft, John E., Ph.D., Stanford U. Joseph C. Ford Professor of Computer Science
Houck, James R., Ph.D., Cornell U. Kenneth A. Wallace Professor of Astronomy/CRSR
Houston, Paul L., Ph.D., Massachusetts Institute of Technology. Professor Emeritus, Chemistry
Hsu, John T. H., D.Music, New England Conservatory of Music. Old Dominion Professor Emeritus, Psychology
Hubbard, John H., Doctorat d'Etat, U. de Paris (France). Professor Emeritus, Mathematics
Hughes, Robert E., Ph.D., Cornell U. Emeritus, Chemistry
Hull, Isabel V., Ph.D., Yale U. Professor Emeritus, History
Husa, Karel, Diplome, Paris Conservatory (France). Kappa Alpha Professor of Music Emeritus
Huttenlocher, Daniel Ph.D., Massachusetts Institute of Technology. Professor Emeritus, Computer Science
Hwang, J. T., Gene, Ph.D., Purdue U. Professor Emeritus, Mathematics
Irwin, Terence H., Ph.D., Princeton U. Susan Linn Sage Professor of Philosophy Emeritus
Isacks, Bryan L., Ph.D., Columbia U. William and Katherine Snee Professor of Geological Sciences/INSTOC
Isard, Walter, Ph.D., Harvard U. Emeritus, Economics
Ishibashi, Billie J., Ph.D., U. of Illinois. Associate Professor Emeritus, Anthropology
Isen, Alice M., Ph.D., Stanford U. Associate Professor Emeritus, Johnson Graduate School of Management/Political Science
Janowicz, Phyllis M., M.A., U. of Massachusetts. Professor Emeritus, English
Jeffreys, Bixlum, Ph.D., New York U. Professor Emeritus, English
Munasinghe, Viranjini P., Ph.D., U. of Michigan. Asst. Prof., Philosophy/Science and Technology Studies
Miller, Richard W., Ph.D., Harvard U. Prof., Philosophy/Science and Technology Studies
Miller, William T., Ph.D., Duke U. Prof., Emeritus, Chemistry
Minkowski, Christopher, Ph.D., Harvard U. Assoc. Prof., History of Art
Mitra, Tapan, Ph.D., U. of Rochester. Prof., Economics
Moen, Phyllis, Ph.D., U. of Minnesota. Prof., Romance Studies
Morley, Michael D., Ph.D., U. of Chicago. Prof., Mathematics
Morrisett, Greg, Ph.D., Carnegie Mellon U. Asst. Prof., Computer Science
Morrison, George H., Ph.D., Princeton U. Prof., Emeritus, Chemistry
Munasinghe, Viranjini P., Ph.D., Johns Hopkins U. Asst. Prof., Anthropology/Asian American Studies
Murray, Edward, Ph.D., Yale Univ. Assoc. Prof., Classics
Murray, Timothy, Ph.D., Johns Hopkins U. Prof., English
Najemy, John M., Ph.D., Harvard U. Prof., History
Nee, Victor, Ph.D., Harvard U. Goldwin Smith Professor of Sociology
Neisser, Ulric, Ph.D., Harvard U. Prof., Psychology
Nelson, Frederick E., Ph.D., U. of Michigan. Assoc. Prof., Geological Sciences
Nerode, Anil, Ph.D., U. of Chicago. Professor of Mathematics
Neuhausser, Frederick, Ph.D., Columbia U. Assoc. Prof., Philosophy
Ngate, Jonathan, Ph.D., U. of Washington. Prof., English
Nicholson, Philip, Florida, Calif. Inst. of Technology. Prof., Astronomy/CRSR*
Norton, Mary Beth, Ph.D., Harvard U. Mary Donlon Alger Professor of American History, History
Nussbaum, Alan, Ph.D., Harvard U. Assoc. Prof., Classics/Linguistics
O'Connor, Stanley J., Ph.D., Cornell U. Prof., Emeritus, History of Art
O'Donoghue, Ted, Ph.D., U. of California at Berkeley. Asst. Prof., Economics
Obadile, Don, Ph.D., U. of Jos (Nigeria). Assoc. Prof., Africana Studies and Research Center
Okhiro, Gary, Ph.D., U. of California at Los Angeles. Prof., History/Asian American Studies Program
Olguin, Ben V., Ph.D., Stanford U. Asst. Prof., English
Oliver, Jack E., Ph.D., Columbia U. Irving Porter Church Professor Emeritus of Engineering/Geological Sciences/INSTOC*
Olum, Paul, Ph.D., Harvard U. Prof. Emeritus, Mathematics
Orear, Jay, Ph.D., U. of Chicago. Prof. Emeritus, Physics/LNS*
Origueira, Salvador, Ph.D., U. Carlos III (Madrid) Asst. Prof. Economics
Owen, David I., Ph.D., Brandeis U. Bernard and Jane Schapiro Professor of Ancient Near Eastern and Judaic Studies, Near Eastern Studies
Owen, Michael J., Ph.D., Indiana U. Asst. Prof., Psychology
Palmer, Robert M., M.M., Eastman School of Music. Given Foundation Professor of Music Composition Emeritus, Music
Pan, An-yi, Ph.D., U. of Kansas. Asst. Prof., History of Art
Parker, A. Reeve, Ph.D., Harvard U. Prof., English
Parpia, Jecvak M., Ph.D., Cornell U. Prof., Physics/Eng
Parrish, Stephen M., Ph.D., Harvard U. Goldwin Smith Professor of English Emeritus
Patterson, J. Ritchie, Ph.D., U. of Chicago. Asst. Prof., Physics/LNS*
Payne, Lawrence E., Ph.D., Iowa State U. Prof. Emeritus, Mathematics
Pepeva, Irena, Ph.D., Brandeis U. Asst. Prof., Mathematics
Peirce, Leslie, Ph.D., Princeton U. Assoc. Prof., Ottoman and Islamic History, Near Eastern Studies
Pelliccia, Hayden, Ph.D., Yale U. Assoc. Prof., Classics
Peraino, Judith A., Ph.D., U. of California at Berkeley. Assoc. Prof., Romance Studies
Peterson, Charles A., Ph.D., U. of Washington. Prof., History
Pietra, Jose, Ph.D., Yale U. Assoc. Prof. Emeritus, Economics
Pigott, Joan R., Ph.D., Stanford University. Assoc. Prof., History
Pingali, Keshav K., Ph.D., Massachusetts Inst. of Technology. Prof., Computer Science
Pinter, Walter M., Ph.D., Harvard U. Prof., Emeritus, History
Plante, Robert A., Ph.D., U. of Chicago. Prof., Emeritus, Chemistry
Platek, Richard, Ph.D., Stanford U. Assoc. Prof., Mathematics
Pohl, Robert O., Doktor, U. Erlangen. Doctor of Philosophy/LASSP*
Pohl, Susanne, Ph.D., U. of Michigan. Asst. Prof., History
Polenberg, Richard, Ph.D., Columbia U. Goldwin Smith Professor of American History, History
Pollak, Nancy, Ph.D., Yale U. Assoc. Prof., Russian Literature
Portusnsus, Jonas, Ph.D., U. of California at Berkeley. Assoc. Prof., Government
Porte, Joel, Ph.D., Harvard U. Ernest I. White Professor of American Studies and Human Letters, English/Comparative Literature
Possee, Uri M., Ph.D., Yale U. Prof., Economics
Powers, David S., Ph.D., Princeton U. Prof., Arabic and Islamic Studies, Near Eastern Studies
Provine, William B., Ph.D., U. of Chicago. Prof., History/Biological Sciences
Pucci, Pietro, Ph.D., U. of Fisa (Italy). Doctor of Philosophy/Classics
Rabkin, Jeremy A., Ph.D., Harvard U. Assoc. Prof., Government
Radzniewicz, Mary A., Ph.D., Columbia U. Jacob Gould Schurman Professor of English Emerita
Ralph, Daniel C., Ph.D., Cornell U. Asst. Prof., Physics/LNS*
Ramage, Andrew, Ph.D., Harvard U. Prof., History of Art
Ramakrishna, Ravi, Ph.D., Princeton U. Asst. Prof., Mathematics
Reed, Joseph D., Ph.D., Stanford U. Asst. Prof., Classics
Regan, Dennis T., Ph.D., Stanford U. Assoc. Prof., Psychology
Regan, Elizabeth Adkins, Ph.D., U. of Pennsylvania. Prof., Psychology/Biological Sciences
Rendsburg, Gary, Ph.D., New York U. Prof., Biblical and Semitic Studies, Near Eastern Studies
Reppy, John D., Ph.D., Yale U. John L. Wetherill Professor of Physics, Physics/LASSP*
Reppy, Judith, Ph.D., Cornell U. Prof., Science and Technology Studies
Resina, Joan Ramon, Ph.D., U. of California at Berkeley. Assoc. Prof., Romance Studies
Rhodes, Frank H. T., Ph.D., U. of Birmingham (England). Prof., Geological Sciences
Richards, Annette, Ph.D., Stanford U. Asst. Prof., Music
Richardson, Robert C., Ph.D., Duke U. F. R. Newman Professor of Physics/LASSP*
Rogers, Joseph T., Ph.D., U. of Rochester. Asst. Prof., Physics/LNS*
Rosen, Bernard C., Ph.D., Cornell U. Prof., Emeritus, Mathematics
Rosenberg, Edgar, Ph.D., Stanford U. Prof., English/Comparative Literature
Rothaus, Oscar S., Ph.D., Princeton U. Prof., Mathematics
Rosset, Margaret, Ph.D., Yale U. Marie Underhill Noell Professor of the History of Science, Science and Technology Studies
Rubin, David L., Ph.D., U. of Michigan. Prof., Physics/LNS*
Rubinfeld, Ronit A., Ph.D., U. of California at Berkeley. Asst. Prof., Computer Science
Rush, Myron, Ph.D., U. of Chicago. Prof., Government
Rusten, Jeffrey S., Ph.D., Harvard U. Prof., Classics
Saccamano, Neil, Ph.D., Johns Hopkins U. Assoc. Prof., English
Sakai, Naoki, Ph.D., U. of Chicago. Prof., Asian Studies
Saloff-Coste, Laurent, Ph.D., U. Paris VI. Prof., Mathematics
Salpeter, Edwin E., Ph.D., Birmingham U. (England). James Gilbert White Distincted Professor in the Physical Sciences Emeritus, Physics/LNS/Astronomy/CRSR*
Salvatore, Nicholas, Ph.D., U. of California at Berkeley. Prof., Industrial and Labor Relations/American Studies
Samuels, Shirley, Ph.D., U. of California at Berkeley. Assoc. Prof., English/Women's Studies
Sands, Elizabeth, Ph.D., Cornell U. Prof., Government
Sangren, P. Steven, Ph.D., Stanford U. Assoc. Prof., Anthropology
Santiago-Irizarry, Vilma, Ph.D., New York U. Asst. Prof., Economics
Sawyer, Paul L., Ph.D., Columbia U. Prof., English
Scatterday, Mark D., D.M.A., Eastman School of Music. Given Foundation Professor of Music/LNS*
Schatz, Alfred H., Ph.D., New York U. Prof., Mathematics
Webster, James, Ph.D., Princeton U.  
Goldwin Smith Professor of Music

Weil, Rachel, Ph.D., Princeton U. Assoc. Prof., History

Weiss, John H., Ph.D., Harvard U. Assoc. Prof., History

West, James E., Ph.D., Louisiana State U. Prof., Mathematics

Wetherbee, Winthrop, Ph.D., U. of California at Berkeley. Avalon Professor of English and Medieval Studies, English/Medieval Studies/Comparative Literature

Wetherington, Elaine, Ph.D., U. of Michigan. Assoc. Prof., Sociology/Human Development

White, William M., Ph.D., U. of Rhode Island. Prof., Geological Sciences

Whiting, Jennifer, Ph.D., Cornell U. Assoc. Prof., Philosophy

Whitman, John B., Ph.D., Harvard U. Assoc. Prof., Linguistics

Wisdom, Benjamin, Ph.D., Cornell U. Goldwin Smith Professor of Chemistry

Wilcox, Charles F., Jr., Ph.D., U. of California at Los Angeles. Prof., Chemistry

Williams, L. Pearce, Ph.D., Cornell U. John Stambaugh Professor of the History of Science Emeritus, Science and Technology Studies

Williams, Robin M., Jr., Ph.D., Harvard U. Henry Scarborough Professor of Social Sciences Emeritus, Sociology

Wilson, Robert R., Ph.D., U. of California at Berkeley. Prof Emeritus, Physics

Wilson, Ron, B.G.S., Wichita State U. Assoc. Prof., Theatre, Film and Dance

Woicik, Peter T., Ph.D., California Inst. of Technology. George W. and Grace L. Todd Professor of Chemistry

Wolff, John U., Ph.D., Yale U. Prof., Modern Languages

Wolters, Oliver W., Ph.D., U. of London (England). Goldwin Smith Professor of Southeast Asian History Emeritus, History

Wong, Shelley, Ph.D., U. of California at Berkeley. Asst. Prof., English

Wyatt, David K., Ph.D., Cornell U. John Stambaugh Professor of History, History

Yan, Tung-Mow, Ph.D., Harvard U. Prof., Physics/LNSf

Yeomans, David G., Ph.D., Stanford U. Asst. Prof., Music

Zabih, Raman, Ph.D., Stanford U. Asst. Prof., Computer Science

Zaslaw, Neil A., Ph.D., Columbia U. Herbert Gussman Professor of Music

Zax, David B., Ph.D., U. of California at Berkeley. Assoc. Prof., Chemistry

Zec, Draga, Ph.D., Stanford U. Assoc. Prof., Linguistics

Zucchi, Alessandro, Ph.D., U. of Massachusetts at Amherst. Asst. Prof., Linguistics
