Fall, summer, or spring. Credits to be arranged. S-U grades optional. Staff. For advanced study by an individual student or for study on an experimental basis with a group of students in a field of TXA not otherwise provided through course work in the department or elsewhere at the university. Students prepare a multiplicity description of the study they want to undertake on a form available from the department office. This form must be signed by the instructor directing the study and the department chair and filed at course registration period after registration along with an add/drop slip in 145 MVR, College Registrar Office. To ensure review before the close of the course registration or change-of-registration period, early submission of the special-studies form to the department chair is necessary. Students, in consultation with their supervisor, should register for one of the following subdivisions of independent study.

**TXA 400 Directed Readings**

For study that predominantly involves library research and independent reading.

**TXA 401 Empirical Research**

For study that predominantly involves data collection and analysis, or laboratory or studio projects.

**TXA 402 Supervised Fieldwork**

S-U only. For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**TXA 403 Teaching Apprenticeships**

Fall or spring. 2–4 credits. Prerequisites: student must have upperclass standing, have demonstrated a high level of performance in the subject to be taught and in the overall academic program, and have permission of the instructor and the department chair. S-U grades optional. Staff. Apprenticeship includes both a study of teaching methods in the field and assisting the faculty with instruction.

**TXA 432 Product Quality Assessment**

Fall. 3 credits. Prerequisites: TXA 135 and Statistics. Lab fee, $15. Lecs M W F 1:25–2:15, lab M or W 2:30–4:25. S. K. Obendorf. This course covers evaluation of fibers, yarns, fabrics, and garments, with emphases on the meaning of standards, testing philosophy, quality control, and statistical and laboratory day-to-day tests done in textile and apparel industry will be discussed. Laboratory sections will introduce students to various test methods, data generation for analysis, and evaluation.

**TXA 436 Fiber Chemistry**

Spring. 3 credits. S-U grade optional. Senior and first-year graduate students. Lecs M W F 10:10–11:00. Offered alternate years. Not offered 2000–2001. C. C. Chu. The chemical and physical structure of several commercially important fibers, such as cotton, wool, silk, polyesters, nylons, acrylics, polyolefins and spandex and their polymerization process are discussed. The general chemical and physical properties of each will be given. Degradation reactions for certain fibers such as polyolefins and acrylics will be discussed.

**TXA 439 Biomedical Materials and Devices for Human Body Repair**

Spring. 2-3 credits. 2 credits meets Tues. only; 3 credits meets Tues. and Thurs. S-U grades only for 2 credits, letter grades only for 3 credits. Juniors and seniors only. Prerequisites: college Natural Science requirement. (Chem. or Biol.). T 1:25–2:40, R 1:25–2:40. C. C. Chu. Survey of materials and devices for repair of injured, diseased, or aged human tissues, organs. It includes properties of synthetic and biological materials, wound healing processes, medical devices for repair of wounds, blood vessels, hearts, joints, bones, nerves, male impotence, vision/hearing/voice, and drug control/release.

**TXA 444 Apparel/Textile Retailing and Distribution**

Spring. 3 credits. S-U grades optional. Juniors and seniors only. Prerequisite: TXA 135, TXA 331, and ARME 240 or equivalent. Lec M W 2:55–4:10. Staff. This course provides an overview of the business of design, production, distribution, marketing, and merchandising of apparel and related products from a management perspective. The organization and structure of both domestic and international retailers is included along with pricing strategies, merchandise planning, inventory management, and sales promotion. New uses of computer systems and information technologies will be emphasized throughout.

**TXA 446 Apparel Design: Intermediate Functional Clothing Design**

Spring. 4 credits. Prerequisites: TXA 306 and TXA 246 or permission of instructor. Minimum cost of materials, $125; lab fee, $15. Offered alternate years. M W 10:10–11:10. Staff. Complex problems in functional apparel design will be studied with an emphasis on totally encapsulating clothing. Students will work in groups and individually to set design criteria and develop innovative solutions for current problems in protective apparel.
TXA 465 Apparel Design: Product Development and Presentation
Fall. 4 credits. Prerequisites: minimum of three drawing or art courses, TXA 264, TXA 368, and TXA 375 or permission of instructor. Recommended: TXA 114. Minimum cost of materials, $250; lab fee, $10. M W 10:10-1:10. S. Ashdown. Through studio problems in apparel design, students examine the influence of manufacturing technology and cost on apparel products. Garments are developed to various stages from sketches to finished samples. Some portfolio development included.

TXA 475 Photoshop for Portfolio Presentations in Textiles and Apparel
Spring (first seven weeks of semester). 2 credits. Limited to 16 students. Prerequisite: TXA 217 or TXA 375. Course fee covering CAD lab color printing, $15.00. T R 10:10-12:05. Staff. This course will explore the use of Adobe Photoshop as a tool for portfolio development in textile and apparel design. Building on studio work produced in other courses, students will learn the basics of Photoshop and create a design line for a formal portfolio that will involve textile design applied to either apparel or home furnishings use.

TXA 499 Honors Thesis Research
Fall and spring. 1-6 credits (maximum 6 credits for graduation). S-U grades optional. Prerequisite: TXA students who have been admitted to college honors program. Staff. Independent research leading to the honors thesis. College honors program guidelines are to be followed.

TXA 600 Special Problems for Graduate Students
Fall or spring. Credit to be arranged. S-U grades optional. Staff. Independent advanced work by graduate students recommended by their chair and approved by the department chair and instructor.

TXA 620 Physical Properties of Fiber-Forming Polymers and Fibers
Fall. 3 credits. Prerequisite: permission of instructor and alternate years. Not offered 1999–2000. A. Netravali. Formation and properties of fiber-forming polymers, rubbery, glassy, and crystalline states and their interconnection. Fiber structure, relationship between chemical structure and physical properties of manufactured and natural fibers. Mechanical, thermal, and viscoelastic properties of fibers and testing methods will be discussed.

TXA 625 The Chemistry of Textile Finishes and Dyeing
Spring. 3 credits. S-U optional. Prerequisite: TXA 336 or equivalent and organic chemistry, or permission of instructor. Offered alternate years. Not offered 1999–2000. C. C. Chu. Chemical aspects of textiles with emphasis on finishes and dyeing are discussed. Industrially important textile chemicals used for dyeing and enhancing fiber and fabric properties, such as durable press, anti-soiling, water repellency, will be studied. The emphasis is on the correlation of the observed effect with chemical structure, end-use influences, interaction with fabric and fibers, sources and synthetic routes. The environmental impact of these textile chemicals and current federal regulation will be briefly discussed.

TXA 637 Research Seminars in Apparel Design
Fall and spring. 1 credit; S-U only; repeat of course each semester is encouraged for all apparel design graduate students. Available to advanced undergraduate students with permission of individual instructor. Apparel Design faculty.

TXA 639 Mechanics of Fibrous Assemblies
Fall. 3 credits. Prerequisite: solid mechanics or permission of instructor. Offered alternate years. Not offered 2000–2001. P. Schwartz. A study of the mechanics of fiber assemblies: idealized yarn and fabric models; statistical bundle theories; deformation of yarns and fabrics in tensile, shear, and compressive stress; bending and buckling; and the mechanical behavior of nonwoven textile materials.

TXA 664 Human Factors: Anthropometrics and Apparel
Spring (even-numbered years). 3 credits. S–U grades optional. Prerequisites: course in statistics and permission of instructor. Open to advanced undergraduates. Offered alternate years. Not offered 2000–2001. S. Ashdown. Seminar course focusing on the human form and its relationship to clothing. Includes discussion of quantification of body sizes and human variation; historical, cultural, and aesthetic concepts of fit; apparel sizing techniques; national and international sizing systems and standards; impact of sizing systems on various populations (elderly, handicapped, etc.).

TXA 675 Aesthetics and Meaning in World Dress
Spring. 3 credits; S–U grades optional. Prerequisites: TXA 125 or course in history of art, costume history, or other history. Offered alternate years. Not offered 1999–2000. C. Jirousek. An examination of the aesthetic and social psychological relationship between body and clothing in the context of various cultures. Students will develop a research topic to be presented orally and in a term paper and will participate in the development of an exhibition.

TXA 899 Master's Thesis and Research
Fall or spring. Credits to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S–U grades optional. Staff.

TXA 999 Doctoral Thesis and Research
Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S–U grades optional. Staff.

Faculty Roster
Anderson, Carol L., Ph.D., U. of Michigan. Assoc. Prof., Human Development, Assistant Dean
Ashdown, Susan, Ph.D., U. of Minnesota. Assoc. Prof., Textiles and Apparel
Avery, Rosemary J., Ph.D., Ohio State U. Assoc. Prof., Policy Analysis and Management
Barr, Ronald J., Ph.D., Indiana U. Prof., Policy Analysis and Management
Battistella, Roger M., Ph.D., U. of Michigan. Prof., Policy Analysis and Management
Becker, Franklin D., Ph.D., U. of California at Davis. Prof. and Chair, Design and Environmental Analysis
Brannon, Patsy, Ph.D., Cornell U. Prof., Nutritional Sciences, Dean
Brumberg, Joan A., Ph.D., U. of Virginia. Prof., Human Development
Bryant, W. Keith, Ph.D., Michigan State U. Prof., Policy Analysis and Management

ADMINISTRATION
Edward J. Lawler, dean
Robert Smith, associate dean, academic affairs
Ronald L. Seebor, associate dean, extension and public affairs
James E. McPherson, assistant dean, Office of Student Services
Gordon Law, librarian
Allan Lentin, director, administrative services
Francine Blau, director, research
Michael O’Hara, director, external relations
Robert Stern, graduate faculty representative
Tove Hamner, editor, Industrial and Labor Relations Review

DEGREE PROGRAMS
Industrial and Labor Relations

GRADUATE DEGREES
More than 120 students on the Cornell campus are enrolled in graduate study in industrial and labor relations, one of the largest graduate fields in the university. Students may work toward the degrees of Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy. For further information on graduate programs, contact the Graduate Office, School of Industrial and Labor Relations, Cornell University, 216 Ives Hall, Ithaca, NY 14853-3901.

THE SCHOOL
The School of Industrial and Labor Relations at Cornell (ILR) is a small school within a large university. It tries to maintain the small-college atmosphere expected of an institution that has about 720 undergraduates and approximately 120 graduate students, even as ILR students participate fully in the activities of the larger Cornell community.

ILR students study in modern, technologically advanced lecture halls, seminar rooms, and libraries.

Almost half of the school’s typical freshman class comes from the greater New York City area. Another 30 percent live in other parts of New York State. Students from other states and a few from foreign countries make up the rest of the class. Women constitute about 50 percent of recent entering classes, and minority students comprise about 25 percent of new freshmen and transfer students.

Students enrolled in the School of Industrial and Labor Relations at Cornell may take a substantial number of courses in the other six undergraduate colleges and schools of the university, including the College of Arts and Sciences. Cornell students have access to all of the libraries and other services of the university.

The school operates in four areas: (1) resident instruction, (2) extension and public service, (3) research, and (4) publications. It provides instruction to undergraduates and graduate students who are preparing for careers in industrial and labor relations, as well as to men and women already engaged in industrial relations activities and the general public through its Extension and Public Service Division.

The school’s Conference Center, part of the extension division, initiates and hosts conferences covering the full scope of industrial and labor relations. The center provides continuing education and information to practitioners and scholars.

The Research Division develops materials for resident and extension teaching and originates studies in industrial and labor relations. The Publications Division publishes and distributes the research results.

DEPARTMENTS OF INSTRUCTION
Courses in the school are organized into six departments:

Collective Bargaining, Labor Law, and Labor History

In the study of workers, employers, and the government policies affecting them, members of this faculty concentrate on subjects of industrial and labor relations best understood by reliance on the fields of administration, economics, history, and law. Courses explore subjects within the framework of American society, stress fundamental forces of change, and analyze texts and empirical data with methods drawn from the social sciences, the humanities, and the legal professions.

Human Resource Studies

This department offers specialization in human resource studies. Human Resources focuses on employer-employee relationships and deals with such topics as human-resource planning, staffing, computer applications to personnel, personnel information systems, training, management development, performance appraisal, compensation administration, organization development, and the sociological environment of human resource management. The study of human resource policy focuses on government efforts to enhance the population’s ability to be employed. Although primarily concerned with governmental measures that influence the supply of labor (for example, training, education, health, mobility, and immigration), the subject area also includes policies in private industry that relate to the demands for labor.

International and Comparative Labor Relations

International and Comparative Labor Relations is concerned with industrial and labor relations systems and labor markets in other parts of the world. Countries include those in Western Europe, as well as in Asia, Latin America, and South America.

Labor Economics

Labor Economics deals with labor markets: that is, the institutional arrangements, terms, and conditions under which workers supply their labor and under which firms demand their labor. Faculty members are especially concerned with understanding the workings of labor markets and the effects of various public policies. The topics dealt with in courses and research include the following: analysis of the labor force, employment and unemployment, wages and related terms of employment, income distribution, income security programs, health and safety in industry, retirement, pensions and social security, economic aspects of collective bargaining, and economic demography.

Organizational Behavior

By studying individuals, groups, single organizations, and associations or organizations, persons in the field of organizational behavior understand human behavior within organizations as well as the actions of the organizations themselves. At the individual level of analysis, courses consider motivation, leadership, attitudes, personality, group processes, organizational change, and worker participation. At the organizational level, courses examine occupations, deviance in the work place, conflict, power, organizational design, public policy regarding organizations, and industrial conflict. The department also offers courses on research methods in organizational research and general survey courses in both psychological and sociological research.

Social Statistics

Economic and social statistics includes the principles of statistical reasoning, statistical methods, and the application of statistical tools of analysis.

A full list of required and elective courses is available from the Office of Student Services, 101 Ives Hall.

RESIDENT INSTRUCTION

This division conducts the on-campus programs leading to the degrees of Bachelor of Science, Master of Industrial and Labor Relations, Master of Professional Studies, Master of Science, and Doctor of Philosophy from Cornell.
Office of Student Services
Staff members from the Office of Student Services, 101 Ives Hall, work closely with faculty and faculty committees to administer degree programs for the school and many of the school's support services. The office's responsibilities include the admitting and orienting of new students, maintaining students' personal and academic records, and counseling students on personal and academic problems. The office also works closely with seniors who are planning graduate study.

Counseling and Advising
New students will be provided advising on orientation, academic procedures, and course registration by counselors in the Office of Student Services.

Each of the school's academic departments names faculty members to serve as advisers for students who wish to consult with them regarding career possibilities in the field, postgraduate programs, or similar matters. Questions or issues related to graduation requirements, course registration, and related academic procedures should be raised with counselors in the Office of Student Services.

Minority Programs
Cornell University administers a variety of special opportunity programs designed to provide financial assistance and other forms of assistance to (1) minority students and (2) low-income students meeting program guidelines. The purpose of these programs is to provide access to a Cornell education for today's problems and involve fieldwork in the solving as interns in congressional offices, labor organizations, personnel offices, and study abroad. Options are also available at a number of foreign universities. Qualified students may spend a semester or a full year abroad.

The ILR program allows juniors and seniors who want to conduct their own research to receive course credit for individually directed studies if the program is supervised by a faculty member.

Study in Absentia
Registration in absentia enables a student to seek admission to another American institution for a semester or a year and transfer credit toward completion of the Cornell degree. This study option requires the development of a plan of study, a statement of appropriate reasons for study away from the university (e.g., availability of courses not offered at Cornell), good academic standing, approval of the plan by the director of student services, and payment of a special in absentia registration fee. Course work taken in absentia is usually not evaluated for transfer credit until the work has been completed and the student has returned to the school. Students then submit a course syllabus and other evidence of content to the chairman of the department that might have offered the respective course, or to a counselor in the Office of Student Services if the course is more appropriate as a general elective.

Leave of Absence or Withdrawal
If a student desires to withdraw or to take a leave of absence from the university, an interview should be scheduled with a counselor in the Office of Student Services. Counselors will assist students in petitioning for approval of a leave of absence and in contacting the appropriate offices or departments of the university.

REQUIREMENTS FOR GRADUATION
To earn the Cornell Bachelor of Science degree in industrial and labor relations, the student needs to successfully complete 120 credits. This requires eight terms of study for an average of 30 credits a year although some students accelerate their studies.

Freshman Year Fall Semester
Freshman Writing Seminar 3
Introductory Microeconomics (ECON 101) 3
History of American Labor: Nineteenth Century (ILRBC 101) 3
Social and Psychological Foundations of Organizational Behavior I (ILROB 170) 3
ILR Colloquium (ILRBC 240) 1
Elective 3
16

Spring Semester
Freshman Writing Seminar 3
Introductory Microeconomics 102 3
History of American Labor: Twentieth Century (ILRBC 101) 3
Social and Psychological Foundations of Organizational Behavior II (ILROB 171) 3
Elective 3
15

Sophomore Year
Fall Semester
Statistics I (ILRST 210) 3
Development of Economic Institutions (ILRLE 140) 3
Labor and Employment Law (ILRBC 201) 3
Human Resource Management (ILRHR 200) Fall 3
Elective 3
15

Spring Semester
Statistics II (ILRST 211) 3
Economics of Wages and Employment (ILRLE 240) 3
Distribution: Cultural Perspectives 3
Distribution: Western Intellectual Tradition 3
Elective 3
15

Junior and Senior Years
Economic Security (ILRLE 340) 3
Collective Bargaining (ILRBC 300) 3
Distribution: International and Comparative ILR 3
Distribution: Upper Division Writing 3
Distribution: Science and Technology 3
Advanced Organizational Behavior (ILROB 420) 3
ILR and General Electives 3
ILR Advanced Electives—27 credit hours in no fewer than 9 courses
General Electives—34 credit hours of which up to 22 hours may be freely elected in the university's endowed divisions

Required Courses
(55 credits)
The curriculum prescribes the courses and subjects listed in the table above; some are illustrative. In the senior year, all courses will be electives.

Elective Courses
(65 credits)
From the courses offered by the school, students must select a minimum of 9 courses and 27 credits of ILR elective courses. No more than 9 of these credits may be satisfied by ILR 490, Directed Studies, or ILR 497-498, Internships, ILR 495, Honors Program, or one semester of Study Abroad.

Undergraduates are required to select one intensive writing course (for a minimum of three credits) from a list of designated courses.

The remaining 34 credits may be selected from the courses of any other college at Cornell, but a student who takes more than 34 credits in the endowed colleges (the College of Architecture, Art, and Planning, the College of Arts and Sciences; the Johnson Graduate School of Management; the College of Engineering; and the School of Hotel Administration) must pay for each credit taken in excess of 34, whether or not the courses are...
For the precise fee per credit, students should call the Office of the Bursar. The number of credits that may be taken in the endowed colleges at no additional cost to the student may be changed at any time by official action of the school.

ILR Math Requirement
If you took AP calculus in high school and scored a 3 or better on the AB exam or a 2 or better on the BC exam, you have fulfilled the ILR math requirement. If you did not take AP calculus, or if you did not achieve the scores noted above, you will be expected to take and pass the ILR Math Assessment before you may register for required courses in Statistics and Labor Economics. The Math Assessment is based on materials covered in New York State Regents Exams for Courses 2 and 3. (Calculus is not covered in those courses.)

The ILR Math Assessment will be scheduled in August, January, and May. Those who do not pass in the first attempt will be expected to register in an appropriate math course and pass the assessment before the beginning of their third semester in the school. Anyone who cannot meet the requirement by the beginning of the third semester may be enrolled for a terminal term and will be expected to leave the school thereafter.

Transfer students will be expected to meet the same standards in math: either present the score required by Cornell University for AP calculus (AB or BC) credit, or pass the ILR Math Assessment before being permitted to register in ILRST 210 or ILRLE 240 with a terminal semester possible after failing the assessment given at the beginning of a third semester as an ILR student.

SCHEDULING AND ATTENDANCE

Schedule Changes
Occasionally it may be necessary for a student to request changes in his or her course schedule either before a term begins or during the semester. Such requests must be directed to the Office of Student Services to avoid possible loss of academic credit.

Class Attendance
It is each student's responsibility to attend all scheduled classes unless excuses have been approved by the faculty. In some courses an instructor may permit a maximum number of class absences without a grade penalty or dismissal from the course. An explanation for absence from class may occasionally be secured from the Office of Student Services in advance of the expected absence. An approved absence may be warranted by:
1) participation in authorized university activities such as athletic events, dramatic productions, or debates;
2) medical problems supported by a record of clinic or infirmary treatment;
3) serious illness or death in the immediate family;
4) other circumstances beyond the student's control.

A request for explanation of an absence should, when possible, be made to the Office of Student Services before the date of expected absence. A reported and explained absence does not relieve a student from fulfillment of academic requirements during the period of absence. The course instructor has the authority to determine what work must be completed. The office can only confirm the explanation for absence. Students should inform the Office of Student Services of any problems they have meeting course requirements.

ACADEMIC STANDING AND GRADES

Academic Integrity
In 1987 the faculty of the School of Industrial and Labor Relations approved a revised code of academic integrity. This code, while based on the Cornell University code, varies somewhat.

Absolute integrity is expected of all Cornell students in all academic undertakings. They must in no way misrepresent their work, fraudulently or unfairly advance their academic status, or be a party to another student's failure to maintain academic integrity. The code specifically prohibits:
1) knowingly representing the work of others as one's own;
2) using or obtaining unauthorized assistance in any academic work;
3) fabricating data in laboratory or field work;
4) giving fraudulent assistance to others;
5) fabricating data in support of laboratory or field work.

Full details on the applications of those prohibitions to course work, term papers, examinations, and other situations are listed in the code. Copies are available from the Office of Student Services, 101 Ives Hall.

Dean's List
A Dean's List is compiled for each of the four undergraduate classes each term on the seventh day following receipt of final grades from the registrar. Eligibility for the Dean's List is determined by applying all of the following criteria:
1) achievement of a term average for freshmen of 3.3 or better, for sophomores of 3.4 or better; and for juniors and seniors of 3.6 or better;
2) a minimum course load for the term of 12 letter-graded credits;
3) completion of all courses registered for at the beginning of the term;
4) satisfaction of all good-standing requirements.

Academic Standing
Good standing requires that all of the following criteria be met at the end of each term:
1) an average of C- (1.7) for the semester's work, including a minimum of 8 completed and letter-graded credits;
2) no failing grades in any course, including physical education;
3) a cumulative average of C- (1.7) for all completed terms.

If at the end of any term a student fails to maintain good standing or if overall academic performance is so marginal as to endanger the possibility of meeting school and university degree requirements, his or her record is reviewed by the Committee on Academic Standards and Scholarships. The committee may issue a written warning to the student at that time. If a student does not improve after the written warning, he or she may be denied permission to register for the next term.

Involuntary Separation from the School for Academic Reasons
A student may be denied permission to register at the end of any term when he or she has failed:
1) to establish good standing after a semester on warning;
2) to maintain an average of 1.7 in any term after a previous record of warning;
3) to achieve good standing after being on warning any two previous semesters;
4) two or more failures in one term or has a term average of 1.0 or below.

The Academic Standards and Scholarship Committee may decide to permit a student to remain on warning more than one semester if there has been significant improvement even though the cumulative average is still below 1.7.

S-U Grading Policy
An undergraduate may register to receive a final grade of S (Satisfactory) or U (Unsatisfactory) in courses that offer this option—either in the school or in other divisions of the university—subject to the following conditions:
1) the S-U option may be used in ILR and in out-of-college course electives only, not in directed studies;
2) students are limited to registering in two S-U courses a term;
3) S-U registration is limited to 4 credits for each course;
4) students registering for S-U grades must be in good standing;
5) students must fulfill the graduation requirement of 105 letter-graded credits.

ILR faculty members assign a grade of U for any grade below C- and a grade of S for any grade of C- or better. A grade of U is considered equal to an F in determining a student's academic standing, although it is not included in the cumulative average.

No change of grading (from letter to S-U or from S-U to letter) may be made after the first three weeks of class. There are no exceptions to this restriction, and appeals will not be accepted.

Grades of Incomplete
A grade of incomplete is assigned when the course has not been completed for reasons that are acceptable to the instructor. It is understood that the work will be completed later and credit given. Instructors may grant a grade of incomplete for a limited number of clearly valid reasons, but only to students with substantial equity in a course. A firm and definite agreement on the conditions under which it may be made up must be made with
the instructor. The school's policy allows a maximum of two full terms of residence for removal of a grade of incomplete. If it is not made up within this time, the grade automatically becomes an F.

SPECIAL ACADEMIC PROGRAMS

To meet the special academic objectives of some students, the school's faculty has established several special academic programs. For additional information, students should contact a counselor in the Office of Student Services. Counselors will explore the program with students to help them decide if it suits their interests.

Dual Registration in the Johnson Graduate School of Management

Dual informal registration in the Johnson Graduate School of Management leads to a Bachelor of Science degree in industrial and labor relations with a master's degree in management after five years of study and is open to students who meet the requirements of the Johnson Graduate School of Management. Early planning by each student, preferably in the sophomore year, is desirable to ensure that the expectations of the Johnson Graduate School of Management and ILR curriculum requirements are fulfilled. Students interested in the very limited and selective program of the Johnson Graduate School of Management should contact the Admissions Office, 319 Malott Hall, and a counselor in the Office of Student Services.

Five-Year Master of Science Degree Program

With early planning it is possible to earn the M.S. degree in a fifth year of study. This program is designed specifically for those who wish concentrated study in an area of specialization in the school for a Master of Science degree. Students considering this program should consult a counselor in the Office of Student Services after their freshman year.

Internships

The Credit Internship Program has provided students with a vivid understanding of problems in labor and industrial relations through observation and participation in "real-life" labor problem solving. A number of selected students spend a term of the junior year in Albany, New York City, or Washington, D.C., in close contact with practitioners. Their activities include independent research under direction of ILR faculty members and seminars drawing on fieldwork experience with employers, labor organizations, and government agencies. More information about this program is available from the Office of Student Services.

Honors Program

Undergraduates who are ranked in the top 20 percent of their class at the end of the junior year may propose a two-semester research project, an honors thesis, for review by the Committee on Academic Standards and Scholarships. When approved, the candidate for graduation with honors works for two semesters (for 3 credits in each term) to research, write, and then defend the thesis.

Study Abroad

Cornell students with strong academic records and the necessary preparation in required and elective courses are encouraged to consider study abroad. The university currently has contact with universities in more than 40 countries that permit undergraduates to register for courses while maintaining Cornell registration and financial aid for a semester or a year. Information about those opportunities may be requested from Cornell Abroad, 474 Uris Hall.

Some study abroad programs require the development of language proficiency and preparation in appropriate courses at Cornell. Students should consult the Office of Student Services and Cornell Abroad in the freshman and sophomore years to be sure that they comply with the academic and procedural requirements for study abroad.

COLLECTIVE BARGAINING, LABOR LAW, AND LABOR HISTORY

ILRCB 100 Introduction to U.S. Labor History: Nineteenth Century

Fall. 3 credits. C. Daniel, I. DeVault, N. Salvatore.

This first semester of a two-semester sequence covers the major changes in the nature of work, the workforce, and the institutions involved in industrial relations in the United States through the end of the nineteenth century.

ILRCB 101 Introduction to U.S. Labor History: The Twentieth Century

Spring. 3 credits. Prerequisite: ILRCB 100. C. Daniel, I. DeVault, N. Salvatore.

This second semester of a two-semester sequence covers the major changes in the nature of work, the workforce, and the institutions involved in industrial relations in the United States of the twentieth century.

ILRCB 201 Labor and Employment Law

Fall. 3 credits. M. Gold, R. Lieberwitz, K. Stone.

A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework within which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employment, including such topics as employment discrimination, the developing law of "unjust dismissal," and union democracy. Also serves as an introduction to judicial and administrative systems.

ILRCB 300 Collective Bargaining (200)

Fall and spring. 3 credits. M. Cook, R. Hebdon, H. Katz, S. Kuruvilla, L. Turner.

A comprehensive introduction to industrial relations and collective bargaining in the United States, the process, scope, and day-to-day administration of contracts; the major substantive issues in bargaining, including their implication for public policy; industrial conflict; the major challenges facing unions and employers today; U.S. industrial relations in international and comparative perspective.

ILRCB 301 Labor Union Administration

Fall. 3 credits. Staff.

Study and analysis of the structure and operations of American unions, including the complicated internal life of the organizations; the varied environments in which unions develop and grow or decline; the relationship of national unions, local unions, and members in the many different sections of internal union government; the ways in which unions are set up to handle organizing, collective bargaining, contract administration, and political activity; the widespread movement toward merger and consolidation of unions that began in the sixties and continues today. All of these will involve a study of union constitutions and other primary documents, in addition to secondary readings. Attention will be given to relevant legislation, current problems of unions, and the eternal problems of attaining union democracy.

ILRCB 302 Strangers and Citizens: Immigration and Labor in U.S. History

Fall or spring. 3 credits. I. DeVault.

Will explore immigrant workers' experiences in the 19th and 20th centuries from different perspectives. We will examine what it meant to the immigrants themselves to arrive as strangers in the United States while also examining the ways in which pre-existing American groups defined these immigrants as "strangers." Similarly, we will look at U.S. citizens in their roles as greeters of immigrants, detractors of immigrants, and as models for the aspirations of immigrants. Throughout the course our main examples will come from the industrial and union realms.

ILRCB 304 Seminar in American Labor and Social History

Fall or spring. 4 credits. Permission of instructor. C. Daniel, I. DeVault, N. Salvatore.

An undergraduate seminar whose topic changes depending on semester and instructor.

ILRCB 305 Introduction to Labor Arbitration and Alternative Dispute Resolution

Fall. 3 credits. J. Gross.

An introductory survey that focuses in part on the U.S. labor arbitration process in the private and public sectors (legal issues, discipline and discharge, contract language interpretation, remedies, and procedures) and in part on alternative dispute resolution in the United States and other countries. Student participation in class discussion is expected and assignments will include an original research paper.

ILRCB 384 Women and Unions (also WOMNS 384)

Fall or spring. 4 credits. I. DeVault.

Will explore women's participation in the United States labor movement in the nineteenth and twentieth centuries. Issues covered will include women workers' relations with male-dominated union movements, the role of class-cross alliances of women in organizing women workers, interactions with radical parties and organizations, problems faced by women union leaders and activities, and others.
ILRCB 385 The African-American Workers, 1865-1910: The Rural and Urban Experience
Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. N. Salvatore.
Examines the history of blacks in America from Emancipation through the experience of the first generation born after slavery, with a focus on the work experience. Topics will include the development of work during Reconstruction; the relationship between work and black organizational developments; between black and white workers; and the nature of work in the agricultural south and in cities throughout the nation.

ILRCB 386 The African-American Worker, 1910 to the Present: Race, Work, and the City
Fall. 3 credits. Prerequisites: junior or senior. N. Salvatore.
Examines the history of blacks in America from the start of the Great Migration through the 1970s, with a focus on the work experience. Topics will include the effect of migration and urbanization on black workers; the nature of the relationship between black and white workers as influenced by depression and World War II; and an examination of the effect of the Civil Rights movement on the economic circumstances of black workers.

ILRCB 400 Union Organizing
Spring. 3 credits. Prerequisites: undergraduates, ILRCB 201 and 300; graduate students, ILRCB 500 and 501. K. Bronfenbrenner.
Explores various aspects of unions’ attempts to organize workers: why some workers join unions and others do not; strategy and tactics implemented by unions and management during organizing campaigns; present status of labor law as it affects organizing; creative approaches to union organizing; the organizing model of unionism.

ILRCB 401 My Brother’s Keeper: Volunteering and Philanthropy
Spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.
The philosophy, practice, economics, and law of volunteering labor and donating money. Topics include altruism versus self interest; why individuals volunteer labor and raise and donate money; the role and practices of charitable organizations; the economic effects of voluntary labor and philanthropic gifts; and the law of raising and distributing money.

ILRCB 404 Contract Administration
Fall. 3 credits. Prerequisites: ILRCB 300 and 201 or ILRCB 500 and 501. K. Bronfenbrenner.
This course will focus on the practice, nature, and challenges of union representation under collective bargaining agreements. Working with union contracts, constitutions, and by-laws from a diversity of national and local public and private sector agreements, the course examines how U.S. unions represent their members in different industries and different collective bargaining environments. Issues to be addressed include union representation, dues checkoffs and responsibilities, contract enforcement structures and practice, access to information, new work systems, hours of work and scheduling, contingent staffing arrangements, workplace discrimination, health and safety, promotions of charitable opportunities, down-sizing, leadership development, membership involvement and commitment, internal organizing, community coalition building, and decertification campaigns. Students will practice hands-on work in interpreting contract language and preparing and presenting grievances and unfair labor practices.

ILRCB 405 Negotiation & Dispute Resolution
Spring. 3 credits. Prerequisites: background in economics and social sciences. Permission of instructor. D. Lipsky.
Distance Learning. Deals with four related topics: (1) nature of conflict particularly between organizations, (2) negotiation and bargaining, with a focus on process, practice, and procedures; (3) third party dispute resolution, with a focus on mediation and arbitration; and (4) alternative dispute resolution (ADR), with a focus on its current use in the corporate sector and the implications for our system of justice. It will be a generic dispute resolution course, i.e. it will not focus on any particular types of disputes, but will deal with many different kinds of conflicts. Will use examples and cases to illustrate general principles. Few if any of these cases and examples will be drawn from labor relations, rather, illustrative material in the course will be based on exercises in areas such as product liability, environmental regulation, commercial relations, and personal injury disputes.

ILRCB 407 Contemporary Trade Union Movement
Spring. 3 credits. Prerequisites: undergraduates, ILRCB 100, 101; graduate students, ILRCB 502. R. Seebor, R. Hurd.
An examination of contemporary trade union issues, including union power, political action, collective bargaining approaches, and organizing efforts. The course will cover structural, functional and strategic aspects of contemporary unions. Speakers from the union movement will address the class.

ILRCB 482 Ethics at Work
Fall or spring. 3 credits. Prerequisites: junior or senior or permission of instructor. M. Gold.
Major theories of ethics are examined, then applied to issues in the employment relationship such as genetic screening of job applicants, random drug testing of employees, affirmative action, discipline for off-duty conduct, whistle-blowing, worker safety and cost-benefit analysis, comparable worth, strikes by employees providing crucial services, and crossing a picket line.

ILRCB 488 Liberty and Justice for All
Fall or spring. 3 credits. Prerequisite: junior or senior or permission of instructor. M. Gold.
Major theories of ethics are examined, then applied to contemporary issues such as affirmative action and reverse discrimination, the right to life (from abortion to capital punishment), comparable worth, and constitutional rights such as freedom of speech.

ILRCB 495 Honors Program
Fall and spring (yearlong course). 3 credits each term. Admission to the ILR senior honors program may be obtained under the following circumstances: (a) students must be in the upper 20 percent of their class at the end of their junior year; (b) an honors project, entailing research leading to completion of a thesis, must be proposed to an ILR faculty member who agrees to act as thesis supervisor; and (c) the project, endorsed by the proposed faculty sponsor, is submitted to the Committee on Academic Standards and Scholarship. Accepted students embark on a two-semester sequence. The first semester consists of determining a research design, familiarization with germaine scholarly literature, and preliminary data collection. The second semester involves completion of the data collection and preparation of the honors thesis. At the end of the second semester, the candidate is examined orally on the completed thesis by a committee consisting of the thesis supervisor, a second faculty member designated by the appropriate department chair, and a representative of the Academic Standards and Scholarship Committee.

ILRCB 497-498 Internship
Fall and spring. 497, 3 credits; 498, 6 credits. Staff.
All students for permission to register for an internship must be approved by the faculty member who will supervise the project and the chair of the faculty member's academic department before submission for approval by the director of Off-Campus Credit Programs. Upon approval of the internship, the Office of Student Services will register each student for 497, for 3 credits graded A+ to F for individual research, and for 498, for 6 credits graded S-U, for completion of a professionally appropriate learning experience, which is graded by the faculty sponsor.

ILRCB 499 Directed Studies
Fall and spring. 3 credits.
For individual or group research projects conducted under the direction of a member of the ILR faculty, in a special area of labor relations not covered by regular course offerings. Sophomores, juniors and seniors with a preceding semester of 3.00 term average, are eligible to submit projects for approval by the Academic Standards Committee. Students should consult with a counselor in the Office of Student Services at the time of CourseEnroll in order to arrange for formal submission of their Directed Study.

ILRCB 500 Collective Bargaining
Fall. 3 credits. Open only to graduate students. Recommended: ILRCB 501 taken previously or concurrently. M. Cook, R. Hebbon, H. Katz, S. Kuruvilla, L. Turner.
A comprehensive introduction to the industrial relations system of the United States. The negotiation, scope, and day-to-day administration of contracts; union and employer bargaining strategies; implications of industrial relations issues for U.S. competitiveness and public policy; industrial conflict; U.S. industrial relations in international and comparative perspective.

ILRCB 501 Labor and Employment Law
Fall. 3 credits. Open only to graduate students. M. Gold, R. Lieberwitz, K. Stone.
A survey and analysis of the law governing labor relations and employee rights in the workplace. The first half of the course examines the legal framework within which collective bargaining takes place, including union organizational campaigns, negotiations for and enforcement of collective bargaining agreements, and the use of economic pressure. The second half of the course surveys additional issues of rights in employ-
ment, including such topics as employment
discrimination, the developing law of "unjust
discrimination," and union democracy. Also serves
as an introduction to judicial and administra-
tive systems.

ILRCB 502 History of Industrial Relations
in the United States since 1885
Spring. 3 credits. Open only to graduate
students. C. Daniel, I. DeVault,
N. Salvatore.
This introductory survey course emphasizes
historical developments in the twentieth
century. Special studies include labor union
struggles over organizational alternatives and
such other topics as industrial conflicts.
working-class life styles, radicalism, welfare
capitalism, union democracy, and the
expanding authority of the federal govern-
ment.

ILRB 504 The U.S. Industrial Relations
System
4 credits. Offered only in New York City
for the MPS Program. Staff.
Examines the development, operation, and
outcomes of the US industrial relations system
in a comparative context. Specifically, the
course contrasts the American experience with
industrial relations institutions and outcomes
with the experience of several other countries
in Europe and Asia. We will look at the
process of union formation, the practice of
collective bargaining at different levels, the
methods of dispute resolution, and the legal
regime germane to industrial relations.
We will also focus on both processes and
outcomes of different country systems,
focusing on the degree of collaboration or
conflict, wage levels and wage inequality, and
practices in different industries and firms.
Finally we will attempt to address the role
played by industrial relations and human
resource policy in economic and social
development in these nations.

ILRCB 602 Arbitration
Fall and spring. 4 credits. Limited to 21
students. Prerequisites: undergraduates,
ILRCB 201, 300; graduate students,
ILRCB 500 and 501; permission of instructor.
J. Gross, R. Lieberwitz.
A study of the place and function of arbitra-
tion in the field of labor-management
relations, including analysis of principles
and practice, the law of arbitration, the
handling of materials in briefs or oral
presentation, the conduct of a mock arbitra-
tion hearing, and the preparation of arbitration
opinions and post-hearing briefs.

ILRCB 603 The Economics of Collective
Bargaining in Sports
Fall and spring. 3 credits. L. Kahn.
Surveys economic and industrial issues in
the sports industry. Topics include: 1) salary
determination, including free agency, salary
caps, salary arbitration; 2) competitive balance
and financial health of sports leagues; 3) anti-
trust issues in sports; 4) labor disputes, union
history, and contract administration issues in
sports leagues; 5) discrimination in sports; 6)
performance incentives.

ILRCB 604 Theories of Equality and
Their Application in the Workplace
Spring. 3 credits. R. Lieberwitz.
An examination of the various aspects of
equality in the workplace, focusing on issues
of race, gender, and national origin, and the
ways in which societal discrimination on these
bases are institutionalized in the workplace.

Theories attempting to define "equality" and
specific workplace issues are studied,
including the means for achieving equality at
the workplace. The course entails a high
level of student participation in class
discussions, and assignments include a
research paper.

ILRCB 605 Readings in the History of
Industrial Relations in the United
States
Fall. 3 credits. Limited to seniors and
graduate students. C. Daniel, N. Salvatore.
A seminar covering, intensively, original
primary sources and scholarly accounts for
different periods in American history.

ILRCB 606 Theories of Industrial
Relations Systems
Fall or spring. 3 credits. Limited to
seniors and graduate students. Prerequi-
tives: seniors, ILRCB 100, 101, 300;
graduate students, ILRCB 500. H. Katz.
Will trace the evolution of theory and research
on industrial relations. Topics include:
theories of the labor movement, institutional
models and evidence regarding what unions
do, the origins of internal labor markets and
their reification, models of strikes, empirical
assessments of arbitration, research on union
decline, and empirical evidence of the impacts of new technology.

ILRCB 607 Values in Law, Economics,
and Industrial Relations
Fall and spring. 3 credits. Limited to 21.
Prerequisites: ILRCB 201, 300, 500, 501.
J. Gross.
An examination of the often hidden values
and assumptions that underlie the contempo-
rary U.S. systems of employment law, work
and business, and industrial relations.
Classroom discussions and student research
projects will use novels and short stories (as
well as the literature of industrial and labor
relations) to focus on issues such as:
discrimination; law, economics and the state;
work and business; power, conflict and
protest; and rights and justice.

ILRCB 608 Special Topics in Collective
Bargaining, Labor Law, and
Legislation
Fall and spring. 3 credits. Prerequisites:
undergraduates, ILRCB 201; graduate
students, ILRCB 501. Staff.
The areas of study are determined each
semester by the instructor offering the
seminar.

ILRCB 609 Special Topics: Labor Law
Policy Seminar
Spring. 3 credits. K. Stone.
The United States collective bargaining
system, which has shaped the New Deal
period, has come under intense attack.
The intellectual premises of the system have
been challenged by scholars on both the right
and the left, and at the same time the decline
in the labor movement has undermined its
political support. This seminar will look at the
theoretical attacks on the New Deal collective
bargaining system and at some of the current
proposals for its replacement. Some of the
topics to be discussed include the theory of
regulation embodied in the National Labor
Relations Act and its critique; alternative
concepts of labor markets and their policy
ramifications; the emerging of the global
economy and its ramifications for domestic
labor regulation. There will also be discussion
of alternative systems of labor regulation, such
as found in West Germany, Sweden, and
Japan.

ILRCB 650 Service Work and Workers in
Historical Perspective
Fall or spring. 3 credits. I. DeVault.
Takes a historical perspective on the
development of a service economy in the
United States. Readings will include general
and theoretical works, but the main focus will
be recent historical scholarship on specific
occupations and situations in the "nonproduc-
tive" workforce. Students will explore primary
resources for research on the subject and write
research papers.

ILRCB 651 Industrial Relations in
Transition
Spring. 3 credits. Limited to seniors and
graduate students. H. Katz.
Considers whether recent developments such
as concession bargaining, worker participa-
tion programs, and the growth of union
firms represent a fundamental transformation in
industrial relations practice. Will review
recent research and new theories arguing that
such a transformation is occurring, including
the work of Piore and Sabel, Bluestone and
Will also review the counterarguments and
evidence put forth by those who believe no
such transformation is under way. Course
material will focus on industrial relations
practice in the private sector in the United
States, although some attention will be paid to
developments in Western Europe, the United
States, and Japan.

ILRCB 655 Employment Law
Spring. 3 credits. Prerequisites: ILRCB
Examines a number of major federal and state
laws designed to protect workers in their
employment relationships. The material
covered will be selected from the following:
the Fair Labor Standards Act, unemployment
insurance, workers' compensation, the
Occupational Safety and Health Act, the
Employee Retirement Income Security Act, the
doctrine of employment at will, Social
Security, workers' right-to-know, plant
 closures, and protection of workers' privacy.

ILRCB 662 Seminar in Labor Relations
Law and Legislation
Fall or spring. 3 credits. Limited
enrollment. Prerequisite: permission of
instructor. R. Lieberwitz.
Legal problems in public employment and
other areas of labor relations affecting the
public interest.

ILRCB 663 Research Seminar in the
History of Industrial Relations
Fall or spring. 3 credits. Prerequisites:
undergraduates, ILRCB 100 and 101;
graduate students, ILRCB 502. C. Daniel,
I. DeVault, N. Salvatore.
The areas of study are determined each
semester by the instructor offering the
seminar.

ILRCB 664 Employment Discrimination
and the Law
Fall. 3 credits. Prerequisite: ILRCB 201/
501 or equivalent. M. Gold.
An examination of the laws against employ-
discrimination based on race, color,
religion, sex, national origin, age, and
disability.
Major topics include unions in politics, unions and economic effects of unions, internal union attitudes toward unions, determinants of union as complex organizations, public opinion and research on trade unions in the United States.

An examination of the development, practice, government and its formulation. The variety of legislative impasse procedures, and the strike against federal, state, and local governments and their employees. The method is to register for ILRCB 798 must be approved by the faculty member who will supervise the project.

A term paper is required.

This study will focus on the First Amendment, freedom of speech and association, equal protection, due process, and other issues in the area of political and civil rights. The course entails a high level of student participation in class discussion, and assignments include a research paper.

ILRCB 703 Theory and Research in Collective Bargaining

Spring. 3 credits. Open to graduate students who have had ILRCB 500 and ILRCB 723 or their equivalents. Recommended: a statistics course beyond the level of ILRST 510. Staff.

This is a second-level course in collective bargaining that builds on the institutional research covered in ILRCB 500. The existing literature in the area of collective bargaining is appraised for its theoretical and empirical content. Efforts are made to explore the appropriate role for theory and empirical analysis in moving research in collective bargaining toward a more analytical perspective and to identify and appraise the underlying paradigms used to study collective bargaining-related issues.

ILRCB 705 The Economics of Collective Bargaining

Spring. 3 credits. Prerequisites: ILRCB 500; ILRLE 540 (or their equivalents) and an understanding of multiple regression analysis; or permission of instructor. Staff.

Focuses on both the economic analysis of unions and collective bargaining in our economy and on the economic forces that affect collective bargaining. The method is to identify and conceptualize the structural determinants of relative bargaining power. On this basis, the course examines both the economic outcomes of collective bargaining and current bargaining trends in a variety of industries. Tentative theoretical analyses of unionism (neoclassical, institutionalist) are compared. The statistical techniques and empirical results of research on the union effect on economic outcomes (wages, prices, inflation, profits, productivity, earnings inequality) are also evaluated. The effect of technology, corporate structures, and public policy on union bargaining power is outlined, and a number of the theories of collective bargaining in the private sector are reviewed.

A term paper is required.

ILRCB 783 Seminar in American Labor History

Spring. 3 credits. Permission of instructor. N. Salvarote.

A reading and research seminar for graduate students that focuses on selected topics in nineteenth- and twentieth-century labor history. The topics change each semester.

ILRCB 790 ILR M.P.S. Program

Fall and spring. 1–9 credits. Supervised research only. Staff.

ILRCB 798 Internship

Fall and spring. 1–3 credits. Designed to grant credit for individual research under the direction of a faculty member by graduate students who have been selected for an internship. All requests for permission to register for ILRCB 798 must be approved by the faculty member who will supervise the project.

ILRCB 799 Directed Studies

Fall and spring. Credit to be arranged. For individual research conducted under the direction of a member of the faculty.

ILRCB 980 Workshop in Collective Bargaining, Labor Law, and Labor History

Fall and spring. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only. Designed to provide a forum for the presentation of current research being undertaken by faculty members and graduate students in the Department of Collective Bargaining, Labor Law, and Labor History, and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student’s thesis research.

HUMAN RESOURCE STUDIES

ILRHR 260 Human Resource Management

Fall. 3 credits. Open only to ILR students; others by permission. M. Cavanaugh and staff.

An introductory overview of the management of human resources in organizations. Topics include human resource decisions dealing with staffing, employee development, work system rewards, and employee relations. Emphasis is on (a) problem-solving and decision-making approaches, (b) operational methods, technologies, and practices; (c) application of relevant behavioral science theory and research; and (d) legislation and other environmental constraints having an impact on human resource practices and the operation of human resources by an enterprise.

ILRHR 268 Personal Computer Basics

Fall, spring, and summer. 2 credits. Limited. Staff.

Provides basic skills in the use of IBM personal computers (PCs) using the Windows environment. Course covers basic hardware, terminology, fundamentals of Disk Operating System (DOS), Internet and Lexis Nexis, Windows 95, Microsoft Excel, Access, and Powerpoint. Emphasis is placed on hands-on experience using examples demonstrating human resource issues and PC-based solutions. This course is a prerequisite to several advanced Human Resource Management electives.

ILRHR 360 Human Resource Economics and Public Policy

Fall, spring. 3 credits. Open to sophomores, juniors, and seniors. R. Bishop, V. Briggs.

A review of labor-market trends, data collection systems, and theories pertaining to public efforts to develop the employment potential of the nation’s human resources and to combat unemployment. The major segments of the nation’s educational training enterprise—public education, higher education, employer-provided training, apprenticeship, and special training programs for the disadvantaged—are examined. Special policy and programmatic issues pertaining to youth, rural workers, welfare reform, direct job creation, worker relocation, economic development, targeted tax credits, industrial policy, and "enterprise zone" proposals are examined. Comparisons are made with other industrialized nations.

ILRHR 362 Career Development: Theory and Practice

Fall, spring. 2 credits. 7 weeks. Limited to 30. S-U only. J. McPherson.

The components of career management: individual factors and environmental realities in the development of both careers and organized programs for career management. Two complementary learning tasks required: information-gathering for career decision making based on self-assessment activities, and comprehension of organizational circumstances and practices encountered as careers develop. Grade based on short writing assignments and research paper.

ILRHR 363 Leadership Seminar for Fraternities and Sororities

Spring. 2 credits. S-U only. Permission of instructor. Staff.

Provide students with an opportunity to develop their leadership and management skills. The philosophy of the class is that fraternity and sorority houses are small businesses and the leadership must be capable of effective managing and leading in order for them to succeed. The learning method will be "hands on" with participants working on weekly assignments that involve their application of the lessons learned to their current job duties. Students will participate in role plays, class discussions, meetings with guest speakers and debriefing sessions where they report the results of their using the material obtained from class in their current situations.
ILRHR 366 Women at Work
Spring. 3 or 4 credits. J. Farley.
Various aspects of female occupational roles in twentieth-century United States. Historical, social, and legal factors that influence women's choice of careers, work socialization and training, and subsequent labor-market experience are considered. Working women's entry-level jobs, opportunities for advancement, and income are compared to men's.

ILRHR 456 International Human Resource Management
Spring. 3 credits. Staff.
Will provide an examination of international human resource management issues in multinational enterprises. The course has two major objectives: to enhance understanding of key strategic and functional issues related to IHRM, and to develop analysis of practical IHRM issues in multinational enterprises. Will include topics such as strategic issues for IHRM, cross-cultural management issues, coordination issues, and expatriate management.

ILRHR 460 Human Resource Strategies for Entrepreneurial Firms
Fall. 4 credits. Open to juniors and seniors. ILR 260 or permission of instructor. T. Welbourne.
This class utilizes a semester-long case study that focuses on human resource issues and strategies for growing, entrepreneurial firms. Students solve weekly dilemmas by integrating their knowledge of the functional areas of human resource management with general management, human resource strategy, entrepreneurship, accounting/finance, marketing, public relations, and small business management. Creative solutions to problems are communicated to the class via role plays, formal presentations, impromptu meetings, and class discussions. In addition to the semester-long case study, students work in teams to develop their own case of an existing company. The emphasis is on integration of concepts, application to real-life business situations, and the development of general management skills and knowledge.

ILRHR 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives
Fall or spring. 3 credits. Prerequisite: ILR 260 or equivalent and consent of instructor. R. Batt.
Seminar designed to explore the state of knowledge and current research concerning the design and development of alternative work systems. The focus is on understanding alternative approaches to work restructuring and their differential effects on firm competitiveness and employee welfare. The first half of the course considers classic texts on mass production, flotillaization, sociotechnical systems, diversified quality production, and lean production. It compares these workplace models in their original national contexts and in subsequent transplant situations. Relevant from economics, engineering, organizational behavior, human resources, and industrial relations is examined. The second half of the course considers these alternative approaches to restructuring in the context of specific manufacturing and service industries and occupational groups. Students are required to hand in weekly memos covering the readings, actively participate in seminar discussions, and write two research papers on topics relevant to the course.

ILRHR 462 Staffing, Training, and Development
Spring. 3 credits. Prerequisites: ILRHR 260 or by permission of the instructor. M. Cerveny.
Provide overviews of the staffing, training, and development functions within organizations. The first half of the semester will focus on the process by which organizations fill positions. Topics will include legal issues, job competencies, and external selection practices, and internal staffing decisions. The second half of the semester will focus on the process by which organizations train and develop employees. Topics will include training needs assessment, program design, training evaluation, and management development practices. Throughout the semester we will examine the relationship between the staffing and training/development functions.

ILRHR 466 Comparative Human Resource Management
Fall. 3 credits. Staff.
Provides a survey of human resource management practices in two key regional areas: Europe and the Asia-Pacific region. Focus of this course is on how HRM practices vary across national, regional, and cultural contexts.

ILRHR 468 Human Resources Management Simulation
Spring. 2 credits. Limited to 30 juniors and seniors. Prerequisite: ILRHR 260 or equivalent. 7 weeks. W. Wasmuth.
Uses a simulation model and an open-systems approach as means to enhance students' skills in strategic planning and managerial decision making. Attention will be given to the implications and efforts of strategic human resource management and supervisory decisions as measured by organizational performance indicators, including quality of work life, employee productivity, customer satisfaction, employee retention, internal control, and the bottom line. Each student will be assigned a team (team) of five members and must be committed to the work of that group. An individual research paper is also required. Regular attendance is required.

ILRHR 469 Immigration and the American Labor Force
Fall and spring. 3 credits. V. Briggs.
Assesses the role that immigration policy plays as an instrument of human resource development in the United States. Immigration policy will be placed in an evolutionary context but primarily in relation to the 1965 revision of mass immigration. In addition to legal immigration, policies pertaining to border communicators, illegal immigration, "maquiladoras," refugees, asylees, and nonimmigrant workers are also examined. Comparisons are also made with immigration systems of other nations.

ILRHR 495 Honors Program
Fall and spring (yearlong course). 3 credits each term.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 497-498 Internship
Fall and spring. 3 and 6 credits.
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 499 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 560 Human Resource Management
Fall and spring. 3 credits. Open only to graduate students. Staff.
A survey course covering the major areas of the management of human behavior in work organizations. Consideration is given to such aspects of strategic and human resource planning, design and management of work teams, staffing, training and management development, organization development, compensation, and employee and labor relations. Emphasis is on the application of theory and research to the solution of personnel problems.

ILRHR 564 Human Resources Management in Effective Organizations
4 credits. Offered only in New York City for the MPS Program. Staff.
This course offers the opportunity to become better prepared to make effective decisions about human resources. Successful organizations depend on people, their human resources. The first module examines strategic human resource management and the effects of HR decisions on organization success and fair treatment of people. Another module focuses on alternative systems used to staff and develop people. The third module focuses on compensating and rewarding people. The final module includes employee relations and alternative work systems. Case and field studies are used throughout the course.

ILRHR 653 Research on Education Reform and Human Resource Policy
Fall and spring. Permission of instructor. J. Bishop.
A research seminar and tutorial in which students conduct qualitative empirical research on a common topic that varies from year to year that can inform education reform efforts or human resource policy. Topics vary from year to year.

ILRHR 656 International Human Resource Management (also NBA 588)
Fall. 3 credits. Prerequisite: ILRHR 260 or 560. Limited. Seniors or graduate students only or permission of the instructor. Staff.
The focus of the course is on international human resource strategies in multinational firms. It has two major objectives: to enhance the understanding of key functional and strategic issues related to HRM activities in international firms and to review practical applications of concepts learned from the course in leading U.S. corporations. In the first part of the course, the emphasis is on the theory of international HRM; the second part is focused on field analysis. During the semester, students will conduct TEAM research on state-of-the-art IHRM practices in leading U.S. multinationals. In addition, each student will prepare a review paper on one specific area of IHRM of his or her choice.
ILRHR 661 Applied Personal and Organization Development
Spring. 3 credits. G. Thomas.
An experiential course that deals with OD and its role in the organizational change process. Combines the opportunity for hands-on practice in a workshop setting. Students will have regular opportunities to participate in research and writing a paper that examines a specific method, technique, or critical issue; an in-class practice in a workshop setting; and a final paper that describes an appropriate and logically applied intervention strategy.

ILRHR 662 People in Agile Organizations
Fall. 4 credits. Prerequisites: ILRHR 260, 560 or equivalent, plus two functional courses in HR management. Enrollment limit, 25. L. Dyer.
Organizational agility is defined as the capacity to be infinitely adaptable without having to change. It is a core competence for organizations operating in rapidly moving marketplaces. Accordingly, an increasing number of organizations are striving to become more agile by inventing new ways of managing all aspects of organizational capability. Course explores the opportunities and challenges posed by organizational agility, with particular emphasis on crafting human resource strategies that support this evolving paradigm. Every effort is made to run the course as an agile organization rather than using a traditional classroom format.

ILRHR 664 HR Online Research and Reporting Skills
Fall. 3 credits. J. Boudreau, B. Basilefski.
Designed to teach students skill-based techniques in HR research methodology. The students will be taught to act as their own consultants in both a classroom and workforce setting as they access data and find statistical information to support their research topics. The first five weeks of the semester will consist of weekly meetings with the reference librarians at the Martin P. Catherwood Library. These visits will cover a different research technique each week, and students will be given readings and a hands-on assignment to gain practical experience on these techniques.

ILRHR 665 Transforming Human Resource Management: Case Studies
Fall and spring. 4 credits. Limited. Prerequisite: ILRHR 260/560 plus two other courses in human resource studies and permission of instructor. L. Dyer, P. Wright.
As the capstone course in HR Studies, students will integrate the theories and practices learned in other courses. Extensive field work is involved. The field projects are designed to require students to draw upon and integrate their coursework in HR planning, staffing, development, compensation, and reward, and new work systems.

ILRHR 666 Human Resource Metrics
Fall. 4 credits. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics, one elective in human resource studies. J. Boudreau.
Explores how to account for the contribution of human resource management programs and decisions to achieving organizational goals. It emphasizes a systematic decision-making system that organizes the discipline of human resource management and can assist in planning and evaluating programs. Topics include the role of financial-accounting statements in managing human resources, cost-benefit analysis for programs, managing human resources as a profit center, and identifying human resource management constituents to address their goals.

ILRHR 667 Employee Relations and Diversities
Spring. 4 credits. Prerequisites: ILRHR 260/560 or equivalent and permission of instructor. Q. Roberson.
Explores the policies, programs, and practices employed by employers to promote the just and humane treatment of employees especially managerial, professional, and other employees not covered by collective bargaining contracts. Includes such policies as the protection of employee rights and the nature of processes used to allocate organizational opportunities and rewards; such programs as employee assistance plans and due process procedures; and elements of such practices as employee communication and supervision. Treats these as a "package" to be considered in totality and developed strategically. Considers variations in employee relations strategies, the motives of employers in establishing such strategies, and the effects of these strategies on relevant individual and organizational outcomes. Special emphasis will be placed on fairness in managing members of under-represented groups.

ILRHR 668 Staffing Organizations
Spring. 4 credits. Limited to 25 students. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics. M. Cavanaugh.
This seminar provides an overview of the process by which organizations staff positions from pools of external and internal applicants. Will focus on theories, research, policies, and practices concerning attraction and selection for the most effective utilization of human resources. Topics covered in the course include: staffing strategy and context, measurement of staffing effectiveness, job/ candidate "package" to be considered in totality and developed strategically, and substantive external selection practices, and internal staffing decisions. Throughout the course, considerable emphasis will be placed on relevant legislation and court decisions, and practical application of relevant theory and past research.

ILRHR 669 Managing Compensation
Fall and spring. 4 credits. Limited to 30 students. Prerequisites: ILRHR 260/560 or equivalent, ILRHR 266 and basic statistics or permission of instructor. R. Broderick, G. Milkovitch.
Focuses on managing employee compensation in contemporary organizations. The major objectives are: to examine the current state of compensation decision making, to examine how recent theoretical and research developments inform compensation decisions, and to offer an opportunity to develop competencies in making compensation decisions.

ILRHR 670 Seminar in Manufacturing
Spring. 15 credits. R. Batt.
Semester in Manufacturing ("SIM") is designed to give students a grounding in the fundamentals of manufacturing, as well as a broad overview of current issues and trends. The 15-credit immersion format allows development of the linkage of manufacturing to other functions in the enterprise (Research & Development, marketing, corporate strategy, human resources, etc.). A highlight of SIM is that each student will visit more than 20 manufacturing facilities during the semester, representing diverse sets of products, processes, and manufacturing strategies. These visits include extended discussion sessions with management, and often union representatives, as well as a factory tour. These visits bring the "real-world" perspective to the course. SIM is built around five basic themes: The 15-credit immersion format allows each theme to be discussed in depth, and the interrelationships between themes to be developed over the semester, giving students a broad understanding of how an enterprise functions.

ILRHR 690 Comparative Human Resource Management
Surveys human resource practices in two key regions of the world: Western Europe and the Pacific Rim. The focus is on how human resource management is related to management of professional and managerial work force, such as selection and staffing, development, and appraisal and reward systems. Special attention is given to current changes and trends in the structure and human resource management area (e.g., unification of Europe, transformation of Japanese firms). Implications for multinational operations in these countries will also be discussed.

ILRHR 691 Human Resource Planning and Strategy
2 credits. Limited. Prerequisites: ILRHR 560 or equivalent, one course in statistics, and permission of instructor. L. Dyer.
Covers the content of human resource strategies and the process of human resource planning. The emphasis is on developing human resource strategies that are integrated with firm business strategies. Covered are methods and techniques used to forecast and plan for organization structures and processes, work force population, recruitment practices, training, tax credits for hiring, vocational rehabilitation of the disabled, job-search training, tax credits for hiring, vocational training, literacy instruction, EEO, OSHA, service employment, assisting new business, and industrial policy. The seminar also investigates how the structure of the economy influences the ability of targeted training and job creation to achieve reductions in unemployment and draws lessons from the experience of other societies.
ILRHR 693 Training and Development in Organizations
Spring. 3 credits. Prerequisites: ILRHR 260/560 or equivalent, one course in statistics or permission of instructor.
M. Cavanaugh.
The purpose of this course is to acquaint students with aspects of learning in organizations. We will begin by discussing organizational learning, and then focus more narrowly on specific ways in which learning is achieved through training and development functions. Topics throughout the semester include: how learning is linked to organizational strategy, how to determine that training is needed, issues regarding the design of training programs, current training techniques, evaluation strategies, and management development practices.

ILRHR 694 Human Resource Information System Applications
4 credits. Limited to 22 students. Prerequisites: ILRHR 260/560 or equivalent; ILRHR 266; at least one upper-level HRS elective; basic statistics; and permission of instructor. Not offered 1999-2000.
J. Boudreau.
Explores the development, implementation and management of computerized personnel information systems and their use in human resource management. Theories and concepts relevant to the design and implementation of such systems are presented and used as the framework for hands-on experience with personal and mainframe computer systems. Students create and use applications of current popular human resource software to design their own applications and present them to the class. Where possible, student applications are based on field work in actual organizations.

ILRHR 695 Education, Technology, and Productivity
Fall. 3 credits. J. Bishop.
The seminar investigates the nexus between the education and training in schools and at the workplace and the technological progressiveness, productivity, and competitiveness of firms, individuals, and nations. We will investigate (1) how technological progress is changing the nature of work and what this implies for reform of education and training, (2) why United States productivity has increased so little in the past two decades, (3) how education and training contribute to the growth and competitiveness, (4) why educational achievement has declined, and (5) how the responsibility for education and training should be apportioned among individuals, firms, private nonprofit organizations, and government.

ILRHR 697 Special Topics in Resource Studies
Fall or spring. 3 credits. Staff.
The areas of study are determined each semester by the instructor offering the seminar.

ILRHR 698 International Human Resource Policies and Institutions
Spring. 3 credits. J. Bishop.
A comparative study of human resource policies and institutions in Western Europe, North America, Japan, and East Asia (with special emphasis on math and science education) and of the effects of these institutions on productivity, growth, and equality of opportunity. The institutions studied include primary and secondary education, apprenticeship, employer training, and higher education. Data on the consequences of policies is presented and an effort made to understand how human resource policies and institutions have contributed to the rapid growth and low levels of inequality in Europe, Japan, and the Pacific Rim nations. Another focus of the course is understanding the causes of the low levels of achievement of American high school students relative to their counterparts abroad.

ILRHR 760 Seminar in Human Resource Studies
Fall or spring. 3 credits. Prerequisites: ILRHR 560, ILRST 510/511, and ILRHR 669 and permission of instructor. P. Wright.
A "floating" seminar designed to give faculty and students an opportunity to pursue specific topics in detail, with an emphasis on theory and research. Topics vary from semester to semester. Interested students should consult current course announcements for details.

ILRHR 765 International Compensation
G. Milkovich.
Seminar focuses on international developments in employee compensation. Will study recent research on local developments and specific organizations' practices in a wide variety of countries. Local national practices will be our principal focus along with expatriates and others. Almost everyone believes they are experts in pay, so we will be drawing upon research and theories from sociology, economics, psychology, etc. Four operative terms are seminar, comparative, compensation, and organization. This is a seminar, so come to each session prepared to be an active player in discussions. Our focus is comparative, including research, theory, and practices of specific enterprises in different countries. Compensation includes all forms of pay including cash, benefits, allowances, and so on. Primary focus is at the organization level of analysis.

ILRHR 787 Human Resource Strategies for Entrepreneurial Firms
4 credits. Open to graduate students only. ILRHR 560, equivalent, or permission of instructor. Not offered 1999-2000.
T. Welbourne.
For course description, see ILRHR 460.

ILRHR 789 Topics in International Compensation Theory and Research
Spring. 4 credits. Prerequisite: ILRHR 669. G. Milkovich.
Examines recent developments in theory, research, and practice related to compensation. Discussion emphasizes the relevance of theory and research to compensation decision making. Students examine compensation and reward-related theories and research from supporting disciplines such as economics, psychology, sociology, and organizational behavior and evaluate their relevance to employee, managerial, executive, and international compensation.

ILRHR 790 ILR M.P.S. Program
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

ILRHR 798 Internship
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 799 Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRHR 960 Workshop in Human Resource Studies
Fall and spring. 2 credits. Enrollment limited to M.S. and Ph.D. candidates. Open only to staff.
The workshop is designed to provide a forum for the presentation and critical discussion of current research being undertaken by graduate students, faculty members, and invited guests in the field of human resource studies. All M.S. and Ph.D. candidates in the Department of Human Resource Studies are urged to enroll; candidates in other departments are cordially invited. Each participant will have an opportunity to benefit from the collective wisdom of the others in the formulation, design, and execution of his or her research, as well as to become current on the latest developments in the field.

ILRHR 961 Doctoral Research Seminar in Human Resource Management
P. Wright.
This seminar is aimed at reading, understanding, and conducting research in HRM. Students should obtain thorough understanding of the current research in traditional areas of HRM such as validation, job analysis, EEO, selection, performance appraisal, compensation, and training, and should develop the skills necessary to evaluate, criticize, and contribute to the literature on HRM.

ILRHR 962 Doctoral Research Seminar in Strategic Human Resource Management
P. Wright.
Seminar is aimed at reading, understanding, and conducting research in SHRM. The course should enable students to obtain a thorough understanding of the current research in Strategic HRM, and to develop the skills necessary to evaluate, criticize, and contribute to the literature on SHRM.

ILRHR 963 Research Methods in HRM/Strategic Human Resource Management
P. Wright.
Designed to build social science research skills, particularly in the area of human resource studies (HRS). Topics include measurement reliability, construct validity, design of studies, external validity, meta-analysis, critiquing/reviewing HRS research, publishing HRS research, and applications of statistical models of HRS issues.

INTERNATIONAL AND COMPARATIVE LABOR

ILRIC 333 Western Europe, the United States, and Japan in a Changing World Economy
Fall. 3 credits (1 additional credit may be arranged). Open to juniors and seniors.
L. Turner.
Offers an introduction to the contrasting national trajectories and current political economies of Germany, Britain, France, Japan, and the U.S. Emphasis will be on (a) cross-national differences and comparisons; and (b) the different capacities that contrasting institutions offer each society as it grapples with intensifying trade competition, domestic political conflict, and the need for production reorganization and “new industrial relations.”

ILRIC 339 The Political Economy of Mexico
Fall. 3 credits. M. Cook.
Explores the range of challenges affecting contemporary Mexican politics, society, and economic development—from democratization to immigration. Examines NAFTA. The course provides both an introduction to Mexican political economy for those with no prior background and an opportunity for students with more knowledge of Mexico to explore a research topic in greater depth.

ILRIC 499 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRIC 534 Western Europe, the United States, and Japan in a Changing World Economy
Fall. 4 credits. Graduate students.
L. Turner.
See description for ILRIC 333. Graduate students attend class, take the midterm and submit an analytical research paper at the end of the semester.

ILRIC 537 Special Topics
Fall or spring. 3 or 4 credits. Staff.
Devoted to new topics in the field. The specific content and emphasis vary depending upon the interests of the faculty member teaching the course.

ILRIC 631 Comparative Labor Movements in Latin America (also Government 631)
Spring. 3 credits. M. Cook.
Examines the historical development of labor movements in Latin America, their role in national political and economic development, and the impact of economic liberalization, authoritarianism, and democratization on contemporary labor organizations in the region. Countries examined will include, but are not limited to, Mexico, Brazil, Argentina, Chile, Peru, and Venezuela.

ILRIC 632 Revitalizing the Labor Movement: A Comparative Perspective
Fall. 4 credits. Graduate seminar open to seniors with permission of instructor only. L. Turner.
Examines contemporary efforts in advanced industrial democracies to reform industrial relations. The first half of the course will examine contemporary industrial relations’ reform efforts in the U.S., including innovative organizing strategies; new calls for union militancy; business strategies for a “union-free” environment; efforts at labor-management cooperation; and the report of the Dunlop Commission. The second half will cover Britain—the Thatcher reforms of the 1980s and the current labor-backed works council movement; France—the Auroux Laws of the 1980s and their effects; and Germany—the transformation of industrial relations in eastern Germany since 1989.

ILRIC 633 Labor, Industry, and Politics in Germany
Fall. 4 credits. Open to seniors with permission and graduate students.
L. Turner.
Is the successful postwar “social partnership” model of organized capitalism in the Federal Republic of Germany viable in the 1990s? To answer this question, we will study the works councils and codetermination, the rise of a strong postwar labor movement, the contemporary German version of social partnership, with an emphasis on current events and the new challenges for German industry and labor posed by German unification and the single European market.

ILRIC 635 Labor Markets and Income Distribution in Developing Countries
Spring. 4 credits. Prerequisite: ILRLE 240 or Economics 313 or permission of instructor. Not offered 1999–2000.
G. Fields.
A course analyzing who benefits and how much from economic growth in developing countries and how income distribution would be affected by various public policies. Topics to be covered include: poverty, inequality, social welfare, and economic growth-theory and evidence; poverty profiles, earnings functions, and decompositions; employment, unemployment, wages, and labor markets; and an introduction to benefit-cost analysis, with application to the economics of education.

ILRIC 636 Comparative History of Women and Work (also Women’s Studies 636)
Fall. 4 credits. Permission of instructor. L. Devault.
Will explore the similarities and differences between different cultures’ assumptions about the work of women as well as women’s experiences in varying work circumstances throughout history. Beginning with theoretical pieces and overviews of the history of women and work, most of the course will consist of in-depth examinations of specific work situations or occupations across time and geography. Comparative examples will be taken from the United States, Europe, and the Third World.

ILRIC 637 Labor Relations in Asia
Fall. 3 credits. Permission of instructor required. S. Kuruvilla.
A comparative survey of the industrial relations systems of selected Asian nations such as Japan, S. Korea, Thailand, Malaysia, Singapore, Hong Kong, China, and several others. The emphasis is on economic development strategies and industrial relations policies in these countries. Industrial relations practices, the extent of union organization, and labor force demographics of these countries will be examined. The primary objective is to provide students with an introduction to industrial relations systems in Asia. The countries chosen are representative, but not exhaustive.

ILRIC 638 Labor, Free Trade, and Economic Integration in the Americas (also Government 630)
Spring. 3 credits. Limited. Open to seniors and graduate students; juniors by permission. Not offered 1999–2000.
M. Cook.
Analyzes the contemporary movements toward free trade and regional economic integration in the Western Hemisphere. Special attention is paid to labor’s role in this process. Examines the origins and implications of the North American Free Trade Agreement (NAFTA) and looks at integration schemes in South America (Mercosur), Central America, and the Caribbean, and at hemispherewide initiatives. A research paper is required.

ILRIC 730 Research Seminar on Labor Markets and Economic Development
Fall or spring. 3 credits. Prerequisite: open to M.S. and Ph.D., students only. G. Fields.
Research seminar for students writing theses or dissertations on aspects of labor markets and economic development. Will address research questions, methodologies, and contributions in the areas of employment and unemployment, income and earnings, educational and human resource development, welfare economics, and economic growth. Numerous presentations and written papers will be required.

ILRIC 739 The Political Economy of Mexico
Spring. 3 credits. M. Cook.
For course description, see ILRIC 339.

ILRIC 790 ILR M.P.S. Program
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. Program.

ILRIC 799 Directed Studies
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

Other courses approved to fulfill ILRIC distribution
ILRCB 304 Latin American Labor History
Fall. J. Cowie.
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILRHR 456 International Human Resource Management
Spring. Staff.
For description, see the section, Human Resource Studies.

ILRHR 461 The Design of Work Systems: Comparative and Interdisciplinary Perspectives
Fall or spring. R. Batt.
For description, see the section, Human Resource Studies.

ILRHR 466 Comparative Human Resource Management
Fall. Staff.
For description, see the section, Human Resource Studies.

ILRHR 469 Immigration and the American Labor Force
Fall and spring. V. Briggs.
For description, see the section, Human Resource Studies.
ILRHR 656 International Human Resource Management  
Spring. V. Pucik.  
For description, see the section, Human Resource Studies.

ILRHR 690 Comparative Human Resource Management  
Fall. Staff.  
For description, see the section, Human Resource Studies.

ILRHR 698 International Human Resource Policies and Institutions  
Spring. J. Bishop.  
For description, see the section, Human Resource Studies.

ILRLE 444 The Evolution of Social Policy in Britain and America  
Spring. G. Boyer.  
For description, see the section, Labor Economics.

ILRLE 448 Topics in Twentieth Century Economic History: The Economics of Depression and the Rise of the Managed Economy  
Fall. G. Boyer.  
For description, see the section, Labor Economics.

ILRLE 640 Economic History of British Labor 1750-1940  
Fall. G. Boyer.  
For description, see the section, Labor Economics.

ILROB 628 Cross-Cultural Studies in Organizational Behavior  
Spring. Staff.

INTERDEPARTMENTAL COURSES

ILRID 150 Freshman Colloquium  
Fall. 1 credit. Open only to ILR freshman. S-U only. Staff.  
This course is offered: a) to acquaint new freshman students with some of the issues and disciplines in the field of industrial and labor relations; b) to establish acquaintanceship among members and the ILR faculty and small, randomly assigned groups of students. The course includes a plant visit and several meetings early in the semester designed to introduce issues encountered in studying the employment relationship.

ILRID 451 Science, Technology, and the American Economy  
Spring. 3 credits. V. Briggs.  
The industrial revolution did not begin in the United States, but the nation became the world's first technological society. Attention will be given to the evolutionary confluence of science, technology, mathematics, religion, and capitalism in the formation of the U.S. economy, its institutions, and its labor force. Primary attention will be given to the post-World War II economic developments. The vantage point will be the linkage with employment, unemployment, income, and productivity considerations. Public policy issues (such as the employment impact of the computer, research and development policy, national defense influences, the "agricultural revolution," savings and investment rates, labor force preparedness) will be explored. Critical concerns pertaining to environmental impacts, income polarization, and consumerism will also be examined.

ILRID 452 Writing in Industrial and Labor Relations  
Fall or spring. 3 credits. J. Farley.  
Will require close reading of four or five books related to the term's theme in the field of industrial and labor relations and careful writing about them. Students will also have an opportunity to practice writing about the world of work for different audiences.

ILRID 790 ILR M.P.S. Program  
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

LABOR ECONOMICS

ILRLE 140 Development of Economic Institutions  
Fall. 3 credits. Prerequisite for non-ILR students: permission of instructor. G. Boyer.  
Provides students with an understanding of the historical roots of the economic system currently dominant in Western Europe and the United States. The course will focus on (a) the process of European economic growth prior to 1914, (b) the effect of industrialization on labor in Great Britain, and (c) the historical evolution of economic thought from Adam Smith to J. M. Keynes.

ILRLE 240 Economics of Wages and Employment (also Economics 431)  
Fall and spring. 3 credits. Prerequisites: Economics 101-102, Economics 313, or permission of instructor.  
Applies the theory and elementary tools of economics to the characteristics and problems of the labor market. Considers both the demand (employer) and supply (employee) sides of the market to gain a deeper understanding of the effects of various government programs and private decisions targeted at the labor market. Topics covered include: employment demand, basic compensation determination, education and training, benefits and the structure of compensation, labor-force participation and its relation to household production, occupational choice, migration, labor-market discrimination, and the effects of unions.

ILRLE 241 Income Distribution (also Economics 432)  
Fall. 4 credits. Prerequisite: ILRLE 240 or equivalent. G. Boyer.  
An in-depth treatment of the economics and financial management and administration of all employee benefits: health care, insurance, retirement income, family-care benefits, executive incentive plans, and other compensation provided as a service or contingent financial package to employees. Detailed international comparisons of health care and retirement systems are included.

ILRLE 444 Modern European Economic History  
Spring. 4 credits. Prerequisite: ILRLE 240 or equivalent. G. Boyer.  
An introduction to the economic development of Europe from 1500 to 1939. Topics covered include: the establishment of an institutional framework supporting economic growth in early modern Europe; the causes of the first industrial revolution in Great Britain; the effects of industrialization on workers' living standards; the spread of industrialization to the major continental powers—France, Germany, Austria-Hungary, and Russia; and the economic causes and effects of the First World War.

ILRLE 445 Women in the Economy (also Econ 457 also WOMNS 446)  
Fall. 4 credits. Prerequisite ILRLE 240 or equivalent. G. Boyer.  
Examines the changing economic roles of women and men in the labor market and in the family. Topics include: a historical overview of changing gender roles; the determinants of the gender division of labor in the family; trends in female and male labor force participation; gender differences in occupations and earnings, and the consequences of women's employment for the family.

ILRLE 446 Economic History of British Labor 1750-1940 (also Econ 459)  
Fall or spring. 4 credits. G. Boyer.  
Will examine various aspects of British labor history from the beginning of the Industrial Revolution until World War II. Specific topics will include: (1) monetary and non-monetary changes in workers' living standards; (2)
and third modules cover the "new personnel economics" (emphasizing economic issues within a firm that relate to selecting, training, assigning, monitoring and compensating workers), and the final module covers key institutions and economic security issues (including unemployment, pensions, disability, discrimination, and unions). The goals of this course are to have students learn to analyse both business and public policy problems, taking into account both basic principles of economic theory and the relevant institutional environments.

ILRLE 642 Economic Analysis of the Welfare State (also Econ 460)
Spring. 4 credits. R. Hutchens.
Includes economic rationales for government intervention and analysis of the effects of programs on economic welfare. Discusses taxes, in-kind, and cash programs. Includes some discussion of welfare states in other countries.

ILRLE 644 The Economics of Occupational Safety and Health (also Econ 461)
Spring. 3 credits.
Analyzes the problem of occupational injuries and illnesses in the United States. The first section concentrates on legal requirements, judicial interpretations, and legal implications of the Occupational Safety and Health Act, then shifts to such questions as the need for, and appropriate goals of, the act; the stringency of safety standards considered in a benefit-cost framework; the difficulties in enforcing the act; and estimates of the impact of the act.

ILRLE 647 Evaluation of Social Programs
Fall. 4 credits.
An introduction to the methodologies used by economists to evaluate the impacts of social-action programs and legislation. General evaluation methodology, cost-benefit analysis, and econometrics are discussed. Case studies are considered to illustrate the uses of these techniques, to acquaint the student with major current government programs and legislation, and to estimate these programs' economic impacts. Throughout, the primary analytic framework used by the instructor is microeconomics.

ILRLE 648 Economic Analysis of the University (also Econ 342)
Spring. 4 credits.
Seeks to illustrate the complexity of decision making in a nonprofit organization and to show how microeconomic analysis in general, and labor market analysis in particular, can be useful in applied to analyze resource allocation decisions at universities. Among the topics covered are financial aid, tuition, admissions policies, endowment policies, faculty salary determination, the tenure system, mandatory retirement policies, merit pay, affirmative action, comparable worth, collective bargaining, resource allocation across and within departments, undergraduate versus graduate education, research costs, libraries, athletics, and "socially responsible" policies. Lectures and discussions of the extensive readings will be supplemented by presentations by Cornell administrators and outside speakers who have been engaged in university resource allocation decisions or have done research on the subject.

ILRLE 741 Applied Econometrics I
Fall. 4 credits.
Considers methods for the analysis of longitudinal data, that is, data in which a set of individual units are followed over time. The focus will be on both estimation and specification testing of these models. Will consider how these statistical models are linked to underlying theories in the social sciences. Course coverage will include panel data methods (including fixed vs. random effects models for both linear and non-linear systems) and, if time permits, duration analysis.

ILRLE 742 Applied Econometrics II
Spring. 4 credits.
Covers statistical methods for models in which the dependent variable is not continuous. It covers models for dichotomous response (including probit and logit) and polychotomous response (including ordered response and multinomial logit), various types of censoring and truncation (e.g., the response variable is only observed when it is greater than a threshold), as well as sample selection issues, etc. Will also include an introduction to duration analysis, in addition to the statistical issues but also the links between behavioral theories in the social sciences and the specification of the statistical model.

ILRLE 744 Seminar in Labor Economics I (also Econ 641)
Spring. 3 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

ILRLE 745 Seminar in Labor Economics II (also Econ 642)
Fall. 3 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

ILRLE 746 Seminar in Labor Economics III (also Econ 643)
Spring. 4 credits. ILRLE 744, 745 and 746 constitute the Ph.D.-level sequence in labor economics. Reading and discussion of selected topics in labor economics. Applications of economic theory and econometrics to the labor market and human resource areas.

ILRLE 748 Economics of Employee Benefits
Fall. 4 credits.
Students in this course attend the lectures in ILRLE 442 (see description for 442) but have additional course requirements. If enrollment warrants, they will also meet separately at a time to be arranged for discussion of topics in 442 and additional topics.

ILRLE 749 Economics of Development (also Econ 672)
Fall. 4 credits.
Prerequisites: first-year graduate economic theory and econometrics. Analytical approaches to the economic problems of developing nations. Topics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who
benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.

ILRLE 790  I LR M.P.S. Program
Fall and spring. 1-9 credits. Supervised research only for those enrolled in the ILR M.P.S. program.

ILRLE 798  Internship
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 799  Directed Studies
For description, see the section on Collective Bargaining, Labor Law, and Labor History.

ILRLE 940  Workshop in Labor Economics
Fall and spring. 3 credits. Intended for Ph.D. students who have started to write their dissertations.

Presentations of completed papers and work in progress by faculty members, advanced graduate students, and speakers from other universities. Focus is on the formulation, design, and execution of dissertations.

ORGANIZATIONAL BEHAVIOR

ILROB 170  Introduction to Micro Organizational Behavior and Analysis: The Social Psychology of the Workplace
Fall. 3 credits. Staff.

This introductory (survey) course considers the basic individual and group processes in the workplace. At the individual level, we will study personality, motivation, perception, attitude formation, and decision making. On the group level, we will emphasize group dynamics, leadership, power and influence, and culture.

ILROB 171  Introduction to Macro Organizational Behavior and Analysis
Spring. 3 credits. Staff.

The relationship between industry and the economy as a whole and its implications for other social institutions in American society (including stratification, politics, and American values) is discussed. The course moves from classical sociological theory to the analysis of complex organizations. The central focus of the course is the study of industrial organizations and of complex organizations in general. Emphasis is on authority relations, goals, the division of labor, bureaucracy, and organizational design.

ILROB 320  The Psychology of Industrial Engineering
Fall. 4 credits. T. Hammer.

A study of the human factors in the industrial engineering of work, workplaces, tools, and machinery. The course examines the aspects of individual and social psychology that operate in the work setting and that should be taken into account in the design of jobs. These include limitations of the human sensory system, individual differences in skills, abilities, motives, and needs; group dynamics; intrinsic motivation; job satisfaction; conflict.

ILROB 321  Group Solidarity (also SOC 311)
4 credits. M. Macy.

What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fall apart? How do group members recruit new members? Select readers? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We will explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as well as alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communities, the civil rights movement, pro-life activists, athletic teams, work groups, and college fraternities.

ILROB 322  Work and Organization
3 credits. M. Loundsbury.

Will theoretiically examine the concept of work and track how the nature of work and the operations of organizations are changing, highlighting the complex linkages between economic activity, social change, and individual experience. Course includes a service-learning requirement that is designed to involve students in projects at local governmental or community organizations. This field-based activity will also enable students to complement theoretical perspectives learned in class with a more grounded, experiential understanding of the relationship between work and organization.

ILROB 324  Gender and Work (also SOC 314/514 and Womms 314/514)
Spring. 4 credits. M. Brinton.

The purpose of this course is to familiarize students with the field of gender stratification. The first part of the course will examine long-term changes in women's labor force participation and the division of labor between the sexes as societies industrialize. We will consider these changes as well as empirical case studies of a number of countries ranging from Taiwan to Ireland. The second part of the course focuses on gender and work in highly industrialized societies, and includes empirical studies of the gendered division of labor in households and the labor market of the United States in particular. The structure of the course is lecture one day per week and detailed discussion and critique of selected readings on the second day. Students take a mid-term exam and prepare a research proposal on some aspect of gender and work. During the last two weeks of the course, students present synopses of their research proposals and we discuss and constructively critique them.

ILROB 325  Organizations and Social Inequality (also SOC 322)
Spring. 3 credits. Removed from ILR writing intensive list. P. Tolbert.

Examines the central role that organizations in industrial societies play in allocating income, status, and power to individuals. A variety of theoretical explanations of social inequality will be examined, and the social policy implications of each will be considered. Class assignments are designed to develop students' general writing skills, as well as substantive understanding of different theories and approaches to the problem of inequality.

ILROB 328  Cooperation, Competition, and Conflict Resolution
Spring. 4 credits. Prerequisite: one course in social psychology or equivalent.

An examination of theory and empirical evidence relating to the resolution of interpersonal, intergroup, and international conflict. Specific attention is devoted to studying factors that contribute to the development of cooperative or competitive bonds between parties to a conflict. The following topics will be covered: the credibility, intensity, and costs of threat; the nature of conflict; and escalation of conflict. Personality and situational factors that regulate conflict intensification are stressed.

ILROB 329  Organizational Cultures
Fall or spring. 3 credits. Prerequisite: one or more courses in sociology. Staff.

Reviews the concept of culture as it has evolved in sociology and anthropology, and applies it to formal organizations in workplaces such as corporations and unions. The course first examines the nature of ideologies as sense-making definitions of behavior, concentrating on the cultural forms that carry these cultural messages, symbols, metaphors, and organizational stories. Considerable attention will be given to rites and ceremonies as a cultural form in organizational life that consolidates many of these expressive forms into one. The course will examine types of ceremonial behavior such as rites of passage, rites of enhancement, and rites of degradation, including the role of language, physical settings, and artifacts in ceremonial behavior. The presence of subcultures and countercultures in organizational behavior will also receive attention, especially the part played by occupational subcultures in formal organizations.

ILROB 370  The Study of Work Motivation
Fall. 4 credits. Open to juniors and seniors. T. Hammer.

Designed to acquaint the student with the basic concepts and theories of human motivation with implications for job design and organizational effectiveness. Focus is on theories of worker motivation and on research approaches and results that apply to the performance of individuals and groups in formal organizations. Readings are predominately from the field of organizational psychology, supplemented by relevant contributions from experimental and social psychology. Each student will design, execute, and analyze a research study of his or her own.

ILROB 371  Individual Differences and Organizational Behavior
Fall or summer. 4 credits. Recommended: some acquaintance with the substance and methods of behavioral or social science.

Examines personality from a comparative psychodynamic point of view. Social behavior, authority relationships, and work motivation are used to illustrate how various theories could be applied to understand behavior and conflict in organizations.

ILROB 290  Organizational Behavior Simulations
Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Limited enrollment. R. Stern.
Basic principles of organizational behavior is studied through readings and participation in simulation games. Simulations model traditional organizations and cooperatives. Games model executive decision making, running a company, assembly work, and cooperative decision making. Organizational design, decision making, conflict, cooperation, and power are the central topics of discussion. The contrasting bases of power in the organizations permits the study of the assumptions underlying organization structure and process.

**ILROB 420 Contemporary Organizational Behavior Applications**
Fall or spring. 3 credits. Prerequisites: ILR 170 and 171 (120 and 121).
Introduces students to contemporary applications of organizational behavior theory in work organizations. Will explore the frameworks of common and current organizational and managerial change interventions, review contemporary literature about them, and try to discover existing links between these processes and the theoretical OB literature. Students will vary from year to year. For this year, applications include TQM, re-engineering, team development, learning organizations, world-class manufacturing, competing values frameworks, assessment interventions, and multiculturalism and diversity issues in the workplace.

**ILROB 421 Regulating the Corporation**
Spring. 4 credits. R. Stern.
Introduces students to a variety of topics involving the sources and consequences of government regulation. Emphasis on the public and private power from which regulatory rules are created, the factors affecting their implementation, and the resulting organizational behavior. It will specifically cover the structure and functioning of government regulatory agencies and corporate responses to regulation, including corporate strategy, change, and political influences. Business ethics and corporate social responsibility are considered along with the role of interest groups such as consumer or citizen organizations.
Research and case materials, reading assignments, and a final paper.

**ILROB 422 Organizations and Deviance**
Fall. 3 credits. W. Sonnestahl.
Focuses upon the deviant actions of organizations, including such behaviors as price fixing, environmental pollution, illegal campaign contributions, and discrimination in hiring and promotion. Examines the origins of such behaviors within organizations, the processes by which they become institutionalized, and the processes by which they become defined as deviant organizational actions. Within this context, the course will examine such contemporary cases as Exxon's Valdez oil spill, Iran-Contra, drug testing, and the federal savings and loan scandal. These events raise troubling questions about what it means to live and work within an organizational society, and they cannot be dismissed as instances of a few individuals gone bad.

**ILROB 425 Sociology of Industrial Conflict**
Spring. 4 credits. R. Stern.
The course focuses on the social, economic, and political causes of industrial conflict. The nature of work and the employment relation-ship provide the foundation for understanding both individual and collective expressions of conflict in a work setting. Workers' background, psychological contracts and authority relations set the stage for studying conflict expressions including strikes, labor turnover, absenteeism, sabotage, accidents, grievances, filing, violence and other forms of conflict at work.

**ILROB 427 The Professions: Organization and Control**
Fall. 3 credits. Prerequisite: permission of the instructor. P. Tolbert.
Focuses on the sources of power and control exercised by professional groups in contemporary society. A number of issues will be examined in this context including: the role of professions in society, processes through which an occupational group becomes defined as a profession, sources of control that professional associations have over their members, relations between professionals and nonprofessionals in organizations, and the relationship between unionization and professionalization of occupations.

**ILROB 428 Organizational Change and Intervention**
Fall. 3 credits. Limited to 25. Juniors and seniors with permission of instructor. L. Williams.
Seminar will focus on planned and unplanned change in organizations. Topics will include mergers and acquisitions, team building, self management and the role of change agents. Participants will be required to develop and present topics in addition to keeping a weekly journal and participating in exercises.

**ILROB 429 Organizational Politics and Institutional Change**
Spring. 2 credits. 7 weeks. Limited to juniors and seniors with permission of the instructor. F. Lawler.
Will examine the market, cultural, political, and structural forces that change the organizational "rules of the game," how those changes affect individuals and organizations, and the distortions that occur as individuals and organizations attempt to adjust to a new unstable order. Issues to be examined include power, corruption, dealmaking, rationality, uncertainty, and competition. Course requirements include completing a major research paper and leading a class discussion.

**ILROB 470 Group Processes**
Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Permission of instructor. E. Lawler.
A review of theoretical approaches and selected research on group phenomena, including the formation of groups, the structure of group relations, and group performance. Specific topics include conformity and obedience, status and power relations, turnover, solidarity and commitment, the management of emotion, the emergence and change of microcultures, and the role of groups in networks and organizations.

**ILROB 472 Applied Organizational Behavior**
Fall. 3 credits. Prerequisites: ILROB 170 and 171. S. Bacharach.
Introduces students to intermediate theory of organizational behavior. It will specifically concentrate on teaching students to use organizational theories for analytical and applied purposes. Among the issues to be addressed are organizational structure, work processes, organizational politics, organizational design, job design, decision making, and quality-of-life work programs.

**ILROB 474 Personality and Organizational Behavior Only**
3 credits. Prerequisite: ILROB 170 or permission of instructor. B. Smith.
Will provide an overview of theoretically grounded personality assessment. While this is not a class in personality theory, various theories will be discussed. Will cover the historical rise, fall, and rebirth of personality theory. In addition, the course will examine the use of personality theories to understand the behavior of people in organizations and the "behavior of organizations". Students will be offered the opportunity to participate in a series of personality assessments designed for individuals. Representative topics include: these assessments will be used throughout the course as an aid to understanding the relationship between personality and behavior within the world of work.

**ILROB 479 Technical Workers and the Social Organization of Research and Development**
Spring. 3 credits. Prerequisite: ILROB 170, 171 or an introductory course in sociology or anthropology. Staff.
Examines how industrial R&D is organized and seeks to impart an appreciation for the practical problems that arise when firms employ a significant number of scientists, engineers, and other technical workers. It is designed for students who have an interest in high-technology firms or who anticipate working for firms in which R&D plays an important role. The course brings relevant theoretical perspectives to bear on pragmatic issues surrounding technical innovation and the employment of scientists and engineers.
In addition, the course will focus on the internal structure of organizations that employ a significant number of scientists, engineers, and other technical workers. It is designed for students who have an interest in high-technology firms or who anticipate working for firms in which R&D plays an important role. The course brings relevant theoretical perspectives to bear on pragmatic issues surrounding technical innovation and the employment of scientists and engineers.
ILROB 620 Theories of Organizational Change, Innovation, and Evaluation
Spring. 4 credits. Prerequisites: ILROB 4 or equivalent. Examine how factors operating in organizational change in general, and in the implementation and use of innovations within formal organizations in particular. The role of roleful behavior in assessing the effectiveness of the implementation of innovation in determining organizational effectiveness are analyzed. Several case studies of organizational change in government, unions, and private industry are examined. The emphasis is on conceptual frameworks for analyzing organizational change and mounting evaluative research on organizations. Readings are interdisciplinary and include sociology, psychology, and political science.

ILROB 621 Organizational Diagnosis Intervention and Development
Spring. 4 credits. Prerequisites: under­graduate courses 171 and 172, graduate students, ILROB 520 and 521 or equivalent, and permission of instructor L. Gruenfeld. This applied course considers theories and techniques for the identification and improve­ment of organizational problems at the behavioral (micro) level. Methods for the implementation of change are evaluated in terms of a light of several normative and descriptive theories of individual and group development and effectiveness. The course emphasizes both quantitative and qualitative data processing procedures.

ILROB 622 Sociology Of Markets
3 credits. M. Lounsbury. Since World War II, the diffusion of "markets" in Asia, Eastern Europe and Latin America as well as changes in the structure of Western economies has reinvigorated questions about how markets are socially structured. Drawing on literature on economic sociology, this course explores the social, cultural, economic, and political factors that shape the emergence and dynamics of markets. Among the issues to be addressed are the social organization of markets, market discrimination, the cooperative aspects of market functioning, and the role of government and other institutional arrangements, the relationship of economic choice to broader social forces such as social movements, and the shift towards globally market-oriented economies.

ILROB 623 Micropolitics in Organizations
Spring. 3 credits. Prerequisites: ILROB 170 and 171. Limited, permission of instructor S. Bacharach. Examines micro-political processes in organizations. Explorations of Marxian, Weberian, and institutional approaches to organizational politics will be specifically analyzed. An attempt will be made to understand how the micro-political rules of organizational games and institutionalized change. Among the ideas to be discussed are the institutionalization of ideology and specification of the relationships among power, tactics, and strategy. Interest groups and coalition politics will be examined in terms of conflict and bargaining. Other issues to be discussed include corruption, dealmaking, and competition. Examples will be drawn from both the private and public sectors. Seminar require­ments will include in-class presentation and a major paper and/or take-home final exam.

ILROB 624 Groups in Work Organizations
Fall. 4 credits. Enrollment limited. Permission of instructor required. L. Gruenfeld. This is an experiential learning course designed primarily for students who has a comprehensive background in the theory and application of organizational science. Work group members study their roles and relationships to each other, the task, other work groups, and especially authorities. Students will study a number of self-reflexive papers in which they conceptualize their experiences. The course concentrates on theory and method in organizational behavior and experience.

ILROB 625 Conflict, Power and Negotiation
Fall. 3 credits. Open to seniors and graduate students. Permission of instructor is required. Limited enrollment. E. Lawler. Theoretical seminar adopts a power perspec­tive on bargaining and conflict resolution. Examines how power relations and power processes affect tactics in bargaining and also when power relation, or promotions, conflict resolution. "Power" is viewed in the course as a capability, embedded in a social structure, and tactics are the action based on or using such power. The seminar gives overview of several theoretical approaches to conflict, including organizational choice, cognitive, social exchange) and places the power perspective in this context.

ILROB 627 Leadership in Organizations
Spring. 3 credits. Prerequisites: two organizational behavior courses at the 300 level or advanced courses in sociology or psychology. L. Gruenfeld. An examination of theories and research findings from the behavioral sciences that are relevant to leadership and the influence process in groups and organizations. Personality, situational factors, intergroup processes, interpersonal perception as well as the motivation to both lead and follow will be discussed. The implications for leadership training, organization development, and action research are explored.

ILROB 628 Cross-Cultural Studies In Organizational Behavior
Spring. 3 credits. Limited. Permission of instructor before registering in course. L. Gruenfeld. Designed for students interested in social psychological theory and research in international culture comparisons of behavior and experience in organizations. Variables such as power distance, individualism-collectivism, universalism-particularism and attitudes toward authority as well as work motivation will be examined. Upon completion of the course, students will be able to conceptual methods and consideration of several major international comparison studies, each student will prepare and present a paper on a topic of his/her own choice usually representing a country of origin (China, Japan, Germany, USA, etc.).

ILROB 629 Personality in Organization
Fall. 4 credits. Open to undergraduates with permission of instructor. L. Gruenfeld. This advanced course considers psychody­namic theories of organizational diagnosis at the individual and group levels. Topics include leadership, power, authority, work motivation, intervention, and change. The
ILROB 723 Behavioral Research Theory, Strategy, and Methods I  
Fall. 4 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll. Prerequisites: ILROB 723 and 724 include: (1) theoretical, conceptual, and ethical questions; (2) survey research and attitude-scaling procedures; (3) laboratory research methods; (4) participant observation and interview methods; (5) use of documents and qualitative data analysis. Provides students with important philosophical background for doing research and exposes them to a well-balanced, interdisciplinary set of quantitative and qualitative research tools.

ILROB 724 Behavioral Research Theory, Strategy, and Methods II  
Spring. 3 credits. Designed to meet the needs of M.S. and Ph.D. candidates majoring in organizational behavior, but other graduate students may enroll. Course will cover (a) analysis and interpretation of qualitative data, (b) statistical methods and interpretation by traditional measures. Examples of topics covered in the course: the use of Chi-square, t-tests, ANOVA, simple and multiple correlation and regression, reliability and validity analyses, causal models, factor analysis, scale construction.

ILROB 725 Analysis of Published Research in Organizational Behavior (also SOC 725)  
Fall. 3 credits. Prerequisites: ILROB 520 and one year of statistics. An advanced research methods course that critically examines published research papers in the field of organizational behavior in terms of research design and methodology as well as research practice.

ILROB 726 Selected Topics in Organizational Behavior  
Fall. 3 credits. Prerequisites: ILROB 520 and permission of instructor. An advanced proseminar that seeks to develop an interdisciplinary perspective on selected topics in organizational behavior. The topics themselves will change from year to year depending on participants' interests. Course is designed to allow students and the instructor to jointly pursue significant scholarly inquiry into one or more arenas of organizational theory. Emphasis will be placed on exploring the relevance of tradition in related disciplines (linguistics, philosophy, sociology, etc.) that may enrich our understanding of organizational life.

ILROB 727 Work and Industrial Conflict  
Spring, week 7-14. 2 credits. A concentrated examination of the sociology of industrial conflict. The seminar focuses on classic formulations of conflict theory in sociology, then the social, political, economic causes of industrial conflict. Both individual and collective forms of conflict expression are examined. Some discussion of the implications of various types of worker management or of firms for industrial conflict will be included.

ILROB 728 Theories of Motivation and Leadership  
Spring. 2 or 4 credits. Prerequisites: ILROB 520. Two independent but sequence-connected minicourses.

(1) Theories of Work Motivation. 7 weeks. 2 credits. Course will provide an introduction to basic concepts of human motivation in general, with particular emphasis on the theories that explain and predict work motivation. Students will examine the empirical research that tests the validity of the theories and will survey how and under what conditions different motivation models can be used for practice in work organizations.

(2) Theories of Leadership and Power. 7 weeks. 2 credits. Several current microtheories of leadership and power and related research are examined. The disciplinary perspective employed is social organizational psychology and the level of analysis emphasized is action and experience of individuals in groups.

ILROB 729 Organizational Change and Intervention  
Fall. 3 credits. Graduate students only; no exceptions. This seminar is concerned with planned and unplanned change in organizations. It is designed to analyze theory in practice. Particular attention will be paid to the role of internal and external change agents. Class members will be encouraged to analyze contemporary changes such as mergers and acquisitions and work force reductions. Participants will submit weekly work force journals.

ILROB 770 The Cultures of Work Organizations  
Fall. 3 credits. Open only to graduate students. Considers both administrative and occupational cultures in the workplace. It takes an anthropology perspective, focusing on ideologies as the main ingredient of cultures but emphasizing the role of cultural forms, e.g., myths, stories, sagas, language, rites and ceremonies, and physical settings of meaning. It pays special attention to the place of subcultures and countercultures in the makeup of administrative culture and to occupations as a major source of subcultures. The role of the environment in which organizations are embedded, and its influence on workplace cultures, is also included. Forms of cultural leadership and approaches to reading and changing cultures are also considered.

ILROB 771 Social Science and Social Scientists  
3 credits. Grad only. Letter grade only. L. Williams. This seven-week course offers a philosophy of science look at social science methods. Discussions will include a comparison of conventional and radical views of theory construction, and the strengths and weaknesses of approaches such as interviewing, surveys, policy capture, laboratory experiments, secondary data analysis, action research and ethnomethodology. Readings will include: *Mismeasurement of Man* (Gould); *Conduct of Intergroup Conflict* Against Method (Feuerband); *Servants of Power* (Baritz); and *Encounter with an Interviewer* (Twain).
ILROB 772 The Social Construction of Economic Life  
3 credits. M. Lounsbury.  
Drawing on the literature in economic sociology, this course emphasizes how "economic" activities are constituted and shaped by the social, cultural and historical contexts within which they are situated. This course will focus on surveying various empirical and theoretical approaches used to study the genesis and influence of broader scale organizational and institutional arrangements and provide students with an opportunity to formulate and refine their own research questions and perspectives.

ILROB 773 Advanced Seminar in Cross-Cultural Studies of Organizational Behavior  
Fall. 3 credits. Permission of the instructor.  
Consider theory and method for the study of cross-cultural and cognitive styles variables. Members participate in the conceptualization and conduct of a comparative research project.

ILROB 776 Organizational Implications of World Class Manufacturing  
Fall. 4 credits.  
Aimed at helping students develop an understanding of organizations as complex social systems, and of the behavioral implications of new manufacturing initiatives. Live case studies are used to study the introduction of a variety of innovations in contemporary manufacturing firms, including manufacturing cells and teams, concurrent engineering, total quality management, and just-in-time material flow. Analyses emphasize the impact of such innovations on individuals' role definitions and relationships, organizations communication requirements and patterns, group dynamics, leadership behaviors, labor relations, and human resource management systems. ILROB 776 is a core course in the Master of Engineering Manufacturing Option degree program.

ILROB 777 Personality in Work Groups and Organizations  
Spring. 3 credits. Prerequisite: statistical methods and/or a course in research methods. Students will administer, analyze, score, and statistically test theory-driven hypothesis. Staff.  
Discusses several theories of personality and related research findings. The relationship of personality to work motivation and leadership and interpersonal behavior in groups (teams) is also considered. Methods of research including observational, peer report, and self-report, as well as performance tests are studied.

ILROB 778 Solidarity in Groups  
Fall. 3 credits. Not offered 1999-2000.  
Examines sociological and social psychological theories about how social solidarity or a "sense of community" comes about and is maintained in groups and organizations. Distinguishes emotional, normative, and instrumental bases for social solidarity and shows how these promote or inhibit subgroup formation in organizations, commitment of individuals to organizations, and organizational citizenship behavior.

ILROB 790 ILRP M.P.S. Program  
Fall and spring. 1-9 credits. Supervised research for those enrolled in the ILRP M.P.S. program.

ILROB 798 Internship  
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 799 Directed Studies  
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

ILROB 920 Organizational Behavior Workshop  
Fall. 2 credits. Limited to M.S. and Ph.D. candidates in the department. S-U grades only.  
This workshop is designed to provide a forum for the presentation of current research undertaken by faculty members and graduate students in the Department of Organizational Behavior and by invited guests. All M.S. and Ph.D. candidates in the department who are at work on their theses are strongly urged to enroll. Each student in the course will be expected to make at least one presentation during the year, focusing on the formulation, design, execution, and results of that student's thesis research.

SOCIAL STATISTICS  
A. Hadi, Chair; J. Angellotti; J. Bunge, T. DiCiccio, P. Velleman, M. Wells

ILRST 210 Statistical Reasoning I  
Fall and spring 1999-2000. 3 credits. Attendance at weekly discussion session is required. J. Angellotti, P. Velleman.

ILRST 211 Statistical Reasoning II  
3 credits. Prerequisite: ILRST 210 or equivalent. Fall, spring and summer 1999-2000.

ILRST 310 Statistical Reasoning II  
Fall, spring and summer 1999-2000. 3 credits. Attendance at weekly discussion session is required. J. Angellotti, P. Velleman.

An introduction to the basic concepts of statistics and data analysis. Descriptive methods, normal theory models and inference procedures for univariate and bivariate data. Basic statistical designs, an introduction to probability and applications of the Binomial and Normal distributions. Estimation, confidence intervals, and tests of significance for a single population mean and proportion, the difference between means and proportions, simple linear regression, correlation, and two-way contingency tables. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

ILRST 311 Statistical Reasoning II  
Fall, spring and summer 1999-2000. 3 credits. Prerequisite: ILRST 210 or suitable introductory statistics course. J. Bunge, T. DiCiccio, A. Hadi.

A second course in statistics. Applications of statistical data analysis techniques, particularly to the social sciences. Topics include: statistical inference; simple linear regression; multiple linear regression; logistic regression, and analysis of variance. Computer packages are used throughout the course.

ILRST 312 Applied Regression Methods  
Fall. 3 credits. Prerequisite: ILRST 211 or equivalent courses. T. DiCiccio.

Matrix algebra necessary to analyze regression models is reviewed. Multiple linear regression, analysis of variance, nonlinear regression, and linear logistic regression models are covered. For these models, least squares and maximum likelihood estimation, hypothesis testing, model selection, and diagnostic procedures are considered. Illustrative examples are taken from the social sciences. Computer packages are used.

ILRST 313 Graphical Methods for Data Analysis  
3 credits. Prerequisite: ILRST 211 or equivalent. Not offered 1999-2000.

The statistical design and analysis of comparative experiments including completely randomized, factorial, randomized block, latin squares, and split-unit designs including crossover and repeated measures. Application of statistical design to research problems. Analyses to compare treatment groups including ANOVA, ANCOVA, contrasts and multiple comparison procedures. Computer packages are used.

ILRST 314 Techniques of Multivariate Analysis  
Spring. 3 credits. Prerequisite: ILRST 211 or equivalent.

Techniques of multivariate statistical analysis discussed and illustrated by examples from various fields. We emphasize application, but theory will not be ignored. Deviation from assumptions and the rationale for choices among techniques are discussed. Students are expected to learn how to thoroughly analyze real-life data sets using computer-packaged programs. Participants should have some knowledge of matrix algebra. Techniques include: multivariate normal distribution, sample geometry and multivariate distances, inference about a mean vector, comparison of several multivariate means, variances, and
covariances; detection of multivariate outliers; principal component analysis, factor analysis; canonical correlation analysis; discriminant analysis, and multivariate multiple regression.

[ILRST 411 Statistical Analysis of Qualitative Data]
3 credits. Prerequisite: two statistics courses or permission of instructor. Not offered 1999–2000. M. Wells. An advanced undergraduate and beginning graduate course. Includes treatment of association between qualitative variables, contingency tables, log-linear models, binary ordinal, and multinomial regression models; limit dependent variables.

[ILRST 499 Directed Studies]
For description, see the section, Collective Bargaining, Labor Law, and Labor History.

[ILRST 510 Statistical Methods for the Social Sciences I]
Fall, spring and summer 1999–2000. 3 credits. J. Angelotti, P. Velleman. A first course in statistics for graduate students in the social sciences. Descriptive statistics, probability and sampling distributions, estimation, hypothesis testing, simple linear regression and correlation. Students are instructed on the use of a statistics computer package at the beginning of the term and use it for weekly assignments.

[ILRST 511 Statistical Methods for the Social Sciences II]
Fall, spring and summer. 3 credits. Prerequisite: ILRST 510 or equivalent introductory statistics course. A. Hadi, P. Velleman. A second course in statistics that emphasizes applications to the social sciences. Topics include: simple linear regression, multiple linear regression (theory, model building, and model diagnostics); and the analysis of variance. Computer packages are used extensively.

[ILRST 610 Seminar in Modern Data Analysis]
Fall, spring and summer. 3 credits. Prerequisite: two statistics courses or permission of instructor. P. Velleman. An advanced survey of modern data analysis methods. Topics include exploratory data analysis, data re-expression, philosophy of data analysis, robust methods, statistical graphics, regression methods, and diagnostics. Extensive outside readings cover recent and historical work. Participants should have some knowledge of multiple regression, including the use of matrices, and some experience using a computer.

[ILRST 611 Statistical Computing]
3 credits. Prerequisites: linear algebra, knowledge of a programming language, and statistics at least through multiple regression. Not offered 1999–2000. A survey of new aspects of statistical computing. Topics include: basic numerical methods, numerical linear algebra, nonlinear statistical methods, numerical integration and approximation, smoothing and density estimation. Additional special topics may include Monte Carlo methods, statistical graphics, computing-intensive methods, parallel computation, computing environments. Designed for graduate students in the statistical sciences and related fields interested in new advances. Students may be asked to write programs in a programming language of their choice.

[ILRST 612 Data Mining]
Spring. 3 credits. Prerequisite: three courses in statistics including multiple regression, computer experience (preferably cross platform), and matrix algebra (may be taken concurrently). J. Bunge. Data mining is the fastest-growing business application of statistics. The term typically refers to a suite of methods used to estimate or predict a response (e.g., probability that a customer will buy a new product), based on a large set of predictors (5,000 independent variables is not unusual). Methods include logistic regression, decision trees (CART), CHAID, neural nets, and discriminant analysis; diagnostics and outlier detection are also important. We will use the new SAS software package Enterprise Miner, which gives a point-and-click interface for data cleaning, exploration and analysis via several methods, and we will also use the IBM competitor Intelligent Miner. I will draw on my consulting experience in industry and will hopefully obtain real (sanitized) datasets for us to work on. For more information e-mail John Bunge at jab18@cornell.edu; see also http://www.cornell.edu/Academic/RSP/ RSP9ILRST.html.

[ILRST 613 Bayesian and Conditional Inference]
3 credits. Prerequisites: graduate level courses equivalent to OR&IE 670 and OR&IE 651 or permission of instructor. Not offered 1999–2000. M. Wells. Covers the following topics: loss functions and utility theory, prior information and subjective probability, coherency, basic Bayesian inference, empirical Bayesian inference, robust Bayesian inference, Bayesian computations, ancillarity, conditional properties of finite, asymptotic, and nonasymptotic, Bayes and Barnard-Nielsen's exact likelihood theory.

[ILRST 614 Structural Equations with Latent Variables]
3 credits. Prerequisites: ILRST 210, 211 or ILRST 510, 511 or equivalent. Not offered 1999–2000. M. Wells. Provides a comprehensive introduction to the general structural equation system, commonly known as the "LISREL model." One purpose of the course is to demonstrate the generality of this model. Rather than treating path analysis, recursive and nonrecursive models, classical econometrics, and confirmatory factor analysis as distinct and unique, we will treat them as special cases of a common model. Another goal of the course is to emphasize the application of these techniques.

[ILRST 615 Expert Systems and Probabilistic Network Models]
3 credits. S-U only. Prerequisite: OR&IE 560 or an equivalent course in probability and statistics. Not offered 1999–2000. This is an interdisciplinary course for students in applied mathematics, computer science, statistics, and other related fields of applications such as medical, engineering, and social sciences. Topics include: components of expert systems, rule-based expert systems, probability-based expert systems, uncertainty measures, dependency models, Bayesian and Markov networks, propagation of uncertainties, learning structure from data, and examples of applications. Students will use computer software to gain experience.

[ILRST 711 Robust Regression Diagnostics]
3 credits. S-U or letter grade. Prerequisite: ILRST 312 or equivalent or permission of instructor. Not offered in 1999–2000. Regression models are simplifications of reality; we rarely expect the model to be exactly true. In many applications of regression, however, small changes in a model, a model assumption, or a data point can have very large effects on the results. Regression analysis is viewed in this course as a cyclical process, which takes inputs and produces outputs in an interactive or cyclical way; a way in which the outputs can be used to diagnose, validate, criticize, and possibly alter the inputs. This is an attempt to narrow the gap between the theory and practice of regression analysis. We discuss classical methods as well as a recently developed general framework for assessing the sensitivity of the outputs to small changes in the input. Students are expected to be able to perform through analyses of real-life data using computer packages. Topics to be discussed include: role of variables in a regression equation, regression outliers and influential observations, robust regression, alternatives to least squares (e.g., LMS, LAV, IRLS) error-in-variables models, and generalized linear models.

[ILRST 712 Theory of Sampling]
Fall. 3 credits. Prerequisite: calculus and at least one semester of mathematical statistics. J. Benkold. Sampling theory from the viewpoint of mathematical statistics. The first part of the course focuses on the classical or "design" approach; the second part on the more-recent "model-based" approach. Attention is paid to recent progress in the field.

[ILRST 713 Counting Processes with Statistical Applications]
3 credits. Prerequisite: a course at the technical level of Math 572 and 574 or permission of instructor. Not offered 1999–2000. The statistical analysis of life history data is playing an increasing role in the social, natural, and physical sciences. We will formulate and solve various practical problems in the statistical analysis of life history data using the modern theory of stochastic processes. We will examine martingale dynamics for point processes relevant to life history data. Both parametric and nonparametric inference for multiplicative intensity models will be considered. The large sample properties of the proposed procedures will be discussed in detail using recent extensions of functional central limit theorems for martingales.

[ILRST 714 Topics in Modern Statistical Distribution Theory]
3 credits. Prerequisite: courses equivalent to OR&IE 581, ILRST 571, and STAT 549 or OR&IE 670. Not offered 1999–2000. Recent research has revealed vast territories of distribution theory that are unfamiliar to most statisticians. Provides an introduction to three topics underlying this "modern" theory: infinite divisibility, decomposability, and stability; characterization of distributions; extensions of univariate distributions to multivariate distributions.
facts and perceptions driving the actors, and engage in applying communication, negotia­tion, and mediation techniques to reduce or eliminate the conflict.

205 Oral Skills for Conflict Management
Fall or spring. 3 credits.
This course emphasizes developing the oral communications skills required to successfully manage conflict both as a party to a dispute, and as a third party who is charged with helping to resolve a dispute. The course presents simulations to help the participants practice their skills.

206 The Nature of Conflict
Fall or spring. 3 credits.
The purpose of the course is to provide students with the conceptual foundation to engage in further study of conflict manage­ment and conflict resolution. Having taken the course, the students will 1) be able to identify and describe types of conflict; 2) be able to identify the various sources of conflict; 3) be able to apply a conceptual model of conflict to interpersonal, organizational, and international conflicts; 4) be able to describe conflict situations in terms of social psychological aspects utilizing a "person perception" or "attribution" theoretical orientation; 5) be able to identify their personal response styles to conflict.

208 Workplace Negotiations
Fall or spring. 3 credits.
Will cover the theory and practice of negotiation as it applies to workplace and business situations. Students will be exposed to theoretical models of negotiation and will participate in negotiation exercises. Students will be asked to write a paper on their negotiating position in each exercise. More weight will be given in grading to the student's ability to present a well-thought-out rationale for positions and tactics than to the outcome of the negotiation itself.

241 Arbitration
Fall or spring. 3 credits.
A study of the place and function of arbitration in the field of labor-management relations, including an analysis of principles and practices, the law of arbitration, the handling of materials in briefs or oral presentation, the conduct of an arbitration hearing, and the preparation of an arbitration opinion.

242 Public Sector Collective Bargaining
Fall or spring. 3 credits.
This course is designed as an introduction to collective bargaining in the public sector. The course examines the historical development of bargaining in public employment, the evolution of state and federal and bargaining theory and practices, as well as impasse resolution techniques frequently found in this sector. Special emphasis will be given to developing an understanding of the similarities and differences between public and private sector bargaining and how they have affected tactics and strategies employed by the parties.

243 Growth of American Business and Management History
Fall or spring. 3 credits.
The growth and cycles of American business enterprise produced significant changes in education, government, work, the family, the ethnic composition of the population, and the landscape. As business and industry expanded, new methods evolved for managing these enterprises. This course will examine the development of managerial practices, the relationship of management to the work force, and the social ramifications of capitalist expansion.

245 Public Sector Labor Law
3 credits.
A survey and analysis of the New York State Public Employees Fair Employment Act is made as well as a comparison with other state laws covering public employees. The course will examine the extent to which the law protects and regulates concerted actions by employees in the public sector. The intent is to study and understand the law as written, but more importantly how it has been interpreted by the courts of New York State in its application. Major emphasis will be employee and employer rights, including recognition and certification, improper practices, strikes, grievances, and disciplinary procedures of the New York State Public Employment Relations Board.

247 Labor and the American Economy
3 credits.
Will help the student understand how economic theories relate to the economic problems confronting the American citizen in general and the American union member in particular. Emphasis will be placed on contemporary economic theories and how their proponents attempt to solve American economic problems.

248 Employment Practices Law
3 credits.
Considers laws and regulations that impact directly on managers and employers. Students will examine issues and laws such as Equal Employment Opportunity, Employee Retirement Income Security Act, Federal Wage and Hour Laws, Occupational Safety and Health Act, unemployment laws and other topics. Students will focus on the practical application of laws and their impact on the workplace.

250 New York Workers' Compensation Law for Trade Unionists and Injured Workers
Fall or spring. 3 credits.
There is a collective perception that the Worker's Compensation system in New York compounds an injured worker's predicament with Byzantine responses that lead to despair. Unions and injured workers' organizations believe that, if properly empowered, they can be just as effective as lawyers in looking after their injured colleagues' claims. This course is structured to meet both of these realities. We will delve into every nook and cranny of New York Worker's Compensation law. The course will be entirely practical. Skills teaching, how to present a case, decorum, ethics, and persuasiveness, are built into the course. Experts on how the system really works will also be used.

251 Principles and Practices of Management
Fall or spring. 3 credits.
Presents the theory and processes of management with an emphasis on supervi­sion. Management functions of planning, organizing, staffing, and controlling are included. Concepts and theories are presented, and case studies are analyzed. Motivating people, exercising leadership, and effectively developing employees are emphasized.
252 Contract Bargaining  
Fall or spring. 3 credits.  
Examines the principles of contract bargaining, including bargaining environments and structures as well as standards used in bargaining. Students will learn to prepare bargaining demands, cost economic items, draft noneconomic contract language, negotiate economic and noneconomic issues, and resolve a contract bargaining impasse. The course will consider the impact of contract bargaining outcomes on workers, unions, employers, and the public.

253 Contract Administration  
Fall or spring. 3 credits.  
Focuses on the role of the steward in administering the union contract in the workplace. Students will evaluate grievance and arbitration contract clauses, the grievance procedure in practice, the role of the union steward, the role of local and international unions, negotiation of grievances, and preparation for arbitration. Students will analyze the impact of grievance and arbitration procedures on workers, unions, and employers.

254 Labor Law  
Fall or spring. 3 credits.  
Examines the principles of labor law by looking at social philosophy and the historical context of federal labor legislation from the 1930s. Students will concentrate on major provisions of the National Labor Relations Act, examining and developing the National Labor Relations Board and the federal courts have interpreted the national labor laws. Discussion will include new directions in labor legislation and interpretation with consideration given to the impact of labor law on workers, unions, and employers.

255 Labor History  
Fall or spring. 3 credits.  
Reviews American labor history from the perspective of workers' social dimensions of the development of the working class, reform and revolutionary movements, and the emergence of craft, industrial, and public employee unions. Included will be a discussion of the development of trade union institutions and leaders and the evolution of union political activities and collective bargaining. Special attention will be paid to the involvement of women and minority workers with unions.

256 Dispute Resolution  
Fall or spring. 3 credits.  
Examines third-party participation in dispute resolution in private and public sector collective bargaining. Development of dispute resolution methods of American labor relations; issues and practices in neutral, binding arbitration of grievances and mediation; conciliation; and fact finding procedures will be discussed. We will also look at the extensive labor-management mechanisms to settle industry disputes.

257 Human Resource Administration  
Fall or spring. 3 credits.  
Designed to provide an overview of personnel practices in the modern organization. It will focus on manpower planning, employment, training, and development, motivation and compensation, and performance appraisal and communication for students who are currently supervisors or personnel practitioners or for those aspiring to those positions.

258 Organizational Behavior  
Fall or spring. 3 credits.  
Designed to expose students to the behavioral science theory that leads to research and how theory and research provide a basis for practical application in business, industry, education, and government.

259 Union Administration  
Fall or spring. 3 credits.  
Focus is on the principles and practices of effective union administration. Students will study the dynamics of democratic organizations and the development of organizational leadership. The course explores alternative methods of decision making and lines of responsibility. The legal obligations of unions and union officials will be discussed and analyzed. The course also examines the structure and evolution of relationships inside the labor movement.

262 Project Management  
Fall or spring. 3 credits.  
Through the process of restructuring, many companies reassess the hierarchy of management levels. This means that more responsibilities are shifting downward to employees who may not have the status (authority) of supervisor or manager, but who have the new responsibility of completing complex, critical projects within well-defined business constraints. In response to the shift in responsibility downward and with much more to be accomplished with limited resources, the demands for employees with effective project management skills are increasing. Employees who can successfully manage projects are and will continue to be the most marketable individuals in the workforce because their skills are transferable to all disciplines, organizations, and situations.

264 Contemporary Labor Problems  
Fall or spring. 3 credits.  
A survey of the major challenges that confront the American labor movement. Students are briefed on the background of each problem and discuss and analyze a broad range of solutions proposed by the experts.

266 Professional Writing: The Power of the Written Word in Business  
3 credits.  
Focuses on the importance of developing effective writing skills and strategies required to be successful in business communities. Students will sharpen existing writing skills, correct bad writing habits, and develop new writing habits through "real life" exercises taken from case studies and their own experiences. In addition, they will learn the importance of using rhetorical strategies such as defining situations requiring written responses, writing to a specific audience, and varying tone and style as the situation demands. Students, upon completing this course, will have the confidence and the writing skills to successfully address most situations requiring written communication. Genres include memos, proposal letters, and reports.

267 Speaking and Listening for Business and the Professions  
Fall or spring. 3 credits.  
The overall objective is to equip participants with the skills and knowledge they need to speak and listen effectively. By the end of the course, students will be able to accurately listen to, and interpret oral communication, identify major causes of listening misunderstandings such as biases, distractions, emotions, etc., describe and employ techniques for overcoming those listening barriers, speak effectively in front of an audience; describe ways to build rapport with an audience; persuade an audience; use visual aids effectively; introduce speakers, make presentations, and speak extemporaneously.

269 The Evolution of Work in America  
Fall or spring. 3 credits.  
Examines the evolution of contemporary business operations. Discussion will focus on historical and present-day theories of work organization, changes in the workplace and workforce, and future trends. The relationship between businesses and the societies in which they exist, in both local and global economies, will also be examined.

343 Health in the Workplace  
Fall or spring. 3 credits.  
Examines the state and federal laws that affect job safety, and health, and the way workers and their unions can use the law to promote safe and healthy working conditions. Topics include safety and health standards; the enforcement of laws and standards; the responsibilities of management; the rights of employees and their unions, including the rights to information; collective bargaining for safety and health; racial- and gender-based discrimination regarding hazardous work; and drug testing.

344 Unions' Strategies for Safety and Health  
Fall or spring. 3 credits.  
Examines how OSHA, the most effective tool for change in the unionized work environment remains the collective bargaining process and collective action. This course explores specific strategies for making the workplace safer through collective bargaining, workers education, safety and health committees, joint labor-management committees, working with OSHA, union-sponsored medical exams at occupational health clinics, and workers OSHA complaint procedures. Case studies will consider integration of occupational health initiative into broader union strategies such as organizing drives and industrial development planning.

345 Health Hazards Identification and Evaluation in the Workplace  
Fall or spring. 3 credits.  
Examines, through fieldwork, the health hazards that exist in the workplace and that the future will see. Students will learn about the many work site health hazards including toxic chemicals, biological agents, radiation, and electromagnetic fields. Routes of exposure, acute and chronic health effects, and the bases of regulatory exposure limits such as TLV's and OSHA PEL's will be discussed. Basic hazard evaluation and information gathering techniques will familiarize students with available resources for evaluating work site conditions.

346 Introduction to Industrial Hygiene: Hazard Evaluation and Control  
Fall or spring. 3 credits.  
This course builds on the knowledge acquired in both the safety hazard and health hazard courses to provide students with greater mastery of hazard evaluation and control methods. (Students are encouraged to complete the health hazard and safety hazard courses before taking this course.) It will provide practical, hands-on training in evaluating potential worksite hazards.
Students will learn about environmental monitoring methods such as air sampling and become familiar with the commonly used equipment. They will also learn to interpret and evaluate monitoring data provided by professional testers.

**347 Safety Hazards Identification and Evaluation in the Workplace**

Fall or spring. 3 credits.

Safety hazards (as opposed to health hazards) generally involve harm of an immediate and sometimes violent nature; health effects include burns, electrical shock, broken bones, and the loss of limbs, eyesight, or hearing. With chemicals, the primary concern is their explosive, reactive, or flammable nature rather than with the toxic effects that are the focus of health hazard evaluation. Students will become familiar with site inspection and hazard identification methods and will learn about control techniques appropriate for a variety of work settings.

**384 Labor, Government, and Politics**

3 credits.

A survey of the ways the American political system affects labor and how organized labor affects the system through voting, political parties, and interest groups.

**387 Safety and Health in the Workplace**

Fall or spring. 3 credits.

To provide basic education and training in workplace safety and health. The course will focus on applicable federal and state laws, standards for safety and health, industrial hygiene, and such health concerns as asbestos, radon, and AIDS. Practical experience will be provided through workplace walk-through safety and health inspections and in use of industrial hygiene equipment that measure noise, temperature, humidity, airflow, and airborne toxics.

**FACULTY ROSTER**

Abowd, John M., Ph.D., U. of Chicago. Prof., Labor Economics

Angellotti, Jon E., MS candidate, Cornell U. Social Statistics

Baechler, Samuel, Ph.D., U. of Wisconsin. Jean McKelvey-Alice Grant Prof. of Labor Management Relations, Organizational Behavior

Bishop, John H., Ph.D., U. of Michigan. Assoc. Prof., Human Resource Studies

Blau, Francine D., Ph.D., Harvard U. Francis Perkins Prof. of Industrial and Labor Relations, Labor Economics

Boudreaux, John W., Ph.D., Purdue U. Assoc. Prof., Human Resource Studies

Boyce, George R., Ph.D., U. of Wisconsin. Prof., Labor Economics

Briggs, Vernon M., Jr., Ph.D., Michigan State U. Prof., Human Resource Studies

Bunge, John A., Ph.D., Ohio State U. Assoc. Prof., Social Statistics

Cook, Maria L., Ph.D., Univ. of Calif., Berkeley. Assoc. Prof., Collective Bargaining, Labor Law, and Labor History

DeCicco, Thomas J., Ph.D., U. of Waterloo. Assoc. Prof., Social Statistics

Dyer, Lee D., Ph.D., U. of Wisconsin. Prof., Human Resource Studies

Ehrenberg, Ronald, Ph.D., Northwestern U. Irving M. Ives Professor of Industrial and Labor Relations and Economics, Labor Economics

Farley, Jennie T., Ph.D., Cornell U. Prof., Extension

Fields, Gary S., Ph.D., U. of Michigan. Prof., Labor Economics

Hadi, Ali S., Ph.D., New York U. Prof., Social Statistics

Hammer, Tove H., Ph.D., U. of Maryland. Prof., Organizational Behavior

Hurd, Richard W., Ph.D., Vanderbilt U. Prof., Extension and Public Service

Hutcheson, Robert M., Ph.D., U. of Wisconsin. Prof., Labor Economics

Jakubson, George H., Ph.D., U. of Wisconsin. Assoc. Prof., Labor Economics

Kuruvilla, Sarosh C., Ph.D., U. of Iowa. Assoc. Prof., Collective Bargaining, Labor Law, and Labor History

Lawler, Edward J., Ph.D., U. of Wisconsin at Madison. Prof., Organizational Behavior

Lipsky, David B., Ph.D., Massachusetts Inst. of Technology. Prof., Collective Bargaining, Labor Law, and Labor History

Lounsbury, Michael, Ph.D., Northwestern U. Lecturer, Organizational Behavior

Milkovich, George, Ph.D., U. of Minnesota. Martin P. Gatherton Professor of Industrial and Labor Relations, Human Resource Studies

Ross, Philip, Ph.D., Brown U. Prof., Collective Bargaining, Labor Law, and Labor History

Salvatore, Nicholas D., Ph.D., U. of California at Berkeley. Prof., Collective Bargaining, Labor Law, and Labor History

Seeber, Ronald L., Ph.D., U. of Illinois. Assoc. Prof., Extension

Charles D. Cranton, assistant dean for alumni and international affairs
Gihan S. Fernando, assistant dean for student services
Richard F. Robinson, assistant dean for administration and finance
Nan A. Colvin, registrar

**FIND YOUR COURSES**

**LAW SCHOOL**

The primary function of the Law School is to prepare attorneys for both public and private practice who will render the highest quality of ethical and professional service to their clients and who will further legal progress and reform. The curriculum is designed to prepare students for admission to the bar in all American states and territories.

Ordinarily, a student who is admitted to the Law School must have a baccalaureate degree from an approved college or university. The course of study leading to the degree of Doctor of Law (J.D.) covers three academic years. Students may be admitted to a program of study leading to the degree of Doctor of Law “with specialization in international legal affairs.” The Law School also offers to a limited number of students an opportunity to earn both a J.D. degree and an LL.M. degree in international and comparative law.

There are combined graduate degree programs with the Johnson Graduate School of Management, the Department of City and Regional Planning of the College of Architecture, Art, and Planning, the School of Industrial and Labor Relations, the graduate divisions in economics, history, and philosophy of the College of Arts and Sciences, and the Université de Paris I (Pantheon-Sorbonne), as well as a special opportunity for highly qualified undergraduates in the College of Arts and Sciences to register in the Law School during their senior year.

Each year the graduate program of the Cornell Law School admits a limited number of students, generally all from abroad. The LL.M. degree (Master of Laws, Legum Magister) and the J.S.D. degree (Doctor of the Science of Law, Jurisprudentiae Scientiae Doctor) are conferred. A small number of law graduates may also be admitted as special students, to pursue advanced legal studies without seeking a degree.

For further information, refer to the Law School catalog, which may be obtained from the Office of the Registrar, Myron Taylor Hall.

**FIRST-YEAR COURSES**

**LAW 500 Civil Procedure**
Fall and spring. 6 credits. K. M. Clermont, B. J. Holden-Smith, J. J. Rachlinski, F. F. Rossi.
An introduction to civil litigation, from commencement of an action through disposition on appeal, studied in the context of the federal procedural system. Also, a detailed consideration of federalism and ascertainment of applicable law; jurisdiction, process, and venue; and former adjudication.

**LAW 502 Constitutional Law**
Fall. 4 credits. K. A. Abrams, S. L. Johnson, G. J. Simson, I. P. Stotsky.
A study of basic American constitutional law, including judicial review, some structural aspects of the Constitution as developed particularly in light of the passage of the Civil War amendments, and certain of its rights provisions.

**LAW 504 Contracts**
Fall and spring. 6 credits. R. A. Hillman, R. S. Summers.
An introduction to the nature, functions, and processes of exchange, contract, and contract law. The course focuses on the predominant rules and principles governing contract and related obligation, including the substantive reasons underlying the rules and principles.

**LAW 506 Criminal Law**
Fall and spring. 4 credits. S. P. Garvey, D. N. Yellen.
An introduction to the constitutional and other legal issues posed by the modem administrative state. Topics include: procedural due process, separation of powers, procedural modes of administrative policymaking; judicial review of agency action, the oversight and control relationships between agencies and Congress or the President. The course provides a working familiarity with the fundamentals of administrative procedure, as well as a larger inquiry into the role of agencies in our constitutional system—and the effect of legal doctrine on shaping that role.

**LAW 508 Legal Methods**
Legal methods is a full-year skills course designed to introduce first-year students to the techniques and logistics of oral advocacy in a courtroom setting. Instruction occurs in small sections of approximately 30 students and in individual conferences. Each student receives extensive editorial and evaluative feedback on each written assignment.

**LAW 512 Property**
Spring. 4 credits. G. S. Alexander, E. Sherwin.
An investigation of the law’s protection of ownership, including the beginnings of property, legal and equitable estates, concurrent ownership, and public and private regulation of land use.

**LAW 515 Torts**
An introduction to the principles of civil liability in the tort field: intentional wrongs, negligence, and strict liability. Attention is also given to the processes by which tort disputes are handled in our legal system.

**UPPERCLASS COURSES**

**LAW 602 Administrative Law: The Law of the Regulatory State**
Fall or spring. 3 credits. C. R. Farina, J. J. Rachlinski.
An introduction to the constitutional and other legal issues posed by the modern administrative state. Topics include: procedural due process, separation of powers, procedural modes of administrative policymaking; judicial review of agency action, the oversight and control relationships between agencies and Congress or the President. The course provides a working familiarity with the fundamentals of administrative procedure, as well as a larger inquiry into the role of agencies in our constitutional system—and the effect of legal doctrine on shaping that role.

**LAW Advanced Civil Procedure**
3 credits. Offered as a seminar in 1999-2000.
A study of complex civil litigation involving multiple parties and multiple claims. Topics include joinder of parties and claims, impleader, interpleader, class actions, and intervention. Consideration of case management, the Civil Justice Reform Act of 1990, multdistric transfers in the federal courts, and the use of alternative procedures for disposition of cases.

**LAW 604 Alternative Dispute Resolution: Mediation as a Nontraditional Approach to Litigation**
Fall. 2 credits. Limited enrollment. J. Meyer.
This seminar will emphasize mediation as a nontraditional, cutting-edge alternative to the traditional litigation process. The seminar will introduce students to the spectrum of ADR processes, but will emphasize mediation as both a concept and a set of skills. The process of mediation will be explored through readings, videotapes, simulations, and role-playing exercises.
LAW 606 American Indian Law
An examination of the primary themes and materials of the federal law concerning Native American tribes and individuals. The course devotes considerable attention to the historical development of law and policy in that area and to the present division of authority over Indian country among federal, state, and tribal governments.

LAW 609 American Legal History: From the Revolution to the Civil War
Fall. 3 credits. S. Cohen.
This course focuses on the development of American law in the century from 1760 to 1860. Transitions in the legal ideology of the period will be examined, including the reception of the common law in America, the influence of the American Revolution on beliefs about the nature of law, shifts in forms of legal reasoning, changes in the legal profession, and the rise of the codification movement. In turn, resulting changes in legal doctrine in such areas as property, contract, tort, and property will be studied for their impact on private and public economic activity.

LAW 610 Antitrust Law
Spring. 2 or 3 credits. Students who have taken an antitrust course in the Paris Program may take this course for 2 credits. G. A. Hay.
A consideration of the basic antitrust rules enacted by Congress and amplified by the courts to protect competitive markets and limit the exercise of monopoly power. Price fixing, boycotts, and market allocation agreements among competitors; agreements between suppliers and customers; joint ventures; and a detailed study of the bankruptcy provisions of most general applicability. The relationship between the rights of an Article 9-secured creditor and the bankruptcy trustee's power to avoid liens. Related topics in the enforcement of money judgments and regulation of the business of banking, expansion through the bank holding-company structure, branch banking, interstate banking, and regulation of failing or failed banks.

LAW 612 Bankruptcy
Fall. 3 credits. Prerequisite: Students who have taken Debtor-Creditor Law are ineligible for this course. T. Eisenberg.
Selected topics in the law of bankruptcy. An overview of the various bankruptcy chapters and a detailed study of the bankruptcy provisions of most general applicability. The relationship between the rights of an Article 9-secured creditor and the bankruptcy trustee's power to avoid liens. Related topics in the enforcement of money judgments and the law of fraudulent conveyance.

LAW 613 Civil Rights Legislation
Fall. 3 credits. Not offered 1999-2000.
This course examines the principal business, legal, and accounting issues in the purchase and sale of privately and publicly held businesses. Emphasis is placed on the negotiation, structuring, financing, and documentation of the most common type of combining transaction—the acquisition of assets of a privately held company. Among the legal issues considered are the business and other reasons for forming or buying a business, the forms of business combinations, directors' duties, successor liability, securities regulation, tax, and antitrust. Additional issues involving acquisitions of publically held companies (including hostile takeovers) are studied principally for comparison. The responsibilities of transactional lawyers to persons other than their clients are also assayed.

LAW 615 Children, Parents, and the State
Spring. 2 credits. L. Teitelbaum.
This course explores legal and social understandings of the rights of children, parents, and the state with respect to issues such as access to and control over the content of education, authority regarding health care, claims to speech and expression, and procreative decisions. The course also examines the operation of rights in connection with juvenile court jurisdiction over neglect and abuse, delinquency, and status offenses.

LAW 616 Commercial Law
Fall. 3 credits. W. F. Taylor.
Examines a variety of commercial dealings and focuses on Articles 2 and 3 of the Uniform Commercial Code, with some procedural requirements for qualifying for copyright protection, then provides an in-depth study of the rights granted to authors under this law, the standards for judging copyright infringement, public policy
limitations on the scope of copyright interest (such as the fair use defense), and remedies available to successful litigants. Issues raised by new information technologies and recent amendments addressing them receive special attention. Partly as an aid for understanding United States law better and partly because copyright law is of increasing international importance, the course also provides some comparative and international copyright law components. In addition, it touches on issues of trademark and right of publicity law as they overlap or complement copyright.

LAW 625 Corporations
Fall or spring. 4 credits. F. S. Kahn, J. R. Macey.
An introduction to the business corporation laws affecting the rights and roles of corporate boards of directors, senior executive officers and shareholders, with an emphasis on large, publicly traded firms. Shareholders' economic interests are examined from the perspective of limited liability and dividend standards, expectations of transferability of shares and the use of debt capital as a mode of financing corporate activity. Shareholders' limited participation rights in corporate decision making are examined from the perspective of state and federal rules governing shareholder voting and the disclosure of corporate information and the notion of managerial expertise (e.g., as evidenced by judicial application of the "business judgment rule"). The latter part of the course focuses on directors' and officers' fiduciary obligations to shareholders, examining the operation of these duties in a variety of settings and transactions. Issues relating to the roles and functions assumed by corporate attorneys (with respect to their clients) and the role of business corporations within society are also addressed. No previous business knowledge is assumed.

LAW 627 Criminal Procedure
Fall. 3 credits. J. H. Blume.
This course surveys the law of criminal procedure, with emphasis on the constitutional constraints that regulate the pretrial stage of the criminal process. More specifically, the course focuses on the law of interrogations and confessions, the admissibility of evidence, and on the right to counsel throughout all stages of the criminal process.

[LAW Current Topics at the Crossroads of Law and Finance [also NBA 551]]
Financial institutions of all kinds, whether they are formally known as insurance companies, banks, investment banks, mutual funds, or pension funds, invest money on behalf of clients in a wide variety of investment vehicles. This course will look at the way that these financial institutions are treated from both a legal and an economic perspective. Emphasis will be placed on the intersections between modern financial theory and legal analysis. Topics to be covered include insurance, bank regulation and reform, securities markets, investment banking, and pensions.

[LAW Death Penalty in America: A Survey/way]
The course will survey the law relating to the administration of the death penalty.

[LAW Debtor-Creditor Game]
3 credits. Prerequisite: Prior enrollment in Secured Transactions or Debtor-Creditor Law or concurrent enrollment in one of those courses and permission of the instructor. Limited enrollment. Not offered 1999-2000.
Advanced debtor-creditor law including Chapter 11 of the Bankruptcy Code, bankruptcy procedure, negotiation techniques, and case strategy.

LAW 630 Directed Reading
Fall or spring. 1 or 2 credits. A two-credit directed reading may also fulfill the second writing requirement. Arrange directly with instructor. See Law School Registrar.
An examination of a topic through readings selected by arrangement between the instructor and an individual student or group of students (not exceeding eight).

LAW 633 Employment Law
Fall. 3 credits. D. Avery.
Survey of major statutory schemes, constitutional principles, and common law doctrines that affect the employer-employee relationship in the public and private sectors, other than laws regulating union formation and collective bargaining which are covered in Labor Law. Topics covered include unjust dismissal, drug testing, free speech, privacy, and antidiscrimination in employment laws. In addition, the course will provide an overview of major statutory schemes affecting the terms and conditions of employment, such as workers' compensation, the Fair Labor Standards Act, and the Occupational Safety and Health Act.

[LAW Entertainment Law]
This course explores several areas within the broad field of entertainment law. Topics include contract law, labor, antitrust, the role of agents, personal and privacy rights, literary and music publishing, sound recordings, films, and television.

LAW 636 Environmental Law
Spring. 3 credits. J. J. Rachlinski.
The course surveys the major environmental law with a primary focus on federal statutes (CERCLA, RCRA, NEPA, the Clean Water Act, the Clean Air Act, and the Endangered Species Act). The course lays out the various governmental tools used to address the political obstacles to efficient regulation of the environment.

[LAW Estate and Gift Taxation]
This course surveys the three federal taxes imposed on wealth transfers: the estate tax, the gift tax, and the generation-skipping tax. The course uses a problem-oriented approach, with emphasis on the Internal Revenue Code, regulations, and other tax materials.

LAW 640 Evidence
Fall or spring. 3 credits. S. D. Clymer, F. F. Rossi.
The rules of evidence in civil and criminal cases with emphasis on relevancy, authentication, witnesses, experts, and hearsay. The course focuses on the Federal Rules of Evidence, with some attention to how they diverge from the common law.

LAW 641 Family Law
3 credits. M. A. Fineman.
Broadly understood, family law is the study of state imposed rules regulating intimacy and intimate relationships in society. Consideration of the legal regulation of intimate relations collapses traditional law school distinctions such as those drawn between "civil" and "criminal" or "public" and "private" mechanisms for controlling family life. The laws that affect family formation and dissolution are many and varied. They reach deep into our lives, influencing as well as being influenced by our assumptions and beliefs about what is "natural" and "normal." In this course we will use scientific and social scientific information to explicitly evaluate some of those assumptions and beliefs, and to call into question the appropriateness of a number of current state laws regulating families. We will examine the evolution of our society's understanding of and expectations for marriage, as well as shifts over the past several decades in the nature of and justification for state regulation of that institution. Substantial attention also will be paid to the social and legal consequences of marriage dissolution, including an examination of the imposition of a gender neutrality-gender equality model in the divorce context.

LAW 642 Federal Courts
Spring. 4 credits. Prerequisite: Constitutional Law and second semester of Civil Procedure. Students without such background should consult with instructor. C. R. Farina.
An intensive examination of the federal courts and their constitutional and statutory role in the federal system. The relationship of the federal courts with the other branches of the federal government and with the state, and the relationship between state and federal law. Case-or-controversy problems, the allocation of jurisdiction between state and federal courts, federal question and diversity jurisdiction of the district courts, and limitations thereon. The course is strongly recommended for anyone planning a judicial clerkship.

LAW 644 Federal Income Taxation
Fall or spring. 4 credits. Limited enrollment. T. Eisenberg, E. M. Jensen.
A basic course designed to develop understanding of tax principles and rules to work effectively with the Internal Revenue Code, regulations, cases, and other tax materials.

LAW 646 Feminist Legal Theory
Fall. 3 credits. M. A. Fineman.
This course provides an introduction to feminist legal theory. During the semester we will consider the historical stages, as well as current and emerging contexts, of feminist theory in law. There will be some comparison of feminist legal theory with allied intellectual movements such as critical race theory. The last part of the course will look at
applied feminist legal scholarship in the areas of (1) the economic subordination of women, (2) the sexual subordination of women, and (3) motherhood and reproduction.

LAW 647 Health Law
Fall. 3 credits. L. I. Palmer.
This course examines the role of law and policy in the health care industry. Students will be invited to take a "systems approach" to the study of the role of law in arriving at coherent policy solutions for a host of dilemmas facing a rapidly evolving industry. Students will be asked to consider if a particular statute, regulation, or judicially crafted legal doctrine is consistent with new developments or any public policy towards health care. Topics covered include: access to health care, purchasing health care, commercialism vs. professionalism, the antitrust challenge to professional dominance; changing institutional providers; and public and industry-sponsored quality control.

LAW 648 Injunctions
Fall. 3 credits. Prerequisite: Two semesters of Civil Procedure. Students without such background should consult with instructor before enrollment. Satisfies the first or second writing requirement. C. R. Farina.
The course integrates theory and practice in focusing on the availability and use of the injunction, an increasingly important remedial tool in both public-interest and private-sector litigation. Coverage includes the substantive and procedural prerequisites for obtaining interlocutory and permanent injunctions, permissible scope and timing, the types and incidents of contempt, and the duties of those enjoined. Special consideration is given to the use of the injunction as a remedial tool for federal courts in public law litigation. The substantial writing component involves several drafting exercises based on real case studies of recent injunctions requests.

LAW 650 Insurance
Spring. 3 credits. J. A. Henderson, Jr.
Insurance is an increasingly important tool for the management of risk by both private and public enterprises. This course provides a working knowledge of basic insurance law governing insurance regulation, risk classification; property, commercial, and liability insurance; and claims processes. The emphasis throughout the course is on the link between traditional insurance law doctrine and modern ideas about the function of private law.

LAW 652 International Business Transactions
3 credits. J. J. Barceló III
An examination of the unique legal features of business transactions across national boundaries. The first half of the course deals with the private law of international transactions. The topics covered include: choice of law in the U.S. and Europe concerning international sales; the U.N. Convention on the Interna-

LAW 653 International Commercial Arbitration
Fall. 3 credits. J. J. Barceló III, D. Ridgway.
A study of arbitration as a dispute resolution process for international trade and business disputes. The course addresses ad hoc and institutional arbitration, the authority of arbitral panels, enforcement of agreements to arbitrate, challenging arbitrators, procedure and choice of law in arbitral proceedings, and enforcement of international arbitral awards. The course gives attention to the international convention on the recognition and enforcement of international arbitral agreements and awards (New York Convention) and the UNCITRAL (U.N. Commission of International Trade Law) arbitral rules and model law. It will focus on commercial arbitration as an international phenomenon and not on arbitration under any particular national system.

LAW 655 International Human Rights
Spring. 3 credits. D. Wippman.
This course explores the development and effectiveness of international legal rules governing the conduct of a state toward people within its jurisdiction. Topics include the substantive norms of human rights, and their philosophic basis, the mechanisms for the protection of human rights, such as the United Nations, specialized agencies, international human rights commissions, and domestic courts; and current issues such as the doctrine of humanitarian intervention, the status of indigenous peoples, and human rights during armed conflicts, illustrated where possible through case studies of current situations.

LAW 656 Introductory Jurisprudence
Fall. 3 credits. Not available to students who have taken Legal Process. S. P. Garvey.
An introduction to contemporary schools of legal and political theory. The schools of legal thought examined include positivism, natural law, legal realism, legal process, and critical legal studies. The schools of political theory examined include liberalism, libertarianism, communitarianism, feminism, and critical race theory.

LAW 657 Issues in Professional and Organizational Ethics: Secrecy and Whistle Blowing
Fall. 3 credits. K. Clark.
This course explores the obligations facing persons who possess confidential information in a variety of legal contexts (e.g., lawyer-client relationships; government and corporate employment; trade secrets; and military information). It also examines the extent of and limitations on whistle blowing options available to lawyers and other professionals.

LAW 660 Labor Law
Spring. 3 credits. D. Avery.
A study of collective bargaining, including the process of union formation, legal regulation of strikes and other economic weapons, negotiation and enforcement of collective agreements, the duty of fair representation, and the relationship between federal labor law and local laws regulating the employment contract.

LAW 661 Law and Medicine
This course considers legal issues related to medical care and biomedical science. Topics include constraints on access to health care, organization and financing of health services, promoting quality of care in hospitals and outpatient sites, fraud and abuse in clinical practice and biomedical research, dilemmas engendered by therapeutic applications of new technologies, and pathways to reform of the U.S. health care system. Teaching materials will comprise a law and medicine casebook, and scientific literature.

LAW 668 Lawyers and Clients
3 credits. Satisfies the professional responsibility requirement. R. C. Cranton.
A survey and critique of (1) the law governing the practice of law and the legal profession’s norms concerning the lawyer-client relationship; (2) the social functions of lawyers; (3) the modes and patterns in which legal services are or are not made available to the public; and (4) ethical theory relating to lawyer role and conduct.
LAW 669 Legal Aspects of Foreign Investing in Developing Countries
Fall. 3 credits. M. B. Ndulo.

This course will study legal aspects of foreign investments in developing countries. It will seek to identify legal problems that are likely to affect a commercial investment in a developing country. Inter alia, it will deal with the public international law principles and rules governing the establishment by foreign businesses of various factors of production (persons and capital) on the territory of other states and the protection of such investments. Thus, the course includes a discussion of the following topics: economic development and foreign capital; obstacles to the flow of investments to developing countries; guarantees to investors and investment codes; bilateral treaties; nationalization; joint ventures; transfer of technology; arbitration; investment insurance; unfication of trade law; and the settlement of investment disputes.

LAW 670 Legislation
Spring. 3 credits. R. F. Balotti.

This course explores various theories of legislation by studying how statutes become a source of public policy, how judges interpret them, and how lawyers draft them. Drafting exercises are used throughout the course to determine the degree to which legislation can be used to reform law or to remedy particular social problems.

LAW 671 Mergers and Acquisitions
Fall. 2 credits. R. F. Balotti.

This course examines the principal business and legal issues in the purchase and sale of publicly held businesses. Emphasis is placed on the role of lawyers in the acquisitions of publicly held companies (including hostile takeovers).

LAW 672 Negotiation

This course is intended to develop methods and skills for negotiation practice: Approaches to negotiation strategy formation, preparation, and conduct will be explored through discussion of selected readings and through case exercises. Students will engage in four or more mock negotiations in situations that typically involve lawyers.

LAW 675 Patent and Trademark Law
3 credits. D. Bordewick.

This course examines federal patent and trademark law. For patent law, particular attention is given to the nonobviousness and novelty requirements; the interpretation of patent claims, the extent to which patent issues are resolved by courts rather than by juries; the doctrine of equivalents; remedies for patent infringement; and defenses to patent infringement claims. For trademark law, the course examines the various kinds of marks, symbols, product configurations, and packagings for which trademark and trade dress protection can be obtained; the need to establish secondary meaning; what constitutes likelihood of confusion; types of trademark infringement; remedies for trademark infringement; and defenses to trademark infringement claims. The course also briefly examines state trade secrets and unfair competition law. Approximately 60% of the class will be devoted to trademark law. We will not consider international issues.

LAW 678 Products Liability
Fall. 3 credits. D. Wippman.

Applications of products-liability doctrine and theory to a variety of problems drawn from or closely approximating actual litigation. An overview of the relevant case law, statutes, and administrative regulations, including the new Restatement, Third, of Torts: Products Liability.

LAW 680 Public International Law
Fall. 2 credits. J. R. Macey.

This course covers the federal rules relating to the public offering of securities, secondary market trading of securities, and the regulation of commercial banking, investment banking, and investment companies (mutual funds).

LAW 682 Remedies
Fall. 3 credits. E. Sherwin.

This is an overview of legal remedies and their origins; federal equitable remedies, restitution, and damages. The emphasis is on private rather than public law. A considerable amount of the course is spent on the nature and history of equity.

LAW 683 Securities Regulation and the Regulation of Financial Intermediaries
Fall. 2 credits. J. R. Macey.

This course covers the federal rules relating to the public offering of securities, secondary market trading of securities, and the regulation of commercial banking, investment banking, and investment companies (mutual funds).

LAW 685 Patent and Trademark Law Systems

Roman law has been the most influential legal system in Western legal history. The course will focus on selected areas of Roman property, contract, and tort law to demonstrate two basic aspects: (1) the distinctive characteristics of classical Roman law, which was largely jurists' law that was shaped by legal experts similar to modern law professors (as opposed to statutory or judge-made law), and (2) the continuing substantive and methodological influence of Roman law in modern civil law systems, including the major impact of Roman law on the unification process of European law. Roman case law is studied in English translation and compared with legal reasoning and solutions in contemporary European (e.g., German and French) legal systems. The course also demonstrates a number of direct and indirect influences of Roman law on Anglo-American law.

LAW 686 Social and Cognitive Psychology for Lawyers

In their short history, cognitive and social psychology have produced a rich understanding of how human beings think and how they interact with each other. It should therefore come as no surprise that these two fields have a number of applications to law. This course will explore some of these applications. Examples include: what effect common errors in judgment have on tort and contract law, how the perception of risk affects societal demand for regulation in environmental law, how organizational and group decision-making processes affect corporate governance, how social norms about fairness impede or
facilitate negotiation and dispute resolution; how biases in judgment influence litigation strategies; and what studies of conformity mean for the development of international human rights law. The goal of this course is to introduce students with interests in different areas of law to some general principles of human thought and social interaction that will be valuable to them in their future practice.

**LAW 684 Social Security Law: Work, Families, and Administrative Justice**
Spring. 3 credits. P. W. Martin.
The course will focus especially on how social security's benefits relate to employment, families and household composition and how its procedures address the challenge of adjudicating the massive numbers of benefit claims that arise each year. It will introduce the general features of the Social Security Act's entitlement, benefit formulae, and procedural rules; highlight those that pose the greatest difficulty to administrators and advocates; and survey current proposals for change.

**LAW 685 Sports Law**
The course traces the development of sports law in the United States. Particular attention is given to the relationship of sports with antitrust and labor law. Contemporary issues involving arbitration, collective bargaining, amateur athletics, agencies, sports, criminal law, and constitutional law are addressed.

**LAW 687 Supervised Teaching**
Fall or spring. 1 or 2 credits. A two- or three-credit supervised writing program may also fulfill the second writing requirement. Arrange directly with instructor. See Law School Registrar.

**LAW 688 Supervised Writing**
Fall or spring. 1, 2, or 3 credits. A two- or three-credit supervised writing program may also fulfill the second writing requirement. Arrange directly with instructor. See Law School Registrar.

**LAW 689 Taxation of Corporations and Shareholders**
Fall. 3 credits. Prerequisite: Federal Income Taxation. E. M. Jensen.
This course examines the federal income taxation of corporate structure and transactions involving alterations in structure, including the rules governing incorporation, dividends, redemptions, liquidations, divisions, and reorganizations.

**LAW 692 Trial Advocacy**
Spring. 4 credits. Prerequisite: Evidence. Limited enrollment. G. G. Galbreath.
This course is devoted to the study of the trial. Fundamental skills are taught in the context of challenging procedural and substantive law problems. Each stage of the trial is examined: jury selection, opening, objections, direct examination, cross-examination, impeachment, expert witnesses, child witnesses, summation, and pretrial. In addition to exercises every week on a particular segment of a trial, the student also does a full-day jury trial at the completion of the course. Video equipment is used to teach and critique student performances. There are a few written assignments.

**LAW 694 Trusts and Estates**
Fall. 4 credits. G. S. Alexander.
The course examines the process of gratuitous transfers of wealth and introduces the practice of estate planning. It surveys the basic law of property succession, including wills and intestate succession, the law of trusts, powers of appointment, federal transfer taxation, and trust investment. Certain recurrent policy problems are emphasized, including the problem of form of legal norms and the problem of collective constraints on private intention.

**PROBLEM COURSES AND SEMINARS**
All problem courses and seminars satisfy the first or second writing requirement. Limited enrollment.

**LAW 700 Advanced Civil Procedure**
Spring. 3 credits. B. J. Holden-Smith. A study of complex civil litigation involving multiple parties and multiple claims. Topics include joinder of parties and claims, impleader, interpleader, class actions, and intervention. There will be consideration of case management and Civil Justice Reform Act of 1990, multidistrict transfers in the federal courts, and the use of alternative procedures for disposition of cases.

**LAW 701 Advanced Criminal Procedure Seminar: Post-Conviction Remedies**
Fall. 3 credits. J. H. Blume. This seminar will explore various post-conviction remedies available to state and federal prisoners, including motions for new trial, state post-conviction proceedings, federal habeas corpus, and other extraordinary writs.

**LAW 704 Advanced Civil Procedure Seminar: Pre-Conviction**
This seminar starts where the course, criminal procedure, ends. Topics may include double jeopardy, restraints on the decision to prosecute, pretrial detention and release, pretrial delay, discovery and the obligation to disclose exculpatory evidence, the right to an impartial jury, jury selection, the right to confront witnesses and to present a defense, and sentencing.

**LAW African Americans and the Supreme Court**
Beginning with its first decisions related to the slavery question, the Supreme Court has at times aided and at other times hindered efforts to afford African Americans full citizenship. This seminar explores the relationship between blacks and the Supreme Court by examining the major Court decisions affecting African Americans and attempting to understand those decisions in their historical contexts. The course begins with a review of the background and meaning of the constitutional provisions pertaining to the status of blacks in the new nation and ends with an intensive look at Brown v. Board of Education.

**LAW 705 Advanced Legal Writing and Analysis**
This seminar will explore in some detail the principles of legal analysis and writing through the medium of various documents produced in representing a hypothetical client in civil or criminal litigation. Students will conduct the necessary research on an assigned legal issue and then prepare a series of documents in preparation of the client's case. Those documents will include a one-page memorandum, a client letter, and a trial brief or memorandum in support of a motion. Students rewrite each document after receiving written comments from Professor Williams and other students through collaborative editing exercises.

**LAW 707 American Legal Theory**
Fall. 3 credits. R. S. Summers. The fall 1999 topic for this seminar is the formality of basic types of legal phenomena such as criteria of valid law (for both publicly and privately made law), statutory rules, accepted methods of statutory interpretation, the principle of stare decisis and common law rules, adjudicative processes, limitations on judicial power to modify rules, and the formal characteristics of the legal system viewed as a whole. American law lacks appropriate formality in many important ways and a heavy price is paid for this. How does the law's formality and its distinctively underlining rationalities (general legal values) profoundly affect the overall content of law and its practice by lawyers in the American as well as other legal systems. Such formalisms and their rationales have as much or more of a claim to primacy as the essence of law than do problem-specific policies that also inform the law's content. In this seminar, there is about equal emphasis on practical skills and theory.

**LAW Appellate Advocacy**
Fall and spring. 3 credits. Prerequisite: Legal Methods or Practice Training 1 and 2. Year-long course. Not offered 1999-2000.
This course is designed to teach students the intricacies and nuances of appellate brief writing. Using the techniques taught in trial brief writing, students will write and rewrite an appellate brief for either the defense or prosecution. Students will read and digest the transcript and choose issues to research and potentially brief. After discussing the potential issues and research and basic appellate principles such as preservation, harmless error, and standards of review, we will turn our attention to the art of persuasion. Beginning with the first word of the Statement of Facts and issues presented, and ending with the last word of the Argument, appellate lawyers painstakingly choose each word to advance their arguments. The class will discuss in detail and practice writing each part of the appellate brief to see how each part can best meet this goal of persuasion. For instance, the Statement of Facts, perhaps the most important part of an appellate brief, will be treated as a story with a plot and sympathetic and unsympathetic characters. The class will discuss language and style and look at such details as word choice, sentence length and placement of "bad facts." The class will similarly dissect the Question Presented, Point Headings, and last, but certainly not least, the Argument.
[LAW] Civil Rights in Housing: Theory and Practice

Students will explore federal fair housing laws, history, and policies, while learning practical litigation skills. The seminar includes reading materials, class discussion, legal writing, and litigation exercises. The seminar material includes court-issued statutes, as well as literature and articles underlying fair housing rights in the United States. The policy literature will be selected from a broad political spectrum, and will be designed to provoke thought and encourage classroom debate. The legal writing assignments and the litigation exercises simulate work assignments common in a civil litigation practice. Students will draft three briefs on different issues at various procedural postures (injunction, summary judgment, and appeal). Additionally, students will complete six short litigation exercises, including developing a proof schema and discovery plan, designing a fair housing test, drafting an affidavit and correspondence in support of a motion, writing jury instructions and a special verdict, and planning a trial notebook.

[LAW] The Common Law and African Legal Systems

Spring. 3 credits. M. Ndulo.

This seminar will study legal systems in post colonial Africa. It will concentrate on the former British colonies. During the colonial period, the common law was imported into British Africa. As a result, these countries are now common law jurisdictions. The description is supported by the history of the countries as well as by current statutory guidelines. African countries, however, also retained African customary law as part of the legal system. The two systems of law operated alongside one another and interacted at various points. During the colonial period, the common law was considered superior to African customary law and became the dominant system of law. In today’s Africa, the two systems continue to operate side by side in very much the same way they did in colonial times. Conflicts between them have generated considerable interest among legal scholars. This seminar will consider the following issues: the introduction of the common law in Africa; nature of the customary judicial process; the nature of the plural system; areas of conflict between customary law and the common law in such areas as succession, land tenure, marriage laws, and gender. It will examine issues relating to constitutional law and governance. Contemporary Africa is engaged in efforts aimed at building democratic political systems that are responsive to the needs of African communities.

In this regard, we will examine such issues as constitutional arrangements in post-independence Africa, and constitutionality, good governance, and development aid.

[LAW] Comparative Legal Methods

Fall. 2 credits. Limited to LL.M. students. B. S. Williams.

This course will provide an introduction to the U.S. legal system and an opportunity for international LL.M. students to develop their legal analysis and writing skills through the completion of a series of writing assignments designed to teach the forms and content of legal analysis and expression common to American legal practice. The course will begin with an introduction to the structure of the U.S. legal system, including information on the nature and function of the state and federal governments and the structure of the American court system. The course will also introduce the methods of research, and the legal writing and analysis skills, including an introduction to basic legal research tools and strategies. The course grade will be based on writing assignments.

[LAW] Constitutional Law and Political Theory

Spring. 3 credits. S. H. Shiffrin.

The purpose of this seminar is to explore theories of freedom of speech and theories of equality. How do freedom, equality, association, and community linked in doctrine, and how should they be linked? Neoconservative, liberal, radical, feminist, and Marxist writings are considered.

[LAW] Corruption Control

This seminar examines the factors that facilitate and inhibit public or private corruption and analyzes the wide variety of criminal, civil, and nontraditional approaches designed to control corruption and to promote governmental and commercial integrity.

[LAW] Critical Race Theory

This seminar will explore the relationship between critical understandings of the significance of race and legal interpretation. Of particular importance is the examination of how societal values and customs, expressed in legal rules purporting to address racial issues, inhibit critical approaches to the concerns of justice for disadvantaged groups.

[LAW] Dispute Resolution Techniques

A course offering students an opportunity to learn conflict management and dispute resolution techniques in negotiation, mediation, and arbitration of commercial disputes, usually in the intellectual property context. The course will be scheduled to take place on certain full weekends to be announced.

[LAW] Emerging Problems of Health Law

Spring. 3 credits. L. I. Palmer.

The delivery of health care presents problems on the frontiers of both law and medicine. These include whether legislatures should authorize physicians to assist the death of dying patients, whether our hospital systems are safe for patients, and the ability to make the system "safe" for patients. Students will study selected problems on the frontiers of law and medicine and prepare a seminar paper on a topic related to one of the emerging issues in health law or bioethics.

[LAW] Empirical Studies of the Legal System

Fall. 3 credits. T. Eisenberg.

This seminar guides students in their own empirical studies of the legal process. Students derive research topics from a variety of empirical sources and design and run their own computer programs. Sample topics may include evaluating patterns of punitive damages awards, use of jury perceptions in death penalty cases, evaluating the success rates and burden of Title VII cases, and studying products liability cases.

[LAW] Family Law Seminar

This seminar explores contemporary problems in equal-employment law. It focuses on legal issues involving Title VII, comparable worth, wrongful discharge, disability discrimination, age discrimination, and equal pay. Students are required to submit a paper as partial fulfillment of the requirements of the course.

[LAW] Employment Discrimination

Spring. 3 credits. W. F. Taylor.

This seminar examines the status and rights of ethnic, racial, religious, and national groups under international law, and considers the role of international law in developing an adequate response to intercommunal conflicts in Europe, Asia, and Africa.

[LAW] European Union Law

Spring. 3 credits. J. J. Barcelo III.

The course studies the EU treaty, institutions, and lawmaking processes; the direct effect, supremacy, and reception of EU law in the member states, the development of the four freedoms (goods, services, persons, and capital) fundamental rights doctrine, protection of the environment, and the EU antitrust law.

[LAW] Family Law Seminar

This course is designed to familiarize the student with the practical problems facing the practitioner in family law cases. Students participate in negotiating separation agreements, presenting oral arguments of motions, preparing a memorandum of law, and developing interviewing skills and client relationships. The philosophy of the family law practitioner and methods of dealing with clients involved in divorce, custody, and the
like are covered. The emphasis is on method rather than substantive law.

**LAW 722 Family Wealth Transfers**
Spring. 3 credits. D. Avery.
This seminar explores the development of the laws relating to property transfers in the context of both traditional and nontraditional family relationships. Readings from history, legal history, political theory, feminist legal theory, psychology, anthropology, sociology, and comparative law will provide a framework for evaluation of the ways in which modern American laws of property, contact, divorce, gratuitous transfers, taxation, and bankruptcy shape and are shaped by the formation, perpetuation, and disintegration of the family. Topics include community property, the Uniform Marital Property Act, constructive trust doctrine, common law concurrent interests, equitable distribution laws, and the laws affecting property settlements, cohabitation agreements, and premarital contracts.

**LAW 726 Federal Litigation Seminar**
3 credits. D. Borzideick.
This seminar is designed for students genuinely interested in being litigators. It explores the “real world” of civil litigation in federal court, from commencement of a lawsuit through termination by some means other than litigation. Attention is given to local rules; complaints; answers; discovery requests; removal issues; venue motions; preliminary injunction motions; summary judgment motions; nonparty discovery; sanctions, FRCP 26 disclosures and requirements; attorney-client privilege issues; and case-management procedures and orders. Throughout the course, the seminar endeavors to determine how one rationally litigates before frequently distracted judges pursuing their own agendas and against counsel evidencing little regard for the rules or the law. This seminar entails a very substantial quantity of written work.

**LAW Feminism and Gender Discrimination**
The seminar provides an introduction to feminist theory as it has emerged in legal scholarship and the social sciences. Several feminist legal theories are then used as a framework for analyzing a series of legal problems implicating gender. Among the problems discussed are sexual harassment, workplace conflict, divorce and child custody, surrogacy, abortion, rape, spousal abuse, and pornography.

**LAW 728 Foundations of Criminal Law**
Fall. 3 credits. Prerequisite: Criminal Law. S. P. Garvey.
This seminar examines various theoretical issues in the substantive criminal law. Among the topics to be discussed are the justification (if any) for punishment; the relationship between theories of punishment and political theory; the moral limits on the authority of the state to criminalize conduct; theories of excuse and justification in the criminal law; and the role of emotion and reason in the criminal law.

**LAW Health Care Reform**
This seminar addresses the role of law in structuring efforts to resolve problems of access, quality, and costs in health care. The focus is on the U.S. health care system but approaches of some other nations to comparable problems are briefly explored. Materials will include a health law casebook and selected readings from medical and health policy sources. During the later part of the semester students present their seminar papers to the class.

**LAW 731 Immigration and Refugee Law**
Fall. 3 credits. Prerequisite: Constitutional Law. S. W. Yale-Loth.
This seminar explores the evolving relationship between U.S. immigration policy and our national purposes. Immigration plays a central role in contemporary American life, significantly affecting our foreign relations, human rights posture, ethnic group relations, labor market conditions, welfare programs, and the public services of immigration policy. It also raises in acute form some of the most basic problems that our legal system must address, including the rights of insular minorities, the concepts of nationality and sovereignty, fair treatment of competing claims for scarce resources, the imperatives of mass administration, and reproductive discrimination. In approaching these questions, the course draws on a diverse historical, judicial, administrative, and policy materials.

**LAW 732 The Independence of Lawyers**
Fall. 3 credits. L. J. Fox.
No area of the law is more ferment than professional responsibility. Traditional models for the provision of legal services are being attacked by others from accountants to real estate brokers who wish to enter the field and who are asking, even demanding, that we dispense with many of our basic ethics rules. The standard litigation model is being attacked as too slow and too expensive and being usurped by alternative methods of dispute resolution. Old fashioned notions of loyalty to clients are being undermined by the economics of the practice of law. Traditional principles of confidentiality are being questioned as interfering with the search for the truth and the demands of effective law enforcement. Insurance companies are aggressively controlling the way legal services are delivered to their insureds. Our ethics rules are being asked to respond to such knotty issues as hate speech, discrimination, and pay-to-play. This seminar will give students an opportunity to explore in depth these and other “hot” topics which, one can predict, will simultaneously be the subject of headline-grabbing news stories (at least in the National Law Journal) as the course proceeds.

**LAW 733 International Criminal Law**
Spring. 3 credits. D. Wippmann.
This seminar will examine the evolution of modern international criminal law, from Nuremberg to the new International Criminal Court. Topics will include the nature and sources of international criminal law, jurisdiction, individual and state responsibility, and the organization of the legal profession.

**LAW 734 Introduction to French Law**
Spring. 3 credits. Prerequisite: Not available to students with significant knowledge of civil law system. C. M. Germain.
Introduction to the French legal system from a comparative law perspective, with a focus on civil law methodology and French legal institutions. Topics studied include French law sources and authorities, such as legislation, court decisions, and scholarly writings; the relationship between French law and the European Union; the French court structure in civil, criminal, and administrative law matters and its major procedural features; and the organization of the legal profession.

**LAW 735 Issues in Tort Law**
Spring. 2 credits. J. A. Sileccano.
The course explores some of the major theoretical and practical questions surrounding the tort system. The central inquiry focuses on the purported goals of tort law, their compatibility with each other, and the degree to which they are realized in practice. The course also examines a variety of substantive areas and considers various proposals to restructure tort law.

**LAW 736 Juvenile Justice Seminar**
Spring. 3 credits. N. Yellen.
This seminar examines the history, philosophy, and current issues involved in the separate juvenile justice system. Among the issues that may be considered are: the constitutional protections applicable to the juvenile justice process, the treatment of noncriminal misconduct, the role of the Juvenile Court, confidentiality, the roles of police, lawyers and social workers, and sanctions.

**LAW Labor Law Theory and Policy Seminar (also ILR 608)**
The U.S. collective bargaining system, which has its origins during the New Deal period, has come under intense attack. The intellectual premises of the system have been challenged by scholars on both the right and the left, and at the same time, the decline in the labor movement has undermined its political support. This seminar will look at the theoretical attacks on the New Deal collective bargaining system and at some of the current proposals for its replacement. Some of the topics to be discussed are: the theory of regulation embodied in the National Labor Relations Act and its critique, alternative conceptions of labor markets and their policy ramifications; and the emerging global economy and its ramifications for domestic labor regulation. There will also be discussion of alternative systems of labor regulation, such as found in West Germany, Sweden, and Japan.
LAW Law and Economics Seminar
Selected analysis of ways in which the law has incorporated, unwittingly or unwittingly, an economic perspective. A major topic is the Coase Theorem and whether the common law promotes efficiency, a second theme is whether such a common law is ethically appropriate; a third theme contrasts the efficiency of the common law with the marketplace for legislation. Prior study of economics is neither required nor disqualifying.

LAW 741 Law and Higher Education
Spring. 3 credits. Prerequisite: Constitutional Law or Administrative Law.
J. J. Mingle.
Higher education is a complex, idiosyncratic institution. Universities and colleges have a unique mission—teaching, research, and public service—and a uniquely challenging task of accommodating the various constituencies and organizations both internal (governing boards, faculty, students) and external (alumni, legislatures, courts, government agencies), that influence how they are managed and how policies are shaped. This seminar will explore the dynamic tensions, high expectations, and complex legal policy issues universities face in fulfilling their mission.

LAW 743 Law and Mental Health Seminar
Fall. 3 credits. H. R. Beresford.
The seminar explores issues at the interface of law and psychiatry. After an introduction to clinical and scientific aspects of mental illness, the seminar will address issues of autonomy, liberty, competency, coercion, and criminal responsibility as they relate to persons with disorders of behavior, cognition, or mood. Students write and present seminar papers on self-selected topics.

LAW 744 Law, Science, and Technology
Fall. 3 credits. Y. M. Cripps.
An examination of the interaction between legal principles and procedures and scientific research and development. Topics include the role of the law in regulating cloning, recombinant DNA research, sorcery, and in vitro fertilization; resolving the ethical, moral, and legal problems of cloning and its technical application; the role of widespread scientific advances in the creation of new legal issues, e.g., the question of liability for injury to persons resulting from the use of new technology. Students will be required to conduct research on the legal and ethical issues involved in the legal regulation of scientific research and development.

LAW 745 Law Through Literature
Fall. 3 credits. N. L. Cook.
This seminar, students use literature, supplemented by law texts, as a basis for understanding operations of law and the impact of legal process on people's lives. An explicit goal of the course is the acquisition of literary skills that can be cross-utilized in law school and the practice of law. Required reading will include works of metaphors and symbols, from SCOTUS to the O. J. Simpson jury. Real-life legal problems, as well as those simulated, will be used to illustrate and illustrate the operation of law in the real world. Readings will especially focus on the role of law in resolving the ethical, social, and economic debate that managed care has generated. Opponents of the trend have called for legislation to set standards for what insurers must provide. For instance, in response to "drive-through deliveries," legislation has been proposed to increase the number of hospital days for which patients may be reimbursed if they are still in managed care. The trend away from managed care is an example of the changing environment for health care in this and other industrialized countries.

LAW 756 Legal Aspects of Commercial Real Estate Development
Spring. 3 credits. J. E. Blyth.
Through the use of several written memoranda and one oral presentation, this seminar addresses considerations basic to commercial real estate development. It focuses on purchase agreements, options, rights of refusal, memoranda thereof, representations, and warranties. Additionally, there will be required of brokers and sellers, attorneys as brokers, notarial misconduct; conveyancing and surveys; commercial leases; conventional financing; conflicts between commercial tenants and institutional landlords; legal issues of title in conventional financing; title insurance; attorney opinion letters; and choice of real estate entity. About one-half of the course is devoted to commercial leases; conventional financing, and alternative to conventional financing (such as tax exempt financing and synthetic leases).

LAW Legal Information Systems
The seminar will address those qualities and effects of legal information databases which courses in legal research and the formal study of information retrieval do not. Whereas such courses and the disciplines from which they arise would see legal information systems as research tools or as corpora that form a backdrop for the study of computer science techniques, we will be interested in such systems as economic entities with particular importance to lawyers and their clients, and as phenomena that have a role in defining the activities and boundaries of lawyering. Why is one such database better than another? What combination of private and public actors provides the "best" system for the lawyer? What is the boundary between legal information and legal advice? What happens to the role of the lawyer when clients have access to a variety of differentially priced sources for legal information? What happens to the role of the client when clients have equal or better access to the letter of the law? What is the role of the lawyer in an environment in which clients can research and analyze legal information directly? The seminar will examine the legal, social, and economic phenomenon that have a role in defining the activities and boundaries of lawyering. Why is one such database better than another? What combination of private and public actors provides the "best" system for the lawyer? What is the boundary between legal information and legal advice? What happens to the role of the lawyer when clients have access to a variety of differentially priced sources for legal information? What happens to the role of the client when clients have equal or better access to the letter of the law? What is the role of the lawyer in an environment in which clients can research and analyze legal information directly? The seminar will examine the legal, social, and economic context in which legal information databases are used.

LAW Managed Care Seminar
Traditional fee-for-service indemnity insurance plans are being replaced by "managed care" as the dominant model of financing health care in this country. This seminar examines the role of law in this new context. It will focus on the role of law in managed care, the economics of managed care, the ethics of managed care, and the economic debate that managed care has generated. Opponents of the trend have
LAW 774 Selected Business
Transactions Seminar
Fall. 3 credits. Recommended prerequisites: Corporations. Z. J. Shulman. An in-depth look at initial public offerings and acquisitions from a practitioner's point of view. With respect to initial public offerings, the course will review the applicable statutory framework, pre-offering corporate preparations (such as the implementation of poison pills and stock option plans), the due diligence process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, selection of a trading forum (i.e., NYSE, NASDAQ, or AMEX) and the transaction closing. Regarding mergers and acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset), and corporate accounting issues i.e., antitakeover matters and fiduciary concerns, fiduciary duties, and crucial legal aspects of the acquisition, such as letters of intent, successor liability, continuity of employees and non-competition agreements.

LAW 777 Theories of Property
Fall. 3 credits. Prerequisite: Property. G. S. Alexander. This seminar explores the various ways that people have conceived of, or understood, property. The materials studied are eclectic and interdisciplinary. They include readings on slavery and property, women and property, community interests in property, as well as classical theories (libertarian, utilitarian, Marxian).

LAW 780 Transition to Democracy
Fall. 3 credits. I. P. Stotzky. The closing decades of the twentieth century can rightly be characterized as the era of democracy. During the 1970s, several southern European nations abandoned longstanding dictatorships and adopted democratic regimes. During the early 1980s, most Latin American nations repudiated their aged military dictatorships and instituted democracies. In the 1990s, another wave of democratization swept Eastern Europe and the Soviet Union, destroying the "Communist Empire." In nations undergoing this transition, economic, political, and social stability has not yet been fully achieved. The corporatist political and social structures have not yet been transformed to allow the vast, underprivileged majority access to the basic necessities that ensure a humane life. Institutional structures of public life, such as a representative legislative branch, a competent judiciary, and an executive branch that adheres to its constitutionally imposed boundaries, must be developed and stabilized. The rule of law—and thus the fundamental guarantees of due process—has to become an accepted, basic requirement of public life and private social interaction. In this seminar, we will examine the many complicated issues involved in the transition process. For example, we will look at the relationship among constitutionalism, democracy, human rights, and law. We will also discuss the role in the democratization process of cultural norms, human rights trials, economic development, and the international community.

LAW 778 United Nations, Elections, and Human Rights
Fall. 3 credits. M. B. Ndulo. The seminar provides a wide range examination of the current status of international protection of human rights with special emphasis on civil and political rights relating to elections and governance. Taking part in the conduct of public affairs is a basic human right increasingly enjoyed by people throughout the world. Universally, the right to take part in government is proclaimed and guaranteed by the Universal Declaration of Human Rights and the International Covenant on Civil and Political Rights and is recognized in many other international treaties and declarations. At times free and fair elections necessitate international assistance to countries to aid them in fulfilling international human rights standards, and efforts to facilitate minority political participation under the Constitution and the Voting Rights Act.

CLINICAL COURSES AND EXTERNSHIPS
All clinic courses and externships satisfy the second writing requirement. Limited enrollment.

LAW 781 Capital Punishment Clinic: Post-Conviction Litigation
Spring. 4 credits. Prerequisite: permission of instructor, Criminal Procedure or Criminal Law experience preferred. J. H. Blume, S. L. Johnson. Death penalty post-conviction litigation: investigation and the preparation of petitions, memorandums, and briefs. This course is taught as a clinic. Two or possibly three cases are assigned to each student. Students will be included in discussions regarding the necessary investigation and strategy for the cases.

LAW 782 Capital Trial Clinic
Spring. 6 credits. Prerequisite: permission of instructor, Criminal Procedure or Criminal Law experience preferred. J. H. Blume, S. L. Johnson. The issues are unique to a capital trial, with a focus on a specific capital trial and the issues it presents.

LAW 784 Government Benefits Clinic
Spring. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1 or Legal Aid Clinic 2. This course combines credit for both courses when combined with LA1 or LA3. B. Strom. The course has both a substantive component, in which a broad conceptual understanding of
a complex and controversial area of law and public policy is developed, and a live client clinical experience, in which clients present information on government benefits cases (social security, public assistance, food stamps, unemployment insurance, Medicaid, SSI, etc.) involving both the Tompkins County Department of Social Services, the N.Y.S. Department of Labor and the Social Security Administration. The course also includes a lawyering skills classroom component because students are simultaneously enrolled in Legal Aid 1 or 3 (see the descriptions below).

**LAW 785 Government Benefits Clinic/Neighborhood Legal Services Externship**
Spring. 6 credits. This course is a combination of government benefits and the Neighborhood Legal Services Externship and either Legal Aid Clinic 1 or Legal Aid Clinic 3 (6 hours combined credit for both courses when combined with LA1 or LA3). B. Strom.

The course is the same as government benefits except that the case-handling component involves handling cases for the ithaca office of Neighborhood Legal Services. See that description for additional details.

**LAW 786 Judicial Externship**
Fall or spring. 4 credits. G. G. Galbreath.

Students work with a trial court judge. Work involves courtroom observation, conferences with the judge, research and writing memora nda, drafting decisions. The emphasis is on learning about judges, judicial decision-making process, and trials. There are weekly class meetings with readings and discussions of topics related to the externship experience. While the primary focus is the student’s work at the placement, each student will also do the class presentations, a final project, and will meet individually with the faculty member.

**LAW 790 Law Guardian Externship**
Fall or spring. 4 credits. J. M. Miner.

Students will learn about the representation of children in abuse and neglect cases, juvenile delinquency proceedings, and PINS (Persons in Need of Supervision) cases through their placement at the Tompkins County Law Guardian office. Duties may include interviewing, investigating, drafting memora nda and motions, and assisting in trial preparation. Participants are required to attend the classroom component of Legal Aid 1, Legal Aid 2, or 3 (see descriptions below).

**LAW 791 Legal Aid Clinic 1**
Fall or spring. 4 credits. During the second and third week there may be a couple accelerated class sessions. Classes are managed by Legal Aid Clinic 1 students and all students in courses which include the Legal Aid 1 classroom component. N. L. Cook, G. G. Galbreath, K. Hessler, J. M. Miner, B. Strom.

Participants handle civil cases for low-income clients of the Legal Aid Clinic under the supervision of the clinic faculty. Students interview and counsel; investigate and analyze facts; interrelate substantive and procedural law with facts in the context of actual representation; develop a strategy to handle clients’ problems; identify and resolve professional responsibility issues; do legal writing; negotiate and settle cases; and represent clients at administrative hearings. Seminar classes develop interviewing, counseling, negotiation, and advocacy skills through the use of readings, videotapes, discussions, demonstrations, and simulation exercises.

**LAW 792 Legal Aid Clinic 2**
Fall. 4 credits. Prerequisite: Legal Aid Clinic 1 or a clinic course that includes the Legal Aid 1 classroom component. N. A. Cook, G. G. Galbreath, K. Hessler, J. M. Miner, B. Strom.

Students handle legal aid cases, participate in a classroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic’s clients in both federal and state courts.

**LAW 793 Legal Aid Clinic 3**
Spring. 4 credits. Prerequisite: Legal Aid Clinic 1 or a clinic course that includes the Legal Aid 1 classroom component. N. A. Cook, G. G. Galbreath, K. Hessler, J. M. Miner, B. Strom.

Students handle legal aid cases, participate in a classroom component, and help supervise participants in Legal Aid Clinic 1. Cases are handled as described in the course description for Legal Aid 1. Students represent the clinic’s clients in both federal and state courts.

**LAW 794 Legislative Externship**
Fall or spring. 3 credits. J. M. Miner, B. Strom.

The students work with the local New York State Member of Assembly. Work involves drafting legislation, tracking legislation for constituents, legal research and writing, responding to constituent requests that particularly require legal research or an explanation of law. The emphasis is on learning about the legislative process, drafting of legislation, understanding the reasons for statutory ambiguity, and developing various skills. There are several informal meetings with the faculty supervisor during the semester with group discussions related to the externship experience.

**LAW 795 Legislative Externship**
Fall or spring. 4 credits. Prerequisite: Legal Aid Clinic 1 or a clinic course that includes the Legal Aid 1 classroom component. B. Strom.

Along with case handling it includes a classroom component. (See Legal Aid 1, 2, and 3 course descriptions.) The classes are devoted to the development of lawyering skills and issues related to professional responsibility and the role of an attorney. Cases involve the representation of clients of a legal services program in the Office of Neighborhood Legal Services (NLS). In addition, each student will meet periodically with the faculty supervisor for review of the placement experience.

**LAW 796 Small Business Clinic**
Fall or spring. 5 credits. W. A. Kell.

Students will learn and apply a broad range of knowledge in business-related law, through participating in interdisciplinary teams of students assisting microenterprise entrepreneurs with legal and business needs, specifically child care programs. Faculty from the Law School, the Johnson School of Management, and College of Human Ecology will supervise teams of students from each of the above colleges and provide classroom teaching. Under such supervision, student teams will work autonomously to consult with and provide technical assistance to the child care entrepreneur. Critical questions include: what are the needs of small businesses for legal consultation in order to survive and thrive? How can professionals of different disciplines work together most effectively to assist small businesses, given the often interconnected nature of legal and business problems? What practices are most conducive to the creation of viable small businesses, enabling entrepreneurs to respond to often-conflicting consumer needs for high quality (but affordable) services? Readings will be drawn from areas of contract, tort, property, employment, and administrative law, as well as areas of business planning, entrepreneurship, and consumer issues. There will be weekly classroom sessions focused on substantive areas of knowledge, the development of client relationships, and ethical issues. Weekly team meetings will also be required for supervision. Guest speakers from each of the colleges will offer additional experiences for learning and discussion. Writing and research requirements are arranged. Students work on behalf of the client entrepreneurs, including the development of contracts, procedures, articles of incorporation, and other documents, as well as internal legal memoranda and business plans. Students will prepare legal memorandum and policy proposals for foreign governments and international organizations. The memorandum will be prepared in coordination with the Public International Law and Policy Group, a nonprofit organization that provides pro bono advice on issues of international law to governments, NGOs, and international organizations. Possible subject areas include minority rights, border treaties, citizenship and nationality disputes, state succession issues, and war crimes.

**LAW Religious Liberties Clinic**

Students work in teams on cases provided by organizations that handle Establishment and Free Exercise Clause cases. All students do substantial research and memoranda writing, and some may draft portions of briefs. To help ensure that students have the opportunity to take a case to completion (or at least to the next stage of litigation), this is a full-year course, with students required to register for both semesters for four credit hours and a grade at the end. Given the nature of litigation, demands on student time may be sporadic, and students should be prepared to do some work over intersession if court deadlines so require.

**LAW 797 Legislative Externship**
Fall or spring. 4 credits. Requires simultaneous enrollment with Legal Aid Clinic 1, Legal Aid Clinic 2, or Legal Aid Clinic 3 (4 hours combined credit for both courses when combined with LA1 or LA2). G. G. Galbreath, B. Strom.

Along with case handling it includes a classroom component. (See Legal Aid 1, 2, and 3 course descriptions.) The classes are devoted to the development of lawyering skills and issues related to professional responsibility and the role of an attorney. Cases involve the representation of clients of a legal services program in the Office of Neighborhood Legal Services (NLS). In addition, each student will meet periodically with the faculty supervisor for review of the placement experience.

**LAW Public International Law Clinic**
LAW 797 Women and the Law Clinic
Spring. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1, Legal Aid Clinic 3 (6 hours combined credit).
J. M. Miner
Students will represent women clients who have legal matters primarily in the family law area (divorce, custody, support, domestic violence). Students will also participate in the lawyering skills classroom component of Legal Aid 1 & 3. An additional class will focus on such issues as the impact of substantive law on women, the impact of legal institutions on women, professional role development, feminist lawyering methods, and other topics related to women and the law.

LAW 798 Youth Law Clinic
Spring. 6 credits. Requires simultaneous enrollment in Legal Aid Clinic 1 or 3 (6 hours combined credit). N. L. Cook
Students will work with groups of youth and service providers in a multifaceted approach to identifying and resolving problems of a legal nature. Under the supervision of faculty and community experts, clinic students will both handle individual representation cases and participate in nonlitigation project work such as community education, legislative advocacy, and meditative training. The emphasis of the course is on planning, communication, policy development, and nonadversarial problem solving.

NONPROFESSIONAL COURSE
GOVERNMENT 313 The Nature, Functions, and Limits of Law
Spring. 4 credits. Undergraduates only. R. A. Hillman
A general-education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of techniques for resolving conflicts and dealing with social problems. The course analyzes the roles of courts, legislatures, and administrative agencies in the legal process, considering also constitutional limits on their power and practical limits on their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process.

FACULTY ROSTER
Abrams, Kathryn J.D., Yale U. Prof.
Alexander, Gregory S., J.D., Northwestern U. Prof.
Avery, Dianne, J.D., Buffalo U. Visiting Prof.
Barceló, John J., J.D., Harvard U.
William Nelson Cromwell Professor of International and Comparative Law
Blume, John H., J.D., Yale U. Visiting Prof.
Clark, Kathleen J.D., Yale U. Visiting Prof.
Clement, Kevin M., J.D., Harvard U. James and Mark Flanigan Professor of Law
Clymer, Steven D., J.D., Cornell U. Prof.
Cramton, Roger C., J.D., U. of Chicago.
Robert S. Stevens Professor of Law
Cripps, Yvonne M., Ph.D., U. of Cambridge.
Visiting Prof.
Eisenberg, Theodore, J.D., U. of Pennsylvania.
Henry Allen Mark Professor of Law
Farina, Cynthia R., J.D., Boston U. Prof.
Finegan, Martha A., J.D., U. of Chicago.
Doreatha S. Clarke Professor of Feminist Jurisprudence
Fox, Lawrence J., LL.B., U. of Pennsylvania.
Visiting Prof.
Garvey, Erik P., J.D., Yale U. Assoc. Prof.
Edward Cornell Law Professor and Professor of Law
Green, Robert A., J.D., Georgetown U. Assoc. Prof.
Hay, George A., Ph.D., Northwestern U.
Edward Cornell Professor of Law and Professor of Economics in the College of Arts and Sciences
Henderson, James A., Jr., LL.M., Harvard U.
Frank B. Ingerson Professor of Law
Hillman, Robert A., J.D., Cornell U.
Edwin H. Woodruff Professor of Law
Holden-Smith, Barbara J., J.D., U. of Chicago.
Assoc. Prof.
Jensen, Erik L., J.D., Cornell U. Visiting Prof.
Johnson, Sheri L., J.D., Yale U. Prof.

Legal Methods Program
Anderson, Paige S., J.D. Cornell U. Academic Support Coordinator, Lecturer
French, David A., J.D., Harvard U. Lecturer
Grumbach, Carol, J.D., Cornell U. Co-director of Legal Methods Program and Senior Lecturer
Lecturer
Williams, Brian S., J.D., Indiana U. Co-director of Legal Methods Program and Senior Lecturer
JOHNSON GRADUATE SCHOOL OF MANAGEMENT

ADMINISTRATION
Robert J. Swierenga, dean
John A. Elliott, associate dean for academic affairs
Michael J. Hostetler, associate dean for executive education
Richard A. Highfield, associate dean for MBA Program and operations
Richard A. Shafer, associate dean for corporate relations
Susan K. Salton, executive director of marketing and corporate communications
Steven J. Sharratt, executive director of development
Natalie M. Grinblatt, director of admissions
Stephen F. Johansson, director of career services
Rhonda Velazquez, assistant to the dean

The Johnson Graduate School of Management prepares men and women for managerial careers in business. The school offers course work in many disciplines to provide potential managers with an understanding of the complexities of the professional world in which they will operate and of the organizations of which they will become a part.

A bachelor's degree or its equivalent is required for admission to the two-year program leading to the Master of Business Administration (M.B.A.) degree. Nearly half of the students have a background of undergraduate studies in arts and sciences, and about one-quarter in engineering. Five percent of the students begin their graduate training immediately after receiving their bachelor's degrees and the remaining 95 percent following work experience.

Combined degree programs allow highly qualified Cornell students to co-register in the school during their senior year, thereby earning a master's degree in less than the usual time.

The doctoral program, administered through the Graduate School, provides an advanced level of education in business for those who seek careers in teaching and research at leading universities.

More detailed information about these programs is available from the Office of Admissions and Student Affairs, Johnson Graduate School of Management, Room 111 Sage Hall.

Students in other graduate programs and undergraduate students registered with the university are welcome in many classes. Since matriculated MBA students require certain courses for graduation, non-Johnson School students are not allowed to pre-enroll. During the first week of classes, registration of non-Johnson School students occurs on a space available basis.

UNDERGRADUATE ONLY

NBA 300 Entrepreneurship and Enterprise
Fall, spring. 3 credits. D. BenDaniel.
This course uses Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies. Among the topics covered are valuation, business, planning, obtaining resources, management of growth, and cashing out. Guest lecturers speak on specialized topics such as corporate and patent law, bankruptcy and workouts, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures. For non-Johnson School students only. Johnson School students see NBA 564.

NBA 401 Entrepreneurship for Scientists and Engineers
Fall, spring. 3 credits. J. Nesheim.
This course is intended to introduce students to the new business startup process. Small teams will be formed to come up with an idea for a startup and create a business plan that can attract venture capital or other funding for the new enterprise. Guest lecturers are from successful high-technology companies. The course is led by instructors from Silicon Valley and Ithaca who created high-technology businesses.

COURSES FOR NON-JOHNSON SCHOOL STUDENTS

NCC 550 Financial Accounting
Fall, spring. 3 credits. Course intended for non-Johnson School students only.
Staff.
This introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis, the accounting cycle, financial-statement preparation, use, and analysis; revenue recognition and cost measurement; present value; and problems in financial-accounting disclosure. This course is similar in content to the MBA core course: NCC 500.

NCC 553 Marketing Management
Fall, spring. 3 credits. Course intended for non-Johnson School students only.
May not be offered 1999–2000. Staff.
The course addresses controllable and uncontrollable marketing variables that managers in multi-product firms face in today's business environment. Topics include customer behavior, product planning, distribution, advertising and promotion, pricing, and competitive strategy. This course is similar in content to the MBA core course: NCC 503.

NCC 554 Management and Organizations
Fall. 3 credits. Course intended for non-Johnson School students only. Staff.
This course takes a resource-based approach to management by arguing that organizations should link their strategy to their internal resources and capabilities. This theme is developed by addressing: (1) the strategic value of internal resources and capabilities, (2) the role of human resources and organizational behavior in formulating and implementing strategy, and (3) the importance of structure and the design of organizations in formulating and implementing strategy. Included among the topics are: how firms create sustainable competitive advantage through internal resources and capabilities, what the best practices are for managing people, what effects best practices have on attitudes and behaviors, why putting the customer first is not necessarily best practice from a resource-based perspective, why organizational culture is central to organizational effectiveness, why the formal organizational chart and structure of an organization are important, how organizations innovate, how organizations change through re-architecture and re-engineering, what firms gain and lose through pursuing core competencies, and what firms gain through strategic alliances and networks. The course makes extensive use of case materials. This course is similar in content to the MBA core course: NCC 504.

NCC 556 Managerial Finance
Fall, spring. 3 credits. Course intended for non-Johnson School students only. Staff.
This course introduces students to business finance through theory and case studies. Topics include stock and bond valuation, the capital-budgeting decision, portfolio theory, the asset-pricing models, raising capital, capital structure, mergers and acquisitions, costs of capital, option pricing, and risk management. International applications are considered within each topic area. Letter grade only, based on exam, group case reports, homework and class participation. This course is similar in content to the MBA core course: NCC 506.

NCC 558 Production and Operations Management
Spring. 3 credits. Course intended for non-Johnson School students only.
Prerequisites: NCC 501 or permission of the instructor. Staff.
Operations management deals with the problems of producing and delivering goods and services, topics that are of strategic importance in almost every organization. Production scheduling is a significant problem for manufacturing firms; smooth work flow and quality control are important in banking operations; inventory control is crucial in large retail establishments; and proper task sequencing is a major problem in the construction industry. The course deals with
these problems and others from a managerial viewpoint. The course is designed around managerial problems in the operations area. Students use case studies to improve skills in problem identification. This course is similar in content to the MBA core course NCC 508.

**NCC 500 Financial Accounting**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. D Souza, R. Libby.
An introductory accounting course that examines the subject from the viewpoint of users external to the organization. Topics include transaction analysis, the accounting cycle, financial-statement preparation, use, and analysis, revenue recognition and cost measurement, present value, and problems in financial-accounting disclosure.

**NCC 501 Statistics for Management**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. J. McClain, J. Thomas.
An introduction to decision making under conditions of uncertainty. Topics include descriptive statistics, probability theory, classical statistics, statistical decision theory, and simple and multiple regression analysis. Applications in finance, marketing and operations management are discussed.

**NCC 502 Microeconomics for Management**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. M. Waldman. Microeconomic theory is introduced and applied to problems faced by managers. Specific topics covered include supply and demand, consumer behavior, pricing when a firm has market power, and the role of contracts. The class employs a lecture format and emphasizes problem solving. Grading is based on a midterm and a final exam.

**NCC 503 Marketing Management**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Stayman, A. Ainslie.
The course is designed to convey the key concepts of marketing and how they fit into the larger context of management strategy and decisions. Both the practical “how” and the fundamental “why” of marketing activities are presented in the light of contributions from behavioral science, economics and statistics. The goals are to provide sufficient understanding for those who will need only to interact with the marketing function, as well as communication concepts and developing processes for understanding consumer behavior and how to devise strategies for further course work and future experience in marketing. The course makes extensive use of case materials.

**NCC 504 Management and Organizations**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. D. Sally.
If you think about it, stories are central to how we know and understand events, people, and facts, and to how we communicate knowledge and history. Most of the jobs you aspire to involve a particular form of story-telling—the CEO’s vision, the analyst’s report, the planner’s strategy, the salesperson’s pitch, the consultant’s analysis, and the manager’s brand. What distinguishes these as business stories is that they are often analytical (based on a set of objective facts and statistics) and reflect a deep understanding of the complex interactions of individuals and organizations. This course has two goals: 1) to make you appreciate the complexity of the issues that often arise in organizations, and 2) to develop and refine your analytical story-telling abilities. To achieve these goals, the course will be taught by the case study method. Cases are an efficient way to expand your experience base with respect to such issues as motivation, power, leadership, ethics, structure, design, and change. We hope to teach you how to make good inferences about what will and won’t work in particular situations, and how to learn from your own experiences and those of others.

**NCC 506 Managerial Finance**
Fall. 2.5 credits. Johnson School core course. Enrollment limited. R. Michael.
We address the issue of what type of investments should firms and individuals take on, and how these investments should be financed. Understanding these concepts is essential to financial managers and professional investors, and have important applications to many aspects of financial decisions all of us have to make on a daily basis (e.g., is getting an MBA a good investment?). The issues involve capital budgeting decisions, stock and bond valuation, how to assess and account for risk through the capital asset pricing model (CAPM), option pricing, capital structure and capital efficiency. Letter grade only, based on examinations, quizzes, group case reports, homework and class participation.

**NCC 508 Managing Operations**
Spring. 2.5 credits. Johnson School core course. Enrollment limited. Prerequisite: NCC 501 or permission of instructor. M. Leis, L. Pecoul.
This course focuses on managing processes: actions that convert inputs into outputs. Almost any business function can be modeled as a network of processes. The first part of the course examines processes, both individually and as part of a larger system; we see that good process design reflects both the volume and the variety of the product. A common course theme is the deleterious effect of variability on cost (supply, quality, or capacity) in complex systems. Queueing theory and simulation are particularly helpful for analyzing process capabilities. The second part of the course analyzes how goods and services are produced. After describing the strategic role of operations, we examine forecasting systems, inventory management and just-in-time, and logistic management. Constrained optimization models provide information about managing with finite resources. The full part of the course examines process improvement through quality and productivity management and corporate learning.

**NCC 509 Strategy**
Spring. 2.5 credits. Johnson School core course. Enrollment limited. B. Hermelin, V. Kadiyali.
Among the critical tasks facing any senior manager are the creation, implementation, and evaluation of a business unit’s strategy. This course seeks to provide the management student with the tools and frameworks essential to carrying out these tasks. Many of these tools and frameworks will be based on recent advances in game theory, industrial organization, and organization theory, although the course will also draw from the older business policy tradition as well. Students who successfully complete this course will be able to analyze industries, identify areas of strategic advantage and disadvantage, and devise strategies that exploit advantages and remedy disadvantages.

**NBA MANAGEMENT ELECTIVE COURSES**

**Accounting**

**NBA 500 Intermediate Accounting**
Fall, spring. 3 credits. Prerequisite: NCC 500 or the equivalent. B. Sanjuk, T. Dyckman.
The course is based on the essential concepts and terminologies of financial accounting introduced in the accounting core course. Students learn to evaluate financial statements through the use of case studies drawn from actual corporate financial reports.

**NBA 501 Accounting for Mergers and Consolidations**
Spring, first half of semester. 1.5 credits. Prerequisite: NBA 500 or permission of the instructor. May not be offered 1999-2000. R. Libby.
The course focuses on accounting problems related to equity financing, including leveraged restructuring, intercorporate investments, leveraged buyouts, consolidated reports, pro forma statements for a merger prospectus, and other related financial reporting problems. The method of instruction is lecture mixed with cases. Grading is based on the use of book exams. Course continues in NBA 508, Advanced Accounting, offered second half of semester.

**NBA 502 Managerial Cost Accounting**
Fall, spring. 3 credits. Prerequisites: NCC 500, NCC 501, and NCC 502, or the equivalent. R. Hilton.
The course is designed both for those responsible for internal accounting information and those who use such information for decision making. Topics include budgeting, accumulating costs for product costing, activity-based costing, standard costs, the
NBA 503 Strategic Cost Management
R. Hilton.
This course focuses on the role of cost management and related issues in helping a firm compete successfully in the global market. Topics considered include activity-based costing, activity-based management, value chain analysis, the lean enterprise, confronting competition in an industry dominated by lean enterprises, re-engineering, process value analysis, identification of non-value-added activities and costs, target costing, Kaizen costing, continuous improvement, time-based competition, cost versus quality, and benchmarking. The course is almost entirely based on cases, many of them lean enterprises in Japan.

NBA 504 Taxation Affecting Business and Personal Decision Making
Spring, first half of semester. 1.5 credits.
Prerequisite: NCC 500 or permission of the instructor. R. Bloomfield.
This course introduces students to the fundamental concepts and techniques of tax planning for individuals and businesses. Planning opportunities considered include changing the timing and nature of income, investments, and expenses; choosing an organizational form; constructing transactions that allow two or more parties to engage in tax arbitrage. The course also introduces tax research techniques and issues regarding tax compliance. Course continues with NBA 507.

NBA 505 Auditing
Spring. 3 credits. Prerequisite: NCC 500 or permission of the instructor. M. Nelson.
The course examines the process by which financial-accounting systems are audited. Topics include ethics, the meaning of audit reports, the legal liability of auditors, the study and evaluation of internal control systems, and various approaches for testing account balances. Problems, cases, and video simulations are used to illustrate concepts.

NBA 506 Financial Statement Analysis
Spring, first half of semester. 1.5 credits.
Prerequisite: NCC 500, NBA 500 (or concurrent enrollment) or permission of the instructor. S. Tasker.
This course develops a set of core skills essential to financial statement analysis. We will cover strategic ratio analysis, cash flow analysis, pro forma financial statements, financial modeling, credit analysis, bond rating and bankruptcy predictions, and firm valuation using discounted cash flow techniques. Emphasis is on practical applications. The course format is a combination of case studies and lectures. The lectures communicate subtler aspects of the material while the cases provide hands-on experience. There will be an examination.
Note: Students who have completed the 3-credit version of NBA 506 cannot enroll in this course.

NBA 507 Tax Implication of Mergers and Acquisitions and Other Special Topics
Spring, second half of semester. 1.5 credits. Prerequisite: NBA 504 or permission of instructor. R. Bloomfield.
This course examines special topics in tax planning for businesses, with particular emphasis on corporate restructuring, M&A transactions, reorganizations (mergers and acquisitions), and intra-entity transactions (transfer pricing issues). Readings include many current research papers examining how large corporations exploit their tax planning opportunities.

NBA 508 Advanced and International Accounting
Spring, second half of semester. 1.5 credits. Prerequisites: NBA 501 or permission of the instructor. J. D'Souza.
The course examines advanced topics in international taxation and international subsidiaries, including foreign currency translation, price level adjustments and international variation in accounting principles. The method of instruction is lectures mixed with case grading. Grading will be based on two exams and some written cases. Continuation of NBA 501, Accounting for Mergers & Consolid. (offered first half of semester).

NBA 509 Advanced Financial Analysis
Fall, second half of semester. 1.5 credits.
Prerequisites: NBA 506, a finance immersion course, or permission of the instructor. C. Lee.
This course builds on the core financial analysis skills developed in NBA 506. Topics covered include equity valuation, residual income models, quality of earnings assessments, earnings manipulation detection, market efficiency issues, fairness opinions in MBOs, and large sample stock screening strategies. The overall focus is on using accounting-based information to make investment decisions. Emphasis is on practical applications and special attention is given to cultivating analytical and communication skills. The course features both lectures and cases. There will be a group term project, but no final exam.
Note: Students who have completed the 3-credit version of NBA 506 cannot enroll in this course.

NBA 510 Cornell Equity Research
Fall, spring. 1.5 credits. S-U grading only.
Prerequisites: NCC 500 and NBA 506 or equivalent, and be taking (or have completed) NBA 506 or have permission of the instructor. S-U grades only. May not be offered 1999–2000.
R. Bloomfield.
Students write and revise equity research reports on companies that are neglected by analysts and preferably undervalued. Class work includes lectures and cases on equity research and valuation, presentations by guest visitors, and presentations by students who must persuade the class to approve their stock recommendations.

NBA 511 Financial Modeling
Fall, spring, second half of the semester. 1.5 credits. Prerequisites: NBA 506 or permission of the instructor, and mastery of basic EXCEL skills. S. Tasker.
Financial modeling is the art and science of constructing spreadsheet models of firms' future financial statements. In this class, we build on the brief introduction to financial modeling in NBA 506 by modeling the effect on the income statement, balance sheet, and statement of cash flows of complicated financial transactions such as leveraged buyouts, mergers/acquisitions, and corporate reorganizations. The class meets in the state-of-the-art Parker Center computer lab, and active student participation is emphasized.

NBA 512 Applied Portfolio Management
Fall, spring. 3 credits. Restricted. C. Lee.
An accounting/finance elective course that focuses on the management of an investment fund (see Charles Lee for a full course description). Students enrolled in this course must commit to taking the course for fall and spring semesters. They will receive three credit hours for each semester's work. Strong preference is given to second year MBA students who have successfully completed either NBA 506 or one of the finance immersion courses. Students need to apply formally. If the number of applicants exceeds 12, admission will be competitive and merit-based.

Economics

NBA 523 Business and Economic Forecasting
Spring, second half of the semester. 1.5 credits.
Prerequisite: NBA 506 or permission of the instructor. R. Highfield.
This course will focus on statistical and econometric approaches to forecasting business and economic data series that have a time dimension (time series). The course provides students with a toolbox of time series forecasting methods and teaches them how to choose the appropriate one. Topics will include the relationship of forecasting to decision making, univariate methods such as ARIMA modeling, and some multivariate methods such as transfer function, regression, vector autoregression and neural networks. Applications will usually involve the forecasting of business and economic data. Although statistical theory will be covered as necessary with lecture and supplemental class notes, the emphasis will be on applications and learning by doing. Passing the course requires participation in class discussions and satisfactory performance on both individual and group projects. There are no exams. There is no test for the course but students will be required to use the student version of a sophisticated econometric software package.

NBA 524 Macroeconomics and International Trade
Fall. 3 credits. Prerequisite: NCC 502 or equivalent or permission of the instructor. R. Lind.
The course applies basic macroeconomic theory to such problems as inflation, unemployment, economic growth, and productivity and examines how those problems interact with international trade and monetary policies. Students learn from national and international observers of national and international economic policy and discerning users of economic analyses and forecasts. A lecture/discussion format is used as the method of instruction.

NBA 527 Applied Economic Analysis (also ECON 616)
R. Frank.
This course will emphasize how economics analysis can help firms and individuals make the most of their opportunities. Of special interest to managers and consultants will be the course's focus on examples that illustrate how faulty economic reasoning leads to inefficient outcomes. The course will also emphasize strategic thinking, and will instruct students in the art of "economic naturalism"—the use of economic reasoning to understand and explain patterns of individual and firm behavior.

**NBA 529 Economics of Imperfect Information (also ECON 757),** 4 credits. Prerequisites: ECON 609-610 and 619. Not offered 1999-2000.

The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered will vary from year to year, subjects such as markets with asymmetric information, signaling theory, sequential choice theory, and search theory will be discussed.

## Finance

**NBA 540 Advanced Corporate Finance (Theory and Practice)**
Fall, spring. 3 credits. Prerequisite: NCC 506 or the equivalent. Students who took NBA 540 and/or NBA 548, 1.5 credit version, can not enroll in this course. H. Bierman.

This course is relevant for both investment banking and the treasurer's activities of an operating corporation. Most class sessions are lecture-discussion, but there are several corporate finance cases. The topics include common stock, preferred stock, debt securities (duration, convexity, inverse floaters, bond refunding, term structure, swaps), hybrids, security design, weighted average cost of capital, basic capital structure issues, cash distribution policy, and the buy versus lease decision. The use of debt to add value, mergers and acquisitions, corporate restructuring, LBO's and MBO's and Merchant Banking are also covered.

**NBA 541 Economic Evaluation of Capital Investment Projects**
Spring. 3 credits. Prerequisite: NCC 506 or permission of the instructor. B. Swamnathan.

This course deals with the evaluation of capital investment projects under uncertainty. The first part of the course focuses on traditional capital budgeting techniques using the discounted cash flow approach. This involves the estimation of cash flows, the treatment of risk and discount rates, the role of inflation and taxes, and the use of single factor and multi-factor asset pricing models in determining discount rates. The second part of the course focuses on the valuation of future investment opportunities of a firm using option pricing techniques. This includes issues such as flexibility options, options on real assets, evaluation of natural resource investments, and valuation of new product investments. The methods of instruction are lectures, case discussion, spreadsheet exercises, statistical exercises, and seminars by practitioners. Students are evaluated on the basis of participation, class exams, homework assignments, mid-term and final exams, cases, a project, and a trading game.

**NBA 542 Investments and Portfolio Analysis**
Fall, spring. 3 credits. Prerequisite: NCC 501, 502, and/or 506. Students with 506 comfort with quantitative methods. H. Li.

This course deals with several important issues pertaining to investments in securities markets. First, it deals with portfolio diversification theory, asset allocation, asset pricing models such as CAPM, APT, etc. and empirical anomalies such as size effect, January effect, etc. Second, the course deals with the issue of evaluating portfolio performance, mutual fund performance, etc. Third, it deals with investment strategies based on patterns in historical security returns. This may be loosely considered as similar to technical analysis. In addition, the course deals with investment strategies based on publicly available information related to accounting and other market statistics, the use of earnings forecasts, etc. This may be considered as falling under fundamental analysis. Finally, the course deals with frictions to trading imposed by the institutional structure of securities markets. The goal of this course is to train the students in the latest tools and techniques in portfolio theory, and familiarize them with the latest developments in securities market research and applications. This is a highly quantitative course involving extensive analysis of security market data using regression analysis and other statistical tools. Grades in this course will be based on mid-term and final exams, cases, a project, and a trading game.

**NBA 543 Financial Markets and Institutions**
Fall, spring. 3 credits. Prerequisite: NCC 506 (Finance core). M. O'Hara, W. Bailey.

This course applies principles of finance in order to understand modern financial markets. Central themes are the structure of financial markets, their pricing function, the interaction between financial markets and macroeconomic conditions, and the processes of innovation and regulation in these markets. We look at the workings of a variety of financial markets and develop an understanding of the different problems which different types of markets address. We study the question of market efficiency and the interaction between government policies and financial markets. We analyze issues of innovation and regulation with basic principles of financial economics. Throughout the course, we consider the relevance of these issues for the practical corporate, portfolio, or public sector decision-maker. The course includes ideas and evidence from academic research along with historical, institutional, and international perspectives. Recent events are used to illustrate concepts and develop analytic skills. Spreadsheet assignments and a term project requiring data analysis develop research skills and illustrate academic concepts. Exams consist of computational, short answer, and short essay questions.

**NBA 544 Bank Management**
3 credits. Prerequisite: NBA 543. May not be offered 1999-96. M. O'Hara.

The course provides an in-depth treatment of management issues in commercial banking. Topics include risk management, credit decisions and pricing, information problems, bank performance evaluation, international lending, and strategic planning. Students learn concepts through case studies and participate in a bank-simulation exercise.

**NBA 545 Corporate Finance**
Fall, first half of semester. Spring, second half of semester. 1.5 credits. Prerequisite: NCC 506. J. Zender.

This half-semester course will cover some of the more advanced topics in the area of corporate finance, including executive compensation, corporate governance, and bankruptcy law. The course will include lecture/discussion sessions in which the main ideas and the existing evidence (i.e., the theory and the empirics) will be presented and discussed. Cases will be used to illustrate the importance and applicability of these ideas and to provide "hands on" understanding of the material.

**NBA 546 Introduction to Derivative Securities**
Fall, spring. 3 credits. Prerequisite: NCC 506 (Finance Core) or permission of the instructor. C. Gulhal, H. Li.

The course introduces students to the pricing and hedging of derivative securities. The course briefly covers forward contracts, futures contracts, and swaps. The primary emphasis is on option contracts. Underlying assets include stocks, currencies, and commodities. Fixed income derivatives are covered in NBA 555. The method of instruction is primarily lectures, supplemented by guest speakers. A midterm and a final exam comprise roughly half the grade, with the remaining half determined by assignments and class participation. The course is a prerequisite for NBA 550, Advanced Topics in Derivative Securities.

**NBA 547 Applied Financial Engineering (also OR&IE 565)**
Spring. 4 credits. Prerequisites: NCC 506, NBA 546, NBA 555, NBA 542, OR&IE 523, OR&IE 523, COMS 211, permission of instructor. F. Diz.

This course is designed to integrate the students' course work in engineering (computing, stochastic modeling) and finance (options/futures and investment theory) through the completion of a project. The course project will be undertaken by student groups. It will involve the implementation of a financial model to a real world problem. Problems will come from the real issues facing the financial industry. The implementation will include model formulation, computer programming, data collection, and data analysis. The course format will be a mixture of lectures by faculty, industry professionals and students (project presentations).

**NBA 549 Managerial Finance Immersion**

This is a unique immersion course specifically designed for students planning to pursue finance careers in national or international companies. Some students interested in non-finance careers (including consulting) may wish to consider this course, but they should recognize that it is not specifically designed for this purpose. A major objective of this course is to help students make better-informed choices about how to launch their finance careers. The course will provide a high level of interaction with executives who work in the finance function in a diverse collection of non-financial corporations. These interactions will take place on campus, and in the facilities of the participating companies. A conscious effort will be made to have a very diverse sample of industries.
and company sizes so that students can appreciate how the financial functions of a company are affected by the size of the company, its internal culture, and the economics and technology of the industries within which it operates.

**NBA 550 Risk Management with Derivatives**
Spring. 3 credits. Prerequisites: NBA 546 and NBA 555 (NBA 555 can be taken concurrently). R. Guha.

This course explores advanced topics in derivatives and risk management. The first part of the course covers topics in derivatives and develops the tools necessary for analysis and the second part is their application to risk management. This course is intensive and demanding—about 90% more demanding than the Fall NBA 546 course.

**NBA 551 Current Topics at the Crossroads of Law and Finance**

This course explores a series of selected topics that intersect the issues in law and finance. The premise of the course is that financial institutions of all kinds, whether they are known as insurance companies, banks, investments banks, or pension funds, invest money and make decisions in a wide variety of settings. This agency relationship introduces a number of important dimensions to the intermediary-client relationship and this course will look at these issues from an economic and legal perspective. Emphasis will be placed on the intersections between modern finance theory and legal analysis.

**NBA 552 Cases in Corporate Finance**
Spring. 3 credits. Prerequisites: GCC 506 or the equivalent. Recommended: NBA 540. Course is limited to second-year MBA’s and Twelve-Month Option Students. Students who took NBA 553 and/or NBA 556, 1.5 credit version, can not enroll in this course. H. Bieman.

This course consists of discussions of corporate finance cases dealing with corporate financing, bankruptcy, merger & acquisition, and corporate bonds and forwards. It is first-hand experience with present case and critique a second. This is in addition to the normal class sessions. The cases in this course deal with mergers, acquisitions, valuation, corporate restructuring, LBO’s, M&A, merchant banking and the pricing of corporations. The material applies equally to careers in investment banking and managerial finance. The course does not deal with sales trading or the details of managing an investment banking firm. Several executives working in corporate finance will present cases.

**NBA 554 International Finance**
Spring. 3 credits. Prerequisite: GCC 506 (Finance core) or permission of instructor. W. Bailey.

This course applies principles of finance to the international setting. International finance is different in two basic respects. First, the existence of multiple currencies adds risk to investment and financing decisions. Second, when corporations and portfolio investors consider international investments, both the problems and opportunities arise. We focus on these issues and highlight how finance theory can be extended to address them. We start with basic principles of international finance, then apply them to a variety of problems. The course helps students to understand the ideas and research results of international finance and to adapt what they learn to the practical problems of the increasingly globalized business world beyond the classroom. The first part of the course outlines three basic themes: exchange rate volatility, barriers to international capital flows, and the value of international diversification. The second part of the course presents a variety of problems, examples, and applications from the three basic themes. These range from corporate finance applications of capital budgeting to portfolio management strategies. Spreadsheet assignments and a term project requiring data analysis development and the ability to interpret and present data. Exams consist of computational, short answer, and short essay questions.

**NBA 555 Fixed Income Securities and Interest Rate Derivatives**
Fall, spring. 3 credits. Prerequisites: GCC 506 (Finance core), GCC 501 (Quantitative Methods core), R. Jarrow.

This course is designed to study the pricing, hedging, and risk management of fixed income securities and interest rate derivatives. Topics to be studied include: the term structure of interest rates, interest rate swaps (caps, floors, collars), the risk structure of interest rates, credit risk spreads, and corporate bond valuation. The method of instruction is lectures and discussion, with computer illustrations an integral part of the class content.

**NBA 556 Immersion in Investment Banking**
Spring. 10 credits. Prerequisite: GCC 506, T. Dyckman, J. Hass, B. Hermaim, H. Li, L. Robinson, B. Swaninaathan, S. Tasker.

This course is specifically designed for those students planning to pursue careers in investment banking. The course is inappropriate for students interested in following a finance career in non-financial industry or non-finance careers (including consulting). This course is designed to meld the practical and the theoretical aspects of the field. We will be expecting a great deal of interaction and discussion between students, the participating faculty, and visiting practitioners. While the course is designed to make its students more attractive as candidates for employment in the investment banking profession, and we expect that some of the participating firms will be using their visits to identify candidates for summer internships, obtaining relevant summer internships remains the responsibility of the students.

**NBA 557 Case Studies in Venture Investment and Management**
Fall. 2 credits. Prerequisites: GCC 500 and GCC 506 or concurrent enrollment. W. Thomas.

A series of cases that focus on the venture capital investment process and on the subsequent management of such ventures. The primary perspective is that of the venture capitalist in assessing and evaluating information, preparing forecasts, assessing risks, developing the investment structure and terms, and deciding whether to invest. Cases also focus on management and financial problems, policy issues, and the relationship between venture capitalists and entrepreneurs. The course perspective is that of the entrepreneur and the techniques and skills employed in managing growing enterprises. Presentations by venture capitalists and entrepreneurs will supplement student discussion and analysis of cases. Grades will be based on written reports, quality of classroom participation, and a final exam.

**NBA 558 Corporate Financial Policy**
Fall, second half of semester. Spring, first half of semester. R. Zender.

This course will deal with frontier topics in corporate finance and investment strategy. The financial world is changing at an increasingly rapid pace. New corporate products are coming to the markets, and the financial structure of many corporations is becoming more and more complicated. Corporate financial officers and investors (such as money managers) need to know the driving forces behind the financial products (debt, equity, and more complicated products) to understand the products themselves. Understanding these issues will enable us to estimate firm values more precisely. The course objective is to enable you to better analyze financial situations you may encounter in the future, as well as firms’ valuation techniques.

**General Management**

**NBA 530 Entrepreneurship Lab**
Fall. spring. 3 credits. Prerequisites: NBA 564 Entrepreneurship, or concurrent enrollment, or permission of MBA students only. Letter/S-U optional grading. P. Sears.

Students will team up with entrepreneurs in the greater Ithaca area on defined projects, which will be integrated with the finance operations, such as production planning, new product launches, or assessing organizational structure. The goal of the course is for students to gain first-hand exposure to the application of functional knowledge in a start-up setting, while bringing real value to the host company.

**NBA 531 Startup Forum: Cornell Technologies with New Venture Potential**
Fall, spring. 1 credit. S-U grading only. M. Holsten.

The course will focus on research at Cornell, which may be a basis for new business ventures. It will address the fundamental ways in which university-based research differs from industrial research. Students will explore and critique the business potential of each concept.

**NBA 532 Venture Partnerships—the Corporate Business Development Role, Big Company vs. Emerging Company**
Spring. 1.5 credits. Letter/S-U optional grading. P. Sears.

In an era when large corporations are ‘downsizing’ and ‘outsourcing’ in order to save on fixed costs, and emerging companies are dependent upon strategic partnerships with large companies as part of their financing strategies, the business development executive can be found at the vortex of this activity. Priorities for the business development executive are distinctly different depending upon the size and history of the enterprise. This course, taught by a venture capitalist who has also served as a Corporate Development Vice President for a Fortune 100 Company, examines the mindset and skills of managers in business development jobs. A significant amount of attention will be paid to
planning and managing the merger and acquisition process, as well as key elements in negotiation of the strategic partnership. There will be several guest speakers, each an acknowledged expert in the field. Students will be assigned deal-making tasks in the context of a case study that will be the centerpiece of the course. Class dates will be announced. Students will be expected to have read the Big Pharm case study prior to the first class.

**NBA 559 The Venture Capital Industry and Private Equity Market**  
Spring. 5 credits.  S-U grading only.  D. BenDaniel, J. Reyes.  
This course focuses on the industry from the practitioners’ perspective. Topics include (1) an introduction to the private equity market focusing on the transactions that define the industry, its structure, participants, history and trends, (2) institutional private equity investing—now an increasingly important and dynamic part of the asset allocation mix, and (3) issues in private equity investing such as concentration in fewer, larger funds and the critical role of gatekeepers, consultants for limited partners. The course will involve lectures and a final paper. The course is given jointly by Professor David BenDaniel and Jesse Reyes, Director of Research of Venture Economics Information Services.

**NBA 560 Business Law I (also ARME 320)  
Spring. 3 credits. Limited to juniors, seniors, and graduate students. D. Grossman.**  
The course introduces the basic tenets of law as they apply to businesses and their operations. Topics include personal property, contracts, agency, real property, and landlord-tenant concerns. Text readings and case studies are used. All students intending to be professional accountants are required to take the course, and it is strongly recommended for finance students.

**NBA 561 Business Law II (also ARME 422)**  
Spring. 3 credits. Prerequisite: NBA 560 or permission of the instructor. D. Grossman.  
The first portion of this course examines legal issues in the formation and operation of business enterprises, particularly partnerships, corporations, and limited liability companies. The second portion of the course will review selected topics in business law, such as employment discrimination, secured transactions, product liability, unfair competition, and international business law.

**NBA 562 Estate Planning (also ARME 422)**  
Fall. 1 credit. S-U grading only. Limited to juniors, seniors, and graduate students. D. Grossman.  
Fourteen sessions on the various aspects of estate planning. The law and use of trusts, the law of wills, federal and New York State estate and gift taxes, and probate procedures are covered.

**NBA 563 Initial Public Offerings and Acquisitions**  
Spring. 3 credits. Letter/S-U optional grading only. D. BenDaniel.  
An in-depth look at initial public offerings (IPOs) and acquisitions from a practitioner’s point of view. With respect to IPOs the course will cover: the applicable statutory framework, pre-offering corporate preparation (such as implementation of poison pills and stock options), the IPO process, the implementation of corporate governance policies appropriate for a public company, the offering registration process, liability under federal securities laws, the Securities and Exchange Commission review process, underwriting arrangements, pricing, selection of a trading forum (e.g., NYSE, NASDAQ or AMEX) and the consequences of going public. Regarding acquisitions, the course will explore: financing alternatives, accounting treatment, due diligence, choosing an appropriate transaction structure (i.e., stock versus asset sale) and crucial aspects of acquisitions, such as letters of intent, continuity of employees, anti-takeover strategies, and non-competition agreements. Mr. Shulman is an attorney with experience in IPOs and acquisitions, and an adjunct professor at the Cornell Law School where he teaches a seminar course on this topic.

**NBA 564 Entrepreneurship and Enterprise**  
Fall, spring. 3 credits. D. BenDaniel.  
The course is a Cornell-developed case studies and lectures to address entrepreneurial management in start-up ventures and new-business development in existing companies. Among the topics covered are valuation of business, planning, obtaining resources, management of growth, and cashing out. Guest speakers speak on specialized topics such as corporate and patent law, bankruptcy and work-outs, leveraged buy-outs, and valuations of businesses. Students team up to write and present business plans. The course attempts to integrate marketing, finance, operations, and human-resource topics in the context of high-growth business ventures.

**NBA 567 Management Writing**  
Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, M. Hittleman, C. Rosen.  
Students learn to write clearly and effectively by focusing on the writing process as well as the finished product. Course topics include audience perspective, style, organization, strategy, and proofreading. There is a writing assignment every week. Students receive instructor and peer feedback. Priority is given to MBA students. Open to graduate students and employee degree candidates if there is room.

**NBA 568 Oral Communication**  
Fall, spring (sections offered in both first and second halves of semester). 1.5 credits. S-U grades only. B. Mink, A. Pike, C. Rosen.  
This course focuses on improving the presentation skills of management students. The course covers: (1) types of speaking formats (impromptu, extemporaneous, manuscript), delivery, organization, visual aids, and question-answer. Student speeches constitute the bulk of class time, with each student presenting seven or eight speeches in the seven-week session. The small class size allows for significant individual attention. Students receive feedback from classmates and the instructor, and have the opportunity to review in tutorials the videotapes of most of their presentations. Priority given to MBA students. Open to other graduate students and employee degree candidates if there is room.

**NBA 569 Management Consulting**  
Fall, spring. 3 credits. A. McAdams.  
This course is case-study oriented. It focuses on strategic consulting. It has multiple objectives. First, it provides students with the opportunity to understand the role of the consultant and to gain indirect experience in that role through dealing with a broad range of practical and real-world issues. Second, it helps students improve their analytic skills through practice with case studies. Third, it provides students with information that they are unlikely to gain in other courses, as well as experience in making group presentations and evaluating them. In addition, students are required to write a comprehensive analytic term paper.

**NBA 570 Leadership in Management**  
Spring (meets during winter break). 1.5 credits. MBA students only. S-U grading only. R. Peterson, RPW Executive Development and other Johnson School faculty.  
This course is a partnership with RPW Executive Development to provide MBA students with the self-awareness and interpersonal skills of effective leaders. The general principles of leadership course is NBA 668. RPW has partnered extensively with the Johnson School Executive Education Department in the past. The course consists of five full-day training sessions. Staff from RPW and Johnson School faculty will provide training. The first two days will focus on self-awareness and employ several experiential exercises and self-assessment instruments including, the Campbell Leadership Index (CLI), Meyers-Briggs Type Indicator (MBTI), the Fundamental Interpersonal Relations Orientation-Behavior (FIRO-B), the Kirton Adaptation/Innovation inventory (KAI), and the Ambiguity Preference Scale (APS). Class members will also be trained in giving and receiving feedback from team members and faculty. Mid-week activities will include various leadership and team challenges, including a business simulation. Attendance is required for all sessions. Priority is given to MBA students who have completed prior to the first day of class to allow for scoring and analysis.

**NBA 571 Cornell Management Simulation**  
Fall, spring. 1.5 credits. Restricted to second-year MBA students. J. Hass, S. Smidt.  
This computer-based simulation is played by self-selected teams of four students who make marketing, production, and finance decisions for one of five companies operating competitively in the same industry. After the first week, during which the rules of the simulation are explained and the software used by each team is demonstrated, the teams make periodic decisions (meeting at their own convenience). At the beginning of the simulation, each team writes a Strategic Intent paper and, before the results of the last decision have been determined, each team presents an in-depth analysis of its performance and its strategy for the future in a “Board of Directors” meeting. Letter grading only, based on the value created for the company’s shareholders (relative to other firms in the same industry), the team’s Strategic Intent paper, and the instructor’s evaluation of team’s performance at the BOD meeting. Students who have completed MBA
NBA 572 Environment, Economics, and Management Policy
Fall. 3 credits. Enrollment preference to Johnson School and other graduate students, others by permission. Johnson School's faculty, an experienced and OECD countries, and are growing in controls are of major importance in the U.S. and, the important role that business has affecting business and public decision making. It investigates the success achieved in the U.S., and the gas leak and the decision of AT&T to accept the division of its company in response to an antitrust suit filed by the United States government. Environmental and waste-management concerns are leading to new laws and regulations that will affect many aspects of business well into the next century, creating opportunities as well as posing problems. The course begins with a discussion of the political and economic foundations of business regulation. Students examine decision-making processes, including economic regulation, environmental regulation, antitrust, and product liability. Guest speakers include leading scholars from throughout the university and business and government leaders.

NBA 573 Seminar in Sustainable Development
Spring, first half of semester. S-U grading only. 1–3 variable credits. A. McAdams. This seminar-style course will involve readings and discussions of environmental management, and will also feature four significant outside speakers on the subject of environmental management. (Students interested in doing consulting projects in environmental management will be accommodated in NBA 575, Advanced Consulting.)

NBA 575 Field Projects
Fall. 3 variable credits. J. Russo. The course teaches how to frame unstructured business problems through a hands-on team project. Teams must identify what the central issues are, and then determine the most appropriate conceptual tools to provide insight into these issues. Students also learn to approach business problems from a cross-functional perspective. Specific conceptual content includes: project management, power politics, and personalities in work groups; managing in for-profit versus not-for-profit organizations; and organizational change. Field Projects is not classroom-based. Although there will be a few class sessions early in the semester, the course structure will revolve around (a) periodic reviews and (b) coaching sessions as needed. The instructor team will contain one regular member of the Johnson School's faculty, an experienced executive, and an administrator.

NBA 577 The Political, Legal, and Regulatory Environment of Business
Spring. 3 credits. Letter/S-U optional grading. R. Schuler. The political climate, laws, regulations and government arrangements for infrastructure have a profound effect on the operation, ownership, and profitability of business. Many of the most important decisions that top management makes are driven by political, legal, and regulatory considerations (e.g., the responses of Exxon to the Exxon Valdez oil spill and Union Carbide to the Bhopal, India, gas leak and the decision of AT&T to accept the division of its company in response to an antitrust suit filed by the United States government). Environmental and waste-management concerns are leading to new principles that have contributed to success for Corning Incorporated. The course will be taught from the perspective of the general manager of a major business unit.

NBA 579 Business Strategy
Fall, first half of semester. 1.5 credits. Enrollment limited to second-year MBA students only. J. Suwinski. A well defined strategy is essential for business success—describing where the business is going, how it's going to get there, and then providing a framework for making decisions along the way. Strategy is the responsibility of top executives of a company/ business, and the ability to formulate effective strategy is one of the key skills that distinguishes General Managers from functional managers. This course will focus on the process of effective strategy formulation from the perspective of the general manager of a business unit. This perspective also applies to consultants who work on business unit strategy. Corporate strategy and its interaction with business unit strategies will be discussed, as well as tools useful for industry and company analysis. Situational analysis will also be covered. This course will compliment the core strategy course, with emphasis on understanding and practicing frameworks that are useful in case-based interviews. The course will draw heavily on the instructors' experience developing strategy for numerous businesses at Corning Incorporated. Guest speakers from industry and strategy consulting firms and also from industry will present their approaches to strategy, and the analytic tools they find most effective in working on business strategy. Students will gain experience, via assigned cases, in analyzing business problems/opportunities, using the strategic process to formulate effective business strategies, and in presenting their recommendations in written form and orally in class. A major case write-up and presentation in a mock board environment at the end of the course gives students an opportunity to play the role of strategy consultants working on a real case.

NBA 580 Strategies for Global Competitiveness
Spring. 3 credits. A. McAdams. Initially, students examine the role of government in several private-market industrialized nations—Japan, France, Germany, the United Kingdom, and Italy—for lessons the United States might learn and use. They investigate the impact of each of those countries' government policies on the global competitiveness of the country's firms. Special emphasis is given to differential policies appropriate to each of a range of industries, from the mature to the high tech (including computers, telecommunications, and electronics), and to stages of development in each economy. Possible lessons are then tested for less developed countries that might include Venezuela, Mexico and newly emergent countries such as Singapore. Classes are run in a discussion format. This

International Management

NBA 576 The World Geopolitical Environment of Business
Fall. 3 credits. Letter/S-U optional grading. R. Lind. The geopolitical face of the world is changing at a pace that few could have envisioned even five years ago. The fall of communism, the institution of sweeping economic restructuring in the former Soviet Union, the move toward democracy with market economies in eastern Europe, the movement of Europe toward a unified economy, and the fluctuations with reform and its implications in China are just a few of the many examples of the changing world environment of business. The course provides students with a view of the fast-paced worldwide changes. Topics covered include developments in western and eastern Europe, the former Soviet Union, the Pacific Rim, Central and South America and the Middle East and the role and fate of developing countries in the world economy. Guest speakers include leading scholars from Cornell and other universities and leaders in business and government.

NBA 580 Strategies for Global Competitiveness
Spring. 3 credits. A. McAdams. Initially, students examine the role of government in several private-market industrialized nations—Japan, France, Germany, the United Kingdom, and Italy—for lessons the United States might learn and use. They investigate the impact of each of those countries' government policies on the global competitiveness of the country's firms. Special emphasis is given to differential policies appropriate to each of a range of industries, from the mature to the high tech (including computers, telecommunications, and electronics), and to stages of development in each economy. Possible lessons are then tested for less developed countries that might include Venezuela, Mexico and newly emergent countries such as Singapore. Classes are run in a discussion format. This
course can be used to fulfill the strategy requirement.

[NBA 581 Special Topics—Contemporary Development of Southeast Asian Economies
This course will analyze the patterns and processes of Southeast Asian economic development during the last three decades. The five plus two countries in the region that will be the focus of the course include Thailand, Indonesia, Malaysia, Singapore, the Philippines, Brunei and Vietnam. The topics will be divided into the following categories: Southeast Asian economic development, regional economic cooperation in Southeast Asia, and the financial crisis of the 1990's. The course will assess important factors and consequences of the region's development patterns and use international comparative analysis to explain the relative position and uniqueness of each country's performance. Evaluation will be based equally on the student's participation in class discussions and debates and on a term paper.]

[NBA 584 International Competitive Strategy
Fall and spring, first half of semester. 1.5 credits. Letter/S-U optional grading. This course can be used to fulfill the strategy requirement. J. Katz.
Focuses on the development of competitive strategies in the global environment—including the identification of internationally relevant strengths and weaknesses, the movement and use of resources to gain competitive advantage, and strategies to confront competitors, both domestic and multinational.

[NBA 585 Cross-National Management
Fall, second half of semester. 1.5 credits. Letter/S-U optional grading. J. Katz.
Focuses on the differences in managerial style across countries and develops skills to deal with these differences. Most of the material will be applicable to all countries, though specific countries will be highlighted each semester.

[NBA 586 Global Management Structures
Spring, second half of semester. 1.5 credits. Prerequisite: the new version of NBA 584. Letter/S-U optional grading. J. Katz.
Focuses on the control, communication and coordination systems within multinational corporations. Design and development of appropriate systems, to ensure enactment of corporate strategy will be addressed.

[NBA 587 International Mergers & Acquisitions
Spring. 1.5 credits. J. Hanks.
This course covers issues relating to mergers and acquisitions in an international context. Topics include business due diligence, pricing and negotiation and other important topics from both the buy and sell side. The course will use both lecture and case formats. Students will be evaluated on the basis of group and individual assignments and projects. The instructor for the course, Mr. Arthur Rosenbloom, is special partner and former chairman of the Board of Patricof & Co. Capital Corp, a New York City–based firm specializing in mergers and acquisitions, private placements, and valuations of going concern businesses for tax and corporate purposes. Patricof has offices in New York and Palo Alto, affiliates in London, Paris, Zurich, Madrid, and Munich and is part of Apax Partners, which includes Patricof & Co. Ventures, Inc., one of the world's largest international venture capital firms. He holds a bachelor's degree from Bucknell University, a master's degree from Columbia University, and a law degree from Cornell. He has taught a similar course at Columbia.

Beginning with the third meeting of the course, Mr. Rosenbloom will conduct the course via a video-teleconferencing link from New York City.

[NBA 589 Managing in Developing Countries
Fall, first half of semester. 1.5 credits. Letter/S-U optional grading. J. Katz.
This class centers on the unique features of industrialized and newly industrializing countries as hosts for multinational business operations. It is a case-based course; each class is spent discussing one or two cases. Topics include environmental variation and how to deal with it and concentrated national power structures and management approaches. We cover a large number of countries spread throughout the world. Students are responsible for providing in-class updates on the countries discussed. Grading is based on the country update presentation, a final case write-up, and class participation.

[NBA 592 Experience in International Management
Spring. 1.5 credits. S-U grades only. J. Katz.
The objective of this course is to combine classroom sessions and international experience to increase awareness of business environments outside the U.S. NOTE: participation in a faculty approved study trip is required to complete this course (fee charged). On trips, students will visit local businesses, subsidiaries of foreign multinational, government officials, local business school students, and others. Students must also attend two pre-trip meetings (1 1/4 hours each) and two Saturday meetings during spring semester (2 1/2 hours each). Those meetings will be used to present information on international business conditions, industrial structures, management styles and also, to develop cross-cultural skills. A final paper, integrating the material learned in the classroom with their experiences, will be required.

Management Information Systems

[NBA 600 Database Management
Database technology is the principal tool of bookkeeping, reporting, and auditing. It is also the primary infrastructure technology for all information systems. Not only is it critical to managing the information flow in modern organizations, it is also the building system for support managerial decisions. The course introduces the basic principles of management, design, and use of databases in organizations. Topics include: data storage and organization, data integrity, and concurrency control, retrieval and end-user languages, reporting and auditing, and the impact on the organization. Students design, create and use databases using various database management systems.

[NBA 601 Electronic Commerce
Spring. 2 credits. Letter/S-U optional grading. Course will meet for the first nine weeks of the semester. L. Orman.
Electronic commerce is the use of information technology in conducting commercial transactions and managing businesses over computer networks. It is a phenomenon that has captured the public attention because of its wide-ranging implications for businesses, markets, public institutions, and the general public. Electronic commerce involves a wide variety of interacting technologies such as communications, networks, databases, expert systems, and multimedia. It also impacts a wide variety of managerial issues. Electronic commerce created a new emphasis on information technologies and systems in management. It led to the development of new technologies and new combinations of existing technologies to support management. On occasion, it radically altered business practices and the role of management.

The students in this course will learn to conduct economic transactions and manage businesses on the Internet. All major technical and managerial issues will be covered through computer exercises on the Internet, and case studies and examples of businesses on the Internet.

[NBA 612 Imaging and the Electronic Age
Fall. 3 credits. D. Greenberg.
The advances of computer graphics, computer processing power, network bandwidths and video compression technologies are forcing the merger of the telephone, television and computer industries. The influence of these technologies has created paradigm shifts that will drastically change the way we communicate, how we are educated, the way we work, design, and in essence, how we will live in the next century. We are just beginning to fathom how these changes will influence our modus operandi and greatly modify our traditional patterns of behavior, both personal and organizational. Clearly, business and industry management will have to understand the implications of the advanced technology. This course will start by presenting historical technological advances that created major paradigm shifts for communications. Advancements in computer technology are emphasizing the fundamentals behind the increases in processing power, video and computer graphics capabilities, and network transmission will be presented. The latter half of the course will cover the effect of these scientific advances on many discipline-specific areas including photography, the film industry, the entertainment and animation industry, television broadcasting, publishing, as well as the computer industry itself. Sessions will be devoted to the social and legal issues rising from the rapid advances in electronic communications. In attempting to predict the disruptive changes of the future, it is best to understand the technological capabilities and their uses. Thus, students with technology or science backgrounds are preferred. Although no computer programming will be required, a working knowledge of computers is necessary. The course will be especially tailored to a business school and industrial concerns and will have interactive live demonstrations at the state-of-the-art laboratory of the Program of Computer Graphics. No prior knowledge in computer science is required.
[NBA 614 Managing in the Information Age]
Fall, first half of semester. 1.5 credits. Not offered 1999–2000. A. McAdams.
In this course we explore a topic that is just beginning to emerge: the implications of the explosion of the Internet and interactive multimedia communications for the way managers think and deal with business opportunities and the origins of the Internet and some of the forces that have led to its rapid development, noting along the way, why and how it has "blindsided us" as Andy Grove of Intel and Bill Gates of Microsoft candidly stated. We then look at how information is being used today in pioneering applications in organizations of various kinds, based, in part, on original case studies and on guest lecturers. Throughout the semester the student will be asked to identify new and innovative use of modern information technologies. The course itself will evolve—even in real time—with the developments in the field.

NBA 615 Information Technology to Manage Business
Fall. 1.5 credits (variable). S-U grades only. A. McAdams.
This course will rely on visiting speakers from several technology-based firms. The teachers will address how to manage the information technology function as a business and how to use IT to deal with business problems. Speakers will come from hardware companies, software companies, and other organizations dealing with large issues of managing the information resource. There will be assignments, with student groups interacting with speakers, and a short paper at the end of the course. The course will meet approximately 10 times during the semester for up to two hours. H-P, Intel, and other firms have indicated an interest in being involved.

Marketing

[NBA 520 Pricing and Strategy]
This course extends material introduced in the core microeconomics course, where the focus is on pricing decisions. The course is taught very much like the core microeconomics course; i.e., the course consists mostly of lectures and problem sets that utilize the ideas derivations. Students will also be exposed to computer-assisted market strategy simulations to evaluate the effects of competing strategies. Guest speakers from industry provide a view of the operational aspects of marketing strategy.

[NBA 623 Customer-Based New Product Development]
Fall, spring, first half of semester. 1.5 credits. Prerequisites: NCC 501 and NCC 503. Not offered 1999–2000.
The successful introduction of new products requires careful planning and systematic screening and testing. This course covers models and methods that are useful to managers in the development (e.g., specification of products and services) and marketing of new products. Heavy emphasis is placed on the measurement of consumer preferences. Students are required to complete a group project, consisting of a measurement instruction consists of a combination of lectures and discussion of cases and articles. Performance is evaluated primarily based on exams and the group project.

[NBA 621 Advertising Management]
Fall. 1.5 credits. Prerequisite: NCC 503 (Marketing core). D. Stayman.
The course is designed to give students an understanding of the advertising and promotion management process. It covers the components of a successful advertising campaign and helps students develop an appreciation of the issues involved in advertising planning and decision making. They also learn how recent social-scientific findings and theory can facilitate advertising management.

[NBA 622 Marketing Strategy]
Fall. 3 credits. Prerequisite: NCC 503 (Marketing core). V. Rao.
The course covers theoretical and practical approaches to the development and evaluation of marketing strategies for multiproduct firms. It considers various environmental orientations and constraints in developing and evaluating integrated marketing strategies for new and established products and services. Recent research results are applied to decisions on product-market boundary definition, resource allocation, product positioning, and competitive reactions. It includes selected current topics such as brand equity, acquisitions, and lead-user analyses. Students use case studies extensively to develop skills in strategy analysis and to enhance skills in assessing external threats and opportunities. They employ computer-assisted market strategy simulations to evaluate the effects of competing strategies. Guest speakers from industry provide a view of the operational aspects of marketing strategy.

NBA 624 Immerion in Brand Management
Spring. 15 credits. Prerequisites: NCC 500, 501, 502, 503 and 506. Restricted enrollment permission of the instructor required. G. Babbes.
This is a full-time program for the semester; students will not be able to take other courses concurrently. The course objective is to train students to think and act like brand managers, some of the best-trained and most upwardly mobile professionals in industry. It will provide students with a unique opportunity to begin integrative to the concepts, principles, and tools necessary to achieve success in brand management. While the course will focus on managing traditional consumer brands, high-tech products, services, and global branding will also be addressed. In-class methods will consist of: (1) academic and industry lecturers; (2) on-site visits with marketing and manufacturing professionals; (3) case and project discussions and presentations; and (4) a final brand management simulation. Course requirements will consist of: (1) extensive readings; (2) individual case write-ups and presentations; (3) group projects and presentations (including a capstone business plan development project); and (4) in-class exams. There will be considerable off-campus travel for field study. Note that this course is an approved substitute for both core courses, NCC 508 and NCC 504.

NBA 625 International Marketing
Spring, second half of semester. 1.5 credits. Letter/S-U optional grading. Recommended: NCC 505, J. Katz.
International Marketing is designed to train students to take a domestic product and expand it into international markets successfully. Market selection, international market research issues, and international marketing strategies are all discussed. The term project (actually submitted in three parts throughout the term) requires that students choose some product and develop a plan for taking it abroad. Each class includes cases, therefore, class preparation is essential. Grading is based on the term project, the final, and class participation. Core marketing provides a useful background, but is not a prerequisite.

NBA 626 Consumer Behavior
Spring. 3 credits. A. Isen.
Topics include factors that influence response to advertising of various kinds, purchase decisions, product perceptions, response to promotion, consumer satisfaction, and the basic methodologies for understanding consumer behavior.

NBA 627 Affect, Brand Equity, and Internet Marketing
Spring. 3 credits. A. Isen.
The course will focus on concepts central to brand equity, including brand association, brand perceptions, brand loyalty, relationship marketing and brand extensions and revitalization, with a special focus on the role of affect (feelings) in decision-making and thought processes that are fundamental to these and other concepts central to brand equity establishment, maintenance, and management. Additionally we'll cover the emerging area of internet marketing from the consumer perspective relative to brand equity, including consumer response to the internet as a medium and marketing channel.
[NBA 630 Policies for Marketing Channels]
Spring. 1.5 credits. Prerequisite: NCC 503. Not offered 1999-2000. V. Kadiyali.
Marketing channels are analyzed as a chain of interdependent and interlocking organizations that produce and deliver goods and services to various consumers. We will look at various aspects of these relationships, such as efficiency, conflict, incentives and government intervention. Instruction consists of lectures, cases and guest speakers. Evaluation is based on cases and a final project (presentation and write up) and on class participation.

[NBA 631 MARKSTRAT Simulation]
Fall. second half of semester. 3 credits. Prerequisite: NCC 503, V. Rao.
MARKSTRAT Simulation offers an opportunity for students to make various marketing strategy decisions in a realistic, dynamic, simulated, competitive environment. Students, working in teams, will manage a portfolio of a firm's products for several years (periods). They will learn how to make long term decisions (introduction of new products) and will deal with various cross-functional issues related to marketing management (e.g., research and development, product design, and budgeting). A major portion of the course will be devoted to an understanding of the basic concepts (e.g., competitive positioning, resource allocation, market segmentation and product design) on which the game is based and to a discussion of suitable methods of analysis of data generated in the game. Students, formulating an initial strategy statement and strategic marketing plan for their firm. This game has become quite popular in various schools of management that are perceived to be competitive to the Johnson School. Students will develop an initial strategy statement and strategic marketing plan for their firm.

[NBA 633 Internet Marketing]
Spring, first half of semester. 1.5 credits. S-U grades only. V. Rao, D. Stayman, V. Kadiyali.
This class explores the effect of the internet on marketing. The topics include an overview of the on-line industry, business models for the internet, advertising and promotions on the internet, marketing research on the internet, loyalty programs for internet marketing, and disintermediation or channel conflict resulting from internet distribution. The course will comprise industry speakers from Cendant, CSC, Netcentives, H-P, 1st USA, Catalina marketing, and Bausch and Lomb and others. Course requirements include write-ups on a subset of speakers, and a final report and presentation on an internet marketing issue of your choice. NBA 633 is restricted to MBA II's because the same information is available for MBA I's in the strategy core.

[NBA 635 Marketing Models]
Fall. 3 credits. Prerequisite: NCC 503. Not offered 1999-2000. V. Kadiyali.
Students learn how to use mathematical models to solve marketing problems. The objective is to develop students' skills in evaluating marketing models and implementing them in management practice.

[NBA 637 Direct Marketing]
The objective of this short course is to expose MBA students to selected contemporary issues in the area of direct marketing. In addition to providing an overview of the direct marketing industry and trends in database technology, the course will address major strategic and tactical issues in the management of direct marketing. The discussion will mainly consider the strategy of a marketer interested in employing the opportunities in direct marketing as an integral element of the marketing mix for a product/service. It will also address appropriate ethical concerns with direct marketing. To acquire a flavor of various practices in the industry, students will visit one or two direct marketing firms in New York City or its vicinity toward the end of the course.

[NBA 638 Analysis of Competitive Decision Making]
Spring. 3 credits. Prerequisite: NCC 502 (Microeconomics core course). V. Kadiyali.
This course brings methods of micro-economics analysis to competitive decision making. Specifically, we will address issues relating to optimal competitive decisions for a firm interacting with current and potential rivals. We discuss how firms can, by their choice of appropriate decisions, best signal to rivals their intentions and their degree of commitment to them. We also look at sustainability, flexibility, and correction of decision choices. Game theoretic perspectives are used to understand these concepts. The dimensions of competitive strategy that we look at include product proliferation, R&D and patent policies, choice of compatibility with existing products, bundling of products, investing in capacity, vertical integration, choice of channels of distribution partners, pricing, and pricing and other discount problems caused in the optimal choice and implementation of firm strategies when information is imperfect. Specifically, we look at issues of moral hazard and adverse selection, and how these issues affect firm choices of supply chains, choice of channel partners, etc.). Instruction includes lectures and cases. Student evaluation is based on cases, class participation and a final project. This course can be used to fulfill the strategy requirement.

[NBA 639 Data-Driven Marketing]
Fall. 3 credits. Ainslie.
Data-Driven Marketing will introduce the future brand manager or marketing consultant to the use of market data to evaluate and construct pricing and promotional strategies. The course will introduce new sources of data available on product purchases and consumers' reactions to the marketing environment. The course focuses on the practical use of popular data sources. Approximately 70 percent of the course will cover panel data on high-volume consumer packaged goods, and 30 percent will be devoted to direct or "database" marketing. The goal of this course is to introduce these new data sources and provide a solid foundation for the development of analytic tools. Examples are drawn from the consumer packaged goods industry. This course makes intensive use of EXCEL and the WINDOWS computing environment. The data has been extracted and organized for use in EXCEL. This allows the student to concentrate on learning modeling tools without a large investment in computing or data manipulation methods.

[Operations Management]

[NBA 641 Logistics and Manufacturing Strategy]
Spring. 3 credits. Letter/S-U optional grading. Prerequisite: NCC 508, ORIE 410, or permission of the instructor. L. J. Thomas.
The course is about supply-chain integration, which involves strategic management of the supply chain, from materials to customer. Students discuss operations strategy issues that are important to both manufacturing and service. The course emphasizes written and oral communication skills. About a fourth of the classes are spent on case studies, with small groups preparing analyses of them. There is one mid-term examination, but the majority of the grade is evaluated based on projects and class participation. There is an option of replacing some assignments with a "live case," a project with a local company.

[NBA 644 Quality Management]
Fall. 3 credits. Prerequisite: NCC 508 or permission of the instructor. Not offered 1999-2000. L. Robinson.
The theme of this course will be the design and improvement of products and processes. The topics to be covered within this survey course include: (1) principles of process improvement (the formal 7-step improvement process, quality tools); (2) process monitoring (statistical process control, process capability, Motorola's '6 sigma' program); (3) product design (the Kano model, customer satisfaction and delight, issues in survey design, quality function deployment (QFD), design and manufacturability); (4) product delivery and support (quality in service and administration, satisfaction guarantees, and customer loyalty); (5) process design and improvement (kaizen vs. business process reengineering, benchmarking, design of experiments); and (6) issues in implementing quality improvements. The structure of the course will emphasize hands-on learning of the principles and learning's from the course. The guest speakers and local plant tour will be supplemented with Harvard cases, several exercises (e.g., assuming the role of a Baldrige Examiner, finding and correcting the root causes of problems in a process) and homework assignments (to allow you to work through quantitative problems without any time pressure). A sizeable component of this course will be a group project, which applies the formal quality improvement process at a local firm.

[NBA 645 Product Development Practicum]
The course centers on developing a major new product for firms. It will involve training in creativity by a consulting firm and readings in product development. This course will provide the opportunity to learn from many different sources, consultants, faculty, and executives.
NBA 646 Managing Knowledge-Based Services  
Spring. 3 credits. Prerequisite: NCC 508. M. Lojo.  
This course is designed for students who plan to manage technical and high-skill service enterprises. We discuss the pros and cons of the "service economy" and examine the unique aspects of producing service products, focusing on high-end, high-value-added services. Although some consumer service examples will be included, the primary emphasis is on corporate and industrial services that occur between large firms, including technical, financial, and expert services. We will explore the use of traditional operations management tools and useful concepts that are more in-depth foray into the course topics. Students will have the opportunity, through homework assignments or projects, to make a more in-depth foray into the course topics.

Organizational Behavior  
NBA 663 Managerial Decision Making  
Fall. 3 credits. J. Russo.  
This course presents practical concepts from the behavioral sciences that can serve as guides to managerial action. Lectures, cases, and exercises are used to acquaint students with new perspectives on decision making, critical thinking, problem solving, and group processes. Taken together, these perspectives offer a trouble-shooter's guide to the uncertainty, complexity, and conflict in the business world.

NBA 666 Judgment and Negotiations  
Fall, spring. 3 credits. K. O'Connor.  
Judgment is the art and science of transforming perception into thought or opinion. Negotiation is the art and science of securing agreements between two or more interdependent parties. The purpose of this course is to understand the theory and processes of negotiations as it is practiced in a variety of settings. This course is designed to complement the technical and diagnostic skills learned in other courses at the Johnson School. A basic premise of the course is that while a manager needs analytical skills to develop optimal solutions to problems, a broad array of negotiation skills is needed for these solutions to be accepted and implemented. The course will highlight the component of an effective negotiation and teach students to analyze their own behavior in negotiations. The course will be largely experiential, providing students with an opportunity to develop their skills by participating in case studies and integrating their experiences with the principles presented in the assigned readings and course discussions.

NBA 667 Managing Intellectual Capital  
Fall, first half of the semester. 1.5 credits. B. Nelsen.  
As the twentieth century draws to a close, economies long based on manufacturing are giving way to those based on the management of information, the production of knowledge, and the provision of services. Hence, organizational profits will increasingly flow from intellectual rather than material capital. A firm's success will hinge upon the manager's ability to recognize and adapt to the unique challenges presented by managing intellectual capital. This course examines this shift in the business environment and its practical implications for managers. Topics addressed include (1) motivating and managing knowledge workers; (2) employee empowerment and self-managing teams; (3) organizational learning; and (4) leadership for innovation and creativity.

NBA 650 Semester in Manufacturing Management  
Spring. 15 credits. Enrollment limited; permission of instructor required. J. Bradley, D. Conway, J. Siwinski.  
This is a full-time program for the semester; students will not be able to take other courses concurrently. The course is concerned with the integration of technological, human-resource, logistical, and financial considerations to produce a manufacturing enterprise that can respond quickly and effectively to market requirements. It will be taught by a team of faculty and industrial practitioners, and much of the student work will be team-oriented. There will be considerable off-campus travel for field study to a variety of manufacturing plants. Note that this course is an approved substitute for both the Managing Operations and Management and Organizations core courses, i.e., NCC 504 and NCC 508. Johnson School students should complete NCC 506 before taking this course.

NBA 651 Employment Relations  
The course will be offered over two full days and will consist of three parts: (1) an overview of U.S. labor and employment law and its effect on today's management, (2) a case analysis of what can lead a workforce to seek union representation to be able to bargain collectively over wages and conditions of employment, and (3) an examination of union-management productivity partnership.

NBA 652 Integrating Product Design, Marketing, and Manufacturing  
The course will make the necessity of integrating product design, marketing, and manufacturing for a firm's success apparent. Managerial tools and useful concepts that facilitate this integration will be introduced. Students will have the opportunity, through homework assignments or projects, to make a more in-depth foray into the course topics.

NMI AND NRE RESEARCH AND ADVANCED STUDIES  
NMI 500-502 Directed Reading and Research  
Fall, spring. 1, 2 or 3 credits. S-U grading only. Restricted to Johnson School students. C. Rosen, B. Mink.  
NMI 510 Multi-Cultural Work Environments  
Spring. 1 credit. S-U grading only. Restricted to Johnson School students. C. Rosen, B. Mink.  
NMI 510 is a independent study course that is open to students where internships will be in a country other than that of their citizenship or prior work experience. The goal of the course is to promote an understanding of the cultural assumptions we bring to the work environment and the effects of cultural differences on organizational interactions and productivity. Registration for the course occurs in the spring semester prior to the internship, and grades are posted in the following fall semester after completion of the course project (a 10-page paper). Students may register for the course after obtaining an internship offer and completing the paperwork for the course instructors. International students will obtain and process work authorization forms with the International Students Office. See Charlotte Rosen (Sage 304) for further details about the academic and immigration requirements for NMI 510.

DOCTORAL SEMINARS  
NRE 502 Doctoral Seminar in Marketing  
3 credits. A. Ainslie.  
This class is intended to introduce students to empirical research in marketing. There will be a strong focus on the historical development of econometric specifications of consumer choice models (with an emphasis on heterogeneity and issues of dynamic consumption patterns), and Bayesian methods in marketing. However, by the very nature of the class, the content will to some extent be driven by the participation of the participants. Teaching will be interactive, and each participant will be expected to present one of the papers studied to the rest of the class. Furthermore, each participant will be expected to replicate the results of one of the papers, requiring the participant to write the necessary code and briefly discuss their findings. Enrollment is by consent of the instructor. Students are required to have taken a graduate level course in either mathematical statistics or econometrics, although this restriction may be waived in special cases. Students are welcome to sit in on parts of the class; for example, the section on Bayesian Methods will be broad enough that students from other areas may find the presentation useful.
NRE 504 Doctoral Seminar in Accounting
3 credits. Staff.
The seminar provides a rigorous and integrative exposure to those aspects of the literature in accounting, behavioral economics, and psychology that are related to questions of accounting and auditing theory and research. This course is for Ph.D. students only.

NRE 507 Doctoral Seminar: Affect and Cognition
Fall. 3 credits. Prerequisites: courses in statistics and experimental design. A. Isen. The course examines research on some of the ways affect influences such thought processes as memory, decision making (including risk taking), and problem solving (including creative problem solving). Applied topics relevant to management concerns (for example, organizational behavior and consumer behavior) as well as other theoretical and applied topics (among them medical decision making, social interaction, self-concept, and cognitive and affective development) are considered, depending on student interests.

[NRE 509 Doctoral Seminar in Research Methods
3 credits. May not be offered 1999-2000. Staff.
This course concerns the fundamentals of scientific research: theory, research design, methods, and criticism. It is designed for doctoral students who wish to undertake research publishable in scholarly journals. Little or no previous experience is assumed. Statistics will not be emphasized; however, familiarity with elementary statistical concepts and inference will prove useful. The course will cover: 1) the principles of theory building; 2) the pros and cons of various general research designs (laboratory and field experiments, surveys, interviews, participant observation, archival studies, simulations, and formal mathematical models); and 3) the structure of research papers and the review process.

[NRE 510 Ethnography in Organizations
This course is a comprehensive introduction to the philosophy and practice of fieldwork in an ethnographic tradition, with particular emphasis on conducting fieldwork in organizational settings. The course has four primary objectives: (1) to acquaint students with various philosophies and techniques for doing field research in organizational settings; (2) to provide students with an opportunity to engage in field research; (3) to provide students with an opportunity to develop unique insights into an organizational setting(s) and contribute to the theoretical understanding of social phenomena in their field of study; and (4) to provide a climate of social support throughout the student’s field experience.

NRE 511 Doctoral Seminar in Finance—Corporate Finance
1.5 credits. Staff.
This course will cover topics in corporate finance and empirical asset pricing.

[NRE 513 Doctoral Seminar in Finance—Market Microstructure
3 credits. May not be offered 1999-2000. Staff.
The course examines recent research in market microstructure, particularly as it relates to theoretical issues. Topics covered include asymmetric information in securities markets, market behavior, and market structure.

[NRE 514 Doctoral Seminar in Finance—Asset Pricing Theory
1.5 credits. Permission of instructor required. May not be offered 1999-2000. Staff.
This course will cover asset pricing theory as based on either economic equilibrium or the absence of arbitrage. The method of instruction is primarily presentations given by the students on important papers. The presentation and the final exam each comprise about half the grade.

[NRE 515 Doctoral Seminar in Behavioral Decision Research
Spring. 3 credits. May not be offered 1999-2000. J. Russo.
This seminar focuses on decision making. The first topic is competing paradigms for research in decision making. A central question of this topic is, “Which paradigms have been most successful or show promise in being most productive in the future?” Other topics will be guided by the interest of participants. They include connectionist approaches, dynamical systems, the interpretation (and distortion) of information, consistency-based theories, biased allocation of attention, and memory—all as applied to the theories and phenomena of decision and judgment.

[NRE 517 Doctoral Seminar in Information, Incentives, Games, and Contracts
3 credits. May not be offered 1999-2000. Staff.
An introduction to game theory and information economics for a broad audience—those who will construct (or just consume) game-theoretic models in applied fields of management (including accounting, finance, marketing, and organizational behavior) and applied fields of economics (including industrial organization, labor economics, macroeconomics, and international economics). The course emphasizes applications at least as much as pure theory; each step in the theory is illustrated by applications from management and economics before the next step in the theory is introduced. The wide variety of applications shows that similar issues arise in different fields and that the same game-theoretic tools can be applied in each setting.

FACULTY ROSTER

Ainslie, Andrew, Ph.D., U. of Chicago. Asss. Prof., Accounting
Babbes, George, Ph.D., U. of California at Berkeley. Asst. Prof., Marketing
Bailey, Warren B., Ph.D., U. of California at Los Angeles. Assoc. Prof., Finance
BenDaniel, David J., Ph.D., Massachusetts Inst. of Technology. Don and Margi Berens Professor of Entrepreneurship
Bierman, Harold, Jr., Ph.D., U. of Michigan. Nicholas H. Noyes Professor of Business Administration
Bloomfield, Robert J., Ph.D., U. of Michigan. Assoc. Prof., Accounting
Bradley, James R., Ph.D., Stanford U. Assst. Prof., Production and Operations Management
Conway, Richard W., Ph.D., Cornell U. Emerson Electric Co. Professor of Manufacturing Management, Prof., Management Information Systems, Director, Semester in Manufacturing
D’Souza, Julia, Ph.D., Northwestern U. Asst. Prof., Accounting
Dyckman, Thomas R., Ph.D., U. of Michigan. Ann Whitney Olin Professor of Accounting
Elliott, John A., Ph.D., Cornell U. Prof., Accounting, Associate Dean for Academic Affairs
Frank, Robert, Ph.D., U. of California at Berkeley. Professor of Economics
Greenberg, Donald P., Ph.D., Cornell U. Prof., Management Information Systems
Guy, John, Ph.D., Columbia U. Asst. Prof., Finance
Hass, Jerome E., Ph.D., Carnegie-Mellon U. Prof., Finance and Business Strategy
Havenner, Heather A., Ph.D., U. of California at Berkeley. Prof., Organizational Behavior
Hermalin, Benjamin E., Ph. D., Massachusetts Inst. of Technology. Prof., Economics
Hilton, Ronald W., Ph.D., Ohio State U. Prof., Accounting
Ise, Alice M., Ph.D., Stanford U. S. C. Johnson Prof., Marketing
Jarrow, Robert A., Ph.D., Stanford U. Assoc. Prof., Finance
Lee, Charles M. C., Ph.D., Cornell U. Prof., Marketing and Economics
Lee, Deane W. Malott Professor of Management, Director, The Park Center for Investment Research
Li, Huitao, Ph.D., Yale U. Asst. Prof., Finance
Libby, Robert, Ph.D., U. of Illinois. David A. Thomas Professor of Management, Prof., Accounting and Behavioral Science
Lind, Robert C., Ph.D., Stanford U. Prof., Economics, Management, and Public Policy
Lojo, Maureen P., Ph.D., Massachusetts Inst. of Technology. Asst. Prof., Production and Operations Management
McAdams, Alan K., Ph.D., Stanford U. Assoc. Prof., Managerial Economics
McClain, John O., Ph.D., Yale U. Prof., Quantitative Analysis
Michaely, Roni, Ph.D., New York U. Assoc. Prof., Finance
Nelsen, Bonalyn, Ph.D., Cornell U. Asst. Prof., Organizational Behavior
Nelson, Mark W., Ph.D., Ohio State U. Assoc. Prof., Accounting
O’Connor, Kathleen, Ph.D., U. of Illinois. Asst. Prof., Organizational Behavior
Orte, Maureen, Ph.D., Northwestern U. Robert W. Purcell Prof., Management, Prof., Finance
Orman, Levent V., Ph.D., Northwestern U. Assoc. Prof., Management Information Systems
Peterson, Randall S., Ph.D., U. of California at Berkeley. Asst. Prof., Organizational Behavior
Rao, Vithala R., Ph.D., U. of Pennsylvania. Deane W. Malott Professor of Management, Prof., Marketing and Quantitative Methods
Robinson, Lawrence W., Ph.D., U. of Chicago. Assoc. Prof., Operations Management
Russo, J. Edward, Ph.D., U. of Michigan. S. C. Johnson Family Prof., Management, Prof., Marketing and Behavioral Science
Sally, David F., Ph.D., U. of Chicago. Asst. Prof., Organizational Behavior
Smidt, Seymour, Ph.D., U. of Chicago. Nicholas H. Noyes Professor of Economics and Finance, Director, Leadership Skills Program
Stayman, Douglas M., Ph.D., U. of California at Berkeley. Assoc. Prof., Marketing
Suwinski, Jan H., MBA, Cornell U. Prof., Business Operations
Swaminathan, Bhaskaran, Ph.D., U. of California at Los Angeles. Asst. Prof., Finance
Tasker, Sarah, Ph.D., MIT. Asst. Prof., Accounting
Thomas, L. Joseph, Ph.D., Yale U. Nicholas H. Noyes Professor of Manufacturing, Director, Executive Development Program
Waldman, Michael, Ph.D., U. of Pennsylvania. Prof., Economics, Charles H. Dyson Prof., Management
Wittink, Dick R., Ph.D., Purdue U. Henrietta Johnson Louis Prof., Management, Prof., Marketing and Quantitative Methods

Lecturers
Highfield, Richard A., Ph.D., U. of Chicago. Sr. Lect. Economics, Associate Dean for MBA Programs and Operations
Katz, Jan, Ph.D., Massachusetts Inst. of Technology. Sr. Lect., International Business and Marketing
Matthews, Ronald W., Sr. Lect., Operations Management
Mink, Barbara E., M.A., Cornell U. Sr. Lect., Management Communications
Pike, Alan S., M.A., Cornell U. Sr. Lect., Management Communications
Rosen, Charlotte, Ph.D., Cornell U. Sr. Lect., Coordinator, Management Communications

Adjunct and Visiting Faculty
Nesheim, John L., MBA, Cornell U. Visiting Lecturer, President, Aladdin Systems, Inc.
Schuler, Richard E., Ph.D., Brown U. Prof. Economics, Prof. Civil & Environmental Engineering
Sears, Peter A., J.D., Harvard U. Visiting Lecturer, Vice President, Business Investments, Smith Kline Beecham Corporation
Thomas, William, MBA, Harvard. Lect., Management, President, Capital Southwest
Zender, Jaime F., Ph.D., Yale U. Prof., Finance
ADMINISTRATION
Jere Haas, director
Carole Bisogno, associate director for academic affairs
Noa Noy, director of graduate studies, Field of Nutrition

THE DIVISION
Nutritional Science draws upon the chemical, biological, and social sciences to understand the complex relationships between human health, nutritional status, food and lifestyle patterns, and social and institutional environments. Understanding these relationships includes the study of the metabolic regulation and function of nutrients, nutrient requirements throughout the life span, role of diet in reducing risk of chronic disease, nutritional quality of foods, and interventions and policies designed to promote the nutritional health of individuals and populations.

The focus of this broad field of study at Cornell is the Division of Nutritional Sciences, which brings together specialists from many disciplines. The faculty are involved in undergraduate and graduate teaching, research, and extension of research-based knowledge throughout New York State, the nation, and the world.

The division is affiliated with both the College of Human Ecology and the College of Agriculture and Life Sciences. An undergraduate program in Nutritional Sciences is offered through the College of Human Ecology. The undergraduate program, Nutrition, Food, and Agriculture, is offered in the College of Agriculture and Life Sciences. In 1997 a new undergraduate program in Human Biology, Health, and Society was established within the College of Human Ecology. Graduate study in the Field of Nutrition, is administered by faculty members throughout the university.

FACILITIES
Most of the faculty members of the division work in Savage Hall, Kinzelberg Hall, and Martha Van Rensselaer Hall. In addition to housing offices, classrooms, and seminar rooms, these buildings contain research facilities, specialized laboratories, a human metabolic research unit, and computer facilities. The division's Learning Resource Center in Martha Van Rensselaer Hall is used by students for individual study and for small group discussions. In addition to printed and audiodigital materials, the Learning Resource Center contains two computers which give students access to specialized software. Savage Hall also has a graduate reading room.

UNDERGRADUATE PROGRAMS
The Division of Nutritional Sciences offers three programs leading to a B.S. degree:

Nutritional Sciences, College of Human Ecology: this program provides students with a strong foundation in the broad field of nutritional sciences as well as thorough training in chemistry and biology. Students may prepare for a variety of career interests including medicine and other health careers, fitness and sports nutrition, nutrition counseling, clinical nutrition, dietetics, nutritional biochemistry, community nutrition, and nutrition education.

Nutrition, Food, and Agriculture, College of Agriculture and Life Sciences: this program is for students who want strong training in human nutrition combined with supportive coursework in the agriculture and the life sciences. Strong preparation in biology, chemistry, and math is required. Students in the Nutrition, Food, and Agriculture Program supplement the nutrition curriculum with courses in areas such as food science, animal science, plant science, advanced biology, business and economics, education, and communication. This program prepares students for variety of career interests.

Human Biology, Health, and Society, College of Human Ecology: established in 1997, this program gives students a strong foundation in biology and then explores human health issues from the perspectives of both biology and the social sciences. Students complete a rigorous curriculum in the natural sciences and then, choosing from a wide array of courses offered in the College of Human Ecology, focus their studies on health issues of their choice. Students can explore such topics as gene expression and metabolism related to disease states, biological and social aspects of growth and development, and policies and programs influencing health.

THE CURRICULUM
Undergraduate students in these three programs complete the requirements of their colleges as well as the courses required by the program of their specific interests.

All three undergraduate programs offered by the division require a strong foundation in chemistry and biology, including introductory chemistry and biology, organic chemistry, biochemistry, and physiology. A minimum competency in college algebra is required with additional math and/or statistics requirement for some programs and career paths. Students in the Human Biology, Health, and Society major also complete a course in physics and two additional courses in advanced biology.

All students complete the introductory course, Nutrition and Health: Concepts and Controversies (NS 115). The Nutritional Sciences major and the Nutrition, Food, and Agriculture Program require the completion of four other core courses: Nutrition and Health: Concepts and Controversies (NS 115); Social Science Perspectives on Food and Nutrition (NS 245); Nutritional and Physicochemical Aspects of Foods (NS 345); Physiological and Biochemical Bases of Nutrition (NS 331); and Methods in Nutritional Sciences (NS 332). Students in these programs also must select a minimum of nine credits in advanced courses in the nutritional sciences.

The Human Biology, Health, and Society major requires a minimum of six credits from courses that integrate biology and the social sciences as they examine health issues. In addition, students must also complete nine credits of advanced electives in courses focused on human biology, health, and society.

Undergraduate students in these three programs have a faculty adviser in the Division of Nutritional Sciences. Student-adviser conferences are required at least twice a year. Advisers help students plan their course schedules and can suggest opportunities for individual study or experience outside the classroom.

In all three undergraduate programs the correct sequencing of biology, chemistry, and/or nutrition courses is very important. Students considering these programs should get detailed information about course requirements from the division's Academic Affairs Office, 309/335 MVR.

CAREER OPTIONS AND COURSE PLANNING
Requirements for the three programs are the minimum set of courses necessary for a bachelor's degree in these fields. Students should supplement their requirements with elective courses and other learning experiences that will prepare them for entry-level jobs or advanced study in their field(s) of interest. A summary of suggested electives for different career interests follows:

Medicine and Other Health Careers: Recommended courses for pre-med students include calculus and two terms of physics. Specific information about medical school admissions requirements can be obtained from the university’s Health Careers Office, 203 Barnes Hall. Students interested in other health careers should acquire specific information about those requirements.

Courses of interest may include those related to the biological and social determinants of health, human growth, development, and behavior through the life course; interpersonal communications; advanced biology; sociology, psychology, and ethics.

Dietetics: Students who wish to work in the areas of clinical nutrition, nutrition counseling, sports nutrition, community nutrition, or food and nutrition management should complete the academic requirements for The American Dietetic Association (ADA). Courses in foods,
nutrition and disease, microbiology, management, statistics, and nutritional care are added to the courses required for the nutrition programs. For more information about meeting ADA requirements see Anne Kendall, 314 MVR.

Exercises, Nutrition, and Health Promotion: Students should complete a course in physiology and a course in anatomy after introductory biology. Students can complete the Applied Exercise Science Concentration at Ithaca College, which includes courses in kinesiology, exercise physiology, and biomechanics. Students who wish to apply to graduate schools to study physical therapy should complete a year of introductory physics; a course in statistics, a course in ethics; and three courses in psychology. Students should check the specific requirements of their schools of interest. For more information about the Applied Exercise Science Concentration, contact the DNS Academic Affairs Office, 309 MVR.

Biomedical Research/Nutritional Biochemistry: Recommended electives include courses in calculus, physics, genetics, advanced biology, biochemistry, and nutrition. Students should check the specific requirements of their schools of interest. For more information about the Biomedical Research/Nutritional Biochemistry program, contact the DNS Academic Affairs Office, 309 MVR.

Public Health and Community Nutrition: Suggested electives include courses in communications, education, human development, policy analysis and management, maternal and child nutrition, geriatric nutrition, nutrition and disease, and food economics.

Nutrition, Food, and Business: Recommended electives include courses in management, marketing, economics, communications, hotel administration, and food service.

Nutrition and Agriculture: Recommended electives include courses in food science, animal science, plant sciences, international agriculture, agricultural economics, biological sciences, and rural sociology.

International Nutrition: Recommended electives include courses in language, anthropology, agricultural economics, policy, economics, rural sociology, international agriculture, and nutritional sciences related to male and child health and problems of developing nations.

Biology and Behavior: Recommended electives include courses in psychology, human development, and neurobiology.

Food, Nutrition, and Health Policy: Recommended electives include courses in economics, sociology, government, policy analysis, and management.

SPECIAL EXPERIENCES

Undergraduates can enhance their experiences by participating in structured field experiences or study abroad. Academic credit can be earned for field experiences in a community agency, health-care facility, or business. The Urban Semester in the College of Human Ecology provides students with an opportunity to study and gain field experience in New York City. All students intending to spend a term off campus in an experience or study abroad must plan their courses well in advance to be sure that all program requirements can be met.

INDEPENDENT STUDY ELECTIVES

Independent study courses (NS 400, 401, 402) can be used to obtain credit for more diverse or intensive experience than the classroom can offer, whether this involves laboratory work, library research, or field study. Any student interested in independent study should obtain the sponsorship of a faculty adviser and the approval of the associate director for academic affairs or consider applying to the honors program.

HONORS PROGRAM

The honors program, leading to a B.S. degree with honors, gives official recognition to students who have demonstrated excellence in their academic work and their capacity for independent study.

In addition to fulfilling the requirements for a major, students may elect NS 400, 401, 402 to design and evaluate research, complete an original piece of research, and prepare an honors thesis. The honors project may be laboratory or field research or deal with policy and program development. For more information, students should contact Michael Kazarinoff, 230 Savage Hall.

COURSES RECOMMENDED FOR NONMAJORS

Courses in nutritional sciences can strengthen programs of study in biological sciences, biology and society, communications, food science, human development, human services, and other fields.

NS 115, Nutrition and Health: Concepts and Controversies, is open to all students. After NS 115, nonmajors with limited backgrounds in chemistry and biology may elect NS 247, Food for Contemporary Living, NS 262, Nutrients and Cells; NS 275, Human Biology and Evolution; NS 306, Nutritional Problems of Developing Nations; NS 315, Obesity and the Regulation of Body Weight; NS 347, Human Growth and Development: Biological and Behavioral Interactions; NS 380, Integrating Food Systems and Human Nutrition Needs; NS 450, Public Health Nutrition; NS 457, National and International Food Economics.

Nonmajors with strong backgrounds in chemistry and the biological sciences may consider NS 331, Physiological and Biochemical Bases of Human Nutrition, as well as many advanced nutritional sciences courses, such as NS 345, Physicochemical and Nutritional Aspects of Foods, NS 421, Nutrition and Exercise; and NS 441, Nutrition and Disease.

GRADUATE PROGRAMS

Graduate study is administered by the Field of Nutrition, a group of about forty faculty members from throughout the university who have a common interest in nutritional problems. In the M.S. and Ph.D. degree programs, students may specialize in molecular and biochemical nutrition, human or animal nutrition, community nutrition, or international nutrition. Research is emphasized in all graduate programs. Field experience may be an important component of concentrations in community, international and public-health nutrition, and nutrition education.

The specialties and interests represented by faculty in the Field of Nutrition provide almost unlimited opportunity for graduate study. Cornell's extensive laboratory and agricultural facilities ensure that students interested in experimental nutrition have exceptional choices and thorough training. As the largest faculty in the country devoted to the study of human nutrition, the field includes specialists in biochemical, metabolic, epidemiological, and sociocultural research. Opportunities to work with community and federal agencies are available to students interested in applied nutrition and public policy. Students in international nutrition are expected to conduct their thesis research abroad.

For more information about the graduate program, please write for the brochure. Graduate Study in Nutrition, available from the Director of Graduate Studies, Field of Nutrition, Cornell University, 309 MVR Hall, Ithaca, New York 14853-4401, telephone (607)255-4410.

COURSES

The course will discuss the facts and fallacies concerning the role that nutrition, exercise, and other health behaviors play in preventing disease, maintaining good health, and maximizing athletic performance will be discussed. Emphasis is on understanding the biological mechanisms through which good nutrition and regular exercise affect psychological and physical health.

NS 116 Personalized Concepts and Controversies Fall 1 credit. Corequisite: NS 115. S-U only. Limited to freshmen and transfer students, 10 per section. TBA. D. Levitsky.

This course provides students enrolled in NS 115 individualized assistance in many skills used in NS 115 such as using computers to analyze data, using electronic mail, finding and using scientific references, and reviewing material presented in NS 115 lectures.

NS 120 Nutrition and Health: Issues, Outlooks, and Opportunities Spring 1 credit. S-U grades only. Limited to 120 freshmen, sophomores and juniors, others by permission of instructor. W 12:20. C. Bisogni.

A course for students interested in exploring careers in the broad fields of food, nutrition, and health. Experts representing different areas will discuss their work, focusing on current issues and trends as well as their requisite knowledge and skills. This course describes the many disciplines that are drawn upon in addressing human problems related to food, diet, and health. It also explores the related intellectual and career opportunities. This is not an introductory nutrition course for nonmajors.
NS 200 Vegetarian Nutrition: An Introduction
Fall. 3 credits. S-U grades optional. Prerequisites: NS 115, or consent of instructor. Limited to nutrition majors. The course will survey vegetarianism from a variety of nutritional and health considerations. The material to be presented and discussed will primarily include the empirical scientific evidence presented for easy comprehension for students without extensive biological or medical background. Particular attention will be given to the role of vegetarianism in the prevention and reversal of chronic degenerative diseases. Special topics on competitive sport, childhood nutrition, food preparation, and dietary transition will be offered. Internationally known guest speakers, will provide 6-8 of the lectures.

NS 222 Maternal and Child Nutrition
Spring. 3 credits. Prerequisites: NS 115 and a college biology course or permission of the instructor. Limited to nutrition majors. Limited to 25 students. Preregistration is required in room 309 Martha Van Rensselaer Hall. M W F 1:25. C. Garza. Involves the study of nutritional requirements in pregnancy, lactation, infancy, and childhood growth through adolescence. Topics include the relationship between maternal diet and pregnancy outcome; analysis of different methods of infant feeding; and nutritional status of pregnant women, children, and adolescents in the United States and in developing countries.

NS 245 Social Science Perspectives on Food and Nutrition
Fall. 3 credits. Prerequisite: NS 115. Limited to nutrition majors. Letter grade only. T R 10:10–11:25. J. Sohal. Theories, concepts, and methods from the social sciences will be used to examine food, eating, and nutrition. The course will use the food and nutrition system and the food choice process as conceptual models for examining the social aspects of nutrition.

NS 247 Food for Contemporary Living
Fall and spring. 1 credit. Laboratory sections limited to 32 students. Preregistration during course pre-registration required in room 309 Martha Van Rensselaer Hall. Laboratory course, 6 credits. Letter grade only. T R 1:25–4:25; spring T 1:25–4:25 or R 9:05–12:05. A. Kendal. Emphasizes meal planning for healthy individuals using national nutrition standards; the development of food preparation and presentation skills; the application of sensory evaluation techniques; food science principles as they apply to cooking and ethnic and cultural influences on cuisine.

NS 262 Nutrients and Cells
Spring. 3 credits. Prerequisites: one semester of biology and chemistry. M W F 1:25–2:20. S. Spalding. This course will focus on the relationships of the cell with the environment. Examples from three general areas will be considered: 1. Mechanisms of uptake of nutrients by bacterial and mammalian cells. 2. Intra-cellular outcomes of nutritional stimuli: effects on metabolism and gene expression, toxicity. 3. Pathways of neutralization: detoxification, secretion, DNA repair.

NS 275 Human Biology and Evolution (also Biological Sciences 275 and Anthropology 275)
Fall. 4 credits. Prerequisites: permission of either instructor. Offered alternate years. Not offered 1999–2000. See BIO SCI 275 for course description.

NS 300 Special Studies for Undergraduates
Fall or spring. Prerequisites: permission of instructor. S-U grades optional. DNS faculty. Special arrangements to establish equivalency for courses not transferred from a previous major or institution. Students prepare a description of the study they want to undertake on a form available from the College Registrar’s Office. The form, signed by both the instructor directing the study and the associate director for academic affairs, is filed at course registration or during the change-of-registration period.

NS 306 Nutritional Problems of Developing Nations
Spring. 3 credits. Prerequisites: NS 115, S-U grades optional. T R 10:10. J-P. Habicht, M. C. Latham. The course is designed for undergraduates interested in the nutritional problems of developing countries. Attention is given to the array of nutrition problems encountered, the causes of hunger and malnutrition, the epidemiology of major nutritional problems afflicting poor nations, the functional consequences of these problems on individuals and societies, and the types of programs that can be implemented to improve health and nutrition.

NS 315 Obesity and the Regulation of Body Weight (also Psychology 613)

NS 320 Introduction to Human Biochemistry
Fall. 4 credits. Prerequisites: one year college biology; one year college general chemistry; and CHEM 257 or 357–358; or permission of the instructor. S-U grades optional. M W F 10:10, sec T 1:25. W. Arion, P. Stover. The principles of biochemistry are presented within the context of human health and disease. Metabolism of carbohydrates, lipids, proteins and selected vitamins is taught from a perspective that emphasizes their role in supporting the structure and physiological functions of the major organs of the body, including blood. The concepts of enzyme catalysis, enzyme control, and bioenergetics are incorporated within this framework. The fundamental concepts of carycorytic DNA structure, function and gene expression an covered with reference to their importance in regulating metabolism and the impact of a changing nutrient environment.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits. Prerequisites: Biological Sciences 330 or 331 or equivalent. S-U grades optional. M W F 10:10; disc. W or R or M. Stitanuk, C. McCormick. This course examines the biochemical and physiological bases of human nutritional requirements. The instructor will use an integrated approach to cover the digestion and metabolism of the nutrients (carbohydrates, proteins, lipids, vitamins, and minerals). Metabolic and chronic diseases that are related to nutritional status are evaluated throughout the semester. The discussion sections and problem sets provide an opportunity to examine in greater depth selected topics from lecture.

NS 332 Methods in Nutritional Sciences
Fall and spring. 3 credits. Each section limited to 18 students. Prerequisites: NS 345, NS 331 preferred or concurrent registration. Laboratory preregistration during course preregistration required in room 309 Martha Van Rensselaer Hall. One evening prelim to be scheduled. Fall. Lab M 12:20, labs M W 1:25–4:25 or M W 6:30–9:30 or T R 10:10–1:10. Spring. Lab M 12:20, labs M W 1:25–4:25 or M W 6:30–9:30, 10:00–11:00 or M W 6:30–9:30. J. T. Brenna, M. N. Kazarinoff.

Laboratory introduction to principles and analytical techniques of nutritional research. Emphasis is on analytical concepts and skills required to determine nutrient function and nutritional status of individuals. Topics include methods of nutrient, metabolite, and enzyme analysis in body fluids, and methods for assessing individual food intake and nutritional status.

NS 341 Human Anatomy and Physiology
Spring. 4 credits. Letter grade only. Prerequisites: college biology, NS 115 recommended. Laboratory preregistration required in 309 MVR during preregistration. Limit 120. Lab M W or R or F, 9:05–11:00 or 2:30–4:25. V. Utermohlen. Introduction to human anatomy and physiology with particular emphasis on aspects of relevance to the nutrition sciences and medicine. All major organ systems will be covered. Laboratories will emphasize location, recognition, and description of anatomical structures. Testing of physiological functions will focus on the tests with nutritional and medical relevance.

NS 345 Nutritional and Physicochemical Aspects of Food
Spring. 3 credits. Prerequisite: college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25–2:40. B. Parker, B. Lewis. A study of the nutritional, physical, and chemical properties of foods including composition, food structure, enzymic and nonenzymic phenomena, and processing/preparation aspects. Issues focused on food safety, regulation, and food composition data bases will also be discussed.

NS 346 Introduction to Physicochemical Aspects of Foods—Laboratory
Spring. 1 credit. Each section limited to 18 students. Limited to dietetics students in DNS. Prerequisites: NS 345 or concurrent registration. Laboratory course in organic chemistry and permission of instructor during course registration
Student teams will investigate new and existing technological options within food systems to address domestic or international human nutrition needs.

**NS 390 Honors in Nutritional Sciences**

Fall. 1 credit. Limited to students admitted to the division honors program. S-U grades only. T 12:20. M. Kazaroff. Research design. Analysis of research papers on selected topics.

**NS 400-401-402-403 Special Studies for Undergraduates**

Fall or spring. Credits to be arranged. S-U grades optional. For advanced independent study by an individual or group of students who want to study a field of nutritional sciences not otherwise provided through course work in the division or elsewhere at the university. Students prepare a description of the study they want to undertake on a form to be signed by the instructor directing the study and the associate director for academic affairs. The form, available from the department office, is filed at course registration or within the change-of-registration period along with an add/drop slip in 145 MVR, College Registrar Office. To ensure review before the close of the course registration or change-of-registration period, students should submit the special-studies form to the associate director for academic affairs as early as possible.

**NS 400 Directed Readings**

For study that predominantly involves library research and independent reading.

**NS 401 Empirical Research**

For study that predominantly involves data collection and analysis or laboratory or studio projects.

**NS 402 Supervised Fieldwork**

For study that involves both responsible participation in a community setting and reflection on that experience through discussion, reading, and writing. Academic credit is awarded for this integration of theory and practice.

**NS 403 Teaching Apprenticeship**

For study that includes assisting faculty with instruction.

**NS 421 Nutrition and Exercise**

Spring. 3 credits. Prerequisites: Bio S 311 or NS 341 and NS 115 or NS 331. S-U grades optional. M W F 11:15. Not offered 1999-2000. Division faculty. This course will acquaint students with the interaction between nutrition, exercise, and athletic performance. Topics will cover the biological, psychological, and sociological aspects of nutrition and exercise and athletic performance. Students will learn nutritional counseling techniques for educating the recreational and professional athlete, coach, and trainer.

**NS 431 Mineral Nutrition and Chronic Disease**

Fall. 2 credits. Prerequisites: NS 331, AnSc 410, or permission of instructor. S-U grades optional. T 11:15. C. McCormick. We will evaluate the evidence that diet plays a role in osteoporosis and hypertension and whether iron status affects the development of heart disease and inflammation. A goal of the course is to review the data upon which recommendations for daily nutrient intakes are currently based. Class discussion of key research articles will be conducted and evaluated.

**NS 441 Nutrition and Disease**

Fall. 4 credits. Prerequisites: NS 331 and a human physiology course. S-U grades optional. M W F 10:10, F 8:00. V. Uttermohlen. Study of the anatomical, physiological, and metabolic abnormalities in acute and chronic illness, and the role of nutritional therapy in their prevention and care of disease. Topics to be covered include: nutritional assessment, nutritional pharmacology, starvation, infection, trauma, cancer, diabetes mellitus, and renal, cardiovascular, pulmonary, skeletal, neurological, liver, and gastrointestinal disorders.

**NS 442 Implementation of Nutrition Care**

Fall. 3 credits. Prerequisites: NS 247, concurrent registration in NS 441 (or equivalent background in either course). S-U grades optional. Lect M W F 9:05. A. Kendall. Development of skills necessary to implement nutritional care plans. Subjects to be covered include: medical nutrition therapy, menu planning for disease states, quality assurance.

**NS 450 Public Health Nutrition**

Spring. 3 credits. Prerequisites: NS 115, and one course dealing with population-level studies, e.g., NS 245, HDFS 150, PAM 201, PAM 303, RSOC 100, RSOC 200. M W F 11:15. K. Rasmussen, D. Pelletier. Public health nutrition is the major professional career track for nutritionists outside of dietetics. It deals with efforts to improve the diet and nutritional status of whole populations by working at the community, state, and national level. This course helps prepare students to work in public health nutrition by describing methods used in the assessment of nutrition problems, development of nutrition-related policies, and delivery of health nutrition, and food assistance programs.

**NS 451 Epidemiology and Health of Human Communities**

Fall. 3 credits. Prerequisite: one semester of statistics (can be taken concurrently). M W F 1:25. E. Frongillo. Examines through a series of case studies, the role of epidemiological investigation in understanding, assessing, and improving the health and nutrition of human communities and populations. Students will read and discuss scientific research and public policy literature on specific topics of current interest. Emphasis is on the conceptualization of epidemiology as an ecological science that studies the interdependence and interaction of humans with their social, cultural, and physical environment. Intended for advanced undergraduates and graduate students with an interest in health, human biology, nutrition, or epidemiology.

**NS 457 National and International Food Economics (also Economics 374)**

Spring. 4 credits. Prerequisites: Econ 101 or CEH 110 and junior standing, or permission of instructor. S-U grades optional. M W F 9:05. E. Thorbecke. Analysis of the world food economy. Review and analysis of the major economic factors determining the demand for food, the composition of food consumption, and nutritional intake, as well as the major economic factors affecting food production.
and supply. This course evaluates the effectiveness of various policies and programs in alleviating poverty and malnutrition.

**NS 486 Applied Dietetics in Foodservice Systems**  
Spring. 3 credits. Limited to 27 students.  
Prerequisites: NS 378, Micro 290.  
Laboratory analyses and practicum. Course prerequisite is required in room 309. Martha Van Rensselaer Hall. White lab coat is required. Approximately $25.00 will be needed for special supplies/angiogram. Lect W 9:05, labs. M or T or W 1:30-6:00. TBA.  
Students will gain experience in facility design, equipment selection, use, and care; job analysis and evaluation; human resources planning; management of financial resources; menu planning, recipe development, volume production; computer-assisted management; employee training; applied safety and sanitation standards; and will develop other skills required to operate/manage a foodservice program. The application of quality management in food service operations and facility management is stressed. Laboratories will be arranged through Cornell Dining.

**NS 498 Honors in Nutritional Sciences**  
Spring. 1 credit. Limited to students admitted to the division honors program. Students may register in NS 499 concurrently. M or F 2:30. M. Kazarninoff and division faculty.  
Juniors (Mondays). Discussion of research opportunities in nutrition and orientation to research facilities. Delineation of honors research problems in consultation with faculty mentors. Seniors (Fridays). Workshop sessions on honors thesis and oral presentation preparation.

**NS 499 Honors Problem**  
Fall and spring. Credits to be arranged. Open only to students in the division honors program. M. Kazarninoff and division faculty. An independent literature, laboratory, or field investigation. Students should plan to spread the work over two or more semesters.

**NS 600 Special Problems for Graduate Students**  
Fall and spring. Credit to be arranged. Limited to graduate students recommended by their chair and approved by the instructor in charge. S-U grades optional. Division faculty.  
Emphasis on independent advanced work. Experience in research laboratories in the division may be arranged.

**NS 601 Proteins and Amino Acids (also Animal Science 601)**  
Spring. 2 credits. Prerequisites: physiology, biochemistry, and nutrition. Offered alternate years. W F 12:20. R. E. Austic.  
The course emphasizes the dynamic aspects of protein digestion and absorption, amino acid transport, and amino acid and nitrogen metabolism and their relationships to the nutritional requirements for amino acids.

**NS 602 Lipids (also Bio Sci 619)**  
Fall. 2 credits. T R 11:15. A. Bensadoun. Advanced course on biochemical, metabolic, and physiological aspects of lipids, more specifically lipid transport. Topics covered include lipid methodology, structure of plasma lipoproteins, molecular biology and cell biology of apolipoproteins, lipoprotein receptors, lipid transfer factors, lipolytic enzymes, and atherosclerosis.

**NS 603 Mineral Nutrition: Metabolic, Health, and Environmental Aspects (also An Sc 603)**  
Fall. 2 credits. Letter grade only. Prerequisites: biochemistry, physiology, and nutrition. T 2:20-4:25. Offered alternate years, not offered 1999-2000. X. G. Lei, G. F. Combs, Jr.  
The course emphasizes the metabolic roles and environmental impacts of mineral nutrition in animal, human, and food systems. Team-taught lectures include general biochemical and physiological aspects of mineral metabolism and specific mechanisms of gene expression regulation and mammalian health disorders associated with individual elements. Methodology and facility of mineral research is also discussed.

**NS 604 The Vitamins (also An Sc 604)**  
Fall. 2 credits. T R 10:10. G. Combs.  
Text-based discussion sessions on nutritional aspects of the vitamins, including recent developments in medical and biochemical interrelationships with other nutrients and metabolites.

**NS 605 Nutritional Biochemistry Colloquium**  
Fall and spring. 1 credit. S-U grades only. R 12:20. Nutritional Biochemistry faculty.  
Nutritional biochemistry colloquium is a graduate seminar series that focuses on recent developments in biochemical nutrition. Weekly presentations are made by faculty, postdocs and graduate students and are based on the primary literature. The presentations are followed by a discussion involving all participants.

**NS 606 Nutrition as an Integrating Discipline: Concepts and Paradigms**  
Fall. 3 credits. Prerequisite: some prior coursework or experience in nutrition, or permission of the instructor. M W F 10:10. M. Kazarninoff, J.P. Habich, and division faculty.  
An overview course for beginning graduate students which introduces them to the full breadth of nutritional science disciplines, including qualitative and quantitative sciences. Also suitable for seniors as an integrating course. The course presents concepts and paradigms of molecular biology, biochemistry, clinical nutrition, epidemiology, anthropology, economics, program planning and administration, policy development, and ethics. This semester the course uses Vitamin A as the example. Emphasis will be placed on the integration of factual and conceptual knowledge to solve nutrition problems in human societies.

**NS 607 Molecular Toxicology (also Toxicology 611)**  
Spring. 3 credits. Prerequisite: Toxicology 610 and a full-year 400-level course in biochemistry or equivalent. S-U grades optional. TBA. S. Bloom, R. Dieter.  
A study of the biochemical mechanisms of absorption, transport, metabolism, and excretion of drugs, carcinogens, and toxicants. Emphasis on oxidative and conjugative pathways of metabolism and of environmental and nutritional factors that influence toxicant metabolism and disposition. Methods of evaluating in vivo and in vitro metabolism are also addressed.

**NS 612 Methods of Assessing Physical Growth in Children**  
Spring. 3 credits. Limited to graduate students and undergraduate students who have permission of the instructor. A previous course in statistics required. S-U grades optional. Lect T 1:25; lab. R 1:25-4:25; disc T 2:15-3:05. J. Haas.  
A laboratory course to train students in methods and techniques used to assess the physical growth and development of children. The methods explored are those applicable for field, community, and clinical studies and cover anthropology, body composition, skeletal age, maturity indicators, physical fitness, and energy expenditure.

**NS 614 Topics in Maternal and Child Nutrition**  
Fall. 3 credits. Prerequisites: NS 331, and 222 or 347. Biological Sciences 311, and permission of instructor. T R 8:30-9:55. Will not be offered fall 2000. K. Rasmussen.  
An advanced course on the role of nutrition during pregnancy and lactation. The feeding and growth of infants and children in health and disease is considered. Critical evaluation of current literature is emphasized via lecture, discussions, and a term paper.

**NS 617 Teaching Seminar**  
Fall or spring. 0 credit. Limited to division graduate students and students who have permission of the instructor. S-U only. C. Bisogni, D. Way.  
Individualized instruction focusing on development of teaching skills for guiding classroom learning in lecture, discussion, and laboratory settings. Preparation of content, presentation, and interaction techniques and evaluative methods are emphasized in relation to the student's specific teaching assignment. Videotaped simulations provide opportunity for practice and analysis of teaching behaviors.

**NS 618 Teaching Experience**  
Fall or spring. 0 credit. Limited to division graduate students and students who have permission of instructor. S-U only. C. Bisogni.  
Designed to provide experience in teaching nutritional sciences by direct involvement in college courses under supervision of a faculty member. The aspects of teaching and the degree of involvement vary, depending on the needs of the course and the experience of the student.

**NS 619 Field of Nutrition Seminar (also Animal Science 619)**  
Fall or spring. 0 credit. S-U only. M 4:00. Faculty and guest lecturers. Lectures on current research in nutrition.

**NS 620 Food Carbohydrates (also Food Science 620)**  
Spring. 2 credits. Prerequisites: Biological Sciences 330 or equivalent. Letter grades only. Offered alternate years. T R 10:10. J. Brady, B. Lewis.  
A consideration of the chemistry of carbohydrates, including sugars and complex carbohydrates (starches, pectins, hemicelluloses, gums, cellulose, and glycoconjugates). Emphasis is on intrinsic chemistry, functionality in food systems, and changes occurring during food processing and storage.
NS 626 Special Topics in Food
Fall. 2 credits. TBA. B. Lewis.
Discussion of current research on specific topics related to functional foods and nutraceuticals/phytochemicals.

NS 631 Dietary Assessment
Fall. 1 credit. 7 weeks only. Prerequisites: statistics and NS 331 or equivalent. Enrollment limited. R 2:30-5:30.
D. Sanjur.
Study of methods and techniques for assessing dietary intake at the individual and household levels.

[NS 636 Integration and Coordination of Energy Metabolism (also Biological Sciences 637)]
Spring. 3 credits. Prerequisites: Biological Sciences 330 and 331, or equivalent. M W F 9-10. Not offered 1999-2000.
The dynamics of energy metabolism in humans and higher animals are developed through characterizations of how the metabolic components support the structure and function of the individual tissues. Mechanisms that control and coordinate energy metabolism within and between organs are analyzed in the context of selected physiological and pathological stresses.

NS 637 Epidemiology of Nutrition
Spring. 3 credits. Limited to graduate students. Prerequisites: Biometry 601 and concurrent registration in Biometry 602 or NS 641 or equivalent knowledge. Basic knowledge about the nutritional aspects of growth and development and about nutritional biochemistry. TBA. J-P. Habicht.
This course covers principles of nutritional epidemiology, impact assessment of nutrition intervention programs, and nutritional surveillance. Principles of using nutritional information in decision making are presented. The course shows how the biochemistry and physiology of nutrition can be related to epidemiological assessment and research strategies.

NS 638 Epidemiology of Nutrition Seminar
Spring. 3 credits. Reserved for graduate students planning field intervention studies; by permission of instructor. Prerequisite: NS 637. TBA. J-P. Habicht.
This course will develop skills in the preparation and interpretation of epidemiological data by discussing current research topics and issues.

NS 640 Social Science Theories in Nutrition
Fall. 3 credits. Limited to 20 graduate students. T R 10:10-12:05. J. Schal.
Social science theories and paradigms of sociology, psychology, anthropology, economics, political science, geography, and history that contribute to understanding food, eating and nutrition will be discussed to understand how theories apply to nutrition topics, issues, and problems.

NS 644 Community Nutrition Seminar
This seminar, sponsored by the Cornell Community Nutrition Program, focuses on research presentations in nutrition education and other areas of community nutrition. Cornell faculty and graduate students and invited outside speakers present research proposals, results from ongoing research, theoretical bases for research, program evaluations, and discuss current programs and issues in community nutrition. The format varies but always includes discussion by participants.

NS 645 Nutrition Intervention in Communities: A Global Perspective
Spring. 3 credits. Limited to 25 graduate students with an interest in human nutrition and health and exceptional senior nutrition majors by permission. Prerequisite: NS 640. M W 9:10-10:30. C. Olson.
The goal of the course is to help students gain tools and develop a conceptual framework for thinking critically about nutrition interventions in communities around the world. The course involves extensive reading, active involvement in class discussions and fieldwork.

NS 646 Seminar in Physicochemical Aspects of Food
Spring. 1-3 credits. Prerequisite: a college course in organic chemistry or biochemistry. S-U grades optional. T R 1:25-2:40. B. Parker, B. Lewis.
An introduction to the physicochemical aspects of food, for graduate students who have had limited or no work in this area. The seminar uses the lectures of NS 345 as a basis for supplementary readings and critical review of research on selected topics.

NS 660 Special Topics in Nutrition
Fall or spring. 3 credits maximum each term. Registration by permission of the instructor. Division faculty.
Designed for students who want to become informed in any specific topic related directly or indirectly to nutrition. The course may include individual orientations, experience in research laboratories, a lecture series on a special topic selected by a professor or a group of students, and/or selected lectures of another course already offered. Topics may be changed so that the course may be repeated for credit.

NS 680 International Nutrition Problems, Policy and Programs
Spring. 3 credits. Prerequisite: permission of instructor. T R 11:15-12:30. M. Latham.
Designed for graduate students who want to learn about the important international problems of developing countries. The major forms of malnutrition related to poverty and their underlying causes are discussed. Emphasis is placed on programs and policies that can assist poor countries and communities to improve their nutritional and health status.

NS 681 Nutritional and Public Health Importance of Human Parasitic Infections
Fall. 2 credits. Prerequisites: graduate student status or permission of instructor. S-U grades optional. T R 2:30-4:15. J. Stephenson.
Reviews the scientific evidence on the relationships between human nutritional status and common human parasitic infections. Concentrates on malnutrition (protein-energy malnutrition, anemia) in developing countries. The parasitic infections emphasized are malaria, hookworm, ascari, schistosomiasis, and trichuriasis. Format is lecture-discussion.

NS 683 Field Studies in International/Community Nutrition
Fall 1 credit. Graduate student status or permission of instructor required. Strongly recommended for graduate students doing field research. S-U grades only. Mainly audio-tutorial format. Available as independent study most semesters. TBA. L. Stephenson.
Reviews practical considerations in conducting field research in developing countries, including (1) seeking fundings, (2) experimental design issues, (3) choice of procedures, and (4) planning for and carrying out data collection. Also includes how to a) construct a C.V., b) write an abstract and prepare a clear 10-minute talk with legible slides (FASEB formation), and c) when, where, and how to publish research results. Extensive handouts. Lecture/demonstration/discussion.

NS 685 Food and Nutrition Policy (also Agricultural Economics 685)
Spring. 3 credits. Prerequisites: introductory microeconomics, intermediate statistics (through multiple regression), or instructor's permission. M W 2:55-4:10.
D. Sahn.
This course examines the role of government policy in alleviating poverty, food insecurity, and malnutrition in developing countries. Topics covered include methodologies for economic policy analysis of time use and food acquisition behavior, the "production" of nutritional outcomes, and the role of price policy and markets. Course readings draw largely on examples from Africa and Asia.

NS 690 Trace Element and Isotopic Analysis (also Chemistry 626)
Spring. 3 credits. Primarily for graduate students and advanced undergraduates. Prerequisite: Chemistry 288 or 390, 302 or Chemistry 208 and Mathematics 112, or permission of instructor. S-U grades optional. Offered alternate years. T R 10:10-12:10. J. T. Brennan.
Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications.

NS 698 International Nutrition Seminar
This seminar series consists of presentations by Cornell faculty and graduate students, and by invited outside speakers. Speakers cover a range of topics relating to nutritional problems, policy, and programs in the non-industrialized countries.

NS 699 Special Topics in International Nutrition
Fall and spring. 3 credits maximum each term. Registration by permission of instructor. Faculty in International Nutrition Program.
This option is designed for graduate students, mainly those with a concentration in international nutrition, who wish to become familiar with some specific topic related to international nutrition that is not adequately covered in an existing course. It usually consists of tutorial study on an agreed topic. Because the topics change, the course may be repeated for credit.

**NS 700 Current Topics in Toxicology (also Toxicology 698)**

Fall or spring. 1–3 credits. S-U grades optional. TBA Staff.

A discussion of the most current developments in various areas of toxicological research and testing. Faculty and students will participate jointly in evaluating research findings and provide seminars and discussion of such material. For information regarding the topic, instructor, and credit, contact the office of the Graduate Field of Environmental Toxicology.

**NS 702 Seminar in Toxicology (also Toxicology 702)**

Fall or spring. 1 credit. S-U grades only.

T 12:20. Staff.

The seminar program covers varied topics in biochemical, genetic, nutritional, veterinary, and regulatory toxicology, ecotoxicology, and environmental chemistry. Included are presentations of basic research studies, fundamental concepts, and research activities involving environmental problems of a toxicological nature. Presentations are given by speakers from Cornell and visitors.

**NS 703 Seminar in Nutritional Sciences**

Fall and spring. 1 credit. S-U grades only.

T 12:20 or W 12:20. Division faculty.

Presentations of original articles pertinent to the Nutritional Sciences. Students will learn how to make professional presentations and how to critique the presentations by others. In addition, students will read and learn how to interpret original articles published in a wide variety of journals.

**NS 707 Nutrition as an Integrating Discipline: Evaluation, Criticism, Application**

Fall. 3 credits. Prerequisites: advanced graduate standing and permission of the instructor. 2-hour class period per week plus discussion and workshop. M 1:25–3:20. Not offered 1999–2000.

M. Kazaninoff, K. Rasmussen.

The goal of this course is to provide an integrative capstone learning experience for advanced graduate students with majors or minors in nutrition. Groups of students will focus on a series of special problems in nutrition drawn from those currently faced by nutrition professionals. Special problems may involve assuming the role of consultants, expert committee members or peer-reviewers who are charged with answering questions or formulating recommendations related to research, programs, or policies.

**NS 899 Master's Thesis and Research**

Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

**NS 999 Doctoral Thesis and Research**

Fall or spring. Credit to be arranged. Prerequisite: permission of the chair of the graduate committee and the instructor. S-U grades optional. Division graduate faculty.

**FACULTY ROSTER**

Bauman, Dale, Prof., Animal Science/Nutritional Sciences.

Miller, Dennis, Prof., Food Science/Nutritional Sciences.

Van Campen, Darrell R., Assoc., Prof., U.S. Plant, Soil, and Nutrition Laboratory/Nutritional Sciences.
Military instruction began at Cornell University in 1868 under the provisions of the Morrill Act of 1862. Since that time, officer education has been highlighted by the construction of Barton Hall in 1914 and the establishment of a formal Reserve Officers Training Corps (ROTC) unit in 1917. The program evolves to keep pace with the latest military changes and emphasizes the development of leadership and managerial skills. Cornell’s Officer Education Program has produced many outstanding civilian and military leaders. The Officer Education Programs prepare students for a commission as an officer in either the United States Army, Navy, Air Force, or Marine Corps. Each service program is headed by a senior military officer who also serves as a full professor on the Cornell faculty.

MILITARY SCIENCE

Lieutenant Colonel John M. Keefe, Engineer, United States Army, Professor of Military Science and Commanding Officer, U.S. Army ROTC Instructor Group
Major Brian Edholm, Military Intelligence, United States Army
Captain Scott Hillmer, Infantry, United States Army
Captain Reginald Snell, Armor, United States Army

United States Army ROTC Program

The primary objective of the Army Officer Education Program at Cornell is to commission the future officer leadership of the United States Army. Intermediate objectives are to provide students with an understanding of the fundamentals of responsibility, integrity, and self-discipline, as well as an appreciation of the citizen’s role in national defense. The application of the decision-making process to a variety of situations is given major emphasis as a valuable aid in developing leadership potential. These objectives are achieved through a program normally covering four years. A two-year program is available for those who qualify. The program includes specific courses in military science, more general academic subjects that assure a well-rounded education, practical training in leadership through participation in the Cadet Corps (including attendance at one six-week summer camp at an Army installation), and the opportunity to participate in a number of extracurricular activities. The combination prepares the student for commissioning and effective performance in the many branches of the Army. The student’s academic major, academic performance, leadership ability, personal desires, and the needs of the Army determine the branch of the Army in which the student is commissioned upon graduation.

Requirements for Enrolling

Applicants must be citizens of the United States and be able to obtain a Secret level security clearance prior to being commissioned as lieutenants. (Non-citizens may enroll in selected portions of the program.) Students must meet Army medical requirements. Overall sound mental and physical condition is essential, and students are required to undergo periodic physical fitness tests. Enrollment and continuation in the program is subject to the approval of the Professor of Military Science. Enrollment in specific courses by students not formally enrolled in the program must be approved by course instructors. Contracted students must register for letter-grade military science classes and leadership laboratories for the purpose of commissioning into the United States Army.

Four-Year Program

The Four-Year Program is open to students in their freshman year or, with the approval of military and university authorities, to sophomores in a five-year degree program. Veterans of the Armed Forces of the United States and students entering Cornell with AROTC credit from secondary or military schools (Junior Division AROTC) may receive advanced standing, if qualified. Under the Four-Year Program students enroll in the Basic Course (Mil S I and II) during the first two years, and the Advanced Course (Mil S III and IV) during the next two years. A total of twelve credits of military subjects are taken. In addition, academic-enrichment courses are required in such fields as written communications, computer science, and military history. All cadets attend a five-week camp, with pay, between the junior and senior years. All cadets participate in physical fitness training three days per week. Each year selected cadets are sent to the Army’s Airborne School, Winter Survival School, and Air Assault Course, depending upon availability and student standings within the ROTC program.

Basic Course (Mil S I and Mil S II)

Students in the first year of the Basic Course take one classroom course in military science in the fall and spring semesters, for which they receive academic credit depending upon their college. These courses include study of the U.S. organization for defense and principles and techniques of leadership and management.

Students also participate in leadership modules that include rappelling, orienteering, drill and ceremony, physical training, winter survival, rifle marksmanship, historical site visits, land navigation, interpersonal communication, and individual tactical training. These modules are designed to promote personal development and enrichment. While they do not receive academic credit for these activities, students may receive physical education credit. Typical freshman participation in Army officer education is 48 1/2 program-related hours.

During the fall of the second year, students take a two-credit course in American military history. The course consists of instruction in three primary areas. The first section develops the concept of the art and theory of modern warfare. It analyzes America’s first attempt at war, the American Revolution, and ends with the development of modern warfare under Napoleon Bonaparte. The second section focuses on America at war in the nineteenth century. Section three focuses on warfare in the twentieth century and concludes with the prospects of future actions for the military.

During the spring of the second year, students take a one-credit course in map reading and spend approximately two hours a week in practical leadership training, land navigation, and military skills.

Advanced Course (Mil S III and Mil S IV)

The Advanced Course of the Four-Year Program is open to students who have successfully completed the Basic Course and are accepted by the Professor of Military Science for further enrollment. It is also open to students who have gained appropriate advanced standing through either successful completion of Basic Camp, a six-week summer training camp, or prior military training. Students entering the Advanced Course must have the equivalent of four academic semesters remaining at Cornell or another degree-granting institution. Students must pass required physical and aptitude tests. In addition, the past performance and desire of each student is evaluated to determine potential for eventual commissioning.

When students are accepted for the Advanced Course or accept a scholarship, they sign a written contract with the U.S. government. Under terms of the contract, they agree to complete the Advanced Course and to accept a commission if offered. Concurrently with the signing of the contract, students enlist in the United States Army Reserve.

Classroom study in the Advanced Course includes one military science course each semester on such subjects as leadership and management, small-unit tactics, and command and staff organization and functions. The two hours a week of practical leadership training continues, and between the junior and senior years all cadets attend a five-week advanced summer camp conducted at Ft. Lewis, Washington.

Scholarships

Scholarships are awarded on the basis of merit and may be available for two, three, or four years. AROTC scholarships are awarded each year to outstanding Basic Camp participants and students in the freshman and sophomore classes. Scholarships pay up to $16,000 toward tuition and mandatory fees. Scholarship cadets and Advanced Course cadets also receive $150 a month for up to ten months a year. Scholarship cadets also receive $450 per year toward the cost of textbooks.
Commissioning
All students who successfully complete the Advanced Course, including the advanced summer camp, are commissioned as second lieutenants in the United States Army upon graduation.

Service Obligations
ROTC graduates may serve on Active Duty, in the Army Reserve, or in the National Guard, depending upon the needs of the Army and the leadership abilities of the cadet. Officers beginning active duty attend the Officer Basic Course (normally ten to sixteen weeks) of their assigned branch. Upon completion, officers are assigned to a unit and location determined by the desires of the individual and the requirements of the Army. Officers selected for reserve duty attend the Officer Basic Course, after which they are released to reserve status.

ROTC graduates generally serve four years on active duty and four years in reserve status; however, some may serve eight years on reserve duty.

Choice of Branch
Cadets in the second year of the Advanced Course (normally the senior year) may specify the branch of the Army—such as Infantry, Armor, Field Artillery, Air Defense Artillery, Aviation, Corps of Engineers, Signal Corps, Military Police, Military Intelligence—in which they prefer to serve. They are notified in December of the branch to which they are assigned. Appointment in a chosen branch depends upon the student's academic and officer education performance, degree area, and the needs of the Army at that time.

Graduate Study
Active duty deferments, or educational delays, may be granted to individuals who want to attend graduate school at their own expense. Requests will be considered on the basis of needs of the service. Admission to graduate school is the student's responsibility.

Benefits
Each cadet in the Advanced Course (Mil S III and Mil S IV) receives $150 a month for up to ten months a year. While attending the advanced summer camp (between the junior and senior years), each cadet receives approximately $700. A cadet in the Two-Year Program receives the same payments as cadets in the Advanced Course and, in addition, receives approximately $700 for summer Basic Camp attendance before entering the Advanced Course.

Military Science Courses
All cadets take one course and a leadership laboratory each semester in military science. The number of hours a week spent in the classroom varies from semester to semester, as does the credit received for each course.

Freshman Year (Mil S I)

<td>MIL S 101</td>
<td></td>
<td>United States Organization for Defense</td>
<td>Fall</td>
<td>1</td>
<td>Required</td>
</tr>
</tbody>
</table>

Students examine the U.S. defense structure in terms of organizations, mission, personnel, and relationships among and between military forces and branches and departments of the government. The U.S. Army force structure is examined at all levels. The complexities and magnitude of operating the defense organization are studied in a framework for subsequent instruction. Students develop skills in conducting oral and written presentations.

Mil S 102 Leadership Theory
Spring. 1 credit. Required. Staff.
This course allows students to develop a basic understanding and appreciation of theories of social and organizational psychology and behavior as they apply to the military setting. Attention is given to leader types, the source and exercise of authority, and the impact of varying styles of leadership, resource management, motivation, and organization effectiveness. The student is introduced to the concepts of integrity, ethics, and professionalism. Classes on historical events and strategy are also presented.

Sophomore Year (Mil S II)

</tbody>
</table>

Students learn the basic principles of group dynamics at the level of the smallest military unit, the squad. Troop-leading procedures are introduced through case studies and role-playing exercises. Leadership theories introduced in Mil S 102 are examined in a variety of realistic settings. The practical application of behavioral theories is explored in the context of small military organizations. The course will also provide practical knowledge of the various forms of topographic representation. Students will use maps in terrain association and land navigation. Knowledge of topography is complemented by an orientation on significant environmental influences of physical, social, and climatic factors. Portions of the course offer experience in land navigation and orienteering.

Mil S 321 Armed Conflict in Society
Fall. 2 credits. Required. Staff.
This course provides practical knowledge in American Military History. It is primarily an overview course designed to provide an understanding of the general nature of warfare and its effect on society. Warfare has also affected the United States. The course consists of three primary areas of instruction with an emphasis on American military history. The first area of instruction addresses the art and theory of modern warfare. It analyzes America's first attempt at war, the American Revolution, and ends with the development of modern warfare under Napoleon Bonaparte. The second phase focuses on America at war in the nineteenth century. It places particular emphasis on the American Civil War and the strategy of annihilation versus the strategy of attrition. The final phase looks at warfare in the twentieth century and finishes with an analysis of the future of warfare for the military of the United States.

</tbody>
</table>

After an initial introduction to techniques of presenting briefings, students are provided with a broad understanding of the principles and application of teamwork in military organizations. Particular emphasis is given to leadership responsibilities of the commander as the team coordinator. This course helps students develop an understanding of the roles and contributions of the various branches of the Army in support of the military team.

Mil S 332 Leadership in Small-Unit Operations
Spring. 2 credits. Required. Prerequisite: Mil S 331. Staff.
This course provides an understanding of the nature of decision making and the tactical application of the military team. Through the use of conferences and extensive practical exercises, students develop familiarity with the factors influencing a leader's decisions and the process of planning, coordinating, and directing the operations of military units through operation plans and orders.

An overview of the functions, responsibilities, and interrelationships among small-unit leaders, the commander, and the staff. Detailed discussions focus on actions of small-unit leaders, communication skills, army operations, the logistical support of the army in the field, and the army training system. The course focuses on the dynamics of leadership in battle through the detailed analysis of a series of case studies. Just war theory, ethics, and professionalism are also addressed in a seminar-type environment.

Mil S 442 Contemporary Military Environment
Spring. 2 credits. Required.
A continuation of Mil S 441. Conferences and seminars examine the techniques of effective military leadership with special attention given to professionalism and ethical considerations in the armed forces during both peacetime and armed conflict. Army operations and basic doctrine are also discussed. This is a capstone course designed to prepare the student for commissioning.

Practical Leadership Training
All Army Officer-Education Students
As with many laboratory periods, no credit is given, and participation is required for successful completion of the AROTC program. Students receive physical education credit for the laboratory. Each semester, cadets register for the appropriate leadership laboratory, consisting of physical fitness training three times per week, two hours of military training each week, and one or two weekend training exercises per semester.

Cadets meet for two hours each week as members of the cadet organization to...
participate in practical leadership exercises. Types of practical activities include rifle marksmanship, orienteering, drill and ceremonies, signal communications, physical fitness training, first aid, tactics and field exercises.

**MIL S III Leadership Laboratory III**
Cadets meet for two hours a week and some weekends to prepare for a five-week summer camp that follows their junior year. Emphasis is on the development of individual practical and leadership technique skills. Cadets rotate through leadership positions to develop an ability to apply decision-making processes to a myriad of situations. Cadets also acquire technical expertise and proficiency in signal communications, physical fitness, drill and ceremonies, rappelling, orienteering, tactics, water survival, and other military skills.

**MIL S IV Leadership Laboratory IV**
Senior cadets plan and operate the leadership laboratory programs for MIL S I–III cadets. The development of planning and supervisory skills is emphasized. Cadets have an opportunity to practice leadership skills developed during previous ROTC training and summer camp experiences. Includes two to three hours a week devoted to physical fitness.

**Professional Military Education (PME) Requirements**
In addition to the ROTC classes and leadership laboratories listed above, a number of courses are required as part of the contracted student's academic program. These courses are offered by the university and round out the student's professional education. The PME component of the ROTC program requires at least one college course in each of the following areas: communication skills, military history, and an introduction to computers. These courses must be completed prior to graduation and commissioning. Courses that meet these requirements are approved by the Professor of Military Science.

**NAVAL SCIENCE**
Captain V. Lynch, United States Navy, Professor of Naval Science and Commanding Officer, Naval ROTC Unit
Lieutenant Colonel R. Minor, United States Marine Corps
Lieutenant J. Cleary, United States Navy
Lieutenant M. Vannoy, United States Navy
Lieutenant J. Biondi, United States Navy

The objective of the Naval Officer Education Program is to prepare selected students for service as commissioned officers in the United States Navy and United States Marine Corps by supplementing their undergraduate education with instruction in essential concepts of naval science and fostering development of leadership, integrity, and dedication to their country and naval services. The program is compatible with most undergraduate major fields of study, including five-year baccalaureate degree programs on a case-by-case basis.

**College Program**
There are two College Programs available. Both lead to a commission in the Naval or Marine Corps Reserve.

Starting in the junior year, each of these programs provides textbooks, uniforms, subsistence allowances, and a subsistence allowance of $150 a month.

The regular College Program is four years long. Academic requirements for students in this program are somewhat less than those for scholarship students, as noted in the curriculum section of this booklet.

The Two-Year College Program begins the summer before the junior year, when students attend a required program with pay at the Naval Science Institute in Newport, R.I.

**Summer Training**
Each summer, students in the Scholarship Program spend approximately four to six weeks on a Navy ship or with a naval activity anywhere in the world for on-the-job training. College Program students attend one summer training session of the same duration between the junior and senior years.

**Active Duty Requirements**
Scholarship midshipmen commissioned in the Navy or Marine Corps Reserve serve on active duty for a minimum of four years. College program midshipmen commissioned in the Navy or Marine Corps Reserve serve a minimum of three years. In some cases, following commissioning, specialized training such as aviation or nuclear power will add additional active duty requirements.

**Choice of Assignment**
Graduates have an opportunity to request the duty they prefer upon graduation. These requests are given careful consideration, and every effort is made to assign newly commissioned officers their duty of choice.

Among the assignments available are duty in naval aviation as either a pilot or naval flight officer, on submarines, and on surface ships. Other specialties, such as special warfare or medical service corps, may be available on a limited basis.

**Marine Corps Options**
The United States Marine Corps is an integral part of the Naval Services and is commanded by the Commandant of the Marine Corps. One-sixth of the NROTC scholarship students may be Marine selectees who will be designated Marine-option midshipmen. Upon successful completion of the program they will be appointed second lieutenants in the United States Marine Corps Reserve.

Marine-option midshipmen follow the same program as other NROTC midshipmen for the first two years. Beginning with the junior year, Marine-option midshipmen are taught Marine oriented courses by a Marine Officer Instructor. For first class summer training (after the junior year), Marine-option students travel to Quantico, Virginia, where they undergo six weeks of intensive training known as the USMC Officer Candidate School. Upon commissioning the following year as second lieutenants, they are assigned to the Basic School at Quantico, Virginia. After the Basic School, the Marine officer is assigned duty in a variety of occupational fields.
Among the duties available are infantry, aviation, artillery, tracked vehicles, engineering, communications, electronics, supply, administration, and computer science. The officer may serve on board naval vessels or at shore installations of the Marine Corps or Navy, either in this country or overseas. The Marine Corps has a postgraduate training system similar in objectives and organization to that of the Navy. Marine officers selected for aviation receive flight training at the Naval Air Station, Pensacola, Florida, along with their Navy counterparts.

Curriculum
A student has three categories of requirements to fulfill as a midshipman. The first of these requirements is a weekly naval professional development session each semester. The second requirement is a naval science course each semester. The last set of requirements consists of other required courses prescribed by the Navy to meet the growing need for more and better technically educated junior officers.

Naval Professional Laboratories
Nav S 141-142, 241-242, 341-342, or 441-442
All students in the program participate in a ninety-minute professional development session each week. The session is held from 2:30 until 4:00 on Wednesday afternoons. This period consists of both drill and professional information briefings. Students gain experience in actual leadership situations and at the same time learn the fundamentals of seamanship, individual formations, movements, commands, discipline, courtesies, and honors. During information briefings special emphasis is given to applied leadership as it relates to the administrative and managerial aspects of a Navy or Marine Corps officer’s duties.

Naval Science Courses
All Navy and Marine midshipmen take one naval science course each semester during their freshman and sophomore years. Navy-option students continue to take a naval science course each semester during their junior and senior years. Marine-option students have slightly different curriculum requirements for their junior and senior years.

Freshman Year (Navy and Marines)
Nav S 101 Fundamentals of Naval Science
Fall. No credit.
A study of fundamental aspects of naval science, including its contributions to sea power, fleet organization and different warfare communities involved in the physical development of naval forces, resources that must be managed, and prospects for the future. Naval uniforms, customs, and traditions are also covered.

Nav S 102 Sea Power and Maritime Affairs
Spring. 3 credits.
Discussions examine the history of the Navy as a force in diplomacy and an instrument of U.S. foreign policy. Relationships between Congress and the military for determining the national defense policy are also explored. An integrated examination of current events and issues gives a historical perspective throughout the course.

Nav S 157 Principles of Sailing
Fall and spring. Physical education credit.
Instruction in basic sailing skills and safety principles. Students sail small boats on Cayuga Lake. Focus is on U.S. Navy Class B inshore skipper certifications.

Sophomore Year (Navy and Marines)
Nav S 201 Organizational Behavior and Small Group Processes
Fall. 3 credits.
The theme of the course is the “evolving role of the manager, organizational decision maker, and leader.” The course will begin by briefly studying the theoretical principles of management and will progress through practical skills of managers and leaders. Lectures, reading assignments, films, and discussions should provide students with an excellent opportunity to wrestle with complex managerial and leadership issues. The goal of this course is for students to begin to develop a sound personal leadership philosophy that will enable them to more effectively accomplish assigned responsibilities leading men and women in today’s demanding and increasing “hi-tech” naval environment.

Nav S 202 Naval Ship Systems I (also Mechanical and Aerospace Engineering 1)
Spring. 3 credits.
An introduction to primary ship-systems and their interrelationship. Basic principles of thermodynamics, propulsion, mechanical operation, internal communications, electronics, ship structure, and other marine systems.

Junior Year (Navy)
Nav S 301 Principles of Navigation (also Agricultural Engineering 305)
Fall. 4 credits.
An introduction to the fundamentals of marine navigation emphasizing piloting and celestial navigation procedures. The course covers coordinate systems, chart projections, navigational aids, instruments, compass observations, time, star identification, use of the nautical almanac, tides and currents, and Electronic navigation systems are discussed.

Nav S 302 Naval Operations
Spring. 3 credits.
The course covers the application of the nautical rules of the road and maneuvering board in order to avoid collisions at sea. Other aspects of naval surface ship operations that are introduced include visual and electronic communications methods, tactical disposition of forces, ship handling theory, and deck seamanship topics.

Senior Year (Navy)
Nav S 401 Naval Ships Systems II (Weapons)
Fall. 3 credits.
The principles and theories used in the development of naval weapons systems are examined. Initially, extensive study is made of detection systems, especially radar and sonar, followed by discussions of ancillary systems for computing, stabilizing, tracking, and weapons control and delivery.

Nav S 402 Leadership and Ethics
Spring. 3 credits.
A variety of topics important to the naval officer for both professional and managerial development are reviewed. The material is tailored for the midshipman to provide an understanding and appreciation of leadership and ethics in preparation for assignments in the naval service. Through the use of lectures, case studies, and role playing, the student will learn various aspects of Navy leadership and ethical decision-making. Marine-option students may also take this course.

Junior or Senior Year (Marine Options)
Nav S 310 Evolution of War
Spring. 3 credits.
A study of warfare that examines the relationship of military strategy to geography, economics, sociology, technology, and national political realities and values; the evolution of warfare, including principles of war, weapons, and associated equipment; and the effects of nuclear weapons and guerrilla warfare on traditional concepts of national strategy.

Nav S 410 History of Amphibious Warfare
Spring. 3 credits.
The history of the development, theory, techniques, and conduct of amphibious operations from 490 B.C. to the present. Special emphasis will be on amphibious operations conducted in the central Pacific during World War II and the future of amphibious operations.

Other Required Courses
Naval Option Scholarship Program
To be eligible for a commission in the United States Navy, midshipmen must successfully complete all the requirements for a baccalaureate degree in any field of study offered by Cornell University and complete courses in the following subjects (specified courses to be approved by the Professor of Naval Science):
- American military affairs or national security policy (one semester)
- English (one year)
- Calculus (one year)
- Calculus-based physics (one year)
- Computer science (one semester)

The calculus requirement must be satisfied by the end of the sophomore year and the physics requirement by the end of the junior year.

Although free choice of academic majors is permitted, students are encouraged to pursue majors in engineering and the physical sciences to meet the technological requirements of the modern Navy.

Naval Option College Program
Naval-option College Program students must complete one year of college-level study in mathematics, physical science, and English as a prerequisite for commissioning. The mathematics course must be completed by the end of the junior year, the physical science course by the end of the senior year. In addition, one term of computer science is required. College Program students who desire entry into the Naval-option Scholarship Program should fulfill all of the requirements applicable to Naval-option scholarship students if they wish to be eligible and competitive for a scholarship controlled by the Chief of Naval Education and Training.
**Marine Option**
Any midshipman, in either the Scholarship Program or the College Program, who completes all of Cornell University’s degree requirements in any academic major, is eligible for a commission in the U.S. Marine Corps or U.S. Marine Corps Reserve. Marine-option students take the same naval science courses and naval professional laboratories as Navy-option students for the freshman and sophomore years. During the junior and senior years, Marine-option students have slightly different naval science course requirements than their Navy-option student counterparts. Two semesters of courses (a minimum of 3 hours each) in the subject area of American Military Affairs or National Security Policy are required. One semester of a modern foreign language must be completed.

**Extracurricular Activities**
The NROTC midshipman at Cornell is offered a broad range of activities, including sail training and a comprehensive intramural sports program. Midshipmen participate in a myriad of social events, including the annual Naval/Marine Corps Birthday Ball.

**DEPARTMENT OF AEROSPACE STUDIES**
Colonel James L. Wilson, Jr., United States Air Force, Professor of Aerospace Studies and Commander, Air Force ROTC Detachment 520
Captain Reid N. Orth, United States Air Force
Captain Daniel P. McAllister, United States Air Force

The objective of the Air Force Officer Education Program at Cornell is to prepare men and women for positions as officers in the United States Air Force. The program is designed to teach students about the mission and organization of the Air Force, the historical development of airpower, leadership, and management. Students study national security policy and the role of the military in a democratic society. This program includes specific courses in aerospace studies and practical leadership laboratories.

**Requirements for Enrollment**
The Air Force Officer Education Program is open to any qualified undergraduate or graduate student enrolled in any major field of study. An applicant must be a United States citizen to become a commissioned officer. Noncitizens may enroll and will receive certificates acknowledging completion of the course but cannot receive a commission.

All applicants receive physical examinations at no cost and must meet certain physical requirements to be accepted. Students who are interested in qualifying for flying categories (pilot or navigator) must meet more stringent physical requirements. In addition, students enrolled in the commissioning program must meet specified physical fitness requirements.

Though the program is designed to prepare future Air Force officers, the Department of Aerospace Studies’ academic courses are open to all students at Cornell.

**Four-Year Program**
The Four-Year Program is open to all qualified freshmen. Sophomores may also enter a condensed version of the four-year program after coordination with the AFROTC staff. Students in a five-year program may enroll during their freshman, sophomore, or junior year. Veterans of the U.S. armed forces and students entering Cornell from military schools may receive advanced standing, subject to approval by the Professor of Aerospace Studies.

The Four-Year Program consists of General Military Courses (GMC) and Professional Officer Courses (POC). For scholarship cadets, the first year of the GMC carries no military commitment, and students may withdraw at any time. For nonscholarship cadets, both years of the GMC carry no military commitment, and students may withdraw at any time.

**General Military Course**
Students in General Military Courses (GMC) take a one-credit-hour Aerospace Studies course each semester. During the freshman year, the student examines the organization and mission of the United States Air Force and the environment of the Air Force officer. In the sophomore year, the student studies the history and development of American air power. In both years, officership and professionalism within the United States Air Force are emphasized.

Students also spend two hours a week in a leadership laboratory. Leadership laboratory provides cadets with the opportunity to put into practice the skills they learn in their aerospace studies classes. These laboratories focus on the development of officer qualities through such activities as drill and ceremonial exercises, group leadership problems, confidence-building exercises, and guest lecturers. In addition, all students participate in summer field training for four weeks between their sophomore and junior years.

**Professional Officer Course**
The Professional Officer Courses (POC) provide a two-year advanced program of instruction. Students who are accepted for the POC must have successfully completed GMC, validated the basic course and must meet academic and physical standards. Each cadet accepted into the POC must sign an agreement to complete the program and accept, if offered, a commission in the United States Air Force upon graduation.

Classroom study in the POC is a three-credit-hour course each semester. In the junior year, cadets study Air Force leadership and management at the junior officer level. During the senior year, cadets study the elements of national security and the military’s role in American society. Leadership laboratory requires two hours a week in the junior and senior years. In leadership laboratory, cadets are exposed to advanced leadership experiences and apply principles of leadership learned in the classroom.

**Two-Year Program**
The Two-Year Program consists of the last two years (Professional Officer Courses) of the regular Four-Year Program plus a five-week summer training course preceding enrollment.

The Two-Year Program is open to all qualified students with two years of academic study remaining at Cornell (graduate or undergraduate) or at schools supported under a crosstown agreement. Applications are accepted from October through April of the academic year preceding the applicant’s planned entry into the program. Selectees are then required to complete a five-week summer training program at government expense.

**Scholarships**
The Air Force offers four-year scholarships to high school seniors and two- and three-year scholarships to college students. Four-year scholarships are offered on a competitive basis in specified majors to high school seniors. Scholarship information can be obtained from a high school guidance counselor, from Air Force ROTC officers at Cornell (AFROTC phone number is 607-255-4004), from a local Air Force recruiter, or from AFROTC/RROO, Maxwell AFB, AL 36112-6663, 1-800-522-0033, extension 2093. The deadline for submitting a four-year scholarship application is December 1 of the year preceding the academic year in which a student wants to enter the program. Students should apply early.

**Scholarships for two and three years**
Applications for these scholarships should be made to the Professor of Aerospace Studies during the freshman or sophomore years of college. All selections are based on the student’s major, scores achieved on the Air Force Officer Qualifying Test, the student’s overall grade point average, and the recommendation of the Professor of Aerospace Studies. Scholarship amounts range from $3,400 per year to full tuition, fees and books, and provide a $150 monthly nontaxable allowance during the school year. Scholarships do not include the cost of room and board.

**Fees**
An initial uniform deposit of $50 is required on entry into AFROTC. Two subsequent $50 uniform payments are due, one on entry into the POC and one before commissioning. At that point, cadets may purchase uniforms with their deposits or return uniforms and receive their deposits back.

**Benefits**
All cadets in the advanced program (POC)—whether they are on scholarship or not—receive a $150-a-month, nontaxable subsistence allowance during the academic year. During the four- or five-week summer field training (see below), each cadet receives a pay allowance plus an allowance for travel to and from the field site. Textbooks and supplies required for Department of Aerospace Studies courses are provided.

All cadets are eligible to participate in AFROTC-sponsored field trips made to Air Force bases throughout the country as well as voluntary summer programs for professional development. Scholarship and advanced cadets (POC) are entitled to space-available travel on Air Force aircraft flying within the continental United States.

**Field Training**
There are two types of field training: a four-week course for cadets in the Four-Year Program and a five-week course for Two-Year Program applicants. Students in these...
Field training is designed to stimulate the development of military leadership skills through meaningful experiences. The curriculum consists of aircraft, aircrew, and survival orientation, junior officer training, physical training, small arms training, social actions program, and supplemental training. The five-week training program includes sixty hours of Air Force ROTC academic work that substitutes for the freshman and sophomore Aerospace Studies courses.

Cadets may also volunteer for one of many Advanced Training Programs. These programs include the Professional Development Program, Air Force Academy Free-Fall Parachute Training, the British Royal Air Force (RAF) Exchange Program, Research and Development Experiences, the Academy Soaring Program, and Army Airborne Training.

**Commissioning Obligations**

All students who successfully complete the AFROTC advanced program (POC) are awarded a baccalaureate degree, tendered a commission, and enter the Air Force as second lieutenants. Second lieutenants commissioned in nonflying categories are required to serve on active duty for four years. Pilots are required to serve on active duty for five years after completing flying training. Navigators serve six years after completing training.

**Air Force Careers**

The Air Force assigns new officers to a career field based on mission requirements, educational background, and officer preferences. Students in the engineering-scientific category may be assigned to practice in their specialty in research and development, communications, electronics, aeronautics, astronautics, biological sciences, computer design and maintenance, meteorology, space, or other engineering and scientific fields. Graduates in the non-technical category can anticipate assignments in manpower management, information management, logistics, law enforcement and investigation, intelligence, personnel, transportation, accounting and finance, and other career fields. They will be placed in positions of responsibility and be given the opportunity to further their development in leadership and management skills. Their specific educational expertise may be required.

Any undergraduate major is suitable for those who are qualified and interested in becoming pilots or navigators. After completion of flying training, personnel are assigned to a specific type of aircraft.

**Curriculum**

Students in the Four-Year Program are required to take all courses listed below. Students in the Two-Year Program are required to take all of the courses listed for the junior and sophomore years. There are no prerequisites for any Aerospace Studies courses.

---

**Freshman Year**

**Air S 161 The Foundations of the United States Air Force I**

Fall. 1 credit

This is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: mission and organization of the Air Force, officer professionalism, military customs and courtesies, Air Force officer opportunities, group leadership problems, and an introduction to communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

**Air S 162 The Foundations of the United States Air Force II**

Spring. 1 credit

Continuation of Air S 161.

**Sophomore Year**

**Air S 211 The Evolution of USAF Air and Space Power I**

Fall. 1 credit

This course is designed to examine general aspects of air and space power through a historical perspective. Utilizing this perspective, the course covers a time period from the first balloons and dirigibles to the space-age global positioning systems of the Persian Gulf War. Historical examples are provided to extrapolate the development of Air Force capabilities (competencies) and missions (functions) to demonstrate the evolution of what has become today's USAF air and space power. Furthermore, the course examines several fundamental truths associated with war in the third dimension: e.g., Principles of War and Tenets of Air and Space Power. As a whole, this course provides the students with a knowledge-level understanding of the general element of employment of air and space power from an institutional, doctrinal, and historical perspective. In addition, students will continue to discuss the importance of the Air Force Core Values by examining operational examples and historical Air Force leaders and will continue to develop their communication skills.

**Air S 212 The Evolution of USAF Air and Space Power II**

Spring. 3 credits

Continuation of Air S 211.

**Junior Year**

**Air S 331 Air Force Leadership and Management I**

Fall. 3 credits

This course is a study of leadership, quality management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory enhances this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course.

**Air S 332 Air Force Leadership and Management II**

Spring. 3 credits

Continuation of Air S 331.

**Senior Year**

**Air S 401 National Security Affairs/ Preparation for Active Duty I**

Fall. 3 credits

This course examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officer professionalism, military control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences, giving students the opportunity to apply the leadership and management principles of this course.

**Air S 402 National Security Affairs/ Preparation for Active Duty II**

Spring. 3 credits

Continuation of Air S 401.

**Leadership Laboratory Courses**

All Air Force cadets spend 2 hours a week throughout the academic year in a leadership laboratory for which no academic credit is given. Occasionally laboratories are held at times other than the normally scheduled period. All cadets are expected to participate in an evening formal dinner and to meet minimum physical fitness and weight standards each semester. Leadership lab is open to students qualified to compete for an Air Force commission.

**Air S 141-142 Initial Military Experiences**

Introduction to the responsibilities, life, and work of an Air Force officer. Basic knowledge of drill and ceremonies, military courtesies, and the wearing of the uniform. Field trip to a local military installation.

**Air S 241-242 Intermediate Military Experiences**

Develops skills in giving commands for drill and ceremonies. Introduction to the Air Force base environment in which the Air Force officer functions. Includes a look at career areas available based on academic majors. Students participate in leadership situations through military drills and ceremonies. Field trip to a local military installation.

**Air S 341-342 Junior Officer Leadership Experiences**

Cadets assume leadership responsibilities similar to those of a junior officer. Emphasis is on the importance of applying effective human relations skills in dealing with superiors, peers, and subordinates. Cadets also gain insight into the general structure and progression patterns common to selected Air Force officer career fields.

**Air S 441 Advanced Leadership Experiences**

Cadets assume command leadership responsibilities to operate a military organization. Cadets apply effective leadership and managerial techniques with individuals and groups to provide self-analysis of leadership and managerial abilities.

**Air S 442 Precommissioning Laboratory**

Factors that facilitate transition from civilian to military life are reviewed. The need for military security, base services and activities, personal finances, travel regulations, and social obligations are introduced.
**DEPARTMENT OF PHYSICAL EDUCATION AND ATHLETICS**

**ADMINISTRATION**

Alan E. Gantert, director

**COURSES**

The courses and fees described in this catalog are subject to change or cancellation at any time by official action of Cornell University. For current fee information on physical education courses call 255-4286; for outdoor education courses, call 255-6415 (ext. 2).

Enrollment in any course is limited by the space available. Other restrictions are included in the course description. Most courses are coeducational. The specific time and place of class meetings, as well as information about fees, are available at the physical education course registration or may be found on “Bear Access,” a package of software for accessing a variety of network services at Cornell, or on the World Wide Web (at http://www.athletics.comell.edu/PE). Course fees are billed through the Office of the Bursar.

Additional course offerings may be listed at registration, as the curriculum is frequently reviewed and changed.

**Aquatic Courses**

**Lifeguard Training**

Fall and spring. Fee charged. Prerequisites: swimming test consisting of 500 yards, demonstrating three strokes, treading water without the use of hands, and retrieving a brick from seven feet of water. Three classes a week.

An American Red Cross certification course. Practice and execution of lifeguarding first aid and CPR skills and techniques. Certification is awarded in lifeguarding, first aid, and CPR upon satisfactory completion of the course.

**Lifeguard Training Instructor**

Spring. Fee charged. Prerequisites: current Red Cross ICT or instructor card, written and skill tests in lifeguarding, first aid, and CPR techniques. Students must not miss first class. Two classes a week.

American Red Cross lifeguarding instructor certification is awarded upon successful completion.

**Scuba, Open-Water**

Fall, spring, and summer (6 weeks). Fee charged.

Program includes classroom work skill training in a pool and open-water training in Cayuga Lake. PADI open water certification is awarded upon successful completion.

**Scuba, Advanced Open-Water**

Fall and spring. Fee charged.

Advanced-level open-water training in Cayuga Lake. For those who have completed the open-water course.

**Rescue Diver**

Fall and spring. Fee charged.

Advanced course for scuba divers. For those who have completed Advanced Open-Water Scuba certification and are interested in learning rescue and safety techniques.

**Dive Master**

Fall and spring. Fee charged.

Advanced-level scuba course open only to those who have completed the Rescue Diver course. NOTE: This is a long, time-consuming course, which requires the student to be in good physical and swimming shape.

**Specialty Scuba Diving**

Fall and spring. Fee charged.

Courses offered in the following specialty diving areas: navigation, search and recovery, night diving, deep diving, underwater photography, wreck, multi-level, boat, tropical fish identification and buoyancy control, and underwater naturalist.

**Scuba Diving Trips**

Spring. Fee charged.

This course is offered during the spring intersession period. Scuba trips to various destinations such as the Bahamas. Locations change from year to year. See the information sheet at the registration table.

**Swimming, Introduction to (ARC)**

Fall, spring, and summer. (6 weeks).

Instruction and practice in skills leading to passing the basic swimming proficiency test.

**Swimming, Advanced Beginning (ARC)**

Spring.

Ideal for all who have taken one term of Beginning Swimming. Regardless of whether the test was successfully completed. Areas of special emphasis are the crawl stroke and rotary breathing, back crawl, elementary backstroke, diving, treading water, and underwater swimming. The primary objective is to strengthen the student’s confidence and competence.

**Swimming, Intermediate (ARC)**

Fall and spring.

Practice of basic skills and five basic strokes; front crawl, back crawl, elementary backstroke, breaststroke, sidestroke.

**Swimming, Advanced (ARC)**

Fall and spring.

Practice of nine strokes: front crawl, back crawl, elementary backstroke, breaststroke, inverted breaststroke, sidestroke, overarm sidestroke, treading, and butterfly.

**Swimming Conditioning**

Fall and spring. Prerequisite: reasonable swimming ability. Introduction to and practice of different training methods. Final objective: to swim 2,500 yards during class period. Primarily a conditioning and not an instructional course.

**Water Safety Instructor**

Spring. Fee charged. Prerequisite: passing of written and skill water tests which are given on the first day.

American Red Cross water safety instructor certification is awarded upon satisfactory completion of the course. This is not a course for a casual participant. Approximately 45 hours of work is required.

**Water Safety Instructor Refresher Course**

Spring. Fee charged.

Selected sessions of the water safety instructor certification course.

**Bowling Courses**

**Bowling**

Fall and spring. Fee charged.

For the beginning and intermediate bowler. Shoe rental is included in the fee.

**Dance Courses**

Develop flexibility, coordination, and the ability to perceive and reproduce phrases of dance movement with rhythmic accuracy, clarity of body design, and fullness of feeling. Auditions are required for admission to all advanced courses, since they require the mental and physical ability to perform more complex phrases in various styles.

**Ballet I**

Fall and spring.

**Ballet II**

Fall and spring.

**Ballet III**

Fall and spring.

**Ballroom Dancing**

Fall and spring. Fee charged.

One class a week, Helen Newman Hall. Students and their partners must sign up at course registration. Includes instruction in the waltz, swing, cha cha, calypso, tango, and others.

**Belly Dancing**

Fall and spring. Fee charged.

Belly dancing is an exciting Middle Eastern folk art that can help in the development of flexibility, body awareness, and overall body tone. The class will begin with warm-ups and continue with basic movements and rhythms, then put them together in a dance to music of the Middle East.

**Introduction to Swing Dance**

Fall and spring. Fee charged.

No partners are needed. Beginners can expect to develop significant capacity for enjoyment of two forms of swing dance: jitterbug and street boogie. Partners will be rotated throughout the course. Effort will be made at registration to equalize male and female ratios.

**Latin Dance**

Fall and spring. Fee charged.

Partner sign-in required. This is an introductory course that will teach salsa, mambo, Latin and merengue. Emphasis on listening, feeling and expressing Latin rhythms with precise detail and technique.

**Modern Dance I (also Theater Arts 124)**

Fall and spring.

**Modern Dance II (also Theater Arts 232)**

Fall, spring, and summer (6 weeks).

**Modern Dance III (also Theater Arts 306)**

Fall and spring.

**Modern Dance IV (also Theater Arts 308)**

Spring.
Equitation Courses

Basic, Intermediate, Advanced
Fall, spring, and summer (6 weeks). Fee charged.

All riding classes are held at the Cornell Equestrian Center located on Pine Tree Road near East Hill Plaza. Detailed information will be offered by the equitation staff at the registration sign-up table. Basic—never ridden, intermediate I—completed basic with knowledge of walk/trot/canter; Intermediate II—walk/trot/canter with control over 2' course; Advanced—strong jumping/dressage skills with experience hunting/showing/eventing. Students must fill out a release form to participate in any riding class.

First Aid/CPR Courses

Emergency Response
Fall and spring. Fee charged.

This advanced-level first aid course is the most comprehensive available without NYS certification. Sixty hours of training includes CPR for the Professional Rescuer and oxygen administration, as well as many of the first aid skills taught in a basic EMT class. American Red Cross certification is valid throughout the United States and is accepted by many states as a Certified First Responder equivalent. Certification is good for three years. This certification would be appropriate for camp medical directors and those who work closely with pre-hospital medical staff.

NYS Emergency Medical Technician—Basic
Two-semester course. Fee charged.

This intensive 130-hour course is taught throughout both the fall and spring semesters. Course includes training in CPR for the Professional Rescuer, oxygen administration, airway management, fracture management, bleeding control, expanded patient assessment, spinal immobilization, medical anti-shock trousers, and defibrillation. Students will qualify for the NYS EMT Certification Exam upon successful completion of this course. Rigid attendance and participation requirements are strictly enforced.

Fishing Courses

Fly Fishing and Basic Flytying Techniques, Level I
Fall and spring. Fee charged.

Learn the art of tying several of your own artificial flies while you learn the art of fly casting. Students must have a valid NYS fishing license and their own wader boots. All other materials provided.

Salt Water Fly Fishing
Fall. Fee charged.

Learn the special techniques necessary for salt water fly fishing. This course includes 4 hours of classroom instruction and 4 days of fishing over fall break.

Fitness Courses

Aerobic Dance
Fall, spring, and summer (6 weeks). Fee charged.

A dance program designed to keep the cardiovascular system in top shape by making the body demand increased amounts of oxygen.

Body Sculpting
Fall and spring. Fee charged.

Cardio Crazy
Fall and spring. Fee charged.

The course is designed to acquaint the student with the various types of indoor aerobic training equipment, rowing machines, treadmill, stair machines, exercise cycles, and Nordic Track, and to teach them to design a personal fitness program incorporating the equipment.

8 O’Clock Rock
Fall and spring. Fee charged.

This class combines the best of the principles of weight training and the cardio training in the 8 O’Clock Rock Class.

Aerobic Instructor Training
Fall and spring. Fee charged.

The course is designed to train the student to teach aerobics and prepare for the A.F.A.A. Primary Aerobic Instructors Certification Test.

Fitness and Conditioning
Fall and spring.

Physical fitness program that embodies features of stretching exercises, weight lifting, and jogging. Students work on their individual training needs.

Jogging
Fall and spring.

This course will cover running and stretching techniques. A conditioning program with the objective to develop the capacity to run three miles after 12 weeks of training.

Jogging Tours—Distance Running
Fall and spring.

A course designed for the intermediate runner who can run an average of 3 miles in 30 minutes. Most tours will be 3-4 miles long and will go through campus and nearby countryside.

Triathlon
Fall and spring.

Designed to acquaint students with the components of, and conditioning for, triathlon (running, swimming, and bicycling).

Wellness and Fitness
Fall and spring. Fee charged.

“Here’s to a Healthier You”—a wellness experience for the busy student. This course will assess the student’s physical fitness status, blood cholesterol levels, and overall lifestyle health habits. Each student will receive an individual exercise prescription and have access to the Wellness Program fitness room in Helen Newman Hall. Lectures on nutrition and stress management are also presented. This course has been made possible through the generosity of the Bateman family in memory of Ms. Dorothy Bateman, Cornell’s first director of women’s sports and physical education (1920 to 1962).

Golf Courses

Golf, Introduction to
Fall and spring. Fee charged.

A PGA program of instruction is geared to all levels of experience and ability. The objective is to give beginners enough skill to play, and to give more-advanced players direction in their thinking, practice, and play, through a thorough understanding of fundamentals. Equipment is furnished.

Golf, Recreational
Fall and spring. Limited to students who are experienced golfers. Fee charged. Students must provide their own clubs. A minimum of ten rounds of nine holes each must be played to receive credit. Fee covers a semester’s membership.

Gymnastics Courses

Gymnastics, Introduction to
Fall and spring.

Introduction to gymnastics deals with a majority of the Olympic events. The course will focus upon beginner-level skills and is open to both male and female participants.

Ice Skating Courses

Skating, Introduction to
Fall and spring. For beginning to intermediate skaters. Fee charged.

Students provide their own skates or rent them at Lynah Rink. Course will cover forward and backward skating, turns, and stops.

Figure Skating, Beginning, Intermediate, and Advanced Levels
Fall and spring. Fee charged.

Instruction and practice in basic figure skating techniques: forward, backward, crossovers, turns, and spirals. Students provide their own skates or rent them at Lynah Rink.

Martial Arts—Self-Defense Courses

Boxing, Introduction to
Fall and spring. Fee charged.

The course covers the basic skills of footwork, defensive, and offensive techniques. Skipping rope, shadow boxing, and heavy bag work will be taught as methods for individual aerobic conditioning.

Boxing, Thai
Fall and spring. Fee charged.

A martial art system developed from the unique culture of Thailand is a blend of art, science, and sport.

Fencing, Introduction to
Fall and spring. Fee charged.

Includes warm-up exercises and offensive and defensive moves. Equipment furnished.

Fencing, Intermediate
Spring. Fee charged. Prerequisite: Introduction to Fencing or the equivalent.

Interclass competition is stressed. Equipment is furnished.

Fencing, Classical
Fall and spring. Fee charged.

Classical fencing is a martial art that uses the practice of the sword to cultivate self-mastery.

Judo, Introduction to
Fall and spring. Fee charged.

Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

Judo, Intermediate
Fall and spring. Fee charged.

Conditions and increases suppleness. Continue to develop skills in the two parts of judo: standing techniques (throws and trips) and mat techniques.

Karate, Introduction to
Fall and spring. Fee charged.

A beginning course taught by professional black belt instructors. Involves mastery of basic blocks, kicks, and punches.

Karate, Advanced
Fall and spring. Fee charged.

Open to those who have taken basic Karate or the equivalent.
Kung Fu
Fall and spring. Fee charged. Exploration of conditioning and fitness procedures used in the major martial arts, such as karate or judo. Covers circular movement for generating strong blocks, kicks, and punches.

Self-Defense and Empowerment for Women
Fall and spring. Fee charged. Basic methods of physical protection for women.

Tae Kwon Do, Introduction to
Fall and spring. Fee charged. A Korean martial art distinguished by emphasis on high and powerful kicks. Basic kicking, punching, and blocking emphasized.

Tae Kwon Do, Intermediate
Fall and spring. Fee charged. A Korean martial art distinguished by its emphasis on high and powerful kicks. Intermediate-level kicking, punching, and blocking are emphasized.

Tae Kwon Do, Advanced
Fall and spring. Fee charged. A Korean martial art distinguished by its emphasis on high and powerful kicks. Advanced-level kicking, punching, and blocking are emphasized.

Tai Chi Chuan, Introduction to, and Intermediate
Fall and spring. Fee charged. Introduction to Tai Chi, a system of graceful exercises that aim at nurturing relaxation, deep breathing, and improved circulation.

Outdoor Education Program
See the brochure for the Cornell University Outdoor Education Program at registration for more information about courses.

Climbing Courses
Basic Rock-Climbing
Fall, spring, and summer. Fee charged. Seven afternoons climbing inside on the Lindseth climbing wall.

Basic Rock-Climbing, for Women
Fall, spring. Fee charged. Seven afternoons climbing inside on the Lindseth climbing wall taught by and for women.

Basic Rock-Climbing, for 24 and Over
Fall, spring. Fee charged. Non-credit course. Four evenings climbing indoors on the Lindseth wall for people age 25 or older.

High Adventure 101
Fall, spring, and summer. Fee charged. Six afternoons at local parks and wilderness areas, some classes on indoor Lindseth climbing wall.

Continuing Rock-Climbing
Fall, spring. Fee charged. Seven afternoons of advanced climbing techniques on the Lindseth climbing wall.

Ice Climbing
Spring. Fee charged. Four outings to local state parks and gorges.

Outdoor Top Roping
Fall, spring. Fee charged. Two outings (nights) on the Lindseth climbing wall and two outings at local climbing areas.

Shawangunks Rock-Climbing
Fall, spring. Fee charged. Four-day climbing camp at the Shawangunks.

Backpacking Courses
Natural History of the Finger Lakes
Fall, spring. Fee charged. Backcountry skills with a strong environmental focus.

Backpacking in the Finger Lakes
Fall, spring. Fee charged. Classes lead to two full weekends on the trail.

Southwest Backpacking
Spring. Fee charged. Spring break trip to the SW deserts and canyons.

Trail Maintenance
Fall, spring. Fee charged. Work with the local trails club to support and maintain trail systems.

Wilderness Skills
Fall, spring. Fee charged. Break trip focusing on wilderness travel and living skills.

Wilderness Survival Skills
Fall, spring. Fee charged. Primitive living skills taught in three classes and a weekend backpack trip.

Biking Courses
Bike and Hike
Fall, spring. Fee charged. Four full days exploring local countryside.

Bike Repair, Beginning
Fall, spring. Fee charged. Non-credit. Two evenings of hands-on repair work.

Bike Repair, Intermediate
Fall, spring. Fee charged. Non-credit. One evening of hands-on repair work.

Mountain Biking
Fall. Fee charged. Four full days exploring local countryside.

Canoeing Courses
Canoeing, Adirondacks
Fall. Fee charged. Break trip explores the beauty of the Adirondacks via canoe.

Introduction to Paddling
Fall, spring. Fee charged. A sampler of beginning canoeing and kayaking.

Canoe/Camping, Flatwater
Fall. Fee charged. Four full days paddling local waterways including an overnight.

Canoeing, Moving Water
Fall, spring. Fee charged. Includes a full weekend of river paddling.

Caving Courses
Caving
Fall, spring. Fee charged. Four days in the fall and two weekends in the spring in Pennsylvania caves.

Hiking Courses
Day Hiking
Fall, spring. Fee charged. Day outings in the Finger Lakes Region.
Living Routines
Fall and spring.
Provides the opportunity to explore a variety of ancient and modern methods designed to bring one to the state of meditation.

Health Issues for Student Athletes
Fall and spring.
To promote and encourage lifestyle choices on the part of student athletes that will help them establish and maintain high levels of all-around health, and thereby contribute positively to their academic and athletic achievement. NOTE: This is an NCAA requirement open to sophomore athletes only.

Relaxation and Stress Management
Fall and spring.
Introduction to basic relaxation techniques for the reduction of everyday stress. Techniques will be taught that can be used in normal everyday living situations.

Swedish Massage
Fall, spring, and summer. Fee charged. 
Learn to give a relaxing, stress-reducing Swedish massage. You will master the basic strokes of Swedish massage and learn about their application to the different parts of the body. Students will use oils and lotions as a part of their training.

Therapeutic Massage
Fall, spring, and summer. Fee charged.
Provides an experiential introduction to several types of massage. Included are Swedish, shiatsu, polarity, and sports massage. Class members will participate in group exercises and practice on each other during class time. All exercises and techniques can be done while wearing street clothing.

Yoga, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.
Gain an experimental understanding of your body and learn certain shiatsu massage techniques.

Yoga, Intermediate
Fall and spring. Fee charged.
Fundamentals of hatha-yoga. Covers basic postures, breathing techniques, and deep relaxation. Introduces chanting.

Badminton, Introduction to
Fall and spring. Helen Newman Hall. 
Fundamental shots, scoring, and general play.

Badminton, Intermediate
Fall and spring. Helen Newman Hall. 
Review of fundamental shots, scoring, and general play.

Racquetball, Introduction to
Fall, spring, and summer. Fee charged.
Instruction for beginners. Equipment is furnished. Protective eyewear required.

Squash, Introduction to, Intermediate
Fall, spring, and summer. Fee charged.
Classes for appropriate level of play. Equipment is furnished. Protective eye wear required.

Tennis, Advanced
Fall, spring. Fee charged. 
Advanced strokes and doubles play emphasized. Recommended for tournament players or those with previous team experience.

Tennis, Indoor-Recreational
Fall and spring. Fee charged.
Play is conducted at the new Reis Tennis Center. Players must have high school or college tournament experience or a rating of 3.5 or higher from the USTA. Matches are played in both doubles and singles. Equipment furnished. NO BLACK-SOLE SHOES ALLOWED ON COURTS!

Sailing Courses
Board Sailing (Wind Surfing)
Fall, spring, and summer (6 weeks). Fee charged. 
A Mistral Board Sailing Academy certificate is awarded on successful completion.

Catamaran, Introduction to
Fall, spring, and summer (6 weeks). Fee charged.
Learn unique skills necessary for sailing multihull catamarans.

Small-Boat Sailing, Introduction to
Fall, spring, and summer (6 weeks). Fee charged. 
Learn basic skills necessary to sail small sailboats and basic keelboats safely.

Small-Boat Sailing, Competitive
Fall and spring. Fee charged. 
Vanguard 420 sailboat used for the course. USYRA Rules Book used as a text for the course. Fee includes one-year membership in university sailing team program.

Water Skiing
Fall only. Fee charged. 
Introductory course for beginning water skiers. Classes will be conducted from East Shore Marina.

Skiing and Snowboarding
Downhill Skiing and Snowboarding
Fall and spring. Fee charged. 
Transportation, instruction, ski-lift fees, and skiing time are offered in a package deal. Greek Peak and Song Mountain personnel are present at registration to explain the program and accept fees. Bus transportation to Greek Peak is provided six afternoons a week for six weeks.

Cross-Country Skiing—See Outdoor Program.

Target Shooting Courses
Archery, Introduction to
Fall and spring. Fee charged. 
Two classes are offered. Instruction in the care of equipment; seven basic steps for shooting; scoring; practice shooting at twenty, thirty, and forty yards.

Pistol, Introduction to
Fall, spring, and summer (6 weeks). Fee charged. 
Instruction in use of pistol in the three modes of fifty-foot competitive target shooting—slow fire, timed fire, and rapid fire. Emphasis on safety and responsibility while firing.

Riflery
Fall and spring. Fee charged. 
Instruction and practice in the techniques of target riflery from various shooting positions.

Trap and Skeet
Fall, spring, and summer (6 weeks). Fee charged. 
Includes lectures and shooting at the Tompkins County Rod and Gun Club range. Guns and shells are furnished.

Team Sports Courses
Basketball
Fall and spring.
Fundamental drills in passing, shooting, and dribbling. Scrimmages each class session.

Ice Hockey, Introduction to
Fall and spring. Prerequisite: basic skating ability. Fee charged.
Stick handling, passing, and shooting are stressed. Some scrimmages. Students provide their own skates and sticks; all other equipment is furnished.

Ice Hockey, Intermediate
Fall and spring. Fee charged. Prerequisite: beginning hockey or previous participation in organized hockey.
This course is designed for the intermediate hockey player. Advanced techniques taught include positioning, power play, penalty killing, and offensive and defensive attack. Each session emphasizes game situations and scrimmaging. Skates and hockey sticks must be supplied by the participants.

Volleyball, Introduction to
Fall and spring.
Fundamentals of ball handling, serves, defensive blocks, and position play are stressed. Classes will scrimmage.

Volleyball, Intermediate
Fall and spring.
Passing and blocking strategy; scrimmages in class.

Volleyball, Advanced
Fall and spring.
Offensive and defensive team strategy is emphasized in class scrimmages.

Weight Training Courses
Trotter Circuit Training
Fall and spring. Fee charged.
Students will gain a working knowledge of the basic principles of Trotter selectorized weight lifting equipment. Emphasis on principles of weight training, circuit training, intensity training, and program design.

Principles of Weight Training
Fall and spring. Fee charged.
Introduces the proper use of intermediate weight equipment. Emphasis on the development of bulk, strength, and endurance.

Independent Study
Fall and spring.
Independent study is designed for those who have difficulty fitting any of the regularly scheduled courses into their academic program. Class activities will be based on personal fitness programs. A term paper is required. Permission to enter this program must be granted by the program director.
SCHOOL OF CONTINUING EDUCATION AND SUMMER SESSIONS

The School of Continuing Education and Summer Sessions provides a wide variety of educational opportunities beyond the degree-granting programs of the university. These programs serve virtually all age groups in a great variety of formats and time frames. For information about the following programs write B20 Day Hall, Ithaca, New York 14853-2801; call 607/255-4987; e-mail cusce@cornell.edu; or fax 607/255-9697; unless indicated otherwise below. You may also visit us on the Web at www.continuingeducation.cornell.edu.

ADMINISTRATION
Glenn C. Altschuler, dean
Judith K. Eger, director, program development and marketing
Abby H. Eller, director, Cornell University Summer College
Christine Holmes, special programs coordinator
Ralph Janis, director, Cornell's Adult University
Charles W. Jermy, Jr., associate dean, and director, Cornell University Summer Session
Joseph Lindner, manager, computing
Ann L. Morse, media manager
Cathy M. Pace, registrar
Diane E. Sheridan, director, finance and administration

CORNELL UNIVERSITY SUMMER SESSION
The Cornell University Summer Session provides unique and unusually attractive opportunities for study and recreation at a time when the Cornell campus and the Finger Lakes region of central New York are at their loveliest and the Ithaca weather is at its best. Participants may choose from a wide spectrum of courses scheduled during three-, six-, and eight-week sessions. Although admission is open to persons of all ages, the majority of summer session participants are matriculated Cornell students. Classes meet daily and are usually kept small to foster a close association between students and teachers. For information call 607/255-4987; e-mail cusce@cornell.edu; or visit our Web site at www.summer.cornell.edu.

SUMMER COLLEGE PROGRAMS FOR HIGH SCHOOL STUDENTS
High school sophomores, juniors, and seniors attend regular university courses through Cornell University Summer College and may earn college credit. They also explore career options through specially designed workshops. Students live in residence halls, become familiar with campus life, and attend seminars describing the college admissions process. The program is designed to help ease the transition from high school to college. For information call 607/255-6200; e-mail summer_college@cornell.edu; fax 607/255-8942; or visit www.summerncollege.cornell.edu.

CORNELL'S ADULT UNIVERSITY
Cornell's Adult University (CAU) offers week-long noncredit courses on campus for adults and families during the summer. During the fall, winter, and spring, there are weekend seminars, week-long domestic programs, and international study tours. Developed and led by distinguished members of the Cornell faculty, all programs are inspired by the belief that learning never ends and that one of the roles of a great university is to provide a bridge between traditional formal education and informal, noncredit study. For information, write Cornell's Adult University, 626H Thurston Avenue, Ithaca, New York 14850-2490; e-mail cauinfo@cornell.edu; fax 607/254-4482; call 607/255-6200; or visit www.cau.cornell.edu.

DISTANCE LEARNING
The School of Continuing Education and Summer Sessions offers courses through distance learning. Instructional materials for these courses may be presented on the World Wide Web, video tapes, and/or CD-ROMs. Students interact with the instructor and other students by phone or e-mail. Assignments and examinations are completed within a scheduled session, just as in on-campus courses, but students have the option of beginning study prior to the start of the session. For information, visit www.continuingeducation.cornell.edu/DL/.

EXTRAMURAL STUDY
Cornell undergraduate or graduate students whose studies have been interrupted may find it appropriate to resume their studies by taking classes on a part-time basis. Area residents may take courses on a part-time basis by registering as extramural students. Those interested may enroll in almost any course offered in the fall and spring terms if they receive the instructor's written approval. Another offering, the Visitor's Program, allows adults to attend classes in many divisions of the university on a space-available basis at a reduced charge. In this program, no credit is given, and no record is kept of attendance or performance. Visitors are required to obtain written permission from the instructor. For information, write to Extramural Study, B20 Day Hall, Ithaca, NY 14853-2801; call 607/255-4987; fax 607/255-9697; e-mail cusce@cornell.edu; or visit www.continuingeducation.cornell.edu/EXMUL/.

WINTER SESSION
Cornell undergraduate and graduate students, as well as employees and area residents, can earn three to four credits between the fall and spring semesters by enrolling in the winter session. This quiet time on campus allows students to enjoy generally smaller classes and to concentrate on intensive study. Winter session students may enroll in scheduled courses or design individualized study with a faculty member. For information, write to Winter Session, B20 Day Hall, Ithaca, NY 14853-2801; call 607/255-4987; fax 607/255-9697; e-mail cusce@cornell.edu; or visit www.wintersession.cornell.edu.

CONTINUING EDUCATION INFORMATION SERVICE
This service provides free information, counseling, and referral to people who have been out of school for several years and want to resume their education. It also provides information about short courses, workshops, professional updates, and executive programs offered by the university to people inside and outside Cornell. For information, write to Continuing Education, B20 Day Hall, Ithaca, NY 14853-2801; call 607/255-4987; fax 607/255-9697; or e-mail cusce@cornell.edu.

SUMMER COURSE ROSTER
The Cornell University Summer Session offers a wide variety of courses. The list that follows includes those courses that are usually offered every summer. The list is not exhaustive; many new courses or courses offered only occasionally are not listed. For complete information, contact the Summer Session Office. Courses are posted to the Web (www.summer.cornell.edu) in the fall as the roster is developed. A preliminary course roster is available beginning in late November. If a course is also offered through distance learning, the course title will be followed by DL.

Writing
WRIT 134 An Introduction to Writing in the University
The College of Veterinary Medicine offers a professional program that requires four years of full-time academic and clinical study of the normal and abnormal structure and function of the animal body and the diagnosis, treatment, and prevention of animal disease.

Students work in small groups under the guidance of a faculty tutor. Case-based exercises are used to facilitate the understanding of basic science concepts within the context of clinical medicine. On average, three to four 2-hour tutorial sessions are scheduled each week. These are complemented by lectures, laboratories, and discussion sessions or other organized learning opportunities specific to the individual course. Faculty are available to respond to questions that arise as a result of the case-based exercises.

The Professional Curriculum

**FOUNDATION COURSES**

In foundation courses I, II, III, and IV (VETMED 510, 520, 530, 540), students work in small groups under the guidance of a facultytutor. Case-based exercises are used to facilitate the understanding of basic science concepts within the context of clinical medicine. On average, three to four 2-hour tutorial sessions are scheduled each week. These are complemented by lectures, laboratories, and discussion sessions or other organized learning opportunities specific to the individual course. Faculty are available to respond to questions that arise as a result of the case-based exercises.

Tutorial sessions and all other organized learning programs are usually scheduled during the mornings, thereby reserving the afternoons for independent study. By situating learning in a clinical context, students are better able to integrate material from the basic and clinical sciences, and are encouraged to develop an understanding of the clinical reasoning process from the beginning of the curriculum. The tutorial-based educational format creates an atmosphere that requires students to be involved actively in their learning and allows them to develop skills in communication, information retrieval, and analysis.

Note: Courses listed in brackets [ ] are approved courses that are not offered during the 1999-2000 academic year.

**VETMED 510 The Animal Body (Foundation Course I)**

Fall. 12 credits. Limited to first-year veterinary students. Letter grades only. S. S. Suarez and staff.

This course is designed to enable students to understand the principles of veterinary anatomy at the gross, microscopic, and ultrastructural levels. Developmental anatomy is emphasized to the extent that it reflects determination of adult form and species differences. Radiologic and related imaging techniques are used throughout the course to assist in the understanding of normal structural anatomy. Understanding of the anatomic basis of common surgical procedures is achieved during the various dissection procedures. The course is based on tutorials with significant emphasis on practical laboratories. Lectures and modules complement student learning.

**VETMED 517 Animals, Veterinarians, and Society: Part A (Foundation Course VIIa)**

Fall. 1 credit. Limited to first-year veterinary students. Letter grades only. A fee of approximately $10 is charged for the course guide. J. E. Saidla and staff.

This course is the correlate for VETMED 510 The Animal Body. This is a laboratory-based course that teaches physical examination of four species (dog, cat, cow, and horse). The class is divided into small groups and each group meets for two hours each week during the first eleven weeks. The skills of auscultation, percussion, palpation, and observation are taught along with clinically related diagnostic procedures.

**VETMED 520 Genetics and Development (Foundation Course II)**

Fall and spring. 8 credits. Limited to first-year veterinary students. Prerequisite: VETMED 510 The Animal Body. Letter grades only. R. A. Levine and staff.

An appreciation of how gene expression and cell behavior contribute to normal animal development and health is crucial for our understanding of the pathogenesis of disease. Students will gain an understanding of the cellular and molecular mechanisms that regulate development and maintain normal structure and function throughout the life of an animal. Emphasis will be placed on defining and characterizing normal cellular behaviors and on understanding how mutations in specific genes promote disease. Students will become familiar with the common molecular procedures being used to develop new diagnostic and therapeutic tools to maintain health and combat disease. Tutorial sessions are complemented by lectures, laboratories, and class discussions.

**VETMED 521 Neuroanatomy and Clinical Neurology**

Spring. 3 credits. Limited to first-year veterinary students. Letter grades only. A. de Lahunta.

Fundamentals of functional neuroanatomy and diseases of the nervous system are taught so that each student is competent in the diagnosis of clinical neurologic disorders of domestic animals. This is a vertically integrated course that includes dissection of the central nervous system of the dog, the anatomic basis for the diagnosis of diseases of
the nervous system, and the differential diagnosis of those diseases. Clinical cases with pertinent lesions are demonstrated with each system. Films and videotapes of clinical patients are used to demonstrate the clinical signs produced by the various diseases. Slides of gross and microscopic lesions are used to emphasize the clinical and neuroanatomic relationships and to stress characteristic features of representative conditions.

**VETMED 527 Animals, Veterinarians, and Society: Part B (Foundation Course VIIb)**

This course begins in the last part of fall semester and finishes at the end of winter session. 1 credit. Limited to first-year veterinary students. Prerequisite: VETMED 517 Animals, Veterinarians, and Society: Part A. Letter grades only. A fee of approximately $7.00 is charged for the course guide. J. F. Saidla and staff.

This course is the correlate for VETMED 520 Genetics and Development. It enters into a study of ethical issues related to animal use, animal welfare, animal genetics, clinical application of genetics, genetics counseling, and clinical day-to-day ethics. The course meets for one 2-hour session each week.

**VETMED 530 Function and Dysfunction: Part Course IIIa**

Spring. 9 credits. Limited to first-year veterinary students. Prerequisite: VETMED 520 Genetics and Development. Letter grades only. D. Roberts and staff.

This course is designed to develop students' understanding of how an animal maintains itself as a functional organism; how this is achieved through the integration of different functional organ systems; how tissue structure relates to tissue function; how injury alters structure and leads to dysfunction, manifested as clinical signs; how organ function can be assessed; and how it can be modulated pharmacologically. The course incorporates aspects of physiology, biochemistry, cell biology, histology, pathology and histopathology, clinical pathology and pharmacology.

**VETMED 531 Function and Dysfunction: Part II (Foundation Course IIIb)**

Fall. 7 credits. Limited to second-year veterinary students. Prerequisite: VETMED 520 Function and Dysfunction: Part I. Letter grades only. D. Roberts and staff.

A continuation of VETMED 530 Function and Dysfunction: Part I.

**VETMED 537 Animals, Veterinarians, and Society: Part C1 (Foundation Course VIIc)**

Spring. 1 credit. Limited to first-year veterinary students. Prerequisite: VETMED 527 Animals, Veterinarians, and Society: Part B. Letter grades only. A fee of approximately $9.00 is charged for the course guide. J. F. Saidla and staff.

This course is the correlate for VETMED 530 Function and Dysfunction: Part I. The central goal of this course is to provide students with the interpersonal skills and techniques necessary to communicate effectively with clients. In addition, students will be provided an opportunity to study the human-animal bond, animal death, and grief counseling. This course provides opportunities to practice client interviewing skills and to participate in a home or farm visit.

**VETMED 538 Animals, Veterinarians, and Society: Part C2 (Foundation Course VIIc, continued)**

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VETMED 537 Animals, Veterinarians, and Society: Part C1. Letter grades only. A fee of approximately $6.00 is charged for the course guide. J. F. Saidla and staff.

This course is the correlate for VETMED 531 Function and Dysfunction, Part II. This course provides for understanding of the medical record, the diversity of clients, employees, and society in general, and a session on alternative medicine and its various practices. How to critically read and evaluate clinical studies and journal articles is also addressed.

**VETMED 540 Host, Agent, and Defense (Foundation Course IV)**

Fall. 12 credits. Limited to second-year veterinary students. Prerequisite: VETMED 531 Function and Dysfunction: Part II. Letter grades only. TBA (course leader) and others.

This course is divided into six sections: the host response to injury; extracellular environment, somatic environment, external environment, and surrounding environment. Using this approach, students develop an understanding of the host response to injury with groups of important pathogens; an understanding of how pathogens manipulate the host and how the host defends itself against attacks; and an understanding of the roles played by the external environment and human intervention in the epidemiology of infectious organisms.

**VETMED 547 Animals, Veterinarians, and Society: Part D (Foundation Course VIIId)**

Fall. 1 credit. Limited to second-year veterinary students. Prerequisite: VETMED 538 Animals, Veterinarians, and Society: Part C2. Letter grades only. A fee of approximately $12.00 is charged for the course guide. J. F. Saidla and staff.

This course is the correlate for VETMED 540 Host, Agent, and Defense. This course will examine governmental regulation of the veterinary profession, including proper conduct, hazardous materials in the workplace, insurance, professional and unprofessional conduct, and environmental issues (OSHA), and environmental issues (EPA). Also included will be sessions relating to controlling and preventing the spread of animal diseases and the role of USDA and specifically APHIS in these regulatory functions.

**VETMED 550 Animal Health and Disease: Part I (Foundation Course V)**

Spring. 10 credits. Limited to second-year veterinary students. Prerequisite: VETMED 540 Host, Agent, and Defense. Letter grades only. D. Warnick and staff.

A clinical service rotation in which students accompany latory clinicians on farm and stable calls and learn the skills and procedures necessary for operation of a modern veterinary practice offering primary care to large animal clients. Routine herd health visits are conducted for cattle, horses, sheep, goats, and swine. Reproductive evaluations (including pregnancy and fertility examinations), nutritional evaluation, and disease prevention are stressed. Herd health programs also include vaccinations, parasite control, mastitis prevention, and routine procedures such as castration and dehorning. With appropriate herds, analysis of computerized performance data is conducted and discussed with the owner. In addition to assisting with routine scheduled work, students participate in diagnosis and medical or surgical treatment of ill or injured animals. This includes rotating assignments for night and weekend duty.

**VETMED 561 Community Practice: Service-Medicine (enroll in VTMED 561)**

2 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. W. A. Holman and staff.

The Community Practice-Medicine Service is structured to provide supervised clinical experience in the practice of small companion
animal medicine. The course is conducted in the Small Animal Clinic of the Veterinary Medical Teaching Hospital. Students interact directly with clients presenting their pets for primary medical care. Under the supervision of the clinical faculty and staff, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plans to the clients and provide follow-up care and management of these patients.

**VETMED 562 Community Practice Service-Surgery and Anesthesiology**

This course involves the hands-on diagnostic techniques, planning of appropriate ancillary tests, diagnosis, treatment and patient care. Daily rounds and discussions are used to monitor patient progress and further educate students.

**VETMED 564 Small Animal Medicine**
Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. S. C. Barr, S. A. Center, J. F. Randolph, K. W. Simpson.

The Small Animal Medicine Service is structured to provide supervised clinical experience in the practice of companion small animal medicine. The course is conducted in the Small Animal Clinic of the Companion Animal Hospital. Students interact directly with clients presenting their pets for primary or referral medical care. Under the supervision of the clinical faculty, the students are expected to formulate and carry out plans for the diagnostic evaluation and medical management of these patients. After review, students explain their plans to the clients and provide follow-up care and management of these patients.

**VETMED 566 Large Animal Medicine Service**
Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. D. Ainsworth, T. Divers and staff.

Students assigned to this service will assist the faculty and house staff of the Large Animal Medicine service in the diagnosis and care of patients. The goal of this course is for students working on this service to acquire knowledge and skills in history taking, physical examination, election and completion of appropriate ancillary tests, diagnosis, treatment and patient care. Daily rounds and discussions are used to monitor patient progress and further educate students.

**VETMED 567 Large Animal Surgery Service**
Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. F. Hackett and staff.

This clinical rotation is structured to provide supervised clinical experience in the practice of large animal surgery. Under the direction of faculty and house staff, students participate in the diagnosis, surgical treatment, and care of patients presented to the Large Animal Clinic. Training through patient care is supplemented by formal rounds and didactic instruction.

**VETMED 568 Anesthesiology Service**
Fall, winter, spring, and summer. 3 credits. Required component of Clinical Rotations (Foundation Course VI). Letter grades only. R. D. Gleed, J. W. Ludders, P. F. Moon and staff.

This course is designed to provide clinical experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in setting up and indirect light. Student experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in setting up and indirect light. Student experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in setting up and indirect light. Student experience in the use of anesthetics in small companion animals, horses, and some food animals. The students participate in setting up and
DISTRIBUTION COURSES

Distribution courses comprise 30 percent of the curriculum and are usually scheduled during the first half of each spring semester. During the first two years, many of the distribution courses are oriented to the basic sciences. During years three and four, students have additional distribution course options from which to choose. Some will emphasize clinical specialties, whereas others will integrate basic science disciplines with clinical medicine and will be co-taught by faculty representing both areas. Students from different classes have the opportunity to take many of these courses together.

Grades: grading options for distribution courses are either letter or S-U.

VETMED 501 Anatomy of the Carnivore
Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of instructor. First-, second-, and third-, and fourth-year veterinary students, others by permission. Letter grades only.
J. Benkenhout
Carnivore anatomy is studied by detailed systematic and regional dissection of the cat, with comparison to the dog. Student dissection is supplemented with prosections, radiographs, and exercises focusing on surgical approaches. There are opportunities for dissection of other carnivores, such as the ferret and the fox, depending on availability of specimens. The lectures augment the laboratory dissection, and introduce the student to functional morphological comparative features in the Order Carnivora. Students do an independent research project on the carnivore species of their choice, and give an oral presentation on this to the class.

VETMED 502 Anatomy of the Horse
Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of instructor. First-, second-, and third-, and fourth-year veterinary students, others by permission. Letter grades only.
M. S. Hackett
This course is organized as a traditional anatomy course that relies primarily on students learning the anatomy of horses through hands-on dissection laboratories augmented by lectures and highlighted by clinical correlations. An understanding of anatomy that provides the foundation for surgery and is directly relevant to clinical practice will be emphasized in the regional approach to dissection. Structural-functional correlations that are unique or important in the horse will be the area of emphasis for most lectures. This is accomplished by integrating the course in selected areas to lay a foundation for the later study of pathology when it reinforces concepts of structure and function that are difficult to understand by studying the gross anatomy alone (i.e., hoof). Student dissection cadavers will be supplemented by skeletal materials, radiographs, models, preserved pre-dissected specimens and fresh specimens when they are available.

VETMED 603 Anatomy of the Ruminant
Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body or permission of instructor. First-, second-, third, and fourth-year veterinary students, others by permission. Letter grades only.
J. Hennson
The regional anatomy of several ruminant species will be covered using dissection laboratories, lectures, and large-group discussions. Functional consequences of structural modifications and anatomical features discussed in laboratory dissection will be emphasized. Microscopic anatomy will be correlated with gross anatomy when appropriate to relate structure to function and to provide a foundation for later study in pathobiology. Student dissection material will be supplemented by skeletal materials, radiographs, models, pres dissected specimens, and postmortem specimens. Students will be required to complete an independent study project on a relevant subject of their choice. Assessment includes written and practical examination.

VETMED 605 Comparative Anatomy: Pattern and Function
Spring. 3 credits. Prerequisite: VETMED 510 The Animal Body. First-, second-, third, or fourth-year veterinary students, others by permission. Letter grades only.
L. A. Mizer
The goal of this course is to study anatomical variability among amniote (mammals, birds, and reptiles) and anamniote (amphibian & fish) species. This is accomplished by studying the anatomy of major organ systems in each species to a common basic pattern and considering the differences in a functional perspective. Six major systems will be explored (reproductive, locomotory, neurosensory, cardiorespiratory, digestive, and urogenital) in a variety of species as available.

VETMED 606 Advanced Clinical Neurology
Spring. 1 credit. Prerequisite: VETMED 521 Neuroanatomy and Clinical Neurology. Third- and fourth-year veterinary students. Letter grades only.
A. delahota
The objective of this course is to further the experience and confidence of the student in the diagnosis and understanding of clinical neurological disorders. It continues their correlation of anatomy, physiology, and pathology in the diagnosis of diseases of the nervous system and the understanding of their pathogenesis. Neurological disorders that are not covered in the foundation course will be considered here. The course is entirely based on case examples that are presented on videotapes or 16mm film and slides.

VETMED 607 The Literature and Subject Matter of Natural History
Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students, others by permission. S-U grades only.
H. E. Evans
This course is an introduction to classic and current natural history literature. Materials relating to the earth sciences and the biology of plants and animals from around the world will be shown and discussed. Students will be required to show and discuss a book that concerns natural history in a country of their choice. A recommended reference text for this course is, The Concise Illustrated Dictionary of Natural History, by R. J. Lincoln and G. A. Boxshall, 1990.

VETMED 609 Anatomy and Histology of Fish
Spring. 2 credits. Minimum enrollment 4; maximum enrollment 6. First-, second-, third, and fourth-year veterinary students, others by permission. S-U grades optional.
P. R. Bowser
This course provides an overview of the diversity of anatomy and histology of fish. Students will participate in lecture, discussion and laboratory exercises to explore the major organ systems. Extensive use of library resources for assigned readings will be expected. Each student will prepare a term project and make one oral presentation.

VETMED 610 Veterinary Aspects of Avian Biology
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 60. First-, second-, third-, and fourth-year veterinary students, others by permission. Letter grades only.
An introduction to avian biology for veterinary students. The course will include lectures and laboratory exercises involving avian evolution, anatomy, physiology, and ecology. Emphasis will be on the development of a strong foundation in avian biology that will be applied in VETMED 616 Diseases of Birds and VETMED 652 Avian Medicine and Surgery.

VETMED 611 Fish Health Management
Spring. 1 credit. Minimum enrollment 8. maximum enrollment 16. First-, second-, third, or fourth-year veterinary students, others by written permission of instructor. S-U grades optional.
P. R. Bowser
This course will present a summary of important diseases of fin fishes. Diseases covered will be those of importance in commercial aquaculture as well as those encountered by the tropical fish hobbyist. The course is designed to provide the students with a knowledge base and hands-on diagnostic experience in diseases of fish.

VETMED 612 Management of Aquarium Systems
Spring. 1 credit. Minimum enrollment 8. maximum enrollment 16. First-, second-, third-, and fourth-year veterinary students or written permission of instructor. S-U grades optional.
P. R. Bowser
This is a lecture and laboratory course dealing with procedures and practices involved in the management of aquarium systems. Topics include water quality, types of aquarium filtration systems, fish health, fish nutrition, and general fish biology. A portion of the course will require the independent work in aquarium system management.
**VETMED 613 Aquavet I: Introduction to Aquatic Veterinary Medicine**

Four weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 2 credits. Minimum enrollment 24 students from Cornell University, the University of Pennsylvania, and other U.S. colleges and schools of veterinary medicine. By permission of the instructor and special application procedure. S-U grades only. Course fee required. P. R. Bowser.

The course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutions at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is designed to introduce veterinary students to aquatic animal medicine. The marine environment is described and visited on field trips in the Woods Hole area. Specific aspects of the reproductive anatomy, physiology, nutrition, microbiology, pathology, and medicine of a variety of marine and freshwater species are discussed. Some emphasis is placed on systems of aquaculture. The specific diseases of a few selected species are presented as examples, including the diseases of a crustacean, a shellfish, a fish, and marine mammals. The course is taught by an invited faculty of thirty-five individuals who are leaders in their respective fields of aquatic animal medicine. Students present seminars on appropriate topics.

**VETMED 614 Aquavet II: Comparative Pathology of Aquatic Animals**

Two weeks of full-time instruction at Woods Hole, Massachusetts, immediately after the spring term. 2 credits. Prerequisites: formal course work in diseases of aquatic animals or appropriate experience and permission of the instructor. Maximum enrollment 18. S-U grades optional. Course fee required. Special application procedure required. P. R. Bowser. This course is sponsored by Cornell University, the University of Pennsylvania, and three marine science institutes at Woods Hole: the Marine Biological Laboratory, Woods Hole Oceanographic Institution, and Northeast Center of the National Marine Fisheries Service. It is an advanced course in the comparative pathology of aquatic invertebrates and vertebrates commonly used as laboratory animals. The material presented will consist of discussions of the diseases of aquatic animals as well as extensive use of the microscope to examine the histopathology associated with these diseases. The course is taught by an invited faculty of twelve individuals who are leaders in their respective fields of aquatic animal medicine.

**VETMED 615 Veterinary Medicine in Developing Nations**

Spring. 2 credits. Minimum enrollment 20. First-, second-, third-, and fourth-year veterinary students; others by permission of instructor. S-U grades only. Offered odd-numbered years. Not offered 1999-2000. E. J. Pearce. Veterinary medicine has an important role to play in developing nations in (a) developing and providing economical sources of animal proteins for human consumption and (b) protecting the public. This seminar course will provide interested veterinary students with information on and insight into the multitude of complex issues facing U.S. veterinarians working in developing nations.

**VETMED 616 Diseases of Birds**

Spring. 2 credits. Minimum enrollment 10; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. Letter grades only. S. Nagji and G. V. Kollas. This course is designed to introduce second-, third-, and fourth-year veterinary students to a basic and practical knowledge of the most common infectious and non-infectious diseases affecting a variety of avian species. The course will emphasize the latest diagnostic and control approaches. The course format will be a combination of didactic lectures and discussions.

**VETMED 618 Adaptation of Animals to the Environment**

Spring. 1 credit. Minimum enrollment 10. Graduate, first-, second-, third-, and fourth-year veterinary students. Letter grades only. Not offered spring 2000. D. Roberts/Ind. The course will examine the physiological adaptations of animals to their environment in addition to methods of acclimatization to novel environments. The course will focus on environmental parameters that exist in harsh environments and include heat, cold, altitude, and xeric conditions. Thus the physiological mechanisms of thermoregulation in mammals, birds and ectotherms will be examined together with their responses to low food and water availability. The knowledge obtained will help in understanding the consequences of translocation of both wild and domestic animals and provide a rational basis for animal housing and the provision of appropriate habitats for zoological gardens. The degree of environmental adaptation will also be examined in terms of animal production from a basic science standpoint.

**VETMED 619 Pathogenesis of Viral Disease (also VETMI 701)**

Spring. 2 credits. Minimum enrollment 15; maximum enrollment 45. Strongly recommended prerequisite of immunology. First-, second-, third-, and fourth-year veterinary students. Letter grades only. Offered odd-numbered years. Not offered spring 2000. J. D. Baines. Course content and objectives: the course will focus on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spreading between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory and urogenital systems. The basic principles of virus taxonomy, structure and replication will be included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from relevant current literature, the text, Nathanson's "Viral Pathogenesis," 1997, and Field's "Virology," third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.

**VETMED 620 Molecular Biology and Immunology of Host-Parasite Interactions (also VETMI 702)**

Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students, others by permission of the instructor. Letter grades only. Offered even-numbered years. E. J. Pearce. The primary objective of this lecture course is to make the student aware of the most important areas of research in contemporary parasitology. Lectures will focus on a broad range of parasites, with an emphasis on those of medical importance. Recently published research articles and data will be used as the basis from which to explore the issues of host invasion, evasion of host defense mechanisms by parasites, vaccination against parasitic infections, chemotheraphy, drug resistance, vector biology, and molecular diagnosis. Biological processes that are especially well understood through work on parasites, such as RNA editing and GPI-anchor biosynthesis and structure, will be covered in detail.

**VETMED 622 Foreign Infectious Diseases of Animals**

Spring. 1 credit. Maximum enrollment 6. Second-, third, and fourth-year veterinary students. Letter grades only. D. H. Schlafer. This course describes the etiology, pathogenesis, clinical signs, gross pathology, differential diagnosis, methods of spread, reservoir hosts, and control of foreign animal diseases that present serious economic threats to the United States. The format is student seminar presentations with each student responsible for presenting one seminar. Ordinarily the course will also include presentations by College faculty and research scientists working on F.A.D.s.

**VETMED 625 Osteoarthritis**

Spring. 1 credit. Maximum enrollment 16. Graduate, first-, second-, third-, and fourth-year veterinary students. Letter grades only. G. Lust. This course provides a basis at the molecular, cellular, and tissue levels for understanding the function of mammalian diarthrodial joints. It includes a description of a diarthrodial joint and the detailed composition and metabolism of bone, articular cartilage, ligaments, meniscus, capsule, and synovium. The interrelationship of synovium, synovial fluid, joint lubrication, articular cartilage, simple biomechanical considerations, and enervation are described to address joint function. A comprehensive discussion of the osteoarthrits that is inextricably associated with hip dysplasia in dogs serves as a basis for the etiopathogenesis of this disease. Osteoarthritis in joints of cats, dogs, horses, pigs, sheep, and cows also are discussed in detail as is osteochondrosis.

Consideration is also given to infectious arthritis and human joint diseases such as gout and pseudogout. The role of pain receptors, a brief discussion of therapy such as the role of nonsteroidal anti-inflammatory drugs, glucocorticoids, and mention of possible corrective surgery procedures are included.

**VETMED 626 Epidemiology of Infectious Diseases**

This course will provide an introduction to the epidemiologic methods used in infectious disease investigations. The importance of surveillance systems in detecting modern epidemics will be emphasized. The student will see the application of effective disease prevention and control strategies will also be discussed. An emphasis will be placed on understanding the relationships between the host, the agent and the environment as they relate to disease causation. The course will explore contemporary epidemiologic methods applicable to old diseases that remain real or potential problems, newly emerging infectious diseases, and nosocomial infections. Selected diseases will be discussed to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and groups of animals. The students will have the opportunity to apply the methods learned to actual disease problems and write an epidemiologic report that might lead to a publication in a peer reviewed scientific journal.

**VETMED 627 Diseases of Antiquity**
Spring. 1 credit. Second-, third-, and fourth-year veterinary students. Letter grade option only. J. Saidla.

This is a study of 30 human and animal diseases that have had profound effects on the course of human history from the beginning of recorded time to the present. The course combines aspects of literature, medicine, and history and explores the interactions between demographics, environment, imperialism, medical care, the environment and disease. Prevailing superstitions and religious views are considered in context with each illness and simultaneously occurring world events.

**VETMED 628 Clinical Pathology**
Spring. 2 credits. Minimum enrollment 20; maximum enrollment 60. Second-, third-, and fourth-year veterinary students. Letter grades only. T. Stokol.

This six-week course addresses a range of issues related to laboratory medicine and interpretation of laboratory results. General topics include aneuploidy, clinical chemistry and immunochemistry, and urinalysis. The primary mode of instruction is student-driven small group (untutored) exploration of case materials followed by faculty-moderated large-group discussions. Selected lectures and laboratory sessions will supplement and expand on issues generated by the case discussions. This course builds on concepts previously addressed in Block 3 and 4, and also provides additional experiences in practical clinical pathology procedures and microscopy.

**VETMED 630 Clinical Biostatistics for Journal Readers**
Spring. 1 credit. Minimum enrollment 6; maximum enrollment 20. First-, second-, third-, and fourth-year veterinary students, all others by permission of the instructor. Letter grade only. H. N. Erb.

The student will become familiar with the statistical methods commonly used in veterinary clinical articles, will be able to recognize, understand, and apply those methods, and will be able to interpret the statistical results.

**VETMED 631 Clinical Diagnostic Parasitology**
Fall and spring. 0.5 credit. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. S-U grades only. To be arranged with Dr. Frongillo. D. D. Bowman and M. K. Frongillo.

This course will provide a chance to perform diagnostic parasitology methods using samples obtained from ongoing clinic cases. Students will attend eight one-hour sessions as they rotate through the Parasitology, Community Practice, and pathology rotations. In the ambulatory service (four sessions with students), diagnostics will concentrate on the laboratory examination of samples from large animal cases that have been observed during the prior week. In the Community Practice Service, one hour will concentrate on the examination of samples from ongoing cases, while a second hour will consist of a discussion of the treatment of common endo- and ecto-parasites. The two hours spent as part of the pathology rotation will examine methods of recovering parasites from pathology specimens, including the examination of wet preparations and the digestion of tissues for parasite recovery. The course is considered to be a logical extension to the foundation course, Host, Agent, and Defense, and is expected to build upon the didactic material presented in Large and Small Animal Parasitology.

**VETMED 632 Senior Seminar**
Fall and spring. 1 credit. First-, second-, and third-year veterinary students. Letter grades only. Must be completed in two consecutive terms (either fall to spring or spring to fall). R. O. Gilbert.

Attendance at fourteen of the senior seminar sessions presented during the academic year constitutes acceptable completion of this course.

This course does not fulfill the one-credit Set VII minimum.

**VETMED 633 Introduction to Nontraditional Companion and Laboratory Animals**
Spring. 1 credit. First-, second-, third-, and fourth-year veterinary students. Letter grades only. J. E. Saidla and staff.

This course is both laboratory and lecture based and deals with a wide variety of nontraditional species that might be brought into a small animal practice other than a dog or cat. These can be either companion or laboratory animals and include rodents, lagomorphs, other small mammals, reptiles, amphibians, birds, fish, goats, sheep, potbellied pigs, primates, and llamas. Instruction in restraint and handling, breeding, husbandry, and general management information is provided for each species. This is followed, where practical, by laboratory sessions for observation, restraint, and physical examination.

**VETMED 635 Introduction to the Professional Literature**

This course introduces students to the professional and biomedical literature, including development of critical reading skills. Students will become familiar with the broad range of professional and biomedical literature and will be encouraged to develop a rigorous approach to journal and scientific article review. Secondary emphasis is on developing skills in library and bibliographic search techniques, as well as selecting the use of veterinary-related online information.

**VETMED 637 Introduction to Community Practice Service**
Fall, winter, spring, and summer. 1 credit. First- and second-year veterinary students by permission of instructor. S-U grades optional. W. E. Hornbuckle.

This course introduces veterinary students to primary care small animal clinical practice through direct exposure to the Community Practice Service at the Veterinary Medical Teaching Hospital. Students observe and assist with restraint, examination and routine treatment of pets, and communication with clients. Successful completion requires satisfactory participation during ten half-days of clinical service.

**VETMED 638 Physiological Nutrition**
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 90. Second-, third-, and fourth-year veterinary students, others by permission of the instructor. Letter grades only. F. A. Kallfelz.

This course will present information on the evaluation and formulation of rations for large and small animals. These concepts will be applied in discussion on the nutritional requirements of these animals during maintenance, gestation, growth, stress, and aging. The course is recommended for all second-year veterinary students who do not have a strong background in nutrition, humane, canine, and feline nutrition. This course, or its equivalent, will be necessary for comprehension of clinical nutrition concepts in Foundation Course V.

**VETMED 639 Veterinary Dentistry**

This is an introductory-level course in small animal dentistry. It is a laboratory course that meets for two hours, twice a week for 16 sessions. Basic concepts and practical topics in dental nomenclature, dental anatomy, oral/dental examination, routine dental care including prophylaxis, stroke, periodontics, endodontics, restorative dentistry, oral surgery, and orthodontics are presented. Basic instrumentation dental radiography and materials used in dentistry are stressed. The class will use prepared specimens for all sessions.

**VETMED 640 Veterinary Aspects of Captive Wildlife Management**
Spring. 2 credits. First-, second-, third-, and fourth-year veterinary students. Letter grades only. G. V. Kollias.

This course will concentrate on principles of captive wildlife management, both clinical and nonclinical. Students will be challenged to learn and integrate a variety of disciplines that are essential to successfully managing wildlife in a captive or semi-free-ranging environment. These disciplines include but are not limited to species-specific (1) behavior and behavioral requirements, (2) nutritional requirements and problems, (3) natural history, (4) medical and toxicological problems, (5) manual restraint and anesthesia, (6) preventive medicine, and (7) medical and legal ethics. In even numbered years the course will emphasize North American wildlife species, and in odd numbered years Central and South American, African, Asian, and Australian species.
This course consists of five laboratories which students practice techniques of embryo recovery, evaluation, handling and transfer. Students will focus on clinical manifestations assessed by faculty wildlife clinicians on a daily basis. Successful completion of the course requires 40 hours of satisfactory supervised, participation per semester in the clinic. Clinic times will be scheduled throughout the semester. Students are required to submit two case summaries before the end of the semester.

**VETMED 649 Introduction to Equine Practice**

This is an introductory course in equine husbandry intended for students with little or no experience working with horses. Lecture topics will include horse breeds and colors, housing facilities and fencing, and overview discussions of the racing, showing, and breeding industries. Laboratories will emphasize basic equine handling and restraint as well as feeds and bedding.

**VETMED 650 Veterinary Parasitology: Large Animal**
Spring. 1 credit. Minimum enrollment 12; maximum enrollment 40. For second-, third-, and fourth-year veterinary students. Letter grades only. S. C. Barr.

This course provides a basic introduction to large animal parasites of veterinary importance, concentrating mainly on the biology, control, and diagnosis of protozoan and metazoan parasites. Emphasis will be given to parasites representative of significant disease processes or of significant economic importance to veterinarians, clients, and producers. The course will elaborate on the biology and pathogenesis of these major pathogens with the ultimate goal being to maximize the recognition of the major disease manifestations induced through examples of each of the different groups of organisms.
This course is intended for students who plan of this course.

In-depth theriogenology of production animals.

Laboratory sessions are tailored to acquisition and discuss their interpretations.

This course is designed to help students understand the methodology and to develop the manual skills required for lameness examination in horses. Aims will be on history taking, clinical signs and examination skills, assessment of clinical pathology data and diagnostic materials (radiographs, ultrasounds), treatment planning, communication skills, facility management and organizational skills. The course will emphasize individual cow treatment.

This course will cover aspects of physiology and therapy of equine reproduction. The purpose of the course is to prepare the student for equine broodmare practice.

This course deals with specific reproductive conditions of production animals as well as reproductive management of production units. Content includes reproductive biology of production animals, economic considerations, and medical and surgical approaches to management of reproductive disorders. Laboratory sessions are tailored to acquisition of specific skills fundamental to the practice of theriogenology of production animals.

Emphasis is on dairy cows.

This course will provide students with a special interest in dairy practice the opportunity for in-depth discussions of special problems in bovine medicine and surgery. Emphasis will be on case discussions, physical examination techniques, and practical matters. The course will emphasize individual cow treatment.

This course will discuss diagnosis, treatment, and prevention of medical and surgical problems of individual small ruminants and of sheep and goat herds. Basic information on breeds, behavior, nutritional requirements, and management systems will be supplied. Economically important contagious or metabolic diseases will be discussed in depth. The diagnostic evaluation and differential diagnoses for common clinical presentations such as skin disease, neurologic disease, lameness, and mastitis will be considered.
This course will cover the basic causes of the manifestations of diabetes, signal transduction mechanisms controlling insulin secretion and insulin action, and the principles underlying current and potential future treatment for this group of diseases. The course will stress the value of basic research into cellular and molecular mechanisms for the treatment and cure of disease.

[VETMED 675] Fundamental Principles of Vertebrate Central Nervous System Pharmacology

This course will include up-to-date knowledge of physiological and pharmacological aspects of the main central nervous system neurotransmitter receptors and provide a basis for rational understanding of the drugs used during surgery and in treatment of neurological disease.

[VETMED 676] Clinical Ophthalmology

Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. R. Riis, N. Irby and T. Kern.

The principles and practice of entry-level veterinary ophthalmology introduced in Block V. Introduction to Veterinary Ophthalmology, and supplemented with lecture and discussion that emphasize species differences, basic surgical decision-making, and recognition of ocular conditions appropriate for referral.

[VETMED 677] Dairy Production Medicine

This is an intermediate course in the techniques and procedures used by veterinarians in modern dairy practice. Many of these activities fall outside the traditional boundaries of medicine, surgery, and theriogenology and might include housing, facilities, manure management, and employee education. Data analysis, disease and productivity monitoring, and evaluation of deviations from targeted persons, policies, and procedures. The course will be effective interventions or corrections, followed by continued surveillance to monitor their effect. Students will be introduced to the dominant software currently used in dairy management. Local dairy herds will serve as additional laboratories for class projects.

[VETMED 678] Small Animal Theriogenology

This is a distribution course in a lecture-based format designed to complement the knowledge gained in the theriogenology component of Foundation Course V, Animal Health and Disease. Content includes discussion of breeding management, infectious and non-infectious causes of infertility and pathology of the male and female reproductive tracts, their diagnosis and management. The emphasis of the course will be on conditions affecting dogs and cats, but some conditions of other common pet species will be discussed.

[VETMED 679] Clinical Pharmacology

Spring. 0.5 credit. Third- and fourth-year veterinary students. S-U grades only. W. Schwark.

This course is offered after Blocks I-V and formal exposure to pharmacology course work is completed. The course is designed to familiarize students with drug use in the clinical setting and utilizes ongoing cases in the teaching hospital as a teaching tool. Pharmacological concepts are emphasized, with a focus on the rationale for drug choice, alternative drug choices available, pharmacokinetic considerations, and potential drug interactions/toxicities. This course is offered at the time students are about to embark on their clinical rotations. It is designed to emphasize practical aspects of pharmacology in the clinical setting, utilizing basic concepts obtained during formal course work. The course will be offered to the student to explain/rationalize drugs employed in clinical cases in the teaching hospital.
This is a team-taught survey course in inherited diseases in domestic animals. Topics include several inherited metabolic disorders of domestic and laboratory animals. It is aimed at the professional student in the veterinary curriculum, but is open to graduate level students. The course will be given in a combination lecture/seminar format, with students leading and actively participating in discussions. The students are expected to do assigned and independent outside research, both for class discussions and the paper.

**VETMED 699 Fundamentals of Ruminant Digestion and Metabolism**
Spring. 0.5 credit. Minimum enrollment 5. First-, second-, third-, and fourth-year veterinary students; selected graduate students by permission of the instructor. Letter grades only.
T. R. Houpt.

This course is designed for the student with little or no previous course work in ruminant digestive physiology. It will consist primarily of lectures surveying the functional aspects of control of feed intake; salivation; reticulorumen motility, including rumination and erosion; microbial flora and fauna; fermentation in reticulorumen (digestion of carbohydrates, proteins and fats); ruminal gas formation; absorption of short-chained fatty acids; special features of ruminal nitrogen metabolism, passage of nutrients to lower tract, and utilization of the ruminant by the functions of omasum, abomasum, small and large intestines. Emphasis will be on the differences of the ruminant digestive processes from those of the simple-stomached animals.

**VETMED 690 Molecular and Genetic Basis of Inherited Disorders in Animals and Application to Clinical Medicine**
Spring. 2 credits. Minimum enrollment 5; maximum enrollment 15. First-, second-, third-, and fourth-year veterinary students; graduate and undergraduate students also welcome. Letter grades only. Offered even-numbered years. J. Ray.

This course introduces the molecular basis of inherited diseases in domestic animals. Topics include several inherited metabolic defects causing systemic malfunctions; muscle, bone abnormalities; retinal degeneration, failure of the immune systems. Techniques to characterize genes and mutations. Use of molecular techniques for diagnosis and prevention. Use of molecular tools for the treatment of inherited disorders.

**VETMED 692 Current Concepts in Reproductive Biology**
Fall. 3 credits. First-, second-, and third-year veterinary students or appropriate undergraduate women in training. Letter grades only. Lec. 2 hours each week; disc. 2 hours each week; T R 10:10-12:05.
J. Fortune, R. Butler, and staff.

This is a team-taught survey course in reproductive physiology and endocrinology. Lectures by a number of reproductive biologists on various aspects of male reproductive function (endocrine regulation, testis function, spermatogenesis, and sperm physiology/function); female reproductive function (endocrinology, ovarian development and function, oocyte physiology/function); pregnancy, parturition; puberty; and reproductive technology. Student participation in the form of discussions and/or presentations.

**VETMED 695 Genetic Basis of Eye Diseases**
Spring. 1 credit. Minimum enrollment 5; maximum enrollment 14. First-, second-, third-, and fourth-year veterinary students; graduate students only. Letter grades only. G. Aguirre.

This course covers the topic of the molecular and genetic basis of inherited eye diseases in domestic and laboratory animals. It is aimed at the professional student in the veterinary curriculum, but is open to graduate level students. The course will be given in a combination lecture/seminar format, with students leading and actively participating in discussions. The students are expected to do assigned and independent outside research, both for class discussions and the paper.

**VETMED 696 Fundamental Principles and Anesthetic Techniques for Small Animal Practice**
Spring. 1 credit. Minimum enrollment 15. Third-, and fourth-year veterinary students. Letter grades only. P. W. Nathaniel, D. J. Fortune, R. Butler, and staff.

This course is designed for the veterinary student with interest in small animal practice. It will consist of lectures, case discussions, and anesthetic protocol development for routine and complicated cases. Special features emphasized in the course will include: management of anesthesia for elective surgery, management of the high-risk patient, fluid therapy, drug interactions, pain management, treatment of respiratory complications, treatment of cardiovascular complications, cardiopulmonary resuscitation, and post-anesthetic management. While fundamental concepts and advancements in anesthesia will be utilized in this course, a practical application for use in private practice will be a major objective.

**VETMED 698 Special Projects in Veterinary Medicine**
Fall, winter, spring, summer. Variable l^f credits. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades only. C. S. V. Short.

This course provides the opportunity for students to work individually with a faculty member to pursue an area of particular interest and, typically, not part of the established curriculum. Specific course objectives and scope are flexible and reflect the scope and academic expertise of the faculty.

**VETMED 701 Research Opportunities in Veterinary Medicine**
Fall, winter, spring, summer. Variable l^f credits. Prerequisite: VETMED 551. Must be arranged with a College of Veterinary Medicine tenure-track faculty member. S-U grades only. C. S. V. Short.

This course provides the opportunity for individual students to work in the research environment of faculty involved in veterinary or biomedical research. Specific course objectives and course content are flexible and reflect the specific research environment. Research projects may be arranged to accumulate credit toward requirements in Distribution Sets I, II, III, IV, and V.

**VETMED 702 Laboratory Animal Medicine**
Fall and spring. 2 credits. Prerequisite of VETMED 551. Minimum enrollment of 4 per rotation. Third- and fourth-year veterinary students. Letter grades only.
F. Quimby and staff.

The practice of laboratory animal medicine requires a combination of preventive programs, clinical skills, knowledge of various species' biology, familiarity with research methodology, and acquaintance with state and federal regulations. This course is offered as a two-week introductory course for students. Students accompany laboratory animal veterinarians on clinical rounds of Cornell's research animal housing and participate in laboratory diagnostic work. Review sessions are conducted on the care and use of animals, pathology, and husbandry of rodents, rabbits, and primates and on current legislation regulating the care and use of research animals. The course may include a field trip to the research animal facilities of Rockefeller University, the Cornell University Medical College, Marshall Farms, and the Laboratory of Experimental Medicine and Surgery in Primates.

**VETMED 703 Clinical Wildlife, Exotic, and Zoo Animal Medicine**
Fall, winter, spring, summer. Variable l^f credits. Prerequisite of VETMED 551. Minimum enrollment 2 per rotation. Third- and fourth-year veterinary students. Letter grades only. G. V. Kollias and staff.
This course introduces students to primary medical care of non-traditional pet species, zoo animals, and native wildlife. Students, directly supervised by the attending clinician, are responsible for the assessment, physical examination, and medical management of exotic animal species presented to the veterinary teaching hospital. Other opportunities available to assist in the development of clinical skills in wildlife, zoo and exotic animal medicine include wildlife clinical cases, ongoing wildlife research and service projects, and trips to the Burnett Park Zoo. Successful completion of the course requires satisfactory performance during this 14-day clinical rotation.

**VETMED 704 Quality Milk**  
Fall or spring. 2 credits. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. Letter grades only. R. Gonzalez, D. Wilson and staff. This course covers the causes, diagnosis, treatment, and prevention of bovine mastitis. The role of management practices is stressed. The course includes lectures, readings, discussions, laboratory exercises, and farm visits as part of the Quality Milk Promotion Services—New York State Mastitis Control Program.

**VETMED 705 Special Opportunities in Clinical Veterinary Medicine**  
Fall, spring, and summer. Prerequisite: VETMED 551. Third- and fourth-year veterinary students. S-U grades only. This course provides opportunities for students finished with Foundation Course V to explore professional areas not available through the regular curriculum. Blocks of two to four weeks are usually spent at other teaching hospitals, research laboratories, or zoological facilities. Student proposals are submitted to the associate dean for academic programs for review and approval. On-site supervisors of the block act as ex-officio faculty members and are required to evaluate each student formally.

**VETMED 707 Poultry Medicine and Production Rotation**  
Fall. 2 credits. Prerequisite: VETMED 551 and VETMED 540 or VETMI 315. Minimum enrollment 10; maximum enrollment 40. Third- and fourth-year veterinary students. Letter grades only. K. A. Schat. This course is a two-week rotation that will take place at the University of St. Hyacinthe or the University of Guelph in alternating years. This course provides students with an introduction in practical poultry medicine by a combination of lectures, discussions, and laboratory sessions including postmortem examinations. Students will also visit hatcheries, broiler, layer, and turkey farms.

**VETMED 720 Issues and Preventive Medicine in Animal Shelters**  

Veterinarians often work for or with animal shelters, serve on shelter boards of directors, are community resources for issues relating to companion animal welfare, participate in spay and neuter programs and influence the quality of the human-animal bond. This course will address the history of the humane movement, role of the veterinarian in relation to shelters, preventive and palliative health management (including highlighting diseases of major concern), issues surrounding euthanasia, reasons for relinquishment, programs for behavior modification and the legal concerns of animal shelters. The course will be addressed using lectures and large group discussions.

**VETMED 725 Diagnostic Cytology**  
Spring. 1.0 credit. Prerequisite: VETMED 628. Maximum enrollment 5. Second-, third-, and fourth-year veterinary students. S-U grades only. T. Stokol. This two-week course will provide in-depth experience in interpretation of cytological specimens. Evaluation of the cytological specimens will be incorporated into clinical cases, so that the results are interpreted with respect to the provided case material. The primary mode of instruction is based on faculty-driven microscopic slide evaluation. Students will be required to evaluate the slides independently prior to the microscope sessions. Selected mini-tutorials and laboratory sessions will be conducted with two one-hour lectures per week and one hour-long large group discussion per week. The class will meet two days per week, the first day for one hour and the second day for two hours. Grades will be based on weekly quizzes, a final exam, a short paper and/or oral participation.

**VETMED 726 Reptile Medicine and Surgery**  
Spring. 1 credit. Minimum enrollment 10; maximum enrollment 40. Third- and fourth-year veterinary students. Letter grades only. G. V. Kilias. This course is designed to introduce third- and potentially fourth-year veterinary students to the principles and practices of reptile medicine and surgery. The course will be taught in a basic lecture and discussion format with laboratories reinforcing concepts presented in the lectures.

**VETMED 730 Vaccines: from Jenner to DNA**  
Spring. 1 credit. Prerequisite: introductory course in immunology or VETMED 540 or VETMI 315. Minimum enrollment 10; maximum enrollment 30. Second-, third-, and fourth-year veterinary students and graduate students. Others by permission of the instructor. Letter grades only. Grades based on two examinations. Offered every numbered years. T. Clark. This course will provide an overview of vaccines used in clinical practice, as well as an in-depth look at vaccine development. Emphasis will be placed on the most recent advances in vaccine design and delivery, including the use of recombinant DNA techniques for targeting specific immunological responses. Lectures will touch on vaccines commonly used in veterinary practice and will address in detail veterinary adjuvants and immunostimulants; attenuated pathogens; synthetic peptides; recombinant subunit vaccines; viral and bacterial vectors for vaccine delivery; synthetic antibodies; and genetic immunization with "naked" DNA.

**VETMED 732 Veterinary Clinical Toxicology**  
Spring. 1.5 credits. Second-, third-, and fourth-year veterinary students. S-U grades optional. L. Thompson and K. Earnest-Koons. This course will provide the veterinary student with a solid introduction to concepts and principles of toxicology and how they are applied in the clinical setting. Students will learn about specific common toxicants, clinical signs in affected animals and treatment protocols for the toxicants in question. Students will also critically review and evaluate the clinical approach to suspected or unknown toxicoses, sample collection and handling, and resources available for clinical toxicologic problems. The course will be conducted with two one-hour lectures per week and one hour-long large group discussion per week. The class will meet two days per week, the first day for one hour and the second day for two hours. Grades will be based on weekly quizzes, a final exam, a short paper and/or oral presentation.

**VETMED 735 Selected Infectious Diseases of Swine**  
Spring. 1.5 credits. Minimum enrollment 6; maximum enrollment 80. Second-, third-, and fourth-year veterinary students. S-U grades optional. K. Earnest-Koons. This course will provide students with a solid introduction to concepts and principles of swine infectious diseases and how they are treated in the clinical setting. Students will learn about specific infectious diseases, their associated animals and treatment protocols for the diseases in question. Students will also gain an understanding of the clinical approach to suspected or unknown infectious agents, sample collection and handling, and resources available for infectious disease diagnosis. The course will be conducted with two one-hour lectures per week and one hour-long large group discussion per week. The class will meet three days per week for one hour each. Grades will be based on weekly quizzes, a final exam, a short paper and/or oral presentation.

**VETMED 736 Special Topics in Ambulatory and Production Animal Medicine.**  
Fall, winter, spring, and summer. Variable 1-2 credits. Prerequisite: VETMED 560. Enrollment is done by lottery. Second-, third-, and fourth-year veterinary students. Letter grades only. J. L. Wernick and staff. This course provides specialized experiences in the Ambulatory and Production Medicine Service. The course will consist of participation in scheduled and emergency farm calls and completion of projects designed to provide experience in herd problem solving, records analysis and implementing herd-health programs. Clinical service assignments will be planned to meet individual student goals. Examples of focus areas available include livestock production medicine, dairy reproductive examinations, small-ruminant medicine, and equine ambulatory practice.

**VETMED 737 Veterinary Diagnostic Imaging: Anatomy and Interpretation**  
Spring. 1 credit. Minimum enrollment 20; maximum enrollment 50. First- and second-year veterinary students by permission of instructor. Third- and fourth-year veterinary students. S-U grades only. P. Scrivani. The course is designed to emphasize the relevance of a solid foundation in veterinary anatomy as it clinically applied to diagnostic imaging. Additionally, the course is designed to provide students with an understanding of the strengths and limitation of diagnostic imaging by discussing interpretation prin-
THE ORGANISMAL AND MOLECULAR LEVELS. STRUCTURE-FUNCTION RELATIONSHIPS ARE STRESSED ALONG WITH UNDERLYING PHYSICAL-CHEMICAL MECHANISMS.

VETBMS 600 Special Projects in Anatomy (enroll in VETM 600) Fall, spring. 1 credit per 2.5-hour period. By permission of the instructor. S-U grades only.

VETBMS 628 Graduate Research in Animal Physiology (Graduate) (enroll in VETM 628) (also BIO S 719) Fall, spring. 1-3 credits. By written permission of committee chairperson and instructor. S-U grades only.

VETBMS 637 Postmortem Pathology (enroll in VETPA 637) Fall, spring. 2 credits. By written permission of committee chairperson and instructor. S-U grades only. Offered 1999-2000. M. J. King.

A presentation of gross and microscopic lesions of diagnostic significance, employing color projection slides as illustrations. Emphasis on pathological and differential diagnosis of a wide spectrum of viral, metabolic, bacterial, parasitic, and other diseases.

VETBMS 639 Autotutorial in Laboratory Animal Medicine and Science (enroll in VETPA 639) Spring. 2-5 credits. Letter grades only. F. W. Quimby.

This course is designed to introduce students to the discipline of surgical pathology. Material from the Surgical Pathology Service is prepared in advance for independent review. Students will receive material, return it completed, and assign the grade. S-U grades only. Not offered 1999-2000.

VETBMS 641 Veterinary Clinical Immunology (enroll in VETPA 641) Spring. 1 credit. By permission of the instructor. Letter grades only. R. M. Lewis.

This course emphasizes the specific aspects of the immune system that are mediated by immunologic processes. Case material from the Teaching Hospital is used to illustrate pathogenesis, etiology, and pathologic features in specific cases. Laboratory diagnostic methods, clinical course, therapeutic approaches, and critical review of each disease under discussion. Student participation in informal case discussions is encouraged.

VETBMS 700 Predictions of Form or Phology (enroll in VETM 700) Spring. 1 credit. By permission of the instructor. S-U grades only.

J. W. Hermanson.
modules are offered each semester by arrangement with the course coordinator.

VETBMS 812 Advanced Physiology Methods II (enroll in VETPH 812) (also BIO S 812) (Graduate) Spring. 2 credits. Enrollment limited. Prerequisites: graduate student status or permission of instructor. S-U grades only. Lab to be arranged. J. Ray. This is a course primarily for graduate students in physiology and related disciplines. Experiments are carried out in the laboratories of physiology faculty members to acquaint students with the latest techniques and methods in physiological research. Three modules are offered each semester by arrangement with the course coordinator.

Veterinary Clinical Sciences [VETCS 700 Pathophysiology of Gastrointestinal Surgery] Fall. 1.5 credits. S-U grades only. Offered every third year. Next offered in fall of 2001. N. G. Ducharme. Normal anatomy and physiology of the gastrointestinal system in carnivores, herbivores and ruminants will be presented initially. This will be followed by in-depth discussion of the pathophysiological mechanisms and sequelae of gastrointestinal obstructions, perforation injury, peritonitis, and short bowel syndrome. The emphasis of this course is development of advanced understanding of surgically relevant gastrointestinal problems which lead to appropriate decision making.

[VETCS 701 Pathophysiology of Orthopedic Surgery (Graduate)] Spring. 1 credit. Prerequisites: DVM degree or equivalent. S-U grades only. Offered every third year. R. P. Hackett, S. L. Fubini, N. G. Ducharme, H. J. Harvey. Using lectures and group discussions, the objective of this course is to explain the pathophysiology of various cardiovascular diseases (cardiac arrhythmia under anesthesia) and thoracic disease (various forms of upper airway resistance). The emphasis is placed on understanding these mechanisms and outlining the surgeon’s response to them.

[VETCS 702 Pathophysiology of Cardiopulmonary Surgery (Graduate)] Fall. 1.5 credits. Prerequisite: DVM, MD, or equivalents, or approval of instructor. S-U grades only. Offered every third year. Next offered spring 2002.

[VETCS 703 Surgical Principles and Surgery of the Integumentary System (Graduate)] Spring. 1.5 credits. For graduate DVM’s (or equivalent) in residency or graduate training programs. S-U grades only. Offered every third year. This course is designed for surgery residents and graduate students. It is largely discussion format and examines surgical principles and surgery of the integumentary system.

[VETCS 704 Pathophysiology of Urogenital Surgery (Graduate)] Fall. For graduate DVM’s or equivalent in residency or graduate training programs. 1.5 credits. S-U grades only. Offered every third year. Next offered fall 2001. S. Fubini. This course is designed to review and discuss urogenital surgical procedures in animals and the rational basis for them. Pathophysiology will be stressed. Some classes will consist of reprints with discussion.

[VETCS 706 Pathophysiology of Neurologic Surgery (Graduate)] Spring. Prerequisite includes DVM, MD, or equivalent, or approval of instructor. 1.5 credits. P. F. Moon. Offered every third year. Next offered spring 2001.

[VETCS 710 Advanced Veterinary Anesthesiology I] Fall, winter. Prerequisites: VETMED 568 Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. P. F. Moon and staff. The content of the course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for residency training in other areas such as surgery and internal medicine. Speakers will be from both inside and outside the college. Topics will cover the basic sciences as they apply to anesthesia such as physics and engineering, applied pharmacology, physiology and pathology. Clinically oriented lectures will also be given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

[VETCS 711 Advanced Veterinary Anesthesiology II] Fall, winter. 1 credit. Prerequisites: VETMED 568, Veterinary Anesthesiology or permission of instructor. Third- and fourth-year veterinary students, graduate students, interns, and residents. S-U grades only. Offered every third year. The content of the course is designed for preparation for the American College of Veterinary Anesthesiology examinations. However, the course is also suitable for residency training in other areas such as surgery and internal medicine. Speakers will be from both inside and outside the college. Topics will cover the basic sciences as they apply to anesthesia such as physics and engineering, applied pharmacology, physiology and pathology. Clinically oriented lectures will also be given concerning specific anesthetic techniques and species-specific differences in response to anesthetic drugs.

Veterinary Microbiology and Immunology VETMI 315 Basic Immunology (Undergraduate) [also Biological Sciences 305] Fall. 3 credits. Strongly recommended: basic courses in microbiology, genetics, and biochemistry. S-U grades optional. J. A. Marsh. A survey of immunology, with emphasis on the cellular and molecular bases of the immune response. More information is available at the bio305 courseinfo web site.

VETMI 320 Principles of Toxicology (Undergraduate) [also Biological Sciences 320] Spring. 3 credits. Prerequisites: one year each of introductory biology and chemistry, with lab; one semester of organic chemistry lecture or waiver by instructor. S-U grades only. 1.25-2.40 S. Penningroth, R. Dietert, and S. Bloom. An introduction to the interdisciplinary science of toxicology, drawing on material from biology, chemistry, pharmacology, ecology, earth science, risk analysis and policy studies. Basic principles of toxicological science are presented and illustrated by case examples, such as pesticide toxicity to wildlife reproduction and human health risk assessment at a Superfund hazardous chemical waste site. Chemical risk management is described as a sociopolitical process involving the integration of scientific, economic and cultural factors. Independent student projects include a toxic chemical profile and a team analysis of hypothetical "environmental risk scenarios." Periodic talks by toxicology faculty acquaint students with basic research in this interdisciplinary branch of Biological Science. This is an introductory level course in toxicology. Format: lecture supplemented by case examples. One field trip to a hazardous chemical waste site. Appropriate for non-majors seeking basic literacy in environmental and human toxicology. "Gateway course" for students interested in 400 and 600 level toxicology courses.

VETMI 404 Pathogenic Bacteriology and Mycology (also BIOMI 404) Spring. 2 or 3 credits (3 credits with lecture and seminar). Prerequisites: BIOMI 290 and 291. Seminar is required of graduate students and open to undergraduates with permission of instructor. Seminar limited to 15 students. Letter grades only. Offered odd-numbered years. Not offered spring 2000. Microbiology faculty. This is a course in medical microbiology, presenting the major groups of bacterial and mycotic pathogens important to human and veterinary medicine. The emphasis of this course is infection and disease pathogenesis. Topics include disease causality; interactions of host, pathogen, and environment, including immunity to bacteria and fungi; and principles of antimicrobial therapy and drug resistance. A companion seminar addresses the current and classic literature related to microbial pathophysiology on the cellular and molecular level.

VETMI 408 Viruses and Diseases I (also Biological Sciences 408) Spring. 3 credits. Intended primarily for graduate and undergraduate microbiology majors. Prerequisites: Microbiology 290 and 291 (College of Agriculture and Life Sciences). Recommended: VETMI 315, Genetics 281. Letter grades only. Offered even-numbered years. J. W. Casey. The course will cover basic concepts in virology with emphasis primarily on DNA virus-host interactions, strategies for gene regulation, and mechanisms of pathogenicity. Selected viral infections that result in immune dysfunction and neoplasia will be highlighted in the context of approaches to prevent or reduce the severity of diseases.

VETMI 409 Viruses and Disease II (also BIOMI 409) Fall. 2 credits. Prerequisites: BIOMI 290 & 291. Recommended BIOMI 408, BIOMI 530-532, BIOMI 432. Offered even-numbered years. Not offered spring 2000. G. Whitaker. This course will be complementary to BIOMI 408, Viruses and Disease I, and will emphasize RNA viruses. The course will be complete in its own right. As such, completion of BIOMI 408 is not a requirement, but is
encouraged. The structure and classification of viruses entry, genome replication and virus assembly. Particular emphasis will be placed on virus-host cell interactions. Vaccinations, chemotherapy and evaluation of viruses will also be discussed.)

**VETMI 431 Medical Parasitology (Undergraduate)**

Fall. 2 credits. Prerequisites: zoology or biology; any of the following courses: BIOES 261, 263, 264, 267, 274, 275, 278; BIOG 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 170, 202, 207; BIOM 192, 290, 398 or equivalent course. Letter grades only. D. D. Bowman.

A systematic study of arthropod, protozoan, and helminth parasites of public health importance, with emphasis on epidemiologic, clinical, and zoonotic aspects of these parasites.

**VETMI 605 Special Projects in Microbiology (Undergraduate)**

Fall, spring. 1–3 credits. By permission of the instructor. Prerequisite: a good background in microbiology or immunology. Preferably, students should have background in pathogenic microbiology and immunology. S-U grades only. Microbiology staff.

The course normally provides an opportunity for the student to work in a research laboratory or carry out a special project under supervision.

**VETMI 700 The Biology of Animal Viruses (Graduate and Upper-level Undergraduate)**

Fall. 2 credits. Letter grades only. Offered odd-numbered years. C. R. Parrish and staff.

This course will examine current topics in studies of animal viruses, with some comparisons with plant viruses where similar mechanisms apply. Selected topics will be examined in depth, and those will include the structures of viruses and their components, viral nucleic acids and replication strategies, details of the interactions between viruses and their host cell components and metabolism. Other topics to be covered will include the evolution and selection of viruses, and novel approaches to the prevention of virus infection, and methods for antiviral chemotherapy.

**[VETMI 701 Pathogenesis of Viral Diseases (also VETMED 619)](enroll in VETPR 611)**

Spring. 2 credits. Given during 8-week spring distribution period, January–March. Open to graduate students and advanced undergraduates with permission of instructor. Strongly recommended prerequisites: Letter grades. Offered odd-numbered years. Not offered spring 2000. Microbiology faculty.

Course content and objectives: the course will focus on the balance between host defense against viral infections and the mechanisms by which viruses perpetuate themselves in human and animal populations. In the process, the mechanisms of cell and animal infection, spread between cells, disease mechanisms, and the roles of the immune response in enhancing and suppressing disease will be explored. This will include a systems-based approach exploring the pathogenesis of disease in the CNS, gastrointestinal, hepatic, tegumentary, respiratory and urogenital systems. The basic principles of virus taxonomy, structure and replication will be included to introduce various viral groups and their special properties. Methods of intervention (vaccination, antiviral drugs) will also be covered. Lectures are derived from relevant current literature. Nathanson's *Viral Pathogenesis*, 1997, and Field's *Virology*, third edition, 1996. Relevant materials will be placed on reserve in the veterinary library.

**VETMI 702 Molecular Biology and Immunology of Host-Parasite Interactions (Graduate) (also VETMED 620)**

Spring. 2 credits. S-U grades optional. Offered even-numbered years. E. J. Pearce. See description for VETMED 620.

**VETMI 705 Advanced Immunology (Graduate) (also Biological Sciences 705)**

Spring. 3 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. Letter grades only. Offered even-numbered years. R. G. Bell and staff. Coverage at an advanced level of molecular and cellular immunology.

**VETMI 706 Immunology Seminar Series (Graduate)**

Fall, spring. No credit. Required of all graduate students in the Field of Immunology. S-U grades only. Fall, E. Pearce; spring, R. Dieter.

Presentations of research investigations by Cornell faculty members, postdoctoral fellows, and graduate students in the Field of Immunology and by invited speakers from other institutions.

**VETMI 707 Advanced Work in Bacteriology, Virology, and Immunology (Graduate)**

Fall, spring. 1–3 credits. By permission of the instructor. S-U grades optional. Microbiology staff.

This course is designed primarily for graduate students with a good background in pathogenic microbiology and immunology. It may be elected by veterinary students who are properly prepared.

**VETMI 710 Microbiology Seminar (Graduate)**

Fall, spring. 1 credit. Required of all graduate students in the Department of Microbiology and Immunology. S-U grades only. E. J. Pearce, C. R. Parrish.

**[VETMI 719 Immunology of Infectious Diseases and Tumors (also Biological Sciences 706) (Graduate)](enroll in VETPR 470) (also A&EP 670e)**

Spring. 2 credits. Prerequisite: VETMI 315 Basic Immunology or permission of instructor. Credit/no-credit. Offered odd-numbered years. Not offered spring 2000. E. Y. Denkers and staff.

Coverage at an advanced level of the immunology of diseases caused by selected bacteria, viruses, fungal, and helminthic parasites. Tumor immunology.

**VETMI 737 Advanced Work in Animal Parasitology (Graduate)**

Fall, spring. 1–3 credits. For advanced undergraduate, graduate, and veterinary students. Letter grades only. D. D. Bowman and other faculty.

This course is intended for advanced undergraduate, graduate, and veterinary students with interests in parasitology research.

**VETMI 770 Advanced Work in Avian Diseases (Graduate)**

Fall, spring. 1–3 credits. By arrangement with the instructor. Letter grades only. Microbiology faculty.

**VETMI 772 Advanced Work in Aquatic Animal Diseases (Graduate)**

Fall, spring. 1–3 credits. By arrangement with the instructor. S-U grades only. P. R. Bowser.

**VETMI 783 Seminars in Parasitology (Graduate)**

Fall, spring. 1 credit. Open to veterinary students or graduate students; others by permission of the instructor. S-U grades only. D. D. Bowman.

This is a seminar series designed to acquaint students with current research in the field of parasitology. The range of topics is determined, in part, by the interests of those participating and may include such topics as the ecology of parasitism, parasite systematics, wildlife parasitology, and parasitic diseases of plants and animals, including humans.

**Veterinary Molecular Medicine**

**VETMM 470 Biophysical Methods (enroll in VETPR 470) (also A&EP 670e)**

Spring. 3 credits. By permission of the instructor. Letter grades only. M. Lindau.

An overview of the diversity of modern biophysical experimental techniques used in the study of biophysical systems at the cellular and molecular level. Topics covered will include methods that examine both structure and function of biological systems, with emphasis on the applications of these methods to biological membranes. The course format will include assigned literature reviews by the students on specific biophysics topics and individual student presentations on these topics. The course is intended for students of the engineering, physics, chemistry, and biological disciplines who seek an introduction to modern biophysical experimental methods. A solid knowledge of basic physics, and of mathematics through the sophomore level is expected. Some knowledge of cellular biology is helpful but not required.

**[VETMM 610 Cellular and Molecular Pharmacology (enroll in VETPR 610)](enroll in VETPR 611)**

Fall. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. Not offered fall 1999. G. A. Weiland and pharmacology faculty.

A graduate-level course surveying the molecular and cellular aspects of receptor mechanisms, signaling pathways, and effector systems. Topics include drug-receptor interactions; ligand- and voltage-gated ion channels; G protein pathways; growth factor signaling; lipid signaling; calcium; nutrient and nitric oxide signaling; and other mechanisms and effector-mediated effects on neural excitation, electrical pacemakers, muscle contraction and gene expression.

**VETMM 611 Systems Pharmacology (enroll in VETPR 611)**

Spring. 2 credits. By permission of the instructors. S-U grades optional. Offered even-numbered years. G. A. Weiland and pharmacology faculty.

A graduate-level course surveying system- and organ-related aspects of pharmacology. Topics covered include drug disposition, pharmacokinetics, autonomic pharmacology;
central nervous system pharmacology; pharmacology of inflammation, allergy and platelet function; cardiovascular, gastrointestinal and endocrine pharmacology; and chemotherapy, including antimicrobial agents and cancer chemotherapy.

VETMM 672 Protein Kinetics (enroll in VETPR 672) (also CHEM 672)
Fall. 4 credits. Prerequisite: CHEM 288 or 390, BIOBM 351 or permission of the instructor. S-U grades optional. B. A. Baird.
Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include: protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation; role of cell membrane receptors in regulating cellular activities.

VETMM 700 Calcium as a Second Messenger in Cell Activation (enroll in VETPR 700)
Spring. 2 credits. By permission of the instructor. Lecture-discussion. S-U grading only. Offered even-numbered years. C. M. Fettweil.
Regulation of intracellular calcium and techniques for studying calcium movements and distribution in cells. Calcium channels and exchangers, calcium-binding proteins, and calcium stores. Phosphatidylinositol turnover, release of calcium from intracellular stores, and activation of calcium influx. Calcium gradients and oscillations. Mechanisms of exocytosis and the proteins involved. Each topic will be introduced with a lecture followed by discussion of recent papers from the literature.

VETMM 701 Organ System Toxicology (enroll in VETPR 701) (also TOX 611)
Fall. 1 credit. For graduate students in environmental toxicology. S-U grading only. Offered fall 1999. W. S. Schwark.
A minicourse on molecular mechanisms involved in chemical toxicity. Specific examples of toxicity in organ systems such as the nervous system, kidney, liver, respiratory tract, and cardiovascular system will be considered.

VETMM 703 Receptor-Ligand Interactions (enroll in VETPR 703) (also BIOBM 790-02)
Fall. 2 credits. By permission of the instructor. S-U grades optional. Offered odd-numbered years. R. E. Oswald, G. A. Weiland.
The course covers both the practical and theoretical tools for the study of ligand-receptor interactions, emphasizing the quantitative and physical chemical aspects of receptor theory. Topics discussed are basic methods of radioligand binding assays, including separation and measurement of bound and free ligand; characterization of receptor function; analysis of receptor structure; thermodynamic basis of the binding; methods of analyzing equilibrium binding; equilibrium binding for complex binding mechanisms; and kinetics of simple and complex binding mechanisms.

[VETMM 704 CNS Synaptic Transmission (enroll in VETPR 704)]
This is a survey course in vertebrate central nervous system physiology and pharmacology, and focuses on mechanisms of neurotransmitter action at the membrane and cellular levels. Roles of selected neurotransmitters in normal and dysfunctional brains are covered. Topics will be introduced in lectures and followed up in discussions of recent journal articles.

[VETMM 705 Molecular Mechanisms of Receptor-G Protein Coupled Signaling (enroll in VETPR 705)]
This course focuses on the mechanisms of action of GTP binding proteins. Several receptor-coupled signaling systems are examined, including adenyl cyclase, vertebrate vision, phosphatidylinositol lipid turnover, receptor systems regulating various ion channels, and receptors involved in cell growth regulation.

[VETMM 706 Growth Factor-Coupled Signaling (enroll in VETPR 706) (also BIOBM 734)]
General theme will be mitogenic signaling pathways. Receptor tyrosine kinases, src, ras, and ras-regulatory proteins will be covered.

[VETMM 707 Protein NMR Spectroscopy (enroll in VETPR 707) (also BIOBM 730)]
The fundamentals of NMR will be presented and the student will acquire the tools necessary to establish an in-depth understanding of multidimensional, multinuclear NMR experiments. Application of the technique to proteins for assignment of resonances, determination of structure, and characterization of dynamics will be presented. Special approaches for applying solution NMR techniques to large proteins will be discussed.

[VETMM 708 Lipid Second Messengers (enroll in VETPR 708)]
Spring. 2 credits. Students with general biology background may enroll by permission of instructor. Lecture-discussion. S-U grades optional. Offered even-numbered years. H. Alex Brown.
This course covers the biochemical pathways involved in the production of lipid second messengers. These pathways function as essential elements of cellular signal transduction cascades. Topics include pathways of phospholipid synthesized from phospholipid by phospholipases; linked through G-proteins and tyrosine kinase receptors to intracellular cascades, and subsequent metabolism of lipid products. The roles of lipids in regulating cell processes, such as membrane structure, exocytosis, cell cycle, and apoptosis, are topics for discussion following reviews of recent publications. A background in general biochemistry is recommended.

VETMM 709 Cancer Cell Biology (enroll in VETPR 709) (also Biological Sciences 750) (Graduate)
Spring. 3 credits. Prerequisite: Biological Sciences 330 or 331 or equivalent. Recommended: graduate courses in biological sciences. Letter grade. Offered even-numbered years. J. L. Guan, R. A. Levine, B. U. Pauli, A. Yen. This advanced graduate course will cover molecular, cellular, and genetic aspects of cancer. The course is divided into four sections. The first section will address tumor etiology, progression, and metastasis. Topics in this section will include causes of cancer, morphologic and genetic models of cancer progression, tumor angiogenesis, tumor invasion, and metastasis. The second section will discuss cell-matrix and cell-cell interactions in cancer. Topics will include the structure and function of the major matrix receptor integrin family of cell adhesion molecules, integrin interactions with the cytoskeleton, intracellular signaling pathways in cell-ECM interactions, integrin-mediated signaling in cellular growth regulation, changes of integrins in human tumors and metastasis, structure and function of cadherin family of cell-cell adhesion molecules, signaling mechanisms in cell-cell interactions in normal development and cancer. The third section will be on cell cycle. It will develop properties of the cell cycle, how its phases are measured, and changes associated with cell transformation. The fourth section will discuss the signaling pathways that regulate cell cycle progression and how oncogenes and tumor suppressor genes regulate cell proliferation, differentiation, and apoptosis.

Special Projects and Research in Pharmacology
Fall, spring, summer. 1–3 credits. By arrangement with the instructor. S-U grades optional. Independent study or research. Pharmacology faculty. These courses cover a variety of topics related to the research interests of the faculty.

VETMM 711 The Role of Calcium in Stimulus-Secretion Coupling (enroll in VETPR 711)
C. M. S. Fewtrell.

VETMM 713 Mechanisms of Growth-Factor Action (enroll in VETPR 713)
R. A. Cerione.

VETMM 714 Central Nervous System Neurotransmitters (enroll in VETPR 714)
L. M. Nowak.

VETMM 718 Structure-Function of the Nicotinic Acetylcholine Receptor (enroll in VETPR 718)
R. E. Oswald.

VETMM 720 Modulation of Nicotinic Acetylcholine Receptor Function (enroll in VETPR 720)
G. A. Weiland.

VETMM 724 The Control of Hormone Secretion (enroll in VETPR 724)
G. W. G. Sharp.

**VETM 730 Graduate Research in Pharmacology (enroll in VETPR 730)**
Fall, spring, and summer. 1–12 credits. By permission of the instructor. S-U grades only. This course is offered by individual faculty members in the Department of Pharmacology for graduate students undertaking research toward M.S. or Ph.D. degrees.

**Directed Readings in Pharmacology**
Fall, spring, and summer. 1–3 credits each topic. By arrangement with the instructor. S-U grades optional. Pharmacology faculty. Reading and discussions. These courses are offered to small groups or to individual students.

**VETM 742 Receptor Mechanisms (enroll in VETPR 742)**
G. A. Weland

**VETM 745 Biochemical Neuropharmacology (enroll in VETPR 745)**
G. A. Weland

**VETM 747 Amino Acid Neurotransmitters (enroll in VETPR 747)**
L. M. Nowak

**VETM 748 Stimulus-Secretion Coupling (enroll in VETPR 748)**
C. M. S. Fewtrell

**VETM 750 Cell Calcium (enroll in VETPR 750)**
C. M. S. Fewtrell

**VETM 780 Advanced Topics in Pharmacology (enroll in VETPR 780)**
Pharmacology faculty.

**Veterinary Population Medicine and Diagnostic Sciences**

**VETPMD 664 Introduction to Epidemiology (Graduate) (enroll in VETCS 664)**
Fall. 3 credits. Prerequisites: VETCS 665 and Statistics and Biometry 602 (College of Agriculture and Life Sciences). S-U grades optional. M W F 8:45–9:35. Y. T. Grohn. Concepts introduced in VETPMD 664 and VETPMD 665 are further developed, with emphasis on statistical methods. Topics include interaction, effect modification, stratified analysis, matching and multivariate (logistic regression) methods, survival analysis, and strategies for the analysis of epidemiologic data.

**VETPMD 666 Advanced Methods in Epidemiology (Graduate) (enroll in VETCS 666)**
Fall. 3 credits. Prerequisites: VETCS 665 and Statistics and Biometry 602 (College of Agriculture and Life Sciences). S-U grades optional. M W F 8:45–9:35. Y. T. Grohn. These studies include observational cohort studies (prospective and retrospective), cross-sectional studies, case-control studies, and hybrid studies (ambidirectional, and other hybrid designs).

**VETPMD 667 Clinical Biostatistics (Graduate) (enroll in VETCS 670)**

The theory behind and interpretation of parametric and nonparametric statistical techniques commonly employed in research/clinical medicine will be explained. Students will analyze small data sets using a commercial statistical software package.

**VETPMD 700 Special Projects in Diagnostic Endocrinology (enroll in VETDL 700)**
Fall spring. 1–3 credits. By permission of the instructor. Letter grades only. T. J. Reimers. An independent study course. Students have the opportunity to research a particular topic in diagnostic/clinical endocrinology.

**VETPMD 701 Special Projects in Infectious Diseases (enroll in VETDL 701)**
Fall spring. 1–3 credits. By permission of the instructor. S-U grades optional. Diagnostic laboratory faculty. This course provides laboratory experience with attention to specific aspects of infectious disease problems.

**VETPMD 702 Special Topics in Infectious Diseases (enroll in VETDL 702)**
Fall spring. 1–3 credits. By permission of the instructor. S-U grades optional. Diagnostic laboratory faculty. The objective of this course is to offer a broad exposure to various aspects of infectious diseases.

**VETPMD 703 Doctoral-Level Thesis Research (Graduate) (enroll in VETDL 703)**
Fall spring. 6–9 credits. By permission of the instructor. S-U grades only. Diagnostic laboratory faculty. Research leading to a Ph.D. degree.

**VETPMD 704 Master's - Level Thesis Research (Graduate) (enroll in VETDL 704)**
Fall spring. 1–3 credits. By permission of the instructor. S-U grades only. Diagnostic laboratory faculty. Research leading to an M.S. degree.

**VETPMD 705 (enroll in VETDL 705)**

**FACULTY ROSTER**

COLLEGE OF ARTS AND SCIENCES

PROGRAM OF STUDY

Introduction
The College of Arts and Sciences—composed of those departments that comprise the humanities and the arts, the basic sciences, mathematics and computer science, and the social sciences and history—is a community of about 4,000 undergraduates and 600 faculty members. The college values intellectual breadth and rigor, individual choice and responsibility, imaginative curricula, and development of critical thinking and writing. The college is also a graduate school and research center attracting faculty whose research and scholarly and creative writing require first-rate academic facilities and who bring to all their students the profound questions and the current ideas of contemporary scholarship. Finally, the college exists within a university of about 18,000 students and 1,630 faculty members. This wider community provides depth and diversity of applied and professional studies beyond what one undergraduate college alone can offer. Students may draw upon the knowledge and facilities of the other undergraduate colleges at Cornell to supplement their studies.

Abundant variety and outstanding quality in many fields, including interdisciplinary fields, give the college its distinctive character. The richness of the curriculum is extraordinary; there is no course that all students must take, and there are nearly two thousand from which they may choose. By choosing courses each semester, students design their own education. They strike a balance between developing known interests and exploring new subjects. They sharpen their verbal and quantitative skills. They also come to understand more thoroughly the Western tradition and learn something about the non-Western world and its peoples. An education in the liberal arts and sciences means honing one's critical capacities, learning about oneself in nature and culture, and gaining real experience with views of the world radically unlike one's own. All this is highly individual, and the college relies on each student and faculty adviser to design a sensible, challenging, and appropriate course of study.

Yet the faculty believes that each student's education should have certain common qualities. These include familiarity with several different ways of knowing that are reflected in clusters of disciplines in the natural sciences, the social sciences, and the humanities and the arts. In addition to these general areas of knowledge, students study foreign languages, acquire effective writing and quantitative skills, and concentrate on one particular field to develop the powers of imagination and critical thinking as fully as possible. To accomplish these objectives, the college has certain requirements for graduation.

Summary of Requirements for the Bachelor of Arts degree

1) First-Year Writing Seminars: two courses. (See "John S. Knight Writing Program," p. 563.)
2) Foreign language: proficiency in one language or qualification in two, 0 to 4 courses. (See below.)
3) Distribution: nine courses, three of which are satisfied with a major in humanities or social sciences and four of which are satisfied with a major in sciences. (See below.)
4) Breadth: two courses (may be among courses for distribution, major, or electives). (See below.)
5) Major. (See below.)
6) Electives: four or five courses (at least 15 credits) in courses not used to fulfill other requirements and not in the major field.
7) Residence: eight full-time semesters, unless a student can successfully complete all other requirements in fewer than eight semesters and meet the additional criteria to accelerate graduation. (See below under "Acceleration.")
8) Minimum number of courses: thirty-four courses. A two-credit course counts as half a course; a six-credit language course counts as one and one-half courses; a one-credit course does not count toward this requirement. (See below under "Courses and Credits.")
9) Credits: a total of 120 academic credits, of which 100 must be taken in the College of Arts and Sciences. (Note "Non-credit courses below.")
10) Physical education: completion of the university requirement (two one-credit non-academic courses). Please note that physical education credit does not count toward graduation or toward the 12-credit minimum required for good academic standing each semester. (See p. 13.)
11) Application to graduate. (See below under "Graduation.")

Foreign Language Requirement
The faculty considers competence in a foreign language essential for an educated person. Studying another language helps students understand the problematics of language itself, our fundamental intellectual tool, and more fully opens another culture for exploration. The sooner a student acquires competence, the more useful it will be. Hence, work toward the foreign language requirement should be undertaken in the freshman and sophomore years. Courses in foreign languages and/or literature are taught in the College of Arts and Sciences by the following departments: Africana Studies and Research Center, Asian Studies, Classics, German Studies, Near Eastern Studies, Romance Studies, and Russian Literature.

The language requirement may be satisfied in one of two ways:
1) by attaining proficiency (competence at the intermediate level) in one language
2) by attaining qualification (mastery of an introductory sequence) in two languages.

Proficiency
Proficiency may be attained in languages by passing an intermediate (usually 200-level) Cornell course (or Chinese or Japanese 161). Some introductory language courses are taught at the 300- or 400-level (for example, Near Eastern Studies 333–334); these do not confer proficiency. Proficiency can also be earned by examination. A score of 4 or 5 on an AP language exam earns three credits but does not carry with it proficiency. However, a student who received a score of 4 or 5 on an AP language exam can earn proficiency and an additional three credits by scoring high enough on the CASE (Cornell Advanced Standing Examination), which is given during orientation week. On the other hand, a score of 4 or 5 on an AP literature exam in French, German (German offers a combined language/literature exam), or Spanish earns proficiency, as well as three credits. Students with those scores should also take the CASE to see if they can earn an additional three credits. Students with appropriate scores on Cornell Language Placement tests or SAT II examinations are also eligible to take the CASE (see chart below). Native speakers and writers of a language other than English may earn proficiency and 6 credits by taking the CASE exam or an individual exam (if no CASE exam is available).

Qualification
Qualification may be attained in any of the following ways:
1) Three years of high school study in any one language gives qualification in that language. No demonstration of competence is necessary. Note, however, that this route to qualification does not guarantee entrance into an intermediate level course. Students who want to continue studying the language must be placed in the appropriate course through an examination. Being placed below the intermediate level does not cancel the qualification.
2) Passing the requisite Cornell course: 102, 123, or 134 in most languages; Chinese 110, 112, or 114; Japanese 160; Korean 102 or 110; Near Eastern Studies 102 in Hebrew, 112 in elementary Arabic; 118 in Elementary Turkish; Classics 103 or 104 in Greek, 106 or 107 in Latin; 132 in Sanskrit, AS&RC 134 in Swahili.
3) A score of 600 in French, 580 in German, and 590 in Italian or Spanish on the SAT.

Note: Except in the case of Sanskrit, completion of language sequences 131–132 does not constitute qualification.
If taken in high school or a score of 56 or higher on the appropriate Cornell Language Placement (LP) test, students may earn a score of 56 on the placement test at the end of a course numbered 122 (second semester of the introductory sequence) and consequently attain qualification without taking 123, the third semester of the introductory sequence. However, with a score of 56, it may be worthwhile to take 123.

4) By departmental or (when no placement test is available) individual examination at Cornell.

Placement in Language Courses and Advanced Placement Credit

Placement into language courses and advanced placement credit are separate results of examinations.

Placement

Entering students who have had two or more years of high school study in a language, who have been awarded credit for language work at another college or university, or who are native speakers, bilingual, or have spoken the language at home, may enroll in a course in the same language only after being placed by examination. The placement exam may have been taken in high school (SAT II, taken after the last course, or AP, if the score was 4 or 5) or at Cornell (LP test). Students may, but need not, retake a language test if a year or more has passed since last taking it. Being placed into a 200-level course does not earn credit toward the degree. Credit is earned only for high school work equivalent in level to language courses numbered 200 and above at Cornell.

Placement Tests and Advanced Placement Credit

The type of test depends upon the language and the student's level of achievement:

1) Eight languages offer scheduled placement and advanced standing tests at the beginning of each semester: Chinese, French, German, Italian, Japanese, Korean, Russian, and Spanish. The schedule is available from Callean Hile, Department of Romance Studies, 203 Goldwin Smith Hall, or by calling the CASE: 692-2825. Alternatively, tests may be taken on the Web at: http://dml.cornell.edu/html/placement.html. Please note that the advanced standing examination in French, German, Italian, Russian, and Spanish, is called the CASE: Cornell Advanced Standing Examination. Eligibility for the CASE may be determined from the placement test below. In Russian only, all students seeking placement take the CASE.

Native speakers of Spanish who have completed their secondary education in a Spanish-speaking country do not take the CASE. For these students, the Spanish program offers a walk-in service, the Native Language Accreditation for Spanish. Students are advised to contact the Spanish Program Office, 522 Morrill Hall, or the Spanish Program Office, 522 Morrill Hall, for help with the definition of "native speakers," and whose test scores make them eligible, should take the CASE.

*Students who have a score of 65 or higher on the LPI, or 690 or higher on the SAT II, or an AP score of 4 or 5 may enroll in Italian 201 or 203 without taking the CASE.
Language Requirement Exemptions and Substitutions

Outright waivers of the requirement are never granted. However, rarely, but if appropriate, alternative courses are arranged. Legitimate requests for exemptions require evidence of inability to learn foreign languages in a classroom setting. Most students provide documentation of learning disabilities relating to foreign language acquisition (e.g., an auditory processing problem) to Student Disability Services, 234 Day Hall, 255-5976. Other students who may never have been tested for a disability reveal it through repeated and dedicated but vain attempts in formal language courses. A poor grade in a Cornell introductory language course or taking the LP exam repeatedly and unsuccessfully is not adequate evidence.

Students who wish to request a substitution for the normal requirement should meet with Dean Walbridge, Office of Admissions and Advising, 172 Goldwin Smith Hall. If Dean Wallbridge determines that the request has merit, the student then meets with the Language Substitution Review Committee. This committee makes the final decision for or against a substitution. If a substitution is allowed, the committee then works with the student to select substitute courses.

Distribution Requirements

In satisfying the distribution requirements, students become acquainted with a broad range of subject matter and points of view among disciplines in the college and explore areas that may be entirely new to them. Although students may complete the requirements over the eight semesters, they can take advanced courses in subjects they find intriguing only if they have completed the introductory prerequisites.

Students must take a total of nine courses (of three or more credits each) for the distribution requirements: four courses from Groups 1 and 2 below, at least two of which are from Group 1 and at least one of which is from Group 2 (for example, one chemistry, one physics, one geology, and one mathematics); five courses from Groups 3 and 4 below, with at least two in each group and two in the same department (for example, one course in sociology, one in history, one in history of art, and two in theater arts). Courses in the major may be applied to the distribution requirements.

1. Physical and Biological Sciences

In fulfilling the science distribution requirement, students must take at least one course from the primary list of courses and may select additional courses from the supplementary list.

Primary list:
- Astronomy: all courses except 233
- Chemistry: all courses
- Geological Sciences: all courses
- Physics: all courses
- Biological Sciences: all courses except 152, 200 (unless permission of the associate director is obtained), 208, 209, or 367

The following courses are especially suitable for the distribution requirement because they have no prerequisites:
- Note that introductory biology can count for distribution only when completed as a two-semester sequence: 105-110, 105-106, or 101 and 103 plus 102 and 104, or 107-108, or a combination of the first term of one sequence and the second term of another.

Supplementary list:
- Animal Science: 100, 150, 212
- Anthropology: 101, 208, 275, 371, 390, 473, 490
- Applied and Engineering Physics: 110
- Biology and Society: 301
- Entomology: 212
- Food: 200
- Materials Science and Engineering: 277
- Natural Resources: 201, 210, 301
- Nutritional Science: 115
- Plant Breeding: 225
- Psychology: 223
- Soils, Crops, and Atmospheric Sciences: 131, 231

2. Quantitative and formal reasoning

- Biometry and Statistics: 215
- City and Regional Planning: 320
- Computer Science: 100, 211, 212
- Economics: 319, 320, 321
- Industrial & Labor Relations: 210, 211
- Linguistics: 216
- Mathematics: all courses except 101 and 109
- Operations Research & Industrial Engineering: 115
- Philosophy: 231, 331, 431, 456
- Physics: 205, 209, 210
- Psychology: 350
- Sociology: 301

If students choose two courses from this list to satisfy part of the distribution requirement, those two courses may not have significant overlap. For example, students may not choose two beginning courses in statistics.

Under exceptional circumstances and upon petition, certain Cornell courses not listed above under Group 2 (courses such as those appearing on the following auxiliary list) may be used to satisfy the requirement in quantitative and formal reasoning. The petition should provide a persuasive rationale both in terms of the student's course of study and in terms of meeting the goals of the requirement.

Auxiliary list: Agricultural Economics 310; Agricultural Engineering 151; City and Regional Planning 321; Industrial and Labor Relations 312; Linguistics 421, 450; Psychology 472-473 (a sequence of two two-credit courses which may count only in its entirety as one course)

3. Social sciences and history

American Studies: 101, 102, 201, 202, 320

Anthropology: all courses except 101, 208, 275, 371, 390, 451, 452, 453, 474, 490

Archaeology: 100, 201, 202, 203, 204, 265, 275, 317, 353, 355, 362, 370, 405, 409, 458, 466, 467, 469, 495, 499

Asian Studies: courses in Asian anthropology, economics, government, history, linguistics, or sociology

Asian American Studies: 110

Biology and Society: 301, 342, 407, 427

City and Regional Planning: 100, 101

Cognitive Studies: 101, 201

Economics: all courses except 317, 318, 319, 320, 321

Engineering: 250, 292

Government: all courses

History: all courses

Linguistics: all courses except 131, 132, 236, 238, 251, 252, 315, 316

Near Eastern Studies: 244 and all other courses in Near Eastern archaeology and history

Religious Studies: 150, 203, 239, 244, 248, 251, 257, 258, 263, 264, 265, 320, 322, 335, 345, 350, 365, 368, 393, 442, 443, 451, 459

Sociology: all courses except 301

PROGRAM OF STUDY 375

CLH2@cornell.edu

http://dml.cornell.edu/html/place/contacts.html
4. Humanities and the arts

African Studies: 202, 210, 211, 265, 285, 303, 304, 310, 422, 425, 431, 432, 435, 455
American Studies: 101, 102, 201, 202, 324
Anthropology: 290, 451, 452, 453, 455
Archaeology: 100, 221, 309, 321, 351, 352, 357, 360, 380, 423, 434, 435, 520, 629
Asian Studies: 208, 211, 212, 215, 218 and other courses in Asian art, literature, religion, or culture
Asian American Studies: 110
Biology and Society: 205, 206
Classics: courses at the 200-level and above in Classical civilization, art, and archaeology; Classical languages at the 200-level and above
Comparative Literature: all courses
English: all courses at the 200-level and above
French Literature: all courses (not language courses)
German Studies: all courses except 121, 122, 123, 204, 295, 296, 303, 304, 305, 306
History of Art: all courses
Italian Literature: all courses except 205 (not language courses)
Music: one course of at least three credits, excluding musical performance, organizations, and ensembles. If a student chooses to satisfy part of the distribution requirement with more than one music course, an acceptable sequence may include four credits in musical performance, organizations, or ensembles combined with introductory, theory, or history and culture courses. (Students may count performance credits as only one course toward distribution.)
Near Eastern Studies: courses in Near Eastern civilization or literature, including 244 and language courses at the 200-level and above
Philosophy: all courses except 191 and courses in logic
Russian Literature: all courses
Science and Technology Studies: 205, 206, 286, 381, 384, 389, 390, 481, 681
Spanish Literature: all courses (not language courses)
Theatre, Film and Dance: all 3- or 4-credit courses at the 200-level or above except technical production studios

Restrictions on Applying Courses to the Distribution Requirements

1) Advanced Placement Credit and Credit from Other Institutions

Students may apply up to two courses of approved advanced placement or transfer credit towards distribution requirements in Groups 1 and 2 (physical/biological sciences and quantitative/formal reasoning), as long as they take at least one course from the primary list in science at Cornell. Transfer credit applied to distribution in Group 2 (quantitative/formal reasoning) must be in mathematics or computer science; it may not be in other quantitative subjects, for example, statistics or logic.

Students may apply no advanced placement or transfer credit from other institutions toward satisfaction of the distribution requirements in Groups 3 and 4 (social sciences/history and humanities/arts).

Students who transfer to the college from another institution or who enter through the Mid-Year Freshman Program are under the above rules for advanced placement credit, but are eligible to have credit for post high school coursework taken at their previous institution count towards all distribution requirements. Transfer students receive a detailed credit evaluation when they are accepted for admission.

2) Freshman writing seminars may not count towards any distribution requirement.

3) No single course may satisfy more than one distribution requirement. However, students may count courses in their major towards distribution. Courses offered or cross-listed by their major department may not be counted towards any distribution category beyond the usual category of the major department itself. For example, a history major may not count a course cross-listed between history and a literature department towards distribution in the humanities.

Breadth Requirements

Students must include in their undergraduate curricula at least one Arts and Sciences course that focuses on an area or a people other than those of the United States, Canada, or Europe, and one course that focuses on the arts themselves and not on interaction with European cultures.) Courses that satisfy the geographic breadth requirement are marked with an @ when described in this catalog. Courses that satisfy the historical breadth requirement are marked with a #. Students may satisfy both requirements, and students may in fact use the same course to satisfy both. Students may use courses satisfying distribution, major, or elective but not writing requirements in satisfaction of either of the breadth requirements. They may also apply Cornell courses conferring proficiency in a non-Western language toward the geographical breadth requirement. They may not apply advanced placement or credit awarded by examination or, for students matriculating as freshmen (with the exception of students entering through the Mid-Year Freshman Program), transfer credit to either of the breadth requirements.

The Major

In their last two years, students devote roughly one-half their time to acquiring depth and competence in a major subject. The choice of major does not define a student's intellect or character or direction of a lifetime's occupation, although it sometimes does some of each. By majoring, students focus and develop their imaginative and intellectual capacities through a subject they find especially interesting.

Most departments and programs specify certain prerequisites for admission to the major; they are found in the department and program descriptions on the following pages.

Students may apply for acceptance into the major as soon as they have completed the prerequisites. To apply, they take a copy of their transcript to an appointment with the director of undergraduate studies in their prospective major. Students must be accepted into a major before the beginning of the junior year. A department or program may refuse admission into the major if the applicant's performance does not meet established standards. A student without a major at the beginning of the junior year is not making satisfactory progress toward the degree, must meet with an advising dean, and may not be allowed to continue in the college.

Available majors

Majors are offered by each of the departments. There are also majors in American studies, archaeology, biology and society, religious studies, Russian and East European studies, science of earth systems and women's studies.

Some students want to pursue an interest that cannot be met within an established major. They may plan, with the help of their faculty adviser, an independent major that includes courses from several departments. See "Independent Major Program," below, under "Special Academic Options." Whatever the major—chemistry, math, philosophy, or music—graduates from the College of Arts and Sciences earn the one degree the college awards, a Bachelor of Arts.

Double Majors

Only one major is required for graduation. Some students choose to complete two majors. No special permission or procedure is required; students simply become accepted into both majors and find an adviser in each department. Both majors will be posted on the official transcript.

Electives

Of the 34 courses and 120 credits required for graduation, almost one-third are free electives. How students use these options to make the difference between an ordinary and a truly interesting course of study. Students must complete at least four courses and at least 15 credits offered outside the major field and not used to fill another requirement. AP credits not otherwise used may be used to fulfill elective requirements. Students may group electives to form a concentration separate from their major or even apply them to a second major. No special permission or procedure is required, students may count courses in a second major as electives. Some students choose to explore a variety of subjects, some develop a concentration in a department or subject outside Arts and Sciences to gain practical training or specialized knowledge.
Residence
The College of Arts and Sciences is primarily a residential college for students who devote their energy and spirit to full-time study. The faculty believes that integrated, full-time study promotes intellectual and creative development and best prepares people for citizenship and careers.

Consequently, eight semesters of full-time study in the College of Arts and Sciences are integral to earning the A.B. degree. Even if the minimum requirements can be met in fewer semesters, the faculty of the college expects students to take advantage of the resources of the university for eight full terms and obtain as rich and advanced an education in the liberal arts and sciences as possible.

Transfer students from other institutions must spend a minimum of four semesters on the Cornell campus in Ithaca enrolled in College of Arts and Sciences. Transfers from other colleges at Cornell must spend four semesters on campus in Ithaca as students in the Internal Transfer Division or in the college.

Approved study abroad, SEA Semester, Urban Semester, and Cornell-in-Washington are considered semesters of residence, but not as semesters on the Cornell campus. Nonetheless, students may spend no more than two semesters on such programs and must be on campus during their last semester.

Semesters of extramural study in the Division of Continuing Education and Summer Sessions do not count as semesters of residence.

Freshmen occasionally enter with credit from other institutions, take leaves and complete courses at other institutions, or take summer courses at other institutions. The college will accept credit for such courses, if they are comparable to courses offered by departments at Cornell and are approved by those departments (approval forms are available in the Academic Advising Center, 55 Goldwin Smith Hall). Students may not, however, count such credit as part of the 100 credits required in the College of Arts and Sciences or use such credit to replace a term of residence. Students may not leave the college after fewer than eight semesters of residence and complete their undergraduate degrees with credits earned at other institutions or as part-time or summer students at Cornell.

Acceleration
Some students decide that they do not need eight semesters of residence to obtain a solid undergraduate education. These students should compress the first four semesters and spend four full semesters in the major.

Benefiting from opportunities for advanced, seminars and Independent (sometimes honors) work is what best characterizes undergraduate education in the college. Students considering acceleration should discuss their plans with their major advisor.

Accelerants apply to graduate two semesters before their intended new graduation date. They must obtain an "Application to Graduate" in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

1. Accelerants must meet either condition a or b:
   a. Complete 60 credits before the beginning of the last four semesters and complete the prerequisites for admission to the major in time to spend four semesters in the major.
   b. Pass 48 credits in College of Arts and Sciences courses numbered "300" and above. Upper-level courses taken in other colleges at Cornell University may count as College of Arts and Sciences credit only if approved for the major.

2. All accelerants are required to complete 100 credits at Cornell at "C" or above. Courses completed with a grade of "S" will count toward the 100 credits. Advanced placement credits do not count towards this requirement.

3. Students may not use credits earned while on leave of absence to reduce their terms of residence.

4. Accelerants may not finish the degree with credits earned in summer or winter session, through part-time study (unless they meet the guidelines for part-time study), or in any program, including Cornell-in-Washington, SEA Semester, Urban Semester, or study abroad. That is, they may not exit through any program other than a regular, full-time Cornell semester in Ithaca.

Students matriculating as freshmen may not compress their undergraduate education into fewer than six semesters of residence. Transfer students, both from other institutions and from other colleges at Cornell, must spend at least four semesters in the college on campus in Ithaca.

Ninth term
Students who can graduate in eight semesters should do so. If a worthy academic plan for a full ninth or tenth semester is approved, the student enrolls in the college as a special student for the additional work. Such a status allows enrollment in a full schedule of courses for full tuition and full use of campus resources, but allows financial aid only from loans or outside agencies, not from Cornell funds. Students who need only a part-time schedule of courses in a ninth or tenth term in order to graduate should complete the outstanding courses as part-time students paying pro-rated tuition. Students may spend a ninth term with Cornell aid only with permission of the Committee on Academic Records. Such permission is normally granted only to:

1. Students who have been ill or have an exceptionally compelling academic plan.
2. Students who are required because of the hierarchical curriculum (for example, physics).
3. Students who were academically under-prepared for the curriculum at Cornell and needed to begin with a lighter schedule of courses than normal. (See Dean Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, about this option.)

Part-time study in special circumstances
The college and university support students (with financial aid and services) as best they can to make full-time study possible. Occasionally, however, extraordinary but non-financial personal, academic, or medical circumstances make becoming a part-time student necessary and appropriate. Students in good academic standing who face extraordinary situations or who have documented disabilities may petition the Committee on Academic Records for part-time status and proration of tuition in the college.

Students requesting part-time status should discuss their situation with Dean Walbridge if their reason is a documented disability that, under the Americans with Disabilities Act, requires appropriate accommodations. Otherwise, students should meet with the dean of their class.

Part-time study in final semester
Students may complete their degrees as part-time students at Cornell after eight semesters of full-time residence only if:

1. They have completed all requirements by the end of the sixth or seventh term, met the criteria for accelerated graduation, and are remaining to complete study beyond what is required for the degree.
2. They have received permission to accelerate, but have been forced to drop or delay a course for reasons beyond their control.
3. They are writing an honors thesis in the eighth semester and can complete all degree requirements by taking two courses, one of which is the thesis itself. They must register for the thesis and at least one additional course.

In all cases, approval of the dean of seniors must be sought in the semester prior to the part-time semester and the student must be enrolling for no more than 8 credits.

Courses and Credits

Counting courses and credits
Students must complete at least 34 courses to graduate—that is, an average of four courses during each of six semesters and five courses during each of two semesters. A three- or four-credit course counts as one course; a two-credit course counts as one-half course. Single-credit courses do not count as part of the 34 except in certain cases when they form a part of a series and two in the same series can be aggregated to count as one-half course (certain offerings in the Departments of Music and of Theatre, Film and Dance). Three one-credit courses do not aggregate to count as one course. A six-credit language course counts as 1 1/2 courses, while the summer Falcon Programs in Asian languages count as ten credits and 2 1/2 courses each. Archaeology and geology fieldwork for more than six credits count as two courses each. Biology 281 counts as 1 1/2 courses. Other five- or six-credit courses count as one course. AP exam scores that result in an award of 3 or 4 credits count as one course; those in language that result in 6 credits count as 1 1/2 courses; those in biology that result in 6 credits count as two courses. The student may receive an award of 8 credits count as two courses.

Students must also complete 120 credits, 100 of which must be from courses taken in the
College of Arts and Sciences. Liberal arts courses approved for study abroad during a semester or academic year of full-time study (not summer study) and courses taken in certain off-campus Cornell residential programs may be counted toward the 100 credits required within the college and also toward the required 34 courses. Credits earned in other colleges at Cornell, or in any subject at U.S. institutions other than Cornell, do not count as part of the 100 nor, for students matriculating in Fall 1994 or after, do advanced placement credits count as part of the 100. The only exceptions are for courses (usually no more than three) that certain departments accept from other colleges at Cornell as fulfilling major requirements and for no more than two courses that an advisor accepts as part of a completed and established cross-college, inter-disciplinary concentration.

**Using courses towards more than one requirement**

A course may fulfill more than one college requirement, under the following conditions:

1. A course may be used to fulfill a distribution requirement and also a major requirement.
2. A one-semester course in foreign literature (not language) that is acceptable for achieving proficiency in that language may also be used as a partial fulfillment of the distribution requirement in the humanities and the arts.
3. Courses may count toward breadth requirements and toward any other requirement except Freshman Writing Seminars.
4. Courses in a second major may count as electives.

**Auditing**

The college encourages its students to take advantage of its rich curriculum by sitting in on courses that interest them but that they cannot commit themselves to for credit. As long as the instructor agrees, students are welcome to visit courses. Small seminars and language courses are sometimes not open to visitors. Audited courses do not appear on the student's schedule or transcript.

**Repeating courses**

Students occasionally need to repeat courses. If the instructor certifies that the course content has been changed, credit will be granted a second time. If the content has not changed, both grades will appear on the transcript and will be included in any average that is calculated, but credit will be counted toward the degree only once; students considering repeating a course under this circumstance should discuss the matter with their advisor and an advising dean. Students who plan to repeat a course submit a petition to the college registrar. If the original course grade was F, no petition is necessary.

**Non-credit courses**

The college does not grant credit toward the degree for every course offered by the university. Courses in remedial or developmental reading, high school mathematics, supplementary science and mathematics offered by the Learning Strategies Center, keyboarding, shorthand, military training, training as emergency medical technician and service as a teaching assistant are among those for which degree credit is not given and that do not constitute part of the 12 credits required for good academic standing.

Students enrolled in courses for undergraduate teaching assistants may petition once to have the non-degree credits count towards good academic standing. This would allow continued eligibility for graduating with distinction in all subjects, but would disqualify the student from being on the dean’s list that semester.

Examples of non-credit courses:

- All courses numbered below 100 (with the exception of Computer Science 099)
- All courses in Military Science, Naval Science, and Aerospace Studies
- ARLS 134
- Biology G 498
- Communications 498
- Education 498
- Engineering 470
- Hotel Administration 170
- Human Development and Family Studies 403
- Human Ecology 100, 101
- Human Service Studies 403, 454
- Mathematics 109
- Nutritional Science 403
- Psychology 498

**Advanced placement credit**

See p. 5. Advanced placement credit counts as part of the 120 credits and 34 courses required for the degree. It does not count as part of the 100 credits required in Arts and Sciences, its application to distribution requirements is restricted, as explained above under Distribution.

**Summer session credit**

A student may earn credit toward the degree by completing courses in Cornell's summer session or by petitioning to take summer courses at other colleges. Students should consult their advisers regarding summer study plans.

Credit for summer courses not taken at Cornell must be approved by the appropriate Cornell department. Approval forms and information are available in the Academic Advising Center, 55 Goldwin Smith Hall and from Robin Perry, Office of Admissions, 172 Goldwin Smith Hall. Credit earned in summer courses other than those at Cornell will not count toward the 100 credits required in the college (including summer or orientation programs abroad) and may be applied only to part of the Group 1 and 2 distribution requirements. Transcripts from other institutions must be sent to Robin Perry, 172 Goldwin Smith Hall.

Entering students who want to receive credit toward the degree for courses completed during the summer before matriculation in a summer session away from Cornell should obtain approval forms as soon as possible and have transcripts sent to Robin Perry, 172 Goldwin Smith Hall, during the summer before matriculation. Credits completed in Cornell summer sessions will be awarded automatically.

Summer session at Cornell or elsewhere does not count toward the eight-semester residence requirement.

**Transferring credit earned away from Cornell while on leave of absence**

Students may petition to transfer credits from other accredited institutions for work completed while on leave of absence. Petitions are available in 55 and 172 Goldwin Smith Hall. The relevant department will decide whether the course is comparable to Cornell courses. Credit approved for transfer counts as part of the 120 required for graduation and as part of the 34 courses. It does not count among the 100 required in Arts and Sciences and cannot be used toward graduation in fewer than eight semesters. Its application to distribution and breadth requirements is restricted as described above under Distribution.

**Transferring credit (for transfer students from another institution or from another Cornell college)**

Transfer students must successfully complete at least 60 credits and 16 courses at Cornell; they must be in residence in the college for four regular semesters (summer session does not count toward the residence requirement). The college evaluates credit earned at another school or college at Cornell University or at another accredited institution of collegiate rank, including advanced placement credit awarded by those colleges, and determines the number of credits and courses the student may apply toward the various requirements for the Bachelor of Arts degree at Cornell. Evaluations of transfer credits are normally provided when students are notified of their admission.

**Physical Education**

See "University Requirements for Graduation," p. 13. The college does not count physical education credit toward the 120 credits required for graduation, nor toward the twelve credits required for good academic standing each semester.

**SPECIAL ACADEMIC OPTIONS**

**Degree Programs**

The following five programs allow students to work toward more than one degree or to alter the regular college or major requirements.

**Independent Major Program**

The Independent Major Program allows students to design their own interdisciplinary majors and pursue a subject that cannot be found within an established major. Proposals for an independent major must be equivalent in coherence, breadth, and depth to a departmental major, well suited to the student's academic preparation, and consistent with a liberal education. Proposals must also be supported by a faculty adviser and are assessed by a board of faculty members. Independent majors substitute for established majors, but students must still satisfy all the other requirements for the baccalaureate degree. Students should contact the director of the Independent Major Program, Office of Undergraduate Advising, 172 Goldwin Smith Hall, for further information. Deadlines for submitting independent major proposals are listed below on the calendar supplement for the College of Arts and Sciences.
College Scholar Program
The College Scholar Program frees up to forty students in each class from the usual college requirements for a degree and allows them to design their own course of study. It is meant to serve students whose interests and talents would benefit from a little more academic freedom than other students have, who demonstrate exceptional promise, and who show the maturity to plan and carry out, with the help of their adviser, a well-designed program of studies. College Scholars do not all design the same kind of program: some, for instance, pursue diverse interests, while others integrate a variety of courses with a common theme.

College Scholars must complete 120 credits of course work (100 in the college), 34 courses, and, unless they receive permission from the program to accelerate, eight full terms of undergraduate study. They must complete the physical education requirement. All College Scholars must complete a senior project. They are not required to complete or fulfill the general education requirements, although members of the College Scholar Advisory Board believe that the spirit of those requirements is a good one.

Each applicant to the College Scholar Program is asked to write an essay, which is due the last Wednesday in April of the freshman year. Mid-year freshmen apply by that date in their first spring semester in the college. Students should contact the program director of their college, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall, for further information.

Dual-Degree Program with Other Colleges
The Dual-Degree Program enables especially ambitious undergraduate students to pursue programs of study in two colleges. Dual-degree candidates may earn both a Bachelor of Arts degree from the College of Arts and Sciences and (1) a Bachelor of Science degree from the College of Engineering or (2) a Bachelor of Science degree from the Department of Architecture, Art, and Planning or (3) a Bachelor of Science degree in urban and regional studies from the Department of City and Regional Planning in the College of Architecture, Art, and Planning or (4) a Bachelor of Science degree in architectural history from the Department of Architecture in the College of Architecture, Art, and Planning. Students enter one of these colleges as freshmen or sophomores and begin the Dual-Degree Program with the second college in the second or, in some cases, the third year. The Dual-Degree Program ordinarily takes five years to complete, and students are eligible for five years of financial aid. For further information contact the Office of Admissions, 172 Goldwin Smith Hall.

Double Registration with and Early Admission to Professional Schools
Registration in the senior year of the College of Arts and Sciences and the first year of Cornell Law School, Cornell Medical College, or the Johnson Graduate School of Management, is occasionally possible. A very few exceptionally well-prepared students who have earned 105 credits before the start of the senior year and have been accepted by one of the above-named professional schools may be permitted to register simultaneously in the college and in one or another of these professional schools during the seventh and eighth terms. They earn the A.B. degree after the first year of professional school.

Students with eight or fewer credits and two or fewer courses to complete may apply to enter the Master's of Engineering program during (but no earlier than) the eighth semester; dual-degree students may enter this program no earlier than the ninth semester. They earn the bachelor degree(s) after one semester of graduate school.

Students interested in the joint program with the Law School or the Graduate School of Management, or in early admission to the Master's of Engineering program should apply to the relevant program. Students interested in the joint program with Cornell Medical School should contact the health careers coordinator, 205 Barnes Hall. All candidates should confirm their eligibility with the dean of seniors, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

Double-registered students must, of course, complete all requirements for the A.B. degree, including 100 credits in Arts and Sciences courses.

Teacher Education in Agriculture, Mathematics and Science
Students at Cornell may pursue teaching credentials in agriculture, biology, chemistry, earth science, general science, mathematics, and physics. Teacher Education in Agriculture, Mathematics and Science (TEAMS) is a university program jointly conducted by the departments of education and mathematics. Although TEAMS offers options for undergraduate and graduate study, most students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching degree (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates, usually during their sophomore year.

For more information, contact the TEAMS support specialist at 255-9255 or D. Trumbull, 255-3108.

Special-Interest Options
The following options do not alter the college's requirements but enable students to pursue special interests within the usual programs.

Informal Minors
Some students organize electives within a discipline or department. Such informal minors can be developed with the help of the departmental directors of undergraduate studies, but are not noted on the transcript.

Concentrations
Established interdisciplinary concentrations, described in the descriptions of the departments and their curricula, provide structures for organizing electives. Completed concentrations are noted on the transcript.

Independent Study
Independent study affords students the opportunity to pursue special interests or research not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the independent course, must approve the program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study (proposal forms are available at the Academic Advising Center, 55 Goldwin Smith Hall). In one semester students may earn up to six credits with one instructor or up to eight credits with more than one instructor.

Undergraduate Research Program
An excellent way to benefit from being an undergraduate at a research university, at Cornell in particular, is to become an apprentice in ongoing faculty research. About 400 students participate each year in creating new knowledge and earning independent study credit for what they learn and contribute. They sharpen their critical and creative abilities and test their interest in pursuing a research career. Sometimes they publish their work.

The Undergraduate Research Program gathers information about research opportunities in most disciplines of the liberal arts and sciences, guides students in finding further opportunities—both on campus and elsewhere, and both during the academic year and during the summer—and helps students prepare for research and presenting themselves as candidates for apprenticeships. Other students locate research opportunities independently through faculty whose courses they have taken, through their major departments, or through published materials.

The Cornell Undergraduate Research Board, an undergraduate organization, conducts an annual open house to help students get started in research and an annual forum at which undergraduates present their work. Students interested in this program should see Dean Williams, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

Language Study
FALCON (Full-Year Asian Language Concentration), FALCON allows students who are interested in the Far East to study Chinese, Indonesian, or Japanese exclusively for one year. They gain proficiency in the language and familiarity with the culture. Students who are interested in the Far East should be aware of the opportunities to pursue rapid and thorough beginning study on campus with the objective of studying abroad later—in China, Japan, or Southeast Asia. Students interested in this program should contact the Department of Asian Studies, Rockefeller Hall, e-mail: falcon@cornell.edu.

Language House Program
A complement to classroom cultural and linguistic instruction, the Language House Program combines residential and academic opportunities for developing and practicing the conversational skills in French, German, Italian, Japanese, Mandarin Chinese, Russian, and Spanish. It helps prepare students who plan to study abroad and helps returning students share their cultural experiences while further increasing their language skills. Students interested in this program should see Academic Administrator Daniel Evett, 156 Goldwin Smith Hall.
Prelaw Study

Law schools neither require nor prefer any particular program of study; they do seek students with sound training in the liberal arts and sciences. It is important that students plan a program in which they are interested and do well. Beyond that, students are advised to take courses that will develop their powers of precise, analytical thinking and proficiency in writing and speaking.

The college offers a concentration in law and society. Students should work toward completion of this concentration because they find it interesting, not because they will impress law schools.

The adviser for students in the College of Arts and Sciences who are applying to law school is Dean Cox, Office of Undergraduate Admissions and Advising, 172 Goldwin Smith Hall.

Premedical Study

The breadth and depth afforded by a liberal arts education are invaluable for people who plan medical careers, whether they intend to practice medicine or related professions. Such training has a profound effect on the doctor’s usefulness to patients, and it affords the flexibility of mind that is needed for major research undertakings. Medical and dental schools do not prescribe or even prefer a particular major; they do, however, require particular undergraduate courses, and most students are well advised to begin chemistry in their freshman year. Students who are interested in medical careers are urged to visit the Health Careers Office, 203 Babbage Hall.

The adviser for students in the College of Arts and Sciences who are planning careers in medicine is Dean Turner, Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

Off-Campus Programs

Many students find it important to their majors or to their overall academic programs to study off campus or abroad for one or two semesters. When it makes academic sense, the college encourages its students to pursue such studies and grants credit toward the degree for work satisfactorily completed.

Study Abroad

All students planning to study abroad apply through Cornell Abroad; please see the Cornell Abroad program description in the introductory section of Courses of Study.

Each year about 200 undergraduates in Arts and Sciences include semester- or year-long study abroad as part of their major undergraduate education. Ideally, study abroad builds upon a broad liberal arts background in the early semesters: area studies, language training, and preparation in the proposed field of study are all essential.

The college insists wherever possible on study at foreign institutions alongside their degree candidates rather than study in self-contained programs that offer courses specially designed for foreigners. The primary goals of this educational immersion are to learn firsthand the modes of inquiry, methods of analysis, and educational values of higher education offered to students of another country and to involve students in social relationships with peers who may hold a new and unexpected range of social attitudes.

Many students go abroad to pursue work in their majors. Focused academic work in an appropriate institution abroad can prepare students for with that of the Cornellers work in the final semesters back in Ithaca.

The college advocates study abroad that enables students to become competent enough in another language to experience daily life, develop social relationships, and accomplish formal course work in that language. Students who intend to study abroad in a country where the host language is not English must demonstrate a serious commitment to learning the language through course work before studying abroad; proficiency in the language is generally the prerequisite. At least one area studies course or one course in the history, culture, economics, politics, or social relations of the country of destination must be part of every student’s preparation for study abroad.

Study abroad is possible during the sophomore and junior years or during the first semester of the senior year. Study abroad in the final semester is rarely approved. Important steps to prepare for study abroad include:

- substantial progress with course distribution requirements;
- admission to a major and a faculty adviser in the major;
- clear academic agenda for study abroad;
- appropriate study of the country or region of destination, especially language study.

Study abroad can earn up to 15 liberal arts and sciences credits per semester of full-time course work as long as the curriculum abroad is consistent with that of the Cornell course work. A maximum of 10 credits is awarded for each trimester of study. Courses that fall outside the scope of the liberal arts and sciences may earn non-Arts credits. Students must carry a full course-load as defined by the host institution. Students may spend up to two semesters abroad. Only those with compelling academic reasons may study in more than one location over two semesters. The college does not approve study abroad that tours more than one country or that is more touristic than scholarly in content and structure. Students must continue study of the host language while abroad. In exceptional circumstances the college will approve programs which, in non-English speaking countries, provide no language training.

All courses taken abroad will appear on the Cornell transcript and grades earned are reported in the system of the host institution. Grades earned through course work abroad must, if possible, become part of the Cornell grade point average.

Students who transfer to Cornell must fulfill all requirements for graduation. Potential externships are arranged through, and approved by, the Cornell-in-Washington program. For further information, see page 20 or inquire at 471 Hollister Hall.

Summer Residential Programs in Archaeology

The Summer Residential Programs in Archaeology offers students from all colleges within the university an opportunity to acquire field experience and to explore career options in archaeology. The program offers two study options: 1) studies in public policy, and 2) studies in the American experience. The program also offers unique externship opportunities; students serve as externs in a federal agency, congressional office, or non-governmental organization and take part in a public policy or humanities seminar. They define and carry out individual research projects under the supervision of Cornell faculty. Potential externship opportunities are arranged through, and approved by, the Cornell-in-Washington program. For further information, see page 49 or inquire at 471 Hollister Hall.

Applications to study abroad must have the support of a faculty adviser in the major and the approval of Dean Chameetzky in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith. Although students investigate programs at the Education Abroad office, Arts and Sciences applicants submit to the college an essay describing the academic rationale for study abroad, an outline of prospective courses to be taken and any other relevant materials.

Summer Residential Programs in Archaeology

During the summer months students may participate in a Cornell-sponsored archaeological project. In recent years the program has organized archaeological projects in Central America, Greece, Israel, Italy and New York State. Students should contact the Archaeology Program for information about the sites currently available.

Summer Residential Programs in Archaeology

The Marine Science program offers students from all colleges within the university an opportunity to earn full academic credit for a semester in Washington, D.C. Students take courses from Cornell faculty, conduct individual research projects, and work as externs. The Cornell-in-Washington program offers two study options: 1) studies in public policy, and 2) studies in the American experience. The program also offers unique externship opportunities; students serve as externs in a federal agency, congressional office, or non-governmental organization and take part in a public policy or humanities seminar. They define and carry out individual research projects under the supervision of Cornell faculty. Potential externship opportunities are arranged through, and approved by, the Cornell-in-Washington program. For further information, see page 20 or inquire at 471 Hollister Hall.

ADVISORS
The following advisers and offices provide academic advising or information on college procedures and regulations.

Faculty Advisers
Each new student is assigned a faculty adviser. Advisers help students plan programs of study and advise them about ways to achieve their academic goals. Advisers may also help students with study or personal problems or direct them to other offices on campus where help is available. Academic difficulties may frequently be solved or avoided if students and advisers recognize and address problems early.

Advisers and new advisees meet first during orientation week to discuss course selection. New students are encouraged to see their advisers again early in the term, before it is too late to drop courses, to discuss their academic program and to become better acquainted. Advisers and advisees meet at least once each semester to discuss courses for the following term and whenever advisees wish to petition for an exception to college rules.

Student Advisers
Student advisers pass on lore about the college's requirements, courses, instructors, and about life at Cornell.

Major Advisers
After acceptance into a major, students are assigned a major adviser, a faculty member in the major department, with whom they meet and direct their course of study. The adviser eventually certifies the completion of the major. The major adviser should be consulted by the student about all academic plans, including honors, study abroad, acceleration, and graduate study. The adviser's support is especially important if a student petitions for exceptions to the requirements for the degree.

Office of Undergraduate Admissions and Advising
This office, 55 Goldwin Smith Hall, 255-5004 and 172 Goldwin Smith Hall, 255-4833, offers resources for faculty and student advisers and for students themselves and their parents.

Advising deans are available to help students define their academic and career goals and to help with special academic options and exceptions to college rules:

Lynne S. Abel, college scholar and independent major programs—255-3386
Robert Chametzky, sophomores and study abroad—255-5004
Gerry Cox, seniors, pre-law students, and national scholarships—255-4833
Ken Gabard, freshmen—255-5004
Lawrence Lamphere, internal transfers and minority students—255-4833
Maria S. Terrell, student advisers and ambassadors, Dean's scholars and Cornell research scholars—255-5004
Janice Turner, minority and pre-med students—255-5004
Peggy Walbridge, transfers and students with disabilities—255-4833

Catherine Wagner, juniors and mid-year freshmen—255-4833
Marilyn Williams, undergraduate research, careers, academic integrity—255-5004

REGISTRATION AND COURSE SCHEDULING

Enrollment in Courses in the College of Arts and Sciences

New Students
During orientation week, new students attend briefings and other information sessions, meet with faculty advisers, and sign into courses. The college reserves spaces in courses for its in-coming students.

Continuing Students
Continuing students select and schedule up to five courses during the semester prior to the one in which the courses will be taken. Students who do not "pre-register" during the designated period must wait until the beginning of the term and may have difficulty securing places in the courses they most want. Before signing into courses, students plan their programs and discuss long-range goals with their faculty advisers. In addition, all students are welcome to discuss programs and plans with an advising dean in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall, or 172 Goldwin Smith Hall.

At the beginning of each term, students find their schedules and should confirm the accuracy of their records on "Just the Facts."

Limits on Numbers of Courses and Credits
To meet the 34-course requirement, students must normally take four courses during each of six semesters and five courses during each of two semesters. To meet the 120-credit requirement, students must average 15 credits per semester. (AP credit and/or summer credits may reduce the numbers of courses and credits.)

Minimum number of credits per semester
To maintain good academic standing as a full-time student, students must enroll in at least twelve credits per semester; for compelling personal or academic reasons students need to carry fewer than twelve credits, they should consult their faculty adviser and an advising dean. Permission is by petition only; it is freely given for first-semester students.

Maximum number of credits per semester
First-term freshmen must petition to register for more than eighteen credits; other students may register for more than eighteen credits only if their previous term's average was 3.0 or higher. No more than twenty-two credits may be taken in a regular semester without permission of the Committee on Academic Records. Students who fail to receive approval for excess credits from the committee run the risk of having only 18 credits for the semester count toward the degree.

Attendance
Attendance in classes is a matter between students and their instructors. If a student cannot attend classes because of illness or family crisis, the Office of Undergraduate Admissions and Advising will notify instructors at the request of the student or the family. Nonetheless, the student must arrange to make up examinations or other work with each instructor. A student who will be absent because of religious holidays or athletic competitions must discuss arrangements for making up work with his or her instructors well in advance of the absence. A student who must miss an examination must also consult with the professor in advance. Alternative arrangements are at the discretion of the instructor.

Adding and Dropping Courses
After course enrollment (pre-registration), students may not adjust their schedules until the new term begins. During the first three weeks of the semester, students may change courses without petitioning. Add/drop forms are available in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

After the third week of classes, students must petition to add courses. They may drop courses up to the seventh week of the term. Between the seventh and twelfth weeks students may petition to withdraw from courses, if (1) the instructor approves; (2) the adviser approves; (3) no issue of academic integrity is at stake; and (4) an advising dean approves. Students must meet with an advising dean to obtain petition forms.

Courses dropped after the seventh week will be noted on the transcript by a "W" where the grade would normally appear. No petitions to withdraw from courses may be submitted after the end of the twelfth week in the term. Deadlines for short courses will be adjusted according to the length of the courses.

Leaves of Absence
Taking time off from college to explore goals and direction, or to gain experiences or funds, is sometimes useful. Students in good academic standing who take a leave before the end of the seventh week of the semester are welcome to register in the college the following semester. Five years is the maximum length of time a student may be on leave and return without special permission. Leaves of absence are of four types:

1) Personal leaves impose no conditions concerning reentering the college except for the five-year limit. Readmission is automatic upon written request made at least one month before the beginning of the term in which the student wishes to return.

2) Medical leaves, usually for at least six months, are granted by the college only upon recommendation by a physician from University Health Services. In some cases, students must satisfy the UHS that the condition requiring the leave has been corrected before they may return. The student's academic standing will also be subject to review at the time of the leave and return.

3) Conditional leaves may be granted by an advising dean if the student is not in good academic standing or, in unusual circumstances, after the seventh week of the term. Normally students may not return from conditional leaves for at least two terms or until specific and individual
of the total credits for the degree. Courses listed above under “Noncredit courses” do not count towards good academic standing.

Academic Actions
Students who are not in good academic standing will be considered for academic action by the faculty Committee on Academic Records or by one of the deans of the college. Those being reviewed for academic action are urged to present evidence that will help explain their poor academic performance. Students may appeal a decision or action of the committee if they have new relevant information. They must consult an advising dean about appealing.

Warning
Any student who fails to maintain good standing will, at a minimum, be warned. The warning may be given by an advising dean or by the faculty Committee on Academic Records. A warning is posted on a student’s college record but is not reported to the university registrar and does not appear on official transcripts.

Required leave of absence
A student in serious academic difficulty may be required by the Committee on Academic Records to take a leave of absence, normally for a full year. Usually, but not always or necessarily, the Committee on Academic Records warns students before suspending them. Before being allowed to return and register in the college, students must describe what they did on leave and how they resolved their problems and submit a plan for completing the degree. In some cases students will be required to furnish evidence that they are ready to return or satisfy other conditions before being allowed to reregister in the college. Students who request to return in less than a year must present to the committee extraordinarily convincing evidence of their readiness to return. “Required leave” and the date are posted on the student’s official transcript.

Required withdrawal
The Committee on Academic Records may dismiss a student from the college because of a highly unsatisfactory record for one term or for failure to make satisfactory overall progress in grades, credits, or the requirements of the major. This action expels the student permanently from the college. “Required withdrawal” and the date are posted on the student’s official transcript.

Withdrawals
A withdrawal is a permanent severance from the university and from status as a degree candidate. Students planning to withdraw should consult an advising dean. Students not requesting a leave and failing to register for a term will be withdrawn from the college. The Committee on Academic Records may require a student to withdraw for a highly unsatisfactory academic record.

Transferring within Cornell (Internal Transfer)
Internal transfer from one college or school at Cornell into another is attractive for many students whose intellectual interests change. Students who want to transfer should discuss their eligibility with a counselor in the new school or college. In some cases, students who want to transfer into the College of Arts and Sciences may transfer directly. In other cases, they may be referred to the Internal Transfer Division.

During the term immediately preceding transfer into the College of Arts and Sciences, students should complete at least 12 credits of courses in the College of Arts and Sciences with a B average and without any grades of Incomplete, any S-U grades (unless only S-U grades are offered for that particular course), or any grades below C. Satisfying this minimum requirement does not, however, guarantee admission. Admission to the college is based on consideration of the student’s entire record at Cornell and the high school record, not just the work of one semester. Interested students should see Dean Lamphere, 172 Goldwin Smith Hall.

ACADEMIC STANDING
Students are in good academic standing for the term if they complete at least 12 degree credits by the end of the term and earn no more than one D and no F or U grades. If a student completes only three courses, all grades must be above D. In addition, students are expected to make acceptable progress toward satisfying requirements for the degree and to earn grades of C (not C–) or better in at least 100
tion and must have a passing grade for the completed portion. When a grade of incomplete is reported, the instructor submits a form stating what work must be completed, when it must be completed, and the grade given (or "frozen" incomplete) earned if the work is not completed by that date. When a final grade is reported, it is recorded on the student's official transcript and must be a passing grade for the completed portion. When a grade of incomplete is reported, the instructor submits a form explaining that this grade was formerly an incomplete.

Students must resolve (make up or "freeze") any incompletes with their instructors before graduation.

**R Grades**

R designates two-semester or year-long courses. The R is recorded on the student's transcript at the end of the first term. The grade recorded at the end of the second term evaluates the student's level of performance in the course for the entire year. The total of credits earned for the whole course is listed each term.

**Grade Reports**

Students should periodically check their courses and grades on "Just the Facts" to be sure that they are recorded correctly.

**Class Rank**

The college does not compute class rank.

**Dean's List**

Inclusion on the Dean's List for academic excellence is an honor bestowed by the dean of the college semester by semester. Based on grades, the criteria include about the top 30 percent of students and vary with the number of credits the student completes. The criteria are subject to slight changes from semester to semester and are available in the Office of Undergraduate Admissions and Advising, 55 Goldwin Smith Hall.

---

**GRADUATION**

**The Degree**

The College of Arts and Sciences grants only one degree (no matter what the student's major): the A.B. (or B.A.). A.B. is the abbreviation of the Latin name for the degree, "Artium Baccalarius," or translated into English, B.A., "Bachelor of Arts."

**Application to Graduate**

In the first semester of their senior year, students attend senior briefings and then complete an application to graduate. The application allows the college to check each student's progress toward the degree and whether the degree can be awarded. This process is intended to help seniors identify problems early enough in the final year to make any necessary changes in their academic plans to satisfy those requirements. Nonetheless, meeting graduation requirements is the student's responsibility; problems that are discovered, even late in the final term, must be resolved by the student before the degree can be granted.

**Degree Dates**

There are three degree dates in the year: May, August, and January. Students who plan to graduate in August may attend graduation ceremonies in the preceding May. Students graduating in January are invited to a special recognition ceremony in December; they may also attend graduation ceremonies in January.

**Honors**

**Bachelor of Arts with Honors**

Almost all departments offer honors programs for students who have demonstrated exceptional ability in the major and who have completed original independent research. The honors programs are described by individual departments in the following sections. The degree of Bachelor of Arts with honors will be conferred upon students who, in addition to having completed the requirements for the degree of Bachelor of Arts, have satisfactorily completed the honors program in their major and have been recommended for honors by their major department, the Independent Major Program, or the College Scholar Program. Concentrations do not offer honors programs.

**Bachelor of Arts with Distinction**

The degree of Bachelor of Arts with distinction in all subjects will be conferred on students who have completed the requirements for the degree of Bachelor of Arts, if they have met the following requirements by the end of their final semester:

1) completed at least 60 credits while registered in regular sessions at Cornell;
2) ranked in the upper 30 percent of their class at the end of the seventh semester, or next-to-last semester for transfers and accelerants;
3) received a grade below C- in no more than one course;
4) received no failing grade;
5) maintained good academic standing, including completing a full schedule of at least 12 credits, in each of their last four terms; and
6) have no Incompletes remaining on their records.

**CALENDAR SUPPLEMENT**

All of the dates in the university calendar at the front of this volume apply to all Cornell students. Listed below are some additional dates that are of importance for students in the College of Arts and Sciences.

<table>

**ADMINISTRATION**

Philip E. Lewis, dean—255-4146
Biddy Martin, senior associate dean—255-4147
Lynne S. Abel, associate dean of admissions and undergraduate education—255-3386
Thak Chaloemtiarana, associate dean—255-7061
Jane V. Pedersen, associate dean of administration—255-7507

**Courses and Departments**

**SPECIAL PROGRAMS AND AREAS OF CONCENTRATION**

The college offers a number of interdisciplinary programs described in the section following the departmental program descriptions.

**AFRICANA STUDIES MAJOR**

See Special Programs and Interdisciplinary Studies.

**AKKADIAN**

See Department of Near Eastern Studies.

**AMERICAN STUDIES**

See Special Programs and Interdisciplinary Studies.
ARTS AND SCIENCES - 1999-2000

ANTHROPOLOGY

Emeritus: J. Murra, R. Smith.

Anthropology is one of the most diverse disciplines in the university. Spanning human evolution, the development and heterogeneity of language and culture, human history, and the diversity of cultures past and present, the field has a variety of methods, addresses basic issues about human origins and human life, and maintains commitment to understanding social life and using this understanding to improve society. Anthropology is an ideal "liberal arts" major. It also serves as a major that, when well designed by the student with their adviser, prepares students for a wide range of professional careers, e.g., law, medicine, foreign service, social services, and business, among others.

Courses for non-majors: Anthropology welcomes non-majors into many of its courses. Unless prerequisites are explicitly stated, 200- and 300-level courses do not have formal prerequisites and can be taken by students with prior experience in anthropology. Such students are welcome in these upper-level courses. For additional information to assist non-majors and students from other colleges in selecting anthropology courses, see the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/).

The Major

The range and complexity of the field of anthropology requires active collaboration between the student and a faculty adviser in developing an individualized program of study. To enter the anthropology major, a student must pass one course in each of the two broad introductory areas of anthropology: "Nature and Culture" and "Culture and History". Undergraduates should note that many 600-level courses are open to them by consent of the instructor.

The Cornell-Nepal Study Program: the Cornell-Nepal Study Program is a joint program of Cornell University and Tribhuvan University, the national university of Nepal. Qualified juniors, seniors, and first- or second-year graduate students works with faculty from both universities to prepare for and undertake field research projects in Nepal. Students receive 15 credits per semester; students may enroll for either fall or spring semester, or for the entire year; application is through Cornell Abroad. For further information, consult David Holmberg or Kathryn March in the Department of Anthropology.

Special Programs and Facilities

Course: "Nature and Culture" and "Culture and History". In addition, students may enroll in Anthropology 497, Topics in Anthropology, a course open to a limited number of juniors and seniors who have obtained consent and supervision of a faculty member. Undergraduates should note that many 600-level courses are open to them by consent of the instructor.

Colloquia: the Department of Anthropology holds colloquia almost every week of the semester on Friday at 3:30 in McGraw 215. Faculty members from Cornell and other universities participate in discussions of current research and problems in anthropology. Students are encouraged to attend.

For more complete information about the anthropology major, see the Director of Undergraduate Studies. Pick up a copy of the major brochure (which includes descriptions of the courses not offered during 1999-2000), or visit the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/).

I. Introductory Courses

A. Nature and Culture:

ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind

Fall. 3 credits. M. Small.

The evolution of humankind is explored through the fossil record, studies of the biological differences among current human populations, and a comparison with our closest relatives, the primates. This course investigates the roots of human biology and behavior with an evolutionary framework. Fee for lab usage and maintenance, $5.
The course is meant to introduce the range of evidence and interpretation will be stressed. Contributions by researchers from a variety of disciplines are highlighted, as are the discoveries that have enlivened the study of human evolution for more than a century. Critical evaluation of evidence and interpretation will be stressed. Demonstrations and films supplement the lectures.

ANTHR 203 Early People: The Archaeological and Fossil Record (also Archaeology 203)
Spring. 3 credits. T. Volman.
A survey of the archaeological and fossil record of human evolution. Contributions by researchers from a variety of disciplines are highlighted, as are the discoveries that have enlivened the study of human evolution for more than a century. Critical evaluation of evidence and interpretation will be stressed. Demonstrations and films supplement the lectures.

ANTHR 211 Nature and Culture
Spring. 4 credits. S. Sangren.
Sociocultural anthropology, because it encompasses the comparative study of humankind in society, provides a unique vantage on the nature of humanity. One of the focal questions of the discipline is the relationship between the physical/biological, the symbolic/biological, and the symbolic/moral worlds in which people live. This inquiry places humankind squarely at the center of social theory, as most social theories and political ideologies are founded on premises regarding human nature. Through study of several conceptual categories which have been flashpoints for debates about nature and culture (e.g., gender, race, and sexuality), this course examines a variety of past and current attempts to explain the relationships between nature and culture in human life.

ANTHR 202 Interpretive Archaeology (also Archaeology 202)
Fall. 3 credits. Not offered 1999–2000.

ANTHR 204 Ancient Civilizations (also Archaeology 204)
Fall. 3 credits. Not offered 1999–2000.

ANTHR 215 Stone Age Art (also Archaeology 215)
Fall. 3 credits. T. Volman.
When did "art," however defined, appear during the human career, how was it produced and for what purposes? These are some of the questions we will investigate through a survey of the discovery, validation, analysis, and interpretation of the earliest art. The course will cover a variety of finds from the Old World, including the well-known cave art of southwestern France and northern Spain, and also consider portable art and decoration. The contributions of new analytical techniques and interpretive approaches are highlighted.

ANTHR 240 Old World Prehistory (also Archaeology 240)
Fall. 3 credits. Not offered 1999–2000.

II. Honors and Independent Study

ANTHR 483 Honors Thesis Research
Fall or spring. Credit and hours to be arranged. Prerequisite: consent of the Honors Committee.

ANTHR 491 Honors Thesis Write-up
Fall or spring. Credit and hours to be arranged. Staff.

ANTHR 497 Topics in Anthropology
Fall or spring. Credit and hours to be arranged. Intended for undergraduate students only. Staff. Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

III. Anthropology Major Senior Seminars

In the senior year, anthropology majors are required to take a Senior Seminar. These seminars meet weekly, are discussion-based, and are limited to anthropology majors. A professor serves as the coordinator for the group. Collaboratively, the students and the professor plan the semester to reflect the concentrations and/or research interests of the participating students. Thus the Senior Seminar serves as a space where students develop their own synthesis of their undergraduate work in anthropology.

ANTHR 489 Anthropology Senior Seminar
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: anthropology majors only. Fall, V. Munasinghe; spring, D. Greenwood.
This course is a synthesis of each student's undergraduate concentration in the major. In collaboration, the instructor and the students will develop a series of topics representing the interests of the students. Students will be required to read extensively and present topics.

IV. Nature and Culture

Thinking about nature and culture and their interaction is central to contemporary anthropology. The courses in this section present a biological and evolutionary perspective on behavior, focus on the interplay between nature and culture, and discuss the controversies surrounding these relationships between these dimensions of human life.

ANTHR 208 The Evolution of Human Mating

ANTHR 211 Nature and Culture
Spring. 4 credits. S. Sangren.
For course description, see section I.A.

ANTHR 244 Male and Female in Chinese Culture and Society (also Women's Studies 344)

ANTHR 370 Environmental Archaeology (also Anthropology 670 and Archaeology 370/670)

ANTHR 371 Human Paleontology (also Biological Sciences 371)
Fall. 4 credits. One year of introductory biology or Anthropology 101 or permission of instructor. Offered alternate years. K. Kennedy.
A broad survey of the fossil evidence for human evolution with special attention to...
skeletal and dental anatomy, geological contexts, paleoecology, dating methods, archaeological associations, and current theories of human origins and physical diversity.

**ANTHR 372 Hunters and Gatherers (also Anthropology 672)**

Spring. 4 credits. T. Volman.

A survey of contemporary and recent peoples with economies based completely or mainly on hunting and gathering. Selected societies from various parts of the world will be examined to compare aspects of technology, subsistence practices, organization and beliefs. The impact of contact with more economically advanced societies will be considered.

[ANTHR 390 Primate Behavior and Ecology](#)

**ANTHR 409 Approaches to Archaeology (also Anthropology 609 and Archaeology 409/609)**

Fall. 4 credits. N. Russell.

An exploration of the concepts that have shaped modern archaeology. The course briefly examines the history of theoretical orientations in archaeology, then considers the variety of perspectives and interpretive frameworks that guide present-day investigations. Case studies illustrate the implications of the nature of the archaeological record for reconstructing subsistence and economic systems, trade, social and political organization, demography, and ideology. An undergraduate seminar especially recommended for undergraduate majors and graduate archaeologists but open to anyone with a serious interest in archaeology.

**ANTHR 475 Evolutionary Theory and Human Behavior (also Anthropology 675)**

**ANTHR 490 Primates and Evolution**

**V. Human History and Archaeology**

Archaeology tells the story of human origins, the invention of farming and settled life, the rise of complex social institutions and technologies, and the worldviews of the past, while also teaching field and laboratory methods for uncovering the human past.

**ANTHR 203 Early People: The Archaeological and Fossil Record (also Archaeology 203)**

Spring. 3 credits. T. Volman.

For course description, see section I.A.

**ANTHR 215 Stone Age Art (also Anthropology 215)**

Fall. 3 credits. T. Volman.

For course description, see section I.B.

**ANTHR 240 Old World Prehistory (also Archaeology 240)**

Fall. 3 credits. Not offered 1999–2000.

**ANTHR 317 Stone Age Archaeology (also Archaeology 317)**

**ANTHR 355 Ancient Mexico and Central America (also Anthropology 355)**

**ANTHR 370 Environmental Archaeology (also Anthropology 670 and Archaeology 370/670)**

**ANTHR 371 Human Paleontology (also Biological Sciences 371)**

Fall. 4 credits. One year of introductory biology or Anthropology 101 or permission of instructor. Offered alternate years. K. Kennedy.

For course description, see section IV.

**ANTHR 372 Hunters and Gatherers (also Anthropology 672)**

Spring. 4 credits. T. Volman.

For course description, see section IV.

**ANTHR 405 Archaeological Research Design (also Anthropology 605 and Archaeology 405/605)**

**ANTHR 406 Approaches to Archaeology (also Anthropology 606 and Archaeology 406/606)**

Fall. 4 credits. N. Russell.

For course description, see section IV.

**ANTHR 456 Mesoamerican Religion, Science, and History**

**ANTHR 458 Archaeological Analysis (also Anthropology 658 and Archaeology 458/658)**

**ANTHR 463 Zooarchaeological Method (also Anthropology 463)**

Fall. 5 credits. Limited enrollment due to limited lab space. N. Russell.

This is a hands-on laboratory course in zooarchaeological method: the study of animal bones from archaeological sites. It is designed to provide students with a basic grounding in identification of body part and taxon, aging and sexing, pathologies, taphonomy, and human modification. We will deal only with mammals larger than squirrels. While we will work on animal bones from prehistoric Europe, most of these skills are easily transferable to the fauna of other areas, especially North America. This is an intensive course that emphasizes laboratory skills in a realistic setting. Preference given to students who have taken either Anthropology 102 or Theatre Arts 474. Fee for film screening and maintenance, $35. R. Ascher.

Shortly after the first films were screened, their makers saw in motion pictures a promise for greater understanding among peoples. Was the promise fulfilled? In this discussion course, responses to this question are examined through the study of short, representative films and related readings. The discussions are framed and informed by ideas from anthropology and film studies. For example, we consider: aesthetics, ethics, and responsibility in filming and editing; connections between sound—or lack of it—and image; the implications of film as a product of Euroamerican culture; cultural assumptions in camera movements, film color, and film pace; indigenous people's presentations of themselves and Euroamerican representations of others; and the blurry, ever changing space that separates fiction from non-fiction film. For one meeting each week, two students, in cooperation with the instructor, are responsible for leading the discussion.

**ANTHR 464 Zooarchaeological Interpretation (also Anthropology 464)**

Spring. 4 credits. N. Russell.

This course follows from last semester's Zooarchaeological Method. We shift our emphasis here from basic skills to interpretation, although you will continue to work with archaeological bones. We will begin by examining topics surrounding the basic interpretation of raw faunal data: sampling, quantification, taphonomy, seasonality. We will then explore how to use faunal data to reconstruct subsistence patterns, social structure, and human/animal relations.

**ANTHR 466 Humans and Animals (also Anthropology 666 and Archaeology 466/666)**

**ANTHR 467 Origins of Agriculture (also Archaeology 467)**

**ANTHR 469 Gender and Age in Archaeology (also Anthropology 669 and Archaeology 469/669)**

**ANTHR 493 Seminar in Archaeology (also Archaeology 493)**

**ANTHR 494 Seminar in Archaeology: The Archaeology of Human Origins (also Archaeology 494)**

Fall. 4 credits. N. Russell.

An exploration of the archaeological record associated with early modern and near-modern humans as well as their non-modern contemporaries, such as the Neanderthals. Major issues include: what behaviors and capabilities are indicated for various populations, and how and why did these change over the course of the later Pleistocene? To what extent does the archaeological record support the "Out-of-Africa" hypothesis of a recent, African origin for all modern humans?

**VI. Anthropological Thought and Method**

As a form of inquiry, anthropology has a long and complex history and utilizes a wide variety of theories and methods. In this section, topics in the history of anthropological thought and a wide variety of anthropological approaches are presented, along with courses focused on the design of anthropological research projects.

**ANTHR 215 Stone Age Art (also Archaeology 215)**

Fall. 3 credits. T. Volman.

For course description, see section I.B.

**ANTHR 291 Filming Other Cultures (also Anthropology 691 and Theatre Arts 291/691)**

Spring. 3 credits. Limited to 20 students. Preference given to students who have taken either Anthropology 102 or Theatre Arts 474. Fee for film screening and maintenance, $35. R. Ascher.

**ANTHR 306 Ethnographic Description**

**ANTHR 324 Anthropology Amongst the Disciplines**

This course poses an alternative to distanced, “objectivist” social science by reviewing some prerequisites and undergraduates are welcome. Field research abroad as part of the Cornell-Nepal Studies Program, the Cornell-Honduras Program, or other departmentally-approved programs. Topics are selected and project proposals prepared by students in consultation with faculty. Fieldwork typically involves extended research (usually 4–6 weeks) in a foreign setting with faculty supervision, culminating in a major paper or report.

**ANTHR 494 Seminar in Archaeology:**
- **ANTHR 494 The Archaeology of Human Origins**

**VII. Understanding Cultures**

Anthropologists examine the diversity of human behaviors, social relationships and structures, economies, political and legal orders, worldviews, logics, languages, symbols, myths, and religions among the many other means human beings invent to create and reproduce social life around the world. Anthropologists work from a holistic perspective to account for differences and similarities across cultures. Anthropologists also take small-scale societies and local sociocultural systems as the object of analysis. They collect data primarily through ethnographic fieldwork, that is, months or years of participating in and observing of the societies they study. Anthropologists see inherent linkages between the practical and the meaningful dimensions of human existence.

**A. Anthropological Approaches to**

- **Economy, Society, Law, and Politics:**

  The courses below take as their starting point what are usually defined as the social, political, legal, and economic practices and structures of human life and show how they are shaped culturally and how they shape culture.

**ANTHR 217 Nationalism and Revivalism**
- Fall. 4 credits. A. Willford.

**ANTHR 305 Emotion, Gender, and Culture**
- (also Women's Studies 305)

**ANTHR 313 Anthropology of the City**

**ANTHR 321 Sex and Gender in Cross-Cultural Perspective**
- (also Anthropology 621 and Women's Studies 321/631)
  - Fall. 4 credits. K. March.

**ANTHR 322 Kinship and Social Organization**
- Spring. 4 credits. B. Lambert.

**B. Interpretive Approaches in Cultural Anthropology:**

These courses stress symbolic or textual approaches to human society. They take as their object of analysis structures of meaning in such diverse areas as performance and text, myth and religion, views of the self, gender, and the sociology of knowledge. These same topics arise in many of the area-focused courses as well (Section D), but take center stage in the following courses.

**ANTHR 291 Filming Other Cultures**
- (also Anthropology 691 and Theatre Arts 291/691)
  - Spring. 3 credits. Limited to twenty students. Preference given to students who have taken either Anthropology 102 or Theatre Arts 474. Fee for film screening and maintenance, $35. R. Ascher.

For description, see section VI.
and societies of particular areas of the world and organize knowledge about these areas in reference to key anthropological questions. Students without prior experience in anthropology are welcome in these courses.

[ANTHR 221 Anthropological Representation: Ethnographies on Latino Culture (also Latino Studies Program 221 and American Studies 221)]

[ANTHR 224 The French Experience (also French Literature 224)]
Fall 3 credits. J. Siegel, A. Berger.
An examination of French society, culture, and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals and cinema. Looking attentively at texts, images, and contexts from selected moments in the eighteenth, nineteenth, and twentieth centuries, we will attempt to unravel some of the defining enigmas of the French experience.

[ANTHR 230 Cultures of Native North America (also Women's Studies 230)]
Fall 4 credits. B. Lambert.
A survey of the principal Eskimo and American Indian cultures north of Mexico. Selected cultures will be examined to bring out distinctive features of the economy, social organization, religion, and worldview. Although the course concentrates on traditional cultures, some lectures and readings deal with changes in native ways of life that have occurred during the period of European-Indian contact.

[ANTHR 280 Intercultural Ethnoscapes: Spain and America (also Latino Studies 280)]
Fall 4 credits. M. Buxo J. Rey.
This course is based on combined research in Spain, the U.S. Southwest, and Latin America and takes advantage of combined work in cultural anthropology, ethnic and gender studies, and the long-term study of information systems. It is an introductory course and does not assume background in anthropology. Readings will be in English.

[ANTHR 303 Asians in the Americas: A Comparative Perspective (also Asian American Studies 303)]
Fall 4 credits. V. Munasinghe.
The common perception of ethnicity is that it is a "natural" and an inevitable consequence of cultural difference. "Asians" overseas, in particular, have won repute as a people who cling tenaciously to their culture and refuse to assimilate into the host societies and cultures. But, who are the "Asians"? On what basis can we label "Asians" an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course will examine the dynamics behind the construction of ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies will focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

[ANTHR 316 Power, Society, and Culture in Island Southeast Asia]

[ANTHR 337 Gender, Identity, and Politics in the Pacific Islands]

[ANTHR 339 Peoples and Cultures of the Himalayas]
Spring. 4 credits. K. March.
A comprehensive exploration of the peoples and cultures of the Himalayas. Ethnographic materials draw on the lifeways of populations inhabiting the Himalayan regions of Bhutan, India, Nepal, and Tibet. Some of the cultural issues to be examined through these sources include images of the Himalayas in the West, forms of social life, ethnic diversity, political and economic history, and religious complexity.

[ANTHR 343 Religion, Family, and Community in China]

[ANTHR 344 Male and Female in Chinese Culture and Society (also Women's Studies 344)]

[ANTHR 345 Japanese Society]
Fall. 4 credits. T. Bestor.
A survey of the patterns of social structure and cultural identity in contemporary Japan, including ethnographic comparative family, community, individual life course (including gender, education, career, and aging); workplace, markets and economic organization; and public culture.

[ANTHR 350 Topics in the Anthropology of Europe]
ANTHR 355 Ancient Mexico and Central America (also Archaeology 355)  

ANTHR 377 The United States (also Latino Studies Program 377 and American Studies 377)  
Fall. 4 credits. V. Santiago-Trizarry. The anthropological inquiry into one's own culture is never a neutral exercise. This course will explore issues in the cultural construction of the United States as a "plurletic" society. We will look at the ideological context for the production of a cultural profile predicted upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality and the way these are applied in practice. The course readings will include historic documents and accounts, popular writing, and recent ethnographies on the United States.

[ANTHR 433 Andean Thought and Culture]  

[ANTHR 443 Religion and Ritual in Chinese Society (also Religious Studies 443)]  

[ANTHR 444 Japanese Social Organization]  

[ANTHR 456 Mesoamerican Religion, Science, and History]  

[ANTHR 477 Ethnology of Island Southeast Asia]  

[ANTHR 493 Seminar in Archaeology (also Archaeology 493)]  

Relevant courses in other departments
ASIAN 601 Seminar: Indonesia  
Fall. 4 credits. J. Siegel.

BIOPL 247 Ethnobiology  
Fall. 3 credits. D. Bates.

BIOPL 348 The Healing Forest  

[BIOPL 442 Current Topics in Ethnobiology]  

GOVT 444 Afrocentism  
Spring. 4 credits. M. Bernal.

GOVT 454 The Herodotean Moment: The Uses and Abuses of 'Western Civilization' (also History 454)  
Spring. 4 credits. M. Bernal.

MUSIC 101 Popular Music in America, 1850-1985  
Fall. 3 credits. M. Hatch.

MUSIC 103 Introduction to the Musics of the World  
Spring. 3 credits. M. Hatch.

MUSIC 245 Gamelan in Indonesian History and Culture  
Fall or spring. 3 credits. M. Hatch.

MUSIC 445-446 Cornell Gamelan Ensemble  
445 fall; 446 spring. 1 credit. Prerequisite: permission of instructor. M. Hatch.

NS/HD 347 Human Growth and Development: Biological and Behavioral Perspectives  
Spring. 3 credits. J. Haas, S. Robertson.

VIII. Graduate Seminars

The graduate program in anthropology is described in much greater detail in the Graduate Program brochure which is available through the Director of Graduate Studies. This document is also found on the Anthropology Department web page (http://falcon.arts.cornell.edu/~anthro/). The seminars described immediately below pertain to the program in socio-cultural anthropology. For information about graduate study in archaeology and biological anthropology, see the Anthropology Department web page.

A core set of seminars is required of all graduate students in socio-cultural anthropology: Anthropology 600, 601, and 602. Anthropology 603 is strongly recommended. These courses are designed to graduate students from other related fields. This sequence, and the graduate curriculum in general, is premised on the idea that anthropology is best defined as the comparative study of human social life. This definition resists institutional pressures in the academy to distinguish social sciences from humanistic or cultural studies and scholarly from more worldly applications. Our most important method, ethnography, is at once scientific and humanistic; disciplinary aspirations refuse to view cultural interpretation and analytic explanation as separable values. Furthermore, theory in anthropology is directly related to practice in the world whether in relation to research or more action-oriented pursuits. Consequently, the core sequences as well as most other courses for graduate students are oriented explicitly toward subverting an ideological construction of social life as separable into cultural and social (or political-economic) domains.

ANTHR 600 Proseminar: Culture and Symbol  
Spring. 6 credits. D. Holmberg. This course focuses on an appreciation of symbolic, expressive, and representational forms and processes both as producers and products of social activities. Through the study of symbolic anthropology, structuralism, exchange, myth and ritual, religion, gender, personhood, linguistics, semiotics, etc., we will investigate how identity and meaning are linked to the practical exigencies of social life. While emphasizing aspects of the discipline generally associated with cultural anthropology, the course will endeavor to set the stage for a dialectical understanding of social, political, economic, and symbolic activities as interconnected phenomena. The works of de Saussure, Levi-Strauss, Dumont, Geertz, Victor Turner, Sahlin, among others, as well as contemporary theories are given careful attention.

ANTHR 601 Proseminar: Social Organization  
Fall. 6 credits. S. Sangren. This course focuses on linkages between culture and social institutions, representations and practices. The nature of these linkages is debated from strongly contesting points of view in social theory (structuralist, poststructuralist, utilitarian, hemeneneic, Marxist). Unlike debates in critical theory where the form of contestation has been mainly philosophical, in anthropology, these issues have developed in ethnographic analyses. The course briefly surveys kinship theory and economic anthropology with a focus on implications for general issues in social theory. Discussion of attempts to develop dialectical social analyses around the motion of "practice" follows. The issues addressed in this section carry over into the next, colonialist and post-colonialist, in which poststructuralist readings of history are counterpointed to Marxism ones. Finally, Lacanian and Marxist visions of ideology as they relate to anthropological theory and ethnographic analysis are examined with particular emphasis on the cultural and social production of persons.

ANTHR 602 The Practices of Anthropology  
Fall. 4 credits. D. Greenwood. The course builds on the foundation of the proseminars but broadens the concept of anthropological practices to include issues about the relations between theory and method, practice-theory, the ethnography of anthropological practices themselves, the examination and critique of the concept of "participant observation," and a consideration of "ethical practices" in anthropology. The centerpiece of the seminar is the connection between the students' own intellectual and existential commitments and their anthropological "practices" and between these and their own emerging research projects.

ANTHR 603 Research Design  

ANTHR 604 Praxis and Culture  

ANTHR 605 Archaeological Research Design (also Anthropology 405 and Archaeology 405/605)  

ANTHR 607 Special Problems in Anthropology  
Fall or spring. Credit and hours to be arranged. Intended for graduate students only. Staff.

Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

ANTHR 609 Approaches to Archaeology (also Anthropology 409 and Archaeology 409/609)  
Fall. 4 credits. N. Russell. For course description, see section IV.

ANTHR 610 Language and Myth  

ANTHR 614 Reading in the Ethnographic Tradition (1880-1860)  

ANTHR 615 Reading Contemporary Ethnographies (1960-1990)  

ANTHR 616 Cultural Production of the Person  
ANTHR 619 Anthropological Approaches to the Study of Buddhism in Asia
Spring. 4 credits. Staff.
This seminar will examine the various conceptual and analytical strategies employed by social scientists in the study of Buddhism especially in South and Southeast Asia. Problems of religious complexity, the social correlates of Buddhism, and the role of Buddhism in social change will be explored.

ANTHR 621 Sex and Gender in Cross-Cultural Perspectives (also Anthropology 321 and Women's Studies 321/631)
Fall. 4 credits. Time to be arranged.
Graduate section of Anthr 321. K. March. For course description, see Anthr 321, section VIIA.

[ANTHR 629 Chinese Ethnology]

[ANTHR 632 Andean Symbolism]

ANTHR 633 Southeast Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course on topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

[ANTHR 636 Cognition and Classification]

[ANTHR 637 Theorizing Social Movements, Human Rights and Democracy in Latin America]

[ANTHR 639 The Feminine Symbolic]

ANTHR 641 South Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

[ANTHR 645 Japanese Ethnology]

[ANTHR 647 Death of the Father]

[ANTHR 648 Marriage and Death]

[ANTHR 649 Narrative and the Analysis of Culture]

ANTHR 653 Myth Onto Film (also Theatre Arts 653)
Spring. 4 credits. Enrollment limited by available studio space and equipment. Some knowledge of one of the following: anthropology, filmmaking, mythology, graphics, drawing, or painting is required. Open to undergraduates and graduate students with permission of instructor. Fee for film screening and maintenance, $50. R. Asher.
In myths, whales fly, pebbles throw themselves across streams, and trees are transformed into women. Toward the end of visualizing myths—in particular the myths of other people—we explore the possibilities of animated film. The technique used is cameraless animation; that is, we draw and paint, frame by frame, directly onto movie film. The intellectual problem is to visualize the myths of others so that they are comprehensible to us but are not thought to be of us. Reading includes introductory works on both myth and animation and there is background reading on the particular myth that is committed to film.

ANTHR 655 East Asia: Readings in Special Problems
Fall or spring. Credit and hours to be arranged. Staff.
Independent reading course in topics not covered in regularly scheduled courses. Students select a topic in consultation with the faculty member who has agreed to supervise the course work.

[ANTHR 656 Maya History]

[ANTHR 658 Archaeological Analysis (also Anthropology 458 and Archaeology 458/658)]

ANTHR 660 Language, Ideologies and Practices (also Latino Studies Program 660)
Spring. 4 credits. V. Santiago-Irizarry. Cultural identity and citizenship in the United States have often been organized around linguistic difference and the issues this raises in an English-dominant society. Drawing from anthropological theories on language, this course will look at the place of language as a signifying practice in the U.S. by focusing on the experience of Latino communities. Topics to be explored include linguistic diversity and change, accommodation and resistance, language maintenance and shift, linguistic ideologies, the production of language hierarchies, and institutional applications of language.

ANTHR 662 Democratizing Society: Participation, Action, and Research (also Anthropology 362)
Fall. 4 credits. D. J. Greenwood. For description, see ANTHR 362, Section VI.

ANTHR 663 Action Research
Spring. 4 credits. D. Greenwood. This seminar is a practicum in action research (AR) in which the semester becomes a self-managing learning environment for the exploration of the techniques and group processes involved in AR, including co-generative learning, searching, and AR facilitation. Participation in a seminar-centered LISTSERV on the Internet is expected.

ANTHR 665 Topics in Native American Societies and Cultures

[ANTHR 666 Humans and Animals (also Anthropology 466 and Archaeology 466/666)]

[ANTHR 669 Gender and Age in Archaeology (also Anthropology 469 and Archaeology 469/669)]

ANTHR 670 Environmental Archaeology (also Anthropology 370 and Archaeology 370/670)

ANTHR 672 Hunters and Gatherers (also Anthropology 372)
Spring. 4 credits. T. Volman. For course description, see IV.

[ANTHR 673 Human Evolution: Concepts, History and Theory (also Anthropology 475)]

[ANTHR 675 Evolutionary Theory and Human Behavior (also Anthropology 476)]

[ANTHR 680 Theory and Ethnography in the Anthropology of Southeast Asia]

[ANTHR 682 Perspectives on the Nation (also Asian American Studies 682)]

[ANTHR 685 Mothers, Priests, Rebels, and Indian Chiefs: New Social Movements in Latin America]

[ANTHR 690 Ritual and Myth: Structure, Process, Practice]

ANTHR 691 Filming Other Cultures (also Anthropology 291 and Theatre Arts 291/691)
Spring. 4 credits. Fee for film screening and maintenance, $35.
For description, see Anthropology 291 and Theatre, Film and Dance 291. Graduate students who register in this course attend the meetings of 291. In addition, they write in-depth studies of one or more films in consultation with the instructor.

ARABIC AND ARAMAIC
See under Department of Near Eastern Studies.

ARCHAEOLOGY
See under Special Programs and Interdisciplinary Studies.

ASIAN AMERICAN STUDIES
See under Special Programs and Interdisciplinary Studies.
The Department of Asian Studies encompasses the geographical areas of East Asia, South Asia, and Southeast Asia and offers courses in most of the disciplines of the social sciences and the humanities. Asian studies courses through the 400 level (ASIAN is the prefix) are taught in English and are open to all students in the university. Some of these courses may be counted toward majors in other departments; others fulfill the humanities distribution requirement. Courses listed under Asian Studies offered through other departments may fulfill distribution requirements in history, social sciences, and arts.

The Major
A student majoring in Asian studies normally specializes in the language and culture of one country and often chooses an additional major in a traditional discipline.

Majors complete two courses at the 200 level (a minimum of 6 credits with a grade of C or better) in one of the Asian languages offered at Cornell. The major consists of at least 30 additional credits (which may include up to 6 credits of further language study) selected by the student in consultation with his or her adviser from among the courses listed under the Department of Asian Studies and numbered 250 and above. The applicant for admission to the major in Asian studies must have completed at least one area studies course selected from among those listed under the Department of Asian Studies and must receive permission for admission to the major from the director of undergraduate studies. The student must have received a minimum grade of C in this course and in all other courses counted toward the major.

Honors
To be eligible for honors in Asian studies, a student must have a cumulative grade average of A- in all Asian Studies area courses, exclusive of language study only, and must successfully complete an honors essay during the senior year. Students who wish to be considered for honors should apply to the director of undergraduate studies during the second term of their junior year. The application must include an outline of the proposed project and the endorsement of a faculty adviser. During the first term of the senior year the student does research for the essay in conjunction with an appropriate Asian studies course or Asian Studies 401. Students of China, Japan and Southeast Asia must also complete Asian Study 611, 612 or 613 respectively. By the end of the first term the student must present a detailed outline of the honors essay and have it approved by the faculty sponsor and the director of undergraduate studies. The student is then eligible for Asian Studies 402, the honors course, which entails writing the essay. At the end of the senior year, the student has an oral examination (with at least two faculty members) covering both the honors essay and the student's area of concentration.

Concentration in South Asia Studies
A candidate for the Bachelor of Arts or Science degree at Cornell may take a concentration in South Asian Studies by completing at least 18 credits of course work in South Asian studies, including Asian Studies 215 (Introduction to South Asia) and four courses or seminars at the intermediate or advanced levels, two of which may be South Asian language courses. Students taking a concentration in South Asian studies are considered members of the South Asia Program and will have an adviser from the program faculty. (This adviser will be for the student's concentration and is not a substitute for a student's academic adviser in his or her major.)

One South Asian graduate course may be taken for the concentration with consent of both the instructor and the adviser. This course applies for one South Asia-related course with a research paper on a South Asian subject. Additional courses may be added if offered with comparable South Asia content.

Concentration in Southeast Asia Studies
A candidate for the Bachelor of Arts or Bachelor of Science degree at Cornell may take a concentration in Southeast Asian studies by completing 18 credits of course work. A recommended plan would include Asian Studies 215 (Introduction to Southeast Asia) and four courses at the intermediate or advanced stage, two of which could be a Southeast Asian language. Students taking a concentration in Southeast Asian studies are members of the Southeast Asia Program and are assigned an adviser from the program faculty. Such students are encouraged to commence work on a Southeast Asian language either at the 10-week intensive courses offered by the Southeast Asia Program Summer Institute (SEASSI) or by studying for one semester at IKIP Malang, Indonesia; Khon Kaen University, Thailand; and Hanoi University, Vietnam; fellowships are available for undergraduates through the Cornell Abroad Program.

Intensive Language Program (FALCON)
The FALCON Program offers intensive instruction in Japanese, Chinese, or Indone- sian. The program is still the only one in the world offering a full year of intensive instruction, except perhaps for the exclusive language schools of some government agencies. Students must formally apply to the program, but the application process is simple and admissions is open to all students. (Applications available for FALCON from the secretary, room 414 Morrill Hall, or visit website http://dml.cornell.edu/FALCON/ and apply on-line). Students may take the entire sequence of 160, 161, 162, or any other portion of the program is they have necessary background credits (determined by placement test). The courses are full-time intensive language study; the degree of intensity required does not allow students to enroll simultaneously in other course or to work, except perhaps on weekends.

Study Abroad
Cornell is a member of the Inter-University Center for Chinese Language Study in Taipei and a member of the Council on International Educational Exchange offering study in China at Peking University and Nanjing University. These centers offer intensive training in both the spoken and written forms of the languages. The Kyoto Center for Japanese Studies (KCJS) is an undergraduate program for students who want to spend one or two semesters in Japan studying both language and culture.

Cornell is a class-A member of the American Institute of Indian Studies, which offers fellowships in India for intensive language study in Hindi, Bengali, and Tamil.

Cornell and the central campus of the Nepalese national university—Trihughan—at Kirtipur, Kathmandu, cosponsors an academic semester or year in Nepal.

Other opportunities include a junior year abroad at IKIP-Malang, in Indonesia, or at the School of Oriental and African Studies, University of London. Many other options for study in Asia exist, including in Indonesia, Thailand, and Vietnam through the Council for International Educational Exchange. Under­graduates should consult Cornell Abroad; graduate students should inquire at the East Asia Program, the South Asia Program, or the Southeast Asia Program offices.

General Education Courses

ASIAN STUDIES 391
and literature, art and architecture, agriculture, industrialization and urbanization, politics and government, warfare and diplomacy, ecological and human degradation, business and marketing. The course aims to teach both basic information and different ways of interpreting that information.

**ASIAN 211 Introduction to Japan:**

Japanese Texts in History @ Fall. 3 credits. B. de Bary.

An interdisciplinary introduction to Japanese Studies especially designed for non-majors. The course takes up a diverse series of cultural artifacts and demonstrates how, against the background of simultaneous and successive rises and falls of polities on the Japanese archipelago, the meanings and readings generated by these artifacts have changed dramatically over time. We will consider verbal and visual, fictional and historical, canonical and non-canonical texts, including the eighth century Kojiki, the county narrative Tale of Genji, eighteenth century puppet theater, modern Ainu autobiography, and films and comic books dealing with themes of nuclear warfare and apocalypse.

**ASIAN 212 Introduction to China:**

Fall. 3 credits. C. Minkowski.

An interdisciplinary introduction to Chinese culture especially designed for students not majoring in Asian Studies.

**ASIAN 215 Introduction to South Asian Civilization:**

Fall. 3 credits. C. Minkowski.

An interdisciplinary introduction to the culture and history shared by India and other states of South Asia. Designed for students not majoring in Asian Studies. Guest lecturers will provide the perspective of their disciplines to the general themes of the course: cultural diversity and the role of tradition in contemporary life.

**ASIAN 218 Introduction to Korea (also History 218 and Government 218):**

Fall. 3 credits. J. Choi.

**Asia—Literature and Religion Courses**

The following courses are taught entirely in English and are open to any Cornell student.

**ASIAN 250 Introduction to Asian Religions (also Religious Studies 250):**

Spring. 3 credits. D. Boucher.

This course will explore a range of religious traditions in South Asia (Pakistan, India, and Sri Lanka) and East Asia (China and Japan) including Hinduism, Buddhism (South and East Asia), Confucianism, Daoism, and Shinto. We will examine these religions in traditional times in order to understand better the historical foundations that have influenced much of what these cultures are today. We will attempt to inquire collectively into the nature of religious impulses among peoples who are in some fundamental ways both very much like us and very much different from us. The course format will include lectures and discussion sections.

**ASIAN 277 Meditation in Indian Culture:**

Spring. 3 credits. D. Gold.

This course probes the truths behind traditional claims of the priority of internal practice in Indian traditions. We will examine both practices themselves—techniques of meditation and contemplation, religious ways of using intellect, forms of chant and ritual—and the dynamics through which these have left a wider mark on South Asian civilization. These dynamics include not only the evident reverberations of practice in philosophical reflection and socio-religious institutions, but also wide-ranging processes of stylization, elaboration, and popularization found throughout South Asian culture. In order to get a sense of the experiences treated in classical religious texts, students will be expected to experiment with some basic meditation practices. At least as important for the work of the course (and much more important for the grade) will be the ways in which students situate these practices within larger South Asian world views as suggested by doctrines, rituals, iconic forms, and literary texts. To keep the interaction between internal practice and broader world views central, we will examine both Hindu and Buddhist sources, consistently examining the ways in which religious literary conventions are given distinct shapes by the two religious traditions.

**ASIAN 291 Classical Indian Narrative (also Classics 291):**

Reading in translation from the principal story collection of ancient India. Sources will include the Vedas, the Sanskrit epics, the Buddhist Jatakas, the Kathasaritasagara, the Pancatantra, and related collections. Attention will be given to comparisons with Greek narrative, and to the diffusion of Indian narratives into the world's literature.

**ASIAN 298 The U.S.-Vietnam War (also History 289):**

Spring. 3 credits. K. Taylor.

This course will survey events in Vietnam, the U.S., and elsewhere related to the US policy of intervention in Vietnam between 1954 and 1975. Readings will include historical narratives, memoirs, and literature. The courses will evaluate the standard winner (Hanoi) and loser (U.S.) narratives and how they have silenced southern Vietnamese voices.

**ASIAN 299 Buddhism (also Religious Studies 361):**

Fall. 4 credits. D. Boucher.

This course will explore the Buddhist tradition from its origins in ancient India to its migrations throughout Asia and eventually to the West. The first half of the course will deal with Indian Buddhism: the Buddha, the principal teachings and practices of his early followers, and new developments in spiritual orientation. We will then turn to the transmission of Buddhism to Central and East Asia, including China, Japan, and Tibet, concentrating on those traditions in traditional times. From there we will look at the southern migration to Sri Lanka and Southeast Asia and conclude with an examination of Buddhism in America.

**ASIAN 300 Premodern Chinese Literature in Translation:**

Fall. 4 credits. D. Gold.

This course is an introduction to classical Chinese literature. A variety of forms and genres, such as poetry, fiction, essays and historical writings, are chosen and arranged in chronological order as well as by general topics and issues, so as to present an overview of how the Chinese literary tradition evolves and to show the interplay of Chinese literature, culture, and history.

**ASIAN 311 Modern Korean Culture and Literature:**

A survey of the literature of the Post-Liberation period (1945-present), with an emphasis on the development of modern Korean poetry and its relation to the intellectual history of this time. Students will read major poetic texts of each period in English translation as well as writings on cultural movements and major arguments in intellectual history.

**ASIAN 314 Europe & Its Others (also Comparative Literature 304):**

Fall. 4 credits. N. Melas.

See ComL 304 for description.

**ASIAN 347 Tantric Traditions (also Religious Studies 349):**

This course treats the development of tantric traditions in the Indian subcontinent and beyond. Philosophical, socio-religious, cultic, and visionary dimensions of tantra will be discussed. We study different Hindu and Indo-Tibetan traditions, with some attention also paid to tantric developments in East Asian Buddhism.

**ASIAN 348 Indian Devotional Poetry (also Religious Studies 348):**

Fall. 4 credits. D. Gold.

A survey of Indian devotional genres, with particular attention to the medieval vernacular literatures. Consideration will be given to social and ritual contexts of the texts, the ways in which their literary conventions work, and their contemplative uses. The predominant focus will be on Hindu traditions, but some Buddhist and Islamic works will also be read. Readings will be in translation.

**ASIAN 351 The Religious Traditions of India (also Religious Studies 351):**

A study of the relationships between the main currents of Indian religion. The course will first focus on the Hindu tradition and its holistic worldview within the context of the caste system. It will then describe the rise of Jainism and Theravada and Mahayana Buddhism, as well as Hindu and Buddhist Tantrism, as religious phenomena reflecting the emergence of individualism.

**ASIAN 354 Indian Buddhism (also Religious Studies 354):**

A survey of Buddhist tradition in India from the life of the Buddha through the formation of the early schools, to the development of the Mahayana and the emergence of tantric Buddhism. Topics to be considered will include Buddhist concerns of human suffering and spiritual liberation, the nature of reality and human understanding, and the importance of compassion and emptiness. Attention will be paid to the identity and social function of the Buddhist movements in classical India.
This course addresses the complexity of religion in Japanese history through a focus on the dominant ideological system of Japanese religious practice and thought—that system commonly referred to as Shinto. In this course, we are interested in understanding the general methodological issues surrounding tradition formation, continuity, change, and revision. The Shinto case reveals the complexity of a given religious system which simultaneously serves as both a cultural ideology and a path for individual spiritual cultivation. A study of Shinto allows us to develop the intellectual frameworks for understanding the dynamics of religious traditions in societies. We will explore the Shinto tradition by looking at 1) the means by which a central corpus of values, tastes, practices, beliefs and concerns have been formulated and how this system has interacted with other religious systems in Japan so as to maintain its right to represent the "authentic Japanese spirit;" 2) the academic sources for the study of the Shinto tradition which have also contributed to its identity and continuity; 3) the view of this religious system from the perspective of those who are actively shaping its discourse; 4) the view of this religious system from the perspective of those peripheralized by its ideologies; 5) the issue of personal cultivation and aesthetic taste in the tradition and 6) the relationship between this religious system and imperialism, war, and historical revisionism.

ASIAN 357 Chinese Religions (also Religious Studies 357) @ #
Spring. 4 credits. D. Boucher.
This course will present a broad survey of Chinese religions from the earliest historic records through the late imperial and modern periods, from highbrow philosophical movements to local deity cults. Our survey will focus intensively on the great traditions of Confucianism, Taoism, and Buddhism as well as the lesser-known practices that often fall through the cracks. Our goal in part will be to trace patterns of continuity among competing and sometimes acrimonious voices.

ASIAN 358 Chinese Buddhism (also Religious Studies 358) @ #

ASIAN 359 Japanese Religions (also Religious Studies 359) @ #

ASIAN 360 Buddhist and Confucian Cultures of Asia @ #
Confucius and Buddha were contemporaries 2,500 years ago. Teachings attributed to them spread over large parts of Asia and were used to formulate expressions of cultural authority in many traditions. This course will survey historical themes in Buddhist and Confucian studies, such as Theravada and Mahayana, Pure Land, Zen, and other forms of Buddhist thought and practice, including interaction with and adaptation to local religions; Confucius and Mencius, Han eclectic Confucianism, Song Chu Hsi Confucianism, and dissenting or variant forms of Confucian thought. This course explores and compares specific examples of these themes in Japan, Korea, China, Vietnam, Thailand, and Burma. This course is intended for Asian studies majors and other interested students.

ASIAN 363 Contemporary Mass Culture in Japan and the U.S. (also Comparative Literature 343) @ #
A comparative study of Japanese and American mass cultures. Rather than seeking, through comparison, to delineate distinctive models of national cultures, the course will trace the complex relationships between cultural nationalist impulses and transnational economies, emphasizing processes of hybridity and fusion. The course will introduce students to a small number of important theoretical writings on mass culture. Areas of study will include the analysis of science fiction, comic books, film and video, popular music, and toy industries. Enrollment limited to 25 students.

ASIAN 373 Twentieth-Century Chinese Literature @
Fall. 4 credits. E. Gunn.
A survey of the principal works in English translation, the course introduces fiction, drama, essays, and poetry of China beginning with the Republican era and continuing up to the present in the People’s Republic and Taiwan, with attention to social and political issues and literary theory.

ASIAN 374 Chinese Narrative Literature (also Comparative Literature 376) @ #
Spring. 4 credits. E. Gunn.
Selected works in classical Chinese fiction are read in translation. Major novels, such as The Dream of the Red Chamber and Water Margin, are emphasized.

ASIAN 375 Japanese Poetry and Poetic Prose @ #
Spring. 4 credits. Alternates with ASIAN 377.

ASIAN 376 Modern Japanese Literature: From Meiji through the Pacific War (also Comparative Literature 369) @ #
We will read Japanese works of fiction, poetry, and critical theory written from the Meiji Restoration into the Showa Period. The course will take up such issues as modernization and the narrative of discovery, imperialism and the non-Western novel, the politics of visibility, gender and representation, and Japanese colonialism. We will consider how writings of critics like Karatani, Fuji, and Layoun have complicated modernizationist schemas of literary development. We will also attempt to explore what Nagahara Yutaka has called the "phenomenology of discrimination" in relation to Japanese literary texts, pursuing contradictions of nationalism and discrimination in the legacy of Meiji Enlightenment thought. Reading of non-Japanese (other Asian, as well as African, American, and European) texts raising pertinent theoretical perspectives will be integrated into the course work.

ASIAN 377 Japanese Tales of Love, War, and the Supernatural @ #
Spring. 4 credits. Alternates with ASIAN 375.
The romantic adventures of the Shining Prince Genji, the battles of 12th-century samurai clans, the ghosts and demons of folklore, and the adventures of Saikaku’s men and women who “loved love” are still very much alive in modern Japanese mass culture—in films, comic books, commercials, TV programs, and video games. This course will survey the original tales (in English translation) to introduce students to the vast array of literature. We will explore some of the changes in the representations of sex and gender, death and dying, and supernatural forces that occurred between the 9th and the 19th centuries.

ASIAN 383 Introduction to the Arts of China (also Art History 380 and Archaeology 380) @
Fall. 4 credits. A. Pan.
See ART H 380 for description.

ASIAN 388 Theorizing Gender & Race In Asian Histories & Literatures @
Fall. 4 credits. N. Sakai.
In recent years some studies have been published about the questions of gender and race in the fields related to East Asia. Yet, compared with the accumulated factual knowledge about these topics, little attention has been paid to how to conceptualize gender and race, how to analyse the mutual implication of sexism and racism, and how to understand the relationships of these topics to the broader contexts of colonialisms, imperialisms and nationalisms. This course is designed to offer a series of discussions about the following problems: 1) the historically specific modes of sexism and racism in social spaces which are related to Japan and other areas in East Asia. 2) the mutual implication of sexism and racism in various contexts including those of colonialism, imperialism and nationalism. 3) the roles of gender and race in the production of knowledge about Japan and East Asia in general. 4) the conceptions of gender and race in the social formations particular to East Asia. The assigned readings include both English and Japanese materials. However, those who register in AS 388 are exempt from reading the Japanese materials.

*Students are allowed to take this course either as AS 388 or as AS 688, although those who have studied Japanese for more than four years are strongly encouraged to register in AS 688. Those who register in AS 688 have to spend additional time in class in order to deal with texts in Japanese.

ASIAN 390 The Sanskrit Epics @ #
Readings in translation from the two Sanskrit epics, the Mahabharata and the Ramayana, supported by a study of the reception of the epics in later Indian imaginative literature. Attention will also be given to comparative traditions of the epic in ancient Indo-European languages.

ASIAN 395 Classical Indian Philosophical Systems (also Classics 395 and Religious Studies 395) @ #
Fall. 4 credits. Prerequisite: some background in philosophy or in classical culture. Not offered 1999–2000. C. Minkowski.
The course will survey drama, music theater, material will require knowledge of Chinese. studies, feminism, and new historicism. grass-roots literature movements, regional Tibetan monasteries. In addition to two through Tibetan history. In this course, we will explore the implications of exile for literary criticism influenced by the globalized critical theories. Major arguments of each of postmodernism and the heteroglossia of nationalism) versus belletristic movement, as well as with a proliferation of late twentieth century representations of Japan, as well as with a proliferation of late twentieth literary criticism, anthropology, and religious studies to explore a number of the problems to which these texts give rise: in what ways are the apparent differences in experience presented in meditation texts shaped by different cosmologies and ritual practice? Do different literary genres have particular religious implications? What are the relations between convention and experience in the creation of the texts? Readings will be drawn from the Upanishads and Tantra, devotional verse in the vernaculars, and the classical meditation manuals of Hinduism and Buddhism. Some attention may be given to Indian Sufi materials. No knowledge of Indian languages is required.

Asian 460 Indian Meditation Texts (also Religious Studies 460) 
Fall. 4 credits. D. Gold. Because texts that record visionary experience prescribe the practice of contemplation, and present enigmatic utterances are highly valued in Indian tradition, they need to be taken seriously by students of Indian and world civilizations. Yet the special problems of interpretation that they present have often caused meditation texts to be passed over in embarrassed, sometimes reverent silence. In this course we will draw on approaches from literary criticism, anthropology, and religious studies to explore a number of the problems to which these texts give rise: in what ways are the apparent differences in experience presented in meditation texts shaped by different cosmologies and ritual practice? Do different literary genres have particular religious implications? What are the relations between convention and experience in the creation of the texts? Readings will be drawn from the Upanishads and Tantra, devotional verse in the vernaculars, and the classical meditation manuals of Hinduism and Buddhism. Some attention may be given to Indian Sufi materials. No knowledge of Indian languages is required.

Asian 463 Readings in Hindi and Urdu Literature 
Spring. 4 credits. Not offered 1999–2000. D. Gold. Selected topics in Hindi and Urdu literature, with readings in the original; discussions in Hindi-Urdu and English. May be repeated for additional credit with consent of instructor.

Asian 464 Readings in Urdu Literature 

Asian 470 The Japanese Noh Theater and Modern Dramatists (also Comparative Literature 470 and Theater Arts 470) 
Fall. 4 credits. Special with ASIAN 471. Not offered 1999–2000. K. Brazzell. Several weeks will be spent studying the literary, performance, and aesthetic aspects of the noh theater. Emphasis will be on noh as a performance system, a total theater in which music, dance, text, costume, and props all interact to create the total effect. Then attention will turn to modern theater people who have reacted to noh in some creative way. Choice of dramatic texts is determined partly on student interests but will probably include Yeats, Brecht, Britten, Claudel, Grotowski, and Mishima. All readings may be done in English translation.

Asian 471 Japanese Theatre (also Television Arts 471) 
Fall. 4 credits. Alternates with ASIAN 470. A study of traditional forms of Japanese theatre. Topics will include ritual and theatre, noh and kyogen, kabuki, and the puppet theatre, and contemporary theatrical use of the traditional forms. Special emphasis will be placed on dramaturgy, acting styles, perfor-
ment trajectories of nations in Asia, Africa and primarily from Southeast Asia (Indonesia, Malaysia, Philippines).

ASIAN 604 Southeast Asia Topical Seminar
Spring. 3-4 credits. Staff.

ASIAN 605-606 Master of Arts Seminar in Asian Studies
605, fall; 606, spring. 2-4 credits. Staff.

ASIAN 607-608 The Plural Society Revisited (also Government 653)
607, fall; 608, spring. 4 credits. 607 may be taken independently for credit; 607 is a prerequisite for 608. B. Anderson. See GOVT 653 for description.

ASIAN 609 Modern Japanese Studies: The Formation of the Field in History and Literature (also History 609)
Spring. 4 credits. N. Sakai, J. V. Koschmann, B. de Bary. See HIST 609 for description.

ASIAN 610 SLA and the Asian Languages (also LING 609)
Fall. 4 credits. M. Ohira. See LING 609 for description.

ASIAN 611 Chinese Bibliography and Methodology
Spring. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. C. d'Orban.

ASIAN 612 Japanese Bibliography and Methodology
Fall. 1 credit. Prerequisite: permission of instructor. Required of honors students and M.A. candidates. F. Kotas.

ASIAN 613 Southeast Asian Bibliography and Methodology
Fall. 1 credit. Prerequisite: permission of instructor. A. Riedy.

This course is designed to instruct students in methods of identifying and locating resources for the study of Southeast Asia. Emphasis will be on the practical aspects of using various types of bibliographical tools to identify both primary and secondary sources in Southeast Asian and Western languages. Electronic databases and online services as well as traditional printed resources will be covered. Relevant ancara of library science will be explained as necessary. Required of honors students and Master of Arts candidates. No foreign language is required but a reading knowledge of at least one Southeast Asian language or other Asian language (especially Chinese or Japanese) and a major European language (especially French, Spanish, or Dutch) is highly desirable.

ASIAN 621-622 South Asia Seminar: Topic to be announced
621, fall; 622, spring. 4 credits. Not offered 1999-2000.

ASIAN 623-624 Topics in South Asia

A series designed to introduce as well as enhance and build on students' knowledge of various topics of importance to South Asia (Bangladesh, India, Nepal, Pakistan, and Sri Lanka). Weekly lectures will survey contemporary themes in South Asian scholarship where visiting scholars and members of the Cornell community will discuss a multidisciplinary range of issues. These may include science and nation building; ritual power and resistance; tribal communities and the environment; industrial and agrarian relations; gender and the media; and economic liberalization. A short essay will be required at the end of the course.

ASIAN 630 Seminar on Vietnamese Historiography of the 16th-18th Centuries
Spring. 4 credits. Permission of instructor required. K. Tan. A survey of texts and secondary literature about Vietnamese speakers from the Hong Duc era (end of 15th century) to the founding of the Nguyen dynasty (beginning of 19th century). Required work will include class presentations, short essays, and a seminar paper representing new research.

ASIAN 676 Southeast Asia Research Training Seminar
Fall or spring. 3-4 credits. Staff.

ASIAN 688 Theorizing Gender & Race in Asian Histories and Literatures
Fall. 4 credits. N. Sakai.

In recent years some studies have been published about the questions of gender and race in the fields related to East Asia. Yet compared with the accumulated factual knowledge about these topics, little attention has been paid to how to conceptualize gender and race and how to analyse the mutual implication of sexism and racism. This course is designed to offer a series of discussions about the following problems: 1) the historically specific modes of sexism and racism in social spaces which are related to Japan and other areas in East Asia. 2) The mutual implication of sexism and racism in various contexts including those of colonialism, anti-colonialism and nationalism. 3) The roles of gender and race in the production of knowledge about Japan and East Asia in general. 4) The conceptions of gender and race in the social formations particular to East Asia. The assigned readings include both English and Japanese materials. However, those who register in AS 688 are exempt from reading the Japanese materials*.

*Students are allowed to take this course either as AS 688 or as AS 689, although those who have studied Japanese for more than four years are strongly encouraged to register in AS 688. Those who register in AS 688 are to be required to spend additional time in class in order to deal with texts in Japanese.

ASIAN 701-702 Seminar in East Asian Literature
701, fall; 702, spring. 1-4 credits. Staff.

ASIAN 703-704 Directed Research
703, fall or spring; 704, fall or spring. 1-4 credits. Staff.

ASIAN 899 Masters Thesis Research
Fall, spring. 2-4 credits. Staff.

ASIAN 999 Doctoral Dissertation Research
Fall, spring. 2-4 credits. Staff.

Honors Courses

ASIAN 401 Asian Studies Honors Course
Fall or spring. 4 credits. Intended for seniors who have been admitted to the honors program. Staff. Supervised reading and research on the problem selected for honors work.
ARTS AND SCIENCES - 1999-2000

ASIAN 402 Asian Studies Honors: Senior Essay
Fall or spring. 4 credits. Prerequisite: admission to the honors program. Staff. The student, under faculty direction, prepares an honors essay.

ASIAN 403-404 Asian Studies Supervised Reading
Fall, spring, or both. 1–4 credits. Prerequisite: permission of instructor. Open to majors and other qualified students. Intensive reading under the direction of a member of the staff.

Bengali

BENG 121-122 Elementary Bengali
121, fall; 122, spring. 4 credits each term. Prerequisite: for Bengali 122, Bengali 121 or examination. D. Sudan. The emphasis is on basic grammar, speaking, and comprehension skills; Bengali script will also be introduced.

BENG 201-202 Intermediate Bengali Reading @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Bengali 201, Bengali 122 or examination; for Bengali 202, Bengali 201 or examination. D. Sudan. Continuing instruction in grammar with attention to speaking and reading skills.

BENG 203-204 Intermediate Bengali Composition and Conversation @
203, fall; 204, spring. 3 credits each term. Prerequisites: for Bengali 203, Bengali 122 or examination; for Bengali 204, Bengali 203 or examination. D. Sudan. Continuing instruction in grammar with attention to writing skills.

BENG 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. D. Sudan. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BENG 303-304 Bengali Literature I, II
303, fall; 304, spring. 4 credits each term. Prerequisites: Bengali 203-204 or equivalent. D. Sudan. An introduction to noted Bengali writers. Selections of works by Rabindranath Tagore and Abanindranath Tagore and short stories by Bonophul will be covered. The course will be devoted to reading these works and developing literary criticism and creative writing in Bengali.

Burmese

NOTE: Contact S. Tun in Morrill Hall 405 before classes begin for placement or other testing and organizational information.

BURM 103-104 Burmese Conversation Practice
103, fall; 104, spring. 2 credits each term. Prerequisites: for Burmese 104, Burmese 103 and Burmese 121. May not be taken alone. Must be taken simultaneously with Burmese 121-122. Satisfactory completion of Burmese 104/122 fulfills the qualification portion of the language requirement. S. Tun. Additional drills, practice and extension of materials covered in Burmese 121 and 122.

These courses are designed to be attended simultaneously with Burmese 121-122 respectively, allowing students to obtain qualification within a year.

BURM 121-122 Elementary Burmese
121, fall; 122, spring. 4 credits each term. Prerequisite: for Burmese 122, Burmese 121. May be taken alone or simultaneously with Burmese 103-104. Satisfactory completion of Burmese 104/122 fulfills the qualification portion of the language requirement. S. Tun. A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

BURM 123 Continuing Burmese
Fall. 4 credits. Prerequisite: Burmese 122. Satisfactory completion of Burmese 123 fulfills the qualification portion of the language requirement. S. Tun. Continuing instruction in conversational and reading skills, to prepare students for 200-level courses.

BURM 201-202 Intermediate Burmese Reading @
201, fall or spring; 202, fall or spring. 3 credits each term. Prerequisites: for Burmese 201, Burmese 122 or examination; for Burmese 202, Burmese 201 and examination. D. Sudan. Continuing instruction in Burmese, with emphasis on consolidating and extending conversational skills, and on extending reading ability.

BURM 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. S. Tun. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

BURM 301-302 Advanced Burmese @
301, fall or spring; 302, fall or spring. 3 credits each term. Prerequisites: for Burmese 301, Burmese 202 or permission of instructor. For Burmese 302, Burmese 201 and examination. S. Tun. Continuing instruction in Burmese, with emphasis on consolidating and extending conversational skills, and on extending reading ability.

BURM 303-304 Advanced Burmese II
303, fall or spring; 304, fall or spring. 3 credits each term. Prerequisite: for Burmese 303, Burmese 202 or permission of instructor. For Burmese 304, Burmese 303. S. Tun. This is a course for students who have good conversational ability in Burmese and some familiarity with Burmese culture, but who need to strengthen reading skills and further enrich their vocabulary. Students will, in consultation with the instructor, be able to select reading materials. There will also be an opportunity for those who need it, to strengthen listening skills, through the study of current films, TV and radio programs in Burmese.

BURM 401-402 Directed Individual Study
401, fall; 402, spring. 2–4 credits variable each term. Prerequisite: permission of instructor. S. Tun. This course is designed to accommodate the needs of advanced or specialized students, and faculty interests. Topics of reading and discussion are selected on the basis of student need.

Cambodian

See Khmer.

Chinese

NOTE: Testing for placement, except for those with near-native abilities (particularly those schooled in a Chinese setting up until the age of about 12) takes place in registration week, before classes begin. Time and place will be posted on the web at http://dml.comell.edu and the Chinese bulletin board opposite Morrill 416. Students with some Chinese schooling who want to obtain 3 or 6 credits for their proficiency will be tested at the beginning of the second week of classes. Again, the time and place will be announced.

CHIN 101-102 Elementary Standard Chinese ('Mandarin')
101, fall; 102, spring. 6 credits each term. Prerequisite: for Chinese 102, Chinese 101 or equivalent. Since each section is limited to 10–12 students, students missing the first two class meetings without a university excuse are dropped so others may register. No student will be added after the second week of classes. Satisfactory completion of Chinese 102 fulfills the qualification portion of the language requirement. Staff. A course for beginners or those who have been placed in the course by examination. The course gives a thorough grounding in conversational and reading skills. Students with some facility in the spoken language (because Chinese is spoken at home) may register; but who do not read characters should take 109–110. Students who read Chinese, but who speak 'dialects,' such as Cantonese or Amoy, should consult with the staff before enrolling.

CHIN 109-110 Beginning Reading and Writing (Standard Chinese)
109, fall; 110, spring. 4 credits each term. Prerequisites: for Chinese 109, basic conversational Chinese ('Mandarin'); if in doubt, take the placement examination; for Chinese 110, Chinese 109 or equivalent. Students who complete Chinese 110 normally continue with Chinese 209 and 210. Because of high demand for this course, students missing the first two meetings without a university excuse are dropped so others may register. Satisfactory completion of Chinese 110 fulfills the qualification portion of the language requirement. F. Lee Mehta. This course is intended primarily for students who speak some Chinese (e.g., at home), but who have had little or no formal training. The focus is on characters, reading comprehension, basic composition, standard grammar, and reading aloud with standard Chinese ('Mandarin') pronunciation.
CHIN 111-112 Beginning Cantonese
(Spoken)
111, fall; 112, spring. 3 credits each term.
Prerequisites: for Chinese 112, Chinese
111 or equivalent. Chinese 111-112 only
satisfies the qualification portion of the
language requirement if the student can
also demonstrate a comparable reading
ability. Staff.
A course in conversational standard
Cantonese (as spoken in Hong Kong and Canton) for
beginners. Students need not have a
Mandarin background to take this course, but
those with elementary reading skills will also
be introduced to Cantonese (character)
writing.

CHIN 113-114 Beginning Reading for
Cantonese Speakers
113, fall; 114, spring. 3 credits each term.
Prerequisite: everyday conversational
ability in Cantonese. Completion of 114
satisfies the qualification portion of the
language requirement. Staff.
This course is intended primarily for students
who speak some Cantonese (e.g., at home),
but who have had little or no formal training in
writing. The focus is on characters, reading
comprehension, standard grammar, and
reading aloud with Cantonese pronunciation.

CHIN 201-202 Intermediate Standard
Chinese ('Mandarin') @
201, fall or summer; 202, spring or
summer. 4 credits each term.
Prerequisites: for Chinese 201, Chinese
102 with a grade of C+ or above or equivalent; for
Chinese 202, Chinese 201 or equivalent.
Satisfactory completion of Chinese 201
fulfills the proficiency portion of the
language requirement. Section 1, Q. Teng;
Section 2, H. Wang.
Continuing instruction in written and spoken
Chinese with particular emphasis on consoli­
dating basic conversational skills and
improving reading confidence and ability.

CHIN 209-210 Intermediate Reading and
Writing @
209, fall; 210, spring. 4 credits each term.
Prerequisites: for Chinese 209, Chinese
110 or equivalent; Chinese 210, Chinese
209. Satisfactory completion of 209 fulfills
the proficiency portion of the language
requirement. After completing 210, students may only take 400-level courses in
Chinese. X. Sun.
Continuing focus on reading and writing for
students with spoken background in standard
Chinese; introduction of personal letter writing
and other types of composition.

CHIN 215 Mandarin for Cantonese
Speakers
Fall or spring. 3 credits each term. Not

CHIN 300 Directed Studies
Fall or spring. 1-4 credits variable.
Prerequisite: permission of instructor.
Staff.
Taught on a specialized basis to address
particular student needs. Times will be
arranged with instructor.

CHIN 301-302 High Intermediate
Chinese
301, fall; 302, spring. 4 credits each term.
Prerequisites: for Chinese 301, Chinese
202 or equivalent; for Chinese 302,
Chinese 301. F. Lee-Mehra.
Continuing instruction in spoken Chinese and
in various genres and styles of written
Chinese.

CHIN 303-304 Advanced Mandarin
Conversation @
303, fall; 304, spring. 1 credit each term.
Prerequisite: Chinese 201-202 or
equivalent or permission from instructor.
Staff.
Conversation and reading practice for students
who wish to maintain language skills. Guided
conversation and oral composition and
translation. Corrective pronunciation drills.

CHIN 411-412 Advanced Chinese:
Fiction, Reportage, Current Events
411, fall; 412, spring. 4 credits each term.
Prerequisites: for Chinese 411, Chinese
302 or equivalent; for Chinese 412,
Chinese 411. Q. Teng.
Reading, discussion, and composition at
advanced levels.

CHIN 412-414 Advanced Chinese:
Focus on Current Events
413, fall; 414, spring. 3 credits each term.
Prerequisites: for Chinese 413, Chinese
412 or equivalent or permission of
instructor, for Chinese 414, Chinese 413.
Reading and discussion, with a focus on
current events. One of the goals of this
course is to build reading confidence and
speed. The content will partially be deter­
mined by student need and interest.

CHIN 425 Special Topics
Fall or spring, according to demand.
4 credits. Prerequisite: permission of
instructor. S. Wen.
A number of different topics in advanced
Chinese language, advertised the previous
semester, will be offered under this title to
accommodate the needs of advanced or
specialized students, and take advantage of
faculty interests. Topics include: correspond­
dence and composition, excerpts from
classical novels, xiesheng comedy routines, etc. May be repeated for credit.

FALCON (Full-year Asian
Language Concentration)
For full information, brochures, etc., see the
FALCON secretary 414 Morrill Hall (e-mail:
falcon@cornell.edu).

CHIN 160 Introductory Intensive
Mandarin
Summer only. 8 credits. Completion of
160 fulfills the qualification portion of the
language requirement. Staff.
Introduction to spoken and written Mandarin.
Lectures on linguistic and cultural matters,
intensive practice with native speakers, and
laboratory work. Students who complete this
course with a grade of at least B are normally
eligible to enroll in Chinese 201.

CHIN 161-162 Intensive Mandarin @
161, fall; 162, spring. 16 credits each term.
Prerequisites: for Chinese 161, Chinese
160 or equivalent or permission of
instructor, for Chinese 162, Chinese 161.
Satisfactory completion of Chinese 161
fulfills the proficiency portion of the
language requirement. Staff.

CHLIT 213-214 Introduction to Classical
Chinese @
213, fall; 214, spring. 3 credits each term.
Prerequisite: qualification in Chinese or permission of
instructor. May be taken concurrently with
Chinese 101-102, 201-202, 301-302.

CHLIT 420 T'ang and Sung Poetry @
Spring. 4 credits. Prerequisite: permission
of instructor. T. L. Mei.
Readings in the original Chinese, together with
secondary works by Chinese and Western
critics.

CHLIT 421-422 Directed Study
Fall or spring. 2-4 credits each term.
Prerequisite: permission of instructor.
Staff.

CHLIT 423 Readings in Chinese History
Fall. 4 credits. W. Shizhen.
Selected Readings.

CHLIT 424 Readings in Literary
Criticism
Fall or spring. 4 credits. Prerequisite:
permission of instructor. Not offered

CHLIT 426 History of the Chinese
Language (also CHIN 403) @
Fall. 4 credits. Prerequisite: reading
knowledge of Chinese. Not offered 1999-
This course explores the development of the
Chinese language from its Sino-Tibetan
beginnings to the present. Topics covered
include changes in sound, vocabulary and
grammatical structure, external influences, Old
Chinese, Middle Chinese and historical origins
of modern dialects.

CHLIT 435 Chinese Buddhist Texts @
Fall. 4 credits. Prerequisite: one year of
literary Chinese or permission of the
instructor. D. Boucher.
This seminar is designed to introduce students
to the idiom of Buddhist Chinese. We will
start by reading selections from the early
translations to gain a grounding in the
vocabulary and syntax that came to character­
ize literary Buddhism in China. From there we
will survey some of the so-called
apocryphal texts (Buddhist "sutras" produced
in China) and look at samples from important
writers and schools, depending on student
interests. This course is open to students in
any area of East Asia with an interest in
developing skills in Buddhist texts.

CHLIT 603 Seminar in Chinese Fiction
and Drama
Fall. 4 credits. Prerequisite: permission of
instructor. E. Gunn.

CHLIT 605 Seminar in Chinese Fiction
and Drama
Spring. 4 credits. Prerequisite: permission
Staff.

CHLIT 607 Early Medieval Chinese
Poetry
Spring. 4 credits. S. Tian.
By reading the poetry, criticism, and discursive
prose of the 1st to 6th centuries AD, we will
consider the changing roles and develop­
ment of Chinese poetry.
**Hindi**

**Hindi 101-102 Elementary Hindi-Urdu**
- Fall, 101, spring, 6 credits each term.
- Prerequisite: for Hindi 102, Hindi 101 or equivalent.

A semi-intensive course for students without prior experience in Hindi-Urdu or a closely related language. A thorough grounding is given in all language skills: listening, speaking, reading, and writing. Students who have had exposure to Hindi-Urdu or a closely related language at home or otherwise should generally take Hindi 101-110. Check with instructor regarding placement.

**Hindi 109-110 Accelerated Elementary Hindi-Urdu**
- Fall, 109, 110, spring, 3 credits each term.
- Prerequisite for Hindi 110: Hindi 109 or equivalent.

An entry-level sequence for students with some prior exposure to Hindi-Urdu or a closely related language. This course sequence will provide a thorough grounding in all the language skills: listening, speaking, reading, and writing. Completion of this sequence, including satisfactory performance on an examination given at the end of Hindi 110, will constitute a level of performance equal to that of the 101-102 sequence, and will thus be considered to fulfill qualification for the language requirement plus eligibility for 200-level Hindi-Urdu courses. Check with instructor regarding placement.

**Hindi 201-202 Intermediate Hindi Reading @**
- Fall, 201, spring, 3 credits each term.
- Prerequisites: for Hindi 201, Hindi 102, for Hindi 202, Hindi 201 or permission of instructor. Not offered 1999-2000.

**Hindi 203-204 Intermediate Composition and Conversation @**
- Fall, 203, spring, 3 credits each term.
- Prerequisites: for Hindi 203, Hindi 102, for Hindi 204, Hindi 203 or permission of instructor.

Throughout this course sequence all aspects of language learning are practiced: listening, speaking, reading, and writing. In 203, video materials are used and the emphasis is on the conversational aspects of the language. In 204, the focus shifts to reading skills and the main text used is a popular novel.

**Hindi 300 Directed Studies**
- Fall or spring. 1-4 credits variable.
- Prerequisite: permission of instructor.
- Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**Hindi 301-302 Advanced Readings in Hindi Literature @**
- Fall, 301; spring, 302, 4 credits each term.
- Prerequisites: for Hindi 301, Hindi 202, for Hindi 302, Hindi 301 or equivalent.

Selected readings in modern Hindi literature.

**Hindi 303-304 Advanced Composition and Conversation @**
- Fall, 303; spring, 4 credits each term.
- Prerequisites: for Hindi 303, Hindi 204 or equivalent, for Hindi 304, Hindi 303 or equivalent.
- Staff.

**Hindi 305-306 Advanced Hindi Readings @**
- Fall, 305; spring, 4 credits each term.
- Prerequisites: for Hindi 305, Hindi 202 or equivalent, for Hindi 306, Hindi 305 or equivalent.

Staff.

**Indonesian**

For students who have completed Indonesian 121-122-123 or its equivalent there is the option of a one-semester program in Malang, East Java, during the junior year. The program combines a variety of cultural and artistic options with area course work and advanced language study. Complete information is available through Cornell Abroad.

Students who have completed a minimum of 18 credits or the equivalent are eligible to apply for a summer program in the Advanced Indonesian Abroad Program. Further information is available from Professor John Wolff (307 Morrill Hall, 255-0733).

**INDO 121-122 Elementary Indonesian**
- Fall, 121, spring, 4 credits each term.
- Prerequisite: for Indonesian 121.
- Staff.

A thorough grounding is given in basic listening and speaking skills with an introduction to reading.

**INDO 123 Continuing Indonesian**
- Fall, 4 credits.
- Prerequisite: Indonesian 122 or equivalent.
- Satisfactory completion of Indonesian 123 fulfills the qualification portion of the language requirement.
- Staff.

Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings and sharpens listening skills.

**INDO 203-204 Intermediate Composition and Conversation**
- Fall, 203, spring, 3 credits each term.
- Prerequisites: for Indonesian 203, Indonesian 123; for Indonesian 204, Indonesian 203 or permission of instructor.
- Staff.

**INDO 205-206 Intermediate Indonesian @**
- Fall, 205, spring, 3 credits each term.
- Prerequisites: for Indonesian 205, Indonesian 123 or equivalent; for Indonesian 206, Indonesian 205 or equivalent.
- Satisfactory completion of Indonesian 205 fulfills the proficiency portion of the language requirement.
- Staff.

This course develops all four skills: reading, writing, speaking, and comprehension.

**INDO 300 Directed Studies**
- Fall or spring. 1-4 credits variable.
- Prerequisite: permission of instructor.
- Staff.

Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**INDO 301-302 Advanced Readings in Indonesian and Malay**
- Fall, 301; spring, 4 credits each term.
- Prerequisites: for Indonesian 301, Indonesian 205-206 or equivalent; for Indonesian 302, Indonesian 301.
- Staff.

**INDO 303-304 Advanced Indonesian Conversation and Composition**
- Fall, 303; spring, 4 credits each term.
- Prerequisites: for Indonesian 303, Indonesian 206; for Indonesian 304, Indonesian 303 or equivalent.
- Staff.

A practical language course on an advanced level in which the students will read materials in their own field of interest, write reports, and meet with the instructor for two hours a week for two credits and twice a week for four credits.

**INDO 401-402 Advanced Readings in Indonesian and Malay Literature**
- Fall, 401; spring, 4 credits each term.
- Prerequisites: for Indonesian 401, Indonesian 302 or equivalent; for Indonesian 402, Indonesian 401 or equivalent.
- Staff.

**JAPANESE**

**JAPAN 101-102 Elementary Japanese**
- Fall, 101; spring, 6 credits each term.
- Prerequisite for Japanese 102: Japanese 101 or placement by the instructor during registration period. Intended for beginners or for those who have been placed in the course by examination.
- Y. Nakanishi-Whitman, R. Sukle and staff.

A thorough grounding in all four language skills—speaking, hearing, reading, writing—at the beginning level, but with a special emphasis on oral communication and actual use of the language in social contexts. Homework for the course is largely work on the skill aspects of language through practice in the language lab with tapes or CD-ROM. The lecture provides explanation, analysis, and cultural background necessary for successful interaction with Japanese people. The sections are conducted entirely in Japanese. Materials covered are not the same as for Japanese 141-142.

**JAPAN 121 Continuing Japanese**
- Fall. 6 credits.
- Prerequisite: placement by the instructor at beginning of semester.
- Y. Nakanishi.

Accelerated training in listening, speaking, reading, and writing with special emphasis on oral communication. For students who have already acquired a limited facility in Japanese through residence in Japan or through brief formal study and require fewer contact hours per week.
JAPAN 141-142 Beginning Japanese at a Moderate Pace
241, fall; 242, spring. 4 credits each term. Prerequisites: for Japanese 142: Japanese 141 or placement by instructor during registration period. Y. Shirai and staff.

Beginning level training in listening, speaking, reading, writing, with more emphasis on written skills than Japanese 101–102. Classroom activities focus on oral communication skills. Homework for the course is largely written exercises. Fewer credits and fewer class contact hours than Japanese 101–102, the course meets 5 hours per week (MTWR). Materials covered are not the same materials as Japanese 101–102.

JAPAN 201–202 Intermediate Japanese Conversation
201, fall and summer, 202, spring and summer. 4 credits each term. Prerequisites: for Japanese 201, Japanese 102 or placement by the instructor during registration; for Japanese 202, Japanese 201 and 203 or placement by the instructor during registration. Y. Katagiri.

JAPAN 203–204 Intermediate Japanese Writing
203, fall, 204, spring. 2 or 3 credits each term. Prerequisites: for Japanese 203, Japanese 102, Japanese 142 or placement by the instructor during registration; for Japanese 204, Japanese 203 or placement by the instructor during registration. N. Nakada.

Reading of elementary texts emphasizing practical materials, with development of writing skills.

JAPAN 241-242 Intermediate Japanese at a Moderate Pace
241, fall; 242, spring. 4 credits each term. Prerequisites: for Japanese 241, Japanese 142 or placement by instructor, for Japanese 242, Japanese 241 or placement by instructor. Y. Kawasaki and K. Selden.

Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command.

[JAPAN 251-252 Elementary Intermediate Japanese @]
251, fall, 252, spring. 4 credits each term. Prerequisites: for Japanese 251, Japanese 160 or placement by instructor during registration period; for Japanese 252, Japanese 251, 102 or placement by instructor during registration period. Not offered 1999–2000. Y. Nakashishi-Whitman.

Training in listening, speaking, reading, and writing for those students who have acquired a basic beginning-level command. Provides an alternate choice for students who find it difficult to schedule the more intensive Japanese 201/203 and 202/204 into their schedules: MBA students, engineering students, hotel school students, arts college students, and others. Highly recommended for those with prior background in the language who are weak in the more complex and difficult grammar patterns.

JAPAN 401-402 Advanced Japanese Oral Narration and Public Speaking
401, fall; 402, spring. 2 credits each term. Prerequisites: for Japanese 401, Japanese 302 or placement by the instructor during registration; for Japanese 402, Japanese 401 or placement by the instructor during registration. N. Nakada.

Instruction in making and delivering socially appropriate and effective speeches, with emphasis on both the construction of discourse and Japanese patterns of oral delivery.

JAPAN 403-404 Advanced Japanese Reading
403, fall, 404, spring. 4 credits each term. Prerequisite: Japanese 304 or permission of instructor.

Section I: Area of Humanities. Cannot be used for distribution. K. Selden. Reading of selected modern texts with emphasis on expository style.

Section II: Area of Economics and Social Science. Cannot be used for distribution with 541–552. Y. Kawasaki. Reading of selected modern texts with emphasis on expository style.

JAPAN 301-302 Communicative Competence
301, fall; 302, spring. 3 credits each term. Prerequisites: for Japanese 301, Japanese 202 and preferably Japanese 204, Japanese 242 or placement by the instructor during registration; for Japanese 302, Japanese 301 or placement by the instructor during registration. Y. Katagiri.

This is a course for students who have learned basic Japanese grammar and oral skill and would like to utilize the language for natural conversation and effective oral communication. The course is intended: 1) to expand vocabulary for daily life use; 2) to brush up on knowledge of basic grammar for fluency; and 3) to develop communicative skills for varied situations.

JAPAN 303–304 Intermediate Japanese Reading II
303, fall; 304, spring. 4 credits each term. Prerequisites: for Japanese 303, Japanese 204 or placement by the instructor during registration; for Japanese 304, Japanese 303 or placement by the instructor during registration. K. Selden.

Reading of selected modern texts with emphasis on expository style.

[JAPAN 351-352 Advanced Japanese at a Moderate Pace @]
351, fall; 352, spring. 4 credits each term. Prerequisites: for Japanese 351, Japanese 252 or placement by instructor during registration period; for Japanese 352, Japanese 351 or placement by instructor during registration period. Not offered 1999–2000.

Training in intermediate to advanced listening and speaking, and continued work on reading and writing. Provides an alternate choice for students who find it difficult to schedule the more intensive Japanese 201/203 and 202/204 into their schedules: MBA students, engineering students, hotel school students, arts college students, and others. Recommended for those with prior background in the language who are weak in the more complex and difficult grammar patterns.

JAPAN 414 Linguistic Structure of Japanese (also Linguistics 404) @
Fall. 4 credits. Prerequisites: Japanese 102 or permission of instructor and Linguistics 101 or equivalent introductory course in linguistics. Offered alternate years. J. Whitman.

Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

JAPAN 551-552 Intermediate Japanese for Business School Students
551, fall; 552, spring. 4 credits each term. Prerequisites: for Japanese 551, Japanese 160, and permission of instructor or placement by instructors during registration period; for Japanese 552, Japanese 551, 102, or placement by instructors during registration. Not offered 1999–2000. Y. Nakashishi-Whitman.

Training in listening, speaking, reading, and writing for students who have already acquired a basic oral proficiency. Course times are arranged to accommodate those in the MBA program, but the material is oriented toward any student. Particularly suited to students who find it difficult to schedule the more intensive 201/203 or 202/204 courses into their schedules.

[FALCON (Full-year Asian Language Concentration)]

Director: R. Sukie, 412 Morrill Hall; FALCON Secretary 414 Morrill Hall, 255-0457.

There are three small interactive classes per day, conducted entirely in Japanese and one lecture conducted in English and Japanese. The interactive classes are conducted by experienced and highly trained native teachers; the lecture is conducted by an expert in Japanese language structure. Two one-
hour sessions in the language lab are required daily. Additional preparation time in the language lab is necessary in the evenings. Exposure to the language exceeds that of any other type of academic settings. The intensive nature of the program allows students to complete their language work in minimal time and undergraduates, including freshmen, to achieve levels of Japanese that are far beyond what is normally achieved in a writing. Formal application must be made to the program prior to beginning of spring term. Students completing this course can move smoothly in the academic year to Japanese 251-252 or 551-552 for part-time work, or continue full time with Japanese 161-162.

JAPAN 161-162 Intensive Japanese (FALCON) 161, fall, 162, spring. 16 credits each term. Prerequisites: for Japanese 161, Japanese 150, or Japanese 102 at Cornell, or placement by FALCON staff prior to beginning of fall term; for Japanese 162, Japanese 161, or placement by FALCON staff prior to beginning of spring term. Students must apply formally to program (see above); application open to all Cornell students and students from other institutions.

(Literature in Japanese

JPLIT 421-422 Directed Readings 421, fall, 422, spring. 2-4 credits. Prerequisite: for JPLIT 421, Japanese 402 or equivalent; for JPLIT 422, Japanese 421 or equivalent. Staff.

JPLIT 612 Seminar in Medieval Genres Spring, 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1999-2000. K. Brazell. This seminar will explore medieval literary genres in terms of the contemporary religious, social, political, and aesthetic discourses. Readings will be in classical and modern Japanese as well as in English.

JPLIT 613 Seminar in Tokugawa Culture and Thought Spring, 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. N. Sakai.

JPLIT 614 Seminar in Modern Japanese Literature (also ComL 695) Fall. 4 credits. Prerequisite: permission of instructor. B. Delary.

How might postmodern debates on language and difference transform our understanding of the project of cross-cultural learning institutionalized in postwar American area studies? Intended as an introductory course for graduate students, this class will emphasize weekly readings of important texts which have grappled with, or attempted to challenge, epistemological assumptions, categories, and processes which informed modern disciplinary knowledge of cultural others. All readings will be done in English, and will attempt to trace the contours of debate over broad theoretical issues whose relevance is by no means confined to the question of area studies. Readings will include texts by Rosi Braidotti, Rey Chow, James Clifford, Jacques Derrida, Gilles Deleuze, William Haver, Luce Irigaray, Alice Jardine, and others.

Graduate-Level Reading Courses

JPLIT 621 Advanced Readings in Pre-Modern Japanese Narrative Literature Fall or spring. 2-4 credits. Prerequisite: permission of instructor. Not offered 1999-2000. K. Brazell.

JPLIT 623 Advanced Readings in Pre-Modern Drama Fall or spring. 2-4 credits. Prerequisite: permission of instructor. Offered alternate years. B. Delary.

The course will consider representations of the body and eroticism in fiction, poetry, film, and theatrical writings from the Taisho through early Showa periods (1912 to the late 1930's). Special attention will be given to writings about the "New Woman" and "Modern Girl," to sexuality in modernist cinematic and literary experiments, and to reciprocal relations between colonial and metropolitan culture. All readings will be done in Japanese.

JPLIT 700 Seminar: Reading of Historical Materials, Japanese imperial nationalism and its literature Spring. 4 credits. N. Sakai.

Javanese

JAVA 131-132 Elementary Javanese 131, fall; 132, spring. 3 credits each term. Prerequisite: for Javanese 132, Javanese 131 or equivalent. This language series (131-132) cannot be used to satisfy the language requirement. Not offered 1999-2000. J. Wolff and staff.

An elementary language course for those who have had no previous experience in the language.

JAVA 133-134 Continuing Javanese 133, fall; 134, spring. 3 credits each term. Prerequisites: for Javanese 133, Javanese 132 or equivalent; for Javanese 134, Javanese 133 or equivalent. Satisfactory completion of Javanese 134 fulfills the qualification portion of the language requirement. Not offered 1999-2000. J. Wolff and staff.

An intermediate conversation and reading course.

JAVA 203-204 Directed Individual Study 203, fall; 204, spring. 3 credits. Prerequisite: Javanese 134 or equivalent. Not offered 1999-2000. J. Wolff and staff.

This is a practical language course on an intermediate level in which the students will work through readings and conversations under the guidance of a native speaker for three contact hours a week.)
This course is for students who have spoken some Korean in the home, but whose reading and writing skills are limited or nonexistent. If in doubt about eligibility, see instructor.

**KOREA 201-202 Intermediate Korean**
- Fall, 201; spring, 202. 4 credits each term.
- Prerequisites: for Korean 201, Korean 102 or permission of instructor; for Korean 202, Korean 201. Satisfactory completion of Korean 201 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.
- Covers the basics of speaking, reading, and writing at the intermediate level. Introduces some reading and writing with Chinese characters.

**KOREA 209-210 Intermediate Reading**
- Fall, 209; spring, 210. 4 credits each term.
- Prerequisites: for Korean 209, Korean 110 or permission of instructor; for Korean 210, Korean 209 or permission of instructor. Satisfactory completion of Korean 209 fulfills the proficiency portion of the language requirement. H. Diffloth and staff.
- An intermediate level of reading comprehension and writing course for students who have acquired basic oral proficiency. Introduces some reading and writing with Chinese characters. If in doubt about eligibility, see instructor.

**KOREA 300 Directed Studies**
- Fall or spring. 1-4 credits variable.
- Prerequisite: permission of instructor. H. Diffloth.
- Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**KOREA 301-302 Advanced Korean**
- Fall, 301; spring, 302. 4 credits each term.
- Continuing instruction in spoken and written Korean, emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

**NEPAL 101-102 Elementary Nepali**
- Fall, 101; spring, 102. 6 credits each term.
- Prerequisites: for Nepali 102, Nepali 101 or examination. S. Oja.
- Intended for beginners. Offered alternate years. S. Oja.
- Emphasis will be on the spoken language, in dialogues, exercises, and conversation practice. In addition, however, special attention is given to assisting students to develop vocabularies and abilities appropriate to their unique professional needs. Reading and writing practice use both colloquial and scholarly materials in the Nepali (Devanagari) script.

**NEPAL 201-202 Intermediate Nepali Conversation**
- Fall, 201; spring, 202. 3 credits each term.
- Prerequisites: for Nepali 201, Nepali 102 or examination; for Nepali 202, Nepali 201 or examination. S. Oja.
- Intermediate instruction in spoken grammar and verbal comprehension skills, with special attention to developing technical vocabularies and other verbal skills appropriate to students' professional fields.

**NEPAL 203-204 Intermediate Nepali Composition**
- Fall, 203; spring, 204. 3 credits each term.
- Prerequisites: for Nepali 203, Nepali 202 or examination; for Nepali 204, Nepali 203 or examination. S. Oja.
- A systematic review of written grammar and reading comprehension, with special attention to the technical vocabularies, necessary writing skills, and published materials typical of advanced students' professional fields.

**NEPAL 300 Directed Studies**
- Fall or spring. 1-4 credits variable.
- Prerequisite: permission of instructor. S. Oja.
- Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.
NEPAL 301-302 Advanced Nepali
301, fall; 302, spring. 3 credits each term.
Prerequisite: Nepali 204 or permission of instructor. S. Oja.
Reading of advanced texts, together with advanced drill on the spoken language.

PALI
See also courses listed in this section under South Asian Languages.

(PALI 131-132 Elementary Pali)
131, fall; 152, spring. 3 credits each term. This language series cannot be used to satisfy the language requirement. Not offered 1999-2000. J. Gair.
131 is an introduction to the language of the canonical texts of Theravada Buddhism. Reading of authentic texts of Theravada Buddhism. Emphasis on both content and grammatical structure. Familiarity with Sanskrit is not required. 132 is a continuation of 131 with further readings.

PALI 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. J. Gair.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Sanskrit

SANSK 131-132 Elementary Sanskrit (also Classics 131-132 and Linguistics 131-132)
131, fall; 132, spring; 132, spring; staff. 4 credits each term.
An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.

[SANSK 251-252 Intermediate Sanskrit (also Classics 251-252 and Linguistics 251-252)]
251, fall; 252, spring. 3 credits each term. Prerequisite: Sanskrit 132 or equivalent. Not offered 1999-2000. A. Nussbaum, fall; C. Minkowski, spring.
Readings from the literature of classical Sanskrit. Fall: selections from the two Sanskrit epics, the Mahabharata and the Ramayana. Spring: more selections from the epics and selections from either Sanskrit story literature or from Sanskrit dramas.

Literature in Sanskrit

[SNLIT 467-468 Reading in Sanskrit Literature: The Vedas @]
Spring. 3 credits. Prerequisite: permission of instructor. Not offered 1999-2000. C. Minkowski.

Sinhala (Sinhalese)

SINHA 101-102 Elementary Sinhala
101, fall; 102, spring. 6 credits each term. Prerequisite: for Sinhala 102, Sinhala 101 or equivalent. Staff.
A semi-intensive course for beginners. A thorough grounding is given in all the language skills; listening, speaking, reading, and writing.

SINHA 160 Intensive Sinhala
Summer only. 10 credits. Intended for beginners. Offered alternate years. Emphasis is on the spoken (colloquial) language, the writing system is introduced and used to present all Sinhala materials, with additional reading practice with colloquial materials. A foundation is laid for later study of the written language (literary Sinhala).

SINHA 201-202 Intermediate Sinhala Reading @
201, fall; 202, spring. 3 credits each term. Prerequisites: for Sinhala 201, Sinhala 102; for Sinhala 202, Sinhala 201 or equivalent. Staff.

[SINHA 203-204 Intermediate Composition and Conversation @]
203, fall; 204, spring. 3 credits each term. Prerequisites: for Sinhala 203, Sinhala 102 or permission of instructor; for Sinhala 204, Sinhala 203 or equivalent. Not offered 1999-2000. Staff.

SINHA 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

[LING 341 India as a Linguistic Area (also Linguistics 341)]
A basic introduction to the linguistic and sociolinguistic character of the subcontinent, with special attention to cross-linguistic family influences and convergence.

[LING 440 Dravidian Structures (also Linguistics 440)]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999-2000. J. W. Gair.
A comparative and contrastive analysis of the structures of several Dravidian languages.

[LING 442 Indo-Aryan Structures (also Linguistics 442)]
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999-2000. J. W. Gair.
Typological discussion of the languages of the subfamily. Specific topics and emphasis may vary depending on the interest of the student.

Southeast Asian Languages

[LING 230 Introduction to Southeast Asian Languages and Linguistics]
Fall. 3-4 credits variable. Prerequisite: for non-majors or majors. Not offered 1999-2000. A. Cohn, J. Wolff.
This is a survey of the languages of Southeast Asia. The goal of this course is to expose students to Southeast Asia as a linguistic area and introduce them to the rich language diversity of the region. It includes three main parts: 1) sociolinguistic and ethnolinguistic issues of language and politics, language and culture, and language use; 2) language structures and typological patterns of the area's languages; 3) historical linguistics, as well as the linguistic effects of language contact and linguistic evidence for prehistory.

[LING 653-654 Seminar in Southeast Asian Linguistics]
653, fall; 654, spring. 4 credits each term. Prerequisite: permission of instructor. Language 653 isn't a prerequisite for Language 654. Not offered 1999-2000. Staff.
Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.

[LING 655-656 Seminar in Austronesian Linguistics (also Linguistics 655-656)]
655, fall; 656, spring. 4 credits each term. Prerequisites: for 655, permission of instructor, for 656, Language 655. Not offered 1999-2000. J. Wolff.
Descriptive and comparative studies of Malayo-Polynesian languages.

[LING 657-658 Seminar in Austroasiatic Linguistics (also Linguistics 657-658)]
657, fall; 658, spring. 4 credits each term. Prerequisite: permission of instructor. Not offered 1999-2000. Staff.
Descriptive and comparative studies of Austroasiatic languages.

Tagalog

TAG 121-122 Elementary Tagalog
121, fall; 122, spring. 4 credits each term. Prerequisite: for Tagalog 122, Tagalog 121. Staff.
A thorough grounding is given in basic speaking and listening skills with an introduction to reading.

(TAG 123 Continuing Tagalog)
Fall. 4 credits. Prerequisite: Tagalog 122 or equivalent. Satisfactory completion of Tagalog 123 fulfills the qualification portion of the language requirement. Not offered 1999-2000. J. Wolff and staff. Improves speaking skills, such as fluency and pronunciation, focusing on verbal communication skills; offers a wide range of readings; and sharpens listening skills.

TAG 205-206 Intermediate Tagalog @
205, fall; 206, spring. 3 credits each term. Prerequisites: for Tagalog 205, Tagalog 123 or equivalent; for Tagalog 206, Tagalog 205 or equivalent. Satisfactory completion of Tagalog 205 fulfills the proficiency portion of the language requirement. Staff.
This course develops all four skills: reading, writing, speaking, and comprehension.

TAG 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Thai

THAI 101-102 Elementary Thai
101, fall; 102, spring. 6 credits each term. Prerequisite: for Thai 102, Thai 101 or equivalent. Intended for beginners or students placed by examination. N. Jagacinski.
A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

**THAI 201-202 Intermediate Thai Reading**
- Fall, 201; Spring, 202. 3 credits each term.
  - Prerequisites: for Thai 201, Thai 102; for Thai 202, Thai 201 or equivalent.
  - N. Jagacinski.

**THAI 203-204 Intermediate Composition and Conversation @**
- Fall, 203; Spring, 204. 3 credits each term.
  - Prerequisites: for Thai 203, Thai 102; for Thai 204, Thai 203.
  - N. Jagacinski.

**THAI 301-302 Advanced Thai @**
- 301, Fall; 302, Spring. 4 credits each term.
  - Prerequisite: Thai 202 or equivalent.
  - N. Jagacinski.
  - Selected readings in Thai writings in various fields.

**THAI 300 Directed Studies**
- Fall or Spring. 1-4 credits variable.
  - Prerequisite: permission of instructor.
  - N. Jagacinski.
  - Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**THAI 303-304 Thai Literature**
- 303, Fall; 304, Spring. 4 credits each term.
  - Prerequisite: Thai 302 or equivalent.
  - N. Jagacinski.
  - Reading of significant novels, short stories, and poetry written since 1850.

**THAI 401-402 Directed Individual Study**
- 401, Fall; 402, Spring. 4 credits each term.
  - For advanced students or students with special problems or interests.
  - Prerequisite: permission of instructor. N. Jagacinski.

**Urdu**
- See listings under Hindi.

**Vietnamese**

**VIET 101-102 Elementary Vietnamese**
- 101, Fall; 102, Spring. 6 credits each term.
  - Prerequisite: for Vietnamese 102, Vietnamese 101 or equivalent. Intended for beginners or students placed by examination. Satisfactory completion of Vietnamese 102 fulfills the qualification portion of the language requirement.
  - T. Tranviet.
  - A thorough grounding is given in all language skills: listening, speaking, reading, and writing.

**VIET 201-202 Intermediate Vietnamese**
- 201, Fall; 202, Spring. 3 credits each term.
  - Prerequisites: for Vietnamese 201, Vietnamese 102 or equivalent; for Vietnamese 202, Vietnamese 201.
  - T. Tranviet.
  - Continuing instruction in spoken and written Vietnamese.

**VIET 203-204 Intermediate Vietnamese Composition and Reading @**
- 203, Fall; 204, Spring. 3 credits each term.
  - Prerequisite: permission of instructor only.
  - T. Tranviet.
  - Designed for students and “native” speakers of Vietnamese whose speaking and listening are at the advanced level, but who still need to improve writing and reading skills.

**VIET 300 Directed Studies**
- Fall or Spring. 1-4 credits variable.
  - Prerequisite: permission of instructor.
  - T. Tranviet.
  - Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**VIET 301-302 Advanced Vietnamese @**
- 301, Fall or Spring; 302, Fall or Spring. 3 credits each term.
  - Prerequisites: for Vietnamese 301, Vietnamese 202 or permission of instructor; for Vietnamese 302, Vietnamese 301.
  - T. Tranviet.
  - Continuing instruction in spoken and written Vietnamese; emphasis on enlarging vocabulary, increasing reading speed, and reading various genres and styles of prose.

**VIET 401-402 Directed Individual Study**
- 401, Fall; 402, Spring. 2-4 credits variable each term.
  - Prerequisite: permission of instructor. Intended for advanced students. T. Tranviet.
  - Various topics according to need.

**[VTLIT 222-223 Introduction to Classical Vietnamese @]**
- 222, Fall; 223, Spring. 3 credits. Prerequisite: qualification in Vietnamese or permission of instructor. Not offered 1999-2000. K. Taylor.
  - This is the first semester of a two-semester sequence of courses introducing students to Han (Classical Chinese as used in the Vietnamese language) and Nom (vernacular Vietnamese character writing). Students will learn to read Han and Nom texts, mostly from the 17th through 19th centuries, including historical records, prose writings, and poetry.

**[VTLIT 224 Continuing Classical Vietnamese @]**
- Fall. 5 credits. K. Taylor.
  - This course continues study for students who have completed VTLIT 222-223 "Introduction to Classical Vietnamese."

**Related Courses in Other Departments and Colleges**
- Check the primary department section for the offering status of the following courses. Courses in other colleges will count as College offering status of the following courses.

ASTRONOMY

Cornell's astronomy faculty, research staff, and graduate students is active in diverse areas of modern astronomy, ranging from theoretical astrophysics and general relativity to radio and radar astronomy, infrared and optical astronomy, and the exploration of the solar system. Cornell operates two local optical observatories, the 200-inch optical telescope at Arecibo, Puerto Rico, and with two other institutions, the 200-inch optical telescope at Mt. Palomar in California. The department faculty are also Principal Investigators on several major NASA space and planetary exploration missions.

The department offers a number of courses to satisfy a general interest in astronomy. These courses have few or no prerequisites and are not intended for the training of professional astronomers. Among the introductory courses, several choices are available, depending on background and on the requirements to be fulfilled. The 100-level courses are designed primarily for non-science majors. The alternative introductory sequence Astronomy 231-232 is geared toward sophomore physical science and engineering majors and requires coregistration in beginning calculus. Astronomy 201 and 202 are intended for students with an interest in astronomy but no scientific background; they are intended for students with an interest in astronomy and physics, or other appropriate courses at or above the 300 level. Advanced seniors can enroll in astronomy graduate courses with the consent of the instructor. Students are also encouraged to work with faculty members on independent study projects or to pursue an independent major under the program in the Science of Earth Systems. In addition, majors are also encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level.

Students interested in planetary studies may substitute one or more appropriate advanced courses upon consent of the major adviser or may pursue an independent major under the major requirements stress the importance of building a strong preparation in physical science. The following upper level courses are normally required:

Mathematics 314 or 318, 316, 323 or 327, 341 and 443

Astronomy 410, 431, and 452

The Major
The purpose of the major in astronomy is to provide in-depth knowledge and education about the nature of the universe. Astronomy relies heavily on preparation in physics and mathematics. Consequently, many courses in these fields are included as prerequisites. In preparation for the major, a student would normally elect the introductory physics sequence Physics 112-213-214 or 116-217-218 and the complementary pathway in mathematics, Mathematics 111-122-211-222 or 191-293-294 (or equivalent). Students who anticipate undertaking graduate study are urged to elect the honors physics sequence Physics 116-217-218-318-327 if possible. The sophomore seminar, Astronomy 233 "Topics in Astronomy and Astrophysics," will provide an introduction to current research in astronomy and astrophysics for prospective majors, but is not required of students who elect to major in astronomy after the sophomore year. Students are also urged to acquire computer literacy. Acceptance to the major will first be considered after completion of three semesters of introductory physics and mathematics and in general will require a GPA of 3.20 in physics and mathematics courses.

The major requirements stress the importance of building a strong preparation in physical science. The following upper level courses are normally required:

Students interested in planetary studies may substitute one or more appropriate advanced courses upon consent of the major adviser or may pursue an independent major under the program in the Science of Earth Systems. In addition, majors are also encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level.

Advanced seniors can enroll in astronomy graduate courses with the consent of the instructor. Students are also encouraged to work with faculty members on independent study projects or to pursue an independent major under the program in the Science of Earth Systems. In addition, majors are also encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level.

Students interested in planetary studies may substitute one or more appropriate advanced courses upon consent of the major adviser or may pursue an independent major under the program in the Science of Earth Systems. In addition, majors are also encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level.

In addition, majors are also encouraged to supplement the above courses with any astronomy, physics, or other appropriate courses at or above the 300 level.
All courses in astronomy, except Astronomy 233, may be used to fulfill the science distribution requirement in the Colleges of Arts and Sciences.

Courses

ASTRO 101 The Nature of the Universe
Fall. 4 credits. No prerequisites. Labs and discussions limited to 30 students each. T. Herter, labs: J. Bell.
This course introduces students to the cosmos. The birth, evolution, and death of stars, the formation of the chemical elements, and the nature of white dwarfs, neutron stars, and black holes are discussed. An introduction to the theories of special relativity and general relativity is given. The course covers the search for other worlds outside the solar system and the possible existence of life and intelligence elsewhere in the universe. Modern theories of cosmology are presented, and the origin, structure, and fate of the universe are discussed. The full notes for the course as well as sample exams and simulations are made available on the web.

ASTRO 102 Our Solar System
Spring. 4 credits. No prerequisites. Labs and discussions limited to 30 students each. J. Veverka, labs: J. Bell.
A survey of the current state and past evolution of our solar system, with emphasis on results from the direct exploration of planets by spacecraft. The course is divided into four parts: theories of formation; the inner planets; the outer solar system; and the search for life in the solar system and elsewhere. Stress is placed on the important processes that have shaped the evolution of planets and satellites.

ASTRO 103 The Nature of the Universe
Fall. 3 credits. Identical to Astronomy 101 except for omission of the laboratory (see description above).

ASTRO 104 Our Solar System
Spring. 3 credits. Identical to Astronomy 102 except for omission of the laboratory (see description above).

ASTRO 105 An Introduction to the Universe
Summer. 3 credits. Identical to Astronomy 105 except for the addition of the afternoon laboratory.

ASTRO 106 Essential Ideas in Relativity and Cosmology
Summer. 3 credits. Prerequisites: high school algebra and trigonometry. Einstein’s theories of special and general relativity, world views, a broad concept about a fundamental change in our conceptual understanding of space and time, will be studied. Correspondence to, and conflicts with, common sense will be pointed out. Applications to various areas will be studied: in special relativity—space travel, equivalence of mass and energy, nuclear fission and fusion, and thermonuclear processes in the sun; in general relativity—motion of light and particles in curved spacetime, cosmological models, and the question of whether the universe is open or closed.

ASTRO 107 An Introduction to the Universe
Summer. 4 credits. Identical to Astronomy 105 except for the addition of the afternoon laboratory.

ASTRO 108 Freshman Writing Seminar: Questions in Astronomy
Spring. 3 credits. Not offered 1999-2000. This class, an introduction to critical, logical thought, will present the basics of the scientific method, how science works in practice, and scientific standards of evidence. We will discuss the evolution of repeatable data into natural law and ideas into accepted theories. Historical illustrations will be drawn from the Copernican Revolution, the Big Bang Theory, and the search for Extraterrestrial Intelligence. We will also examine pseudosciences such as astrology and ufology, compare them to their scientific counterparts, and demonstrate that they consistently fail to meet rigorous standards. Students will be asked to write logical criticism of items in the news and assigned readings from Carl Sagan’s Demon-Haunted World and James Burke’s “Connections,” and design and report on their own small scientific experiments.

ASTRO 195 Observational Astronomy
Fall. 3 credits. Limited to 20 students. T. Stacey.
This course provides a "hands-on" introduction to observational astronomy intended for liberal arts students at the freshman and sophomore level. High school mathematics is assumed, but there are no formal prerequisites. The course objective is to teach how we know what we know about the Universe. The course is set up with 2 lectures and 1 evening laboratory per week. Not all of the evening sessions will be "laboratories." Some evening sessions will be "astronomy" classes, but exercise work will be done in the form of homework exercises. Students will also work in small groups to design and build telescopes, and observe with them. The emphasis will be on learning about the night sky from the ancient Greeks to the Hubble Space Telescope available on the World Wide Web.

ASTRO 201 Our Home in the Universe
Fall. 3 credits. Freshman Writing Seminar: Course intended for freshmen and sophomores. T. Herter, labs: J. Bell.
This writing course is designed to develop an understanding of our home planet as a member of a diverse and fascinating family of objects in our solar system. Discussion will center on how our studies of other planets and satellites have broadened our knowledge and perspective of Earth, and vice versa. We will study, debate, and learn to write critically about important issues of science, ethics, and public policy that have emerged from this new found perspective. Topics to be discussed include global warming, nuclear winter, the impact threat, and the searches for extraterrestrial life. Our exploration of these and other topics will be up-to-date, interactive, and possibly controversial.

ASTRO 202 Our Home in the Solar System
Spring. 3 credits. Prerequisite: some background in science is required. Course intended for freshmen and sophomores. J. Bell.

ASTRO 211 Astronomy: Stars, Galaxies, and Cosmology
Fall. 4 credits. Intended for engineering and physical sciences freshmen and sophomores. Prerequisite: introductory calculus or co-registration in Mathematics 111 or 191. J. Houck.
The formation and evolution of normal stars, supernovae, pulsars, and black holes. The interstellar medium. Cosmology and the structure and evolution of galaxies.

ASTRO 212 The Solar System: Planets, Satellites, and Rings
Spring. 4 credits. Intended for first and second year engineering and physical sciences students. Prerequisite: introductory calculus or co-registration in Mathematics 111 or 191; some knowledge of classical physics (mechanics and thermodynamics). P. Nicholson, D. Campbell.

ASTRO 213astrophysics
Fall. 2 credits. Prerequisites: Physics 112 or 116 and 213 or 217; Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 214 Our Home in the Universe
Fall. 2 credits. Prerequisites: Physics 112 or 116 and 213 or 217; Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 215 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 216 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 217 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 218 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 219 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 220 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 221 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 222 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 223 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 224 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 225 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 226 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 227 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 228 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 229 Introduction to the Physical Universe
Spring. 2 credits. Prerequisites: Physics 112 or 116, Mathematics 112, 122, or 192, or permission of instructor.
Intended for sophomores planning to major in astronomy or related fields.

ASTRO 230 Space Exploration
Spring. 3 credits. S. Squyres.
This course provides an overview of space science, with particular emphasis on the solar system, and a detailed examination of a few selected objects, including the planet Mars, the
satellites in the outer solar system, and comets. The focus is on methods of collecting information and especially on spacecraft and space missions. Topics will include the design and limitations of instruments. Ethical and political questions associated with space exploration will be discussed. Intended for students with an interest in science, technology, and associated policy issues. No special background in physical sciences, math, or engineering is assumed.

ASTRO 290 Relativity and Astrophysics
Spring. 4 credits. Prerequisites: knowledge of freshman physics, calculus, and geometry. J. Wasserman. This course provides a geometrically based introduction to special and general relativity, followed by consideration of astrophysical applications. Included will be discussion of tests of Einstein's theory of space, time, and gravitation, physics of white dwarfs, neutron stars, and black holes, introduction to modern cosmology.

ASTRO 299 Search For Life in the Universe
Spring. 4 credits. Prerequisites: two courses in any physical science subject or permission of instructor. J. Cordes, S. Eikenberry. The contents of the universe will be surveyed. Theories of cosmic and stellar evolution, and of the formation and evolution of planetary systems, planetary atmospheres and surfaces will be reviewed. Questions regarding the evolution of life and the development of technology will be discussed. Methods to detect extraterrestrial life with emphasis on radio telescopes and associated instrumentation will be presented. Hypothetical communication systems will be developed and discussed.

ASTRO 331 Climate Dynamics (also SCAS 331)
Spring. 4 credits. Prerequisites: Math 112, 122, or equivalent; Physics 213 or 217; R. Giovanelli, G. Stacey. An introduction to astronomy, with emphasis on the application of physics to the study of the universe. Physical laws of radiation. Distance, size, mass, and age of stars, galaxies, and the universe; stellar evolution and nucleosynthesis. Supernovae, pulsars, and black holes. Galaxies and quasars. Introduction to cosmology. The structure and evolution of planets and of the solar system. Mainly intended for students of science, engineering and science education, interested in astronomy and astrophysics.

ASTRO 410 Experimental Astronomy
Fall. 4 credits. Prerequisites: Physics 214/8 (or 310 or 360), Physics 523/7 (or co-registration) or permission of instructor. J. Cordes, J. Holsclaw, and D. Campbell. Observational astrophysics. Major experiments will involve techniques in CCD (charge-coupled-device) imaging, optical photometry, optical spectroscopy, radiometry, radio spectroscopy and radio astronomy. The experiments involve use of the Hartung-Boothroyd Observatory's 24-inch telescope, a laboratory 2-element radio interferometer, and a radio telescope mounted on top of the Space Sciences Building. The laboratory covers the fundamentals of using astronomical instrumentation and data analysis as applied to celestial phenomena: asteroids, supernova remnants, globular clusters, planetary nebulae, the interstellar medium, OH masers, and galaxies.

ASTRO 431 Introduction to Astrophysics and Space Sciences I
Fall. 4 credits. Prerequisites: mathematics above the 200 level; Physics 443 is recommended. A. Lai. A systematic development of modern astrophysical concepts for physical science majors. Stellar structure and evolution, stellar atmospheres, compact objects (white dwarf, neutron star and black hole), planets and brown dwarfs. Current research problems in these areas will be introduced along the way. The emphasis will be on using fundamental physics principles to explain the astronomical phenomena. A variety of physics, including elements of general relativity, nuclear physics, sold state physics and fluid mechanics, will be introduced or reviewed in a quick, practical fashion and put into use in solving astrophysics puzzles. At the level of Astrophysical Concepts by Harwit.

ASTRO 432 Introduction to Astrophysics and Space Sciences II
Spring. 4 credits. Prerequisite: Astronomy 431 or permission of instructor. D. Chernoff. This course is divided into two broad topics: the astrophysics of the interstellar medium and cosmology. The interstellar medium section will cover thermal equilibrium and radiative transport in HII regions, atomic gas regions, and molecular clouds. The cosmology section will include expansion of the universe, metrics, Friedmann equations, dark matter, cosmological tests, the early universe, and the cosmological production of the elements.

ASTRO 434 The Evolution of Planets
Spring. 4 credits. Not offered 1999–2000. An introduction to the physical and chemical processes that have been active in altering the environments of planets and satellites from their original to their present state. Theories of the formation of the solar system are revealed with special emphasis on chemical differentiation of the primeval solar nebula. A critical assessment is made of how well the various theories account for the clues left in the meteorite record and how well they explain the current environments of the planets and satellites. The main ideas about the formation and evolution of terrestrial planets, satellite systems, and asteroids are considered in detail. Some specific topics included are the history of the earth-moon system, the probable evolution of Jupiter's Galilean satellites, and the comparative histories of Venus, Earth, and Mars.

ASTRO 440 Independent Study in Astronomy
Fall or spring. 2–4 credits. Prerequisite: permission of instructor. Recommended: familiarity with the topics covered in Astronomy 332, 431, or 434. Individuals work on selected topics. A program of study is devised by the student and instructor. Students need to fill out an independent study form, have it signed by the instructor, and register in the department office, 510 Space Sciences Building.

ASTRO 485 Atmospheric and Ionospheric Physics (also ELE E 485)
Fall. 5 credits. Prerequisites: Physics through 214 or equivalent, introductory chemistry, introductory differential equations. Not offered 1999–2000. Staff. The structure and dynamics of the middle atmosphere and the ionosphere are surveyed. Topics include energy balance and thermal structure, global circulation patterns, waves that carry energy from the lower atmosphere to the upper atmosphere, ionization, production and loss of charged particles, coupling of the neutral atmosphere with electric fields, and charged particle transports. Observation techniques, including radar and in situ instruments, will be discussed. Comparisons with other planets will be made.

ASTRO 490 Senior Seminar Critical Thinking
Spring. 3 credits. Not offered 1999–2000. Critical thinking in scientific and nonscientific contexts. Topics will include elements of classical logic and rhetoric, including standards of evidence. Case studies will include examples of competing hypotheses in the history of science, as well as examples from borderline science and medicine, religion, and politics. Stress will be laid on creative generation of alternative hypotheses and their winnowing by critical scrutiny. Topics will include the nature and history of the universe, the nature of reality, the possibilities of life on other planets, and artificial intelligence.

ASTRO 509 General Relativity
Fall. 4 credits. Not offered 1999–2000. For description, see PHYS 553.

ASTRO 510 Applications of General Relativity
Spring. 4 credits. Not offered 1999–2000. For description, see PHYS 554.

ASTRO 511 Physics of Black Holes, White Dwarfs, and Neutron Stars (also Physics 525)

ASTRO 516 Galactic Structure and Stellar Dynamics
Fall. 4 credits. Not offered 1999–2000. This course is an introduction to the study of the structure of galaxies using both modern physics. Topics include the observed kinematics and spatial distribution of stars in the vicinity of the Sun, shapes and properties of stellar orbits, the gravitational N-body problem, collisional relaxation in stellar systems, spiral structure, galaxy classification and evolution, and cosmological results in galaxy formation.
ASTRO 520 Radio Astronomy
Fall. 4 credits. D. Campbell, J. Cordes.
Radio astronomy: telescopes, electronics; antenna theory; observing procedures and data analysis; concepts of interferometry and aperture synthesis.

ASTRO 523 Signal Modeling, Statistical Inference, and Data Mining in Astronomy
Spring. 4 credits. Not offered 1999–2000. The course aims to provide tools for modeling and detection of various kinds of signals encountered in the physical sciences. Data modeling and statistical inference from large and diverse databases will be covered. Experimental design is to be discussed. Basic topics covered include: probability theory; Fourier analysis of continuous and discrete signals; digital filtering, matched filtering and pattern recognition; spectral analysis; Karhunen-Loève analysis; wavelets; parameter estimation; optimization techniques; Bayesian statistical inference; deterministic, chaotic, and stochastic processes; image formation and analysis; and maximum entropy techniques. Specific applications will be chosen from current areas of interest in astronomy, where large-scale surveys throughout the electromagnetic spectrum and using non-electromagnetic signals (e.g., neutrinos and gravitational waves) are currently conducted. Applications will also be chosen from topics in geophysics, plasma physics, electronics, artificial intelligence, expert systems, and genetic programming. The course will be self-contained and is intended for students with thorough backgrounds in the physical sciences or engineering.

ASTRO 525 Techniques of Optical/Infrared and Submillimeter Astronomy
Spring. 4 credits. T. Herter, G. Stacey. Optical/Infrared and submillimeter telescopes and instrumentation will be discussed and related to current research in these fields. The course includes telescope design and general optical design (ray tracing). CCD, photodetector, bolometer, impurity band conduction, and heterodyne detection systems are presented. The instrumentation discussion includes general instrument design and specific applications to cameras, spectrographs, and interferometers. Detection limits of various systems, cryogenic techniques, and astronomical data analysis techniques are also discussed. Special topics include speckle interferometry and adaptive optics.

ASTRO 530 Astrophysical Processes
Spring. 4 credits. R. Giovanelli, M. Haynes. Thermal and nonthermal radiation processes encountered in studies of stars, the interstellar and intergalactic media, galaxies and quasars. Fundamentals of radiative transfer, bremsstrahlung, synchrotron radiation, and Compton scattering will be covered, as well as spectral line transfer, gas heating and cooling, and topics in atomic and molecular spectroscopy. These topics will be discussed within the framework of astrophysical situations, such as star formation, interstellar gas and dust clouds, jets, active galactic nuclei, clusters of galaxies and cosmology.

ASTRO 555 Theory of the Interstellar Medium

ASTRO 560 Theory of Stellar Structure and Evolution (also Physics 667)
Fall. 4 credits. The role of shock waves and energetic outflows in the thermal equilibrium and ionization state of gas in the galaxy. Basic astrophysical fluids and plasmas. Galactic dynamics. Observational techniques, current problems and results.

ASTRO 570 Planets of the Solar System
Fall. 4 credits. P. Nicholson. An introductory survey of planetary science with an emphasis on the application of physical principles. Planetary dynamics, including satellite orbits, tidal interactions, resonances, and tides. The rotation and magnetic fields of planets, and the origin of the solar system. Stellar seismology. Dwarf planets, pre-main sequence contraction.

ASTRO 571 Mechanics of the Solar System (also Theoretical and Applied Mechanics 673)

ASTRO 579 Celestial Mechanics
Fall. 3 credits. Not offered 1999–2000. For description, see T&M 672.

ASTRO 590 Galaxies and the Universe

ASTRO 599 Cosmology (also Physics 599)
Fall. 4 credits. Prerequisites: statistical physics, quantum mechanics and electromagnetic theory. 1. Wasserman. This course is intended to provide a detailed theoretical development of current ideas in cosmology. Topics include: An observational overview; growth of irregularities, galaxy formation and clustering, big bang cosmology, recombination, nucleosynthesis; very early universe; symmetry breaking, inflationary scenarios. At the level of Peebles, Principles of Physical Cosmology.

ASTRO 620 Seminar: Advanced Radio Astronomy
Spring. 2 credits. Prerequisites: some background in extragalactic astronomy and/or radio astronomy suggested. Open to advanced undergraduates by permission of the instructor. Selected topics in observational cosmology at radio wavelengths including: redshift surveys, gas stripping mechanisms, rotation curves and the distributions of mass and light, large scale structure, peculiar motions, atomic and molecular studies at high redshift, the Sunyaev-Zel’dovich effect, evolution of radio luminosity function, and the cosmic microwave background.

ASTRO 621 Seminar: Planetary Radar Astronomy
Spring. 3 credits. Prerequisites: intended for graduate students and upper-level undergraduates in astronomy, engineering, and geology. A good background in undergraduate mathematics and physics is required. Not offered 1999–2000. The application of radar to the study of the surfaces of planets, planetary satellites, asteroids, and comets. Topics covered will be target detectability and the specification of the needed antennas, transmitters, and receiving systems; data processing techniques, imaging techniques including delay-Doppler imaging, synthetic aperture radar (SAR) and interferometric SAR; target characterization from cross section, scattering laws and polarization measurements, remote sensing and spacecraft radar observations of Mercury, Earth, the Moon, Mars, the satellites of Jupiter, the rings of Saturn, asteroids, and comets.

ASTRO 640 Advanced Study and Research
Fall or spring. Credit to be arranged. Guided reading and seminars on topics not currently covered. Students need to register in the department office, 510 Space Sciences Building.

ASTRO 652 Advanced Atmospheric Dynamics (also SCAS 652)
Fall. 3 credits. Offered alternate years. Not offered 1999–2000. For description, see SCAS 652.

ASTRO 660 Cosmic Electrodynamics (also Applied and Engineering Physics 608)

ASTRO 671 Seminar: Planetary Science
Fall. 3 credits. J. Veverka. An informal series of lectures discussing the techniques used to obtain and interpret spacecraft and earth-based remote sensing data to the planets, satellites and smaller bodies in the solar system. Intended for graduate students and seniors. The emphasis this year will be on the continuing exploration of Io, Jupiter’s volcanically active moon.

ASTRO 673 Seminar: Planetary Atmospheres
Spring. 2 credits. Not offered 1999–2000. This course will deal with motions in planetary atmospheres. Among the topics to be discussed are the Venus general circulation, dust and water transports on Mars, alternating jets on the outer planets, and compositional layering in the outer planets.
The major in biological sciences at Cornell is designed to enable students to acquire the foundations in physical and life sciences necessary to understand modern biology and to pursue advanced studies in a specific area of biology. Programs of study include animal physiology, biochemistry, cell biology, ecology and evolutionary biology, general biology, genetics and development, microbiology, neurobiology and behavior, systemsatics and biotic diversity, and plant biology. A special program of study is available for qualified students with an interest in nutrition. Students interested in the marine sciences may consult the Cornell Marine Programs Office (G14 Stimson Hall, 255-3717) for academic advice and career counseling. For more details about the biology curriculum, see the section in this catalog on Biological Sciences.

### BIOLOGY AND SOCIETY MAJOR

See under Special Programs and Interdisciplinary Studies.

### BURMESE

See Department of Asian Studies.

### CAMBODIAN

See Department of Asian Studies.

### CHEMISTRY AND CHEMICAL BIOLOGY

S. T. Marcus, associate director of undergraduate studies

The chemistry department offers a full range of courses in physical, organic, inorganic, analytical, theoretical, bioorganic, and biophysical chemistry. In addition to their teaching interests, chemistry faculty members have active research programs. The link between teaching and research is a vital one in a continuously evolving scientific subject; it ensures that students will be provided with the most advanced information and perspectives, and affords opportunities for students to participate in research.

### THE STANDARD MAJOR

The chemistry major at Cornell provides a great deal of flexibility and prepares students for a large variety of career options. In recent years, chemistry majors have gone on to graduate study in chemistry, medicine, law, and business management, as well as directly into positions with chemical, pharmaceutical, and other industrial companies. A major in chemistry can also provide the basis for work in related areas such as molecular biology, chemical physics, geochronology, chemical engineering, materials science, solid-state physics, and secondary education. The required courses for the major can be completed in three years, leaving the senior year open for advanced work and independent work under the supervision of a professor.

The courses are arranged as a progression, with some (including mathematics and physics) prerequisite to those that are more advanced. During the first year, a student should normally register for general chemistry (preferably Chemistry 206-216 although Chemistry 207-208 or 206-208 is acceptable), mathematics, a freshman writing seminar, a foreign language if necessary, or physics. Chemistry 215-216 is aimed at those students with good preparation and a strong interest in chemistry. Students who do not know if their preparation is adequate should consult the instructor. In the second year a student should complete calculus and take physics and organic chemistry (Chemistry 359-360 is preferred to Chemistry 357-358). The second-year laboratory courses include 300, Quantitative Chemistry and 301, Experimental Chemistry I. Chemistry 389-390, Physical Chemistry I and II, and Chemistry 302-303, Experimental Chemistry II should be completed in the third year. Chemistry 410 should be completed in the third or fourth year. Advanced work in chemistry and related subjects can be pursued in the fourth year and in the earlier years as well. The opportunity for independent research is also available. All students with questions about the major are encouraged to consult the chair of the Department of Chemistry and Chemical Biology or the chair's representative. Entering students who are exceptionally well prepared in chemistry may receive advanced placement credit for Chemistry 207.

Prerequisites for admission to a major in chemistry are (1) Chemistry 215-216, 300; or 207-208, 300; or 211, 208, 300; or 206, 208, 300; (2) Physics 207 or 112; and (3) Mathematics 111 or 191. Students are not encouraged to undertake a major in chemistry unless they have passed those prerequisite courses at a good level of proficiency. The minimum additional courses that must be completed for the standard major in chemistry are listed below.

2. Mathematics 112, 213, or 122, 221–222, or 192–293–294
3. Physics 208

Potential majors electing to take Mathematics 213 are strongly urged to do so in their sophomore year to avoid scheduling conflicts with Chemistry 389 in their junior year.

The sequence described above is a basic program in chemistry that students can extend substantially in whatever direction suits their own needs and interests. Those going on to do graduate work in chemistry should recognize that these requirements are minimal and should supplement their programs, where possible, with further courses such as Chemistry 405, 655, 666, 676, 681. Even students not planning graduate work in chemistry should consider advanced work in physics and mathematics, courses in the...
biological sciences, and advanced work in chemistry as possible extensions of the basic program.

Honors. The honors program in chemistry offers superior students in the standard major an opportunity to study independently in seminars and to gain additional experience by engaging in research during the senior year. It is particularly recommended to those who plan graduate work in chemistry. Prospective candidates should complete the introductory organic chemistry and physical chemistry sequences by the end of the junior year, although failure to complete those courses in the junior year does not in itself disqualify a student from the honors program. Completion of the program at a high level of performance leads to the degree of Bachelor of Arts with honors in chemistry. Students will be admitted to the program by invitation of the department, with selection based on a superior cumulative average, including chemistry grades, and good performance in at least 4 credits of research at Cornell. Prospective candidates should discuss their plans with advisers by March 1 of their junior year; participants are notified by early January of their senior year. To be awarded honors, candidates must show outstanding performance in at least 8 credits of undergraduate research such as is offered in Chemistry 421, 433, 461, or 477. In addition, the writing of a thesis in the honors seminar (Chemistry 498) is expected.

The Alternative Major
The alternative major is a flexible program that provides core coverage of chemistry around which students can design a program to meet their own career goals. Requirements consist of a core program along with four additional courses chosen by the student. One of the four must be in chemistry at the 300 level or above; the other three may be in another field but should represent a cohesive plan and must be approved by a departmental committee.

The Core Program for the Alternative Major
1) Chemistry 215-216, 300 (or 207-208, 300; or 211, 208, 300; or 206, 208, 300); 251, 257, 287, 289, and 410 (Chem 357–358 or 359–360) can be substituted for Chem 257, or Chem 389–390 can be substituted for Chem 287, thereby fulfilling the requirement for an additional 300-level chemistry course)
2) Mathematics 111–112, or 111, 122, or 191–192
3) Physics 207–208, or 112, 213

Additional Courses for the Alternative Major
Possible plans for the remaining three courses might include programs in Biochemistry; Biology; Physics; Computer Science; Polymers; Materials Science; Science, Technology, and Society; History and Philosophy of Science and Technology; Business and Management; Economics; Education; and others. Premedical students and those interested in pursuing double majors might find the alternative major attractive. The course requirements for admission to the alternative major are the same as those for the standard major.

Program for Science Teachers
Chemistry majors who wish to become teachers will be interested to know that Cornell University offers a certification program for teachers of secondary (grades 7–12) science. Interested students apply to the program during their junior or senior years. If accepted, students integrate some course work in Education with the rest of their undergraduate studies. All chemistry majors who enter this program will remain in the College of Arts and Sciences to complete the major.

After earning the bachelor's degree, certification students enter the Graduate Field of Education to complete a fifth year of study at Cornell. Following this fifth year, students are eligible for a master's degree from Cornell and a teaching certificate from New York State. Additional information is available from Susie Slack, 424 Kennedy Hall, 255–9255 or Prof. Deborah Trumbull, 426 Kennedy Hall, 255–3100.

Laboratory Course Regulations
Students registered for laboratory courses who do not appear at the first meeting of the laboratory will forfeit their registration in that course.

Students and members of the teaching staff are required to wear safety goggles and lab aprons in all chemistry laboratories. Close-toed footwear is required (no sandals).

Students are reminded to take their goggles and lab aprons to the first laboratory session. Those who fail to cooperate with the safety program will be asked to leave the laboratories.

Students are required to pay for glassware and any other items broken or missing from their laboratory desks at the close of each semester. Students who fail to inventory their desks at the appointed time in the presence of their instructor are charged a $10 fee in addition to charges for any breakage.

Courses
Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

Preliminary examinations for all courses may be given in the evening.

CHEM 105 The Language of Chemistry
Fall. 3 credits. This course contributes to meeting the Core Program requirement as well as satisfying the C.A.L.S. physical science requirement of one course in chemistry. S-U or letter grades. Lec., M W F 1:25. Preims.: 7:30–9 p.m., Feb. 29, March 30. M. A. Hines.

CHEM 207–208 General Chemistry
Fall or summer. 207. 4 credits each term. Recommended for those students who will take further courses in chemistry. Prerequisite for Chemistry 207: high school chemistry. Prerequisite for Chemistry 208: Chemistry 206 or 207. Lecs.: M W F 1:25–4:25. R. C. Fay.

CHEM 207–208 General Chemistry
Spring or summer. 207. 4 credits each term. Recommended for those students who will take further courses in chemistry. Prerequisite for Chemistry 207: high school chemistry. Prerequisite for Chemistry 208: Chemistry 206 or 207. Lecs.: T R 10:10 or 12:20. Lab T R F 8–12 or M T W R F 12:20–4:25. Preims.: 7:30–9 p.m., Oct. 5, Nov. 11, Feb. 29, April 11. Fall: J. F. McMurry; spring: R. C. Fay.

Fundamental chemical principles and descriptive facts are covered, with considerable attention given to the quantitative aspects and to the techniques important for further work in chemistry. Second-term laboratory includes a systematic study of qualitative analysis.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry 207 by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall. Taking Chemistry 208 after 215 is not recommended and can be done only with the permission of the 208 instructor.

CHEM 211 Chemistry for the Applied Sciences
Fall or spring, 4 credits. Recommended for those students who intend to take only one term of chemistry. Enrollment limited. Prerequisite: high school chemistry or calculating chemical problems will be emphasized, rather than the memorization of specific results or formulas. There will be an opportunity for students, working in small groups, to prepare short reports on topics of particular current interest at the interface between chemistry and biology.

CHEM 106 Strategies in Science: The World of Chemistry
Spring. 3 credits. This course contributes to meeting the College of Arts and Sciences "Physical and Biological Sciences" distribution requirement Group D as well as satisfying the C.A.L.S. physical science requirement of one course in chemistry. S-U or letter grades. Lecs, M W F 1:25. Preims.: 7:30–9 p.m., Feb. 29, March 30. M. A. Hines.

A general appreciation of chemistry in the everyday world which will highlight for nonscientists the way the scientific method works. The course will focus not only on what modern chemistry has accomplished, but more generally on the way scientists think and how they function.

CHEM 206 Introduction to General Chemistry
Fall or summer. 4 credits. Enrollment limited. Recommended for students who have not had high school chemistry and for those needing a less intensive course than Chemistry 207. Lecs., M W F 11:15, dis sec., W 7:00–8:30 p.m.; lab, T R or F 8:00–11:00, or M W F 1:25–4:25. Preims.: 7:30–9 p.m., Oct. 5, Nov. 11. S. Lee.

An introduction to general chemistry, with emphasis on important principles and facts. Chemistry 206 covers much of the same material as Chemistry 207 plus the basics of chemical equilibrium, but does so at a slower pace.

CHEM 207–208 General Chemistry
Fall or summer. 207. spring or summer, 208. 4 credits each term. Recommended for those students who will take further courses in chemistry. Prerequisite for Chemistry 207: high school chemistry. Prerequisite for Chemistry 208: Chemistry 206 or 207. Lecs.: T R 10:10 or 12:20. Lab T R F 8–12 or M T W R F 12:20–4:25. Preims.: 7:30–9 p.m., Oct. 5, Nov. 11, Feb. 29, April 11. Fall: J. F. McMurry; spring: R. C. Fay.

Fundamental chemical principles and descriptive facts are covered, with considerable attention given to the qualitative aspects and to the techniques important for further work in chemistry. Second-term laboratory includes a systematic study of qualitative analysis.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry 207 by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall. Taking Chemistry 208 after 215 is not recommended and can be done only with the permission of the 208 instructor.

CHEM 211 Chemistry for the Applied Sciences
Fall or spring, 4 credits. Recommended for those students who intend to take only one term of chemistry. Enrollment limited. Prerequisite: high school chemistry or

Important chemical principles and facts are covered with the objective of understanding the role of chemistry in other fields. Emphasis is on topics such as solid-state materials, periodic trends, and specific classes of compounds, such as polymers.

Note: Entering students exceptionally well prepared in chemistry may receive advanced placement credit for General Chemistry by demonstrating competence in the advanced placement examination of the College Entrance Examination Board or in the departmental examination given at Cornell before classes start in the fall.

CHEM 215–216 General and Inorganic Chemistry
Fall, 215; spring, 216. 4 credits each term. Recommended for students who intend to specialize in chemistry or in related fields. Enrollment limited. Prerequisites: good performance in high school chemistry, physics and mathematics. Corequisite: a calculus course at the level of Mathematics 111 or 191 for students who have not taken high school calculus. Prerequisite for Chemistry 216: Chemistry 215. Lecs: M W F 12:20; lab, M T W R or F 1:25–4:25. Prelims: 7:30–9 p.m., Oct. 5, Nov. 11, Feb. 17, March 14, April 13. Fall: R. Hoffmann; spring: S. Lee.

An intensive systematic study of the laws and concepts of chemistry, with considerable emphasis on quantitative aspects. Second term includes systems of inorganic chemistry. Laboratory work covers qualitative and quantitative analysis, transition metal chemistry, and spectroscopic techniques.

Note: Taking Chem 208 after 215 is not recommended and can be done only with the permission of 208 instructor.

CHEM 223 Introduction to Biomolecular Structure
Fall. 2 credits. Limited to 30 students. Prerequisites: 208 or 208-1A or equivalents. Lecs, T R 2:30–3:30, S. E. Ealick. This course is intended for students with a basic understanding of chemistry who are considering a program of study in biochemistry. The interrelationship of the structure and function of the most important molecules are explored. Emphasis is placed on understanding the way in which the three-dimensional arrangements of atoms determine the biological properties of both small molecules and macromolecules such as proteins and enzymes. The study of molecular structure is aided by interactive computer graphics for visualizing three-dimensional structures of molecules.

CHEM 251 Introduction to Experimental Organic Chemistry
Fall, spring, or summer. 2 credits. Recommended for non-chemistry majors. Enrollment limited. Prerequisites: coregistration in Chemistry 257 or 357. Lecs: Fall, R 11:15 or F 8:00; spring, F 8, lab, M T W R or F 1:25–4:25, or T R 8–11. Prelims: 7:30–9 p.m., Fall: Nov. 11. Spring: April 18. S. Russo.

Introduction to the synthesis, separation, and handling of materials, including applications of many topics of chromatography, simple and fractional distillation, crystallization, extraction, and others.

CHEM 252 Elementary Experimental Organic Chemistry

A continuation of Chemistry 251.

CHEM 257 Introduction to Organic and Biological Chemistry
Spring. 3 credits. Prerequisite: Chemistry 206 or 207. Because Chemistry 257 is only a three-credit course, it does not provide a practical route to satisfying medical school requirements. Lecs, M W F 11:15. Prelims: in normal class period at 11:15. J. Meinwald.

An introduction to organic chemistry with an emphasis on those structures and reactions of organic compounds having particular relevance to biological chemistry.

CHEM 278–279 Introductory Physical Chemistry

A systematic treatment of the fundamental principles of physical chemistry, focusing in the fall on thermodynamics and the quantum mechanics of the periodic table and chemical bonding. In the spring the course will be oriented to the application of physical chemistry to biological systems, including transport, kinetics, electrochemistry, spectroscopy. Chemistry 279 satisfies the minimum requirement for physical chemistry in the alternative chemistry major.

CHEM 289–290 Introductory Physical Chemistry Laboratory
Fall, 289; spring, 290. 2 credits each term. Lecs: Fall, R 8:00 a.m.; spring, R 8:00 or 9:05. Lab, Fall, R 8:00; spring, M T W R 1:25–4:25, T. McCarrick.

A survey of the methods basic to the experimental study of physical chemistry, with a focus on the areas of kinetics, equilibrium, calorimetry and molecular spectroscopy.

CHEM 300 Quantitative Chemistry
Fall. 2 credits. Prerequisite: Chemistry 208 or 208-1A. Advanced placement in chemistry. Lecs, R 10:10; lab, M T W R F 12:20–4:25 or T R 8–12. Prelims: 7:30–9 p.m., Oct. 21, Nov. 16.

J. M. Burlitch.

Volumetric, spectrophotometric, and potentiometric methods are emphasized. Techniques are learned by analysis of knowns, and then are used on unknowns. Lectures and problem sets stress the relationship between theory and applications.

CHEM 301 Experimental Chemistry I
Spring. 4 credits. Prerequisites: Chemistry 208, or Chemistry 300, and M W F 8:00; 2 labs, M W 1:25–4:25 or T R 8–11 or T R 1:25–4:25. J. M. Burlitch.

An introduction to the techniques of synthetic organic chemistry. A representative selection of the most important classes of organic reactions will be explored in the laboratory. Laboratory techniques and the theoretical basis for the separation and characterization techniques used will be discussed in the lectures.

CHEM 302 Experimental Chemistry II
Fall. 4 credits. Enrollment limited; prerequisite given to chemistry majors. Prerequisite: Chemistry 301. Lecs, M W F 9:05; 2 labs, M W 1:25–4:25, T R 8–11 or T R 1:25–4:25. B. A. Baird.

Instrumental methods of analysis, including chemical microscopy, AA spectrophotometry, and gas chromatography. The design, execution, and analysis of experiments is stressed.

CHEM 303 Experimental Chemistry III
Spring. 4 credits. Each lab limited to 11 students. Prerequisites: Chemistry 302, 389, 390; coregistration in the latter is permissible. Lecs, M W F 9:05; 2 labs, M W 1:25–4:25, or T R 9:00–12 or T R 1:25–4:25. H. D. Abruha.

An introduction to experimental physical chemistry, including topics in calorimetry, spectroscopy and kinetics. The analysis and numerical simulation of experimental data is stressed.

CHEM 357–358 Organic Chemistry for the Life Sciences
Fall or summer, 357; spring or summer, 358. 3 credits each term. Prerequisite for Chemistry 357: Chemistry 208 or 216 or advanced placement recommended. Concurrent registration in Chemistry 251 or 300. Prerequisite for Chemistry 358: Chemistry 357 or permission of the instructor. Lecs, M W F 9:05 or 10:10, optional rec may be offered. Prelims: 7:30–9 p.m., Sept. 30, Oct. 19, Nov. 16, Feb. 17, March 14, April 13. Fall: B. K. Carpenter; spring: J. C. Clardy.

A study of the more important classes of carbon compounds—especially those encountered in the biological sciences. Emphasis will be placed on their three-dimensional structures, mechanisms of their characteristic reactions, their synthesis in nature and the laboratory; methods of identifying them, and their role in modern science and technology.

Note: Because of duplication of material, students who take both Chemistry 257 and 357 will receive graduation credit only for Chemistry 257.

CHEM 359–360 Organic Chemistry I and II
Fall, 359, spring, 360. 4 credits each term. Recommended for students who intend to specialize in chemistry or closely related fields. Enrollment limited. Prerequisites: Chemistry 216 with a grade of B or better, Chemistry 208 with a grade of A or better, or permission of instructor. Prerequisite for Chemistry 360: Chemistry 359.

Recommended: coregistration in Chemistry 300–301–302. Lecs, M W F 9:05; dis sec, W 7:30 p.m.; prelims, 7:30–9:00 p.m., Sept. 22, Oct. 20, Nov. 10, Spring: 7:30–9:00 p.m., Feb. 9, March 8, April 5. Fall: B. Ganem; spring: G. W. Coates.

A rigorous and systematic study of organic compounds, their structures, the mechanisms of their reactions, and the ways they are synthesized in nature and in the laboratory.
CHEM 390-390 Physical Chemistry I and II
Fall, spring, 390. 4 credits each term. Prerequisites: Mathematics 213 or, ideally, 221-222; Physics 208; Chemistry 208 or 216 or permission of instructor. Prerequisite for Chemistry 390. Chemistry 389. Lecs, 389: M W F 10-10:30, rec M or W 1:25 or T 9:05. Lecs, 390: M W F 10:30-10:55. Prelims: 7:30-9 p.m. 389, Sept. 30, Nov. 2, Nov. 30, 390: Feb. 17, March 14, April 13. Fall: M. A. Hines; spring 390: H. F. Davis.

The principles of physical chemistry are studied from the standpoint of the laws of thermodynamics, kinetic theory, statistical mechanics, and quantum chemistry.

CHEM 391 Physical Chemistry II (also CHEM E 391)
Spring. 4 credits. Enrollment limited to engineering students only. Prerequisites: Mathematics 293; Physics 112, 213, Chemistry 208 or permission of instructor. Co-prerequisite: Math 294. Prerequisite for Chemistry 391: Chemistry 389. Lecs, M W F 9-9:50; rec M 1:25 or T 9:05; T. M. Duncan.

The study of two topics: (1) Quantum chemistry—the electronic structure of atoms, molecules, and condensed matter; the interaction of electromagnetic radiation with matter for spectroscopy and chemical reaction. (2) Chemistry kinetics—reaction rate laws from experimental data and reaction mechanisms; approximation methods and applications to polymerization and heterogeneous catalysis.

CHEM 404 Entrepreneurship in Chemical Enterprise
Spring. 1 credit. Lecs, T 2:55-4:10.

B. Gamem

Designed to acquaint students with the problems of planning, starting, and managing a new scientifically oriented business venture. The course will consist of six weekly 90-minute meetings with an additional four and one half hours of case studies and assigned reading, as well as outside lectures by entrepreneurs in the chemical, pharmaceutical, and biotechnology industries. Topics will include new technology evaluation and assessment, business formation, resource allocation, management development, as well as manufacturing and sales issues.

CHEM 405 Techniques of Modern Synthetic Chemistry
Spring. 3 or 6 credits. Enrollment limited. Prerequisites: Chemistry 302 and permission of instructor. To receive three credits, students must perform a minimum of three two-week experiments. Six credits will be given for three additional experiments. Completion of five exercises in elementary glass-blowing will count as one experiment. Lab time required: 16 hours each week, including at least two 4-hour sessions in one section (M W 1:25). First meeting will be at 1:30 on first class day of semester. Lec, first week only, at times to be arranged. Not offered 1999-2000. J. M. Burlitch.

The syntheses of complex organic, organometallic, and inorganic molecules are carried out with emphasis on the following techniques: vacuum line, high pressure, high temperature solid state, inert atmosphere, nonaqueous solvents, radioactive labeling, solgel, photochemical and electrochemical methods, solid phase peptide synthesis, and polymer synthesis. Elementary glass-blowing.

CHEM 410 Inorganic Chemistry
Fall. 4 credits. Prerequisites: Chemistry 358 or 360, and 287 or 390. Lecs, M W F 11:15. Prelims: 7:30-9:00 p.m., Sept. 23, Oct. 21, Nov. 18. T. F. Wolczanski.

A systematic study of the synthesis, structure, bonding, reactivity and uses of inorganic compounds, organometallic complexes and solid state species.

CHEM 421 Introduction to Inorganic Chemistry Research
Fall or spring. 2-4 credits. Prerequisites: Chemistry 303 and 395-390, or Chemistry 287-288, and Chemistry 289-290 with an average of B- or better, or permission of instructor. Selected faculty.

Research in inorganic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 423 Introduction to Analytical Chemistry Research
Fall or spring. 2-4 credits. Prerequisites: Chemistry 303 and 395 with an average of B- or better or permission of instructor. Selected faculty.

Research in analytical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 461 Introduction to Organic Chemistry Research
Fall or spring. 2-4 credits. Prerequisites: Chemistry 302 and 358 or 360 with a grade of B- or better or permission of instructor. Selected faculty.

Research in organic chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 477 Introduction to Physical Chemistry Research
Fall or spring. 2-4 credits. Prerequisite: Chemistry 390 with an average of B- or better or permission of instructor. Selected faculty.

Research in physical chemistry involving both laboratory and library work, planned in consultation with a faculty member.

CHEM 498 Honors Seminar
Spring. M.W.F. Honors permission to standard chemistry majors only by departmental invitation. Additional prerequisites or corequisites: outstanding performance in either (1) two coherent 4-credit units of research in a course such as Chemistry 421, 421, 453, 461, or 477, or (2) one 4-credit unit in a course such as Chemistry 421, 433, 461, or 477 and summer research equivalent to at least 4 credits in the same subject. W 3:30-4. R. Hoffman.

Informal presentations and discussions of selected topics in which all students participate. Professional issues will be discussed, including graduate education, publication, techniques of oral and audiovisual presentation, employment opportunities, history and role of scientific research. Individual research on advanced problems in chemistry or a related subject under the guidance of a faculty member, culminating in a written report.

CHEM 600-601 General Chemistry Colloquia
Fall, 600; spring, 601. No credit. Required of all graduate students except those majoring in organic or bioorganic chemistry. Juniors and seniors are encouraged to attend. R 4:40. D. B. Zax.

A series of talks representative of all fields of current research interest in chemistry other than organic chemistry, given by distinguished visitors and faculty members.

CHEM 602 Information Literacy for the Physical Scientist

An introduction to physical science information research methods—use of paper and electronic resources. With the continued information explosion, much time can be wasted and important information missed unless an efficient information research strategy is developed. This course demonstrates the use of library and other information resources as a method to critically evaluate the success of research projects. Text: Journal Literature of the Physical Sciences by Alice Leffer Primack and Chemical Information Sources by Gary Wiggins.

CHEM 605 Advanced Inorganic Chemistry II: Symmetry, Structure, and Reactivity
Fall. 4 credits. Prerequisite: Chemistry 389-390 or equivalent or permission of instructor. Lecs, M W F 11:15. R. C. Fay.

Selected topics in structure, bonding, and reactivity of inorganic compounds with emphasis on main group elements; at the level of Chemistry of the Elements, by Greenwood and Earnshaw. Group theory applications: hybrid orbitals, molecular orbitals, molecular vibrations, and ligand field theory; at the level of Cotton's Chemical Applications of Group Theory.

CHEM 606 Advanced Inorganic Chemistry II: Synthesis, Structure, and Reactivity of Coordination Compounds, and Bioinorganic Chemistry

Synthesis, structure, and reactivity of modern coordination compounds, oxidation and bioinorganic chemistry. Emphasis on bonding models, structure, and reactivity, including the elucidation of mechanisms. Readings at the level of Purcell and Kotz's Inorganic Chemistry, and Jordan's Reaction Mechanisms of Inorganic and Organometallic Systems.

CHEM 607 Advanced Inorganic Chemistry III: Solid-State Chemistry

CHEM 608 Organometallic Chemistry

Synthesis, structure, and reactivity of organotransition metal complexes. Current literature is emphasized, and background readings are at the level of Colman, Heffesud, Finke and Norton's "Principles and Applications of Organotransition Metal Chemistry."
CHEM 622 Chemical Communication  

CHEM 625 Advanced Analytical Chemistry I  
Spring. 4 credits. Prerequisite: Chemistry 288 or 390 or equivalent. Lecs, M W F 9:05; occasional prelms W 7:30 p.m. C. F. Wilcox.
The application of molecular spectroscopy to chemical problems. Topics in infrared, NMR, and mass spectroscopy are discussed.

CHEM 627 Advanced Analytical Chemistry II  
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 390 or equivalent, but Chemistry 793 or equivalent would be helpful. Lecs, M W F 12:20. Not offered 1999-2000. D. B. Zax.
Modern techniques in nuclear magnetic resonance. Little overlap is expected with Chem 625, as this course will focus on more general questions of experimental design, understanding of multipulse experiments, and aspects of coherent averaging theory. Example to be taken from both liquid and solid-state NMR. May also be of interest to other coherent spectroscopies.

CHEM 628 Isotopic and Trace Element Analysis (also Nutritional Sciences 690)  
Spring. 3 credits. Primarily for graduate students and advanced undergraduates. Prerequisite: Chemistry 288 or 390 or 302, or Chemistry 208 and Mathematics 112, or permission of instructor. Offered alternate years. Lecs T R 10-11. J. T. Brenna.
Survey course in modern high precision isotope ratio mass spectrometry (IRMS) techniques and trace/surface methods of analysis. Topics include dual inlet and continuous flow IRMS, thermal ionization MS, inductively coupled plasma MS, atomic spectroscopy, ion and electron microscopies, X-ray and electron spectroscopies, and biological and solid state applications.

CHEM 629 Electrochemistry  
Fall. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisite: Chemistry 390 or equivalent. (Mathematics 213 helpful). Lecs, T R 8:40-9:55. H. D. Abruña.
Fundamentals and applications of electrochemistry. Topics will include the fundamentals of electrode kinetics, electron transfer theory, the electrical double layer, diffusion, and other modes of transport. A wide range of techniques and their application as well as instrumental aspects will be covered.

CHEM 650-651 Organic and Organometallic Chemistry Seminar  
Fall, 650; spring, 651. No credit. Required of all graduate students majoring in organic or bioorganic chemistry. Juniors and seniors are encouraged to attend. M 4:30. D. Y. Sogah.
A series of talks representative of all fields of current research interest in organic and organometallic chemistry, given by research associates, faculty members, and distinguished visitors.

CHEM 665 Advanced Organic Chemistry  
Fall. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisites: Chemistry 358 or 360, and 390 equivalents or permission of instructor. Lecs, M W F 12:20. D. B. Collum.
A survey of reaction mechanisms and reactive intermediates in organic chemistry.

CHEM 666 Synthetic Organic Chemistry  
Spring. 4 credits. Primarily for graduate students and upperclass undergraduates. Prerequisite: Chemistry 390 or equivalent or permission of instructor. Lecs, T R 10:10-11:25. B. Ganem.
Modern techniques of organic synthesis, applications of organic reaction mechanisms and retrosynthetic analysis to the problems encountered in rational multistep synthesis, with particular emphasis on modern developments in synthesis design.

CHEM 668 Chemical Aspects of Biological Processes  
Fall. 4 credits. Prerequisite: Chemistry 360 or equivalent. Lecs, T R 8:40-9:55. T. P. Regan.
A representative selection of the most important classes of enzyme-catalyzed reactions will be examined from a mechanistic perspective. Topics discussed will include the chemical basis of enzyme catalysis, techniques for the elucidation of enzyme mechanism, cofactor chemistry, and the biosynthesis of selected natural products. The application of chemical principles to understanding biological processes will be emphasized.

CHEM 670 Fundamental Principles of Polymer Chemistry  
Fall. 4 credits. Prerequisite: Physical Chemistry 389/390 and Organic Chemistry 359/360 or equivalent or by permission of instructor. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymers is required. Lecs, T R 10:00-11:15. G. W. Coates.
This course emphasizes general concepts and fundamental principles of polymer chemistry. The first part of the course deals with general introduction to classes of polymers, molar masses and their distributions, and a brief survey of major methods of polymer synthesis—radical, step growth, ionic, group transfer, Ziegler-Natta and metathesis polymerization methods—with emphasis on kinetics and mechanisms rather than on structure. The second part deals with characterization and physical properties. These include: solution properties—solubility and solubility parameters, solution viscosity, molecular weight characterizations (gel permeation chromatography, viscometry, light scattering, osmometry), bulk properties—thermal and mechanical properties, and structure-property relationships. The discussions will focus on chemistry rather than engineering of polymers.

CHEM 671 Synthetic Polymer Chemistry (also Materials Science and Engineering 671 and Chemical Engineering 675)  
Spring. 4 credits. Prerequisites: Organic Chemistry 359/360 or equivalent or by permission of instructor. Primarily for graduate students and advanced undergraduates. No previous knowledge of polymer chemistry is required. Knowledge of material covered in Chem 670 will be helpful but not required. Lecs, T R 8:30-10:00. D. Y. Sogah.
The objective of the course is to teach general concepts of polymer synthesis and discuss application of organic synthetic methods to the development of new polymers and the control of their architecture. Emphasis will be on modern concepts in synthetic polymer chemistry and cover topics of current interest: the study of new methods of synthesis, preparation of polymers with reactive end groups, the control of polymer stereoch­mistry and topology, and the design of polymers tailored for specific uses and properties. Topics on synthesis will be selected from the following: step-growth polymerization, free radical polymerization and copolymerization, Ziegler-Natta polymerization, recent developments in living free radical polymerization, anionic polymerization, cationic polymerization, group transfer polymerization, ring-opening metathesis polymerization, and cyclopolymerization.

CHEM 672 Kinetics and Regulation of Enzyme Systems  
Fall. 4 credits. Primarily for graduate students with interests in biophysical chemistry. Prerequisite: Chemistry 288 or 390, BIOBN 331, or equivalents or permission of instructor. Lecs, M W F 10:10. P. L. Houston.
Focus is on protein interactions with ligands and consequent changes in structure and activity. Topics include: protein structure and dynamics; thermodynamics and kinetics of ligand binding; steady state and transient enzyme kinetics; enzyme catalysis and regulation, role of cell membrane receptors in regulating cellular activities.

CHEM 677 Chemistry of Nucleic Acids  
Properties, synthesis, reactions, and biochemical reactions of nucleic acids.

CHEM 678 Statistical Thermodynamics  
Fall. 4 credits. Primarily for graduate students. Prerequisite: Chem 390 or equivalent. Lecs, M W F 10:10. J. Marohn.

CHEM 681 Introduction to Quantum Chemistry  
Prerequisites: one year of undergraduate physical chemistry, three semesters of calculus, one year of college physics. Lecs: T R 10:10-11:25 a.m. R. F. Loring.
An introduction to the application of quantum mechanics in chemistry. This course covers many of the topics in Chemistry 792-794 at a more descriptive, less mathematical level. The course is designed for advanced undergraduates, chemistry graduate students with a minor in physical chemistry, and graduate students from related fields with an interest in physical chemistry. At the level of Quantum Chemistry, by Levine, or Molecular Quantum Mechanics by Atkins.

[CHEM 686 Physical Chemistry of Proteins]
Spring. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 288 or 390 or equivalents. S-U grades. Letter grades for undergraduates. Offered alternate years. Not offered 1999--2000. Chemical constitution, molecular weight, and structural basis of proteins; thermodynamic, hydrodynamic, optical, spectroscopic, and electrical properties; protein and enzyme reactions; statistical mechanics of helix-coil transition in biopolymers; conformation of biopolymers; protein folding.

[CHEM 765 Physical Organic Chemistry I]
Fall. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 665 or permission of instructor. Lecs, M W F 10:10. C. F. Wilcox. Application of computational and experimental techniques to studies of organic reaction mechanisms and the properties of reactive intermediates.

[CHEM 766 Physical Organic Chemistry II]
Spring. 3 credits. Primarily for graduate students. Prerequisite: Chemistry 765 or permission of instructor. Not offered 1999--2000.

[CHEM 774 Chemistry of Natural Products: Combinatorial Chemistry]
Spring. 3 credits. Prerequisites: Chemistry 360 and BIOM 330 or equivalent. Lecs, M W F 10:10--11:10. T. P. Begley. Combinatorial chemistry has revolutionized the way organic chemists think about structure function studies on biological systems and the design of inhibitors. This course will explore the design, synthesis, screening, and use of natural (i.e., peptide, protein, nucleic acid, carbohydrate) and unnatural (i.e., totally synthetic) libraries.

[CHEM 775 Chemical Kinetics and Molecular Reaction Dynamics]
Fall. 4 credits. Prerequisite: Chemistry 681 or permission of instructor. Lecs, T R 10:10--11:25. Not offered 1999--2000. H. F. Davis. Principles and theories of chemical kinetics and molecular reaction dynamics. Topics include potential energy surfaces, transition state theory, and statistical theories of unimolecular decomposition. Depending on class interest, the course will also include special topics such as surface reactions and photochemistry.

[CHEM 768 Special Topics in Organic Chemistry: Fundamentals of Polymer Chemistry]
Fall. 4 credits. Prerequisite: Physical Chem 389/390 and Organic Chem 359/360 or equivalent or permission of instructor. Primarily for graduate and advanced undergraduate students. Lecs, T R 8:30--10:00. Not offered 1999--2000. Introduction to polymer physical chemistry. Kinetics and mechanisms of Polymerization methods: Ionic, radical, step-growth, and group transfer polymerization. Polymer Stereochemistry. Solution properties: molecular weight characterization and polymer solubility. Mechanical and Thermal Properties. Structure-Property Relations. The discussions will focus on chemistry rather than engineering of polymers and examples will be taken from current literature.

[CHEM 791 Spectroscopy]
Spring. 4 credits. Prerequisite: Chemistry 793 or Physics 442 or equivalent. Lecs, M W F 11:15--12:05. G. S. Ezra. Principles of molecular rotational, vibrational, and electronic spectra. Topics include: interaction of molecules with radiation; Born-Oppenheimer approximation; diatomic molecules; polyatomic molecules; feasible operations and the molecular symmetry group; spectroscopy, dynamics, and IR. At the level of Kroto's Molecular Rotation Spectra.

[CHEM 792 Molecular Collision Theory]

[CHEM 793 Quantum Mechanics I]

[CHEM 794 Quantum Mechanics II]

[CHEM 795 Statistical Mechanics]
Spring. 4 credits. Primarily for graduate students. Prerequisite: Chemistry 678 and 793 or equivalent. Lecs, T R 8:30--9:55. B. Widom. Statistical mechanics of systems of interacting molecules. Structure and thermodynamics of classical liquids. Phase transitions and critical phenomena. Inhomogeneous fluids. Introduction to non-equilibrium statistical mechanics. Students are presumed to have taken a course in statistical thermodynamics at the level of the first twelve chapters of Statistical Mechanics, by McQuarrie.

[CHEM 798 Special Topics in Physical Chemistry (Chemical Bonding in Polymers, Surfaces and the Solid State)]
Spring. 4 credits. Prerequisite: Chemistry 605, or 681, or 793, or Physics 443, or the equivalent. Lecs, T R 10:10--11:25. Not offered 1999--2000. R. Hofmann. The qualitative aspects of the electronic structure and chemical bonding of condensed one-, two- and three-dimensional systems will be discussed, in a way accessible to a wide range of inorganic and organic chemists, and to engineers and physicists as well.

Cornell University has long recognized the
importance of studying the civilizations of
ancient Greece and Rome. Particularly in an
age of increasing specialization, study of the
Classics is widely viewed as an excellent
means of acquiring a liberal education; at
Cornell, we are deeply interested in the
continuing humanistic values contained in the
literature of the ancient world and in gaining
a fuller understanding of these important
cultures and their imprint upon subsequent
generations.
The Department of Classics at Cornell is one of
the oldest and largest in the country. With
eleven faculty members, together with
professors of related interests in the depart­
ments of History, Philosophy, Comparative
Literature, History of Art, Modern Languages,
Linguistics, and Near Eastern Studies and in
the Archaeology, Medieval Studies, and
Religious Studies programs, the range of
instruction available is very large, including
not only the traditional study of language,
literature, and ancient history, but also newer
developments in the field, such as compar­
tive study of Mediterranean civilizations and
modern literary theory.

Although Classical studies, like other areas of
humanistic study, does not aim at providing
specific preprofessional training, over the
years Classics majors from Cornell have gone
on to a wide variety of careers in law,
education, medicine, diplomacy, management,
educational administration, government, and
many others.
The department offers courses in Bronze Age
and Classical archaeology and is active in field
projects in Classical lands. It sponsors
archaeological excavations at Halai in Greece,
which serves as a field training school for
Cornell undergraduate and graduate students.
On campus there are also collections of
ancient artifacts, reproductions of ancient
sculpture, and one of the few laboratories in
the world to concentrate on the tree-ring
dating of ancient monuments from Greece,
Cyprus, and Turkey. The archaeology courses
may be used to satisfy some of the require­
ments for the Intercollege Program in
Archaeology or for the major in Classical
Civilization. No knowledge of either Greek or
Latin. Similarly, the department offers a variety of courses and seminars in
English on such subjects as Greek
mythology, Greek and Roman mystery
religions, early Christianity, and Greek
and Roman society, as well as ancient epic,
tragedy, history, and philosophy. For those
whose interest in the things Greek and Roman
extends no further than a desire to understand
the English language a little better, the
department offers one course in the Greek
and Latin elements that make up a huge
proportion of the vocabulary of Modern
English, and another that deals more
specifically with the Greek and Latin
ingredients of bioscientific vocabulary.
Programs in Greek and Latin at the elementary
level are also offered. For the more ambitious
there are courses involving reading, in the
original, of Greek and Latin authors from
Homer to St. Augustine and Bede and,
periodically, the Latin works of Dante,
Petrarch, and Milton. Sanskrit, the classical
language of ancient India, is also offered,
along with a special introduction on Indian
religion, myth, and literature. The department
makes every attempt to adapt its program to
the needs of each student. If there is a
Classical writer you would like to study, the
department will do its best to help you do so
whether you are a major in the department or
not.

Majors
The Department of Classics offers majors in
Classics, Greek, Latin, and Classical
Civilization.

Classics
The Classics major comprises seven courses in
advanced Greek and Latin (numbered 201 or
above) and 3 courses in related subjects (see
below) selected in consultation with the
adviser. Classics majors are required to take
at least 3 of the advanced courses in Greek,
and two 300-level courses in the
other.

Students who are considering the option of
undertaking graduate study in Classics are
strongly advised to complete the Classics
major.

Greek
The Greek major comprises Courses 201 plus
5 advanced courses in Greek (numbered 203
and above) of which at least 3 are to be taken at
the 300-level, and 3 courses in related
subjects (see below) selected in consultation with
the adviser.

Latin
The Latin major comprises Courses 205 plus
5 advanced courses in Latin (numbered 207 and
above) of which at least 3 are to be taken at
the 300-level, and 3 courses in related
subjects (see below) selected in consultation with
the adviser.

Classical Civilization
Those who major in Classical Civilization must
complete (a) qualification in Latin and Greek
or proficiency in either; (b) Classics 211 (or
History 265), Classics 212 (or History 266),
and Classics 220, plus 5 courses selected from
those listed under Classical civilization,
Classical archaeology, Ancient Philosophy,
Latin, and Greek; and (c) 3 courses in related
subjects (see below) selected in consultation with
the adviser.

Related Subjects
The field or scope of the subject "Classics" is
the interdisciplinary study of Greek and
Roman antiquity, comprising Greek and Latin
language, literature, and linguistics; ancient
philosophy; history; archaeology and art
history; papyrology; epigraphy; and numis­
matics. It covers the ancient Mediterranean
and neighboring lands as they were during
the period extending from approximately 3000
B.C.E. to the 6th century C.E. In addition to the
archaeological courses in language and
literature, the major includes related courses
intended to give breadth and exposure to the
other disciplines within the field and to enrich
the student's study of the original languages.
Since the influence of the Greco-Roman world
extended far beyond antiquity, a related
course could well focus on some aspect of the
classical tradition in a later period
Students select related courses in consultation with
their advisers or the DUS.

Honors
Candidates for the degree of Bachelor of Arts
with honors in Classics, Greek, Latin, or
Classical civilization must fulfill the require­
ments of the appropriate major study as given
above and must also successfully complete the
special honors course 472. Credit for the
honors course may be included in the credits
required for the major. Students who wish to
become candidates for honors must have a
cumulative average of B, and B+ in the major.
In consultation with the Standing Committee
on Honors, the students should choose an
honors adviser by the end of their sixth
semester. By the second week of their
seventh semester they should submit an
outline of their proposed honors work to the
Standing Committee and to the adviser(s).
The thesis will be written under the supervi­sion
of the honors adviser(s) chosen by the
student. Honors advisers will submit
recommendations to the Standing Committee
on Honors. The Committee will read all
honors theses and will determine the level of
departmental honors. A copy of each
successful honors thesis will be filed with the
department.

Independent Study
Independent study at the 300 level may be
undertaken by undergraduates upon
completion of one semester of work at the
300 level. 200-level independent study may
be undertaken only if the case of
documented schedule conflict upon application to
the DUS.

Study Abroad
Cornell participates in the Intercollegiate
Center for Classical Studies in Rome, which
offers courses in Latin, Greek, ancient
history, art, archaeology, and Italian. Another
opportunity for a semester's study abroad is
available through College Year in Athens.
(Consult Cornell Abroad for details.) In
addition, Cornell is a member institution of the
American School of Classical Studies at
Athens, whose Summer Program is open to
graduate students and qualified undergradu­
ates. The American Academy in Rome, of
which Cornell is also a member institution,
offers full-year and summer programs for
qualified graduate students. For graduate
students the Department of Classics offers a
few travel grants each year from the
Townsend Memorial Fund. Detailed
information on these programs is available in
the Department of Classics Office, 120
Goldwin Smith Hall.
Summer Support for Language Study
The Beatrice R. Kanders Memorial Scholarship (for the summer immediately following the freshman or sophomore year; preference given to dyslexic students) is available to students who want to enroll in Intensive Latin or Greek in the Cornell summer session. These courses are designed to enable students to enter second-year Latin or Greek the following fall. Preference is given to Classics undergraduates, and other students needing Latin or Greek for completion of their majors. Applications are due to the chair of the Department of Classics by March 27.

Placement in Latin, Ancient Greek, and Modern Greek
Placement of first-year students in Latin and ancient Greek courses, and proficiency level in modern Greek, is determined by an examination given by the Department of Classics during orientation week or by arrangement with the director of undergraduate studies.

First-Year Writing Seminars
The department offers freshman writing seminars on a variety of topics. Consult John S. Knight Writing Seminar Program brochures for times, instructors, and descriptions.

Classical Civilization

CLASS 100 Word Power: Greek and Latin Elements in the English Language
Spring. 3 credits. F. Hohenzahn.
This course gives the student with no knowledge of the classical languages an understanding of how the Greek and Latin elements that make up over half our English vocabulary operate in both literary and scientific English usage. Attention is paid to how words acquire their meaning and to enlarging each student's working knowledge of vocabulary and grammar.

CLASS 102 Bioscientific Terminology
A study of the Greek and Latin word elements that combine to form most of the specialized terms in the biological sciences. The student who learns the meanings of those elements and the rules of word formation can usually recognize the basic meaning of any unfamiliar word in that field. This skill is especially valuable for pre-medical, pre-dental, pre-veterinary students, and for those in other health science fields, as well as for students who would like to broaden their general vocabulary.

CLASS 217 Initiation to Greek Culture: The Greeks at War, from Troy to Charonisia
Fall. 4 credits. Limited to 18 students. D. Mankin.
This course is intended especially for freshmen (a few exceptionally motivated sophomores or upperclass students may be accepted). Apply in writing to the chair, Department of Classics, 120 Goldwin Smith Hall. J. Coleman.
Knowledge of Greek is not necessary, since all texts are in translation. What is necessary is the willingness to participate in three one-hour seminars each week and also a supplementary one-hour (occasionally two-hour) session, during which the class will participate in workshops with specially invited guests.

One of the most troubling legacies of the Ancient Greeks is their almost unquestioning acceptance of war as a legitimate human activity and a measure of male heroism. Our critical examination will show how literature and art exemplify this attitude, beginning with the first and greatest war poem, the Iliad, and concluding with the Macedonian conquests of the 4th century B.C.E. Included are Herodotus on the Persian wars, Thucydides on the Peloponnesian War, and the anti-war comedies of Aristophanes. Themes include the visual image of the hero, the role of women as mediators and victims, and the importance of warfare in the political life of the Greek city-states.

CLASS 218 Initiation to the Classical Tradition: Strange Voyages

CLASS 223 The Comic Theater (also Comparative Literature 222 and Theatre Arts 223)
Summer 2000 and spring 2001. 3 credits.
J. Rusten.
The origins of comic drama in ancient Greece and Rome, and its subsequent incarnations especially in the Italian renaissance (Commedia erudita and Commedia dell'arte), Elizabethan English-century France, the English Restoration, and Hollywood in the thirties and forties. Chief topics will be: the growth of the comic theatrical tradition and conventions; techniques and themes of comic plots (trickster, parody, farce, caricature), and the role of comedy in society. All readings in English.

CLASS 231 Ancient Philosophy (also Philosophy 211)
Fall. 4 credits. G. Fine.
For description, see PHIL 211.

CLASS 236 Greek Mythology (also Comparative Literature 236)
Fall 1999 and summer 2000. 3 credits.
J. Ginsburg.
A survey of the Greek myths, with emphasis on the content and significance of the myths in Mediterranean society, including the place of myth in Greek life and consciousness; the factors and influences involved in the creation of myths; and the use of myths for our understanding of Greek literature, religion, and moral and political concepts.

CLASS 240 Initiation to Greek Religion
Fall. 4 credits. Limited to 18 students. K. Clinton.
Greek religion constitutes one of the essential features of ancient civilization and distinguishes it from later Western civilization. Since religion permeates Greek culture, including the major art forms (epic poetry, tragedy, comedy, architecture, painting, and sculpture), the course will investigate the interaction of religion with these forms—an investigation that is fruitful both for the understanding of Greek religion and the forms themselves, some of which, like tragedy, originated in cult. A representative variety of cults and their history will be studied with special emphasis on mystery cults, such as the Eleusinian mysteries of Demeter and Persephone, the Kabiroi, the Great Gods of Samothrace, and Bacchic rites.

CLASS 265 Ancient Greece from Homer to Alexander the Great (also History 265)
Spring. 4 credits. Open to freshmen. B. Strauss.
For description, see HIST 265.

CLASS 269 A History of Rome from Republic to Holy City (also History 268)
For description, see HIST 268.

CLASS 291 Classical Indian Narrative (also Asian Studies 291)

CLASS 303-304 Independent Study in Classical Civilization, Undergraduate Level
303, fall; 304, spring. Up to 4 credits.

CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also Religious Studies 333)
Fall. 4 credits. A previous course in Classics (civilization or language) or Religious Studies 101 is recommended. Not offered 1999–2000. K. Clinton.
A study of the controversial question of religious continuity between paganism and early Christianity. After a brief survey of classical mystery cults and Hellenistic religion, the course will focus on such Hellenistic cults as the mystery cults of Isis, Bacchus, and Atis and the Great Mother and on the distinctive features that contributed to their success. Discussion of Christian liturgy and beliefs to determine what Christianity owed to its pagan predecessors and to isolate the factors that contributed to its triumph over the "rival" pagan cults of late antiquity.
[CLASS 345] The Tragic Theater (also Comparative Literature 344 and Theatre Arts 345)  #
Spring. 4 credits. Limited to 40 students. F. Ahl.
Tragedy and its audiences from ancient Greece to modern theater and film. Topics: origins of theatrical conventions; Shakespeare and Seneca; tragedy in modern theater and film. Works studied will include: Aeschylus' Agamemnon; Sophocles' Oedipus Tyrannus, Philoctetes; Euripides' Alcestis, Helen, Iphigenia in Aulis, Orontes; Seneca's Thyestes, Trojan Women; Shakespeare's Julius Caesar, Titus Andronicus, Othello, Strindberg's The Father, Dürrenmatt's The Visit, Bergman's Seventh Seal; Cacoyannis' Iphigenia.

[CLASS 382] Greeks, Romans, and Victorians (also Comparative Literature 362)  #
For description, see ASIAN 390.

[CLASS 390] The Sanskrit Epics (also Asian Studies 390)  #
For description, see ASIAN 390.

[CLASS 395] Classical Indian Philosophical Systems (also Asian Studies 395 and Religious Studies 395)  #
4 credits. Prerequisite: some background in philosophy or in classical Indian culture.
For description, see ASIAN 395.

[CLASS 405] Augustine's Confessions: Memory and Self (also Comparative Literature 400, Philosophy 413, and Society for the Humanities 402)  #
Fall. 4 credits. Limited to 15 students.
Permission of instructor. C. Brittain.
For description, see HUM 402.

[CLASS 406] Augustine's Dialogues on the Soul (also Comparative Literature 424, Philosophy 413, and Society for the Humanities 403)  #
Spring. 4 credits. Limited to 15 students.
Permission of instructor. C. Brittain.
For description, see HUM 403.

[CLASS 463] Gender and Politics in the Roman World (also History 463 and Women's Studies 464)  #
An undergraduate seminar examining the relationship between gender and politics in the late Roman Republic and early Empire. Among the questions this course will address are: was politics the exclusive domain of men in Roman society (as is generally assumed) or does a broader definition of politics and an understanding of the various forms' political activity in ancient Rome might have taken allow a place for women in Roman political life? Why did issues such as family, marriage, and sexuality become subjects of political debate and legislation?

[CLASS 469] Equality and Inequality in Ancient Greece (also History 469)
Fall. 4 credits. Prerequisite: History 265, Classics 211 or 217, or written permission of the instructor. B. Strauss.
For description, see HIST 469.

[CLASS 480] Roman Society and Politics under the Julio-Claudians (also History 473)  #
4 credits. Prerequisite: Classics 212, History 268, or permission of instructor.
This course examines several of the important social and political changes in Roman society under Augustus and his successors, the Julio-Claudians. Topics to be investigated include Augustus' consolidation of power through political and social revolution, the Augustan attempt to regulate family life and social relations by legislation, the relation of the emperor Tiberius with the members of the old ruling class, the growth of the imperial bureaucracy and the new opportunities for social mobility, the political opposition to Claudius and Nero, Nero's cultural and provincial policy, and the manipulation of the imperial cult. All readings will be in English.

[CLASS 711-712] Independent Study for Graduate Students in Classical Civilization
711, fall; 712, spring. Up to 4 credits.

Greek

[CLASS 101] Greek for Beginners
Fall. 4 credits. F. Ahl.
Introduction to Attic Greek. Designed to enable the student to read the ancient authors as soon as possible.

[CLASS 103] Attic Greek
Spring. 4 credits. Prerequisite: 101 or equivalent. H. Pelliccia.
A continuation of Classics 101.

[CLASS 104] Intensive Greek
Summer. 6 credits. Staff.
An intensive introduction to the fundamentals of ancient Greek. Prepares students in one term for 200-level Greek.

[CLASS 201] Attic Authors  #
Fall. 3 credits. Prerequisite: Classics 103 or 104 or equivalent. H. Pelliccia.
Selected readings from Greek prose.

3 credits. Prerequisite: at least one year of ancient Greek (Classics 101–103 or 104) or permission of instructor.

[CLASS 203] Homer  #
Spring. 3 credits. Prerequisite: Classics 103 or 104 or equivalent. J. Coleman.
Readings in the Homeric epic with emphasis on formulaic style.

[CLASS 210] Attic Prose
3 credits. Prerequisite: Classics 103 or 104 or equivalent. Not offered 1999–2000.

[CLASS 225-226] Independent Study in Greek, Undergraduate Level
225, fall; 226, spring. Up to 4 credits. Only by permission of the DUS in the case of documented schedule conflict.

Latin

[CLASS 105] Latin for Beginners
Fall. 4 credits. Staff.
An introductory course in the essentials of Latin, designed for rapid progress toward reading the principal Latin writers.

CLASS 329 Greek Sculpture (also History of Art 329) #
Spring. 4 credits. J. Coleman.
An examination of ancient Greek sculpture, both three-dimensional and two-dimensional, from the Archaic to the Hellenistic period. Aspects of the works studied include: technological advances, changing ideology of the sculptors, regionalism of styles, and taste of individual patrons.

[CLASS 350] Arts of the Roman Empire (also History of Art 322) #
A. Ramage.
For description, see ART H 322.

[CLASS 352] The City of Athens (also Archaeology 352 and History of Art 352) #
A detailed survey of the architectural development of the city of Athens from the Bronze Age to the 6th century A. D. The principal monuments will be examined against a broad historical and cultural background, with special attention to both Athenian society and the development of Greek art and architecture as a whole.

CLASS 357–358 Independent Study in Classical Archaeology, Undergraduate Level
357, fall; 358, spring. Up to 4 credits.

CLASS 361 Summer Program in Etruscan Archaeology at La Piana (also Archaeology 361)
Summer only: 3 or 6 credits. Permission required. J. Whitehead.

CLASS 423 Ceramics (also Archaeology 423 and History of Art 423)
Fall. 4 credits. Prerequisite: permission of instructor. A. Ramage.
For description, see ART H 423.

[CLASS 430] Seminar on the Bronze Age Architecture of Asia Minor (also Archaeology 425 and History of Art 425) #
P. I. Kuniholm.
For description, see ART H 425.

[CLASS 432] Sardis and the Cities of Asia Minor (also Archaeology 432 and History of Art 432) #
A. Ramage.
For description, see ART H 424.

CLASS 434 The Rise of Classical Greece (also Archaeology 434 and History of Art 434) #
Spring. 4 credits. Recommended: Classics 220 or 221, History of Art 220 or 221, or permission of instructor. P. I. Kuniholm.
For description, see ART H 424.

[CLASS 435] Seminar on Roman Art and Archaeology (also Archaeology 435 and History of Art 427) #
A. Ramage.
For description, see ART H 427.

[CLASS 629] The Prehistoric Aegean (also Archaeology 629) #
J. Coleman.
Seminar with focus on the Aegean and neighboring regions in the Neolithic and Early Bronze Ages.

[CLASS 630] Seminar in Classical Archaeology (also Archaeology 520 and History of Art 520) #
P. I. Kuniholm.
For description, see ART H 520.

CLASS 721–722 Independent Study for Graduate Students in Classical Archaeology
721, fall; 722, spring. Up to 4 credits.

Greek and Latin Linguistics

CLASS 420 Plautus #
Fall. 4 credits. Prerequisite: at least one 300-level Latin course or permission of instructor. A. Nussbaum.
A close reading of several Plautean comedies with attention to language and meter.

CLASS 421 Greek Comparative Grammar (also Linguistics 451) #
Fall. 4 credits. Prerequisite: thorough familiarity with the morphology of classical Greek. A. Nussbaum.
The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

CLASS 422 Latin Comparative Grammar (also Linguistics 452) #
A. Nussbaum.
The prehistory and evolution of the sounds and forms of Classical Latin as reconstructed by comparison with the other Indo-European languages.

CLASS 424 Italic Dialects (also Linguistics 454) #
A. Nussbaum.

CLASS 425 Greek Dialects (also Linguistics 455) #
A. Nussbaum.

CLASS 426 Archal Latin (also Linguistics 456) #
A. Nussbaum.

CLASS 427 Homeric Philology (also Linguistics 457) #
A. Nussbaum.
The language of the Homeric epics: dialect background, archaisms, modernizations. The notion of a Kunstsprache: its constitution, use, and internal consistency. The phonological and morphological aspects of epic compositional technique.

CLASS 429 Mycenaean Greek (also Linguistics 459) #
A. Nussbaum.

Sanskrit

CLASS 131–132 Elementary Sanskrit (also Linguistics 131–132 and Sanskrit 131–132) #
131, fall; 132, spring, staff. 4 credits each term.
An introduction to the essentials of Sanskrit grammar. Designed to enable the student to read classical and epic Sanskrit as quickly as possible.

CLASS 251–252 Intermediate Sanskrit (also Linguistics 251–252 and Sanskrit 251–252) #
251, fall; 252, spring. 3 credits each term.
Readings from the literature of Classical Sanskrit. Fall: selections from the two Sanskrit epics, the Mahabharata and the Ramayana. Spring: more selections from the epics, and from either Sanskrit story literature or from Sanskrit dramas.

CLASS 403–404 Independent Study in Sanskrit, Undergraduate Level
403, fall; 404, spring. Up to 4 credits.
C. Minkowski.

CLASS 703–704 Independent Study for Graduate Students in Sanskrit
703, fall; 704, spring. Up to 4 credits.
C. Minkowski.
Also see Classics 291, 390, and 395 (Classical Civilization listings).

Honors Courses

CLASS 472 Honors Course: Senior Essay
Fall and spring. 8 credits. An adviser must be chosen by the end of the student's sixth semester. Topics must be approved by the Standing Committee on Honors by the beginning of the seventh semester. See "Honors," Classics front matter.

COMPARATIVE LITERATURE

Also cooperating: A. Adams, D. Bathrick, J. Bishop, R. Brann, S. Buck-Mors, P. Carden, E. Hanson, T. Hope, C. Kaske, D. Mankin, B. Maxwell, M. Migiel, G. Waite.

The Department of Comparative Literature provides a broad range of courses in European as well as non-European literature. Courses stress significant authors, themes, problems, styles, genres, historical periods, and theoretical perspectives. In cooperation with related departments in the humanities, the departmental offerings reflect current interdisciplinary approaches to literary study: hermeneutics, semiotics, deconstruction, cultural criticism, Marxism, reception aesthetics, feminism, and psychoanalysis.

The Major

The major enables students to develop an integrated knowledge of Western literature, to strengthen their reading and writing abilities, and to prepare for careers demanding analytical, interpretive, and evaluative skills. Prospective majors should consult with the director of undergraduate studies. After declaring a major, a student chooses an adviser from the department's faculty. The requirements for the major are designed to allow each student to follow a course of study that combines intellectual rigor with the pursuit of personal interests. The specific contours of such a program are worked out in consultation with the student's adviser.

Requirements for the Major

1) Five courses in Comparative Literature at the 200 level and above, including the core course listed below. A student may include up to two literature courses from other departments.

2) One core course in Comparative Literature (for 1999 refusing Comparative Literature 304 [fall], to be taken by all majors in their junior or senior year. At the discretion of the department, students may enroll in core courses in both their junior and senior years.

3) Five courses in literature and other areas of the humanities at the 200 or higher level, to be taken in one or more foreign literature departments. Texts must be read in the original language. A student may offer one language course (conversation, composition, etc.) towards fulfilling the language requirement.

4) An honor's essay (Comparative Literature 493) of roughly fifty pages is now optional. It is to be written during the senior year under the direction of a faculty member, preferably from within the department, who has agreed to work in close cooperation with the student. Students are urged to begin research on their thesis topic during the summer preceding their senior year. In lieu of a Senior Honors Essay, students may take one course at the 400-600 level. The department also encourages:

1) a program that includes broad historical coverage (e.g., Comparative Literature 201–202: Great Books); intensive study of a single genre (e.g., Comparative Literature 363–364: The European Novel, Comparative Literature 356: Contemporary Fiction); analysis of problems in literary theory (e.g., Comparative Literature 302: Literature and Theory, Comparative Literature 448: Subject to Translation). The department also offers a number of strongly recommended 200-level courses designed to acquaint undergraduates with the discipline.

Comparative Literature 203: Introduction to Comparative Literature, as well as broading introductory courses in World Fiction (Comparative Literature 204) and World Poetry (Comparative Literature 205), with emphasis on the nineteenth and twentieth centuries.

2) a second foreign language, especially for students interested in graduate work in literature.

Honors

A student who completes the requirements for the major is eligible for the degree of Bachelor of Arts with honors in comparative literature. The department bases its decision on the student's achievements in the major, and in their overall academic performance at Cornell.

First-Year Writing Seminars

Most 100-level courses may be used toward satisfying the freshman writing seminar requirements. See "John S. Knight Writing Program" for a full description of the first-year seminar program.

Courses

**COM L 201** Introduction to Comparative Literature (also Asian 203) Fall or spring. 4 credits. Fall: W. Kennedy and department members; spring: E. Rosenberg and department members.

The course is intended to answer the question persistently asked by undergraduates: "What is comparative literature, anyway?" The format of the course is designed to acquaint students with the range and variety of the field by having members of the department present those aspects which reflect their areas of expertise and their methods of teaching. Of the two meetings each week, the first will generally take the form of a lecture; the second will be a discussion of the assigned text. Texts and topics range from bawdy tales by Chaucer and Boccaccio to the naturalism of Thomas Mann and the fantasy of Kundera, and from modern American poetry to postmodern critical theory.

**COM L 204** Global Fictions (also Asian 204) Spring. 4 credits. N. Melas.

This course will be an introduction and an inquiry into global perspectives on fiction. Can the reading of fiction point us towards becoming citizens of the world? How might we know this world? How might we imagine it? We will consider the condition of the stranger in this global era as well as construct a geography of reading. Readings will be drawn mainly but not only from the contemporary period and outside Europe. Readings will change depending on the instructor, but may include works of Rushdie, Marquez, Conde, Munif, Castellanos, Oe, Ngugi, Wolf, Kincaid, Homer.

Unlikely Comparative Literature 207, 205 is intended to be a survey that concentrates largely (but of course not exclusively) on foreign poetry. The course will cut across historical periods and poetic genres, from conventional "strict" genres of the sonnet-variety to forms more nearly associated with our own times: free verse, "the prose poem," etc. Difficult as it may be to avoid poets on the order of Shakespeare, Milton, Goethe, and Keats, we propose to focus on the practitioners of the craft from Baudelaire, Whitman, Hopkins, Mallarmé, and Rilke on down.

More advanced undergraduate seminars naturally tend to focus on contemporary literary theory; after all, it is essential for students of literature to be well-informed about contemporary theoretical debates, methodologies, and problems. But literary theory and criticism did not begin with the structuralist revolution of the 1960s, and it is essential for students to understand earlier developments—many of which will have the potential to provoke similar debates. Critical historicization should begin at home, with an awareness of how different the forms, practices, institutions and politics of literary criticism have been, and this course will thus introduce students to the vast field of pre-1960 debates. We will examine the historical evolution of key terms now more or less taken for granted as part of critical vocabulary, and we will pay particular attention to the

**COM L 223 The Comic Theater (also CLASS 223 and THETR 223)**  
Summer 2000 and spring 2001. 3 credits. For description, see Classics 223.

**COM L 236 Greek Mythology (also CLASS 236)**  
Fall. 3 credits. Limited to 200. D. Mankin. For description, see Classics 236.

**COM L 239 Cultural History of the Jews of Spain (also NES 239, JWST 239, REL ST 239 and SPAN L 239)**  
Fall. 3 credits. Not offered 1999–2000. R. Brann. For description, please see Near Eastern Studies 239.

**COM L 246 Israel: Literature and Society (also NES 236, JWS1 236)**  
Fall. 4 credits. Y. Halevi-Wise. For course description, please see Near Eastern Studies 339.

**COM L 279 The Russian Connection, 1830–1867 (also RUSL 279)**  
Fall. 4 credits. P. Carden. For course description, please see RUSL 279.

**COM L 280 The Russian Connection, 1870–Present (also RUSL 280)**  
Spring. 4 credits. P. Carden. For course description, please see Russian Literature 280.

**COM L 299 The Hebrew Bible and the Arabic Qur’an in Comparative Literature (also REL ST 299 and JWS1 299)**  
Spring. 4 credits. R. Brann. For course description, please see Jewish Studies 299.

**COM L 302 Literature and Theory (also COM L 622 and ENGL 302/602)**  
Fall. 4 credits. Not offered 1999–2000. J. Culler. Study of issues in contemporary theoretical debates, with particular attention to structuralism, deconstruction, psychoanalysis, and feminism. Readings from Barthes, Bataille, Foucault, J. Butler, B. Johnson, and others. (No previous knowledge of literary theory is assumed.)

**COM L 304 Europe and Its Others: An Introduction to the Literature of Colonialism**  
Fall. 4 credits. N. Melas. Core course for 1999–2000. Through an examination of selected works from the literature of the nineteenth century to the modern period, mainly written in English and French, the course will explore the problems and possibilities, imperialist prejudice for narration, both in the literature of imperialism and the literature against imperialism. Topics will include transcultural (de)formation of identity, exoticism and internationalism, racial romance, cultural pressures on reading and interpretation, and the powers and pitfalls of writing back. Probable authors: Hagar, Stevenson, Conrad, Camus, Conde, Achebe, Duras, Saleh. All readings available in English.

**COM L 305 Irony: An Introduction**  

**COM L 311 Modern European Literature and Culture (also RUSL 311, French 315)**  
Fall. 4 credits. G. Gibian. We shall concern ourselves with European culture as embracing the area from Russia through to the Atlantic Ocean, not as divided into Western, Eastern, or Central. European culture crosses the old East-West political boundaries. Case studies: Ireland, France, Czech Republic, Russia.

This course is designed for those interested both in the artistic, imaginative side of European literature and in the ways in which culture expresses some of the most significant concerns of our age. The conceptual links will include issues of national identity and social justice, as well as concerns of private emotions and individual personality. Popular culture, film, TV, theatre will be integrated with the reading and class discussion. Some authors who will be read: Flaubert, Charlotte Bronte (*Villette*), Karl Marx, Dostoevsky, Mayakovksy, Yeats, Malraux, Camus, Joyce, Solzhenitsyn, Kundera, and others.

**COM L 318 Bodies Politic: Queer Theories and Literature of the Body**  

This course will examine notions of corporeality —of bodies both social and individual—as deployed and analyzed in theories of gender and sexuality of the last century. How do concepts of perversion and degeneration haunt the idea of the social body? How are individual bodies stigmatized, encoded, and read within the social sphere? Sexology, psychoanalysis and new-historicist critiques, including those that emphasize the discursive intersections of sexuality, race and nationhood, will constitute our textual corpus in an attempt to question the habitual dichotomization of “theoretical” and “cultural” production, we shall also include a small number of literary and visual texts which comment upon these theoretical traditions. Included are works by Kafka, Havelock Ellis, Max Nordau, Andre Gide, Radclyffe Hall, E. M. Forster, Luce Irigaray, Cherrie Moraga, Judith Butler, Michael Foucault, Homi Bhabha, Biddy Martin, Esther Newton, Julia Kristeva, Janine Chasseguet-Smirgel.
COM L 322 Russian Theatre and Drama (also RussL 322)
Spring. 4 credits. S. Senderovich.
For course description, please see Russian Literature 322.

COM L 323 Encounters with the Dead (also ITAL L 323/623)
Fall. 4 credits. M. Migiel.
For description, please see Italian Literature 323/623.

COM L 326 Christianity and Judaism (also RelST 326)
Spring. 4 credits. C. Carmichael.

COM L 328 Literature of the Old Testament (also Rel. St. 328) #
Fall. 4 credits. C. M. Carmichael.
Analysis of small sections of well-known material for in-depth discussion.

COM L 330 Political Theory and Cinema (also GerSt 330, Govt 370, Theirt 339)
Spring. 4 credits. G. Waite.
For course description, please see German Studies 330.

COM L 334 Muslims, Christians and Jews in Islamic Spain: Literature and Society (also NES 339/639, JWST 339, Rel. St. 334 and SPAN L 339/699)
Fall. 4 credits. R. Brann.
For description, please see Near Eastern Studies 339.

COM L 335 The Modern and Contemporary Theatre (also THETR 335)
Fall. 4 credits. Not offered 1999-2000. R. Schneider.
For course description, please see THETR 335.

COM L 336 European Drama 1660-1900: Molière to Ibsen (also ENGL 335 and THETR 333) #
Major works by such writers as Molière, Congreve, Goethe, Schiller, Kleist, Shelley, Byron, Büchner, Ibsen, and Chekhov.
Attention to influential theater traditions (commedia dell'arte, melodrama, pantomime), theories and styles of acting (Diderot, Garrick, Keen); the role of theater in the cultural politics of Enlightenment and Revolutionary Europe (Rousseau, Burke).

COM L 338 Western and Eastern Films of Russian Literary Masterpieces (also RussL 337)
Fall. 4 credits. S. Senderovich.
For course description, please see Russian Literature 337.

COM L 343 Contemporary Mass Culture in Japan and in the U.S. (also Asian St 363)
For description, please see Asian Studies 363.

COM L 344 Tragic Theatre (also Classics 345)
Spring. 4 credits. F. Ahl.
For course description, please see Classics 345.

COM L 350 Education and the Western Literary Tradition (also RussL 350, GOIS 350)
Spring. 4 credits. P. Carden.
For course description, please see Russian Literature 350.

COM L 352 European Cultural History, 1750-1870 (also HIST 362) #
For description, please see History 362.

COM L 353 European Cultural History (also Hist 363)
For course description, please see History 363.

COM L 355 Decadence (also ENGL 355 and WOMNS 355)
Fall. 4 credits. E. Hanson.
For description, please see English 355.

COM L 356 Renaissance Literature
An introduction to Renaissance literary texts with some attention to cultural backgrounds and intellectual history. Readings from Machiavelli, Erasmus, Rabelais, Shak, Cervantes and others.

COM L 357 Orientalism, Exoticism, and Interiority (also FrLit 397)
Spring. 4 credits. T. Hope.
Not a spatially defined place on a map, but a cultural and psychological formation. Readings in French prose fiction, but also poetry, opera, painting, non-fiction and German and English literature.

COM L 358 Literature and Religion: Western Mysticism (also RomS 358, Rel. St. 358)
Analysis of some canonical texts of western mysticism toward a systematic view of their common features (a semiotics of the mystical text). Readings include: excerpts from the Bible, Plotinus, Psuedodionysius, Bernard of Clairvaux, Ibn Arabi of Murcia, The Zohar, Meister Eckhart, Teresa of Avila, John of the Cross, and expressions of silence and the ineffable in our times.

COM L 362 The Culture of the Renaissance II (also ENGL 325, HIST 364, MUS 390, ART H 351 and Rel. St. 362)
Spring. 4 credits. C. Kaske, W. J. Kennedy.
Members of various departments will lecture on Luther, Michelangelo, Edmund Spenser, Cervantes, Copernicus, Galileo, and Monteverdi. Guest lectures will include Peter Dear, History; Esther Dotson, History of Art; and Rebecca Harris-Taylor, History. Lectures and discussion will introduce different methods of interpretation and of historical analysis. Written requirements: two short papers and a final take-home examination.

COM L 363-364 The European Novel (also SpanL 363) #
363, fall; 364, spring. 4 credits. Comparative Literature 363 and 364 may be taken independently of each other. Fall: C. M. Arroyo; spring: J. Ashton.

363: From Boccaccio to Goethe. Survey of the history of the novel from its origins to the end of the eighteenth century. The new genre of Humanism and the medieval romances of chivalry. Ambiguities derived from the lack of the word “novel.” Different steps in the conquest of realism. The novel and intellectual history in different epochs: character and structure in the novels and contemporary philosophical views on man, cosmos, gender, and social classes. Readings include Boccaccio’s Fiammetta, G. Pérez’s Lazarillo de Tormes, Cervantes’s Don Quixote, Mme de Lafayette’s The Princess of Cleves, Defoe’s Robinson Crusoe, Heracle Walpole’s The Castle of Otranto, and Goethe’s The Sorrows of Young Werther, as well as a short package containing theoretical statements about the genre from Giraldi Cinthio to Goethe: All texts read in English.

364: From Stendhal to the present (in translation). Close reading of novels from the 19th and 20th centuries: Stendhal’s The Red and the Black; Flaubert’s Madame Bovary; Dostoevsky’s Crime and Punishment; Joyce’s Portrait of the Artist as a Young Man; Kafka’s The Metamorphosis; and Kundera’s The Unbearable Lightness of Being. Study of the changing ways of representing recurring themes: the role of the creative imagination; the city and country; rebellions and revolutions; communities and solidarity; dominant groups and minorities (social, ethnic, religious, psychological); interplay of politics, sex, and humor. Artistic and structural developments: coherence, connectedness, fragmentation; from realism to modernism.

COM L 365 Contemporary Fiction
Fall. 4 credits. B. Maxwell.
A study of European fiction and drama largely drawing on texts from the first half of the twentieth century. We will pay particular attention to the making of literary types and characters; to traces of utopian and messianic elements; to the relations between memory and political revolution; and to the motive of resentment. Readings (in translation) chosen from the following: Robert Walser, Snowwhite and The Walk; Franz Kafka, The Trial; Thomas Mann, Death in Venice; Bertolt Brecht, The Rise and Fall of the City of Mahagonny; Joseph Roth, Hotel Saucey; Alfred Döblin, Berlin Alexanderplatz; Christa Wolf, The Quest for Christa T; Louis Aragon, Paris Peasant; Louis-Ferdinand Céline, Death on the Installment Plan; Elio Vittorini, In Sicily; Natalia Ginzburg, stories; and Isaac Babel, stories. Collateral theoretical readings by Georg Lukacs, Ernst Bloch, Bertolt Brecht, Walter Benjamin, Siegfried Kracauer, Gershon Scholem, Elias Canetti, and Christa Wolf.
I 422

ARTS AND SCIENCES - 1999-2000

COM L 367 The Russian Novel (also RUSS L 367)
Fall. 4 credits. G. Gibian.
For description, please see Russian Literature 367.

COM L 368 Visual Culture and Social Theory (also GOVT 375 and ART H 370)
Fall. 4 credits. S. Buck-Morris.
For description, please see Government 375.

[COM L 375 Chekhov (also RUSS L 373)]
S. Senderovich.
For course description, please see Russian Literature 375.

COM L 376 Chinese Narrative Fiction (also Asian 374)
Spring. 4 credits. E. Gunn.
For course description, please see Asian Studies 374.

COM L 385 Reading Nabokov (also RUSS L 385, ENGL 379)
Fall. 4 credits. Enrollments limited to 25.
G. Shapiro.
For course description, please see Russian Literature 385.

[COM L 387 Interpretation and/as Violence]
Staff.
This course is a response to the approach of the millennium and the increase of violence that seems destined to accompany it. The working hypothesis of the course is that reading should be a process of radical patience which resists the millennial drive towards apocalypse, and that 'reading' should be distinguished from 'interpretation.' The course will introduce students to the history and theory of interpretation and will show how it has implied a certain kind of violence at least since the beginnings of Christianity. We will begin by exploring how the New Testament comes into being as a more or less violent interpretation of Jewish scriptures, and how Christianity sets up a strong interpretative regime that continues to exert its power today. Given that the ethics of interpretation is becoming increasingly urgent, we will focus on how literary interpretation becomes institutionalized in order to rethink what happens when a reader meets a text. Particular attention will be given to developments in nineteenth-century Germany, where theological categories gradually became secularized as part of the founding process of the modern university.

COM L 388 Critical and Comparative Literature in Central and Eastern Europe (also RUSS L 389)
G. Gibian.
For course description, please see Russian Literature 389.

COM L 394 Trans-Atlantic Renaissance (also ROM S 394)
J. Piedra.
For course description, please see Romance Studies 394.

COM L 395 Fin de Siècle or Belle Epoque?: Parisian Culture Around 1900 (also FRLIT 393)
Staff.
Focusing on Parisian culture between 1880 and 1914, a period in which artists and intellectuals confronted a startling new world wrought by industrial production, urban concentration, and political reorganization, this course will consider the relationship between decadence and modernity, with special attention to sexuality and the subject of modernity in the Belle Époque. Themes to be considered include: 1) theories of pathology, decadence, and difference; 2) city spectacle and mass entertainment; 3) the retreat to the interior as a site of psychological exploration and artistic innovation; 4) feminine culture and the New Woman; 5) spaces of the demimonde (the culture of courtesans, sapphism 1900); 6) identity and technological innovation. Short critical texts will be read in relation to well-known authors of the period such as Max Nordau, Zola, Hugo, Rackham, Colette, and Proust. Requirements will include short oral presentations and a term paper.

COM L 396 German Film (also GERST 396 and THETR 396)
D. Bathrick.
For description, please see Theatre Arts 396.

COM L 400 Augustine's Confessions (also SOC HUM 442 and NES 490)
Fall. 4 credits. Enrollments limited to 15.
C. Brittain.
For course description, please see Society for Humanities 402.

COM L 404 History into Fiction: Nazis and the Literary Imagination (also JewST 414, ENGL 404 and GERST 414)
Fall. 4 credits. E. Rosenberg.
For description, see ENGL 404.

COM L 408 Operatic Contacts (also SOC HUM 405)
Fall. 4 credits. Enrollments limited to 15.
A. Groos.
For course description, please see Society for Humanities 417.

COM L 409 Genius and Madness in German Literature (also GER ST 428)
A. Schwartz.
For course description, please see German Literature 428.

COM L 410 Semiotics and Language (also LING 400 and FR ROM ST 400)
Spring. 4 credits. Prerequisite: some background in an area relevant to semiotics: e.g., linguistics, philosophy, psychology, anthropology, or literature, or permission of instructor. Not offered 1999-2000.
L. W. Vaughan.
For description, please see Linguistics 400.

COM L 411 The Short Novel from Flaubert and James to the Present
E. Rosenberg.
Discussion of some ten authors who excelled in the form of the novella and whose names are thus up to a point "given": in addition to James and Flaubert, writers like Conrad, Tolstoy, Mann, Kafka, Joyce, Faulkner, Marquez, Morrison. One novella each week or week and a half, but not in canonical order; e.g., Conrad's Heart of Darkness, Kafka's Penal Colony, and Ozuik's The Shawl as versions of modencies (or significations); the question of "status" as this is reflected in the relations between employer and domestic in things like Flaubert's Simple Heart, Tolstoy's Master and Man, and Gertrude Stein's The Good Anna; versions of the recit--specifically on the conditions of marriage—in Tolstoy's Kreutzer Sonata and (to stick with Beethoven) André Gide's Pastoral Symphony; same-sex relations in James's Pupil and Mann's Death in Venice; then also varieties of the fantastic in, say, Jekyll and Hyde, Turn of the Screw, Dostoevsky's Double.

COM L 413 Death, Culture and the Literary Monument
N. Melas.
Beginning with Homer's Iliad, this course will inquire into the monumental transformation of death into immortality in the literary composition. How do death's negotiations become fiction's triumph? We will pay particular attention to the fate of this procedure when its subjects are no longer heroic warriors but slaves and women. How do colonial domination and gender difference alter the aesthetic procedures and assumptions underlying commemoration and literary immortality? In addition to death and language, we will consider such themes as the relation of antiquity to the present, of identity to its dissolution and of politics to culture. Readings of literary texts drawn from a variety of languages and traditions will be attended by selected readings in critical theory and a glance at visual culture, particularly surrounding monuments commemorating the emancipation of slaves and the holocaust. Authors will include Homer, Derek Walcott, Simone Schwarz-Bart, Virginia Woolf, Krista Wolf, Tayeb Salih, Michelle Blanchet, Hegel, Orlando Patterson, Walter Benjamin.

COM L 416 Contemporary Literary Criticism (also ASIAN 406)
Spring. 4 credits. Y. Kim.
For course description, please see Asian Studies 406.

COM L 417 Faust (also GER ST 417)
H. Deinert.
For course description, please see German Studies 417.

COM L 418 Virtual Orientalisms (also ASIAN 415)
Spring. 4 credits. B. deBary.
Registration limited to 25. For course description, please see Asian Studies 415.

COM L 419-420 Independent Study
419: fall; 420: spring. Variable credit.
Comparative Literature 419 and 420 may be taken independently of each other. Applications available in 145 C.S.

COM L 421 Approaches to Discourse (also LANG 420)
H. Tao.
For course description, please see LANG 420.
COM L 424 Augustine's Dialogues of the Soul (also SOC HUM 403)
Spring. 4 credits. Enrollments limited to 15. C. C. Brittain.
For course description, please see Society for Humanities 403.

[COM L 425 Marx, Freud, Nietzsche (also GER ST 415, GOVT 473)]
G. Waite.
For course description, please see German Studies 415.

[COM L 426 New Testament Seminar (also REL ST 428)]
Spring. 4 credits. Enrollment is limited to 20 students.
C. Carmichael.

COM L 428 Biblical Seminar (also REL ST 427)
Fall. 4 credits. C. Carmichael.
Discussion of attitudes to sexuality in the Bible. In Old and New Testament texts we will examine the clash between ancestral behavior and subsequent laws and between legal and religious ideas. Topics will include marriage and divorce, incest, intermarriage, gender discrimination, guilt and shame, homosexuality, women and purity, sexual language and symbols. It should be possible to say something new about the topics and also, because of the perennial nature of the issues, to say something that is relevant to contemporary life. The seminar is for teachers of ancient history, biblical, Jewish, and religious studies, cultural anthropology, ethics, history of law, literary studies, sociology, western civilization, and women's studies.

COM L 429 Readings in the New Testament (also NES 429, REL ST 429 and ENGL 429)
Fall. 4 credits. Limited to 30 students.
J. P. Bishop.
Close readings of representative texts from the New Testament in modern scholarly editions, with the help of appropriate introductory and specialized commentary. The focus will be on Acts and the letters of Paul. All readings will be in English, but repeated reference to the Greek original will be made. Graduate students and undergraduates from other colleges who are interested in the material should not feel inhibited about enrolling. The approach will be primarily exegetical; that is, we will try to find out what the texts say and what they mean by what they say. Thus we can hope to stay open to scholarly and religious issues alike.

COM L 431 Testimony, Law and Literature (also SoCh 420)
Spring. 4 credits. M. Sanders.
For course description, please see Society for Humanities 420.

COM L 433 Visual Studies in the Diaspora (also SoCh 410)
Fall. 4 credits. K. Mercer.
For course description, please see Society for Humanities 410.

COM L 434 Nabokov vs. Freud (also Russ-L 435)
Spring. 4 credits. S. Senderovich.
For course description, please see Russian Literature 435.

[COM L 440 Semiotics and Texts (also LANG 435)]
For course description, please see LANG 455.

COM L 444 China Goes Global (also SocH 422)
Spring. 4 credits. Q. Zhang.
For course description, please see Society for Humanities 422.

[COM L 445 Nabokov vs. Sartre (also RUSS L 425)]
S. Senderovich.
For course description, please see Russian Literature 425.

[COM L 449 Misogyny and Its Readers (also COM L 649, ITAL L 405/609, WM ST 409/609)]
M. Migiel.
For course description, please see Italian Literature 409.

[COM L 450 Renaissance Poetry (also COML 650, EngL 422/822)]
Fall. 4 credits. W. Kennedy.
A reading and discussion of key texts in lyric poetry from Italian, French, English, and other European literatures of the Renaissance. Topic for Fall: national identity in Petrarch, DuBellay, Sidney, and Wroth.

COM L 451 Renaissance Narrative
Spring. 4 credits. W. Kennedy.
A reading and discussion of key texts in narrative epic and chivalric romance from Italian, French, English, and other European literatures of the Renaissance.

[COM L 452 Renaissance Humanism (also COM L 652)]
W. Kennedy.
A reading and discussion of key texts by Renaissance humanists in Italian, French, English and other European literatures from the fourteenth to seventeenth centuries.

[COM L 455 Caribbean Literature (also AFRICANA ST 455)]
Fall. 4 credits. W. Kennedy.
Enrollment limited to 15.
A. Adams.
For description, please see Africana Studies 455.

[COM L 456 Boccaccio: Gender, Power, and the Medieval Text (also ITAL L 445/645 and WOMNS 448/548)]
M. Migiel.
For description, please see Italian Literature 445/645.

COM L 459 Opera, History, Politics, Gender (also HIST 456, MUSIC 474, ITAL 456, SOC HUM 459, WOMST 484)
Spring. 4 credits. M. Steinberg, S. Stewart.
For course description, please see History 456.

COM L 460 Francophone Sub-Saharan African Cinema and Literature
Fall. 4 credits. D. Thomas.
Lectures will focus on the history of Western colonial contact with Africa (from colonization to decolonization), the particular conditions in which African cinema emerged, language politics, production and distribution, film and popular culture, the impact of colonial education and new national culture on traditional Africa, African women and sexual politics, satires and fables of today's Africa, political commitment, and the consequences of modernization on African traditions and rural life.

In addition to the films that will be screened, students will be required to read a number of novels and plays. This will allow students to compare and contrast the respective merits and effectiveness of writers and filmmakers treating similar sociological circumstances, and to confront the particular problems facing film and print culture.

[COM L 463 Decadence, Degeneration and the 19th-Century Imaginary]
T. Hope.
Through critical reading of French, British and German prose fiction as well as examples of medical, anthropological and philosophical thought, we shall examine the social significance of discourses of disease, decadence and degeneration from the late eighteenth century to the early twentieth. How are questions of bodily pathology related to the construction of "normal" bodies? How does perversion emerge at the core of theories of heredity and genealogy that traverse Europe's colonial scenes? What is the relationship between symptoms and texts, between sickness and subversion, in the mapping of gender, class, race and sexuality onto the body? The course material will include readings from Jean-Jacques Rousseau, Alexandre Dumas fils, Edgar Allan Poe, Honoré de Balzac, Arthur Schnitzler, Friedrich Nietzsche, Sigmund Freud, Rémy de Gourmont, Havelock Ellis, Radclyffe Hall and Thomas Mann. Students may read in the original language or in translation.

COM L 465 Feminist Theory/Lesbian Theory (also WomSt 445, GerSt 465)
Fall. 4 credits. A. Villarejo.
For course description, please see Women's Studies 465.

[COM L 472 Poetics of the 1990s (also ENGL 408, SPAN L 472, and GER ST 472)]
Fall. 4 credits. Enrollment limited to 15 students.
Where is poetry now? Where is it heading as we move toward the twenty-first century? What is its current situation in light of the historic changes that have occurred since 1989? Exploring how contemporary poetry is responding to a new era of altered expectations and redrawn boundaries, a time of renewal and redefinition, we will track the principal issues, directions, figures, and forces shaping the process of poetry's unfolding in the twentieth century's final decade. Materials will be drawn from a wide variety of forms and contexts, including movies, literary journals, general circulation magazines, and anthologies, as well as individual poetry collections.

COM L 474 Topics in Modern European Intellectual and Cultural History (also Hist 474)
Fall. 4 credits. D. LaCapra.
For course description, please see History 474.

COM L 477 Mourning People: Melancholias of Nation and Race (also COM L 677, FrLit 409/609)
Fall. 4 credits. T. Hope.
This course will examine the usefulness of psychoanalysis to postcolonial studies, race theory, and genealogies of nationhood. We
shall concentrate on French and Francophone English and Anglophone literatures as "case studies" intended to test the limits of historicist theories of race and nation including those of Todorov, Bhabha, Said, Spillers, Cheng, Anderson, Gisnant and Freud. Why is the imagination of community so tightly linked with the specter of violent origins? Why is a collectivity grounded in nationhood in fact ruptured by abysses of dispossession? Why does the genealogical imagination of race, similarity and assimilation depend upon the specter of fleshly pathology and archaic symptomatics? Course material will be wide-ranging, but we shall depart from Bernardin de Saint-Pierre's national (French? Mauritian?) fable, Paul et Virginie. Proceed through nineteenth-century French and British "cryptic orientalism" and imperial agendas in Empire as well as psychoanalytic and national discipline, psychoanalytic Egyptology, Africanist and diasporic nostalgias, memory and Jewish identity before and since the Holocaust, and migrant mournfulness. In general, the course will move from "allo-melancholic" to "auto-melancholic" cultural formations, investigating, for example, how Mauritian culture has inherited European melancholy as its colonial legacy and how the metaphors have responded to the loss of former colonies.

**COM L 478 Nationalism and National Literatures in Francophone sub-Saharan Africa (also COM L 678)**

Spring. 4 credits. D. Thomas. This seminar will begin with an examination of the history of French colonial contact with francophone sub-Saharan Africa. Our discussion will focus on colonial expansionism, French assimilationist policies, and the gradual emergence of the nationalist discourse that culminated in the gradual and systematic dismantling of the Empire. This information will subsequently be brought to the appreciation and understanding of cultural phenomena procured by francophone sub-Saharan African novelists and filmmakers between 1950-1990.

**COM L 481 Baldaire in Context (also COM L 680)**

**COM L 482 Latin American Women Writers (also SpanL 492, WmSt 481)**

Spring. 4 credits. D. Casillo. For course description, please see Spanish Literature 492.

**COM L 483 Immigration the Holocaust (also EngL 483)**

Spring 2000. 4 credits. D. Schwarz. For course description, please see English 458.

**COM L 493 Senior Essay**

Fall and spring. 8 credits. Hours to be arranged individually in consultation with the director of the Senior Essay Colloquium. Approximately fifty pages to be written over the course of two semesters in the student's senior year under the direction of the student's advisor. An "R" grade will be assigned on the basis of research and a preliminary draft completed in the first semester. A letter grade will be awarded on completion of the second semester.

**COM L 604 Translation and the Global Marketplace**

Fall. 4 credits. Not offered 1999-2000. C. Spivak, P. Boundary. The seminar will investigate the global politics of translation, focusing on how works are picked up (or not) for international circulation. Issues to be examined include: how the politics of local censorship restrict or enable visibility; how the problem of cultural essentialism is packaged and marketed transnationally; how cultural and national identity come through (or not) in translation; how experiments in non-standard English (ebonics, cubonics, creolite, drug argot, and class slang) disturb or reaffirm linguistic identity politics. In addition to critical texts, the course will engage with textual studies of Ken Saro-wiwa's Sozaboy: A Novel Written in Rotten English, Salman Rushdie's The Satanic Verses, Theresa Hak Cha's Dictée, Patrick Chamoiseau's Texaco, Irvine Welsh's Trainspotting, and Gustavo Perez Firmat's Life on the Hyperside. The final section of the seminar will be devoted to exploring ways in which a growing number of non-western writers have begun to break out of traditionalist narrative modes in order to "translate" the effects of new media on literary representation, from Afro-futurism to postcolonial cyberpunk.

**COM L 609 Comparison and Cultural Difference**

Fall. 4 credits. Not offered 1999-2000. N. Melas. This course will be a wide-ranging investigation of the pitfalls and possibilities for cross-cultural comparison. We will examine the structure and mechanisms of comparison, both as a disciplinary method and as a concept or practice: to what extent and in what circumstance can comparison produce cultural difference, consolidate it, dissolve it, erect borders, inhabit borderlands, propose a global ecumene? With particular attention to colonialism and globalization, we will inquire into the relation between various modes of comparison and broader contexts and ideologies. Though focused on the humanities and on theoretical texts, readings will include incursions into the social sciences and selected poetry and film. Authors may include Lycard, Foucault, Fanon, Tilley, Gilroy, Clifford, Appadurai, Bhabha, Lanser, Kincaid, Walcot.

**COM L 610 Modern Japanese Studies: The Formation of the Field in History and Literature (also ASIAN 609)**

Spring. 4 credits. B. deBary, N. Sakai, J. Koschmann. For course description, please see Asian Literature 609.

**COM L 619-620 Independent Study**

619, fall; 620, spring. Variable credit. For course description, please see Asian Literature 609.

**COM L 622 Literature and Theory (also COM L 302 and ENGL 302/602)**

Fall. 4 credits. Not offered 1999-2000. J. Culler. For description, please see Comparative Literature 302.

**COM L 623 Encounters with the Dead (also Ital L 623, JewS 623)**

Fall. 4 credits. M. Migiel. For course description, please see Italian Literature 623.

**COM L 625 Literature and Affect (also GerSt 617)**

Fall. 4 credits. A. Schwarz. For course description, please see German Studies 617.

**COM L 626 Baroque (also GER ST 627)**

Fall. 4 credits. Not offered 1999-2000. G. Waite. For description, please see German Studies 627.

**COM L 641 Bakhtin as Reader (also RUSS L 641)**

Spring. 4 credits. Also open to undergraduates with permission of instructor. Not offered 1999-2000. P. Carden. For description, please see Russian Literature 641.

**COM L 649 Misogyny and Its Readers (also COM L 449, ITAL L 409/609, WM ST 409/609)**

Fall. 4 credits. Not offered 1999-2000. M. Migiel. For course description, please see Italian Literature 409.

**COM L 650 Renaissance Poetry (also ComL 450, EngL 622)**

Fall. 4 credits. W. Kennedy. For course description, please see Comparative Literature 450.

**COM L 652 Renaissance Humanism (also COM L 452)**

**COM L 656 Aesthetic Theory: The End of Art (also GER ST 656)**

Spring. 4 credits. Not offered 1999-2000. P. Gilgen. For course description, please see German Studies 656.

**COM L 657 Seminar in Dramatic Theory (also THEATR 637)**

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999-2000. R. Schneider. For description, please see Theatre Arts 637.

**COM L 660 Visual Ideology (also GerSt 660, Teatr 660)**

Spring. 4 credits. G. Waite. For course description, please see German Studies 660.

**COM L 662 Cinematic Desire (also EngL 660, WmSt 661)**

Fall. 4 credits. E. Hanson. For course description, please see English 660.

**COM L 664 Literature and the Uncanny (also GER ST 668)**

Fall. 4 credits. Not offered 1999-2000. A. Schwarz. For course description, please see German Studies 668.

**COM L 671 Transnational Imaginaries: Globalization and Culture**

Fall. 4 credits. N. Melas. The term "globalization" has become ubiquitous in recent years as the primary conceptual frame and material basis for understanding contemporary transnationalism. It evokes a brave new borderless world in
which politics, culture, and social formations are no longer necessarily congruent nor primarily beholden to national boundaries, thus making neocolonial domination easier to see and harder to combat. It triumphantly or despairingly announces the end of history when space precedes time as the measure of human experience, and that experience exceeds the grasp of aspects of our understanding of culture—both in its ethnographic and humanist guises—and of the categories through which we apprehend and analyze it. The question of the mutation of culture in globalization is most often framed either in terms of the prospects for global culture and its inverse, a regeneration of resistant and hybrid localism, or in terms of the global reach of chiefly U.S. popular culture through the media. While considering these issues, this seminar will focus on how globality is represented, or rather imagined, particularly in cultural texts (chiefly theory, literature, and film) marginal to the centers of power. In addition to providing a critical survey of some of the most influential texts and debates on the subject of globalization, this seminar will also attempt a re-evaluation (not to say a rehabilitation) of the position of "the Global" and the pivotal if often covert role it plays in claims for cultural resistance. Authors may include Amin, Wallerstein, Hall, Myoshi, Harvey, Robertson, Appadurai, Agamben, Wallcott, Brennan, Jameson, Glissant, Mies.

COM L 674 Contemporary Poetry and Culture: 1968-1998 (also ENGL 697 and GERST 674)
The redrawing of cultural and political boundaries underway since the late 1980's has made it possible to conceive of the poetry of the Cold War era with a degree of closure unimaginable only a few years ago. In light of this changed situation, we will focus on the second half of the post-1945 period—the thirty years extending from 1968 to the present—with particular attention to the past two decades. Exploring issues of emerging and evolving importance for a poetry of the present moment in light of the recent past, we will consider modes as well as alternative practices; canon formation, gender, and multiculturality; the roles of the publishing industry, popular culture, creative writing programs, and new computer technologies in shaping reading habits and writing communities.

COM L 675 After the Divide: German Critical Theory of the Seventies and Eighties (also GERST 675 and HIST 675)
For description, please see German Studies 675.

COM L 677 Mourning People: Melancholias of Nation and Race (also FrLit 609)
Fall. 4 credits. T. Hope.
For course description, please see Comparative Literature 477.

COM L 678 Nationalism and National Literatures in Francophone sub-Saharan Africa (also COM L 478)
Spring. 4 credits. D. Thomas.
For course description, please see Comparative Literature 478.

COM L 680 Baudelaire in Context (also COM L 481)
For course description, please see Comparative Literature 481.

COM L 683 Imagining the Holocaust (also COM L 683, ENGL 458/658, JWST 458/658)
Spring. 4 credits. D. Schwarz.
For course description, please see English 458.

COM L 686 Althusser and Lacan (also GER ST 686, FR LIT 623)
For course description, please see German Studies 686.

COM L 689 Adorno's Aesthetic Theory (also GER ST 689)
For course description, please see German Studies 689.

COM L 695 Post-Modern Thought and Area Studies (also JapL 614)
Fall. 4 credits. B. dehny.
For course description, please see Japanese Literature 614.

COM L 696 Conceptualizing Cultural Contact (also GERST 696, NES 696)
Spring. 4 credits. L. Adelson.
For course description, please see German Studies 696.

COM L 699 German Film Theory (also GERST 699 and THETR 699)
For description, please see Theatre Arts 699.

COMPUTER SCIENCE

The Department of Computer Science is affiliated with both the College of Arts and Sciences and the College of Engineering. Students in either college may major in computer science. For details, visit our Worldwide Web site at http://www.cs.cornell.edu/ugrad

The Major
CS majors take courses in algorithms, data structures, logic, programming languages, scientific computing, systems, and theory. Electives in artificial intelligence, computer graphics, computer vision, databases, multimedia, and networks are also possible. Requirements include:
- four semesters of calculus (MATH 111-122 (or 112)-221-222 or 191-192-293-294)
- two semesters of introductory computer programming (COM S 100 and 211 or 212)
- a seven-course computer science core (COM S 222, 280, 314, 381, 410, 414, and 482)
- two 400+ computer science electives, totaling at least 6 credits
- a computer science project course (COM S 413, 415, 418, 433, 473, 501, 514, 519, or 604)
- a 3+ credit mathematical elective course (OR&IE 270, MATH 300+, T&AM 300+, etc.)
- two 300+ courses that are technical in nature and total at least six credits
- a three course specialization in a discipline other than computer science. These courses must be numbered 300-level or greater and total at least nine credits.

The program is broad and rigorous, but it is structured in a way that supports in-depth study of outside areas. Intelligent course selection can set the stage for graduate study and employment in any technical area and any professional area such as business, law, or medicine. With the advisor, the computer science major is expected to put together a coherent program of study that supports career objectives and is true to the aims of liberal education.

Admission
The prerequisites for admission to the major are:
1) Completion of Computer Science 100-211 (or 212)-280
2) Completion of Mathematics 111-122-221 or Mathematics 191-192-293
3) B- or better in all computer science and mathematics courses
4) Acceptance by the department's admissions committee

After admission, students are expected to maintain at least a 2.75 grade-point average in their major courses. Any grade below C- in a core course or related elective is not acceptable.

Honor. To qualify for departmental honors a student must have:
- maintained a cumulative GPA>=3.5
- completed 8 credit hours of COM S course work at or above the 500 level
- completed 6 credit hours of COM S 490 research with a COM S faculty member, spread over at least two semesters and with grades of A- or better.

Note: Honors courses may not be used to satisfy the COM S 400+ elective requirement, the COM S project requirement, the math or technical electives, or the specialization minor. See the COM S undergraduate website for more information on eligibility. http://www.cs.cornell.edu/ugrad

Courses
For complete course descriptions, see the computer science listing in the College of Engineering section.

COM S 099 Fundamental Programming Concepts
Fall, summer. 2 credits. S-U grades only. No prerequisites.
COM S 100 Introduction to Computer Programming
Fall, spring, summer. 4 credits.
During the fall semester, two versions of COM S 100 (COM S 100a and COM S 100b) are available as described in the computer science listing in the College of Engineering.

COM S 101 Introduction to Cognitive Science (also COGST 101, LING 170, and PSYCH 102)
Fall. 3 credits.

COM S 113 Introduction to C
Fall, spring. 1 credit. Weeks 5-8.
Prerequisite: COM S 100 or equivalent programming experience. Credit is granted for both COM S 113 and 213 only if 113 is taken first. S–U grades only.

COM S 114 Unix Tools
Fall, spring. 1 credit. Weeks 1-4.
Prerequisite: COM S 100 or equivalent programming experience. S–U grades only.

COM S 130 Creating Web Documents
Fall. 3 credits.

COM S 201 Cognitive Science in Context Laboratory: Explorations of Cognitive Science in Ecological Settings (also COGST 201 and PSYCH 201)
Fall, spring. 4 credits. Limited to 24 students. Prerequisite: Introduction to Cognitive Science (PSYCH 102, COGST 101, COM S 101), or written permission of the instructor. Disc and demos, M W 10:10, lab, M or W 1:25-4:25, plus additional hours to be arranged. B. Halpern and staff.

COM S 202 Transition to Java
Fall, spring. 1 credit. Weeks 1-4.
Prerequisites: COM S 100; COM S 212 recommended.

COM S 211 Computers and Programming (also ENGRD 211)
Fall, spring, summer. 3 credits. Prerequisite: COM S 100 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.

COM S 212 Structure and Interpretation of Computer Programs (also ENGRD 212)
Fall, spring. 4 credits. Prerequisite: COM S 100 or equivalent programming experience. Credit will not be granted for both COM S 211 and 212.

COM S 213 C++ Programming
Fall, spring. 2 credits. Prerequisite: COM S 211 or 212 or equivalent programming experience. Students who plan to take COM S 113 and 213 must take 113 first. S–U grades only.

COM S 222 Introduction to Scientific Computation (also ENGRD 222)
Spring, summer. 3 credits. Prerequisites: COM S 100 and (MATH 222 or 294).

COM S 280 Discrete Structures
Fall, spring. 4 credits. Pre- or co-requisite: COM S 211 or 212 or permission of instructor.

COM S 314 Introduction to Digital Systems and Computer Organization
Fall, spring. 4 credits. Prerequisite: COM S 211 or 212 or equivalent.

COM S 318 Introduction to Theory of Computing
Fall, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481.

COM S 409 The Science of Programming
Spring. 4 credits. Prerequisite: COM S 280 or equivalent. Not offered every fall; semester to be announced.

COM S 409 Data Structures and Algorithms for Computational Science
Spring. 4 credits. This course is not open to COM S majors. Credit will not be granted for both COM S 409 and 410. Prerequisite: COM S 211 or 212 or equivalent programming experience.

COM S 410 Data Structures
Fall, spring, summer. 4 credits. Prerequisite: COM S 280 or permission of instructor.

COM S 411 Programming Languages and Logics
Fall. 4 credits. Prerequisites: COM S 410 or permission of instructor. Not offered every fall; semester to be announced.

COM S 412 Introduction to Compilers and Translators
Fall. 3 credits. Prerequisites: COM S 314, 410, and 381 or 481. Corequisite: COM S 413.

COM S 413 Practicum in Compilers and Translators
Spring. 2 credits. Prerequisites: COM S 314, 410, and 381 or 481. Corequisite: COM S 412.

COM S 414 Systems Programming and Operating Systems
Fall, summer. 3 credits. Prerequisite: COM S 314 or permission of instructor.

COM S 415 Practicum in Operating Systems
Fall. 2 credits. Prerequisite: COM S 410. Corequisite: COM S 414.

COM S 417 Computer Graphics and Visualization (also ARCH 374)
Spring. 3 credits. Prerequisite: COM S 211 or 212.

COM S 418 Practicum in Computer Graphics (also ARCH 375)

COM S 421 Numerical Analysis
Fall. 4 credits. Prerequisites: MATH 294 or equivalent, one additional mathematics course numbered 300 or above, and knowledge of programming.

COM S 432 Introduction to Database Systems
Fall. 3 credits. Prerequisites: COM S 211 or 212 and COM S 410. Recommended: COM S 213 and strong programming skills in C, C++, or Java.

COM S 433 Practicum in Database Systems
Fall. 2 credits. Corequisite: COM S 432.

COM S 444 Distributed Systems and Algorithms
Fall. 4 credits. Pre- or co-requisite: COM S 414 or permission of instructor. Not offered every year. Not offered 1999-2000.

COM S 472 Foundations of Artificial Intelligence
Fall. 3 credits. Prerequisites: COM S 211 or 212 and COM S 280 or equivalent.

COM S 473 Practicum in Artificial Intelligence
Fall. 2 credits. Prerequisites: COM S 211 or 212 and COM S 280 or equivalent. Corequisite: COM S 472.

COM S 481 Introduction to Theory of Computing
Fall. 4 credits. Prerequisite: COM S 280 or permission of instructor. Credit will not be granted for both COM S 381 and 481.

COM S 482 Introduction to Analysis of Algorithms
Spring. 4 credits. Prerequisites: COM S 280 and either 381 or 481, or permission of instructor.

COM S 486 Applied Logic (also MATH 486)
Fall or spring. 4 credits. Prerequisites: MATH 222 or 294, COM S 280 or equivalent (such as MATH 332, 432, 434, 481), and some course in mathematics or theoretical computer science.

COM S 490 Independent Reading and Research
Fall, spring. 1–4 credits.

COM S 501 Software Engineering: Technology and Technique
Fall. 4 credits. Prerequisite: COM S 410 and knowledge of the C programming language.

COM S 513 System Security
Spring. 4 credits. Prerequisites: COM S 414 or 519 and familiarity with JAVA programming language.

COM S 514 Intermediate Computer Systems
Fall or spring. 4 credits. Prerequisites: COM S 414 or permission of instructor.

COM S 515 Practicum in Systems
Fall or spring. 1–2 credits. Co-requisite: COM S 514.

COM S 519 Engineering Computer Networks
Fall. 4 credits. Prerequisites: COM S 314 and 410, or permission of instructor.

COM S 522 Computational Tools and Methods for Finance
Spring. 4 credits. Prerequisites: programing experience (e.g. C FORTRAN, or MATLAB), some knowledge of numerical methods, especially numerical linear algebra.

COM S 574 Heuristic Methods for Optimization (also CEE 509)
Spring. 3 or 4 credits. Prerequisite: COM S/ENGRD 211 or 212 or 222 or CEE/ENGRD 241, or graduate standing, or permission of instructor.
COM S 601 System Concepts
Fall. 3 credits. Prerequisite: open to students enrolled in the COM S Ph.D. program.

COM S 611 Advanced Programming Languages
Fall. 4 credits. Prerequisites: graduate standing or permission of instructor.

COM S 612 Compiler Design for High-Performance Architectures
Spring. 4 credits. Prerequisites: COM S 314 and 412 or permission of instructor.

COM S 613 Concurrent Programming
Spring. 4 credits. Prerequisites: COM S 414 or permission of instructor. Not offered every year; semester to be announced.

COM S 614 Advanced Systems
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor.

COM S 618 Principles of Distributed Computing - Message Passing
Spring. 4 credits. Prerequisites: mathematical maturity and some basic knowledge of distributed systems. Offered in even-numbered years.

COM S 619 Principles of Distributed Computing - Shared Memory
Spring. 4 credits. Prerequisites: mathematical maturity and some basic knowledge of distributed systems. Offered in odd-numbered years. Not offered 1999-2000.

COM S 621 Matrix Computations
Fall. 4 credits. Prerequisites: MATH 411 and 431 or permission of instructor.

COM S 622 Numerical Optimization and Nonlinear Algebraic Equations

COM S 624 Numerical Solution of Differential Equations
Spring. 4 credits. Prerequisite: previous exposure to numerical analysis (e.g. COM S 421 or 621) to differential equations, and knowledge of MATLAB. Offered in even-numbered years.

COM S 626 Computational Molecular Biology
Spring. 4 credits. Prerequisites: familiarity with linear programming, numerical solutions of ordinary differential equations and non-linear optimization methods.

COM S 631 Multimedia Systems
Spring. 4 credits. Prerequisite: COM S 414 or permission of instructor. Not offered 1999-2000.

COM S 632 Advanced Database Systems
Spring. 4 credits. Prerequisite: COM S 432 or 433 or permission of instructor.

COM S 664 Machine Vision
Spring. 4 credits. Prerequisites: undergraduate-level understanding of algorithms and MATH 221 or equivalent.

COM S 671 Introduction to Automated Reasoning
Fall. 4 credits. Prerequisite: COM S 611 and graduate standing or permission of instructor.

COM S 672 Advanced Artificial Intelligence
Spring. 4 credits. Prerequisites: COM S 472 or permission of instructor.

COM S 674 Natural Language Processing
Spring. 3 credits. Prerequisites: COM S 472 or permission of instructor. Not offered every year; semester to be announced.

COM S 676 Reasoning About Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in even-numbered years. Not offered 1999-2000.

COM S 677 Reasoning About Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Offered in odd-numbered years.

COM S 681 Analysis of Algorithms
Fall. 4 credits. Prerequisites: (COM S 381 or 481, and graduate standing) or permission of instructor.

COM S 682 Theory of Computing
Spring. 4 credits. Prerequisite: (COM S 381 or 481) and (COM S 482 or 681) or permission of instructor.

COM S 686 Logics of Programs
Spring. 4 credits. Prerequisites: COM S 481, 682, and (MATH 481 or MATH/COM S 486).

COM S 709 Computer Science Colloquium
Fall, spring. 1 credit. S-U grades only. For staff, visitors, and graduate students interested in computer science.

COM S 713 Seminar in Systems and Methodology
Fall, spring. 4 credits. Prerequisites: a graduate course employing formal reasoning, such as COM S 611, 613, 671, a logic course, or permission of instructor. Not offered every year; semester to be announced.

COM S 715 Seminar in Programming Refinement Logics
Fall, spring. 4 credits. Prerequisite: permission of instructor.

COM S 717 Topics in Parallel Architectures
Fall. 4 credits. Prerequisite: COM S 612 or permission of instructor. Not offered every year; semester to be announced.

COM S 719 Seminar in Programming Languages
Fall, spring. 4 credits. Prerequisite: COM S 611 or permission of instructor. S-U grades only.

COM S 722 Topics in Numerical Analysis
Fall, spring. 4 credits. Prerequisite: COM S 621 or 622 or permission of instructor. Not offered every year; semester to be announced.

COM S 729 Seminar in Numerical Analysis
Fall, spring. 1-4 credits (to be arranged). Prerequisite: permission of instructor. S-U grades only.

COM S 754 Systems Research Seminar
Fall, spring. 1 credit.

COM S 772 Seminar in Artificial Intelligence
Fall, spring. 4 credits. Prerequisite: permission of instructor.

COM S 773/774 Proseminar in Cognitive Studies I & II (also COGST, PHIL, LING, and PSYCH 773/774)
Fall, 773; spring, 774. 4 credits.

COM S 777 Seminar in Natural Language Understanding
Fall, spring. 2 credits.

COM S 789 Seminar in Theory of Algorithms and Computing
Fall, spring. 4 credits. Prerequisite: permission of instructor. S-U grades only. Independent research or Master of Engineering project.

COM S 790 Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. Letter grade only. Independent research or Master of Engineering project.

COM S 799 Special Investigations in Computer Science
Fall, spring. Prerequisite: permission of a computer science adviser. S-U grades only. Doctoral research.

DUTCH
See Department of German Studies.

ECONOMICS

The study of economics provides an understanding of the way economies operate and an insight into public issues. The department offers a broad range of undergraduate courses in such fields as money and banking, international and comparative economics; econometrics; theory, history, growth and development; and the organization, performance, and control of industry.
Social Science Distribution Requirement
The microeconomics distribution requirement can be fulfilled with any of the following:
Economics 101, Economics 301, or Economics 313.
The macroeconomics distribution requirement can be satisfied with any of the following:
Economics 102, Economics 302, or Economics 314.

The Major
Prerequisites
Economics 101 and 102 and Math 111 (or equivalents, with approval of the director of undergraduate studies), all with grades of C or better.
Economics 301 with a grade of C or better substitutes for 101; Economics 302 with a grade of C or better substitutes for 102.

Requirements
Eight courses listed by the Department of Economics at the 300 level or above, or approved by the student's major adviser, all with grades of C- or better.
These eight courses must include:
(1) Economics 313 and 314,
(2) Economics 321, or Economics 319 and 320,
(3) at least 3 courses from the following:
Economics 301 with a grade of B or better substitutes for both 101 and 313; Economics 302 with a grade of B or better substitutes for both 102 and 314.
If Economics 321 is applied toward the major, neither 319 nor 320 can be applied.
Economics 263, 399, and 499 cannot be counted toward the eight-course requirement.
An honors program is currently being offered. Students should consult the director of undergraduate studies before May of their junior year for more information.
Students planning graduate work in economics and business are strongly encouraged to prepare themselves well in mathematics and econometrics. These students are strongly encouraged to enroll in Economics 319–320 rather than Economics 321.

Courses
ECON 101 Introductory Microeconomics
Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102.
Introduction and evaluation of how the price system operates in determining what goods are produced, how goods are produced, and who receives income, and how the price system is modified and influenced by private organizations and government policy.
ECON 102 Introductory Macroeconomics
Fall, spring, winter, and summer. 3 credits. Economics 101 is not a prerequisite for 102.
Analysis of aggregate economic activity in relation to the level, stability, and growth of national income. Topics discussed may include the determination and effects of unemployment, inflation, balance of payments, deficits, and economic development, and how these may be influenced by monetary, fiscal, and other policies.

ECON 263 International Economics
Spring and summer. 4 credits. Prerequisite: Economics 101–102 or equivalent.
This course surveys international economics in one semester. First, it surveys the sources of comparative advantage, and it analyzes commercial policy and the institutional aspects of the world trading system. Second, it discusses exchange rates, and it studies theories of balances of payments adjustments. This course is intended primarily for government majors who are comfortable with a less technical approach to international economics. (Cannot be applied to the economics major.)

ECON 301 Microeconomics
Fall. 4 credits. Prerequisite: Economics 101–102 or equivalent.
Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 101 and 313. (Can replace 313 only with grade of B or better). This course covers the topics taught in Economics 101 and 313. An introduction to the theory of consumer and producer behavior and to the functioning of the price system.

ECON 302 Macroeconomics
Spring. 4 credits. Prerequisite: Economics 101–102 or equivalent.
Intended for students with strong analytical skills who have not taken Economics 101, 102. Can be used to replace both Economics 102 and 314. This course covers the topics taught in Economics 102 and 314. (Can replace 314 only with grade of B or better). An introduction to the theory of national income determination, unemployment, growth, and inflation.

ECON 307 Introduction to Peace Science (also CRP 495.10 and Introduction to Peace Science)
Winter session. 4 credits. Prerequisites: Economics 101–102 or permission of instructor.
Introduction to the theories of and research on conflict resolution. Topics include conflict, its role and impact on society; theories of aggression and altruism; causes of war; game theory, conflict management procedures and other analytical tools and methods of peace science; alternatives to war.

ECON 313 Intermediate Microeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.
The pricing processes in a private enterprise economy are analyzed under varying competitive conditions, and their role in the allocation of resources and the functional distribution of national income is considered.

ECON 314 Intermediate Macroeconomic Theory
Fall, spring, and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.
The theory of national income and determination and economic growth in alternative models of the national economy is introduced. The interaction and relation of these models to empirical aggregate economic data is examined.

ECON 317 Intermediate Mathematical Economics I
Introduction of calculus and matrix algebra; problems of maximization of a function of several variables. Economic examples are used to illustrate and teach the mathematical concepts.

ECON 318 Intermediate Mathematical Economics II
Advanced techniques of optimization and application to economic theory.

ECON 319 Introduction to Statistics and Probability
Fall. 4 credits. Prerequisites: Economics 101–102 and Mathematics 111–112.
This course provides an introduction to statistical inference and to principles of probability. It includes descriptive statistics, principles of probability, discrete and continuous distributions, and hypothesis testing (of sample means, proportions, variance). Regression analysis and correlation are introduced.

ECON 320 Introduction to Econometrics
Spring. 4 credits. Prerequisites: Economics 101–102, 319, or equivalent.
Introduction to the theory and application of econometric techniques. How econometric models are formulated, estimated, used to test hypotheses, and used to forecast; understanding economists' results in studies using regression model, multiple regression model, and introduction to simultaneous equation models.

ECON 321 Applied Econometrics
Fall, spring and summer. 4 credits. Prerequisites: Economics 101–102 and calculus.
This course provides an introduction to statistical methods and principles of probability. Topics to be covered include analysis of data, probability concepts and distributions, estimation and hypothesis testing, regression, correlation and time series analysis. Applications from economics are used to illustrate the methods covered in the course.

ECON 323 American Economic History #
Fall. 4 credits. Prerequisites: Economics 101–102 or equivalent.
Problems in American economic history from the first settlements to early industrialization are surveyed.

ECON 324 American Economic History #
Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent.
A survey of problems in American economic history from the Civil War to World War I.

ECON 324A American Economic History #
Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent. Instructor's permission required.
Same material as Economics 324, seminar limited to 12 students.

ECON 331 Money and Credit
Fall. 4 credits. Prerequisites: Economics 101–102 and 314.
A systematic treatment of the determinants of the money supply and the volume of credit. Economic analysis of credit markets and financial institutions in the United States.

ECON 333 Financial Economics Spring. 4 credits. Prerequisites: Economics 101–102 and 313, or their equivalent, and one semester of calculus.
The role of government in a free market economy is analyzed. Topics covered include public goods, market failures, allocation mechanisms, optimal taxation, effects of taxation, and benefit-cost analysis. Current topics of an applied nature will vary from term to term.

ECON 335 Public Finance: The Microeconomics of Government Fall. 4 credits. Prerequisites: Economics 101–102 and 313, or their equivalent, and one semester of calculus.
The course surveys the sources of economic growth. Numerous theoretical models are presented and empirical results are discussed. The theory and decision making in the presence of uncertainty and the practical aspects of particular asset markets are examined.

ECON 336 Public Finance: Resource Allocation and Fiscal Policy Spring. 4 credits. Prerequisites: Economics 101–102, 313 or their equivalent and one semester of calculus.
This course covers the revenue side of public finance and special topics. Subjects covered include the federal debt, the budget, and government regulation and transfers, as well as problems like local public goods, health care, education, the hierarchy of governmental structure, plus a variety of applied problems.

ECON 341 Labor Economics For description, see ILRLE 240.

ECON 351 Industrial Organization I Fall. 4 credits. Prerequisite: Economics 313 or its equivalent.
This course examines markets with only a few firms (i.e., oligopolies), and the primary focus will be the strategic interactions between firms. Topics include static competition in oligopolies, cartels and other forms of collusive behavior, competition between firms producing differentiated products, entry behavior, R&D behavior, and government interventions in oligopoly industries (e.g., antitrust laws).

ECON 352 Industrial Organization II Spring. 4 credits. Prerequisite: Economics 313 or its equivalent.
This course primarily focuses on the pricing decisions of firms. The course does not consider the strategic response of other firms to these pricing decisions. The pricing decisions include price discrimination, commodity bundling, pricing a product line and pricing a durable good. In addition to pricing decisions, the course will consider topics associated with private information such as adverse selection, signaling and moral hazard. Numerous theoretical models are presented and empirical results are discussed.

ECON 361 International Trade Theory and Policy Fall. 4 credits. Prerequisites: Economics 101–102 and 313.
This course surveys the sources of comparative advantage. It studies commercial policy and analyzes the welfare economics of trade between countries. Some attention is paid to the institutional aspects of the world trading system.

ECON 362 International Monetary Theory and Policy Spring and summer. 4 credits. Prerequisites: Economics 101–102 and 314. This course surveys the determination of exchange rates and theories of balance of payments adjustments. It also explores open economy macroeconomics, and it analyzes some of the institutional details of foreign exchange markets, balance of payments accounting, and the international monetary system.

ECON 371 Economic Development Spring. 4 credits. Prerequisites: Economics 313 or equivalent.
Study of the problem of sustaining accelerated economic growth in less-developed countries. Trade-offs between growth, welfare, and equity; the legacy of colonialism; relevance of history and economic theory; problems of capital formation, economic planning and international specialization; and the interaction of industrialization, agricultural development, and population change are emphasized.

This course examines several special topics in the economics of developing countries. Among the topics covered recently are the theories of development and underdevelopment, the debate over development economics, the peasant household and its place in the world economy, the debt crisis, the state vs. market debate and the role of the state in economic development, and the question of sustainable development.

ECON 404 Economics and the Law Fall. 4 credits. Prerequisite: Economics 101. An examination, through the lens of economic analysis, of legal principles drawn from various branches of law, including contracts, torts, and property. Cases are assigned for class discussion; in addition, there are several writing assignments.

ECON 408 Production Economics and Policy For description, see ARME 608.

ECON 409 Environmental Economics and Policy For description, see ARME 451.

ECON 413 Economics of Consumer Demand For description, see CEH 613.

ECON 415 Price Analysis For description, see ARME 415.

This course is intended for advanced economics majors who are especially interested in economic theory. Topics to be covered: (a) review of the one good Ramsey model of optimal savings and accumulation, conditions for intertemporal efficiency in production; comparative dynamics and sensitivity analysis; (b) some earlier models of capital accumulation, the roles of present value and interest rates as return in guiding investment decisions; (c) growth, exhaustible resources; pollution and conservation: discussion of the trade-offs facing a society.

Early writings in economics and their relationship to current economic analysis and policy issues, for example, ancient and medieval philosophers on justice in exchange; mercantilist arguments for trade protection; early theories about the effect of monetary expansion (D. Hume); the role of the entrepreneur (Cantillon); and general competitive equilibrium (the Physiocrats). The most recent reading assignment in this course is Adam Smith's Wealth of Nations but the emphasis is on the relationship between the precursors of Adam Smith and his Wealth of Nations to modern economic analysis and current efforts to answer some of the questions raised in the early writings on economics.

This course provides an introduction to the theory of decision making under uncertainty with emphasis on economic applications of the theory.

ECON 420 Economics of Family Policy—Adults Economics 420 and 421 together, count as one course for the Economics major. For description, see CEH 320.

ECON 421 Economics of Family Policy—Children Economics 420 and 421 together, count as one course for the Economics major. For description, see CEH 321.

ECON 422 The Economics of Infrastructure and a Sustainable Environment For description, see CEE 422.

ECON 425 Economic History of Latin America @ # Spring. 4 credits.
A survey of changing economic institutions and policies from pre-Columbian to modern times.

ECON 426 History of American Enterprise # Spring. 4 credits. Prerequisites: Economics 101–102 or equivalent.
History of the changing structure of American business from 1800 to the present, with major emphasis upon developments after the Civil War. The focus of the course will be the changing structure of challenges (for example, the rise of unions, development of a national capital market, changing role of government) and the various responses of business organizations and entrepreneurs to those challenges.

ECON 430 Policy Analysis: Welfare Theory, Agriculture, and Trade For description, see ARME 630.

ECON 432 Health Economics and Policy For description, see CEH 632 or PAM 655.

ECON 435 Information and Regulation For description, see CEH 635.
ECON 440 Analysis of Agricultural Markets
Economics 440 and 441 together, count as one course for the Economics major. For description, see ARME 440.

ECON 441 Commodity Futures Markets
Economics 440 and 441 together, count as one course for the Economics major. For description, see ARME 441.

ECON 444 Modern European Economic History
For description, see ILRLE 444.

ECON 445 Topics in Microeconomic Analysis—Markets and Planning
Fall. 4 credits. Prerequisites: Economics 313. This is a course of economic theory designed for upperclass undergraduates. Course contents may vary from year to year. Issues that may be examined include (1) How can economic activities be efficiently organized through the market mechanism? Why is the presence of many traders essential to efficiency? (2) What can be done if the indivisibility in production processes becomes an important hindrance to competitive pricing? (3) How can economic planning be decentralized efficiently? This course serves two purposes: (1) to introduce concepts that are novel to undergraduates and relevant to public policy but require only a modicum of analytic tooling up, and (2) to illustrate the deductive approach of modern economic analysis—how to define concepts unambiguously, how to form propositions in clear-cut fashion, and how to follow up logical implications sequentially to the conclusion.

ECON 446 Topics in Macroeconomic Analysis—Is Keynesianism Dead?
Fall or spring. 4 credits. Prerequisites: Economics 313. Not offered 1999–2000. The coverage of this course may vary from term to term. Presently, the content of the course deals with the range of criticisms against Keynesian theory by the New Classical Economics, alias the Equilibrium School, alias the Rational Expectations School. Despite the fact that almost all intermediate macroeconomic textbooks are Keynesian in perspective, clearly Keynesian economics is currently at bay. We shall review critically, critiques to Keynesian theory.

ECON 448 Economic Systems: East and West
Fall. 4 credits. Prerequisites: Economics 101, 102. The course will develop first the basic features of a centrally planned economy and proceed to consider the most important example: the rise and fall of the Soviet Union. Secondly, the analysis will be extended to what used to be known as "Eastern Europe" (e.g., Czechoslovakia, Hungary, Poland). From this necessary historical background, the course will proceed to current attempts to move away from Socialist central planning and its legacies to market economy, privatization, and independence.

ECON 454 The Economics of Health Care
For description, see ILRLE 440.

ECON 455 Income Distribution
For description, see ILRLE 441.

ECON 456 The Economics of Employee Benefits
For description, see ILRLE 442.

ECON 457 Women in the Economy
For description, see ILRLE 445.

ECON 458 Topics in Twentieth Century Economic History
For description, see ILRLE 448.

ECON 460 Economic Analysis of the Welfare State
For description, see ILRLE 462.

ECON 461 The Economics of Occupational Safety and Health
For description, see ILRLE 464.

ECON 462 Labor in Developing Economies
For description, see ILRLE 332.

ECON 464 Economics of Agricultural Development
For description, see ARME 464.

ECON 465 Food and Nutrition Policy
For description, see ARME 665.

ECON 466 Economics of Development
For description, see ARME 466.

ECON 467 Game Theory
Fall. 4 credits. Prerequisites: Economics 313 and 319. This course studies mathematical models of conflict and cooperation in situations of uncertainty (about nature and about decision makers).

ECON 468 Economic Problems of Latin America
Spring. 4 credits. Prerequisites: Economics 101–102. Current topics include, international debt, capital flight, economic integration, stabilization programs, etc.

ECON 469 China's Economy Under Mao and Deng
Fall. 4 credits. Prerequisites: Economics 101–102 or permission of instructor. Examines the development of the Chinese economy and the evolution of China's economic system between 1949 and the early 1990's.

ECON 471 The Economies of the Former Soviet Union and of Central Europe: From Central Planning to Markets
Fall. 4 credits. Prerequisites: Economics 101, 102. The course will introduce first the basic features of a centrally planned economy and proceed to consider the most important example: the rise and fall of the Soviet Union. Secondly, the analysis will be extended to what used to be known as "Eastern Europe" (e.g., Czechoslovakia, Hungary, Poland). From this necessary historical background, the course will proceed to current attempts to move away from Socialist central planning and its legacies to market economy, privatization, and independence.

ECON 473 Economics of Export-led Development
Spring. 4 credits. Prerequisites: Economics 313, 314, or their equivalent. This course will examine the phenomenon of export-led development from both the theoretical and empirical points of view. Concentration will be on experiences within the West Pacific Rim.

ECON 474 National and International Food Economics
For description, see NS 457.

ECON 475 The Economy of India
Fall. 4 credits. Prerequisite: Economics 101–102 or equivalent background. This course will present the major economics and development problems of contemporary India and examine the country's future economic prospects. It will, however, be our aim to discuss these problems in their proper historical perspectives. Hence, the course will start with a brief outline of the social and political history of India. It will then turn to a more detailed account of the economic history of India in two stages.

ECON 477 Contemporary Development of Southeast Asian Economies
Spring. 4 credits. Prerequisite: Economics 101–102. Consult the Director of Undergraduate Studies for details. Interested students should apply to the program in the spring semester of their junior year.

ECON 478 Readings in Economics
Fall or spring. Variable credit. Independent study.

ECON 479 Honors Program
Fall and spring. 8 credits. Prerequisites: Economics 313, 314, 321 (or 319–320). Consult the Director of Undergraduate Studies for details. Interested students should apply to the program in the spring semester of their junior year.

Graduate Courses and Seminars

ECON 609 Microeconomic Theory I
Fall. 4 credits. Topics in consumer and producer theory.

ECON 610 Microeconomic Theory II
Spring. 4 credits. Topics in consumer and producer theory, equilibrium models and their application, externalities and public goods, intertemporal choice, simple dynamic models and resource depletion, choice under uncertainty.

ECON 613 Macroeconomic Theory I

ECON 614 Macroeconomic Theory II
ECON 616 Applied Price Theory
Spring. 4 credits.
The course emphasizes the applications of the principles of price theory to a variety of problems taken from concrete, practical settings.

ECON 617 Intermediate Mathematical Economics I
Fall. 4 credits. Prerequisites: Calculus II and intermediate linear algebra.
The course will cover selected topics in Matrix algebra (vector spaces, matrices, simultaneous linear equations, characteristic value problem), calculus of several variables (elementary real analysis, partial differentiation, convex analysis), classical optimization theory (unconstrained maximization, constrained maximization).

ECON 618 Intermediate Mathematical Economics II
A continuation of Economics 617, the course develops additional mathematical techniques for applications in economics. Topics covered could include study of dynamic systems (linear and nonlinear difference equations, differential equation, chaotic behavior), dynamic optimization methods (optimal control theory, nonstochastic and stochastic dynamic programming), and game theory (repeated dynamic and evolutionary games).

ECON 619 Econometrics I
Fall 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
This course gives the probabilistic and statistical background for meaningful application of econometric techniques. Topics to be covered are (1) probability theory; probability spaces, random variables, distributions, moments, transformations, conditional distributions, distribution theory and the multivariate normal distribution, convergence concepts, laws of large numbers, central limit theorems, Monte Carlo simulation; (2) statistical inference; (3) hypothesis testing; (4) econometrics; (5) experimental design; (6) exponential families of distributions. Further topics in statistics will be considered in Economics 620.

ECON 620 Econometrics II
Spring. 4 credits. Prerequisite: Economics 619.
This course is a continuation of Economics 619 (Econometrics I) covering (1) statistics: estimation theory, least squares methods, method of maximum likelihood, generalized method of moments, theory of hypothesis testing, asymptotic test theory, and nonnested hypothesis testing and (2) econometrics: the general linear model, generalized least squares, specification tests, instrumental variables, dynamic regression models, linear simultaneous equation models, nonlinear models, and applications.

ECON 699 Readings in Economics
Fall or spring. Variable credit.
Independent study.

ECON 703 Seminar in Peace Science
Fall. 4 credits.
Among topics to be covered at an advanced level are game theory, coalition theory, bargaining and negotiation processes, cooperative procedures, microbehavior models, microstructural processes, and general systems analysis.

ECON 710 Stochastic Economics: Concepts and Techniques
Spring. 4 credits. Prerequisites: Economics 609, 610, 613, 614, 619, and 620.
This course will review a number of techniques that have been useful in developing stochastic models of economic behavior.

ECON 712 Advanced Macroeconomics
4 credits. Prerequisites: Economics 613, 614.
The purpose of this course is to introduce the student to some of the topics and analytic techniques of contemporary macroeconomic research. The course will fall into three parts: (a) dynamic programming, new Keynesian economics, and recent theories of economic growth. The dynamic programming section will include material on overlapping generations; (b) models of wage and price rigidity, coordination failure and credit markets. The section on endogenous growth will look at recent efforts to add non-convexities to models of optimal growth. These topics are intended to complement the material on overlapping generations covered elsewhere.

ECON 713 Advanced Macroeconomics II
Spring. 4 credits. Prerequisites: Economics 613, 614.
This course reviews the most recent research in endogenous growth theory. This theory is little more than a decade old, but it has produced a large amount of both empirical and theoretical results that have substantially reshaped the general field of macroeconomics. It is perhaps no exaggeration to say that most of the work at the frontier of today's macroeconomics belongs to this field. An increasing number of papers have been touching upon relevant issues such as: learning by doing, R&D investment, market structure, public and private organization of R&D, education financing, human capital accumulation, technological unemployment, growth and business cycles, inequality and growth, political equilibrium, democracy and growth, instability, social conflict, capital accumulation, intergenerational and vested interests and barriers to technology adoption, transfers of technologies, sustainable development, etc.

This course tries to orient the student in this large and variegated literature consisting of recently published articles and working papers. Understanding this literature is a sound training in the analytical methods used at the frontier of theoretical research, but it also provides a number of empirical results at the center of the economic debate.

ECON 717 Mathematical Economics
4 credits. Prerequisites: ECON 609–610 (or equivalent training in micro theory) and MATH 413–414 (or equivalent training in analysis).

The primary theme of this course is to explore the role of prices in achieving an efficient allocation of resources in dynamic economies. Some of the classical results on static equilibrium theory and welfare economics on attaining optimal allocation through decentralized organizations are examined through an axiomatic approach. Some basic issues on capital theory are also analyzed.

ECON 718 Topics in Mathematical Economics

ECON 719 Advanced Topics In Econometrics I
Fall. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
Advanced topics in econometrics, such as asymptotic estimation and test theory, robust estimation, Bayesian inference, advanced topics in time-series analysis, errors in variable and latent variable models, qualitative and limited dependent variables, aggregation, panel data, and duration models.

ECON 720 Advanced Topics In Econometrics II
Spring. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
For description see Economics 719.

ECON 721 Time Series Econometrics
Spring. 4 credits. Prerequisites: Economics 619–620 or permission of instructor.
This course covers traditional and current time series techniques that are widely used in econometrics. Topics include the theory of stationary stochastic processes including univariate ARMA(p,q) models, spectral density analysis, and vector autoregressive models, parametric and semi-parametric estimation; current developments in distributional theory; estimation and testing in models with integrated regressors including, unit root tests, cointegration, and permanent vs. transitory components.

ECON 731 Monetary Theory and Policy
Spring. 4 credits. Prerequisites: Economics 619 or permission of the instructor.
Advanced topics in monetary economics, macroeconomics, and economic growth—such as overlapping-generations, taxes and transfers, nonmonetary transactions demand for money, multi-asset accumulation, exchange rates, and financial intermediation.

ECON 732 Monetary Theory and Policy
Fall. 4 credits. Prerequisites: Economics 731 or permission of the instructor.
Advanced topics in monetary economics, macroeconomics, and current macroeconomic issues such as economic volatility, the “burden” of government debt, restrictions on government borrowing, dynamic optimization, endogenous growth theory, technological evolution, financial market frictions, and cyclical fluctuations.

ECON 735 Public Finance: Resource Allocation and Fiscal Policy (also ARME 735)
Spring. 4 credits.
This course develops a mathematical and highly analytical understanding of the role of government in market economies and the fundamentals of public economics and related issues. Topics covered include generalizations and extensions of the fundamental theorems of welfare economics, in-depth analysis of
social choice theory and the theory on implementation in economic environments, public goods and externalities and other forms of market failure associated with asymmetric information. The theoretical foundation for optimal direct and indirect taxation is also introduced along with the development of various consumer surplus measures and an application to benefit cost analysis. Topics of an applied nature vary from semester to semester depending upon faculty research interests.

ECON 736 Public Finance: Resource Allocation and Fiscal Policy  
Fall. 4 credits.  
This course spends a large part of the semester covering the revenue side of public finance. Topics include the impact of various types of taxes as well as the determination of optimal taxation. The impact of taxation on labor supply, savings, company finance and investment behavior, risk bearing, and portfolio choice are explored. Other topics include the interaction of taxation and inflation, tax evasion, tax incidence, social security, unemployment insurance, deficits, and interactions between different levels of government.

ECON 738 Public Choice  
Spring. 4 credits.  
Prerequisites: ECON 609, 610.  
This class has two parts. It begins with an introduction to economic theories of political decision making and then surveys the theory of voting, theories of political parties and party competition, theories of legislative decision making and interest group influence. We also discuss empirical evidence concerning the validity of these theories. The second part uses these theories to address a number of issues in Public Economics. We develop the theory of political failure, analyze the performance of alternative political systems and discuss the problem of doing policy analysis which takes into account political constraints.

ECON 741 Seminar in Labor Economics  
For description see ILRLE 744.

ECON 742 Seminar in Labor Economics  
For description see ILRLE 745.

ECON 751 Industrial Organization and Regulation  
Fall. 4 credits.  
Prerequisites: ECON 609, 610.  
This course focuses primarily on recent theoretical advances in the study of industrial organization. Topics covered include market structure, non-linear pricing, quality, durability, location selection, repeated games, collusion, entry deterrence, managerial incentives, switching costs, government intervention, and R&D/Patents. These topics are discussed in a game-theoretic context.

ECON 752 Industrial Organization and Regulation  
Spring. 4 credits.  
Prerequisites: ECON 609, 610, 751.  
This course rounds out some topics in the Theory of Industrial Organization with the specific intent of addressing the empirical implications of the theory. The course reviews empirical literature in the SCP paradigm and in the NEIO paradigm.

ECON 753 Public Policy Issues for Industrial Organizations  
Spring. 4 credits.  
Prerequisites: Economics 609, 610, and 751.  
The course takes an in-depth view of the interaction between the government and business. Methods of business control, including antitrust, price regulation, entry regulation, and safety regulation. Emphasis will be not only on the economic effects on business, but on the economics of selecting and evolving the method of control.

ECON 755 Rivalry and Cooperation  
Fall. 4 credits.  
Prerequisites: Economics Graduate Core or instructor's permission.  
Standard models, economic interaction is impersonal. Agents respond to price signals and measure their own welfare not in relative but in absolute terms; and cooperative behavior emerges only when it coincides with narrow self-interest. This course will explore the details of rivalry and cooperation in an effort to synthesize broader views of economic interaction. Topics will include the effect of concerns about relative income on wage rates, consumption, savings, and regulation; the effect of concerns about fairness on prices and wages; the conditions that foster trust and cooperation; and the role of positional competition in the distribution of economic rewards.

ECON 756 Noncooperative Game Theory  
Fall. 4 credits.  
Prerequisites: Economics 609, 610, and 619.  
This course surveys equilibrium concepts for non-cooperative games. We will cover Nash equilibrium and a variety of equilibrium refinements, including perfect equilibrium, proper equilibrium, sequential equilibrium and more! We will pay attention to important special classes of games, including bargaining games, signalling games, and games of incomplete information. Most of our analysis will be from the strict decision-theoretic point of view, but we will also survey some models of bounded rationality in games, including games played by automata.

ECON 757 Economics of Imperfect Information  
Spring. 4 credits.  
Prerequisites: Economics 609-610 and 619.  
The purpose of this course is to consider some major topics in the economics of uncertain information. Although the precise topics considered will vary from year to year, subjects such as markets with asymmetric information, signalling theory, sequential choice theory, and record theory will be discussed.

ECON 760 Topics in Political Economy  
Fall. 4 credits.  
Prerequisite: Economics graduate core or instructor's permission.  
This course will develop critiques and extensions of economic theory, taking into account the political and social moorings of economic activity and equilibria. The formation and persistence of social norms; the meaning and emergence of property rights; the role of policy advice in influencing economic outcomes; and the effect of political power and ideology on economic variables will be studied. While these topics were popular in the classic works of political economy, recent advances in game theory and, more generally, game-theoretic thinking allows us to approach these topics from a new perspective. Hence, the course will begin by devoting some lectures to elementary ideas in game-theory and strategic analysis.

ECON 761 International Economics: Trade Theory and Policy  
Fall. 4 credits.  
Prerequisites: ECON 609, 610.  
This course surveys the sources of comparative advantage. It analyzes simple general equilibrium models to illustrate the direction, volume, and welfare effects of trade. Topics in game theory and econometrics as applied to international economics may be covered.

ECON 762 International Economics: International Trade Theory and Policy  
Spring. 4 credits.  
Prerequisite: ECON 761.  
This course surveys the determination of exchange rates and theories of balance of payment adjustments. It explores open economy macroeconomics by analyzing models of monetary economies. Topics in monetary economics and econometrics as applied to international economics may be covered.

ECON 770 Topics in Economic Development  
For description, see ARME 667.

ECON 771 Economic Development and Development Planning  
Spring. 4 credits.  
Prerequisites: graduate core or instructor's permission.  
Reviews the existing literature on the determinants of economic growth and the interrelationship of growth and income distribution through the process of economic development. A general equilibrium approach to development is taken. Computable general equilibrium models, based on social accounting matrices, are used to explore the performance of a variety of developing countries. Among the topics explored are: impact of structural adjustment and stabilization policies on growth, equity and internal and external equilibrium, sectoral interrelationship and interdependence through the growth process. Critical review and evaluation of national, sectoral and regional development models built for such developing countries as India, Brazil, Indonesia and Ecuador.

ECON 772 Economics of Development  
Spring. 4 credits.  
Prerequisites: first-year graduate economic theory and econometrics.  
Analytical approaches to the economic problems of developing nations. Economics to be covered include: some old and new directions in development economics thinking, the welfare economics of poverty and inequality, empirical evidence on who benefits from economic development, labor market models, project analysis with application to the economics of education, and development policy.
The course deals with economic systems, with low-income levels. Specific topics vary each semester.

ENGLISH

The Department of English offers a wide range of courses in English, American, and Anglophone literature as well as in creative writing, literary theory and criticism, and film analysis. Literature courses focus variously on the close reading of texts, the study of particular authors and genres, questions of critical theory and method, and the relationship of literary works to their historical periods and to other disciplines. The department seeks not only to foster analytical reading and lucid writing, but also through the study of literary texts, to teach students to think about the nature of language and to be alert to the rhythms and pleasures of that ordinary and peculiar activity, reading.

Students who major in English develop their own programs of study in consultation with their advisors. Some focus on a particular historical period or literary genre; others combine sustained work in creative writing with the study of literature. Others pursue special interests in such areas as women's literature, African-American literature, literature and the visual arts, or critical theory.

Many students informally supplement their course work in English by attending the public lectures and poetry readings sponsored by the department, or by writing for campus literary magazines.

ENCON 773 Economic Development
Fall. 4 credits. Prerequisites: Economics 609 and 620.

The course is concerned with theoretical and applied works that seek to explain economic development, or lack thereof, in countries at low-income levels. Specific topics vary each semester.

ENCON 774 Economic Systems
Spring. 4 credits.

The course deals with economic systems, with the formerly centrally planned economies, and with the economies in transition.

ENCON 784 Seminars in Advanced Economics
Fall and spring. 4 credits.

ENGLISH

Fall and spring. 4 credits.

ENGLISH 433

Fall, spring, each summer. 3 credits. Each section limited to 17 students. Freshman Writing Seminar. Recommended for prospective majors in English.

ENGLISH 491 and 492, which together constitute a two-semester survey of major British writers, though not required are strongly recommended for majors and prospective majors because they afford the kind of overview and introduction to periods and literary genres that helps students make more informed choices of advanced courses. The American Literary Tradition (English 275), Creative Writing (English 280 or 280A, and the Essay in English (English 295) are also suitable preparations for the major.

Course Requirements

English majors are required to complete, with passing letter grades, at least 40 credit hours in courses approved for the major. All English courses numbered 300 and above are approved for the major. In addition, all 200-level English courses except freshman seminars (English 270, 271, and 272), courses in creative and expository writing (English 280, 281, 288, and 289), and those courses which require the English 295, are suitable preparations for the major. Of the 40 credits required to complete the major, 8 (two courses) must be at the 400 level or above, and 12 (three courses) must be taken in literature originally written in English before 1800. As many as 12 credits in literature or creative writing in Comparative Literature, Theatre, Film, & Dance, the Africana Studies and Research Center, the Society for the Humanities, Asian American Studies, and Latino Studies may be counted toward the major, provided they are at the 300 level or above. Double majors may exercise this option even if the 12 credits are applied to their second major. English majors are encouraged to take advantage of this option by taking courses in which they read foreign works of literature in the original languages: 200-level literature courses for which qualification is a prerequisite may be for this purpose treated as if they were 300-level courses.

The Major in English with Honors

Second-term sophomores who have done superior work in English and related subjects are encouraged to seek admission to the department's program leading to the degree of Bachelor of Arts with Honors in English. Following an interview with the chair of the Honors committee, qualified students will be admitted provisionally to the program. During their junior year, these students must complete at least one Honors seminar (English 491 or 492) and are encouraged to take an additional 400-level English course in the field in which they plan to concentrate. On the basis of work in these and other English courses, a provisional honors candidate is expected to select a thesis topic and secure a thesis adviser by the end of the fall term of their senior year. A student who has been accepted by a thesis adviser becomes a candidate for honors rather than a provisional candidate.

During the senior year, each candidate for Honors in English enrolls in a year-long tutorial (English 493 and 494) with the faculty member chosen as thesis adviser. The year's work culminates in the submission of a substantial scholarly or critical essay to be judged by at least two members of the faculty. More information about the program may be found in the brochure for honors candidates available in the English office.

Courses for Nonmajors

For students not majoring in English, the department makes available a variety of courses at all levels. Some courses at the 200 level are open to qualified freshmen, and all of them are open to sophomores. Courses at the 300 level are open to sophomores, juniors, and seniors and to others with permission of the instructor. The suitability of courses at the 400 level for nonmajors will vary from topic to topic, and permission of the instructor may be required.

First-Year Writing Seminars

As part of the First-Year Writing Program, the Department of English offers many one-semester courses concerned with various forms of writing (narrative, biographical, expository), with the study of specific areas in English and American literature, and with the relation of literature to culture. Students may elect any two of these courses during their first year to satisfy the Freshman Writing Seminar requirement. Descriptions of First-Year Writing Program offerings may be found in the First-Year Writing Program listings, available from college registrars in August for the fall term and in November for the spring term.

First-Year Writing Seminars Recommended for Prospective Majors

ENGLISH 270 The Reading of Fiction
Fall, spring, each summer. 3 credits. Each section limited to 17 students. Freshman Writing Seminar. Recommended for prospective majors in English.

This course examines modern fiction, with an emphasis on the short story and novel. Students will write critical essays on authors who flourished between 1870 and the present, such as James, Joyce, Woolf, Hurston, Lawrence, Fitzgerald, Hemingway, Faulkner, Rhys, Welty, Salingar, and Morrison. Reading lists vary from section to section, and some may include a novel, but close, attentive, imaginative reading and writing are central to all. This course does not satisfy requirements for the English major.
ENGL 271 The Reading of Poetry
Fall, spring. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English.
This course is designed to increase the student's ability to understand and write about poetry. Readings will be drawn from the major periods, modes, and genres of poetry written in English. This course does not satisfy requirements for the English major.

ENGL 272 Introduction to Drama
Fall, spring. 3 credits. Each section limited to 17 students. Recommended for prospective majors in English.
Students in this seminar study plays, older and newer, in a variety of dramatic idioms and cultural traditions. Plays being performed by the Theatre Department will be included if possible. A reading list might include works by Sophocles, Shakespeare, Chekhov, Brecht, Caryl Churchill, Beckett, and Shange. Course work consists of writing and discussion and the occasional viewing of live or filmed performances. This course does not satisfy requirements for the English major.

Expository Writing

ENGL 288-89 Expository Writing
Fall, summer, winter. 3 credits. Each section limited to 16 students. Students must have completed their colleges' first-year writing requirements or have permission of the instructor. S. Davis and staff. Web site: http://instruct11.cit.cornell.edu/Courses/engl288/288FD99.index.html English 288-89 offers guidance and an audience for students who wish to gain skill in expository writing. Each section provides a context for writing defined by a form or use of exposition, a disciplinary area, a practice, or a topic intimately related to the written medium. Course members will read in relevant published material and write and revise their own work regularly, while responding to each other's. Since these seminar-sized courses depend on members' full participation, regular attendance and submission of written work are required. Students and instructors will confer individually throughout the term. English 288 does not satisfy requirements for the English major.

Section 1—S. Jeffers—Minding the Body
Section 2—J. Dougherty—Into the Wild
Section 3—A. Boehm—The Reflective Essay
Section 4—B. LeGendre—Issues, Audiences and Ourselves
Section 5—S. Davis—Writing in the Electronic Age
Section 6—G. Umbach—Reading the News, Understanding the Media

Spring 1999: To be announced
See English department Course Offerings for full fall and spring section descriptions.

ENGL 380 Reading as Writing
Spring. 4 credits. Course limited to 15 students. Prerequisites: permission of the instructor on the basis of a writing sample (critical/interpretive prose), which should reach the instructor before the first day of class. S. Davis. This course practices and studies related arts: reading selected 19th- and 20th-century prose figments and poems and writing interpretive essays about them—but also, writing as a reader of one's own work and revising in the light of others' responses to it. Course members will work with a fairly small number of texts and build sustained essays from shortish 'segments' of them. The texts (tentatively): Marilynne Robinson's Housekeeping, poems of Wordsworth, poems and stories of Poe, Vladimir Nabokov's Lolita; Doris Lessing's Memoirs of a Survivor, and J. M. Coetzee's Writing for the Barbarians. Students will present their work to the group at various stages of completion and develop a portfolio of well-crafted prose for submission at the end of the term. With the help of a few theorists of reading and literary reception, they will also pay attention to the ways in which both critical readers and creative writers "rewrite" the texts they read. This is a course for English majors and nonmajors who wish to extend their mastery of critical and interpretive prose and their understanding of what they do when they write it. It will be advantageous for students planning to write honors theses in English or another discipline.

ENGL 387 Autobiography: Theory and Practice
Spring. 4 credits. A. Boehm.
In this nonfiction prose-writing seminar we explicate canonical autobiographies as models of rhetoric to be imitated in weekly writing assignments.

ENGL 388 The Art of the Essay
Fall. 4 credits. Limited to 15 students. Interested students should submit one or more pieces of recent writing (prose) to the instructor before the beginning of the term, preferably at prerogation. L. Fukandiy.
For both English majors and nonmajors who have done distinguished work in freshman writing seminars and in such courses as English 280-281, 288-289, and who desire intensive practice in writing essays as a kind of creative nonfiction. The course assumes a high degree of self-motivation, a capacity for independent work, and critical interest in the work of other writers. It aims for a portfolio of conceptually rich and stylistically polished writing.

Creative Writing

Students usually begin their work in Creative Writing with English 280 or 281, and only after completion of the Freshman Writing Seminar requirement. Please note that either English 280 or English 281 is the recommended prerequisite for 300-level creative writing courses. English 280 and 281 may satisfy a distribution requirement in your college (please check with your college adviser). English 382-383, 384-385, and 480-481 are approved for the English major.

ENGL 280-281 Creative Writing
Fall, spring, summer, winter session. 3 credits. Prerequisites: completion of the Freshman Seminar requirement. Limited to 18 students.

Majors and prospective majors, please note. Although recommended for prospective English majors, English 280-281 cannot be counted towards the 40 credits required for completion of the English major. It is a prerequisite for 300-level courses in creative writing, which count towards the major. English 280 is not a prerequisite for English 281.

An introductory course in the theory, practice, and reading of prose, poetry, and allied forms. Students are given the opportunity to try both prose and verse writing and may specialize in one or the other. Many of the class meetings are conducted as workshops.

ENGL 382-383 Narrative Writing
Fall, spring. 382, spring. 383. 4 credits each term. Each section limited to 15 students. Prerequisites: English 280 or 281, or permission of instructor. Fall: Sec. 1, R. Morgan; sec. 2, D. McClan, sec. 3, L. Herrin. Spring: H. Viramontes, M. Koch, R. Morgan, L. Herrin. The writing of fiction; study of models; analysis of students' work.

ENGL 384-385 Verse Writing
Fall or summer, 384; spring. 385. 4 credits each term. Each section limited to 15 students. Prerequisites: English 280 or 281, or permission of instructor. Fall: R. Shepherd, R. McClane. Spring: R. Shepherd, P. Jarowitz. The writing of poetry; study of models; analysis of students' poems; personal conferences.

ENGL 480-481 Seminar in Writing
Fall. 480; spring, 481. 4 credits each term. Each section limited to 15 students. Students are encouraged to take English 280 or 281 and at least one 300-level writing course. Prerequisites: permission of instructor, normally on the basis of a manuscript. Fall: Sec. 1, H. Viramontes; sec. 2, R. Morgan. Spring: M. McCoy, K. McClane. Intended for those writers who have already gained a basic mastery of technique. Although English 480 is not a prerequisite for 481, students normally enroll for both terms and should be capable of a major project—a collection of stories or poems, a group of personal essays, or perhaps a novel—to be completed by the end of the second semester. Seminars are used for discussion of the students' manuscripts and published works that individual members have found of exceptional value.

Courses for Freshmen and Sophomores

These courses have no prerequisites and are open to freshmen and non-majors as well as majors and prospective majors.

Introductions to Literary Studies

ENGL 201-202 The English Literary Tradition

Tradition # 201: Fall. 4 credits. English 201 is not a prerequisite for 202. This course may be used as one of the three pre-1800 courses required of English majors. A. Galloway. An introduction to the study of English literature, examining its historical development and many of its literary movements. Works to be read include Sir Gawain and the Green Knight; selections from Chaucer's Canterbury Tales and Spenser's Faerie Queene; Shakespeare's Henry IV, Part I and King Lear; poets: Jonson, Donne, and Herbert; and selections from Milton's Paradise Lost.

202: Spring. 4 credits. D. Fried. A survey of English literature from the late seventeenth century to the early twentieth
century, including poetry and some prose works from the Restoration and eighteenth century, the Romantic period, the Victorian period, and Modernism. Lectures and discussion sections.

**ENGL 204 Mostly Poems and Stories**  
Fall and spring. 4 credits. Fall, F. Bogel; spring, R. Parker.  
Introduction to the pleasures of close reading, with special emphasis on analyzing the forms, structures, and rhetorical dynamics that characterize poems, prose narratives, and drama and contribute to their appeal. The syllabus will include works from older as well as more recent periods. We are likely to study poems by (among others) William Shakespeare, Robert Herrick, John Keats, Robert Browning, Christina Rossetti, Sylvia Plath, Ted Hughes, and Elizabeth Bishop; stories by Isabel Allende, Flannery O'Connor, James Baldwin, Toni Cade Bambara, and Beth Nugent; and such novels as Auster's *Pride and Prejudice* and Morrison's *The Bluest Eye*.

**ENGL 208 Shakespeare and the Twentieth Century (also Comparative Literature 208)**  
Fall. 4 credits. S. Davis.  
This course traces relationships between the Shakespeare of early modern times and some of the Shakespearean inheritors and created by the twentieth century. We will compare a small number of plays with their adaptations in fiction, theater, film, the educational system, and popular culture. The discussion of each play will be organized around one or more critical approaches. The course will attempt to provide an introduction to the contemporary study of literature and culture.

**ENGL 227 Shakespeare #**  
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. W. Wetherbee.  
Careful study of ten of Shakespeare's major plays, including at least three videotaped performances.

**Major Genres and Areas**

**ENGL 203 Major Poets**  
Spring. 4 credits. R. Gilbert.  
Intensive reading in the work of nine poets chosen to represent important periods and modes of poetry. Poets to be studied may include William Shakespeare (the sonnets), Andrew Marvell, Alexander Pope, John Keats, Emily Dickinson, Robert Browning, Gedneybrook, and Seamus Heaney.

**ENGL 205 Readings in English Literature**  
Fall. 3 credits. This course is intended for nonmajors. R. Farrell.  
English Literature to 1800. This course is open to any student interested in literature and culture. Authors covered include Chaucer, Shakespeare, Jonson, Swift, and Pope. Grade will be based on four short papers, three of which may be revised for a higher grade.

**ENGL 206 Readings in English and American Literature #**  
3 credits. This course is intended for non-majors. Two lectures and one discussion section each week. To be offered 2000–2001.

**ENGL 207 Introduction to Modern Poetry**  
Fall. 4 credits. R. Gilbert.  
This course will sample the vast array of poetic modes and forms employed over the past century and a half, with primary emphasis on the work of American poets. Our focus in the course will be on the poems themselves—how they feel, sound, look, mean, and do. Lectures, discussions, and written assignments will emphasize both the craft of writing poetry and the discipline of reading it with understanding and appreciation. No previous study of poetry required.

**ENGL 209 Introduction to Cultural Studies**  
Spring. 4 credits. M. P. Brady.  
Salsa, hip-hop, MTV, talkshows, sit-coms, movies, literature are all forms of entertainment and means of analyzing the cultures that produce them. This course will introduce students to the various cultural forms we encounter in our everyday lives and to some of the critical work that has been written about them. Examples will come from a range of contemporary and historical texts. The course will follow a lecture-discussion format.

**ENGL 210 Medieval Romance: The Voyage through the World #**  
Spring. 3 credits. To be offered 2000–2001.

**ENGL 212 Introduction to Medieval Epic**  
Spring. 4 credits. This course may be used as one of the three courses before 1800 required for the English major. T. Hill.  
An introduction to medieval epic focusing particularly on the English and "Insular" epic tradition. Works studied will normally include Beowulf, Maldon, Egils saga, Njals saga, the Tain Bo Cualaine, the Chanson de Roland, the Nibelungenlied, selections from Malory, and English and Scots ballads. Requirements include two papers, a midterm, and a final. No previous knowledge of medieval literature is expected.

**ENGL 240 Survey in U.S. Latino Literature (also Latino Studies 240)**  
Spring. 4 credits. M. P. Brady.  
It is estimated that by the year 2030, the Latino/a population in the United States will be the largest "minority group" in the country. This course seeks to introduce students to the growing body of literature (both fiction and poetry) by the various U.S. Latino/a communities. We will examine cultural production that results from intercultural crossings between Mexico, Cuba, Guatemala, Dominican Republic, El Salvador and Los Angeles, New York, Miami. How do Latino/a literatures converge and diverge as they explore issues of "race," ethnicity, gender, sexuality, class, nationality, and identity in general, at a time when the American profile is increasingly becoming "Latinized." Authors examined may include Chicanxs, Sephardic Jews, Collón, Miguel Pino, Nicolás Mohr, Cristina García, Julia Alvarez, Américo Paredes, Junot Díaz, Loida Maritza Pérez, Sandra Benítez, Martin Espada, Lorna Dee Cervantes, Frances Negrón-Muntaner, Luz María Umpiére, and Victor Martínez.

**ENGL 253 The Modern Novel**  
Fall 4 credits. J. Ashton.  
In this course we will read some of the most famous and groundbreaking novels of the 20th century, asking, among other things, what makes them "modern." Period of concentration will shift from year to year. For Fall of 1999, the focus will be on American modernism 1920–1940, including the following novels: *Babbitt* (1922), *The Great Gatsby* (1925), *The Sun Also Rises* (1926), *Death Comes for the Archbishop* (1927), *Passing* (1929), *The Sound and the Fury* (1929), *The Maltese Falcon* (1930), *The 42nd Parallel* (1930), *Nighthood* (1936), and *Native Son* (1940).

**ENGL 260 Introduction to American Indian Literatures (also American Studies 260)**  
Fall. 4 credits. R. Warrior.  
An introduction to Native American literatures, we read a variety of genres—novels, short fiction, autobiography, poetry, oral traditions—spanning Indian publications through the last two centuries. Issues arising from the text include aesthetics of orality and literacy, cultural change and survival; colonial ideology politics; mythic histories; world views and ideologies; and contemporary tribal sovereignty. A goal of the course is to read historical American contexts through the eyes of Native American texts.

**ENGL 262 Asian American Literature (also Asian American Studies 262 and American Studies 262)**  
Fall. 4 credits. S. Wong.  
This course will introduce students to a range of writing by Asian Americans and to some critical issues concerning the production and the reception of Asian American texts. In reading through selected works of prose, poetry, and drama, we will be asking questions about the relationship between literary forms and the sociohistorical context within which they take on their meanings, and about the historical formation of Asian American identities.

**ENGL 264 Ethnic Literature: Bridges and Boundaries**  

**ENGL 265 Introduction to African American Literature (also American Studies 265)**  
Fall. 4 credits. J. Goldsby.  
From Phillis Wheatley's Boston to Walter Moseley's Los Angeles, the city has long been an alluring force in African American literature. In this course, we will read a broad range of texts, films, and other visual media that celebrate and/or question urban life. Through these works, we will also explore intraracial conflicts of class, gender, sexuality, and national identity amongst African Americans themselves, from the "Talented Tenth" to the "Hip Hop Nation." Authors may include: DuBois, Larsen, Hughes, Harston, Wright, Petry, Baldwin, Brooks, Ellison, Hansberry, Baraka, Shange, Reed, Devere Smith, Morrison.

**ENGL 274 Scottish Literature and Culture #**  
Fall. 3 or 4 credits. To be offered 2000–2001.

**ENGL 274 Scottish Literature and Culture**  
Fall. 3 or 4 credits. To be offered 2000–2001.

**ENGL 274 Scottish Literature and Culture **  
Fall. 3 or 4 credits. To be offered 2000–2001.

**ENGL 291 Investigating American Literature (also Latino Studies 391)**  
Fall. 3 credits. Non-majors are welcome.  
4 credits will complete an additional writing project. This course only counts towards the English major when taken for 4 credits. Non-majors are welcome. Enrollment limited to 20. T. Hill and H. Shaw.  
Scotland was an independent kingdom during most of its history. Although it is now politically united with England, it preserves its cultural distinctiveness. This course provides an introduction to Scottish literature and its cultural context. We will focus on important Scottish literary texts, with special emphasis on the medieval period and the nineteenth and twentieth centuries. The course should...
appeal to those who wish to learn more about their Scottish heritage, to those who wish to view in a new perspective works normally considered monuments of "English" literature, and to those who simply wish to know more about a remarkable culture and the literature it produced. Some of the texts will be read in Scots, but no familiarity with Scots or earlier English is presumed. Authors studied will include Henryson, Dunbar, Anonymous (the Scottish Ballads), Hume, Burns, Scott, Hogg, Stevenson, and Grassy Gibbon.

ENGL 275 The American Literary Tradition (also American Studies 275)
Fall. 4 credits. H. Spillers.
The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

[ENGL 295 The Essay in English] # 4 credits. Prerequisite: completion of freshman seminar requirement. This course may be counted as one of the three pre-1800 literature courses required of English majors. To be offered 2000-2001.

Special Topics

ENGL 235 Rewriting the Classics: Stories of travels and encounters
Spring. 4 credits. E. DeLoughrey.
In this course we will look at such classic tales as Shakespeare's The Tempest, Dostoievsky's Robinson Crusoe, Bronte's Jane Eyre, and Conrad's Heart of Darkness and later novels that rewrite them, such as Aimee Cesaire's The Devil, J. M. Coetzee's Foe, Jean Rhys' Wide Sargasso Sea, and Wilson Harris' Palace of the Peacock. We will consider how stories travel across time and space and how the modern versions differ from their classic counterparts. Requirements: active class participation, student presentations, a few short essays and a final paper on the writer of your choice.

ENGL 252 Women and the Holocaust (also Women's Studies 252 and Jewish Studies 255)
Fall. 4 credits. M. Jacobus.
The lens provided by women's writing about the Holocaust offers a unique perspective on women's living and dying in the camps. We will focus on Holocaust writing by women and girls, some autobiographical, some fictional, that explores their gendered traumas of separation, sequestration, sexuality, survival, and memory. Using the definitive edition of Anne Frank's diaries as a point of departure, we will read memoirs and journals by women who recorded their lives en route to and in the camps. Texts will include the Scottish Ballads, Hume, Burns, Scott, Hogg, Stevenson, and Grassy Gibbon.

ENGL 263 Interpreting Hitchcock
Fall. 4 credits. Two lectures a week, and a weekly discussion section. Students must be free to attend Monday evening screenings of the films. Lab fee. Enrollment limited to 75. L. Bogel.
Through detailed analysis of about a dozen of Hitchcock's major films—from early British talkies (Blackmail, The Thirty-Nine Steps), to early 40's work in Hollywood (Shadow of a Doubt, Notorious), and major American films of his late period (Rear Window, Psycho, The Birds, North By Northwest)—we will consider Hitchcock as a major technical and stylistic innovator in the history of cinema. As texts for psychoanalytic and feminist approaches to study, his films invite questions about film language, the ethics of spectatorship, and the nature of desire and sexuality.

ENGL 268 The Culture of the 1960s (also American Studies 268)
Fall. 4 credits. P. Sawyer.
Were the Sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an empassioned critique that changed American society? What can the experiences of young "boomers" contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, the Vietnam War, the counterculture, the New Left, the women's movement and the movement for gay rights. Texts will include The Autobiography of Malcolm X, The Electric Kool-Aid Acid Test, Dispatches, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, and manifestos. The term paper will explore students' special interests.

ENGL 291 The American 1920s: Literature and Culture (also American Studies 291)
Fall. 4 credits. B. Maxwell.
The course will take a broad approach to the cultural activities of the decade following the First World War and preceding the Great Depression. Topics will include the new motives, forms, and audiences of fiction and poetry, literary realism under duress; the Harlem Renaissance; postwar blues and the influence epidemic; suffragist politics and the New Woman, Fugitive revanchism; the masses as a matter for intellectual scrutiny; Fordism; the Red Scare, nativism, and the fear of anarchism; the cultures of radio, children's illustrated books, popular song and jazz. We will ask: what made for aesthetic radicalism and political radicalism in the period; what were the relations of pleasure and labor; how differentiated was the self-consciousness of the "Lost Generation"; and what appear to be the legacies of the decade? Readings will include essays by Randolph Bourne, Margaret Sanger, Walter Lippmann, W. E. B. DuBois, and Lewis Mumford; fiction by Jean Toomer, Ernest Hemingway, Sherwood Anderson, Dorothy Parker, Nella Larsen, John Dos Passos, Samuel Ornitz, Delmore Schwartz, Dashiell Hammett, and perhaps even F. Scott Fitzgerald; and poetry by Pound, Eliot, Williams, H. D., Langston Hughes, Hart Crane, Marianne Moore, and Louis Zukofsky.

Courses for Sophomores, Juniors, and Seniors

ENGL 301 Mind and Memory (also Society for the Humanities 301, Theater 301, and Music 372)
Spring. 4 credits. D. Ackerman.
For complete description see Society for the Humanities 301.

ENGL 302 Literature and Theory (also English 602 and Comparative Literature 302 and 622)
Fall. 4 credits. To be offered 2000-2001.

ENGL 308 Icelandic Family Sagas

ENGL 310 Old English in Translation
Spring. 4 credits. T. Hill.
This course may be used as one of the three courses before 1800 required for the English major.

ENGL 311 Old English (also English 611) #
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. T. Hill
This course will provide a grounding in the Old English language and proceed to the reading of some major texts in poetry, such as The Wanderer and The Battle of Maldon. No previous knowledge of Old or Middle English is required or expected. There will be both a mid-term and a final, plus oral reports. Students will be encouraged to follow their own interests. Graduate students will be expected to do a substantial paper, or other research exercise.

ENGL 312 Beowulf (also English 612) #
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. One semester's study, or the equivalent, of Old English is a prerequisite. R. Farrell
A close reading of Beowulf. Attention will be given to relevant archaeological, literary, cultural, and linguistic issues.
ENGL 319 Chaucer
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. R. Farrell.
This course will begin with the study of the major Canterbury Tales and some of Chaucer's minor works, such as The Book of the Duchess. All works will be read in Middle English, but ample time will be devoted to learning the language and the possible to read Chaucer as a poet without Middle English. There will be lectures on Chaucer's life, society, literary and religious content. There will be take home mid- and end-of-term exams, and student presentations.

ENGL 320 Literature of the English Renaissance (1500–1660)
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. B. Adams.
Verse and prose (principally non-dramatic) from More to Milton, including selected works of Skelton, Wyatt, Surrey, Sidney, Spenser, Marlowe, Shakespeare, Jonson, Donne, Herbert, Bacon, Marvell, Suckling, Lovelace, Burton, and Browne. Contexts (political, social, intellectual, religious) as well as texts.

ENGL 321 Spenser and Malory (also Religious Studies 319)
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. Informal lecture and discussion. Two papers, no exams. C. Kaske.
Paired selections covering half of Malory's Morte d'Arthur and half of Spenser's Faerie Queene. Chretien's romances, Sir Gawain and the Green Knight and some of Spenser's minor poems will be mentioned occasionally as background. Comparisons will assess the influence, the distinctive genius of each author as a writer of romance, and the development of Arthurian romance from the Middle Ages to the Renaissance.

ENGL 325 The Culture of the Renaissance II (also Comparative Literature 362, and History 364)
Spring. 4 credits. For complete description, see Comparative Literature 362.
ENGL 327 Shakespeare
Fall. 4 credits. B. Correll.
The course will focus on the importance of gender and power in eight texts of Shakespeare: comedies, tragedies, poetry. Lectures and discussions will address issues of form, context and thematic content, as well as Renaissance and contemporary cultural debates.

ENGL 328 The Bible

ENGL 329 Milton

ENGL 330 Restoration and Eighteenth-Century Literature
Spring. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. F. Bogel.
Close reading of texts in a variety of genres (poetry, fiction, drama, autobiography) will be guided by such topics as the nature of satire, irony, and mock-forms; the languages of the ridiculous and the sublime; the authority and fallibility of human knowledge; connections among melancholy, madness, and imagina-

Works by such writers as Rochester, Dryden, Swift, Gay, Defoe, Johnson, Boswell, Sterne, and Cowper.

ENGL 333 The Eighteenth-Century English Novel
Fall. 4 credits. This course may be used as one of the three pre-1800 courses required of English majors. N. Saccamano.
A study of form and theme in the British novel tradition. The course focuses on representa-tive novels mostly from the eighteenth century, paying attention to language and structure but also to cultural contexts and to the development of the novel form itself. We explore such topics as truth and fiction; romance, realism, satire, and the gothic; heroic and mock-heroic modes; sentiment, sensibility, and sexuality, race and gender, and the forms and uses of narrative. Readings may include Behn's Oroonoko, Defoe's Moll Flanders, Richardson's Clarissa, Fielding's Tom Jones, Johnson's Rasselas, Walpole's The Castle of Otranto, Sterne's A Sentimental Journey, and Austen's Emma.

ENGL 335 European Drama 1660–1900: Mollière to Ibsen (also Comparative Literature 336)
Spring. 4 credits. R. Parker.
For complete description, see Comparative Literature 335.

ENGL 340 The English Romantic Period
Fall. 4 credits. R. Parker.
Readings in various writers from the late 1780s through the 1820s—among them Blake, Wordsworth, Wellington, Coleridge, Byron, Mary Shelley, Percy Shelley—texts with major emphasis on poems, but substantial collateral attention also to prose fiction, drama, letters, and political and literary surveys. The course will be concerned both with formal experiments in narrative, lyric, and dramatic representation and with analyses of political and cultural issues and contexts in an age of national reform and international revolution and conflict.

ENGL 345 Victorian Controversies
Fall. 4 credits. S. Siegel.
Economic, political and technological changes transformed the nineteenth century. We will consider some of the controversies these transformations provoked in England and Ireland. Our readings will be selected chiefly from leading nineteenth-century periodicals and from essays that contributed greatly to shaping public opinion. We will explore the social problems Victorian critics and artists identified, the various solutions they proposed, and the contrasting visions of their nation and its colonies. The men and women who contributed to the periodical press, and who shaped literary culture and anticipated new cultural forms, were preoccupied with urgent questions about themselves: Was their century marked by progress or by decline? Would machines degrade or enable workers? Did aesthetic experience complement or compete with religious doctrine? Were art and science dependent upon or opposed to each other? Should all forms of expression be permitted or should certain forms be censored? Should the colonies be permitted to rule themselves or remain dependent on England? Would prestige be gained if institutions of higher learning awarded degrees to women? Was "womanliness" revealed through "character" or through "behavior"? In addition to these intellectual conflicts, we will

be attentive to the emergence of new visual forms that participated in and provoked controversy. Accordingly, we will view photographs and diary drawings. Students will write a term paper and a take-home final exam.

ENGL 347 Freud and Reading
Spring. 4 credits. M. Jacobus.
This course will offer an introduction to Freud's writings, and to the legacy of his ideas, focusing on Freud as both writer and reader, as well as exploring his interest for contemporary students of literature and culture. Well served by his early translators, Freud has long been an object of fascination to literary critics and close-readers, as well as the source of a significant body of literary theory. We will look both at early "novella"-style works such as Studies on Hysteria and at the case-histories of Little Hans, Dora, and the Wolf Man, with an eye to Freud's narrative skill and persuasive art, as well as at subsequent readings that take issue with or illuminate his theories or modes of analysis. Alongside the case-histories, we will explore The Interpretation of Dreams and some of the influential readings of the dream-text to which it gave rise. We will also read Freud's writings on literature and art, including Delusion and Dream in Jensen's Gradiva (this reading of a fin de siècle novel), along with his writings on such topics as daydreaming, telepathy, negation, and the uncanny. We will end with his response to the first world war in Beyond the Pleasure Principle. The emphasis will be on what Freud's writing offers for literary and cultural studies, as well as the ways in which his ideas both shaped and were shaped by twentieth-century European culture.

ENGL 348 Studies in Women's Fiction: The Development of the Female-Authored Novel from the Seventeenth to the Twentieth Century (also Women's Studies 348)
Fall. 4 credits. L. Brown.
This course raises central questions about the role of gender in the study of literature by exploring the development of the female-authored novel from the seventeenth to the twentieth century. Readings will include Aphra Behn's Oroonoko, Fanny Burney's Evelina, Jane Austen's Emma, Charlotte Brontë's Jane Eyre, Virginia Woolf's Room of One's Own and Mrs. Dalloway, and Toni Morrison's Sula. These works raise issues of race and slavery, love and marriage, sexuality and homosexuality, history and women's history, and writing its history. Professor's class will work together to develop strong close readings of the texts and to explore the contexts in which they were written. These discussions will be the basis for an evolving assessment of the status of the female-authored novel by a woman. Students will be asked to participate in discussion, and to write 4 four-page papers and a take-home final exam.

ENGL 350 The Modern Tradition I: 1890–1930
Fall. 4 credits. To be offered 2000–2001.
**ENGL 351 The Modern Tradition II**

Spring. 4 credits. S. Siegel.

This course will examine the relation of modernists literary expression to the violence and ideological upheavals of the first half of the century. Readings will include Imagist and Surrealist Manifestos; the social and political writings of the Bloomsbury Group; the emergence and elaboration of dream theory, psychoanalysis, and literary Expressionism. Readings will include T. E. Hulme, Ezra Pound, and Wyndham Lewis; Lytton Strachey, Virginia Woolf, and G. E. Moore; Freud, Jung, and Winnicott; Yeats, Lady Gregory, and Shaw.

**ENGL 352 Queer Theatre (also Theatre Arts 320 and Women's Studies 320)**

Spring. 4 credits. E. Gainor.

For complete description, see Theatre Arts 320.

**[ENGL 353 Postcolonial Literature To be offered 2000-2001.]**

**ENGL 355 Decadence (also Comparative Literature 355 and Women's Studies 355)**

Spring. 4 credits. E. Hanson.

"My existence is a scandal," Oscar Wilde once wrote, summing up in an epigram the effect of his carefully cultivated style of perversity and paradox. Through their valorization of aestheticism and all that was considered artificial, unnatural, or morbid, the so-called "decadent" writers of the late-nineteenth century sought to free the pleasures of beauty and sexual desire from their more conventional ethical moorings. We will discuss the most important texts through which "decadence" was defined as a literary style, including works by Charles Baudelaire, J.-K. Huysmans, Rachedle, Leopold von Sacher-Masoch, A. C. Swineburne, Walter Fater, and Lionel Johnson, with a particular focus on Oscar Wilde. Topics for discussion will include aestheticism and the cult of "art for art's sake," theories of cultural and linguistic degeneration, homophobia and sexual encoding, androgyny and sexual inversion, hysteria and mysticism, chastity and sublimation, Catholicism and Hellenism, and dandyism. Students may read French and German texts in the original or in translation.

**ENGL 356 Postmodernist Fiction**

Spring. 4 credits. M. Hie.

This class will explore experimental (i.e., weird, counterrealist, "difficult") fiction, both print and hypertext, written in the post-World War II period by some, but not all, of the following writers: Kathy Acker, Margaret Atwood, John Barth, Angela Carter, Theresa Hak Kyung Cha, Robert Coover, Don Delillo, J. Yellowlees Douglas, Michael Joyce, Nathaniel Mackey, Vladimir Nabokov, Thomas Pynchon, Ishmael Reed and Joanna Russ. We will also read some criticism and theory dealing with the period, condition, or movement described as "postmodern" or "postmodernist." Hypertexts will be available on computers at campus locations designated especially for this function. Copies of hypertexts (on floppy disk) will also be available from library reserve.

Class requirements include online newsgroup participation, two critical papers, a take-home midterm and a take-home final.

**ENGL 361 Early American Literature (also American Studies 361)**

Spring. 4 credits. This course may be used as the 300-399 courses required for English majors. S. Samuels.

An exploration of national identities in the formative British colonial period, including the relation of sexualities, religions, narrative practices, and encounters with other cultures to the contested formulations of destiny and free will in determining and explaining an American national character. Moving from early contact narratives through the conflicts that led to the American Revolution and beyond, this course will consider American writing from the 1630s to the 1830s; among other sources, we will read sermons, diaries, journals and poetry of the Puritans, captivity and emancipation narratives, autobiographical writings by Jonathan Edwards and Benjamin Franklin, political writings by Crevecœur, Paine, and Jefferson, fiction by Brockden Brown, Irving, Sedgwick, Child, and Cooper and the early work of Poe, Hawthorne, and Emerson.

**ENGL 362 The American Renaissance (also American Studies 362)**

Fall. 4 credits. J. Porte.

American writing from the 1830's through the 1850's, with emphasis on the major literary achievements of Emerson, Poe, Hawthorne, Thoreau, Melville, Whitman and Dickinson. We shall also study Douglass's 1845 Narrative and Stowe's Uncle Tom's Cabin.

**ENGL 363 The Age of Realism and Naturalism (also American Studies 363)**

Spring. 4 credits. J. Goldsby.

Literary history tells us that realism and naturalism were aesthetic movements that emerged in American fiction at the turn of the 19th century. Cultural histories of the era tell us social ideals about what constituted the "real" and the "natural" were debated by Americans as they coped with the revolutionary changes that turned their worlds upside down between the Civil and First World Wars. This course moves between these two accounts in order to appreciate the varied styles and issues that comprised the literature of American realism at the turn of the 19th century. Principal authors may include: Charles Chesnutt, Stephen Crane, Theodore Dreiser, William Dean Howells, Henry James, Mark Twain, and Edith Wharton.

**[ENGL 364 American Literature Between the Wars (also American Studies 364)**

4 credits. To be offered 2000-2001.]

**ENGL 365 American Literature Since 1945 (also American Studies 365)**

Fall. 4 credits. To be offered 2000-2001.

**ENGL 366 The Nineteenth-Century African Novel (also American Studies 366)**

Spring. 4 credits. M. Seltzer.

A study of American fiction in its first flowering. This course will include such major works as Hawthorne's The Scarlet Letter, Melville's Moby-Dick, James' The Portrait of a Lady, and Mark Twain's Adventures of Huckleberry Finn.

**ENGL 369 Studies in Film Analysis: Fast Talking Dames**

Spring. 4 credits. L. Bogel.

With some attention to melodrama's roots in nineteenth-century fiction and theatre and in twentieth-century women's fiction and popular Freudianism, we will work to define Hollywood's melodrama as both a genre and a way of viewing the world. Psychoanalytic and feminist analyses of melodrama will help us pose larger questions about gender and culture, about gendered spectatorship, about the relation of these films to American culture, about Hollywood's changing constructions of "woman," the "maternal," and the "feminine," and questions about desire, pleasure, fantasy, and ideology in relation to the melodramatic heroine. Required weekly, evening screenings of such films as: Picnic, Now, Voyager, Rebecca, Mildred Pierce; The Women. Imitation of Life; Gilda; Leave Her to Heaven; Gaslight.

Regular critical readings, frequent viewing questions, two longer essays, no exam. Students must be free to attend regular evening screenings and video showings of the films once or twice a week. Lab fee.

**[ENGL 371 American Poetry to 1950 (also American Studies 371)**

4 credits. To be offered 2000-2001.]

**ENGL 375 Survey in African American Literature to 1917 (also American Studies 375)**

**ENGL 376 Survey in African American Literature: 1918 to Present**

Spring. 4 credits. H. Spillers.

This course will select its readings from the genres of poetry, drama, and fiction produced by black American writers from the period of the Harlem Renaissance, to the present. Readings will include poems by Harlem Renaissance poets, the poets of African-American modernism, i.e., Gwendolyn Brooks and Robert Hayden, and some of the poetry of the Black Arts Movement of the 60s, by way of Leroi Jones/Imamu Baraka's and Larry Neal's Black Fire, plays by Lorraine Hansberry, Ed Bullins, August Wilson; non-fictional and fictional writings by Malcolm X, Martin Luther King, Nella Larsen, Jean Toomer, Zora Neale Hurston, Toni Morrison, and Nate Mackey. (Gane, The Auto-biography of an Ex-Colored Man, Passing, The Autobiography of Malcolm X, Letter from an Birmingham Jail, Black Boy, Invisible Man, Flight to Canada, Oxherding Tales, Middle Passage, Jazz, and The Bedouin Hornbook will be among the selected texts for the spring term.) The course is designed for majors, but will be open to all interested students.

**ENGL 378 American Poetry Since 1950 (also American Studies 372)**

Fall. 4 credits. R. Gilbert.

The second half of the 20th century has been a remarkably rich and diverse period in American poetry, characterized by constant innovations in form and technique, and restless exploration of new areas of language and experience. In this course we will focus on a sense of attention to the years born between 1911 and 1932. These may include some or all of the following: Elizabeth Bishop, Robert Lowell, Gwendolyn Brooks, John Berryman, Robert Creeley, Allen Ginsberg, Frank O'Hara, W. S. Merwin, James Wright, A. R. Ammons, John Ashbery, James Merrill, Sylvia Plath, and Adrienne Rich.
ENGL 379 Reading Nabokov  
Fall. 4 credits. G. Shapiro.  
For complete description, see Russian literature 385.

ENGL 381 Reading as Writing  
See complete course description in section headed Expository Writing.

ENGL 382-383 Narrative Writing  
See complete course description in section headed Creative Writing.

ENGL 384-385 Verse Writing  
See complete course description in section headed Creative Writing.

ENGL 388 The Art of the Essay  
See complete course description in section headed Expository Writing.

[ENGL 390 Autobiography: Memoir, Memory, and History  
4 credits. To be offered 2000–2001.]

[ENGL 394 Topics in American Indian Literature (also American Indian Studies 394 and American Studies 394)  
4 credits. To be offered 2000–2001.]

[ENGL 395 Video: Art, Theory, Politics (also Theatre Arts 395)  
Fall. 4 credits. To be offered 2000–2001.]

Courses for Advanced Undergraduates

Courses at the 400-level are open to juniors and seniors and to others by permission of the instructor unless other prerequisites are noted.

ENGL 402 Literature as Moral Inquiry  
Fall. 4 credits. S. Mohanty.  
What can literary works, especially novels and short stories, tell us about moral issues? Should they be seen as suggesting a form of moral inquiry similar to the kind of philosophical discussion we get in, say, Aristotle’s Nicomachean Ethics? Do they deal with the same range of issues? Can reading philosophical works in ethics together with novels that deal with similar themes help us understand these themes better? This course is an attempt to answer these questions. We will read selections from key texts in moral philosophy, including works by Aristotle, Kant, Marx, Nietzsche, and Rawls. Our attempt will be to use these works to help us understand the nature of moral debate and inquiry in novels like Eliot’s Middlemarch, James’s Portrait of a Lady, Morrison’s Beloved, Woolf’s Mrs. Dalloway, Conrad’s Heart of Darkness, Achebe’s Things Fall Apart, and Handke’s The Left-Handed Woman. Other writers we will most probably read include Nadine Gordimer, Doris Lessing, Salman Rushdie, and Kazuo Ishiguro. The emphasis will be on close reading, with particular attention to the relationship between formal elements (such as the use of narrative techniques) and the moral questions the texts organize and explore. Assignments include two papers and a journal.

ENGL 404 History Into Fiction: Nazis and the Literar...

ENGL 448 The American Short Story Fall, spring, or summer. 4 credits. To be offered 2000–2001.

ENGL 452 Wilde and Woolf (also English 652) Fall. 4 credits. S. Siegel. This seminar will consider the question of style: what does the word mean, why has it claimed attention; how has it behaved in the work of two authors whose writing among their contemporaries marked a distinctive departure from Oscar Wilde and Virginia Woolf as readers of literary and social texts. Along the way, we will direct our attention to the implicit expectations we bring to our understanding of "Victorians" and "Modernists." Selections will be drawn from the full range of Wilde's and Woolf's work. Our principal texts, however, will be limited to a few essays by each author.

ENGL 458 Imagining the Holocaust (also English 658, Jewish Studies 458 and 658, Comparative Literature 483 and 683) Spring. 4 credits. D. Schwarz. What is the power of this imagination in keeping the memory of the Holocaust alive for our culture? We shall examine major and widely read Holocaust narratives which have shaped the way we understand and respond to the Holocaust. As we move further away from the original events, why do the kinds of narratives with which authors render the Holocaust horror evolve to include fantasy and parable? Employing both a chronological overview and a synchronic approach—which conceives of the authors having a conversational relationship with one another—we shall discover recurring themes and structural patterns in the works we read.

We shall begin with first-person reminiscences—Wiesel's Night, Levi's Survival at Auschwitz, and The Diary of Anne Frank—before turning to seemingly realistic fictions such as Hersey's The Wall, Kosinski's The Painted Bird, and Ozick's "The Shawl." In later weeks, we shall explore diverse kinds of fictions and discuss the mythopoeic vision of Schwarz-Bart's The Last of the Just, the illuminating distortions of Epstein's King of the Jews, the Kafkaesque parable of Appelfeld's Badonveld 1939, and the fantastic cartoons of Spiegelman's Maus. Books. We shall also include Kinell's Schindler's List, which was the source of Spielberg's academy award winning film, and compare the book with the film.

ENGL 460 Riddles of Rhythm Fall. 4 credits. D. Fried. What makes a poem's pulse beat? How and why does language ordered into rhythm affect us? How do our responses through rhythmic means? What are some of the ways that poets and their readers have tried to make sense of the essence and effects of rhythm? Is poetic rhythm best understood on the model of music? Does ordinary language outside of poetry have its own rhythms? What does the arrangement of poems in lines have to do with its rhythms? Is "free verse" free from rhythm? We will read a variety of poems from the Renaissance to the present, and a range of essays about poetry in an attempt to answer these questions. Writing assignments will include interpretative essays about poems, analysis of accounts of poetic rhythm, including accounts offered by the poets themselves, and occasional short exercises working with poetic rhythm and other formal features of poems. Poets to be studied may include Shakespeare, Herbert, Marvell, Milton, Pope, Keats, Byron, Poe, Dickinson, Whitman, Hopkins, Hardy, Owen, Frost, Williams, Moore, Bishop, and Ammons. No previous study of poetic meter or rhythm is assumed.

ENGL 463 Problems in the Novel: Murder and Crime Writing Spring. 4 credits. R. Morgan. An investigation of the representation of murder across a range of novels, non-fictional accounts and film. Focus on turn of the century and recent materials.

ENGL 464 Emerson and Poe Spring. 4 credits. R. Morgan. This course will focus on the two most important opposing theories and theorists of American poetry and poetics in the 19th century. Though near contemporaries, born in Boston in the same decade, and both deriving their main ideas from Coleridge, Emerson and Poe represented sharply differing versions of the American poetic enterprise. Both steeped in Neoplatonic terms and metaphors, they inspired conflicting traditions, Emerson the expansive Wordsworthian poetics that Whitman seized upon, Poe the Gnostic interiors that made him kin to Hawthorne, Melville and Baudelaire in faraway Paris. Poe called Emerson one of the transcendental "frog-pondians" and Emerson referred to Poe as "the jingle man." Through the works of later writers such as Dickinson, Frost, Crane, and Faulkner we will study how the schism Poe and Emerson defined has been central to American literature ever since.

ENGL 466 James on Film 4 credits. To be offered 2000–2001.

ENGL 469 Faulkner (also American Studies 469) Fall. 4 credits. H. Spillers. This course will examine selected writings of William Faulkner, beginning with some of the early novels (The Sound and the Fury, Light in August, Absalom, Absalom!) and concluding with A Fable. We will consider Faulkner's impact as a maker of myth and one of the leading figures of a literary discourse that creates a modernist sensibility in American letters. As a southern writer, Faulkner is generally associated with private, domestic space, this course will explore the motifs of exile and border crossing and sketch out the ways in which gender, nation and class relate to recent masculinist productions of "traveling theory." We will read novels/poetry by Joan Riley, Merle Hodge, Patricia Grace, Miriama Ba, Anita Desai, and Grace Nichols, and align these texts with the theoretical works of Edward Said, Karen Kaplan, Paul Gilroy and M. NourbeSe Philip. Requirements: active class participation, student presentations, a few short essays and a final paper on the writer of your choice.

ENGL 475 Studies in the Twentieth Century: Major Experimental Novels Fall. 4 credits. M. Hite. A seminar looking at the scope of experimental narrative fiction in the twentieth century, going backward from the hypertexts of the 1990s to the "stream of consciousness" mode and theory that marked the second decade of the century. We will look closely at hypertext fiction and theory by Shelley Jackson, Deena Larsen and Stuart Moulthrop, at print fiction by Angela Carter, Thomas Pynchon, William Faulkner, Virginia Woolf and Dorothy Richardson; and at critical essays by such writers as Moulthrop, Cooper, Carter, Haraway, Benjamin, Woolf and Richardson.

Seminor participants will do regular 5–10 minute presentations, weekly short (2–3 page) essays posted on the class newsgroup, and a final, longer (14+ pages) paper. Hypertexts will be available on computers at two campus locations designated specially for this function. Copies of the hypertexts may also be on library reserve for students to check out.

ENGL 476 Global Women's Literature (also Women's Studies 476) Fall. 4 credits. E. DeLoughrey. This course focuses on contemporary women's writing in English from "postcolonial" regions such as the Pacific, Caribbean, India and Africa. During the semester we will look at how women from these regions depict the process of migration from within the nation (from rural to urban spaces) or from the "postcolony" to metropoles such as England. As women are generally associated with private, domestic space, this course will explore the motifs of exile and border crossing and sketch out the ways in which gender, nation and class relate to recent masculinist productions of "traveling theory." We will read novels/poetry by Joan Riley, Merle Hodge, Patricia Grace, Miriama Ba, Anita Desai, and Grace Nichols, and align these texts with the theoretical works of Edward Said, Karen Kaplan, Paul Gilroy and M. NourbeSe Philip. Requirements: active class participation, student presentations, a few short essays and a final paper on the writer of your choice.

ENGL 477 Studies in Native American Literature: Native American Literature and Criticism (also English 677) Spring. 4 credits. R. Warrior. Native American literature and the criticism that has grown alongside it has emerged over the past thirty years into a maturing field. A major purpose of this course is to provide an advanced introduction to the major literary texts in the field. But another focus of the course will be a metatheroretical discussion of how literary and cultural criticism is constructed and theorized for that literature.
Readings will include Silko, Vizenor, Momaday, Harjo, Craig Womack, Jace Weaver, and Kimberly Blaeser.

**ENGL 478 American Religions and American Literatures**
Spring. 4 credits. R. Warrior.
This course explores ways in which the discourses of American religions inform the literary production of the United States in the nineteenth century. Beginning with selections from Jonathan Edwards and other theological writers, we will then turn to a set of canonical literary texts, including The Scarlet Letter, Moby Dick, and Whitman’s “Democratic Vistas.” But we will also read work that represents a more diverse version of America’s literatures and religions, including American Indian writers such as William Apace, Maria Stewart and others.

**ENGL 479 Jewish-American Writing (also American Studies 479 and Jewish Studies 478)**
Fall. 4 credits. J. Porte.
A study of American Writing from about 1895 to the present that is concerned with the Jewish experience in the New World. Some topics to be covered: immigrant life, gender issues, the conflict between religious and secular outlooks, political affiliation, the Great Depression, the Group Theater, anti-Semitism, Jewish life in the suburbs, the impact of the Holocaust, the “renewal” of Yiddish culture and religious interest. Authors to be studied will probably include: Abraham Cahan, Anzia Yezierska, Fannie Hurst, Henry Roth, Clifford Odets, Karl Shapiro, Alfred Kazin, Saul Bellow, Bernard Malamud, Philip Roth, Ruth Whitman, and Cynthia Ozick. There will be opportunities for research in secondary sources and we may view some films on Jewish subjects.

**ENGL 480-481 Seminar in Writing**
Fall, 480; spring, 481. 4 credits. See complete description in section headed Creative Writing.

**ENGL 490 Literatures of the Archipelagoes: Caribbean and Pacific “Tidalectics”**
Spring. 4 credits. E. DeLoughrey.
The islands of the Pacific and Caribbean share similar histories of European colonization and complex patterns of migration, diaspora, “exile” and settlement. As a series of small nations connected by the migratory paths of the sea, their literatures are often categorized under the rubric of regional studies. In Barbadian Kamau Brathwaite’s definition, “tidalectics” draw upon “the movement of the water backwards and forwards as a kind of cyclomotion, rather than linear.” While we will examine a number of themes shared by the writers of both regions (island sovereignty, creolization, and postcolonial issues), overall we will focus on how seas and oceans facilitate these patterns of dispersal and landfall in both archipelagoes. We will look at the ways bodies of water are theorized by Paul Gilroy, Antonio Benitez-Rojo, Édouard Glissant and Pacific writers Epeli Hau’ofa, Witi Ihimaera and Albert Wendt. Other readings will include poetry by Derek Walcott, Brathwaite, Grace Nichols, Teresa Teaiwa, and novels/short stories by Ihimaera, Wendt, Ana Lydia Vega, and Edwidge Danticat.

**ENGL 491 Honors Seminar I**
Fall. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructor.

**Early Shakespeare**
S. McMillin.
Studies in the first half of Shakespeare’s career, intended to introduce the critical and scholarly questions important in Shakespeare studies today. Readings will include such plays as Henry IV, Parts One and Two, Henry V, Romeo and Juliet, Comedy of Errors, Much Ado About Nothing, Merchant of Venice. Assignments will fall at the rate of about one play and one critical essay per week. Reports, short papers, a term paper.

**ENGL 492 Honors Seminar II**
Spring. 4 credits. Open to students in the Honors Program in English or related fields, or by permission of instructors.

**Section I: Birth of the Cool**
African American Literary Culture of the 1940s and 1950s. J. Goldsby.
After the Harlem Renaissance but before the Civil Rights and Black Nationalist eras, an extraordinary group of African American writers—the “coolest,” in Miles Davis’ sense of the term—came of literary age together: Ralph Ellison, Richard Wright, and James Baldwin; Gwendolyn Brooks, Ann Petry, and Dorothy West. We will read their signal works in the context of the authors’ careers, and in relation to the cultural and racial politics underlying the “American Century.” Short critical essays, 1–2 oral presentations, and a research-oriented project. English 265 or 376 suggested but not required.

**Section II: Reading Joyce’s Ulysses**
D. Schwarz.
A thorough, episode-by-episode study of the art and meaning of Joyce’s Ulysses. We will explore the relationship between it and the other experiments in modernism and show how Ulysses redefines the concepts of epic and hero. We will also view Ulysses to address major issues in literary study and to test various critical and scholarly approaches. Such a self-conscious inquiry into theories and methods should prepare students to confront other complex texts, as well as help them define their own critical positions as they plan their senior honors theses.

**ENGL 493 Honors Essay Tutorial I**
Fall or spring. 4 credits. Prerequisites: senior standing and permission of Director of the Honors Program.

**ENGL 494 Honors Essay Tutorial II**
Fall or spring. 4 credits. Prerequisites: English 493 and permission of Director of the Honors Program.

**ENGL 495 Independent Study**
Fall or spring. 2–4 credits. Prerequisites: Permission of departmental adviser and director of undergraduate studies.

**Courses Primarily for Graduate Students**
Permission of the instructor is a prerequisite for admission to courses numbered in the 600s. These are intended primarily for graduate students, although qualified undergraduates are sometimes admitted. Undergraduates seeking admission to a 600-level course should consult the instructor. The list of courses given below is illustrative only; a definitive list, together with course descriptions and class meeting times, is published in a separate department brochure before course enrollment each term.

**Graduate English Courses for 1999-2000**

**ENGL 600 Colloquium for Entering Students**

**ENGL 602 Literature and Theory**

**ENGL 611 Old English (also English 311)**

**ENGL 614 Middle English (also English 413)**

**ENGL 616 The Development of Print Culture**

**ENGL 622 Renaissance Poetry (also Comparative Literature 450, Comparative Literature 650)**

**ENGL 627 Studies in Shakespeare: Shakespeare and Money**

**ENGL 641 Studies in Romantic Writing: Byron, Hazleitt, Shelley, Keats, and the Issue(s) of Romanticism**

**ENGL 652 Wilde and Woolf (also English 452)**

**ENGL 660 Cinematic Desire (also Theatre Arts 661, Women's Studies 661, & Comparative Literature 662)**

**ENGL 667 American Fiction, 1850-1900**

**ENGL 668 The Stein Era: (Post)Modernism and the Canonizing of Gertrude Stein**

**ENGL 707 Writing in the Disciplines: Literacy, Social Organization, Consciousness, and the Information Society (also Writing 707)**

**ENGL 710 Advanced Reading in Old English**

**ENGL 780.1 MFA Seminar: Poetry**

**ENGL 780.2 MFA Seminar: Fiction**

**ENGL 785 Reading for Writers**

**ENGL 610 Dante, Chaucer, Boccacio, and Gower**

**ENGL 612 Beowulf (also English 312)**

**ENGL 618 Medieval Drama**

**ENGL 623 Allegory and Romance**

**ENGL 633 Eighteenth Century Poetry**

**ENGL 640 Slavery and the Idea of Race in Early Modern English (also Society for the Humanities 416 & English 440)**

**ENGL 643 Mad Romanticisms**

**ENGL 656 Postmodernism**

**ENGL 658 Representing the Holocaust (also English 458, Jewish Studies 458 & Jewish Studies 658)**

**ENGL 675 The Long Poem**

**ENGL 676 Theory of the Novel**
ENGL 677 Native American Literature and Criticism

ENGL 681 Prosody

ENGL 699 Studies in African American Literature: African-American Women and the Culture Critique

ENGL 781.1 MFA Seminar: Poetry

ENGL 781.2 MFA Seminar: Fiction

English for Academic Purposes

ENGL 205 English as a Second Language
Fall. 4 credits. Prerequisite: placement by examination. S. Schaffzin.
An all-skills course emphasizing listening and speaking, with some writing practice. Students also meet individually with the instructor.

ENGL 206 English as a Second Language
Spring. 3 credits. Prerequisite: ENGL 205 or placement by examination. S. Schaffzin.
A writing class for those who have completed ENGL 205 and need further practice, or for those who place into the course. Individual conferences are also included.

ENGL 209 English as a Second Language
Fall or spring. 1 credit. Prerequisite: placement by examination. S. Schaffzin.
Practice in academic speaking. Formal classroom discussion techniques and presentation of information to a group. Presentations are videotaped and reviewed with the instructor. Individual conferences supplement class work.

ENGL 210 English as a Second Language
Spring. 1 credit. Prerequisite: permission of instructor. S. Schaffzin.
Practice in academic speaking. Formal classroom discussion techniques and presentation of information to a group. Presentations are videotaped and reviewed with the instructor. Individual conferences supplement class work.

ENGL 211 English as a Second Language
Fall, spring, or summer. 3 credits. Prerequisite: placement by examination. D. Campbell.
Academic writing with emphasis on improving organization, grammar, vocabulary, and style through the writing and revision of short papers relevant to students' fields. Frequent individual conferences supplement class work.

ENGL 212 English as a Second Language
Spring. 3 credits. Prerequisite: permission of instructor. Enrollment is restricted to 12 on a first-come, first-served basis. D. Campbell.
Research paper writing. For the major writing assignment of this course, the students must have a real project that is required for their graduate work. This can be a thesis proposal; a pre-thesis, part of a thesis, such as the literature review or discussion section; a paper for another course or a series of shorter papers (with permission of the other instructor); or a paper for publication. Time limitations make it difficult to deal with work over 20 pages in length. Course work involves practice in paraphrase, summary, the production of cohesive, coherent prose, vocabulary use, and grammatical structure. Frequent individual conferences are a necessary part of the course. Separate sections for Social Sciences/Humanities and for Science/Technology.

ENGL 213 Written English for Non-Native Speakers
Spring. 3 credits. Prerequisite: permission of instructor. S. Schaffzin.
Designed for those whose writing fluency is sufficient for them to carry on regular academic work but who want to refine and develop their ability to express themselves clearly and effectively. Individual conferences supplement class work.

First-Year Writing Seminar

ENGLB 215-216 English for Later Bilinguals
For description, see first-year writing seminar brochure.

Intensive English Program

305 Morrill Hall
This noncredit, nondegree program provides full-time intensive English language instruction as well as academic, social, and cultural orientation to the United States and its institutions. The aim of the program is for participants to acquire proficiency in the language in order to pursue goals in English for academic, business, professional, or personal purposes.

Programs are offered both fall and spring semesters and in a six-week summer session (from late June to early August). Participants receive a minimum of 20 hours of classroom instruction weekly in speaking, listening, reading, writing, and grammar, which are taught at all levels from low intermediate through very-high advanced. Applicants must be at least 17 years of age, hold the equivalent of a high school diploma, and have had some previous study of English.

Students who have gained full admission to or who are already registered in degree-granting programs at Cornell should consult the section "English for Academic Purposes" (series ENGLF).

The Intensive English Program is coordinated by the director, Jeanette Mancusi, Cornell University, Morrill Hall, Ithaca, New York 14853-4701, U.S.A. Information and application materials are available directly from the program by writing to the above address, calling 607-255-4863, or faxing 607-255-7491. Internet e-mail is CUEP@cornell.edu. Web page is http://dml.cornell.edu/languages/IEP/cuep.html.

FILM
See Department of Theatre, Film and Dance.

See Romance Studies.

FIRST-YEAR WRITING SEMINARS

For information about the requirements for writing seminars and descriptions of seminar offerings, see "Special Programs and Interdisciplinary Studies" at the end of the Arts and Sciences section of this catalog and consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in October for the spring term.

GEOLOGICAL SCIENCES

As an intercollege unit, the Department of Geological Sciences has degree programs in both the College of Arts and Sciences (B.A. degree) and the College of Engineering (B.S. degree).

We live on a planet with finite resources and a finite capacity to recover quickly from human-induced environmental stresses. It is also a powerful planet, with geologic hazards such as earthquakes and volcanic eruptions that alter the course of history with little prior warning. As the human population grows, understanding the earth and its resources becomes progressively more important for both future policy makers and ordinary citizens. Because the human need to understand the earth is so pervasive, we provide our students with a broad and solid minimal set of required courses plus room to explore more specialized topics with well-chosen electives within and outside the department. The Geological Sciences Major prepares students for advanced study in geology, geophysics, geochemistry and geobiology, and careers in mineral and petroleum exploration or in environmental geology. Alternatively, it is a valuable major for a pre-law or pre-med program or in preparation for a career in K-12 education.

In addition to course work, students learn by outdoor field work and involvement in the vigorous research programs of the department. Facilities include laboratories, workshops, and processing seismic signals and digital images of the earth's surface, instruments for highly precise isotopic and element analyses, and extensive libraries of earthquake records, satellite images, and exploration seismic records. High-pressure, high-temperature mineral physics research uses the diamond anvil cell and the Cornell High Energy Synchrotron Source (CHESS). Undergraduates have served as field assistants for faculty members and graduate students in Argentina, British Columbia, the Aleutian Islands,
The Major

For admission to the Geological Sciences major in the College of Arts and Sciences, a student should have made substantial progress toward completing the following basic science requirements for the major: MATH 111-112 or MATH 191-192, PHYS 207-208 or PHYS 112-113, CHEM 207 or 211. Freshmen and Sophomores should take an introductory GEOL course (or courses), normally GEOL 101 or GEOL 201, or GEOL 102 or GEOL 104. Juniors with a strong foundation in mathematics and science may be accepted into the major without an introductory course. Majors take GEOL 210, the five 300-level core courses listed below, 6 credits of additional coursework from geological sciences courses numbered 300, 400, or 600, plus an additional course in either computer science or biological science, or an intermediate-level course in biological science, mathematics, chemistry, or physics. In addition, a requirement for an advanced outdoor field experience may be met by completing one of the follow 4 credit options: (a) GEOL 417 (Field Mapping in Argentina, 3 credits) and GEOL 491 or 492 (based on field observations) for a combined 4 credit minimum; (b) GEOL 437 (Geophysical Field Methods, 3 credits) plus at least 1 credit of GEOL 491 or 492 using geophysical techniques from GEOL 437; (c) GEOL 491-492 (Undergraduate Research, 2 credits each) with a significant component of field work; or (d) an approved outdoor field course taught by another college or university (4 credit minimum).

Core Courses

- **GEOL 326** Structural Geology
- **GEOL 355** Mineralogy
- **GEOL 356** Petrology and Geochemistry
- **GEOL 375** Sedimentology and Stratigraphy
- **GEOL 388** Geophysics and Geotectonics

Prospective majors should consult R. W. Kay, director of undergraduate studies, or another faculty member as early as possible for advice in planning a program. Students majoring in geological sciences may attend the departmental seminars and take advantage of cruises, field trips, and conferences offered through the Department of Geological Sciences.

Courses

**Freshman and Sophomore Courses**

- **GEOL 101 Introductory Geological Sciences**
  - Fall, spring, or summer. 3 credits. Fall, staff, spring, J. M. Bird; summer, W. Brice.
  - Designed to enhance an appreciation of the physical world. Natural environments, surface features, dynamic processes such as mountain belts, volcanoes, earthquakes, glaciers, and river systems are emphasized. Interactions of the atmosphere, hydrosphere, biosphere, and lithosphere (Earth System Science). Water, mineral, and fuel resources; environmental concerns. Field trips in the Ithaca region.

- **GEOL 102 Evolution of the Earth and Life**
  - (also BIO G 170)
  - Spring. 3 credits. J. L. Cisne.

- **GEOL 104 The Sea: An Introduction to Oceanography**
  - (also BIO ES 154)
  - Spring, summer. 3–4 (4 credits with lab section) credits. Spring: C. H. Greene, W. M. White; summer: J. Chimient. A survey of the physics, chemistry, geology, and biology of the oceans for both science and non-science majors. Topics include: seafloor spreading and plate tectonics, marine sedimentation, chemistry of seawater, ocean currents and circulation, the oceans and climate change, ocean ecology, coastal processes, marine pollution, and marine resources.

- **GEOL 105 Writing on Rocks (Freshman Seminar)**
  - Fall. 3 credits. J. Chimient.
  - See Freshman Seminar Handbook for description.

**GEOL 106 Vertebrate Fossil Preparation**

- Spring. 1 credit. Prerequisites: one introductory geology course or concurrent enrollment, class size is limited. J. Chimient.

- A laboratory-oriented course that will expose students to techniques of vertebrate fossil preparation. Roughing-out and fine preparation of large specimens in solid matrix will be covered, as well as screen washing and microscope techniques for the recovery of micro-vertebrate remains. Specialized scanning techniques will be discussed. The class will meet for one hour each week for the first six weeks of the semester. Students will be assigned to an individual or group project requiring two hours of participation each week for the remainder of the semester.

- **GEOL 107 How the Earth Works**
  - Fall. 1 credit. J. L. Cisne.

- A user-friendly introduction to the workings and interactions of solid earth, ocean, atmosphere, and life as they relate to understanding ongoing global change.

- **GEOL 109 Dinosaurs**
  - Fall. 1 credit. J. L. Cisne.

- An introductory survey course for anyone interested in dinosaurs. Lectures examine the fossil evidence and illustrate how various geological and biological disciplines contribute to understanding dinosaurs and their world.

- **GEOL 111 To Know the Earth and Build a Habitable Planet**
  - Fall. 3 credits. J. M. Bird.

- **GEOL 122 Earthquake! (also ENGR 122)**
  - Fall. 3 credits. L. D. Brown.

- The science of natural hazards and strategic resources is explored. Techniques for locating and characterizing earthquakes, and assessing the damage they cause; methods of using sound waves to image the earth's interior to search for strategic materials; the historical importance of such resources. Seismic experiments on campus to probe for groundwater, the new critical environmental resource.

- **GEOL 200 Art, Archaeology, and Analysis**
  - (also ARKEO 285, ARTH 200, ENGR 185, PHYS 200)

- Spring. 3 credits. R. Kay.

- An interdepartmental course on the use of techniques of science and engineering in cultural research. Applications of physical and physiological principles to the study of archaeological artifacts and works of art. Historical and technical aspects of artistic creation. Anaylses by modern methods to deduce geographical origins, and for exploration, dating and authentication of cultural objects. Does not meet liberal studies distribution requirement for Engineering.

- **GEOL 201 Introduction to the Physics and Chemistry of the Earth**
  - (also ENGR 101)

- Fall. 3 credits. Prerequisites: Physics 112 or 207. L. M. Cathles.
GEOL 203 Natural Hazards and the Science of Complexity
Fall. 3 credits. Prerequisites: 1 calculus course. Not offered 1999-2000.
D. L. Turcotte.
Studies of natural hazards, earthquakes, volcanic eruptions, floods, hurricanes, tornadoes, severe storms, wildfires, meteor impacts. Applications of the science of complexity to natural hazards: fractals, chaos, and self-organized criticality.

 GEOL 204 Ocean Sciences Laboratory
Spring. 3 credits. Prerequisite or corequisite: BIOES 154/GEOL 104.
C. H. Greene, B. W. Monger.
A laboratory course investigating the physcs, chemistry, geology, and biology of the oceans. This course is intended for science majors to supplement the material covered in BIOES 154/GEOL 104. The course includes a discussion section and laboratory each week.

GEOL 210 Introduction to Field Methods in Geological Sciences
Fall. 3 credits. Prerequisite: GEOL 101, 201, or permission of instructor. Weekly field sessions. A weekend field trip.
S. Mahlburg Kay.
The methods by which rocks are used as a geological database. Field methods used in the construction of geologic maps and cross sections; systematic description of stratigraphic sections. Field and laboratory sessions on Saturday mornings until Thanksgiving. One additional lecture during most of these weeks. One weekend field trip to eastern New York.

GEOL 212 Caribbean Field Trip (January)
Spring. 2 credits. Prerequisite: permission of instructor. Enrollment limited to 15. Approximate cost $1100. L. D. Brown.
A multidisciplinary look at earth science and environmental issues represented in the Yucatan Peninsula of Mexico. Base for operations will be the Centro Ecologico Akumal, located on the Caribbean coast south of Cancun. This coast and its associated reef ecosystem epitomizes the conflict between ecological preservation and economic development on an international scale. Excursions may include visits to Merida, a historic Spanish town which lies above the buried impact structure that many believe resulted in the death of the dinosaurs; ruins at Chichen Itza, Mayapan, Coba, and Tulum associated with the rise and fall of Mayan culture; and wildlife (monkeys, jaguars, crocodiles) preserves where recent research has found evidence that the fall of the Mayans may have been triggered by climate change. The field trip will feature snorkel tours of reefs and lagoons as well as the cenotes (sinkholes) that characterize the region. Weekly field lectures during the semester will provide background; field trip scheduled for January 2000.

GEOL 213 Marine and Coastal Geology
Summer. 2 credits. Prerequisites: an introductory course in geology or permission of instructor. Staff.
A four-week course offered at Cornell's Shedd Marine Laboratory (SML), on an island near Portsmouth, New Hampshire. For more details and an application, consult the SML office, G14 Stimson Hall. Estimated cost for 1999 (including tuition, room, board, and ferry transportation) is $1100.

Junior, Senior, and Graduate Courses
Of the following, the core courses GEOL 326, 355, 356, and 388 may be taken by B.S. candidates who have successfully completed GEOL 201 or the equivalent and by B.A. candidates who have completed GEOL 101 or the equivalent, or who can demonstrate to the instructor that they have adequate preparation in mathematics, physics, chemistry, biology, or engineering.

GEOL 302 Evolution of the Earth System [also SES 302 and SCAS 332]
Spring. 4 credits. Prerequisites: MATH 112 or 102 or permission of instructor. Lectures, to be announced; discussion, to be announced. B. L. Isacks and staff.
Co-evolution of life and the earth system: Earth's early history; plate tectonics, continental drift and climate changes during the past billion years; mountain building, ice ages, and our own emergence during the past ten million years. Introduction to methods of interpreting information preserved in the rock record.

GEOL 315 Geomorphology
Fall. 4 credits. Prerequisite: one of the following: a 3-credit GEOL or SES course, or SCAS 260. T. E. Jordan and B. L. Isacks.
A study of the processes that sculpt the Earth's landscapes (above and below sea level) and the nature of those landforms. Landforms constructed by Earth's internal processes are the point of departure, as we examine their modification by physical interaction with the atmosphere and oceans. Also treated are depositional landforms that are generated by accumulations of grains of sediment. Laboratory exercises include both field examination of landforms of the Finger Lakes area and computer analysis of satellite images and Digital Elevation Models of examples from around the globe. Two Saturday field trips.

GEOL 326 Structural Geology
Spring. 4 credits. Prerequisite: MATH 112, GEOL 101 or 201, or permission of instructor. R. W. Allmendinger.
Nature and origin of deformed rocks at microscopic to macroscopic scales, with emphasis on structural geometry and kinematics. Topics include stress, strain, rheology, deformation mechanisms, minor structures, faulting, folding, and structural families.

GEOL 356 Petrology and Geochemistry
Spring. 4 credits. Prerequisite: GEOL 355. R. W. Kay.
Principles of phase equilibrium as applied to igneous and metamorphic systems. Description, classification, chemistry, origin, regional distribution, and dating of igneous and metamorphic rocks. Geochemical distribution of trace elements and isotopes in igneous and metamorphic systems. The petrological evolution of the planets.

GEOL 375 Sedimentology and Stratigraphy
Fall. 4 credits. Prerequisite: GEOL 101 or 201. J. L. Cisne.

GEOL 388 Geophysics and Geotectonics
Spring. 4 credits. Prerequisites: Mathematics 192 (or 112) and Physics 208 or 213. B. L. Isacks.
Global tectonics and the deep structure of the solid earth as revealed by investigations of earthquakes, earthquake waves, the earth's gravitational and magnetic fields, and heat flow.

GEOL 411 Satellite Remote Sensing in Geoscience
Fall. 3 credits. Prerequisite: permission of instructor. Not offered 1999-2000.
B. L. Isacks.
Instruction in satellite remote sensing, image processing, geographic information systems (GIS) and analysis of digital elevation models, using advanced computer workstations, via participation in current research on earthquakes, glaciers, and tectonics.

GEOL 417 Field Mapping in Argentina
Summer. 3 credits. Prerequisites: GEOL 210 and 326; Spanish desirable, but not required. S. Mahlburg Kay.
Modern techniques of geological mapping applied in the region of San Juan, Argentina, including folded and faulted sedimentary rock units of the Andean Precordillera (San Juan River section), intensely deformed Precambrian metamorphic rocks of the Pampean Ranges (Pie de Palo), and shallow-level silicic intrusives (Cerro Blanco-Ullun).
GEOL 423 Petroleum Geology
Fall. 3 credits. Recommended: GEOL 326. Offered alternate years. Not offered 1999–2000. Introduction to hydrocarbon exploration and development. Exploration techniques, including well logs, fluid pressures, seismic-reflection methods, gravity, and magnetic measurements to map subsurface structures and stratigraphy. Petroleum origin and migration. Dispersal systems and depositional and stratigraphic measurements to map subsurface structures, including the creation and modification of igneous rocks. Temperature and stress in the crust and mantle and their influence on reaction rates and textures of metamorphic rocks. Application of experimental studies to natural systems.

GEOL 444 Advanced Mineralogy
Spring. 3 credits. Prerequisite: GEOL 355 or permission of instructor. Not offered 1999–2000. W. A. Bassett. Crystallography and crystal chemistry of minerals and the methods of their study. X-ray diffraction methods, computer simulation of crystal structures. Emphasis on effects of high pressures and temperatures with implications for understanding of Earth’s interior.

GEOL 455 Geochemistry
Fall. 4 credits. Prerequisites: Chemistry 207 and Mathematics 192 or equivalent. Recommended: GEOL 356. Offered alternate years. W. M. White. The Earth from a chemical perspective. Formation of the elements; cosmochemistry; chemical evidence regarding the formation of the Earth and Solar System; trace-element geochemistry; isotope geochemistry; geochemical thermodynamics and kinetics; chemical evolution of the crust, mantle, and core; weathering and the chemistry of natural waters; chemical cycling of the oceans, hydrothermal systems and ore deposition.

GEOL 458 Volcanology

GEOL 462 Marine Ecological Processes
(also BIOES 462)

GEOL 463 Geophysical Field Methods
Fall. 3 credits. Prerequisites: PHYS 213 or 208, or permission of instructor. L. D. Brown. Introduction to field methods of geophysical exploration, especially as applied to environmental issues. Emphasis on seismic, gravity, and magnetic techniques. Field surveys carried out at the beginning of the semester. Field surveys are analyzed in a series of weekly follow-up meeting days during the semester in which the results are analyzed and interpreted. A field companion to GEOL 434, which is recommended but not required prior to this course.

GEOL 464 Geohydrology
(also ABEN 471 and CEE 431)
Fall. 3 credits. Prerequisites: Mathematics 294 and Earth 207, W. A. Bassett, L. M. Cales, J.-Y. Parlange, T. S. Stenehuis. Intermediate-level study of aquatic organism, groundwater flow, and related design factors. Includes description and properties of natural aquifers, groundwater hydraulics, soil water, and solute transport.

GEOL 465 Advanced Petrology
GEOL 502 Case Histories in Groundwater Analysis  
Spring. 4 credits. L. M. Cathles  
Groundwater flow in a specific area, such as a proposed nuclear-waste disposal site, analyzed in depth. Geological and resource data on the area are presented early in the course. Then the material is analyzed by students working as an engineering analysis team. Each student makes a weekly progress report and writes part of a final report. Results are presented in a half-day seminar at end of term.

GEOL 622 Advanced Structural Geology I  
Spring. 3 credits. Prerequisites: GEOL 326 and permission of instructor. Offered alternate years. R. W. Allmendinger. Stress-strain theory and application. Advanced techniques of structural analysis. Topics include finite and incremental strain measurement; microstructure, preferred orientation, and TEM analysis, pressure solution and development, and experimental deformation. Applications to deformation of unconsolidated sediments, brittle and brittle-ductile deformation of supracrustal strata, and ductile deformation of high-grade metamorphic rocks. Kinematic analysis of shear zones and folds in these regimes.

[GEOL 624 Advanced Structural Geology II  

GEOL 628 Geology of Orogenic Belts  
Spring. 3 credits. Prerequisite: permission of instructor. J. M. Bird. A seminar course in which students study specific geologic topics of an orogenic belt selected for study during the term. The course is intended to complement GEOL 681.

GEOL 634 Advanced Geophysics I: Fractals and Chaos in Geology and Geophysics  
Spring. 3 credits. Prerequisite: GEOL 388 or permission of instructor. Offered alternate years. D. L. Turcotte. Definitions of fractal sets and statistical fractals, scale invariance, self-affine fractals, multifractals, applications to fragmentation, seismicity and tectonics, petroleum distribution and reserves, ore grade and tonnage, drainage networks and landforms, and floods and droughts. Definitions of chaos and self-organized criticality, renormalization groups, diffusion limited aggregation and percolation clusters, wavelet transforms, applications to mantle convection, the earth's dynamo, and distributed seismicity.

GEOL 636 Advanced Geophysics II: Quantitative Geodynamics  
Spring. 3 credits. Prerequisite: GEOL 388 or permission of instructor. Offered alternate years. Not offered 1999–2000. D. L. Turcotte. Stress and strain in the earth, elasticity and flexure, heat transfer, gravity, fluid mechanics, rock rheology, faulting, chemical geodynamics, flow in porous media.]

GEOL 651 Analysis of Biogeochemical Systems  
Spring. 3 credits. Prerequisite: MATH 293 or permission of instructor. Offered alternate years. L. A. Derry. Dynamics of biogeochemical systems. Kinetic treatment of biogeochemical cycles. Box models, residence time, response time. Analytical and numerical solutions of model systems. Eigen-analysis of linear systems. Feedback and nonlinear cases, problems of uncertainties in natural systems. Modeling software such as Stella II and Matlab; applications to current research of participants or from recent literature.

GEOL 656 Isotope Geochemistry  
Spring. 3 credits. Open to undergraduates. Prerequisite: GEOL 455 or permission of instructor. Offered alternate years. W. M. White. Nucleosynthetic processes and the isotopic abundances of the elements. Geochronology and cosmochemistry using radioactive decay schemes, including U-Pb, Rb-Sr, Sm-Nd, K-Ar, U-series isotopes, and cosmogenic isotopes such as 13C and 18O. Use of radiogenic and stable isotopes in petrology and their application to study of the evolution of the crust and mantle. Isotopic evidence regarding the formation of the Earth and the Solar System. Stable isotopes and their use in geochronometry, meteorites, paleontology, and the global climate system.

GEOL 681 Geotectonics  
Fall. 3 credits. Prerequisite: permission of instructor. J. M. Bird. Theories of orogenesis, ocean and continent evolution. Kinematics of lithospheric plates. Rock-time assemblages of modern oceans and continental margins, and analogs in ancient orogenic belts. Time-space reconstructions of specific regions. Problems of dynamic mechanisms—corollaries and evidence from crustal features.

GEOL 695 Computer Methods in Geosciences  
Fall, spring. 3 credits. L. Brown, B. L. Isacks. Independent research projects using state-of-the-art computational resources in the Department of Geological Sciences. Possibilities include: image and seismic processing, seismic and geomechanical modeling, GIS, use of interpretational workstations for 3D seismic satellite imagery, modeling fluid flow through complex media.

GEOL 700-799 Seminars and Special Work  
Fall, spring. 1–3 credits. Prerequisite: permission of instructor. Staff. Advanced work on original investigations in geological sciences. Topics change from term to term. Contact appropriate professor for more information.

GEOL 722 Advanced Topics in Structural Geology  
R. W. Allmendinger.

GEOL 731 Plate Tectonics and Geology  
J. M. Bird.

GEOL 733 Fractals and Chaos—Independent Studies  
D. L. Turcotte.

GEOL 751 Petrology and Geochemistry  
S. Mahlburg Kay, R. W. Kay.

GEOL 753 Advanced Topics in Mineral Physics  
W. A. Bassett.

GEOL 755 Advanced Topics in Petrology and Tectonics  
J. M. Bird, W. A. Bassett.

GEOL 757 Current Research in Petrology  
S. Mahlburg Kay, R. W. Kay.

GEOL 762 Advanced Topics in Petroleum Exploration  
Fall. W. B. Travers.

GEOL 771 Advanced Topics in Sedimentology and Stratigraphy  
T. E. Jordan.

GEOL 773 Paleobiology  
J. L. Casne.

GEOL 775 Advanced Topics in Oceanography  
Spring. C. H. Green.

GEOL 780 Earthquake Record Reading  
Fall. M. Barazangi.

GEOL 781 Geophysics, Exploration Seismology  
L. D. Brown.

GEOL 783 Advanced Topics in Geophysics  
B. L. Isacks.

GEOL 789 Lithospheric Seismology (COCORP Seminar)  
L. D. Brown.

GEOL 793 Andes-Himalaya Seminar  

GEOL 795 Low Temperature Geochemistry  
L. A. Derry.

GEOL 796 Geochemistry of the Solid Earth  
W. M. White.

GEOL 797 Fluid-Rock Interactions  
L. M. Cathles.

GEOL 799 Soil, Water, and Geology Seminar  
L. M. Cathles, T. S. Steenhuis.

GERMAN STUDIES  
L. Adelson, chair; P. Gilgen, director of undergraduate studies; A. Schwarz, director of graduate studies; D. Bathrick, M. Briggs (Dutch), B. Bueter, H. Deimert, I. Ezerghalis, A. Groos, P. U. Hobendahl, G. Lischke, B. Martin, L. Trancik (Swedish), G. Valk, G. Waite

The Department of German Studies offers students a wide variety of opportunities to explore the literature and culture of German-speaking countries, whether as part of their general education, a major in German Studies or a double major involving another discipline, or as preparation for graduate school or an international professional career. Courses are offered in English translation as well as in German, subjects range from medieval to contemporary literature and from film and visual culture to intellectual history, music, history of psychology, and women's studies.

L. M. Cathles, T. S. Steenhuis.
The department's offerings in English begin with a series of First-Year Writing Seminars introducing various aspects of German literature (the fairy-tale and romantic narratives, twentieth-century writers such as Kafka, Hesse, Mann, Brecht), issues in mass culture and modernity, problems of German national identity/ies, and cinema and society. A variety of courses in English translation are also offered on the 300- and 400-level. They explore such topics as the Faust legend, aesthetics from Kant to Heidegger, Freud and his legacy, opera from Mozart to Strauss, the German novel, political theory and cinema, the Frankfurt School, and feminist theory. It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

Students wishing to begin German language at Cornell enroll in GERST 121-122. Those successfully completing this sequence and those placing into the 200-level may pursue further language study or begin with the literature and cultural studies tracks in German Studies. The beginning sequence of 200-level courses in German Studies, with readings and discussion in German, is designed to provide further grounding in the language as well as introduce German literature and cultural studies. More advanced courses introduce majors and other qualified students to a broad variety of literary and cultural topics. (Beginning in spring 1998, GERST 201 and GERLA 203 were replaced by GERST or GERLA 200.)

**Sequence of courses**
- **First level:** German 121–122, after completion, placement into German 123 or 200, 205
- **Second level:** German 200, 202, 204, 205–206
- **Third level:** German 301, 302, 303–304, 306, 307

Further 300- and 400-level literature and culture courses.

**Advanced Standing**
Students with an AP score of 4 or better are automatically granted three credits in German. Students with an AP score of 4 or better, an LPG score of 65 or higher, or a SAT II score of 680 or higher must take the CASE examination for placement in courses above GERST 200. Students coming to Cornell with advanced standing in German and/or another subject are encouraged to consider a double major and to discuss the options with the director of undergraduate studies as early as possible.

**The Majors**
The department offers two options for the major: German literature/culture and German area studies, the latter a more broadly defined sequence that includes work in related disciplines. The course of study in either major is designed to give students proficiency in reading, speaking, and writing in German, to acquaint them with German culture, and to help them develop skills in reading, analyzing, and discussing German texts in relevant disciplines. For both majors, there is a wide variety of courses co-sponsored with other departments (Comparative Literature, Government, History, Music, Theatre, Film, and Dance; Women's Studies).

**German Studies**
Although the emphasis of this track is on literature, majors may also pursue individual interests in courses on film and visual culture, theater and performing arts, music, intellectual and political history, and women's studies that have a substantial German component. Please consult with the director of undergraduate studies.

**Admission:** By the end of their sophomore year, prospective majors should have successfully completed GERST 202, GERST 220, or GERST or GERLA 204.

To complete the major, a student must:
1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, GERST or GERLA 303, 305) or the equivalent.
2. Complete six courses in German Studies at the 300 level or above. One of these must be the Senior Seminar (GERST 410).

**German Area Studies**
Students select courses from the Department of German Studies as well as courses with a substantial German component from other departments, such as Comparative Literature, Government, History, Music, Theatre, Film, and Dance; Women's Studies.

**Admission:** By the end of their sophomore year, prospective majors should have successfully completed GERST 202, GERST 220, or GERST or GERLA 204.

To complete the major, a student must:
1. Demonstrate competence in the German language by successful completion of two 300-level courses with intensive language work (GERST 301, 302, GERST or GERLA 303, 305) or the equivalent.
2. Complete six courses with a substantial German component at the 300 level or above. Three of these must be in German Studies, including the Senior Seminar (GERST 410).
3. Select a committee of one or more faculty advisors to help formulate a coherent program of study. One of the advisors must be from the Department of German Studies.

**Study Abroad**
The department encourages undergraduate majors to consider studying abroad for 1–2 semesters, normally during the junior year, as regular students at a German-speaking university. Interested students should consult Bonnie Buettner or Gunhild Lischke as early as possible.

**Honors**
- **Eligibility:** A student wishing to receive honors in German Studies must have a GPA of 3.5 in all courses relevant to the major.

**Committee:** Candidates for honors form an advisory committee consisting of an advisor from German Studies and at least one additional faculty member.

**Honors essay:** During the first term of their senior year, students determine the focus of their honors essay through an appropriate course, GERST 453, under the direction of their advisors. During the second term they complete an honors essay, GERST 454, which will be evaluated by the committee.

**Determination of honors:** An oral examination concludes the process. Honors will be determined by the essay, the exam, and grades in the major.

**Fees:** Depending on the course, a small fee may be charged for film rental or photocopied texts for course work.

**Freshman Writing Seminars**
See Freshman Seminar booklet for course times and descriptions.

**GERST 109 From Fairy Tales to the Uncanny:** Exploring the Romantic Consciousness
Fall or spring. 3 credits. B. Buettner, P. Gilgen, and staff.

**GERST 111 Workshop in German Studies**
Fall. 3 credits. H. Deinert.

**GERST 130 Metropolis, Modernity, and Mass Culture: The Roaring Twenties, German-style**
Fall or spring. 3 credits. B. Buettner, P. Gilgen and staff.

**GERST 150 Imaging Germany/s**
Fall or spring. 3 credits. B. Buettner, P. Gilgen and staff.

**GERST 151 Kafka, Hesse, Brecht, and Mann**
Spring. 3 credits. H. Deinert.

**GERST 170 Marx, Nietzsche, Freud**
Fall or spring. 3 credits. G. Waite and staff.

**[GERST 175 Cinema and Society**
Not offered 1999–2000.]

**GERST 180 Towards the Net.Citizen:**
Writing and New Communication Technologies
Fall. 3 credits. B. Buettner and staff.

**Courses Offered in German**

All courses are now designated GERST. Courses in earlier years were designated either GERLA or GERST. Course numbers remain the same.

**GERST 121 Elementary German I**
Fall or spring. 4 credits. Intended for students with no prior experience in German or with a language placement test (LPG) score below 37, or an SAT II score below 370. G. Lischke and staff.

Elementary German I is designed to familiarize students with basic vocabulary and syntax so they can communicate about everyday life. Videos and audio tapes facilitate listening comprehension and insight into German culture. Daily practice in section provides the opportunity to learn vocabulary and syntax.
GERST 122 Elementary German II
Fall or spring. 4 credits. Prerequisite: GERST 121, LPG score 37-44, or SAT II 570-640; or obtain an LPG score of 56 or above after German 122 attain qualification and may enter a 200-level course; otherwise, successful completion of German 123 is required for qualification. G. Lischke and staff.
Elementary German II, the second semester of elementary German, presupposes that students have not yet learned narrative past, subjunctive, passive or dependent word order. Topics include: leisure activities, work and the media, including TV, newspaper, film and fiction. There is also discussion of a timeline of key events in Germany from 1917-1989.

GERST 123 Continuing German
Fall or spring. 4 credits. Limited to students who have previously studied German and have an LPG score 45-55 or SAT II 460-570. Satisfactory completion of German 123 fulfills the language qualification requirement. Staff.
German 123 is a course on the beginning intermediate level. Students will further develop their language proficiency by communicating about broad cultural topics and themes. To provide each student with a maximum opportunity for speaking in German and getting as much help and feedback as possible, work in class will be done in pairs and/or small groups.

GERST 200 Contemporary Germany
Fall and spring. 3 credits. Prerequisite: qualification in German (LPG score 56-64 or SAT II score 580-670 or GERST or GERLA 123 or equivalent or permission of instructor). Fulfills the Arts and Sciences humanities distribution requirement. Staff.
An intermediate language course designed to provide an introduction to modern German culture and literature while developing language proficiency. Students examine issues that shape German society, literature, and thought as reflected in short stories, poems, radio, political texts, video, and audio materials. Selections include "Beyond the Wall: German Unification," "Germany: A Multi-cultural Society?", "Speaking and Identity," and "Musikszene." Oral and written work and individual and group presentations emphasize accurate and idiomatic expression. Successful completion of the course enables students to continue with more advanced courses in language, literature and culture.

GERST 202 Exploring German Literature
Fall or spring. 3 credits. Prerequisite: GERST 200, GERST or GERLA 203 or equivalent or permission of instructor. Taught in German. Can be used in partial fulfillment of the humanities distribution requirement. B. Buettner, P. Gilgen, and staff.
In this intermediate course, we will read and discuss a number of works belonging to different literary genres by major German-speaking authors, such as Kafka, Walser, Brecht, Mann, Frisch, Dürrenmatt, Bachmann, and others. We will explore questions of subjectivity and identity in modern society, of human existence as existence in language, and of the representation of history in literary texts. Activities and assignments in this course will focus on the development of reading competency in different literary genres, the use of accurate and idiomatic expression, the expansion of students’ German vocabulary, and the systematic review of select topics in German grammar.

GERST 204 Intermediate Conversation and Composition
Fall or spring. 3 credits. Prerequisite: GERST or GERLA 200, GERST or GERLA 203 or GERST or GERLA 205 or placement by examination (placement score and CASE). Staff.
Emphasis on improving oral and written expression of idiomatic German. Enrichment of vocabulary and appropriate use of language in different conversational contexts and written genres. Material consists of readings in contemporary prose, articles on current events, videos, and group projects. Topics include: awareness of culture, dependence of meaning on perspective, interviews with native German speakers, German news broadcasts, reading German newspapers on the internet.

GERST 205 Business German I
Fall. 3 credits. Prerequisite: qualification in German (German 123 or an LPG score of 56-64 or an SAT II score between 580-670). Successful completion of GERST or GERLA 205 fulfills the language proficiency requirement. G. Lischke.
Learn German and understand German business culture at the same time. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants will learn about the business culture in Germany and how to be effective in a work environment, Germany’s role within the European Union, the dual education system, the importance of trade and globalization, and current economic issues in Germany. Material consists of authentic documents from the German business world, TV footage, and a Business German textbook.

GERST 206 Business German II
Spring. 3 credits. Prerequisite: proficiency in German (GERST or GERLA 205, GERST or GERLA 200, GERST or GERLA 203, GERST 201 or placement by examination (placement score and CASE)). G. Lischke.
This course is a continuation of GERST or GERLA 205; however students without previous knowledge of Business German are welcome. This is a German language course that examines the German economic structure and its major components: industry, trade unions, the banking system, and the government. Participants will learn about the business culture in Germany and how to be effective in a work environment, Germany’s role within the European Union, the role of the German Bundesbank, the importance of trade and globalization, and current economic issues in Germany. Material consists of authentic documents from the German business world, TV footage and a Business German textbook. At the end of the course, the external Goethe Institut exam "Deutsch fur den Beruf" will be offered.

GERST 220 Was ist deutsch?

GERST 301 Scenes of the Crime: German Mystery and Detective Fiction
Fall. 4 credits. Prerequisite: GERST 202, or GERST or GERLA 204, or equivalent or permission of instructor; Taught in German. P. Gilgen.
An exploration of German crime, detective, and mystery writing in texts ranging from the eighteenth century to contemporary fiction. Authors to be studied may include: Kleist, E. T. A. Hoffmann, Kafka, Dürenmatt, Handke, Schatten, Sjöstrand. This course aims at improving proficiency in aural and reading comprehension, as well as in speaking and writing skills, with emphasis on vocabulary expansion, advanced grammar review, and stylistic development. Recommended for students interested in a combined introduction to literature and high-level language training. This course may be counted toward the requirement for 300-level language work in the major.

GERST 302 Youth Culture: Adolescence in German Fiction
Spring. 4 credits. Prerequisite: GERST 202 or GERST or GERLA 204 and GERST 301 or equivalent or permission of instructor. Taught in German. A. Schwarz.
Examination of literary and cultural approaches to childhood, youth and adolescence in texts ranging from the late 18th century to the present. Authors include: Hoffmann, Keller, Goethe, Mann, Walser, Musil, Zweig, Handke, Kaschnitz. Aimed at further improving students' proficiency in aural and reading comprehension, as well as in speaking and composition skills. Focus on high-level grammar review, stylistic and expository refinement and vocabulary expansion. Recommended for students wishing to combine intensive language training with reading and discussion of short fiction.

GERST 303 Advanced Conversation and Composition
Fall or spring. 4 credits. Prerequisite: GERST or GERLA 204, GERST 202, GERST 220, or placement by examination (CASE). Staff.
Further enrichment of vocabulary and emphasis on improving students’ oral and written style. Study of the language of different text types, including journalistic and literary texts. Discussion of current events provides insight into the historical, political and social-issues of German-speaking countries. Individual and group projects provide an opportunity for each student to pursue his/her field of interest and share it with the class.

GERST 304 Advanced Conversation and Composition
Spring. 4 credits. Prerequisite: German 303 or placement by examination (CASE). Not offered 1999-2000.

GERST 306 Zeitungsddeutsch

GERST 307 Modern Germany
Fall. 4 credits. Prerequisite: GERST 202 or GERST or GERLA 204 or GERST 220 or equivalent or permission of instructor. Taught in German. L. Adelson.
Introduction to the history of postwar Germany, the development and unification of the two Germanys, and their societies. The
emphasis is on cultural and social institutions as well as political and intellectual debates. The course will be centered on political theory and their relationship to one another, with a focus on the role of humans and their impact on society.

Courses offered in English

Course offerings include:

**GERST 353 Kleist #**

**GERST 354 Schiller #**

**GERST 357 Major Works of Goethe (1749-1832) #**

Courses offered in English

It may be possible to arrange a German section for courses taught in English, either informally or formally (for credit). Students are encouraged to discuss this possibility with instructors.

**GERST 237 The Germanic Languages (also Linguistics 237)**

**GERST 318 "1800" #**
Spring. 4 credits. Taught in English. P. Gilgen.

This course examines the period from 1770 to 1830, a period of decisive social and cultural change in Germany, which led to the emergence of nationalism, historicism, classicism, romanticism, the invention of "literature," as well as the development of the systems of Kantian and post-Kantian philosophy. The course will include a selection of texts from different genres and other artificats (opera, the fine arts) and will give a survey of the cultural and intellectual developments during the period. Readings may include Lessing, Kant, Herder, Goethe, Schiller, Fichte, Hölderlin, Mozart, Novalis, F. Schlegel, A. W. Schlegel, Kleist, Beethoven and Hegel as well as other authors and artists. While most readings will consist of shorter selections, a number of longer works will also be read.

**GERST 374 Opera and Culture (also MUSIC 374 AND ITALY 374)**

**GERST 378 German Aesthetic Theory: From Kant to Hegel #**

**GERST 383 German Literature of the Twentieth Century #**

**GERST 395 Rilke: The Dulgo Elegies and Sonnets to Orpheus**
Spring. 4 credits. In English translation.
We will use a bilingual edition for the benefit of those who know German.

H. Deinert.

We will discuss the ten elegies and fifteen-five sonnets both as documents of their time and in the context of intellectual history. In 1922, the same year of the publication of Joyce’s “Ulysses”, Eliot’s “Waste Land”, and Valéry’s “Charmes”, Rilke’s “Duino Elegies”, more than ten years in the making, and “Sonnets to Orpheus” were finally completed in a burst of creative energy that astonished even the poet. One of Germany’s greatest lyrical poets along with Klopstock, Goethe and Hölderlin, Rilke attempts nothing less than the creation of a modern myth, secular religion in which the relationship between God and humans is replaced by one between man and Angel, the latter, like Nietzsche’s Superman, but a projection of human possibilities and aspirations. A member of a generation still burdened by the destruction and social and political upheaval brought about by World War I, Rilke defines the role of humans in terms of preservation and conservation, of exuberant service to what is transitory, be it natural or cultural phenomena: “tran­ sient, they look to us for deliverance, us, the most transient of all” (IX. Elegy).

**GERST 396 German Film (also COM L 396 AND TRHET 396)**

**Advanced Undergraduate and Graduate Courses**

**GERST 403 The Afro-Europeans**

**GERST 404 Operatic Contacts (also COM L 408, MUSIC 405, 5 HUM 405, TRHET 405)**
Fall. 4 credits. Ability to read music helpful but not required. Limited to 15 students. A. Groos.

**GERST 405 Introduction to Medieval German Literature I #**

**GERST 406 Introduction to Medieval German Literature II #**

**GERST 407 Deutsch als Fremdsprache—Teaching German as a Foreign Language**
Fall. 3 credits. Intended primarily for graduate students preparing to teach German. TBA. G. Lischke.

**GERST 408 Uncanny Communities**

**GERST 409 Spinoza and Virtual Ideology**

**GERST 410 Senior Seminar #**
Fall. 4 credits. Open to all students with an adequate command of German. Prerequisite: any German course at the 300 level or equivalent or permission of instructor. Texts and seminar discourse in German. H. Deinert.

Topic: Kleist. The Prussian aristocrat Heinrich von Kleist, who has been compared by some to Aeschylus and Shakespeare, committed suicide in 1811 at the age of thirty-four because “I have run out of avant-garde.”

We will examine his dramas and prose writings against the background of revolutionary turmoil in Europe and the Americas and the Wars of National Liberation against Napoleon.

**GERST 412 German Literature from 1770 to 1848 #**

**GERST 413 Women around Freud (also COM L 412 and WOMNS 413)**

**GERST 414 History into Fiction: Nazis and the Literary Imagination (also ENGL 404, COM L 404, and NES 404)**
Fall. For description, see COM L 404.

**GERST 415 Marx, Nietzsche, Freud (also COM L 425 and GOVT 473)**

**GERST 417 Faust: Transformations of a Myth (also COM L 417) #**

**GERST 418 Thomas Mann**

**GERST 428 Genius and Madness in German Literature (also COM L 409)**
**ARTS AND SCIENCES - 1999-2000**

[GERST 430] Brecht, Artaud, Müller, Wilson (also COM L 430 and THETR 420)

[GERST 435] Introduction to Literary Theory (also COM L 435)

[GERST 441] Introduction to Germanic Linguistics (also LING 441)
Fall. 4 credits. Prerequisite: Ling 101 or permission of instructor. W. Harbert.
For description, see LING 441.

[GERST 447] Reading Freud: Gender, Race, and Psychoanalysis (also COM L 447 and WOMNS 447)

[GERST 451-452] Independent Study
Fall; Spring. 1-4 credits each term. Prerequisite: permission of instructor.

[GERST 453] Honors Research
Fall. 4 credits. Staff.

[GERST 454] Honors Thesis
Spring. 4 credits. Staff.

[GERST 457/458] Imagining the Holocaust (also COM L 458/458, ENGL 458/458, and JWST 458/458)
Spring. 4 credits. D. Schwarz.
For description, see ENGL 458/458.

[GERST 472] Poetry of the 1990s (also COM L 472)

[GERST 495] The Aesthetic Theory of the Frankfurt School (also COM L 495)

[GERST 496] Theorizing the Public Sphere (also COM L 496 and HIST 496)

[GERST 498] German Literature in Exile

Graduate Courses

Note: For complete descriptions of courses numbered 600 or above consult the appropriate instructor.

[GERST 600] Special Topics in Feminist Theory (also ANTH 600 and COM L 600)

[GERST 606] Topics in Historical Germanic Phonology
Spring. 4 credits. Prerequisite: Ling 441.
The development of the Germanic sound system from Proto-Germanic to its daughter languages.

[GERST 607] Topics in Historical Germanic Morphology
Fall. 4 credits. Prerequisite: Ling 441.
The Germanic verbal system and its Indo-European origins.

[GERST 608] Topics in Historical Germanic Syntax
Fall. 4 credits. Prerequisite: Ling 441.
A diachronic and comparative investigation of syntactic processes in the older Germanic languages.

[GERST 615] Jews in German Culture Since 1945 (also JWST 615)

[GERST 617] Literature and Affect (also COM L 625)
Fall. 4 credits. Discussion and texts in English (German texts will be available). A. Schwarz.
By focusing on two predominant affects within traditional and contemporary thought—melancholy and anxiety—the goal of this class is to investigate the relationship between moods, dispositions, affects, and literary representation. In order to discuss the impact of melancholy and anxiety on processes of communication and signification, particular attention will be paid to their relation to philosophical and psychoanalytic models of understanding; their relation to rhetorical figures as well as to metaphors of spatiality and the body (questions of spatial and “mental” orientation, states of suspension, corporeal integrity). Our readings will be directed by the following concerns: the melancholy and anxiety mental disorders, philosophical concepts, natural dispositions, or literary genres. Focus on the relationship of affects to artistic production and the constitution of subjectivity. Authors include: Hegel, Benjamin, Kierkegaard, Heidegger, Kristeva, Freud, Butler, Abraham, Torok, Nietzsche, Goethe, Hölderlin, Büchner, Rilke, Benn, Walser.

[GERST 615] "The Science of the Experience of Consciousness": Hegel's Phenomenology of Spirit (and Beyond)
Fall. 4 credits. P. Gilgen.
Centered on a close reading of the Phenomenology of Spirit, this course examines its problematic position vis-à-vis Hegel's subsequent system of philosophy. Intended as a ladder that would lead up to philosophical knowledge, the Phenomenology is and, at the same time, is not (yet) philosophy. This undecided position of the text is reflected in the text, and it poses the question of the possibility, the status, and the option of philosophy after the Phenomenology (which then leads to the question whether such philosophy would or would not coincide with philosophy after Hegel). The examination of three prominent constellations in the reception history of the Phenomenology will, on the one hand, address contemporary theory's vast debt to Hegel (primarily to the Phenomenology) and, on the other hand, lead us back to the primary text by forcing repeated reexaminations of its philosophical arguments as well as its textual structure. We will begin this examination by tracing the aftermath of the Phenomenology in post-Hegelian German thought (especially in the works of “Left-Hegelians” such as Feuerbach and Marx, among others). In a second stage, we will focus on the intense reception of Hegel—for the most part the Hegel of the Phenomenology—in France during the years immediately preceding and following World War II—especially Jean Hyppolite's seminal commentary and Alexander Kojève's influential lectures, published as Introduction to the Reading of Hegel. Finally, the presence of the Phenomenology in contemporary theory will be addressed in readings that may include Francis Fukuyama, Jacques Derrida, Judith Butler, John Sallis, and Donald Phillip Verene.

[GERST 621] Issues in Gay and Lesbian Studies (also WOMNS 621)

[GERST 624] Seminar in Medieval German Literature II

[GERST 626] Nuremberg

[GERST 627] Baroque (also COM L 626)

[GERST 629] The Enlightenment

[GERST 630] Classicism and Idealism

[GERST 631-632] Academic German I and II
631, fall; 632, spring. 3 credits each term. Limited to graduate students. Prerequisite: for German 632, German 631 or equivalent. Staff.
Intended primarily for beginners with little or no previous German knowledge. Emphasis in 631 on acquiring basic German reading skills. Emphasis in 632 on development of the specialized vocabulary of student's field of study.

[GERST 634] German Romanticism
Fall. 4 credits. Most readings are in German; discussion and papers are in English. Students from other disciplines are welcome. Anchor course. G. Waite.
Structured introduction to German literature, philosophy, criticism, and painting from c. 1789 to c. 1830 in the context of European developments. The larger social context requires readdressing aesthetic and poetic questions to a romantic "school" (Heine), a "German ideology" (Marx and Engels), a "Romantic ideology" (McGann), "Art and the Industrial Revolution" (Klingender), and "The flight from reality of the artistic period" (Lukács). Crucial and related issues include gender and political economy, the Spinoza debate; the trope of the automaton; and understanding critically the reception of this ostensibly object by subsequent history: what is the ulterior motive behind literary periodization and (literary) history?

[GERST 635] The Gates to Modernity: From Karlsbad to the 1848 Revolution

[GERST 637] 19th-Century Fiction: The Realist Project

[GERST 647] German Literature from 1949 to 1989: Questions about Identity
Studies (also WOMNS 621)

[GERST 650] Culture in the Weimar Period
Spring. 4 credits. Prerequisite: reading knowledge of German. Anchor course. D. Bathrick.
This survey course will treat major developments in the area of German culture (literature, cinema, painting) between 1900 and 1933. Individual representative texts will be studied and discussed in their relation to the cultural, political, and social contexts out of which they emerge. Lectures and discussions will focus both on a detailed investigation of individual works as well as on the general historical background and developments of the period.
visual practices have come from outside or from the peripheries of the institution of art history and criticism. This seminar will analyze the interactions between academically sanctioned disciplines (such as iconography and connoisseurship) and innovations coming from philosophy, psychoanalysis, historiography, sociology, literary theory, mass media criticism, feminism, and Marxism. We will try especially to develop: (1) a general theory of "visual ideology" (the gender, social, racial, and class determinations on the production, consumption, and appropriation of visual artifacts under modern and postmodern conditions); and (2) contemporary theoretical practices that articulate these determinations. Examples will be drawn from the history of oil painting, architecture, city planning, photography, film, and other mass media.

GERST 663 Nietzsche and Heidegger (also COM L 663) Not offered 1999–2000.

DUTCH 203 Intermediate Composition and Conversation Fall. 3 credits. Prerequisite: qualification in Dutch or permission of instructor. M. Briggs. Improved control of Dutch grammatical structures and vocabulary through guided conversation, compositions and reading, drawing on all Dutch-speaking cultures. Taught in Dutch.

DUTCH 204 Intermediate Composition and Conversation Spring. 3 credits. Prerequisite: Dutch 203 or permission of instructor. M. Briggs. This course aims to emphasize written and oral application of accurate, idiomatic Dutch. Reading of authentic material such as newspapers, literature, and history, with emphasis on the students' interests and specializations. Taught in Dutch.

DUTCH 300 Directed Studies Fall or spring. 1–4 credits variable. Prerequisite: proficiency in Dutch or permission of instructor. M. Briggs. Individualized advanced Dutch studies. This course aims to provide students with individualized programs which can be anything from advanced mastery in any or all skills to the mastery of Dutch for research. Literature history in support of all disciplines. Taught in Dutch.

Swedish

SWED 121–122 Elementary Swedish 121, fall; 122, spring. 4 credits each term. Prerequisite: for Swedish 122, Swedish 121 or equivalent. L. Transcik. The aim of this course is to develop skills in listening, speaking, reading and writing within Sweden's cultural context. Work on the internet and interactive computer programs are used in these courses.

SWED 123 Continuing Swedish Fall. 4 credits. Prerequisite: Swedish 122 or equivalent. L. Transcik. Development of skills in spoken and written Swedish within Sweden's cultural context.

SWED 203 Intermediate Swedish Spring. 3 credits. Prerequisite: Swedish 123 or permission of instructor. L. Transcik. Intermediate to advanced level instruction utilizing audio-visual material and text to enhance language comprehension.

SWED 204 Advanced Swedish Fall. 3 credits. Prerequisite: Swedish 203 or permission of instructor. L. Transcik. Emphasis on improving oral and written expression of Swedish, including vocabulary, readings in contemporary prose, treatment of specific problems in grammar, and presentation of videos and films.

SWED 300 Directed Studies Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. L. Transcik. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

GOVERNMENT

Government is what Cornell calls a department that elsewhere might be termed political science. The focus of this discipline is power applied to public purposes. Some faculty concentrate on purposes, some on applications. Some engage in the close reading of great texts of political philosophy, while others analyze the behavior of power-wielders and publics in this and other societies. Government is divided into four subfields: U. S. politics, comparative politics (other nations), political theory (philosophy), and international relations (transactions between nations).

To accommodate new courses or course changes, a supplementary announcement is prepared by the department. Before enrolling in courses or registering each term, students are requested to consult the current supplement listing courses in government, available in 125 McGraw Hall.

The Major

To be admitted to the major, a student must pass two government courses.

To complete the major, a student must (1) pass two of the introductory government courses (Government 111, 131, 161, 181); (2) pass an additional course in one of the remaining subfields (American government, comparative government, political theory, or international relations). This course may be any course offered in the government department, including introductory courses, upper-level courses or seminars. Students are strongly advised to take at least one course in each of the four subfields; (3) accumulate an additional 28 credits of government course work at the 200-level or above; (4) complete at least one seminar-style course in government which may be applied toward the 28 credits. These courses include those numbered 400.XX to which students are admitted by application only; (5) accumulate 12 credits in upper-level courses in related fields (such as anthropology, economics, history, psychology, and sociology). Upper-level courses are usually courses numbered at the 300-level or above (200-level courses are not considered upper-level). Students should consult with their major adviser to choose appropriate courses. All choices of related courses must be approved by the major adviser, or the director of undergraduate studies; (6) all courses used to fulfill a government major must be passed with a letter grade.

To summarize, a total of 10 government courses and 3 additional courses (12 credits) of upper-level related courses are required to complete the major.

Cornell-in-Washington Program. Government majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

Study Abroad in Geneva. French, history, and government majors, or other students with a commitment to international experience, may study abroad in Geneva, Switzerland. Geneva is an especially appropriate location for students with an interest in international affairs, as many international organizations maintain offices there, among them the United Nations, the Red Cross, the Headquarters of the World Health Organization, the International Labor Organization, the World Intellectual Property Organization, the European Nuclear Research Center, and the Ecuemical Center at Grand-Saconnex. Cornell students enroll full-time in the University of Geneva and affiliated schools, including the Graduate School of International Studies (HEI) and the Development Studies Institute, where they take year-long courses, studying with Swiss and international students. They can choose classes in many subjects, including literature, economics and other social sciences, law, theology, psychology, education, architecture, physical education, and French language, civilization and history.

The University of Geneva offers four consecutive three-week language and civilization summer courses beginning in mid-July, which prepare students for the mandatory French exam given in early October. Cornell students must attend the last of these sessions, from mid-September to early October, but earlier sessions are recommended for students who need additional language preparation.

Interested students can participate in internships at international organizations, and qualified participants may be able to work under the direction of officials on research studies that are of mutual interest.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation is the completion of French 204 or 213, or its equivalent in advanced credit or placement by the Cornell C.A.S.E. examination. Students should plan to study abroad for the entire academic year.

Students interested in the study abroad program in Geneva should contact the Cornell Abroad office at 474 Uris for further information.

European Studies Concentration. Government majors may elect to group some of their required and optional courses in the area of European studies, drawing from a wide variety of courses in relevant departments. Students are invited to consult Professors P. Katzenstein, J. Pontusson, and Tarrow for advice on course selection and foreign study programs.

Model European Community Simulation. Undergraduates with an interest in the European Union, public affairs or debating may participate in an annual European Union simulation held, on an alternating basis, in April at SUNY Brockport or in January in Brussels. The simulation provides an opportunity for participants, representing politicians from the members states, to discuss issues and resolutions of current concern to the EU.

To prepare for the simulation, a two-credit course is offered by the Government department each year (Government 431 or Government 432). Participation in the simulation is open only to those who register for this course. Anyone interested in participating or finding out more information should contact the Institute for European Studies at 120 Uris Hall, 255-7792.

International Relations Concentration. See the description under "Special Programs and Interdisciplinary Studies."

HONORS. In their junior year, Government majors with a G.P.A. of 3.30 in all subjects may join the honors program, which involves a sequence of special courses in the junior and senior year. Application to the honors program will be made in the late spring of the sophomore year and application forms will be available in 125 McGraw Hall. The courses comprising the honors sequence (honors courses) are described below. Students may be admitted to the honors program in the junior or senior year only with the special permission of the Director of Undergraduate Studies.

Introductory Courses

Students registering for introductory courses should register for the lecture only. Sections will be assigned during the first week of class. Introductory courses are also offered during summer session.

GOVT 111 Introduction to American Government and Politics
Fall and summer. 3 credits. T. J. Lowi.

An introduction to government through the American experience. An accent on analysis of the institutions of government and politics as mechanisms of social control.

GOVT 131 Introduction to Comparative Government and Politics
Fall and summer. 3 credits. V. Bunce.

This course provides a survey of the institutions, political processes, and policies of contemporary states. It focuses on the conditions for and workings of democracy. Looking at Western Europe, we will analyze institutional variations among liberal democracies, and their political implications. We will then probe the origins of democracy in
Western societies and the reasons why communism and other forms of authoritarian rule have prevailed elsewhere. Finally, we will explore the impetus behind and the obstacles to democratization in the Third World and the erstwhile Communist Bloc. Throughout this survey, problems of democracy will be related to problems of economic development, efficiency, and equality.

**GOVT 161 Introduction to Political Philosophy #**
Spring. 3 credits. N. Hirschmann. A survey of the development of Western political theory from Plato to the present. Readings from the works of the major theorists. An examination of the relevance of their ideas to contemporary politics.

**GOVT 181 Introduction to International Relations**
Spring and summer. 3 credits. P. Katzenstein. An introduction to the basic concepts and practice of international politics.

**Major Seminars**

**GOVT 400 Major Seminars**
Fall or spring. 4 credits. These seminars, emphasizing important controversies in the discipline, cap the majors' experience. Thus preference in admission is given majors over nonmajors and seniors over juniors. Topics and instructors change each semester. To apply, students should pick up an application in 125 McGraw Hall during the course selection period the semester before the seminar is given.

The following courses are open to sophomores, juniors, and seniors without prerequisites unless otherwise indicated.

**American Government and Institutions**

**GOVT 302 Social Movements in American Politics (also American Studies 302)**
Spring. 4 credits. F. Sanders. From populism to environmentalism, social movements directed at reform of national policies and political structures have been an earmark of American politics. This course will begin with an examination of late-nineteenth-century agrarian and labor movements and move through progressivism, a variety of 1930s upsurges, civil rights, and more or less contemporary environmental, consumer, feminist, and peace movements. The focus will be on the conditions that gave rise to these movements, their internal resources, and external alliances and their ultimate impact on the national state (as well as vice versa).

**GOVT 303 Introduction to American Political Parties**

**GOVT 304 Public Opinion and Political Participation**
Fall. 4 credits. J. Cowden. Government 304 is a survey course about the nature and impact of public opinion and mass political behavior. We will examine classic and contemporary scholarship on the following topics: the role of public opinion in democratic theory; the measurement of opinions; the political sophistication of the electorate; racial and political intolerance; political socialization; party identification and party systems; media effects; candidate preference; turnout and abstention; attitudes about distributive justice; and the intersection between public opinion and public policy.

**GOVT 305 Atomic Consequences: The Incorporation of Nuclear Weapons in Post-War America**

**GOVT 306 Latino Politics in the United States**
Spring. 4 credits. P. Caban. During the last two decades, the U.S. has undergone a dramatic demographic transition in which people of Latin American and Caribbean descent have emerged as the fastest growing racial/ethnic minority. At the local and state levels Latinos constitute a political force that has fundamentally reconfigured the public policy making process in certain regions of the country. Their growing electoral strength also promises to inject new issues and perspectives into national level politics. This course focuses on the emergence of Latino political identity and the complex forms of Latino political participation and engagement in the United States.

**GOVT 308 Science in the American Polity 1800–1960**

**GOVT 309 Science in the American Polity**

**GOVT 310 Power and Poverty in America**

**GOVT 311 Urban Politics**

**GOVT 313 The Nature, Functions, and Limits of Law**
Spring. 4 credits. Undergraduates only. R. Hillman. A general education course for students at the sophomore and higher levels. Law is presented not as a body of rules but as a set of varied techniques for resolving conflicts and dealing with social problems. The roles of courts, legislatures, and administrative agencies in the legal process is analyzed, considering also the constitutional limits on their power and practical limits of their effectiveness. Assigned readings consist mainly of judicial and administrative decisions, statutes and rules, and commentaries on the legal process. Students are expected to read assigned materials before each class and to be prepared for participation in class discussion.

**GOVT 316 The American Presidency (also American Studies 316)**

**GOVT 317 Campaigns and Elections**
Fall. 4 credits. W. Mebane. This course examines campaigns and elections, focusing primarily on national elections in the United States. Topics include the relationship between elections and the economy, the weakness of the American party system, voter turnout, individual voting decisions, negative campaigning, and the noncompetitiveness of congressional elections. We examine several theories that explain these phenomena, including in particular the theory of rational choice. Course requirements include one or two papers based on original analysis of election survey data.

**GOVT 318 The American Congress**
Spring. 4 credits. M. Sherer. The role of Congress in the American political system. Topics to be discussed: the political setting within which Congress operates, the structure of Congress, the salient features of the legislative process, and recent congressional behavior in a number of policy areas.

**GOVT 320 Public Opinion and Public Choice**
Spring. 4 credits. Prerequisite: Government 111 or permission of the instructor. W. Mebane. A fundamental paradox in democracy is the fact that a government the people control will only rarely be a government that does what the people want. This is not to say that government NOT by the people is better (it's usually worse). This course explores this problem, contrasting the answers given by the concept of public opinion and the formal theory of social choice. We encounter the paradox in several American political institutions, including elections, legislatures, and bureaucracies.

**GOVT 324 Legal Reasoning and Legal Adaptation: A Comparison of American and Taiwan Law**

**GOVT 327 Civil Liberties in the United States**
Spring. 4 credits. J. Rabkin. An analysis of contemporary issues in civil liberties and civil rights, with emphasis on Supreme Court decisions. Cases are analyzed in terms of democratic theory and the social and political context in which they arose.

**GOVT 328 Constitutional Politics: The United States Supreme Court**
Fall. 4 credits. J. Rabkin. The course investigates the role of the Supreme Court in American politics and government. It traces the historical development of constitutional doctrine and the institutional role the court has played in American politics.

**GOVT 353 Feminism Movements and the State (also Women's Studies 353)**
Fall. 4 credits. M. Katzenstein. This course focuses on women's activism and the American state. The subject emphasis and format (lecture, sections, tutorials) of this course changes each year and is announced on the first day of class. Active class discussion and extensive writing will be encouraged whatever the particular format of this coming year's class organization.
Interested students should pre-register (in order that we may estimate possible class numbers), but final admission to the class is contingent on application to be completed at the first meeting of the class.

[GOVT 405 Government and the Economy (also GOVT 705)]

[GOVT 406 Politics of Education (also GOVT 706)]

GOVT 408 Politics of the American Civil War (also American Studies 430)
Fall. 4 credits. R. Bensel.
The Civil War, along with the Founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American political development. Arising out of intense ideological, cultural and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention will be paid to: (1) the political economy and culture of plantation slavery in the antebellum South; (2) the apparent coincidence of collision between the slave and free states and their respective societies; (3) the military, political, and economic strategies that determined, on both sides, the course and duration of the war; (4) the limits and possibilities of reform of southern society during Reconstruction; and (5) the impact of the Civil War on the subsequent development of the United States.

GOVT 409 Racial Prejudice and Political Intolerance
Spring. 4 credits. J. Cowden.
This course explores the nature, scope, and etiology of intolerance and its implications for the operation of politics in the United States. Readings will include many of the “classics” in political science, political psychology, psychoanalysis, and social psychology, dating from the 1930s to the present.

GOVT 412 American Political Parties and Elections
Spring. 4 credits. J. Cowden.
This seminar examines changes in the character of political parties and the behavior of the electorate. It also considers the changing relationship between political parties and elections, on the one hand, and other political processes and institutions, on the other.

GOVT 413/413 Finance, Federalism, and Politics
Spring. 4 credits. W. Mebane.
"All politics is local politics," some say. This course gives sustained attention to that proposition. We examine the dependencies which exist in the United States between political outcomes and local economies. Fiscal federalism, the consequences local taxing and spending have for economic growth, the pork barrel, and the effects local economic conditions have on elections are among the topics considered. Theoretical suggestions from economics and regional science are reviewed along with research from political science. Students are also introduced to a number of recently organized data collections which offer chances for new, systematic research in this area.

GOVT 419 The Politics of Scandal (also GOVT 619)
Spring. 4 credits. M. Shleifer, J. Rubkin.
This seminar will discuss the politics of "scandal" and "reform" in constitutional doctrine, American history, and recent experience.

GOVT 427 The Politics of Environmental Protection in America

GOVT 428 Government and Public Policy: An Introduction to Analysis and Criticism
Fall. 4 credits. T. J. Lowi.
Government 428 concentrates on the history and criticism of U.S. policies and the politics associated with them. Particular attention given to the origins and character of the regulatory state and the welfare state.

GOVT 429 Government and Public Policy: An Introduction to Analysis and Criticism
Spring. Open to undergraduates. 428 and consent of instructor are required for 429. T. J. Lowi.
Government 429 is an opportunity to pursue further the research begun in 428.

Comparative Government
Government 131 is recommended.

GOVT 218 Introduction to Korea (also ASIAN 218)
Fall. 3 credits. J. I. Choi.
An interdisciplinary introduction to Korean history and culture, including geography, ethnography, language, literature, philosophy, religion, political economy, government, music, and art (sculpture, architecture, and painting), with an overview of Korean history from the Three Kingdoms Period to the present, focusing on the March 1, 1919, Independence Movement, the Korean War, the 1950 Student Revolution, the 1980 Kwangju Massacre, and other events.

[GOVT 251 The Politics of Economic Life]

[GOVT 252 Contemporary Palestinian Society (also NES 298)]
See Near Eastern Studies 298 for description.

[GOVT 332 Modern European Politics]

[GOVT 333 Government and Politics of the Former Soviet Union]

GOVT 334 Political Economy of East Asia
Spring. 4 credits. R. Bullock.
This lecture course examines East Asian political economy in historical and comparative perspective. Central questions include: Why have Japan, South Korea, and Taiwan developed so rapidly in the postwar era? Can we identify an East Asian mode of development? What does the region's growth mean for other countries and for the international economy? Are Southeast Asian countries following a similar trajectory today? Particular topics include Japanese colonialism, industrial policy and its critics, domestic political consequences of rapid growth, the political corruption, US-Japan economic conflict, and recent attempts at political-economic liberalization.

[GOVT 335 America in the World]
[GOVT 336 Postcommunist Transitions]

GOVT 338 Comparative Political Economy
Fall. 4 credits. C. Way.
This course examines the junctures of politics and the economy in the advanced industrial democracies. Why do some countries have large, inclusive welfare states while others have minimal social programs? Is the welfare state in decline, and if so why? Does it really make any difference for the economy whether parties of the left or right govern? Do strong unions have negative effects on the economy, or can they actually boost economic performance? What does increasing globalization of the world economy mean for the constraints and opportunities facing governments in managing the economy and providing social welfare? How will the European integration change the world? Are all market economies pretty much the same, or are there varieties of capitalism that differ in important ways? We will use a variety of theoretical perspectives to provide some insight into these and other questions, paying particular attention to evaluating the theoretical arguments with both systematic and historical evidence.

GOVT 340 Latin American Politics
Spring. 4 credits. H. Schamis.
This is the introductory lecture course to the politics of Latin America. The main purpose is to view the region in a conceptual and comparative perspective. Country cases will be introduced in order to understand the fundamental historical processes as well as to explain the significance of competing theoretical frameworks that have shaped the debate in the field. The course will focus on the political economies of the region in order to analyze the role of groups and classes under different political regimes and contrasting strategies of development.

GOVT 341 Modern European Society and Politics (also SOC 341)
Spring. 4 credits. J. Pontusson and D. Schirmer.
This interdisciplinary course explores the contested meaning(s) of citizenship in contemporary European societies, situating recent developments in an historical perspective. In postwar Europe, citizenship took on social and industrial connotations which are largely absent in the U.S. The tension between this expanded notion of citizenship and market economics is a central feature of current political debates, not least in the emergent democracies of Eastern Europe. At the same time, the process of European economic and political integration recasts the role of nation states and their relationship to their citizens. Under the general theme of citizenship, the course will explore the political economy of European integration, nationalism and the limits of transnational identities, class structure and gender relations, the realignment of political ideologies and partisan allegiances, social movements, civil society and the future of European welfare states.

[GOVT 342 United Germany in the New Europe]
[GOVT 361 Modern Ideologies: Liberalism and Its Critics #
4 credits. Not offered 1999-2000.]

[GOVT 362 Politics of Sexuality (also Women's Studies 262)
4 credits. Not offered 1999-2000.]

[GOVT 364 The Selfish Individual and the Modern World
4 credits. Not offered 1999-2000.]

[GOVT 366 American Political Thought from Madison to Malcolm X (also History 316 and American Studies 366)
4 credits. Not offered 1999-2000.]

[GOVT 368 Global Climate and Global Justice (also Philosophy 368)
4 credits. Not offered 1999-2000.]

GOVT 369 Introduction to Feminist Political Thought (also Women's Studies 269)
Fall. 4 credits. N. Hirschmann.
This course will provide a general introduction to feminist political thought, surveying various current issues and methodologies. The course will combine analysis of women in western political thought and the relationship of feminism to the discipline of political science, readings by contemporary feminist theorists; and consideration of what theory can contribute to practical issues such as battering, pornography, prostitution, racism, sexuality, and sexual harassment.

GOVT 370 Political Theory and Cinema (also GERST 330, COM L 330, THETR ARTS 330)
Fall. 4 credits. G. Waite.
See German Studies 330 for description.

GOVT 375 Visual Culture and Social Theory (also ART H 370 and Comp. Lit. 368)
Fall. 4 credits. S. Buck-Morss.
Introduction to critical concepts for the analysis of visual culture, in specific socio-historical contexts.

GOVT 377 Concepts of Race and Racism
Spring. 4 credits. A. M. Smith.
This course examines race and racism from a political theory perspective. We will discuss the different types of racism: traditional racism, "new racism," or cultural racism; scientific racism and contemporary hybrid racism. We will then examine the politically ambiguous "ethnicity theory." In the second half of the course, we will consider the works by Marable on African American political economy, women of color feminist theorists; native American theorists; Takaki on Asian American labor history; and Hero on Latinos/Latinas and American politics. Although we will discuss American multicultural history and in some detail, our primary focus will be on an investigation of these works' theoretical foundations.

[GOVT 461 Interpreting Race and Racism
4 credits. Not offered 1999-2000.]

[GOVT 462 Modern Political Philosophy
4 credits. Not offered 1999-2000.]

[GOVT 465 Reconciling Liberalism (also Phil 447)
Fall. 4 credits. R. Miller.
For description see Philosophy 447.]

[GOVT 466 Feminism and Gender Discrimination
4 credits. Not offered 1999-2000.]

[GOVT 467 Radical Democratic Feminisms
Fall. 4 credits. A. M. Smith.
Radical Democratic Feminisms is an advanced feminist theory seminar. We will focus on contemporary political discourses that are influenced by socialist feminism, radical democratic pluralism, critical race theory, and radical anti-racist and anti-heterosexist multiculturalism. The reading list will include works by Simone de Beauvoir, Joan Scott, Michele Barrett, Lynne Segal, Zillah Eisenstein, Frances Fox Piven, Barbara Ehrenreich, Jacqui Alexander, Chandra Talpade Mohanty, Judith Butler, Julia Epstein, Anne McClintock, Angela Davis, Alice Echols, Dangerous Bedfellows, Lisa Duggan, Nan Hunter, Amy Gluckman and Betsy Reed, Elizabeth Grosz, Elisabeth Probyn, Katha Pollitt, Renata Salecl, Patricia J. Williams, Ellen Wills, Gayatri Spivak, Jeffrey Escoffier, Barbara Epstein, and bell hooks. Students should have completed at least one course in feminist theory and at least one course in social theory or political theory before taking this course.

[GOVT 468 Global and Domestic Dimensions of Science and Technology Policy
4 credits. Not offered 1999-2000.]

[GOVT 469 Limiting War (also Phil 369)
4 credits. Not offered 1999-2000.]

[GOVT 473 Marx, Nietzsche, Freud (also German Studies 415)
4 credits. Not offered 1999-2000.]

[GOVT 474 Community, Nation, and Morality
4 credits. Not offered 1999-2000.]

International Relations
Government 181 is recommended.

[GOVT 294 Global Thinking (also Philosophy 294)
Spring. 4 credits. No prerequisites, intended for freshmen and sophomores. Fulfills geographical distribution requirement.

[GOVT 295 American Foreign Policy
Fall. 4 credits. M. Bloom.
This course will provide an overview of the history of American foreign policy, focusing on the period between 1914 and the present. Various theoretical approaches to the study of American foreign policy will be covered, including international, domestic and individual levels of analysis. These interpretations will be used to examine events including: the First World War and the League of Nations; the rise of American hegemony; various crises of the Cold War, including the U-2 crisis, the Berlin crisis, and the Cuban missile crisis; and the Korean, Vietnamese and Gulf Wars. Emphasis will be placed on security as opposed to economic foreign policy issues.

[GOVT 386 The Causes of War
Spring. 4 credits. C. Way.
This course surveys leading theories of the causes of interstate war—that is, large-scale organized violence between the armed forces of states. Why is war a recurring feature of international politics? Are democracies more peaceful than other types of states, and if so, what explains this "democratic peace"? Why do democratic publics seem to reward threats to use force by "rallying around the flag" in support of their governments? Does the inexorable pattern of the rise and fall of nations lead to cycles of great power wars throughout history? These and other questions will be examined in our survey of theories of war at three levels of analysis: the individual and small groups, domestic politics, and the international system. Topics covered include: 1) historical patterns of war; 2) theoretical explanations for war; 3) evaluation of the evidence for the various explanations; 4) nuclear weapons; 5) ethics and warfare; and, 6) the major security problems of the coming decades, civil war, and the prospects for peace in the future.

[GOVT 387 Political Psychology in International Relations
4 credits. Not offered 1999-2000.]

is team-taught by leading faculty researchers from the three fields listed.

GOVT 380 The Politics of Modern Germany
Fall. 4 credits. D. Schirmer.
"Learning from History" in the sense of "learning from failure" is one of the basic modes of political modernization. Thus, structures and functioning of German postwar politics are inseparably tied to interpreting the causes of the political instability of the Weimar Republic and the rise of Nazism. Therefore, the course will employ the interpretation of history as a general framework for the introduction into German studies. Topics will include the constitutional concept of the Grundgesetz (basic law), the political culture, the electoral and party systems, parliament and government, interest groups and Germany's liberal corporatism, and the federal system. We will also try to evaluate to which degree German politics have been transformed by the process of unification.

GOVT 382 International Relations of East Asia
4 credits. Not offered 1999-2000.]

[GOVT 383 Theories of International Relations
4 credits. Not offered 1999-2000.]

GOVT 385 American Foreign Policy
Fall. 4 credits. M. Bloom.
This course will provide an overview of the history of American foreign policy, focusing on the period between 1914 and the present. Various theoretical approaches to the study of American foreign policy will be covered, including international, domestic and individual levels of analysis. These interpretations will be used to examine events including: the First World War and the League of Nations; the rise of American hegemony; various crises of the Cold War, including the U-2 crisis, the Berlin crisis, and the Cuban missile crisis; and the Korean, Vietnamese and Gulf Wars. Emphasis will be placed on security as opposed to economic foreign policy issues.

GOVT 386 The Causes of War
Spring. 4 credits. C. Way.
This course surveys leading theories of the causes of interstate war—that is, large-scale organized violence between the armed forces of states. Why is war a recurring feature of international politics? Are democracies more peaceful than other types of states, and if so, what explains this "democratic peace"? Why do democratic publics seem to reward threats to use force by "rallying around the flag" in support of their governments? Does the inexorable pattern of the rise and fall of nations lead to cycles of great power wars throughout history? These and other questions will be examined in our survey of theories of war at three levels of analysis: the individual and small groups, domestic politics, and the international system. Topics covered include: 1) historical patterns of war; 2) theoretical explanations for war; 3) evaluation of the evidence for the various explanations; 4) nuclear weapons; 5) ethics and warfare; and, 6) the major security problems of the coming decades, civil war, and the prospects for peace in the future.

GOVT 393 Introduction to Peace Studies
(also SOC 310)
Fall. 4 credits. J. Reppy and R. Williams. This course serves as an introduction to the study of war, peace, and peacemaking. We will study different theories of peace and war from a variety of disciplinary perspectives. The course will cover definitions of peace and war, causes of conflict, and modes of conflict prevention and resolution. The concepts will be applied to a range of historical and current conflicts. Students will prepare analyses of specific conflicts and instances of peacemaking for class presentation.

Honors Courses

Late each spring a limited number of sophomore majors are admitted to the honors program, their work to begin the following fall. Application forms and a full description of the program may be obtained in 125 McGraw Hall.

GOVT 493 Studying Politics: The Junior
Honors Seminar
Fall and spring. 4 credits. Fall, V. Shue; spring, R. Bensel. The seminar will meet twice weekly under the supervision of a senior faculty member with numerous classes being led by other members of the department faculty. The seminar will survey the broad range of what we mean by “the study of politics” and the various methods we enlist to carry out the study. The seminar will be writing intensive, requiring at least five papers.

GOVT 494 Honors Seminar: Thesis
Clarification and Research
Fall. 4 credits. E. Sanders. Each student works individually with a faculty member. The student initiates the tutorial by interesting a faculty member in his or her likely thesis project and by submitting to the director of undergraduate studies a form outlining the general area the thesis will treat and bearing the faculty tutor’s signature. This form is due the third week of classes. The tutorial culminates in a ten-to-fifteen-page paper setting forth the central questions to be addressed by the thesis, the state of existing knowledge regarding those questions, and why they matter.

GOVT 495 Honors Thesis: Research and
Writing
Spring. 4 credits. Limited to students who have successfully completed Government 494. Students continue the work of the preceding semester typically with the same faculty tutor. Research on the thesis is completed and writing begun. The tutorial culminates in a thesis of some sixty to eighty pages. The grade for the tutorial is determined by the faculty tutor, while the degree of honors (if any) awarded the thesis is decided by a committee of faculty members established for that purpose.

Independent Study

Independent study, Government 499, is a one-on-one tutorial which is arranged by the student with a faculty member of their choosing. Government 499 is open to government majors doing superior work, and it is the responsibility of the student to establish the research proposal and to find a faculty sponsor. Applicants for independent study must present a well-defined program of study that cannot be satisfied by pursuing courses in the regularly scheduled curriculum. No more than 4 credits of independent study may count toward fulfillment of the major. Students who elect to continue taking this course for more than one semester must select a new theme or subject each semester. Credit can be given only for work that results in a satisfactory amount of writing. Emphasis is on the capacity to subject a body of related readings to analysis and criticism. Keep in mind that independent study cannot be used to fulfill the seminar requirement. The application form for Independent Study is available in 125 McGraw Hall and must be completed at the beginning of the semester in which the course is being taken.

GOVT 499 Readings Fall or spring.
Fall or spring. 1-4 credits.

Graduate Seminars

Qualified undergraduates are encouraged to apply for seminars listed with 600 course numbers but may only register with the permission of the instructor. Students may consult the supplement that lists graduate courses, available in the department office.

Field Seminars

GOVT 603 Field Seminar in American
Politics
Fall. 4 credits. E. Sanders. The basic issues and institutions of American government and the various subfields of American politics are introduced. The focus is on substantive information and theoretical analysis and problems of teaching and research.

GOVT 606 Field Seminar in International
Relations
Fall. 4 credits. M. Evangelista. A general survey of the literature and propositions of the international relations field. Criteria are developed for judging theoretical propositions and are applied to the major findings. Participants will be expected to do extensive reading in the literature as well as research.

GOVT 607 The Western Political
Tradition: A Survey

Methodology

GOVT 601 Scope & Methods of Political
Analysis
Fall. 4 credits. W. Mebane. This course introduces the major analytical approaches used in contemporary political science research. We touch on broad philosophical issues concerning the nature of theory and inference, the practices of cultural and historical interpretation, and the relevance of moral values and political commitments. Several kinds of research designs, including comparative case studies, and quasi-experimentation, are briefly examined. The basic analytical ideas involved in statistical methods such as sampling and regression analysis are introduced, as are the basic concepts of the theory of collective choice and the elementary methods of applied game theory.

GOVT 602 Field Seminar in Political
Methodology

GOVT 605 Comparative Methods
Spring. 4 credits. J. Pontusson and C. Way. This seminar provides a survey of different methodological approaches to the study of comparative politics: single case studies, comparative case studies based on Millian logic, qualitative comparative analysis, and a variety of quantitative methods. Substantive works will be used to illustrate each approach. Throughout, the discussion will emphasize methodological issues that are common to all forms of comparative inquiry.

GOVT 707 Game Theory for Political
Science

American Government and Institutions

GOVT 609 Political Parties and
Elections

GOVT 611 The Political Economy of
American Development, 1860-1900
Fall. 4 credits. B. Sicherman. This course will trace and describe the political economy of national state formation from the last decades of the antebellum period, through the Civil War and Reconstruction era, and ends with the transition to a more industrial society during the late nineteenth and early twentieth centuries. Utilizing a broad survey of the historical literature on these periods, the course will investigate: (1) the connection between slavery and the emergence of southern separatism; (2) the impact of conflict between the plantation South and industrializing North on American state formation; (3) the failure of post-Civil War attempts to remold the southern political economy; (4) the role of finance capital markets in industrial and
western agrarian expansion and the consequent emergence of monetary issues in national politics; and (5) the political economic basis of possible developmental trajectories other than the high-tariff, gold-standard one actually followed.

**[GOVT 612 American Political Development II: Social Movements and State Expansion in the Twentieth Century]**

**[GOVT 613/413 Finance, Federalism, and Politics]**
Spring. 4 credits. W. Mebane.
For description see Government 413.

**[GOVT 615 State and Economy in Comparative Perspective]**
Spring. 4 credits. R. Bensel.
This course reviews the extensive literature on the political economy of comparative state formation and institutional change. Among the topics covered will be war-making and state expansion, regime evolution and economic development, and market processes and class transformations. Although much of the reading and discussion will focus on the United States and Europe, the limits of these cases as theoretical prototypes for the remainder of the world will also be considered.

**[GOVT 618 Politics, Markets, and the Middle Classes]**

**[GOVT 619 The Politics of Scandal]**
Spring. 4 credits. M. Shetter and J. Ribkin.
See Government 419 for description.

**[GOVT 620 The United States Congress]**

**[GOVT 623 The Politics of Courts]**

**[GOVT 628 Bureaucracy and Law]**

**[GOVT 629 Cleavages and Coalitions in Contemporary American Politics]**

**[GOVT 703 Political Economy]**

**[GOVT 705/405 Government and the Economy]**

**[GOVT 706 The Politics of Education]**

**Comparative Government**

**[GOVT 630 The Political Economy of Market Reform]**

**[GOVT 632 Politics and Society in Western Europe]**

**[GOVT 633 European Party Systems and Political Change]**

**[GOVT 634 Genetic Engineering: Politics and Society in Comparative Perspective]**

**[GOVT 638 Latin American Political Economy]**
Spring. 4 credits. H. Shamis.
The central goal of this seminar is to examine the magnitude and scope of the decades-long process of economic transformation in the region and its implications for political stability. In order to do so, we will adopt a historical political economy approach. Old concepts—populism, corporatism, nationalism—will be reviewed in light of new developments. Different economic phases and strategies—export-led growth, import-substituting industrialization, market-oriented reform—will be analyzed in light of the region's changing social structures, unstable political institutions, and shifting preferences and ideologies of social actors. And classic theoretical approaches—Modernization, Dependency, Bureaucratic-Authoritarianism—will be reevaluated in light of the current convergence toward marketization and democratization.

**[GOVT 639 Studying Political Culture]**

**[GOVT 642 Comparative Political Economy: East and Southeast Asia]**

**[GOVT 645 Chinese Politics]**
Spring. 4 credits. V. Hsu.
Review and assessment of several of the major currently competing approaches to the study of Chinese politics. Discussion and evaluation of leading works in the field analyzing Chinese state and society, policymaking and policy implementation, bureaucratic politics, elite politics, political culture, and political economy. Special attention to problems of research and interpretation.

**[GOVT 648 Political Economy of Change: Rural Development in the Third World]**

**[GOVT 652 Southeast Asia Seminar: The Philippines (also Asian Studies 601)]**

**[GOVT 653 The Plural Society Revisited (also AS 607)]**
Fall. 4 credits. B. Anderson.
John Furnivall's concept, invented 40 years ago, posited colonial society as one in which race (and ethnicity), class, occupation, and residence were distributed more or less isomorphically. The seminar will review the utility of the concept in light of subsequent research on colonial Asia, and its applicability to developments since the achievement of independence. It will also consider the relevance of the concept to (decolonized) modern Thailand. The core problematic issue will be the relationship between classification (naming) and power.

**[GOVT 655 Gender, Politics and Welfare Policies in Europe and the U.S. (also GOVT 442)]**

**[GOVT 656 Comparative Political Economy]**

**[GOVT 657 Comparative Democratization]**
Fall. 4 credits. H. Schamis.
This course will focus on the transition from authoritarian to liberal politics in Eastern Europe and in Latin America. Particular attention will be paid to Poland, Hungary, Russia as well as Argentina, Brazil, and the not-necessarily-transitional Mexico. During the course, we will also bring in a variety of other cases of recent democratization—in particular, Spain, Portugal, Italy, and Greece. Our focus will be equally divided between the empirics of these transitions and theoretical understandings of transitions to democracy.

**[GOVT 660 Social Movements and Contentious Politics (also SOC 660)]**

**[GOVT 662 The Administration of Agricultural and Rural Development]**
Spring. 4 credits. N. Uphoff.
For description, see INTAG 603.

**[GOVT 731 Political Ecology]**
Spring. 4 credits. R. Herring.
Political ecology studies the intersection of the politics of economic change and policies of states with interests in the environment—whether in conservation or transformation. It is centrally concerned with the sources of change in landscapes, both proximate and distal—and therefore with the political economy of development—and equally with human responses to ecological dynamics. Scarcity, degradation, threat, and opportunity. Politics respond to and shape evolution of ecological systems, in both intended and unintended ways. Reciprocal, social movements around both protection of particular environments and opposition to state efforts to protect or change ecological systems introduce new political cleavages. Differing conceptualizations of public goods in ecological systems give rise to divergent problems of policy and collective action. Arenas across boundaries: international environmental "soft law" is a product of domestic environmental politics and simultaneously a source of new politics on the ground. The course is seminar in format and explicitly comparative in method; materials will be drawn from both the history of industrial societies and currently transitional ("less developed") societies.

**[GOVT 732 Post socialist Transformations]**
Fall. 4 credits. V. Bunce and M. Evangelista.
This is a seminar in comparative and international politics that examines the political and economic, domestic and international experiences of the 27 countries that once made up the Soviet Union and Eastern Europe. Among the topics addressed will be explanations of why socialism and socialist states collapsed; how democratization relates to economic reform; and why relations among the nations of the region and the new states of the region are cooperative or conflictual.

**[GOVT 733 State, Market Economy and Civil Society in Contemporary South Korea]**
Fall. 4 credits. J. J. Choi.
This seminar aims to analyze basic aspects in Korean politics and society since World War II, with special emphasis on the basic categories of society, the state, market economy and civil society. These categories broadly match with the state-making, industrialization, and democratization which have been the main forces in shaping the history of contemporary Korea.
Political Theory

GOVT 663 Political Theories of Power
Fall. 4 credits. A. M. Smith. 
Through reading and discussion of theorists such as Lukes, Gramsci, Laclau and Mouffe, Nietzsche, Foucault, Fraser, Butler, (Biddy) Martin, (Renata) Salcé, (Joan) Scott, (Jacqueline) Rose and (Mike) Davis, we will explore the contemporary debates on the structure of power relations. Seminar themes will include: the definition of social agents' interests, hegemony, disciplinary regimes, subjectivity and resistance. Seminar participants should already have a basic familiarity with the treatment of power in the political theory tradition.

GOVT 664 Contemporary Democratic Theory

GOVT 665 American Political Thought:
From Madison to Malcolm X

GOVT 667 Major Figures in Modern Political Theory
Spring. 4 credits. N. Hirschlmann. This seminar will focus on three figures in modern political theory who present contrasting yet curiously related visions of politics. Emphasis will be placed on analytical treatment of historical works, and the course will strive to integrate historical and analytical political philosophy through weekly student papers and presentations of primary and secondary sources. No single critical methods, such as feminism, postmodernism, may be utilized to locate a critical reading of texts within contexts of cultural history.

GOVT 669 Modern Social Theory I
Fall. 4 credits. S. Buck-Morris. Readings vary, but topics are drawn from the traditions of Marx, Weber, Durkheim, the Frankfurt School, and Freud. They include political economy, the transformation to "modern," ideology as the legitimation of power, and social institutions as social constraints. The methods of critical theory, structuralism, post-structuralism, and feminism will be considered.

GOVT 670 Modern Social Theory II
Spring. 4 credits. S. Buck-Morris. Issues raised by neo-Marxism, critical theory, post-structuralism, and feminism will be considered.

GOVT 671 Graduate Seminar in Feminist Political Theory
Fall. 4 credits. N. Hirschlmann. The course is open to undergraduates who have taken Government 463 or other courses in feminist theory, with permission of the instructor. This graduate seminar will examine contemporary feminist theory from the perspective of political theory. We will study the work of feminist theorists who work specifically within the discipline of political science, as well as the specifically political dimensions of work not generally considered political theory. Though particular readings and topics will change from year to year in response to the most recent literature, in general the course will focus on questions of epistemology and methodology as a way to explore a variety of issues relevant to feminism as an academic, intellectual, and political enterprise.

GOVT 674 Theory and Practice of Nationalism
Fall. 4 credits. B. Anderson. This course will be devoted to the comparative study of the rise and transformation of nationalism, according to different theoretical and philosophical traditions. The relationship of nationalism to questions of race, gender, class, and time will also be discussed on the basis of both theoretical and empirical studies.

GOVT 675 Gramsci and Cultural Politics (also German Literature 668)

GOVT 676 Theories of Governmentality

GOVT 678 Classics in Political Thought:
Adam Smith and David Hume

GOVT 679 Althusser and Lacan

GOVT 680 Theoretical Approaches to Ideology
Spring. 4 credits. A. M. Smith. An investigation of what is casually referred to as the "politics of meaning" is of course central to political theory and political science as a whole. However, profound controversies revolve around the definition of "ideology," its location in the social, its relationship to the interests of dominant groups, the means by which it is circulated throughout diverse social sites, its ability to displace traditional modes of thought, and the processes by which it penetrates and re-constructs the world views of the dominated. We will lay the groundwork for the seminar by examining key texts on ideology by Marx. We will trace the multiple meanings of the term in his work and their various implications. Next we will discuss the ways in which Adorno, Horkheimer, Gramsci, Althusser, Hall and Laclau have re-articulated Marx's formulations. We will address the Freudsian and Lacanian interventions in ideology studies with respect to the concepts of the unconscious and misidentification. Then we will explore the problem of ideological analysis and historicity, with reference to classical texts in the structuralist, science and technology studies, and feminist traditions. Finally, we will conclude the seminar with a discussion of the incorporation of sedimented discourse in everyday practice with reference to the work of Bourdieu.

GOVT 686 International Strategy
Fall. 4 credits. H. Shue. This course will provide an overview of international security policy. This course will cover several theoretical perspectives, including rational choice and psychological approaches to the study of security issues. These perspectives will be used to examine various substantive topics including war and deterrence, balance of power, alliance politics, domestic constraints on foreign policy and military strategy. Less attention will be paid to issues involving economic cooperation and sanctions.

GOVT 695 International Political Economy

GOVT 696 International Strategy

GOVT 697 International Environmental Policy

GOVT 698 Political Economy and National Security

GOVT 699 International Security Politics
Spring. 4 credits. P. Kaizenstein. This course will provide an overview of theoretical and research topics in the area of international security policy. This course will cover several theoretical perspectives, including rational choice and psychological approaches to the study of security issues. These perspectives will be used to examine various substantive topics including war and deterrence, balance of power, alliance politics, domestic constraints on foreign policy and military strategy. Less attention will be paid to issues involving economic cooperation and sanctions.

GOVT 691 Normative Elements of International Relations
Fall. 4 credits. H. Shue. We examine selected normative elements of international affairs, divided into three inter-locking clusters. First are issues about conflict, including both low-intensity military intervention and nuclear weapons. Second are questions about cooperation, especially between rich nations and poor nations. Third are debates about the authority and status of the major players in the international system of individual persons, nation-states, and international regimes. Questions considered include: is the retention by some nations of nuclear weapons morally justified? Is the world economy unique? Should national governments be pressured to respect individual human rights?

GOVT 694 Research Design and Grant Writing

Although the course has methodological goals, these will be pursued through reading and discussing important applications (e.g., the democratic peace, rally effects, conflict formation and dissolution, economic disputes and bargaining between states, welfare state development and retrenchment, exchange rate politics, etc.). We will focus on the problems of identifying interesting questions, formulating appropriate strategies for answering them, and finding the appropriate methodological tools with which to conduct the research, acquiring the knowledge necessary to read and understand literature using a variety of methods, and writing up results so they can be published. The major course requirement is a piece of original research on a topic of the student's choosing.

GOVT 695 International Political Economy

GOVT 696 International Strategy

GOVT 697 International Environmental Policy

GOVT 698 Political Economy and National Security

Independent Study
This course is NOT open to undergraduates. Undergraduates wishing to conduct supervised study should register for Government 499.
GOVT 799 Independent Study
Fall or spring. 4 credits.
Government 799 is a course of individualized reading and research for graduate students. Topics, readings, and writing requirements will be designed through consultation between the student and the instructor. Graduate students in government who are looking to use this as an option to fulfill their course requirements should check with their chairs to be certain that the program of study is acceptable for this purpose. Applications must be completed and signed by the instructor and by the chairs of their special committees. They are available from, and must be returned to, the graduate assistant in 125 McGraw Hall.

HISTORY

The popularity of history among Cornell students is due to its usefulness as preparation for graduate, professional, or law school and for any career that requires critical thinking and good writing. The reputation of the faculty for scholarship, teaching, and advising; and most of all, the intrinsic interest of the discipline. A wide variety of introductory and advanced courses is offered. The department is particularly strong in ancient, medieval, and modern European history; in American, Latin American, and Asian history; and in the history of science.

The Major
To complete the history major, a student must fulfill the requirements listed below:

1) Take 9 history department courses (for either 3 or 4 credits each), completing all of them with a grade of C or better. (Courses taken for entry may count towards fulfilling the major.)

2) Of the total 9 courses:
   a) 4 must be outside of American history and
   b) 3 must be in history before 1800.

Courses used to fulfill Requirement (1) above may also be used to fulfill Requirement (2), in respect both to (a) and (b) if applicable. A course in American history before 1800 may be used to fulfill Requirement (2b). A course before 1800 in a field other than American history can be used toward fulfillment of both Requirements (2a) and (2b).

3) Of the total 9 courses, one must be a 400-level seminar. History 400 may be used to fulfill this requirement. Appropriate 400-level seminars may be used to fulfill Requirements (2a) and (2b).

HONORS
The history department offers an honors program for students who wish to research and write a thesis during their senior year. In addition to writing the thesis, honors students must maintain a 3.5 average in their history courses, take the Honors Proseminar (History 400) plus an additional 400-level seminar, preferably during their junior year, and complete 10 courses in history (for 3 or 4 credits each). During the second term of sophomore year or early in junior year, interested students should speak to a faculty member or faculty adviser about the honors program.

Before the beginning of senior year, the candidate presents in conversation or in writing a thesis proposal to an appropriate member of the faculty. The faculty member who approves the proposal ordinarily becomes the thesis supervisor. If for any reason it is necessary to change supervisors, this arrangement should be confirmed no later than the fourth week after the beginning of the candidate's senior year.

Honors candidates should register in History 401, Honors Research, with their supervisors. Any exceptions to this must be approved by the Honors Committee. History 401 is a 4-credit course that permits honors candidates to conduct research and to begin writing the honors essay. At the end of the first semester of the senior year, as part of the requirements for History 401, the student submits to the supervisor a ten-to-fifteen page overview, or, alternatively, a preliminary draft of some part of the thesis along with an outline of the whole and meets with a committee consisting of the student's supervisor and one other department member who will eventually serve as a reader of the thesis. That committee then recommends whether the student may proceed to enroll in History 402, Honors Thesis, during the final semester of the senior year. History 402 is a 4-credit course that permits honors candidates to complete the honors essay and to demonstrate their understanding of the ways in which the themes explored in the thesis fit into a larger historical context.

The completed thesis is evaluated by three readers, including the two faculty members who administered the preliminary oral interview in December.

The text of the honors essay may not exceed sixty pages except by permission of the chair of the honors committee and the student's supervisor. Two copies are due during the third or fourth week of April. In May each honors candidate is given an oral examination administered by the supervisor; examination focuses on the essay as well as the specific subfield of history in which the student has conducted research (e.g., Periclean Athens, seventeenth-century science, nineteenth-century America).

To qualify for a bachelor of arts degree with honors in history, a student must (1) sustain at least a 3.5 cumulative average in all history courses and (2) earn at least a cum laude grade on the honors essay and on the oral examination.

Cornell-in-Washington Program.
History majors may apply to the Cornell-in-Washington program to take courses and undertake a closely supervised externship during a fall or spring semester.

Honors and research courses

Course Numbering System
100-level courses are very general introductory courses (like 151-152, 190-191) and freshman writing seminars.

200-level courses come in two kinds: seminars or lecture courses. Neither kind has prerequisites and both admit freshmen.

200-level seminars (which are identified by the name "seminar" in the title) are similar to first-year writing seminars, except that there is greater emphasis on subject matter and less on writing.

200-level lecture courses cover a relatively broad geographical area, period of time, or subject.

300–399-level courses may have specified prerequisites or deal with more-specialized subjects than do those numbered 250–299. Admission of freshmen varies from course to course and is indicated in the course descriptions.

400–499 are upper level undergraduate courses.

600–699 and 700–799 are graduate level courses.
**Comparative History**

[HIST 274 Foodways: A Social History of Food and Eating #
S. L. Kaplan.
An interdisciplinary examination of the validity of the adage "man is what he eats." Among the topics: food and nutrition, food and social structure, the politics of food control, food and modernization, taste making, and food in religion and literature. Cases will be drawn widely across space and time, from Pharaoh's Egypt to the 1990s.]

[HIST 360 Early Warfare, East and West #
A study of the principal modes of warfare found both in the East and the West from ancient times up to the eighteenth century. Tactical evolution and the impact of innovations are stressed, but attention is also paid to the general social and cultural background and the role of nonmilitary factors.]

[HIST 380 Social History of Western Technology #
J. Weiss.
For description, see History of Science.]

[HIST 393 Images of Humanity in Medieval China (also Asian Studies #
Fall. 4 credits. Prerequisite: any course on premodern China or Chinese religions, or permission. Not offered 1999–2000. C. Peterson.]

[HIST 405 Population and History #

[HIST 409 Seminar on Work in Europe and America #
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. S. L. Kaplan.
A comparative study of the meaning of work in different societies from premodern times to the present. Emphasis on the "representations" of work of the actors themselves who worked, as well as of those, who for various critical reasons, did not work. The seminar will examine not only ideology but also the organization, practice, and physical place of work. It will explore theory as well as "cases," and draw on anthropological and sociological as well as historical materials.]

[HIST 432 The City in History: Europe and America #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000.
S. Blumin.
Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe and in modern Europe and America.
Individual research projects.]

[HIST 451 Lord and Peasant in Europe: A Seminar in Social History #
S. L. Kaplan.]

[HIST 454 The Herodotean Moment: The Uses and Abuses of "Western Civilization" (also Government #
Spring. 4 credits. Limited to 20 students.
Prerequisite: permission of instructor. N. Najemy, M. Bernal.
The basic premise of the seminar is that the concept of "Western civilization" is a problematic one in need of critical and historical analysis. The course will examine the evolution and transformation of this concept from antiquity to the twentieth century by focusing on selected moments (and texts in which they are represented) of actual and/or perceptual encounters with other civilizations. It will also inquire into the political uses and abuses of the idea of the West, and the literary, psychological, and anthropological dimensions of the idea. History. Readings include selections from Herodotus's Histories, Virgil's Aeneid, Augustine's City of God, Betty's Song of Roland, Petrarch's, Machiavelli, Montesquieu, Flaubert, Shelley's Hellas, Arnold, Hegel's Philosophy of History, James Mill's History of British India, and, from secondary critical literature, Tzetven Todorov's The Conquest of America and Edward Said's Orientalism.]

**History of Science**

[HIST 281 Science in Western Civilization (also Science and Technology Studies 281) #
Fall. 4 credits.
History 281 is not a prerequisite to 282. P. R. Dear.
This course aims to make comprehensible both to science majors and to students of the humanities the historical structure and development of modern science and to show science as a cultural phenomenon. Changing perceptions of human knowledge from Greek Antiquity to the twentieth century form the framework for current Western views of the world, while the roots of the present-day dominance of "science" as a symbol of progress and modernity lie in an alliance between knowledge of nature and power over nature that took shape in the nineteenth century after a long period of emergence. This course covers the eighteenth, nineteenth, and early twentieth centuries.]

[HIST 287 Evolution (also Biology-General Courses 207, Science and Technology Studies 287) #
Fall. 3 credits.
W. Provine.
For description, see BIO G 207.]

[HIST 292 Inventing an Information Society (also Engineering General Interest 298, Electrical Engineering 298, and Science and Technology Studies 292) #
Spring. 3 credits.
R. Kline.
For description, see ENGRG 298.]

[HIST 380 Social History of Western Technology #
J. Weiss.
Studies in the interaction between technological changes and social changes in Western Europe and America since the eighteenth century. Readings and lectures will deal both with instances of social transformation that accompanied technological changes and with the role of technology in social thought and cultural expression. Special attention to three periods: Britain during the Industrial Revolution, America in the nineteenth century, and America during the Vietnam War.]

[HIST 415 Seminar in the History of Biology (also Biology-General Courses 467, Biology and Society 447, Science and Technology Studies 447) #
Summer. 4 credits.
W. Provine.
Specific topic changes each year.]

[HIST 525 Seminar in the History of Technology (also Science and Technology Studies 525) #
Fall. 4 credits.
R. Kline.
For description, see S&T 525.]

[HIST 616 Enlightened Science (also Science and Technology Studies 416) #
Fall. 4 credits.
P. R. Dear and M. A. Dennis.
"Science" is a term that is often associated with "rationality." The idea that "reason," rather than "faith" or "tradition" should be the pre- eminent guide to practical action has deep roots in the thought of 18th-century Europe, the period known as the Enlightenment. The practice and image of science in the Enlightenment shows how this ideal was developed and understood, and what its meanings and implications were. Those meanings, and their associated values, remain strongly with us today. This course will investigate our current scholarly understanding of many themes and issues relating to "enlightened science," as well as studying writings of the period itself in a variety of topical areas, from political economy to astronomy and natural history, in several national contexts including Scotland, France, and Germany. We will attempt to view these materials from the perspective both of developments from earlier periods and in relation to the later consequences of this ideology.
This seminar will look at immigration to the United States in the twentieth century, focusing on the experiences of several groups as case studies. We will analyze the "push/pull" historical-structural factors that compelled people to come to the United States, the nature of cultural and structural assimilation, nativist movements, the evolution of U.S. immigration policy, the formation of ethnic identity in U.S. society. Attention will be given to current issues such as immigration reform, bilingual education, and the multiculturalism debate.

[HIST 202 Comparative Migration in the Americas (also American Studies 204)]
A seminar examining migration both within and to the Americas in the 19th and 20th centuries. Topics to be discussed are the reasons for population movements; immigration policies; social, economic, and political accommodation; nativist and restrictionist responses; women and migration; remittances and transnationalism. Among the immigrant-receiving nations studied are Argentina, Brazil, Canada, Cuba, Mexico, and the United States.

[HIST 208 Seminar: The Era of Franklin D. Roosevelt (also American Studies 208)]
Fall. 4 credits. Seminar designed for undergraduates but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. R. Polenberg.
The impact of the Great Depression and World War II on American politics, law, and culture.

[HIST 209 Seminar: Political History of Indians in the United States (also American Indian Studies 209)]
Fall. 4 credits. Seminar designed for undergraduates but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999-2000. D. Usner.
An investigation of the political organization and change among Native American societies. Discussions and assignments examine forms of tribal government, diplomacy, and warfare, as well as political relations with European colonies and their United States. Specific topics include pan-Indian confederacies, Indian policy, struggles over sovereignty, and Indian strategies of autonomy and resistance.

[HIST 210 The Atlantic World from Columbus to Equiano]
Spring. 4 credits. R. J. Weil and M. B. Norton.
After Europeans first crossed the Atlantic in the late fifteenth century, the ocean became a vast highway linking the European powers—Spain, France, Britain, and the Netherlands—with their colonial outposts in America. This seminar will explore the Atlantic world through reading such primary sources as the log of Christopher Columbus and the autobiography of Olaudah Equiano, an Anglo-African sailor, and recent scholarly examinations of the slave trade and other aspects of the Atlantic economy. Intended primarily for sophomore prospective history majors; open to others by permission of instructors.

[HIST 213 Asian American History (also Asian American Studies 213)]
Fall. 4 credits. Not offered 1999-2000. Staff.
Comparative introductory history of Asian Indians, Chinese, Filipino, Japanese, and Koreans in the U.S. from about 1850 to World War II. Themes include U.S. expansionism in the Pacific, Asian migrant labor in Hawaii and the American West, the anti-Asian movement, and Asian resistance.

[HIST 214 Seminar on American Foreign Policy (also American Studies 214)]
Fall. 3 credits. Prerequisite: permission of instructor. W. LaFeber.

[HIST 238 History of Women in the Professions, 1800 to the Present (also American Studies 258, Women's Studies 258, and Human Development 258)]
For description, see HDFS 258.

[HIST 251 Black Religious Traditions from Slavery to Freedom (also American Studies 251, Religious Studies 251)]
A survey on the black religious and spiritual traditions during bondage and the early years of freedom. The course will examine the religion, the rise of black churches in the North, the formation of black churches after the Civil War, the independent church movement and the churches' role in social protest.

[HIST 260 Introduction to U.S. Latino History, Part I (also Latino Studies Program 260 and American Studies 259)]
Spring. 4 credits. M. C. Garcia.
This course introduces students to the history of Latinos in the United States. We will focus specifically on the history of Chicanos (Mexican Americans) and Central Americans. Part II of this course, History 261, focuses on the history of Puerto Ricans, Cubans, and Dominicans in the U.S. Students are not required to take both courses. Among the topics that will be addressed are: historical immigration patterns and the "push/pull" factors that compelled migration to the United States; the social and political events that shaped Latino communities; the role of cultural identity, race, class, and gender in shaping experience; the role of foreign policy in formulating immigration policy.

[HIST 261 Introduction to U.S. Latino History, Part II (also Latino Studies Program 261 and American Studies 261)]
Fall. 4 credits. M. C. Garcia.
This survey will discuss the history of Latinos from the Caribbean: the Puerto Ricans, Cubans, and Dominicans. Students will be introduced to some of the most important historical and theoretical works in this field. Topics to be discussed include the push/pull/historical-structural factors that influenced migration to the United States, the historical evolution of these communities; the role of cultural identity, as well as race, class, and gender in shaping experience; the intersection of foreign policy and immigration policy.

[HIST 273 Women in American Society, Past and Present (also Women's Studies 273)]
Spring. 4 credits. M. B. Norton.
A survey of women's experiences in America from the seventeenth century to the present. Among the topics to be discussed are women's familial roles, the changing nature of household work, the women's rights movement, employment of women outside the home, racial and ethnic differences in women's experiences, and contemporary feminism.
[HIST 276 American Indian History, 1500–1850 (also American Indian Studies 276 and American Studies 272)] #
A survey of North American Indian history from the sixteenth century to the mid-nineteenth century. Relations between Indian Nations and with European colonies will be explored. Different cultural groups and cross-cultural encounters will be compared, with emphasis on resistance and adaptation to European colonialism. The formative years of U.S. Indian policy and the experiences of Indian people through the removal era will receive close attention.

[HIST 277 American Indian History Since 1850 (also American Indian Studies 277)]
A historical study of American Indians in the United States and Canada from the mid-nineteenth century to the present. The active and complex role played by Indian people in their responses to government policies and to socioeconomic changes will be emphasized. Challenges faced and initiatives taken by Indians will be traced from the early reservation years to the current era of self-determination. Cultural change and continuity within Indian communities will be closely examined.

[HIST 303 African-American Women in Slavery and Freedom (also Women's Studies 307)]
Historical exploration of African-American women from a sociopolitical perspective. Topics include women in Africa, slavery and freedom, sexuality, labor, the family, gender cross-racially that begins with the African background and ends at 1900.

[HIST 304 American Culture in Historical Perspective, 1880–1980 (also American Studies 304)]
Spring. 4 credits. M. Kammen.
An introduction to the study of modern American culture. An emphasis upon the role of culture in the quest for national identity; the function of cultural myths and myth making; the advent of modernism; relationships between mass culture, popular culture, and high culture; and on the question of American exceptionalism (distinctiveness). Special attention also to the situation of subcultures and regions, to the changing role of entertainment in relation to leisure, the media, ethnicity (pluralism), the decorative and popular arts.

[HIST 311 The Structure of American Political History (also American Studies 311)] #
Examines the course of American politics from the eighteenth century to the present, focusing on the massive transformation of American political life in the late nineteenth and twentieth centuries in response to industrialization and urbanization, the depression and the international crises from the 1930s to the 1990s.

[HIST 313 U.S. Foreign Relations, 1750–1915] #
W. LaFeber.
Examines the development of the U.S. continental and global empires by analyzing policy and policymakers from Benjamin Franklin to Woodrow Wilson. Emphasis is placed on domestic events that shaped foreign policy. In conjunction with HIST 313, a special course, 301, for discussion and guided research will be offered.

[HIST 314 History of American Foreign Policy, 1912 to the Present]
T. Borstelmann.
Students examine the emergence of the United States as a world power in the twentieth century. The course focuses on the domestic sources of foreign policy and the assumptions of the major policymakers (Wilson through Clinton). Important themes include the American response to a revolutionary world since 1912, the role of American racial views in the making of foreign policy, and the increasingly dominant role of the president in the making of U.S. foreign policy.

[HIST 316 American Political Thought: From Madison to Malcolm X (also Government 366)] #
For description, see GOVT 366.

[HIST 318 American Constitutional Development]
R. Polenberg.
Major issues in constitutional history. Topics include: the drafting of the Constitution; the Bill of Rights; the Marshall era; the crises caused by slavery and emancipation; the rise of substantive due process; Holmes, Brandeis, and freedom of speech; the Roosevelt "revolution"; civil liberties and civil rights in modern America; the right of privacy; the contemporary Supreme Court.

[HIST 321 Colonial North America to 1763] #
A survey of European settlement in North America and the Caribbean, emphasizing the interactions of Europeans, Indians, and African-Americans. Topics include: political relations; religious and political change; and the impact on the colonies of internal and external conflicts.

[HIST 324 Varieties of American Dissent, 1880–1900 (also American Studies 324)]
A continuation of History 311 but can be taken independently. Examines the course of American politics from the 1890s to the present, focusing on the massive transformation of American political life in the late nineteenth and twentieth centuries in response to industrialism and urbanization, the depression and the international crises from the 1930s to the 1990s.

[HIST 330 The Age of Jackson, 1815–1850 (also American Studies 330)] #

[HIST 331 The American Civil War and Reconstruction 1860–1877 (also American Studies 331)] #
Spring. 4 credits. J. Silbey.
An analysis of the factors leading up to the breakup of the Union and the war in North and South, and the problems of restoration and reconstruction of the seceded states.

[HIST 332 The Urbanization of American Society: 1600–1860 (also American Studies 332)] #
Fall. 4 credits. S. Blumin.
America was born in the country and moved to the city. This course examines the transformation of America from a rural to a
rapidly urbanizing society and culture, from the first European settlements to the era of the Civil War. It is also a history of the city itself, a human community, and as a crucible of cultural contact and change.

**HIST 333 The Urbanization of American Society: 1860-2000 (also American Studies 333)**
Spring. 4 credits. S. Blumin.

An examination of American society in the context of capitalist development and of capitalism as a social phenomenon. The transformation of pre-industrial colonies into an industrializing nation; the development of social classes; the emerging ethos of enterprise in twentieth-century America; rapid urbanization and the city; the first European settlements to the era of the present (and near future). It is also a history of the city itself, as a human community, a crucible of cultural contact and change, and a focus of public policy.

**HIST 335 African-American History from Slavery to Freedom #**

Introductory course on African-Americans from 1619 to 1865. Emphasis will be on life in bondage, the free black communities, and racism. Other topics include African cultural heritage; the slave trade; religion, the family, and the black freedom struggle.

**HIST 336 Capitalism and Society in Developing America, 1607-1877 (also American Studies 336)**

An examination of American society in the context of capitalist development, and of capitalism as a social phenomenon. The transformation of pre-industrial colonies into an industrializing nation; the development of social classes; the emerging ethos of enterprise.

**HIST 337 Entrepreneurialism and Organization in the Age of the Corporation: Capitalism and Society in Modern America, 1840-2000 (also American Studies 337)**

An examination of American society in the context of capitalist development and of capitalism as a social phenomenon. The rise of corporate capitalism; class, "mass", and the ethos of enterprise in twentieth-century American society.

**HIST 340 Recent American History, 1925-1960**

Topics include the Hoover-Franklin Roosevelt and World War II; the Holocaust and the atomic age; the Cold War and civil liberties; individualism and conformity in the 1950s.

**HIST 341 Recent American History, 1960 to the Present**
Summer and fall. 4 credits. Not open to freshmen. R. Polenberg.

Topics include the Supreme Court and civil rights; Kennedy, Johnson, and social reform; the Vietnam War and Watergate; politics and the presidency from Carter to Clinton, and class, race, and ethnicity in modern America.

**HIST 345 The Intellectual and Cultural Life of Nineteenth-Century America (also American Studies 345 and Religious Studies 345)**

An examination of the development of cultural and intellectual diversity in the United States. Particular emphasis will be placed on religious pluralism.

**HIST 346 The Modernization of the American Mind (also American Studies 346)**
Fall. 4 credits. R. L. Moore.

American thought and culture from 1890 to the present. Emphasizes the intellectual impact of major political and economic events and the adaptation of social ideas and values to new conditions.

**HIST 359 American Families in Historical Perspective (also American Studies 359, HD 359, and Women's Studies 357)**
Spring. 3 credits. Prerequisite: HD 150 or one 200-level social science or history course. S-U grades optional. Human ecology students must register for HD 359. Not offered 1999-2000. J. Blumberg.

For description, see HDFS 359.

**HIST 375 The African-American Workers, 1865-1910: The Rural and Urban Experience (also ILRCB 385)**
Fall. 3 credits. Prerequisite: juniors and seniors, permission of instructor. Not offered 1999-2000. N. Salvatore.

For description, see ILRCB 385.

**HIST 376 The African-American Workers, 1910-the present: Race, Work, and the City**

For description, see ILRCB 386.

**HIST 378 Topics in U.S. Women's History (also American Studies 378 and Women's Studies 378)**
Fall. 4 credits. Preference given to students who have taken Hist/WS 273, Hist/WS 303, or Hist/WS 338. Others: permission of instructor only.

M. B. Norton.

Topic for 1999: Gender and Sexuality in America. A colloquium course, limited to 20 students. Students will read and discuss some of the new scholarly work on gender and sexuality in American history. They will also prepare several written and oral presentations based on their analyses of primary sources in the Cornell Human Sexuality collection and elsewhere.

**HIST 411 Undergraduate Seminar in American Political History**
Spring. 4 credits. Prerequisite: permission of instructor. J. Silbey.

**HIST 414 Motivations of American Foreign Policy**
Fall. 4 credits. Prerequisite: permission of instructor. W. LaFeber.

Topic for Fall 1999: technology and its perceived effect on U.S. foreign relations, 1840-1900s.

**HIST 418 Undergraduate Seminar in the History of the American South**

**HIST 419 Seminar in American Social History (also American Studies 419)**
Fall. 4 credits. S. Blumin.

**HIST 421 Undergraduate Seminar in Cultural History (also American Studies 421)**
Spring. 4 credits. Prerequisite: permission of instructor. M. Kammen.

Topic for Spring 2000: the annual cycle of the seasons in nature and in Western culture, with contextual attention to pagan origins, syncretism in the cycle of the Christian calendar year, psychological connections between the human life cycle and the seasons, and the more recent impact of industrialization as well as urbanization on societal feelings about the seasons. Emphasis upon the United States and seasonal implications for the history of consumerism. Sources will include art, literature, the writings of eminent naturalists, and materials concerning festivals and holidays. A mix of primary and secondary source readings.

**HIST 428 Comparative History of Colonial North America**
Fall. 4 credits. D. Usner.

This seminar will consider ways of comparing how different European empires, especially Spain, France, and England, colonized North America from the 16th through the 18th centuries. Settlement patterns, labor systems, trans-Atlantic connections, and Indian relations will be examined for similarities and differences across imperial boundaries. Borders between colonial and frontier regions, where empires came face-to-face, will also be explored. Problems and opportunities for comparative study, found in old and new scholarship on early America, will be critically discussed.

**HIST 429 Undergraduate Seminar in Indians of Eastern North America (also American Indian Studies 429)**

A seminar examining the history of Native Americans in the eastern woodlands from colonial times to the present. The cultural and economic participation of Indians in the evolution of frontier societies will be examined. Major topics include fur-trade networks, political relations, removal, and the persistence of Indian communities in eastern states.

**HIST 430 America in the Camera's Eye (also American Studies 430.2)**
Fall. 4 credits. R. L. Moore.

Photographs and films have become archives for historical research. From the set of Matthew Brady's Civil War images, the United States has been recorded by documentary...
photographers who have called attention to the country's progress and its poverty. Hollywood filmmakers have also recorded endless images of the American landscape and placed against that landscape fictionalized accounts of the country's history and its social problems. What can we learn from these images? What is their relation to written texts and to other documents that tell us about the past? How truthful is documentary? How misleading is Hollywood? One key text will be James Agee's and Walker Evans' Let Us Now Praise Famous Men. The seminar will meet once each week for discussion and periodically during the semester to view films.

[HIST 432 The City in History: Europe and America]
Reading and discussion of significant interpretations of the rise, role, and character of cities in medieval and early modern Europe, and in modem Europe and America. Individual research projects.

[HIST 440 Undergraduate Seminar in Recent American History]
Topic: freedom of speech, censorship, and the Supreme Court.

[HIST 442 Religion and Politics in American History: From J. Winthrop to R. Reed (also American Studies 442 and Religious Studies 442)]
A reading and research seminar concerned with popular culture in nineteenth-century America (publications, performances, and audiences).

[HIST 459 Female Adolescence in Historical Perspective (also Women's Studies 439 and Human Development 417)]
Fall. 5 credits. Limited to juniors and seniors only with the permission of instructor. J. Brumberg.
For description, see HD 417.

[HIST 484 Seminar in the History of American Labor: Race, Work, and the City (also I LR 304)]
Fall. 4 credits. Open to juniors and seniors only with the permission of the instructor. Not offered 1999–2000. N. Salvatore.
For description, see ILRCB 304.

[HIST 486 Seminar on the 1960s]
Fall. 4 credits. T. Borstelmann.
This course will explore the issues and developments of the most turbulent and significant decade in recent U.S. history. Major topics will include the civil rights movement, the Kennedy and Johnson administrations, the Vietnam War, the anti-war movement, the counterculture, the women's liberation movement, and the Nixon administration. A substantial research paper will be required.

[HIST 487 Spanish Borders and French Frontiers in American History (also S HUM 417)]
Spring. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. D. Usner.
For description see S HUM 417.

[HIST 500 Undergraduate Research Seminar (also American Studies 500)]
Fall and spring. 8 credits each term. S. Blumin and others.
Offered in Cornell-in-Washington Program.
An intensive research and writing experience utilizing the extensive resources of Washington, D.C.

[HIST 521 Seminar in American Cultural Studies (also American Studies 521)]
The focus will be the relationship between government and culture in historical perspective. After three contextual sessions devoted to 19th-century background, we will mainly be concerned with the period from the 1930s to the present. Several comparative sessions will be devoted to government as a patron of culture in other societies. A research paper is required.

[HIST 607 Writing Seminar on African-American Women]
This course is designed for students actively engaged in a writing project on African-American women's history. Students must have already done the research and most of the reading for their papers prior to enrollment. Reading and class discussion will focus on style, methodology, and theory. An extensive research paper is due at the end of the semester.

[HIST 608 African-American Women]
Spring. 4 credits. Prerequisite: permission of instructor. Letter only. M. Washington.
A reading and discussion topics seminar focusing on the experiences of African-American women in pre-twentieth century America, including the Caribbean. Topics include women and labor, abolitionism, women's rights, sexuality and race relations, education and racial uplift, black women's literature, marriage and family.

[HIST 610 Afro-American Historiography]
Reading and discussion course focusing on the way historians write and interpret the Black experience in America. Students will be concerned with historical narrative, various schools of thought, and historical approaches.

[HIST 613 Seminar on American Diplomatic History]
A reading and research seminar in twentieth-century American diplomatic history, emphasizing the Cold War period and interpretive approaches to U.S. foreign policy. A research paper is required.

[HIST 617 Seminar in American Cultural History]

[HIST 618 Seminar in American Cultural History]
Spring. 4 credits. R. L. Moore.
A reading and research seminar concerning selected topics in nineteenth century America.

[HIST 621 Graduate Seminar in American Cultural History]
Fall. 4 credits. M. Kamen.
The history of cultural criticism in the U.S. during the 20th century. Emphasis on the problem of cultural stratification and on the shifts from genteel to popular mass culture. A research paper will be required.

[HIST 624 Graduate Seminar in American Indian History (also American Indian Studies 624)]
This seminar examines, through a selected series of major topics and problems, the historical study of North American Indians. Various approaches in history—together with anthropology, political science, folklore, and other disciplines—are explored. Emphasis is placed on current interpretations and directions.

[HIST 626 Graduate Seminar in the History of American Women (also Women's Studies 626)]
A reading and research seminar intended primarily for graduate students. Major works in American women's history will be carefully scrutinized, and each student will prepare a lengthy research paper.

[HIST 627 Graduate Seminar in Early American History]
Fall. 4 credits. Prerequisite: permission of instructor. M. B. Norton.

[HIST 633 Seminar in Nineteenth-Century American History]

[HIST 634 Seminar in Nineteenth-Century American History]
A research seminar intended primarily for graduate students exploring society, culture, and politics of the United States between 1815 and 1896.

[HIST 640 Graduate Seminar in Recent American History]
A graduate research seminar that will examine American legal and constitutional history.

[HIST 683 Seminar in American Labor History (also ILRCB 783)]
Fall. 3 credits. Prerequisites: graduate students only. Not offered 1999–2000. N. Salvatore.
For description, see ILRCB 783.

[HIST 710 Colloquium in American History]
Examination of major approaches, periods, issues, and modes of interpreting American history. Readings include recent "classics" of American scholarship from diverse subfields and genres.
Latin American History

HIST 249 Race and Class in Latin American History
Fall. 4 credits. Prerequisite: permission of instructor. T. Holloway.
This seminar focuses on ethnic interaction and class formation in the historical development of Latin American societies considering the roles of Native Americans, Europeans, and Africans. Each approach is approached as an analysis of the historical origins of contemporary patterns, and comparisons will be made among units, in a search for underlying and overarching themes.

HIST 295 Colonial Latin America @
Fall. 4 credits. M. Roldan.
Survey of Spanish America from the rise of pre-Columbian civilizations through the European conquest, the establishment and development of colonial societies, imperial rivalries in the New World, the background of the independence movements, and the achievement of political independence.

HIST 296 Modern Spanish America @
Spring. 4 credits. T. Holloway.
Survey of the Latin American nations from independence to the present. Major themes include the persistence of neocolonial economic and social institutions, the development of nationalist and populist politics, revolutionary movements of the twentieth century, and United States-Latin American relations.

HIST 347 Agrarian Societies in Latin American History @
Spring. 4 credits. T. Holloway.
The development of rural patterns of wealth, status, and power, focusing on the role of country people in the larger society. Topics include disruption of the conquest, evolution from encomienda to hacienda, rise of plantation agriculture and export enclaves, decline of Indian communities, peasant protest, and land reform and development programs of the recent past.

HIST 348 History of Brazil @
Fall. 4 credits. T. Holloway.
A survey of Brazilian history from colonial times to the present. Recent topics include the import-substituting growth model, contradictions leading to military rule 1964-1985, transition to competitive politics, debt, ecology, regional and social disparities. Some comparisons are made to other Latin American countries.

HIST 424 Art and Politics in Twentieth-Century Latin America
This seminar will examine how the intersection of art and politics shaped culture, ideology, and identity in Latin America from the Mexican Revolution to the dictatorships of the late twentieth century. Topics may include muralism and the Mexican Revolution; the artist as muse and activist (Frida Kahlo); working class and immigrant culture in Argentina and the tango; samba as social and political protest; n Film, gender and politics in exiled women's literature, the appropriation of public spaces as artistic forum and means of communication under authoritarian regimes.

HIST 445 Prostitutes and Patriots: Urban Culture and the Construction of Citizenship in Latin America, 1880-1950 (also History 645)
Fall. 4 credits. Prerequisites: History 295 and/or 296 suggested. Permission of instructor required. Enrollment limited to 15. M. Roldan.
Unprecedented demographic and economic changes gave rise to debates by the late nineteenth century regarding the definition of citizenship and the limits of individual participation in Latin American societies. These debates centered on the city—the symbol of both “progress” and “disorder.” Rising tensions were expressed through the trope of the “prostitute” (disease and loss of control) and the “patriot” (science, statesmanship and order). The course examines changing notions of the private/public; the regulation of sexuality and gender; popular mobilization; and the construction of the nation.

HIST 470 Violence, Nation, Myth: The Americas (1770-1940).
Spring. 4 credits. M. Roldan and S. Samuels.
Marching Seminar. This course considers the concept of violence in two different cultural contexts (the United States and Latin America) and from a range of perspectives: historical, literary, theoretical, and political. A central assumption is that violence has played a critical role in shaping discourses about the nation, everyday life, individual identity, and citizenship in the Americas. We will examine the intersection of domestic and national violence and myth, and the significance of frontiers, borders, and marginality as these are contested in struggles over slavery, family violence, transnational migration, and sexual, racial or ethnic identity.

[HIST 640 Seminar in Latin American History
Spring. 4 credits. Not offered 1999-2000. Staff.]

African History

[HIST 255 Cultures and Ecology in Precolonial Africa @
This course will examine the history of Africa, from the origins of humankind up to 1800 by focusing on a number of controversial issues about the African past. Why did humankind emerge in Africa? Who were the ancient Egyptians? What “race” were they and is this important anyway? If so, why? How did the ecological environments of the past shape African cultures and their histories? What role did women play in early African societies and what can this information tell us about how human societies have operated from time immemorial? What role did the slave trade play in influencing the current economic position of Africa and race relations in the U.S. today?

[HIST 391 Riot and Revolution in Nineteenth Century Africa: The Birth of the Modern
The beginning of the nineteenth century witnessed the rapid and often times forceful expansion of Islam in West Africa, the end of the Atlantic slave trade, the transformation of the Zulu from a small, inconsequential people to the largest and most powerful ethnic group in South Africa, and the wild fire spread of Swahili as a lingua franca in east and central Africa. This course explores these revolutionary changes and the upheavals that accompanied them as Africa remade itself to face the modern era. Lectures, readings and discussions will focus on the causes and consequences of these events and their significance for understanding contemporary Africa.]

[HIST 407 The Colonial Encounter
The course examines the way colonizer and colonized influenced the culture, history and identity of the other. Emphasis is on exploring the colonial encounter as a phenomenon in itself as well as both sides of the unequal equation that linked specific European countries (for example, France, England, Germany, Netherlands) with the states they colonized in Africa and Asia. This linkage challenged, at different times in different places, pre-existing understandings of self, country, and culture, as well as notions about the other.]

[HIST 434 Gender and Sexuality in the Social History of Africa (also Women's Studies 477) @
This course will examine the history of gender relations in Africa during the precolonial and colonial periods. Among the questions to be explored: what was the nature of gender relations in precolonial Africa; how were these relations affected by the entrance of Islam, the Atlantic slave trade, and other changes that affected particular African societies; what factors influenced the nature and extent of that impact; how did African men and women define gender and sexual identities and how did particular historical forces such as colonialism and the entrance of Christianity and Islam affect these identities.]

HIST 443 The European as Other (also S HUM 404)
Fall. 4 credits. Permission of instructor. Limit 15. S. Greene.
For description see S HUM 404.

Asian History

[HIST 190 Introduction to Asian Civilizations @
An introduction to the distinctive cultures of China, India, Japan, and Southeast Asia that features an intensive examination of selected topics and periods of particular significance in the history of each.]

HIST 191 Introduction to Modern Asian History @
Fall. 4 credits. S. Cochran, T. Loos.
The history of Asia-Pacific from the nineteenth century to the present, focusing on relations of China, Japan, and Southeast Asia with each other and with the West.

HIST 207 The Occidental Tourist: Travel Writing and Orientalism in Southeast Asia (also Asian Studies 207)
Spring. 4 credits. Letter grade only. T. Loos.
HIST 218 Introduction to Korea (also Asian Studies 218)
- Fall. 3 credits. Y. J. Park
  For description see Asian Studies 218

HIST 230 Seminar in History (also History 243) The Asia-Pacific War
- Fall. 4 credits. Seminar designed for underclassmen but open to all students. Enrollment limited to 15 students.
  Prerequisite: permission of instructor. J. V. Koschmann.
  This seminar will examine what is at stake when the fighting between Japan and its former enemies in the Pacific during World War II is remembered, memorialized, and (re)constructed as historical narrative by Japanese, Americans and others. By exploring voices, they have silenced southern Vietnamese (Hanoi) and loser (U.S.) narratives and how the course will evaluate the standard winner narratives, memoirs, and literature. The study of that day.

HIST 294 History of China in Modern Times
- Spring. 4 credits. S. Cochran.
  A survey that concentrates on the rise of the last imperial dynasty in the seventeenth and eighteenth centuries, the upheavals resulting from domestic rebellions and foreign imperialism in the nineteenth century, and the twentieth-century efforts to achieve social mobilization, political unity, and commercial expansion.

HIST 297 Japan Before 1600
  This course explores Japan before 1600 from a variety of perspectives. Analysis of primary sources, including literary and archaeological artifacts, is emphasized. History 297 is a good introduction to issues of premodern historical study and to the general study of East Asia. (Graduate students or more advanced undergraduates who would like to do a research project should register for History 497.)

HIST 298 State, Society, and Culture in Modern Japan
- Spring. 4 credits. J. V. Koschmann.
  A survey of Japan from early-nineteenth century to the present, which attempts to connect the political, socio-economic, and imaginative realms of modern Japanese life so as to achieve a complex view of modern Japanese society. Pays particular attention to the changing situation of women and women's movements, Japan's relations with Asia and the U.S., and problems of historical representation and consciousness. Readings will include Japanese works in translation as well as secondary sources.

HIST 322 History of Samurai
  This course explores the role of the samurai at various epochal moments, and the effects of samurai-centered governance has had on society and culture writ broadly up to the early modern era. This is very much a hands-on course in which analysis and writing are emphasized. Graduate students are welcome but they should register for History 522 after consultation with the instructor.

HIST 326 History of the Samurai II
- Fall. 4 credits. J. Piggott.
  We will continue study of themes and issues introduced in History 322, wherein we traced the origins of the samurai from eighth-century roots through the era of the first bakufu, or warrior government, during early medieval times. This course will cover the samurai during the remaining centuries of the medieval age, through 1600.

HIST 360 Early Warfare, East and West
  For description see Comparative History.

HIST 388 Vietnamese Histories (also History 886 and Asian Studies 385/685)
  For description see Asian Studies 385.

HIST 393 Images of Humanity in Medieval China (also Asian Studies 393)

HIST 395 Southeast Asia to the Eighteenth Century
- Fall. 4 credits. D. Wyatt.
  A survey of the earlier history of Southeast Asia, concentrating particularly on regional movements of economic, social, cultural, and political change and using, to the extent possible, readings in translated primary sources.

HIST 396 Southeast Asian History from the Eighteenth Century (also Asian Studies 396)
- Spring. 4 credits. S-U option. T. Loos.
  Surveys the modern history of Southeast Asia with special attention to colonialism, the Chinese diaspora, and socio-cultural institutions. Considers global transformations that brought "the West" into people's lives in Southeast Asia. Focuses on the development of the modern nation-state, but also questions the narrative by incorporating groups that are typically excluded. Assigns primary texts in translation.

HIST 416 Undergraduate Seminar on Gender and Sexuality in Southeast Asia (also Asian Studies 416 and Women's Studies 416)
- Fall. 4 credits. Letter grade only. T. Loos. Students consider the relationships among colonialism and gender and sexual identity formation in Southeast Asia. Using material from a wide range of fields including anthropology and literature, the course complicates a simplistic East/West and male/female binary.

HIST 420 Japan in the Year 1000: The Tale of Genji in Historical Perspective
- Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. J. Piggott.
  The tale of Genji is a classic of premodern Japanese literature that provides readers a broad view into Japan's courtly society at a time when many of the elements of Japan's classical tradition were taking form. Additional primary source readings and secondary sources provide insight into the countryside beyond the capital as well. Previous study of premodern Japan is advised.

HIST 422 China Goes Global (also S HUM 422, ASIAN 420, COM L 444)
- Spring. 4 credits. Prerequisite: permission of instructor. Limited to 15 students.
  For description see S HUM 422.
ARTS AND SCIENCES - 1999-2000

An inquiry into structures of family and gender relations in the classical and medieval periods. Themes will include kinship and family organization, state formation, and gender construction. Those interested in comparative perspectives are encouraged to enroll. "Breadth" reading, primary source materials, and comparative reading placing Japan in an East Asian context will be emphasized. Previous study of premodern Japan and East Asia is recommended.

The turn of the fourteenth century witnessed epochal changes in Japan as structures of monarchy, court-Bakufu relations, landholding, judiciary, international relations, and popular culture were deeply affected by the failure of Go-Daigo Tenno's royal restoration. Core readings of the seminar will include portions of the martial epic, the Taiheiki, and other materials from which insights into these transformations can be drawn. Previous study of Japanese history, especially History 322, is highly recommended.

[HIST 490 Tales of the Heike—A Marcham Seminar (also Asian Studies 490 and Soc Hum 489)] Fall. 4 credits. Prerequisite: previous study of pre-1600 Japan or permission of an instructor. Limited to 12 students. K. Brazell and J. Piggott.

Medieval Japan was crisscrossed by a growing assortment of itinerant, traditionally blind, minstrels who sang the heroic exploits of fighting men of the late twelfth century. The cantos of the Tales of the Heike (Heike Monogatari) were reportedly woven together by a master chanter named Kakuichi in the 14th century. The cultural historian, Barbara Ruch, has called the Heike "Japan's first national epic," because listening to it, enjoying it, identifying with it brought strata and categories of fighting men of the late twelfth century. Possibilities for cross-disciplinary research (along lines recently undertaken in areas such as feminist criticism and cultural studies, for example) will also be explored.

The seminar will explore kingship and state formation in a comparative perspective. Readings will include theoretical and ethnohistorical work on societies across the globe, East and West. In addition to participating in discussions focused on core readings, seminar members will undertake research projects targeting societies of their choice. Students with an interest in the history of preindustrial societies, political and cultural anthropology, and religion will find the seminar stimulating.

Explores the premodern civilization of Japan from a variety of historical perspectives. Students will attend History 297 lectures and participate in a special weekly colloquium.

[HIST 499 Problems in Modern Chinese History (also History 694)] Spring. 4 credits. Prerequisite: History 294 or permission of instructor. S. Cochran.

This course gives each student an opportunity to select one research topic and work on it throughout the semester. Knowledge of Chinese is not required, but background in Chinese studies is needed.

Designed primarily for graduate students in East Asian Studies who specialize in Chinese and/or Japanese history but need for comparative or other purposes to develop a familiarity with the main problems and contours of Korean history. Readings will be selected primarily from English-language works on Korea from the 1870s through the post-World War II era, including Japanese colonial policy and practice in Korea, the Korean War, and the postwar history of the Republic of Korea.

[HIST 598 Colloquium in Modern Japanese History] Spring. 4 credits. J. V. Koschmann.

For graduate students only. Students will attend lectures and do the reading for History 298, participate in a special weekly colloquium, and write a seminar paper.

[HIST 609 Modern Japan Studies: The Formation of the Field in History and Literature (also Asian Studies 609)] Fall. 4 credits. J. V. Koschmann and N. Sakai.

The course will provide both a historical introduction to and critical analysis of the constitution of modern Japan studies as a "field" of postwar academic inquiry. While reading texts particularly influential in the early and contemporary formation of the field, we will consider such questions as the domestic and international contexts in which Japanese studies has been institutionalized and maintained, and the relationship between "Japan" as object of area studies discourse and "Japan" as represented in American journalism, popular culture, and politics. Interdisciplinarity and team-taught, the course will aim to introduce students to a range of methodologies and approaches developed in historical and critical works, problematizing assumptions in each case. Possibilities for cross-disciplinary research (along lines recently undertaken in areas such as feminist criticism and cultural studies, for example), will also be explored.

For description see Asian Studies 385.

[HIST 693 Problems in Modern Chinese History (also History 493)] Fall. 4 credits. Prerequisite: permission of instructor. S. Cochran.

Conflicting interpretations of Chinese history during the late imperial period and the first half of the twentieth century.

[HIST 694 Problems in Modern Chinese History (also History 498)] Spring. 4 credits. Prerequisite: permission of instructor. S. Cochran.

For description, see HIST 499.

[HIST 695 Early Southeast Asia: Graduate Proseminar] Fall. 4 credits. D. Wyatt.

Introduction to the history of Southeast Asia for graduate students.

[HIST 696 Modern Southeast Asia: Graduate Proseminar] Spring. 4 credits. Not offered 1999-2000. Introduction to the modern history of Southeast Asia for graduate students. Students will be expected to attend the lectures and complete the readings for History 396, and they will meet separately as a group to further explore selected topics.

[HIST 796 Seminar in Southeast Asian History] Spring. 4 credits. Prerequisite: reading knowledge of relevant languages. D. Wyatt.

[HIST 797 Seminar in Japanese Thought] Spring. 4 credits. Prerequisite: reading knowledge of Japanese and permission of instructor. J. V. Koschmann.

Near Eastern History

HIST 206 From Empire to Empire: Palestine under late Ottoman and British Rule, 1799-1948 (also Near Eastern Studies 265)
Fall. 4 credits. M. LeVine.
This course examines the social history of Palestine during the late Ottoman and Mandate periods from a variety of disciplinary perspectives with the goal of helping students better understand the continuities of changes that occurred in the transition from Ottoman to British rule.

HIST 253 Introduction to Islamic Civilization I (also Near Eastern Studies 255, Religious Studies 255)
Spring. 3 credits. D. Powers.
For description see NES 255.

[HIST 254 Islamic History: 600-1258 (also Near Eastern Studies 257 and Religious Studies 257) @ #]
For description, see NES 257.

[HIST 317 Islamic History: The Age of Ibn Khaldun (also Near Eastern Studies 356)
For description, see NES 356.

[HIST 372 Introduction to Islamic Law (also History 652, Near Eastern Studies 351/651, Religious Studies 350) @ #]
For description, see NES 351.

[HIST 461 Seminar in Islamic History 600-750 (also History 671, Near Eastern Studies 451 and 650, and Religious Studies 451) @ #]
For description, see NES 451.

[HIST 652 Introduction to Islamic Law (also History 372, Near Eastern Studies 351/651, Religious Studies 350) @ #]
For description, see NES 351.

For description, see NES 451.

Ancient European History

HIST 151 Introduction to Western Civilization #
Summer and fall. 4 credits. S. Pohl.
A survey of European history from Antiquity to the Renaissance and Reformation. Important themes will include the influence of ancient culture on medieval society, the development of and conflict between secular and ecclesiastical governments, European encounters with the non-Europeans, the culture and role of minority groups within European society, and the roles of women.

HIST 203 War and Diplomacy in Korea
Spring. 4 credits. B. Strauss.
Korea’s challenging location between great powers, its long struggle between independence and outside control, and its tragic division, all make for a singular case study in the history of war and diplomacy. This course will examine that history with particular focus on the Imjin War (1592-1598) and the Korean War (1950-1953). Topics include geopolitics, military tactics and strategy on the Korean peninsula, Admiral Yi Sun-Shin as strategist and tactician, the effect of war on Korean society, and the pattern of Korean relations with China, Japan, Russia (and other northern Asian powers), and the United States.

[HIST 228 Seminar: War and Peace in Greece and Rome
Fall. 3 credits. Not offered 1999-2000. B. Strauss.
A study of war and peace in the ancient Mediterranean world in light of modern theories of international relations. The course will test the validity of modern theories against ancient models and will ask what the ancient experience can contribute to modern theory and practice. Case studies include the Peloponnesian War, the Second Punic War, Alexander’s conquests, and the defense of the Roman Empire.

[HIST 232 Seminar: Eyewitness to War in the Ancient World
A study of ancient soldier-historians who participated in the campaigns about which they later wrote. Topics include historiography, autobiography, propaganda, prose style. Readings include selections from Thucydides, Xenophon, Julius Caesar, Josephus, Ammianus Marcellinus as well as, for comparative purposes, modern soldier-historians.

HIST 265 Ancient Greece from Homer to Alexander the Great #
Spring. 4 credits. Open to freshmen. B. Strauss.
A survey of Greece from the earliest times to the end of the Classical period in the late fourth century B.C. The course focuses on the Greek genius: its causes, its greatness, its defects, and its legacy. The Heroic Age, the city-state, ancient democracy, and the intellectual ferment of the Greek Enlightenment are the main topics of study. Readings in translation from Homer, Aristophanes, Sophocles, Herodotus, Thucydides, Plato, Aristotle, and from the evidence of ancient inscriptions, coins, art, and architecture.

[HIST 266 A History of Rome from Republic to Holy City #
A survey of Rome and its empire from the beginning to late antiquity. This course will explore the formation of Rome’s Mediterranean empire and its political, social and economic consequences; the constitutional and social struggles of the late Republic; the transition from Republic to Principate; society and state under the Caesars, the nature and limits of governing a world empire; the interaction of pagans, Christians and Jews in the Roman world.

[HIST 367 Representations of Women in Ancient Greece and Rome (also Classics 363 and Women’s Studies 363)
For description, see Class 363.

[HIST 452 The Tragedy of Classical Athens, 482-404 B.C. #]
The nature of Athenian democracy, society, and culture in the “golden age” of Athens. The course will examine the influence of Athenian political life on the great tragedies of the age and the influence of tragedy on the Athenians’ conception of their character and history. Readings from Herodotus, Thucydides, Aeschylus, Sophocles, Euripides, Aristophanes, Plato, Aristotle, and Plutarch.

[HIST 453 Crisis of the Greek City-State, 415-336 B.C. #]
The fortunes of the city-state and citizen in an age of uncertainty. The focus is on Athens with some attention paid to the wider Greek world. Topics include the nature of Athenian politics, Athenian society, cultural change, and war between the city-states, crisis as a historical concept, and anthropology and ancient Greece. Readings in translation include Thucydides, Sophocles, Euripides, Aristophanes, Plato, Aristotle, Demostenes, and Xenophon.

[HIST 463 Gender and Politics in the Roman World (also Classics 463 and Women’s Studies 464) #]
For description, see CLASS 463.

[HIST 484 Murder, Warfare and the State: Violence in Europe, 1300-1800
Fall. 4 credits. Permission of instructor. S. Pohl.
An inquiry into forms and attitudes toward violence in late medieval and early modern Europe. Questions to be explored include: How violent was premodern Europe compared to modern Europe? How did the various cultural legitimations of violence change over time? We will examine these questions by analyzing forms of interpersonal violence as well as violence orchestrated by the state, such as warfare and capital punishment.

HIST 469 Equality and Inequality in Ancient Greece (also Classics 469)
Fall. 4 credits. Prerequisite: History 265, Classics 211 or 217, or written permission of the instructor. B. Strauss.
We will examine equality and inequality in Archaic and Classical Greek city-states ca. 650-400 B.C., with an eye toward politics, society and economics, culture, and gender relations. The course will focus on concepts and institutions such as ancient democracy, tyranny, and oligarchy, “middle” ideology, and slavery, as well as theories of equality. All readings in English.
A study of attitudes toward magic, witchcraft, astrology, specters and demons in late medieval and early modern Europe and what they reveal to us about religious beliefs, concepts of community, and gender relations. Special attention will be given to the role the Christian Church claimed in defining the occult: which aspects it legitimated and which it condemned. Other topics include the influence of humanism, the Reformation, and the Scientific Revolution on attitudes toward

We shall also undertake an analysis of the historiographical model which opposes "elite" to "popular" ideas. The course emphasizes close analyses of primary works, including literary and visual sources.

We will look at the impact of the reformation, counter-reformation and wars of religion on aspects of political, social and cultural life in 16th- and 17th-century Europe, exploring shifts in gender relations, the problem of social control, the effect of religious conflict on the power of the state and its contested boundaries with the church, the relationship of elite and popular religion, and the encounter of European missionaries with other cultures. Students will engage with major historiographical interpretations of the period, as well as with the close reading of primary sources.

A seminar designed for underclassmen but open to all students. Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999-2000. R. Weil.

"All the Atlantic Mountains shook," wrote the poet William Blake of the revolutions which toppled regimes across Europe and the Americas at the end of the 18th century. This course will explore the ideas, outcomes and connections among events in America, France, Haiti, and Britain, through literary and philosophical texts: Wordsworth, Rousseau, Jefferson, Paine, Burke, Godwin, Tecqueville, and even Jane Austen.

For description see Early Modern European History.

Enrollment limited to 15 students. Prerequisite: permission of instructor. Not offered 1999-2000. S. Pohl.

A survey of medieval civilization from ca. 500 to ca. 1100 dealing with religious, intellectual, political, and economic developments in Western Europe.

A survey of a medieval civilization from ca. 500 to ca. 1100 dealing with religious, intellectual, political, and economic developments in Western Europe. Special attention will be given to the role the Christian Church claimed in defining the occult: which aspects it legitimated and which it condemned. Other topics include the influence of humanism, the Reformation, and the Scientific Revolution on attitudes toward
to Alberti to Pico, down to the crisis of Italian culture, gender, language, and the role of intellectuals in society. Emphasis will be placed on the close reading of primary sources and on issues of interpretation.

HIST 351 Machiavelli (also Romance Studies 351) #
Spring. 4 credits. J. Najemy.
This course will present Machiavelli in a variety of historical and interpretive contexts. European and Italian politics in the early sixteenth century; the decline of the Florentine republic and the rise of the Medeic principate; Machiavelli's own career in government and his, and the republic's, crisis in 1530; the intellectual traditions of Renaissance humanism, political thought, and the revival of antiquity; vernacular literary currents and popular culture; and the remarkable generation of political figures, writers, and theorists with whom Machiavelli associated and corresponded. Emphasis will be placed on a close reading of the major works (including the letters, The Prince, the Discourses, Mandragola, and selections from The Art of War and the Florentine Histories, all in translation) and a critical examination, in the light of that reading, of some major modern interpretations of Machiavelli.

HIST 361 The Culture of the Renaissance I (also History of Art 350 and Comparative Literature 361) #
An interdisciplinary exploration of some major themes of Renaissance society and culture from the fourteenth to the sixteenth centuries. Through text and works of art we investigate Renaissance discourses of antiquity and authority, education and learning, religion and lay culture, politics, gender and family, love and eros, and cross-cultural encounters.

HIST 364 The Culture of the Renaissance II (also Comparative Literature 362, English 325, Religious Studies 362, Music 390) #
Spring. 4 credits. Open to freshman with permission. C. Kaske, W. Kennedy.
For description, see COM L 362.

HIST 366 Medieval Culture, 400-1150 (also Religious Studies 365) #
Fall. 4 credits. Prerequisite: History 263 or permission of instructor. Not offered 1999-2000. J. J. John.
Intellectual and cultural developments in the age of monasticism, from St. Augustine and St. Benedict to St. Anselm and St. Bernard of Clairvaux.

HIST 368 Marriage and Sexuality in Medieval Europe (also Religious Studies 368, Women's Studies 368) #
Spring. 4 credits. P. Hyams.
Few topics generate heat so readily as gender relations and sexuality. The twin goals are to understand the problem of sexuality up to about 1500. The class will first clarify the church's normative rules of law and theology. Armed with this framework, it will then turn to more specific topics, including homosexuality, prostitution, rape/abduction and sexuality in medieval literature. The goal is to be able to compare the ideal model with the reality, and thus to assess the product the medieval church passed on to Western culture and ourselves. No formal prerequisite, though some prior knowledge of medieval European history is desirable.

HIST 369 The History of Florence in the Time of the Republic, 1250-1530 #
Florentine politics from the communal period through the age of Dante, the rise and decline of the guild republic, the age of civic humanism, and the rise of the Medici to the crisis of the republic in the time of Machiavelli. Social conflicts, economic structures, guilds, family history, and political and historical ideas are considered in the context of the emergence and transformation of republican government.

HIST 377 Gender in Early Modern Europe (also Women's Studies) #
An inquiry into how masculinity and femininity were defined in early modern Europe. Questions to be explored include: What purpose did gender distinctions serve in this particular society? To what extent were men and women able to shape and redefine the meaning of their gender? How was their ability to do so affected by such events as the Reformation and the French Revolution?

HIST 405 Population and History
For description, see Comparative History.

HIST 408 Feudalism and Chivalry: Secular Culture in Medieval France, 1000-1300 #
Fall. 4 credits. No prerequisites; History 263 or 264 would help. Not offered 1999-2000. P. Hyams.
An upper-level seminar on the main currents of noble lay culture in France, which led European fashions in love, warfare, entertainment, and environment through most of the period. There will be heavy emphasis on contemporary sources (in English), including lively and complete readings from epic literature (the Song of Roland), lives, and chronicles.

HIST 409 Seminar on Work in Europe and America
For description see Comparative History.

HIST 427 Power and Society in Early Medieval Europe and Japan
Spring. 4 credits. Prerequisite: a course in medieval European or Japanese historical studies, or permission of instructor. Not offered 1999-2000. P. Hyams.
This seminar will focus on structures, processes, and practices of society in early medieval Europe and Japan. It will provide a forum for discussion of the ways in which, in some very different societies, Europeans and Japanese handled power. We will also be interested in comparing historiographical methodologies employed and issues considered by historians of these societies. The nature of power and authority and characteristic organizational practices, including kingship, land tenure, status, systems, and religious and military structures; the formation of ideology through art, ritual, literature, and law; and various means of linking center and periphery in these societies will be topics for discussion.

HIST 436 Conflict Resolution in Medieval Europe #
Spring. 4 credits. P. Hyams.
This seminar concentrates on a time (late 9th-13th centuries) when much of Europe lacked formal systems of justice, and so handled questions of social control quite largely by extra-legal means. Its subject is in one sense political history upside-down, as viewed by individuals rather than their rulers. We examine ways in which anthropology and some recent approaches to law can assist the readings will be primarily anthropology, partly translated medieval accounts of actual conflicts, with samples of recent interpretation. The topics covered should be of interest to law students and majors in anthropology and other modern social sciences.

HIST 446 Law, Crime and Society in Europe, 1400-1700 #
Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999-2000. S. Pohl.
This comparative study focuses on Germany, England, France, and Italy and concentrates mainly on the social and legal treatment of crimes of violence. Throughout the course, we shall consider the differences and similarities between English common law and continental legal systems. Major issues to be covered include the role of criminal justice, the fate of customary methods of conflict resolution in a time of increasing legal centralization, and the relationship between cultural and legal change. We shall approach these issues by examining, among other things, the development of criminal procedure, the role of lawyers, contested notions of criminal responsibility, and the self-presentation of defendants. The course emphasizes close readings of primary works, including trial documents and literary sources.

HIST 447 Crusaders and Chroniclers #
An intensive reading seminar offering a natural progression from History 259 The Crusades. It will examine contemporary accounts of the crusading movement in English translation. The twin goals are to follow select themes of crusading history to a deeper level than is possible in History 259 and to study medieval historiography through whole chronicles and other primary sources.
[HIST 451] Lord and Peasant in Europe: A Seminar in Social History #

[HIST 468] The Representation of Eros in the Italian Renaissance #

[HIST 472] Politics and Culture in 18th-Century England #

Between 1660 and 1800 England experienced imperial and economic expansion, the Enlightenment, and the threat of Revolution abroad and at home. How in this context did people interpret and imagine the nature of the social order, political authority, and the family? We will consider the changing and fiercely contested notions of property, politeness, crime and punishment, sexuality, Empire, slavery and the market.

[HIST 481] The English Revolution #

Between 1640 and 1660, England experienced two decades of civil war and revolution and embarked on a fascinating series of attempts to reorganize political and religious life. Women and the lower classes emerged as actors on the political stage, radical religious sects flourished, and the nature of authority was questioned in both the family and the state. This course will explore the political, cultural, religious and social dimensions of the English Revolution, using mostly primary sources.

[HIST 496] Theorizing the Public Sphere (also Comparative Literature 496 and German Studies 496)
For description, see GERST 496.

[HIST 651] Old English Literature in Its Historical Context (also English 710)

This graduate course, cross-listed with English 710, might equally be known as "Anglo-Saxon England: History and Literary Context." It studies the written sources for major questions of Anglo-Saxon history in their literary and cultural context. It concentrates on important texts extant in both Latin and Old English. Comparison can illuminate the resources and intentions of writers, compilers, and copyists, the literary and linguistic culture of England, and the ways in which historians might most fruitfully study such texts. Bede's Ecclesiastical History, and Battle of Maldon and Aelfric's Colloquies, and selections from the Anglo-Saxon chronicles, laws, homilies and wisdom literature are all likely to come under scrutiny. One goal is to reclaim for European religious history a corpus of material that historians neglect because it is in Old English.

[HIST 653] England—Britain—Europe in the Middle Ages

This graduate seminar tentatively explores the coming move from the study of medieval English history to that of the British Isles and its inhabitants within the wider context of Europe and Western Christendom. Readings will mostly be representative original sources. The precise texts and topics studied will depend on the interests (and especially future teaching plans) of participants, but will certainly allow for a critical examination of existing literature on the general and cultural history of England, Scotland, Ireland and Wales.

[HIST 663] Graduate Seminar in Renaissance History
Fall. 4 credits. Open to undergraduates with permission of instructor. J. Najemy.

[HIST 664-665] Seminar in Latin Paleography

[HIST 666] Seminar in Medieval History

[HIST 669] Politics, Power, and Culture in Early Modern England

An inquiry into how the ruling class ruled, and what that meant to and for everyone else. Topics include: the invention of the state, the relationship of central and local power, clientage and corruption, the construction of categories of “public” and “private,” representations of monarch and resistance, court culture, the social interpretations of the English Revolution and their critics. Focus is on historiography and methodology, with some engagement with primary sources.

Modern European History

[HIST 152] Introduction to Western Civilization (1600 to the end of World War II) #
Spring. 4 credits. R. L. Moore and M. Steinberg.

This course offers a comparative perspective on the development of modern states, societies, and cultures in Europe and North America. Religious and scientific revolutions in early modern Europe; European expansion and conquest; Enlightenment and revolution; liberalism, capitalism, and communism; the politics of race, slavery, and the new imperialism; the World Wars and the Holocaust; the Cold War; the modern and the post-modern in European and American culture.

[HIST 220] The French Experience: An Introduction (also French Literature 224)

An examination of French society culture and institutions. What has made French culture so distinctive? Its literature and its revolutions, its gastronomy and fashion, its painting, cathedrals and cinemas. Looking attentively at texts, images and contexts from selected moments in the seventeenth, eighteenth, nineteenth, and twentieth centuries, we will attempt to unravel some of the defining enigmas of the French experience. Two lectures/week in English and one section (one section conducted in English, one in French). Readings available both in French and English translation.

[HIST 252] Russian History to 1600 #
Fall. 4 credits. W. Pintner.

The origin and development of the fundamental social, political, economic, and cultural institutions that have determined the nature of contemporary Russian society.

[HIST 267] History of Zionism and the Birth of Israel (also Jewish Studies 280; Near Eastern Studies 290)

This course will examine the history of Zionism as an ideology and political movement from its origins in the nineteenth century to the present. Attention will be paid to situating Zionism within the context of modern Jewish, European, and Middle Eastern History. Topics will include: the ideological foundations of Zionism; the role of Theodor Herzl and the rise of political Zionism; the Balfour Declaration; the development of the Yishuv; Zionism as a cultural identity for Diaspora Jewry; the British mandate; the Arab-Zionist encounter, Zionist responses to the Holocaust, and Zionism and contemporary Israeli society.

[HIST 283] Europe in the Technological Age

An introduction to politics, culture, and technology in contemporary Europe. In the sections on politics a survey of party systems and their interactions with social movements is followed by examinations of post-Communist constitution and political structures, Germany, and the European Union. The section on European culture pays special attention to the European press and electronic media as shapers and reflections of cultural values. A section on the struggle over the control of the past deals with tensions and conflicts in European national memories. In the section on Nationalism and ethnicity, political and cultural approaches are combined in consideration of the wars in former Yugoslavia as well as less violent conflicts between nationalists and members of ethnic minorities elsewhere in Europe. The section on technology deals with the design of products and processes as a cultural phenomenon, making cross-national comparisons of some of the social, cultural, and institutional influences on engineering performance.

Fall. 4 credits. Not offered 1999-2000. V. Caron.

This course will examine the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. We will examine the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics will include: the impact of the Spanish Expulsion of 1492, religious, intellectual, and socio-economic dimensions of the dispersion, including Lurianic Kabbalah and the messianic movement of Shabbetai Zevi, the establishment of Jewish communities in the West; the end of the "Golden Age" of Polish Jewry and the rise of Hasidism; the changing economic and political role of Jews in the 17th and 18th centuries; and the impact of the Enlightenment.
An introductory lecture course spanning the lifetime of the USSR (1917-1991), but covering the last years of the Russian Empire and the first years of the post-communist present as well. Geographically, it focuses on the Russian heartland and the non-Russian areas of the Soviet Union. The course will explore the roots and consequences of the Russian Revolution; the nature and evolution of Leninism, Stalinism and Soviet communism; the entrenchment of reform of the post-Stalinist system; and the legacy of communism for the region’s new regimes. Students are introduced to a wide variety of historical materials, including documents, essays, memoirs, literature and film.

HIST 291 Modern European Jewish History, 1789-1948 (also Jewish Studies 252)
Fall. 4 credits. V. Caron.
Jewish life in Europe experienced a profound transformation as a result of the process of Jewish emancipation which began at the end of the eighteenth century. While emancipation offered Jews unprecedented social, economic, and political opportunities, it also posed serious challenges to traditional Jewish life and values by making available new avenues of integration. This course will examine the ways in which Jewish and non-Jewish society responded to these new developments from the eighteenth century Enlightenment to the post-World War II era. Topics will include Jewish responses to emancipation, including assimilation and new varieties of religious accommodation; the development of modern anti-semitism; the rise of Zionism and the creation of the state of Israel; the modernization of Eastern European Jewry; the impact of mass immigration; and the Nazi era.

HIST 355 The Old Regime: France in the Seventeenth and Eighteenth Centuries
Fall. 4 credits. S. Kaplan.
A systematic examination of the social structure, economic life, political organization, and collective mentalities of a society that shaped all others in its time and then, brutally and irreversibly, began to age. France, in European perspective, from the wars of religion through the age of Voltaire.

HIST 356 The Era of the French Revolution and Napoleon
S. Kaplan.
A study of the failure of the traditional system, its dismantling and replacement in France, and the international consequences. Focus will be on the meaning of the revolutionary experience, the tension between the desires to destroy and to create, and the implications of the Revolution for the modern world.

HIST 357 Survey of German History, 1648–1890
Fall. 4 credits. Open to freshmen with permission of instructor. I. Hull.
An examination of the social, political, and intellectual, and diplomatic history of the German states from the devastation of the Thirty Years’ War, through absolutism, the bourgeois revolutions of 1848, the struggle for unification, to the beginning of the modern industrial state.

HIST 358 Survey of German History, 1890 to the Present
Spring. 4 credits. Open to freshmen with permission of instructor. I. Hull.
An examination of the “German problem,” that is the intellectual, political, economic and other causes of modern Germany’s extreme violence and volatility from 1890 through 1945, and of the consequences thereof on the divided Germany of 1945 to 1989, and on the new German state since 1990.

HIST 362 European Cultural History, 1750–1870 (also Comparative Literature 352)
M. Steinberg.
The course will focus on the making of middle-class culture, society, and imagination from the Enlightenment through the French Second Empire. There will be three units in period and thematic foci: Germany in the period of Enlightenment, emancipation, and the burgeoning of national consciousness; questions of race, gender, and sexuality in early 19th-century England; modernism and urbanism in Second Empire France. Primary readings (including novels, paintings, and operas) will be considered along with contemporary historical and theoretical readings.

HIST 370 History of the Holocaust (also Jewish Studies 353)
V. Caron.
This course will analyze the meaning of the Holocaust from three vantage points: that of European history; that of Jewish history; and that of those states and religious institutions that shared responsibility by having stood by in silence. Topics include: the evolution of modern anti-semitism; the role of anti-semitism in the Nazi ideology and program; the bureaucratization of death; Jewish life in ghettos and concentration camps; the fate of Jews in occupied Europe and the question of collaboration; Jewish political behavior under duress; the responses of the Western allies and the Churches; contemporary interpretations of the Holocaust and the meaning of evil.

HIST 379 The First World War: Causes, Conduct, Consequences
Fall. 4 credits. Open to freshmen with permission of instructor. I. Hull.
This course examines the long-term and immediate political, social, and cultural causes of World War I, its catastrophic prosecution, and its revolutionary consequences. Recurring themes are: the building of nation-states, the diplomatic and military systems of the nineteenth and twentieth centuries, mass mobilization, the development of mass violence, and the emergence of millenarian visions of the future.

HIST 380 Social History of Western Technology
J. Weiss.
For description see History of Science.

HIST 383 Europe, 1900–1945
J. Weiss.
An investigation of the major developments in European politics between 1900 and the end of the Second World War. Emphasis on the rise and fall of democratic political systems and their alternatives. Topics include the reorientation of liberalism and socialism, the transforming effects of war and depression, the dynamics and diplomacy of fascism, the European response to economic and ideological influence of America and the Soviet Union, the changes in Eastern Europe during the interwar years, and the interaction between politics and social structure.

HIST 384 Europe, 1945–1968
Fall. 4 credits. J. Weiss.
A political and social history of Europe between the fall of fascism and the political crises of 1968. Emphasis on the comparative study of the elaboration of democratic institutions and ideologies. Topics include the origins and course of the Cold War in Western and Eastern Europe, Gauilism and Christian Democracy, the emergence of welfare states, liberal-democratic and Communist culture, the end of colonial empires in the West, opposition movements in Eastern Europe, and the general upheaval of 1968.

Spring. 4 credits. J. Weiss.
The major political developments in Europe between the upheavals of 1968 and the collapse of Communist regimes. Topics will include the effects of economic turmoil in 1973–1974; the response to terrorism; regionalist movements; new ethnic minorities and their opponents; Socialist governments in southern Europe; the arrival of democracy in Spain, Portugal, and Greece; new dynamics in the European Community; the rise of Thatcherism; the war scare of the 1980s; and the final phase of the Cold War.

HIST 405 Population and History
S. Kaplan.
For description, see Comparative History.

HIST 406 The People in the French Revolution
S. Kaplan.
The Revolution was nothing if not a mass event. Mass action played a critical part in shaping its course. The “re-invention” of France affected the population down to each village and demanded decisions from virtually every adult. This course will focus on the people as actors: their collective memory, their ideologies, their repertoire of intervention, the formation of a popular political culture. It will explore the relationships between the people (in their multiple incarnations) and the revolutionary elites who sought to articulate and appropriate the Revolution. A major theme will be the tension
between the ambitions to achieve liberty and equality."

**[HIST 409 Seminar on Work in Europe and America](#)**

For description see Comparative History.

**[HIST 417 History of Jews in Modern France](#)**

(Also Jewish Studies 446; French Literature 413)

Spring. 4 credits. Prerequisite: permission of instructor. Not offered 1999-2000. V. Caron.

This course will explore the integration of Jews into French society from the French Revolution to the present. Topics will include: the debate over Jewish emancipation during the Enlightenment, the French Revolution, and the Napoleonic era; the processes of religious and social assimilation, the rise of antisemitism and the Dreyfus Affair; Jewish responses to antisemitism, the immigrant challenge and refugee crisis of the 1930's; the Vichy era and Jewish resistance during World War II, and the reconstruction of the French Jewish community since 1945.

**[HIST 435 Collective Action and Politics in Modern Europe](#)**

For description, see GOVT 435.

**[HIST 441 Seminar in the European Enlightenment](#)**

**[HIST 451 Lord and Peasant in Europe: A Seminar in Social History](#)**

**[HIST 456 Opera, History, Politics, Gender (also WOMNS 454, COM L 455, S HUM 459, ITAL 456, MUSIC 474)](#)**

Spring. 4 credits. M. Steinberg and S. Stewart.

The will to social order and the desire to transcend it: this basic conflict in modern culture was negotiated in many places, nowhere more dramatically than in the world of opera. Body and mind, the visceral and the mannered, authority and subversion: these themes are integral to operatic works and culture. This seminar will examine works and contexts of Mozart, Beethoven, Wagner, Verdi, and Puccini alongside issues of German and Italian nationalism, liberalism, the continuities of patriarchy, and patterns of cultural identity and cultural difference in modern Europe. We will analyze opera videos in class, and if possible we will arrange an excursion to the Metropolitan Opera in New York City. No technical competence is required, but the seminar should be most interesting to those seeking an upper-level course in cultural history and cultural studies.

**[HIST 457 Seminar in European Fascism](#)**

**[HIST 459 Antisemitism and the Crisis of Modernity: From the Enlightenment to the Holocaust (also Jewish Studies 454)](#)**

This course will explore the role of antisemitism in nineteenth and twentieth century European ideological, political and socioeconomic developments. Attention will be paid to the way in which antisemitism illuminates the underside of European history, allowing us to see how anti-Jewish intolerance and prejudice became embedded in the worldviews of significant sectors of the European population, culminating in the Holocaust. Topics will include: the Christian roots of antisemitism and the extent to which modern antisemitism marks a break with the medieval past; the politicization of antisemitism by both Left and Right; the role of antisemitism in socioeconomic conflicts linked to the rise of capitalism; Jewish responses to antisemitism; antisemitism in the nazi and Fascist revolutions; and contemporary interpretations of antisemitism.

**[HIST 462 Popular Culture in European History](#)**

Fall. 4 credits. S. L. Kaplan.

An examination of the origins, practices and meanings of popular culture throughout Europe from the Middle Ages to the era of the French Revolution. After considering the various ways in which "culture" and "popular" can be construed, the seminar will focus on the specific manifestations of popular culture, its various languages and genres, and its complex relations with the dominant/elite cultures.

**[HIST 467 Seminar in Modern European Political History](#)**

Fall. 4 credits. Permission of instructor required. J. Weiss.

Topic for 1999-2000: "The Year 1968 as Post War Europe's Turning Point. The course will examine the thought and actions that culminated in the upheavals of 1968. Critical thought, social movements, and political shifts brought fundamental challenges to governments and institutions in both Western and Eastern Europe. Was this the end of one postwar era and the beginning of another?"

**[HIST 474 Topics in Modern European Intellectual and Cultural History (also COML 474)](#)**

Fall. 4 credits. Prerequisite: permission of instructor. D. LaCapra.

Topic for 1999-2000: "History and Trauma. The course will investigate the role of traumatic events in history and the attempt in various genres (especially historiography) to "represent" or come to terms with them. The focus will be on the nazi genocide, but comparable questions will also be treated (notably with respect to the problem of slavery). Assignments include works of Tadeusz Borowski, Cathy Caruth, Frantz Fanon, Saul Friedlander, Raul Hilberg, Toni Morrison, and Agnieszka. There will also be viewings of testimonies and films, including Part I of Claude Lanzmann's Shoah."

**[HIST 477 Seminar on the Politics of the Enlightenment](#)**

An inquiry into the historical origins of European (especially French) political, social, and economic thought, beginning in the 1680s, at the zenith of Louis XIV's absolutism, and culminating in the French Revolution a century later. Emphasis is on the relation of criticism and theory to actual social, economic, religious, and political conditions. An effort is made to assess the impact of enlightened thought on the eighteenth-century world and to weigh its implications for modern political discourse. Readings in translation from such authors as Bayle, Montesquieu, Voltaire, Rousseau, Diderot, and others as well as from modern scholarly and polemical literature.

**[HIST 478 Stalinism As Civilization](#)**

The collapse of the Soviet Union provides an opportunity to reconsider the entire Stalinist experience, both on the basis of newly accessible documents and from fresh perspectives. This course approaches Stalinism as an entire system, examining the links between high politics, foreign relations, culture and everyday political strategies. Readings will include historical studies as well as newly available primary materials. Knowledge of Russian not required.

**[HIST 488 Seminar in Late Nineteenth-Century European Imperialism](#)**

This seminar examines the theories of the "second wave" of European imperialism, and then compares the imperial experiences of Great Britain, France, and Germany. It focuses on the imperial powers, and on the (often unintended) consequences of their colonial involvement centuries ago. Of special concern are the transformation of nationalism into imperialism, and the effects on the European powers themselves of their experiences of applied racism and the commission of mass violence in their colonies.

**[HIST 505 Graduate Seminar in European Cultural and Intellectual History](#)**

The seminar will function as a companion course to History 363. Admission is open to graduate students, but, by application to the instructor, to seniors. All participants will be required to attend the lectures in History 363. The seminar readings will focus on the primary readings in History 363 (Nietzsche, Wagner, Eliot, Freud) and will add to them literary and theoretical texts on the themes of subjectivity, ideology, and psychoanalysis.

**[HIST 635 The Gates to Modernity: From Karlsbad to the 1848 Revolution (also German Studies 635)](#)**

For description, see GER ST 635.

**[HIST 661 Graduate Seminar in Twentieth-Century German History](#)**

**[HIST 672 Seminar in European Intellectual History](#)**

Fall. 4 credits. D. LaCapra.

**[HIST 673 Seminar in European Intellectual History](#)**

Spring. 4 credits. D. LaCapra.
HIST 674 Graduate Seminar in German History, 1770–1918

HIST 675 After the Divide: German Critical Theory of the Seventeens and Eighties (also Comparative Literature 675 and German Studies 675)
For description, see GER ST 675.

HIST 678 Seminar in Modern European Social History

HIST 750 European History Colloquium
Fall and spring. 4 credits, each term. Kaplan, Caron (fall); Weiss, Caron (spring).
A research colloquium designed for European history graduate students. The colloquium will offer a forum for students to present papers and to discuss the work of visiting scholars.

Honors and Research Courses
Note: History 301–302 are not regular courses for which students may sign up at will. They are personal arrangements between an instructor and a particular student. Students must first gain the consent of a particular instructor to work with them.

HIST 301 Supervised Reading
Fall or spring. 2 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 302 Supervised Research
Fall or spring. 3 or 4 credits. Open only to upperclass students. Prerequisite: permission of instructor. Staff.

HIST 400 Honors Proseminar
Fall. 4 credits. Limited to 14 students. For prospective honors candidates in history. Prerequisite: permission of a member of the Honors Committee is required to register. M. Kammen.
An exploration of major approaches to historical inquiry, analysis, and presentation. Ways of thinking about history along with research methods and organization of the results will be considered by reading and discussing a variety of historical works. Substantive readings will be drawn from several time periods and diverse geographical areas. There will be one short paper during the semester, and a longer final paper which explores the work of a major historian or school of historical writing.

HIST 401 Honors Guidance
Fall or spring. 4 credits. Prerequisites: History 400 and permission of instructor. Staff.

HIST 402 Honors Research
Fall or spring. 4 credits. Prerequisites: History 400 and permission of instructor. Staff.

HIST 703–704 Supervised Reading
703, fall; 704, spring. 4 credits each term. Limited to graduate students. Prerequisite: permission of instructor. Staff.

HIST 709 Introduction to the Graduate Study of History
Fall. 4 credits. Required of all first-year graduate students. T. Borstelmann, J. V. Koschinmann.
The course is designed to introduce entering graduate students to crucial issues and problems in historical methodology that cut across various areas of specialization.

HISTORY OF ART
L. L. Meixner, chair; R. G. Calkins, director of graduate studies; J. E. Bernstock, director of undergraduate studies; P. J. Kuniholm, C. Lazzaro, K. McGowan, A. Pan, A. Ramage, St. Reiss.
The Department of the History of Art provides a broad range of introductory and advanced courses in Western (European and American) and non-Western art (East and Southeast Asian, African), from antiquity to the present.

The Major
Department majors acquire a broad understanding of the history of art in several chronological and geographical areas: ancient, medieval, Renaissance, Baroque, modern (Europe and U.S.A.), Southeast Asia, China, Japan, and Africa. Additionally, majors practice a range of art historical methods and interpretive strategies, including connoisseurship, dendrochronology, feminism, iconography, semiotics, and social history. Majors are encouraged to locate the history of art within allied humanities fields and the applied arts by taking courses in history, literature, history of architecture, and fine arts. The study of foreign languages is encouraged strongly.

Requirements for the Major
Prospective majors should consult the director of undergraduate studies. Students wishing to major in the history of art should complete two courses at Cornell in the department by the end of their sophomore year. One of the two courses required for entry into the major must be at the 200-level, and one must emphasize material predominantly before 1800 or outside Europe/U.S.A. These two courses are prerequisites for the major and a grade of C or above is required for admission; courses must be taken for a letter grade. These courses do count toward the total 44 credits. The major in the history of art requires 44 credits, 30 at the 300-level or above. The core requirements: proseminar, one 400-level area seminar; two courses in art outside Europe/U.S.A., three courses in art predating 1800 (ancient, medieval, or Renaissance/Baroque). Majors must choose at least two courses from different categories. In addition to the 44 credits, majors are required to take two courses, approved by their advisors, in areas related to the history of art.

Hons
To become a candidate for the degree of Bachelor of Arts with honors in the history of art, a student must have a cumulative average of B+ for all courses taken in the department and in all arts and sciences courses. Application to write an honors thesis should be made to the director of undergraduate studies during the second term of the junior year. The application must include a summary of the proposed project, an endorsement by a faculty sponsor, and a copy of the student's transcript. In the senior year the honors candidate will include in his/her course load, History of Art 600 and 601. These courses address the research and writing of the senior thesis under the direction of the student's project adviser.

Course Numbering System
100-level courses are all freshman writing seminars.
200-level courses are introductions to the major subdivisions of Western art and art outside the West.
300-level courses are more specialized, and some have the introductory course in the appropriate area as a prerequisite. Freshmen are advised to take the introductory courses unless they already have substantial background in the history of art.
400-level courses are seminars primarily for advanced undergraduates and graduate students.
500-level courses are seminars primarily for graduate students.

First-Year Writing Seminars
For First-Year Writing Seminar offerings in the History of Art, see the John S. Knight Writing Program's special brochure. These courses may be used as freshman electives but not to satisfy the distribution requirement.

Courses
ART H 200 Art, Archaeology and Analysis (also Architecture 285, MS&E 285, Engineering 185, Geology 200, Physics 200)
Spring. 3 credits. R. Kay.
For description see Geology 200.

ART H 202 Survey of European Art: Renaissance to Modern #
Summer only. 3 credits. Staff.
The major traditions and movements in western European art from the Renaissance to the Modern period. Painting, sculpture, and architecture with an emphasis on painting.

ART H 220 Introduction to Art History: The Classical World (also Classics 220) #
Fall. 4 credits. Each student must enroll in a section. A. Ramage.
An overview of the art and archaeology of the Greek and Roman world. The sculpture, vase painting, and architecture of the ancient Greeks from the Geometric period through the Hellenistic, and the art of the Romans from the early Republic to the time of Constantine the Great.

[ART H 221 Minoan-Mycenaean Art and Archaeology (also Classics 221 and Archaeology 221) #
For description, see Classics 221.]

[ART H 224 Archaeology in Action I (also Classics 232 and Archaeology 224) #
ART H 225 Archaeology in Action II (also Classics 233 and Archaeology 233) #
P. I. Kuniholm.
Objects from the Classical, Hellenistic, and Roman periods are "dug" out of Cornell basements, identified, cleaned, restored, catalogued, and photographed and are considered in their appropriate historic, artistic, and cultural contexts.

ART H 230 Introduction to Art History: Monuments of Medieval Art (also Religious Studies 230) #
Spring. 4 credits. Each student must enroll in a section. J. Coleman.
An introduction to the approaches to art history through a study of selected works of art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

ART H 245 Introduction to Art History: Renaissance and Baroque Art #
Fall. 4 credits. Each student must enroll in a section. C. Lazzaro.
A survey of major works of European painting, sculpture, and architecture from 1400 to 1700. The focus is on preeminent artists, workshop methods, style, meaning, patronage, and the function of art in a range of social contexts. The course also covers the methods of art history currently practiced in Renaissance and Baroque studies. Weekly section meetings are required.

ART H 260 Introduction to Art History: The Modern Era
Spring. 4 credits. Not open to students who have taken History of Art 261. Each student must enroll in a section. J. F. Bernstock.
A discussion of the most important developments in art from 1780 to the present. The emphasis is on major movements and artists such as Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol).

ART H 261 Introduction to Art History: Modern Art
An introduction to early modern art as it developed between the French Revolution and World War I. Both European and American movements are examined, including Romanticism, Impressionism, and Cubism. Units are organized around central figures such as Mary Cassatt, Edgar Degas, Thomas Eakins, and Vincent van Gogh. Lectures are supplemented with discussions of methods of inquiry, including social history and feminism, fundamental to interpreting works of art.

ART H 280 Introduction to Art History: Approaches to Asian Art @ #
Arranged according to selective focus and emphasis rather than broad chronological survey, this course introduces students to the varied responses of the Asian artist in diverse social, political, and historical contexts. Indian miniature paintings, Japanese prints, high-fired ceramics from Thailand and Vietnam, Indonesian textiles and jewelry, Javanese shadow-puppet theater, and Balinese ritual and performance traditions will be explored. A number of class sessions will meet in the Herbert F. Johnson Museum of Art.

ART H 309 Dendrochronology of the Aegean (also Classics 309 and Archaeology 309)
Fall and spring. 4 credits. Prerequisite: permission of instructor. Limited to 10 students. P. I. Kuniholm.
Participation in a research project of dating modern and ancient tree-ring samples from the Aegean and Mediterranean. Supervised reading and laboratory work. A possibility exists for summer fieldwork in Greece and Turkey.

ART H 319 Art in the Daily Life of Greece and Rome (also Classics 319) #
A. Ramage.
Classical art is well reflected in the small items of daily life that are neglected frequently in the standard histories. This course looks at the making and decorating of household items in Greece and Rome in a variety of materials from clay to metal. The links between the commissions of the state and the tastes of the people are examined through their material culture.

ART H 320 The Archaeology of Classical Greece (also Classics 320) #
A. Ramage.
The visual arts in the service of the first world state. The course starts with the architecture, painting, and sculpture of the Etruscan and Republican period but concentrates on monuments of the Imperial era in Italy and the provinces until the time of Constantine. Art made for private patrons is considered, along with the official presentations of the emperors.

ART H 322 Arts of the Roman Empire (also Classics 350) #
A. Ramage.
The varied issues of Greek cities and the Roman state are examined. Coins are considered as art objects as well as economic and historical documents. The changes in design, value, and metals from the origins of coinage to the late Roman period are studied. Lectures, student presentations, and work with the actual examples.

ART H 326 Greek and Roman Coins (also Classics 327) #
Spring. 4 credits. A. Ramage.
A survey of medieval architecture from the Early Christian period to the Late Gothic (A.D. 500–1500). Considerable emphasis will be placed on the development of structural systems and upon the form, function, and meaning of important medieval buildings.

ART H 327 Greek and Roman Coins (also Classics 327) #
R. G. Calkins.
Sculpture, painting, and architecture in the period from the late antique through the Carolingian era (A.D. 300–900). The evolution of the early Byzantine tradition will also be considered.

ART H 332 Architecture in the Middle Ages (also Architecture 382, Religious Studies 332) #
R. G. Calkins.
An examination of Italian art, beginning with twelfth-century Sicily, and with emphasis on thirteenth- and fourteenth-century sculpture, painting, and to a lesser extent, architecture, which includes the works of Duccio, Giotto, the Pisani, and Lorenzetti as the prelude to the Italian Renaissance.

ART H 333 Early Medieval Art and Architecture #
R. G. Calkins.
An introduction to the approaches to art history through a study of selected works of art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

ART H 334 Gothic Art and Architecture (also Religious Studies 334) #
R. G. Calkins.
A discussion of the most important developments in art from 1780 to the present. The emphasis is on major movements and artists such as Romanticism (Delacroix), Realism (Courbet), Impressionism (Monet), Post-Impressionism (van Gogh), Cubism (Picasso), Fauvism (Matisse), Surrealism (Miro), Abstract Expressionism (Pollock), and Pop Art (Warhol).

ART H 335 Greek and Roman Coins (also Classics 327) #
R. G. Calkins.
Sculpture, painting, and architecture in the period from the late antique through the Carolingian era (A.D. 300–900). The evolution of the early Byzantine tradition will also be considered.

ART H 336 Prelude to the Italian Renaissance (also Religious Studies 336)
Fall. 4 credits. R. G. Calkins.
An examination of Italian art, beginning with twelfth-century Sicily, and with emphasis on thirteenth- and fourteenth-century sculpture, painting, and to a lesser extent, architecture, which includes the works of Duccio, Giotto, the Pisani, and Lorenzetti as the prelude to the Italian Renaissance.

ART H 337 The Medieval Illuminated Book (also Religious Studies 337) #
R. G. Calkins.
A discussion of the most important developments in art from the Middle Ages: architecture, sculpture, painting, manuscript illumination, metalwork, and ivory.

ART H 338 Greek and Roman Coins (also Classics 327) #
R. G. Calkins.
Sculpture, painting, and architecture in the period from the late antique through the Carolingian era (A.D. 300–900). The evolution of the early Byzantine tradition will also be considered.
ART H 341 Flemish Painting (also Religious Studies 342) #
Spring. 4 credits. R. G. Calkins.
An examination of Flemish painting in the 15th century, with emphasis on the work of Robert Campin, Jan van Eyck, Roger van der Weyden, Hugo van der Goes, Hans Memling, and ending with Jerome Bosch. Issues of the social, economic, and devotional context will be discussed as they pertain to the particular development of Northern Realism and Symbolism during this century.

ART H 343 Italian Renaissance of the Fifteenth Century #
C. Lazzaro.
This course examines the artistic production of the fifteenth century in its social and cultural context. The new style, which was developed in Florence in the early century and spread to other cities in Italy, is examined in the context of the newly educated class, the increased wealth of the mercantile, urban class, and the new role of family in society.

ART H 344 Italian Renaissance of the Sixteenth Century: Leonardo, Michelangelo, and Raphael #
C. Lazzaro.
This course focuses on the three great artists of the late fifteenth and sixteenth century, Leonardo, Michelangelo, and Raphael. It examines each as a thinker as well as an artist, through their own writings together with their works of painting, sculpture, and architecture. It also analyses the contemporary constructions of the artist as genius and as courtier in the biographies and other writings about them.

ART H 345 Rome, Florence, and Venice in the Sixteenth Century #
Spring. 4 credits. C. Lazzaro.
This course examines the distinctive cultural identities of Rome, Florence, and Venice, and how art, architecture, and urban planning served to create the myths and self-images of these cities, their rulers, and society. Topics include the centers of power, relationship of church and state, and private patronage and collections.

ART H 348 Renaissance Art in Northern Europe: The Sixteenth Century #
S. Reiss.
This course will examine the painting, graphic arts, and sculpture of Northern Europe in the sixteenth century. Principal emphasis will be on art produced in the Netherlands and Germany. Topics to be considered include patronage and artists in different regions of Northern Europe, the importance of sixteenth-century traditions, the impact of Italian art, and the development of specifically northern forms of artistic expression in religious and secular art, including landscape, portraiture, and genre painting. Among the themes we will explore are constructions of gender and representations of women in Northern Renaissance art, attitudes to peasants and the urban lower classes, the impact of the Protestant Reformation and iconoclasm, and the development of the art market in the North. Artists to be considered include Bosch, Bruegel, Dürer, and Grünewald.

ART H 350 The Culture of the Renaissance I (also History 361 and Comparative Literature 361) #
C. Lazzaro, J. M. Najemy.

ART H 351 The Culture of the Renaissance II (also Comparative Literature 362, History 364, Music 390, Religious Studies 362, English 325) #
Spring. 4 credits. W. J. Kennedy, C. Kaske.
For description, see COM L 362.

ART H 353 Art and Death in Europe: 1250–1600 #
S. Reiss.
This course will explore rituals, images, and monuments associated with death and dying in late medieval and early modern Europe. Topics to be considered include cultural attitudes towards death, the impact of the Black Death, the mortis mortuus, the relation between death and eroticism, funeral rituals, and, especially, tomb sculpture and mortuary structures in Italy, France, the Netherlands, Germany, England, and Spain.

ART H 355 Art as Spectacle: The Italian Baroque (also Religious Studies 352) #
C. Lazzaro.

ART H 358 Religion and Images Across the Early Modern World (also Religious Studies 358) #
C. Lazzaro.

ART H 360 Painting and Everyday Life in Nineteenth-Century America (also American Studies 360) #
L. L. Meixner.
Nineteenth-century American painters often constructed images of "exceptionalism," DeTocqueville's term for the social harmony and material abundance he considered unique to the New World. Embedded in these icons of national cohesion, however, were signs of race, class, and political conflict that we will decode through interdisciplinary methods. Our topical units include New England portraiture and commodity, Hudson River landscape and corporate (railroad) patronage, images of African-Americans and Reconstruction, images of Native Americans, the West, and Manifest Destiny. Through these, we will challenge the assumption that American art celebrated democracy, and consider more complex and conflicting "lives." Our key artists include John S. Copley, George Caleb Bingham, Winslow Homer, Mary Cassatt, and Thomas Eakins. Our readings include art historical texts and others by Poe, Emerson, and Whitman.

ART H 361 The Social History of Nineteenth-Century European Painting #
L. L. Meixner.

ART H 362 Impressionism and Society #
Fall. 4 credits. L. L. Meixner.
This course discusses French Impressionism as the products of nineteenth-century public life. By offering Impressionism to the state culture of the Third Republic, including universal expositions, we will trace subversive themes such as criminality, cafe and brothel societies, clandestine prostitution, and class-regulated leisure. Alongside the "Haussmannization" of Paris and urban commodity culture, we will consider French agrarian identity, landscape, and utopia.

ART H 365 Art from 1940 to 1990 (also American Studies 355) #
Fall. 4 credits. J. E. Bernstock.
Major artists and movements in the United States since 1940, beginning with Jackson Pollock and Abstract Expressionism, and continuing through recent developments in art. Attention is devoted to the critical reception that artists have received and to artists' statements themselves.

ART H 370 Visual Culture and Social Theory (also Government 375 and Comparative Literature 368) #
S. Reiss.
For description, see Government 375.

ART H 371 Architectural History of Washington, D.C. #
Fall or spring. Variable credit. Only for students in the Cornell-in-Washington program. Only for non-architects.
P. Scott.
A historical and critical survey of the architecture of Washington. Attention will be given to the periods, styles, architects, and clients—public and private—of the notable buildings and to the urban space of the nation's capital. The vocabulary of architectural analysis and criticism will be taught. Field trips required.

ART H 377 African American Art (also AS&RC 304) #
Spring. 3 credits. S. Hassan.
For description, see AS&RC 304.

ART H 378 Art in African Culture and Society (also AS&RC 310) #
Fall. 3 credits. S. Hassan.
For description, see AS&RC 310.

ART H 380 Introduction to the Arts of China (also Archaeology 380 and Asian 383) #
Fall. 4 credits. A. Pan.
This course offers a survey of the art and culture of China, from the Neolithic period to the twentieth century. We begin with an inquiry into the meaning of national boundaries and the controversy of the Han Chinese people, which will help us identify the scope of Chinese culture (architectural, literary, and religious) Chinese culture will be presented through both legends about the origins of the Chinese, and scientifically excavated artifacts. Art of the dynastic and modern periods will be presented in light of contemporaneous social, political, geographical, philosophical and religious contexts. Students will work directly with objects in the Herbert F. Johnson Museum of Art.

ART H 385 Representation and Meaning in Chinese Painting #
Spring. 4 credits. A. Pan.
Using major monuments of art, this course introduces various genres of Chinese painting through socio-political and religious history. The focus is on understanding the aesthetic criteria, artistic movements, stylistic transformations, and agendas of different social classes. Weekly sections will meet at the Herbert F. Johnson Museum so that students can gain first-hand experience examining and handling Chinese paintings.
ART H 402 | Independent Study
Fall or spring. 2-4 credits. May be repeated for credit. Prerequisite: permission of a department faculty member. Individual investigation and discussion of special topics not covered in the regular course offerings, by arrangement with a member of the department.

ART H 407 | Museum Issues
Spring. 4 credits. Prerequisite: permission of instructor. Majors only. All classes will meet in the Johnson Art Museum Study Gallery. L. Meixner. This seminar gives advanced Art History majors the opportunity to work directly with original objects from collections in the Herbert F. Johnson Museum. The course focuses on art and connoisseurship by questioning the ways quality is determined in works of art. Topics include methods of attribution, fakes and forgeries, technique and media, restoration and conservation, art education, and theories of perception. Session leaders include the curatorial staff of the art museum.

ART H 410 | Visual Studies in the Diaspora (also Society for the Humanities 410)
Fall. 4 credits. K. Mercier. For description see Society for the Humanities 410.

ART H 423 | Ceramics (also Classics 423 and Archaeology 423)
Fall. 4 credits. A. Ramage. Bronze Age, Greek, and Roman pottery specimens from Near-Eastern and Mediterranean sites will be studied to provide direct experience of one of the basic prerequisites of architectural excavation—the identification and dating of pottery types. Reports, delivered in class, will concern ancient ceramic materials or particular types and periods of ceramics. Practical experience in making and decorating pottery will be encouraged.

ART H 424 | Sardis and the Cities of Asia Minor (also Archaeology 432 and Classics 432)

ART H 425 | Seminar on the Bronze Age Architecture of Asia Minor (also Classics 430 and Archaeology 425)
4 credits. Prerequisite: permission of instructor. Not offered 1999-2000. P. L. Kuniholm. The course will cover major architectural building programs from Neolithic Catal Hüyük, Beycesultan, to the final phases of Troy and Hittite Bogazköy. The art and archaeology of these civilizations will be taken in action through a reading knowledge of German useful.

ART H 427 | Seminar on Roman Art and Archaeology (also Classics 435 and Archaeology 435)

ART H 430 | America in the Camera's Eye (also History 430 and Women's Studies 430.32)
Fall. 4 credits. R. L. Moore. For description see History 430.

ART H 434 | The Rise of Classical Greece (also Archaeology 434 and Classics 434)
Spring. 4 credits. Recommended: Classics 220 or History of Art 220, Classics 221 or History of Art 221, or permission of instructor. P. L. Kuniholm. The art and archaeology of the Greek dark ages. Topics include: site reports, pottery, metalworking, the introduction of the alphabet, the beginnings of coinage, and links with Anatolia and the Near East.

ART H 448 | Studies in Sixteenth-Century European Art
4 credits. Not offered 1999-2000. C. Lazzaro. Constructing the Self in the Sixteenth Century. This seminar examines portraits, self-portraits, autobiographies, and biographies, as well as treatises on etiquette and behavior. In this society, "civility," the mark of class and education, was conveyed through bearing, gesture, manners, and personal and social organization and artistic interests, all of which are evident in both visual and verbal representations of individuals.

ART H 451 | Prints of the Fifteenth through the Seventeenth Century
4 credits. Prerequisite: permission of instructor. Not offered 1999-2000. C. Lazzaro. This seminar has several aims: to introduce students to prints—the techniques, styles, and issues of connoisseurship—and to the major printmakers of the period, including Marcantonio Raimondi, Dürer, and Rembrandt; to give students first-hand experience with works of art in the Herbert F. Johnson Museum; and to consider the social and cultural issues raised in the medium of prints and through their unique visual language. These issues include the social hierarchies of class and gender (including witches), moral concerns and religious devotion, the construction and transmission of notions of antiquity and classicism, and the representation of the urban and rural environment. Students will give brief presentations on prints in the collection and longer ones of their own research projects on these and related topics.
ART H 456 Seminar in Baroque Art #

ART H 457 The Sexed Body in Western Art (Asian Studies 457) #

ART H 461 Fin-de-siècle Cultures in Europe, England, and America #

ART H 462 Topics in Early Modernism #
Spring. 4 credits. Prerequisite: permission of instructor. Auditing is not permitted. Not open to freshmen or sophomores. L. L. Meixner. Topic for Spring 2000: Early Modernism in America. Using the Armory Show (1913) as its center, this interdisciplinary seminar examines the varied expressions of American modernism prior to World War II. Against the backdrop of post-World War I social politics and the Jazz Age, we will examine: the machine aesthetic and kinetic poetry, icons such as the Brooklyn Bridge, O'Keefe, Stieglitz, and the rise of photography at "291," American Dada, the Harlem Renaissance, and the introduction of homoerotic imagery. Aside from major artists, key figures include Gertrude Stein, Dos Passos, Hart Crane, and Ernest Hemmingway.

ART H 463 Studies in Modern Art #

ART H 464 Studies in Modern Art #
Spring. 4 credits. Prerequisite: Art History 365 and permission of instructor. Auditing is not permitted. J. E. Bernstock. Topic for Spring 2000: Problems in Modern Sculpture. This seminar focuses on problems in criticism of twentieth-century sculpture, starting with Rodin. Controversial issues involving public sculpture are also examined.

ART H 466 Women Artists (also Women's Studies 404)
Fall. 4 credits. Prerequisite: permission of instructor. J. E. Bernstock. This seminar will be devoted to a study of the work of women artists from antiquity to the present. The works of the most prominent women artists from each period will be studied in relation to the changing roles of women in society. The artists to be studied include Jennifer Bartlett, Artemisia Gentileschi, Elizabeth Vigee-Lebrun, Mary Cassatt, Käthe Kollwitz, Georga O'Keefe, Louise Nevelson, Joan Mitchell, Judy Chicago, and Barbara Kruger.

ART H 476 Seminar in American Art #

ART H 481 Art of the Tang Dynasty (618–907)
Fall. 4 credits. Prerequisite: ART H 383 or a course in Chinese history or Chinese literature and permission of instructor required. A. Pan. This seminar explores art and culture of the Tang dynasty, China's "golden age," by focusing on new discoveries and museum objects representing court, secular, and Buddhist art. We will examine how imperial taste, patronage, and aesthetics influenced painting, calligraphy, gold and silver wares, ceramics, and important architectural and cave-temple sites.

ART H 483 Arts of the Song Dynasty (960–1279)
Spring. 4 credits. A. Pan. This seminar surveys arts of the Song dynasty, a period of introversion and high refinement. Through readings, class discussions, and visits to the Herbert F. Johnson Museum of Art, students will gain knowledge of painting (landscape, figure, horse, flower-and-bird, literati traditions and theories), calligraphy, Song antiquarianism, imperial patronage, religious art (painting, sculpture and temples), and ceramics.

ART H 490 Art and Collecting: East and West #

ART H 494 Feminist Theory and the History of Art #

ART H 520 Seminar in Classical Archaeology (also Classics 630 and Archaeology 520) #

ART H 531 Problems in Medieval Art and Architecture (also Religious Studies 531)
Fall. 4 credits. Prerequisite: permission of instructor. R. G. Calkins. Topic for fall 1999: Archaelogy of the Book. A detailed investigation of the methods and procedures of examining medieval illuminated manuscripts. Emphasis will be on understanding the hand written book as a functioning object: its production, decoration, use, and reception. Students will conduct research on a facsimile of a medieval manuscript amongst those housed in the Rare and Manuscript Collections, Kroch Library. Discussions, reports on readings and presentations of research paper in class.

ART H 540 Seminar in Renaissance Art #
Spring. 4 credits. Prerequisite: permission of instructor. C. Lazzaro. Topic for Spring 2000: Nature, Cultural Landscape and Gardens in Early Modern Italy. This seminar will examine cultural understandings of nature, the paired concepts of nature and culture, and the representations of nature in gardens. We will consider the human interventions on the land, the cultural significance of plants and animals, the literary pastoral, collections of natural objects, and the flourishing garden tradition.

ART H 549 Problems in Interpretation in Italian Renaissance Art #
4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. C. Lazzaro. This seminar will examine assumptions about meaning and what meaning is produced in Renaissance art. Various interpretative strategies will be examined, among them iconographic, semiotic, feminist, and psychoanalytic, within a specifically Renaissance and social context. Texts by Panofsky and critical discussions of them, Baxandall, Bryson, and others will be read and discussed with reference to particular works of art. The seminar is intended primarily for graduate students in all areas of the history of art and those in other disciplines with an interest in the Italian Renaissance. Senior History of Art majors with background in the Italian Renaissance are also welcome.

ART H 555 Baroque Ephemera and Public Performance #

ART H 571 African Aesthetics (also AS&RC 503) #
Spring. 4 credits. S. Hassan. For description, see AS&RC 503.

ART H 580 Problems in Asian Art (also Asian Studies 602 and Religious Studies 580)
Spring. 4 credits. Prerequisite: permission of instructor. K. McGowan. Topic for Spring 2000: The Subtle Body—Exploring the Art of Tantra. One of the defining characteristics of Tantra is the attention paid to the human body. In Hindu and Buddhist traditions alike, the esoteric practice of Tantra regards sexual energy as a path to spiritual enlightenment by means of the subtle body. This course examines the particular wisdom contained in texts called Tantras, divining the complex and interpenetrating symbologies which evolve visually in art and architecture, mathematics and music, dance and ritual, magic and metaphysics. Since the essential ingredients of Tantra are presumably older than either Hinduism or Buddhism, we will explore how both religions developed their own distinctive variations, which can be seen to have fused with dynamic effect in localized communities throughout history in India, Tibet, Cambodia, China, and Indonesia. Special emphasis will be given to the popularity of Hindu Tantra's deliberate critique of caste distinctions, and Buddhist Tantra's prevailing social iconoclasts.

ART H 591–592 Supervised Reading #
591, fall; 592, spring. 4 credits. May be repeated for credit. Limited to graduate students.

ART H 594 Feminist Theory and the History of Art #

ART H 600 Honors Work #
Fall or spring. 8 credits. Intended for senior art history majors who have been admitted to the honors program. Basic methods of art historical research will be discussed and individual readings assigned, leading to the selection of an appropriate thesis topic.

ART H 601 Honors Work #
Fall or spring. 8 credits. Prerequisite: History of Art 600. The student under faculty direction will prepare a senior thesis.

LINGUISTICS

Linguistics, the systematic study of human language, lies at the crossroads of the humanities and the social sciences, and much of its appeal derives from the special combination of intuition and rigor that the analysis of language demands. The interests of the members of the Department of Linguistics and linguistic colleagues in other departments span most of the major subfields of linguistics: phonetics and phonology, the study of speech sounds; syntax, the study of how words are combined; semantics, the study of meaning; historical linguistics, the study of language change over time; sociolinguistics, the study of language's role in social and cultural interactions; and applied linguistics, which relates the results of linguistic research to problems of bilingual education, second-language learning, and teaching.

Studying linguistics is not a matter of studying many languages. Linguistics is a theoretical discipline with ties to such areas as cognitive psychology, philosophy, logic, computer science, and anthropology. Nonetheless, knowing particular languages (e.g., Spanish or Japanese) in some depth can enhance understanding of the general properties of human language. Not surprisingly, then, many students of linguistics owe their initial interest to a period of exposure to a foreign language, and those who come to linguistics by some other route find their knowledge about languages enriched and are often stimulated to embark on further foreign language study.

Students interested in learning more about linguistics and its relationship to other disciplines in the humanities and social sciences are encouraged to take Linguistics 101, which is a prerequisite for most other courses in the field, or one of the freshman writing seminars offered in linguistics (on topics such as metaphor, American Sign Language, and the science of language). Linguistics 101 and other introductory courses fulfill the social science distribution requirement. Most 100- and 200-level courses have no prerequisites and cover various topics in linguistics (e.g., Ling 118 Varieties of Human Language, Ling 216 Mathematical Linguistics) or focus on the linguistics of a particular geographic region or historical development of particular languages (e.g., Ling 217 History of the English Language, Ling 230 Introduction to Southeast Asian Languages and Linguistics). Some of these courses also fulfill the breadth requirements.

Talks and discussions about linguistics are offered through the Undergraduate Linguistics Forum and the Cornell Linguistic Circle. These meetings are open to the university public and anyone wishing to learn more about linguistics is most welcome to attend.

The Major
For questions regarding the linguistics major, contact Professor Molly Diesing (212 Morrill Hall, 255-8655, md20@cornell.edu).

The prerequisite for a major in linguistics is the completion of Linguistics 101 and either Linguistics 201 or 203. The major has its own language requirement, which should be completed as early as possible: qualification in two languages other than English, one of which must be either non-European or non-Indo-European. With approval of the department's director of undergraduate studies, this requirement may be waived (i.e., reduced to the normal arts college language requirement) for students taking the cognitive studies concentration or a double major.

The other requirements for the linguistics major are as follows:

1) Linguistics 201 (Introduction to phonetics and phonology) or Linguistics 203 (Introduction to syntax and semantics), whichever one was not taken as a prerequisite to the major

2) Linguistics 314 (Historical)

3) Three of the following five courses, one of which must be either Phonology I or Syntax I:

- Linguistics 301 (Phonology I)
- Linguistics 303 (Syntax I)
- Linguistics 309 or 310 (Morphology I or II)
- Linguistics 319 (Phonetics I)
- Linguistics 421 (Semantics I)

4) A course at or beyond the 300 level in the structure of English or some other language, or a typological or comparative structure course such as Linguistics 401, 402, or Field Methods (Linguistics 300).

5) One additional linguistics course for at least 4 credit hours, which may be a course with significant linguistic content in a related field.

Honors. Applications for honors should be made during the junior year. Candidates for admission must have a 3.0 (B) average overall and should have a 3.2 average in linguistics courses. In addition to the regular requirements of the major, the candidate for honors will complete an honors thesis and take a final oral examination in defense of it. The thesis is usually written during the senior year but may be started in the second term of the junior year when the student's program so warrants. The oral examination will be conducted by the honors committee, consisting of the thesis adviser and at least one other faculty member in linguistics. Members of other departments may serve as additional members if the topic makes this advisable. Linguistics 493 and 494 may be taken in conjunction with thesis research and writing but are not required.

General Linguistics
Fees: Depending on the course, a small fee may be charged for photocopied texts for course work.

First-Year Writing Seminars
LING 100 Language, Thought, and Reality
For descriptions, see freshman writing seminar brochure.

LING 101 Theory and Practice of Linguistics
Fall or spring. 4 credits each term. Fall, J. Whitman; spring, M. Diesing.

An introductory course designed to provide an overview of the science of language, especially its theoretical underpinnings, methodology, and major findings. The course focuses on the basic analytic methods of several subfields of linguistics including phonetics, morphology, syntax, semantics, language variation, language change, and psycholinguistics.

LING 118 Varieties of Human Language
Fall. 3 credits. Not offered 1999-2000. Language diversity has a place in our complex world. Whether spoken by a handful of speakers or by hundreds of millions, each language manages the same tasks of communication and fits in with its social environment. Language (identification, literacy, and multilingualism are among the issues touched on.)

LING 170 Introduction to Cognitive Science (also Cognitive Studies 101, Computer Science 101, Philosophy 191, and Psychology 102)
For description, see COGST 101.
LING 201 Introduction to Phonetics and Phonology
Spring. 4 credits. Prerequisite: LING 101 or equivalent permission of instructor. A. Cohn.

An introduction to the study of human speech sounds and how they pattern in languages. The first part of the course will focus on phonetics: the production, acoustics, and perception of speech, with attention to both the common and the less common sounds of the world’s languages. The second part of the course will focus on phonology: how human speech sounds pattern within and across languages, with an emphasis on the rules that govern these patterns and their possible representation.

LING 203 Introduction to Syntax and Semantics
Fall. 4 credits. Prerequisite: LING 101 or equivalent permission of instructor. J. Shimoyama.

This course focuses on language as a system of knowledge that enables native speakers to create and interpret the structures of their language. Part of the course will consider issues of syntactic structure, such as the order of constituents, the hierarchical organization of grammar, and syntactic universals. The other part of the course will focus on meaning and interpretation, addressing such issues as the role of context, how information is structured, and how it is encoded in the syntax.

LING 212 Language and Culture

We often assume that there is a close relationship between differences in language and cultural variation. This course focuses on that relationship, beginning with an examination of the linguistic relativity hypothesis, which posits a link between basic properties of languages and crosscultural differences in world view. We also examine potential cultural determinants of variation in language: pronouns and honorific systems, systems of ritual and taboo in language, and the impact of narrative organization on grammar. Special attention is paid to ‘extreme’ forms of language: invented languages from Esperanto to Klingon; constructed and trancelanguages, language games and secret languages.

LING 215/715 Psychology of Language (also Psychology 215)
Not offered 1999-2000. For description, see PSYC 215.

LING 216 Mathematical Linguistics

The course is an introduction to the mathematical concepts and techniques most frequently used in theoretical linguistics.

LING 244 Language and Gender (also Women’s Studies 244)
Spring. 4 credits. For non-majors or majors. S. McConnell-Ginet.

This course explores connections between language (use) and gender/sex systems, addressing such questions as the following: How do sex and gender affect the ways we speak, the ways we interpret and evaluate speech? How do sociocultural differences in women’s and men’s roles affect their language use, their relation to language change? What is meant by sexist language? How does conversation structure the social worlds of women and men? Readings draw from work in linguistics, anthropology, philosophy, psychology, literature, and general women’s studies and feminist theory.

LING 246/546 Minority Languages and Linguistics

This course examines minority languages from a social, political, and psychological perspective. Topics discussed include language death, language maintenance, bilingualism, language contact, official status, and related issues. Languages/language families to be discussed include Spanish in the U.S., Celtic languages, African languages, Yiddish, and others, depending on the special interests of the instructors.

LING 254 Language, Mind, and Brain
Fall. 4 credits. For non-majors or majors. Prerequisite: a basic course in linguistics and/or psychology is desirable. J. Bowers.

An introductory course that emphasizes the formal structure of the human language and its biological basis. The following topics are covered: the formal representation of linguistic knowledge, principles and parameters of universal grammar, the basic biology of language, mechanisms of linguistic performance, the modularity hypothesis, and language and cognition. This course is especially suited for majors in fields such as psychology, philosophy, computer science, and linguistics (and also for those enrolled in the concentration in cognitive studies) who want to take a one-semester introduction to linguistics that concentrates on the formal principles that govern linguistic knowledge, along with some discussion of their biological realization and their use in perception and production.

LING 270 Truth and Interpretation (also Cognitive Studies 270 and Philosophy 270)
Not offered 1999-2000. For description, see PHIL 270.

LING 300 Field Methods
Spring. 4 credits. Prerequisites: LING 201 and 203 or permission of instructor. C. Collins.

Elicitation, recording, and analysis of data from a native speaker of a non-Western language not generally known to students.

LING 301-302 Phonology I, II
301, fall; 302, spring. 4 credits each term. Prerequisites: for LING 301, LING 201 or equivalent; for LING 302, LING 301 or permission of instructor. Fall, A. Cohn; spring, D. Zec.

301 provides a basic introduction to phonological theory. The first half of the course focuses on basic principles of phonology, patterns of sounds, and their representations. In the second half, the nature of syllable structure and feature representations are explored. 302 provides further refinement of the issues investigated in 301, focusing in particular on metrical theory, Lexical Phonology, autosegmental morphology, and Prosodic Morphology.

LING 303-304 Syntax I, II
303, fall; 304, spring. 4 credits each term. Prerequisites: for LING 303, LING 203; for LING 304, LING 303 or permission of instructor. Fall, C. Collins; spring, J. Bowers.

303 is an introduction to syntactic theory, with emphasis on the classical theory of transformational grammar. 304 is an advanced course, surveying current syntactic models and dealing with such issues as the nature of syntactic representation, levels of representation, principles of universal grammar, and the relation of syntax and semantics.

LING 306 Functional Syntax
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 1999-2000. A general survey of syntactic theories that highlight grammatical function and reveal its role in discourse structure.

LING 309 Morphology
Spring. 4 credits. Prerequisite: LING 101 or equivalent permission of instructor. V. Carstens.

A general survey course, focusing on the relationship of meaning and form in morphology and introducing techniques of morphological analysis. Current research on form-meaning questions is discussed.

LING 310 Morphology II
Fall. 4 credits. Prerequisite: LING 203 or permission of instructor. J. Whitman.

Consider recent discussions in morphological theory, in particular the relationship of morphology and syntax.

LING 314 Introduction to Historical Linguistics #
Spring. 4 credits. Prerequisite: LING 201 or permission of instructor. J. Whitman.

A survey of the basic mechanisms of linguistic change, with examples from a variety of languages.

LING 319 Phonetics I
Fall. 4 credits. Prerequisite: LING 201 or permission of instructor. A. Tsuchida.

Provides a basic introduction to the study of phonetics. Topics include phonetics, anatomy and physiology of the speech production apparatus, transcription and production of some of the world’s sounds, basic acoustics, computerized methods of speech analysis, acoustic characteristics of sounds, speech perception, speech synthesis, stress and intonation.

LING 320 Phonetics II
Spring. 4 credits. Prerequisite: LING 319. A. Tsuchida.

This course is a continuation of Phonetics I and provides a more detailed survey of some areas in acoustic and articulatory phonetics. Topics include feature theory, vocal tract acoustics, quantal theory, speaker normalization, theories of speech perception, coarticulation, theories of speech production, and prosody. In addition, a number of "hands-on" projects will be part of the course.

LING 325 Pragmatics
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 1999-2000. S. McConnell-Ginet.

An introduction to the study of such topics as speech acts, presupposition, deixis, implicatures, and conversational strategies.
[LING 334 Non-Linear Syntax](#)  
Fall. 4 credits. Prerequisite: LING 303 or equivalent. Not offered 1999–2000. C. Rosen.

Analyses of some twenty diverse languages are examined with the aim of building a formal account of the syntactic constructions existing in the world’s languages, and discerning universals that delimit this inventory. Not all approaches to comparative work, depicts constructions in the abstract, not imagining them as arrays of elements in space. Simultaneously it studies the morphosyntactic systems that relate constructions to their linear realizations.

[LING 350 Representing Language: Knowledge and Insight (also Cognitive Studies 350)](#)  
Fall. 4 credits. J. Gair.

This course will deal with some of the discoveries made in modern linguistics that reveal some fundamental properties of human language and the special human capacity for it, as well as some of the still unsettled questions about it. It will also trace some of the paradigm shifts that have occurred within linguistics, and consider some of the ways in which language has been represented, both within the science of linguistics and outside of it, by contrasting what is known with what is popularly believed to be true. Projected topics will include: innateness vs. language as socio-cultural; language variability vs. universal grammar; language change and relatedness of languages; the question of correctness.

[LING 370 Language and Cognition (also Psychology 370)](#)  
Spring. 4 credits. Prerequisite: LING 101 or 264 or PSYC 215, or permission of one of the instructors. Not offered same years as PSYC 416. Not offered 1999–2000.

Examination of current research on selected topics on language from both linguistic and psychological perspectives. Topics may include: universal grammar and language acquisition, syntactic parsing, word recognition, sentence production, aphasia, and schizophrenic language.

[LING 390 Independent Study in Linguistics](#)  
Fall or spring. 1–4 credits variable. Prerequisite: LING 101 or permission of instructor. Staff.

Independent study of topics in linguistics not covered in regular curriculum for undergrads.

[LING 401 Approaches to Language Typology I](#)  
Spring. 4 credits. Prerequisite: LING 101 or equivalent. C. Rosen.

Study of a basic paradigm of contemporary linguistics: in what ways do languages differ and in what ways are they all alike? Efforts to formalize universal syntax and to characterize the total repertory of constructions available to natural languages. Common morphological devices and their syntactic correlates. Emphasis on systems of case, agreement, and voice.

[LING 402 Approaches to Language Typology II](#)  

A topics-oriented course focusing on the interaction between linguistic theory and crosslinguistic variation.

[LING 403 Applied Linguistics and Second Language Learning](#)  
Fall. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, anthropology, communication, cognitive studies, education or literary analysis, or permission of instructor. Not offered 1999–2000. Staff.

This course is an introduction to the field of applied linguistics which focuses on different domains of language research as they come to bear on the matter of second language learning. Thus, topics include developmental and experimental psychology of language, textual and discourse analysis, literacy, cognitive consequences of bilingualism, corpora and language teaching, and contact between first and second language communities.

[LING 405 Sociolinguistics](#)  
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. J. Wolf.

The principal work of linguistics is to describe, analyze, and understand the regularities of language systems. How, then, are we to deal with irregularities and variability when they are observed in language? This course will introduce and discuss some of the most significant issues in the study of language variation, and it will examine some of the methodologies that have been developed to study variation in language use.

We will consider the observable interactions between linguistic variables and social factors (e.g., age, sex, ethnicity) and review the main generalizations about these factors that sociolinguistics has arrived at in the last three decades. Some of the problems associated with the quantification and measurement of non-linguistic variables will be discussed and we will evaluate the various ways researchers have dealt with these problems.

[LING 406 Ethnolinguistics](#)  
Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. J. Wolf.

This course will be an introduction to the study of pidgin and creole languages and the issues surrounding them both in and beyond linguistics. Topics covered will include: genesis of pidgins and creoles; classification of pidgins and creoles; creoles and language universals; creoles and sociolinguistic variation; a module on Saramaccan Creole English; educational and language planning issues; sociohistorical issues. Black English.

[LING 413 Topics in Historical Linguistics #](#)  
Fall. 4 credits. Prerequisite: LING 314 or permission of instructor. Not offered 1999–2000. W. Harbert, C. Rosen.

Examination of recent research illustrating a variety of productive and innovative approaches to problems in historical linguistics. Readings center on phonological and morphological evolution in the Romance and Germanic families. Students carry out guided research projects.

[LING 414 Second Language Acquisition I (also Asian Studies 414)](#)  
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. Y. Shirai.

A survey of the quantitative and qualitative research literature on the acquisition of second and additional languages among the adult population. Research carried out in both experimental and natural settings will be considered. Topics include: learner errors and errors analysis; contrastive analysis hypothesis; developmental and variability patterns in the acquisition of syntax, phonology and morphology; including the potential effects of typological and formal universals; pragmatics and discourse; the lexicon, social and cognitive factors in acquisition, communication and learning strategies; theories of second language acquisition.

[LING 415 Second Language Acquisition II (also Asian Studies 417)](#)  

This course will examine various issues in second language acquisition research that is particularly relevant to foreign language teaching and learning. Topics covered will include: the role of input (listening/reading) vs. output (speaking/writing); implicit vs. explicit learning; negative vs. positive evidence (including the role of error correction); affective factors (anxiety, fear, test anxiety); individual differences; teachability hypothesis and syllabus construction; the structure of second language proficiency.

[LING 420 Approaches to Discourse (also Asian Studies 419 and Comparative Literature 421)](#)  
Spring. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, sociology, anthropology, or literary analysis, or permission of instructor. Not offered 1999–2000. H. Tao.

Learning another language entails using that language—that is, being able to create and understand discourse in that language. Interdisciplinary studies demonstrate that there are patterns of language use at the sentence level in ordinary conversation and other types of spoken interaction as well as in written texts of various sorts. This course will introduce the various discourse approaches to language from the fields of anthropology, sociology, cognitive psychology, analysis, linguistics, and philosophy and focus on the major insights that have proven to be most helpful in understanding second language learning and language use. The topics to be covered include: narrative structure, conversation structure, rhetorical structure, information flow in discourse, and language and social interaction.

[LING 421-422 Semantics I, II](#)  
421, spring; 422, fall. 4 credits each term. Prerequisites: for LING 421, LING 203; for LING 422, LING 421 or permission of instructor. Fall: J. Shimoyama; spring, M. Diesing.

421: An introduction to semantics of natural language. The course starts from basic foundational questions concerning the nature of meaning and the empirical domain of semantic theory. Truth-conditional and logical theories and their application to the investigation of the structure of natural languages are extensively explored (with some comparisons with other approaches). Through the study of quantification, scope, anaphora, modality, presuppositions, and the like, one tries to gain insight into general characteristics of the cognitive apparatus that is at the basis of our capacity for understanding sentences.

422: Guides students into current work in semantic theory. The first half of the course is an introduction to Montague-style semantics, whose influence on current research is quite
extensive. The second half of the course focuses on selected topics that have grown out of (and sometimes against) classical Montague semantics. Such topics are usually drawn from the following: generalized quantifiers and anaphora, type-shifting, problems of tense and aspect, the linguistic relevance of algebraic approaches to properties, propositions, events and thematic roles, and discourse representation theory.

**LING 425 Corpora and Applied Linguistics (also Asian Studies 425)**

Fall. 4 credits. Prerequisite: at least one course in applied linguistics, linguistics, psychology, sociology, anthropology, or literary analysis, or permission of instructor. Not offered 1999–2000. H. Y. Fu.

This course introduces the foundations of studies of language based on large quantities of natural language data, the utility of large corpora for language learning and teaching, and the computational skills needed to carry out applied linguistic research based on language corpora. It will be conducted in both lecture and lab session formats. Topics include: the creation of corpora, coding and tagging of corpora, monolingual vs. parallel corpora, native vs. learner corpora, corpora and language pedagogy, corpora and discourse pragmatics, special issues in East Asian language corpora, corpora and lexicon and grammar.

**LING 436 Language Development (also Cognitive Studies 436, Human Development 436, and Psychology 436)**

Spring. 4 credits. Open to undergraduate and graduate students. Graduate students should also enroll in HD 635/LING 700, PSYCH 600, a supplemental graduate-seminar. Prerequisite: at least one course in developmental psychology, cognitive psychology, cognitive development, neurobiology, or linguistics. B. Lust.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available (see COGST 450/LING 450/PSYCH 457).

**LING 450 Lab Course: Language Development (also Cognitive Studies 450 and Psychology 437)**

Spring. 2 credits. Prerequisite: concurrent enrollment in either COGST/HD/LING/PSYCH 450. B. Lust.

This laboratory course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies research labs and will meet once a week in group format. It will include several structured modules dealing with topics covered in the survey course, COGST/HD/LING/PSYCH 450, Language Development. They will include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods in order to test hypotheses.

**LING 493 Honors Thesis Research**

Fall. 4 credits. Prerequisite: LING 494 or may be taken before or after LING 494, or may be taken independently.

**LING 494 Honors Thesis Research**

Spring. 4 credits. Staff. May be taken as a continuation of, or before, LING 493.

**LING 601 Topics in Phonological Theory**

Spring. 4 credits. Prerequisites: LING 301 and one higher-level course in phonology. D. Zec.

Selected topics in current phonological theory.

**LING 602 Topics in Morphology**

Fall. 4 credits. Prerequisites: LING 301 or 313 or permission of instructor. Not offered 1999–2000. D. Zec.

Selected topics in current morphological theory.

**LING 604 Research Workshop**

Fall. 2 credits. S-U grade only. Required of third-year linguistics graduate students. A. Cohr.

This course provides a forum for presentation and discussion of ongoing research, and development of professional skills. Participants must enroll in a concurrent independent study with a special committee member, or a relevant workshop.

**LING 605 Historical Syntax**

A course on change in language structure, beginning with an overview of widely attested types of syntactic change and proceeding to an introduction of current theoretical treatments. Topics covered include grammaticalization, word order change, and the interplay between morphological and syntactic change. Assumes a basic background in syntax.

**LING 607 Twentieth-Century Approaches to Language**

Fall. 4 credits. Prerequisite: at least one course in linguistics or permission of instructor. Offered alternate years. Not offered 1999–2000. L. Waugh, M. Bernal. The development of 20th-century approaches to language in America and Europe. Work in 19th-century approaches will also be considered in their relation to 20th-century approaches.

**LING 608 Discourse Analysis (also Comparative Literature 618)**

**LING 609 SLA and the Asian Languages (also Asian Studies 610)**

Fall. 4 credits. Prerequisite: LING 414–415 or permission of instructor. Y. Shirai. This course will survey the literature on the acquisition of Asian languages both in first and second language. We will mainly focus on Japanese, Korean, Chinese (Mandarin/Cantonese), but other languages (Thai, Malay, Vietnamese, Burmese, Tagalog, etc.) may be dealt with, depending on faculty/student interest.

**LING 616 Syntax III**

Fall. 4 credits. Prerequisite: LING 304 or permission of instructor. V. Carstens. An examination of recent developments in syntactic theory, including "minimalist" approaches to phrase structure, derivations/representations and the nature of economy conditions, and parametric differences.

**LING 633 Seminar in First-Language Acquisition: Cross-linguistic Studies of the Acquisition of Anaphora (also Cognitive Studies 633 and Human Development 633)**

Fall. 1–4 credits. Prerequisite: LING 436 or equivalent or permission of instructor. Not offered 1999–2000. B. Lust. This seminar will review and critique current theoretical and experimental studies of the first-language acquisition of anaphora, with a concentration on insights gained by cross-linguistic study of this area. The seminar will focus on relating current developments in linguistic theory regarding anaphora to current experimental research on first-language acquisition of anaphora. Attention will also be given to the development of research proposals.

**LING 637 Experimental Research for Language Sciences**

A detailed study of experimental procedures for carrying out research in linguistics, especially in the areas of applied linguistics, phonetics, and language acquisition. Quantitative and qualitative research methods are considered.

**LING 648 Speech Synthesis by Rule**

Spring. 4 credits. Prerequisite: LING 301, 319, or permission of instructor. Offered alternate years. Not offered 1999–2000. S. Hertz.

Investigates the nature of the acoustic structure of speech synthesis, using speech as a tool for exploring this structure. A particular acoustic model will be proposed, developed, and motivated by considering the relationship between phonological and acoustic structure, speech timing, phonemic universals, coarticulation, and speech perception. The primary tool for investigation will be the Delta System, a powerful software system for investigating phonology and phonetics through speech synthesis. The course is meant for graduate students and advanced undergraduate students in linguistics, but may also be of interest to students in psychology/psycholinguistics, computer science, and cognitive studies.

**LING 700 Seminar**

Fall or spring, according to demand. Credit to be arranged.

Seminars are offered according to faculty interest and student demand. Topics in recent years have included subject and topic, Montague grammar, speech synthesis, lexicography, classical and autonomous phonology, Japanese sociolinguistics, relational grammar, semantics and semiotics, and others.

**LING 701–702 Directed Research**

701, fall; 702, spring. 1–4 credits. Hours to be arranged. Staff.
narratives, and enhancing conversational ability. Advanced grammar and vocabulary will be supplemented with further instruction in the linguistic structure of ASL. Readings, class discussions, and videotexts containing samples of the visual literature of the U.S. Deaf community will continue students' investigation into American Deaf history and the shaping of modern Deaf culture.

Arabic

[LING 416 Structure of the Arabic Language (also Near Eastern Studies 416) @ #
For description, see NFS 416.]

Celtic

LING 236 Introduction to Gaelic
Spring. 3 credits. W. Harbert.
This course is an introduction to the history, structure, and current status of the Scottish Gaelic language, oriented around elementary Gaelic texts.

LING 238 Introduction to Welsh
W. Harbert.
This course surveys the history, structure, cultural and political situation of the Welsh language. It includes several sessions of elementary language instruction and a brief introduction to Welsh literature.

LING 539 The Celtic Languages
Fall. 4 credits. Graduate students register under LING 539.
W. Harbert.
This course surveys the history, structure, and political and social situation of the Celtic languages (Welsh, Scottish Gaelic, Irish Gaelic, Breton, Cornish, and Manx). The course includes a few days of introductory language instruction in some of these languages.

LING 242 Diversity in American English
Spring. 3 credits. J. Bowers.
This course is a basic introduction to the regional dialects of English spoken in the United States. It is linguistically oriented, introducing the relevant aspects of phonetics, phonology, morphology, and syntax where appropriate. There is an emphasis on the students discovering what features characterize their own dialects (if they speak American English). The class is also of use as an introduction to American English dialects for non-native speakers of English.

LING 217 History of the English Language #
Spring. 4 credits. W. Harbert.
This course explores the development of the English language from its Indo-European beginnings to the present. Topics covered include changes in sound, vocabulary and grammatical structure, external influences, Old English, Middle English, Standard English, dialects, and World Englishes.
French

LING 232 The French Language Today
Fall. 3 credits. Prerequisite: LING 101. Not offered 1999–2000. A. Cohn. Designed for students with a working knowledge of French, this course explores the structure of French and how it is used. The course investigates the sound system, word structure and sentence structure of French as well as different varieties of French, including regional and social variation and formal vs. informal differences.

LING 433 Contemporary Theories of French Grammar
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. Not offered 1999–2000. L. Waugh. Selected topics in twentieth-century French linguistics.

LING 439 Linguistic Structure of French II: Semantics, Pragmatics, and Discourse Analysis
Fall. 4 credits. Prerequisite: qualification in French. Offered alternate years. Not offered 1999–2000. L. Waugh. A synchronic study and analysis of modern French, with emphasis on semantics, pragmatics, and discourse analysis.

German and Yiddish

LING 237 The Germanic Languages
Fall. 4 credits. Not offered 1999–2000. W. Harbert, M. Diesing. This course surveys the history, structure, and use of the modern Germanic languages (English, German, Dutch, Afrikaans, Swedish, Danish, Icelandic, Norwegian, Faroese, and Yiddish).

LING 241 Yiddish Linguistics (also Jewish Studies 271)
Fall. 4 credits variable. Prerequisite: LING 101 or permission of instructor. M. Diesing. This course will cover a wide variety of topics relating to the Yiddish language and Yiddish culture, including the structure of Yiddish, the history of the Yiddish language, Yiddish in America (the Yiddish revival, the role of the Yiddish press, etc.), Yiddish as a minority/dying language, and the influence of Yiddish on present-day American English. No previous knowledge of Yiddish required.

LING 315–316 Old Norse
315, fall; 316, spring. 4 credits each term. E. Johannsson. Old Norse is a collective term for the earliest North Germanic literary languages: Old Icelandic, Old Norwegian, Old Danish, and Old Swedish. The richly documented Old Icelandic will be the center of attention, and the purpose is twofold: the student will gain (a) knowledge of an ancient North Germanic language, important from a linguistic point of view, as well as (b) access to the medieval Icelandic (and Scandinavian) literature.

315: The structure of Old Norse (Old Icelandic), phonology, and morphology, with reading of selections from the Prose-Edda, a 13th-century narrative based on the Eddaic poetry. 316: Extensive reading of Old Norse texts, among them selections from some of the major Icelandic family sagas: Njals saga, Grettis saga, and Egils saga, as well as the whole Hrafnkels saga.

LING 441 Introduction to Germanic Linguistics (also German Studies 441)
Fall. 4 credits. Prerequisite: LING 101 or permission of instructor. W. Harbert. Survey of major issues in historical Germanic linguistics.

LING 643 Topics in Historical Germanic Phonology #
Spring. 4 credits. Prerequisite: LING 441. Not offered 1999–2000. W. Harbert. The development of the sound system from Proto-Germanic to its daughter languages.

LING 644 Topics in Historical Germanic Syntax #

LING 645 Gothic

LING 646 Old High German, Old Saxon

Greek

LING 451 Greek Comparative Grammar (also Classics 421)
Fall. 4 credits. Prerequisite: thorough familiarity with classical Greek morphology. A. Nussbaum. The prehistory and evolution of the sounds and forms of ancient Greek as reconstructed by comparison with the other Indo-European languages.

LING 455 Greek Dialects (also Classics 425) #
Fall. 4 credits. Prerequisite: basic familiarity with classical Greek morphology. Not offered 1999–2000. A. Nussbaum. A survey of the dialects of ancient Greek through the reading and analysis of representative epigraphical and literary texts.

LING 457 Homeric Philology (also Classics 427) #

LING 459 Mycenean Greek (also Classics 429) #

An introduction to the epigraphy, language, and content of the Linear B tablets with special attention to their implications for Greek historical grammar and dialectology.

Hungarian

LING 427 Structure of Hungarian
Fall. 4 credits. Prerequisite: LING 101 or equivalent. Offered alternate years. Not offered 1999–2000. W. Browne. Survey of phonology, morphology, and syntax of this non-Indo-European language. Topics to be stressed include vowel harmony, consonant assimilation; definite and indefinite conjugations, possessives, verb prefixes, causatives; focus, word order, clause types, movement, intonation.

Indo-European

LING 131–132 Elementary Sanskrit (also Classics 131–132 and Sanskrit 131–132)

LING 251–252 Intermediate Sanskrit (also Classics 251–252 and Sanskrit 131–132) @

LING 460 Sanskrit Comparative Grammar

LING 617–618 Hittite
617, fall; 618, spring. 4 credits each term. Prerequisites: for LING 617, permission of instructor; for LING 618, LING 617 or equivalent. E. Bickel. An introduction to the cuneiform writing system and the grammar of Hittite, followed by the reading of selected texts.

LING 619 Rigveda
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. C. Minkowski. Reading and linguistic analysis of selected Vedic hymns.

LING 631 Comparative Indo-European Linguistics

LING 635–636 Indo-European Workshop
635, fall; 636, spring. 4 credits each term. Prerequisite: permission of instructor. Not offered 1999–2000. Staff. An assortment of subjects intended for students with previous training in Indo-European linguistics: problems in the reconstruction of Proto-Indo-European, topics in the historical grammars of the various IE languages, reading and historical linguistic analysis of texts, and grammatical sketches of "minor" IE languages.
ITALIAN

[LING 409] Structure of Italian
Fall. 4 credits. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 1999-2000. C. Rosen.

Survey of Italian syntax, using simple theoretical tools to bring hidden regularities to light. Topics include auxiliaries, modals, clitics, reflexive constructions, agreement, impersonal constructions, causatives.

[LING 410] History of the Italian Language
Spring. 4 credits. Prerequisites: LING 321 and either Italian 201, 203, or equivalent. Offered alternate years. Not offered 1999-2000. C. Rosen.

Overview of Italian and its dialects from the earliest texts to the present day. Emergence of the standard language. External history and sociolinguistic circumstances.

JAPANESE

[LING 404] Linguistic Structure of Japanese (also Asian Studies 412)
Fall. 4 credits. Prerequisites: Japanese 102 or permission of instructor and LING 101 or equivalent introductory course in linguistics. Offered alternate years. J. Whitman.

Introduction to the linguistic study of Japanese, with an emphasis on morphology and syntax.

[LING 411] History of the Japanese Language (also Asian Studies 411)
Fall. 4 credits. Prerequisite: permission of instructor. Offered alternate years. J. Whitman.

An overview of the history of the Japanese language followed by intensive examination of issues of interest to the participants. Students should have a reading knowledge of Japanese.

KOREAN

[LING 430] Structure of Korean (also Asian Studies 430)
Spring. 4 credits. Offered alternate years. J. Whitman.

Intensive examination of the syntax and phonology of a non-Indo-European language with the objective of testing principles of current linguistic theory. No previous knowledge of Korean required.

LATIN AND ITALIC

[LING 452] Latin Comparative Grammar (also Classics 422)

The prehistory and evolution of the sounds and forms of classical Latin as reconstructed by comparison with the other Indo-European languages.

LINGUISTIC STRUCTURE OF LATIN AND ITALIC

[LING 454] Italic Dialects (also Classics 424)

The phonology and morphology of Faliscan, Oscan, and Umbrian studied through the reading of epigraphical texts. Attention to the relations of these languages to Latin and the question of proto-Italic.

[LING 456] Archaic Latin (also Classics 426)

Reading of epigraphic and literary preclassical texts with special attention to archaic and dialectal features. The position of Latin among the Indo-European languages of ancient Italy, the rudiments of Latin historical grammar, and aspects of the development of the literary language.

ROMANCE

[LING 321-322] History of the Romance Languages
321, fall; 322, spring. 4 credits each term. Prerequisites: LING 101 or equivalent and qualification in any Romance language. Offered alternate years. Not offered 1999-2000. C. Rosen.

[LING 323-324] Comparative Romance Syntax
323, spring; 324, fall. 4 credits each term. Prerequisites: LING 101, or equivalent and qualification in any romance language. Offered alternate years. C. Rosen.

Concise survey of romance syntax, covering the salient constructions in six languages with equal attention to their historical evolution and their current state. Grammatical innovation and divergence in a typological perspective.

RUSSIAN AND SLAVIC

[LING 417-418] History of the Russian Language (also Russian 401-402)
417, fall; 418, spring. 4 credits each term. Prerequisites: for LING 417, permission of instructor; for LING 418, LING 417 or equivalent. Offered alternate years. Not offered 1999-2000. W. Browne.

A synchronic analysis of the structure of modern Russian. LING 443 deals primarily with morphology and its relation to syntax and 444 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphological and syntactical properties.

LING 661 Old Church Slavonic (also Russian 601)
Fall. 4 credits. This course is prerequisite to LING 662. Offered alternate years. W. Browne.

Grammar and reading of basic texts.

LING 662 Old Russian Texts (also Russian 602)
Spring. 4 credits. Prerequisite: LING 661. Offered alternate years. W. Browne.

Grammatical analysis and close reading of Old Russian texts.

[LING 671-672] Comparative Slavic Linguistics (also Russian 651-652)
671, fall; 672, spring. 4 credits each term. Prerequisites: for LING 671, LING 661 taken previously or simultaneously or permission of instructor; for LING 672, LING 671 or permission of instructor. Offered alternate years. Not offered 1999-2000. W. Browne.

Sounds and forms of the Slavic languages and of prehistoric common Slav; main historical developments leading to the modern languages.

SOUTHEAST ASIAN

[LING 341] India as a Linguistic Area
Spring. 4 credits. Prerequisite: LING 101 or permission of instructor. Not offered 1999-2000. J. Gair.

A basic introduction to the linguistic and sociolinguistic character of the subcontinent, with special attention to cross-linguistic family influences and convergence.

[LING 440] Dravidian Structures

A comparative and contrastive analysis of the structures of several Dravidian languages.

[LING 442] Indo-Aryan Structures

Typological discussion of the languages of the subfamily. Specific topics and emphasis may vary depending on the interest of the students.

SOUTHEAST ASIAN

[LING 230] Introduction to Southeast Asian Languages and Linguistics
Fall. 3-4 credits variable. For non-majors or majors. Not offered 1999-2000. A. Cohn, J. Wolff.

This is a survey of the languages of Southeast Asia. The goal of this course is to expose students to Southeast Asia as a linguistic area and introduce them to the rich language diversity of the region. It includes three main parts: 1) sociolinguistic and ethnolinguistic issues of language and politics, language and culture, and language use; 2) language structures and typological patterns of the area’s languages; 3) historical linguistics, genetic relations between languages, as well as the linguistic effects of language contact and linguistic evidence for prehistory.

NOTES:

- [LING 341-342] History of the Indo-European Languages
  This course covers the evolution of the Indo-European languages, focusing on the languages of ancient Italy, the rudiments of Latin historical grammar, and aspects of the development of the literary language.

- [LING 417-418] History of the Russian Language
  This course provides a comprehensive overview of the Russian language, from its early stages to modern developments, with a focus on morphology and syntax.

- [LING 661-662] Old Church Slavonic
  This course is a prerequisite for advanced study in Old Russian, focusing on grammar and reading.

- [LING 671-672] Comparative Slavic Linguistics
  This course covers the sounds and forms of Slavic languages, with a focus on prehistoric and modern developments.

- [LING 230] Introduction to Southeast Asian Languages and Linguistics
  This course provides an introduction to the linguistic and sociolinguistic character of Southeast Asia, covering the languages of the region and their historical evolution.
MATHEMATICS 487

Mathematics is the language of modern science; basic training in the discipline is essential for those who want to understand, as well as for those who want to take part in, the important scientific developments of our time. Acquaintance with mathematics is also extremely useful for students in the social sciences and valuable for anyone interested in the full range of human culture and the ways of knowing the universe in which we live.

The Department of Mathematics faculty has strong groups specializing in algebra, number theory, real and complex analysis, Lie groups, topology and geometry, logic, probability and statistics, mathematical physics, and applied mathematics. Related departments at Cornell have specialists in computer science, operations research, linear programming, and game theory, and courses in these topics can be integrated readily into the mathematics major.

The department offers a rich variety of undergraduate courses, and many of its beginning graduate courses are suitable for advanced undergraduates as well. Under some conditions, a student may carry out an independent reading and research project for college credit under the supervision of a faculty member.

Members of the department are available to discuss with students the appropriate course for their levels of ability and interest, and students are urged to avail themselves of this help.

Students who want to take any of the courses numbered 300 or above are invited to confer, before registering, with the instructor concerned. The level of a course is indicated by the first digit of the course number.

4) Further high-level mathematical courses. Any one of the following are sufficient:
   a) four additional Mathematics courses numbered 300 or above.
   b) (Concentration in Computer Science) five additional courses from i) and ii), of which at least one is from i) and three are from ii)
      i) Mathematics courses numbered 300 or above
      ii) Computer Science courses numbered 310 or above
   c) (Concentration in Operations Research) five additional courses from iii) and iv) below, of which at least one is from iii) and three are from iv)
      iii) Mathematics courses numbered 300 or above

Advanced Placement

Secondary school students are strongly urged to take one of the two advanced placement examinations of the College Entrance Examination Board in their senior year. Freshmen who have had some calculus but who have not taken an advanced placement examination should take the placement examination in mathematics offered at Cornell just before the beginning of classes in the fall. It is most important that anyone with any knowledge of calculus carefully read "Advanced Placement," p. 5.

The Major

The mathematics major adapts to a number of purposes. It can emphasize the theoretical or the applied. It can be appropriate for professionals and nonprofessionals alike, and can be broad or narrow. It can also be combined easily with serious study in another subject in the physical, biological or social sciences by means of a double major and/or concentration. For example, a double major with mathematics and computer science is facilitated by the concentration in computer science (4b) described below; this concentration permits a student to use certain computer science courses to satisfy the requirements of both majors. Questions concerning the major should be brought to a departmental representative.

Prerequisites: the traditional prerequisites are Mathematics 221–222, 223–224 or 293–294. A unit on infinite series is required. Such a unit is offered in Mathematics 112, 122, and 192. Normally students will be admitted to the major only when they have grades of B– or better in all sophomore-level mathematics courses they have taken. Alternative prerequisites are Mathematics 213, 231, normally with grades of B+ or better.

Requirements

There are five requirements for the major:

1) Computer Science 100. Students are urged to take this course before the end of the sophomore year.
2) Two courses in algebra. Eligible courses are Mathematics 431 or 433, 432 or 434 or 532, 336.
3) Two courses in analysis. Eligible courses are Mathematics 321, 411 or 413, 414, 418, 420, 422, 423, 427, 428.
4) Further high-level mathematical courses. Any one of the following are sufficient:
   a) four additional Mathematics courses numbered 300 or above.
   b) (Concentration in Computer Science) five additional courses from i) and ii), of which at least one is from i) and three are from ii)
      i) Mathematics courses numbered 300 or above
      ii) Computer Science courses numbered 310 or above
   c) (Concentration in Operations Research) five additional courses from iii) and iv) below, of which at least one is from iii) and three are from iv)
      iii) Mathematics courses numbered 300 or above

Spanish

LING 365 Seminar in Southeast Asian Linguistics
655, fall; 656, spring. 4 credits each term. Prerequisite: LING 303 or permission of instructor. LING 655 is not a prerequisite for 654. Not offered 1999–2000.
Languages of mainland Southeast Asia. Topics, chosen according to student interests, may include description, dialectology, typology, comparative reconstruction, and historical studies.

LING 655-656 Seminar in Austronesian Linguistics
655, fall; 656, spring. 4 credits each term. Prerequisites: for LING 655, LING 101 and permission of instructor; for LING 656, LING 655. J. Wolff. Descriptive and comparative studies of Malayo-Polynesian languages.

LING 657-658 Seminar in Austroasiatic Linguistics
657, fall; 658, spring. 4 credits each term. Prerequisite: LING 101 or permission of instructor. Not offered 1999–2000.
Descriptive and comparative studies of Austroasiatic languages.

LING 366 Spanish in the United States (also SpanRom 366 and Latino Studies Program 366)

LING 407 Grammatical Structure of Spanish I (also SpanRom 407)
Spring. 4 credits. Prerequisite: proficiency in Spanish or permission of instructor. Not offered 1999–2000. M. Suher. This course seeks to equip the advanced student or the future language professional with practical insights into problem areas for foreign language learners with the aid of linguistic descriptions. The intent is to narrow the gap known to exist between the knowledge that a native speaker has and the incomplete one that a foreign language learner possesses.

LING 408 Grammatical Structure of Spanish II (also SpanRom 408)
Spring. 4 credits. Prerequisites: LING 101 and proficiency in Spanish or permission of instructor. Offered alternate years. Not offered 1999–2000. M. Suher. Survey of Spanish morpho-syntax using contemporary theoretical models to highlight hidden patterns and generalizations. Topics may vary according to students' interests, but may include major clause types, word order possibilities, negation, agreement, and null categories.
honors should consult their major advisers concerning suitable courses.
To be considered for high honors, a student usually will be expected to write a Senior Thesis, and present it orally to the department. This project is carried out during the senior year under the supervision of a member of the Mathematics Department faculty. Students interested in high honors should consult their major advisers and the Mathematics major director during the second semester of their junior year.

Teacher Education in Agriculture, Mathematics and Science (TEAMS)

Students at Cornell may pursue teaching credentials in biology, chemistry, earth science, general science, mathematics, and physics. TEAMS is a university program jointly conducted by the Departments of Education and Mathematics. Although TEAMS offers options for undergraduate and graduate study, most students enroll in a five-year program, which combines an undergraduate major in mathematics or one of the sciences with a one-year Master of Arts in Teaching (MAT). Students from any college at Cornell are eligible to apply to the program as undergraduates. Students who complete their undergraduate studies and who have been placed in sequence 3 and take Mathematics 431—472.

Distribution Requirement

Virtually all mathematics courses can be used to satisfy the Quantitative and Formal Reasoning part of the Distribution Requirements. Explicit exceptions are noted in the beginning of the Arts and Sciences section of the Courses of Study.

Fees

In some courses there may be a small fee for computer lab use or for photocopying materials to be handed out to students.
This course is designed to prepare students from biology are used. Mathematical modeling, sets, functions, and equations, and Markov chains. Examples

This course is designed for students who wish to experience how mathematical ideas naturally evolve. The homework will consist of the students actively investigating mathematical ideas. The course will emphasize ideas and imagination as opposed to techniques and calculators. Topics will vary depending on the instructor. Some assessment will be done through writing assignments.

Fall, spring. 3 credits. Prerequisite: three years of high school mathematics, including trigonometry and logarithms. Mathematical modeling, sets, functions, and graphing (including use of log and semi-log paper). Probability (with some applications to genetics). Matrices, systems of linear equations, and Markov chains. Examples from biology are used.

Fall, spring. 4 credits. Prerequisites: Mathematics 109 or three years of high school mathematics, including trigonometry.* Functions and graphs, limits and continuity, differentiation and integration of algebraic, trigonometric, inverse trig, logarithmic and exponential functions. Applications of differentiation, including graphing, max-min problems, tangent line approximation, implicit differentiation, applications to the sciences. The mean value theorem. Antiderivatives, definite and indefinite integrals, the fundamental theorem of calculus, substitution in integration, the area under a curve. Graphing calculators will be used, and their pitfalls will be discussed, as applicable to the above topics.

Mathematics 111 can serve as a one-semester introduction to calculus or as part of a 2-semester sequence in which it is followed by Mathematics 112 or 122.

Fall, spring. 4 credits. Prerequisites: Mathematics 106 or 111 with a grade of C or better. Those who do well in Mathematics 111 and expect to major in mathematics or a strongly mathematics-related field should take 122 instead of 112.* Integration: applications, including volumes and arc length, techniques of integration, approximate integration with error estimates, improper integrals, differential equations (separation of variables, initial conditions, systems, some applications). Infinite sequences and series: definition and tests for convergence, power series, Taylor series with remainder. Parametric equations.

Fall. 4 credits. Prerequisite: three years of high school mathematics with average grade of A- or better, or permission of the department.* This is a first-semester course in calculus intended for students who have been quite successful in their previous mathematics courses. The syllabus for the course is quite similar to that of Mathematics 111; however, the approach is more theoretical and the material will be covered in greater depth.

Fall, spring. 4 credits. Prerequisite: one semester of calculus with a high performance or, permission of the department. Students planning to continue with Mathematics 213 are advised to take 112 instead of this course.* Differentiation and integration of elementary transcendental functions, the techniques of integration, applications, polar coordinates, infinite series, and complex numbers, as well as an introduction to proving theorems. The approach is more theoretical than in Mathematics 112.

Fall. 3 credits. Not offered 1999–2000. Over the centuries mathematicians have interpreted the concept of "space" in numerous ways. This course will survey some of these approaches from the time of Euclid to the later perspective of non-Euclidean systems. We will evaluate the impact of these viewpoints on such concepts as distance, angle measurement, straightness and curvature, dimension, and surface. We will make and analyze models to get a feel for the concepts and to assess the relevance of various approaches to geometry.

Fall, spring. 4 credits. Prerequisites: high school mathematics.

This introductory statistics course will discuss techniques for analyzing data occurring in the real world and the mathematical and philosophical justifications for these techniques. Topics include population and sample distributions, central limit theorem, and statistical theories of point estimation, confidence intervals, and testing hypotheses, the linear model, and the least squares estimator. The course concludes with a discussion of tests and estimates for regression and analysis of variance (if time permits). The computer will be used to demonstrate some aspects of the theory, such as sampling distributions and the Central Limit Theorem. In the lab portion of the course, students will learn and use computer-based methods for implementing the statistical methodology presented in the lectures. (No previous familiarity with the computer is presumed.)

Fall. 3 credits. Prerequisite: high school mathematics.

This course is designed to prepare students for Mathematics 111. Algebra, trigonometry, logarithms, and exponentials are reviewed.

*MATH 111-112 Calculus
Calculus is the study of functions and processes from the point of view of how they are changing. What can we know of a function from its graph? Is it differentiable? How fast does it change? What is the cumulative effect of infinitely many infinitesimal changes?

Mathematics 111 and 112 aim to provide, to students with little or no prior exposure to calculus, the knowledge that calculus is useful, in that its applications to the physical, biological and social sciences have shaped our world, and beauty, in that it represents a breathtaking attempt of the human mind to capture the infinitely large and the infinitely small.

These courses seek to provide basic understanding, technical skills and sample applications in various fields for the very broad range of students who take them. Topics are studied (as appropriate) by analytic, numerical and graphical methods. These courses usually have several sections with small-group projects. (See the Supplement to the Course and Room Roster.)

MATH 111 Calculus
Fall, spring. 4 credits. Prerequisites: Mathematics 109 or three years of high school mathematics, including trigonometry.*

MATH 112 Calculus
Fall, spring. 4 credits. Prerequisites: Mathematics 106 or 111 with a grade of C or better. Those who do well in Mathematics 111 and expect to major in mathematics or a strongly mathematics-related field should take 122 instead of 112.*

MATH 122 Honors Calculus
Fall, spring. 4 credits. Prerequisite: one semester of calculus with a high performance or, permission of the department.

MATH 121 Honors Calculus
Fall. 4 credits. Prerequisite: three years of high school mathematics with average grade of A- or better, or permission of the department.* This is a first-semester course in calculus intended for students who have been quite successful in their previous mathematics courses. The syllabus for the course is quite similar to that of Mathematics 111; however, the approach is more theoretical and the material will be covered in greater depth.

MATH 122 Honors Calculus
Fall, spring. 4 credits. Prerequisite: one semester of calculus with a high performance or, permission of the department. Students planning to continue with Mathematics 213 are advised to take 112 instead of this course.*
well as some understanding of the process by which intuitive notions are developed into precise mathematical statements.]  

**MATH 191 Calculus for Engineers**  
Fall. 4 credits. Prerequisite: three years of high school mathematics, including trigonometry.*  
Plane analytic geometry, differential and integral calculus, and applications. This course is restricted to engineering students who have had no previous successful experience with calculus. Students who have had such experience but wish to take a first-semester calculus course should take MATH 193.  

**MATH 192 Calculus for Engineers**  
Fall, spring. 4 credits. Prerequisite: Mathematics 191 or 193.*  
Methods of integration, polar coordinates, complex numbers, infinite series. Introduction to physical vectors and calculus of functions of several variables.  

**MATH 193 Calculus for Engineers**  
Fall, spring. 4 credits. Prerequisite: three years of high school mathematics including trigonometry, plus some knowledge of calculus.*  
Plane analytic geometry, differential and integral calculus, and applications. Mathematics 193 covers essentially the same topics as 191, but is designed for students with some previous successful experience with calculus.  

**MATH 213 Calculus**  
Fall, spring. 4 credits. Prerequisite: Mathematics 112, 122, or 192.*  
Vectors and vector-valued functions. Multivariable and vector calculus including multiple integrals. First- and second-order differential equations with applications; systems of differential equations. Elementary partial differential equations. This course is designed for students who wish to master the basic techniques of calculus, but whose major will not require a substantial amount of mathematics. The course may emphasize different topics in the syllabus in different semesters.  

**MATH 221 Linear Algebra and Calculus**  
Fall, spring. 4 credits. Prerequisite: two semesters of calculus with a grade of B or better, or permission of instructor.  
Linear algebra and differential equations. Topics include vector algebra, linear transformations, matrices, linear differential equations, as well as an introduction to proving theorems. This course is especially recommended for students who plan to major in mathematics or in a strongly mathematics-related field.  

**MATH 222 Calculus**  
Fall, spring. 4 credits. Prerequisite: Mathematics 221.*  
Vector differential calculus, calculus of functions of several variables, multiple integrals. This course is especially recommended for students who plan to major in mathematics or in a strongly mathematics-related field.  

**MATH 223 Honors Linear Algebra and Calculus**  
Fall. 4 credits. Prerequisites: two semesters of calculus with a grade of A- or better, or permission of instructor.*  

*See the list of courses with overlapping content at the end of the introduction.  

Vectors, matrices and linear transformations; differential calculus of functions of several variables; inverse and implicit function theorems; quadratic forms, extrema, and manifolds; multiple and iterated integrals. Mathematics 223-224 provides an integrated treatment of linear algebra and multivariable calculus designed for students who have been highly successful in their previous calculus courses.  

**MATH 224 Honors Linear Algebra and Calculus**  
Spring. 4 credits. Prerequisites: Mathematics 223.*  
Vector fields; line integrals; differential forms and exterior derivative; work, flux, and density forms; integration of forms over parametrized domains; Green’s, Stoke’s, and divergence theorems.  

**MATH 231 Linear Algebra**  
Spring. 3 credits. Prerequisite: Mathematics 111 or equivalent.*  
Vectors, matrices, and linear transformations, affine and Euclidean spaces, transformation of matrices, and eigenvalues.  

**MATH 281 Deductive Logic (also Philosophy 331)**  
Spring. 4 credits.  
For description, see PHIL 331.  

**MATH 293 Engineering Mathematics**  
Fall, spring. 4 credits. Prerequisites: Mathematics 192 plus a knowledge of computer programming equivalent to that taught in Computer Science 100.*  

**MATH 294 Engineering Mathematics**  
Fall, spring. 4 credits. Prerequisite: Mathematics 293.*  
Introduction to partial differential equations, Fourier series, and boundary value problems, with applications. Matrix theory and linear algebra, inner product spaces. May include computer use in solving problems.  

**MATH 321 Applicable Analysis**  
Fall. 4 credits.  
Prerequisites: Mathematics 221, 294, or 221 and 222, or 213 and 231.*  
Graduate students who need mathematics before they take the 400-level courses. Special care is given to initiate the student into the writing of proofs and the language of mathematics. Symmetries, Groups of transformations. Subgroups and cosets. Homomorphisms and isomorphisms. Orbits and fixed points. Finite groups, wallpaper groups ("2-dimensional crystallographic groups") and the associated tessellations of the Euclidean plane.  

**MATH 332 Algebra and Number Theory**  
Fall. 4 credits. Prerequisites: Mathematics 221, 231, or 294.*  
Various topics from number theory and modern algebra, usually including most of the following: Primes and factorization, Diophantine equations, congruences, quadratic reciprocity, continued fractions, rings and fields, finite groups, introduction to arithmetic of the Gaussian integers and quadratic fields. Motivation and examples for the concepts of abstract algebra are derived primarily from number theory and geometry.  

**MATH 336 Applicable Algebra**  
Spring. 4 credits. Prerequisites: Mathematics 221, 294, or 231.*  
An introduction to concepts and methods of abstract algebra and number theory that are of importance in science and engineering. Applications of the theory to concrete problems will be stressed. The course treats mathematical topics usually selected from the following list: elementary number theory and congruences, groups, fields, partially ordered sets, lattices, graph theory, Boolean algebras, finite machines and languages. Applications discussed usually include at least some of the following: cryptography, primality testing, elementary coding theory, enumeration problems, fast Fourier transform, difference equations. Additional topics and applications may be chosen by the instructor.  

**MATH 356 Groups and Geometry**  
Spring. 4 credits. Prerequisites: Mathematics 221 or Mathematics 294.  
Groups were introduced in the nineteenth century as the set of symmetries of an algebraic or geometric object, and this viewpoint is a central one in modern mathematics. This course studies the geometry of the planes and of patterns in the plane in terms of the group of symmetries ("isometries") of the plane. Prior knowledge of groups is not a prerequisite. One aim is to give students experience in modern algebra and geometry (including the geometry of complex numbers) and a sense of the unity of mathematics before they take the 400-level courses. Special care is taken to initiate the student into the writing of proofs and the language of mathematics. Symmetries, Groups of transformations. Subgroups and cosets. Homomorphisms and isomorphisms. Orbits and fixed points. Finite groups, wallpaper groups ("2-dimensional crystallographic groups") and the associated tessellations of the Euclidean plane.  

**MATH 384 Foundations of Mathematics (also Philosophy 434)**  
Fall. 4 credits. Prerequisites: one course in logic or permission of instructor.  
For description, see PHIL 434.  

**MATH 401 Honors Seminar: Topics in Modern Mathematics**  
Spring. 4 credits.  
This course is a participatory seminar primarily aimed at introducing senior and junior mathematics majors to some of the challenging problems and areas of modern mathematics. The seminar will help students develop research and expository skills in modern mathematics. The seminar will help students develop research and expository skills in mathematics.
mathematics, which is important for careers in any field that makes significant use of the mathematical sciences (i.e., pure or applied mathematics, physical or biological sciences, business and industry, medicine). The content will vary from year to year.

MATH 403 History of Mathematics #
Spring. 4 credits. Prerequisites: two courses in mathematics above 300, or permission of instructor. Survey of the development of mathematics from antiquity to the present, with an emphasis on the achievements, problems, and mathematical viewpoints of each historical period and the evolution of such basic concepts as number, geometry, construction, and proof. Readings from original sources in translation. Students will be required to give oral and written reports.

[MATH 405 Mathematical Exposition
Fall. 3 credits. Not offered 1999-2000. A seminar in mathematics and its applications to other fields. Students will be expected to have had at least two years of college-level mathematics. Course work will consist of discussions, written projects, and student talks. The content of these discussions, projects, and talks will vary, to be determined by the instructor in consultation with the students.]

[MATH 408 Mathematics in Perspective
Spring. 4 credits. Prerequisite: consent of instructor (intended for senior mathematics majors and other students with strong mathematics backgrounds). Not offered 1999-2000. The purpose of this course is for students to step back and to form an overview of the mathematics they have learned.]

MATH 411 Introduction to Analysis
Fall. 4 credits. Prerequisite: Mathematics 222 or 231-232-294. Students who need measure theory and Lebesgue integration for advanced probability courses should take Mathematics 413-414 or audit the first few weeks of Mathematics 621. Undergraduates who plan to attend graduate school in mathematics should take Mathematics 413-414. An introduction to the theory of functions of real variables, stressing concepts and a logical development of the subject rather than applications. Topics include Euclidean spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, and the Riemann integral. Students who wish to continue study of theoretical analysis upon completion of Mathematics 411 may take, for example, Mathematics 418.

MATH 413-414 Honors Introduction to Analysis
413, fall; 414, spring. 4 credits each. Prerequisite for 413: Mathematics 222 or 293-294. Prerequisite for Mathematics 414: Mathematics 413. This sequence, designed for honors students, provides an introduction to the theory of functions of real variables, stressing a rigorous logical development of the subject rather than applications. Topics include metric spaces, the real number system, continuous and differentiable functions, uniform convergence and approximation theorems, Fourier series, Riemann and Lebesgue integrals, calculus in several variables, and differentiable forms.

MATH 418 Introduction to the Theory of Functions of One Complex Variable
Spring. 4 credits. Prerequisite: Mathematics 222 or 294 or 213. May be offered only in alternate years. A rigorous introduction to complex variable theory. Complex numbers. Differential and integral calculus for functions of a complex variable, including Cauchy's theorem and the calculus of residues. Elements of conformal mapping.

MATH 420 Applicable Analysis
Fall, spring. 4 credits. Prerequisites: high level of proficiency in Mathematics 294; or 221 and 222; or permission of instructor. Graduate students who need mathematics extensively in their work and who have had solid courses in calculus and complex variables should take Mathematics 615-616. With less preparation they should take Mathematics 420 (or 321)-422-425. Ordinary differential equations in one and higher dimensions: qualitative, analytic, and numerical treatment of applications. Some important partial differential equations (heat equation, wave equation, and vibrating membrane) and their connections with Fourier series and the Laplacian. Vector calculus and Stokes Theorem, with applications to electromagnetism. Mathematics 420 has substantial overlapping content with Mathematics 321, but more strongly emphasizes the mathematical properties of solutions of ordinary differential equations and the approximation to such solutions by numerical and computer methods.

MATH 422 Applicable Analysis II
Fall, spring. 4 credits. Prerequisite: Mathematics 420 or 321. Complex variables, Fourier transforms, Laplace transforms. Additional topics may include: an introduction to generalized functions. Applications to partial differential equations.

MATH 423 Applicable Analysis III
Spring. 4 credits. Prerequisite: Mathematics 420 or 321; however, students who have not taken 422 should talk to the instructor before taking this course. Normed vector spaces. Elementary Hilbert space theory. Projection and orthogonality. Fourier series. Functional analysis. Applications to elliptic partial differential equations and to integral equations.

[MATH 425 Numerical Solutions of Differential Equations
Spring. 4 credits. Prerequisites: Mathematics 222 or 294, one course numbered 300 or higher in mathematics, or permission of instructor. Not offered 1999-2000. Methods and basic theory for the numerical solution of ordinary and partial differential equations. Linear multistep methods, Runge-Kutta methods, and the problem of stiffness for ordinary differential equations. Finite difference methods and Galerkin finite element methods for partial differential equations. Homework will involve use of a computer.]

MATH 427 Introduction to Ordinary Differential Equations
Fall. 4 credits. Prerequisite: Mathematics 222 or 294 or permission of instructor. Covers the basic existence, uniqueness, and stability theory together with methods of solution and methods of approximation. Topics include singular points, series solutions, Sturm-Liouville theory, transform methods, approximation methods, and application to physical problems.

MATH 428 Introduction to Partial Differential Equations
Spring. 4 credits. Prerequisite: Mathematics 222 or 294 or permission of instructor. Topics selected from first-order quasilinear equations, classification of second-order equations, with emphasis on maximum principles, existence, uniqueness, stability. Fourier series methods, approximation methods.

MATH 431-432 Introduction to Algebra
431, fall; 432, spring. 4 credits each. Prerequisite: Mathematics 221 or 231. Prerequisite for Mathematics 432: Mathematics 431 or 433, or permission of instructor. Undergraduates who plan to attend graduate school in mathematics should take 431-432. An introduction to linear algebra, including the study of vector spaces, linear transformations, matrices, and systems of linear equations; quadratic forms and orthogonal product spaces; canonical forms for various classes of matrices and linear transformations; determinants. 432: an introduction to various topics in abstract algebra, including groups, rings, fields, factorization of polynomials and integers, congruences, and the structure of finitely generated modules over Euclidean domains with application to canonical forms of matrices.

MATH 433-434 Honors Introduction to Algebra
433, fall; 434, spring. 4 credits each. Prerequisite: Mathematics 321 or 231. Prerequisite for Mathematics 434: Mathematics 433 or permission of instructor. Honors version of Mathematics 431-432. Mathematics 433-434 will be more theoretical and rigorous than 431-432 and will include additional material such as multilinear and exterior algebra.

[MATH 436 Applications of Abstract Algebra
Spring. 4 credits. Prerequisites: Linear algebra (MATH 231 or higher). Familiarity with elementary algebra or number theory such as MATH 332 would also be helpful. Not offered 1999-2000. The course is intended for students who would like to learn modern algebra and its applications outside of mathematics. There will be at least as much emphasis on applications as the relevant modern algebra. Frequently, the applications involve or were made possible by the advent of computers. Students who already know the modern algebra covered in the course may still find the applications to be of interest. Specific topics will be chosen by the instructor. The algebra typically includes items drawn from: elementary number theory, polynomials and ring theory, monoids and group theory, real closed fields, algebraic combinatorics, Groebner bases, algebraic geometry, field theory. The applications and related topics typically include items drawn from: complex analysis, coding theory, encryption, discrete mathematics.]

*See the list of courses with overlapping content at the end of the introduction.
Topics in projective geometry include homogeneous coordinates and the classical plane and relations to spherical geometry. Geometry include models of the hyperbolic plane is realized. Straightedge for example, the historical problem of the classical geometries that developed as spherical, and projective geometry— the Erdos-Ko-Rado theorems.

Nonconstructive methods: Ramsey's theorem, t-designs, application to statistical design. MATH 452 Classical Geometries

Emphasis is on diverse applications and on computational geometry, hyperplane linear programming, structural rigidity, probability laws, expectations, moments, and lambda-calculus reduction strategies. Equational logic. Herbrand Universes and unification. Rewrite rules and equational logic, Knuth-Bendix methods and the congruence-closure algorithm and lambda-calculus reduction strategies. Topics in Prolog, LISP, ML, or Nuprl. Applications to expert systems and program verification.

MATH 481 Mathematical Logic (also Philosophy 431)
Spring. 4 credits. Prerequisites: one logic course from the Mathematics Department at the 200 level or higher, one logic course from the Philosophy Department at the 300 level or higher, or permission of the instructor. Not offered 1999–2000. For description, see PHIL 432.

MATH 483 Intensional Logic (also Philosophy 436)
Fall. 4 credits. Prerequisites: one logic course at the 200 level or higher from the Philosophy Department or the Mathematics Department, or permission of instructor. Not offered 1999–2000. For description, see PHIL 436.

MATH 486 Applied Logic (also Computer Science 486)
Spring. 4 credits. Prerequisites: Mathematics 222 or 294; Computer Science 280 or equivalent (such as Mathematics 332, 336, 432, 434, 436, or 481); and some additional course in mathematics or theoretical computer science. Propositional and predicate logic, compactness and completeness by tableaux, natural deduction, and resolution. Equational logic. Herbrand Universes and unification. Rewrite rules and equational logic, Knuth-Bendix methods and the congruence-closure algorithm and lambda-calculus reduction strategies. Topics in Prolog, LISP, ML, or Nuprl. Applications to expert systems and program verification.

MATH 490 Supervised Reading and Research
Fall, spring. 1–6 credits. Supervised reading and research by arrangement with individual professors. Not applicable for material currently available in regularly scheduled courses.

MATH 500 College Teaching
Fall. 4 credits. Prerequisites: Mathematics 336, 432, 434, 436, or 481); and some additional course in mathematics or theoretical computer science. Propositional and predicate logic, compactness and completeness by tableaux, natural deduction, and resolution. Equational logic. Herbrand Universes and unification. Rewrite rules and equational logic, Knuth-Bendix methods and the congruence-closure algorithm and lambda-calculus reduction strategies. Topics in Prolog, LISP, ML, or Nuprl. Applications to expert systems and program verification.

MATH 503 History of Modern Mathematics

**MATH 505 Educational Issues in Undergraduate Mathematics**

Fall. 4 credits. Prerequisite: graduate standing or permission of the instructor. This course will examine various educational issues in undergraduate mathematics and the relationship of these issues to the mathematics itself. The precise choice of topics will vary, but the intent is that a balance of different views be presented and discussed. There will be extensive readings in the course and occasional guest lectures. Possible topics include: nature of proof and how and when to teach it, calculus "reform," teaching mathematics to school teachers, using writing, using history, alternative assessments, alternatives to lecturing, equity issues, effective use of technology, what is mathematical understanding and how do we recognize it, what should every mathematics major know, research in undergraduate mathematics.

**MATH 507 Teaching Secondary Mathematics: Theory and Practices**

Spring. 4 credits. This course will provide direct experience of new approaches, curricula and standards in mathematics education. Discussion of articles, activities for the secondary classroom and videotape of classroom teaching will be tied to in-class exploration of math problems. Experience in the computer lab, examining software environments and their use in the mathematics classroom will be included. Participants will be expected to write short papers. Nature of proof in class and present their opinions on issues.

**MATH 508 Mathematics for Secondary School Teachers**

Fall, spring. 1-6 credits. Prerequisite: secondary school mathematics teacher, graduate standing, or permission of instructor. May not be taught every semester. An examination of the principles underlying the content of the secondary school mathematics curriculum, including connections with the history of mathematics and current mathematics research.

**Graduate Courses**

Graduate-level mathematics courses (formerly 500 and 600 level) have been renumbered to conform to university guidelines regarding course level numbers. For details, see p. 5. The level numbers (first digit of the course number) have been raised by one, effective in the fall of 1997. Course content and level of difficulty remain unchanged.

Students interested in taking graduate courses in mathematics should consult the department for further details, times, and possible changes in courses as described below.

**MATH 611-612 Real and Complex Analysis**

611. fall, 612. spring. 4 credits each. 611: measure and integration, functional analysis. 612: complex analysis, Fourier analysis, and distribution theory.

**MATH 613-614** *Topics in Analysis*

613. fall, 614. spring. 4 credits each. 614 not offered 1999-2000.

**MATH 615-616** *Mathematical Methods in Physics*

615. fall, 616. spring. 4 credits each. Intended for graduate students in physics or related fields who have had a strong advanced calculus course and at least two years of general physics. A knowledge of the elements of finite dimensional vector space theory, complex variables, separation of variables in partial differential equations, and Fourier series will be assumed. The course overlaps with parts of Mathematics 120 (or 321)-422-423. Undergraduates will be admitted only with permission of instructor. Mathematics 615 is a prerequisite for 616. 616 not offered 1999-2000.

Topics designed to give a working knowledge of the principal mathematical methods used in advanced physics. Discussion of some basic notions: metric space, vector space, vector space linearity, continuity, integration. Generalized functions (Schwartz distributions). Fourier series and Fourier integrals. Saddle point method. Linear operators. Differential operators and integral operators, the equations and eigenvalue problems connected with them and the special functions arising from them. Elements of group theory. The representation group and its representations.

**MATH 617 Dynamical Systems**

**MATH 618 Smooth Ergodic Theory**

**MATH 619-620 Partial Differential Equations**

619. fall, 620. spring. 4 credits each. Basic theory of partial differential equations.

**MATH 621 Measure Theory and Lebesgue Integration**

Fall. 4 credits. Measure theory, integration, and Lp spaces.

**MATH 622 Applied Functional Analysis**

Spring. 4 credits. Basic theory of Hilbert and Banach spaces and operations on them. Applications.

**MATH 628 Complex Dynamical Systems**

Various topics in the dynamics of analytic mappings in one complex variable, such as: Julia and Fatou sets, the Mandelbrot set, Marie-Sad-Sullivan's theorem on structural stability. Local theory, including repelling cycles and the Yoccoz inequality, parabolic points and Ecale-Voronin invariants, Siegel disks and Yoccoz's proof of the Siegel Brjuno theorem. Quasi-conformal mappings and surgery: Sullivan's theorem on non-wandering domains, polynomials like maps and renormalization, Shishikura's construction of Herman rings. Puzzles, tableaux and local connectivity problems. Thurston's topological characterization of rational functions, the spider algorithm, and mating of polynomials.

**MATH 631-632-634 Algebra**

631. fall, 632. spring, 634. spring. 4 credits each. 632 not offered 1999-2000.

631: finite groups, field extensions, Galois theory, rings and algebras, tensor and exterior algebra. 632: Wedderburn structure theorem, Brauer group, group cohomology. 634: Dedekind domains, primary decomposition, Hilbert basis theorem, local rings.

**MATH 637 Analytic Number Theory**

**MATH 649 Lie Algebras**

**MATH 650 Lie Groups**

**MATH 651 Introductory Algebraic Topology**

Spring. 4 credits. Fundamental group and covering spaces. Homology theories for complexes and spaces.

**MATH 652-653 Differentiable Manifolds**

652. fall, 653. spring, 654. spring. 4 credits each. Prerequisites: advanced calculus, linear algebra (Mathematics 431), point set topology (Mathematics 453). This is an introduction to differential geometry and differential topology at the level of the beginning graduate student. 653 not offered 1999-2000.

**MATH 661 Geometric Topology**

Fall. 4 credits. An introduction to some of the more geometric aspects of topology and its connections with group theory. Possible topics: surface theory, 3-manifolds, knot theory, geometric and combinatorial group theory, hyperbolic groups, hyperbolic manifolds.
MATH 662 Riemannian Geometry  
Spring. 4 credits.  
Linear connections, Riemannian metrics and parallel translation. Covariant differentiation and curvature tensors. The exponential map, the Gauss Lemma and completeness of the metric. Isometries and space forms, Jacobi fields and the theorem of Cartan-Hadamard. The first and second variation formulas. The index form of Morse and the theorem of Bonnet-Myers. The Rauch, Hessian, and Laplacian comparison theorems. The Morse index theorem. The conjugate and cut loci. Submanifolds and the Second Fundamental form.

MATH 671-672 Probability Theory  
671, fall; 672, spring. 4 credits each.  

MATH 674 Introduction to Mathematical Statistics  
Spring. 4 credits. Prerequisites: Mathematics 671 or permission of instructor. Topics include an introduction to the theory of point estimation, consistency, efficiency, sufficiency, and the method of maximum likelihood. Convexity and basic concepts of decision theory are introduced. Concepts of sequential methods may be discussed.

MATH 681 Logic  
Spring. 4 credits.  
Basic topics in mathematical logic, including propositional and predicate calculus, formal number theory and recursive functions, completeness and incompleteness theorems. Other topics as time permits.

MATH 711-712 Seminar in Analysis  
711, fall; 712, spring. 4 credits each. 711 not offered 1999–2000.

MATH 713 Functional Analysis  
Spring. 4 credits.  
Topological vector spaces. Banach and Hilbert spaces, Banach algebras. Additional topics to be selected by instructor.

MATH 715 Fourier Analysis  
Fall. 4 credits.

MATH 717 Applied Dynamical Systems (also T&AM 776)  

MATH 722 Topics in Complex Analysis  
Spring. 4 credits.  
Selections of advanced topics from complex analysis, such as Riemann surfaces, complex dynamics, conformal and quasiconformal mapping. Course content varies.

MATH 723 Fourier Analysis  
Spring. 4 credits.  
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 731-732 Seminar in Algebra  
731, fall; 732, spring. 4 credits each.

MATH 735 Topics in Algebra  
Spring. 4 credits.  
Selection of advanced topics from algebra, algebraic number theory, and algebraic geometry. Course content varies.

MATH 740 Homological Algebra  

MATH 751-752 Seminar in Topology  
751, fall; 752, spring. 4 credits each.

MATH 753-754 Algebraic Topology  
753, fall; 754, spring. 4 credits. 754 not offered 1999–2000. The continuation of 651. Cohomology, cup products, Poincare duality, higher homotopy groups, fiber bundles, fibrations, vector bundles, characteristic classes, K-theory, spectral sequences, cohomology operations.

MATH 757-758 Topics in Topology  
757, fall; 758, spring. 4 credits each. Selection of advanced topics from modern algebraic, differential, and geometric topology. Course content varies.

MATH 767 Algebraic Geometry  
Fall. 4 credits.

MATH 771-772 Seminar in Probability and Statistics  
771, fall; 772, spring. 4 credits each.

MATH 777-778 Stochastic Processes  
777, fall; 778, spring. 4 credits each.

MATH 781-782 Seminar in Logic  
781, fall; 782, spring. 4 credits each.

MATH 785 Automata Theory  
Fall. 4 credits. Prerequisite: Mathematics 481 or similar mathematical logic course at 400-level or higher. Not offered 1999–2000. Basic results in finite and tree automata, including the algebraic approach to these topics. Buchi automata, with applications to computability theory and decidability problems. Rabin automata and their applications to decidability problems, boolean algebras, linear orderings, topology. Applications of automata theory to theoretical computer science in modal and temporal logic and concurrency.

MATH 786 Proof Theory  
Fall. 4 credits. Not offered 1999–2000. This course will cover basic ideas and methods of proof theory along with major recent developments motivated by computer science and knowledge presentation theory. The topics will include Gentzen style and "natural" derivations, normalization theorems for classical and constructive logics, connections with the typed lambda calculus, Curry-Howard isomorphism, arithmeticization of proof theory, incompleteness theorems, Loeb's theorem, modal logic of formal provability, models of arithmetic, consistency proofs and normalization theorems in typed lambda calculus.

MATH 787 Set Theory  

MATH 788 Topics in Applied Logic  
Fall. 4 credits. This course covers applications of the results and methods of mathematical logic to other areas of mathematics and science. Topics vary each year; some recent examples are: automatic theorem proving, formal semantics of programming and specification languages, linear logic, constructivism (intuitionism), non-standard analysis. The student is expected to be familiar with the standard results in graduate level mathematical logic.

MATH 790 Supervised Reading and Research  
Fall, spring. 1–6 credits.

MATH 901-902 Oliver Club Seminar  
Fall 901, Spring 902.

MATH 903-904 Olivetti Club Seminar  
Fall 903, Spring 904.

MATH 905-906 Occasional Seminar on Undergraduate Education  
Fall 905, Spring 906.

MATH 907-908 Educational Issues in Undergraduate Mathematics  
Fall 907, Spring 908.

MATH 911-912 Seminar in Analysis  
Fall 911, Spring 912.

MATH 913-914 Seminar in Dynamics and Geometry  
Fall 913, Spring 914.

MATH 949-950 Seminar in Lie Groups  
Fall 949, Spring 950.

MATH 951-952 Topics in Topology and Algebra  
Fall 951, Spring 952.

MATH 967-968 Seminar in Combinatorial and Algebraic Geometry  
Fall 967, Spring 968.
MUSIC

Department office: 255-4097.

Musical Performance and Concerts

Musical performance is an integral part of Cornell's cultural life and an essential part of its undergraduate academic programs in music. The department encourages music making through its offerings in individual instruction and through musical organizations and ensembles that are directed and trained by members of the faculty. Students from all colleges and departments of the university join with music majors in all of these ensembles:

Vocal ensembles
- Cornell Chamber Singers
- Cornell Chorale
- Cornell University Chorus
- Cornell University Glee Club
- Sage Chapel Choir

Instrumental ensembles
- Chamber Music Ensembles
- Cornell Chamber Orchestra
- Cornell Experimental Lab Ensemble
- Cornell Gamelan
- Cornell Jazz Ensembles
- Cornell Symphony Orchestra
- Cornell University Chamber Winds
- Cornell University Symphonic Band
- Cornell University Wind Ensemble
- Cornell University Wind Symphony

Information about requirements, rehearsal hours, and conditions for academic credit can be found in the following listings for the Department of Music. Announcements of auditions are posted during registration each fall term and, where appropriate, each spring term as well.

The university is also home to many student-run musical organizations, including the Big Red Marching Band and Big Red Pep Band, the Cornell Savoyards, and several a cappella groups. Information about these groups, too, is available through the Department of Music (255-4097), or the director of undergraduate studies (255-4079).

The Department of Music and the Faculty Committee on Music sponsor more than one hundred formal and informal concerts each year by Cornell's ensembles, faculty, and students and by distinguished visiting artist. The great majority of concerts are free and open to the public. Lectures and concerts are listed on the World Wide Web (http://www.mus.cornell.edu/). Additional information is available through the events office (255-4760).

Nonmajors

In addition to its performing, instructional, and concert activities, the department offers numerous courses for nonmajors, many of which carry no prerequisites and presuppose no previous formal training in music. Consult the following course listings, and for further information contact the department office, 129 White Hall 1999–2000 (255-4079), or the director of undergraduate studies (255-3423).

The Major

Two options are available for the student planning to major in music. Each carries the study of music to an advanced level through the integration of performance, music theory, and music history. Option I is a general course, not necessarily oriented toward eventual graduate or professional work in music. Option II is a more specialized and concentrated program, suitable for students who want to prepare for graduate or professional work in music.

All students contemplating a major in music under either option should arrange for placement examinations and advising in the department as early as possible, usually during the freshman orientation period. Information is available from the director of undergraduate studies. All students are expected to have chosen an advisor from among the department faculty at the time of application for major status.

Option I

Option I presupposes some musical background before entering Cornell. Prerequisites for admission to the major are completion of Music 152 and 154, at the latest, by the end of the sophomore year (the freshman year is preferable), with an overall grade of B- or better in each course. For further information, contact the director of undergraduate studies.

The requirements for the Bachelor of Arts degree with a major in music under Option I comprise the following:

1) in music theory: Music 251, 252, 253, 254, 351, 353, and one of the following: Music 451, 452, 453, 454, 455, 456.

2) in music history: sixteen credits in courses numbered 381 or above listed under Music History Courses for Majors. At least three of these courses must be drawn from the four-course sequence Music 381–384.

3) in performance: four semesters of participation in a musical organization or ensemble sponsored by the Department of Music (Music 331 through 346 and 421 through 448).

Option II

Option II presupposes considerable musical study before entering Cornell. Prerequisites for admission into the Option II program are previous acceptance as an Option I major and satisfactory completion of Music 252 and 254, normally by the end of the sophomore year. Students must apply to the department for formal acceptance as an Option II major. An Option II major concentrates in one of the three areas listed below. For Option II in performance, exceptional promise must be demonstrated, in part by a successful solo recital before the end of the sophomore year.

The requirements for the Bachelor of Arts degree with a major in music under Option II are:

1) completion of all the requirements for Option I, except as noted below, and

2) in addition:

a) in performance:

(1) the requirement for four semesters of participation in a musical organization or ensemble is waived (but such majors are expected to participate actively in chamber and other ensembles sponsored by the department);

(2) sixteen credits in individual instruction in the student's major instrument, or voice, earned by taking Music 323–324 throughout the junior and senior years.

b) in theory and composition or in history: twelve additional credits in this area of concentration at the 300 level or above, of which either four may be earned in Music 301 or 302 when taken after four credits, or eight may be earned in Music 401–402.

Honor.

The honors program in music is intended to provide special distinction for the department's ablest undergraduate majors. Qualified students are invited to become candidates by the faculty early in the second semester of their junior year. As soon as possible thereafter, the student forms a committee of three or more faculty members to guide and evaluate the honors work. Senior year candidates enroll in Music 401–402 with the chair of the committee as instructor. Candidates will be encouraged to formulate programs that allow them to demonstrate their musical and scholarly abilities, culminating in an honors thesis, composition, or recital, to be presented not later than April 1 of the senior year. A comprehensive examination administered by the candidate's committee is held not later than May 1. The level of honors conferred is based primarily on the candidate's performance in the honors work and secondarily on the candidate's overall record in departmental courses and activities.

Distribution Requirement

College of Arts and Sciences students may apply either one or two Music Department courses toward the distribution requirement in Group 4 (humanities and the arts). Neither freshmen seminars nor advanced placement credit count toward this requirement.

If one music course is counted for distribution, it must carry at least 3 credits, and it may not be in musical performance (Music 321–322, 323–324) or in organizations and ensembles (Music 331 through 346 and 421 through 448).

If two music courses are counted for distribution, they must total at least 6 credits, and at least one of the courses must be academic, not performance-oriented. The formal "course," however, may comprise either up to 4 credits for four credits earned in organizations and ensembles (Music 331 through 346 and 421 through 448), but not both.
ARTS AND SCIENCES - 1999-2000

Facilities

Music Library. The Music Library, in Lincoln Hall (White House 1999-2000), has an excellent collection of standard research tools. Its holdings consist of approximately one hundred-twenty thousand books, periodicals, and scores and forty-five thousand sound and video recordings. Particularly noteworthy are the collections of opera from all periods; twentieth-century scores and recordings; a large microfilm collection of Renaissance sources, both theoretical and musical; and a collection of eighteenth-century chamber music. In addition, the Department of Rare Books, in the Kroch Library, houses a collection of early printed books on music and musical manuscripts.

Concert Halls. The Department of Music sponsors more than one hundred concerts annually. Cornell's principal concert halls are Bailey Hall Auditorium (about 2000), Alice Statler Auditorium (about 900), Sage Chapel (about 800) and Barnes Hall Auditorium (about 280).

Rehearsal Spaces. The orchestras and bands rehearse in Bailey Hall, Barnes Hall, and Barton Hall; the Jazz Ensembles, Garban, and Chamber Ensembles rehearse in Lincoln Hall; and the choral ensembles are quartered in Sage Chapel. Practice studios in Lincoln Hall (White Hall 1999-2000) are available for individual practice by pianists, vocalists, and instrumentalists.

Twenty-two grand pianos and eight upright or studio pianos are housed in Cornell's offices, classrooms, and rehearsal spaces. In addition, our Center for Keyboard Studies includes two concert grand pianos (Steinway and Mason & Hamlin), two eighteenth-century fortepiano replicas (copies of Johann Andreas Stein and Anton Walter), an original Broadwood grand piano from 1827, an 1824 Graf fortepiano replica, one Dowd and one Hubbard harpsichord, and a Chaliss clavichord.

Digital/Electronic Equipment. A Macintosh Master studio is available for graduate student use (hours to be arranged) and occasional independent study use. The software used is Performer, Mosaic, Finale, and various Opcode patch editor/librarians. The instruments include a Yamaha KX89 MIDI Controller keyboard, a Yamaha TX802 FM synthesizer, an E-Mu Proteus XR, a Casio FZ 10M sampler and various other synthesizers. In addition, there are two MIDI work stations with additional instruments, including a Korg M1 synthesizer and an Akai S900 sampler.

Introductory Courses

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

MUSIC 100 Elements of Musical Notation
Fall or spring. 2-5. 1 credit. Prerequisite: enrollment in any three-credit course in music and permission of instructor. D. Conn.

This four-week course, given at the beginning of each term, will fulfill the requirement of basic pitch and rhythm and reading skills needed for introductory courses (except 101 and 103) and 200-level courses with prerequisites. The material covered in this course is no longer part of Music 105.

MUSIC 101 Popular Music in America: 1850-1985 (also AM ST 105)
Fall. 3 credits. 1-hour disc to be arranged. M. Hatch.

A survey of the history and diverse streams of popular music in America. Elementary vocabulary and techniques for describing, analyzing, and evaluating music. Relationshps between mainstream music, tributaries, and side-streams, and between folk, art, and popular music.

MUSIC 103 Introduction to the Musics of the World
Spring. 3 credits. 1-hour disc to be arranged. No previous training in music required. S. Pond.

Exploration of musical genres from selected regions of the world. The course examines both the elements of musical styles and the features of society that influence music. Listening assignments are major components of the course.

MUSIC 105 Introduction to Music Theory
Fall, spring, or summer. 3 credits. Plus two hours to be arranged. Experience in reading music is recommended. Fall, S. Tucker; spring, S. Pond.

An elementary, self-contained introduction to music theory emphasizing fundamental musical techniques, theoretical concepts, and their application. Intervals, scales, triads, basic concepts of tonality; extensive listening to music in various styles; analysis of representative works of Bach, Mozart, Haydn and Beethoven.

MUSIC 107 Hildegard to Handel
Fall. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. R. Harris-Warrick.

The music of Western Europe from the Middle Ages through the Baroque period. Starting from Gregorian chant and the monophonic works of Hildegard von Bingen, this course will survey composers and repertoires such as the troubadours, the Notre Dame School, Renaissance sacred polyphony, madrigals, the dance suite, concertos, cantatas, and will end in the early 18th century with works by Vivaldi, Bach, and Handel.

MUSIC 108 Mozart to Minimalism
Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. N. Zaslav.

A survey of Western art music in many genres from the second half of the 18th century to the present. Composers whose music will be studied include Haydn, Mozart, Beethoven, Schumann, Mendelssohn, Berlioz, Chopin, Wagner, Verdi, Liszt, Brahms, Mahler, Debussy, Strauss, Stravinsky, Bartók, Ives, Webern, Messiaen, Copland, Bernstein, Carter, Stucky, and Sierra.

MUSIC 201 Diction for Oral Presentation
Fall or spring. 1 credit. Prerequisite: permission of instructor. J. Kellock.

Introduction to the uses of the International Phonetic Alphabet for pronunciation of English, French, German, and Italian. Open to singers and non-singers. Assignments will vary according to musical experience. Singing students will be expected to perform their assignments. Students taking voice lessons for credit (321a-322a) must take Music 201 by the end of the third semester of lessons.

Music Theory

Students contemplating the music major are strongly advised to take Music 151, 152, 153, and 154 in the freshman year; in any case Music 152 and 154 must be completed no later than the end of the sophomore year. Students contemplating Option II must complete Music 252 and 254 by the end of the sophomore year.

MUSIC 151 Tonal Theory I
Fall. 3 credits. Prerequisites: admission by departmental placement exam and concurrent enrollment in or previous credit for Music 153, or equivalent. Intended for students expecting to major in music and other qualified students. E. Murray.

Detailed study of the fundamental elements of tonal music: rhythm, scales, intervals, triads; melodic principles and 2-part counterpoint; diatonic harmony and 4-part voice leading in root position and first inversion; analysis of phrase and period structure.

MUSIC 152 Tonal Theory II
Spring. 3 credits. Prerequisites: Music 151 and 153 or equivalent, and concurrent enrollment in or previous credit for Music 154. Intended for students expecting to major in music and other qualified students. E. Murray.

Continued study of voice leading and harmonic progression, including diatonic modulation, analysis of binary and ternary forms.

MUSIC 153 Musicianship I
Fall. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 151. Intended for students expecting to major in music and other qualified students. 3 hrs. TBA. E. Murray.

Sight singing: diatonic melodies in treble, alto, and bass clefs. Musical terms: nuance and expression marks.

MUSIC 154 Musicianship II
Spring. 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 152. Intended for students expecting to major in music and other qualified students. A grade of B- or better in Music 152 is required for admission to the music major. E. Murray.

Continued study of voice leading and harmonic progression, including diatonic modulation, analysis of binary and ternary forms.

MUSIC 239 Introduction to Improvisational Theory
Spring. 2 credits. Prerequisite: permission of instructor. Intended for performers in "jazz" and related styles. Not offered 1999-2000.

Tonal, modal, and blues harmonic resources, and the formal structures in which they are
embodied. Development of improvisational skills and creation of spontaneous compositions.

MUSIC 251 Tonal Theory III
Fall 3 credits. Prerequisites: Music 152 and 154 or equivalent, and concurrent enrollment in Music 253. D. Yearsley.
Continuation of diatonic and introduction to chromatic harmony. Emphasizes counterpoint, composition in small forms.

MUSIC 252 Tonal Theory IV
Spring 3 credits. Prerequisites: Music 251 and 253 or equivalent, and concurrent enrollment in Music 254. R. Sierra.
Study of and composition in larger forms, including sonata form; systematic study of chromatic harmony, voice-leading, and modulation; composition in chromatic style.

MUSIC 253 Musicianship III
Fall 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 251. 2 hours TBA. D. Yearsley.

MUSIC 254 Musicianship IV
Spring 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 252. 2 hours TBA. R. Sierra.

MUSIC 255 Materials of Twentieth-Century Music
Fall 3 credits. Prerequisite: Music 252 and 254 or equivalent, and concurrent enrollment in Music 255. S. Stucky.
Introduction to some techniques of twentieth-century music including extended tonality, modes, twelve-tone technique, set theory and new approaches to form and rhythm. Analysis of representative works by Debussy, Bartok, Webern, Hindemith, Schoenberg, Stravinsky, and others.

MUSIC 351 Musicianship V
Fall 2 credits. Prerequisite: concurrent enrollment in or previous credit for Music 251. 2 hours TBA. S. Stucky.

MUSIC 451 Counterpoint
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. S. Stucky.
Composition in the polyphonic vocal style of the late Renaissance.

MUSIC 452 Topics in Music Analysis
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1999-2000. J. Webster.
A survey of important analytical approaches to tonal music, including thematic-motivic relations, phrase-rhythm, large-scale paragraph construction, structural-tonal voice-leading, and relations among the movements in a multimovement work.

MUSIC 453 Introduction to Improvisational Theory
Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1999-2000. Staff.
Study and performance of tonal, modal, and blues harmonic resources; introduction to the formal structures in which these resources are embodied. Includes ear training, work at the keyboard, composing short pieces, and analyzing selected representative works of popular music and African-American art music from 1940 to 1970.

MUSIC 454 Composition Fall. 4 credits. Prerequisite: Music 251 or permission of instructor. R. Sierra.

MUSIC 455 Conducting Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. S. Tucker.
Fundamentals of score reading, score analysis, rehearsal procedures and conducting technique; instrumental and choral contexts.

MUSIC 456 Orchestration Spring. 4 credits. Prerequisite: Music 251 or permission of instructor. Not offered 1999-2000. Orchestra based on nineteenth- and twentieth-century models.

Music in History and Culture
MUSIC 221 History of Rock Music (also AM ST 223)
Spring. 3 credits. No previous training in music required. J. Peraino.
This course examines the development and cultural significance of rock music from its origins in blues, gospel, and Tin Pan Alley up to present-day genres of alternative rock and hip hop.

MUSIC 222 A Survey of Jazz (also AM ST 222)
Fall. 3 credits. Enrollment limited. S. Pond.
This course will trace historical developments in jazz from its African roots to the current diverse spectrum of improvisational styles that form popular, neoclassic, and innovative contemporary jazz music.

MUSIC 245 Gamelan in Indonesian History and Cultures
Fall or spring. 3 credits. Permission of instructor. No previous knowledge of musical notation or performance experience necessary. M. Hatch.
An introduction to Indonesia through its art. Elementary techniques of performance on the Javanese gamelan; a general introduction to Indonesian history and cultures, and the socio-cultural contexts for the arts there. Several short papers and one longer research report are required.

MUSIC 261 Bach and Handel
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1999-2000. D. Yearsley.

MUSIC 262 Haydn and Mozart
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1999-2000. N. Zaslaw.
Music for courts, theaters, churches, concerts, dancing, marching, public and private ceremonies, and domestic use by two extraordinarily different musical personalities who were friends, explored in its historical and socio-cultural contexts.

MUSIC 263 Beethoven
Fall. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1999-2000. J. Webster.
A survey of Beethoven's life, works, and influence. While the primary focus will be his musical style and its development, the course will also cover social-cultural factors and the psychology and reception of genius.

MUSIC 264 Musical Romantics
Spring. 3 credits. Prerequisite: any 3-credit course in music or permission of instructor. Not offered 1999-2000. D. Rosen.
This survey of music from 1815 to 1900 will be divided into five segments focusing on five composers (Schubert, Berlioz, Verdi, Wagner, and Mahler) and two or three segments on broader topics, such as musical nationalism in Russia, Fin de siecle Vienna, the art song, and the history of the piano and its music.

MUSIC 274 Opera
Fall. 3 credits. R. Harris-Warrick.
An introduction to major works of the operatic repertoire, with discussion of texts and theatrical performances as well as music Video recordings will be an integral part of the course; trips to live performances will be scheduled where possible.

MUSIC 275 Choral Sounds
Spring. 3 credits. Prerequisite: ability to read music or concurrent enrollment in Music 100. R. Harris-Warrick.
This course examines representative works composed for group singing, primarily from the Western choral tradition, but also including folk and popular styles, from the Middle Ages to the 20th century. Class will include discussion of performance practices as well as historical and stylistic issues, and will be integrated with local concert offerings.

MUSIC 276 The Orchestra and Its Music
Fall. 3 credits. Prerequisite: any three credit music course or permission of instructor. N. Zaslaw.
The music of, and the social structures supporting, large instrumental ensembles in the Western world, including Italian court festivals of the 16th century, string bands of the 17th century, Lully's ascendency at Paris and Versailles, and music of Purcell, Corelli, Vivaldi, Bach, Handel, Haydn, Mozart, Beethoven, Schubert, Schumann, Mendelssohn, Berlioz, Liszt, Wagner, Brahms, Tchaikovsky, Bruckner, Mahler, Strauss, Stravinsky, Schoenberg, Webern, Bartok, Shostakovich, Messiaen, Copland, Carter, Tower, Stucky, Sierra, and others.
### Music 388: Independent Study in Music History
Prerequisite: Music 152 or permission of instructor. 

This course focuses on the study of various topics in music history. Students enrolling in Music 398-399 participate in, but do not register for, an approved 200-level music history course and, in addition, pursue independent research and writing projects.

#### Fall
- **MUSIC 405: Operatic Contacts (also S HUM 405)**
  - Instructor: D. Ackerman
  - Fall. 4 credits. Limited to 15 students.
  - Prerequisite: permission of instructor. A. Groos.
  - See S HUM 405 for description.

#### Fall
- **MUSIC 418: Exploring the Israeli Folksong (also S HUM 418)**
  - Instructor: D. Rosen.
  - Fall. 4 credits. Limited to 15 students.
  - Prerequisite: permission of instructor. A. Groos.
  - See S HUM 418 for description.

#### Fall
- **MUSIC 474: Opera, History, Politics, Gender (also HIST 456, WOMNS 454, COML 459, HUM 459, ITALA 456)**
  - Instructor: M. Steinberg and S. Stewart.
  - Fall. 4 credits.
  - Prerequisite: any three-credit music course or proficiency in German or Italian.
  - See HIST 456 for description.

#### Fall
- **MUSIC 489: African American Music Innovators (also ASARC 489)**
  - Instructor: D. Ackerman.
  - Fall. 4 credits.
  - Prerequisite: Musical History, permission of instructor. Not offered 1999-2000.

#### Fall
- **MUSIC 490: American Musical Theatre (also English 454)**
  - Instructor: A. Groos.
  - Fall. 4 credits.
  - Prerequisite: any three-credit music course or proficiency in German or Italian.
  - To be offered 2000-01. D. Ackerman.

#### Fall
- **MUSIC 491: American Popular Song**
  - Instructor: E. Murray and C. Greenspan.
  - Fall. 4 credits.
  - Prerequisite: Musical History, permission of instructor. Not offered 1999-2000.

#### Fall
- **MUSIC 492: Music and Queer Identity**
  - Instructor: A. Groos.
  - Fall. 4 credits.
  - Prerequisite: Musical History, permission of instructor. Not offered 1999-2000.

### Independent Study

#### Fall
- **MUSIC 301-302: Independent Study in Music**
  - Instructor: J. Peraino.
  - Fall. 3 credits. Limited to 15 students.
  - Prerequisite: permission of instructor. Not offered 1999-2000.

### Honors Program

#### Fall
- **MUSIC 401-402: Honors in Music**
  - Instructor: J. Peraino.
  - Fall. 4 credits. Limited to 15 students.
  - Prerequisite: permission of instructor. Not offered 1999-2000.

### Digital Music and New Media

#### Fall
- **MUSIC 120: Learning Music through Digital Technology**
  - Instructor: D. Borden.
  - Fall or spring. 3 credits. Enrollment limited.
  - Prerequisite: permission of instructor. D. Borden.

### Additional Courses

#### Fall
- **MUSIC 372: Mind and Memory (also ENGL 301, S HUM 301, and THETR 301)**
  - Instructor: D. Ackerman.
  - Fall. 4 credits.
  - See S HUM 301 for description.

#### Fall
- **MUSIC 390: Culture of Renaissance II (also COMP LIT 362, ENGL 325, HIST 334, and ART 351)**
  - Instructor: W. Kennedy and C. Kaske.
  - Fall. 4 credits. Plus discussion section.

#### Fall
- **MUSIC 398-399: Independent Study in Music History**
  - Instructor: D. Ackerman.
  - Fall and spring. 4 credits.
  - Prerequisite: Musical History, permission of instructor. Not offered 1999-2000.

#### Fall
- **MUSIC 493: Women and Music (also WOMNS 496)**
  - Instructor: J. Peraino.
  - Fall. 4 credits.
  - Prerequisite: Musical History, permission of instructor. Not offered 1999-2000.

This course introduces the students to a critical examination of women's participation in Western European and American musical traditions. The course will focus on the various subject positions and critical perspectives that women hold in examples of music and writings about music. Of primary importance will be the concepts of "objective" vs. "subjective" approaches to the topic of the week. Topics will include approaches to history and criticism, women composers, women performers, women as objects, women's music, drag and androgyny, and women as listeners. Students will be asked to keep a journal of their reactions to the readings, listening assignments, and class discussions, and to write "objective" and "subjective" formal papers.

#### Fall
- **MUSIC 494: Love, Sex, and Song in Medieval France (also WOMNS 403)**
  - Instructor: J. Peraino.
  - Fall. 4 credits.
  - Prerequisite: Musical History, permission of instructor. Not offered 1999-2000.

This course explores the cult of courtly love and its inextricable relationship with singing. We will focus on secular music and poetry and relevant narratives of Southern and Northern France from the twelfth and thirteenth centuries, and consider issues such as constructions of gender and gender relations, music and sexuality in the Middle Ages, medieval misogyny, women's voices in courtly love lyric, the relationship of words and music, performance context and reconstruction.
three classroom concerts, some analysis and a final public concert.

**MUSIC 391 Media Arts Studio I (also THETR 391, ART 391, ARCH 391)**
Fall. 3 credits. Permission of instructor. See THETR 391 for description.

**MUSIC 392 Media Arts Studio II (also THETR 392, ART 392, ARCH 392)**
Spring. 3 credits. Permission of instructor. See THETR 392 for description.

**MUSIC 420 Introduction to MIDI Techniques**
Spring. 4 credits. Permission of instructor. D. Borden.

This course is an introduction to MIDI for students who are already at an advanced level in music composition. Three composition projects will be completed in collaboration with film, dance, and computer animation students.

**[MUSIC 620 Introduction to MIDI Techniques]**

**Musical Performance**

Cornell faculty members offer individual instruction in voice, organ, harpsichord, piano and fortepiano, violin, viola, cello, and some brass and woodwind instruments to those students advanced enough to do college-level work in these instruments. Lessons are available by audition only. They may be taken either without credit or, through Music 321–322, with credit. Other instruments may sometimes be studied for credit outside Cornell, but also by audition only (see Music 321h–322h).

**Lessons for beginners.** The Music Department can recommend outside teachers for those who wish to begin studying voice or an instrument. No credit is available for beginning instruction.

**Auditions.** Auditions are held at the beginning of each term for lessons for advanced students. Contact the Department of Music office (104 Lincoln Hall) for information.

**Fees.** The fee for a one-half hour lesson weekly, without credit, is $150 per term. For a one-hour lesson (or two half-hour lessons) weekly, without credit, the fee is $300. The fee in Music 321–322 for a one-hour lesson (or two half-hour lessons) for credit is $225 per term. All fees are non-refundable once lessons begin, even if the course is subsequently dropped.

**Scholarships.** Music majors receive a scholarship equal to the lesson fee listed above. Members of department-sponsored organizations and ensembles may, with the permission of the director of the organization, receive a scholarship of up to $150 of the Cornell fee for the type of lessons chosen during the term. These scholarships are intended only for lessons in the student’s primary performing medium. Scholarship forms, available in the Music Department office, are to be returned to the office within the first three weeks of classes.

**Practice rooms.** Practice-room fees for twelve hours weekly are $50 per term and for six hours weekly are $40 per term for a room with a piano. Practice-room fees for twelve hours weekly are $25 per term and for six hours weekly are $15 per term for a room without a piano. The fee for the use of the pipe organ is $50 for twelve hours weekly and $40 for six hours weekly. All fees are non-refundable.

**Earning credit.** Every 4 credits earned in Music 321–322, the student must have earned, or currently be earning, at least 3 credits in another music course (excluding freshman seminars, Music 321–322, 323–324, 331–343, or 421 through 480). These 3 credits must be earned prior to, or simultaneously with the first 2 credits in 321–322; they cannot be applied retroactively. Transfer credit for appropriate music courses already taken elsewhere may be used to satisfy this requirement with the approval of the department chair.

**Lessons taken outside Cornell.** Under certain conditions, advanced students may earn credit for lessons taken outside Cornell. An audition is required, and no credit can be granted for beginning instruction. For further information, read the description of Music 321h–322h and contact the Music Department office.

**MUSIC 321–322 Individual Instruction in Voice, Organ, Harpsichord, Piano, Strings, Woodwinds, and Brass**
Prerequisite: advanced students may register only after a successful audition with the instructor, usually scheduled during the first week of classes, and will receive credit only as described under “Earning credit,” above. Students may register for this course in successive years. Students, at the sole discretion of the instructor, earn 2 credits each term for a one-hour lesson (or two half-hour lessons) weekly accompanied by an appropriate practice schedule.

**MUSIC 321a–322a Individual Instruction in Voice**
321a, fall; 322a, spring. 2 credits each term. Prerequisite: successful audition. D. Yearsley.

**MUSIC 321c–322c Individual Instruction in Organ**
321c, fall; 322c, spring. 2 credits each term. Prerequisite: successful audition. M. Bilson, X. Bjerken and staff.

**MUSIC 321d–322d Individual Instruction in Harpsichord**
321d, fall; 322d, spring. 2 credits each term. Prerequisite: successful audition. D. Yearsley.

**MUSIC 321e–322e Individual Instruction in Violin or Viola**
321e, fall; 322e, spring. 2 credits each term. Prerequisite: successful audition. L. Case.

**MUSIC 321f–322f Individual Instruction in Cello**
321f, fall; 322f, spring. 2 credits each term. Prerequisite: successful audition. H. Hoffman.

**MUSIC 321g–322g Individual Instruction in Brass**
321g, fall; 322g, spring. 2 credits each term. Prerequisite: successful audition. Not offered 1999–2000. M. Scatteredday

**MUSIC 321h–322h Individual Instruction Outside Cornell**
321h, fall; 322h, spring. 2 credits each term. Prerequisite: successful audition. Coordinator: D. Conn.

All the standard orchestral and band instruments, keyboard instruments, guitar and voice, may, under certain conditions, be studied for credit with outside teachers. This course is available primarily for the study of instruments not taught at Cornell and when there is limited enrollment in Music 321–322. Prior approval and audition by a member of the faculty in the department is required, and credit may be earned only as described under “Earning credit,” above. Additionally, a departmental petition must be completed by the end of the third week of classes. For information and a list of approved teachers, contact the department office, 104 Lincoln Hall/12 White Hall (1999–2000).

**MUSIC 321i–322i Individual Instruction in Woodwinds**
321i, fall; 322i, spring. 2 credits each term. Prerequisite: successful audition. D. Conn.

**MUSIC 323–324 Advanced Individual Instruction**
323, fall; 324, spring. 4 credits each term. Open only to juniors and seniors majoring in music under Option II with concentration in performance and to graduate students. Option II majors whose lessons must be taken outside Cornell may apply to the department for financial assistance toward the costs; $225 per semester will normally be awarded to such students.

**Musical Organizations and Ensembles**

Students may participate in musical organizations and ensembles throughout the year. Permission of the instructor is required, and admission is by audition only (usually at the beginning of each semester), except that the Sage Chapel Choir and the Cornell Gamelan Ensemble are open to all students without prior audition. Registration is permitted in two of these courses simultaneously and students may register in successive years, but no student may earn more than 8 credits in these courses. Membership in these musical organizations and ensembles is also open to qualified students who wish to participate without earning credit.

**MUSIC 331–332 Sage Chapel Choir**
331, fall or summer; 332, spring. 1 credit. No audition for admission. R. Riley.

Open to all students and members of the University. Varied and demanding repertoire. The Sage Chapel Choir sings regularly in the Sunday Service of Worship which is broadcast on 870 WHCU-AM radio, and on special occasions throughout the year.
MUSIC 333-334 Cornell Chorus
333, fall; 334, spring. 1 credit. Prerequisite: permission of instructor. W 5:15-7:15 p.m. plus 2 hours to be arranged. S. Tucker.

MUSIC 335-336 Cornell University Glee Club
335, fall; 336, spring. 1 credit. Prerequisite: permission of instructor. W 7:30-9:30 p.m., plus 2 hours to be arranged. S. Tucker.

MUSIC 337 Wind Symphony
Fall. 1 credit. Prerequisite: permission of instructor. M W 4:45-6:30. D. Conn.

MUSIC 338 Symphonic Band
Spring. 1 credit. Prerequisite: permission of instructor. M W 4:45-6:30. D. Conn.

MUSIC 339-340 Cornell Jazz Ensembles
339, fall; 340, spring. 1 credit. Prerequisite: permission of instructor. W 6-8 p.m. K. Hester.

MUSIC 342 Wind Ensemble
Spring. 1 credit. Prerequisite: permission of instructor. M 7:30-9:30 and R 4:45-6:30. M. Scatterday.

MUSIC 343-344 Cornell Symphony Orchestra
343, fall; 344, spring. 1 credit. Prerequisite: permission of instructor. W 7:30-10:00 p.m. E. Murray.

[MUSIC 345-346 Introduction to the Gamelan G]
Concentrated instruction for beginning students in elementary techniques of performance on the Indonesian gamelan. Music 245 is a 3-credit course that complements the instruction in gamelan by an introduction to Indonesian history and cultures.

MUSIC 421-422 Cornell Chamber Orchestra
421, fall; 422, spring. 1 credit. Prerequisite: permission of instructor. T 5-6:30 p.m. J. Hus.
Study and performance of the chamber symphonies of Haydn, Mozart, and their contemporaries. For strings, woodwinds, and horns. More recent music may also be included in the spring.

MUSIC 437-438 Chamber Winds
437, fall; 438, spring. 1 credit. Prerequisites: enrollment in Symphonic Band, Wind Symphony or Wind Ensemble in the same semester as this course AND permission of instructor only. Fall, T R 4:45-6:30 p.m., D. Conn. Spring, T F 4:45-6:30 p.m., M. Scatterday.
A flexible instrumentation ensemble performing original woodwind, brass, and percussion music from Gabrieli brass choirs and Mozart serenades through more contemporary works such as Stravinsky’s Octet and new music premiers. The ensemble will perform on wind symphony, symphonic band and wind ensemble concerts in addition to several chamber concerts throughout the year.

MUSIC 439-440 Experimental Lab Ensemble
439, fall; 440, spring. 1 credit each term. Permission of instructor. W 8:30-10:30 p.m. K. Hester.

MUSIC 441-442 Chamber Music Ensemble
441, fall; 442, spring. 1 credit. Prerequisite: permission of instructor. J. Hus. Study and perform chamber music works from duos to octets for pianists, string and wind players.

MUSIC 443-444 Chorale
443, fall; 444, spring. 1 credit each term. Prerequisite: permission of instructor. F 4:30-6:15 p.m. Staff. Study and performance of selected choral music for mixed voices.

MUSIC 445-446 Cornell Gamelan Ensemble
445, fall; 446, spring. 1 credit each term. Enrollment limited. Prerequisite: permission of instructor. R 7:30-10:00 p.m. M. Hatch.
Advanced performance on the Javanese gamelan. Tape recordings of gamelan and elementary number notation are provided. Some instruction by Indonesian musicians is offered in most years.

MUSIC 447-448 Chamber Singers
447, fall; 448, spring. 1 credit each term. Prerequisite: permission of instructor. Plus 2 hours to be arranged. Shapovalov.

Graduate Courses
Open to qualified undergraduates with permission of instructor.

MUSIC 601 Introduction to Bibliography and Research
Fall. 4 credits. M 1:25-4. L. Coral. This course explores the nature of the discipline and introduces the many types of bibliographic tools, both printed and electronic, needed to pursue research in music.

[MUSIC 602 Analytical Technique]
A critical survey of various analytical methods in current use. Frequent analytical assignments and class presentations.

[MUSIC 603 Editorial Practice]

[MUSIC 604 Ethnomusicology: Areas of Study and Methods of Analysis]
Spring. 4 credits. Open to graduate students in anthropology, linguistics, psychology, sociology, and other cognate fields with permission of instructor. Not offered 1999-2000. M. Hatch. Major aspects of research into musical cultures of the world. Problems, theories, and methods, especially those affecting analytical terminology, transcription and analysis of sound events, and fieldwork.

MUSIC 622 Historical Performance Practicum
Fall. 4 credits. M. Bilson. The study of 18th- and 19th-century instrumental performance practices, with special emphasis on the string quartets of Haydn and the piano trios of Schubert. Open to qualified performers.

[MUSIC 653 Topics in Tonal Theory and Analysis]

[MUSIC 654 Topics in Post-tonal Theory and Analysis]

[MUSIC 657-658 Composition]
657, fall; 658, spring. 4 credits each term. F 1:25-4:00 p.m. plus 1 hour to be arranged. R. Sierra, S. Stucky.
See German Studies for description.

[MUSIC 677 Mozart: His Life, Works, and Times (also German Studies 757)]
Spring. 4 credits. N. Zaslaw.

[MUSIC 680 Topics in Ethnomusicology]

[MUSIC 681 Seminar in Medieval Music]
Topic: Medieval Music and Intellectual History.

[MUSIC 683 Music and Postmodern Critical Theory]
Fall. 4 credits. J. Peraino.
This course surveys the many critical theories that have been included under the umbrella of “postmodernism,” and that have fueled the debate between “old” and “new” styles of musicology. Readings will focus on structuralism and post-structuralism, feminist literary criticism, queer theory, and postmodern and post-colonialism, and their application in musicology and ethnomusicology. A broad spectrum of music will be examined along with the readings.

[MUSIC 684 Seminar in Renaissance Music]

[MUSIC 686 Seminar in Baroque Music]
Fall. 4 credits. N. Zaslaw.
Topic: Handel. Recent controversies over Handel’s career and music.

[MUSIC 688 Seminar in Classical Music]

[MUSIC 689 Seminar in Music of the Romantic Era]

[MUSIC 690 Seminar in Music of the Twentieth Century]
Spring. 4 credits. D. Rosen.
Topic: Britten.

[MUSIC 691-692 Historical Performance]
691, fall; 692, spring. 4 credits each term. Prerequisite: permission of instructor. Hours to be arranged. M. Bilson.
Lessons on the major instrument with supplementary study and research on related subjects.

[MUSIC 693 Seminar in Performance Practice]
Fall or spring. 4 credits. Not offered 1999-2000.

[MUSIC 697-698 Independent Study and Research]
697, fall; 698, spring. Credit to be arranged. Staff.

[MUSIC 785-786 History of Music Theory]
785, fall; 786, spring. 4 credits each term. Not offered 1999-2000.
Continued study of Sumerian grammar and culture.

[NES 433] Introductory Sumerian I (also NES 434)

[NES 434] Introductory Sumerian II (also NES 435–436)

[NES 435-436] Aramaic I-II (also JWST 435-436)

[NES 631] Introductory Sumerian I (also NES 433)

[NES 632] Introductory Sumerian II (also NES 434)

[NES 633-634] Elementary Akkadian I and II (also NES 333-334)
Fall, 633; spring, 634. 4 credits each term. Prerequisite for NES 634: 633 or permission of instructor. D. Owen.

An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide the background for the study of the language. Knowledge of another Semitic language helpful but not essential.

[NES 637-638] Ugaritic I & II (also NES 337-338)
Fall, 637; spring, 638. 4 credits each term. Prerequisite: knowledge of another Semitic language (preferably Hebrew). G. Rendsburg.

Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.

[NES 261] Ancient Seafaring (also ARKEO 278, JWST 261)

A survey of the history and development of archaeology under the sea. The role of nautical technology and seafaring among the maritime peoples of the ancient Mediterranean world—Canaanites, Minoans, Mycenaeans, Phoenicians, Hebrews, Greeks, and Romans—as well as the riverine cultures of Mesopotamia and Egypt. Evidence for maritime trade, economics, exploration and colonizaton, and the role of the sea in religion and mythology.

[NES 263] Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, and RELST 264)
Spring. 3 credits. Enrollment limited to 50 students. J. Zorn.

A survey of the principal archaeological developments in Canaan/Israel from the Neolithic period (ca. 9000 B.C.E.) to the Babylonian Exile (586 B.C.E.). Includes an introduction to archaeological methodology utilized in the reconstruction of ancient cultures, as well as the basic bibliography of the field. Emphasis will be placed on the use of archaeological data for understanding major problems in Israelite history and archaeology: such as the dating of the cultural milieu of the patriarchs, the dating and geographical setting of the Exodus and the Israelite conquest, and the origin and history of the Philistines. Special lectures will be devoted to topics such as: warfare, cult, food production and storage, writing and water systems. Recommended for students planning to participate in excavations in Israel.

[NES 366] The History and Archaeology of the Ancient Near East (also ARKEO 366, JWST 366)
Fall. 4 credits. Prerequisite: Archaeology 100 or permission of instructor. D. I. Owen.

A survey of the history and archaeology of the major civilizations of the Near East from the Persian Gulf to Syria and Anatolia. The course will cover the time span from the prehistoric period to the Persian conquest. Sumerian, Babylonian, Elamite, Elamite, West Semitic, Assyrian and Persian cultures will be discussed with particular emphasis on indigenous development and cross-cultural contacts.

[NES 197] Introduction to Near Eastern Civilization (also JWST 197 and RELST 197)

[NES 234] Arabs and Jews: Cultures in Confluence and Conflict (also JWST 234, RELST 234, and COM L 234)

[NES 244] Introduction to Ancient Judaism (also JWST 244 and RELST 244)

This course focuses on the development of Judaism as a religion and as a civilization in antiquity. Particular emphasis is placed on theological development culminating in monotheism, the role of the covenant, law and society, sacrifice and prayer as modes of worship, and similar topics. Jewish civilization is placed within the context of ancient civilizations (Canaan, Egypt, Babylon, Persia, Greece, Rome). Texts to be studied include selections from the Bible, the Apocrypha, the Dead Sea Scrolls, Josephus, and the Mishnah. All readings in English translation.

[NES 251] Introduction to Islam: Religion, Politics, and Society (also RELST 252)

[NES 255] Introduction to Islamic Civilization (also HIST 253, RELST 255)
Spring. 3 credits. D. Powers.

The seventh-century Arab conquests resulted in the creation of a vibrant new civilization that stretched from the Iberian Peninsula in the West to Central Asia and the borders of India in the East. We will follow the course of Islamic history from the birth of Muhammad until the Mongol sack of Baghdad in 1258, with special attention to the religion of Islam and to the achievements of Muslims in the fields of law, theology, literature, science, philosophy, art and architecture. Friday sections will be devoted to the reading and analysis of primary sources in English translation.

[NES 265] From Empire To Empire: Palestine Under Late Ottoman and British Rule (also JWST 265, HIST 260)
Fall. 4 credits. M. LeVine.

This course examines the social history of Palestine during the late Ottoman and Mandate periods from a variety of disciplinary perspectives with the goal of helping students better understand the continuities of changes that occurred in the transition from Ottoman to British rule.

[NES 291] Arab Society and Culture

The focus of this course is Arab society in the 20th century. We will start with a definition of the term "Arab" and address the issue of whether there is one or several Arab nations. This will be followed by a detailed examination of the following topics: the role of religion, history, and language in shaping modern Arab society; Arab identity and the development of Arab nationalism; the Arab-Israeli conflict; the conflict between secular and religious movements; the political systems of the different Arab countries; ethnic and religious groups; the distribution of resources (the super-rich and the destitute) and resulting conflicts; education; the family and the status of women. No prior knowledge of Arabic is required.

[NES 296] Issues in 20th Century Catholic Thought (also RELST 201)
Fall. 3 credits. D. McKenzie.

This course is designed to introduce the student to important themes in twentieth century Catholicism including ideas of the church, religious freedom, human dignity and human rights, the Eucharist, hierarchy within the church, the communion of saints, discrimination, options for and obligations to the poor, solidarity, and peacemaking. This exploration is rooted in historical studies as well as theological and ethical approaches. No previous study of Catholicism is presupposed. Consideration will be given to the study of the Second Vatican Council and the ways in which this council inspired changes in the Catholic Church with which the church continues to grapple. Particular attention will be given to understanding Catholicism in the United States and the tensions that exist between United States Catholics and the institutional church.
We will assess the significance of the globalization of the church for theology and ethical decision making.

NES 339 Islamic Spain: Culture and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339/699, NES 538)  @ # Fall. 4 credits. R. Brann.

This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusian Jewish subcultural adaptations of Andalusian Arabo-Islamic culture.

[NES 351 Introduction to Islamic Law (also NES 651, RELST 350, HIST 372/652) @ # Fall. 4 credits. Enrolled limited to 25 students. Not offered 1999-2000. D. Powers.]

While much of Christian Europe slumbered, Islamic cities of the Mediterranean and Asia shone with the brilliance of their many courts, patronized by rulers determined to outdo each other in the display of wealth and achievement. In centers such as Cairo, Kairouan, Baghdad, Cordoba, Granada, Isfahan, Herat, Agra, Lahore, and Istanbul, luxurious palaces were built to express not only power of sovereignty but intellectual prowess as well, for it was a sign of prestige for a prince to attract the greatest artists, poets, scientists and scholars to his court. The focus of this course will be the architectural and artistic setting of court life and the display of power in outward signs such as festivals, coinage, and public acts that confirmed and symbolized royal power and authority.

NES 357 Islamic Law and Society (also RELST 358) @ # Spring. 4 credits. D. Powers.

The Shari'ah, or sacred law of Islam, embodies the totality of God's commands that regulate the life of every Muslim in all its aspects. The Shari'ah comprises on an equal basis ordinances regarding worship and ritual as well as political and, in Western terms, strictly legal rules. This course examines the relationship between the Shari'ah and the major political and social institutions of Islamic society. Topics to be discussed will include the status of women, slaves, and non-Muslims; attitudes toward the economy and the arts, the significance of jihad (holy war), the nature of the Muslim city, and the relationship between the religious establishment and the government. Attention will be given to the function of the Shari'ah in the modern world, with special reference to the problems and challenges of legal reform.

NES 363 Society and Law in the Ancient Near East (also JWST 363) @ # Fall. 4 credits. T. Sharbach.

This course will study Near Eastern law codes from Mesopotamia, the Hittite world and Israel. We will consider what legal and ethical norms can be derived from these laws, as well as exploring the issue of the social realities the laws addressed. Our main sources will be the Code of Hammurabi, but we will also read contemporaneous judicial proceedings, contracts and narratives that shed light on the actual practice of law.

NES 464 The Herodotean Moment (also GOVT 454, HIST 454) @ # Spring. 4 credits. M. Bernal.

The basic premise of the seminar is that the concept of "Western civilization" is a problematic one in need of critical and historical analysis. The course will examine the evolution and transformation of this concept from antiquity to the twentieth century by focusing on selected moments (and in texts in which they are represented) of actual and/or perceptual encounters with other civilizations. It will also inquire into the political uses and abuses of the idea of the West, and the literary, psychological and anthropological dimensions of the idea's history.

NES 494 Modern Medicine and the Catholic Church (also RELST 494) Spring. 4 credits. D. McKenzie.

This course is designed to help students develop an understanding of the ethical approaches to contemporary health care which are based on the Catholic tradition in all of its breadth and diversity. Catholic tradition and medicine through critical analysis of relevant teachings and church statements are explored. Principle based approaches are considered as a conversation partner to examine the significance of a faith based approach. The goal of this course is to help students think analytically and critically about health care ethics. The ability to appreciate complexity and tolerate legitimate differences in moral methods and choices is an important framework for this class, as well as an interest in Catholic tradition and consideration of what constitutes just health care and the Church's longstanding commitment to medicine will provide a lens to examine critical issues such as: allocation of healthcare resources, the healing relationship and structure of medical care, autonomy and relationships in decision making, life and death treatment decisions, organ donation, abortion, new reproductive technologies, genetics and euthanasia. Attention will also be given to contemporary Roman Catholic scholars and theologians who offer feminist and liberation perspectives.

NES 497 Thomas Merton: Monk and Author (also RELST 497) Fall. 4 credits. D. McKenzie.

Thomas Merton (1915-1968), a major Catholic theologian of the twentieth century, enjoys a wide popularity based on his books, letters, and his participation in the Buddhist-Christian dialogue (Zen and the Birds of Appetite). Guest faculty from the Asian Studies Department will explore Merton's contributions from their perspective.

NES 639 Islamic Spain: Culture and Society (also NES 351, JWST 339, COM L 334, RELST 334, SPAN L 339/699) @ # Fall. 4 credits. R. Brann.

This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusian Jewish subcultural adaptations of Andalusian Arabo-Islamic culture.

NES 666 Conceptualizing Cultural Contact (also GERST 696, COM L 696) Spring. 4 credits. L. Adelson.

Since the West German and Turkish governments signed a labor recruitment agreement in 1961, the Turkish population in the Federal Republic has become the largest group of foreigners to reside permanently in Germany. While Turks have borne the brunt of xenophobic hostility in a country that may soon grant them citizenship, a lesser known fact is that Turkish-German authors of several generations have been producing German literature for over two decades. Departing from the sociological model that usually interprets this minority literature as a plea for German compassion or intercultural dialogue, this course juxtaposes prose fiction about Turkish-German contact and critical theories of difference with two goals in mind: 1) Students will be introduced to representative examples of Turkish-German literature, a cultural phenomenon whose scope and significance have grown, not lessened, over time. 2) Various modes of conceptualizing cultural contact within a given country will be explored and compared, methodologically in relation to each other and analytically with regard to the Turkish-German field.
[NES 239] Cultural History of the Jews of Spain (also JWST 239, COMP LIT 239, RELST 239, SPAN LIT 239) @ # Fall. 3 credits. Not offered 1999–2000. R. Brann.

This course will examine the history of European Jewry during the centuries of transition from the Middle Ages to the Modern Era. It examines the extent to which traditional Jewish life began to break down during this period and thus paved the way for the emergence of modern Jewry. Topics will include: the impact of the Spanish Expulsion of 1492; religious, intellectual, and socioeconomic dimensions of the Marrano dispersion, including Lurianic Kabbalah and the messianic movement of Shabbetai Tzevi; the reestablishment of Jewish communities in the West; the end of the “Golden Age” of Polish Jewish and the rise of Hasidism; the changing economic and political role of the Jews in the 17th and 18th centuries, and the impact of Enlightenment.

[NES 244] Introduction to Classical Jewish History (also RELST 248 and JWST 248) @ # Fall. 3 credits. Not offered 1999–2000.

[NES 255] Introduction to Islamic Civilization I (also RELST 255, HIST 253) @ # Spring. 3 credits. D. Powers.

For description see Near Eastern Civilization.

[NES 261] Ancient Seafaring (also JWST 261, ARKEO 275) @ # Fall. 3 credits. Not offered 1999–2000. D. Owen.

[NES 263] Introduction to Biblical History and Archaeology (also ARKEO 263, JWST 263, RELST 264) @ # Spring. 3 credits. Enrollment limited to 50 students. J. Zorn.

For description see NES 263 under Near Eastern Archaeology.

[NES 266] Jerusalem Through the Ages (also JWST 266, ARKEO 266, RELST 266) Fall. 3 credits. J. Zorn. Not offered 1999–2000.

This class will explore the history, archaeology and natural topography of Jerusalem throughout its long life, from its earliest remains in the Chalcolithic period (ca 4000 B.C.E.) to the present day, including Jebusite Jerusalem, Jerusalem as the capital of the Davidic dynasty, the Roman era city of Herod and Jesus, the Crusaders and medieval Jerusalem, and Ottoman Jerusalem as the city entered the modern era. Students will examine the original historical sources (e.g. the Bible, Josephus, and the Madaeba map) which pertain to Jerusalem. Slides and videos will be used to illustrate the natural features, man-made monuments, and artifacts which flesh out the textual material providing a fuller image of the world’s most prominent spiritual and secular capital.

This course will examine the history of Zionism as an ideology and political movement from its origins in the 19th century to the present. Attention will be paid to situating Zionism within the context of modern Jewish, European, and Middle Eastern History. Topics will include: the ideological foundations of Zionism; the role of Theodor Herzl and the rise of political Zionism; the Balfour Declaration, the development of the Yishuv; Zionism as a cultural identity for Diaspora Jewry; the British Mandate; the Arab-Zionist encounter; Zionist responses to the Holocaust; and Zionism and contemporary Israeli society.

[NES 294] Modern History of the Near East: Changing Politics, Society and Ideas (also JWST 294, GOVT 358) @ # Spring. 4 credits. Fulfills the college distribution requirement in history or the social sciences. M. Bloom.

This introductory course is designed to acquaint students with the main political, social, and cultural trends that have shaped the modern and contemporary history of the Near East. While discussing developments in the region during the nineteenth and twentieth centuries, the lectures will focus on such themes as modernization, nationalism, Islamic response, and Arab politics in global and regional contexts. The course does not presuppose any knowledge of Near Eastern languages.

[NES 295] Introduction to Christian History (also JWST 295, RELST 295, HIST 295) @ # Spring. 3 credits. K. Haines-Eitzen.

This course offers an introduction of Christianity from the apostle Paul through the 17th century, with an emphasis on the diversity of Christian traditions, beliefs, and practices. We will explore the origins of Christianity within the eastern Mediterranean world, the spread of Christianity, the development of ecclesiastical institutions, the rise and establishment of monasticism, and the various controversies that occupied the church throughout its history. The course will draw upon primary literary sources (from biblical literature to council proceedings, monastic rules, sermons, theological treatises, and biographies) as well as Christian art, inscriptions, music, and manuscripts.

[NES 321] Heresy and Orthodoxy in Early Christianity (also RELST 321) @ # Fall. 4 credits. K. Haines-Eitzen.

In this course we will explore the varieties of Christian thought and practice from the first through the fourth centuries. In its earliest centuries, Christianity consisted of a diverse range of movements, each of which was considered “heretical” by its opponents, one of which came to dominate all the others and so earned itself the designation “orthodoxy.” The “heresies” we will study include Adoptionism, Marcionism, Gnosticism, Montanism, Arianism, and Donatism. Consideration will also be given to the ways in which charges of “heresy” intersected with competing views about women in the early Church, the relationship between Judaism and Christianity, the construction of authority, and the content, function, and sacredness of early Christian books.

The active patronization of art, architecture, literature, and charitable works by Muslim women from the 12th century to the present was a sign of their public and personal power. This course will examine the meanings of female empowerment, ascribing it to family ties, the birth of male heirs, education, financial independence, etc., as well as its limitations in a world where the public institutions were run by men. It will particularly examine periods of change and the rise of self-conscious feminism in the modern age.

[NES 351] Introduction to Islamic Law (also NES 651, RELST 350, HIST 372/652) @ # Fall. 4 credits. Enrollment limited to 25 students. Not offered 1999–2000.

An examination of the Islamic world in the age of the great fourteenth-century historian Ibn Khaldun, with special attention to the political, social, and economic history of the Maghrib, or Muslim West.

[NES 358] Ottoman History: 1300–1600 (also HIST 446/646 and NES 650) @ # Fall. 4 credits. Not offered 1999–2000.

[NES 366] The History and Archaeology of the Ancient Near East (also ARKEO 366, JWST 366) @ # Fall. 4 credits. Prerequisite: Archaeology 100 or permission of instructor. D. I. Owen.

For description, see Near Eastern Archaeology.

This course is concerned with state and society in Pharaonic Egypt 3400–300 B.C.E. This will be combined with an introduction to Middle Egyptian, the official language of the Middle Kingdom 2000–1750 B.C.E and accepted as the “classical” language thereafter. This is a two-semester sequence course. In the fall we shall study the Egyptian state and society through secondary materials; in the spring we shall be reading primary sources concerned with everyday life, official reports and adventures abroad.

[NES 393] Religion and Politics in the Middle East (also RELST 393) Fall. 4 credits. Enrollment limited to 25 students. Not offered 1999–2000.

[NES 395] International Relations of the Middle East (also GOVT 392) @ Fall. 4 credits. Not offered 1999–2000.
[NES 399] Age of Empires: Architecture of the Ottoman, Safavid, and Mughal Dynasties  
Fall. 4 credits. D. F. Ruggles.  
The Ottomans, Safavids, and Mughals were the three great empires that coexisted in the Islamic world in the 16th, 17th, and 18th centuries. Their three architectures are all expressions of Islamic culture and stem from common sources, and yet the regional differences are marked. The Ottomans built monochromatic stone mosques with cascading low domes; the Safavids built tall domes sheathed in brilliant blue and white tiles; and the Mughals realized their architecture in the indigenous red sandstone and white marble of India. The themes addressed in class are the competition, imitation, and defiant rejection among the three empires; trade and communication with Europe; ethnicity and non-Islamic traditions; and regional versus pan-Islamic interests, and the symbolic construction of sovereign legitimacy with respect to both political dynasty and Islam. We will study the structure and engineering of great domes, the social use of space in mosque and palace planning, the expression of individual identity in tomb patronage, and competing political interests among contemporary and modern users of the building.

[NES 451] Seminar in Islamic History: 600-750 (also HIST 461/671, NES 650, and RELST 451)  
@ Spring. 4 credit. Enrollment limited to 25 students. Prerequisite: NES 257 or 258, or permission of instructor. Not offered 1999-2000. D. Powers.

[NES 453] Islam in China and Southeast Asia (also JWST 466)  

[NES 457] The Role of Women in Muslim Societies: Past, Present and Future (also Asian 423)  

[NES 459] Women, Men and the Law in Muslim Court (also WOMNS 458, RELST 459, HIST 457/657 and NES 655)  
@ Fall. 4 credits. Prerequisites: previous course in Islamic Studies helpful but not essential. Enrollment limited to 20 students. Not offered 1999-2000.

[NES 466] The Mythology and Religion of Ancient Mesopotamia and Canaan (also JWST 466, RELST 466)  
@ Spring. 4 credits. T. Sharlab.  
This course will introduce the religion of ancient Mesopotamia and of the Levant prior to the arrival of the Israelites. We will use translations of ancient Mesopotamian and Canaanite myths and hymns as the main area of investigation, but we also will look at archaeological and art historical evidence to explore the ancient Near East perception of the cosmos.

[NES 650] Seminar in Islamic History: 600-750 (also HIST 461/671, NES 451, and RELST 451)  

[NES 651] Introduction to Islamic Law (also NES 351, RELST 350, HIST 372/652)  

[NES 655] Women, Men and the Law in Muslim Court (also WOMNS 458, RELST 459, HIST 457/657 and NES 459)  
Fall. 3 credits. Prerequisites: previous course in Islamic Studies helpful but not essential. Enrollment limited to 20 students. Not offered 1999-2000.

[NES 658] Ottoman History: 1300-1600 (also HIST 446/646 and NES 358)  

[NES 659] Ottoman History: 1600-1923 (also HIST 441/641 and NES 359)  

[NES 213] Introduction to the Qur'an (also RELST 213)  
@ Spring. 3 credits. Not offered 1999-2000.

[NES 222] Introduction to the Bible I (also JWST 223, RELST 223)  
@ Fall. 3 credits. G. Rendsburg.  
This is the first course of a two-semester sequence. The course introduces students to the literature of the Hebrew Bible, which is accomplished by concentrating on the Torah and the historical material in Joshua through Samuel, that is, the material which covers the period from Israel's origin through King David. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, mythology, and law.

[NES 224] Introduction to the Bible II (also JWST 224, RELST 224)  
@ Spring. 3 credits. Not offered 1999-2000. G. Rendsburg.  
This is the second of a two-semester sequence, but one does not need to take NES 223 in order to take this course. The main goal is to introduce students to the literature of the Hebrew Bible. This is accomplished by concentrating on the historical material in Judges, the book of Ruth, the book of Job, that is, the material which covers the period from King Solomon through the end of the biblical era. Emphasis is placed on literary, historical, and theological matters. Special use is made of the numerous archaeological discoveries that have advanced our knowledge of ancient Israel. As such, the Bible is studied against the backdrop of ancient Near Eastern literature, history, religion, and mythology. (Note: students who have taken NES 227 Introduction to the Prophets are ineligible to take this course; NES 224 is intended to replace NES 227.)

[NES 229] Hebrew Bible and Arabic Qur'an in Comparative Perspective (also RELST 299, COM L 299, JWST 299)  
@ Spring. 3 credits. R. Brann.  
This course examines (in translation) the Hebrew Bible and Arabic Qur'an as foundational documents of their respective religious traditions and as texts by which their corresponding religious communities came to constitute and define themselves. The approach in this course will be comparative, analyzing literary aspects of the parallel narrative traditions on Creation, the Noah story, Abraham/Abraham and his sons, the Joseph/Yusuf cycle, as well as poshibility and Islamic elaborations of the Solomon/Sheba material. The class will also discuss the concepts of revelation, prophethood, community, and notions of history, eschatology, and apocalypse. In ancient Israel the major texts came forth in the Hebrew Bible and Arabic Qur'an. The problematic nature of revealed scripture in monotheistic religion and the limited relevance of the idea of "influence" in the Near Eastern context will also be studied.

[NES 313] Classical Arabic Texts (also RELST 313)  
Fall. 4 credits. Prerequisite: NES 311 or equivalent. Not offered 1999-2000. D. Powers.  
This course will be an advanced study of classical Arabic through a close reading of selected chapters of the Qur'an, together with the Qur'anic commentary (tafsir) and other relevant literature. Special attention will be given to grammar, syntax, and lexicography.

[NES 320] Women in the Hebrew Bible (also JWST 320, WOMNS 322)  
@ Spring. 3 credits. G. Rendsburg.  
This course features stories about women in the Hebrew Bible. Through literary readings of these texts we attempt to understand the portrayal of women (characteristics and roles assigned by male writers), the social reality represented, and the role of narrative in the promotion of ideologies. All texts in English translation. Hebrew texts optional.

There is one credit option for students who wish to meet 1 hour/week to read the texts in the Hebrew original (NES 326).
[MUSIC 787] History and Criticism  
A. Richards.

[MUSIC 789] Liturgical Chant in the West  

[MUSIC 901–902] Thesis Research  
901, fall; 902, spring. Up to 6 credits each term, to be arranged. Offered for S/U only. Limited to doctoral students in music who have passed the Admission-to-Candidacy Exam.

NEAR EASTERN STUDIES

The Department

The Department of Near Eastern Studies (360 Rockefeller Hall, 255-6275) offers courses in the civilizations of the Near East including archaeology, history, religions, languages, and literatures. Students are encouraged to take an interdisciplinary approach to the religions and cultures of the region which has had an important impact on the development of antique, medieval, and modern civilization. The department's course offerings treat the Near East from the dawn of history to the present and emphasize methods of historical and literary analysis.

Distribution Requirements

Any two Near Eastern Studies history or archaeology courses at the 200, 300 or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the social sciences/history. Any two Near Eastern Studies civilization or literature courses at the 200, 300, or 400 level that form a reasonable sequence or combination satisfy the distribution requirement in the humanities. NES 197, 198 or a 200-level survey course plus any other Near Eastern studies course will constitute a sequence to fulfill the distribution requirement in either social sciences/history or humanities, depending on the second course used in combination with 197, 198 (or a 200-level survey course). All 200 or 300-level language courses may fulfill the humanities requirement.

The Major

The precise sequence and combination of courses chosen to fulfill the major is selected in consultation with the student's adviser. All majors must satisfy the following requirements (no course may be used to satisfy two requirements; S-U options not permitted):

A. Qualification in two Near Eastern languages or proficiency in one.
B. Three- or four-credit NES courses, which must include the following:  
1. NES 197 or 198 (when NES 197–198 are not offered, students may substitute a 200-level survey course with the approval of the director of undergraduate studies).
2. Two 200-level NES survey courses, one whose chronological parameters fall within the period 3000 B.C.E. to 600 C.E., and one whose chronological parameters fall within the period 600 C.E. to the present. The following are examples (a complete list can be obtained in the department office):
   - 3000 B.C.E. to 600 C.E.
     - NES 223, Introduction to the Bible
     - NES 263, Introduction to Biblical History and Archaeology
     - NES 248, Introduction to Classical Jewish History
   - 600 C.E. to the present
     - NES 233, The Lyrics of Love and Death: Medieval Hebrew and Arabic Poetry in Translation
     - NES 255, Introduction to Islamic Civilization
     - NES 258, Islamic History 1258–1914
     - NES 294, Modern History of the Near East
3. At least two NES courses at the 300 level or above (one of which may be NES 301, 302, 311, or 312).

Prospective majors should discuss their plans with the director of undergraduate studies before formally enrolling in the department. To qualify as a major, a cumulative grade average of C or better is required.

Honors. Candidates for the degree of Bachelor of Arts with honors in Near Eastern Studies must fulfill the requirements of the appropriate major study and enroll in the honors course, NES 499, in the fall and spring semesters of their senior year. For admission to the honors program, candidates must have a cumulative average of B+ or better and have demonstrated superior performance overall in Near Eastern Studies courses. After consulting their major adviser, candidates should submit an outline of their proposed honors work to the department director during the second semester of their junior year.

Study abroad. Near Eastern Studies majors may choose to study in the Near East during their junior year. There are various academic programs in the countries of the Near East that are recognized by the Department of Near Eastern Studies and that allow for the transfer of credit. Archaeological field work on Cornell-sponsored projects in the Near East may also qualify for course credit.

Freshman Seminar

NES 127 What's Love Got To Do With It? Marriage and Courtship in the Hebrew Bible  
Fall and spring. 3 credits. Enrollment limited to 15. Not offered 1999–2000.  
C. Smith.

We will read selections from the Hebrew Bible (in translation) and examine the portrayal of courtship and marriage in its laws, poetry, and narratives.

NES 150 Discovering Islam  
D. Powers.

Against the backdrop of Western stereotypes, we will explore Islamic society and culture from within, with special attention to prophecy and revelation, ritual practice, criminal law, the status of women, and the Islamic understanding of death and resurrection.

NES 163 Things The Prophets Never Told You: Archaeology and the Religion of Ancient Israel (also JWST 163)  
Fall. 3 credits. Enrollment limited to 15 students. J. Zorn.

A casual reading of the Hebrew Scriptures might lead one to believe that the normative religion of the Israelites was that spelled out in the Torah and Prophets. However, a more critical appraisal of the Biblical texts, along with an analysis of extra-Biblical texts and archaeological materials, demonstrates that the Israelites were often closer to their pagan neighbors than to modern Judaism or Christianity. Students will explore in their essays these similarities and differences. Topics may include: cult prostitution, magic, funerary rites, temple ritual, Hebrew mythology, etc. Readings will be from the Hebrew Bible, translations of extra-biblical texts, articles on archaeology and modern synthetic treatments of Israelite cult.

NES 190 Catholic Social Action (also RELST 190)  
Spring. 3 credits. Enrollment limited to 15 students. D. McKenzie.

This course will focus on the history and development of Catholic Social Teaching, which calls on Catholics to work to eliminate injustice and build a compassionate world. Attention will be given to several themes including the economy (the rights of workers and owners, the rights to private property and its limitations, economic rights and initiative, debt and development), peace-making, capital punishment, option for the poor, and global solidarity. The class will analyze critically major encyclicals, popes' and bishops' statements, as well as attend to selected grassroots movements that inspired this teaching. The course is designed as a comprehensive introduction to the study of Catholicism and its social mission in the twentieth century. Participants will assess the strengths and weaknesses of Catholic Social Teaching and evaluate its contributions to human rights discourse.

Language Courses

NES 101–102 Elementary Modern Hebrew I and II (also JWST 105-106)  
101, fall; 102, spring. 6 credits each term. Prerequisite for NES 102: 101 or permission of instructor. Satisfactory completion of NES 102 fulfills the qualification portion of the language requirement. Enrollment limited to 17 students in each section.  
S. Shoer.

Intended for beginners. This course provides a thorough grounding in reading, writing, grammar, oral comprehension and speaking. Students who complete the course will be able to function in basic situations in a Hebrew-speaking environment.

NES 111–112 Elementary Arabic I and II  
111, fall; 112, spring. Enrollment limited to 17 in each session. 6 credits each term. Prerequisite for Arabic 112: Arabic 111 or permission of instructor. M. Younes.
The course provides a thorough grounding in all language skills: listening, speaking, reading, and writing. It starts with spoken Arabic and gradually integrates Modern Standard Arabic with listening and reading texts. Emphasis will be on learning the language through using it in meaningful contexts. The student who successfully completes the two-semester sequence will be able to: 1) understand and actively participate in simple conversational situations involving basic vocabulary and practical and social situations (introductions, greetings, school, home and family, work, simple instructions, etc.); 2) read Arabic material of limited complexity and variety (simple narrative and descriptive texts, directions, etc.); 3) write notes and short letters describing an event or a personal experience. An important objective of the course is to familiarize students with basic facts about the geography, history, and culture of the Arab world.

NES 117-118 Elementary Turkish I & II
117, fall; 118, spring. 4 credits each term. Prerequisite: NES 117 is NES 117 or permission of instructor. Enrollment limited to 17 students. H. Unlu.

Intended for beginners. This course is designed to develop proficiency and communication in modern Turkish in the four basic language skills: speaking, listening, reading, and writing. Facts about the geography, history, and culture of Turkey are built into the teaching/learning process emphasizes the functional use of the language and contextual communication in the four skills. In the spring term, the course will continue to help students acquire the basic vocabulary and fundamental structures of Turkish. Students will proceed to use the major points of Turkish grammar, conduct oral (informal conversation and structured situations) and written practice, and advance their reading skills. The course will place increased emphasis on the development of conversational, reading, and writing skills while focusing on communicative drills and activities that involve student interaction.

NES 123-124 Elementary Biblical Hebrew I & II (also JWS 123-124, RELST 123-124)
123, fall; 124, spring. 3 credits each term. Enrollment limited to 17 students. Y. Chen.

The course is intended to develop basic proficiency in reading the Hebrew Bible. The first semester will emphasize introductory grammar and vocabulary. The second semester will focus on reading selected passages in the Hebrew Bible, with further development of vocabulary and grammar.

NES 133-134 Qur’anic and Classical Arabic
133, fall; 134, spring. 4 credits each semester. M. Younes.

This course is designed for students who are interested in reading the language of the Qur’an and Hadiths (Sayings of the Prophet) with accuracy and understanding. Authenticated texts in the form of the Qur’an and Hadiths will be presented and analyzed, and basic grammatical structures will be discussed, explained, and practiced systematically. Interested students will be encouraged to memorize from the texts. At the end of the two-semester sequence, the successful student will have mastered a working vocabulary of over 1000 words, correct pronunciation, and the most commonly used grammatical structures. In addition, the course will provide the student with a firm foundation on which to build an advanced study of Classical Arabic.

NES 201-202 Intermediate Modern Hebrew I and II (also JWS 201-202)
201, fall; 202, spring. Enrollment limited to 15 students in each section. 4 credits each term. Prerequisites for NES 201: 102 or permission of instructor; for NES 202, 201 or permission of instructor. N. Scharf. A sequel to NES 101-102. Continued development of reading, writing, grammar, oral comprehension, and speaking skills. The course introduces Hebrew literature and Israeli culture through the use of texts and audio-visual materials.

NES 211-212 Intermediate Arabic I and II
211, fall; 212, spring. Enrollment limited to 15 students in each section. 4 credits each term. Prerequisites: for NES 211, one year of Arabic or permission of instructor; for NES 212, 211 or permission of instructor. Staff.

A sequel to NES 111-112. Continued development of the four language skills through extensive use of graded materials on a wide variety of topics. Increasing attention will be given to natural pronunciation and grammatical accuracy, but the main focus will be on developing communication skills. The student who successfully completes NES 212 will be able to: 1) understand and express himself or herself in Arabic in situations beyond the basic needs; 2) read and comprehend written Arabic of average difficulty; 3) write a letter, a summary of a report or a reading selection. An appreciation of Arabic literature and culture will be sought through the use of authentic materials.

NES 301-302 Advanced Modern Hebrew I and II (also JWS 301-302)
301, fall; 302, spring. Limited to 15 students. 4 credits each term. Prerequisite: NES 301-202 or equivalent, with permission of instructor. Prerequisite for NES 302: 301 or equivalent, with permission of instructor. This sequence may be used to fulfill the humanities distribution requirement in literature. Limited to 15 students. N. Scharf.

Advanced study of Hebrew through the analysis of literary texts and expository prose. This course employs a dual perspective: language is viewed through literature and literature through language. Students will develop composition skills by studying language structures, idioms, and various registers of style.

NES 311 Advanced Arabic I
Fall. 4 credits. Prerequisite: NES 212 or permission of instructor. Limited to 15 students. Staff.

Students will be introduced to authentic, unedited Arabic language materials ranging from poems, short stories, and plays to newspaper articles dealing with social, political, and cultural issues. Emphasis will be on developing fluency in oral expression through discussions of issues presented in the reading selections. A primary objective of the course is the development of writing skills through free composition exercises in topics of interest to individual students.

NES 312 Advanced Arabic II
Spring. 4 credits. Limited to 15 students. Prerequisite: NES 311, or permission of instructor. Staff.

This course is a continuation of NES 311 using similar but more challenging materials. There will be more focus on the writing skills, the development of native-like pronunciation, and accurate use of grammatical structures than in NES 311. Each student will be required to make an oral presentation in Arabic on a topic of his/her choice and submit a written version of the presentation.

NES 333-334 Elementary Akkadian I & II (also NES 633-634)
333, fall; 334, spring. 4 credits each term. Prerequisite for NES 334: 333 or permission of instructor. Prerequisite for NES 634: 633 or permission of instructor. D. I. Owen.

An introduction to the Semitic language of the Akkadians and Babylonians of ancient Mesopotamia. Utilizing the inductive method, students are rapidly introduced to the grammar and the cuneiform writing system of Akkadian through selected readings in the Code of Hammurapi, the Descent of Ishtar, and the Annals of Sennacherib. Secondary readings in comparative Semitic linguistics, the position of Akkadian in the family of Semitic languages and on the history and culture of Mesopotamia provide a background for study of the language. Knowledge of another Semitic language is helpful but not essential.

NES 337-338 Ugaritic I & II (also NES 637-638)
337, fall; 338, spring. 4 credits. Prerequisite: knowledge of another Semitic language (preferably Hebrew). G. Rendsburg.

Study of the language and literature of ancient Ugarit, an important site in northern Canaan. Special attention is paid to the relationships between Ugaritic and Hebrew and between Canaanite literature and the Bible.

NES 416 Structure of the Arabic Language (also LING 416)

NES 420 Readings in Biblical Hebrew Prose (also JWS 420, RELST 420)
Spring. 4 credits. Prerequisite: one year of Hebrew, Biblical or modern. Course may be repeated for credit. Not offered 1999-2000. G. Rendsburg.

An advanced course in reading selected portions of the Hebrew Bible. Emphasis will be placed on the philological method, with attention to literary, historical, and comparative concerns.

NES 433 Introductory Sumerian I (also NES 633)
Fall. 4 credits each semester. Prerequisite: permission of instructor. Not offered 1999-2000. D. Owen.

This course will consist of an introduction to the Sumerian cuneiform script and grammar of the third millennium B.C.E. Readings in selected Sumerian economic, legal, and historical inscriptions, a basic introduction to Sumerian grammar and scripts, linguistic connections, and a survey and discussion of Sumerian civilization and culture. Students who have taken or plan to take Akkadian, Hebrew, or Hittite linguistics or are otherwise interested in the history of language should consider this course.
Wish to meet one hour each week to read the An in-depth exploration of early Christian Gnosticism—as its literatures, beliefs, and practices. Early Christian Gnosticism came to be considered heretical by early proto-orthodox Church Fathers. In this course, however, we will not simply read the condemnations written by the opponents of gnostic thought; rather, we will focus our attention on reading (in English translation) substantial portions of the texts written by the Gnostics themselves and found at Nag Hammadi, Egypt, in 1945. We will explore gnostic ideas about the world, creation, salvation, God, humanity, and the human body, while also attending to issues of gender, asceticism, and scriptural interpretation as they intersect with gnostic thought. To set gnostic literature within a socio-historical context, we will discuss other relevant ancient texts and scholarly theories about the Jewish and Hellenistic roots of early Christian Gnosticism.

NES 329 Intro to the New Testament— Seminar (also JWST 329, RELST 329) Fall. 1 credit. Prerequisite: concurrent enrollment (or past enrollment) in NES 229 and one year of ancient Greek.

A weekly seminar that may be taken in addition to NES 229. The seminar will provide an opportunity to read portions of the New Testament and other early Christian writings in Greek. We will work on grammatical and textual portions of the texts as well as other problems related to translations.

NES 339 Islamic Spain: Culture and Society (also JWST 339, COM L 334, RELST 334, SPAN L 339/699) Fall. 4 credits. R. Brann.

For description, see NES Civilization.

NES 345 The Islamic Book Fall. 4 credits. D. F. Ruggles.

Books both as material objects and texts will be the subject of this course, and for both we will study first-hand the Arabic and Persian works in the rare book and manuscript collections of the Kroch Library and the Johnson Museum. In the first half of the course, we will look at the materials and techniques of manuscript making (parchment, ink, paper, and bindings) and the visual organization of the page. We will proceed to the non-figural decoration of Qurans, prayerbooks, and secular texts with calligraphy, painted frontispieces and gold illumination. We will then study the various extant illustrated manuscripts of major works of literature and history, such as the Maqamat, Bayan va Ryad, the world history of Rashid al-Din, Baharnama, Suleymannama and the Mongol, Timurid and Safavid versions of the Shabnameh. Projects will consist of creating an exhibition (either in electronic form or for glass display cases) with an accompanying explanatory catalogue.

Beliefs about gender, sexuality, and the human body were remarkably interwoven with political, religious, and cultural disputes in early Christianity. In this course we will explore the construction and representation of gender, sexuality, and the body in various forms of Christianity from the first century through the fourth. Asceticism and celibacy, veiling and unveiling, anoss-pressing and Gnostic androgyne, marriage and childbirth, and homosexuality will be among the topics considered, and our sources will range from the New Testament, early Christian apocrypha, martyrologies, and patristic writings to Greek medical texts, Jewish midrash, Roman inscriptions, and Egyptian erotic and magical spells. Current interdisciplinary and theoretical studies on gender, ideology, sexuality, and power will aid us in our analytical approaches to the ancient materials.

NES 400 Seminar in Advanced Hebrew (also JWST 400) Fall. 4 credits. Prerequisite: NES 302/JWST 302 or permission of instructor. Enrollment limited to 15 students.

N. Scharf.

Continuation of work done in NES/JWST 302, with less emphasis on the study of grammar. We will read and discuss texts of cultural relevance, using articles published in Israeli newspapers and works by authors in each of the three principal genres: poetry, theater and novels. The course may be repeated for credit with permission of instructor.

NES 420 Readings in Biblical Hebrew Prose (also JWST 420 and RELST 420) Spring. 4 credits. Prerequisite: one year of biblical or modern Hebrew. Course may be repeated for credit. Not offered 1999–2000. G. Rendsburg.

An advanced course in reading selected portions of the Hebrew Bible. Emphasis will be placed on the philological method, with attention to literary, historical, and comparative concerns.

NES 421 Readings in Biblical Hebrew Poetry (also JWST 421, RELST 421) Fall. 4 credits. Prerequisite for NES 421: one year of Biblical or Modern Hebrew. Course may be repeated for credit. G. Rendsburg.

Advanced course in reading selected poems of the Hebrew Bible. Chapters to be studied include various Psalms, parts of the Book of Job, various prophetic speeches, and early compositions such as Genesis 49 and Judges 5. Emphasis will be placed on the philological method, with attention to literary, historical, and comparative concerns as well.

This course examines the culture and society of al-Andalus (Islamic Spain) from 711, when Islam arrived in Iberia, until 1492 and the demise of Nasrid Granada. Through extensive discussion and analysis of Arabic, Latin, and Hebrew primary documents and literary texts of various genres (in translation), the course challenges ideological bases of conventional thinking regarding the social, political and cultural identity of medieval "Spain." Among other things, the class investigates the origins of lyric poetry, the relationships among the various confessional and ethnic communities in al-Andalus and the problems involved in Mozarabic Christian and Andalusian Jewish subcultural adaptations of Andalusian Arabo-Islamic culture.

NES 491-492 Independent Study, Undergraduate Level Fall and spring. Variable credit. Prerequisite: permission of instructor.

NES 499 Independent Study, Honors Fall and spring. Variable credit. Prerequisite: permission of instructor.

NES 691-692 Independent Study: Graduate Level Fall and spring. Variable credit. Prerequisite: permission of instructor.

The Program of Jewish Studies

The Program of Jewish Studies encompasses a broad spectrum of disciplines that includes civilization, history, language, literature, philology, archaeology and religion. The program offers students the opportunity to take a wide variety of courses in Jewish Studies whose subjects are not represented in the Department of Near Eastern Studies. Students interested in planning a program in Jewish Studies should consult with the director, Professor David I. Owen, 360 Rockefeller Hall. For complete listings and descriptions, see Program of Jewish Studies under "Special Programs and Interdisciplinary Studies."
JWST 236 Israel: Literature and Society
(also NES 236) #
Fall. 4 credits. Y. Halevi-Wise.

PHILOSOPHY

Emeritus: C. A. Ginet.

The study of philosophy provides students with an opportunity to become familiar with some of the ideas and texts in the history of thought while developing analytical skills that are valuable in practical as well as academic affairs. It affords the excitement and satisfaction that come from understanding and working toward solutions of intellectual problems. The curriculum includes offerings in the history of philosophy, logic, philosophy of science, ethics, social and political philosophy, metaphysics, and theory of knowledge. Any philosophy course numbered in the 100s or 200s is suitable for beginning study in the field. Sections of Philosophy 100 are part of the freshman writing seminar program; they are taught by various members of the staff on a variety of philosophical topics, and because of their small size (seventeen students at most) they provide ample opportunity for discussion. Students who want a broad introduction to philosophy may take Philosophy 101, but many students with special interests may find that the best introduction to philosophy is a 200-level course in some particular area of philosophy; such courses have no prerequisites and are usually open to freshmen.

The Major

Students expecting to major in philosophy should begin their study of it in their freshman
or sophomore year. Admission to the major is granted by the director of undergraduate studies of the department on the basis of a student's work during the first two years. Normally the student must have completed two philosophy courses with grades of B or better. Eight philosophy courses are required for the major. They must include at least one course in ancient philosophy (Philosophy 210 or 211, or a course with a large component on Plato or Aristotle), at least one course in classical modern metaphysics and epistemology (Philosophy 212 or a course on the empiricists, the rationalists, or Kant), and a minimum of three courses numbered above 300. Students admitted to the major after fall 1996 will be required to take a minimum of six philosophy courses numbered above 200, and may not count more than one section of Philosophy 100 toward the major. A course in formal logic (e.g., Philosophy 251), while not required, is especially recommended for majors or prospective majors. Courses numbered 191–199 do not count toward the major.

Philosophy majors must also complete at least 8 credits of course work in related subjects approved by their major advisors. Courses may also serve as teaching or research aides, working with faculty members familiar with their work.

Honors. A candidate for honors in philosophy must be a philosophy major with an average of B- or better for all work in the College of Arts and Sciences and an average of B or better in all work in philosophy. In either or both terms of the senior year a candidate for honors enroll in Philosophy 490 and undertakes research leading to the writing of an honors essay by the end of the final term. Honors students normally need to take Philosophy 490 both terms of their senior year in order to write a satisfactory honors essay. Philosophy 490 does not count toward the eight philosophy courses required for the major. Prospective candidates should apply at the philosophy department office, 218 Goldwin Smith Hall.

Fees

In some courses there may be a small fee for photocopying materials to be handed out to students.

Introductory Courses

These courses have no prerequisites; all are open to freshmen.

Note: Class meeting times are accurate at the time of publication. If changes are necessary, the department will provide new information as soon as possible.

PHIL 100 Freshman Writing Seminars in Philosophy
Fall and spring. 3 credits. Consult the brochure or list of freshman writing seminars prepared by the John S. Knight Writing Program.

PHIL 101 Introduction to Philosophy

Fall. This course will deal with selected central problems of philosophy, such as: the grounds and extent of our knowledge, responsibility and human freedom, personal identity and the relationships of persons to each other and to the world around them, the foundations of morality, the existence of God and of evil. Readings will be from both historical and contemporary authors.

Spring: As the title suggests, this is an introductory course. We will discuss four principle areas: systematology, philosophy of mind, ethics, and metaphysics; if you don’t know what some of these terms mean, you can be sure that you will learn something here. We will begin with a close reading of Descartes’s classic Meditations on First Philosophy. We will continue with Cartesian themes through the first two-thirds of the course, with discussions of the nature of the mental, personal identity, and free will. The last part of the course will be devoted to a survey of ethical theories.

PHIL 131 Logic, Evidence and Argument
Fall. 3 credits. M W F 10:10–11:00, S. MacDonald.
An introduction to the concepts and skills central to critical reading and thinking. The course aims to provide a general understanding of the principles of reasoning and to develop skills in identifying, analyzing, and evaluating the sorts of reasoning we encounter everyday in ordinary discourse. Students will be expected to attain facility with two different formal systems for representing and evaluating reasoning: formal logic and traditional syllogistic logic—and to acquire the ability to apply these systems in the analysis and evaluation of various kinds of ordinary reasoning.

PHIL 142 Appropriation and Alienation
Spring. 3 credits. This course is intended for freshmen. T R 2:55–4:10, T. Berry.
This course will investigate an important issue in political philosophy: the justification of property rights. We will start the course by watching a film, The Field, in which two different conceptions of what justifies ownership come into conflict. Should things belong to those who make them? Or shouldn’t labor be the primary justification of property rights? We will spend the first half of the course investigating how the philosopher John Locke handles this issue in his classic defense of private property. In the second half, we will consider Karl Marx’s classic objections to Locke’s defense of private property.

PHIL 145 Contemporary Moral Issues

PHIL 181 Introduction to the Philosophy of Science
Spring. 3 credits. T R 1:25–2:40, N. Sethi.
In this course we will attempt to answer such central questions as: What reasons do scientists have for accepting current scientific theories? Is science a search for truth? How can scientists test theories about unobservable entities? Do scientists discover or construct facts about nature? Are scientific claims immune to cultural, social and subjective influences?

PHIL 191 Introduction to Cognitive Science (See Cognitive Studies 101)
Fall. 3 credits. T R 11:40–12:55, M. Spivey-Knowlton.
This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuro-sience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

PHIL 193 Inequality, Diversity and Justice (also City and Regional Planning 293, Government 293, Sociology 283)
Fall. 4 credits. M W F 2:30–3:20. The class will meet as a whole, for a lecture, F, 8/27; thereafter, lectures will be given M, W, disc. secs will be F. No prerequisites. Intended for freshmen and sophomores. R. Miller.
An interdisciplinary discussion of the nature and moral significance of social inequality, diversity and poverty and of the search for just responses to these economic opportunities? What are the causes of poverty? To what extent is greater equality a demand of justice? Are traditional welfare programs an appropriate response to poverty? What special significance have gender as sources of inequality? Do they merit special remedies such as affirmative action? How should governments deal with religious diversity and other differences in ultimate values? For example, should abortion statutes be neutral toward rival views of the importance of potential human life? What are the causes of worldwide inequality? To what extent do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of the economic and legal reasoning in the search for answers to these questions. To provide these resources, the course will be taught by leading faculty researchers in philosophy, political theory, the social sciences and law.

PHIL 194 Global Thinking (also Government 204, International Relations 207, American Studies 210, Sociology 293)
The analysis taught in this course is global in two different respects: national and interdisciplinary methods. We look in detail at questions raised by one of the most important and most difficult issues facing international society: when, if ever, should other nations unilaterally or multilaterally intervene militarily into ethnic conflicts like those in Kosovo and Rwanda in this decade? Both of these recent cases, one in Europe and one in Africa, raise fundamental questions about the kind of world we are constructing for the 21st century. To what extent is the system of nation-states we now have either desirable or avoidable? Does every ethnic group have a right to a self-determining and sovereign state? When is the use of military force morally justified? Should trials for war crimes or crimes against humanity be routinely held after military conflicts? These and other ethical questions need to be answered in light of the best available knowledge about the political dynamics of foreign intervention and the changing international legal regime, bringing together political science, law, and ethics. The course is taught by leading faculty researchers from the three fields involved.

PHIL 211 Ancient Philosophy (also Classics 231)
Fall. 4 credits. This course has no prerequisites. It is open to freshmen. T R 1:25–2:40. G. Fine.
This course examines the origin and development of Western philosophy in Ancient Greece and Rome. We will study some of the central ideas of the Pre-Socratics, Socrates, Plato, Aristotle, and the Hellenistic philosophers (Epicureans, Stoics, and Skeptics).
Questions to be considered include: What are the nature and limits of knowledge? Is knowledge ever certain? How reliable is perception? What are the basic entities in the universe: atoms, Platonic Forms or Aristotelian substances? Is moral knowledge possible? What is the nature of happiness and what sort of life will make people happy? Do human beings have free will? Ought we to fear death? One of the fundamental works we will read is Plato's Republic.

PHIL 212 Modern Philosophy
Spring. 4 credits. No prerequisites. M W F 1:25–2:15. Z. Szabó.
This course is about the rise of modern philosophical thought in the 17th and 18th centuries in Europe. We will be focusing on four philosophers: Descartes, Berkeley, Leibniz and Hume. Our main interest will be the theory of ideas and the way this theory underlies metaphysics. What are ideas and how do we come to have them? Why are ideas necessary for knowledge about the external world? What is the connection between the structure of ideas and the structure of reality? This course emphasizes close readings of original texts (or translations of original texts) and critical assessment of philosophical arguments.

PHIL 213 Existentialism
This course will provide an introduction to the central themes and methods of existentialism as exemplified in the writings of Kierkegaard, Nietzsche, Heidegger, and Sartre. Topics will include: the nature of consciousness; the idea that human existence is a task; the anxieties of freedom; nihilism and despair; relationships between self and others; the possibility of an ethics of authenticity. Readings will be drawn from the aforementioned philosophers and will include one or two plays as well as one or two short stories. Time permitting, one or two films will also be screened and discussed over the course of the semester.

PHIL 214 Philosophical Issues in Christian Thought

PHIL 231 Introduction to Deductive Logic
Fall. 4 credits. M W F 1:25–2:15. H. Hodes.
The logic of truth-functional connectives and the universal and existential quantifiers: analysis of English-statements in terms of a formal language; evaluation of deductive reasoning in terms of such an analysis.

PHIL 241 Ethics (by petition for breadth requirement)
Fall. 4 credits. M W F 9:05–9:55. N. Sturgeon.
An introduction to the philosophical study of moral theories and moral arguments. Ethical relativism, ethical egoism, ethical skepticism, utilitarianism and deontological theories; some application to controversial contemporary issues.

PHIL 242 Social and Political Philosophy (also Government 260)

PHIL 243 Aesthetics

PHIL 244 Philosophy and Literature

PHIL 245 Ethics and Health Care
Fall. 4 credits. T R 10:10–11:25. C. Williams.
This course is an introduction to the ethical issues surrounding health care. Topics include: the professional-patient relationship; personhood, quality of life, and death, and their relations to issues such as abortion and euthanasia; justice and access to health care.

PHIL 246 Ethics and the World Environment
Critical philosophical analysis of the conceptual frameworks in which policies affecting the environment are formulated and justified. The course is an extended case-study of the global environmental issue of rapid climate change, focusing upon the ethical issues at the heart of the debates about the Kyoto Protocol to the Framework Convention on Climate Change. The key issues include alternative frameworks for assigning responsibility for making necessary sacrifices between industrialized and developing nations, alternative principles for handling risks to future generations when outcomes are uncertain, and conflicting views about alleged over-consumption in wealthy nations and alleged over-population in poor nations.

PHIL 247 Ethics and Public Life

PHIL 249 Feminism and Philosophy (also Women's Studies 249)
Fall. 4 credits. M W F 11:15–12:05. J. Whiting.
An historical introduction, using literary as well as philosophical texts, to views about the nature of women and their position in society—from the ancient debate (between Plato and Aristotle) about whether men and women are by nature suited to different activities, to contemporary debates between "sameness" and "difference" feminists. Texts will include Aeschylus, Plato, Aristotle, Rousseau, Wollstonecraft, Engels, and various twentieth century authors (such as Virginia Woolf, Carol Gilligan, Catherine MacKinnon, and Sarah Hogland).

PHIL 261 Knowledge and Reality
Fall. 4 credits. T R 11:40–12:55. J. Stanley.
There are many propositions you take yourself now to know. For example, you take yourself now to know that there is a course-description of a philosophy class in front of you. You take yourself now to know that a human being has been on the moon before. You take yourself to know that two plus two is four. And so on. In taking ourselves to know such propositions, we are assuming that we can come to know facts about the world on the basis of such methods as observation, testimony, and memory. In this course, we will investigate, on an introductory level, different theories of which it is to know something on the basis of perception, reasoning, memory, or testimony. Issues we will discuss include skepticism, i.e., positions which challenge our right to take these methods as sources of knowledge. We will read classical and contemporary sources.

PHIL 262 Philosophy of Mind

PHIL 263 Religion and Reason
What must (or could) God be like, and what reasons do we have for thinking that a being of that sort actually exists? What difference would (or could) the existence of God make to our lives? Religion and Reason examines the idea, common to several major world religions, that God must be an absolutely perfect being. What attributes must a perfect being have? Must it have a mind, be a person, care for human beings? Is the concept of a perfect being coherent? Is the existence of a perfect being compatible with the presence of evil in the world and the existence of human freedom? Does human morality depend in any important way on the existence of God or a perfect being? Is a perfect being among the things that actually inhabit our universe? The course approaches these questions with the tools and methods of philosophical reason and through readings drawn from both classic texts and contemporary philosophical discussion.

PHIL 270 Truth and Interpretation (also Linguistics 270/Cognitive Studies 270)

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)
Spring. 4 credits. M W 10:10–11:00. R. Boyd.

PHIL 309 Plato
Fall. 4 credits. Prerequisites: at least one previous course in philosophy. M W 2:55–4:10. G. Fine.
A systematic survey of many of Plato's dialogues, including the Republic. We will consider Plato's views on knowledge and reality, as well as his ethical and political theories. Topics to be covered include the theory of forms; the nature and limits of knowledge and sense perception; the ideally just state; human happiness; why be moral; the nature of the soul and immortality.

PHIL 310 Aristotle
A general introduction to Aristotle's works—from the logical and biological through the ethical and political—organized around the differences, and relations, between his theoretical or scientific works and his practical or ethical works. Topics will include: the
extent to which his ethical and political views are based on his metaphysical and psychological views; and the contrast between the universality and exactness of mathematics and other sciences and the alleged particularity and inexactness of ethics.

**PHIL 311 The Rationalists**
4 credits. Spring. Prerequisites: at least one previous course in philosophy. T R 1:25-2:40. G. Fine.
We will consider the metaphysics and epistemology of Descartes, Spinoza, and Leibniz. Topics to be considered include: the nature of substance; proofs for the existence of God; free will, determinism, and causation; scepticism; the nature and limits of knowledge; the nature and value of sense perception; mind and body.

**PHIL 312 Modern Empiricism**
Spring. 4 credits. M W F 11:15-12:05.
A systematic survey of important themes in Hume. We will read extensively in each of the three major divisions of *A Treatise of Human Nature*, with occasional glances at Hume's later writings. Topics will include associationism in philosophical psychology, causal inference and belief in unperceived objects, communication of mental states via sympathy, the alleged "combat" of reason and passion, the moral sense and its evolution.

**PHIL 313 Twentieth-Century Continental Philosophy**
Spring. 4 credits. M 7:30-10:00 p.m. W. Bracken.
An investigation of leading figures in French and German speaking philosophy in the Twentieth-century, including such movements as existentialism, phenomenology, structuralism, post-structuralism, and the Frankfurt school of Critical Theory. Particular attention will be paid to the ways in which these figures can be understood as continuing "the critique of the subject" that Nineteenth-century German philosophers such as Hegel and Marx derived from Kant. Topics will include many of the following: existential phenomenology's critique of consciousness; the central role given to: (differing interpretations of) Hegel's master-slave dialectic; the "decentering" of the subject; Lacan's theory of the mirror stage; structuralist conceptions of the unconscious; humanism and anti-humanism; ideology critique and psychoanalysis as methods of self-overcoming; the relationship between reason and desire; the possibility of an ethics (and a politics) of desire. We will focus on selected readings from Kojève, Sartre, Beauvoir, Lacan, Kristeva, Althusser, Marcuse, Adorno, and possibly one or two others, along with supplementary texts from Hegel, Marx, Freud and Nietzsche.

**PHIL 314 Ancient Philosophy: The World of Theory and the World of Ordinary Life**

**PHIL 315 Medieval Philosophy**
Fall. 4 credits. T R 11:40-12:35.
S. Macdonald.
A survey of some main themes and major figures in medieval philosophy. Emphasis will be on the close reading and analysis of representative texts, but some attention will be given to the general historical development of philosophical themes and traditions during the thousand years separating late antiquity and the Renaissance. Readings (in English translation) may include Augustine, Boethius, Anselm, Abelard, Aquinas, Scotus, and Ockham and address topics in metaphysics, epistemology, ethics, and philosophical theology.

**PHIL 316 Kant**
Fall. 4 credits. M W F 1:25–2:15. T. Irwin.
An introduction to Kant's main metaphysical and epistemological doctrines as presented in the *Critique of Pure Reason*, including the nature of space and time, the justification of scientific knowledge, the nature of human reason and self-consciousness. Special attention will be paid to Kant's critique of traditional metaphysics and his attempt to establish a new metaphysics, grounded in practical reason, that establishes the existence of God, human freedom, and morality.

**PHIL 317 Hegel**

**PHIL 318 Twentieth-Century Philosophy**
Spring. 4 credits. Recommended background: Philosophy 231 or the equivalent. C. Williams.
A survey of philosophical writings from the late 19th to early 20th century including G. Frege, B. Russell, L. Wittgenstein, on language, foundations of mathematics, topics in metaphysics (and perhaps epistemology).

**PHIL 319 Philosophy of Marx**

**PHIL 320 Deductive Logic (also Mathematics 281)**
Review of derivations and truth-in-a-model; function- constants and identity; truth in non-fully-distinguished models; very basic set-theory; sets as the only mathematical objects; mathematical induction, soundness; completeness. Recommended previous course: Philosophy 231 or equivalent.

**PHIL 322 Philosophy of Language**
Fall. 4 credits. T R 1:25–2:40. Z. Szabó.
This course is an introduction to contemporary philosophy of language. It does not, however, aim at covering all the ground; instead, we will focus almost exclusively on questions of quantification. Problems surrounding the use of quantifiers in natural languages play an important role in philosophical reflection, so working through this course will help you to orient yourself in contemporary analytic philosophy. In relation to quantification, we will touch on a number of important issues including problems surrounding the logical consequence relation, the status of modalities, the nature of intentionality, and the interpretation of propositional attitudes.

**PHIL 341 Ethical Theory**
Spring. 4 credits. M W F 10:10–11:00. N. Sturgeon.
Topic for 2000: Consequentialism and Its Critics. A historical and systematic investigation of one of the deepest divides in philosophical debate about ethics, between those who think the moral evaluation of acts, character traits, and social institutions depends solely on their good or bad consequences and critics who find this approach fundamentally misguided.

**PHIL 342 Law, Society, and Morality**
(also Law 666)

**PHIL 343 Resistance and Responsibility**
(also Law 676)

**PHIL 344 History of Ethics: Ancient and Medieval**

**PHIL 345 History of Ethics: Modern**

**PHIL 346 Modern Political Philosophy**
(also Government 482)

**PHIL 351 Metaphysics and Epistemology**

**PHIL 362 Philosophy of Mind**
Spring. 4 credits. T R 2:55–4:10.
S. Shoemaker.
The nature of consciousness. Topics will include: the nature of introspective awareness of one's mental states, the nature of "phenomenal consciousness" and the question of whether this involves "qualia," the "function inervins" that constitute consciousness, the "explanatory gap" between neural states and conscious states, and the issue of whether the existence of consciousness is compatible with physicalism about the mind and functionalist views about the mind.

**PHIL 363 Topics In the Philosophy of Religion**

**PHIL 368 Global Climate and Global Justice**
(also Government 368)

**PHIL 369 Limiting War**
(also Government 469)

**PHIL 381 Philosophy of Science**
(also Science and Technology Studies 381)

**PHIL 382 Philosophy and Psychology**

**PHIL 383 Choice, Chance and Reason**

**PHIL 384 Philosophy of Physics**

**PHIL 387 Philosophy of Mathematics**

**PHIL 389 Philosophy of Science**
(also Science and Technology Studies 381)

**PHIL 390 Informal Study**
Fall or spring. Credit to be arranged. To be taken only in exceptional circumstances. Must be arranged by the student with his or her adviser and the faculty member who has agreed to direct the study.

**Advanced Courses and Seminars**
These courses are offered primarily for majors and graduate students.

**PHIL 395 Majors Seminar**

**PHIL 409 German Philosophical Texts**
on the ways in which contact with the other is the constitution of subjectivity. It will focus on the idea that interactions with "the other" (i.e., the otherness of the self) are fundamental to the philosophical dialogues, modeled on the dialogues of Plato and Aristotle. These powerful and conceptually rich dialogues have played a significant role in the development of Western philosophy, and their continued relevance is evident in contemporary debates about the nature of the self and its relationship to the other.

### PHIL 410 Latin Philosophical Texts
Fall and spring. Variable credit. Prerequisites: knowledge of Latin and permission of instructor. Hours to be arranged.

S. MacDonald.

Reading of philosophical texts in the original Latin.

### PHIL 411 Greek Philosophical Texts (also Classics 311)
Fall and spring. Variable credit. Prerequisites: knowledge of Greek and permission of instructor. Hours to be arranged.

T. Irwin, C. Brittain.

Reading of philosophical texts in the original Greek.

### PHIL 412 Medieval Philosophy

### PHIL 413 Topics in Ancient Philosophy (also Society for the Humanities 402 and 403)
Fall and spring. 4 credits. T 2:30-4:25. C. Brittain.

Fall: Topic: Augustine's Confessions: Memory and the Self. Augustine's Confessions record the strange story of his conversion to the divine, and its origins in Greek philosophy, Latin rhetorical theory, and individual experience.

Spring: Topic: Augustine's Dialogues on the Soul. Augustine's first works after his conversion were a series of Christian philosophical dialogues, modeled on the exemplary works of Cicero. The dialogues exploit the Platonist conception of the soul Augustine found in the works of Plotinus: its immateriality (On the Quantity of the Soul), its intellectual capacities (Against the Academicians), its immortality (On the Immortality of the Soul), and its relation to God (The Solidogeny). But these works are not simple translations of Greek philosophy into the pre-existing mold of the Latin dialogue; they represent Augustine's appropriation of the "pagan" cultures of Greece and Rome for a new intellectual vision of Christianity. This course will examine Augustine's fusion and transformation of both the philosophical sources and the literary forms which provoked these powerful and conceptually rich dialogues.

### PHIL 414 German Philosophy after Kant

### PHIL 415 Special Topics in the History of Philosophy (also Society for the Humanities 408 and 416)
Fall and spring. 4 credits. Fall, M 12:20-2:15, spring, M 12:20-2:15. F. Neuhouser.

Fall: Topic: Subjectivity and the Other I. This seminar examines various forms of the idea that interactions with "the other" (i.e., with other subjects) are essentially involved in the constitution of subjectivity. It will focus on the ways in which contact with the other is essential to reason, morality, freedom, and personal identity, as well as to alienation and self-tyranny. Readings will include: Rousseau on self-love and its connection to autonomy; Hegel's account of the master-slave relation and the unhappy consciousness; Sartre's view of the other as a threat to subjectivity; and de Beauvoir's portrayal of woman as the other and her attempt to unite autonomous subjectivity with being an object for others.

Spring: Topic: Subjectivity and the Other II. This seminar examines the themes of its predecessor with special attention to the role played by the other in certain (loosely speaking) psychological theories of subjectivity. This course will include: G. H. Mead, on the importance of social roles to subjectivity; Nietzsche, guilt, enslavement, and resentment; Freud's theory of neuroses, narcissism, and the therapeutic relation between analyst and analysand; and Kristeva's view of the other as internal to each of us.

### PHIL 416 Modern Philosophy

### PHIL 431 Mathematical Logic (also Mathematics 481)

### PHIL 432 Topics in Logic (also Math 482)

### PHIL 433 Philosophy of Logic

### PHIL 434 The Foundations of Mathematics (also Math 384)
Fall. 4 credits. M W F 2:30-3:20. H. Hodes.

Topic for 1999: set-theoretic foundations: formalizing logic (with attention to classical vs intuitionistic reasoning); formalizing arithmetic, set theory, and its ZF- (and IZF) formalization; ordinal and cardinal numbers; the axiom of choice; number-systems within set-theory; truth and consistency in set-theory; alternatives to the ZF-formalization. Time permitting we will contrast the set-theoretic approach with approaches based on untyped Lambda-calculi or type-theories.

### PHIL 435 Intensional Logic (also Math 483)

### PHIL 436 Topics in the Philosophy of Language

### PHIL 441 Contemporary Ethical Theory

### PHIL 442 Ethics and the Philosophy of Mind (also Society for the Humanities 409)
Fall. 4 credits. T 12:20-2:15. J. Hill.

Topic: "Cosmopolitanism and The Self". This seminar philosophically examines the racial and ethnic tribal identities on which contemporary selves are predicated. As a plausible antidote to problems spawned by tribalism, we will examine the possibility of a moral cosmopolitan identity. Readings will be drawn from the Ancient and Enlightenment cosmopolitans as well as contemporary texts which aim to deconstruct the concept of race.

### PHIL 443 Aesthetic Theory
Spring. 4 credits. T R 11:40-12:55. C. Williams.

An examination of issues that commonly arise from our experience of the arts: the charactere, and appropriateness of aesthetic judgments; the content of artworks, and the extent to which contents can be reproduced, stated, or paraphrased; the relevance of moral consideration to art; the role of aesthetic attributes, expressiveness and aesthetic definitiveness (e.g., sentimentality, bad taste, insincerity). Although these issues can be formulated in a way that is neutral between the various arts, they can seem more pressing (or intractable) for specific arts; and we will give some attention to the more specialized contexts.

### PHIL 444 Contemporary Legal Theory (also Law 710)

### PHIL 446 Topics in Social and Political Philosophy (also Government 474)

### PHIL 447 Contemporary Political Philosophy (also GOVT 465)
Fall. 4 credits. T R 2:55-4:10. R. Miller.

Topic for 1999: Reconciling Liberalism. While traditional liberal goals of civil liberty, political equality and economic opportunity retain a central place in current political philosophy, liberalism has recently been subject to a variety of sharply contrasting interpretations, e.g., as based on political values shared by all reasonable moral doctrines (Rawls); as sustained by a general account of moral obligation, centered on mutual justifiability (Scanlon); or as expressing a distinctive view of the good life, in which autonomy plays a fundamental role (Raz). Others (e.g., Sandel) have argued that central liberal goals require, for their achievement, an ethic of solidarity and the collective development of shared values. Our discussion of these outlooks and their critics will include Rawls, Political Liberalism; Scanlon, What We Owe to Each Other; Raz, The Morality of Freedom; Sandel, Democracy's Discontent, and relevant disputes over the liberty and equality protected by the U.S. Constitution.

### PHIL 460 Metaphysics and Epistemology (also Society for the Humanities 444)

### PHIL 461 Feminist Epistemology (also Women's Studies 481)

### PHIL 462 Philosophy of Mind

### PHIL 463 Problems in the Philosophy of Science
Spring. 4 credits. W 7:30-10:00. R. Boyd.

### PHIL 464 Special Studies in Philosophy
Fall and spring. 4 credits. Open only to honors students in their senior year. See Honors description at front of Philosophy section.

### PHIL 611 Ancient Philosophy
Spring. 4 credits. M 4:30-6:30. T. Irwin.

### PHIL 612 Medieval Philosophy

### PHIL 613 Modern Philosophers

PHIL 633 Philosophy of Language Fall and spring. 4 credits. Fall, W 4:30-6:30, J. Stanley; spring, R 4:30-6:30, Z. Szabo. Fall: special topics in the philosophy of language. Spring: topics in semantics and pragmatics. We will survey current work in linguistics and in the philosophical literature with special focus on anaphora and quantification.

PHIL 641 Ethics and Value Theory Fall. 4 credits. M 4:30-6:30. N. Sturgeon. Topic for fall: moral relativism, moral realism and moral nihilism

PHIL 642 Morality, Self, and Psychopathology Spring. 4 credits. T 4:30-6:30. J. Whiting. Philosophical accounts of personal identity—typically aspire to a kind of universality; each account tends to represent itself as the (presumably uniquely) correct account implying the falsity of its various rivals (e.g., psychological continuity theories implying the falsity of bodily continuity theories and vice versa). But to the extent that we are dealing with selves—i.e., partially reflexive entities—it seems possible that different self-conceptions might yield different sorts of selves; some, for example, more, and some less, bodily (or psychological) than others. We will examine this sort of “contingency of selfhood” both cross-culturally (looking, e.g., at non-Western conceptions of selves; the Buddhist ideal of self-dissolution) and psychopathologically (looking, e.g., at pathological configurations of self such as those involved in autism, schizophrenia, multiple-personality-disorder, and eating disorders), treating the study of psychopathology as akin (for our purposes) to ethnography. The idea is to see whether forms of selfhood (or subjectivity) that we take for granted and perhaps even view as inescapable are in fact contingent and optional. We can then ask what sorts of selfhood (or subjectivity) it is valuable (morally, aesthetically, or otherwise) to cultivate. This raises the difficult question of the point(s) of view from which we are to make such assessments.

PHIL 662 Philosophy of Mind Fall. 4 credits. T 4:30-6:30. S. Shoemaker. The Mind-Body Problem: mental causation, the physical realization of mental states, and emergence.

PHIL 700 Informal Study Fall or spring. Credit to be arranged. To be taken by graduate students only in exceptional circumstances and by arrangement made by the student with his or her Special Committee and the faculty member who has agreed to direct the study.

PHIL 773 Proseminar in Cognitive Studies (also Cognitive Studies 773, Linguistics 773, and Computer Science 773) Fall. 2 credits. Fall. R grade. For description, see COGST 773.

PHIL 774 Proseminar in Cognitive Studies (also Linguistics 774) For description, see COGST 774.

Related course in other department German Studies 378. German Aesthetic Theory from Kant to Hegel. P. Gilgen.

PHYSICS

The Department of Physics offers a full range of university-level work in physics, from general education courses for nonscientists to doctoral-level independent research. Major research facilities are operated by the Laboratory of Atomic and Solid State Physics (LASSP) and the Laboratory of Nuclear Studies (LNS). LASSP carries out extensive research efforts in condensed-matter physics and in low-temperature physics. LNS operates major high-energy particle physics research facilities at Wilson Laboratory, the Cornell electron-positron storage ring (CESR). Theoretical work is carried out in many fields of physics, including astrophysics. There is a full schedule of weekly research-oriented seminars and colloquia. Junior and senior students will find many opportunities for research participation and summer employment.

Introductory physics courses sequences are: 101—102, 207—208, and 112—213—214, or its honors version 116—217—218. In addition, there is a group of general-education courses, Physics 200 through 206, 209, 210. Physics 101—102, a self-paced autotutorial course, is designed for students who do not intend to take further physics courses and who do not have preparation in calculus. Physics 112 and 207 both require calculus (Mathematics 191 or 111), and additional mathematics is required for subsequent courses in the sequence. Physics 101—102 or 207—208 may be taken as terminal physics. The three-term sequence 112—213—214 or its honors version, 116—217—218, is recommended for engineers and physics majors. Physics 214 and 218 are place an increasing emphasis on use of the computer for homework, laboratory exercises, and projects; some knowledge about computing, perhaps at the level of Computer Science 99 or 100, is desirable. Courses beyond the introductory level that might be of interest to nonmajors include: Physics 316 (Modern Physics I), Physics 330 (Modern Experimental Optics); and Physics 360 (Electronic Circuits). Advanced placement and credit are offered as outlined in "Advanced Placement of Freshmen," or students may consult Professor Rogers, the director of undergraduate studies, as should students requesting transfer credit for physics courses taken at another college.

The Major
The major program is constructed to accommodate students who wish to prepare for professional or graduate work in physics as well as those who wish to complete their major program in the field of physics but have other post-graduation goals. Students who wish to major in physics are advised to start the physics sequence in the first year of their freshman year. (Note that students who have had contact with introductory calculus may take Physics 112 with co-registration in Mathematics 191.) The major program can still be completed with a second-terms start, but flexibility in future course scheduling is reduced.

Prospective majors are urged to make an early appointment at the physics office for advice in program planning. Acceptance into the major program is normally granted upon completion of a year of physics and mathematics courses at Cornell with all course grades at the B-level or higher. The department office will give advice in the matter of selecting a major faculty adviser. Details of the major course program are worked out in consultation between the student and major adviser.

Physics Core
Common to all major programs is a requirement to complete a core of physics courses. In addition to the three-term introductory sequence (Physics 112—213—214 or Physics 116—217—218), the core includes five upper-level courses—a(1) the three-term sequence in modern physics (Physics 316—317), (b) at least three semester hours of laboratory work selected from Physics 310, 330, 360, 410, Astronomy 410, (c) an intermediate course in classical mechanics, and (d) an intermediate course in electromagnetism.

Accompanying these physics courses should be work in mathematics through at least Mathematics 222 or 294. Students following the professional/graduate school channel are expected to complete at least one additional year of applicable mathematics (Applied and Engineering Physics 321—322 or Mathematics 321/420—422).

In addition to the core, each physics major must complete 15 semester hours of credit in an area of concentration which has been agreed upon by the student and major faculty adviser.
Typical Physics Course Sequences (other sequences are also possible)

- For majors with concentrations outside physics, there will be wide variation in individual programs, arranged to best match the field of concentration.
- Crossovers between the two sequences 112–113–214 and 116–217–218 are possible, although the constant the sophomore year with Physics 116, even if they qualify for advanced placement credit for Physics 112. Core courses in mechanics and electromagnetism will normally be Physics 318 and Physics 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course Physics 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who may follow the different sequences is the amount and level of pre-college work in calculus and in physics. Changes in these typical patterns will be common, as agreed upon between student and major faculty adviser.

Concentration within Physics

A student who wishes to pursue professional or graduate work in physics or a closely related field should follow a concentration within the field of physics. For those students with a strong secondary school preparation, the sequence Physics 116–217–218 is encouraged. Students are strongly encouraged to continue the sequence with Physics 116, even if they qualify for advanced placement credit for Physics 112. Core courses in mechanics and electromagnetism will normally be Physics 318 and Physics 327, respectively. The minimum 15 hours beyond the core must be composed of physics courses with numbers greater than 300 and must include the senior laboratory course Physics 410. This means a physics concentration needs a minimum of 7 credit hours of laboratory work to complete the requirements. The accompanying table shows several typical course sequences by means of which the major requirements may be completed. The primary distinction among students who may follow the different sequences is the amount and level of pre-college work in calculus and in physics. Changes in these typical patterns will be common, as agreed upon between student and major faculty adviser.

Concentration outside Physics

The concentration will reflect the student's interest in some area related to physics. The array of courses that comprise the concentration must have internal coherence. The array will normally be worked out in conference with the major faculty adviser and must be approved by the adviser. Of the required 15 hours credit beyond the core, at least 8 credits must be in courses numbered above 300. Students have chosen to concentrate in such topics as chemical physics, astrophysics, natural sciences, history and philosophy of science, computer science, meteorology, or econometrics. A combined biology-chemistry concentration is appropriate for pre-medical students or those who wish to prepare for work in biophysics. Students interested in a career in the teaching of science should consider the Teacher Education in Science and Mathematics (TESM) Program, which is administered by the Departments of Education and Mathematics and is described in detail in the College of Arts and Sciences section of this catalog. A concentration in "science education" would then typically include Education 402 and 403, both part of TESM, and two or more courses designed to broaden the student's background in general science and mathematics.

For students with concentrations outside physics, the core requirements in mechanics and electromagnetism can be appropriately met with Physics 314 and Physics 323, respectively. Students with an astronomy concentration who might continue in that field in graduate school should use Astronomy 410, 431, 432 as part of the concentration; they are encouraged to use Physics 318 and 327 to satisfy the core requirements in mechanics and electromagnetism.

Foreign Language Requirement

Students interested in eventual graduate work in physics are advised to meet this College of Arts and Sciences requirement with work in French, German, or Russian.

Honor

A student may be granted honors in physics upon the recommendation of the Physics Advisers Committee of the physics faculty. There is no particular course structure or thesis requirement for honors.

Double Majors

Double majors including physics are possible and not at all uncommon. It should be noted, however, that if a student wishes to complete a major in physics as well as a major in one or more other subjects, any course used to satisfy a requirement of the second major may not be used also in satisfaction of any physics major requirement.

Courses with Overlapping Content

Because the department offers several courses with overlapping content, students should select courses carefully to meet the needs of their academic programs and to ensure credit for each course they take. Listed below are groups of courses with largely similar content. In general, students may receive credit for only one of the courses in each group.

- Physics 101, 112, 116, 207
- Physics 102, 208, 213, 217
- Physics 314, 318
- Physics 323, 327

Course Prerequisites

Prerequisites are specified in physics course descriptions to illustrate the materials that students should have mastered. Students who wish to plan programs different from those suggested by the prerequisite ordering are urged to discuss their preparation and background with a physics adviser or with the instructor in the course. In many cases an appropriate individual program can be worked out without exact adherence to the stated prerequisites.

Courses

Listed days and times are not definite but are unlikely to change. Days and times will not be listed for 600-level courses.

PHYS 101 General Physics I

Fall, summer 4-week or 8-week session. 4 credits. General introductory physics for non-physics for non-physysics majors.

Prerequisites: three years of high school mathematics, including some trigonometry.

A student without high school physics should allow extra time for Physics 101. Includes less mathematical analysis than Physics 207, but more than Physics 200–206, 209, 210. Enrollment may be limited.

Fall introductory lec. R Aug. 26 or M Aug. 30, 7:30 p.m. J. Parpia.

Physics 101 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit. Most instruction occurs in the learning center utilizing video-taped lectures, personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 101: kinematics, forces and dynamics, momentum, energy, fluid mechanics, waves and sound, thermal physics, kinetic theory, and thermodynamics. At the level of Physics by Cutnell and Johnson.
PHYS 102 General Physics II
Spring, summer 4-week or 8-week session. 4 credits. Prerequisite for Physics 102. Physics 101 or 112 or 207. Includes less mathematical analysis than Physics 208, but more than Physics 200–206, 209, 210. Enrollment may be limited. Spring introductory lec, M Jan. 24, 7:30 p.m. Staff. Physics 101-102 emphasizes quantitative and conceptual understanding of the topics of introductory physics developed without use of calculus. The course is mostly self-paced in a mastery-oriented format including eight subject units and a final retention (review) unit. The term is divided into three test tries taken at the time of the designed to measure mastery with a limit of personal tutoring by staff, assigned laboratory exercises, and solutions of sample test questions at our web site. Unit testing is designed to measure mastery with a limit of three test tries taken at the time of the student's choice. Major topics for 102: electricity and magnetism, optics, relativity, atomic, quantum, and nuclear physics. At the level of Physics by Cutnell and Johnson.

PHYS 103 General Physics
Summer. 4 credits. Prerequisite: three years of high school mathematics, including some trigonometry. A student without high school physics should allow extra time for Physics 103. Physics 103 is a more traditional version of Physics 101. Physics 103 is not appropriate for students majoring in physics or engineering. Primarily for students majoring in the life sciences. Lectures and discussions: M-F 10:00–11:15; laboratories M W 2:00–5:00. Basic principles treated quantitatively without calculus. Kinematics; forces and fields, momentum, angular momentum and energy; thermal physics and fluid mechanics; and sound waves. Text at the level of Physics, 4th edition, by Cutnell and Johnson.

PHYS 112 Physics I: Mechanics
Fall, spring, summer 6-week session. 4 credits. Intended for science students of engineering and for prospective physics majors. Prerequisite: coregistration in Mathematics 192 (or 194 or 112), or substantial previous contact with introductory calculus combined with coregistration in Mathematics 111 or 191. Lec, M W F 10:10–11:00 or 12:20–1:10. Two rec. and one lab/cooperative learning session each week. Evening exams. Fall, P. Krasicky; spring, R. Galik. Mechanics of particles: kinematics, dynamics, conservation laws, central force fields, periodic motion. Mechanics of many-particle systems: center of mass, rotational mechanics of a rigid body, static equilibrium. At the level of University Physics, Vol. 1, by Young and Freedman.

PHYS 116 Physics I: Mechanics and Special Relativity
Fall, spring. 4 credits. More analytic than Physics 112, intended for students who will be comfortable with a deeper, somewhat more mathematically rigorous approach. Intended mainly but not exclusively for prospective physics majors. Prerequisites: a good secondary school physics course and familiarity with basic calculus. Connective transfers between Physics 116 and Physics 112 (in either direction) are encouraged during the first few weeks of instruction. Lec, M W F 10:10–11:00. Fall, H. Tye; spring, R. Patterson. A more rigorous version of Physics 112, covering similar topics at the level of An Introduction to Mechanics, by Kleppner and Kolenkow.

PHYS 190 Supplemental Introductory Laboratory
Fall, spring, 1 credit. Times by arrangement with instructor S–U only. Enrollment limited to students who have all of the following: (i) three transfer credits for introductory physics lecture material; (ii) a degree requirement of the laboratory component of that introductory course; (iii) approval of the director of undergraduate studies; (iv) permission of the lecturer of that course at Cornell. Enrollment limited. A Physics 190 Permission Form must be filed in 121 Clark Hall with the physics department course coordinator. Students perform the laboratory component of one of the introductory courses (Physics 112, 213, 214) to complement the related course acquired elsewhere. Those wishing to take the equivalent of one of these introductory courses at another institution should receive prior approval from the director of undergraduate studies.

PHYS 200 Art, Archaeology, and Analysis (also Geology 200, Engineering 185, M S & E 285, Archaeology 285, and Art 372)
For description, see GEOl 200.

PHYS 201 Why the Sky Is Blue: Aspects of the Physical World
Fall. 3 credits. Lec, T R 2:55–4:10, rec, W 2:30–3:20 or W 3:35–4:25. A. Sadoff. This is a descriptive physics course aimed specifically at the non-science student. There is an emphasis on the ideas of modern physics where the approach is both historical and thematic. The methodology of science and the nature of evidence is emphasized. An overtiding theme is the character of physical laws as shown through the great principles of symmetry and conservation. While there are a few computational problems assigned, the purpose is to help students to understand the concepts rather than to master problem solving techniques. At the level of Physics for Poets by March.

PHYS 202 The World According to Physics—The Way Things Work
Summer 3-week session. 3 credits. Prerequisite: three years of high school mathematics, including some trigonometry. M–F 10:00–12:00; laboratories 2 afternoons per week to be arranged. R. Lieberman. Intended to provide students majoring in fields outside the sciences with an appreciation for the familiar physical world surrounding them. Which falls faster, a pound of gold or a pound of feathers? What trajectory does a launched rocket follow? Why are the curves of highways banked? What actually keeps a satellite circling the earth—why doesn't it just fall down or fly away? Can you build a ship that runs off the heat found in the ocean? With an emphasis on problem solving, the course helps the student to develop skills transferable to other areas. Topics include Newton's basic laws of motion, trajectories, satellites, space travel, and the concepts of energy.

PHYS 203 Physics of the Heavens and the Earth—A Synthesis
Spring. 3 credits. Prerequisite: none; uses high school algebra and geometry for non-science majors. Lec, T R 2:55–4:10; sec, W 2:30–3:20 or 3:35–4:25. H. Padamsee. This course shows how the unification of apparently distinct areas of physics leads to an explosion in the growth of our knowledge and understanding. The material is divided into three parts: the physics of motion on earth and motion in the heavens, showing how the two evolved separately, from the ideas of the ancient Greeks to the dynamics and celestial discoveries of Galileo; the final melding of these two topics with Newton's Universal Gravitation; an exploration of this "new" physics and its impact. There is an emphasis throughout on "how do we know the laws"? These are the stories of breakthroughs and brilliant insights made by fascinating people, offering at the same time a humanistic perspective.

PHYS 204 Physics of Musical Sound
Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, M W F 9:05–9:55; rec, R or F 3:35–4:25. E. Cassel. Many features of the production, propagation, and perception of musical sound may be understood in terms of important concepts in physics. Topics covered will include the mechanism of tone production in musical instruments, distinctions in tone quality, musical scales and tuning, some basic principles of room acoustics, and aspects of the mechanism of hearing. In addition to homework assignments and exams, students will write a research paper investigating a topic in the physics of sound that interests them. At the level of The Acoustical Foundations of Music, by J. Backus.

PHYS 205 Reasoning about Luck
Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, M W 2:30–4:00; rec, T 2:30–3:20. Not offered 1999–2000. An attempt to explore how natural scientists can cope rationally with randomness. The first part of the course deals with the basic ideas of probability theory and explains why it is that in large systems likely events can become overwhelmingly likely. If we apply these ideas to gases consisting of very large numbers of molecules, an explanation of the true nature of heat follows. In this way, students are given a deep understanding of the second law of thermodynamics. Probability enters into quantum mechanics in a more basic and somewhat mysterious way. We will spend the latter part of the course giving simple examples of the difference between classical and quantum probability. In particular, we discuss what is meant by an "entangled state" and how we know there are no hidden variables. At the level of Reasoning About Luck: Probability and Its Uses in Physics by Ambegaokar.)
PHYS 207 Fundamentals of Physics I
Fall. 4 credits. Prerequisites for Physics 207: high school physics plus Mathematics 111 or 191, or substantial previous contact with introductory calculus, combined with coregistration in a math course approved by instructor. Lec, M W F 9:05-9:55 or 11:15-12:05; two rec. and one lab each week. Evening exams. R. Thorne.

PHYS 208 Fundamentals of Physics II
Spring. 4 credits. Prerequisites for Physics 208: Physics 207 or 112 or 101 and at least coregistration in Mathematics 112 or 192. Physics 207–208 is a two-semester introduction to physics with emphasis on tools generally applicable in the sciences, intended for students majoring in a physical science, mathematics, or an analytically oriented biological science. Mechanics, conservation laws, waves, and topics from thermal physics, fluids, acoustics and properties of matter. At the level of Fundamentals of Physics, Vol. I, 5th edition, by Halliday, Resnick, and Walker.

PHYS 209 Relativity and Chaos
Spring. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, T R 1:25-2:40, rec, M 2:30-3:20 or M 3:35-4:25. N. D. Mermin.

PHYS 210 Randomness in Classical and Quantum Physics
Fall. 3 credits. Intended for nonscientists; does not serve as a prerequisite for further science courses. Assumes no scientific background but will use high school algebra. Lec, T R 1:25-2:40, rec, M 2:30-3:20 or M 3:35-4:25. N. D. Mermin.

PHYS 213 Physics II: Heat/Electromagnetism
Fall, spring, (summer 6-week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: Physics 112 and coregistration in the continuation of the mathematics sequence required for Physics 112. Lec, T R 9:05-9:55 or 11:15-12:05, two rec. each week and six 2-hour labs. Evening exams. R. Galik; spring, staff.

PHYS 214 Physics III: Optics, Waves, and Particles
Fall, spring, (summer 6-week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: Physics 213 and coregistration in the continuation of the mathematics sequence. Lec, T R 9:05-9:55 or 11:15-12:05, two rec. each week and one 3-hour lab alternate weeks. Evening exams. F. Sethna; spring, staff.

PHYS 215 Introduction to Special Relativity
Fall, spring, based upon prerequisite 1 credit. S-U only. Enrollment may be limited. Course will be completed within first four to six weeks of term. Coregistration in this course is a requirement for registration in Physics 217, unless the student has taken a relativity course at the level of Physics 116 or Astronomy 106. Prerequisites: Physics 112 or Physics 207 or permission of instructor. Lec, T R 8:00-8:50. F. Sethna; spring, staff.

PHYS 216 Introduction to Modern Physics
Fall, spring, based upon prerequisite. 1 credit. S-U only. Enrollment may be limited. Course will be completed within first four to six weeks of term. Coregistration in this course is a requirement for registration in Physics 217, unless the student has taken a relativity course at the level of Physics 116 or Astronomy 106. Prerequisites: Physics 112 or Physics 207 or permission of instructor. Lec, T R 8:00-8:50. F. Sethna; spring, staff.

PHYS 217 Physics II: Electricity and Magnetism (also A&E P 217)
Fall, spring, (summer 6-week session). 4 credits. Primarily for students of engineering and for prospective physics majors. Prerequisites: Physics 112 and coregistration in the continuation of the mathematics sequence required for Physics 112. Lec, T R 9:05-9:55 or 11:15-12:05, two rec. each week and six 2-hour labs. Evening exams. R. Galik; spring, staff.

PHYS 218 Physics III: Waves and Thermodynamics
Fall, spring. 4 credits. Enrollment may be limited. A more rigorous version of Physics 214. Conditions governing enrollment are similar to those of Physics 217. Lec, M W F 11:15-12:05. F. Sethna; spring, R. Buhrman.

PHYS 310 Intermediate Experimental Physics
Spring. 3 credits. Enrollment may be limited. Prerequisites: Physics 208 or 213. Labs T R 1:25-4:25. Students select from a variety of experiments. An individual, independent approach is encouraged. Facilities of the Physics 410 lab are available for some experiments.

PHYS 311 Intermediate Mechanics
Spring. 4 credits. Prerequisites. Physics 208 or 213. Math 294 (or equivalent); Applied and Engineering Physics 322 or coregistration in Mathematics 420/421 recommended. Intended for physics majors with concentration outside of physics or astronomy; Physics 318 covers similar material at a more analytical level. Lec, M W 10:10-11:00, rec, F 1:25-2:15. C. Franck.

PHYS 312 Modern Physics I
Fall, spring. 3 credits. Prerequisites: Physics 214 or 218 and coregistration in at least Mathematics 294 or equivalent. It is assumed that majors registering in Physics 312 will continue with Physics 317. Lec, M W F 9:05-9:55; rec, R 3:35-4:25. F. Sethna; spring, D. Rubin.

PHYS 313 Modern Physics II

PHYS 314 Modern Physics III

PHYS 315 Modern Physics IV

PHYS 316 Modern Physics I
Fall, spring. 3 credits. Prerequisites: Physics 214 or 218 and coregistration in at least Mathematics 294 or equivalent. It is assumed that majors registering in Physics 316 will continue with Physics 317. Lec, M W F 9:05-9:55; rec, R 3:35-4:25. F. Sethna; spring, D. Rubin.

PHYS 317 Modern Physics II
Fall, spring. 3 credits. Prerequisites: Physics 316. Lec, M W F 9:05-9:55, rec, T 2:30-3:20. E. Flanagan.

PHYS 318 Modern Physics III

PHYS 319 Modern Physics IV

PHYS 320 Modern Physics V

PHYS 321 Modern Physics VI
PHYS 318 Analytical Mechanics
Spring. 4 credits. Prerequisites: Physics 116 or permission of instructor; Applied and Engineering Physics 321 or Mathematic­

Newtonian mechanics of particles and systems of particles, including rigid bodies; oscillating modes and small vibrations; introduction to Classical Dynamics by Marion and Thornton and Physics 318 Lecture Notes by Hand and Finch. Supplementary reading will be assigned.

PHYS 323 Intermediate Electricity and Magnetism
Fall. 4 credits. Prerequisites: Physics 208 or 213/214 (or equivalent) and Math 295/296 (or equivalent) and registration in Applied and Engineering Physics 321 or Math 420 recommended. Intended for physics majors with a concentration outside of physics or astronomy. Physics 323 covers material at a more analytical level. Lec, M W F 11:15–12:05, rec, F 2:30–3:20. R. Talman.

Includes electro/magnetostatics, boundary value problems, dielectric and magnetic media, Maxwell’s Equations, electromagnetic waves, and sources of electromagnetic radiation. At the level of Introduction to Electrodynamics by Griffiths.

PHYS 327 Advanced Electricity and Magnetism
Fall. 4 credits. Prerequisites: Physics 217/218 or permission of instructor; coregistration in Applied and Engineering Physics 321 or Mathematics 420. Intended for physics majors concentrating in physics or astronomy. Physics 323 covers similar material at a less demanding level. N. B.: Physics 327 requires knowledge of the material at the level of Physics 217. Lec, M W F 11:15–12:05, rec, F 2:30–3:20. L. Gibbons.

Electro/magnetostatic-vector and scalar potentials, Laplace’s Equation and boundary value problems, multipole radiation-solutions to Maxwell’s Equations, energy-momentum of radiation; electrodynamics in media; special relativity-transformations, four vectors, particle kinematics and dynamics, relativistic electrodynamics. At the level of Classical Electromagnetic Radiation, by Heal and Marvel.

PHYS 330 Modern Experimental Optics (also A&E P 330)

A practical laboratory course in basic and modern optics. The seven projects cover a wide range of topics from geometrical optics to classical wave properties such as interfer­ence, diffraction and polarization. Each experimental setup is equipped with standard, off-the-shelf optics and opto-mechanical components to provide the students with hands-on experience in practical laboratory techniques currently employed in physics, chemistry, biology, and engineering. The students will also be introduced to digital imaging and image processing techniques. At the level of Optics by Hecht.

PHYS 341 Thermodynamics and Statistical Physics
Fall. 4 credits. Prerequisites: Physics 214 and Mathematics 294. Lec, M W F 10:10–11:00, rec, R 2:30–3:20. V. Else.

Statistical physics, developing both thermody­namics and statistical mechanics simultane­ously. Concepts of temperature, laws of thermodynamics, entropy, thermodynamic relations, applications to phase equilibrium, multicomponent systems, chemical reactions, and thermodynamic cycles. Application of statistical mechanics to physical systems; introduction to treatment of Maxwell-Boltzmann, Bose-Einstein, and Fermi Dirac statistics with applications. Elementary transport theory. At the level of Fundamen­tals of Statistical and Thermal Physics, by Reif, or Introduction to Statistical Mechanics by Betts.

PHYS 360 Electronic Circuits (also A&E P 363)
Fall, spring. 4 credits. Prerequisites: Physics 208 or 213 or permission of the instructor. No previous experience with electronics assumed, however, the course moves quickly through some introductory topics such as basic DC circuits. Fall term is usually less crowded. Lec, M 2:30–4:25, labs, T R or W 1:25–4:25 (also evening labs M W 7:30–10:30 spring). Fall, E. Kirkland; spring, R. Thorne.

Analysis, design, build and experimentally test circuits used in scientific and engineering instrumentation (with discrete components and integrated circuits). Analog circuits: resistors, capacitors, operational amplifiers (linear amplifiers with feedback, oscillators, comparators); transistors, diodes and transistors. Digital circuits: combinatorial (gates) and sequential (flip-flops, counters, shift registers) logic. Computer interfacing introduced and used to investigate digital to analog (DAC) and analog to digital conversion (ADC) and signal averaging. At the level of Microelectronic Circuits by Sedra.

PHYS 400 Informal Advanced Laboratory
Fall, spring; (summer, 6 week session) Variable to 3 credits. (3 credits NOT variable in summer.) Prerequisites: two years of physics with permission of instructor. Lab, T W 1:25–4:25. Fall, W. Ho; spring, D. Hartill. Experiments of widely varying difficulty in one or more areas, as listed under Physics 410, may be done to fill the student’s special requirements.

PHYS 410 Advanced Experimental Physics
Fall, spring. 4 credits. Limited to seniors except by special permission. Prerequi­sities: Physics 214 (or 310 or 360) plus 318 and 327, or permission of instructor. Lec, M 2:30–3:20, Lab, T W 1:25–4:25. Fall, W. Ho; spring, D. Hartill. Selected topics in experimental concepts and techniques. About sixty different experiments are available in acoustics, optics, spectro­sopy, electronic circuits, electronics and solid state, cosmic rays, nuclear physics. The student performs three to six diverse experiments, depending on difficulty, selected to meet individual interests. Independent work is stressed. Lectures are on experimental techniques used in experiments in the laboratory and on current research topics.

PHYS 443 Introductory Quantum Mechanics
Spring. 4 credits. Prerequisites: Physics 327 or 323, and Physics 316 and Applied and Engineering Physics 321 or Mathematic­

Introduction to concepts and techniques of quantum mechanics, at the level of An Introduction to Quantum Mechanics, by Griffiths.

PHYS 444 Nuclear and High-Energy Particle Physics
Spring. 4 credits. Prerequisite: Physics 443 or permission of instructor. Lec, M W F 9:05–10:55, rec, F 2:30–3:20. Staff. Behavior of high-energy particles and radiation; elementary particles; basic properties of accelerators and detectors; general symmetries and conservation laws. At the level of Concepts of Particle Physics, by Gottfried and Weissskopf or Modern Element­ary Particle Physics by Kane.

PHYS 454 Introductory Solid-State Physics (also A&E P 450)
Fall. 4 credits. Prerequisite: Physics 443, A&E P 361, Chemistry 793, or permission of instructor. Lec, W 9:05–10:55; Computer lab: W or R 2:30–4:25. F. Wise.

An introduction to modern solid-state physics, including crystal structure, lattice vibrations, electron theory of metals and semiconductors, and selected topics from magnetic properties, optical properties, superconductors, and defects. At the level of Introduction to Solid State Physics, by Kittel, and Solid State Physics, by Ashcroft and Mermin.

PHYS 455 Geometrical Concepts in Physics
Spring. 3 credits. Prerequisite: Physics 323 or equivalent and at least coregistration in Physics 318 or permission of instructor. Usually offered every other spring. Not offered 1999–2000. Lec, T R 10:10–11:25.

Geometrical methods are an essential tool in modern theoretical physics and also provide deep insights into classical physics. This course will introduce basic concepts from differential geometry, emphasizing calcula­tional methods and illustrating their utility by drawing examples from mechanics, electrodyn­amics, and crystal diffraction. Tensors, differential forms, covariant and Lie deriva­tives, Lie algebra of vector fields and gauge invariance will be developed and employed. At the level of Geometric Mechanics by Talman.

PHYS 480 Computational Physics (also Phys 680 and Astro 690)
Spring. 3 credits. S-U grades only. Prerequisites: the course assumes a good background in the standard "mathematical methods for physics" courses. Ability to write programs in Fortran or C. No previous knowledge of numerical analysis is assumed. Lec, T R 10:10–11:25. Staff. A course designed to familiarize students with numerical techniques for solving diverse problems in physics and related fields. The problems will be drawn from many different branches of physics, but the emphasis will be on common techniques of solution. Numerical techniques discussed in the course will include ordinary and partial differential equations, linear algebra and eigenvalue
problems, Monte Carlo techniques, solving nonlinear equations, fast Fourier transforms, etc. In contrast to traditional numerical analysis courses, the flavor of the course will be "how to..." rather than "why..." No theorems will be proved. Students will be expected to solve, both individually and in small teams, assigned numerical exercises. Text: *Numerical Recipes: The Art of Scientific Computing*, by Press, Teukolsky, Flannery, and Vetterling.

**PHYS 481-489 Special Topics Seminar**

Offerings are announced each term. 2 and 3 credits. Limited to senior physics majors and those who receive permission of instructor. S-U grades only.

**New special topics seminar for fall 1999:**

**PHYS 488** Fall. 3 credits. Prerequisites: intermediate E&M (Phys 323 or Phys 327) and classical mechanics (Phys 314 or Phys 318). Introduction to Accelerator Physics and Technology (also Phys 688). Lec T 10:10–11:25. G. Dugan. Fundamentals of the design of particle accelerators and the physics, as well as the construction of high energy colliders, such as the Cornell Electron Storage Ring (CESR). Includes beam optical design, the single-particle dynamics of transverse and longitudinal motion, collective motion, the role of synchrotron radiation, and the interactions of colliding beams. The physics of some of the required technologies, such as electron sources, radiofrequency cavity systems, beam dynamics, and magnets, will be covered in seminars conducted by experts. Student participation in machine experiments at CESR will be arranged as the running schedule permits. At the level of Introduction to the Physics of High Energy Accelerators by Edwards and Syphers.

**New special topics seminar for Spring 2000:**

**PHYS 489** Spring. 3 credits. Prerequisites: intermediate level mechanics (Phys 314 or 327) and E&M (Phys 323 or 327) or permission of instructor. Previous completion of Phys 488/688 is recommended. Lec T 10:10–11:25. S. Gruner and R. Talman. The Storage Ring as a Source of Synchrotron Radiation (also Phys 689). Physics of synchrotron radiation with a focus on characteristics of radiation from dipole magnets, electron beam properties that influence radiation characteristics, issues of flux, brightness, emittance, brilliance, beam stability, and beam lifetime. Regular lectures will alternate with visitor lectures on specialized topics on radiation from insertion devices (i.e., wigglers and undulators), x-ray optics, coupling to beams, and coherence in x-ray beams. There will be special emphasis on understanding the requirements for doing synchrotron radiation experiments.

**PHYS 490 Independent Study in Physics**

Fall or spring. Variable to 4 credits. Ordinarily limited to seniors. Prerequisite: permission required of professor who will direct proposed work. A copy of the Request for Independent Study Form must be filed with physics department course coordinator, 121 Clark Hall. Individual project work (reading or laboratory) in any branch of physics.

**PHYS 500 Informal Graduate Laboratory**

Fall, spring. Variable. To 2 credits. Permission of instructor. Experiments of widely varying difficulty in one or more areas, as listed under Physics 510, may be done to fulfill student's special requirements.

**PHYS 510 Advanced Experimental Physics**

Fall, spring, summer. 3 credits. Lab, T W 1:25–4:25. Fall, W. Ho, Spring, D. Hartill. About sixty different experiments are available in acoustics, optics, spectroscopy, electrical circuits, electronics, magnetic, resonance, X-rays, low temperature, solid state, cosmic rays, nuclear physics. Students perform four to eight experiments selected to meet individual needs. Independent work is stressed. An optional lecture associated with Physics 410, M 2:30–4:25 is available. It includes lectures on techniques used in experiments in the advanced laboratory and on current research topics.

**PHYS 520 Projects in Experimental Physics**

Fall, spring, summer. Variable to 3 credits. To be supervised by faculty member. Students must advise department course coordinator of faculty member responsible for their project. Prerequisite: Physics 510. Projects of modern topical interest that involve some independent development work by student. Opportunity for more initiative in experimental work than is possible in Physics 510.

**PHYS 525 Physics of Black Holes, White Dwarfs, and Neutron Stars (also Astronomy 515)**

**PHYS 551 Classical Mechanics**

Spring. 3 credits. Prerequisite: an undergraduate course in classical mechanics at the level of books by K. Symon or B. Marsden. Lec, T 10:10–11:25, rec, R 1:25–2:15. L. Hand. Lagrangian and Hamiltonian formulation of classical mechanics, using modern methods, modern applications in nonlinear dynamics. At the level of *Theoretical Mechanics of Particles and Continua*, by Fetter and Walecka.

**PHYS 553-554 General Relativity (also Astronomy 509-510)**

553, fall; 554, spring. 4 credits. Prerequisite: knowledge of special relativity at the level of Classical Relativity by Goldstein. Lec, T R 1:25–2:40. Not offered 1999–2000. Next offered 2000–01. E. Flanagan. Physics 553 is a systematic introduction to Einstein's theory, with emphasis on modern coordinate-free methods of computation. Topics include review of special relativity, modern differential geometry, foundations of general relativity, laws of physics in the presence of a gravitational field, experimental tests of gravitation theories. At the level of *Gravitation*, by Misner. Physics 554 is a continuation of 553 that emphasizes applications to astrophysics and cosmology. Topics include relativistic stars, gravitational collapse and black holes, gravitational waves, cosmology.

**PHYS 561 Classical Electrodynamics**

Fall. 3 credits. Lec T 8:30–9:55. Sec M 2:30–3:20. T-M. Yan. Maxwell's equations, electromagnetic potentials, electrodynamics of continuous media (selected topics), special relativity, radiation theory. At the level of *Classical Electrodynamics*, by Jackson.

**PHYS 562 Statistical Physics**

Spring. 4 credits. Primarily for graduate students. Prerequisites: a good knowledge of quantum mechanics (at the level of Merzbacher), classical mechanics (at the level of Marion), and statistical mechanics (at the level of Reif). Lec, M W F 9:05–9:55. N. Ashcroft. Macroscopic or thermodynamic concepts including the laws of thermodynamics, thermodynamic functions, thermodynamic stability, and the thermodynamics of phase equilibria. Microscopic concepts including 1-, 2-, and N-particle quantum states; the micro-canonical, canonical and grand-canonical distributions, Bose-Einstein, Fermi-Dirac and Boltzmann statistics, the density-matrix. The microscopic-macroscopic connection. Applications include spin systems—the Ising and related models; strongly correlated fluids, and lattice-gases, including distribution and correlation functions, thermodynamic perturbation theory and introduction to critical phenomena and the renormalization group; dense Fermi- and Bose- systems; linear response of quantum and classical systems; transport properties and the Boltzmann equation. At the level of *Mathematical Physics* (2nd edition) by Pathria and *Statistical Mechanics of Phase Transition* by Yeomans.

**PHYS 572 Quantum Mechanics I**

Fall. 4 credits. Lec, M W F 11:15–12:05. P. Drell. General principles of quantum mechanics, formulated in the language of Dirac. Systems with few degrees of freedom: hydrogen atom, including fine and hyperfine structure, the deuteron; and atomic transitions. Theory of angular momentum, symmetries, perturbations and collisions will be developed to analyze phenomena displayed by these systems. At the level of *Modern Quantum Mechanics* by Sakurai. A knowledge of the subject at the level of Phys 443 will be assumed, but the course will be self-contained.

**PHYS 574 Quantum Mechanics II**

PHYS 599 Cosmology (also ASTRO 599)
For description, see ASTRO 599.

PHYS 635 Solid-State Physics I
Fall. 3 credits. Prerequisites: a good undergraduate solid-state physics course, such as Physics 454. D. Ralph.
A survey of the basics of the physics of solids: crystal structure, x-ray diffraction, phonons, and electrons. Selected topics from semiconductors, magnetism, superconductivity, disordered materials, dielectric and optical properties and mesoscopic physics. At level of Solid State Physics by Ashcroft and Mermin.

PHYS 636 Solid-State Physics II
Spring. 3 credits. Prerequisites: Physics 635. P. Bruno.
A continuation of Physics 635; magnetism, superconductivity, broken symmetries, elementary excitations, and other topics in quantum condensed matter physics not covered in Solid State Physics by Ashcroft and Mermin; such as topological defects, superfluids, the quantum Hall effect, mesoscopic quantum transport theory, disordered systems, Anderson localization and other metal-insulator transitions.

PHYS 645 High-Energy Particle Physics
Fall. 3 credits. D. Cassel.
Introduction to physics of baryons, mesons, and leptons. Symmetry, magnetic, and weak interactions. Relevance of symmetry laws to particle physics. Introduction to the quark model. At level of The Experimental Foundations of Particle Physics, by Cahn and Goldhaber.

PHYS 646 High-Energy Particle Physics II
Spring. 3 credits. Staff.
Topics of current interest, such as high-energy electron and neutrino interactions, electron positron annihilation, and high-energy hadronic reactions. Lectures and reading material are at the level of Introduction to High Energy Physics, by Perkins, and Elementary Particle Physics by Griffiths.

Note: Only S-U grades will be given in courses numbered 650 or above.

PHYS 651 Relativistic Quantum Field Theory I
Fall. 3 credits. S-U grades only. A. LeClair.
Topics to be covered include consequences of causality and Lorentz invariance, field quantization, perturbation theory, calculation of cross sections and decay rates, and an introduction to radiative corrections and renormalization with applications to electromagnetic and weak interactions.

PHYS 652 Relativistic Quantum Field Theory II
Spring. 3 credits. S-U grades only. H. Tye.
This course is a continuation of Physics 651 and introduces more advanced methods and concepts in quantum field theory. Topics include functional integral methods, quantization of non-abelian gauge theories, the renormalization group, and spontaneous symmetry breaking. Topics in cosmology, supersymmetry or superstring may be introduced. Applications to the electroweak theory and quantum chromodynamics are emphasized. At the level of An Introduction to Quantum Field Theory by Peskin and Schroeder.

PHYS 653 Statistical Physics
Fall. 3 credits. Normally taken by graduate students in their second or later years. Prerequisites: competence in the basic principles of quantum mechanics, statistical physics at the level of Physics 562, and thermodynamics. S-U grades only. V. Ambegaokar.
Survey of topics in modern statistical physics: Dynamical statistical physics (kinetic theory, Boltzmann equation, hydrodynamics); theory of simple fluids; scaling theories and the renormalization group; phase transitions in disordered systems; pattern formation in nonlinear systems, percolation theory.

PHYS 654 Theory of Many-Particle Systems
Spring. 3 credits. Prerequisites: Physics 562, 574, 635, 636, and 653. S-U grades only. Staff.
Equilibrium and transport properties of microscopic systems of many particles studied at zero and finite temperatures. Formalisms such as thermodynamic Green's functions are introduced and applied to such topics as normal and superconducting Fermi systems, superfluidity, magnetism, insulating crystals.

PHYS 661 Advanced Topics in High Energy Particle Theory
Fall. 3 credits. Prerequisites: Physics 652. S-U grades only. Not offered 1999–2000. This course will present advanced topics of current research interest. Subject matter will vary from year to year. Some likely topics are two-dimensional conformal field theory with applications to string theory and condensed matter physics, applications of the electroweak theory, lattice gauge theory, mathematical methods (e.g. group theory), perturbative quantum chromodynamics, anomalies and geometry, supersymmetry, current algebra, heavy quark physics, heavy quark symmetry and phenomenological issues beyond the standard model.

PHYS 665 Topics in Theoretical Astrophysics
For description, see ASTRO 699.

PHYS 667 Theory of Stellar Structure and Evolution (also Astro 560)
For description, see ASTRO 560.

PHYS 670 Instrumentation Seminar
Conception, design, and performance of innovative instrumentation in condensed matter and elementary particle physics.

PHYS 680 Computational Physics (also Physics 480 and Astronomy 690)
For description, see PHYS 480.

PHYS 681-689 Special Topics
Offerings are announced each term. Typical topics are group theory, analyticity in particle physics, weak interactions, superfluids, stellar evolution, surface physics, Monte Carlo methods, low-temperature physics, magnetic resonance, phase transitions, and the renormalization group.

New special topics seminar for fall 1999.
PHYS 688 Introduction to Accelerator Physics and Technology (also Phys 488). For description see PHYS 488.
New special topics seminar for spring 2000.
PHYS 689 The Stanford Ring as a Source of Synchrotron Radiation (also Phys 489). For description see PHYS 489.

PHYS 690 Independent Study in Physics
Fall or spring. Variable to 4 credits. Students must advise department course coordinator, 121 Clark Hall, of faculty member responsible for grading their project. S-U grades only. Special graduate study in some branch of physics, either theoretical or experimental, under the direction of any professorial member of the staff.

POLISH
See Department of Russian.

PORTUGUESE
See Department of Romance Studies.

PSYCHOLOGY
The major areas of psychology represented in the department are perceptual and cognitive psychology, biopsychology, and personality and social psychology. These areas are very broadly defined, and the courses are quite diverse. Biopsychology includes such things as animal learning, neuropsychology, interactions between hormones, other biochemical processes, and behavior. Perceptual and cognitive psychology includes such courses as cognition, perception, memory, and psycholinguistics. Personality and social psychology is represented by courses in social psychology and personality (such as Psychology and Law, Judgment and Decision Making, and Social Construction of Gender), as well as courses in fieldwork and psychopathology. In addition to the three major areas mentioned above, the department also emphasizes the statistical and logical analysis of psychological data and problems.

The Major
Admission to the major is usually granted to any student in good standing in the college who has passed three or more psychology courses with grades of C+ or better. Provisional admission requires two such courses. To apply to the major and receive an adviser, a major application form may be obtained from the department office (211 Uris Hall).
Requirements for the major are:
1) a total of 40 credits in psychology (including prerequisites), from which students majoring in psychology are expected to choose, in consultation with their advisers, a range of courses that covers the basic processes in psychology (laboratory and/or field experience is recommended); and
2) demonstration of proficiency in statistics before the beginning of the senior year.
(See the section below on the statistics requirement.)

Normally it is expected that all undergraduate psychology majors will take at least one course in each of the following three areas of psychology:

1) Perceptual and cognitive psychology
2) Biopsychology
3) Social, personality, and abnormal psychology

The following classification of Department of Psychology offerings is intended to help students and their advisers choose courses that will ensure that such breadth is achieved.

1) Perceptual and cognitive psychology:
2) Biopsychology:
3) Social, personality, and abnormal psychology:
   - Psychology 128, 265, 275, 277, 280, 281, 325, 327, 328, 402, 404, 450, 481, 489, 491.

4) Other courses:
   - The major adviser determines to which group, if any, these courses may be applied.

With the permission of the adviser, courses in other departments may be accepted toward the major requirements.

Fieldwork, independent study, and teaching.

The department requires students to observe the following limits on fieldwork, independent study, and teaching.

1) Undergraduates may not serve as teaching assistants for psychology courses if they are serving as teaching assistants for any other course during the same semester.
2) An undergraduate psychology major cannot apply more than 12 of the credits earned in independent study (including honors work) and fieldwork toward the 40 credits required by the major.

Statistics requirement. Proficiency in statistics can be demonstrated in any one of the several ways listed below.

1) Passing Psychology 350.
2) Passing an approved course or course sequence in statistics in some other department at Cornell. The approved list of courses and sequences may change. It has usually included Sociology 301, and the sequences Education 352 and 353, and Industrial and Labor Relations 210 and 211. Requests that a particular course be added to this list may be made to Professor Gilovich.
3) Passing a course or course sequence in statistics at some other college, university, or college-level summer school. The course or sequence must be equivalent to at least 6 semester credits. The description of the course from the college catalog and the title and author of the textbook used must be submitted to Professor Gilovich for approval.
4) Passing an exemption examination. This examination can be given at virtually any time during the academic year if the student gives notice at least one week before. Students who have completed a theoretical statistics course in a department of mathematics or engineering and who wish to demonstrate competence in applied statistics usually find this option the easiest. Students planning this option should discuss it in advance with Professor Gilovich.

Concentration in biopsychology. Psychology majors interested in psychology as a biological science may specialize in biopsychology. Students in this concentration must meet all of the general requirements for the major in psychology and must also demonstrate a solid background in biology; the physical sciences, including at least introductory chemistry, and mathematics. Students will design with their advisers an integrated program in biopsychology built around courses on physiological, chemical, anatomical, and ecological determinants of human and nonhuman behavior offered by the Department of Psychology. Additional courses in physiology, anatomy, biochemistry, neurochemistry, neurobiology, and behavioral biology may be designated as part of the psychology major with consultation between the student and his or her biopsychology adviser.

Concentration in personality and social psychology. Psychology majors who wish to specialize in social psychology are expected to meet the general requirements set by their department, including statistics. To ensure a solid interdisciplinary grounding, students in the concentration will be permitted to include some major courses in sociology and related fields. Advisors will assist students in the selection of a coherent set of courses from social organization, cultural anthropology, experimental psychology, social methodology, and several aspects of personality and social psychology. Seniors in the concentration may elect advanced and graduate seminars, with the permission of the instructor.

Undergraduate honors program. The honors program is designed for those exceptionally able students who wish to pursue an intensive and independent program of research in psychology. Successful participation in this program serves as evidence of the student's ability in the two most important skills of an academic psychologist: the capacity to acquire and integrate a substantial body of theoretical and factual material and the ability to engage in creative research activity. All qualified students planning on a graduate education in psychology or other academic fields should consider the honors program seriously. The program offers most students the closest collaboration with a faculty member in the field of research in psychology. Successful completion of the program will provide most students the closest contact and collaboration that they will receive during their time at Cornell.

The core of the honors program is a research project that the student carries out in close collaboration with a faculty member in the field of psychology. It is assumed that most students will do so while enrolled in Psychology 470 (Undergraduate Research in Psychology). A written report of the research is to be given to the chair of the honors committee (currently Professor Field) toward the end of the last semester of the student's senior year. An oral defense of the thesis is then given before a committee of three faculty members, and the student presents his or her work in a public forum. Final honors standing (summa cum laude, magna cum

laude, cum laude) is indicated on the student's diploma. The T. A. Ryan Award, accompanied by a cash prize, is awarded to the student who conducts the best honors project in a given year.

A student may formally apply to the honors program at any time during the senior year provided that she or he is actively engaged in independent research. However, students must do so by the second week of November. Applications should be given to Professor Field and should be made directly by the student.

Distribution Requirement

The distribution requirement in the social sciences is satisfied by any two courses in psychology with the exception of Psychology 223, 307, 322, 324, 326, 332, 350, 361, 396, 410, 420, 422, 424, 425, 429, 431, 440, 441, 470, 471, 472, 473, 475, 478, 479, 491, 492.

Note: The Department of Psychology has listed all days and times for each course that we offer. If there should be changes in the days, times, or semester that a course is offered, we will post the necessary changes throughout the department and in the supplements of the Course and Time and Course and Room Rosters. Changes are also available on the World Wide Web site, http://comps9.psych.cornell.edu

Courses

**PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry**

Fall. 3 credits. Students who would like to take a discussion seminar should also enroll in Psychology 103. M W F 10:10.

J. B. Mass.

The study of human behavior. Topics include brain functioning and mind control, psychophysiology of sleep and dreaming, psychological testing, perception, learning, cognition, memory, language, motivation, personality, abnormal behavior, psychotherapy, social psychology, and other aspects of applied psychology. Emphasis is on developing skills to critically evaluate claims made about human behavior.

**PSYCH 102 Introduction to Cognitive Science (also COGS 101, COMS 101, LING 170, PHIL 191)**

Fall. 3 or 4 credits (the four credit option involves a writing section instead of taking exams). T R 11:40-12:55.

M. Spivey.

This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: language, vision, learning and memory, action, and artificial intelligence.

**PSYCH 103 Introductory Psychology Seminars**

Fall. 1 credit. Limited to 300 students.

Prerequisite: concurrent enrollment in Psychology 101. Hours are arranged. 12 different time options.

J. B. Maas and staff.
A weekly seminar that may be taken in addition to Psychology 101 to provide an in-depth exploration of selected areas in the field of psychology. Involves extensive discussion and a term paper related to the seminar topic. Choice of seminar topics and meeting times will be available at the second lecture of Psychology 101.

**PSYCH 209 Developmental Psychology**
Spring. 4 credits. Graduate students, see Psychology 709. T R 2:55-4:10. Staff. One of four introductory courses in cognition and perception. A comprehensive introduction to current thinking and research in developmental psychology that approaches problems primarily from a cognitive perspective. The course focuses on the development of perception, action, cognition, emotion, personality, social understanding, language, and moral reasoning.

**PSYCH 214 Issues in Cognitive Psychology**
Fall. 3 credits. Sophomore standing required. Limited to 150 students. Graduate students, see Psychology 014. M W F 11:15. Staff. Various approaches to the study of cognition will be discussed. Basic concepts in how humans process different kinds of information such as visual, auditory, and symbolic will be introduced. These concepts will then be used to explore topics such as attention and consciousness, concept formation and representation, memory processes and systems, imagery and cognitive maps, problem solving and judgment and choice, language acquisition and comprehension, intelligence and creativity, and social cognition.

**PSYCH 215 Psychology of Language**
Spring. 3 or 4 credits (4-credit option involves term paper). Graduate students, see Psychology 715. M W F 11:15. Not offered 1999–2000. Staff. One of four introductory courses in cognitive psychology. Introduction to the psychological study of language. Covers research in spoken language comprehension and production, reading, and language acquisition.

**Introductory courses in social and personality psychology.** Each of the following four courses (265, 275, 277, 280) provides an introduction to a major area of study within social and personality psychology. These courses are independent of one another, and none have any prerequisites. Students may take any one of the courses or any combination of them (including all four). Courses may be taken in any order or simultaneously.

**PSYCH 216 Cognitive Psychology Lab**
Fall. 1 credit. Limited to 16 students. Prerequisite: concurrent enrollment in Psychology 214. Hours to be arranged. Staff. If you've ever wondered how humans manage to represent their visual world, why telephone numbers are so easily forgotten, or why stories work as a mnemonic device, why certain things are better remembered than others, whether bilinguals are disadvantaged relative to monolinguals, how children acquire knowledge of the world, how people make decisions...this laboratory is for you! A weekly lab meeting that encourages students to discover the scientist in themselves through the study of cognition. Much of cognitive research takes place in the laboratory and this course allows students to become familiar with the "how-to" of such research. Students will be given six to eight basic experiments to explore and tinker with. They will be encouraged to pose "what if" questions and eventually test them. The course promotes independent thinking, problem solving in an experimental setting, proposing and testing of one's own hypotheses, relating laboratory cognition to the real world, and communicating scientific ideas through informal and formal writing and oral assignments. Be prepared for an interactive learning experience.

**PSYCH 223 Introduction to Biopsychology**
Fall. 3 credits. M W F 10:10. No prerequisites. Can be used to satisfy the psychology major breadth requirement and as an alternative prerequisite for upper-level biopsychology courses. Students who would like to take a demonstration/demonstration seminar should also enroll in Psychology 224, a one hour per week one-credit section. M. J. Oren.

An introduction to psychology from a biological perspective, including both evolutionary and physiological approaches to behavior. Topics include the structure and function of the nervous system, genetic and biochemical models of behavior, hormones and behavior, biological bases of learning, cognition, communication, and language, and the economy and evolution of social organization and social development.

**PSYCH 224 Introduction to Biopsychology Seminars**

A weekly seminar that may be taken in addition to Psychology 223 to allow and encourage "hands-on" involvement with some of the course material, including interactive computer programs and movies to get a clearer picture of basic neuroanatomy, visits to the laboratories of biopsychology faculty, films, reading, writing, and discussion of course material. Involves several small assignments equivalent to a 10-page paper.

**PSYCH 265 Psychology and Law**
Fall. 3 credits. M W F 1:25. O. A. Durbin.

This course examines the implications of psychological theory and methods for law and the criminal justice system. We concentrate on psychological research on legal topics (e.g., confession, eyewitness testimony, jury decision making, homicide, aggression, the prison system), social issues (e.g., death penalty, affirmative action), as well as on psychologists as participants in the legal system (e.g., assessing insanity and dangerousness and for expert testimony).

**PSYCH 275 Introduction to Personality Psychology**
Spring. 3 credits. Prerequisites: Psychology 101, HDFS 115, or permission of instructor. T R 10:10–11:25. C. Hazen.

An introduction to personality psychology, with an emphasis on personality development and contemporary research. Covers the major theories of personality, influences on personality development (including genetic, biological, experiential and environmental factors), and methods for assessing personality.

**PSYCH 277 Social Construction of Gender (also Women's Studies 277)**
Psychology/Women's Studies 277 is an interdisciplinary course that addresses two broad questions: 1) how an individual's gender and sexuality are constructed, and 2) how hidden assumptions or "lenses" embedded in our social institutions, cultural discourses, and individual psyches perpetuate male power and oppress women and sexual minorities. Although students are not required to volunteer at a local agency, the instructor will assist students in finding sites that may provide appropriate learning opportunities. A paper, relating current research to topics relevant to community mental health, is due at the end of the course.

PSYCH 292 Intercultural Psychology Spring. 4 credits. Prerequisites: one 200-level course in psychology. M W TBA.

Section meetings on Friday. U. Neisser.

A scientific overview of the controversial issues that surround intelligence tests and what they mean for the history of testing, correlates of test scores, alternative approaches to mental ability, genetic and environmental contributions to diversity in intelligence, effects of schooling, worldwide IQ gains, cultural factors and group differences.

PSYCH 294 Social Psychology Fall. 4 credits. Limited to 70 students. Prerequisites: Psychology 101 or HD 115.

Students may not concurrently register with Psych 324 or PSYCH 292.

Spring. 4 credits. Prerequisite: Psychology 205, 209, 214, or 215 (other psychology, linguistics, or biology courses could serve as prerequisite with permission of the instructor). Limited to 30 students. Graduate students, see Psychology 716. T R 10:10-11:25. C. L. Krumhansl.

Basic approaches to the perception of auditory information, with special consideration of complex patterns such as speech, music, and environmental sounds.

PSYCH 322 Hormones and Behavior (also BIOL 322)

Spring. 3 credits. Two lectures plus a section in which students will read and discuss original papers in the field, give an oral presentation, and write a term paper.

Limited to juniors and seniors. Prerequisites: Psychology 223, or BIOL 221 or 222, or one year of introductory biology plus a course in psychology. S-U grades optional. Graduate students see Psychology 722. M W F 11:15. F. Atkins Regan.

A major focus of the course will be comparative and evolutionary approaches to the study of the relationship between reproductive hormones and sexual behavior in vertebrates, including humans. Also included will be hormonal contributions to parental behavior, aggression, stress, learning and memory, and biological rhythms.

PSYCH 324 Biopsychology Laboratory (also BIOL 324)

Fall. 4 credits. Limited to 20 juniors and seniors. Prerequisites: Psychology 223 or BIOL 221 or 222, and permission of instructor. T R 9:05. B. P. Halpern.

A laboratory course designed to provide experience in animal behavior (including learning) and its neural and hormonal mechanisms. A variety of techniques, species, and behavior patterns are included.

PSYCH 325 Psychopathology (also HDFS 370)

Spring. 3 credits. Limited to sophomores, juniors, and seniors. Prerequisites: Psychology 101, HDFS 115, or Education 110; a course in statistics (e.g., Psych 350, SOC 301, Educ 352 or 353, Ag Ec 310 or equivalent). Limited to 150 students. C. Maxwell Miller.

A research-based survey of the cognitive, emotional, and biological aspects of psychopathology across the life span. The major mental illnesses will be covered, including schizophrenia, anxiety disorders, affective disorders, and personality disorders as well as psychopathological disorders of childhood. Emphasis will be placed on the development of psychopathology theories and models of etiology, and intervention strategies.

This course is intended to be a rigorous introduction to the scientific study of psychopathology and psychopathological development. A great deal of attention to psychopathology.

PSYCH 326 Evolution of Human Behavior Fall. 3 or 4 credits; the 4-credit option involves a laboratory project or paper. Prerequisites: Psychology 205, 209, 214, or 215 (other psychology, linguistics, or biology courses could serve as prerequisite with permission of the instructor). Limited to 30 students. Graduate students, see Psychology 716. T R 10:10-11:25. C. L. Krumhansl.

Basic approaches to the perception of auditory information, with special consideration of complex patterns such as speech, music, and environmental sounds.
A broad comparative approach to the behavior of animals and humans with special emphasis on the evolution of human behavior. Topics covered will vary but will include some of the following: human evolution, evolutionary and sociobiological theory, animal communication, nonverbal communication, language, cognitive capacities, social behavior and organization, cooperation and competition, sexual behavior, mating and marriage systems, aggression, warfare.

**PSYCH 327 Field Practicum I**

Fall only. 3 credits. Prerequisites: Psychology 325 or HD 370 (or taken concurrently), and permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: $25 each semester. Enrolled students must commit to taking Psychology 328 in the spring semester. No S-U option. M W 8:40-9:50. H. Segal.

This course is composed of three components which form an intensive undergraduate field practicum. First, students spend 3-6 hours a week at local mental health agencies, schools, or nursing facilities working directly with children, adolescents or adults; supervision is provided by host agency staff. Second, Cornell faculty provide additional weekly educational supervision for each student. Third, seminar meetings cover issues of adult and developmental psychopathology, clinical technique, case studies, and current research issues. Students write two short papers, two final take-home exams, and present an account of their field experience in class.

**PSYCH 328 Field Practicum II**

Spring. 3 credits. Prerequisites: Psychology 327 taken the previous term. Psychology 325 or HD 370 (or taken concurrently), permission of instructor. No S-U grades. Enrollment is limited to 30 students. Fee: $25 each semester. M W 8:40-9:50. H. Segal.

This course continues the field practicum experience from Psych 327. Students spend 3-6 hours a week at mental health agencies, schools, or skilled nursing facilities working directly with children, adolescents or adults; supervision is provided by host agency staff.

**PSYCH 332 Biopsychology of Learning and Memory (also BIONB 328)**

Students will be familiar with one year of biology and either a biopsychology class or BIONB 222. Limited to 60 students. Graduate students, see Psychology 652. M W F 11:15. T. J. DeVoogd.

This course will survey the approaches that have been or are currently being used in order to understand the biological bases for learning and memory. Topics will include invertebrate, “simple system” approaches, imprinting, avian song learning, hippocampal and cerebellar functions, and human pathology. Many of the readings will be from primary literature.

**PSYCH 342 Human Perception: Applications to Computer Graphics, Art and Visual Display**

Fall. 3 or 4 credits. The 4-credit option involves independent project. Prerequisite: Psychology 101 or permission of instructor. Psychology 205 strongly recommended. Graduate students, see Psychology 642. T R 11:40-12:55. D. J. Field.

Our present technology allows us to transmit and display information through a variety of media. To make the most of these media channels, it is important to consider the limitations and abilities of the human observer. The course will consider a number of applied aspects of human perception with an emphasis on the display of visual information. Topics to be covered include: “three-dimensional” display systems, color theory, spatial and temporal limitations of the visual systems, attempts at subliminal communication, and “visual” effects in film and television.

**PSYCH 347 Psychology of Visual Communications**

Spring. 3 credits. Limited to 15 students. Prerequisites: Psychology 101 and permission of instructor. R 10:10-12:05. J. B. Maas.

An exploration of theories of education, communication, perception, attitude, and behavior change as they relate to the effectiveness of visually based communication systems. Emphasis is on the use of photography and computer graphics to deliver educational messages.

**PSYCH 350 Statistics and Research Design**

Acquaints the student with the elements of statistical description (measures of average, variation, correlation, etc.) and, more important, develops an understanding of statistical inference. Emphasis is placed on those statistical methods of principal relevance to psychology and related behavioral sciences.

**PSYCH 361 Biopsychology of Normal and Abnormal Behavior (also NS 361)**

A critical analysis of research about the adaptive and maladaptive reasons for human behavior and/or cognitive functioning. Psychological, biological, and societal influences will be considered. Topics include: (1) the psychobiology of learning and memory; (2) nutritional influences on behavior/cognition (e.g., sugar, food additives, choline); (3) cognitive dysfunction (e.g., amnesia, Alzheimer’s disease); (4) developmental exposure to environmental toxins and drugs of abuse; and (5) psychiatric disorders (depression, eating disorders).

**PSYCH 396 Introduction to Sensory Systems (also BIONB 396)**

Spring. 3 or 4 credits (4 credits with term paper). Registration for the 4-credit option requires permission of instructor. Prerequisite: an introductory course in biology or biopsychology, plus a second course in neurobiology or behavior or perception or cognition or biopsychology. Students will be expected to have elements of knowledge of perception, neurophysiology, behavior, and chemistry. No auditors. Graduate students, see Psychology 696. M W F 10:10. Offered alternate years. B. P. Halpern.

The course is taught using the Socratic method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with both those characteristics of sensory systems that are common across living organisms and those sensory properties which require adaptation to particular habitats or environments. Classroom discussion can increase, but not decrease, a student's final grade. There are two preliminary exams and a final exam. The principles and limitations of statistical methods used to examine sensory systems will be considered. General principles of sensory systems, and auditory, visual, and somesthetic systems are covered. One aspect of each system (e.g., localization of objects in space by sound, color vision, thermoreception) will be selected for special attention. Two or more textbooks and a course packet of reproduced articles will be used.

**PSYCH 401 Theoretical Approaches to Psychopathology and Treatment**

Fall. 3 credits. Limited to 20 students. Prerequisites: Psychology 281 or 325. M. M. Leibowitz.

This course is designed to provide students with an overview of theoretical approaches to psychopathology and psychotherapy. It also aims to develop students' capacities to think in theoretical terms. The seminar and practical practice. We will examine the theoretical and pragmatic features of major contemporary models of psychotherapy and explore the conceptual traditions on which they draw. Observation of the work of children and adolescents, audio-visual demonstrations, case presentations and discussions will be included to advance students' understanding of the application of theory to practice. At the end of the course, students should be prepared to take a particular case, to study the theoretical, practical, and research issues it raises, including intervention strategies. This course is not intended to provide students with an understanding of methods. It is organized around theory, research, and practice relevant to the treatment of several of the Disorders of Infancy and Childhood as well as specific disorders of Adults on Axis I and Axis II of DSM IV.

Special attention will be given to the work of:

1. Daniel Stern, M.D.—Psychoanalytic。
2. Lorna Benjamin, Ph.D.—Interpersonal Theory
3. Aaron Beck, M.D.—Cognitive Theory

**PSYCH 402 Current Research on Psychopathology about Depression**

Current research and theory on the nature and etiology of depression. Approaches from various perspectives (biological, psychological, socio-cultural) are considered. Minimal attention to psychotherapy and symptomatology.

---

**PSYCHOLOGY 523**
[PSYCH 404 Psychopathology and the Family
This course will explore familial influences on the development of abnormal behavior. It will examine how psychological, biological, and cultural factors in a family might contribute to such disorders as anorexia nervosa, depression, sexual abuse, psychopathy, and psychosomatic illnesses. Emphasis will be placed on abnormal family experiences in the family and their impact on the development of later psychopathology. The course will also discuss how the evolution of family structures in more recent times (e.g., the rise in day care and divorce) influences the individual. Family therapy approaches and techniques will also be examined.]

[PSYCH 410 Undergraduate Seminar in Psychology
Fall or spring. 2 credits. Nonmajors may be admitted, but psychology majors are given priority. Hours to be arranged. Staff.
Information on specific sections for each term, including instructor, prerequisites, and time and place, may be obtained from the Department of Psychology office, 211 Uris Hall]

[PSYCH 412 Laboratory in Cognition and Perception
A laboratory course is designed to introduce students to experimental methods in perception and cognitive psychology. Students will take part in a number of classic experiments and develop at least one independent project. Computers will be available and used in many of the experiments although computer literacy is not required. Projects will be selected from the areas of visual perception, pattern recognition, memory, and concept learning.]

[PSYCH 413 Information Processing: Conscious and Nonconscious
Spring. 4 credits. Prerequisite: at least one course in human experimental and permission of instructor; Psychology 350 or equivalent will be useful for evaluating empirical articles. R 10-12-12:55. Not offered 1999-2000. Staff.
In the past decade, a not-so-quiet revolution has been taking place in the field of cognition regarding the problem of conscious mental computation. Data have come from patients with striking neuropsychological syndromes, i.e., the phenomenon of "blindsight" in which patients can respond to visual stimuli without the conscious experience of vision or the "apareil" in which such patients appear to interact learning and memory without the awareness of the learning encounters. This signature of independent mental computations has also been amply demonstrated in normal individuals in laboratory settings. We will critically evaluate the theoretical worth and empirical justification of the distinction between "conscious" and "non-conscious" mental computations in normal and patient populations. Weekly readings will be from, but not limited to, topics such as visual processes, face recognition, explicit and implicit memory, language processing and social cognition. Students will be required to: (a) read and prepare advance level discussions of classic and current papers; (b) submit weekly summaries of the assigned readings, and (c) write a term paper on a topic of their interest. Students should be prepared to present and extensively, think analytically, discuss cogently, and write succinctly.]

[PSYCH 414 Comparative Cognition
Spring. 3 credits. Prerequisite: Psychology 205, 209, 214, or permission of instructor. Graduate students, see Psychology 714. T R 11:40-12:55. M. J. Owren.
This course examines some of the conceptual and empirical work resulting from and fueling the recent surge of interest in animals' thinking. Specific topics may include whether nonhumans behave intentionally, show concept and category learning, memory, and abstract thinking similar to that of humans, the role of social cognition in the evolution of intelligence, and whether animals are conscious or self-aware. Evidence from communication studies in which animal signals provide the "mind" will play a strong role in the deliberations, including studies of naturally occurring signaling in various species and experiments in which nonhumans are trained in human-like language behavior. Cognition in nonhuman primates will be a specific focus throughout. The course will be a mix of lecture and discussion, emphasizing the latter as much as possible.]

[PSYCH 415 Concepts, Categories, and Word Meanings
Fall. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. Graduate students, see Psychology 615. M 1:25-4:25. Not offered 1999-2000. Staff.
A consideration of what types of categories are psychologically important, how they are represented and used through concepts, and how concept structure and semantic structure are interrelated. Different models of concept structure and categorization processes are evaluated, as is conceptual change and concept acquisition. Other topics include: relations between concepts and broader knowledge representation systems such as scripts, mental models, and intuitive theories; relative roles of associative information and beliefs in concept structure; categorization in other species; neuropsychological studies of categorization; comparisons of categorization systems across cultures; and comparisons of concept structures across different types of categories.]

[PSYCH 416 Modeling Perception and Cognition
Spring. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. M W F 11:15-12:05. M. Spivey.
This course offers a survey of several computational models that understand perception and cognition. We will explore linear systems analysis, connectionist models, dynamical systems, and production systems, to name a few. Emphasis will be placed on how complex sensory information gets represented in these models, as well as how it gets processed. This course will cover computational accounts of language processing, language acquisition, visual perception, and visual development, among others. Students will complete a final project that applies a computational model to some perceptual/cognitive phenomena.]

[PSYCH 417 The Origins of Thought and Knowledge
Fall. 4 credits. Prerequisites: Psychology 205, 209, 214, or 215, or permission of instructor. Graduate students, see Psychology 717. M 1:25-4:25. Not offered 1999-2000. Staff.
An in-depth analysis of current theories concerning the growth of thought and knowledge in childhood. Several controversies will be discussed in detail, including: Are mental abilities organized in local domains or modules that have their own patterns of development? Are there qualitatively different kinds of perception and knowledge? Is the process more continuous or discrete? What is the relation between language development and the development of abnormal behavior? Is cognitive development a modular process? Are there basic processes that are universal in all human knowledge? Are there modules that have their own patterns of development, or is the process more continuous in nature? What restrictions should these developmental considerations place on models of thought and knowledge in adults?]

[PSYCH 418 Psychology of Music
Spring. 3 or 4 credits, depending on whether student elects to do an independent project. Prerequisites: psychology major or senior standing with major in psychology or music and some background in both, or permission of instructor. Graduate students, see Psychology 618. M W 4:25-4:40. C. L. Kreutzmann.
Detailed analysis of topics in the psychology of music, including theories of consonance, perception of tonal-harmonic structure, memory for music, and effects of musical training. Emphasis given to experimental methodologies.]

[PSYCH 419 Neural Networks Laboratory
Spring. 4 credits. Prerequisites: at least one course in biology or biological psychology, one year of calculus, and permission of instructor. Limited to 15 students. Graduate students, see Psychology 619. T R 2-4:10. Not offered 1999-2000. D. J. Field.
The course will take a hands-on approach to understanding the limitations and successful applications of neural networks to problems in cognitive and biological psychology. A variety of neural network architectures will be discussed and explored using computer simulations. Applications of networks to perceptual recognition and representation will be emphasized. We will consider the class of problems that different networks can solve and consider the accuracy with which they model real nervous systems. Students will complete weekly lab reports and develop one independent project demonstrating the application of a neural network to a problem discussed in the course.]

[PSYCH 420 Laboratory in Neuroethology (also BIONB 420-03)
Designed as a laboratory component for BIONB 424/Psychology 424, this course will illustrate principles of neuroethology: sensory processing, neuromotor control, and behavioral analysis. Students will participate in six
laboratory exercises scheduled throughout the semester. The laboratory will be open from 12:20 until 5:00 p.m. on Mondays and Wednesdays. Labs will be done in groups of two. Students will learn the fundamentals of electrophysiology, neuroanatomy, and behavior through a series of six laboratory exercises using electric fish, Drosophilia, crayfish and Limulus, bats and moths.

[PSYCH 422 Developmental Biopsychology]
Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as Psychology 223 or BIONB 221). Graduate students, see Psychology 622. M W F 9:05–9:55. Not offered 1999–2000. B. L. Finlay.

We will discuss the relationship of the development and evolution of the brain to the development of behavior. Topics include how neurons are generated, finding targets, and establishing connections; the emergence of reflexive and complex behavior; how experience affects the developing brain; evolutionary perspectives on the development of perception; sensory communication systems, and abnormal development.

[PSYCH 424 Neuroethology (also BIONB 424)]
Spring. 3 credits. Prerequisites: BIONB 221 and 222. S-U grades optional for graduate students only. T 9:05–11:00, R 9:05–9:55. Classes will be held on T at 9:05–11:00. Thursday's class will run for one hour. Recitations will be scheduled in class. Not offered 1999–2000. C. D. Hopkins.

In the 1950’s-1970’s ethologists attempted to understand the mechanisms of animal behavior through the use of comparative methods, evolutionary analysis, careful observations of animals in their native habitats, and clever experimentation. Now, with the advent of new fields such as ethology, sensory physiology, and techniques in the neurosciences, many of the ethologist's mechanisms are being explained in terms of neural systems. This course will review the current status of research in neuroethology, including: mechanisms of acoustical communication in insects and in vertebrates; echolocation in bats and sound localization in owls; electroreception and electrolocation; chemical communication; and visual processing. In addition, it will review studies of the neural systems involved in decision making, in initiating action, and in coordinating fixed acts. Assigned readings will include original articles from the scientific literature. A term paper/poster on neuroethology will be required.

PSYCH 425 Cognitive Neuroscience
Fall. 4 credits. Prerequisites: a course in introductory biology and a course in biopsychology or neurobiology (such as Psychology 223 or BIONB 221). Graduate students, see Psychology 625. M W F 9:05–9:55. B. L. Finlay.

We will study the relation between structure and function in the central nervous system. The importance of evolutionary and mechanistic approaches for understanding the human behavior and cognition will be stressed. The course will focus on issues in cognitive neuroscience: mechanisms of perception, particularly vision, and the neuropyschology of everyday acts involving complex cognitive skills such as recognition of individuals, navigation in the world, language, memory, and social interaction.

[PSYCH 429 Olfaction and Taste: Structure and Function (also BIONB 429)]
Fall. 3 or 4 credits (4-credit option requires a research project). The project research can, but does not need to, study nonhuman vertebrates). Preference given to junior and senior psychology and biology majors and graduate students. Prerequisites: one 300-level course in biopsychology or equivalent. Graduate students, see Psychology 629. T R 9:05. Not offered 1999–2000. B. P. Halpern.

The structural and functional characteristics of olfaction and taste will be explored by reading and discussing current literature in these areas. Structure will be examined at the light levels of electron microscopes as well as at the molecular level. Function will be primarily reviewed at the cellular and biochemical aspects. The emphasis will be on vertebrates, especially air-breathing vertebrates in the case of olfaction, but there will be some coverage of invertebrate forms. At the level of Smell and Taste, an emphasis will be given to developing a broad understanding of taste and smell, especially air-breathing vertebrates. An emphasis will be given to the cellular and biochemical aspects. The emphasis will be on vertebrates, especially air-breathing vertebrates in the case of olfaction, but there will be some coverage of invertebrate forms. At the level of Smell and Taste, an emphasis will be given to developing a broad understanding of taste and smell, especially air-breathing vertebrates.

PSYCH 431 Effects of Aging on Sensory and Perceptual Systems (also BIONB 421)
Fall. 3 or 4 credits; the optional (or fourth) credit involves a term paper. Prerequisites: an introductory course in biology or psychology, plus a second course in perception or neurobiology or cognition or psychology. No auditors. Limited to 25 students. Graduate students, see Psychology 631. T R 10:10–11:25. B. P. Halpern.

A literature-based examination of post-maturation changes in the perceptual, structural, and physiological characteristics of somesthetic, chemosensory, visual, and auditory systems. Emphasis will be on human data, with non-human information included when especially relevant. Current developments in human sensory prosthetic devices, and in regenerative structures, will be examined. Brief written statements (by electronic mail) of questions and problems related to each set of assigned readings will be required at least one day in advance of each class meeting. This course will be taught using the Socratic Method, in which the instructor asks questions of the students. Students read, analyze, and discuss in class difficult original literature dealing with the subject matter of the course. Students are expected to come to each class having already done, and thought about, the assigned readings.

PSYCH 436 Language Development (also HDFS 436, LING 436, and COG ST 436)
Spring. 4 credits. Independent work on assigned modules, and independent research, throughout the week, and throughout the term. Prerequisites: at least Psychology 223 or BIONB 221. An additional course in biology, biopsychology or neurobiology is recommended. S-U grades optional. Graduate students, see Psychology 640. M W 8:40–9:55. Not offered 1999–2000. S. Porto.

Taking a comparative evolutionary perspective, this course examines the neural events that instigate, maintain, and disturb the states and rhythms of sleep in various species. Emphasizing human data where possible, special topics will include sleep deprivation and the biological functions of sleep; sleep's putative role in learning and memory; biologically interesting deviations from normal sleep; the cognitive neuroscience of sleep.

PSYCH 440 The Brain and Sleep
Fall. 4 credits. Prerequisites: at least Psychology 223 or BIONB 221. An additional course in biology, biopsychology or neurobiology is recommended. S-U grades optional. Graduate students, see Psychology 640. M W 8:40–9:55. Not offered 1999–2000. S. Porto.

This course surveys basic issues, methods, and research in the study of first-language acquisition. Major theoretical positions in the field are considered in the light of experimental studies in first-language acquisition of phonology, syntax, and semantics from infancy on. The fundamental issues of relationships between language acquisition and thought are discussed, as are the fundamental linguistic issues of Universal Grammar and the biological foundations for language acquisition. The acquisition of communication systems in nonhuman species such as chimpanzees is addressed, but major emphasis is on the child. An optional lab course supplement is available. (See Cog St. 450/ Ling 450 and Psych 437.)

PSYCH 447 Lab Course: Language Development (also LING 450 and COGST 450) [in conjunction with HDFS/LING 444, Language Development]
Spring. 2 credits. B. Lust.

This laboratory course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies Research Labs. This course is partially funded by a new National Science Foundation grant to Cornell's Cognitive Studies Program, "Interdisciplinary Approaches to the Scientific Study of Language, Knowledge and Acquisition." This project is intended to involve undergraduates in active research and to coordinate related subfields of several disciplines in a unified, laboratory-supported curriculum.

This course will include several structured modules dealing with topics covered in the survey course, H/D/LING/PSYCH 436, Language Development. They will include training in how to study and analyze original child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods in order to test hypotheses. The course will meet once a week in group format. In addition, students will be given access to a research lab environment for independent work on assigned modules, and independent research, throughout the week, and throughout the term.

[PSYCHOLOGY 525]
PSYCH 450 The Lenses of Gender (also Women's Studies 450)
Spring. 4 credits. Limited to 15 seniors and graduate students. Prerequisites: 1) senior or graduate standing, with preference given to psychology majors and women's studies majors; 2) both a course related to gender and/or sexuality and a course related to clinical and/or personality psychology. Permission of instructor required. Interested students should attend first class. Letter grade only. Graduate students, see Psychology 650/Women's Studies 650. F 2:30-4:25. Not offered 1999-2000. S. L. Bern
The focus of this seminar is the intersection of gender and clinical psychology. Rather than surveying a broader array of topics more superficially or studying a single topic in very great depth, the seminar will take up several gender- and sexuality-related issues in moderate depth over the course of several weeks. Possible topics include depression, eating disorders, recovery of false memories, transgender, needs of lesbian and gay clients. Course requirements will likely include a final essay examination and a term paper or a class presentation.

PSYCH 470 Undergraduate Research in Psychology
Fall or spring. 1-4 credits. S-U grades optional. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology.
Hours to be arranged. Staff
Practice in planning, conducting, and reporting independent laboratory, field, and/or library research.

PSYCH 471 Advanced Undergraduate Research in Psychology
Fall or spring. 1-4 credits. S-U grades optional. Written permission of the staff member who will supervise the work and assign the grade must be included with the course enrollment material. Students should enroll in the section listed for that staff member. A section list is available from the Department of Psychology.
Hours to be arranged. Staff
Advanced experience in planning, conducting, and reporting independent laboratory, field, and/or library research. One, and preferably two, semesters of Psychology 470 is required. The research should be more independent and/or involve more demanding technical skills than that carried out in Psychology 470.

PSYCH 472 Multiple Regression
Spring, weeks 1-7. 2 credits. Prerequisite: one solid semester of introductory statistics. Analysis of variance is helpful but not required. M W F 10:10. R. B. Darlington
Uses and pitfalls of multiple regression in causal analysis, path analysis, and prediction. Emphasis on analyzing data collected under uncontrolled conditions. Includes collinearity, indicator variables, sets, adjusted and unshrunken R², suppressors, hierarchical analysis, overcontrol, experimental design. Very little hand computation; uses MYSTAT computer program.

PSYCH 473 General Linear Model
Spring, weeks 8-14. 2 credits. Prerequisite: Psychology 472 or equivalent. M W F 10:10. R. B. Darlington
Includes multivariates or predictions. Structures for multiple tests, diagnostic methods, nonlinear relationships, interaction, man and simple effects, and basic power analysis. Emphasizes the use of MYSTAT, briefly discusses SAS PROC REG and SAS PROC GLM.

PSYCH 475 Multivariate Analysis of Psychological Data
Fall. 2 credits. Prerequisite: Psychology 473 or permission of instructor. R 10:10-12:05. R. B. Darlington
Students vote on topics to cover, choosing among nonparametric methods, time series, cluster analysis, multidimensional scaling, component analysis, factor analysis, MANOVA, canonical correlation, repeated measures, logistic regression, log-linear models, corrections for unreliability in regression, nesting, power analysis, influence analysis, and other topics. First class sketches all these topics before vote.

PSYCH 478 Psychometric Theory
Fall. 2 credits. Prerequisite: Psychology 472 or permission of instructor. Not offered 1999-2000. T 10:10-12:05. R. B. Darlington
Statistical methods relevant to the use, construction, and evaluation of psychological tests.

PSYCH 479 Multisample Secondary Analysis
Statistical methods for analyzing and integrating the results of many independent studies on related topics.

PSYCH 480 The Cornell Westchester/ Payne Whitney Field Placements
Fall year or through summer and fall. Prerequisites: Psych 325 or Psych 281(for Psych), Biology or Chemistry with Lab (Pre-med), Sophomores or Juniors only. C. Maxwell Miller
The Cornell-Westchester/Payne Whitney field placement program makes available eight-week research/clinical internships for Cornell-Ithaca undergraduates who are pre-professionals in psychology, neurobiology, psychiatry, or medicine. Each student is matched with a MD/Ph.D. mentor at the Cornell-Westchester or Payne Whitney hospital. Students work on one rotation throughout the summer and assist the researcher with his/her work. Students' work includes, but is not limited to, reading, reporting, observing, writing literature reviews, learning grant-writing, assisting in the conducting of experiments and planning their own experiments.

Most placements involve a clinical component as well. Under the supervision of the mentor, students work in therapy groups with patients, participate in testing, and gain experiences in psychological rehabilitative activities. The patient populations with whom students work are diverse with regard to age and diagnosis as well as race, culture, ethnicity, and national background.

PSYCH 481 Advanced Social Psychology
Fall. 4 credits. Limited to 20 students, by application. Senior psychology majors have priority. Graduate students, see Psychology 681. T R 10:10-11:25. D. T. Regan
Selected topics in social psychology are examined in depth with an emphasis on the relationship between experimental research and the development of theory. Readings will be mostly primary sources. Among the theoretical approaches to social behavior we may discuss are social comparison theory, cognitive dissonance, attribution processes and social judgment, dramaturgy and impression management, and evolutionary perspectives.

PSYCH 489 Seminar: Beliefs, Attitudes, and Ideologies
Fall. 4 credits. Prerequisites: admission is by application during the spring preregistration period. Senior psychology majors, M 2:30-4:25. Not offered 1999. D. B. Bern
The seminar examines fundamental properties of beliefs and attitudes: how they are formed and changed, what psychological functions they serve for the individual and how they coalesce into belief systems or ideologies. Several specific ideologies are examined in detail: for example, the political ideologies of the American public, gender, sexual orientation, the ideological factors that plaid in anorexia in a society, the contrasting worldviews of "pro-choice" and "pro-life" activists, the ideologies of psychology and science, and more. Participants write weekly commentaries on the readings in addition to a term paper examining a particular ideology.

PSYCH 491 Research Methods in Psychology
An intensive examination of the basic research methods used in social, personality, cognitive, and developmental psychology. The course will focus on designing and conducting experiments, i.e., how to turn vague theories into concrete and testable notions, evaluate studies, avoid common pitfalls, and, finally, remain ethical. Beyond learning methods of "correct" and rigorous experimentation, we will also discuss what makes a research study actually interesting. The course in addition will cover test construction, survey methods, and "quasi experiments." Students will concentrate on completing a small research project in which they conduct an experiment, interpret its data, and write up the results.
Advanced Courses and Seminars

Advanced seminars are primarily for graduate students, but with the permission of the instructor they may be taken by qualified undergraduates. The selection of seminars to be offered each term is determined by the needs of the students.

A supplement describing these advanced seminars is available at the beginning of each semester and can be obtained from the department office (211 Uris Hall). The following courses may be offered either term and carry 4 credits unless otherwise indicated.

PSYCH 510-511 Perception
PSYCH 512-514 Visual Perception
PSYCH 518 Topics in Psycholinguistics
PSYCH 519-520 Cognition
PSYCH 521 Psychobiology
PSYCH 522 Topics in Perception and Cognition
PSYCH 523 Hormones and Behavior

PSYCH 492 Sensory Function (also BIONB 492)
Spring. 4 credits. Limited to 25 students. Prerequisite: a 300-level course in biopsychology, or BIONB 222 or BIOAP 311, or permission of the instructors. Students are expected to have a knowledge of elementary physics, chemistry, and behavior. S-U grades optional. Offered alternate years. Graduate students, see Psychology 692. Not offered 2000–2001. M W F 10:10. B. P. Halpem and H. C. Howland.

This course covers classical topics in sensory function such as vision, hearing, touch and balance, as well as some more modern topics like sensory coding, location of stimulus sources in space, the development of sensory systems, and non-classical topics such as electrophysiology and internal chemoreceptors. Both human and nonhuman systems are discussed. In all cases the chemical, physical, and neurophysiological bases of sensory information are treated, and the processing of this information is followed into the central nervous system. This course will be taught using the Socratic method, in which the instructors ask questions of the students, and their answers will be discussed. Students will be expected to come to each class having read, thought about, and prepared to discuss, the assigned readings and other assigned information resources. Students will submit brief analyses of, and comments and questions on, all assignments by e-mail to the course's electronic mailing list a day before each class meeting. The mailing list will distribute submissions to all members of the class and to the instructors. In addition to these brief triweekly written exercises, a term paper in the form of a review article will be required.

PSYCH 527 Topics in Biopsychology
PSYCH 535 Animal Behavior
PSYCH 541 Statistics in Current Psychological Research
PSYCH 580 Experimental Social Psychology
PSYCH 600 General Research Seminar
Fall or spring. No credit.

PSYCH 601 Computational Models of Language
Spring. 4 credits. R 10:10–12:05. Prerequisites: consent of instructor. M. Spivey.

This seminar will involve in-depth discussion of a range of computational approaches to language representation, processing, and acquisition. We will cover phrase-structure grammars, context-free grammars, connectionist models, statistical natural language processing, and dynamical systems, to name just a few. There will also be some hands-on experience writing models in a computer lab using the MATLAB programming environment.

PSYCH 605 Perception (also Psychology 205)
Spring. 4 credits. T R 11:40–12:55. Non-Arts graduate students only. J. E. Cutting.

PSYCH 607 Chemosensory Perception (also Psychology 307)

PSYCH 611 Introduction to Human Memory (also Psychology 311)

PSYCH 612 Laboratory in Cognition and Perception (also Psychology 412)

PSYCH 613 Obesity and the Regulation of Body Weight (also Nutritional Sciences 315)
Spring. 3 credits. Limited to 30 students. Prerequisites: one course in psychology and one course in nutrition. Undergraduate students may register with permission of instructor. S-U grades optional. Offered alternate years. T R 1:25–3:20. D. A. Levitsky.

This course is a multidisciplinary discussion of the causes, effects, and treatments of human obesity. Topics include the biopsychology of eating behavior, the genetics of obesity, the role of activity and energy metabolism, psychosocial determinants of obesity, anorexia nervosa, therapy and its effectiveness, and social discrimination.

PSYCH 614 Issues in Cognitive Psychology (also Psychology 214)
Fall. 4 credits. M W F 10:10. Staff.

PSYCH 615 Concepts, Categories, and Word Meaning (also Psychology 415)

PSYCH 618 Psychology of Music (also Psychology 418)

PSYCH 619 Neural Networks Laboratory (also Psychology 419)

PSYCH 622 Developmental Biopsychology (also Psychology 422)

PSYCH 625 Cognitive Neuroscience (also Psychology 425)
Fall. 4 credits. M W F 9:05–9:55. B. L. Finlay.

PSYCH 626 Evolution of Human Behavior (also Psychology 326)

PSYCH 629 Offal and Taste: Structure and Function (also Psychology 429 and BIONB 429)

PSYCH 631 Effects of Aging on Sensory and Perceptual Systems (also Psychology 431 and BIONB 421)
Fall. 4 credits. T R 10:10–11:25. B. P. Halpem.

PSYCH 632 Biopsychology of Learning and Memory (also Psychology 332 and BIONB 328)

PSYCH 640 The Brain and Sleep (also Psychology 440)

PSYCH 641 Laboratory in Sleep Research (also Psychology 441)

PSYCH 642 Human Perception: Applications to Computer Graphics, Art, and Visual Display (also Psychology 342)

PSYCH 650 The Lenses of Gender (also Psychology 450 and Women's Studies 450 and Women's Studies 550)

PSYCH 681 Advanced Social Psychology (also Psychology 481)

PSYCH 689 Seminar: Beliefs, Attitudes and Ideologies (also Psychology 489)

PSYCH 691 Research Methods in Psychology (also Psychology 491)

PSYCH 692 Sensory Function (also Psychology 492 and BIONB 492)

PSYCH 696 Introduction to Sensory Systems (also Psychology 396 and BIONB 396)
Spring. 4 credits. M W F 10:10. B. P. Halpem.
PSYCH 700 Research in Biopsychology
PSYCH 709 Developmental Psychology (also Psychology 209)

PSYCH 710 Research in Human Experimental Psychology
PSYCH 713 Information Processing: Conscious and Non-conscious (also PSYCH 413)
Spring. 4 credits. R 10:10-12:35. B. Khunana.

PSYCH 714 Comparative Cognition (also Psychology 414)

[PSYCH 715 Psychology of Language (also Psychology 215)]

PSYCH 716 Auditory Perception (also Psychology 316)
Fall. 4 credits. T R 10:10-11:25. C. L. Krumhansl.

[PSYCH 717 The Origins of Thought and Knowledge (also Psychology 417)]

PSYCH 720 Research in Social Psychology and Personality
PSYCH 722 Hormones and Behavior (also Psychology 322 and RION 322)
Spring. 3 credits. M W F 11:15-12:05. E. A. Regan.

PSYCH 773-774 Proseminar in Cognitive Studies I and II (also COGST 773/774, PHIL 773/774, LING 773/774, and COMS 773/774)
Fall: R grade. Spring: S-U only. 4 credits.

The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar will consist of a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that make up the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty members from the field will introduce the theoretical and methodological issues that underlie the field and its relation to Cognitive Studies; in addition, they will introduce various labs in which active research is being conducted in their field at Cornell.

The proseminar will include suggestions from faculty in each field for further advanced interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It will conclude (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice.

Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade will be assigned in the fall semester, and a S-U grade only will be assigned in the spring semester.

PSYCH 775 Proseminar in Social Psychology I
Fall. 2 credits. Limited to 10 graduate students in social psychology. Hours to be arranged. D. A. Dunning, T. D. Gilovich, and D. T. Regan. This is the first term of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasize social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.

PSYCH 776 Proseminar in Social Psychology II
Spring. 2 credits. Limited to 10 graduate students in social psychology. Hours to be arranged. D. A. Dunning, T. D. Gilovich, and D. T. Regan. This is the second half of a year-long discussion-seminar course intended to give graduate students an in-depth understanding of current research and theory in social psychology. The course will emphasize social cognition, but other topics, such as group dynamics, social influence, the social psychology of language, emotional experience, etc., will be covered.

PSYCH 900 Doctoral Thesis Research in Biopsychology
PSYCH 910 Doctoral Thesis Research in Human Experimental Psychology
PSYCH 920 Doctoral Thesis Research in Social Psychology and Personality

Summer Session Courses
The following courses are also frequently offered in the summer session, though not necessarily by the same instructor as during the academic year. Not all of these courses will be offered in a particular summer. Information regarding these courses and additional summer session offerings in psychology is available from the department before the end of the fall semester.

PSYCH 101 Introduction to Psychology: The Frontiers of Psychological Inquiry
PSYCH 123 Introduction to Biopsychology
PSYCH 128 Introduction to Psychology: Personality and Social Behavior
PSYCH 199 Sports Psychology
PSYCH 280 Introduction to Social Psychology
PSYCH 350 Statistics and Research Design

QUECHUA
See Romance Studies.

RELIGIOUS STUDIES MAJOR
See "Special Programs and Interdisciplinary Studies."

ROMANCE STUDIES
The Department of Romance Studies (Mitchell Greenberg, chair) offers courses in French, Italian, and Spanish literatures. In addition, the department's program includes courses in the French, Italian, Portuguese, Quecha and Spanish languages and linguistics; semiotics; and Francophone, Italian, and Hispanic studies. Through its course offerings and opportunities for independent study, the department seeks to encourage study of the interactions of the Romance literatures among themselves, with other literatures, and with other fields of inquiry.

French

The Major
The major in French is divided into three options: French Area Studies, French linguistics, and French literature. While prospective majors should try to plan their programs as far ahead as possible, especially if they intend to study abroad, no student will be refused admission merely because of a late start. In view of the ongoing curriculum changes that will be implemented in 1999-2000, please see Professor Jacques Béreaud, the director of undergraduate studies. This consultation is especially important for finding out what sequence of courses will follow the current choice of courses.

The French Linguistics Option
The major in French linguistics is designed to give students proficiency in the oral and written language and to develop skills in the linguistic analysis of French.

To be admitted to the major, students should have completed Linguistics 101 and French 200, 203, 205, or 213 (or their equivalents) by the end of the sophomore year. It is expected that all students in the major will also take either French 220, 221, or 222, preferably by the end of the sophomore year.

To complete the major, a student must:
1) Acquire a sound degree of competence in French. This competence is demonstrated by the successful completion of French 312 (or its equivalent) or by the passing of a special examination. Typically, students in the major will have taken 312 by the end of their junior year.
2) Take six courses in French, Romance, and general linguistics (in addition to Linguistics 101). These courses will include at least one course concerning the history of French (e.g., Romance Linguistics 321, French 629 [listed under Romance Studies]), one course concerning the structure of French (e.g., French 405, 408, 410, Linguistics 323), and one other course in French linguistics.
3) Take two courses (preferably a sequence) in some allied area, for example, (a) French literature and civilization, (b) psycholinguistics, (c) philosophy of language, (d) French history, culture, music, or history of art or architecture. (This requirement may be waived for students who are double majors in other fields.)
The honors program encourages well-qualified students majoring in French linguistics to do independent work in French outside the structure of courses. The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not practically possible in the case of course papers.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 429-430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major. At the end of the senior year each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

The Literature Option

The major in French, literature option, is designed to give students proficiency in the oral and written language, to acquaint them with French literature and culture, and to develop skills in literary analysis.

Admission

To be admitted to the major, students should have completed FRJLT 201, 220, or 221 plus 222 and FRROM 213 or its equivalent by the end of their sophomore year.

For completion of the major, a student must:

1. Acquire a sound degree of competence in French language. This competence is demonstrated by the successful completion of French 301-312 or their equivalents, such as properly accredited study abroad or the passing of a special language test (the CASE examination) or the permission of the adviser (this option applies only to 312).

2. Take two courses in Romance Studies (literature or civilization) at the 300 level or above.

3. Take six courses at the 300 level or above in no more than three areas of interest such as—but not limited to—Africana studies, anthropology, comparative literature, French literature, economics, government, history, history of art, linguistics, music, theater arts, women's studies. Each area must be represented by at least two courses, and each course must have a significant French component. At least one of these six courses should be at the 400 level.

A copy of each student's program will be given to the director of undergraduate studies for approval and safekeeping.

Study Abroad in France

French majors or other interested students may study in France for one or two semesters during their junior year. Opting for one of several study programs recognized by the departments of Romance Studies and Linguistics facilitates the transfer of credit. Information about these plans is available from the director of undergraduate studies.

Students must be Cornell undergraduates with a strong academic record. The minimum French preparation work is the completion of FRROM 213 or its equivalent in advanced credit or placement by the Cornell CASE examination. The taking of FRROM 301 and/or 312 is, however, strongly recommended.

Students interested in studying in France are encouraged to consider the special benefits offered by EDU CO, the program in Paris cosponsored by Cornell and by Duke University. EDU CO offers advanced students a challenging course of study and the experience of total immersion in French life and culture in Paris. Participants in this program spend the year or the semester as fully matriculated students at the University of Paris VII and other institutions of higher learning in Paris, including the Institut d'Etudes Politiques (Sciences Po), selecting courses in many fields from the regular university course offerings. Students begin the academic year with an intensive three-week orientation into French history, society, and daily life. While it is possible to enroll in the EDU CO Program for one semester, admission will be given first to students planning to study abroad for the full academic year.

EDU CO maintains a center in Paris with appropriate support staff. The resident director, chosen annually from the Cornell and Duke faculties, teaches a special seminar each semester, provides academic advice, and helps ensure the quality of the courses. The center, which includes a small library and word-processing facilities, is regularly used by students for special tutorials, seminars, and lectures, as well as normal gatherings.

Honors. The honors program encourages well-qualified students majoring in French literature or culture to do independent work in French outside the structure of courses.

The preparation of the senior honors essay, generally spread over two terms, provides a unique learning opportunity, since it allows for wide reading and extensive rewriting to a degree not possible in the case of course papers.

No special seminars or courses are required of honors students, but they will have regular meetings with the faculty advisers who have agreed to supervise their work. They may receive course credit by enrolling in French 429-430, but these independent study courses must be taken in addition to the courses that meet the minimum requirements for the major.

At the end of the senior year each honors student is examined orally on the honors essay by a jury consisting of his or her faculty adviser and two other faculty members. The awarding of honors is determined by the student's grades in the major and the quality of the honors essay.

Fees. Depending on the course, a small fee may be charged for copies of texts used in course work.

Language

All language courses are offered by the Department of Romance Studies and French linguistics courses are offered by the Department of Linguistics.

Note: Students placed in 200-level courses also have the option of taking courses and/or literature courses; see listings under "Literature" for descriptions of the literature courses, some of which may be taken concurrently with French Language 200, 203, 205, or 213 or Hotel Administration 266.

FRROM 121 Elementary French

Fall, spring and summer: 4 credits. Spring enrollment limited. No prerequisites. Students who have studied French for 2 or more years must take the language placement test (LPP). Intended for beginning students or those placed by examination.

Small classes provide the opportunity for student interaction and intensive practice in listening to, speaking, reading, and writing basic French in meaningful contexts, which offers insights into French language, culture, and society.

FRROM 122 Elementary French

Fall or spring. 4 credits. Prerequisite: French 121, LPF score 37-44, or SAT II 370-480. Students who receive an LPF score of 56 after French 122 attain qualification and may enter the 200-level sequence; otherwise, satisfactory completion of French 123 is required for qualification. M. J. Highfield.

The goal of French 122 is to build on the students' elementary knowledge of French so that they can function in basic situations in a French-speaking culture. Courses offer intensive, context-specific practice in speaking, listening, reading, and writing.

FRROM 123 Continuing French

Fall, spring, or summer. 4 credits. Limited to students who have previously studied French and have an LPF score of 45-55 or SAT II 490-590. Satisfactory completion of French 123 fulfills the qualification portion of the language requirement. C. Waldron, I. Daly.

French 123 is an all-skills course designed to improve pronunciation, oral communication, and reading ability; to establish a groundwork for correct writing; and to provide a substan-
illustrate today's idiomic language. Course required of French majors.

**FRROM 305** French through Film
Fall and spring. 4 credits. Prerequisite: Q++ on CASE exam, French 213, or permission of instructor. C. Waldron. Analysis of French films and related readings. Used as a means of studying the language. Particular emphasis on the culture and historical context as it relates to French contemporary society. Additionally, guest speakers will provide enrichment on selected topics.

**FRROM 312** Advanced French II
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRROM 301 or placement by the Cornell Advanced Standing Examination (CASE). Fall, J. Bereaud; spring, N. Furman. Continuation of work done in French 301. The objective of French 312 is to teach students to speak and write correct French, in French 312 students will be expected to have a richer, more expansive and hopefully elegant command of the language. Formal study of grammar will be discontinued, and more attention will be devoted to the examination of texts and oral presentations by students. Weekly papers as in French 301.

**FRROM 630** French for Reading—Graduate Students
Spring only. 3 credits. Limited to graduate students. Staff. Designed for those with little or no background in French, this course's primary aim is to teach students to read in French. 

**FRFROM 200 Intermediate Reading and Writing**
Fall or spring. 3 credits. Prerequisite: qualification in French (FRROM 105, LPF score 55-64, or SAT II 600-680). Satisfactory completion of French 200 fulfills the proficiency portion of the language requirement. I. Daly. Readings, composition, conversation, various other activities, including films, videos, and newspaper articles. The course gives students the opportunity to expand their language skills and to strengthen their knowledge of grammar for better control. Taught in French.

**FRFROM 201 Intermediate Composition and Conversation I**
Fall, spring, or summer. 3 credits. Enrollment and instruction: Prerequisite: proficiency in French (French 200, 203, or 205), permission of instructor, or placement by Cornell Advanced Standing Examination (CASE) offered by the Department of Romance Studies. This course, or its equivalent, is required for admission to the Cornell Abroad program. A. Grandjean-Levy. Emphasis on improving grammatical accuracy and on enriching vocabulary in oral and written expression of French. Varied types of reading including newspaper articles, short stories, films, and presentations by students, provide the basis for writing assignments and class discussions. Themes and emphases may vary from section to section. Taught in French.

**FRFROM 202 Intermediate Composition and Conversation II**
Fall, spring, or summer. 3 credits. Enrollment and instruction: Prerequisite: proficiency in French (French 200, 203, or 205), permission of instructor, or placement by Cornell Advanced Standing Examination (CASE) offered by the Department of Romance Studies. This course, or its equivalent, is required for admission to the Cornell Abroad program. A. Grandjean-Levy. Emphasis on improving grammatical accuracy and on enriching vocabulary in oral and written expression of French. Varied types of reading including newspaper articles, short stories, films, videos, and presentations by students, provide the basis for writing assignments and class discussions. Themes and emphases may vary from section to section. Taught in French.

**FRFROM 300 Directed Studies**
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

**FRFROM 301 Advanced French I**
Fall or spring. 4 credits. Limited to 15 students. Prerequisite: FRFROM 213 or Q++ on Cornell Advanced Standing Examination (CASE). Fall, J. Bereaud; I. Daly; spring, I. Daly or N. Furman. Class discussions based on reading of selected contemporary texts: half will be short stories by 20th-century writers, half will be articles on current events taken from French magazines or newspapers. All texts are chosen for their thematic or cultural interest and linguistic quality. Special attention will be given to correctness and accuracy in French through grammar review and weekly papers (essays or translations). Two films will be shown to illustrate today's idiomic language. Course required of French majors.

This course serves as an introduction to French Area Studies. It provides an overview of Francophone culture and society from 1945 to the present. Readings will include a selection of articles dealing with issues of current concern in France; works by French and Maghrebi or African writers; poetry or drama; two films will also be discussed.

**FRLIT 221** Modern French Literature #
Fall or spring. 3 credits. Prerequisites: SAT II score of 640 and above, or LPF score of 60, or FRDML 200, 203, or 205. Conducted in French. Fall, N. Furman and staff; spring, staff. This course, divided into small sections, is intended as an introduction to French literature, the modern period. Texts have been chosen both as a function of their centrality to the traditional literary canon and with an eye to experimentation. The course considers literary genres (poetry, drama, the novel) as solicitations to read texts differently, at different speeds, with diverse claims on our attention. The course is designed to satisfy a general interest in modern French literature as well as to prepare students to pursue a French major in literature. Readings will include works by Baudelaire, Mallarmé, Sartre, Cocteau, Proust, Duras.

**FRLIT 222** Early Modern French Literature #
Spring. 3 credits. Prerequisite: FRLIT 201, 220, 221 or permission of the instructor. Required of all literature majors, but not limited to them. Conducted in French. M. C. Vallois. Study of the classic literature of seventeenth-century France (Corneille, Racine, Mollière, Mme. de Lafayette, La Fontaine) and of eighteenth-century Enlightenment literature (Voltaire, Rousseau, Diderot, Beaumarchais). Special attention is paid to the ways in which these various works represent or deal with the shift from an aristocratic cultural code of values to modern bourgeois ideology and aesthetics. The course will also invite reflection on the status and centrality of female characters in classical and neo-classical French literature; it will attempt to trace the evolution from the classical tragic heroine to more modern (but no less problematic) representations of women.

**FRLIT 224** The French Experience: An Introduction (also ANTH 224)
Fall. 3 credits. Conducted in English (with the possibility of a section in French). Readings available both in French and in English translation. A. Berger and J. Siegel. We look ethnographically and through literature at taste and at class as they function and are discussed in France. We examine the practice of speech and how it's reflected in literature. We look at readings from France, America and other places. By emphasizing differences, the French experience emerges.

**FRLIT 315** Modern European Literature and Culture (also COML 311 and RUSSL 311)
Fall. 4 credits. Conducted in English. G. Giber. For description, see Comparative Literature 311.

**FRLIT 320** French Civilization II: Contemporary France
Fall. 4 credits. Prerequisite: FRLIT 213 or equivalent. Conducted in French. J. Bereaud.
Detailed, analytical study of contemporary French society, its structure and its culture. In the second part of the course, students will select a topic for in-depth, personal research leading to the writing of a term paper. Short oral presentations will be encouraged. A variety of resources will be used: texts, magazine and television excerpts, and internet items. A few films will be shown to illustrate some aspects of French life.

FRLIT 330 Francophone African Literature
Spring. 4 credits. E. Kaufman. Introduction to the works of representative poets, dramatists, novelists, and short story writers from sub-Saharan Africa and Madagascar. L. S. Senghor, C. Laye, F. Oyono, J. J. Rabearivelo, S. Labou Tansi, and the Afro-Caribbean Aimé Césaire will be among the writers whose works will be read. The focus will be on the twentieth century and the nature of these writers' relationships with both the West and with Africa.

FRLIT 333 Contemporary French Thought
Spring. 4 credits. Conducted in French. R. Klein. This course is intended to introduce students to the work of some of the major figures in contemporary French thought, in writing published since the events of May 1968. A broad range of topics and issues will be examined, with particular attention to those that have transformed traditional academic disciplines. Books have been selected not only with a view to their theoretical interest, but with an eye to the quality of their French prose. Readings will include works by Lévi-Strauss, Foucault, Cixous, Irigaray, Kristeva, Derrida, Barthes, Baudrillard.

FRLIT 334 The Novel as Masterwork (also French Literature 684)
Fall. 4 credits. Conducted in French. M. C. Vallois. This course traces the evolution of the nineteenth century French novel. Readings include novels by Scribe, Balzac, Flaubert and Zola.

FRLIT 356 Renaissance France
Fall. 4 credits. Conducted in French. K. Long. This course will trace the importance of a number of movements/crises/events in the evolution of France as a nation and a culture, as well as the impact of these movements on the origins of modern thought. We will consider the ongoing debate on the status of women, known as the querelle des femmes; the discovery of the "New World," and its subsequent colonization, the Reformation, which led eventually to a separation of religious and national interests; and the rise of modernization and scientific disciplines. These areas of inquiry will be studied by means of various texts: the works of Marguerite de Navarre, Louise Labé, François Rabelais, Joachim du Bellay, Pierre de Ronsard, Ambroise Paré, and Michel de Montaigne, among others. Texts and discussions will be in French.

FRLIT 370 Perspectives on the Age of Enlightenment: "Enlightened" Literature
Spring. 4 credits. M. C. Vallois. Through readings of various works of the French 18th century (by Montesquieu, Voltaire, Diderot, Rousseau and Sade), we will study the emergence of new literary discourses and practices aiming at a "secularization" of the literary field, in conjunction with the ideological and epistemological changes which took place in the age of Enlightenment.

FRLIT 396 The Contemporary French Novel: 1950 to the Present
Spring. 4 credits. Prerequisite: French 201 or permission of instructor. S. Tarrow. The course will focus on novels written after 1960, tracing the development of new forms of the genre and new voices in the repertory. Works by writers such as Camus, Robbe-Grillet and Duras will be accompanied by those of North African and immigrant writers. Issues of language and identity will be considered in the context of European imperialism and an increasingly multi-cultural society. Weekly readings, two short essays and a final paper are required.

FRLIT 397 Orientalism, Exoticism and Interiority (also COM L 357)
Spring. 4 credits. T. Hope. For description, see Comparative Literature 357.

FRLIT 409 Mourning People (also FRLIT 609, COM L 477/677)
Fall. 4 credits. T. Hope. For description, see Comparative Literature 477.

FRLIT 419-420 Special Topics in French Literature
419, fall; 420, spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff. Guided independent study of special topics.

FRLIT 428 Oulipo: Forms of Potential Literature (also FRLIT 698)
Spring. 4 credits. R. Klein. "Oulipo (Ouvroir de litterature potentielle)") is a relatively small circle of writers and mathematicians that has been conducting radical experiments in literary form since its formation in 1960. Its members are largely, but not exclusively, French, and its meetings are held in Paris. Its aim is to identify and analyze older, even ancient experiments in literary form and to elaborate new forms or textual principles by means of novel combinators or permutations, including computer algorithms. Its founding and continuing members include some of the most prominent contemporary French writers, poets and novelists, including Raymond Queneau, Jacques Roubaud, Georges Perec, as well as the Italian writer, Italo Calvino, and the American, Harry Matthews. The course aims principally to examine the theoretical claims of Oulipo, its hostility to surrealism, its voluntarism, its preference for formal constraints, its exemplification of rhetorical and literary procedures (lipograms, palindromes, rithorical verse, holoremynes, Boolean haikus, etc.). At the same time, close readings of selected texts will be encouraged.

FRLIT 429-430 Honors Work in French Literature
Fall. 4 credits; spring. 8 credits year-long program. N. Furman and staff. Guided independent study of special topics. Chapters from dissertations and works in-progress, articles and essays from visiting lecturers. Activities will include reading and discussion of seminal texts, chapters from dissertations and works in-progress, articles and essays from visiting lecturers.

FRLIT 433 French Feminisms (also WOMS 493)
Fall. 4 credits. Conducted in English. N. Furman. This course will examine the political, theoretical and literary concerns of contemporary French women who have addressed "la question de la femme/la question du feminin." Readings will include representative texts by Simone de Beauvoir, Monique Wittig, Kristeva, Jacques lacan, Luise Irigaray, Jacques Derrida, and Helène Cixous.

FRLIT 607-608 Proseminar
Fall. 607, fall; 608, spring. 2 credits each term. M. C. Vallois and staff. Meeting every two weeks, the pro-seminar will be the place for sustained exchanges between graduate students, faculty, and visiting lecturers. Activities will include reading and discussion of seminal texts, chapters from dissertations and works in-progress, articles and essays from visiting lecturers.

FRLIT 609 Mourning People (also FRLIT 409, COM L 477/677)
Fall. 4 credits. T. Hope. For description, see Comparative Literature 477.

FRLIT 617 Poetry and Poverty: 19th Century French Lyricism and the Times of Indigence
Fall. 4 credits. A. Berger. From Pauvres Gens (Hugo) to the "pauvre Léllant" (Verlaine), from Baudelaire's "poor to Rimbaud's scum, French poetry takes up the claim of the poor. But poverty as a social phenomenon doesn't simply become a poetic theme by striking lyricism's sentimental chord. If poverty is the main issue of the century, as French 19th century political and social thinkers agree, and if the question of modern times is indeed the question of poverty ("la misère"), as Michelet and Heidegger suggest in various ways, then the lyrical treatment of poverty raises the question of poverty's relation to modernity, and more specifically to the economy which defines it. Through a close examination of poems by Hugo,
ARTS AND SCIENCES - 1999-2000

Baudelaire, Rimbaud, Verlaine, Mallarmé and Jehan-Rictus, read along with Michelet, Benjamin and Heidegger among others, we will address the question of poetry’s relations to the modern experience of lack and need, as well as to the poor as representative of the outcast. How can poetry give (itself!!) and what can it give in times of want?

FRLIT 639-640 Special Topics in French Literature
Fall, 640, spring. 4 credits each term. Staff.
Guided independent study for graduate students.

FRLIT 677 Nationalism and National Literature in Francophone sub-Saharan Africa (also FRLIT 477, COM L 478/678)
Spring. 4 credits. D. Thomas
For description, see French Literature 478.

FRLIT 684 The Novel as Masterwork (also FRLIT 334)
Fall. 4 credits. M. C. Vallois.
For description, see French Literature 334.

FRLIT 689 Bohemians and Dandies (also FRLIT 481)
Spring. 4 credits. N. Furman.
For description, see French Literature 481.

FRLIT 698 Oulipo: Forms of Potential Literature (also FRLIT 428)
Spring. 4 credits. R. Klein.
For description, see French Literature 428.

Italian
Faculty: M. Migiel (director of undergraduate studies), A. Grassi (emerita), K. Battig von Wittelsbach, Flaminia Cervesa-McCobb, S. Stewart-Steinberg, M. Swenson

The Major
Students who wish to major in Italian should consult the Director of Undergraduate Studies who will assign the student a major adviser. The general plan and the details of the student’s course of study will be worked out in consultation with the adviser. Italian majors are encouraged to take courses in related subjects such as history, art history, music, philosophy, anthropology, classics, linguistics, and other modern languages and literatures. While a major often occupies only the junior and senior years, it is wise for students to seek faculty advice about the major as early as possible.

Students who elect to major in Italian ordinarily should have completed Italian 201 by the end of their sophomore year. Exemptions can be made on the basis of an examination. Students majoring in Italian are expected to become conversant with a fair portion of the masterworks of Italian literature, to acquaint themselves with the outlines of Italian literary history, and to develop some skill in literary analysis. To this end, students will be expected to complete successfully 32 credits of Italian literature courses at the 300 level or higher, with papers to be written in Italian or English. Required courses for the major are ITALL 303, 304, and a course on Dante. ITALL 402, History of the Italian Language, and 403, Linguistic Structure of Italian, may be counted toward the 32 credits required for the major (an introductory linguistics course is a prerequisite of ITALL 402 and 403).

Students majoring in Italian will also be expected to acquire competence in the handling of the language. That competence may be demonstrated by passing an oral and written examination to be arranged with the adviser.

Italian majors will also be required to complete successfully two courses in related fields (for example, Italian history, Italian art history, literary theory).

Italian majors may study in Italy, generally during their junior year, under any of those study-abroad plans organized by American universities that allow the transfer of grades and credits.

To be eligible, students must have completed the first two years of their curriculum requirements and be in good academic standing.

Language

ITALA 121-122 Elementary Italian
Fall, 121; fall, 122; spring, 4 credits each term. Prerequisite: for ITALL 122, ITALL 121 or equivalent. Intended for beginners or students placed by examination. At the end of ITALL 122, students who score 56 or higher on the LPI attain qualification and may enter the 200-level sequence; otherwise ITALL 123 is required for qualification. M. Swenson.

A thorough grounding in all the language skills: listening, speaking, reading, and writing. Language practice is in small groups. Lectures cover grammar and cultural information.

ITALA 123 Continuing Italian
Fall, spring, or summer. 4 credits. Limited to students who have previously studied Italian and have an LPI score 45–55 or SAT II 460–580. Satisfactory completion of ITALL 123 fulfills the qualification portion of the language requirement. K. Battig von Wittelsbach.

ITALA 123 is an all-skills course designed to improve speaking and reading ability, to establish a groundwork for correct writing, and to provide a substantial grammar review.

ITALA 203-204 Intermediate Composition and Conversation
Fall, 3 credits each term. Prerequisites: for ITALL 203, qualification in Italian; for ITALL 204, 203 or equivalent. S. Stewart-Steinberg.

Guided conversation, composition, reading, pronunciation, and grammar review emphasizing the development of accurate and idiomatic expression in the language.

Note: Students placed in 200-level courses also have the option of taking courses in introductory literature and cinema, see separate listings under ITALL 201, 202 and 205 for description of these courses.

ITALA 207 Intermediate Composition and Conversation
Fall. 3 credits each term. Prerequisite: qualification in Italian. K. Battig von Wittelsbach.

Guided reading, conversation, composition, and grammar review emphasizing preparation for Italian literary studies.

ITALA 300 Directed Studies
Fall or spring. 1–4 credits variable. Prerequisite: permission of instructor. Staff.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

ITALA 314 Advanced Italian: Language and Social Issues (also Italian Lit 214)
Spring. 3 credits. Prerequisite: ITALL 204 or equivalent. ITALL 313 is not prerequisite to ITALL 314 and may be taken after ITALL 314. S. Stewart-Steinberg.

Further development of all skills, with emphasis on self-expression. Content: evolution and crisis in Italian politics, values, and national identity against the background of European unification. Social movements, issues, and attitudes, especially as reflected in the mass media.

ITALA 631 Readings in Italian Opera Libretti
Spring. 2 credits. For graduate students only. Prerequisite: permission of instructor. Offered concurrently with appropriate seminars in the Department of Music.

Literature

ITALA 201–202 Introduction to Italian Literature
3 credits. Prerequisite: permission of instructor. ITALL 201 is not prerequisite to ITALL 202 or ITALL 205. Conducted in Italian. Fall, 202; spring, 201. M. Migiel and staff.

In this course, students will develop their language skills in Italian by reading, discussing, and writing about short works of fiction (twentieth-century short stories in ITALL 201; twentieth-century prose works in ITALL 202).

ITALA 205 The cinematic Eye of Italy
Fall and spring. 3 credits. Conducted in Italian. Prerequisite: ITALL 203 or permission of the instructor. Fall: S. Stewart-Steinberg; spring: M. Migiel.

In this sophomore seminar, film will be used to explore some of the most important issues in modern Italian cultural history, such as: Italy as a relatively new nation-state; fascism; regionalism; the Southern question; Catholicism; terrorism; the new consumerism of the 80’s and 90’s; and Italy’s recent evolution into a multicultural society. Films viewed will include those from the fascist era and the neonazi period, as well as later reformulations and critiques of these early works.

There will also be readings designed to introduce students to Italian film criticism and to key debates about contemporary Italian culture.

Italian Culture Courses
The sequence of ITALL 220, 221, 222, 223, and 224 is intended to give students a broad overview of the principal issues in Italian culture. The approach will be interdisciplinary, drawing on materials from at least three
of the following cultural domains: literature, politics, economics, history, art, film, music, religion, science, psychology, philosophy, and anthropology.

ITAL 220-224 are conducted in English. Students who are proficient in Italian will have the option of enrolling concurrently in the one-credit Italian practicum, ITALL 300.

ITAL 220 Medieval Italy
Spring. 4 credits. W. Kennedy.
This course will cover the late medieval period in Italy and will deal with such issues as social, economic, and political transitions to early modernity; cultural and intellectual developments in literature, philosophy, theology, and the visual arts; and modern approaches to pre-modern cultures through gender and identity studies. Topic for 2000: readings will focus on the multi-faceted allegory of Dante's Divine Comedy, the lyric poetry of Petrarch, and the often raucous storytelling of Boccaccio's Decameron.

ITAL 221 The Italian Renaissance (also HIST 350)
Fall. 3 credits. J. Najemy.
For description, see History 350.

ITAL 224 Contemporary Italy
Fall. 4 credits. M. Migiel.
The course will cover the period from World War II to the present and will deal with issues such as: Neo-realism, the partisan experience, the impact of the economic boom and demographic changes in the 1950s and 1960s, Christianity vs. Marxism, Italian film makers and the myth of Italy, terrorism, Italian feminist thought, rethinking history, North vs. South, immigration and Italian national identity.

ITAL 300 Italian Practicum
Fall or spring. 1 credit. M. Migiel and staff.
Students enrolled in an Italian literature or culture course that is conducted in English (e.g., ITALL 221, 224, 323) may opt to take this one-credit practicum in Italian, provided that they have already attained proficiency in the language. Students in the practicum will spend one class hour per week discussing selected issues or texts in Italian; they will also complete an appropriate amount of written work in Italian.

ITAL 323 Encounters with the Dead (also ITALL 623, COM L 323/623, JWST 323/623)
Fall. 4 credits. M. Migiel.
Focusing on two epic works obsessed with death and with the dead (Dante Alighieri's Comedy [1321] and Claude Lanzmann's Shoah [1985]) this seminar will explore how Dante's poem and Lanzmann's film address and will deal with issues such as: Neorealism, the partisan experience, the impact of the economic boom and demographic changes in the 1950s and 1960s, Christianity vs. Marxism, Italian film makers and the myth of Italy, terrorism, Italian feminist thought, rethinking history, North vs. South, immigration and Italian national identity.

ITAL 351 Machiavelli (also HIST 351)
Spring. 4 credits. J. Najemy.
For description, see History 351.

ITAL 394 Calvino and Levi: Then and Now (also ITALL 694)
Spring. 4 credits. Conducted in English. M. Migiel.
A study of the principle works by Italo Calvino and Primo Levi, two of the most important Italian writers of the second half of the twentieth century, and a critical examination of the theoretical frameworks that have been used to understand them so far.

ITAL 419-420 Special Topics in Italian Literature
419, Fall; 420, Spring. 2-4 credits each term. Prerequisite: permission of instructor. M. Migiel.
Guided independent study of specific topics.

ITAL 429-430 Honors in Italian Literature
429 fall; 430, spring. 8 credits. Year-long course. R for fall semester; letter grade for spring semester. Limited to seniors. Prerequisite: permission of instructor. M. Migiel.

ITAL 458 Opera, History, Politics, Gender (also HIST 456, SOC HUM 459, COM L 459, WOMNS 454)
Spring. 4 credits. M. Steinberg and S. Stewart.
For description, see History 456.

ITAL 623 Encounters with the Dead (also ITALL 323, COM L 323/623, JWST 323/623)
Fall. 4 credits. M. Migiel.
For description, see Italian Literature 323.

ITAL 639-640 Special Topics in Italian Literature
639, Fall; 640, Spring. 4 credits each term. M. Migiel.

ITAL 694 Calvino and Levi: Then and Now (also ITALL 394)
Spring. 4 credits. Conducted in English. M. Migiel.
For description, see Italian Literature 394.

Portuguese

Faculty: J. Oliviera

PORT 121-122 Elementary Portuguese
121, Fall; 122, Spring. 4 credits each term. Intended for beginners. Students may attain qualification upon completion of 122 by achieving a satisfactory score on a special examination. J. Oliviera.
A thorough grounding is given in all the language skills: listening, speaking, reading, and writing.

PORT 203-204 Intermediate Composition and Conversation
203, Fall; 204, Spring. 3 credits each term. Prerequisites: for Portuguese 203, Portuguese 122 or permission of instructor; for Portuguese 204, Portuguese 203 or permission of instructor. J. Oliviera.
Conversational grammar review with special attention to pronunciation and the development of accurate and idiomatic oral expression. Includes readings in contemporary Portuguese and Brazilian prose and writing practice.

Quechua

Faculty: L. Morató-Peña.

QUECH 131-132 Elementary Quechua
131, Fall; 132, Spring. 3 credits each term. Prerequisite: qualification in Spanish. This language series (131-132) cannot be used to satisfy the language requirement. L. Morató-Peña.
A beginning conversation course in the Quechua dialect of Quechua.

QUECH 133-134 Continuing Quechua
133, Fall; 134, Spring. 3 credits each term. Prerequisites: for Quechua 133, Quechua 131-132 or equivalent; for Quechua 134, Quechua 133 or equivalent. Satisfactory completion of Quechua 134 fulfills the qualification portion of the language requirement. L. Morató-Peña.
An intermediate conversation and reading course. Study of the Huarochiri manuscript.

QUECH 300 Directed Studies
Fall or Spring. 1-4 credits variable. Prerequisite: permission of instructor. L. Morató-Peña.
Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Spanish

C. Arroyo

ROMS 363 The European Novel (also COM L 363)
Fall. 4 credits. C. Arroyo.
For description, see Comparative Literature 363.

Quechua

The Major

The major is designed to give students proficiency in the oral and written language, to acquaint them with Hispanic culture, and to develop their skills in literary and linguistic analysis. Satisfactory completion of the major should enable students to meet language and literature requirements for teaching, to continue with graduate work in Spanish or other appropriate disciplines, or to satisfy standards for acceptance into the training programs of the government, social agencies, and business concerns. A Spanish major combined with another discipline may also allow a student to undertake preprofessional training for graduate study in law or medicine. Students interested in a Spanish major are encouraged to seek faculty advice as early as possible. For acceptance into the major, students should consult the director of undergraduate studies in Spanish—Professor Piedra—who will admit them to the major and choose an adviser from the Spanish faculty.
Spanish majors will then work out a plan of study in consultation with their advisers. Previous training and interests as well as vocational goals will be taken into account when the student's program of courses is determined.

SPANL 201 and SPANR 204 (or equivalent) are prerequisite to entering the major in Spanish. All majors will normally include the following core courses in their programs:

1) SPANR 311 and 312
2) SPANL 315, 316, and 318 (not necessarily in that order)

Spanish majors have great flexibility in devising their programs of study and areas of concentration. Some typical options of the major are:

1) Spanish literature, for which the program of study normally includes at least 20 credits of Spanish literature beyond the core courses. Literature majors are strongly urged to include in their programs courses in all the major periods of Hispanic literature.

2) A combination of literature and linguistics.

3) Either of the above options with a maximum of three (3) courses at the 300 level or above in other disciplines counted toward the major. Whichever option a student chooses, he or she is encouraged to enrich the major program by including a variety of courses from related fields or by combining Spanish with related fields such as history, philosophy, sociology, anthropology, art, music, Classics, English, comparative literature, and other foreign languages and literatures. The interdepartmental programs in Latin American Studies and Latino Studies sponsor relevant courses in a variety of areas.

The J. G. White Prize and Scholarships are available annually to students who achieve excellence in Spanish.

For the concentration in Spanish linguistics, see Department of Linguistics—Spanish.

Study abroad in Spain. Cornell, the University of Michigan, and the University of Pennsylvania cosponsor an academic year in Spain program. Students enrolled in this program spend the first three weeks before the fall semester begins in a residential college located on the campus of the University of Madrid, where they take a course in Spanish language and contemporary society and take advantage of special lectures and field trips in Madrid and Castile. This course carries three credits. In early October the program moves to Seville, where students enroll in as many regular classes at the University of Seville as their language competency and general education permit. Their academic work is supplemented by courses designed explicitly for the program by Seville faculty, as well as a seminar regularly offered by the resident director, who is chosen from the faculty of either Cornell, Michigan or Pennsylvania. The special courses normally include history of art and architecture, Spanish composition and syntax, and modern Spanish history. In Seville students live with selected families in "residencias," or in a few cases in "colegios mayores." Cornell-Michigan-Pennsylvania also maintains a center in Seville, which is used by students for special seminars, tutorials, lectures, and informal gatherings.

Applicants are expected to have at least completed SPANR 204 prior to departure. Students are strongly encouraged to study abroad for the entire year rather than for one semester. Students interested in the study abroad program should consult with the Cornell Abroad office for further information.

HONORS. Honors in Spanish may be achieved by superior students who want to undertake guided independent research and reading in an area of their choice. Students in the senior year select a member of the Spanish faculty to supervise their work and direct the writing of their honors essays (see Spanish 429-430).

FEES. Depending on the course, a small fee may be charged for film use or for copies of texts for course work.

Language

All language courses are offered by the Department of Romance Studies, and Spanish linguistics courses are offered by the Department of Linguistics.

Note: students placed in the 200-level courses have the option of taking language and/or literature courses, see listing under SPANL 201 for description of the literature course. It may be taken concurrently with SPANR 203-204.

Important Information about registration for Spanish classes

The Spanish Program offers a number of elementary and intermediate courses to satisfy the needs of students with a variety of backgrounds; students are urged to register for the appropriate level so as to start the semester in the right class. Students with two or more years in the language are required to take the placement test before taking any Spanish course.

*the placement score can be from an SAT II test, the CPT, or the LPS.

SPANR 112 Elementary Spanish: Review and Continuation

Fall. 4 credits. Prerequisite: LPS score 37-44. M. Rice.

This course is designed for students who have taken some Spanish and who have a placement score of 37-44 or SAT II 370-450. It provides a basic review and then moves on to cover new material for the remainder of the term. Students who have taken Spanish 121 may enroll for this course. As part of the final exam, students take the LPS and, according to their score, may place into Spanish 123 (score below 56) or receive qualification (56 or above), and placement into the 200-level courses.

SPANR 121-122 Elementary Spanish

121, fall and summer; 122, spring. 4 credits each term. Prerequisite: for Spanish 122, Spanish 121 2. Iguna and staff.

This course is intended for students with no experience in Spanish. (Students who have previously studied 2 or more years of Spanish are not eligible for 121 unless they have an LPS score lower than 37 or SAT II lower than 370.) The course provides a thorough grounding in all language skills. Language practice in small groups. Lectures cover grammar, reading, and cultural information. Evening prelims.

SPANR 123 Continuing Spanish

Fall, spring, or summer. 4 credits. Prerequisite: Spanish 112, Spanish 122, or an LPS score 45-55 or SAT II 460-580. M. K. Redmond and staff.

An all-skills course which requires daily preparation before class and active student participation in class. Includes researching cultural topics of the student’s choice, oral presentations, grammar review, audio tapes, video, journal and essay writing, speaking in small groups and authentic readings. Satisfactory completion of Spanish 123 fulfills the qualification portion of the language requirement. After this course, the student may take 201, 203, 213.

SPANR 200 Spanish for English/Spanish Bilinguals (also Latino Studies Program 202)

Fall or spring. 3 credits. Prerequisite: LPS score 56 or higher, SAT II 590 or higher, CASE placement, or permission of instructor. N. Maldonado-Méndez.

A course designed to expand bilingual students' knowledge of Spanish by providing them with ample opportunities to develop and improve each of the basic language skills. Not available to students who have taken Spanish 203 or 213.

SPANR 203 Intermediate Composition and Conversation I

Fall, spring, or summer. 3 credits. Prerequisite: Spanish 123, LPS score 56-64, or SAT II 590-680. Not available to students who have taken Spanish 213.

N. Maldonado-Méndez, M. Rice and staff. Conversational grammar review with special attention to the development of accurate and idiomatic oral expression. Includes readings in contemporary Spanish prose and practice in writing.

SPANR 204 Intermediate Composition and Conversation II

Fall or spring. 3 credits. Prerequisite: Spanish 203, 213, CASE placement, or permission of instructor. This course, or its equivalent, is required for admission to the Cornell Abroad program. E. Dozier and staff.

An advanced-intermediate course designed for students who want to go beyond the basic language requirements and further broaden their knowledge of the language and related cultures, as well as improve their comprehension and communication skills. This course guides students to take greater command of their own language skills and help them optimize their continued progress. Includes a strategic focus on specific problems in listening and reading comprehension, and in accurate writing and speaking.
SPANR 205 Spanish Translation
Summer. 4 credits. Prerequisite: proficiency in Spanish. J. Routier-Pucci. The objective of the course is to learn to translate from Spanish into English and in so doing, to investigate the various technical, stylistic and cultural difficulties encountered in the translation process.

SPANR 213 Intermediate Spanish for the Medical and Health Professions
Fall or spring. 3 credits. Prerequisite: qualification in Spanish (Spanish 123, LPS score 56-64, or SAT II 590-680) or permission of instructor. Students who have taken Spanish 203 or 200 should speak to the instructor. A. Tóis. Contextual oral grammar review, with dialogues, debates, compositions, and readings on health-related themes. Special attention is given to relevant cultural differences. Fullfills proficiency requirement.

SPANR 300 Directed Studies
Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

SPANR 310 Advanced Conversation and Pronunciation
Spring. 3 credits. Prerequisite: Spanish 204 or equivalent. Z. Iguina. A conversation course with intensive oral practice obtained through the production of video programs. Study of the fundamental aspects of communication in the standard spoken and written Spanish, with some focus on dialectal variations. Weekly pronunciation labs.

SPANR 311 Advanced Composition and Conversation
Fall or spring. 4 credits. Prerequisite: SPAN 204 or 212 or equivalent. M. Stykos and staff. Advanced language skills, developed through reading, grammar review, and intensive practice in speaking, writing, and translation. Analysis of present-day Spanish usage in a wide variety of oral and written texts.

SPANR 312 Advanced Composition and Conversation
Fall or spring. 4 credits. M. Stykos. Readings and class discussion will focus on the stylistic analysis of modern texts. Increased emphasis, through weekly essays, on students' development of an effective Spanish prose style.

SPANR 630 Spanish for Reading
Spring. 3 credits. Limited to graduate students. E. Sánchez-Blake. Designed for those with little or no background in Spanish and little exposure to written Spanish, this course primarily aims to develop skill in reading Spanish. Grammar basics, extensive vocabulary, and strategies for reading in a foreign language are covered. The types of texts to be covered will be based on the interests of the students in the course.

SPANR 660 Latino Languages, Ideology and Practice (also Anthropology 660 and Latino Studies Program 660)
Spring. 4 credits. V. Santiago-Infrazary. For description, see Anthropology. Taught on a specialized basis to address particular student needs. Times will be arranged with instructor.

Literature

SPANL 201 Introduction to Hispanic Literature @
Fall or spring. 3 credits. Prerequisite: qualification in Spanish or permission of instructor. The course is divided into small sections and is conducted mainly in Spanish. (Fullfills both the language proficiency requirement and the humanities distribution requirement. The literature course that normally follows SPANL 201 is either 316 or 318.) J. Piedra and staff.

An intermediate course designed to improve Spanish skills through reading and discussion of contemporary literary works from Spain and Spanish America. Emphasis on the development of fluency in reading and of critical and analytical abilities. The cultural, sociological, and aesthetic implications of texts by authors such as Borges, Cortázar, Puentes, García Márquez, García Lorca, and Cela are considered.

SPANL 246 Contemporary Narratives by Latina Writers (also LSP 246)
Fall. 3 credits. L. Carrillo. This course offers a survey of narratives by representative Latina writers of various Latino ethnic groups including Chicana, Chilean, Cuban, Dominican, and Puerto Rican. We will investigate the parallel development of a Latina perspective on personal, social, and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We will investigate these works as artistic attempts to deal with such issues as culture, language and biculturalism, family, gender, sexuality, and domesticity. We will account for regional distinctions and contributions. Readings will include works by Julia Alvarez, Gloria Anzaldúa, Elena Castedo, Ana Castillo, Denise Chávez, Sandra Cisneros, Judith Ortiz Cofer, Cristina Garcia, Nora Glickman, Nicholas Mohr, Cherríe Moraga, Achy Obejas, Esmeralda Santiago, Ana Lydia Vega, and Helena Maria Viramontes.

SPANL 301 Hispanic Theater Production
Fall or spring. 1-2 credits. S-U only. D. Castillo. Students develop a specific dramatic text for full-scale production. The course will involve selection of an appropriate text, close analysis of the literary aspects of the play, and group evaluation of its representational value and effectiveness. All students will be involved in some aspect of production and will write a final paper as a course requirement. Credit will be variable depending upon the student's role in play production: a minimum of 50 hours of work is required for one credit; a maximum of two credits will be awarded for 100 hours or more of work.

SPANL 315 Renaissance Hispanisms: Spain and the Americas @
Spring. 4 credits. Conducted in Spanish. Prerequisite: SPANL 316 or SPANL 318. M. A. García. In Spain, the cultural revolution known as the Renaissance produced a glittering array of artistic works, which gave rise to the term, Golden Age. There was a "darker side" to the Renaissance, however, which juxtaposed the conquest of America with the establishment of the Inquisition and the expulsion of the Jews and later, of the Moriscos. The tale of these relations of exclusion and fascination, of domination and communication with the other is recapitulated by the literature of the period. Texts include Columbus, Cabeza de Vaca, Lazarillo, Garciñelas, A. Vázquez de Sanches, San Juan de la Cruz, Cervantes, Marfa de Zayas, Lope de Vega, Calderón, and others.

Note: SPANL 316 and 318 can be taken in any order. Prerequisite: Spanish 201 or 4 years of high school Spanish or permission of instructor.

SPANL 316 Readings in Modern Spanish Literature
Fall or spring. 4 credits. Prerequisite: Spanish 201 or 4 years of high school Spanish or permission of instructor. Taught in Spanish. Fall, J. Kronik or M. Stykos; spring, staff. Readings and discussion of representative texts from Spain from the romantic period to the present. Bécquer, Galdós, Unamuno, García Lorca, Cela, and others.

Note: The prerequisite for the following courses, unless otherwise indicated, is SPANL 315, 316, or 318 or permission of instructor.

SPANL 320 Perspectives on Latin America @
Spring. 3 credits. Conducted in English. D. Castillo. This interdisciplinary, co-taught course will be offered every spring through the Latin American Studies Program. It is highly recommended for Latin American Studies Concentrators. Topics will vary by semester, but readings will always focus on current research in various disciplines and regions of Latin America. The range of issues addressed will include the economic, social, cultural, and political trends and transitions in the area. In the weekly meetings, instructors and guest lecturers will facilitate student discussions. Students are required to participate in all class discussions and write one research paper in their chosen focus area.

SPANL 339 Islamic Spain: Culture and Society (also NES 339, JWST 339, COM L 334, RELST 334 and SPANL 689) @
Fall. 3 credits. S-U option. This course can also be used to fulfill the requirements of the Medieval Studies Program. Offered every other year. R. Brann.

For description, see NES 339.

SPANL 345 Contemporary Spanish-American Novel @
Spring. 4 credits. Prerequisite: SPANL 317 or equivalent. E. Paz-Soldán. Reading and discussion of selected works of narrative fiction by today's leading authors: Cabrera Infante, Cortázar, Donoso, Fuentes, García Márquez, Garciñelas de la Vega, Llosa, and others. Two abiding concerns will be the way in which history interacts with aesthetic form and the role of the bicultural reader in actualizing the text's potential.
SPANL 348 Cuban Literature  
Fall. 4 credits. J. Piedra.
A panoramic view of Cuban literature and culture from its "national origins" in the seventeenth-century to the present. One fourth of the course will be devoted to reading texts from the nineteenth to the twentieth centuries, particularly anti-slavery and travel literature of the nineteenth century. Beside early and middle twentieth-century masterpieces we will read contemporary texts written within and outside of the Cuban Revolution. The course ends with Cuban-American literature written in English, Spanish, and Spanglish.

SPANL 375 Fictions of the Picaresque in Spain and America (also SPANL 475)  
Spring. 4 credits. M. A. Garces.
While one critic defines the picaresque novel as the autobiography of "an unscrupulous wretch," narrated as a sequence of episodes, others have described it as a drama of consciousness. A fragmentary confession that emphasizes the traumas and vicissitudes that shaped a particular life since its origins, including dreams and fantasies which often question sexual identity, the picaresque bears an uncanny resemblance to the discourse of the analysand in psychoanalysis. We will explore the relationships of the picaresque with such genres as psychoanalysis, autobiography, travel literature, romance, soldierly adventure, and semi-documentary fictions, like some chronicles of the conquest. Our trans-Atlantic voyage starts in Europe with Lazarillo de Tormes and works by Alemán, Cervantes, Delicado, and Quevedo, ending in the New World with famous Vida y sucesos de la monja Alferez, attributed to the transvestite nun-soldier, Catalina de Erasau, and Conquista y descubrimiento del Nuevo Reino de Granada, known as El Cervantez, by Rodriguez Freyle. Readings will be supplemented with an ample range of theoretical and critical perspectives.

SPANL 397 Reality and Fiction in Modern Spanish Narrative  
Fall. 4 credits. Conducted in Spanish. J. W. Kronik.
This course will examine the various ways in which selected novels of the nineteenth- and twentieth-century realist period (Galdós, Clarin) and across the twentieth century (Baroja, Carmen de Burgos, Cela) to the present day (Rosa Montero, Lucia Etxebarria) have defined and coped with the task of representing in their imaginative writings the social and political reality they lived and observed. Consideration will be given to the tensions between reality and its fictionalfiguration and the technical processes of narrative.

SPANL 399 Spanish Film  
Fall. 4 credits. Conducted in Spanish. Screenings to be announced. J. R. Resina.
Examines the evolution of Spanish cinema since Franco's death in 1975, both from a historical and a cinematic perspective. The focus will be on documentary, fictional and allegorical reconstructions of the past and on the images of the new democratic society which illustrates a postmodern aesthetic.
Selected films include works by directors who started their careers under the dictatorship (Saura, Erice, Boqu) and by members of the younger generation, such as Almodovar.

SPANL 419-420 Special Topics in Hispanic Literature  
419, Fall; 420, Spring. 2-4 credits each term. Prerequisite: permission of instructor. Staff.
Guided independent study of specific topics. For undergraduates interested in special problems not covered in courses.

SPANL 429-430 Honors Work in Hispanic Literature  
429, Fall; 430, Spring. 8 credits. Year-long course, R grade fall semester, letter grade spring semester. Limited to seniors. Prerequisite: permission of instructor. M. Garces.

SPANL 475 Fictions of the Picaresque in Spain and America (also SPANL 375)  
Spring. 4 credits. M. A. Garces.
For description, see Spanish Literature 375.

SPANL 479 Colonial Spanish American Literature: Voices of the Colonized  
Spring. 4 credits. Conducted in Spanish. J. Piedra.
The course will explore the birth of dissent within Spanish colonial literature as a semi-official alternative compendium of other vehicles of expression: history and philosophy, grammar and religion, "anthropology" and "ethnology." The emphasis is on the dissenting voices of native Americans, Blacks and women, as well as other "minorities" as they converge in the emergence of a "Creole" conscience. The textual selections or complete works to be considered emphasize the aspects of colonial texts that attempted to side with the "colonized" or that were indeed written by them. The list includes the following authors: Columbus, Pane, Las Casas, Inca Garcilaso, Guaman Poma, Silvestre del Balboa, Padre de la Carbonera, Lizardi.

SPANL 487 Borges  
Fall. 4 credits. E. Paz-Soldán.
This course examines the life and work of Jorge Luis Borges, one of the indisputable masters of twentieth-century literature. We will study his poems, essays and short stories written within the modernity/postmodernity debate, and in multiple contexts: local, Latin American, and global. The course will also read other writers of the River Plate region, those who influenced Borges (Macedonio, Fernandez), those influenced by him (Cardenas), and those who resisted his enormous influence (Onetti), trying to establish a genealogy of literary affiliations and ruptures. There will be a particular interest in studying film adaptations of Borges' stories.

SPANL 491-492 Latin American Women Writers (also WOMNS 481 and COM L 482)  
Spring. 4 credits. Conducted in English. D. Castillo.
This course will provide a sampler of novels and short stories by and about Latin American women. We will look at the question of self-construction and issues such as the social and political concerns involved in a specifically Latin American feminine identity. All works will be read in translation. (Romance Studies students should read originals of the works from the Spanish.) Authors may include writers such as Luisa Valenzuela (Argentina) and Rigoberta Menchu (Guatemala), Helena Parente Cunha and Clarice Lispector (Brazil), Helena Maria Viramontes (U.S.A.), and Simone Schwartz-Bart (Guadeloupe).

SPANL 497 Modern Spanish Poetry and Poetics  
Fall. 4 credits. Conducted in Spanish. C. M. Arroyo.
This course will focus on the development of modern Spanish poetry from Becquer to the present. Readings will include texts by Becquer, Machado, Lorca, Jimenez, Guillen, and others as well as poetic and theoretical works designed to help us situate Spanish poetry with respect to such contemporary European aesthetics as romanticism, symbolism, and post-symbolism.

SPANL 639-640 Special Topics in Hispanic Literature  
639, Fall; 640, Spring. 2-4 credits each term. Staff.

SPANL 660 Tales of Love, Trauma and Creation in Cervantes  
Fall. 4 credits. M. A. Garces.
From his first to his last writings, Cervantes' fiction turns around that void represented by the traumatic experience of his Algerian captivity. Linked to explorations in memory, captivity in Cervantes is also paradoxically associated with fantastic—and often perverse—tales of love, as if approaching the site of trauma would elicit an explosion of fantasy. Our seminar will undertake a panoramic survey of Cervantes' works using a wide range of theoretical perspectives. The writer's interest in the problem of fantasy and reality, his exploration of madness in relation to meaning, makes him a cultural ancestor of Freud. More important, the act of bearing witness to a traumatic event that simultaneously functions as a fountain of creation, pressures the relationship between trauma and fantasy, traumatic knowledge and literary studies. Selections from La Galatea, Don Quijote, the Novelas ejemplares, the plays El Trato de Argel and Los barrios de Argel, and the Persiles will be approached through theoretical readings from texts by Freud, Lacan, Kristeva, and others.

SPANL 699 Islamic Spain: Culture and Society (also SPANL 339, COM L 420, JWST 339 and NES 339/639)  
Fall. 4 credits. R. Brann.
For description, see Spanish Literature 339.
The Russian Major

Russian majors study Russian language, literature, and linguistics, and emphasize their specific interests. It is desirable, although not necessary, for prospective majors to complete Russian 121-122, 201-202, and 203-204 as freshmen and sophomores, since these courses are prerequisites to most of the junior and senior courses that count toward the major. Students may be admitted to the major upon satisfactory completion of Russian 122 or the equivalent. Students who elect to major in Russian should consult Professor Carden as soon as possible. For a major in Russian, students will be required to complete (1) Russian 301-302 or 303-304 or the equivalent, and (2) 18 credits from 300- and 400-level literature and linguistics courses, of which 12 credits must be in literature in the original Russian.

Certain courses may, with the permission of the instructor, be taken for one additional hour's credit. Such courses will involve a one-hour section each week with work in the Russian language. These courses count one hour each of credit toward the 12 courses of Russian literature in the original language required for the major.

Study Abroad

Cornell is an affiliated institution with the Council on International Educational Exchange program for Russian language study at St. Petersburg State University. Cornell students also frequently attend the American Council of Teachers of Russian program in Moscow and other Russian language programs. Opportunities are available for study during the summer, a single semester, or the full year. Further information is available from W. Browne, in the Department of Linguistics.

Honor. Students taking honors in Russian undertake individual reading and research and write an honors essay.

Fees. Depending on the course, a small fee may be charged for photocopied texts for course work.

Freshman writing seminar requirement. The following courses will satisfy the freshman writing seminar requirement: Russian 103, 104 and 105.

Russian and East European Studies Major

See "Special Programs and Interdisciplinary Studies," which follows the department listings.

Russian Language

RUSSA 121-122 Elementary Russian

121, fall or summer; 122, spring or summer. 4 credits each term. May be taken alone and qualification will be achieved with satisfactory completion of 121-122-123; or may be taken concurrently with 103-104 and qualification will be achieved at completion of 122-104. Includes a guest lecture by Prof. Peter Holoquist. S. Paperno, V. Tsimberov and staff.

A thorough grounding is given in all the language skills: listening, speaking, reading, and writing. Course materials include clips from original Russian films and TV programs.

RUSSA 123 Continuing Russian

Fall. 4 credits. Limited to students who have previously studied Russian or been placed by department. Satisfactory completion of Russian 123 fulfills the qualification portion of the language requirements. Includes a guest lecture by Prof. George Gibian, L. Papemo and S. Papemo. A course designed to prepare students for study at the 200 level. Passing this course is equivalent to qualification. Authentic Russian materials are used. TV, books, etc.

RUSSA 203-204 Intermediate Composition and Conversation

203, fall or summer; 204, spring or summer. 3 credits each term. Prerequisites: for Russian 203, qualification in Russian (Russian 123 or placement by department); for Russian 204, Russian 203 or equivalent. Includes a guest lecture by Prof. Gabriel Shapiro. L. Papemo, S. Papemo, V. Tsimberov.

Guided conversation, composition, reading, pronunciation, and grammar review, emphasizing the development of accurate and idiomatic expression in the language. Course materials include video clips from an original Russian feature film.

RUSSA 205-206 Reading Russian Press

205, fall; 206, spring. 2 credits each term. Prerequisite: qualification in Russian (Russian 123 or placement by department). Both sections must be taken in order to satisfy the proficiency level for the language requirement. This course cannot be used to satisfy the humanities requirement. Not offered 1999-2000. Staff. Reading unabridged articles on a variety of topics from current Russian periodicals and web pages.

Note: Students placed in the 200-level courses also have the option of taking courses in introductory literature; see separate listings under Russian 201 and 202 for descriptions of these courses, any of which may be taken concurrently with the 203-204 and 205-206 language courses described above.

RUSSA 300 Directed Studies

Fall or spring. 1-4 credits variable. Prerequisite: permission of instructor. Staff.

Taught on a specialized basis to address particular student needs including native speakers of Russian. Topics will be arranged with instructor.

RUSSA 303-304 Advanced Composition and Conversation

303, fall; 304, spring. 4 credits each term. Prerequisites: for Russian 303, Russian 204 or equivalent; for Russian 304, Russian 303 or equivalent. L. Papemo, S. Papemo, V. Tsimberov.

Writing, reading, and conversation: viewing and reading authentic language materials; current Russian films (feature and documentary), newspapers, TV programs, and other materials are used.

RUSSA 305-306 Directed Individual Study

305, fall; 306, spring. 2 credits each term. Prerequisite: placement by the department. Not offered 1999-2000. Staff. This course is intended for students with special needs (e.g., children of Russian immigrants who speak Russian at home) that cannot be met by any other Russian course.

RUSSA 309-310 Advanced Reading

309, fall; 310, spring. 4 credits each term. Prerequisites: for Russian 309, Russian 204; for Russian 310, Russian 309 or equivalent. L. Papemo.

The purpose of the course is to teach advanced reading skills. The weekly reading assignment is 20-40 pages of unabridged Russian prose (50-60 pages for native speakers), mostly (non-fiction) of the 20th century. The discussion of the reading is conducted entirely in Russian and centered around the content of the assigned selection.

RUSSA 401-402 History of the Russian Language (also Linguistics 417-418)

401, spring; [402.] 4 credits each term. Prerequisites: for Russian 401, permission of instructor; for Russian 402, Russian 401 or equivalent. Offered alternate years. Not offered 1999-2000. W. Browne.

Phonological, morphological, and syntactic developments from Old Russian to modern Russian.

RUSSA 403-404 Linguistic Structure of Russian (also Linguistics 443-444)

403, fall; 404, spring. 4 credits each term. Prerequisites: for Russian 403, Linguistics 101 and permission of instructor, for Russian 404, Russian 403 or equivalent. Offered alternate years. Not offered 1999-2000. W. Browne.

A synchronic analysis of the structure of modern Russian. Russian 403 deals primarily with morphology and its relation to syntax and 404 with syntax and word order. Topics covered include case theory, the functions of word order, voice, agreement, impersonal constructions, negation, nonuniversal categories, and the relation between morphology and syntax.

RUSSA 413-414 Advanced Conversation and Stylistics

413, fall; 414, spring. 2 credits each term. Prerequisites: for Russian 413, Russian 303-304 or the equivalent, for Russian 414, Russian 413 or equivalent. V. Tsimberov. Discussion of authentic unabridged Russian texts and films (feature or documentary) in a variety of nonliterary styles and genres.

RUSSA 601 Old Church Slavonic

Fall. 4 credits. This course is prerequisite to Russian 602. Offered alternate years. W. Browne.

Grammar and reading of basic texts.

RUSSA 602 Old Russian Texts

Spring. 4 credits. Prerequisite: Russian 601. Offered alternate years. W. Browne. Grammatical analysis and close reading of Old Russian texts.
RUSSA 633-634 Russian for Russian Specialists
633, fall; 634, spring. 2 credits each term. Prerequisites: four years of college Russian. For graduate and advanced undergraduate students. S. Paperno.
The course is designed for students who specialize in an area of Russian studies requiring fine active control of the language. Fine points of syntax, usage, and style are discussed.

[RUSSA 651-652 Comparative Slavic Linguistics (also Linguistics 671-672)]
651, fall; 652, spring. 4 credits each term. Prerequisites: Russian 651, Russian 601 taken previously or simultaneously or permission of instructor, for Russian 652, Russian 651 or permission of instructor. Offered alternate years. Not offered 1999-2000. W. Brown.
Knowledge of the sounds and forms of the Slavic languages and of prehistoric common Slavic; main historical developments leading to the modern languages.]

[RUSSA 700 Seminar in Slavic Linguistics]
Topics chosen according to the interests of staff and students.

Russian Literature
There are a variety of courses: some with readings in English translation, others in the original Russian, or both. The connection between Russian society, art, and literature is particularly close, so instruction and discussion in class often include a variety of topics, such as culture and intellectual history, as well as literature. Several courses are interdisciplinary, cosponsored with the departments of History, Economics, Government, Comparative Literature, etc.

RUSSL 103 Freshman Writing Seminar: Classics of Russian Thought and Literature
Fall or spring. 3 credits. D. Galloway.
Russian society has always seen its literature as having a mission important to the development of the nation. In this course we will examine Russian literature as it participates in the debate, whether Russia? We will look in particular at the conflict between the Slavophiles, those who thought Russia had its own unique destiny, and the Westernizers, those who thought Russia should look to the West as a model for its development. We will be reading such Russian authors as Turgenev, Dostoevsky, Herzen, and Solzhenitsyn in Russian translation. The course will examine the rhetorical means each author uses to make his argument. All reading is in English translation.

RUSSL 104 Freshman Writing Seminar: Nineteenth-Century Russian Literary Masterpieces
Fall. 3 credits. P. Carden.
This course will introduce students to a broad selection of the major short works of the Russian literary tradition. Our emphasis will be on what makes each work interesting as writing, what themes have been particularly interesting to Russians, and how we recognize the distinctive voice of each of the writers we are studying. Among the authors read are Pushkin, Gogol, Turgenev, Dostoevsky, Tolstoy, and Chekhov. All reading is in English translation.

RUSSL 105 Freshman Writing Seminar: Twentieth-Century Russian Literary Masterpieces
Fall or spring. 3 credits. D. Galloway.
We will read and write about a selection of works from the major Russian literary movements of the twentieth century. The course will concentrate in part on important literary responses to the first Russian Revolution and the society it created. Authors to be read include Zamyatin, Olesha, Zoshchenko and Vladimir. Readings in English translation.

RUSSL 201-202 Readings in Russian Literature
Fall or spring. 3 credits. Prerequisites: qualification in Russian. Open to freshmen. Fall: 201, N. Pollak; spring: 202, G. Shapiro.
These courses are designed as the initial courses students take after qualification in Russian and are conducted mainly in Russian. Considerable guidance is provided, however, and there is no presumption of fluency. The goal of the course is to introduce students to original Russian literature, to sample differing literary styles, and to accomplish both with minimal recourse to English. Several short papers in Russian and English will be assigned. Readings from nineteenth- and twentieth-century masters of prose and verse such as Pushkin, Lermontov, Turgenev, Tolstoy, Chekhov, Babel, and Zoshchenko.

RUSSL 207 Themes from Russian Culture
Spring. 3 credits. G. Shapiro.
This course is based on lectures, discussions, and audio-visual presentations (slides, tapes, films). Included within its scope are various aspects of Russian culture such as literature, art, music, religion, philosophy, and social thought from its very beginning through the eighteenth century. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country which plays a major role in the world today. Russian culture will be presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.

RUSSL 208 Themes from Russian Culture II
This course is based on lectures, discussions, and audiovisual presentations (slides, tapes, films). Included are various aspects of Russian culture as literature, art, music, religion, philosophy, and social thought over the last two hundred years. The course is designed to give undergraduates a broad familiarity with the cultural traditions of the country that plays a major role in the world today. Russian culture will be presented as part of Western civilization with attention given to its distinctive character. The basic texts are literary works of moderate length in English translation.

RUSSL 279 The Russian Connection, 1830-1867 (also COM L 279)
Fall. 3 credits. P. Carden.
As Russian prose began to find its voice, it responded with enthusiasm to the European prose tradition. One line of development in the Russian novel began with Rousseau's division between the needs of individual growth, nourished by solitude and introspection, and the demands of society. Tolstoy's War and Peace can be read as a summary and a testing of the novelistic tradition that grew out of the work of Rousseau, in both European and Russian literature. We will follow the line that leads to Tolstoy's multifaceted inquiry, beginning with two short novels that set the tone for the introspective novel in the two traditions, Constance's Adolphe and Lemontov's Hero of Our Time. Looking at relevant excerpts from a range of European prose writers Rousseau, Musset, Goethe, Sternehal, Thackeray among others, we will think about the possibilities and limitations of the introspective novel as a form, especially as manifested in one of the monuments of the genre, War and Peace.

RUSSL 300 Understanding Russia Today (also Govt 357)
Fall. 4 credits. G. Gibian.
An interdisciplinary inquiry into Russian society and its history, designed as an introduction for students not majoring in Russian studies. This course also acts as a synthesis for those who are studying various aspects of Russia in separate disciplines, and is organized into a variety of approaches to Russian language, culture, history, and literature. It aims to teach both basic information and different ways of interpreting that information. Topics will include: the land and the people; doing business in Russia; literary traditions and revolts; Russian national identity; nationalism; persistent cultural traits; religion, history, politics and government; relations with other nations, inside Russia and outside; Jews and Russians; folklore; social matters, customs, values; position of women; education; music, architecture; agriculture and industry; Russian maximalism; regionalism; the ecology; film, TV, theatre, journalism.

RUSSL 311 Modern European Literature and Culture (also COMP L 311, ROM ST 311)
Fall. 4 credits. Core course for European Studies concentration; no prerequisites. G. Gibian.
For course description, please see Comparative Literature 311.

RUSSL 330 Understanding Russia Today (also Govt 357)
[RUSSL 331 Introduction to Russian Poetry #]
Fall. 4 credits. Prerequisites: Russian 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. Not offered 1999-2000. S. Senderovich. A survey of Russian poetry with primary emphasis on the analysis of individual poems by major poets.

RUSSL 332 Russian Drama and Theatre (also Theatr 322, COM L 322)
Spring. 4 credits. S. Senderovich. Selected topics. Discussion of a number of the most representative Russian plays of the nineteenth and twentieth centuries in chronological order. Introductions to the historical period, cultural atmosphere, literary trends, and crucial moments in the history of the Russian theater will be especially emphasized. Among the works we will be studying will be Ostrovsky’s Inspector General, Ostrovsky’s The Storm, and Chekhov’s The Cherry Orchard. All readings will be in English translation. Additional assignments in critical literature will be made for graduate students.

[RUSSL 333 Twentieth-Century Russian Poetry]

[RUSSL 334 The Russian Short Story]
Fall. 4 credits. Prerequisites: Russian 202 or equivalent and permission of instructor. This course may be counted toward the 12 credits of Russian literature in the original language for the Russian major. Also open to graduate students. Not offered 1999-2000. N. Poliak. A survey of two centuries of Russian story telling. Emphasis on the analysis of individual stories by major writers, on narrative structure, and on related landmarks of Russian literary criticism.

RUSSL 335 Gogol
Fall. 4 credits. G. Shapiro. Selected works of Gogol read closely and viewed in relation to his life and to the literature of his time. Readings in English translation.

RUSSL 337 Films of Russian Literary Masterpieces (also Comparative Literature 338)
Fall. 4 credits. S. Senderovich. War and Peace and Dr. Zhivago are well-known American films relating to Russian literature of the 19th and 20th centuries. Russian literature has been a matter of great interest both in the West and East. A clear cut practice of cultural translation is presented by film versions of Russian literary masterpieces. We will perform a comparative analysis of these films, which will provide an excellent opportunity for discussing problems of translation between various media and of cultural translation.

RUSSL 350 Education and the Philosophical Fantasies (also COM L 350)
Spring. 4 credits. P. Carden. A major philosophical tradition has conceived of education as encompassing the whole of our lives. What we should do or be is seen as the result of every choice we make. The whole of our human context is understood as a school in which we form ourselves. This all-encompassing vision of education has been embodied in the works of the great philosopher-fantasists who use the forms of fiction to explore fundamental issues of education. In this course we will examine several key philosophical fantasies, among them Plato’s Republic, Rousseau’s Emile, and Tolstoy’s War and Peace. Our aim will be to understand how the discourse on education became a central part of our Western tradition.

RUSSL 367 The Russian Novel (also Comparative Literature 367)
Fall. 4 credits. Also open to graduate students. Special discussion section for students who read Russian. G. Gibian. Sentimentality, romanticism, realism, modernism. Novels and short stories by Gogol, Turgeniev, Tolstoy, Dostoevsky, Chekhov, and others. Readings in English translation.

RUSSL 368 Russian Literature from 1917 to the Present
Spring. 4 credits. Also open to graduate students. No prerequisites. There will be a special section for students who read Russian. Not offered 1999-2000. G. Gibian. In translation. A survey of Russian literature focusing on the most important writers. Among the themes to be explored will be Russian Modernism, social command, socialist realism, the Thaw, dissident and emigre literature, post-modernism. Writers include Blok, Mayakovsky, Babel, Olesha, Platonov, Pasternak, Nabokov, Solzhenitsyn, the two Erofeevs, and contemporary women poets and short story writers.

RUSSL 369 Dostoevsky #

RUSSL 373 Chekhov in the Context of Contemporary European Literature and Art (also Comparative Literature 375)
Fall. 4 credits. Not offered 1999-2000. S. Senderovich. Reading and discussion of Anton Chekhov’s short stories in the context of the European art of the short story and painting of that era. The course is designed for nonmajors as well as literature majors. All reading is in English translation.

RUSSL 377 Baltic Literature (also German Studies 377)

RUSSL 384 Dialogue in/as Text (also Comparative Literature 384)
Spring. 4 credits. Not offered 1999-2000. P. Carden. An examination of the principle of dialogue and dialogism as it appears in fictional discourse. Using the theories of Mikhail Bakhtin as a point of departure, we will examine the use of dialogue as a form of discourse beginning with Plato’s Phaedrus. Dostoevsky’s novels Notes from Underground, The Possessed, and The Brothers Karamazov will be discussed as dialogic, or polyphonic forms of discourse. Finally, we will discuss selected works of Gide, Sartre and Camus, who acknowledged their debt to Dostoevsky, to see if they are indeed polyphonic in structure.

RUSSL 385 Reading Nabokov (also Comparative Literature 385 and English 379)
Fall. 4 credits. G. Shapiro. This course offers an exciting trip to the intricate world of Nabokovian fiction. After establishing himself in Europe as a distinguished Russian writer, Nabokov, at the outbreak of WWII, came to the United States where he reestablished himself, this time as an American writer of world renown. In our analysis of the Nabokovian artistic universe, we shall focus on his two splendid achievements as a Russian writer, The Defense (1930) and Despair (1934) (both in their English form), and then examine the two widely read novels that he wrote in Ithaca while teaching literature at Cornell—Lolita (1955) and Pnin (1957).

RUSSL 389 Contemporary Literature in Central and East Europe (also Comparative Literature 389)
Fall. 4 credits. Not offered 1999-2000. G. Gibian. The course this year will study developments in literature (and to some extent in other areas of culture) in Hungary, Poland, Slovakia, and the Czech Republic in the most recent periods. We shall focus on novels and short stories, but some consideration will also be given to drama and poetry. No knowledge of Eastern European languages is required. The reading will be done in English translation.

RUSSL 393 Honors Essay Tutorial
Fall and spring. 8 credits. Must be taken in two consecutive semesters in senior year. Credit for the first semester will be awarded upon completion of second semester. For information, please see Director of Undergraduate Studies.

RUSSL 404 History and Nationality in Russia and Eastern Europe (also S Hum 404)
Fall. 3 credits. Not offered 1999-2000. G. Gibian. Ethnicity and nationality appear as the main forces behind the recent dramatic changes in Eastern Europe. The seminar addresses these issues in Russia, Czech Republic, and elsewhere, mainly from a literary perspective and also in the context of rising ethnic and national consciousness throughout the world.

RUSSL 409 Russian Stylistics
Spring. 4 credits. Also open to graduate students. Prerequisite: three years of Russian. Not offered 1999-2000. S. Senderovich. A few steps beyond normative grammar. Introduction to the subleties of idiomatic Russian on the levels of morphology, syntax, vocabulary, and phonology. Introduction to the genres of live colloquial and written language. Development of writing skills through short assignments and their analyses. First notions of literary stylistics and their practical application.

RUSSL 415 Post-Symbolist Russian Poetry
Spring. 4 credits. Prerequisite: permission of instructor. N. Poliak. We will examine works by three poets in the first quarter of this century. Inokentij Annenskij, the Symbolist whom the Acmeists considered their mentor, Osip Mandelstam, a founding Acmeist, and Boris Pasternak,
associated, at least for a time, with the Futurists. Through close readings of their
verse, and also critical prose and manifestoes, we will attempt to determine some of the
general features that link poets of such diverse orientations in the years following the crisis of
Symbolism. We will also outline the features that distinguish them as representative of their
respective movements.

RUSSL 425 Vladimir Nabokov vs. Jean-Paul Sartre (also COMP L 445)
S. Senderovich.
Jean-Paul Sartre reviewed Nabokov’s Despair in 1938. Ten years later Nabokov returned the
favor in his review of the English translation of Sartre’s La Nausée. The apparent tension
between the two celebrated men of European letters of the twentieth century allows us to
look at the works of both through the eyes of the other, to go into the problems of
Existentialist philosophy, into Nabokov’s brand of it, and to see it in relation to Sartre in
Nabokov’s works. The latter gives an excellent yet unexplored approach to the
poetic world of Vladimir Nabokov. Nabokov’s major response to Sartre occurred in the novel
Pnin written in Ithaca and largely about Cornell.

RUSSL 427 Russian Formalism (also Comparative Literature 427)
N. Pollak.
This is a course on Russian Formalism, a trend in literary interpretation that flourished in the
1910s and the first part of the 1920s. We will read the writings of such scholars as
Tynianov, El’kinbaum, Shklovsky, and Jakobson, as well as the works they studied.
The course provides a historical examination of a school of poetics that rose to some of the most
important movements in twentieth-century Western criticism—and in other disciplines,
such as linguistics and anthropology. The course also provides both a look at classics of
Russian prose and an approach to literature that has something to offer readers today. No
knowledge of Russian is required.

RUSSL 430 Practice in Translation
Spring. 4 credits. Prerequisites: proficiency in Russian or approval of instruc-
W. Browne and S. Senderovich.
A practical workshop in translation: documents, scholarly papers, literary works (prose and
poetry). Translation mostly from Russian to English, partly from English to Russian.
Attention to problems and development of skills.

RUSSL 431 Contemporary Russian Prose
Spring. 4 credits. Prerequisites: Russian 301–302 or 303–304, and permission of instruc-
tor. This course may be counted towards the 12 credits of Russian literature in the
original language for the Russian major. Graduate students may audit the
This course is designed to acquaint students with the way Russian prose has developed
during the past forty years. Although the emphasis will be on comprehension of the
text, we will also discuss literary structure, modern literary history, social and political
problems, and the ways in which life in Russia is reflected in its literature. Authors to be read
include Viktor Nekrasov, Yuri Kazakov, Alexander Solzhenitsyn, Varlam Shalamov,
Abram Tertz (Andrei Sinyavsky), Vasili Axyonov, and Tatjana Tolstaya. This course is
specifically intended for third- and fourth-year Russian majors.

RUSSL 432 Pushkin 
Fall. 4 credits. Prerequisites: Russian 202 or equivalent, and permission of instruc-
tor. This course will investigate the literary and cultural theories of Mikhail Bakhtin, focusing
in particular on his interpretations of literary texts. We will read a representative selection
of works by Bakhtin covering the chronologi-
cal development of his ideas. Each member of the
class will select one or more of the literary
texts commented on by Bakhtin as an
case for independent work. A reading
knowledge of Russian is not required, although
Russian readers may have alternate assignments in the language.

RUSSL 445 Bataliukov and Pasternak
Fall. 4 credits. Prerequisites: at least one 300-level course in Russian literature in the
original, or permission of the instructor.
A study of the works of Konstantin Bataliukov (b. 1878) and Boris Pasternak (b. 1890),
two poets who have been described as innovators in Russian poetic language. We will examine
the poetry (and prose) of these poets and some of their contemporaries, with a view to
exploring their parallel roles in two ages of
poetry a century apart.

RUSSL 460 Short Works of Tolstoy and Dostoevsky
G. Gibian.
Readings in Russian and in translation. Open
to graduate students.

RUSSL 491 Reading Course: Russian Literature in the Original Language
Fall or spring. 1 credit each term. Prerequisite: permission of instructor.
Staff.
This course is to be taken in conjunction with
any Russian literature course in English
translation. Students will receive one credit
for reading work done in Russian in addition to
their normal course work.

RUSSL 492 Supervised Reading in Russian Literature
Fall or spring. 1–4 credits each term. Prerequisite: permission of instructor.
Staff.

RUSSL 499 The Avant-Garde in Russian Literature and the Arts
Spring. 4 credits. Open to any student who has completed a second-year course in
Russian, or who has equivalent reading
skills in Russian. May be used in
satisfaction of the 12 hours of reading
required for the Russian major. Not
The first decades of the twentieth century was
perhaps the richest period ever in Russian
literature and the arts. It begins with the
brilliant experimentation in poetry and prose of
Andrei Bely, Blok, Remizov and others. It
continues with the breakthroughs in painting
and sculpture of Malevich, Goncharova,
 Tatlin, etc. In the second decade the
rumbustious Futurists take over in literature
and establish a compact with theater and the
visual arts in which all the art forms break
down the barriers to produce a new kind of
art. During this period Russian artists in every
medium were on the cutting edge of the
European art scene. After the Revolution
Russian artists and writers of the avant-garde
continued their dominance for a time, now
including the developing medium of film.
In this course we will read representative
Russian texts by the major authors of the
period and we will also investigate develop-
ments in the theater, the visual arts and film.

Graduate Seminars

RUSSL 603 Nineteenth Century Russian Literature
G. Shapiro.
Nineteenth- and twentieth-century works
chosen according to the needs of the students
enrolled. Stress on skills useful in teaching
Russian literature.

RUSSL 611 Supervised Reading and Research
Fall or spring. 2–4 credits. Prerequisite:
permission of the department. Staff.

RUSSL 617-618 Russian Stylistics I and II

RUSSL 619 Seventeenth-Century Russian Literature
G. Shapiro.
Seventeenth-century Russian literature is often
studied together with Medieval literature. Is
such an arrangement justified, or does
seventeenth-century literature have its own
problems that makes it worth studying
separately? In scholarship the seventeenth
century is referred to as the Age of Baroque.
Did Muscovite Russia experience its own
Baroque, and, if so, what are its unique
features? These and other important issues
will be addressed in the seminar. In the
course of the seminar a variety of concepts,
genres, and themes characteristic for the
epoch will be discussed. We will read the
works of such authors as Simeon Polotsky,
Silvester Medvedev, Karion Istomin, and the
archpriest Avvakum.

RUSSL 620 Twentieth-Century Russian Poetry
Spring. 4 credits. Open to advanced undergraduates with permission of
N. Pollak.
An in-depth study of the writings of selected
twentieth-century poets. Authors may include
Blok, Mandelstam, Pasternak, Tsvetayeva, and
Khlebnikov.

RUSSL 621 Old Russian Literature
S. Senderovich.
A survey.
RUSSIAN 541

[RUSSSL 622] Eighteenth-Century Literature

[RUSSSL 624] Russian Romanticism

A survey of concepts, themes, genres, and main individual contributions in Russian literature of the Age of Romanticism. The Age of Romanticism encompasses the first four decades of the nineteenth century. Zhukovskiy, Batsishkov, Pushkin, Baranynsky, Gogol, and Lermontov are the major representatives of this style and the most important period of Russian literature. The emphasis is on poetry, its historical and theoretical problems. It was, above all, the golden age of Russian poetry, which prepared and deeply influenced the following age of great Russian prose. Turgeney, Tolstoy, Dostoysky, and Chekhov are full of allusions to the texts of the golden age and cannot be properly understood without it.

[RUSSSL 625] Russian Realism

A study of the development of psychological realism in Russian prose of the nineteenth century, with some attention to the poetic tradition. In addition to reading representative works, we will pay attention to the historical background of the period. We will approach the works through the critical writings of several important theorists, in particular those of Lyda Ginzburg.

[RUSSSL 626] The Tradition of Russian Poetry

This course will examine a selection of poems that have been particularly important for the tradition of Russian literature in the nineteenth and twentieth centuries. Our focus will include critical and literary responses to these poems as well as close readings.

[RUSSSL 627] Russian Formalism (also Comparative Literature 627)

[RUSSSL 630] Gogol

Gogol’s artistic career from his “Ukrainian cycles to Dead Souls.” We will examine representative works from each of the major divisions of Gogol’s early work, in particular from his cycles Evenings on a Farm near Dikanka and Mirgorod, and will trace the writer’s development toward his magnum opus, Dead Souls. Although some of the readings will be done in English to enable the class to cover a significant amount of material, the class work will be focused on close analysis of the Russian text.

[RUSSSL 641] Bakhtin as Reader (also COMP L 641)

[RUSSSL 650] Russian Intellectual History

Nineteenth- and twentieth-century selected topics. Taught mostly in English.

[RUSSSL 669] Dostoevsky

Study of representative works from various periods of Dostoevsky’s life, including some articles, speeches, and parts of The Diary of a Writer, against the context of nineteenth-century Western European and Russian literature. A variety of critical and scholarly approaches (from Russian Formalists to recent Western scholars) will be sampled and evaluated.

[RUSSSL 671] Seminar in Nineteenth-Century Russian Literature

[RUSSSL 672] Seminar in Twentieth-Century Russian Literature

[RUSSSL 673] The Russian Nabokov
Fall. 4 credits. Also open to advanced undergraduates. Not offered 1999–2000. G. Shapiro.

Vladimir Nabokov wrote much verse, several plays, numerous short stories, and nine novels in Russian before switching to English. He is a major Russian writer of the twentieth century. This seminar will examine his work in the context of modern Russian literature, concentrating in particular on the novels. Knowledge of Russian is highly desirable, but all the works discussed also exist in English translation.

[RUSSSL 675] Russian Literature, 1917–1945

This semester will focus on the achievements of Russian prose between the two World Wars. Among the authors whose works will be closely read and discussed, there are Malevich, Tatlin, Dziga Vertov, and Babel. We will examine theater through the Futurist performance piece, “Victory Over the Sun,” through Meyerhold’s productions of Mayakovsky’s plays and other experimental pieces, and through mass spectacles. We will consider the film theories of Eisenstein and Dziga Vertov and see several of their films. In the visual arts we will examine the experiments of Larionov and Goncharova, Malevich, Kandinsky, and Tatlin. We will also look at the photomontage of Rodchenko.

SCIENCE AND TECHNOLOGY STUDIES
The importance of science & technology in the modern world is difficult to overstate. Whether one looks at computers in society, the history of evolutionary theory, the challenges of environmental controversies, the ethical dilemmas of biomedicine, or the military applications of research, science and technology profoundly affect our lives—even in ways that we scarcely understand or only dimly perceive. The field of science and technology studies uses tools from the history, philosophy, sociology, and politics of science and technology to examine science and technology in their social and cultural context and to explore their political and policy implications. Systematic, integrated study of the origins and impacts of science and technology provides an understanding of the interactions among science, technology, and society and yields invaluable insights into the nature of the modern world.

The Science & Technology Studies Major
The major in Science & Technology Studies offers students wishing to pursue careers in law, public policy, health care, or management an opportunity to develop a full appreciation of the place of science and technology in society. The curriculum aims to further students' understanding of the historical, social, political, and ethical aspects of science and technology and to enable students to participate effectively in policy debates and decision making. In today's world, issues at the intersection of the technical and social continue to shape public policy, management, and research. Thus, the integrated approach of the S&T major provides a strong foundation for careers in the professions, in public policy, and in management, as well as in research and teaching.

Themes of the Major
Students in the S&T major develop a program individually tailored to their particular interests. To give their coursework a coherent focus, students select a theme that draws together a group of related courses. Available themes include:

1. Science, Technology & Public Policy.
   Many of the most important policy issues of our time involve science and technology. This theme provides students an opportunity to gain a deep appreciation of the problems this situation raises in democratic societies. Through courses that survey the place of science in American politics and through courses that focus on such substantive issues as national technology policy or the politics of genetic engineering, this theme explores the tensions between expertise and democracy, the uses of scientific knowledge in making and legitimating policy, social movements that question technology and science, and contemporary debates over economics, innovation, and technology policy.

2. Technology, Culture, & Society.
   Students interested in this theme may examine the connections among technology and society by studying the manifold ways in which social groups (scientists, engineers, inventors, corporations, government agencies, and consumers) interact to construct technological artifacts and systems, and how the use of these artifacts and systems is related to social and cultural change. Areas of particular interest are: computers and society, the military and technological change, gender and technology, biotechnology and society, and telecommunications policy.

   By focusing on the relationship between scientific knowledge and political power, this theme offers unique insights into the making and implementation of environmental policy. Courses are available on such topics as American environmental politics, international environmental policy, science and the law, the history of agricultural science, and environmental communication. Students explore the causes and consequences of environmental controversies, the nature of risk and uncertainty in environmental issues, the roles of experts and the public in environmental decisions, and the challenges of global environmental policy.

4. History and Philosophy of Science and Technology.
   This theme provides students with an appreciation of science and technology in historical perspective and with an understanding of the philosophical problems posed by scientific knowledge. Courses available range from broad surveys to intensive studies of focused subjects. Students in this theme address such topics as the emergence of modern science; gender and science; the goal of achieving valid knowledge; and the philosophical and institutional problems that this entails; the issues for history and philosophy of science raised by the new sociology of scientific knowledge; the relationship between knowledge, technology, and ethics; and the impact of major institutions—such as religion, medicine, the military, and the modern consumer economy—on the development of the sciences.

Beyond the four themes described above, S&T majors may also create their own themes, carefully tailored to their particular interests. Examples might include "Computers, Innovation, and Society" or "Science, Technology, and Globalization."

Admission to the Major
Students intending to major in Science & Technology Studies should submit an application during their sophomore year. Juniors are considered on a case-by-case basis. The application includes (1) a one-page statement explaining the student's intellectual interests and why the major is consistent with the student's academic interests; (2) the theme the student wishes to pursue in the major; (3) a tentative plan of courses fulfilling S&T requirements; and (4) an up-to-date transcript of work.
completed at Cornell University (and elsewhere, if applicable). Acceptance into the major requires completion of the following prerequisites: a) two introductory courses chosen from some combination of history, philosophy, sociology, or government; b) the science requirement of the College of Arts and Sciences; c) mathematics or computer science courses in fulfillment of the Arts College Group Two distribution requirement. Sophomores in the process of completing these prerequisites may be admitted to the major on a provisional basis. Further information and application materials are available at 275 Clark Hall (255-6047).

Requirements

S&TS majors must complete the following requirements:

1. Core courses. Science and Technology Studies majors will be required to take:
   (a) either S&TS 250 (Technology in Society) or S&TS 282 (Science in Western Civilization); and
   (b) S&TS 381 (Philosophy of Science: Knowledge and Objectivity) or S&TS 389 (Philosophy of Science: Evidence and Explanation) or S&TS 201 (What is Science? An Introduction to Social Studies of Science and Technology); and
   (c) S&TS 390 (Science in the American Polity: 1800-1960) or S&TS 391 (Science in the American Polity: 1960-now) or S&TS 442 (Sociology of Science).
   
2. Additional Science and Technology Studies courses. Science and Technology Studies majors will be required to complete at least 21 credit hours of additional courses in Science and Technology Studies, subject to the following restrictions:
   (a) Breadth requirement: at least one course beyond the core courses in each of the three areas of concentration: history, philosophy, and social studies of science and technology;
   (b) Depth requirement: at least two courses in one area beyond the core courses and intended for advanced undergraduates or graduate students.
   
3. Science Requirement: in addition to the science requirement of the College of Arts and Sciences, Science and Technology Studies majors are required to take an additional two semesters of a natural science or engineering (including computer science). Mathematics sufficient to fulfill the additional science requirement should be completed before undertaking that requirement. Choice of these courses should be made in consultation with the student’s major adviser and should be related to the theme selected by the student.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented S&TS majors. Students who enroll in the honors program are expected to do independent study and research, with faculty guidance, on issues in science and technology studies. Students who participate in the program should find the experience stimulating and rewarding whether or not they intend to pursue a research career. S&TS majors are considered for entry into the honors program at the end of the spring semester before their junior year. More information on the honors program is available from the S&TS undergraduate office at 275 Clark Hall (255-6047).

The Biology and Society Major

The Department of Science & Technology Studies also offers the Biology and Society major, which is offered from the Biology and Society curriculum under general studies. The Biology and Society major is ideally suited for students who wish to combine training in biology with exposure to perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing foundational training in basic biology, biology and society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The biology and society major is offered to students enrolled in the College of Arts and Sciences. Undergraduates in the College of Agriculture and Life Sciences can develop an approved sequence of courses from the biology and society curriculum under general studies. The major is coordinated for students in all colleges through the Biology and Society office. Students can get information, specific course requirements, and application procedures for the major from the office in 275 Clark Hall, 255-6042.

A full description of the Biology and Society major can be found in the Courses of Study section entitled Special Programs and Interdisciplinary Studies.

The Concentration in Science and Technology Studies

The concentration (or minor) in Science & Technology Studies (S&TS) is designed for students who wish to engage in a systematic, interdisciplinary exploration of the role of science and technology in modern societies. The concentration is intended for students with varied academic interests and career goals. Majors in the natural sciences and engineering have an opportunity to explore the social, political, and ethical implications of their selected fields of specialization, while students majoring in the humanities and social sciences have a chance to study the processes, products, and impacts of science and technology from multiple disciplinary perspectives.

The S&TS concentration permits students to develop an individualized program of study closely related to their major field. For example, students might use the S&TS concentration to further explore issues related to their major, focusing on such topics as computers and society, gender and technology, science and society, science and politics, and environmental policy. By choosing courses in S&TS which fit their particular goals, students can tailor the concentration to provide breadth and depth in areas of special interest.

S&TS courses are organized into three areas: history, philosophy, and social studies of science and technology. To satisfy the requirements for the S&TS concentration, students must complete with letter grades a minimum of four courses selected from the course offerings listed for the major. At least one course should be chosen from the list of core courses. The remaining three courses should be chosen in consultation with an S&TS faculty adviser and must be drawn from at least two of the three areas. Interested students may obtain further information about courses by contacting the S&TS undergraduate office, 275 Clark Hall (255-6042).

Course Offerings

Introductory Course

History

Philosophy

Social Studies of Science

Independent Study

S&TS 101 Science and Technology in the Public Arena

Fall 3 credits. J. Reppy.

An introduction to public policy issues arising from developments in science and technology. We will study such topics as the politics of expertise, the effect of technical change on workers, and the management of risk. The emphasis will be on understanding the role played by technical expertise in political controversies. Students will work in small groups to prepare position papers on selected topics such as biological cloning, encryption on the internet, gendered design in automobiles, outbreaks of rare diseases, and nuclear waste disposal.

History

S&TS 233 Agriculture, History, and Society: From Squanto to Biotecnology

Fall 3 credits. M. W. Rossiter.

This course will survey the major themes in the development of agriculture and agribusiness in the United States in the nineteenth and twentieth centuries. These include particular individuals (such as Liberty Hyde Bailey, Luther Burbank, G. W. Carver, Henry A. Wallace, and Norman Borlaug), the rise of government support and institutions (including U.S.D.A. and Cornell), noteworthy events (the Dust Bowl, World War II, and the environmental movement), and the achievements of the recent Green and "Gene" Revolutions.

S&TS 250 Technology in Society (also Electrical Engineering 250 and History 250)

Fall. 3 credits.

For description, see ENGRG 250.

S&TS 281 Science in Western Civilization (also History 281)

Fall. 4 credits.

For description, see HIST 281.

S&TS 282 Science in Western Civilization

For description, see HIST 282.)
S&TS 283 The Sciences in the Twentieth-Century  
Spring. 4 credits. M. Dennis.  
Science emerged as a powerful source of social, economic, and political power during the twentieth century. Through an examination of the development of the sciences—physical and biomedical—during the twentieth century, students will learn about the reciprocal relations between science and society. Topics covered may include: the rise and development of quantum mechanics; the emergence of Big Science; the history of the sciences in totalitarian nations, especially the former Union of Soviet Socialist Republics and Communist China; the evolutionary synthesis; the rise and fall of molecular biology; the multiple forms of eugenics; the transformation of the social sciences; the role of new technologies in scientific change, especially computer and communication technology; the growth of science as a profession; and the development of science in non-western cultures.

S&TS 287 Evolution (also History 287)  
Fall. 4 credits.  
For description, see BIO G 207.

S&TS 292 Inventing an Information Society (also Electrical Engineering 298 and Engineering 298 and History 292)  
Spring. 3 credits.  
For description, see ENGRG 298.

S&TS 295 Computers: From Babbage to Gates  
Fall. 4 credits. M. Dennis.  
Computers have not always been the ubiquitous beige boxes gracing our desktops; in Victorian London, Charles Babbage attempted to build his analytical engine using brass gears and steel rods; and during World War II the Allied governments used sophisticated electro-mechanical and electronic "brains" to break Axis codes. Machines that once occupied entire rooms now travel in knapsacks. How did this technology, once considered esoteric and useful to only technical specialists, colonize industry, academia, the military, the federal government, and the home? Using primary historical materials, including novels, films, archival documents and other texts we will follow computers from Babbage's Victorian dream of an analytical engine to the visions of contemporary moguls like Bill Gates whose goal is "information at your fingertips." We will explore not only how computer technology affects society, but how culture and politics enable and sustain the development of the machine. This is a course in the history and sociology of computers; a background in computer science is not required. (No technical knowledge of computer use is presumed or required.)

[S&TS 433 International History of Science]  
A survey of the major scientific events and institutions in several foreign nations, including developing countries. The course covers the period 1660 to the present and gives some attention to who in each country becomes a scientist, who rises to the top, and who emigrates. Weekly readings and a research paper.

S&TS 444 Historical Issues of Gender and Science (also Women's Studies 444)  
Fall. 4 credits. Open to sophomores. M. W. Rossiter.  
One-semester survey of women's role in science and engineering from antiquity to the 1980s, with special emphasis on the United States in the twentieth century. Readings will include biographies and autobiographies of prominent women scientists, educational writings and other primary sources, and recent historical and sociological studies. By the end of the semester, we shall have attained a broad view of the problems that have faced women entering science and those that still remain.

S&TS 447 Seminar in the History of Biology (also Biology and Society 447, History 415, and Biological Sciences 467)  
Summer. 4 credits. Limited to 18 students. S-U grades optional.  
For description see Biology Sci (BIO G) 467.

S&TS 525 Seminar in the History of Technology (also History 525)  
Fall. 4 credits. R. Kline.  
Exploration of the history of technology in Europe and the United States from the eighteenth century to the present. Typical topics include the industrial revolution in Britain, the emergence of engineering as a profession, military support of technological change, labor and technology, the "incorporation" of science and engineering, technologi­cal utopias, cultural myths of engineers and inventors, social aspects of urbanization in the city and on the farm, post-war consumerism, and gender and technology. The interests of students and recent literature in the field will be considered in selecting the topics for the seminar.

S&TS 616 Enlightened Science (also HIST 616)  
Fall. 4 credits. Limited to graduate students. P. Dear and M. Dennis.  
For description, see HIST 616.

[S&TS 644 Topics in the History of Women in Science (also Women's Studies 644)]  
This is a one-semester graduate seminar on selected topics in the history of women and gender in science and technology, covering mostly the U.S. in the 20th century but broadly defined to include earlier periods and other countries. It seeks to acquaint advanced students with some of the best recent literature on this topic and to identify and explore possible new topics. Weekly readings and a research paper.

[S&TS 680 Seminar in Historiographical Approaches to Sciences (also History 680)]  
For description, see History 680.

[S&TS 682 Topics in the Scientific Revolution (also History 682)]  
For description, see HIST 682.

[S&TS 687 Seminar in the History of the Agricultural Sciences]  
Weekly readings and a research paper.

[S&TS 777 Science, Technology and the Cold War]  
This graduate seminar will examine the historical transformation wrought in the organization and practice of the physical, biomedical, and environmental sciences since 1945. How did military and federal patronage affect the development of the sciences, the organization of the postwar university, and the armed services? Students will read contemporary historical materials as well as primary texts to understand the development of particular institutions, technologies, and individuals. In addition to participation in the weekly discussion, each student will prepare a research paper for presentation to the seminar.

Philosophy

S&TS 205 Ethical Issues in Health and Medicine (also Biology and Society 205)  
Fall. 4 credits.  
For description, see B&SOC 205.

S&TS 206 Ethics and the Environment (also Biology and Society 206)  
Spring. 4 credits.  
For description, see B&SOC 206.

S&TS 286 Science and Human Nature (also Philosophy 286)  
Spring. 4 credits.  
For description, see PHIL 286.

[S&TS 381 Philosophy of Science: Knowledge and Objectivity (also Philosophy 381)]  
Fall. 4 credits. Not offered fall 1999.  
For description, see PHIL 381.

S&TS 681 Philosophy of Science (also Philosophy 681)  
Spring. 4 credits.  
For description, see PHIL 681.

Social Studies of Science

S&TS 201 What is Science? An Introduction to the Social Studies of Science and Technology  
Spring. 3 credits. T. Pinch.  
This course is not a science or engineering course. It is not an introduction to science and technology. It is a course which allows both science and non-science majors to reflect on the nature of science and technology as activities. How come science is so successful? Has it always been that way? How different really is science from other activities? How does a new invention come about? In order to understand better what science is we will also look at what it is not. We will look at episodes of mainstream science, along with science from the X-Files. One week students may study what went on in the confirmation of Einstein's theory of relativity,
another week we may hear about crop circles and parapsychology.
Throughout, we will be looking at the infrastructure of science and technology—the
bats that scientists, engineers, and their
textbooks take for granted. No particular science or arts requirements are needed for
this course. The materials are chosen so as to be understandable by all. We will use a
variety of media, including still images, video and computer simulations.

S&TS 285 Communication in the Life Sciences (also COMM 285)
Spring. 3 credits. B. Lewenstein.
For description, see COMM 285.

S&TS 311 Sociology of Medicine
Spring. 4 credits. S. Hilgarter.
This course provides an introduction to the ways in which medical practice, biomedical
technology, and the medical profession are embedded in society and shaped by social
phenomena. Accountability to patients and the public, and struggles over the control of
medical practice in a world where medicine is connected to gender, class, race, and
personal autonomy are important overarching themes. We will examine the structure of the
medical profession, medical training and professional socialization, the social organiza-
tion of the hospital, and doctor-patient interactions. The course will also explore
how biomedical knowledge and technology get produced, assessed, and introduced into
clinical practice. Topics may include the intensive care unit, the training of surgeons,
the regulation of pharmaceuticals, AIDS and breast cancer activism, genetic testing, and
priority setting in biomedical science.

S&TS 324 Environment and Society
(also Rural Sociology 324 and Sociology 324)
Fall. 3 credits. Not offered 1999–2000.
For description, see R SOC 324.

S&TS 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also Government 305, AM ST 350)
Spring. 4 credits. M. Dennis.
This course will explore the development of atomic weapons from early twentieth-century
ruminations about super bombs in science fiction through the Manhattan Project, the
postwar development of thermonuclear weapons and civil defense, and more recent plans
for strategic defense. Our focus will expand to cover the lives of researchers at
such institutions as Los Alamos during and after World War II as well as discussions of
national politics. Other topics include the Nazi effort to develop an atomic bomb, the
role of technical espionage during and after World War II, and the problems posed by the
classification of technical knowledge. We will seek to understand how the bomb became
part of American culture through the use of literature and film, as well as readings in
primary historical documents and secondary analyses. In addition to class meetings, there
is also a required screening session on W 7–10 p.m. in Uris media room B. Films will
generally last less than two hours, but some are longer. Viewing the movies is an essential
part of the course.

S&TS 352 Science Writing for the Mass Media (also Communication 352)
Fall. 3 credits.
For description, see COMM 352.

S&TS 360 Ethical Issues in Engineering (also Engineering 360)
Spring. 3 credits.
For description, see ENGR 360.

S&TS 390 Science in the American Polity, 1800–1960 (also Government 306, AM ST 388)
How did America become a leading nation in scientific and technical research? This course
charts the development of American science from its origins in gentlemanly societies in the
early nineteenth century through the development of large-scale federally funded research
or Big Science. Particular attention will be paid to the importance of government
patronage in creating new social and intellectual spaces for research; the impor-
tance of medicine and the medical disciplines for the development of university-
based research; the origins and expansion of research in the military and the role of war
in the political economy of American science.

S&TS 391 Science in the American Polity, 1965–Now (also Government 309, AM ST 389)
Spring. 4 credits. M. Dennis.
This course reviews the changing political relations between science, technology and the state in America from 1960 to the present. It focuses on the politics of choices involving science and technology in a variety of institutional settings, from Congress to courts and regulatory agencies. The tensions and contradictions between the concepts of science as an autonomous republic and as just another special interest provide the central theme for the course. Topics addressed will include research funding, technological controversies, scientific advice, citizen participation in science policy, and the use of experts in courts.

S&TS 400 Components and Systems: Engineering in a Social Context (also Mechanical and Aerospace Engineering)
For description, see M&AE 400.

S&TS 401 Biology and Society: The Social Construction of Life (also Biology and Society 301)
Fall. 4 credits.
For description, see B&SOC 301.

S&TS 406 Biotechnology and Law (also Biology and Society 406)

S&TS 407 Law, Science and Public Values (also Government 407 and Biology and Society 407)

S&TS 409 From the Phonograph to Techno (also Society for the Humanities 409)

S&TS 411 Knowledge, Technology, and Property
Spring. 4 credits. Prerequisites: at least one course in science and technology studies.
B. Lewenstein.
Should the human genome be treated as private property or a public resource? How
should copyright be managed in the digital environment of the Internet? Is music
"sampling" high-tech theft or artistic expres-
sion? Does bioprospecting represent an
elevated strategy for preserving biodiversity or a post-colonial means for
transferring resources from the developing
world to the North? Debate about the nature and scope of intellectual property is an
increasingly salient feature of contemporary politics. This course examines the ownership
of knowledge and technology, exploring fundamental tensions that intellectual property
systems express and incompletely reconcile. Perspectives from science and technology
studies, sociology, law, and economics will inform the course. Case studies will explore
the construction of property in contexts ranging from the early history of copyright to
the ownership of life forms, avatars, algorithms, artistic content, electronic
databases, and the personal identities of
celebrities.

S&TS 427 Politics of Environmental Protection in America (also Government 427)
An introduction to the distinctive feature of environmental protection in America, focusing
particularly on the role of law, science, and
citizen activism in public policymaking.
Readings from law, political science, and
policy analysis will examine the changing role of
expert agencies, courts, public interest
groups, Congress, and the states in environ-
mental politics since the late 1960s. Case
studies of specific environmental controversies
(nuclear power, siting, pesticides, endangered
species) will be used to explore dominant
public conceptions of risk and safety,
regulatory costs and benefits, and the goals
and instruments of environmental policy.

S&TS 442 The Sociology of Science
(also City and Regional Planning 442 and Biology and Society 342)
Fall. 4 credits. T. Pinch.
A view of science less as an autonomous
activity than as a social institution. We will
discuss such issues as controversies in science,
analysis of scientific text, gender and the
social shaping of scientific knowledge.

S&TS 466 Public Communication of Science and Technology
Fall. 4 credits. Limited to 15. Prerequi-
site: COMM 352 or 360, ENGRG 350 or permission of instructor. Not offered 1999–2000.
B. Lewenstein.
For description, see COMM 466.
In this course we will study the innovation process (that is, the introduction of new technology into practice) through the critical analysis of selected theories of innovation and supporting empirical evidence. Economic theories will be contrasted to the insights to be found in science and technology studies. The focus will be on the context of interests and ideology in which the various theories have been framed and their differing implications for technology policy. Authors to be covered include Schumpeter, Soltow, Scherer, Nelson and Winter and Bijker and Pinch.

[S&T&S 467 Innovation: Theory and Policy]
Fall. 4 credits. Open to upper-level undergraduates and interested graduate students. Prerequisite: Economics 102 or permission of the instructor. Not offered 1999–2000. J. Reppy.

[S&T&S 469 Food, Agriculture, and Society (also Biology and Society 469, and Biology General 469)]
Spring. 3 credits. Not offered 1999–2000. For description, see BIO G 469.

[S&T&S 483 The Military and New Technology]
Fall. 4 credits. Not offered 1999–2000. For description, see GOVT 483.

[S&T&S 490 The Integrity of Scientific Practice]

Recent scandals over scientific fraud, debates about financial conflicts of interest, disputes about the use of human and animal subjects, and tensions over thehip of data have raised concern about integrity in science. In addition, changes in the American research system—from the emergence of a new university-industry relationships to the growth of electronic communication—pose new questions about who owns and controls research. The course addresses practices that present problems of integrity in research (e.g., fraud, secrecy, commercialization). It also examines how scientific practices affect the structural integrity of science as an institution. Through these complementary concepts of integrity, the course explores the connections between the conduct of science and its cultural authority.

[S&T&S 493 Economics Meets Science Studies]

This course will cover a variety of possible interactions between the disciplines of economics and science and technology studies. Economists (at least some economists) are interested in science and technology as important components in economic growth, while scholars in science studies often appeal to economic motivations and institutions to explain behavior in the production of scientific and technological knowledge. We will explore ways in which economics can provide new questions and theoretical approaches for science and technology studies. From another perspective, economics, as the most "scientific" of the social sciences, is itself a subject for study. Internal critiques by economists will be compared to external analyses in the science studies literature. Reading and discussion will include theories on the epistemology and use of rhetoric in economic and on the "new economics of science, and examples of the use of economic analysis in the science studies literature."

[S&T&S 532 Inside Technology: The Social Construction of Technology]
Spring. 4 credits. T. J. Pinch.

Rather than analyze the social impact of technology upon society, in this course we will investigate how society gets inside technology. In other words, is it possible that the very design of technologies embody assumptions about the nature of society? And, if so, are alternative technologies possible which embody different assumptions about society? Do explicit theories about society? Is technology gendered? How can we understand the interaction of society and technology? Throughout the course the arguments will be illustrated by detailed examinations of particular technologies, such as the ballistic missile, the bicycle, the electric car, and the refrigerator.

[S&T&S 631 Qualitative Research Methods for Studying Science]
Fall. 4 credits. T. J. Pinch.

Much has been learned about the nature of science by sociologists and anthropologists doing lab coeval and studying scientists in action. In this course we will look at the methods used in this new wave of science studies. We will examine what can be learned by interviewing scientists, from videos and from detailed studies of scientific texts. Students will gain hands-on experience by conducting a mini-project in which they investigate some aspect of scientific culture.

[S&T&S 645 Genetics: Politics & Society in Comparative Perspective (also Government 634)]

Contemporary genetics and biotechnology are highly controversial, creating high hopes for some and deep anxieties for others. This course will trace the conflicts and power struggles over genetic engineering, using it as a case to examine some crucial issues in the relationships among science, technology, and politics. In particular, the course will focus on three themes—the politics of property, the politics of identity, and the politics of risk—as they pertain to genetics. Topics may include the social shaping biological research; eugenics and genetics; genetics and medicine; the regulation of risks; the growth of commercial biotechnology; university-industry relationships; Green parties and social movements; North-South issues and biotechnology; the Human Genome Project; intellectual property and patenting genes; and the debate over human cloning.

[S&T&S 700 Special Topic 1: Science Studies and the Politics of Science]
Fall. 4 credits. Prerequisites: S&T&S 711 or permission of the instructor. Not offered 1999–2000. J. Reppy.

Theoretical developments in science and technology studies have called attention to the contingent and socially embedded character of both knowledge claims and technological systems. Drawing on literature from several disciplines, this seminar explores the consequences of these findings for social and political studies of science. Issues and problems to be considered include trust and skepticism, political and legal agency, reflexive institutions, relativism and social action, science and norms, and the co-production of knowledge and social order.

[S&T&S 700 Special Topic 2: Technology Transfer Issues]

The goal of this course is to develop a coherent analytical framework for analyzing technology transfer, using insights from economics, sociology, history, and science and technology studies and to employ that framework to evaluate current policy issues. We will study the process of technology transfer in different contexts, ranging from intra-firm and intra-industry to technology transfer between civil and military sectors and between industrialized countries and LDCs. The readings will include a mix of theoretical writings and case studies.

[S&T&S 711 Introduction to Science and Technology Studies (also HIST 711)]
Fall. 4 credits. S. Hilgartner.

This introductory course will provide students with a foundation in the field of science and technology studies. Using classic works as well as contemporary exemplars, seminar participants will chart the terrain of this new field. Topics for discussion include, but are not limited to: historiography of science and technology and their relation to social studies of science and technology; laboratory studies; intellectual properties; science and the state; the role of instruments; fieldwork; politics and technical knowledge; philosophy of science; sociological studies of science and technology; and popularization.

Independent Study

[S&T&S 399 Undergraduate Independent Study]
Fall or spring. 1–4 credits. Please apply in 275 Clark Hall.

[S&T&S 699 Graduate Independent Study]
Fall or spring. 2–4 credits. Please apply in 275 Clark Hall.

[S&T&S 700 Special Topics]
Spring. 3–4 credits.

SINHALA (SINHALESE)

See Department of Asian Studies.

SOCIOLGY

The subject matter of sociology is human social organization and institutions. The Department of Sociology offers courses in social organization that include (among other issues) examination of inequality on the basis of race, ethnicity, income, and occupation; political behavior and public policy; social psychology and group processes; and contemporary social movements for change. Courses that analyze institutions include the family, politics and issues of public policy, the analysis of voluntary organizations, and the
The Department of Sociology offers the study of networks of political and organizational action. It provides students with particularly effective ways to understand the complexities of modern life. For many students, the undergraduate years are a last opportunity to gain the insights these fields have to offer. The Department of Sociology is continuing to design an array of beginning and advanced courses that convey a broad understanding of the methods and insights of sociological analysis—courses that will be of particular interest to undergraduates who may not major in sociology. First- and second-year students should note that the introductory courses (101, 103, 115, 150) provide substantial focus on the sociological analysis of major issues of public life. A wide selection of general education courses is available at the 200 level. Advanced undergraduates who are majors in other fields should also see, in particular, the descriptions of Sociology 303, 310, 354, 370, 380, for which there are no prerequisites other than junior or senior standing.

**Sociology Courses for Nonmajors**

Sociology provides students with particularly effective ways to understand the complexities of modern life. For many students, the undergraduate years are a last opportunity to gain the insights these fields have to offer. The Department of Sociology is continuing to design an array of beginning and advanced courses that convey a broad understanding of the methods and insights of sociological analysis—courses that will be of particular interest to undergraduates who may not major in sociology. First- and second-year students should note that the introductory courses (101, 103, 115, 150) provide substantial focus on the sociological analysis of major issues of public life. A wide selection of general education courses is available at the 200 level. Advanced undergraduates who are majors in other fields should also see, in particular, the descriptions of Sociology 303, 310, 354, 370, 380, for which there are no prerequisites other than junior or senior standing.

**Related Courses in Other Departments**

Students interested in sociology should consult direct cross-lists of the other social science departments in the College of Arts and Sciences (including Anthropology, Economics, Government, and Psychology) and of these other departments: Organizational Behavior (College of Industrial and Labor Relations), Human Development and Family Studies (College of Human Ecology), and Rural Sociology (College of Agriculture and Life Sciences).

**The Major**

Requirements for general sociology: (1) 101 and any other 100-level or 200-level course (excluding Freshman Writing Seminar) with a 2.5 minimum grade-point average; (2) no later than the junior year, the 301 and 303 methods courses; (3) one course in the department at the 400 level or higher (491 is recommended); and (4) 20 additional credits in sociology, of which 5 may be taken in related departments on the approval of the student's major adviser. A list of pre-approved courses is maintained by the director of undergraduate studies, some of which are listed under "Related Courses." Requirements for honors: Potential honors students are encouraged to begin taking the methods and statistics courses during their sophomore year and to take at least 2 credits of a truly global course Independent Study during their junior year. Honors students take Sociology 495-496 during their senior year. Graduation with honors requires a cumulative average of at least B+ in all sociology courses and the successful completion of an oral defense of the honors thesis. Interested students should consult the director of undergraduate studies no later than the second semester of their junior year.

**Supervised research.** Qualified sociology majors are invited to participate with faculty members in research. Such projects are usually initiated in one of two ways: the student may offer to assist the faculty member in an ongoing project, or the student may request that the faculty member supervise the execution of a project conceived by the student. In either case the student should enroll in Sociology 491. Interested students may direct inquiries to any faculty member.

**Business and Organizational Studies Concentration**

Sociology majors who wish to prepare for postgraduate study in professional schools (business, management, or law) or a career in business or nonprofit organizations may elect to acquire a concentration in Economic and Organization Sociology. This program provides Cornell students with training in economic sociology, organizational studies and comparative societal analysis useful in a world increasingly shaped by economic and social forces of a truly global dimension. The required core courses in the concentration are: SOC 105, SOC 215, and a research-oriented honors seminar to be fulfilled as an independent study course (SOC 491) with faculty members affiliated with the concentration. Affiliated faculty include: P. Becker, M. C. Brinton, M. Clarkberg, S. K. Hap, M. M. Macy, V. Nee, P. Tolbert, R. Stern, and D. Strang. In addition to the required courses, students choose four elective courses from the following list: SOC 217, SOC 220, SOC 311, SOC 314/515, SOC 315, SOC 322, SOC 326/526, SOC 370/570, SOC 373, SOC 421, and SOC 427. Students completing the concentration receive a letter of recommendation from the Chair based on the cumulative academic record in the concentration. Please contact Crystal Chapman, Undergraduate Program Coordinator, or Elaine Wethington, DUS, for additional information on the Business and Organizational Studies concentration.

**Introductory Courses**

**SOC 101 Introduction to Sociology (also RS 101)**

Fall, spring, or summer. 3 credits. Fall, M. Macy; spring, S. Szelenyi. This course provides an introduction to theory and research in sociology. It demonstrates how the insights, theories, and methods of sociological analysis can be brought to bear on major issues of social life. A primary goal is to convey a sense of the manner in which sociologists formulate theories and how the collection and analysis of data are used to evaluate those theories. The course will provide "hands-on" experience in analyzing sociological issues. Students undertake guided research exercises that involve using computers to analyze actual data. No prior background is presumed; necessary skills are covered in class and section meetings.

**SOC 103 Self and Society (also R Soc 103)**

Fall. 3 credits. J. W. Burkard. An introduction to microsociology, focusing on social processes within small groups, including the family. Emphasis is on leadership, conformity, social influence, cooperation and competition, distributive justice, and micro analyses of interaction.

**SOC 105 Introduction to Economic Sociology (also RS 105)**

Fall. 3 credits. G. K. Stinchcombe. Modern social thought arose out of attempts to explain the relationship between economic development and the social transformations that gave rise to the contemporary world. Classical theorists from Karl Marx and Max Weber to Karl Polanyi focused their writings on emergent capitalist economies and societies. Contemporary social theorists likewise have sought to understand the interaction between capitalism and the social forces reacting against and emerging from modern economic development. From exchange and rational choice theories to network analysis and institutional theory, a central theme in contemporary social thought has been the relationship between economy and society, economic action and social structure, rationality and fundamental social processes. This course provides an introduction to social thought and research seeking to understand and explain the relationship between economy and society in the modern era.

**SOC 115 Utopia in Theory and Practice**

Spring. 3 credits. D. Strang. People have always sought to imagine and realize a better sort of society, with both inspiring and disastrous results. In this course we discuss the literary utopias of More, Morris, and Bellamy, and also the dystopias of Huxley, Orwell, and Zamiat. We also examine real social experiments, including nineteenth century intentional communities, 20th century socialism in Cuba, and modern ecological, political, and millennial movements. Throughout, the emphasis is on two sociological questions. What kinds of social relationships appear as ideal? How can we tell societies that might work from those that cannot?

**SOC 151 Families and the Life Course (also HDFS 151)**

Spring. 3 credits. T. Miratno. For description, see HDFS 151.

**General Education Courses**

**SOC 200 Social Problems (also RSOC 200)**

T. Hirsch. For course description, see RSOC 200.

**SOC 201 Religion and Family in the U.S. (also RSOC 202 and RELST 203)**

3 credits. Not offered 1999-2000. P. Becker. This course will examine how two fundamental social institutions—religion and the family—are interlinked in American society. As recently as the 1960s, religious institutions were organized around the needs of one dominant family form, the male-breadwinner family with a stay-at-home mother. But since the 1950s, that family form is no longer statistically dominant or culturally normative. How have religious institutions adapted to new family forms? How do religious beliefs influence behavior within families, for example, the raising of children? How do religious groups foster ideals of family life or influence our beliefs about what are "good" families? How do people's family experiences and family values influence their participation...
in organized religion? What models of family life are religious groups organized around? We will begin to answer these questions by exploring the religious-family link in a variety of religious, ethnic, and social class contexts within the contemporary United States.

**SOC 202 Population Dynamics (also RSOC 201)**
Spring. 3 credits. I. Williams.
For course description, see RSOC 201.

**SOC 203 Work and Family (also Women's Studies 203)**
Spring. 3 credits. W. Burkard.
Home and family life often is portrayed in the popular media as a haven away from the harsh realities of public life, suggesting that work and family constitute separate and distinct spheres. By contrast many sociologists contend that there is a link between work and family, and that this link has different consequences for men and women. It will highlight the responses of individuals, employers and governments, both in the U.S. and internationally, to these dilemmas posed by the interface between work and family.

**[SOC 204 Race and Ethnic Relations](#)**
Staff.
This course focuses on race and ethnic relations in contemporary perspective. It examines the social and behavioral implications of variations of race and ethnicity in small group interaction, the world of work, and the larger society. Topics: inequalities in income and employment, affirmative action, ethnic political mobilization, patterns of marriage and family formation.

**SOC 206 International Development (also RSOC 206)**
Spring. 3 credits. P. McMichael.
For course description, see RSOC 205.

**SOC 208 Social Inequality**
Spring. 3 credits. D. Grusky.
This course reviews contemporary approaches to understanding the distribution of valued goods and the social consequences by which such inequality comes to be seen as legitimate, natural, or desirable. We address questions of the following kind: What are the major forms of stratification in human history? Is inequality and poverty an inevitable feature of human life? How many social classes are there in advanced industrialism? Is there a "ruling class?" Are lifestyles, attitudes, and personalities shaped fundamentally by class membership? Can individuals born into poverty readily escape their class origins and move upward in the class structure? Is there much countervailing downward mobility? Are social contacts and "luck" important forces in matching individuals to jobs and class positions? What types of social processes serve to maintain and alter racial, ethnic, and gender discrimination in labor markets? Is there an "underclass?" Will stratification systems take on new and distinctive forms in the future? These and other questions are addressed in light of classical and contemporary theory and research.

**SOC 210 Social Problems**
Spring. 3 credits. D. Heckathom.
Course description is to be announced.

**SOC 215 Organizations: An Introduction (also R SOC 215)**
Fall. 3 credits. S. Han.
This is an introductory course in the study of organizations. We will start by taking a look at various examples of organizing, including a street gang in a Boston neighborhood, a minority community, industrial corporations, modern university and Valley and Route 128, and more. Hence, a sampler. These brief glimpses serve as exercises in looking behind and beyond diverse rhetoric for common patterns in organizational phenomena. The focus is to supplement research scholarship, not the training of managers. Nonetheless, the analytical skills you will acquire are applicable to work in firms, government agencies, and nonprofit organizations.

**SOC 217 Embedded Markets**
Spring. 3 credits. S. Han.
This is a course designed for a wide range of students who are generally interested in organization perspectives on markets and businesses. The primary focus of the course is on modes of organizing. In particular, we will look at the economic actions played out in social settings. Basic conceptual frameworks will be provided. Yet the course will extensively use, and ask you to come up with, contemporary and local problems to illustrate the core issues.

**SOC 220 Culture and Conflict in Organizations**
Spring. 3 credits. P. Becker.
How do the organizations we belong to shape us? What is organizational identity and how does it come about? How do cultural beliefs shape organizations? What kinds of organizations strike us as legitimate and effective, and why? Organizations may be goal-directed problem-solvers, but they're also locations for storing and transmitting social facts, like the hierarchical relations among groups, and powerful ideas, including moral codes. Organizations may seem to evolve naturally, but are often shaped by internal conflicts or powerful outsiders. The first part of this course will examine theories of organizational culture and power, the second part will consist of case discussions of organizations, businesses, religious denominations, little league teams, and social movement organizations.

**SOC 222 Social Policy and Organization in Health, Education, and Welfare**
D. Strang.
Introduces the development of three central kinds of social policy: those concerned with delivering medical care, schooling the young, and providing resources for the economically vulnerable. The course treats the historical development of large-scale public programs, regulatory systems, or attempts to stimulate provide action; political struggles over social rights and the allocation of resources; and the organization and carrying out of public policy. The focus is on American policy, but with considerable comparative attention to the health, education, and welfare programs of other nations.

**SOC 250 Religion and Public Life (also RELST 249)**
P. Becker.
This course explores how religion provides a basis for moral critique, political mobilization, and social identity in a modern society. The first part introduces basic issues—definitions of religion, the sociological approach to the study of religion, religion and modernity. In the main body of the course, we will read studies of specific religious groups and organizations in the contemporary United States—examining such questions as: "How does religion provide a basis for gender identity and gender relations? What do religious groups and discourses contribute to public debate on issues ranging from economic justice to abortion? "How do religious leaders mobilize citizens for social action in their communities?"

**SOC 265 Latinos in the U.S. (also LSP 201 and R SOC 265)**
Spring. 3 credits (4-credit option available). H. Velez.
Exploration and analysis of the Hispanic experience in the United States. An examination of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, the economic problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

**SOC 281 Contemporary Social Issues**
This course uses contemporary social issues to introduce students to sociological reasoning, explanation, and analysis. Topics include race, gender, and performance differences in face-to-face groups; gender and double standards; the origins of economic inequality; and crime and deviance. Students will complete guided research problems that require the analysis of existing data. Classroom instruction will give students all the skills necessary to complete the research exercises.

**SOC 290 Social Psychology of Interpersonal Relations**
The focus of this course is on the relationship between the individual and the social group. It will examine the way in which the individual shapes "society," and in turn, how society influences individual behavior. Topics include formation of self, influence and conformity, and the emergence of racial and gender differences in status and power.

**Methods and Statistics Courses**

**SOC 293 Inequality, Diversity and Justice (also City and Regional Planning 293, Government 293, Philosophy 193, Sociology 293)**
Fall. 4 credits. No prerequisites: intended for freshmen and sophomores. R. Miller.
An interdisciplinary discussion of the nature and moral significance of social inequality, diversity and poverty and of the search for just responses to them. How unequal are economic opportunities? What are the causes of poverty? To what extent can we reduce poverty? How do poverty and social stratification create and serve as the basis for differential power? How can we address issues of poverty and inequality? How can the state address economic issues? What are the major theories of poverty? What are the causes of poverty? What are the major theories of poverty? What do greater equality and a demand of justice? Are traditional welfare programs an appropriate response to poverty? What special significance have race and gender as sources of inequality? Do they have special remedial and affirmative action? How should governments deal with
religious diversity and other differences in ultimate values? For example, should abortion statutes be neutral toward rival views of the importance of potential human life? What are the causes of worldwide inequality? To what extent do people in per-capita rich countries have a duty to help the foreign poor? Moral argument, investigations of social causes and legal reasoning interact in the search for answers to these questions. To provide these resources, the course will be taught by leading faculty researchers in philosophy, political theory, the social sciences and law.

SOC 301 Evaluating Statistical Evidence
Spring. 3 credits. M. Clarkberg.
A first course in statistical evidence in the social sciences, with emphasis on statistical inference and multiple regression models. Theory is supplemented with numerous applications.

SOC 303 Design and Measurement
Spring. 4 credits. Prerequisite: a course in sociology. S. Caldwell.
Foundations of sociological analysis; issues arising from using data sources; the quality of our primary data; methods of its collection; research designs in wide use and their limitations; pragmatic considerations in doing research on humans, organizations, communities, and nations.

Intermediate Courses

SOC 309 The Sociology of Marriage (also SOC 509)
Spring. 3 credits. M. Clarkberg.
Contemporary debate on the nature of the family in the U.S. often assumes a simplistic decay of the "traditional marriage." This course unpacks the myths and facts that undergird this model. We will overview the historical patterns of marriage in the United States, examine data on contemporary union formation and dissolution and their consequences, and explore various theoretical models of marriage and its decline.

SOC 310 Solidarity and Social Control
What is the most important group that you belong to? What makes it important? What holds the group together, and how might it fail apart? How does the group recruit new members? Select leaders? Make and enforce rules? Do some members end up doing most of the work while others get a free ride? We will explore these questions from an interdisciplinary perspective, drawing on sociobiology, economics, and social psychology, as we apply alternative theories of group solidarity to a series of case studies, such as urban gangs, spiritual communes, the civil rights movement, modern businesses, teams, work groups, and college fraternities.

SOC 313 Social Networks and Social Structure (also SOC 513)
A critical survey of theories and techniques of structural analysis in sociology, centering on the usefulness of social network analysis in providing integration of studies at different levels of generality. Applications in the areas of the sociology of organizations, community studies, social stratification, and dependence relations emphasize on the mutual relevance of theories and operational research procedures.

SOC 315 Contemporary Business Organization
Fall. 4 credits. D. Strang.
Corporate America appears constantly in the throes of rapid change. In recent years, demographic change and downsizing has restructured the face of management, breaking the implicit social contracts many employees thought they enjoyed. Large bureaucratic organizations have declined relative to small networked firms, while at the same time mergers and acquisitions consolidate operations in many industries. Japanese frameworks like total quality management have become American business movements. This course examines what is new and not so new in contemporary American business.

SOC 322 Organizations and Social Inequality (also ILR 325)
Spring. 3 credits. P. Tolbert.
For course description, see ILR 325.

SOC 324 Environment and Society (also STAS 324 and RSOC 324)
Spring. 3 credits. M. Pfeffer.
For course description, see RSOC 324.

SOC 326 Social Policy (also SOC 526)
Fall. 4 credits. S. B. Caldwell.
The dramatic growth of the policy research sector as an institutional and intellectual force signals a changing relationship of social science to social policy in the United States. With an eye on that relationship, this course examines the development of social policy in selected areas, among them welfare, poverty, housing, crime, and health. The policy research sector itself—people, values, and institutions—is also surveyed.

SOC 333 Primate Societies
Spring. 3 credits. R. Grannis.
All primates (including humans) share a common social and cultural, as well as biological, heritage which was bequeathed to us by our common ancestors. This shared inheritance is even more pronounced between humans and their closest non-human relatives, chimpanzees and gorillas. This course will survey the social behaviors and cultural forms of our primate cousins with a special focus on baboons, chimpanzees, and gorillas. We will begin by reviewing the diversity of primate species and their societies. We will then look at primate socioecology including demography, hunting and gathering, and kinship. Next, we will examine the politics, economics, communication, and culture of some of our more closely related primate cousins. In addition to sharing a common past, all primates (except for some recent humans) are hunter-gatherers with similar biological capacities and needs who have solved similar socioecological problems. We will end the course by considering the implications of these findings for our lives as human primates.

SOC 336 Segregation
Spring. 3 credits. R. Grannis.
Over seven decades ago, Robert Park noted that "Physical distances frequently are the indices of social distance." As we near the beginning of a new millennium, very little has changed. Segregation may have disappeared from our public discourse, but it is a very present reality in our cities. This course will survey residential segregation by asking some very basic questions: What does it mean to be segregated? How has segregation been different in different times and places? What are the consequences of segregation? Why does segregation occur? How can illegal segregation persist? What can be done about segregation?

SOC 340 Health, Behavior, and Health Policy
Spring. 3 credits. S. B. Caldwell.
This course examines the social contexts of physical and mental health, illness and medical care; its purpose is to explore the contributions of social science to health promotion and health policy. Topics include: social context of health, disease and illness; social organization of health services; use of health service; effectiveness of health service use; health promotion and disease prevention, and national health care policies.

SOC 341 Modern Euro Society and Politics (also GOVT 341)
Fall. 3 credits. J. Portusson and D. Schirmer.
For course description, see GOVT 341.

[SOC 350 Comparative Revolutions Not offered 1999-2000. For description, see GOVT 350.]

SOC 353 Knowledge and Society
Spring. 3 credits. C. Leuenberger.
This course will focus on the historical evolution of the sociology of knowledge as a theoretical paradigm across several research fields. We will examine the phenomenological origins of the sociology of knowledge and many of its central texts. We will study how it has been applied to such areas as personhood, interaction, religion, identity and the emotions. We will also consider epistemological questions that arise and will cover various theoretical and empirical approaches which have been influenced by the sociology of knowledge such as ethnomethodology, conversation analysis and the sociology of science and technology.

In what ways, if any, do laws and legal institutions make a difference to people who have disputes? How do laws come to be a modern profession? How do business organizations deal with legal ambiguity in constructing symbols of compliance with laws? How do networks of interpretive communities structure the authority of law? By exploring selected topics such as these, we seek to understand the distinctive contributions of sociology to the study of law and the social order.]

SOC 356 Law in Society (also SOC 556)
Fall. 4 credits. W. Burkard.
The phrase "law and society" misleadingly suggests that we are speaking of two discrete entities: 'law' and 'society'. But law is itself part of society, its basic processes are social processes, and it contains within its own internal workings social dimensions worthy of study by the sociologist. In this course we will examine law in society. The classical sociological models of law—those of Marx, Weber and Durkheim—are well-represented. The works of several significant American and European critical legal theorists—those of the American Legal Realists, the Frankfurt School, Michel Foucault, Roberto Unger, Duncan Kennedy, and Jurgen Habermas—are also well-represented, not only to facilitate an understanding of the bases for
the attacks on the liberal Rule of Law, but also to facilitate an understanding of the relationship between law and politics and the potential for utilizing the Rule of Law through democracy. The major themes in "classical" and contemporary legal anthropology—e.g., hegemony v. resistance, rule-centered v. processual v. interpretive paradigms—are reviewed. We also consider the extent to which the various perspectives on law in society have been appropriated internationally.

[**SOC 358 Modes of Institutional Analysis** (also **SOC 558**)]
D. Straub.

Much social theory treats individual behavior as occurring within and shaped by "institutions." For example, discussions of American health care policy emphasize not only the preferences of physicians, businesses, and consumers, but also the institutional structure of American government that provides multiple veto points and makes broad cross-class coalitions difficult to build. This course will examine the main types of institutional analysis active in contemporary social science.

[**SOC 370 Careers (also SOC 570)**]
By examining various career paths, we will consider the implications of career as a continuous process or as a sequence of positions. We will explore the differences and similarities among different career paths and lay out the patterns and structures of the career formation from a sociological point of view. We will also discuss the settings in which the career development takes place, giving some comparative attention to the ways of organizing careers in other societies.

[**SOC 371 Comparative Social Stratification** (also **RSOC 370**)]
Fall. 3 credits. S. Feldman.
For course description, see RSOC 370.

[**SOC 373 Organizational Behavior**]
Simulations
Fall. 3 credits. Prerequisites: ILROB 170 and 171 or equivalent. Limited enrollment. R. Stern.
See ILROB 373 for course description.

[**SOC 375 Classical Theory**]
Spring. 3 credits. J. E. S. Moore.
Introduces students to major macro-sociological paradigms and encourages them to participate in "cross-paradigm" debates. The three main theories of sociology (i.e., Marx, Durkheim, and Weber) are compared with respect to their approaches to the social sciences, their views on human history, their conceptions of capitalist society, and their ideas on social change. The assigned reading focuses on the original writings of these theorists, while the lectures provide the requisite socio-historical context.

[**SOC 380 Gender, Ideology, and Culture** (also **WOMNS 380**)]
P. Becker.
This course will explore representations of women in popular culture and, ideology, and look at how women "read" popular culture. The aim of the course is to enable students to think critically and analyze the effects of ideological representa-

Advanced Courses
The following courses are intended for advanced undergraduates with substantial preparation as well as for graduate students in sociology and related disciplines. The normal prerequisite for all 400-level courses is one introductory course plus 301 (or an equivalent statistics course). Students who are not sure whether their background is sufficient for a particular course should consult the professor in charge.

[**SOC 402 Doctors and Lawyers**]
Spring. 4 credits. W. Burland.
This seminar will examine sociological and historical materials on the education and training of physicians and attorneys and the practice of medicine and law. Students will utilize these materials to develop projects, e.g., the effects of managed care on medical practice, the role of clinical training in legal education, and will present their works-in-progress during the last half of the course. This course may interest upper-level students considering careers as physicians or attorneys, as well as potential sociologists of medicine, law, or the professions.

[**SOC 404 Economy and Family—Interrelationships Over the Life Course** (also **SOC 504**)]
Fall. 4 credits. M. C. Berg.
While sociologists have often argued that the modern family has shed most of its "productive" functions, economic models have never been more central in the study of the family. This course explores the emerging dialogue between economists and family scholars along two related dimensions. First, we examine the [reciprocal] relationship between the structure of the economy (including income, careers, and workplace characteristics and policies) and family structure and outcomes. Second, we weigh the contribution of economic or "rational actor" models to the study of the family's behaviors. These related economic processes will be used to examine marriage and divorce, time use and the division of labor within families, population growth, and the dynamics of health and aging.

[**SOC 408 Qualitative Methods** (also **SOC 508**)]
Spring. 4 credits. P. Becker.
This course is designed to introduce students to qualitative research. We will focus on interviewing, document review, and participant observation, although we will also talk about reliability, validity, ethics, and research involvement, issues that are applicable to qualitative research more broadly. Each student will design and carry out a semester-length research project, keep a field journal, and do a final research report.

[**SOC 421 Regulating the Corporation** (also **ILROB 421**)]
Fall. 3 credits. P. Cotter: permission of the instructor. P. Tolbert.
See ILROB 421 for course description.

[**SOC 427 The Professions: Organization and Control** (also **ILROB 427**)]
Fall. 3 credits. P. Becker: permission of the instructor. P. Tolbert.
See ILROB 427 for course description.

[**SOC 429 Culture and Agency** (also **SOC 529**)]
P. Becker.
This course will look at the development of sociological theory on questions of culture and agency. Starting with various reflection or materialist approaches to culture that decenter agency, we will then follow the development of theories that explicitly link culture to actors and events in an attempt to account for both social reproduction and social change. The readings will cover a broad time span and a variety of intellectual approaches, including critical theory and cultural studies, but will center on the sociology of culture.

[**SOC 430 Social Organization of Economic Action** (also **SOC 530**)]
Fall. 4 credits. S. Han.
See SOC 530 for course description.

[**SOC 437 Social Demography** (also **RSOC 438**)]
Spring. 4 credits. S. Han.
See SOC 530 for course description.

[**SOC 438 Immigration and Ethnic Identity**]
V. G. Nee.
Immigration has been a central process in the peopling of American society. The early immigration to the United States involved primarily the migration and settlement of European national groups. Since 1965, the mix of immigration has shifted to include increasing diversity of ethnic groups, especially from Latin America and Asia. As American society moves into an era of increasing ethnic diversity, the issue of ethnic boundaries and identity becomes increasingly complex and problematic. This course seeks to examine the causes of international migration, the dynamics of immigrant incorporation into American society, and the making of new ethnic groups and identities.

[**SOC 444 Contemporary Research in Social Structure**]
R. L. Breiger.
Stratification and mobility as paired concepts, requiring mutual articulation. The interplay of structure (occupational groups, labor markets, organizational demographics, social classes)
and process (tracking, career trajectories, socioeconomic attainment). Recently formulated log-linear models of mobility and structure provide a central focus of the course.

**SOC 457 Health and Social Behavior (also HDFS 457)**
Fall. 3 credits. Prerequisites: HDFS 150, HSS 201, Sociology 101, or Rural Sociology 101 and a course in statistics. Letter grades only. E. Wethington. See HDFS 457 for course description.

**SOC 480/580 Identity and Interest In Collective Action**
Fall. 4 credits. M. Macy. This seminar examines the problem of collective action from alternative theoretical perspectives: on centered on shared interests, the other on common identities. The former claims that groups are held together because the members are interdependent and thus benefit from cooperating in a common endeavor. Others argue that effective mobilization may depend on affective ties among participants who share a salient demarcation line and a purpose to resolve, and its possible resolution, through an examination of formal theoretical studies (especially computer simulation) as well as empirical research using experimentation and comparative case analyses. Key concepts addressed in the social dilemmas (and game-theoretic analysis), the free-rider problem, rational choice theory, formal and informal social control, social identity theory, and the role of networks and institutions as mechanisms for reconciling the tension between individual self-interest and collective obligations.

**SOC 491 Independent Study**
Fall or spring. 1–4 credits. For undergraduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure agreement of a faculty member to serve as supervisor for the project throughout the term. Graduate students should enroll in 891-892.

**SOC 495 Honors Research**
Fall or spring. 4 credits. Limited to sociology majors in their senior year. Prerequisite: permission of instructor.

**SOC 496 Honors Thesis: Senior Year**
Fall or spring. 4 credits. Prerequisite: Sociology 495.

**Graduate Core Courses**
These courses are primarily for graduate students in sociology but may be taken by other graduate students with permission of the instructor. Graduate students in sociology will normally take each of the five courses listed below, but with the concurrence of their special committees other arrangements may be made.

**SOC 504 Economy and Family (also SOC 404)**
Fall. 4 credits. M. Clarkberg. For course description, see SOC 404.

**SOC 505 Research Methods I: Logic of Social Inference**
Fall. 4 credits. Prerequisite: a first course in statistics and probability. M. Clarkberg. This course is an introduction to techniques of social inference. We will cover research methods, sources of evidence, model design, and questions of empirical validity.

**SOC 506 Research Methods in Sociology II**
Spring. 4 credits. Prerequisite: Sociology 505 or equivalent. D. Grusky. Introduction to the general linear model for discrete and continuous variables. Discussion of principles of estimation, model selection, coefficient interpretation, specification error, and fit assessment. The linear regression model is covered in depth and then generalized to the cases of logistic regression, probit, log-linear, log-multiplicative, latent class, and related models. Although the statistical theory underlying these models is reviewed, issues of interpretation and estimation typically take precedence. Emphasis is accordingly placed on the analytic and stylistic issues that arise in writing research papers based on the general linear model.

**SOC 507 Research Methods in Sociology III**
Fall. 4 credits. Prerequisite: Sociology 506. D. Strang. Models and methods for the quantitative and formal analysis of social dynamics. The course focuses on event history analysis in the case of discrete outcomes and pooled cross-sectional and time-series analysis in the case of continuous outcomes.

**Graduate Seminars**
These seminars are primarily for graduate students but may be taken by qualified advanced undergraduates who have permission of the instructor. Which seminars are to be offered any term is determined in part by the interests of the students, but it is unlikely that any seminar will be offered more frequently than every other year. The list below indicates seminars that are likely to be offered, but others may be added and some may be deleted. Students should check with the department before each term.

**SOC 508 Qualitative Methods (also SOC 408)**
Spring. 4 credits. P. Becker. This course is designed to introduce students to qualitative research. We will focus on interviewing, document review, and participant observation, although we will also talk about validity, reliability, ethics, and research-involvement, issues that are applicable to qualitative research more broadly. Each student will design and carry out a semester-length research project, keep a field journal, and do a final research report.

**SOC 509 The Sociology of Marriage (also SOC 309)**
Spring. 3 credits. M. Clarkberg. For course description, see SOC 309.

**SOC 513 Social Networks and Social Structure (also SOC 313)**

**SOC 526 Social Policy (also SOC 326)**
Fall. 4 credits. S. B. Caldwell.

**SOC 529 Culture and Agency (also SOC 429)**

**SOC 530 Social Organization of Economic Action (also SOC 430)**
Spring. 4 credits. S. Han. The issue of organizational boundary has been a central concern for both organizational sociology and economic sociology. The seminar approaches the issue, although it covers many other relevant literatures, mainly by playing two lines of argument against each other: transaction cost economics and transfer pricing problem. Meta-analytic techniques are also introduced, which are to be used for the final team project reviewing the empirical research on vertical integration.

**SOC 556 Law in Society (also SOC 356)**
Fall. 4 credits. W. Burkard. For course description, see SOC 556.

**SOC 558 Modes of Institutional Analysis (also SOC 358)**

**SOC 575 Seminar in Institutions and Rationality**
2 credits. Not offered 1999–2000. V. Nee. This year-long seminar examines the theoretical logic and assumptions of the new institutionalism in sociology and other social sciences. Understanding the part played by informal constraints of social norms and networks and by formal institutional arrangements (i.e., contracts, property rights, laws, regulations and the state) encompass the domain of study. The seminar will focus on comparative analysis and case studies illuminating and explaining the part played by institutions in structuring the economic and social transactions of society and specifying the causal mechanisms shaping path dependent institutional change.

**SOC 580 Simulating Social Dilemmas (also SOC 480)**
Fall. 4 credits. M. Macy.
Soc 552 Transitions to Market Economies in China and Eastern Europe
Spring. 4 credits. V. Nee.
This course examines the problems and prospects of transitions to markets in China and Eastern Europe. It introduces concepts for understanding the state socialist economy that is being transformed and analyzes important social and economic developments since 1988. Topics include privatization, joint ventures, new capital markets, entrepreneurship, and labor relations in these changing economies.

Soc 591 Special Seminars in Sociology
Fall and spring. 2-4 credits.
These graduate seminars will be offered irregularly. Topics, credit, and instructors will vary from semester to semester. Students should look at the sociology department bulletin board at the beginning of each semester for possible offerings.

Soc 606-607 Sociology Colloquium
Fall and spring. No credit. Required of all sociology graduate students.
A series of talks representative of current research interests in sociology, given by distinguished visitors and faculty members.

Soc 608 Proseminar in Sociology
Fall. One credit. Enrollment restricted to first-semester sociology graduate students. Discussions on the current state of sociology and on the research interests of the members of the field, given by members of the field.

[Soc 660 Social Movements]
For description, see GOVT 660.

Soc 691 Independent Study
Fall or spring. 2-4 credits. Prerequisite: graduate status and permission of a faculty member willing to supervise the project.
Staff.
For graduates who wish to obtain research experience or to do extensive reading on a special topic. Permission to enroll for independent study will be granted only to students who present an acceptable prospectus and secure agreement of a faculty member to serve as supervisor for the project throughout the term.

Soc 707 Literacy, Social Organization, Consciousness, and the Information Society [also ENGL 707, LING 707, PSYCH 707, WRIT 707]
Fall. 5 credits. Letter or S-U.
C. Bazerman, visiting professor.
This course will investigate the literate practices of contemporary academic, disciplinary, and professional cultures, which are deeply implicated in contemporary forms of social organization and consciousness. We will examine the historical emergence and elaboration of literate practices and the implications for contemporary society moving from print to electronic media. This investigation will start with considering the interaction of literacy and social organization at earlier moments and will then consider some relevant theory to expose the ways text, social organization, and consciousness interact. We will then return to the rise and organization of academic, disciplinary, professional, and information culture. Each participant in the seminar will be responsible for developing a project examining socio-cognitive discursive practices within a classroom, disciplinary, professional, or cyber-information domain.

Soc 725 Analysis of Published Research in Organizational Behavior (also ILROB 725)
Fall. P. Tolbert.
For course description, see ILR 725.

Soc 891–892 Graduate Research
891, fall; 892, spring. Up to 4 credits each term, to be arranged. Prerequisite: graduate status and permission of a faculty member willing to supervise the project.

Soc 895–896 Thesis Research
895, fall; 896, spring. Up to 6 credits each term, to be arranged. Prerequisite: permission of thesis director.

Theatre, Film & Dance
D. Bathrick, chair; R. Archer, S. Brookhouse, J. Chu, S. Cole (on leave spring 2000), D. Feldshuh, A. Fogelsanger, (coordinator, dance program); D. Fredericksen, (director, film studies); J. E. Gainor, (director, graduate studies, on leave fall 1999); K. Goetz (on leave spring 2000), D. Hall, C. Hatcher, E. Intemann, J. Johnson, M. Kovar, B. Levitt, P. Lillard, J. Morgenroth, C. Orr, Brookhouse, M. Rivchin, R. Schneider, J. Self, B. Suber (on leave spring 2000), A. Van Dyke, (director, undergraduate studies); A. Villarejo
Through its courses and production laboratories, the department provides students with a wide range of opportunities in theatre, film, and dance. It offers a theatre arts major with concentration in theatre or film and a major in dance. These majors educate students in accordance with the general liberal arts ethic of the college. The programs in dance and film and the advanced undergraduate theatre program give some measure of professional preparation in those arts as well. The department encourages academic and studio participation by students from all disciplines and also provides the Cornell community with an opportunity to take part in its productions on an extracurricular basis.

Theatre Arts Major

Theatre Concentration
The theatre concentration offers studies in the history of theatre, dramatic theory and criticism, playwriting, acting, directing, design/technology, and stage management. Students interested in the Theatre Arts major should consult with Alison Van Dyke (Director of Undergraduate Studies, Theatre, Film & Dance).

Course requirements for theatre concentration:

1) Thetr 240 and Thetr 241 (two-semester introduction to theatre) 8
Thetr 250 Introduction to Theatre Design and Technology 4
Thetr 280 Introduction to Acting 3

2) Four laboratory courses distributed as follows:

Thetr 151 Production Lab I 1–3
Thetr 153, Thetr 253, or Thetr 353 Stage Management Lab I, II, or III 1–3
Thetr 155 Rehearsal and Performance or Thetr 151 in a different area 1–3
Thetr 251 or Thetr 351 Production Lab II or III 1–4

3) Four courses in the area of Theatre Studies (see Theatre Studies section of theatre courses) chosen in the following manner:

one course must be at 300 level
one course must be at 400 level
two additional courses at the 300 or above level
one of the four courses must be pre-twentieth century.

4) Three courses (at least 9 credits) in other Theatre courses chosen in consultation with the faculty advisor. Course taken to qualify for admission to the Advanced Undergraduate Theatre Program (described below) may also be used to fulfill this requirement.

5) Courses in which a student receives a grade below "C" cannot be used to fulfill the requirements for a Theatre Arts major.

Honors
The Theatre Arts honors program is for majors who have demonstrated exceptional ability in the major and who seek an opportunity to explore branches of their subject not represented in the regular curriculum or to gain experience in original research. To be part of the honors program the student must maintain a GPA of 3.5 in classes for the theatre major and an average of 3.0 in all courses. Students must consult with their advisers in the spring of their junior year in order to enroll in the honors programs.

The Advanced Undergraduate Theatre Program
The department offers advanced study in directing, playwriting, design/technology and
stage management to students who qualify on the basis of outstanding achievement in course work. Admission to the AUTP is by invitation of the area faculty supervisor and the completion of a recommended "track" of courses or equivalent experience. (For recommended course of study please see listing of courses at end of departmental listings.) Approval process will include a portfolio review and/or interview. The program provides students with intensive study in theatre as well as the opportunity to collaborate with professional faculty and guest artists.

Film
The study of film began in this department in the 1930s and continues to be based here. In the interim years, however, it has also spread into a significant number of other departments in the college: Africana studies, anthropology, Asian studies, comparative literature, English, German studies, history, psychology, romance studies and women's studies. This proliferation of courses has been accompanied by a comparable proliferation of perspectives and faculty concerns, e.g., the relationship of national cinemas to national literatures and specific cultures, film's relationships to myth and ideology, the use of film as historical evidence, film's efficacy as a rhetorical medium, and film's contribution to perennial issues in the study of the arts, and studies in cognition. In addition, courses in film production and the history and theory of film as an art are centered in this department. This richness of courses and perspectives is matched by the ways in which students may make film the focus of their undergraduate studies. The four ways currently being used are as follows: 1) concentrating on film within the Department of Theatre, Film & Dance; 2) constructing an individually tailored Independent Major in film (including the possibility of placing film in tandem with another medium or discipline); 3) focusing on film as a College Scholar; and 4) concentrating in Visual Studies. Students interested in option 4 should consult Marilyn Rivchin (Theatre, Film & Dance). Students interested in options 2 or 3 should consult Don Fredericksen (Theatre, Film & Dance) and Lynne Abel (director, College Scholar and Independent Major programs). Students interested in the first option should consult Don Fredericksen (director, Film Studies; Theatre, Film & Dance).

Film Concentration Requirements
The department's film concentration requires a total of 50 credits in film and related courses. Students should note that a number of film courses—including two required "core" courses: Theatre Arts 375 and 376—are offered in alternating years, during the fall semester. This means that students cannot fulfill the requirements for the major in less than two years, and that they should plan accordingly, in consultation with their major adviser. In particular, students must plan to be in residence at Cornell during both their junior and senior year fall semesters. Within the "core" required courses, Theatre Arts 274, Introduction to Film Analysis, should be taken during the sophomore year.

Majors wishing to utilize the production courses in a substantial manner must plan carefully and work within certain limits. These courses are: Theatre Arts 277, 377, 383, 413, 477, 493 and 653. Enrollment in each of these courses is limited by the nature of the work and by facilities. Enrollment in Theatre Arts 477 and 493 depends upon the quality of previous work in Theatre Arts 277, 377, 383 and/or 413; enrollment is not guaranteed. Majors without a strong interest in production can complete the production requirement with one course: Theatre Arts 277. Majors with a strong interest in production should begin instead with Theatre Arts 377, after they have taken Theatre Arts 274 in their sophomore year. The total credits in production courses cannot exceed twenty hours; this limit is strictly enforced.

1. A core of four film courses.
   [THETR 274] Introduction to Film Analysis
   [THETR 375] History and Theory of Commercial Narrative Film
   [THETR 376] History and Theory of Documentary and Experimental Film
   [THETR 277] Video Production I
   (offered alternate spring semesters, and summers; not offered 1999-2000)
   OR
   [THETR 377] Fundamentals of 16mm Filmmaking
   3

2. One of the following three courses:
   [THETR 250] Fundamentals of Theatre Design/Technology
   [THETR 280] Introduction to Acting
   [THETR 398] Directing I
   (prerequisite: permission)
   3

3. Four courses (15-16 credits) in film (offered by Theatre, Film & Dance as below, or by other departments (with consent of adviser):
   [THETR 264] Hitchcock
   4
   [THETR 275] Introduction to Film Theory
   (offered alternate spring semesters; not offered 1999-2000)
   [THETR 277] Video Production I
   (offered alternate spring semesters; not offered 1999-2000)
   [THETR 291] Filming Other Cultures
   [THETR 369] Studies in Film Analysis
   [THETR 378] Soviet Film of 20s and French Film of 60s
   (offered alternate spring semesters not offered 1999-2000)
   [THETR 379] Modern Documentary Film
   (offered alternate spring semesters; offered 1999-2000)
   [THETR 383] Screenwriting
   [THETR 386] Third Cinema
   (Not alternate years; offered 1999-2000)
   [THETR 391] Media Arts Studio I
   3
   [THETR 392] Media Arts Studio II
   3
   [THETR 395] Video: Art, Theory, Politics
   4

Honors
Students who have maintained a GPA of 3.5 in their film concentration courses and an average of 3.0 in all courses may elect to work for honors in film during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in film.

The Advanced Undergraduate Film Program
The department offers advanced study in filmmaking to students who qualify on the basis of outstanding achievement in film studies and film production courses. Acceptance to the AUFP and admission to the advanced film production course (THETR 493) will be determined by a committee of film faculty in December of each year, based on applications from students who have a proposal (script or treatment) for a film or video project. Up to four of these students will also be selected to receive the Melville Shavelson Award to help fund their advanced film projects.

Film Study Abroad
The College of Arts and Sciences, through this department and in consort with a number of other colleges and universities, offers up to a full year of study at the Inter-University Center for Film and Critical Studies in Paris, France.
The center's program is theoretical, critical, and historical. It is most useful to students pursuing a major in film studies and serves as an intensive supplement to their Cornell film courses. Fluency in French is required, and Theatre Arts 274 or 275 and 375 are prerequisites. Inquiries should be addressed to Professor Frederic Jensen, Cornell's liaison with the center.

The Dance Program

The dance program offers courses in dance technique, improvisation, composition, performance, anatomical analysis of movement, and the history, theory, and criticism of dance. Technique courses include modern dance at four levels and ballet at three levels. Other dance forms, such as historical dances, African, jazz and ballroom dance, are offered on a rotating basis. Courses in African, jazz and ballroom dance, taken in sequence, may be considered dance electives. Students may also satisfy the physical analysis of dance requirement by taking dance technique classes in the dance program. The schedule for all dance technique classes is available in the main office of the Center for Theatre Arts. Students taking technique for academic credit must also register through their own colleges.

The faculty offer rehearsal and performance workshops in which they choreograph and rehearse original dances, performed in public concert. Admission to rehearsal and performance classes is by audition. Students may receive one academic credit (S-U grades only) when performing in student-faculty concerts by registering for THETR 155.

The Dance Major

To be admitted to the major, students must have completed two technique courses in modern dance or ballet at level II or above, and THETR 210 (Beginning Dance Composition). It is recommended that THETR 201 (Dance Improvisation), THETR 250 (Fundamentals of Theatre Design and Technology) and Music 105 (Introduction to Music Theory) be taken before the junior year. It is also strongly recommended, but not required, that dance majors take THETR 233 (Explorations in Movement and Performance). The following requirements are expected of the major.

Prerequisites for the Major:

THETR 210 Beginning Dance Composition and Music Resources

Two technique courses in modern dance or ballet at level II or above

Requirements for the Major: Credits

Music 105 Introduction to Music Theory (or substitute at the appropriate level) 3

ONE course in historical dance, jazz, a non-western form, folk dance, or ballet dance 0-3

Two semesters each of ballet and modern dance (in addition to the prerequisite) 4

THETR 155 Rehearsal and Performance 1

THETR 201 Dance Improvisation 3

THETR 250 Fundamentals of Design and Technology 4

THETR 310-311 Intermediate Dance Composition 8

THETR 312 Physical Analysis of Movement 3

THETR 314-315 Western Dance History 8

THETR 410 Advanced Dance Composition 4

THETR 418 Seminar in History of Dance (or other 400-level academic dance course) 4

THETR 493 Senior Project 4

Total 40-49

Students will be expected to perform in at least two concerts and to present at least two of their own dances, in addition to the senior project.

Honor

Students who have maintained a GPA of 3.5 in classes for the dance major and an average of 3.0 in all courses may elect to work for honors in dance during their senior year. They must consult with their adviser in the spring of their junior year about the honors program in dance.

Department Courses:

See individual sections for: Freshman Writing Seminars; General Survey Courses; Theatre Studies; Acting; Directing; Playwriting; Design, Technology; Stage Management; Independent Study, Internships and Honors; Film; Dance.

First-Year Writing Seminars

THETR 147 FWS Phantasms and Philes

Fall. 3 credits. T. Rhys. What is it about the supernatural that appeals to audiences? Is it the visual spectacle, or something deeper? What happens when we put our darkest fears on stage? This course explores these questions by juxtaposing a present-day drama—Fox Television’s The X-Files—with the plays of the British gothic period.

THETR 152 FWS Smoking Sirens:

Fall and spring. 3 credits. H. Young Jr. This course explores the development of the ‘femme fatale’ in popular culture. It uses novels, films, and plays in conjunction with relevant theoretical texts to chronicle her rise over the past seventy years. Specifically, this course studies the socio-political positioning of women in modern art, closely analyses gender construction and performances and probes into the issues of sexuality and sexual differences. Representative texts will include Double Indemnity, the play M Butterfly, and the films The Blue Angel, Jules et Jim, La Femme Nikita, and Basic Instinct. Writing assignments will include short first person narratives, play analyses, film reviews and a screenwriting exercise. Weekly film screenings will be required.

THETR 154 FWS Beyond Bruce Lee:

Fall. 3 credits. C. Concession. ‘Kung fu’ films feature Bruce Lee, Jackie Chan, and Jet Li will be viewed and discussed in terms of their impact domestically and internationally, and examined more deeply to explore their cultural and political significance. How do they define Chinese masculinity? How do they contribute to the effort to construct a narrative history for colonized Hong Kong? What do they reveal about Hong Kong’s relationship with mainland China? We will evaluate this in light of the recent return of HK to Chinese governance. Weekly film screenings will be required. Readings include background material in history and film theory, and both popular and scholarly articles on the films and relevant issues. Papers will include the above topics, as well as a movie review and brief scene script. Films include Dragon, Rumble in the Bronx, Once Upon a Time in China, Lethal Weapon 4 and others.

THETR 154 FWS Stages of Desiring

Fall and spring. 3 credits. D. Matson. Is gay theater its own art? Is theater a gay art? This course is a survey of American drama dealing with or written by lesbians, gays, bisexuals, and transgendered persons, or more simply, queers. Using Oscar Wilde’s The Importance of Being Earnest as our point of departure, we will work our way to the present, visiting such playwrights as Tennessee Williams, Edward Albee, Carol Churchill, Holly Hughes, and Larry Kramer before finishing out the course with Tony Kushner’s epic Angels in America. Through reaction papers, class discussion, and possibly even the writing of a one-act play, students will be expected to confront candidly questions of queerness and theater; need there be any distinction between queer theater and straight theater? and just what is it about the theater that offers queerness a sanctuary? These questions will inevitably lead us to issues of stereotyping, stigmatizing, performing, gender, and dressing in drag.

THETR 155 FWS Film, Fantasy, and the Bard

Fall and spring. 3 credits. E. Intemann. Today’s popular literature and films are often inspired by historical literary sources, and Shakespeare’s plays are especially rich in finding their way into current works. This course will examine Shakespeare, as realized in various forms of today’s film and popular literature. The class will explore King Lear and A Midsummer Night’s Dream as envisioned by Shakespeare and as reinterpreted in the modern film and fantasy literature genres. Although the writing assignments will be primarily critical essays, students will be given the opportunity to write some fiction. Issues discussed might include how content relates to form, be it literary or dramatic; how our modern sensibility affects our perception of the work; how themes are emphasized or de-emphasized depending on the historical and cultural biases of the audience; and how the appeal of Shakespeare may have taken with his source material compare to those currently taken with his works.
An introduction to theatrical production for the non-major. Students will develop a new critical perspective of the performing arts by examining the creation of theatre onstage and backstage through lectures, demonstrations, discussions with various faculty and staff at the Center for Theatre Arts, and by attending department productions. Some writing is required.

**THEATRE, FILM & DANCE 555**

### General Survey Courses

**THETR 230 Creating Theatre**
Spring. 3 credits. Limited to 25 students. D. Hall and faculty. An introduction to theatrical production for the non-major. Students will develop a new critical perspective of the performing arts by examining the creation of theatre onstage and backstage through lectures, demonstrations, discussions with various faculty and staff at the Center for Theatre Arts, and by attending department productions. Some writing is required.

**THETR 301 Mind and Memory: Explorations of Creativity in the Arts and Sciences (also English 301 and Music 372)**
Spring. 4 credits. Limited to 40 students. For description, see English 301.

**THETR 430 Introduction to Theatre Management**
This class is introductory to the profession of theatre management. The class will be a project-oriented study of components of the field, such as marketing, fundraising, contracts, organizational structures, personnel management, accounting, and box office.

### Theatre Studies Courses

**THETR 223 The Comic Theater (also Comparative Literature 223 and Classics 223)**
For description, see Classics 223.

**THETR 240 Introduction to World Theatre I**
Fall. 4 credits. R. Schneider.
A survey of the roots of theatrical representation around the world from ritual practice to classical Greek and Roman theatre as well as Indian, Chinese, Japanese, African, and native performance. A charting of major developments in the theatre—playwriting, acting, staging, architecture—through the 17th century.

**THETR 241 Introduction to World Theatre II**
Spring. 4 credits. R. Schneider.
A survey of the major developments and innovations in world theatre since 1642, exploring the evolution of naturalism, the birth of the director, as well as the emergence of the avant-garde in the West and its supposed demise today. This course will examine the impact of colonialism on theatre practices around the world.

**THETR 320 Queer Theatre (also English 352 and Women’s Studies 320)**
Spring. 4 credits. Limited to 20 students. J. E. Gainor and D. Matson.
What is Queer Theatre and did it exist before the politicization of Queer Identity? Starting with the Renaissance in England, we will examine dramatic, critical, historical and other writing as we pose questions about spectatorship, viability and professionalism. Evening film screenings will be required.

**THETR 322 Russian Drama and Theatre (also Russian Literature 332)**
Spring. 4 credits. S. Senderovich.
See Russian Literature 322 for description.

**THETR 332 Medieval and Renaissance Theatre (also Comparative Literature 332 and English)**
Spring. 4 credits. Prerequisites: THETR 240 or permission of instructor. Not offered 1999–2000. J. E. Gainor.
Besides the discussion of representative plays from these periods, this class may focus on questions such as the staging of medieval drama, the relationship between the church and the community, and the ways in which historians and critics have interpreted the Renaissance, especially in light of class, race, and gender on stage as well as in the audience.

**THETR 333 European Drama 1660-1900: Moliere to Ibsen (also English 335 and Comparative Literature 336)**
See English 335 for description.

**THETR 334 American Indians and Film (also Am. St. 330)**
Fall only. 4 credits. L. Black.
We will use documentaries, classic Westerns, comedies, modern-day commentaries on American Indians, and recent films made by American Indians (Smoke Signals, Imagining Indians) to explore constructions of Indians in film and the creations of Indian and non-Indian identities through film narrative.

**THETR 335 The Modern and Contemporary Theatre (also Comparative Literature 335)**
Fall. 4 credits. Prerequisites: THETR 240 or permission of instructor. Not offered 1999–2000. R. Schneider.
A study of the drama and its cultural contexts from the late nineteenth century to the present. This course will raise questions about modern as well as postmodern theories of performance and the role of theatre in society. It may also examine western style theatre in non-western settings.

**THETR 336 American Drama and Theatre (also English 336)**
A survey of American theatre from 1900–1960. Emphasis will be placed on the relationship among theatre, culture, and history.

**THETR 337 Contemporary American Theatre (also English 337)**
A survey of American drama and theatre post-1960. Particular emphasis will be placed on plays by women and dramatists of color to explore questions of identity and theatrical responses to contemporary American culture.

**THETR 339 Theories and Techniques of 20th Century Western Theatre**
Fall. 4 credits. Prerequisite: permission of instructor. Not offered 1999–2000. R. Schneider.
A look at Western performance across the 20th century emphasizing theatre theory and directing technique rather than drama. Beginning with symbolism, naturalism and the avant-garde we’ll move on to explore...
THETR 435 Special Topics: The Victorian and Edwardian Theatre (also English 422)
Fall. 4 credits. Limited to 15 students. Prerequisite: permission of instructor. Not offered 1999–2000. J. E. Gainor.

An in-depth exploration of theatre and drama in England from the mid-nineteenth through early twentieth centuries. Topics will include melodrama, the social problem play, the popular theatre, the conditions of theatrical production, and the impact of European theatre. Representative authors include Robertson, Pinero, Shaw, Wilde, Robins, Galsworthy, and St. John.

THETR 436 The Female Dramatic Tradition (also Women's Studies 433)

Is there a “female dramaturgy”? What is the female tradition in the theatre? The course will explore these questions through an investigation of texts by women dramatists, including Hotvitha, Aphra Behn, and Caryl Churchill, as well as theory by such critics as Sue Ellen Case and Jill Dolan.

THETR 438 East and West German Drama (also German Studies 438 and Theatre 648)

Major historical and textual developments in German theatre from the end of World War II to the present. Leading dramatists from West and East Germany, Switzerland, and Austria (Brecht, Friez, Durrenmatt, Weiss, Hochhuth, Muller, Braun, Kroetz, Handke, and others) will be treated in the light of the political events and aesthetic-dramaturgical traditions from which they emerge and with which they are taking issue.

THETR 439 Theatre of Commodity: Advertising, TV, and Performance (also Women's Studies 441/641)

This course will explore the employment of bodies and objects as representational emblems of value and desire in late capitalism. We will analyze the ways in which desire circulates through print advertising, television, and the avant-garde. We will examine socio-cultural constructions of the relationship between screen bodies and live bodies, especially as involves advertising and audience. We will explore conceptual and culturally inscribed spaces between notions of desire, fulfillment, deferral and value coding. Throughout, feminist analyses of gender construction and deployment in the realms of the market, popular culture and “high” art will frame our inquiry. Finally we will ask questions about the problematic of intervention into practices in art and popular culture relative to consumption and commodity aesthetics. The course will draw on Williamson, Marx, Benjamin, Freud, Irigaray, de Certeau, Bauchillard, Derrida, Goldman, McClintock, Borden, Friedan, Haug, Lee, Fiske, Goffman, Lears, Murray, Taylor, and others as well as numerous print advertisements, television texts, and performance artworks.

THETR 445 Text Analysis for Production: How to Get from the Text onto the Stage
Fall. 4 credits. Prerequisite: THETR 240 or THETR 281 or THETR 250 or THETR 298, and permission of instructor. Limited to 15 students. B. Levitt.

This course examines the play as the central, essential source for production decisions made by the actor, the director, the designer and the dramaturg. Students “present” their conclusions about the performance of studied texts through project work as either an actor, director, designer or dramaturg, as well as through two to three papers.

THETR 454 American Musical Theatre (also English 454)
Spring. 4 credits. Prerequisite: ENGL 272 or THETR 240 and 241 and ability to read music at the level of MUSIC 105. Not offered 1999–2000. S. McMillin.

See English 454 for description.

THETR 459 Contemporary British Drama (also English 459)

See English 459 for a complete description.

THETR 470 The Japanese Noh Theater and Modern Dramatists (also Asian Studies 470 and Comparative Literature 470)

For description, see Asian Studies 470.

THETR 471 Japanese Theatre (also Asian Studies 471)

See description, see Asian Studies 471.

THETR 600 Proseminar in Theatre Studies
Spring. 4 credits. Limited to Theatre Arts graduate students.

An introduction to the theory and methods involved in the study of the theatre. Attention will focus on pedagogy and the profession in Part I. Part II will explore current scholarly trends.

THETR 637 Seminar in Dramatic Theory (also Comparative Literature 638)
Fall. 4 credits. Prerequisite: permission of instructor. R. Schneider.

Topic varies each semester.

THETR 648 East and West German Drama: Post-1945 (also THETR 438 and German Studies 438)

THETR 660 Visual Ideology (also Comparative Literature 660 and German Studies 660)
Spring. 4 credits. G. Waite.

For description, see German Studies 660.

THETR 679 Bertolt Brecht in Context (also German Studies 679 and Comparative Literature 679)

See German Studies 679 for description.

THETR 703 Theorizing Film (also English 703 and French Lit 695)

See English 703 for description.

Acting

THETR 155 Rehearsal and Performance
Fall or spring. 1–2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the department's scheduled auditions. Students should add this course only after they have been assigned roles. S/U grades only.

THETR 205 Rehearsal Workshop
Fall or spring. 2 credits. Limited to 30 students. Prerequisites: participation in a particular department production; and by permission. Staff.

This course will enable students participating in a particular production to gain expertise and/or knowledge to contribute to that production. The focus of the class will depend on the needs of a particular production (history, choreography, textwork, dramaturgy, etc.).

THETR 280 Introduction to Acting
Fall or spring. 3 credits. Each section is limited to 16 students. Pre-registration and registration only through roster in the department office, Center for Theatre Arts. Staff.

An introduction to the actor's technique and performance skills, exploring the elements necessary to begin training as an actor, i.e., observation, concentration, and imagination. Focus will be on physical and vocal exercises, improvisation, and text and character. There is required play reading, play attendance, and some scene study.

THETR 281 Acting I
Fall or spring. 3 credits. Each section is limited to 14 students. Prerequisites: THETR 280 and audition. Registration only through roster in department office, the Center for Theatre Arts. 281 is restricted to sophomores and above. B. Levitt and S. Cole.

Practical exploration of the actor's craft through improvisation and exercises in physical and psychological action. Scene study utilizing the plays of Williams, Inge, and Miller.

THETR 282 Standard American Stage Speech
Fall. 3 credits. Prerequisites: THETR 280 and permission of instructor. A. Van Dyke.

An introduction to Standard American Stage Speech. We will study various regional American accents and Standard American Stage Speech using the International Phonetic Alphabet (IPA) as a way to designate the vowel, diphthong, and consonant sounds of spoken English. The goal of this course is to learn speech for use in performing Shakespeare, Shaw, Chekov, Moliere, etc.
A study of the art of acting in its historical and cultural context from the Greeks to the early 20th century, with an emphasis on an analysis of the evolution of acting in relation to social context. Lectures and film showings, with student papers and presentations required.

**Directing**

**THETR 177 Student Laboratory Theatre Company**
Spring. Spring. 3 credits. The Student Laboratory Theatre Company is a group of student-actors who earn credit by acting in three scenes directed by students taking THETR 498. Students enrolling in SLTC for credit will earn 1 credit for 2 projects and 2 credits for 3 projects. SLTC also meets with directors once a week.

**THETR 398 Fundamentals of Directing I**
Fall. 3 credits. Limited to 10 students. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. D. Feldshuh. Focused, practical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student’s awareness of why and how certain stage events communicate effectively to an audience. Each student will direct a number of exercises as well as a short scene.

**THETR 498 Fundamentals of Directing II**
Spring. 4 credits. Enrollment strictly limited. Prerequisite: THETR 280 and 398, and permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Recommended: THETR 250 and 281. D. Feldshuh. This course builds on the staging techniques learned in Fundamentals of Directing I. In this course each student will direct a series of projects and public presentations focusing on specific directorial challenges.

**THETR 499 Practicum in Directing**
Fall or spring. 1-4 credits. Prerequisites: THETR 250, 251, 280, 398, 498, and permission of instructor. D. Feldshuh. This course will allow the student who has completed the appropriate prerequisites the opportunity to direct a full presentation of theatre in conjunction with a faculty mentor. It may also involve an internship with a prominent director on campus or the opportunity to assistant direct a faculty or guest director.

**Playwriting**

**THETR 348 Playwriting**
Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. Staff. Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals and write. The semester culminates in the completion of a twenty to thirty minute one-act play.

**THETR 434 Advanced Playwriting**
Spring. 4 credits. Prerequisite: THETR 348 or permission of instructor. Not offered 1999-2000. Staff. A continuation of Theatre Arts 348, emphasizing advanced techniques and culminating in the completion of a full-length play.

**THETR 497 Seminar in Playwriting**
1-4 credits. Prerequisite: THETR 348 and 349 and permission of instructor. Not offered 1999-2000. Staff. This class is an extension of THETR 348 and 349. Students formulate a process for developing a full-length play, which they develop over the course of the semester. The class meetings are made up of discussions about the students' process and creative tactics, and reading of material generated by the playwrights.

**Design, Technology, and Stage Management**

**THETR 250 Fundamentals of Theatre Design and Technology**
Fall and spring. 4 credits. Not open to first term freshmen. Limited to 12 students. Registration only through department roster in CTA 225. A minimum of one credit of Production Lab (THETR 151 or 251) is strongly recommended concurrently. K. Goetz, R. Archer, J. Johnson, C. Hatcher, C. Orr Brookhouse, and E. Intemann.

An introduction to design and technology in the theatre. Lectures, discussion, and project work introduce the principles of designing scenery, costumes, lighting and sound, and the technical process of realizing designs on stage. Students are required to purchase materials, which the instructors will specify (approximate cost, $40).

**THETR 284 Speech and Dialects for Performance**
Spring. 3 credits. Limited to 12 students. Primarily for department majors or advance undergraduate training program candidates. Prerequisites: THETR 281 and permission of instructor. Not offered 1999-2000. A. Van Dyke. Development of speech and dialects in dramatic text.

**THETR 287 Summer Acting Workshop**
Summer. 3 credits. Limited to 16 students in a section. Levitt and staff. An introduction to the processes of acting. Practice in training techniques, rehearsal procedures, and methodology.

**THETR 380 Acting II**
Fall. 3 credits. Prerequisite: THETR 281 and audition. Limited to 12 students. S. Cole. A continuation of Acting I. Special consideration will be given to a physical approach to characterization utilizing the plays of Chekhov and Ibsen.

**THETR 381 Acting III: Advanced Scene Study**
Spring. 3 credits. Prerequisite: THETR 380 and audition. Limited to 10 students. B. Levitt. This course focuses on advanced problems in language and period style (movement, bows, curtsies, and period dances). Monologues and scenes will be drawn from these playwrights: Shakespeare and Molière.

**THETR 385 Advanced Studies in Acting Techniques**
Spring. 3 credits. Prerequisites: THETR 281, Audition and permission of instructor. Limited to 10 students. Topic varies each semester. May be repeated for credit. Not offered 1999-2000. B. Levitt.

**THETR 387 Movement for the Actor**
Fall. 3 credits. Prerequisites: THETR 281 and permission of instructor. Limited to 10 students. Not offered 1999-2000. Staff. Physical skills for the actor will be developed through work with LeCôq-based Neutral Mask corporeal mime, and physical acting techniques.

**THETR 415 The History of Acting**
Spring. 3 credits. Limited to 10 students. Prerequisites: THETR 380 and permission of instructor. Not offered 1999-2000. S. Cole. A study of the art of acting in its historical and cultural context from the Greeks to the early 20th Century, with an emphasis on an analytical understanding of acting methodology in relation to social context. Lectures and film showings, with student papers and presentations required.

**Costume History**
Spring. 3 credits. Limited to 20 students. C. Orr Brookhouse. Costume History will offer an overview of the history of clothing from the first signs of clothing to the early 20th century. It will investigate personal, social, religious, political, and regional reasons for why and how clothing evolved.

**THETR 349 Costume History: From Fig Leaf to Vanity**
Fall. 3 credits. Limited to 20 students.

**THETR 251 Fundamentals of Theatre Management**
Fall or spring. 1-2 credits. Limited to 10 students. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. D. Feldshuh. This course builds on the staging techniques learned in Fundamentals of Directing I. In this course each student will direct a series of projects and public presentations focusing on specific directorial challenges.

**THETR 177 Student Laboratory Theatre Company**
Spring. Spring. 3 credits. The Student Laboratory Theatre Company is a group of student-actors who earn credit by acting in three scenes directed by students taking THETR 498. Students enrolling in SLTC for credit will earn 1 credit for 2 projects and 2 credits for 3 projects. SLTC also meets with directors once a week.

**THETR 398 Fundamentals of Directing I**
Fall. 3 credits. Limited to 10 students. Prerequisite: permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. D. Feldshuh. Focused, practical exercises teach the student fundamental staging techniques that bring written text to theatrical life. A core objective is to increase the student’s awareness of why and how certain stage events communicate effectively to an audience. Each student will direct a number of exercises as well as a short scene.

**THETR 498 Fundamentals of Directing II**
Spring. 4 credits. Enrollment strictly limited. Prerequisite: THETR 280 and 398, and permission of instructor. Special consideration is given to students who have completed THETR 280 or are intending to continue in the area of stage or screen directing. Recommended: THETR 250 and 281. D. Feldshuh. This course builds on the staging techniques learned in Fundamentals of Directing I. In this course each student will direct a series of projects and public presentations focusing on specific directorial challenges.

**THETR 499 Practicum in Directing**
Fall or spring. 1-4 credits. Prerequisites: THETR 250, 251, 280, 398, 498, and permission of instructor. D. Feldshuh. This course will allow the student who has completed the appropriate prerequisites the opportunity to direct a full presentation of theatre in conjunction with a faculty mentor. It may also involve an internship with a prominent director on campus or the opportunity to assistant direct a faculty or guest director.

**Playwriting**

**THETR 348 Playwriting**
Fall. 4 credits. Limited to 12 students. Prerequisite: permission of instructor. Staff. Various approaches and techniques are examined as the student is introduced to the art and craft of dramatic writing. The student is required to read dramatic texts, observe theatre productions and rehearsals and write. The semester culminates in the completion of a twenty to thirty minute one-act play.

**THETR 434 Advanced Playwriting**
Spring. 4 credits. Prerequisite: THETR 348 or permission of instructor. Not offered 1999-2000. Staff. A continuation of Theatre Arts 348, emphasizing advanced techniques and culminating in the completion of a full-length play.

**THETR 497 Seminar in Playwriting**
1-4 credits. Prerequisite: THETR 348 and 349 and permission of instructor. Not offered 1999-2000. Staff. This class is an extension of THETR 348 and 349. Students formulate a process for developing a full-length play, which they develop over the course of the semester. The class meetings are made up of discussions about the students' process and creative tactics, and reading of material generated by the playwrights.
An exploration of the process of designing theatre; research and creation of the scenic space, and elements of interior design. Experience in theatre production and graphic skills is helpful but not essential. Students are required to purchase materials which the instructor will specify (approximate cost $50.00).

**THETR 364 Scenic Design Studio**

Fall. 3 credits. Limited to 10 students. Prerequisite: THETR 250 and 340 or permission of instructor. K. Goertz. An exploration of the process of designing scenery for the live theatre. Projects will employ various media to explore dramatic use of architecture, the scenic space, and elements of interior design. Experience in theatre production and graphic skills is helpful but not essential. Students are required to purchase materials which the instructor will specify (approximate cost $50.00).

**THETR 366 Costume Design Studio**

Spring. 3 credits. Students are required to purchase materials which the instructor will specify (approximate cost $50.00). Limited to 10 students. J. Johnson. Design of costumes for the theatre, concentrating on script and character analysis, period research, design elements, figure drawing and rendering skills, and an understanding of production style. May be repeated for credit.

**THETR 368 Sound Design Studio**

Spring. 4 credits. Limited enrollment to 6 students. Prerequisite: THETR 250 or 252 or permission of instructor. Students are required to purchase supplies (approximate cost $20.00). C. Hatcher. The use of sound as a medium of design for the theatre; research and creation of the theatrical sound score, digital recording and basic audio engineering techniques with projects in post production studio engineering and live sound style is on producing viable sound designs for live theatre events.

**THETR 369 Digital Audio Studio**

Fall. 3 credits. Limited to 6 students. By permission of instructor only. C. Hatcher. A project oriented course focusing on current techniques in digital audio recording, editing and processing for theatre and video production. Students will explore Digidesign's Pro Tools multitrack environment, MOTU's Digital Performer including basic MIDI operation and methods of synching audio to video. Some experience with audio recording, music or video production is helpful but not necessary.

**THETR 462 Lighting Design Studio II**

Spring. 4 credits. Prerequisite: THETR 362 or permission of instructor. Limited to 6 students. E. Intemann. This course concentrates on designing lighting for different genres in various venues, developing the lighting designer as a versatile artist. Personal style and artistic commitment will be stressed.

**Technology**

**THETR 252 Technical Production Studio I**

Fall. 3 credits. Limited to 6 students. D. Hall and J. Zomow. Stage Lighting and Sound Technology: the practical aspects of lighting and sound technology including equipment setup, engineering, electrical, organization, recording techniques, and production paperwork will be explored through projects, lectures, and class discussions. In addition to twice-weekly class meetings the course requires a laboratory commitment of fifty hours for the semester.

**THETR 254 Theatrical Make-up Studio**

Fall. 3 credits. Students are required to purchase make-up kits which the instructor will provide (approximate cost $50.00). Limited to 12 students. J. Johnson. Basic techniques of make-up for the stage including corrective, old age, and fantasy use of prosthetics, wigs, hair and hairpieces.

**THETR 256 Technical Production Studio II**

Spring. 3 credits. Limited to 6 students. Students are required to purchase materials, which the instructor will specify (approximate cost $25). Prerequisite: THETR 250 or permission of instructor. Additional hands-on time in prop and paint shops required, to be discussed. T. Honesty.

**Scene Painting** introduction to the basic techniques of painting scenery, including but not limited to the layout and painting of bricks, marble, stone, and wood grain for the theatre. Individual projects in scene painting and participation on paint crew for productions are included. Students will be introduced to the processes of propmaking, including furniture construction and upholstery techniques, use of shop tools and materials, period research, and painting and finishing.

**THETR 340 Theatrical Drafting and Technical Drawing Studio**

Fall. 3 credits. Prerequisite: THETR 250 or permission of instructor. S. Brookhouse. Implementation of the fundamentals of drafting and technical drawing. Introduction of the concept or permission of instructor. The approach to drafting for the theatre. A series of projects to familiarize students with the convention and process of visualization and drafting.

**THETR 352 Themed Entertainment: The Technical Perspective**

Fall. 3 credits. Limited to 12 students. R. Archer. Exploration into the integration of art and science in today's theme parks and interactive entertainment attractions. Papers, projects, and discussions will deal with planning and development aspects of large-scale entertainment projects including architecture, engineering, construction, and attraction installation. Focus will be on the specialized entertainment technologies that make these attractions work: audio and lighting design, ride and show control systems, and special effects.

**THETR 354 Stagecraft Studio**

Fall. 3 credits. A minimum of one credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. R. Archer. An exploration of the techniques and practice of theatre operation, scenic construction, stage mechanics, rigging, painting, and model building.

**THETR 356 Costume Construction Studio**

Spring. 3 credits. A minimum of one credit of production laboratory (THETR 151 or 251) is strongly recommended concurrently. Prerequisite: THETR 250 or permission of instructor. Lab fee of $25 to be paid in class. C. Orr Brookhouse. A project/lecture/discussion class in costume research, patterning, cutting, construction, and fitting.

**THETR 358 Costume Draping Studio**

Fall. 3 credits. Prerequisite: THETR 356 or permission of instructor. Not offered concurrently. J. Johnson. The course will provide further experiences in the area of costume construction, particularly in the specialized area of patterning. Students will learn to make patterns by the method of draping on the form and will conclude the class by building a complete costume (from inside out) using that method of patterning.

**Stage Management**

**THETR 153 Stage Management Production Laboratory I**

Fall and spring. 1–2 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium Theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard. Practical experience in theatrical production as assistant stage manager for a dance theatre concert or as a stage manager for readings, Black Box lab productions, or S.L.T.C. under the supervision of the faculty production manager. THETR 370 complements this course.

**THETR 253 Stage Management Laboratory II**

Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium Theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard. Practical experience in theatrical production as assistant stage manager for a season production under the supervision of the faculty production manager. THETR 370 complements this course.

**THETR 353 Stage Management Laboratory III**

Fall and spring. 1–4 credits. May be repeated for credit. Before registering, students must attend orientation meeting in the Proscenium Theatre at the Center for Theatre Arts at 7:30 p.m. on the first Tuesday of classes. Prerequisite: permission of instructor. P. Lillard. Practical experience in theatrical production as stage manager for a dance theatre concert, or an AUTP production under the supervision of the faculty production manager. THETR 370 complements this course.

**THETR 370 Stage Management Studio**

Fall. 2 credits. Prerequisite: THETR 250 or 280 or permission of instructor. P. Lillard. Introduction to the concepts and techniques of stage management as they relate to specific areas of production. Development of relevant communication skills and an understanding of the production process as experienced by a...
THETR 453 Stage Management Laboratory IV
Fall and spring. 1-5 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard.
Practical experience in theatrical production as stage manager for a season under the supervision of the faculty production manager.

Production Laboratories

THETR 151 Production Laboratory I
Fall and spring. 1-3 credits. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre. P. Lillard, S. Brookhouse, T. T. Honesty, J. Zornow, C. Orr Brookhouse.
This course provides practical experiences in theatrical production. Students can work on scenery, costumes, properties, lighting, or stage crew. No prerequisites or experience required.

THETR 251 Production Laboratory II
Fall and spring. 1-3 credits. Prerequisite: permission of instructor. May be repeated for credit. Orientation meeting on the first Tuesday of classes each semester at 7:30 p.m. in the CTA Proscenium Theatre. P. Lillard, S. Brookhouse, D. Hall, C. Hatcher, C. Orr Brookhouse, J. Zornow.
Practical experience in theatrical production, as a light board operator, sound board operator, sound technician, head dresser or scenery/props special project.

THETR 351 Production Laboratory III
Fall and spring. 1-3 credits. May be repeated for credit. Prerequisite: permission of instructor. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, E. Intemann, J. Zornow, C. Hatcher, J. Johnson, C. Orr Brookhouse.
Practical experience in theatrical production as a master electrician, assistant technical director, assistant costume shop manager or assistant to a faculty or guest director or designer.

THETR 451 Production Laboratory IV
Fall and spring. 1-4 credits. May be repeated for credit. Prerequisite: admission to Advanced Undergraduate Theatre Program. P. Lillard, R. Archer, S. Brookhouse, K. Goetz, D. Hall, C. Hatcher, J. Johnson, E. Intemann, C. Orr Brookhouse.
Practical experience in theatrical production, in the position of designer, shop manager, technical director or sound engineer.

Independent Study, Internships and Honors

THETR 300 Independent Study
Summer, fall, or spring. 1-4 credits. Independent Study in the Theatre allows students the opportunity to pursue special interests not treated in regularly scheduled courses. A faculty member, who becomes the student's instructor for the course, must approve the student's program of study and agree to provide continuing supervision of the work. Students must prepare a proposal for independent study which is available in 225 CTA.

THETR 485 Undergraduate Internship
Fall, spring, or summer. 1-3 credits. To be eligible to enroll and receive credit for an internship, students must either be majors or be concentrators in the department. Students are responsible for arranging their own internships in consultation with the faculty in their area of choice prior to preregistration for the semester in which the internship is planned to take place. To receive credit within this course, the internship must be unpaid. Students must follow the rules and procedures stated in the departmental internship form.

THETR 495 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors students in Theatre, Film and Dance.
This course is the first of a two-semester sequence (the second is THETR 496) for seniors engaged in an honors project.

THETR 496 Honors Research Tutorial
Fall or spring. 4 credits. Limited to Honors student in Theatre, Film and Dance.
This course is the second of a two-semester sequence (the first is THETR 495) for students engaged in an honors project.

Film

THETR 264 Interpreting Hitchcock (also English 263)
Fall. 4 credits. Limited to 75 students. L. Bogel.
See English 263 for complete description.

THETR 274 Introduction to Film Analysis: Meaning and Value
Fall. 4 credits. Limited to thirty-five students. D. Fredericksen.
An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Prospective film majors should enroll in their sophomore year.

THETR 275 Introduction to Film Theory
Spring. 4 credits. No prerequisites, strongly recommended for film majors.
This course provides an introduction to critical and theoretical approaches to film over the past century. It surveys questions of form, genre, aesthetics, narrative, spectatorship, industry, authorship, and apparatus through readings and weekly screenings of films key to these theoretical and critical formulations. The second half of the course will be devoted to the major theoretical trajectories of the past few decades in the humanities more generally and in their specific relations to cinema: structuralism and semiotics, Marxism, psychoanalysis, feminist theory, poststructuralism, postcolonial theory and queer theory.

THETR 277 Video Production I
A hands-on, beginning video production course using Super-VHS cameras and editing equipment. Students will learn camera, lighting, sound recording, editing and digital effects through a series of technical exercises. Students will develop two short, original video projects to be shown publicly at the end of the semester. A $100 equipment maintenance fee per student will be collected in class. Cost for videotape approximately $50-100.

THETR 291 Filming Other Cultures
Fall or spring. 4 credits. Limited to 20 students, with preference given to those who have taken either Anthropology 102 or Theatre Arts 274. Fee for screening and maintenance, $35. R. Ascher.
THETR 291 meets simultaneously with THETR 691/ANTRO 291/691. For topics and issues addressed, please see the description under Anthropology 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog's Where the Green Ants Dream. In consultation with the instructor, review films related to their special interests and major field of study.

THETR 329 Political Theory and Cinema
For description, see German Studies 330.

THETR 369 Studies in Film Analysis
Fall. 4 credits. Limited to 20 students, with preference given to those who have taken either Anthropology 102 or Theatre Arts 274. Fee for screening and maintenance, $35. R. Ascher.
THETR 369 meets simultaneously with THETR 691/ANTRO 291/691. For topics and issues addressed, please see the description under Anthropology 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog's Where the Green Ants Dream. In consultation with the instructor, review films related to their special interests and major field of study.

THETR 375 History and Theory of the Commercial Narrative Film
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Offered alternate years. Prerequisite for film majors THETR 274. Not offered 1999-2000. A. Villarejo.
Consideration of the broad patterns of narration in the history of the commercial narrative film. Emphasizes placed upon the early articulation of a cinematic means of narration, realism as an artistic style, the nature and function of popular film, and the modes of modernist and postmodernist "art cinema" narration.

THETR 376 History and Theory of Documentary and Experimental Film
Fall. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 274 is strongly recommended, but not required. A. Villarejo.
First, the history and theory of documentary film up to the end of World War II. Second, the history and theory of the experimental and personal film forms in Europe and the United States.

THEATRE, FILM & DANCE 559
ARTS AND SCIENCES - 1999-2000

THETR 377 Fundamentals of 16mm Filmmaking
Fall and spring. 4 credits. Limited to 12 students. Intended for juniors and seniors (who may take the course up to a year or more in advance) with prior permission from the film majors. Prerequisite: THETR 274 (or higher-level film studies course) and permission of instructor. Equipment fee, $100 (paid in class). The average cost to each student for materials and processing is $40. M. Rivchin.

A hands-on course in the basics of 16mm filmmaking techniques, requiring no prior production experience, emphasizing creative development of filmic ideas through critical discussion. Students may explore narrative, experimental, documentary, and abstract genres, producing short exercises and a final sound film project (8-12 minutes) to be screened publicly.

THETR 378 Soviet Film of the 1920s and French Film of the 1960s
Spring. 4 credits. Fee for screening expenses, $10 (paid in class). Prerequisite: THETR 377 is strongly recommended but not required. Offered alternate years. Next offered: spring 2001. D. Fredericksen.

An intensive treatment of two distinct periods of radical innovation in film theory and history. Emphasis upon the animated relationship between theory and filmmaking during these two decades. Major figures include Eisenstein, Pudovkin, Vertov, Kuleshov, Dovzhenko, and Room, in the Soviet 1920’s; Godard, Truffaut, Resnais, Rohmer, Tati, Rouch, Bresson and Bazin in the French 1960’s.

THETR 379 Modern Documentary Film
Spring. 4 credits. Prerequisite: THETR 376 is strongly recommended but not required. Fee for screening expenses, $10 (this fee is paid in class). Offered alternate spring semesters; offered spring 2000. T. Murray.

An intensive consideration of documentary filmmaking from 1945 to the present. Emphasis upon the documentary film as an artistic form with a distinct history and set of theoretical questions, as a sociopolitical force, as an ethnographic medium within and without a filmmaker's culture, and as a televised medium of persuasion and expression.

THETR 383 Screenwriting
Spring. 3 credits. Prerequisites: THETR 274 and 377, and permission of instructor. Limited to 12 students. Not offered 1999-2000. Staff.

Exercises in various genres of screenwriting will be explored: the commercial narrative, documentary, experimental, and abstract. This class will culminate in the writing of a finished script for a ten to fifteen-minute film. Note: This class is designed as a creative writing experience that will demand a great deal of outside work.

THETR 386 Third Cinema
Spring. 4 credits. Prerequisite: previous course in film history or analysis helpful, though not mandatory. Offered alternate years, offered 1999-2000. A. Villarejo.

This course explores postcolonial film and video through the rubric of "third cinema." We will investigate the diverse historical, national, political and generic commitments of films from Africa, South Asia, Latin America, the US and UK (Sembene, Ray, Broeka, etc.).

Readings in film and postcolonial theory will guide our critical analyses of the films.

THETR 391 Media Arts Studio I (also ART 391, ARCH 391, MUSIC 391)
Fall. 3 credits. Prerequisite: permission of instructor and junior-level standing required, minimum THETR 377 or 277, or dance studio courses. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin and B. Suber, THETR; S. Taft and S. Bowman, ART; K. Hubbell, J. Zissou and G. Wilcox, ARCH; D. Borden, MUSIC.

A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film and video. Group projects and discussions will investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, including virtual and performative events.

THETR 392 Media Arts Studio II (also ART 392, ARCH 392, MUSIC 392)
Spring. 3 credits. Preference given to those who completed Media Arts Studio I. See THETR 393 for prerequisites. $50 equipment fee (to be paid in class). Participating faculty include: M. Rivchin and B. Suber, THETR; S. Taft and S. Bowman, ART; K. Hubbell, J. Zissou and G. Wilcox, ARCH; D. Borden, MUSIC.

A continuation of Media Arts Studio I. A collaborative interdisciplinary studio course in a variety of digital and electronic media, including art, architecture, music, dance, film and video. Group projects and discussions will also investigate the artistic and interactive potential of a high-speed intranet connecting arts spaces on campus, including virtual and performative events.

THETR 395 Video: Art, Theory, Politics (also English 395)

For description, see English 395.

THETR 396 German Film (also Comparative Literature 396 and German Studies 396)

This course will explore German film from the Weimar and Nazi periods to the present in relation to the cultural and sociopolitical context of which it was a part. Readings and lectures will be devoted to formal and cultural developments historically as well as interpretive analysis of selected individual films.

THETR 413 Film and Performance
Spring. 4 credits. Prerequisite: at least one production course in 16mm film or video, and/or at least one 300-level course in acting or directing. Permission of the instructor. Limited to 12 students. $50 maintenance fee to be collected in class. Not offered 1999-2000. M. Rivchin and faculty.

THETR 474 Jung, Film, and the Process of Self-knowledge (also College Scholar Seminar)
Fall. 4 credits. Limited to 20 students. Offered alternate spring semesters; offered 1999-2000. D. Fredericksen.

"Know thyself" is one of the oldest and most enduring imperatives of the human spirit, and a raison d'être for liberal studies. This seminar will trace the Jungian approach to this imperative and test its critical capacities with respect to films by Pellini (8 1/2), Bergman (Persona), and Roeg (Walkabout).

THETR 475 Seminar in the Cinema I

Topic for fall 1999: the films of Ingmar Bergman. An intensive consideration of Bergman's corpus, with emphasis upon the films of the middle and end of his career. As well, close attention will be given to the nature of the critical act and its relationship to biography, film history, and film theory.

THETR 476 Seminar in the Cinema II

THETR 477 Intermediate Film and Video Projects
Fall. 4 credits. Limited to 8 students. Offered alternate years. Prerequisites: THETR 377 or 277 as minimum; preference given to those who have taken THETR 383 (screenwriting), 398 (directing), or 413 (acting and directing for the camera), and permission of instructor. Equipment fee: $100 to be collected in class. Film projects costs: $500-1000; video $50-150. M. Rivchin.

16mm filmmaking and video skills course designed to increase the student's knowledge and practice of: cinematography, lighting, sync-sound filming and editing techniques; working with labs and sound houses; S-VHS and digital video camera; and both analog and non-linear (AVID) editing. Each student will write, direct, shoot and edit one original short, sync-sound scene and one experimental project.

THETR 478 Advanced Film and Video Projects
Spring. 4 credits. Limited to 4-6 students, those selected to the Advanced Undergraduate Film Program by application in December. Prerequisite: THETR 377 or 277, and 477; recommended: 383 (screenwriting) and 398 (Directing 1). Equipment fee: $100. Project costs: $500-2000. M. Rivchin.

This is a third-level film production course for those students who have already written and proposed a dramatic narrative script, a documentary treatment, or an experimental or animation storyline. Working in two production crews rotating as directors, cinematographers, and sound recordists, these students may shoot in sync-sound, film, or video. Students will edit the films they write and direct, and will be individually responsible for editing and all completion costs of their projects, which will be screened publicly at the end of the semester.

THETR 479 Advanced Film and Video Projects
Spring. 4 credits. Limited to 4-6 students, those selected to the Advanced Undergraduate Film Program by application in December. Prerequisite: THETR 478. Equipment fee: $100. Project costs: $500-2000. M. Rivchin.

This is a third-level film production course for those students who have already written and proposed a dramatic narrative script, a documentary treatment, or an experimental or animation storyline. Working in two production crews rotating as directors, cinematographers, and sound recordists, these students may shoot in sync-sound, film, or video. Students will edit the films they write and direct, and will be individually responsible for editing and all completion costs of their projects, which will be screened publicly at the end of the semester.
THETR 563 Myth onto Film
4 credits. R. Ascher.
For description, see ANTHR 653.

THETR 661 Cinematic Desire (also English 660 and Comp Lit. 662)
Fall. 4 credits. E. Hanson.
See English for complete description.

THETR 674 Introduction to Film Analysis: Meaning and Value
Fall. 4 credits. Limited to 10 graduate students. D. Fredericksen.
An intensive consideration of the ways films generate meaning and of the ways we attribute meaning and value to films. Discussion ranges over commercial narrative, documentary, and personal film modes. Graduate students who intend to teach film at the undergraduate level are especially welcome. In addition to full participation in the work of THETR 274, graduate students will read and discuss in tutorials Bordwell's Making Meaning. Inference and Rhetoric in the Interpretation of Cinema.

THETR 691 Filming Other Cultures (also Theatre 291 and Anthro 291/691)
Spring. 4 credits. Fee for film screening and maintenance. $35. R. Ascher.
THETR 691 meets simultaneously with THETR 291/ANTRO 291/691. For topics and issues addressed, please see the description under Anthropology 291. Additionally, all graduate students review widely distributed films of general interest, for example, Werner Herzog's Where the Green Ants Dream, and, in consultation with the instructor, review films related to their special interests and major field of study.

THETR 699 German Film Theory (also German Studies 699 and Comparative Literature 698)
This course examines critically major German film theories from the Weimar period to the present. Works by Balazs, Arnheim, Kracauer, Benjamin, Adorno, Horkheimer, Kluge, Syberberg, Koch, Elsaesser, and others will be discussed in relation to the context in which they emerge as well as current debates in film theory.

Dance
Classes in Dance Technique (THETR 122, 231, 232, 303, 304, 306, 308, 309), Explorations (THETR 233), and the movement sections of Indian Dance (THETR 307, 317) are co-listed in the Department of Physical Education (PE) and the Department of Theatre, Film & Dance (THETR). Students may register for these classes either through PE in order to satisfy the university's physical education requirement or through THETR for 0 or 2 credits. Concurrent enrollment in THETR 212 and a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Not offered 1999-2000. J. Morgenroth.
When the body knows when, where, and how to move without prior direction, we call that possibility of "training" one's movement instinct to respond with focus, humor, and spontaneity. Live musical accompaniment. Includes some dance history.

THETR 201 Beginning Dance Composition
Fall and/or spring. 1-2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which the credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the dance program's auditions. Students may add this course only after they have been assigned roles. S-U grades only.
The study, development, and performance of roles in departmental dance productions.

THETR 308 Dance Technique IV/Modern (also Physical Education 438)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Self. Advanced and pre-professional Modern technique. A continuation of and supplement to THETR 306.

THETR 309 Dance Technique IV/Ballet (also Physical Education 439)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Staff. Advanced and pre-professional Ballet technique. A continuation of and supplement to THETR 304.

Composition, Improvisation, and Performance
THETR 155 Rehearsal and Performance
Fall and/or spring. 1-2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which the credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the dance program's auditions. Students may add this course only after they have been assigned roles. S-U grades only.

THETR 210 Beginning Dance Composition
Fall and spring. 3 credits. Limited to 12 students. Concurrent enrollment in a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Not offered 1999-2000. J. Morgenroth.
Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through improvisation. This course offers the possibility of "training" one's movement instincts to respond with focus, humor, and spontaneity. Live musical accompaniment. Includes some dance history.

THETR 304 Dance Technique III/Ballet (also Physical Education 434)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. B. Suber.
Intermediate Ballet technique. Work is done on strengthening the body through a movement technique emphasizing presence and musicality based on harmonic muscular control.

THETR 306 Dance Technique III/Modern (also Physical Education 436)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Morgenroth; spring, J. Chu.
Intermediate modern technique focusing on rhythm, placement, and phrasing for students who are prepared to refine the skills of dancing. Students will be challenged by complex phrases and musicality.

THETR 303 Dance Technique Workshop (also Physical Education 422)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
This class goes beyond the conventional modern dance class and looks into the very nature of technical training for dancers by studying and investigating a variety of movement forms including yoga, improvisation, classical and modern western dance. It is open to level III and IV dance technique students.

THETR 305 Dance Technique Workshop (also Physical Education 431)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Morgenroth.
Beginning Modern technique intended for students with some dance training. Includes all basic barre and center work focusing on presence and presentation.

THETR 302 Dance Technique I/Modern (also Physical Education 421)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Morgenroth.
Rhythm, placement, and phrasing for students who are prepared to refine the skills of dancing. Students will be challenged by complex phrases and musicality.

THETR 301 Rehearsal and Performance
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.
Advanced and pre-professional Modern technique. A continuation of and supplement to THETR 306.

THETR 308 Dance Technique IV/Modern (also Physical Education 438)
Fall and spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Fall, J. Chu; spring, J. Self. Advanced and pre-professional Modern technique. A continuation of and supplement to THETR 306.

THETR 309 Dance Technique IV/Ballet (also Physical Education 439)
Spring. 0 to 1 credit. By placement only; no pre-enrollment. Satisfies the PE requirement if taken as PE. Attendance at dance concerts is required. Staff. Advanced and pre-professional Ballet technique. A continuation of and supplement to THETR 304.

Composition, Improvisation, and Performance
THETR 155 Rehearsal and Performance
Fall and/or spring. 1-2 credits. 1 credit per production experience per semester up to 2 credits per semester. Students must register for the course in the term in which the credit is earned; requests for retroactive credit will not be honored. Limited to students who are assigned roles after tryouts at the dance program's auditions. Students may add this course only after they have been assigned roles. S-U grades only.

The study, development, and performance of roles in departmental dance productions.

THETR 201 Beginning Dance Composition
Fall and spring. 3 credits. Limited to 12 students. Concurrent enrollment in a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Not offered 1999-2000. J. Morgenroth.
Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through improvisation. This course offers the possibility of "training" one's movement instincts to respond with focus, humor, and spontaneity. Live musical accompaniment. Includes some dance history.

THETR 210 Beginning Dance Composition
Fall and spring. 3 credits. Limited to 12 students. Concurrent enrollment in a dance technique class at the appropriate level is required. Attendance at dance concerts is required. Not offered 1999-2000. J. Morgenroth.
Weekly assignments in basic elements of choreography. Students compose and present short studies that are discussed and reworked. Problems are defined and explored through improvisation. Informal showing at end of each semester.

THETR 211 Dance Movement Workshop
Summer. 3 credits. Limited to 15 students. For students with varied levels of training, including those with no experience. J. Kvar.
Students explore new ways of moving and creating dances and prepare short studies each week based on material covered in class. Modern dance technique, improvisation, and composition are covered. Students observe and discuss the main concerns of contemporary performance from the artist's performer's perspective. Viewings of films, videotapes, and live performances.
THETR 212 Music Resources for Dance Composition
Fall and spring. 1 credit. MUSIC 105 is recommended as a prerequisite but not required. Students may register in successive semesters for a maximum of 4 credits. Attendance at dance concerts and music concerts is required. J. Self.

THETR 233 Explorations in Movement and Performance (also Physical Education 440)
Fall. 0 or 1 credit. Limited to 16 students. Satisfies PE requirement if taken as PE. Attendance at dance concerts is required. J. Self.

THETR 310 Intermediate Dance Composition I
Fall and spring. 3 credits. Prerequisite: THETR 210. Concurrent enrollment in THETR 212 and a technique class at the appropriate level is required. Fall, J. Self, spring, staff.

THETR 311 Intermediate Dance Composition II
Fall and spring. 3 credits. Prerequisite: THETR 310. Attendance at dance concerts is required. Concurrent enrollment in THETR 212 and a technique class at the appropriate level is required. Fall, J. Self, spring, staff.

THETR 312 Physical Analysis of Movement
Fall. 3 credits. J. Morgenroth.

THETR 351 Senior Project in Dance
Fall or spring. 4 credits. Prerequisite: THETR 410 or permission. This course is limited to senior dance majors only. Students who elect this course will create a project in choreography and performance, dance film or video, dance pedagogy, or other appropriate area agreed upon with a member of the dance faculty. Senior projects that are to be performed must be presented within one of the three regularly scheduled department concerts.

THETR 354 Western Dance History I: Classical Ballet History as a Reflection of Western Ideology
Fall. 4 credits. Attendance at dance concerts is required. B. Suber.

THETR 366 Costumes & Stagecraft
4 credits. Attendance at dance concerts is required. J. Chu.

THETR 401 Senior Paper in Dance
Fall or spring. 3 credits. Attention to the student. Not offered 1999-2000. E. Intemann, A. Fugelsanger, J. Morgenroth.

Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.

THETR 418 Seminar in History of Dance
Spring. 4 credits. Attendance at dance performances is required. Not offered 1999-2000. B. Suber.

THETR 419 Music, Dance, and Light

Artistic values, parameters, and concerns of music (sound design), dance, and lighting design are compared and contrasted, and the combination of design elements is analyzed in contemporary dance. Includes writing in response to readings, audio and video recordings, and performances. Some classes devoted to creating sound, movement, and lighting.

Tracks toward admission into the advanced undergraduate theatre program

Design, Technology, and Stage Management
Recommended for individuals interested in a Design, Technology, or Stage Management track.

THETR 250 Fundamentals of Theatre Design and Technology
Fall and spring. 4 credits. Attendance at dance concerts is required.

THETR 151 and 251 Production Lab I and II (at least one credit each)
Recommended for Scenic Design emphasis.

THETR 340 Theatrical Draughting and Technical Drawing Studio
4 credits. Attention at dance concerts is required. B. Suber.

THETR 351 Production Lab III (as Design Assistant)
4 credits. Attention at dance concerts is required. B. Suber.

THETR 354 Stagecraft Studio
4 credits. Attention at dance concerts is required. B. Suber.

THETR 364 Scene Design Studio
4 credits. Attention at dance concerts is required. B. Suber.

THETR 451 Production Lab IV (at least 1 credit)
Recommended for costume design or costume shop management emphasis.

THETR 254 Theatrical Make-up Studio
4 credits. Attention at dance concerts is required. B. Suber.

THETR 351 Production Lab III (as Design Assistant)
4 credits. Attention at dance concerts is required. B. Suber.

THETR 356 Costume Construction Studio
4 credits. Attention at dance concerts is required. B. Suber.

THETR 366 Costume Design Studio I
4 credits. Attention at dance concerts is required. B. Suber.

THETR 451 Production Lab IV (at least 1 credit)
Recommended for Lighting Design or costume shop management emphasis.

THETR 252 Technical Production Studio I
4 credits. Attention at dance concerts is required. B. Suber.

THETR 351 Production Lab III (as Design Assistant)
4 credits. Attention at dance concerts is required. B. Suber.

THETR 356 Costume Construction Studio
4 credits. Attention at dance concerts is required. B. Suber.

THETR 366 Costume Design Studio I
4 credits. Attention at dance concerts is required. B. Suber.

THETR 451 Production Lab IV (at least 1 credit)
Recommended for Sound Design emphasis.

THETR 251 Production Lab II (as Design Assistant)
4 credits. Attention at dance concerts is required. B. Suber.

THETR 252 Technical Production Studio I
4 credits. Attention at dance concerts is required. B. Suber.

THETR 351 Production Lab III (as Design Assistant)
4 credits. Attention at dance concerts is required. B. Suber.

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES
Africana Studies and Research Center

The Africana Studies and Research Center is concerned with the examination of the history, culture, intellectual development, and social organization of Black people and cultures in the Americas, Africa, and the Caribbean. Its program is structured from an interdisciplinary and comparative perspective and presents a variety of subjects in focal areas of history, literature, social sciences, and African languages. African languages such as Swahili are consistently offered, while other languages, e.g., Mandinka and Yoruba are occasionally offered. African languages are also taught during summer/winter session.

The center offers a unique and specialized program of study that leads to an undergraduate degree through the College of Arts and Sciences and a graduate degree, the Master of Professional Studies (African and African-American), through the university's Graduate School.

A student may major in Africana studies; however, another attractive alternative is the center's joint major program. This program enables the student to complete a major in one of the other disciplines represented in the college while at the same time fulfilling requirements for a major in Africana Studies. This requires only a few more credits than is usually the case when one completes a single major course of study. Courses offered by the center are open to both majors and nonmajors and may be used to meet a number of college distribution requirements, including historical/empirical breadth (A) and geographical breadth (A) requirements, such as freshman writing seminars, language (Swahili), expressive arts, humanities, social sciences, and history.

The Africana Major
The undergraduate major offers interdisciplinary study of the fundamental dimensions of the African-American and African experiences. Because of the comprehensive nature of the program, it is to the students' advantage to declare themselves Africana majors as early as possible. The following are prerequisites for admission to the major.

Students should submit:
1) a statement of why they want to be an Africana studies major;
2) a tentative outline of the area of study they are considering (African or African-American) for the undergraduate concentration; and
3) a full transcript of courses taken and grades received.

The center's undergraduate faculty representative will review the applications and notify students within two weeks of the status of their request.

After acceptance as a major in the Africana Center, a student must maintain a C+ cumulative average in the center's courses while completing the major program. The Africana major must complete 36 credits in courses offered by the center, to include the following four core courses: AS&RC 205, 231, 290, and 422. Beyond the core courses, the student must take at least 6 credits of center courses numbered 200 or above and 15 credits numbered 300 or above. The program of an undergraduate major may have a specifically Afro-American focus or a specifically African focus.

Joint Majors
The center encourages joint majors in the College of Arts and Sciences and in other colleges. Joint majors are individualized programs that must be worked out between the departments concerned. The center's undergraduate faculty representative, Professor Adams, will assist students in the design and coordination of joint major programs. However, in any joint major program, the center will require at least 16 credits be taken in Africana studies courses, including AS&RC 290.

Double Majors
In the case of double majors (as distinct from joint majors) students undertake to carry the full load of stipulated requirements for a major in each of the two departments they have selected.

Certificate in African Studies
In conjunction with the Institute for African Development, the Africana Studies and Research Center administers an undergraduate Certificate in African Studies program. The certificate is offered as a minor concentration available to students in all of the undergraduate colleges at Cornell. Many of the courses in the program might be used to fulfill other course distribution requirements. By pursuing this certificate, students acquire an interdisciplinary understanding of Africa. After developing a foundation of knowledge on the culture, society, and development of Africa in the core course "Africa: The Continent and Its People," students pursue 15 credit hours in a humanities or development studies track or a combination of the two, including an additional core course, either "African Civilizations and Cultures" or "Contemporary African Development Issues." The requirements for the certificate are a minimum of 18

credit hours, including the core courses. Students interested in the certificate program must contact Professor Adams (the center's undergraduate faculty representative) who will register them in the program and assign them a faculty advisor from the College. The faculty advisor will be responsible for determining completion of the certificate requirements.

Honors. The honors program offers students the opportunity to complete a library research thesis, a field project in conjunction with a classroom assignment or experiment designed by the student. The requirements for admission to the honors program for all students—regular majors, joint majors, and double majors—are a B- cumulative average in all courses and a B+ cumulative average in the center's courses. Each student accepted into the honors program will have an honors faculty committee consisting of the student's adviser and one additional faculty member, which is responsible for final evaluation of the student's work. The honors committee must approve the thesis or project before May 1 of the student's junior year. The completed thesis or project should be filed with the student's faculty committee by May 10 of the senior year.

Language Requirement
Courses in Swahili may be used to satisfy the College of Arts and Sciences language requirement. In Swahili, successful completion of AS&RC 131, 132, 133, and 134 provides qualification, and the addition of 202 provides proficiency. AS&RC majors are not required to take an African language, but the center recommends the study of Swahili to complete the language requirement.

AS&RC 131 Swahili
Fall. 4 credits. Laboratory time to be arranged. A. Nanji.
Beginner's Swahili Part I—Grammar for speaking, reading, and writing. Requires no knowledge of language. Swahili is spoken in East and Central parts of Africa.

AS&RC 132 Swahili
Spring. 4 credits. Prerequisite: Swahili 131. A. Nanji.
Continued study of the basic grammatical formation of the language and the introduction of reading material ranging from songs to short stories. A great many drills are invariably used in this course to help develop the student's comprehension of the language. Swahili tapes are highly utilized during all of these sequences.

AS&RC 133 Swahili
Fall. 4 credits. Prerequisites: Swahili 131 and 132. Laboratory language time to be arranged. A. Nanji.
Advanced study in reading and composition.

AS&RC 134 Swahili
Spring. 4 credits. Prerequisite: Swahili 133. A. Nanji.
In this course the sequence more emphasis is placed on the development of reading ability and the acquisition of writing skills. Students are expected to read and comprehend selected Swahili stories and write compositions on chosen topics. Ample consideration is given to oral practice in the classroom.

AS&RC 171 Black Families and the Socialization of Black Children
Fall. 3 credits. Faculty.
This course provides an examination of the evolution of the Black family from its roots in Africa, the evolution of family forms, the impact of social policy, and a consideration of the literature stressing family and child well-being. Among the major topics considered will be male/female relationship issues, childbearing and parental roles, the extended family, economic and health issues. The component of the course focusing on youth will primarily cover child and adolescent development.

AS&RC 172 The Education of Black Americans: Historical and Contemporary Issues
Spring. 3 credits. Faculty.
This course will be devoted to the history of educating Black Americans. Considerable attention will be given to contemporary issues. The major topics of focus will include an examination of the debates concerning the type of the education needed, public and private schooling efforts, the Africana Studies movement, community control issues, busing, affirmative action, re-segregation debates and new initiatives in education including vouchers, and charter schools.

AS&RC 191 Africa: The Continent and Its People
Fall. 3 credits. L. Edmondson.
An introductory interdisciplinary course focusing on Africa's geographical, ecological, and demographic characteristics; indigenous institutions and values, the triple cultural heritage of Africurity, Islam, and Western civilization; main historical developments and transitions; contemporary political, economic, social, and cultural change. Africa's ties with the United States (from trans-Atlantic slavery to the present), its impact on the emerging world order, and its contribution to world civilization will also be explored.

AS&RC 202 Swahili Literature
Fall. 4 credits. Prerequisite: Swahili 134. A. Nanji.
Students gain mastery over spoken Swahili and are introduced to the predominant Swahili literary forms.

AS&RC 204 History and Politics of Racialization: A Comparative Study
Spring. 4 credits. A. Bekele.
The primary focus of this course will be on the historical and contemporary significance of racialization in the United States and South Africa with regard to societal development and inter-relations. It will include an analysis of the historical development of racialized barriers as an instrument of power and privilege. The ways in which racialization is used as an instrument of ideology to social status, cultural hierarchy and economic positions will also be examined. Particular emphasis will be given to the development and perpetuation of scientific racism in both places. The apparent success against Jim Crow form of racism in the United States and apartheid in South Africa appears to transform racism into subtle and 'scientific' sphere. This transformation and its continued impact in perpetuating social inequality will be further analyzed.

AS&RC 205 African Cultures and Civilizations
Spring. 3 credits. D. Ohadile.
This course is concerned with the peoples of Africa and the development of African cultures and civilizations from the earliest times to the present day. It focuses on the near modern civilizations of Africa south of the Sahara, and the ancient civilizations of Egypt and the Nile Valley, together with their contributions to the development of the major world civilizations. The course also deals with the socio-political organization of African societies, their kinship systems, cross-cutting ties, rites of passage, gender relations, arts (including music, dance, folklore, architecture, sculpture, painting, and body decoration).

AS&RC 210 Major Works of Black World Writing
Fall. 3 credits. A. Adams.
This course surveys classic texts by African American, Caribbean, and African writers. The focus is on literary texts by authors such as Langston Hughes, Toni Morrison, James Baldwin, Maryse Conde, and Chinua Achebe, with a view toward analyzing common experiences, references, themes, and literary strategies across the Black world. The works of fiction, poetry, and drama that constitute the central material of the course are supplemented by essays and biographies from other authors who have influenced the creative vision and the movement of the peoples of Africa and the Diaspora, e.g., W.E.B. DuBois and Marcus Garvey, Nelson and Winnie Mandela.

AS&RC 231 African American Social and Political Thought
Spring. 3 credits. J. Turner.
This is an introductory course that will review and analyze the major theoretical and ideological formulations developed and espoused by African-Americans in the struggle for liberation. This semester we will focus specifically on the political philosophy and historical significance of Malcolm X, and the work and movement of the Black Arts Movement, as the prime movers of nationalism and pan-Africanism among Black people in this century. Such themes as slave resistance, nationalism, Pan-Africanism, emigration, anti-imperialism, socialism and internal colonialism, and the political and social views of Black women will be discussed. Black political thought will be viewed in its development as responses to concrete conditions of oppression and expression.

[AS&RC 265 African American Literature in the 20th Century]
Fall. 3 credits. Not offered fall 1999. Faculty.
This course provides an overview to major works in African American literature from 1900 to the 1980s. Focusing on significant moments in the tradition, the readings highlight literary movements, their advocates, and their detractors. Divided into four units, the literary works come from the Post-Reconstruction period, Harlem Renaissance, Socialism, Realism, and Modernists of the 1930s and 1940s, the Black Arts Movement of the 1960s and 1970s, and the Womanist critiques from the mid 1970s through the 1980s. In addition to a range of periods and styles, this course includes a range of genres, such as the autobiography, poetry, essay, short story, drama, and novel.]
AS&RC 271 Introduction to African Development (also CRP and Government 271) @
For description, see CRP 271.

AS&RC 280 Race, Power, and Privilege in the United States (formerly Racism in American Society) @
This course will be a topical treatment of the history and theory of racism in the United States. The course will begin with an examination of basic concepts and theories of racism. From there we will examine the history of racial groups in America—African-Americans, Native Americans, Asian Americans, and the Hispanic groups. Particular attention will be paid to the political economy of racism and the sociological and the psychological aspects of race relations in America, with specific reference to the differences and intersections of race, class, gender, and ethnicity.

AS&RC 283 History of Resistance Movements in Africa and the Diaspora @
Fall. 3 credits. D. Ohadike.
This course deals with the history of resistance and liberation movements in Africa, Brazil, the Caribbean, and the United States. It is concerned with the medical relationships between European domination and Black resistance. It examines the methods, strength, and complexity of Black resistance and liberation, together with the rise of revolutionary classes in Africa and the Diaspora. It draws attention to the importance of unity and organization in resistance and then shows similarities, connections, and continuities in Black resistance. Finally, it demonstrates that African background helped to shape the nature of systems for independence and civil liberties in the Caribbean, Brazil, and the United States.

AS&RC 290 The Sociology of the African-American Experience @
Fall. 3 credits. J. Turner.
This is an introductory course to the field of African-American Studies. It stresses a historical sociological approach to the examination of the African-American experience. The course surveys the African beginnings of human kind and the classical role of Black people in world civilization and the making of early culture. The course treats issues in the humanities, social sciences, and history. This course is required for all undergraduate students majoring at the African Center.

AS&RC 304 African American Art @
Spring. 3 credits. S. Hassan.
This course investigates the different forms of African American art. It will deal with visual artistic traditions in relation to their historical origins and socio-cultural context from the early days of slavery to the present time. The course will start with an overview of African art and the experiences of the Middle Passage and slavery in relation to African American traditions in the decorative arts including: pottery, architecture, ironwork, quiltmaking, basketry. This is followed by a fine art survey starting with the eighteenth and nineteenth centuries continuing through the early twentieth-century Harlem Renaissance up to the present. Certain issues related to African American arts and creativity such as "improvisation," "Black Aesthetics," and "Pan Africanism" will also be explored. Slides, films, film strips will be used extensively to illustrate topics discussed. Visits to museums and relevant current exhibitions may be arranged.

AS&RC 310 Art in African Culture and Society @
Fall. 3 credits. S. Hassan.
This course is a survey of the visual art and material cultural traditions of sub-Saharan Africa. It aims at examining different forms of visual artistic traditions in relation to their historical and sociocultural context. The symbolism and complexity of traditional African art will be explored through the analysis of myth, ritual, and cosmology. In-depth analysis of particular African societies will be used to examine the relationship of the arts to indigenous concepts of time, space, color, form, and sociopolitical order. New and contemporary art forms associated with major socioeconomic changes and processes of assimilation and acculturation will also be explored. These include tourist art, popular art, and elite art.

AS&RC 311 Government and Politics in Africa @
Fall. 3 credits. A. Mazrui.
Power and participation in Africa. The colonial background and its political consequences. The pre-colonial continuities in the post-colonial politics. Ethnicity and allegiance in the African polity. The monarchical tendencies in African culture. From the warrior tradition to the military coup in the post-colonial era. From the older tradition to presidentialitarianism. From the sate tradition to intellectual meritocracy. The relationship between the one-party and the multiparty state. Socio-cultural versus socio-economic ideologies. The gender question in African politics. The soldier and the state. The African political experience in a global context.

AS&RC 352 Pan-Africanism and International Politics @
Spring. 3 credits. J. Edmondson.
Pan-Africanism addresses the shared experiences and aspirations of African people around the world, focused on a search for greater linkages and unifying measures. Informed by the experiences of the racial factor in international relations, this course will examine Pan-African theories, ideologies, and movements, past and present, in their political, socio-economic, and cultural manifestations, focusing mainly on the African continent, the Caribbean, and Black America.

AS&RC 362 Global Perspectives on Gender @
Spring. 3 credits. N. Assie-Lumumba.
The course will examine how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The course will be taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty member directing the course, the class will consider such issues as cross-cultural perspectives on gender, the history of work and family life in different societies; the gendered division of labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; the role of the state in constructing an engendered economy and polity.

AS&RC 380 African History: Earliest Times to 1800 @
Fall. 3 credits. A. Bekerie.
As the second largest continent with vast and varying geographical and sociocultural conditions combined with recently established fact as an original home of human species, Africa provides rich and diverse oral and written early history. The course covers some of the major historical signposts from the origins of human species to 1800. Among the topics for discussion are: Historical Perspectives and Sources, The Nile River Cultural Complex, Berber, Carthage and Maghreb of North Africa, Upper Guinea and Western Sudan of West Africa, Cities of the East African Coast, and Great Zimbabwe and other sites of Southern Africa.

AS&RC 381 African History, 1800-Present @
Spring. 3 credits. D. Ohadike.
This is a survey of African history in the nineteenth and twentieth centuries. It deals with African revolution and resistance movements, the ending of the slave trade and the politics of the abolition; European scramble and partition of Africa; resistance to European colonial conquest; African societies in the colonial period; the politics of decolonization; Neo-colonialism; the rise and decline of military regimes; African debt crisis; and conflict and reconciliation in Africa.

AS&RC 404 Afrocentricity: Paradigm and Critical Readings @
Fall. 4 credits. A. Bekerie.
What is Afrocentricity? It is a theoretical framework designed to interpret the histories and cultures of peoples of Africa and African descent by locating them at the center of their experiences. In other words, it is a method of knowing the life experiences of African peoples from the inside out. The course will examine—through the writings of Asante, Kete, Clarke, Jean, Myers, Amin, Mazrui, Gates, Appiah, Richards, Schlesinger and Thiongo—the conception and depth of the paradigm, its roots in the process of domination and utilization of knowledge, particularly emancipatory knowledge, the history of the paradigm, and the debate it generates among a wide range of thinkers and scholars.

AS&RC 410 African American Politics @
Spring. 4 credits. J. Turner.
The central thesis of African American politics has been its movements for political change and democratic access and human rights. This development since the seventeenth century is a complex political legacy. This course will conduct a close study of African American political practices and interpret the historical stages in the process of African politics will be examined. The development of electoral offices in federal and statewide politics, and the significant urban political power bases giving rise to African American majority politics in critical industrial centers, as well as rural hamlets will center the course. Presidential politics—the Jesse Jackson campaigns—and new political formations including Black Republicans/conservatives will constitute the empirical portion of this course. The course will review the development of the literature in African American politics.
AS&RC 420 Public Policy and the African American Urban Community  
Spring. 4 credits. J. Turner.  
The socioeconomic conditions of the African American urban community will be the central focus of this course. The impact of drug abuse, poverty, crime, and education models will be explored in relationship to the social needs of the African American population. The changing configuration of internal organization of the African American community nationally will be examined.

AS&RC 422 African Literature  
Spring. 4 credits. T. Adams.  
With such an emphasis on issues of nationalism, African American urban community issues, and the role of African culture in the diaspora, this course will focus on the role of African literature in the coming of age of Africa. The course will examine the impact of colonialism, the role of African writers in the development of an African cultural identity, and the role of African literature in the development of African nations. The course will also examine the role of African literature in the development of African American literature.

AS&RC 425 African American Performance Genres and Traditions  
Spring. 4 credits. Not offered spring 2000. Faculty.  
This course introduces students to the various genres in African American performance traditions, including poetry, theater, dance, and music. The course will focus on the role of African American performance traditions in shaping African American identity and culture.

AS&RC 435 African Cinema (also Society for the Humanities 435)  
Spring. 4 credits. S. Assié-Lumumba.  
This course offers an overview of African cinema and filmmaking. It surveys historically the evolution of African cinema from its early days to the present. Through screening of selected African films, different trends within African cinema will be explored, such as "Return to the Sources" and the rediscovery of the pre-colonial past, the "Social Realist" narrative and critique of post-independence Africa, recovery of the story of colonialism from the perspective of the colonized, and the entertainment genre. Techniques, style, and aesthetics of African cinema will also be discussed. The course offers a unique opportunity to look at African culture and society, and the role of African cinema in the development of African American identity.

AS&RC 451 Politics and Social Change in the Caribbean  
Fall. 4 credits. L. Edmondson.  
A study of the historical, geostrategic, political, economic, social, cultural, and regional influences bearing on the domestic and international experiences of Caribbean societies. Special attention will be given to conflicting definitions and perceptions of the Caribbean, contending theories of Caribbean social structure and models of development, the continuing salience of struggles for change and transformation, prospects of regional integration, and Caribbean challenges to the global system, especially with regard to the region's impact on the United States and the region's position in the Third World in the context of the North-South cleavage.

AS&RC 455 Caribbean Literature  
Fall. 4 credits. A. Adams.  
This course will examine the prose literature of the Caribbean islands. Through the reading of several novels and short stories from the various languages and cultural strains that comprise the Caribbean societies, students will study the points of commonality and the diversity within this body of literature. The recurrence of certain historical, social, and cultural issues that have formed the multi-ethnic Caribbean peoples will be analyzed in their varying manifestations across the linguistic and other boundaries to uncover the underlying shared experience.

AS&RC 459 Education in Africa and the Diaspora  
Fall. 4 credits. N. Assié-Lumumba.  
This course deals with educational innovations geared to promoting equal opportunity based on gender, race, and class, in Africa and the African diaspora. After an introduction on the concepts of education and innovations and the states of innovation as planned change, the course will focus on concrete historical and contemporary cases of educational innovations. The case studies in the United States include the creation and expansion of historically black institutions such as Lincoln University, Spelman College, Tuskegee Institute (now Tuskegee University), and other schools in the South, and the Westside Preparatory School in Chicago. The African cases to be studied include African languages for instruction in various countries, the Nigerian case, Ujamaa and education for self-reliance in Tanzania, and the case of Cote d'Ivoire which adopted television as a medium of instruction.

AS&RC 468-469 Honors Thesis  
Hours to be arranged. 468; fall; 469, spring. Africana Center faculty.  
For senior Africana Studies majors working on honors theses, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty. Permission of the AS&RC director of undergraduate studies is required.

AS&RC 475 Black Leaders and Movements in African-American History  
Fall. 4 credits. R. Harris.  
Analyzes the personalities, ideas, and activities central to the struggle for African-American liberation from the eighteenth-century to the present. Examines historical understanding of leadership and the structure of protest movements with the goal of understanding current leadership needs and trends among African Americans.

AS&RC 478 Family and Society in Africa  
Fall. 4 credits. N. Assié-Lumumba.  
The family as a social institution is structured according to social-economic, historical, political, and cultural specificities. It is the frame in which the family in Africa and the African diaspora must be analyzed. The topics to be discussed in this course include the concepts of nuclear and extended family, the place and role of different age groups and generations in the family, marriage and its related issues, parenthood, childrearing, gender roles, class differences, and "family planning." This course also deals with the impact of westernization, urbanization, and modern economy on the structure of the family in Africa as well as the legacy of African family values in the African diaspora with a focus on the African American case.

AS&RC 479 Women and Gender Issues in Africa  
Spring. 4 credits. N. Assié-Lumumba.  
There are two contrasting views of the status and role of women in Africa. One view portrays African women as oppressed and exploited by men. According to another view women have a favorable social position in Africa: indigenous ideologies consider women to be the foundation of society, they are economically active and independent and they have an identity independent of men. In this seminar we will discuss the status and role of women in Africa historically as well as in the contemporary period. Among the topics to be covered are: women in non-western/pre-colonial societies; the impact of colonial policies on the status of women; gender and access to schooling, participation in the economy and politics; women and the law; women and health; gender issues in southern Africa; womanism and feminism; the United Nations Decade of Women and the four World Conferences on Women (Mexico 1975, Copenhagen 1986, Nairobi 1985, and Beijing 1995).

AS&RC 483 History of African Political Thought  
Fall. 4 credits. D. Ohadikie.  
The purpose of this course is to provide students with a thorough knowledge of the history of African political thought and ideologies, from ancient times to the present. This course is divided into two broad sections. The first section looks at the history of African political thought and ideologies in ancient and near modern times and explains the functioning of African communalism. The second section examines the history of anti-colonial political thought. It explains why the colonial intelligentsia and radical African nationalists developed such political ideologies as African socialism, Lumumbism, and Nkrumahism. The course also looks at sociopolitical thought in African literature, and explores the contributions of African religious thought (like Kimbanguism and Tokoisim) to the development of African political culture. Among the works of theoretical African political thinkers to be studied are those of Casely Hayford, Leopold Sedar Senghor, Simon Kimbangu, Amilcar Cabral, Franz Fanon, Kwame Nkrumah, Patrice Lumumba, Nnamdi Azikiwe, Julius Nyerere, Jomo Kenyatta, Nelson Mandela, and Steve Biko.

AS&RC 484 Politics and Social Change in Southern Africa  
Spring. 4 credits. L. Edmondson.  
This course focuses on the legacies of apartheid and the challenges of transformation toward a post-apartheid society in South Africa. Topical emphasis: National liberation; the rise and decline of apartheid; the historical continuity of Black resistance against racism under, against, and after apartheid;
South Africa's relations with its neighbors; geo-political, economic, and racial dimensions of the American connection, politics of negotiation and transition to majority rule; prospects for stability, democracy and equality; South Africa's new role in the African continental and global arenas. Instructor's lectures will be supplemented by films and class discussions.

AS&RC 498-499 Independent Study
Hours to be arranged. 498-fall; 499-spring. Africana Center faculty. For students who wish to pursue special topics, with selected reading, research projects, etc., under the supervision of a member of the Africana Studies and Research Center faculty.

AS&RC 501 Global Africa: Comparative Black Experience @
Spring. 4 credits. A. Mazrui. This seminar will address two diasporas in the Black experience. The Diaspora of enslavement concerns slaves and descendants of slaves in both the Western and Eastern Diaspora. The Diaspora of colonization concerns the demographic diaspora as a result of colonialism. African-Americans are in their majority part of the Diaspora of Enslavement. Recent Algerian immigrants into France are part of the Diaspora of Colonization. Jamaicans and Trinidadians in Britain are part of a discrete diaspora—products of both enslavement and colonialism. The course will address these areas of Black comparison: Comparative Slavery—A Triple Heritage; Race and Race Mixture in Four Traditions; Comparative Emancipation from Slavery; Comparative Liberation from Colonialism; Comparative Struggle for Civil Rights; The Gender Question in Global Africa; Comparative Quest for Global Equality.

AS&RC 502 Education and Development in Africa @
Spring. 4 credits. N. Assilé-Lumumba. In the 1950s and 1960s, the human capital theory that emphasizes the importance of formal education for achievement of full productive potential of individuals and countries enjoyed renewed popularity. African countries promoted educational expansion with the expectation that it would lead to socio-economic development. The initial euphoria was however followed by skepticism and disillusion. Education began to be perceived even as a hindrance to development. This course examines the relationship between formal education and individual and national development. In this seminar, different paradigms of development including modernization and dependency theories and Third World Forum are presented with an emphasis on the perceived and actual roles of education in individual and national development.

AS&RC 503 African Aesthetics @
Fall. 4 credits. S. Hassan. The goal of this course is to investigate in depth the principles of aesthetics and philosophy of African visual arts. The course will offer a critical survey of the different writings and the growing body of research on this relatively new area of inquiry. The objectives of the course are to review how African aesthetics has been studied to date, to provide a critical analysis of the different approaches to the subject and related issues, and to suggest future directions of research. In-depth analysis of particular African societies will be used to examine the relationship of arts and aesthetics to indigenous concepts of time, space, color, form, and sociopolitical order. In addition, issues related to African aesthetics and arts such as style, gender, class, and social change will also be explored.

AS&RC 504 Political Change in Africa Fall. 4 credits. A. Mazrui. The study of Africa can be approached either dialectically (focusing on the tension between opposing forces) or thematically (focusing on themes as chapters of experience). This course will be devoted to thematic approaches. In their class assignments and examinations students are free to use either approach. The first approach will explore the dialectic between continuity and change; tradition and modernity; dependency and liberation; foreign and indigenous influences; politics; political and political development; democratic and authoritarianism; socialism and capitalism. The thematic approach will examine African Nationalism; race consciousness and Pan-Africanism; political parties and internal groupings; power, ethnicity in politics; class-formation; civil-military relations; economic and cultural dependency; sub-regional and continental Pan-Africanism; crisis of the African state; and Africa in World Politics.

AS&RC 510 Historiography and Sources: The Development of African-American History
Spring. 4 credits. A. Adams. Studies the way Black historians in particular have explained the African-American past. Examines the development of writing African-American history during the twentieth century. Seeks to determine the principles for interpreting African-American history. Acquaints participants with the methodologies and sources central to understanding the African-American experience.

AS&RC 530 Womanist Writing in Africa and the Caribbean @
Spring. 4 credits. A. Adams. Theoretical essays on the nature, relevance, and articulation of Black literary texts from African and Caribbean writers will complement literary texts. Gender issues, as manifested both at home and in emigrant situations abroad will be examined in texts by such writers as Sistren, Conde, Dangarembga, Aidoo, Warner-Vieyra, Ba, Emecheta, Kincaid, W. Mandela. Falcon worked may be read in the original by individuals who so desire.

AS&RC 598-599 Independent Study
598-fall; 599-spring. Variable credit. For all graduate students.

AS&RC 601-602 Africana Studies Graduate Seminar
601. 4 credits. Spring. 4 credits. Africana Studies faculty. This course, which will be conducted as a seminar, is designed for first-year AS&RC graduate students. It will be coordinated and supervised by the professor but team-taught by three or four faculty per semester. Each participating faculty will be responsible for a topical segment of the course related to her/his areas of specialization or an area of interest pertaining to theory and methodology of Africana Studies.

AS&RC 698-699 Thesis
698, fall; 699, spring. Limited to Africana Studies and Research Center graduate students.

Agriculture, Food, and Society Concentration
A. G. Power, coordinator; G. Altschuler, M. M. Devine, emeritus; M. J. Esman, J. Fessenden MacDonald, C. C. Geisler, A. Gillespie, B. Ginsberg, D. J. Greenwood, S. L. Kaplan, D. R. Lee, T. J. Lowi, T. A. Lyon, P. L. Marcus, P. McMichael, V. Nee, D. I. Owen, D. Pimentel, N. T. Uphoff, D. Usner. Office: 275 Clark Hall, 255-6042. Agriculture, Food, and Society is an interdisciplinary concentration that is designed to introduce students to the study of agricultural and food systems from diverse perspectives within the liberal arts. The Agriculture, Food, and Society concentration seeks to make available to students a coherent program of study in which the role of agriculture in modern and prehistorical human societies and the development of societies can be understood in biological, social, scientific, and humanistic perspectives. The concentration draws upon courses in several colleges—in particular, the Colleges of Arts and Sciences, Agriculture and Life Sciences, and Human Ecology. The concentration is administered by a committee, the members of which are drawn from the faculty associated with the concentration. The members of this committee include faculty from each of the major colleges from which courses in the concentration are drawn. The work of the committee is supported administratively through the Biology and Society Major. The office of the Biology and Society Major (275 Clark Hall) also provides a central location for students to receive information about relevant course offerings, upcoming seminars and presentations, faculty interests, and so on.

Basic Requirements
The requirements for the Agriculture, Food, and Society concentration are designed to ensure a broad background in the biological, socioeconomic, and humanistic dimensions of agricultural and food issues. These requirements include foundation courses in biology; the Senior Seminar B&SoS/BioG/S&TS 469, Food, Agriculture, and Society; plus a minimum of five electives totaling 15 credits drawn from the courses offerings.

Students enrolling in the Agriculture, Food, and Society concentration should take the following foundation courses in biology to prepare themselves for work in agricultural science: a two-semester introductory biology sequence selected from Biological Sciences 109/110, 105/106, or 101-102 (Advanced placement introductory biology with a score of 4 or 5, or Biological Sciences 107/108, offered during the eight-week Cornell summer session, also satisfies the biological sciences requirement). These courses may be used to meet group I (physical or biological sciences) distribution sequence requirements in the College of Arts and Sciences. It is recommended (but not required) that students in the Agriculture, Food, and Society concentration elect one or more freshman
writing seminars with agriculturally related content to meet basic college requirements for graduation. The electives for the concentra-
tion, from which a minimum of five courses and 15 credits must be taken, are organized into three groups: agricultural and nutritional science, humanities, and social science/ history. Students must select one agricultural and nutritional science course, one humanities course, and three social science or history courses. A maximum of six of the 15 credits may be earned in 100-level courses.

In addition, students are required to take the senior seminar, B& Soc/Biog/Env 469, Food, Agriculture and Society. Adjustments to these and other requirement of the concentration may be made with the approval of the student's Agriculture, Food, and Society faculty adviser.

**American Studies**

**The Major**

The major in American Studies, appropriate for a wide variety of future professions, began as a program of coordinated study in the history, literature, and politics of the United States. These remain the core elements, but American Studies aims to be inclusive in its subject matter. Given the nation's diverse population and cultures, the program wants its majors to examine American experience in broad terms, drawing on the materials and methods of a variety of disciplines.

The prerequisites are two courses from the following: American Studies 101, American Studies 102, English 262, English 265, English 275, English 276, English 469, Government 111, History 101, History 102, History 260, History 261. Students who contemplate becoming an American Studies major are encouraged to speak with the program director as early as possible to arrange for a major adviser.

In consultation with their advisers, American Studies majors elect, in addition to the prerequisites, 36 credits (or nine courses) chosen from the American Studies course list (these courses are usually crosslisted with courses in other departments). The program includes courses in all of the three large periods into which the nation's development can be divided (colonial, nineteenth century, and twentieth century). Students must take no more than five courses before 1900. At least one of these courses must be in the period before 1800. Each student must also take one of American Studies 430 seminars or, with the approval of the adviser, an appropriate substitute seminar at the 400-level. (American Studies 500 taught in Washington, DC, does not fulfill the seminar requirement.) Students are given considerable freedom in creating a balanced program, but no more than five courses may be in any one department.

Beyond the basic core requirements for the major, 8 credits of work in the history or literature of a culture outside the United States are required. Students who study abroad for one semester usually satisfy this requirement. Students may find courses relevant to American experience that they wish to take that are not on the American Studies course list. With their adviser's approval, students may count two such courses towards fulfilling the major.

**Honors**

Candidates for honors must maintain an average of B+ in courses pertinent to the major. Normally, at the end of the junior year students who wish to write a senior honors essay must approach a member of the American Studies Program faculty and discuss their ideas for a project. With approval from the faculty member students may then register in the fall of their senior year for American Studies 493, the honors essay tutorial. At the end of the fall semester, candidates will meet with their adviser and a second member of the American Studies faculty to discuss their progress. If satisfactory, honors students will complete their honors essays in the spring by enrolling in American Studies 494.

**Prerequisite Courses (see also under appropriate departments)**

**AM ST 101 Introduction to American Studies: American Revolution to the Beginning of the 20th Century #**

Fall. 4 credits. G. Altshuhler and D. McCall.

In this interdisciplinary course we will analyze American values and behavior as the intersection of culture, politics, literature, and society. We will do so by examining eight "great" or classic texts written between 1775–1900. The historical context of these texts will be explored in lecture and they will be treated as literature and historical/cultural documents. Texts include: Common Sense by Thomas Paine, The Blithedale Romance by Nathaniel Hawthorne, The Lincoln-Douglas Debates, The Bostonians, The Great Gatsby, The Sound and the Fury, The Huckleberry Finn, and American Pastoral. The historical context of these texts will be explored in lecture and they will be treated as literature and historical/cultural documents. Texts include: Common Sense by Thomas Paine, The Blithedale Romance by Nathaniel Hawthorne, The Lincoln-Douglas Debates, The Bostonians, The Great Gatsby, The Sound and the Fury, The Huckleberry Finn, and American Pastoral.

**AM ST 102 Introduction American Studies: Progressive Era to the Present**

Spring. 4 credits. G. Altshuhler and D. McCall.

In this interdisciplinary course we will analyze American values and behavior as the intersection of culture, politics, literature, and society. We will do so by examining eight "great" or classic texts written between 1900 and the present. Texts include: Ernest Hemingway's A Farewell to Arms, F. Scott Fitzgerald's The Great Gatsby, William Faulkner's Sound and the Fury, Richard Wright's Black Boy, John Updike's Rabbit Run, and Philip Roth's American Pastoral.

American Studies 101 is not a prerequisite of American Studies 102.

**American Studies 430 Seminars**

**Section One: The Politics of the American Civil War (also Government 408)**

Fall. 4 credits. R. Bensel.

The Civil War, along with the founding of the nation in the late eighteenth century, is one of the two most important influences on the course of American Political development. Arising out of intense ideological, cultural, and economic competition between the slave South and the free labor North, the conflict created two new national states: a northern Union that replaced the loose federation of the antebellum period and a southern Confederacy that perished at Appomattox. In this course, particular attention will be paid to: (1) the political economy and culture of plantation slavery in the antebellum South; (2) the apparent inevitability of collision between the slave and free states and their respective societies; (3) the military, political, and economic strategies that determined, on both sides, the course and duration of the war; (4) the limits and possibilities of reform of southern society during Reconstruction; and (5) the impact of the Civil War on the subsequent development of the United States.

**Section Two: American in the Camera's Eye (also History 430)**

Fall. 4 credits. R. L. Moore.

Photographs and films have become archives for historical research. From the era of Matthew Brady's Civil War images, the United States has been recorded by documentary photographers who have called attention to the country's progress and its poverty. Hollywood filmmakers have also recorded endless images of American landscape and placed against that landscape fictionalized accounts of the country's history and its social problems. What can we learn from these images? What is their relation to written texts and to other documents that tell us about the past? How truthful is documentary? How misleading is Hollywood? One key text will be James Agee's and Walker Evans' Let Us Now Praise Famous Men. The seminar will meet once each week for discussion and periodically during the semester to view films.

**Section Three: Literature as History: The Americas (also English 430)**

Spring. 4 credits. B. Maxwell.

Beginning with William Carlos Williams' In the American Grain (1925), this course will consider modernist innovations in the telling of history by literary means. Responding to what they felt as the "deadness" of conventional historiography, writers such as Williams, Charles Reznikoff, John Sanford, Muriel Rukeyser, Melvin Tolson, and Paul Metcalf produced imaginative histories that made a new world of historical narration, and in the process found new objects of historical attention, one of which was the plural, transnational America of the hemispheric Americas. This reconfiguration anticipated and in some cases shaped recent revisionist critiques of the European presence on American soil (Eduardo Galeano, Leslie Marmon Silko, David Stannard, Ward Churchill, Noam Chomsky, Ana Castillo); accordingly, students will read examples, some polemical, of that later work.
Anthropology, Sociology, and Economics

[AM ST 150 Introduction to American Religion (also Sociology 150 and Religious Studies 150)]
P. Becker.
For description, see SOC 150.

[AM ST 203 Religion and Family in the U.S. (also Sociology 201, Rural Sociology 202, Religious Studies 203)]
P. Becker.
For description, see SOC 201.

[AM ST 221 Anthropological Representation: Ethnographies of Latino Culture (also Anthropology 221 and Latino Studies Program 221)]
For description, see ANTHRO 221.

[AM ST 322 American Economic History (also Economics 323)]
Spring. 4 credits. P. McClelland.
For description, see ECON 323.

[AM ST 377 The United States (also Anthropology 377 and Latino Studies Program 377)]
Fall. 4 credits. V. Santiago-Irizarry.
For description, see ANTHRO 377.

[AM ST 380 Gender, Ideology, and Culture (also Sociology 380 and Women's Studies 380)]
Not offered 1999–2000. 4 credits.
P. Becker.
For description, see SOC 380.

[AM ST 426 History of American Enterprise (also Economics 426)]
P. McClelland.
For description, see ECON 426.

Literature and Theatre Arts

[AM ST 216 Comparative American Literature (also Comparative Literature 215)]
Fall. 4 credits. B. Maxwell.
For description, see COM L 215.

[AM ST 240 Survey in US Latino Literature (also English 240)]
Spring. 4 credits. M. P. Brady.
For description, see ENGL 240.

[AMST 250 Introduction to American Indian Literature (also English 250)]
Fall. 4 credits. R. Warrior.
For description, see ENGL 250.

[AM ST 262 Asian American Literature (also English 262, Asian American Studies 262)]
Fall. 4 credits. S. Wong.
For description, see ENGL 262.

[AM ST 265 Introduction to African American Literature (also English 265)]
Fall. 4 credits. J. Goldsby.
For description, see ENGL 265.

[AM ST 267 American Literary Identities: Nineteenth Century (also English 267)]

AM ST 268 The Culture of the 1960s (also English 268)
Fall. 4 credits. P. Sawyer.
This course argues that the 1960s helps define the 1990s, but that as we look back, the 1990s helps define the 1960s. Were the sixties a time of dangerous experimentation with drugs, sex, and alternative lifestyles on the part of a pampered generation that gradually learned to straighten up and join the mainstream? Or was it a time of revolutionary hopefulness, when the civil rights movement and the Vietnam War stimulated an impassioned critique that changed American society? What can the experiences of young "boomers" contribute to a later generation, the last of the twentieth century? The course explores these and other questions by focusing on the topics of racial justice, war, the counterculture, the New Left, and the women's movement. Texts will include: The Autobiography of Malcolm X, The Electric Kool-Aid Acid Test, Dispatches, the poems of Allen Ginsburg and Adrienne Rich, films, music, speeches, manifestoes, and memoirs. The term paper will explore students' special interests.

AM ST 275 The American Literary Tradition (also English 275)
Fall. 4 credits. H. Spillers.
The problem of an American national literature is explored through the reading, discussion, and close analysis of texts across the range of American literary history. Not a survey, this course focuses on the relations of the texts to each other, the shaping of national identities in those relationships, and the assumptions about history, language, and the self that underlie them.

AM ST 276 Literature in the Cold War Culture (also English 276)
For description, see ENGL 276.

AM ST 291 American 1920s: Literature and Culture (also English 291)
Fall. 4 credits. B. Maxwell.
For description, see ENGL 291.

AM ST 318 Queer Theatre (also Theatre Arts 320)
Spring. 4 credits. E. Gainor.
For description, see THETR 320.

[AM ST 334 American Drama and Theatre (also Theatre Arts 336 and English 336)]
E. Gainor.
For description, see THETR 336.

[AM ST 335 Contemporary American Theatre (also Theatre Arts 337 and English 337)]
E. Gainor.
For description, see THETR 337.

AM ST 338 American Indians and Film (also Theatre Arts 338)
Fall. 4 credits. L. Black.
For description, see THETR 338.

AM ST 361 Early American Literature (also English 361)
Spring. 4 credits. S. Samuels.
For description, see ENGL 361.

AM ST 362 The American Renaissance (also English 362)
Fall. 4 credits. J. Porte.
For description, see ENGL 362.

AM ST 363 The Age of Realism and Naturalism (also English 363)
Spring. 4 credits. J. Goldsby.
For description, see ENGL 363.

[AM ST 364 American Literature Between Wars (also English 364)]
For description, see ENGL 364.

[AM ST 365 American Literature Since 1945 (also English 365)]
B. Maxwell.
For description, see ENGL 365.

D. McCall.
For description, see ENGL 366.

[AM ST 367 The Modern American Novel (also English 367)]

[AM ST 369 Survey of African American Literature to 1917 (also English 375)]
J. Goldsby.
For description, ENGL 375.

[AM ST 370 Survey in African American Literature: 1918 to Present (also English 376)]
H. Spillers.
For description, see ENGL 376.

[AM ST 371 American Poetry to 1950 (also ENGL 371)]
R. Gilbert.
For description, see ENGL 371.

[AM ST 372 American Poetry Since 1950 (also English 378)]
Fall. 4 credits. R. Gilbert.
For description, see ENGL 378.

[AM ST 374 19th-Century American Women Writers (also English 374 and Women's Studies 378)]
Staff.
For description, see ENGL 374.

[AM ST 394 Topics in American Indian Literature: Native Cultural Studies (also English 394)]
Spring. 4 credits. Staff.
For description, see ENGL 394.

[AM ST 465 Proseminar in American Studies (also English 465)]
J. Porte.
For description, see ENGL 465.

[AM ST 467 Studies in American Fiction: 1870–1915 (also English 467)]

AM ST 469 William Faulkner (also English 469)
Fall. 4 credits. H. Spillers.
For description, see ENGL 469.

AM ST 470 Studies in the Novel: Hemingway, Fitzgerald, Faulkner (also English 470)
Spring. 4 credits. D. McCall.
For description, see ENGL 470.
AM ST 471 American Indian Women's Literature (also English 471)
For description, see ENGL 471.

AM ST 473 American Indian Autobiography (also English 473)
For description, see ENGL 473.

AM ST 474 Contemporary African American Poetry (also English 474)
K. McClane.
For description, see ENGL 474.

AM ST 479 Jewish-American Writing (also English 479 and Jewish Studies 476)
Fall. 4 credits. J. Porte.
For description, see ENGL 479.

AM ST 485 American Modernist Writing (also English 485)

Government and Public Policy

GOVT 111 Introduction to American Government and Politics
Fall. 3 credits. T. J. Lowi.
An introduction to government through the American experience. Concentration on analysis of the institutions of government and politics as mechanisms of social control.

AM ST 302 Social Movement in American Politics (also Government 302)
Spring. 4 credits. M. E. Sanders.
For description, see GOVT 302.

AM ST 305 Public Opinion and Political Participation (also Government 304)
Fall. 4 credits. J. Cowden.
For description, see GOVT 305.

AM ST 306 Latino Politics in the United States (also Government 306)
Spring. 4 credits. P. Caban.
For description, see GOVT 306.

AM ST 310 Civil Liberties in the United States (also Government 327)
Spring. 4 credits. J. Rabkin.
For description, see GOVT 327.

AM ST 315 Prisons (also Government 314)
Spring. 4 credits. M. Katzenstein.
For description, see GOVT 314.

AM ST 316 The American Presidency (also Government 316)
M. E. Sanders.
For description, see GOVT 316.

AM ST 319 The American Congress (also Government 319)
Spring. 4 credits. M. Sheffer.
For description, see GOVT 318.

AM ST 328 Constitutional Politics: The United States Supreme Court (also Government 328)
Fall. 4 credits. J. Rabkin.
For description, see GOVT 328.

AM ST 350 Atomic Consequences: The Incorporation of Nuclear Weapons in Postwar America (also Science and Technology Studies 350, Government 305)
Spring. 4 credits. M. Dennis.
For description, see S&TS 350.

AM ST 353 Feminism Movements and the State (also Government 353, Women's Studies 353)
Fall. 4 credits. M. Katzenstein.
For description, see GOVT 353.

AM ST 376 American Political Thought from Madison to Malcolm X (also Government 366 and History 316)
I. Kramnick.
For description, see GOVT 366.

AM ST 388 Science in the American Polity, 1800-1960 (also Science and Technology Studies 390, Government 308)
M. Dennis.
For description, see S&TS 390.

AM ST 389 Science in the American Polity, 1960-Now (also Science and Technology Studies 391, Government 309)
Spring. 4 credits. M. Dennis.
For description, see S&TS 391.

AM ST 409 Racial Prejudice and Political Intolerance (also Government 409)
Spring. 4 credits. J. Cowden.
For description, see GOVT 409.

AM ST 418 The Politics of Scandal (also Government 419)
Spring. 4 credits. M. Sheffer and J. Rabkin.
For description, see GOVT 419.

AM ST 428 Government and Public Policy: An Introduction to Analysis and Criticism (also Government 428)
Fall. 4 credits. T. Lowi.
For description, see GOVT 428.

AM ST 429 Government and Public Policy: An Introduction to Analysis and Criticism (also Government 429)
Spring. 4 credits. T. Lowi.
For description, see GOVT 429.

History

AM ST 103 Introduction to American History (also History 101)
Fall. 4 credits. D. Usner.
A survey of American history from the beginning through the Civil War. Topics include cultural encounters in the age of Columbus, European colonization, the American Revolution, the early republic, antebellum reform movements, and the coming of the Civil War.

AM ST 104 Introduction to American History (also History 102)
Spring. 4 credits. M. C. Garcia.
An introductory survey of the development of the United States since the Civil War.

AM ST 201 Popular Culture in the United States, 1900-1945
G. Altschuler.
American Studies 201 will deal with American popular culture in the period between 1900 and the end of World War II. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines and music, we will try to better understand the ways in which popular culture as “contested terrain,” the place where social classes, racial and ethnic groups, women and men, the powerful and the less powerful, seek to “control” images and themes. Topics for 201 include: the Western; Cultural Heroes and the Cult of Individualism in the 1920s; The Hays Code and the Black Sox scandal; Mae West and the “New Women” Advertising in an Age of Consumption; Gangsters and G-Men; Jackie Robinson and the American Dilemma.

AM ST 202 Popular Culture in the United States, 1945-Present
G. Altschuler.
American Studies 202 will treat the period from 1945 to the present. As we examine best-sellers, films, sports and television, radio, ads, newspapers, magazines and music, we will try to better understand the ways in which popular culture shapes and/or reflects American values. The course will also depict popular culture as “contested terrain,” the place where social classes, racial and ethnic groups, women and men, the powerful and less powerful, seek to “control” images and themes. Topics for 202 include: The “Honey-moons” and 1950s Television; soap operas; “Gross-out” movies; Elvis; The Beatles, and Guns ‘n Roses; Gothic Romances; People; Magazaine and USA Today.

AM ST 204 Comparative Migration in the Americas (also History 202)
M.C. Garcia.
For description, see HIST 202.

AM ST 208 Seminar: Era-Franklin D. Roosevelt (also History 208)
Fall. 4 credits. R. Polenberg.
For description, see History 208.

AM ST 214 Seminar on American Foreign Policy (also History 214)
Fall. 3 credits. Prerequisite: permission of instructor. W. LaFeber.
For description, see HIST 214.

AM ST 241 History of Childhood in the United States (also Human Development and Family Studies 241 and History 271)
Fall. 4 credits. J. Brumberg.

AM ST 251 Black Religious Traditions from Slavery to Freedom (also History 251 and Religious Studies 251)
For description, see HIST 251.

AM ST 258 Historical Development of Women as Professionals, 1800 to Present (also Human Development and Family Studies 258, History 238, Women's Studies 238)
J. Brumberg.
For description, see HD 258.

AM ST 259 Introduction to US Latino History, Part I (also History 260, Latino Studies Program 260)
Spring. 4 credits. M. C. Garcia.
For description, see HIST 260.

AM ST 261 Introduction to US Latino History, Part II (also History 261, Latino Studies Program 261)
Fall. 4 credits. M. C. Garcia.
For description, see HIST 261.

AM ST 272 American Indian History, 1500–1600 (also History 276)
D. Usner.
For description, see HIST 276.

AM ST 301 American Indian Women's Studies (also History 301, Women's Studies 301, Women's Studies Program 301)
Spring. 4 credits. M. C. Garcia.
For description, see HIST 301.

AM ST 302 American Indian Women's Studies Program 261)
Spring. 4 credits. M. C. Garcia.
For description, see HIST 260.

AM ST 303 American Indian Women's Studies (also History 303, Women's Studies 303, Women's Studies Program 303)
Spring. 4 credits. M. C. Garcia.
For description, see HIST 303.
AM ST 273 Women in American Society, Past and Present (also History 273)
Spring. 4 credits. M. B. Norton.
For description, see HIST 273.

[AM ST 277 American Indian History Since 1830 (also History 277) 4 credits. Not offered 1999–2000.
J. Silbey.
For description, see HIST 277.]

M. Washington.
For description, see HIST 303.]

M. Kammen.
For description, see HIST 304.

J. Silbey.
For description, see HIST 311.]

J. Silbey.
For description, see HIST 312.]

[AM ST 314 History of American Foreign Policy, 1912 to the Present (also History 314) 4 credits. Not offered 1999–2000.
T. Borstelmann.
For description, see HIST 314.]

R. Polenberg.
For description, see HIST 317.]

N. Salvatore.
This course examines both the experience and the perception of work in American life in the century framed by two fundamental formations: the emergence of a system of industrial capitalism largely nationalistic in its orientation and the development of a more international economic system in more recent times. Among the topics considered will be the effects of technological change, its impact on the experience of work across numerous occupational categories, and the changing perceptions of work as reflected in contemporary cultural expression, literature, and commentary across the century.]

M. B. Norton.
For description, see HIST 321.]

M. B. Norton.
For description, see HIST 325.]

N. Salvatore.
The idea of dissent in American society raises a variety of images. Civil rights activists, striking workers, and student radicals of the 1960s are familiar enough symbols of dissent. But might we understand a Pentecostal believer, filled with the spirit of his or her God in critiquing contemporary society, as an example of American dissent? This course will explore the varieties of economic, political, and cultural dissent in American between 1880 and 1990, and will examine how understanding dissent in its specific historical context illuminates major aspects of American life and culture.]

D. Usner.
For description, see HIST 327.]

J. Silbey.
For description, see HIST 330.]

J. Silbey.
For description, see HIST 331.]

AM ST 332 The Urbanization of American Society, 1600 to 1860 (also History 332) Fall. 4 credits. S. Blumin.
For description, see HIST 332.

For description, see HIST 333.

S. Blumin.
For description, see HIST 336.]

S. Blumin.
For description, see HIST 337.]

R. Polenberg.
For description, see HIST 340.]

AM ST 341 Recent American History, 1960–Present (also History 341) Fall. 4 credits. R. Polenberg.
For description, see HIST 341.

R. L. Moore.
For description, see HIST 345.]

[AM ST 346 Modernization of the American Mind (also History 346) Fall. 4 credits. R. L. Moore.
For description, see HIST 346.]

J. Brumberg.
For description, see HD 359.]

AM ST 378 Topics in US Women's History (also History 378 and Women's Studies 378) Fall. 4 credits. M. B. Norton.
For description, see HIST 378.

AM ST 411 Seminar: American Political History (also History 411) Spring. 4 credits. J. Silbey.
For description, see HIST 411.

AM ST 417 History of Female Adolescence (also Human Development 417, History 458, Women's Studies 438) Fall. 4 credits. J. Brumberg.

L. L. Meixner.
For description, see ART H 462.

Honors Please see description of major for information about registration in these courses.

AM ST 493-494 Honors Essay Tutorial 493, fall; 494, spring. Up to 4 credits each semester. See R. L. Moore for appropriate advisor.

Center for Applied Mathematics

The Center for Applied Mathematics administers a broadly based interdepartmental graduate program that provides opportunities for study and research over a wide range of the mathematical sciences. This program is based on a solid foundation in analysis, algebra, and methods of applied mathematics. The remainder of the graduate student's program is designed by the student and his or her Special Committee. For detailed information on opportunities for graduate study in applied mathematics, students should contact the Director of Graduate Studies of the Center for Applied Mathematics, 657 Frank H. T. Rhodes Hall. There is no special undergraduate degree program in applied mathematics. Undergraduate students interested in an application-oriented program in mathematics may select an appropriate program in the Department of Mathematics, the Department of Computer Science, or some department of the College of Engineering.

A listing of selected graduate courses in applied mathematics can be found in the description of the Interdisciplinary Centers, Programs, and Studies.

Archaeology Program

A. Ramage (history of art), program director
S. Baugher (landscape architecture),
R. G. Calkins (history of art), K. M. Clinton
(classics), J. E. Coleman (classics), D. Evett
(Language House Program), R. T. Farrell
(English), K. L. Gleason (landscape architecture),
J. S. Henderson (anthropology),
K. A. R. Kennedy (ecology and systematics),
P. I. Kuniholm (history of art), director of
undergraduate studies, D. I. Owen (Nineteenth
Eastern studies), N. Russell (anthropology),
B. S. Strauss (history), T. P. Volman (anthropology).

Archaeology is an interdisciplinary field at
Cornell, which is one of the few universities in the
United States to offer a separate archaeology
major. Program faculty members, affiliated with several departments, coordinate course offerings and help students identify opportunities for fieldwork, graduate study, and professional positions.

The Major

Prospective majors must complete Archaeology
100 or one of the basic courses as defined below before they will be admitted to the
major. This initial course will not be counted
the major requirements.

Because the major draws on the teaching and
research interests of faculty from many
departments to present a broad view of
the archaeological process, interested students
should discuss their course of study with a
participating faculty member as early as
possible. In some areas of specialization,
intensive language training should be
coordinated with other studies as early as the
freshman year.

Once admitted to the major, students must
take an additional 32 credits from the courses
listed below, selected in consultation with a
major adviser of their choosing. These
courses should provide exposure to a broad
range of archaeologically known cultures and
the methods of revealing and interpreting
them. Sixteen of the credit hours should be
at the 300 level or above. At least two courses
must be taken from each of categories B-E.

Courses basic to the discipline of archaeology
are marked with the word "Basic" after the
number of credit hours. It is recommended
that majors who are planning to pursue
graduate studies in archaeology should take
at least two of the basic courses in each
category. Further courses in languages and
geology are also recommended.

Honors. Honors in archaeology is awarded
on the basis of the quality of an honors essay
and the student's overall academic record.
Prospective honors students should have a 3.5
grade point in the major and a 3.0 gradepoint
overall. They should consult with the
director of undergraduate studies before the beginning of the senior year. The honors essay
is normally prepared in consultation with a
faculty adviser during the senior year; students
may enroll in Archaeology 481, fall; 482, spring for this purpose.

Fieldwork. Every student should gain some
practical experience in archaeological
fieldwork on a project authorized by his or
her adviser. This requirement may be waived
in exceptional circumstances. The Jacob and
Hedwig Hirsch bequest provides support for a
limited number of students to work at
excavations sponsored by Cornell and other
approved institutions.

The Concentration

Students in Cornell schools and colleges other
than Arts and Sciences may elect a concentration
in archaeology. To concentrate in
archaeology, the student must complete five
interdepartmental study courses above the 300
level, at least four of which must be
basic courses, or two five-course sequences of
archaeology courses. Concentrators are encouraged
to gain some fieldwork experience. They
are eligible on the same basis as majors for Hirsch
Scholarships in support of fieldwork.

First-Year Writing Seminars

For course descriptions, see the first-year
writing seminar brochure.

A. Introductory Courses and Independent Study
Courses

ARKEO 100 Introduction to Archaeology
(also Anthropology 100)
Fall. 3 credits. Basic. J. Henderson.
A broad introduction to archaeology—the
study of material remains to answer questions
about the human past. Case studies highlight
the variability of ancient societies and illustrate
the varied methods and interpretive frameworks
archaeologists use to reconstruct them.
This course can serve as a platform for both
Archaeology and Anthropology undergraduate majors.

ARKEO 201 Lost Tribes and Sunken Continents (also Anthropology 201)
Fall and spring. Credit to be arranged.
An examination of popular theories about past civilizations, differences among them, and the
interests of explorers and archaeologists.
Topics include the Fabian civilization of Atlantis, Stonehenge, Egyptian and Mexican
pyramids, and the history of contacts between the
Old World and the Americas.

ARKEO 300 Individual Study
Archaeology and Related Fields
Fall and spring. Credit to be arranged.
Prerequisite: Archaeology 100 or permission of instructor.
Students pursue topics of particular interest
with the guidance of a faculty member.

ARKEO 481-482 Honors Thesis
481, fall; 482, spring. 4 (V) credits. S-U only.
Prerequisite: Archaeology 100 or permission of instructor.
Students pursue topics of particular interest
with the guidance of a faculty member.

ARKEO 600 Special Topics in
Archaeology
Fall and spring. 4 (V) credits.
Students pursue advanced topics of particular interest under the guidance of a faculty
member(s).
**ARKEO 681–682 Master’s Thesis**

681, fall; 682, spring. 4 (V) credits. S-U only. Limited to students admitted to Master’s Program in Archaeology. Students, working individually with a faculty mentor(s), prepare a Master’s Thesis in Archaeology.

**B. Theory and Interdisciplinary Approaches**

- **ARKEO 202 Interpretive Archaeology** (also Anthropology 202) @
  - For description, see ANTHR 202.

- **ARKEO 203 Early People: The Archaeological and Fossil Record** (also Anthropology 203) #

- **ARKEO 204 Ancient Civilizations (also Anthropology 204) @**

- **ARKEO 215 Stone Age Art (also Anthropology 215) @**
  - Fall. 3 credits. T. P. Volman.
  - For description, see ANTHR 215.

- **ARKEO 317 Stone Age Archaeology (also Anthropology 317)**
  - For description, see ANTHR 317.

- **ARKEO 409 Approaches to Archaeology (also Archaeology 609 and Anthropology 409/609)**
  - Fall. 4 credits. Basic. Prerequisite: permission of instructor. N. Russell.
  - For description, see ANTHR 409.

- **ARKEO 494 Seminar in Archaeology: The Archaeology of Human Origins (also Anthropology 494) @**
  - Fall. 4 credits. T. P. Volman.
  - For description, see ANTHR 494.

- **ARKEO 609 Approaches to Archaeology (also Archaeology 409 and Anthropology 409/609)**
  - Fall. 4 credits. Basic. Prerequisite: permission of instructor. N. Russell.
  - For description, see ANTHR 609.

**BIO ES 371 Human Palaeoontology (also Anthropology 371)**

- Fall. 3 credits. K. A. R. Kennedy.

**LA 569 Archaeology in Preservation Planning and Design (also CRP 569)**

- Spring. 3 credits. S. Baughers.

For description, see LA 569.

**C. Old World Archaeology**

- **ARKEO 221 Minoan-Mycenaean Art and Archaeology (also Classics 221 and History of Art 221) @**
  - For description, see CLASS 221.

- **ARKEO 233 Archaeology in Action II (also History of Art 225 and Classics 233) @**
  - For description, see ART H 225.

- **ARKEO 263 Introduction to Biblical History and Archaeology (also NES 263, Jewish Studies 263, and Religious Studies 264) @**
  - Spring. 3 credits. J. Zorn.
  - For description, see NES 263.

- **ARKEO 275 Ancient Seafaring (also Jewish Studies 261 and Near Eastern Studies 261) @**
  - For description, see NES 261.

- **ARKEO 321 Mycenae and Homer (also Classics 321 and History of Art 321) @**
  - Fall. 4 credits. Prerequisite: at least one previous course in Archaeology, Classics, or History of Art. J. Coleman.
  - Study of the relationship between the Mycenaean period of Greece (known primarily from archaeology) and the Homeric* Iliad* and* Odyssey*. Topics include Mycenaean architecture, burial customs, kinship and military activities; the reasons for the collapse of the Bronze Age palatial economies; the archaeological evidence for society in the “Dark Ages” that followed; the writing systems of Mycenaean Greece (Linear B) and the Iron Age (the Semitic/Greek alphabet); the nature of the Homeric poems and their value as historical sources.

- **ARKEO 352 The City of Athens from Theseus to Justinian (also Classics 352 and History of Art 352) @**
  - Fall. 3 credits. Not offered 1999–2000. Staff.
  - For description, see CLASS 352.

- **ARKEO 366 The History and Archaeology of the Ancient Near East (also Jewish Studies 366 and Near Eastern Studies 366) @**
  - Fall. 4 credits. D. I. Owen.
  - For description, see NES 366.

- **ARKEO 380 Introduction to the Arts of China (also History of Art 380) @**
  - Fall. 4 credits. A. Pan.
  - For description, see ART H 380.

- **ARKEO 417 Early Medieval Archaeology and Literature (also Archaeology 617, English 417 and 617)**
  - Spring. 4 credits. Prerequisite: permission of instructor. Enrollment limited to 15 students. This course may be used as one of the three pre-1800 courses required of English majors. Not offered 1999–2000; next offered 2000–01. R. T. Farrell.
  - For description, see ENGL 417.

- **ARKEO 425 Seminar on the Bronze Age Architecture of Asia Minor (also Art History 425 and Classics 430)**

- **ARKEO 432 Sardis and the Cities of Asia Minor (History of Art 424 and Classics 432) @**

- **ARKEO 434 The Rise of Classical Greece (also History of Art 434 and Classics 434) @**
  - Spring. 4 credits. Recommended: Classics 220 or 221 or History of Art 220 or 221, or permission of instructor. P. I. Kuniholm.
  - For description, see ART H 434.

- **ARKEO 435 Seminar on Roman Art and Archaeology (also Classics 435 and History of Art 427) @**
  - For description, see ART H 427.

- **ARKEO 520 Seminar in Classical Archaeology (also History of Art 520 and Classics 630) @**
  - For description, see ART H 520.

- **ARKEO 617 Early Medieval Archaeology and Literature (also Archaeology 417, English 417 and 617)**
  - For description, see ENGL 417.

- **ARKEO 629 The Prehistoric Aegean (also Classics 629) @**
  - 4 credits. For graduate students, and advanced undergraduates with permission of instructor. Not offered 1999–2000. J. E. Coleman.
  - For description, see CLASS 629.

**CLASS 220 Introduction to Art History: The Classical World (also History of Art 220) @**

- Fall. 4 credits. A. Ramage.
  - For description, see CLASS 220.

- **CLASS 319 Art in the Daily Life of Greece and Rome (also History of Art 319)**
  - For description, see ART H 319.

- **CLASS 322 Greeks and Barbarians (also History of Art 328) @**
  - 4 credits. Prerequisite: Classics 220 or 221, or permission of instructor. Not offered 1999–2000. J. Coleman.
  - For description, see CLASS 322.

- **CLASS 329 Greek Sculpture (also History of Art 329)**
  - Spring. 4 credits. J. E. Coleman.
  - For description, see CLASS 329.

- **CLASS 333 Greek and Roman Mystery Cults and Early Christianity (also Religious Studies 333) @**
  - Fall. 4 credits. A previous course in Classics (civilization or language) or Religious Studies 101 is recommended. Not offered 1999–2000. K. Clinton.
  - For description, see CLASS 333.

- **ART H 322 Arts of the Roman Empire (also Classics 350) @**
  - For description, see ART H 322.

- **ART H 325 Greek Vase Painting (also Classics 325) @**
  - For description, see ART H 325.

- **ART H 327 Greek and Roman Coins (also Classics 327) @**
  - Spring. 4 credits. A. Ramage.
  - For description, see ART H 327.

- **LA 292 Creating a Second Nature**

  - Spring. 3 credits. K. Gleason.
  - For description, see LA 292.
D. New World Archaeology

[ARKEO 355] Ancient Mexico and Central America (also Anthropology 355) #
For description, see ANTHR 355.]

[ARKEO 493] Seminar in Archaeology (also Anthropology 493) #
Fall. 4 credits. Not offered 1999–2000.]

[ANTHR 456] Mesoamerican Religion, Science, and History #
Fall. 4 credits. Not offered 1999–2000.]

LA 360 Pre-Industrial Cities and Towns of North America (also CRP 360)
Fall. 3 credits. S. Baugher.
For description, see LA 360.

E. Methodology and Technology

[ARKEO 262] Laboratory in Landscape Archaeology (also Landscape Architecture 262)
Spring. 3 credits. Not offered spring 2000. S. Baugher.
For description, see LA 262.]

ARKEO 285 Art, Archaeology, and Analysis (also Landscape Architecture 185, Engineering 285, History of Art 200, MSA 285, History of Art 200, MSA 285, and Physics 200)
Spring. 3 credits. 3 lecs. Does not meet liberal studies distribution requirements. Staff.
For description, see GEO 200.

ARKEO 309 Dendrochronology of the Aegean (also History of Art 309 and Classics 309)
Fall and spring. 4 credits. Limited to 10 students. Prerequisite: permission of instructor. P. I. Kuniholm.
For description, see ART H 309.

ARKEO 361 Summer Program in Etruscan Archaeology at La Plana in Italy (also Classics 361) #
Summer only. 3 or 6 credits. Permission required. J. Whitehead.

ARKEO 370 Environmental Archaeology (also Anthropology 370 and Anthropology 370 and Anthropology 370 and Anthropology 370)
Fall. 4 credits. Prerequisite: two previous courses in archaeology or permission of instructor. Not offered 1999–2000.
T. P. Volman.
For description, see ANTHR 370.]

ARKEO 405 Archaeological Research Design (also Archaeology 405 and Anthropology 405 and Anthropology 405 and Anthropology 405)
T. P. Volman.
For description, see ANTHR 405.]

ARKEO 423 Ceramics (also History of Art 423 and Classics 423)
Fall. 4 credits. Prerequisite: permission of instructor. A. Ramage.
For description, see ART H 423.

ARKEO 458 Archaeological Analysis (also Anthropology 458 and Anthropology 458 and Anthropology 458 and Anthropology 458)
Spring. 4 credits. Prerequisite: one course in archaeology or permission of instructor. Enrollment limited to 15 students. Not offered 1999–2000.
J. S. Henderson.
For description, see ANTHR 458.]

ARKEO 463 Zooarchaeological Method (also Anthropology 463) #
Fall. 5 credits. N. Russell.
For description, see ANTHR 463.]

ARKEO 464 Zooarchaeological Interpretation (also Anthropology 464) #
Spring. 4 credits. N. Russell.
For description, see ANTHR 464.]

[ARKEO 466] Humans and Animals (also Anthropology 466 and Anthropology 466 and Anthropology 466 and Anthropology 466)
Fall. 4 credits. Not offered 1999–2000.]

[ARKEO 467] Origins of Agriculture (also Anthropology 467) #
Spring. 4 credits. Not offered 1999–2000.]

[ARKEO 469] Gender and Age in Archaeology (also Anthropology 469 and Anthropology 469 and Anthropology 469 and Anthropology 469)
Spring. 4 credits. Not offered 1999–2000.]

[ARKEO 601] Graduate Colloquium in Archaeology
4 credits. Open to graduate students and advanced undergraduates by permission of instructor. Not offered 1999-2000. Staff.
Faculty members of the Program in Archaeology and invited speakers will present summaries of the different aspects of archaeological analysis. Topics may include: lithics, ceramic typology, petrographic and neutron activation analysis, dendrochronology and other chronological techniques, settlement patterns, inscriptions, human and animal bones.]

[ARKEO 605] Archaeological Research Design (also Anthropology 405 and Anthropology 405 and Anthropology 405 and Anthropology 405)
J. S. Henderson, T. P. Volman.
For description, see ANTHR 405.]

[ARKEO 666 Humans and Animals (also Archaeology 666 and Anthropology 666 and Anthropology 666 and Anthropology 666)
Fall. 4 credits. Not offered 1999–2000.]

[ARKEO 669 Gender and Age in Archaeology (also Archaeology 669 and Anthropology 669 and Anthropology 669 and Anthropology 669)
Spring. 4 credits. Not offered 1999–2000.]

[ARKEO 670 Environmental Archaeology (also Anthropology 370 and Anthropology 370 and Anthropology 370 and Anthropology 370)
Fall. 4 credits. Prerequisite: two previous courses in archaeology or permission of instructor. Not offered 1999–2000.
T. P. Volman.
For description, see ANTHR 370.]

[ANTHR 371] Human Paleontology (also Biological Sciences 371)
Fall. 4 credits. Prerequisite: one year of introductory biology, Anthropology 101, or permission of instructor. Not offered 1999–2000.
K. A. R. Kennedy.
For description, see ANTHR 371.]

[ANTHR 474] Laboratory and Field Methods in Human Biology (also Biological Sciences 474)
5 credits. Prerequisite: one year of introductory biology, Anthropology 101, or permission of instructor. Not offered 1999–2000.
K. A. R. Kennedy.

[LA 261] Urban Archaeology (also CRP 261)
Fall. 3 credits. Not offered 1999–2000.
S. Baugher.
For description, see LA 261.]

Asian American Studies Program

The Asian American Studies Program is a university-wide academic program housed administratively within the College of Arts and Sciences. Its aim is to promote teaching, research, and educational activities related to Asian Americans and to serve as a resource to the campus and regional communities. The program's undergraduate courses, offered within the program and cross-listed with departments in various colleges, meet distribution requirements and count toward a concentration in Asian American Studies. The program does not offer a graduate course of study, but students can undertake graduate work in Asian American Studies within selected disciplines of the university.

Undergraduate Concentration

The program's undergraduate concentration affords students an opportunity to develop a multidisciplinary approach to the study of Asians in America. The course of study stresses developments within the United States, but also underscores the transnational and comparative contexts of Asian America and the field's connections with African American, American Indian, Latino, and Women's Studies. Students must work with a faculty adviser from among the program's affiliated faculty and must complete at least fifteen (15) units of credit as follows: (a) AAS 110 and two (2) additional courses in Asian American Studies; (b) one (1) course in Africana, American Indian, Latino Studies, or Women's Studies; and (c) one (1) course in East Asian, South Asian, or Southeast Asian Studies. (These courses must be approved by the student's faculty adviser, and they should address issues of race, gender, or the histories and cultures of Asian peoples.) Students must file an application for the concentration with the Asian American Studies Program.

Resource Center

The program's Asian American Studies Resource Center provides meeting space for the more than thirty-five undergraduate student organizations of the Cornell Asian Pacific Student Union and the graduate student Asian Pacific American Graduate Association. It also holds a modest print collection of books, periodicals, and newspapers; a current news clip file; a comprehensive database of publications on Asian Americans since 1977; and a sizable collection of videotapes on the Asian American experience.

Research

The program encourages faculty and student research on Asian Americans by sponsoring guest lectures, conferences, film festivals, readings, and exhibits. It also funds research projects and student travel to conferences and research sites. The Asian American Studies Workshop is the program's principal research initiative, engaging Cornell's faculty and students with invited faculty from other universities in a year-long intensive study of selected themes.
Affiliated Faculty
T. Chaloesmiatara (Southeast Asia Program), B. de Bary (Asian Studies), S. Han (Sociology), V. P. Kayastha (Kroch Library), J. V. Koschmann (History), L. C. Lee (Human Development), V. Munasinghe (Anthropology), V. Nee (Sociology), R. E. Ripple (Education), N. Sakai (Asian Studies), S. Samuels (English), A. M. Smith (Government), K. W. Taylor (Asian Studies), S. Tien (Gannett Health Center), S. Wong, director (English), D. Yeh (Vice President Student/ Academic Services)

Courses

AAS 110 Introduction to Asian American Studies
Spring. 3 credits. This course can be used to satisfy either a social science or humanities distribution requirement.
Interdisciplinary, cross-cultural introduction to Asian American Studies focusing on contemporary issues. Major themes include: identity and stereotypes, gender, family, community, education, migration and labor, and anti-Asianism. Coverage will be given to both Hawaii and the U.S. mainland, and to Asian Indians, Chinese, Filipinos, Hawaiians, Japanese, Koreans, and Southeast Asians.

[AAS 213 Asian American History]
Not offered fall 1999.
For description, see HIST 213.1

AAS 303 Asians in the Americas: A Comparative Perspective (also Anthropology 303)
Fall. 4 credits. The common perception of ethnicity is that it is a "natural" and an inevitable consequence of cultural difference. "Asians" overseas, in particular, have won more to their culture and refuse to assimilate into their host societies and cultures. But, who are the "Asians"? On what basis can we label Asians an ethnic group? Although there is a significant Asian presence in the Caribbean, the category "Asian" itself does not exist in the Caribbean. What does this say about the nature of categories that label and demarcate groups of people on the basis of alleged cultural and phenotypical characteristics? This course will examine the dynamics behind group identity, namely ethnicity, by comparing and contrasting the multicultural experience of Asian populations in the Caribbean and the United States. Ethnographic case studies will focus on the East Indian and Chinese experiences in the Caribbean and the Chinese, Korean, Japanese, Filipino, and Indian experiences in the United States.

AAS 262 Asian American Literature
For description, see ENGL 262.

AAS 412 Undergraduate Seminar in Asian American History (also History 412)
Spring. 4 credits. For description, see HIST 412. A reading and research seminar that will cover various topics in Asian American History.

[AAS 435 Asian American Images in Film]
3 credits. Prerequisite: AAS 110 or permission of instructor. Not offered spring 2000.
Examination of images of Asians in American film and television productions within their historical and socio-cultural contexts. Use of film and media theory to assess the impact of those images on both Asian and non-Asian American viewers. Students will be challenged to create, in video or on paper, images that avoid stereotypes and depict more realistically the Asian American experience.

[AAS 438 Immigration and Ethnic Identity]
For description, see SOC 438.

AAS 467 Psycho-Social Issues in Asian American Identity
Spring. 3 credits. For description, see HD 467.

[AAS 478 Self and Nation in Asian-American Literature (also English 478)]
A study of the ways in which Asian American writers have constructed their self and nation. Topics will include nationalism, feminism, identity politics, and theories of minority discourse. In our reading of selected works of prose, poetry and drama by Chinese American, Japanese American, and American and Korean American writers, we will be asking questions about the relation of these works to the moment of their production and reception, and the manner in which these texts engage with shifting cultural and political struggles. Writers under discussion may include: Carlos Bulosan, Theresa Hak Kyung Cha, Frank Chin, Jessica Hagedorn, David Henry Hwang, Maxine Hong Kingston, Joy Kogawa, David Mura.

[AAS 482 Twentieth Century Women Writers of Color]
This course will explore a range of writing—novels, stories, poems, essays—by American women writers of color in the twentieth century. We will look at how these writings articulate concerns with language, home, mobility, and memory, and at how the work is informed by the specificities of gender, race, region, and class. Readings may include works by Joy Hino, Leslie Marmon Silko, Sandra Cisneros, Gloria Anzaldua, Sandra Cisneros, Gloria Anzaldua, Theresia Hak Kyung Cha, Sigrid Nunez, Jamaica Kincaid, Maxine Hong Kingston, and Gwendolyn Brooks.

AAS 495 Independent Study
Fall or spring. 1-4 credits. Topic and credit hours to be mutually arranged between faculty and student. Independent Study Forms must be approved by Asian American Studies Program Office.

Biology and Society Major

J. V. Koschmann (History), L. C. Lee (Human Development), V. Munasinghe (Anthropology), V. Nee (Sociology), R. E. Ripple (Education), N. Sakai (Asian Studies), S. Samuels (English), A. M. Smith (Government), K. W. Taylor (Asian Studies), S. Tien (Gannett Health Center), S. Wong, director (English), D. Yeh (Vice President Student/ Academic Services)

The Biology and Society major is ideally suited for students who wish to combine training in biology with exposure to perspectives from the social sciences and humanities on the social, political, and ethical aspects of modern biology. In addition to providing foundational training in basic biology, Biology and Society students obtain background in the social dimensions of modern biology and in the biological dimensions of contemporary social issues.

The Biology and Society major, which involves faculty from throughout the university, is offered by the Department of Science & Technology Studies. Students in the College of Arts and Sciences and the College of Agriculture and Life Sciences can develop an approved sequence of courses from the Biology and Society curriculum under general studies. The major is coordinated for students in all colleges through the Biology and Society office. Students can get information, specific course requirements, and application procedures for the major from the undergraduate records office in 275 Clark Hall, 255-6047.

Because the major is multidisciplinary, students must obtain a basic understanding of the several disciplines it comprises. The curriculum includes courses in ethics, mathematics, statistics, history, philosophy, and social studies of science and biology; and basic biology (e.g., cell and molecular biology, biochemistry and molecular-cell biology, ecology, evolutionary biology) as well as integrative courses offered through Biology and Society. In addition, majors are required to take a core course and must develop a major theme: an intellectually coherent grouping of courses representative of their special interest in Biology and Society. Recommended themes in the Biology and Society major include biology, behavior, and society; biology and human population; biology and public policy; environment and society; food agriculture, and society; and health and society. Students may also develop their own individually tailored themes (which in recent years have included topics such as biotechnology and society, and agriculture, environment, and society). In consultation with their faculty adviser, students select courses that meet the foundation and core course requirements so as to build a coherent theme. Sample curricula for the recommended themes and for several student developed themes are available in the Biology and Society office.

There are student advisers and faculty available (according to posted office hours or by appointment) in the Biology and Society office, 275 Clark Hall or 278 Clark Hall, to answer questions and to provide assistance.

Admission to the Major

All students should have completed a year of college-level biology before submitting an application during their sophomore year. Juniors are considered on a case-by-case basis. Upper-division applicants should realize the difficulties of completing the major requirements in fewer than two years. The application includes (1) a one-page statement explaining the student's intellectual interests in biology and society.
Major Requirements

No single course may satisfy more than one major requirement.

1) Basic courses

A. Biological sciences: 101–104 or 105–106 or 107–108 (prerequisite for admission to Biology and Society).

B. College calculus (one course): Math 106, 111, 112 or any higher level calculus.

Recommended but not required:
- General chemistry (one year sequence) (prerequisite to biochemistry and other chemistry courses):
  - Chemistry 103-104, 207-208, or 215-216.

2) Foundation Courses (should be completed by end of junior year).

These courses must be above the 100-level, at least 3 credit hours and taken for a letter grade.

A. Ethics: one course; B&SOC 205 (also S&TS 205) or B&SOC 206 (also S&TS 206).**

B. Social sciences/humanities foundation: two courses; one from any two of the following subject areas: History of Science; Philosophy of Science; Sociology of Science; Politics of Science; and Science Communication.**

C. Biology foundation (breadth requirement): three courses; one each from three of the following subject areas: Ecology; Philosophy of Science; Sociology of Science; Molecular and Cell Biology; Evolutionary Biology (BIO ES 270); Biochemistry; Molecular and Cell Biology (BIO BM 231 or 350 or 351 or 353); Microbiology (BIO MI 290); Genetics and Development (BIO GD 281 or 282 or Plant Breeding 225); Neurobiology and Behavior (BIO NB 221 or 222); Botany (BIO PL 241); and Anatomy and Physiology (BIO AP 311 or NS 341 but NOT BIO AP 212).

D. Biology foundation (depth requirement): one biology course for which one of the above (2.C.) is a prerequisite.

E. Statistics: one course selected from MATH 171, IRL 210, BTRY 215, AG EC 310, EDUC 253, Soc 301, Psych 350, Econ 319, ORIE 370, BTRY 601, CRP 320.

3) Core Course: (one course). Should be completed by end of junior year.

B&Soc 301 Biology and Society: The Social Construction of Life (also S&TS 401); or Phil 286: Science and Human Nature (also S&TS 286).

4) Theme (five courses that correspond to the theme selected by the student)

Themes are chosen by students. There are four options:

a) Natural Science Issues/Biological Elective (two courses). Select from the list of B&Soc approved Natural Science Issues courses or choose courses with introductory biology as a prerequisite from:
- ALS, AN SC, BIOSCI, ENTR, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VT/MED.

b) Humanities/social sciences electives** (Two courses. Courses from the list of Senior Seminars may be used as theme electives if not used to meet another requirement).

c) Senior Seminar (one course taken senior year). Courses change yearly.

** Students may petition to take a second statistics course (an advanced course, in sequence with the statistics course taken in the foundation) in place of the calculus requirement.

** Among the courses taken to meet the social sciences and humanities requirements (2.A, 2.B, 3, and 4.C), a minimum of two social science courses and two humanities courses must be chosen.

History of science courses may be counted toward the humanities requirement for the major.

Independent Study

Projects under the direction of a biology and society faculty member are encouraged as part of the program. Students may design their own theme area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1-4 credits in Biology and Society 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology and Society office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

The Honors Program

The honors program is designed to provide independent research opportunities for academically talented undergraduate students whose major is Biology and Society (B&SOC). Students who enroll in the honors program are expected, with faculty guidance, to do independent study and research dealing with issues in biology and society. Students who participate in the program should find the experience intellectually stimulating and rewarding whether or not they intend to pursue a research career.

Biology and Society majors are considered for entry into the honors program at the end of the spring semester before their senior year. Application forms for the honors program are available in the Biology and Society office, 275 Clark Hall. The honors program is available to Biology and Society majors from the College of Arts and Sciences. Biology and Society majors in the Colleges of Human Ecology and Agriculture and Life Sciences must be selected by an honors committee within their college. To qualify for the Biology and Society honors project, students must have an overall Cornell cumulative grade-point average of at least 3.5, have formulated a research topic, and have found a project supervisor (with a Cornell appointment) and a Biology and Society faculty member willing to serve as their advisers. Applications will be reviewed by a committee headed by the director of undergraduate studies, who will notify students directly of the outcome. Students will be permitted to register for the honors program only by permission of the department. More information on the honors program is available in the Biology & Society office, 275 Clark Hall (255-0407).
We address how ethical analysis helps shape our responses to environmental problems. Major aims include: articulating the ideology, politics, and prudence or wisdom. A background in basic ecology or environmental issues or ethics is helpful.

1. History of Science

B&SOC 207 Evolution (also Science and Technology Studies 287 and History 287)  Fall or summer. 3 credits. (Intended for students with no background in college biology. May not be taken for credit after BIOES 278.) W. B. Provine. For description, see BIOG 207.

[COMM 466 Communication of Science and Technology  Fall. 3 credits. Not offered 1999–2000. B. Lewenstein.]

2. Ecology

B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)  Fall. 4 credits. Prerequisite: two semesters of social science or humanities and one year of introductory biology. Limited to 75 students. May be used to meet the sociology of science requirement if not used to meet the core course requirement. Staff. See Core Courses for description.

B&SOC 342 Sociology of Science (also Science and Technology Studies 442 and City and Regional Planning 442)  Fall. For description, see S&TS 442.

HSS 246 Determinants of Behavior (also PAM 201)  Fall. 3 credits.

R SOC 208 Technology and Society  Fall. 3 credits.

S&TS 201 What Is Science? An Introduction to the Social Studies of Science and Technology  Spring. 3 credits. T. Pinch.

S&TS 311 The Sociology of Medicine  Spring. 4 credits. S. Hilgartner.

3. Sociology of Science

[PHIL 381 Philosophy of Science: Knowledge and Objectivity (also Science and Technology Studies 381)  Fall. 4 credits. Limited to 30 students. R. Boyd. For description, see PHIL 381.]

3. Sociology of Science

B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)  Fall. 4 credits. Prerequisite: two semesters of social science or humanities and one year of introductory biology. Limited to 75 students. May be used to meet the sociology of science requirement if not used to meet the core course requirement. Staff. See Core Courses for description.

B&SOC 342 Sociology of Science (also Science and Technology Studies 442 and City and Regional Planning 442)  Fall. For description, see S&TS 442.

R SOC 208 Technology and Society  Fall. 3 credits.

S&TS 201 What Is Science? An Introduction to the Social Studies of Science and Technology  Spring. 3 credits. T. Pinch.

S&TS 311 The Sociology of Medicine  Spring. 4 credits. S. Hilgartner.

4. Politics of Science

[PHIL 381 Philosophy of Science: Knowledge and Objectivity (also Science and Technology Studies 381)  Fall. 4 credits. Limited to 30 students. R. Boyd. For description, see PHIL 381.]

3. Sociology of Science

B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)  Fall. 4 credits. Prerequisite: two semesters of social science or humanities and one year of introductory biology. Limited to 75 students. May be used to meet the sociology of science requirement if not used to meet the core course requirement. Staff. See Core Courses for description.

B&SOC 342 Sociology of Science (also Science and Technology Studies 442 and City and Regional Planning 442)  Fall. For description, see S&TS 442.

R SOC 208 Technology and Society  Fall. 3 credits.

S&TS 201 What Is Science? An Introduction to the Social Studies of Science and Technology  Spring. 3 credits. T. Pinch.

S&TS 311 The Sociology of Medicine  Spring. 4 credits. S. Hilgartner.

4. Politics of Science

5. Science Communication

COMM 260 Scientific Writing for Public Information  Fall or spring. 3 credits. Limited to 25 nonfreshman or graduate students per section. Prerequisite: any college-level writing course.

COMM 285 Communication in the Life Sciences (also S&TS 285)  Spring. 3 credits. B. Lewenstein.

7. Botany

BIOL 241 Introductory Botany  
Fall. 3 credits.  
For description, see BIOL 241.

8. Physiology and Anatomy

BIOP 311 Introductory Animal Physiology, Lectures (also Veterinary Medicine 346)  
Fall. 3 credits.  
Prerequisite: one year of college biology, chemistry, and mathematics.  
Recommended: previous or concurrent course in physics.

NS 341 Human Anatomy and Physiology  
Spring. 4 credits.  
Prerequisite: college biology (NS 115 recommended).  
Permission only.

D. Biology foundation (depth requirement): one course for which one of the above breadth requirement courses (2C) is a prerequisite.

E. Statistics (select one)

ARME 210 Introductory Statistics  
Fall. 4 credits.

BTRY 215 Introduction to Statistical Methods  
Fall. 3 credits.

BTRY 601 Statistical Methods I  
Fall. 4 credits.

CRP 223 Introduction to Statistical Reasoning for Urban and Regional Analysis  
Fall. 3 credits.

ECON 319 Introduction to Statistics and Probability  
Fall or summer. 4 credits.  
Prerequisites: Economics 101-102 and Mathematics 111-112.

ILRST 210 Statistics: Statistical Reasoning  
Fall and spring. 3 credits.

PSYCH 350 Statistics and Research Design  
Fall. 4 credits.

SOC 301 Evaluating Statistical Evidence  
Fall. 4 credits.

III. Core Courses

B&SOC 301 Biology and Society: The Social Construction of Life (also Science and Technology Studies 401)  
Fall. 4 credits.  
Prerequisite: two semesters of social science or humanities and one year of introductory biology or permission of instructor. Limited to 75 students. Staff.  
Critical thinking about the diverse influences shaping the life sciences. Topics include evolution and natural selection, heredity and genetic determinism, biotechnology and reproductive interventions. We interpret episodes, past and present, in biology in light of scientists' historical location, economic and political interests, use of language, and ideas about causality and responsibility. Readings, class activities, and written assignments are designed so that students develop interpretive skills and explore their own intellectual and practical responses to controversies in biology and society.

PHIL 286 Science and Human Nature (also Science and Technology Studies 286)  
Spring. 4 credits.  
For description, see PHIL 286.

IV. Themes

A. Natural Science Issues/Biology Elective (two courses).  
Select from the list of B&SOC approved Natural Science Issues courses or choose course(s) with intro biology as a prerequisite from: ALS, AN SC, BIOSCI, ENTOM, FOOD, HD, NS, NTRES, PL BR, PL PA, PSYCH, VTMED.

BIOAP 214 Biological Basis of Sex Differences (also Biology and Society 214 and Women's Studies 214)  
Fall. 3 credits.  
For description, see BIOAP 214.

BIOES 275 Human Biology and Evolution (also Anthropology 275 and Nutritional Sciences 275)  
Fall. 3 credits.  
Offered alternate years.  

BIOPL 247 Ethnobiology  
Fall. 3 credits.

HD 266 Emotional Functions of the Brain  
Fall. 3 credits.

[HD 347 Human Growth and Development: Biological and Behavioral Interactions (also Biology and Society 347 and Nutritional Sciences 347)  
Spring. 3 credits.  
Prerequisites: Biological Sciences 101 or 109 or equivalent, and Human Development 115 or Psychology 101.  
Offered alternate years.  
Not offered 1999-2000.]

HD 370 Experimental Psychopathology  
Spring. 3 credits.

NS 222 Maternal and Child Nutrition  
Spring. 3 credits.

NS 361 Biology of Normal and Abnormal Behavior (also Psychology 361)  
Fall. 3 credits.  
For description, see NS 361.

NTRES 201 Environmental Conservation  
Spring. 3 credits.

Examples of biology electives

AN SCI 300 Animal Reproduction and Development  
Spring. 3 credits.

HD 366 Psychobiology of Temperament and Personality  
Spring. 3 credits.

NS 331 Physiological and Biochemical Bases of Human Nutrition  
Spring. 4 credits.

B. Humanities/Social Science elective (two courses)

Courses listed earlier as social science/humanities foundation courses (2B) are particularly appropriate as social science/humanities electives. However, a single course cannot be used to meet both requirements. Additional courses that are recommended as social science or humanities electives are:

Examples of social science electives

ARME 464 Economics of Agricultural Development  
Spring. 3 credits.

ANTHRO 211 Nature and Culture  
Spring. 3 credits.

[BIOES 673 Human Evolution: Concepts, History, and Theory (also Anthropology 673)  
Fall. 3 credits.  
Offered alternate years.  
For description, see BIOES 673.]

CRP 380 Environmental Politics  
Spring. 4 credits.

[CRP 451/551 Environmental Law  
Fall. 4 credits.  
Not offered 1999-2000.]

HD 241 History of Childhood in the United States  
Fall. 3 credits.

[HD 258 The Historical Development of Women as Professionals, 1800 to the Present (also Women's Studies 238 and History 238)  
Fall. 3 credits.  
Not offered 1999-2000.]

HSS 315 Human Sexuality (also PAM 380)  
Spring. 3 credits.

[HSS 325 Health Care Services and the Consumer (also PAM 381)  
Fall. 3 credits.  
Offered alternate years.  
Not offered 1999-2000.]

HSS 330 Ecology and Epidemiology of Health (also PAM 303)  
Fall. 3 credits.

[HSS 335 Contemporary Issues in Women's Health (also PAM 350)  
Fall. 3 credits.  
Not offered 1999-2000.]

HSS 634 Health Care Organization (also PAM 657)  
Fall. 3 credits.

HSS 688 Long-Term Care and the Aged: Alternative Health and Social Service Delivery Systems (also PAM 688)  
Fall. 3 credits.

NS 450 Public Health Nutrition  
Spring. 3 credits.

NS 457 National and International Food Economics (also Economics 374)  
Spring. 3 credits.

NTRES 400 International Environmental Issues  
Fall. 4 credits.

PSYCH 326 Evolution of Human Behavior  
Fall. 4 credits.

R SOC 201 Population Dynamics (also Sociology 202)  
Spring. 3 credits.

R SOC 205 Rural Sociology and International Development (also SOC 206)  
Spring. 3 credits.

R SOC 324 Environment and Society (also Science & Technology Studies 324 and Sociology 324)  
Fall and summer. 3 credits.  
For description, see R SOC 324.
Examples of humanities electives

*NTRES 407 Religion, Ethics, and the Environment*  
For description, see *BioG 469*.

*PHIL 368 Global Climate and Global Justice (also Government 468)*  

*PHIL 681 Philosophy of Science (also Science & Technology Studies 681)*  
Spring. 4 credits. For description, see PHIL 681.

### C. Senior Seminars

*Bio G 467 Seminar in the History of Biology (also Biology & Society 447, History 415, and Science & Technology Studies 447)*  
Summer (5-week session). 4 credits. Limited to 18 students.

For description, see *Bio G 467*.

*BIO G 469 Food, Agriculture, and Society (also Biology & Society 469 and Science & Technology Studies 469)*  

For description, see *Bio G 469*.

*BioES 661 Environmental Policy (also Biology & Society 461 and Agriculture and Life Sciences 661)*  
Fall or spring. 3 credits each term. Limited to 12 students. (Students must register for 6 credits each term since an "R" grade is given at the end of the fall term).

For description, see *BioES 661*.

*CEH 444 Housing for the Elderly (also PAM 375)*  
Spring. 3 credits.

*HD 366 Psychobiology of Temperament and Personality*  
Fall. 3 credits.

*HD 610 Processes in Human Development*  
Fall. 3 credits.

*HD 660 Social Development*  
Spring. 3 credits. Permission of instructor required for undergraduates.

[HSS 335 Contemporary Issues in Women’s Health (also PAM 350)]  
Fall. 3 credits. Not offered 1999-2000.

*HSS 625 Health Care Services: Consumer and Ethical Perspectives (also PAM 652)*  
Fall. 3–4 credits. Permission of instructor required. If using this course as a senior seminar, B&SOC majors must take it for 4 credits by writing a major paper. Enrollment limited—preference given to HSS students.

*HSS 631 Managed Health Delivery Systems: Primary-Ambulatory Care (also PAM 656)*  
Spring. 3 credits.

*HSS 655 Leadership in Human Service Organizations (also PAM 680)*  
Fall. 3 credits.

### [SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES](#)

*Bio G 408 Human Fertility in Developing Nations (also Biology & Society 404)*  
Spring. 3 credits. Not offered 1999-2000. For description, see *Bio G 408*.

*R Soc 410 Population and Environment*  
Spring. 3 credits.

*R Soc 418 Population Policy (also Biology & Society 414)*  
Spring. 3 credits. Not offered 1999-2000. For description, see *R Soc 418*.

*S&TS 406 Biotechnology and the Law (also Biology & Society 406)*  
Fall. 4 credits. Not offered 1999-2000. Staff.

For description, see *S&TS 406*.

*S&TS 427 Politics of Environmental Protection in America (also Biology & Society 427 and Government 427)*  
Fall. 4 credits. Not offered 1999-2000. Staff.

For description, see *S&TS 427*.

*S&TS 490 Integrity of Scientific Practice*  
Fall. 4 credits. S. Hilgartner.

For description, see *S&TS 490*.

*S&TS 645 Genetic Engineering: Politics and Society in Comparative Perspective (also Government 634)*  

For description, see *S&TS 645*.

### V. Other Courses

*B&SOC 375 Independent Study*  
Fall or spring. 1–4 credits. Prerequisite: must have written permission of faculty supervisor and Biology and Society major. Projects under the direction of a Biology and Society faculty member are encouraged as part of the program of study within the student’s concentration area. Applications for research projects are accepted by individual faculty members. Students may enroll for 1–4 credits in Biology and Society 375 (Independent Study) with written permission of the faculty supervisor and may elect either the letter grade or the S-U option. Students may elect to do an independent study project as an alternative to, or in advance of, an honors project. Applications and information on faculty research, scholarly activities, and undergraduate opportunities are available in the Biology and Society office, 275 Clark Hall. Independent study credits may not be used in completion of the major requirements.

*B&SOC 400 Undergraduate Seminar*  
Fall or spring. Variable credit. May be repeated for credit.

From time to time different seminars on topics of interest to undergraduates are offered. Topics and instructors are listed in the biology and society supplement issued at the beginning of each semester.

*B&SOC 499 Honors Project*  
Fall and spring. 3–5 credits each term. Open only to Biology and Society students in their senior year.

Students who are admitted to the honors program are required to complete two semesters of honors project research and to write an honors thesis. The project must include substantial research and the completed work should be of broader scope and greater originality than is normal for an upper-level course.

Students may take 3–5 credits per semester up to a maximum of 8 credits in B&SOC 499, Honors Project. Students should note that B&SOC 499 is to be taken in addition to those courses that meet the regular major requirements. The student and the project supervisor must reach clear agreement at the outset as to what sort of work will need to be completed during the first semester. Minimally, an honors thesis outline and bibliography should be accomplished. At the end of the first semester, a letter grade will be assigned and the advisers, in consultation with the Director of Undergraduate Studies, will evaluate whether or not the student should continue working on an honors project. Students who do continue in the honors program for the second semester will receive a letter grade at the end of their final term whether or not they complete a thesis and whether or not they are recommended for honors.

Applications and information are available in the Biology and Society office, 275 Clark Hall.

### Cognitive Studies Program

J. Halpern (computer science), R. Hoy (neurobiology and behavior), co-directors.

C. Cardie, R. Constable, B. Donald, J. Halpern, D. Hutenlocher, L. Lee, R. Rubinfeld, B. Selman, R. Zabih (computer science); A. Hedge (design and environmental analysis); J. Dunn, R. Ripple, D. Schrader (education); R. Canfield, S. Ceci, B. Koslowski, B. Lust, S. Robertson, E. Wethington (human development); R. O’Connor, R. Peterson, J. Russo (Johnson Graduate School of Management); J. Bowers, A. Cohn, M. Diesing.

Cognitive studies is comprised of a number of disciplines that are linked by a major concern with fundamental capacities of the mind, such as perception, memory, reasoning, language, and the organization of motor action. In the College of Arts and Sciences these disciplines are represented in the departments of Computer Science, Linguistics, Mathematics, Modern Languages, Philosophy, Psychology, Economics and Sociology. Elsewhere in the university they are represented in the Department of Human Development and Design and Analysis (College of Human Ecology), the Section of Neurobiology and Behavior (Division of Biological Sciences), the Department of Education (College of Agriculture and Life Sciences), and the Johnson Graduate School of Management.

The issues addressed in cognitive studies arise at several levels. At the broadest level are problems of characterizing such basic notions as "mind," "knowledge," "information," and "meaning." At a more specific level are questions regarding the abstract operating principles of individual components of the...
mind, such as those underlying visual perception, language ability, and understanding of concepts. These principles concern the organization and behavior of the components and how they are biologically represented in the brain. At the most specific level are questions about the properties of the elementary computational structures and processes that constitute these components. Important insights into issues of this kind have been achieved in recent years as a result of the various cognitive studies disciplines converging in their theoretical and methodological approaches. This convergence, in fact, warrants grouping the disciplines together under the single term "cognitive studies." Even greater progress can be expected in the future as a consequence of increasing cooperation among the disciplines.

Undergraduate Concentration
An interdisciplinary undergraduate concentration in Cognitive Studies is available at Cornell University. Undergraduates in the College of Arts and Sciences can design their own concentration. Students from other colleges who seek such a concentration should discuss such possibilities within the Cognitive Studies program, which will provide information and contacts concerning such concentrations.

The undergraduate concentration in Cognitive Studies is designed to enable students to engage in a structured program directly related to the scientific study of cognition and the mind. The concentration provides a framework for the design of structured, supervised programs of study in this growing interdisciplinary field. Such programs of study will complement coursework in a single discipline as represented by an individual department. This is crucial for students who wish a strong background in their major, independent of their work in the concentration. Independent majors and college scholars may also apply. Colleges vary in their procedures for formal recognition of this concentration (contact the Cognitive Studies office for details). The Cognitive Studies Program faculty have designed five structured "tracks" that offer students different ways of satisfying the concentration. In addition, students are always able to construct their own programs of study subject to approval by their concentration advisor. The courses listed under each track are program suggestions. The student should consult with his/her Cognitive Studies advisor to develop a more customized curriculum. In some cases, students may want to combine or cross tracks.

In general, it is expected that students in the concentration will take COGST 101, a lab course such as COGST 201, and three courses at the 300 or 400 level in at least two departments. Even though five courses are required to complete the concentration, we expect that students interested in cognitive studies will often end up taking more, and we encourage them to do an independent research project (COGST 470) and a research workshop such as COGST 471.

The five tracks are as follows. The first track involves a particular approach to the study of cognition. The other four tracks are structured around specific content domains and consist of sets of suggested course clusters. Please note that many of these courses have substantial prerequisites.

Foundational issues in cognitive science are intimately relevant to real world settings. The Cognitive Studies in Context track offers students the opportunity to learn and independently explore how theory and research on the mind can help us understand how we use information in much of our daily activities, whether it be the workplace, the classroom, or any other aspect of everyday life. Students will come to understand more systematically the cognitive ergonomics of such diverse settings as an airport checkpoint, a quality control station on an assembly line, or an anesthesia station in a surgical suite. They will come to better understand the perceptual constraints that help tailor the nature of visual communication systems, or the linguistic constraints that help tailor text-based communication systems. Teachers will come to see how the functional architecture of human memory guides the presentation and use of information in a wide array of settings. They will also learn how design constraints on computer hardware and software interact with human capacities and biases.

COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
In addition, there are upper-level approved courses in Cognitive Studies areas will normally be expected.

2. Perception and Cognition
This track focuses on psychological, computational, and neurobiological approaches to the interface between perception and cognition. Students will develop a grasp of the continuum between sensory impressions and complex thought.

COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
COGST 450/LING 450/PSYCH 437, Lab Course: Language Development
COM S 462, Robotics and Machine Vision
BION 526, The Visual System
PSYCH 305, Visual Perception
PSYCH 309, Development of Perception and Representation
PSYCH 316, Auditory Perception
PSYCH 418, Psycholinguistics and Language Development
PSYCH 412, Laboratory in Cognition and Perception
PSYCH 416, Modeling Perception and Cognition
PSYCH 419, Neural Networks Laboratory

3. Language and Cognition
This track focuses on the representation, processing, and acquisition and learning of language, as well as its role in cognition and culture. Students will acquire skills and knowledge in formal and applied linguistic theory, psycholinguistic experimentation, and computational modeling techniques.

COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
COGST 450/LING 450/PSYCH 437, Lab Course: Language Development
COM S 411, Programming Languages and Logic
LING 203, Introduction to Syntax and Semantics
LING/PHIL/COGST 270, Truth and Interpretation
LING 301–302, Phonology I & II
LING 303–304, Syntax I & II
LING 309–310, Morphology I & II
LING 319–320, Phonetics I & II
LING 325, Pragmatics
LING 350/COGST ST 350, Representing Language: Knowledge Taught and Untaught
LING 403, Introduction to Applied Linguistics
LING 409, Psycholinguistics of Second Language Learning
LING 421–422, Semantics I & II
PHIL 332, Philosophy of Language
PSYCH 215/LING 215, Psychology of Language
PSYCH 370/LING 370, Language and Cognition
PSYCH 415, Concepts, Categories, and Word Meanings
PSYCH 416, Modeling Perception and Cognition
PSYCH 436, MNG 436/HD 436/COGST 436, Language Development

4. Cognition and Information Processing
This track focuses on how the mind (or a computer) can encode, represent, and store information. Students will develop an understanding of concepts, categories, memory, and the nature of information itself.

COGST 101/COM S 101, LING 170/PHIL 191/PSYCH 102, Introduction to Cognitive Science
COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory
COGST 450/LING 450/PSYCH 437, Lab Course: Language Development
COM S 211, Computers and Programming
COM S 212, Structure and Interpretation of Computer Programs
COM S 472, Foundations of Artificial Intelligence
COM S 473, Pragmatics in Artificial Intelligence
PHIL 262, Philosophy of Mind
PHIL 362, Philosophy of Mind
PSYCH 305, Development of Perception and Representation
PSYCH 311, Introduction to Human Memory
PSYCH 412, Laboratory in Cognition and Perception
PSYCH 413, Information Processing: Conscious and Non-conscious
PSYCH 414, Comparative Cognition
PSYCH 415, Concepts, Categories, and Word Meanings
PSYCH 416, Modeling Perception and Cognition
PSYCH 417, The Origins of Thought and Knowledge
5. Cognitive Neuroscience

This track focuses on neurobiological and cognitive approaches to understanding how perception and cognition emerge in the human brain. Students will acquire knowledge of how neural structures subserve what perceptual/cognitive processes, and how they interact.

COGST 201/COM S 201/PSYCH 201, Cognitive Science in Context Laboratory

COM S 240, Data Structures

COM S 401, Programming Languages and Software Engineering

PSYCH 328, Biopsychology of Learning and Memory

PSYCH 396, Introduction to Sensory Systems

PSYCH 416, Modeling Perception and Cognition

PSYCH 419, Neural Networks Laboratory

PSYCH 425, Cognitive Neuroscience

PSYCH 440, The Brain and Sleep

A Cognitive Studies undergraduate laboratory and computer facility is available for all students in a Cognitive Studies concentration. This facility will help link resources from different laboratories across the Cornell campus as well as providing a central location for developing and conducting experimental research in cognitive studies.

Students who complete the concentration requirements will have their concentration in Cognitive Studies officially represented on their transcript. In addition, students who have made very substantial progress towards completing the requirements for the concentration will be eligible for enrollment in the Graduate Proseminar in Cognitive Studies during their senior year (COGST 773-774).

Concentration Application Procedures.

Initial inquiries concerning the undergraduate concentration should be made to the Cognitive Studies Program coordinator, Mary Wright, cogst@cornell.edu, 255-6431, who will provide application materials and set up a meeting with a relevant member of the Undergraduate Concentration Committee. This Committee will assist the student with selection of a concentration adviser with expertise in the student's main area of interest.

To formally initiate the concentration in Cognitive Studies, a student must gain approval for a selection of courses from a concentration adviser (one of the program faculty). The courses selected must form a coherent cluster that makes sense to both the adviser and the student. To be admitted to the concentration, the student must submit this plan of study to the Cognitive Studies undergraduate faculty committee for final approval.

In addition to assisting in and approving the student's selection of courses, the concentration adviser serves as a general source of information about the field of cognitive studies, relevant resources around the university, and job and graduate school opportunities. Often, the adviser can help the student develop independent research experience.

Independent Research. The concentration encourages each student to be involved in independent research that bears on research issues in cognitive studies, if possible. COGST 470 is available for this purpose. It is recommended that students report on their research activities in an annual undergraduate forum. The Undergraduate Concentration Committee is committed to helping students find an appropriate research placement when needed.

The Committee for Undergraduate Concentration in Cognitive Studies consists of: Bart Selman, computer science, 5-5643, 4144 Upson Hall, selman@cs.cornell.edu; Draga Zec, linguistics, 5-0728, 217 Morrill Hall, DZEC@cornell.edu; Jason Stanley, philosophy, 5-6829, 216 Goldwin Smith, JCSZ@cornell.edu; Michael Owren, psychology, 5-3835, 224 Uris Hall, MOwren@cornell.edu. The current Director of Undergraduate Studies is Draga Zec.

Graduate Minor

For information, consult the program office (235 Uris Hall, 254-6431; cogst@cornell.edu or the director of graduate studies, Carol Rosen 255-0722, cr@cornell.edu).

Courses

Cognitive Studies

COGST 101: Introduction to Cognitive Science (also COM S 101, LING 170, PHIL 191, PSYCH 102)

Fall. 3 credits. M. Spivey. This course surveys the study of how the mind/brain works. We will examine how intelligent information processing can arise from biological and artificial systems. The course draws primarily from five disciplines that make major contributions to cognitive science: philosophy, psychology, neuroscience, linguistics, and computer science. The first part of the course will introduce the roles played by these disciplines in cognitive science. The second part of the course will focus on how each of these disciplines contributes to the study of five topics in cognitive science: learning, perception, reasoning, memory, and artificial intelligence.

COGST 201: Cognitive Science in Context Laboratory (also Cognitive Studies, Computer Science, Psychology)

Fall or spring. 4 credits. Prior completion of "Introduction to Cognitive Science" PSYCH 102/COGST 101/COM S 101, LING 170/PHIL 191 or equivalent is recommended. Knowledge of programming languages is neither assumed nor required. Limited to 24 students. Disc and demos, M W 11:15–12:05; lab, M W 12:25–3:25, plus additional hours to be arranged. Fall, B. Halpert and staff. Spring, D. Field and staff. A laboratory course that explores the theories of cognitive science and provides direct experience with the techniques of cognitive science, in relation to the full range of both present and anticipated-future activities in the workplace, the classroom, and in everyday life. Discussions of laboratory exercise results, supplementation of laboratory topics, and analyses of challenging primary research literature are done in meetings of the entire class. Laboratory exercises, which are done on an individual or small group basis, include both pre-planned investigations and student-developed experiments. Use of digital computers as well as the Internet, electronic mail, and Web sites are integral components of the course.

State of the art computing, display (visual, auditory, and other perceptual/sensory systems), digital communication, and simulation approaches are used to apply cognitive science principles and concepts to the analysis, exploration, and direct testing of human-machine interfaces. The focus is on human-computer interactions that are intended to permit effective and efficient exchange of information and control of functions or operations. This approach is applied to real life settings such as interactions with touch screen displays, effects of very brief sensory inputs on subsequent decisions, computer-based natural language recognition and processing, use of 'neural networks,' and personal and group transportation vehicles and systems. Students are expected to come to each discussion meeting having read and thought about assigned materials, and to come to scheduled laboratory meetings prepared to perform the laboratory exercises. Laboratory facilities will be available to students at all times so that statistical analysis of data, preparation of laboratory reports, and collection of experimental data will be facilitated.

COGST 450: Lab Course: Language Development (also LING 450 and PSYCH 437) (in conjunction with HD/PSYCH/LING 436, Language Development)

Spring. 2 credits. B. Lust. This laboratory course will provide undergraduates with an introduction to hands-on research experience in the Cognitive Studies Research Labs. This course is partially funded by a new National Science Foundation grant to Cornell's Cognitive Studies Program: "Interdisciplinary Approaches to the Scientific Study of Language Knowledge and Acquisition." This project is intended to involve undergraduates in active research and to coordinate related subfields of several disciplines in a unified, laboratory-supported curriculum.

The course will include several structured modules dealing with topics covered in the survey course, HD/LING/PSYCH 436, Language Development. They will include training in how to score and analyze child language data, including the use of selected portions of a large database of child language data from many languages in the Cornell Language Acquisition Lab (CLAL), and training necessary to the collection and analysis of new child language data. Emphasis will be placed on developing research methods to test hypotheses.

The lab course will meet once a week in group format. In addition, students will be given access to a research lab environment for independent work on designated modules, and independent research, throughout the week, and throughout the term.

COGST 470: Undergraduate Research in Cognitive Studies

Fall or spring. 1–4 credits. S–U grades optional. Prerequisite: permission of major adviser; written permission of Cognitive Studies faculty member who will supervise the research and assign the grade. Hours to be arranged. Cognitive Studies faculty.

Experience in planning, conducting, and reporting independent laboratory, field, and/or library research in an interdisciplinary area relevant to cognitive studies.
This course surveys basic issues, methods, and correctness within the science of linguistics and outside of language has been represented, both popularly believed to be true. Projected it, by contrasting what is known with what is language and the special human capacity for discovering how issues of leamability and language processing raise constraints for this project.

This course will deal with some of the discoveries made in modern linguistics that reveal some fundamental properties of human language and the special human capacity for it, as well as some of the still unsettled questions about it. It will also trace some of the still unsettled related research.

LING 350 Representing Language: Knowledge Taught and Untaught (also COGST 350)

Fall. 4 credits. J. Gair.

This course will deal with some of the paradigms shifts that have occurred within linguistics and consider some of the ways in which language has been represented, both within the science of linguistics and outside of it, by contrasting what is known with what is popularly believed to be true. Projected topics will include: innateness vs. language as socio-cultural; language variability vs. universal grammar; language change and relatedness of languages; the question of correctness.

HD 347 Human Growth and Development (College of Human Ecology)

Fall or summer. 3 credits.

HD 348 Infant Behavior and Development

Fall. 3 credits.

HD 349 Human Growth and Development: Biological and Behavioral Interactions

Spring. 3 credits.

Computer Science

COM S 211 Computers and Programming
Fall or spring. 3 credits.

COM S 212 Structure and Interpretation of Computer Programs
Fall or spring. 4 credits.

COM S 280 Discrete Structures
Fall or spring. 4 credits.

COM S 381 (or 481) Introduction to Theory of Computing
Fall. 3 or 4 credits.

COM S 410 Data Structures
Fall or spring. 4 credits.

COM S 411 Programming Languages and Logic
Fall or spring. 4 credits.

COM S 472 Foundations of Artificial Intelligence
Fall. 3 credits.

COM S 473 Practicum in Artificial Intelligence
Fall. 2 credits.

COM S 482 Introduction to Analysis of Algorithms
Spring. 4 credits.

COM S 486 Applied Logic (also MATH 486)
Fall or spring. 4 credits.

Education (College of Agriculture and Life Sciences)

EDUC 210 Psychology of Learning and Memory
Fall. 3 credits.

EDUC 212 Psychological Foundations of Education
Spring. 2-3 credits.

EDUC 311 Educational Psychology
Fall. 3 credits.

Human Development (College of Human Ecology)

HD 115 Human Development
Fall or summer. 3 credits.

HD 266 Emotional Functions of the Brain
Fall. 3 credits. R. A. Depue.

[HD 334 The Growth of the Mind
Spring. 4 credits. Not offered 1999-2000.]

HD 344 Infant Behavior and Development
Fall. 3 credits.

HD 347 Human Growth and Development: Biological and Behavioral Interactions
Spring. 3 credits.
LING 450 Lab Course: Language Development (also COGST 450 and PSYCH 437)
Spring. 2 credits.

Mathematics
MATH 281 Deductive Logic (also PHIL 331)
Fall. 4 credits.

MATH 481 Mathematical Logic (also PHIL 431)
Spring. 4 credits.

MATH 482 Topics in Logic (also PHIL 432)
Spring. 4 credits.

MATH 483 Intensional Logics and Alternatives to Classical Logics (also PHIL 436)

MATH 486 Applied Logic (also COM S 486)
Spring. 4 credits.

Modern Languages
LANG 414 Second Language Acquisition I
Fall. 3 credits.

LANG 425 Corpora and Applied Linguistics
Fall. 4 credits.

Neurobiology and Behavior (Division of Biological Sciences)
BIONB 221 Neurobiology and Behavior I: Introduction to Behavior
Fall. 3, 4, or 5 credits.

BIONB 222 Neurobiology and Behavior II: Introduction to Neurobiology
Spring. 3 or 4 credits.

BIONB 326 The Visual System

BIONB 328 Biopsychology of Learning and Memory (also PSYCH 332)
Spring. 3 credits.

BIONB 396 Introduction to Sensory Systems (also PSYCH 396)
Spring. 3 or 4 credits.

BIONB 421 Effects of Aging on Sensory and Perceptual Systems (also PSYCH 431 and 631)
Fall. 3 or 4 credits.

BIONB 424 Neuroethology (also PSYCH 424)

BIONB 492 Sensory Function (also PSYCH 492)
Spring. 3 or 4 credits.

BIONB 496 Bioacoustic Signals in Animals and Man

Philosophy
PHIL 231 Introduction to Deductive Logic
Fall. 4 credits.

PHIL 261 Knowledge and Reality
Spring. 4 credits.

PHIL 282 Philosophy of Mind

PHIL 270 Truth and Interpretation (also COGST 270 and LING 270)

PHIL 286 Science and Human Nature (also S&TS 286)
Spring. 4 credits.

PHIL 318 Twentieth-Century Philosophy

PHIL 331 Deductive Logic (also MATH 281)
Fall. 4 credits.

PHIL 332 Philosophy of Language
Spring. 4 credits.

PHIL 361 Metaphysics and Epistemology
Spring. 4 credits.

PHIL 381 Philosophy of Science: Knowledge and Objectivity (also S&TS 381)
Fall. 4 credits.

PHIL 382 Philosophy and Psychology

PHIL 389 Philosophy of Science: Evidence and Explanation

PHIL 431 Mathematical Logic (also MATH 481)

PHIL 432 Topics in Logic (also MATH 482)
Spring. 4 credits.

PHIL 433 Philosophy of Logic

PHIL 436 Intensional Logic (also MATH 483)

PHIL 437 Problems in the Philosophy of Language

PHIL 461 Metaphysics

Psychology
PSYCH 205 Perception
Spring. 3 credits.

PSYCH 209 Development

PSYCH 214 Issues in Cognitive Psychology
Fall. 3 credits.

PSYCH 215 Psychology of Language
Spring. 3 or 4 credits.

PSYCH 305 Visual Perception
Fall. 4 credits.

PSYCH 311 Introduction to Human Memory

PSYCH 316 Auditory Perception
Fall. 3 or 4 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

PSYCH 332 Biopsychology of Learning and Memory (also BIONB 328)
Spring. 3 credits.

PSYCH 342 Human Perception: Applications to Computer Graphics, Art, and Visual Display
Fall. 3 credits.

PSYCH 361 Biopsychology of Normal and Abnormal Behavior (also NS 361)
Fall. 3 credits.

PSYCH 396 Introduction to Sensory Systems (also BIONB 396)
Spring. 3 or 4 credits. Not offered 1999-2000.

PSYCH 412 Laboratory in Cognition and Perception

PSYCH 413 Information Processing: Conscious and Non-conscious
Spring. 4 credits.

PSYCH 414 Comparative Cognition
Spring. 3 credits.

PSYCH 415 Concepts, Categories, and Word Meanings

PSYCH 416 Modeling Perception and Cognition

PSYCH 417 The Origins of Thought and Knowledge

PSYCH 419 Psychology of Music
Spring. 3 or 4 credits.

PSYCH 425 Cognitive Neuroscience

PSYCH 436 Language Development (also COGST 436, HD 436 and LING 436)
Spring. 4 credits.

PSYCH 492 Sensory Function (also BIONB 492)
Spring. 4 credits.

Sociology
SOC 480 Simulating Social Dilemmas (also SOC 580)
Fall. 4 credits.

Graduate Courses and Seminars
The following courses and seminars are generally for graduate students only. However, some may be appropriate for advanced undergraduates. The director of the concentration must approve an undergraduate's use of any of these for satisfying the concentration requirements.

COGST 773-774 Proseminar in Cognitive Studies I and II (also Com S 773/774, Ling 773/774, Phil 773/774, Psych 773/774)
Fall: R grade; spring: S-U only. 4 credits. T 1:25-2:40. Staff.

The Cognitive Studies Proseminar consists of two semesters of meetings with the graduate faculty in the field of Cognitive Studies. The proseminar will provide a general introduction to the field of Cognitive Studies including an introduction to each of the major disciplines that comprise the minor: i.e., computer science, linguistics, philosophy, and psychology. In each of these disciplines, faculty from the field will introduce theoretical and methodological issues that underlie the field and its relation to Cognitive Studies; in addition, they will introduce various labs in which active research is being conducted in their field at Cornell; and current issues of interdisciplinary interest. The proseminar will include suggestions from faculty in each field for further advanced
interdisciplinary research that can be pursued at Cornell during a Cognitive Studies minor. It will conclude (end of second term) with individual student presentations in which students initiate a critique of some interdisciplinary research, after consultation with a faculty member of their choice. Although suitable to entering graduate students, the proseminar is also open to graduate students beyond their first year. Advanced undergraduates with a Cognitive Studies concentration may also be admitted. This is a year-long lecture and discussion course. The year-long commitment is mandatory. An "R" grade will be assigned in the fall semester, and an S-U grade will only be assigned in the spring semester.

COM S 674 Natural Language Processing
Spring. 4 credits. Prerequisite: COM S 472 recommended.

COM S 676 Reasoning About Knowledge
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered every year. J. Y. Halpern

COM S 677 Reasoning About Uncertainty
Fall. 4 credits. Prerequisites: mathematical maturity and an acquaintance with propositional logic. Not offered every year; next offered fall 1999. J. Y. Halpern

COM S 775 Seminar in Natural Language Understanding
Fall and spring. 2 credits.

EDUC 611 Educational Psychology
Fall. 3 credits. Undergraduates admitted with permission from instructor. R. Ripple

EDUC 614 Epistemological Development and Reflective Thought
Fall. 3 credits.

EDUC 714 Moral Development and Education
Spring. 3 credits.

HD 600/700 Graduate Seminars

LING 700 Graduate Seminars

MATH 581 Logic

MATH 655 Mathematical Foundations of Computer Modeling and Simulation

MATH 684 Recursion Theory

MATH 688 Automated Theorem Proving

LANG 700 Seminar (Grammaticization and Second Language Acquisition)
Spring. 4 credits.

PHIL 700 Graduate Seminars

PSYCH 601 Computational Models of Language
Spring. 4 credits. Prerequisite: consent of instructor. M. Spivey

PSYCH 676 Topics in Emotion
Spring. 4 credits. M. Owen and C. Krumhansl.

College Scholar Program
L. Abel, director, 172 Goldwin Smith Hall, 255-3386.
The College Scholar Program is described in the introductory section of Arts and Sciences.

COLLS 397 Independent Study
Fall or spring. 1–4 credits. Prerequisite: permission of program office.

COLLS 499 Honors Research
Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

East Asia Program

140 Uris Hall

East Asian studies at Cornell is led by thirty-four faculty members from five colleges, who participate in a program of research and teaching on the civilizations and cultures of East Asia. Courses are offered through various departments in most of the humanities and social sciences disciplines, as well as in the fields of business, city and regional planning, international and comparative labor relations and rural sociology. Language courses in Mandarin, Cantonese, Korean, and Japanese are offered, in addition to the Full-year Asian Language Concentration (FALCON) in Japanese and Mandarin. Undergraduates major in the Department of Asian Studies and concentrate on the language and culture of one East Asian country, while graduate students may work toward an M.A. in East Asian studies, a dual M.B.A./M.A. degree, or an M.A. in an interdisciplinary discipline such as agricultural economics, anthropology, city and regional planning, government, history, history of art, linguistics, literature, rural sociology, or sociology. A variety of fellowships, travel grants, awards, and assistantships are available for graduate students concentrating on East Asia.

The formal program of study is enriched by a variety of extracurricular activities, including a Japanese and Chinese language house, film series, workshops, art exhibits, and numerous lectures, symposia and performances related to East Asia. The Watson Collection in Olin Library is a comprehensive collection of books on East Asia in Western languages, Japanese, Chinese, and Korean. The Mary Rockwell Galleries of the Herbert F. Johnson Museum of Art have an excellent collection of East Asian art.

First-Year Writing Seminars

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, see the John S. Knight Writing Program offering, and consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in late October for the spring term.

Human Biology Program

J. Haas (nutritional sciences), director, 127 Savage Hall, 255-8001; B. Finlay (psychology), J. Fortune (physical therapy/women's studies), E. Frongillo (nutritional sciences), R. Johnston (psychology), K.A.R. Kennedy (ecology and systematics/anthropology), D. Levi-Strauss (nutritional sciences), P. W. Nanthiansel (psychology), D. L. Pelletier (nutritional sciences), W. Provine (ecology and systematics/history), R. Roberts (psychology), S. Robertson (human development), S. Ravin-Williams (human development), M. Small (anthropology)

Human biology integrates the methods and theories of many disciplines, such as biological anthropology, nutrition, neurobiology, physiology, psychology, demography, ecology, genetics, and paleontology, into a comprehensive study of biological diversity in Homo sapiens. A central focus of this interdisciplinary approach to the study of the human organism is an understanding of evolutionary processes that explain our biological variation through space and time. The program of study seeks to educate future biological scientists to address the concerns of a society that is becoming more demanding of the scientific community to place its specialized biological knowledge in a broad context. The human biology curriculum is of particular relevance to undergraduate students in premedical and predentistry programs, biological anthropology, nutrition, human development, ecology, systematics, psychology, physiology, genetics, and the health-related sciences. It serves to bring together students with a common interest in humankind as defined from these diverse fields and to provide a forum for student-faculty interaction on various topics relating to human evolution and biological diversity.

Human biology is not a major but a curriculum of study that provides majors in various departments with a program for selecting elective courses that deal with the biology of the human species. Students in their junior year may develop a program of study in human biology while majoring in a number of different departmental fields.

Basic Requirements

The requirements for a program of study in human biology are designed to ensure sufficient background in physical sciences and mathematics to enable the student to pursue a wide range of interests in the fields of modern biological sciences, anthropology, and fields related to the evolution and physical diversity of the human species. Adjustments may be made in these requirements, depending upon the student's academic background, affiliation with colleges and schools within the university.

The basic requirements are one year of introductory biology (Biological Sciences 101–103 plus 102–104 or 105–106 or Biological Sciences 107–108 offered during the eight-week Cornell Summer Session); one year of general chemistry (Chemistry 207–208 or 215–216); one year of college mathematics (Mathematics 111–112 or 105–106 or 111–105); one course in genetics (Biological Sciences 281 or 282); one course in biochemistry (Biological Sciences 330, 331, 332, or 333 or Nutritional Sciences 320). It is recommended that students planning graduate study in...
biological anthropology, psychology, and related fields in the medical and nutritional sciences take a course in statistics. Students should consult their faculty adviser in human biology for help in selecting appropriate courses.

Elective courses should be taken that will enable the student to acquire breadth in the subject matter of human biology outside of their departmental major. Therefore only 6 of the 15 human biology elective credits may be taken from among the following courses.

The courses listed below are representative of the offerings in human biology and are included to assist the student in organizing a curriculum of study. They are organized into three groups that reflect the three levels of integration noted above: (1) human anatomy and physiology, (2) human behavior, and (3) human evolution and ecology. Students should choose at least one course from each of these areas of integration. It is anticipated that the student will include in a program of study at least one of the laboratory courses offered. It is expected that a student will take a minimum of 15 credits from among these courses.

There is no foreign language requirement for human biology beyond what is dictated by specific departments and colleges. The requirements for the human biology curriculum are set alongside requirements of the undergraduate majors as these are defined by different departments. Students with independent majors may design their own programs of study under the guidelines provided by their college. Although a student may indicate an interest in human biology in the freshman year and be able to obtain early guidance from a faculty adviser representing the curriculum of study, it is more usual for students to establish their course programs in the first semester of the junior year. The student may request one of the faculty advisers in his or her department who is listed as a faculty in human biology to be their principal adviser, or he or she may have an adviser in the department of the major and seek the advice of a human biology faculty adviser in matters pertaining to satisfaction of the requirements. In certain cases a faculty adviser may represent both the major and the curriculum of study in human biology.

Courses

Human Anatomy and Physiology

BIO AP 458 Mammalian Physiology
Spring. 3 credits.

BIO ES 474 Laboratory and Field Methods in Human Biology (also Anthropology 474)
Spring. 5 credits.

NS 115 Nutrition and Health: Concepts and Controversies
Fall. 3 credits.

NS 222 Maternal and Child Nutrition
Spring. 3 credits.

NS 315 Obesity and the Regulation of Body Weight
Fall. 3 credits.

NS 331 Physiological and Biochemical Bases of Human Nutrition
Spring. 4 credits.

NS 341 Human Anatomy and Physiology Lab
Spring. 4 credits.

NS 361 Biology of Normal and Abnormal Behavior (also Psychology 361)
Fall. 3 credits.

NS 441 Nutrition and Disease
Fall. 4 credits.

PSYCH 322 Hormones and Behavior (also Biological Sciences 322)
Spring. 3 or 4 credits.

PSYCH 425 Cognitive Neuroscience
Fall. 3 or 4 credits.

VET M 431 Medical Parasitology
Fall. 2 credits.

Human Behavior

ANTHR 390 Primate Behavior and Ecology
Spring. 4 credits.

ANTHR 490 Primates and Evolution
Spring. 4 credits.

BIO GD 481 Effects of Aging on Sensory and Perceptual Systems (also Psychology 431 and 631)
Fall. 3 or 4 credits.

BIO NB 427 Animal Social Behavior
Fall. 4 credits.

HD 344 Infant Behavior and Development
Fall. 3 credits.

PAM 380 Human Sexuality
Spring. 3 credits.

NS 245 Social Science Perspectives of Food and Nutrition
Fall. 3 credits.

NS 347 Human Growth and Development: Biological and Behavioral Interactions (also Human Development 347 and Biology and Society 347)
Spring. 3 credits.

PSYCH 326 Evolution of Human Behavior
Fall. 4 credits.

PSYCH 425 Cognitive Neuroscience
Fall. 3 or 4 credits.

R SOC 408 Human Fertility in Developing Nations
Spring. 3 credits.

R SOC 438 Social Demography
Fall. 3 credits.

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES 585

Human Evolution and Ecology

ANTHR 101 Introduction to Anthropology: Biological Perspectives on the Evolution of Humankind
Fall. 3 credits.

ANTHR 203 Early Peoples: The Archaeological and Fossil Record (also Archaeology 203)
Spring. 3 credits.

ANTHR 390 Primate Behavior and Ecology
Spring. 4 credits.

ANTHR 391 The Evolution of the Human Life Cycle
Spring. 3 credits.

BIO G 207 Evolution (also History 287, and Science and Technology Studies 287)
Fall or summer. 3 credits.

BIO ES 261 Ecology and the Environment
Fall or summer. 4 credits.

BIO ES 272 Functional Ecology of Vertebrates
Spring. 4 credits.

BIO ES 275 Human Biology and Evolution (also Anthropology 275 and Nutritional Sciences 275)
Fall. 3 credits.

BIO ES 278 Evolutionary Biology
Fall or spring. 3 or 4 credits.

BIO ES 371 Human Paleontology (also Anthropology 371)
Fall. 4 credits.

BIO ES 461 Population and Evolutionary Ecology
Spring. 4 credits.

BIO ES 464 Macroevolution
Spring. 4 credits.

BIO ES 470 Ecological Genetics (also Entomology 470)
Spring. 4 credits.

BIO ES 471 Mammalogy
Fall. 4 credits.

BIO GD 481 Population Genetics
Fall. 4 credits.

BIO GD 482 Human Genetics and Society
Fall. 3 credits.

BIO GD 484 Molecular Evolution
Spring. 3 credits.

BIO ES 673 Human Evolution: Concepts, History and Theory (also Anthropology 673)
Fall. 3 credits.
B & SOC 447 History of Biology-Evolution  (also History 447)  
Fall. 4 credits.

PAM 303 Ecology and Epidemiology of Health  
Spring. 3 credits.

NS 306 Nutritional Problems of Developing Nations  
Fall. 3 credits.

NS 451 Epidemiology and Health of Human Communities  
Fall. 3 credits.

PSYCH 326 Evolution of Human Behavior  
Fall. 4 credits.

R SOC 201 Population Dynamics  
Spring. 3 credits.

VET MI 431 Medical Parasitology  
Fall. 2 credits.

VET CS 664 Introduction to Epidemiology  
Fall. 3 credits.

Independent Major Program

L. Abel, director, 172 Goldwin Smith Hall, 255–3386.  
The Independent Major Program is described in the introductory section of Arts and Sciences.

IM 351 Independent Study  
Fall or spring. 1–4 credits. Prerequisite: permission of program office.

IM 499 Honors Research  
Fall or spring. 1–8 credits; a maximum of 8 credits may be earned for honors research. Prerequisite: permission of program director. Each participant must submit a brief proposal approved by the honors committee.

International Relations Concentration

Matthew Evangelista, director

The concentration in international relations provides a curricular structure for undergraduates to focus on the study of global issues and processes. Students may major in international relations or they may choose to complete a separate major that includes courses in international relations. Students must complete at least one course from each of the four groups. 

Group 1: International Economics and Development

Core:

ECON 361 International Trade Theory  
(Econ 101–102–313)

Electives:

ECON 324 American Economic History
ECON 425 Economic History of Latin America
ECON 457/ WOMNS 446 Women in the Economy
ECON 460/ ILRLE 642 Economic Analysis of Welfare State
ECON 471 Economy of Former USSR & Central Europe
ECON 472 Comparative Economic System: East & West
ECON 475 Economic Problems of India
GOVT 338 Comparative Political Economy
GOVT 433 Politics of Economic Liberalization in the Developing World
ILRIC 333/ 533 Western Europe, US, and Japan
ILRIC 632 Labor Movements: Comparative Perspectives

Group 2: World Politics and Foreign Policy

Core:

GOVT 385 American Foreign Policy

Electives:

AS & RC 311/ 504 Government and Politics in Africa
AS & RC 380 African History: Early Times to 1800
AS & RC 451 Political and Social Change in Caribbean
GOVT 351 India
GOVT 358/ NSE 294/ JWST 294 Modern History of the Near East
GOVT 380 Politics of Modern Germany
GOVT 393/ SOC 393 Introduction to Peace Studies
GOVT 432 Model European Union II
HIST 191 Introduction to Modern Asian History
HIST 214 SEM American Foreign Policy (permission of instructor)
HIST 293 History of China Up to Modern Times
HIST 295 Colonial Latin America
HIST 384 Europe, 1945–1968
HIST 414 Motivations of US Foreign Policy (permission of instructor)
HIST 464 Murder, War, & State, Violence in Europe (permission of instructor)
HIST 467 SEM Modern European Political History

Group 3: Transnational Processes and Policies

Core:

GOVT 393/ SOC 393 Introduction to Peace Studies

Electives:

B & SOC 461/ ALS 661/ BIOE 661 Environmental Policy (a year-long course)
CRP 477/ SEM Issues in African Development
GOVT 400 US Sovereignty and International Law (by permission only)
HIST 250/ ELE 250/ ENGRG 250 Technology in Society
INTAG 300 Perspectives in International Agricultural and Rural Development
NTRES 400 International Environmental Issues (juniors and seniors)
R SOC 438/ SOC 437 Social Demography (enrollment limited to 30)
## Group 4: Cultural Studies

**Core:**

- ANTHR 200 Cultural Diversity and Contemporary Issue
- ANTHR 321/ WOMNS 321/ Sex and Gender: Cross
- ANTHR 621 Cultural Perspective

**Electives:**

- ANTHR 303/ AAS 303 Asians in the Americas
- ANTHR 322/ RELST 322 Magic, Myth, Science and Religion (limited to 12 students)
- ANTHR 328 Conflict, Dispute Resolution, and Law in Cultural Context
- ANTHR 339 Peoples/Cultures of Himalayas
- ANTHR 345 Japanese Society
- ANTHR 362/ 662 Democratizing Society
- ASIAN 211 Introduction to Japan
- ASIAN 215 Introduction to South Asian Civilization
- ASIAN 490/ HIST 490 Tales of Heike
- ASARC 478/ WOMNS 478 Family and Society in Africa
- COML 311/ RUSSL 311/ Modern European Literature and Culture
- COML 404/ ENGL 404/ GERST 414 Imagination
- ENGL 252/ WOMNS 252/ JWST 255 Women and the Holocaust
- ENGL 268/ AM ST 268 The Culture of the 1960's
- ENGL 434 Electronic Art and Culture
- FRLIT 220 French and Francophone Culture
- FRLIT 224/ ANTHR 224 The French Experience
- HIST 151 Introduction to Western Civilization
- HIST 249 Race and Class in Latin American History
- HIST 281/ S&TS 281 Civilization
- HIST 287/ BIO G 207/ S&TS 287 Evolution
- HIST 291/ JWST 252 History: 1789-1948
- HIST 326 History of the Samurai, Part II
- HIST 348 History of Brazil
- HIST 355 The Old Regime: France 17th and 18th Century
- HIST 366/ RELST 366 Medieval Culture, 1100-1300
- HIST 395 Southeast Asia to the 18th Century
- HIST 428 Comparative History of Colonial North America (permission of instructor)
- HIST 445/ HIST 645 America (permission of instructor)
- HIST 462 Pop Culture in European History
- HIST 474 Topics in Modern European Intellectual History
- HIST 493/ HIST 693 Problems in Modern Chinese History (permission of instructor)
- NES236/ JWST 236/ COML 246 Israel: Literature and Society
- NES 294/ JWST 294/ GOVT 358 Modern History of the Near East
- NES 366/ JWST 366 Ancient Near East
- SOC 393/ GOVT 393 Sociology of War and Peace

### Language Requirement

IR Concentrators are expected to complete additional language study beyond the College of Arts and Sciences degree requirement. This study can be accomplished in one of two ways:

1. Two years of one foreign language (proficiency plus one course)
2. Two languages at proficiency

### Study Abroad

IR Concentrators are strongly encouraged to study abroad to bring a practical dimension to their expertise in international issues. Those who choose this option will find the requirements for the concentration highly compatible with study abroad.

All courses used to fulfill the concentration requirements must be taken for a letter grade. Transcripts will reflect successful completion of the requirements for the concentration. In addition, students will receive a special certificate signed by both the director of the Mario Einaudi Center for International Studies and the director of the international relations concentration. To enroll and for further information, contact Zhong Wu, the administrative coordinator, IRC, at the Mario Einaudi Center for International Studies.

### Center for International Studies

See Interdisciplinary Centers, Programs, and Studies.

### Program of Jewish Studies

- D. I. Owen, director (Ancient Near Eastern and Biblical History and Archaeology)
- L. Adelson (German-Jewish Literature and Culture)
- R. Brann (Judeo-Arabic Studies)
- S. Burgwyn (Israeli Music)
- V. Caron (Modern French and European-Jewish History)
- M. Diesing (Yiddish Language and Linguistics)
- N. Furman (French Holocaust Literature)
- K. Haines-Eitzen (New Testament and Early Christianity)
- Y. Halevi-Wise (Modern Hebrew Literature)
- R. Hoffman (Holocaust Studies)
- P. Hyams (Medieval Jewish History)
- D. LaCapra (Holocaust Studies)
- M. Levine (Modern Middle Eastern History and Political Science)
- M. Migiel (Italian Literature)
- R. Polenberg (American-Jewish History)
- J. Porte (American-Jewish Writers)
- D. S. Powers (Arabic and Islamic Studies)
- G. Rendsburg (Biblical and Semitic Studies)
- E. Rosenberg (Holocaust Studies)
- N. Scharf (Hebrew Language)
- D. Schwarz (Anglo-Jewish Literature)
- G. Shapiro (Russian-Jewish Literature)
- S. Shoer (Hebrew Language)
- M. Steinberg (German-Jewish History and Culture)
- Y. Szekely (Judaica Bibliography)
- J. Zorn (Biblical Archeology)

The Program of Jewish Studies was founded as an extension of the Department of Semitic Languages and Literatures, now the Department of Near Eastern Studies, in 1973 and attained status as an intercollegiate program in 1976.

The program has grown out of the conviction that Judaism civilization merits its own comprehensive and thorough treatment and that proper understanding of any culture is inconceivable without adequate knowledge of the language, literature, and history of the people that created it. Accordingly, the offerings in the areas of Jewish languages and literatures have been considerably expanded, and courses in ancient, medieval, and especially modern Jewish history and culture have been added to the program.

It is a broadly based, interdisciplinary program, bringing together faculty from various Cornell departments and colleges.

The Program of Jewish Studies supports teaching and research in the many areas of Jewish Studies. It is a secular, academic program, whose interests are diverse and cross-cultural. The program recognizes its special relationship to teaching and research in classical Judaica and Hebraica pursued by the members of the Department of Near Eastern Studies.

It presently enables students to obtain basic instruction and specialization in the fields of Semitic languages; the history, literature, and culture of ancient, medieval and modern Hebrew literature; ancient, medieval, and modern Jewish history; and Holocaust studies. In some of these fields students may take courses on both graduate and undergraduate levels. Faculty throughout the university provide breadth to the program by offering courses in related areas of study.

### Courses Offered

**JWST 105-106 Elementary Modern Hebrew I and II** (also NES 101-102)

- 105 fall: 6 credits. S. Shoer.
- For description, see NES 101-102.

**JWST 123-124 Elementary Biblical Hebrew I & II** (also NES 123-124, RELST 123-124)

- 123 fall; 124 spring. 3 credits. Y. Chen.
- For description, see NES 123-124.

**JWST 163 Things the Prophets Never Told You: Archaeology and the Religion of Ancient Israel** (also NES 163)

- Fall. 5 credits. J. Zorn.
- For description, see NES 163.

**JWST 201-202 Intermediate Modern Hebrew I and II** (also NES 201-202)

- 201, fall; 202, spring. 4 credits. N. Scharf.
- For description, see NES 201-202.
JWST 223 Introduction to the Bible I (also NES 223) Fall. 3 credits. G. Rendsburg. For description, see NES 223.

JWST 229 Introduction to the New Testament (also NES 229, RELST 229) Fall. 3 credits. K. Haines-Eitzen. For description, see NES 229.

JWST 236 Israel: Literature and Society (also NES 236) Fall. 3 credits. Y. Halevi-Wise. For description, see NES 236.

JWST 252 Modern European Jewish History, 1789-1948 (also HIST 291) Fall. 4 credits. V. Caron. For description, see HIST 291.

JWST 255 Women and The Holocaust (also ENGL 252, WOMNS 252) Fall. 4 credits. M. Jacobus. For description, see ENGL 252.

JWST 263 Introduction to Biblical History and Archeology (also RELST 264, ARKEO 263 and NES 263) Fall. 4 credits. G. Rendsburg. For description, see ENGL 252.

JWST 271 Yiddish Linguistics (also LING 241) Fall. 4 credits. M. Diesing. For description, see LING 241.

JWST 279 The Hebrew Bible and The Arabic Qur'an in Comparative Perspective (also NES 299, GOVT 358) Spring. 4 credits. M. Diesing. For description, see GOVT 358.

JWST 290 History of Zionism and the Birth of Israel (also NES 290, HIST 267) Spring. 4 credits. M. Diesing. For description, see HIST 267.

JWST 301-302 Advanced Modern Hebrew I and II (also NES 301-302) Spring. 3 credits. M. P. Diesing. For description, see NES 300.

JWST 323 Encounters With The Dead (also JWST 623, ITALL 323/623, COM L 323/623) Fall. 4 credits. T. Sharlach. For description, see ITALL 323.

JWST 326 Women in the Hebrew Bible—seminar (also NES 326, WOMNS 326) Spring. 4 credits. G. Rendsburg. For description, see NES 326.

JWST 328 Gnosticism and Early Christianity (also NES 326, RELST 330) Spring. 4 credits. M. Diesing. For description, see NES 328.

JWST 329 Intro to the New Testament—Seminar (also NES 329, RELST 329) Fall. 1 credit. K. Haines-Eitzen. For description, see NES 329.

JWST 339 Islamic Spain: Culture and Society (also NES 339/639, JWST 639, RELST 334, SPAN L 339/699, COM L 334) Fall. 4 credits. M. Diesing. For description, see HIST 285.

JWST 363 Society and Law in the Ancient Near East (also NES 363) Fall. 4 credits. R. Brann. For description, see NES 363.

JWST 366 The History and Archaeology of the Ancient Near East (also NES 366, ARKEO 366) Fall. 4 credits. D. I. Owen. For description, see NES 366.

JWST 400 Seminar in Advanced Hebrew (also NES 400) Fall. 4 credits. Enrollment limited to 15 students. N. Scharf. For description, see NES 400.

JWST 414 History into Fiction: Nazis and the Literary Imagination (also ENGL 404, COM L 404, GERST 414) Fall. 4 credits. E. Rosenberg. For description, see ENGL 404.

JWST 418 Exploring the Israeli Folksong (also S HUM 416, MUSIC 418) Spring. 4 credits. S. Burstyn. For description, see S HUM 418.

JWST 421 Readings in Biblical Hebrew Poetry (also NES 421, RELST 421) Fall. 4 credits. G. Rendsburg. For description, see NES 421.

JWST 422 History into Fiction: Nazis and the Literary Imagination (also ENGL 404, COM L 404, GERST 414) Fall. 4 credits. E. Rosenberg. For description, see ENGL 404.

JWST 435-436 Aramaic I & II (also NES ASS-347, RELST 344) Fall. 4 credits. D. La Capra. For description, see NES 435.

JWST 454 Anti-Semitism and the Crisis of Modesty (also HIST 474) Spring. 4 credits. D. La Capra. For description, see HIST 474.

JWST 457 Topics in Modern European Intellectual and Cultural History (also HIST 457) Spring. 4 credits. T. Sharlach. For description, see HIST 457.

JWST 458 Imagining the Holocaust (also JWST 658, ENGL 458/658, GERST 457/657) Spring. 4 credits. D. Scharf. For description, see ENGL 458.

JWST 466 The Mythology and Religion of Ancient Mesopotamia and Canaan (also NES 466, RELST 466) Spring. 4 credits. T. Sharlach. For description, see NES 466.

JWST 474 Topics in Modern European Intellectual and Cultural History (also HIST 474) Fall. 4 credits. D. La Capra. For description, see HIST 474.

JWST 479 Jewish-American Writing (also ENGL 479, AM ST 479) Fall. 4 credits. J. Porte. For description, see ENGL 479.

JWST 499 Independent Study—Undergraduate Fall and spring. Variable credit. Staff.

JWST 499 Independent Study—Honors Fall and spring. Variable credit. Staff.

JWST 623 Encounters With The Dead (also JWST 323, ITALL 323/623, COM L 323/623) Fall. 4 credits. M. Diesing. For description, see ITALL 323.

JWST 639 Islamic Spain: Culture and Society (also NES 339/639, JWST 339, RELST 334, SPAN L 339/699, COM L 334) Fall. 4 credits. R. Brann. For description, see NES 339/639.

JWST 658 Imagining the Holocaust (also JWST 458, ENGL 458/658) Spring. 4 credits. D. Schwarz. For description, see ENGL 458/658.

JWST 197 Introduction to the Near Eastern Civilization (also NES 197 and RELST 197) Fall. 3 credits. K. Haines-Eitzen. For description, see NES 197.

JWST 223 Introduction to the Bible (also NES 223 and RELST 223) Fall. 3 credits. Y. Halevi-Wise. For description, see NES 223.

JWST 227 Introduction to the Prophets (also NES 227 and RELST 227) Fall. 3 credits. R. Brann. For description, see NES 227.

JWST 239 Cultural History of the Jews of Spain (also COM L 239, NES 239, RELST 239, and SPAN L 239) Fall. 3 credits. M. Diesing. For description, see HIST 285.

JWST 248 Introduction to Classical Jewish History (also RELST 248 and NES 248) Fall. 3 credits. M. Diesing. For description, see HIST 285.

JWST 251 The Holocaust: The Destruction of European Jewry Fall. 3 credits. M. Diesing. For description, see HIST 285.

JWST 253 From Medievalism to Modernity: The History of Jews In Early Modern Europe, 1492-1789 (also NES 245, HIST 285) Spring. 4 credits. M. Diesing. For description, see HIST 285.

JWST 261 Ancient Seafaring (also NES 261, ARKEO 275) Fall. 3 credits. M. Diesing. For description, see HIST 285.

JWST 290 History of Zionism and the Birth of Israel (also NES 290, HIST 267) Spring. 4 credits. M. Diesing. For description, see HIST 267.

JWST 328 Gnosticism and Early Christianity (also NES 326, RELST 330) Spring. 4 credits. K. Haines-Eitzen. For description, see NES 328.

JWST 339 Islamic Spain: Culture and Society (also NES 339/639, JWST 339, RELST 334, SPAN L 339/699, COM L 334) Fall. 4 credits. R. Brann. For description, see NES 339/639.
John S. Knight Writing Program

The director of the John S. Knight Writing Program is Jonathan Monroe, professor in the Department of Comparative Literature and George Elliott Reed Professor of Writing and Rhetoric. Katherine Gottschalk, senior lecturer in the Department of English, is the Walter C. Teagle Director of First-Year Writing Seminars. The program's offices are in 159 Goldwin Smith Hall, 255-4061.

M. Gilliland (Writing Workshop), K. Hjortshoj (Writing Workshop), B. LeGendre (Writing Workshop), J. Martin (Writing Workshop), J. Pierpoint (Writing Workshop), E. Shapiro, (Writing Workshop).

The John S. Knight Writing Program helps to coordinate the teaching of writing for undergraduates in six of the university's schools and colleges (the School of Industrial and Labor Relations and the colleges of Agriculture and Life Sciences, Architecture, Art, and Planning, Arts and Sciences; Engineering; and Human Ecology). The program administers writing seminars for first-year and upperclass students, tutorial writing classes, and seminars in the teaching of writing. More than thirty academic departments and programs participate in the program.

Advanced Writing Seminars

For upperclass students, the program collaborates with the Department of English in offering English 288-89, "Expository Writing." This course helps students write with more confidence and skill in all disciplines, while provoking inquiry into particular areas of study, forms or uses of writing, or topics intimately related to the written medium. Students may choose among a variety of sections focusing on such themes as "Writing about the Social World," "Writing in the Humanities," "Issues and Audiences," "Understanding the News," and "The Languages of Science."

First-Year Writing Seminars

For first-year students the program offers the first-year writing seminars—more than 125 different courses in the humanities, social sciences, expressive arts, and sciences. Through introductory work in a particular field of study, seminars help students write good English expository prose—prove that, at its best, is characterized by clarity, coherence, intellectual force, and stylistic control. All seminars pursue this common aim through small classes, with a maximum of seventeen students, and adherence to a program-wide set of guidelines:

- Seminars require at least six—and at most ten—formal writing assignments on different topics, totaling a minimum of thirty pages. (Some of the 30-page total may include preparatory drafts.)
- A minimum of two of the required essays (see above) are developed through several stages of revised drafts under the instructor's guidance so that the revisions stand as substantially improved essays.
- All seminars spend ample classroom time on work directly related to writing.
- Reading assignments in the course subject are kept under 75 pages per week to permit regular, concentrated work on writing.
- All students meet in at least two individual conferences with the instructor.

Offerings change from semester to semester. Each term's first-year writing seminars are described in a brochure available from college registrars. To ensure that students will enjoy the benefits of small writing classes, first-year writing seminars are limited to no more than seventeen students. Instead of pre-enrolling in their writing courses, students request placement in one of five writing seminars by filling out and submitting a form from their college registrars. Over ninety percent receive one of their top three choices. Students may change their writing seminars each semester in the First-Year Writing Seminar Exchange. Changes can also be made at special First-Year Writing Seminar add/drop sessions held during the first two weeks of each semester.

The colleges and the school served by the program accept first-year writing seminars in fulfillment of their individual graduation requirements in categories referred to variously as "first-year writing," "oral and written expression," and the like. The program does not decide whether students may graduate: it makes courses available. Individual colleges and schools administer their own graduation requirements.

Currently, most undergraduate students are required to take first-year year writing seminars. Architecture majors, however, need only one. Hotel students fulfill their requirement through Hotel Administration 165, which should be taken with Hotel Administration 265 during the first two semesters at Cornell. Agriculture and Life Sciences students can take first-year writing seminars or choose from among a variety of other courses to fulfill their requirement.

All students who score "4" or "5" on the Princeton Advanced Placement Examination in English receive these credits. Such credits are awarded automatically; no application to the John S. Knight Writing Program or the Department of English is necessary. How these credits may be applied to first-year writing or other distribution requirements depends on the student's college and score. All students who score "5," except Architecture majors, may apply their three credits toward the writing requirements of their college. Of students who score "4," only Architecture and Industrial and Labor Relations students may apply their three credits toward the writing requirements of their college. Students should always consult their college registrars to be certain that they understand their writing requirements.

Students who have already taken a first-year writing seminar, or who score "4" or "5" on the Princeton AP exam, or "700" or better on the English Composition or CEEB tests, may enroll, space permitting, in the following upper-level first-year writing seminars: English 270, 271, or 272.

Although there are no exemptions from college writing requirements, some students may fulfill all or part of their college's writing requirement through transfer credits or writing-course substitutions.

For work done at other institutions to be accepted as equivalent to first-year writing seminars, students should demonstrate that they have done a reasonably equivalent amount of writing in a formal course. (It is not sufficient to write, for example, one thirty-page term paper.) Students in the College of Engineering and the College of Arts and Sciences must file an "application for transfer evaluation" to request writing credit for such courses; students in other colleges should consult their college registrars.

In unusual circumstances, upper-level students may petition to use a Cornell writing course other than a first-year writing seminar to satisfy part of their writing requirement. The John S. Knight Writing Program must approve all such petitions in advance.

For information about the requirements for first-year writing seminars and descriptions of seminar offerings, consult the John S. Knight Writing Program brochure, available from college registrars in August for the fall term and in late October for the spring term.

Teaching Writing

Each summer and fall, the program offers instruction in the teaching of writing to new staff members in the first-year writing seminars and other interested instructors. Teaching Writing I, offered in the summer, is primarily a course for graduate students; the same course is offered in the fall as Teaching Writing II. The program also sponsors a summer apprenticeship program for a limited number of graduate students, and a summer seminar for faculty members interested in the teaching of writing.

WRIT 700 Teaching Writing

Summer and fall. 1 credit. S-U grade only.

Teaching Writing introduces new instructors of Cornell's First-Year Writing Seminars to the challenges of teaching writing in courses that both introduce students to particular fields of study and develop the sophisticated writing skills students will need throughout their undergraduate careers and beyond. An overview of methodologies involved in the teaching of writing within a disciplinary context is provided by readings representing a range of pedagogical theories and practices, seminar discussions, and presentations of faculty, visiting scholars in the field, and experienced TAs. Participants in the course prepare written assignments designed to prepare them for the actual work of their First-Year Writing Seminars. In addition, written critiques and explanatory rationales of those assignments provide an opportunity for reflection on the methods chosen and on the principles underlying them.

WRIT 707 Literacy, Social Organization, Consciousness, and the Information Society (also ENGL 707, LING 707, SOC 707, & PSYCH 707)

Fall. 5 credits. C. Bazerman.

This course will investigate the literate practices of contemporary academic, disciplinary, and professional cultures, which are deeply implicated in contemporary forms of social organization and consciousness. We will examine the historical emergence and elaboration of literate practices and the implications for contemporary society moving from print to electronic media. This investigation will start with considering the interaction of literacy and social organization at earlier
moments and will then consider some relevant theory to expose the ways text, social organization, and consciousness interact. We will then return to the rise and organization of academic, disciplinary, professional, and information culture. Each participant in the seminar will be responsible for developing a project examining socio-cognitive discursive practices within a classroom, disciplinary, professional, or cyber-information domain.

Writing Workshop
The John S. Knight Writing Program offers "An Introduction to Writing in the University" for first-year students (or transfer students needing writing credit) through the Writing Workshop. This course is designed for students who have had little training in composition or who have serious difficulty with writing assignments.

Writing 137 and 138 are graded S-U only, and students receiving a grade of S are granted credit toward their college writing requirements. Students who think this course might be appropriate, including non-native speakers of English scoring less than 600 on the Test of English as a Foreign Language (TOEFL), should attend the assessment sessions offered by the Writing Workshop during orientation week each fall. The Workshop also offers a Walk-In Service (see below) to help students work on writing assignments. The director is Joe Martin, senior lecturer in the Writing Workshop. The Workshop offices are in 174 Rockefeller Hall, 255-6349.

The Walk-In Service
Through the Walk-In Service, the Writing Workshop offers tutoring assistance in writing to any student who needs help with a writing project. The Walk-In Service has tutors available during the academic year in 174 Rockefeller and north- and west-campus residential areas. The director is Mary Gilliland. For information contact the Writing Workshop, 174 Rockefeller Hall, 255-6349.

WRIT 137-138, 134 An Introduction to Writing in the University
137, fall, 138, spring; 134, summer. 3 credits each term. Each section limited to 12 students. Partially during the fall and spring, 6 students in the summer. S-U grades only. Prerequisite: permission of instructor. This writing seminar is designed for students who need more focused attention to order to master the expectations of academic writing. The course emphasizes the analytic and argumentative writing and critical reading essential for university-level work. With small classes and with weekly student/teacher conferences, each section is shaped to respond to the needs of students in that particular class.

WRIT 139-239 Special Topics in Writing
Fall, spring. 139, undergraduate students only; 239, graduate students only. 3 credits. S-U grades only. Cannot fulfill any writing or distribution requirements. Prerequisite: permission of instructor. These courses allow students the opportunity to resolve significant writing challenges that have interfered with their academic progress. Students must have ongoing writing projects on which to work. Instruction is in weekly tutorials. Interested students should come to 174 Rockefeller for more information.

Latin American Studies
190 Urs Hall

The Latin American Studies Program encourages and coordinates faculty and student interests in Latin America. A variety of special lectures, films, and seminars supplement the regular courses offered. Graduate students may pursue a minor in Latin American Studies, while majoring in the field of their choice.

Undergraduate Concentration
Undergraduate students may fulfill a Latin American Studies Concentration by completing a minimum of 15 credits in Latin American studies courses combined with language proficiency in Quechua, Spanish, or Portuguese. Latin American courses are offered in the College of Agriculture and Life Sciences; the College of Architecture, Art, and Planning; College of Arts and Sciences, College of Human Ecology; and the School of Industrial and Labor Relations.

For further information and a current course listing, students should contact the program office at 255-3345 or 190 Urs Hall.

Latin American Studies Core Courses
It is strongly recommended that undergraduate concentrators take the interdisciplinary core course SPAN 320/LASP 301 Perspectives on Latin America.

Particular attention is drawn to the following courses that students have taken in the past to complete requirements for the undergraduate concentration or the graduate minor.

Other courses may be substituted with the approval of the advisor.

213 Intermediate Spanish for the Medical and Health Professions
300 Directed Studies. Extra credit for ANTHRO 333 and CRP 371
Undergraduate Concentration

The Latino Studies Program offers an undergraduate concentration in Latino Studies which consists of an interdisciplinary course of study primarily in history, sociology, anthropology, literature and language. To complete the concentration, students must take at least five courses (minimum total of 15 credits) in Latino Studies, including “Latinos in the United States” (LSP 201/SOC 265) offered each spring semester. Students are required to include at least two courses at the 300 or 400 levels. Students who are interested in the concentration must meet with the LSP advisor, senior lecturer Loretta Carrillo, and file an application with the Latino Studies Program office by the beginning of their junior year. A maximum of one independent study, which requires the approval of the LSP advisor, will be accepted to fulfill the requirements of the concentration. The FWS does not count towards fulfilling concentration requirements.

Resource Center

The Latino Studies Program Resource Center in 432 Rockefeller Hall serves Cornell students, faculty, staff, and the wider local community. The Resource Center maintains print and online material pertinent to U.S. Latino issues and also provides a meeting space for more than 25 Latino student organizations.

Courses

**LSP 201 Latinos in the United States (also SOC 265)**
Exploration and analysis of the Hispanic experience in the United States. An examination of sociohistorical background and economic, psychological, and political factors that converge to shape a Latino group identity in the United States. Perspectives are suggested and developed for understanding Hispanic migrations, the plight of Latinos in urban and rural areas, and the unique problems faced by the diverse Latino groups. Groups studied include Mexican Americans, Dominicans, Cubans, and Puerto Ricans.

**LSP 240 Survey in U.S. Latino Literature (also ENGL 240)**
Spring. 4 credits. Time: THA
M. P. Brady.
It is estimated that by the year 2000, the Latino/a population in the United States will be the largest “minority group” in the country. This course seeks to introduce students to the growing body of literature (both fiction and poetry) by the various U.S. Latino/a communities. We will consider cultural production that results from intercultural crossings between Mexico, Cuba, Guatemala, and the United States. Topics may include the development of a Latina/o perspective on personal, social, and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We will investigate these works as artistic attempts to deal with such issues as “race,” ethnicity, gender, sexuality, class, national identity, and general, in a time when the American identity is increasingly becoming “Latinized.” Authors examined may include Tomas Rivera, Cherríe Moraga, Jesús Colón, Miguel Pinero, Nicolsa Mohr, Cristina García, Julia Alvarez, América Paredes, Junot Díaz, Luisa Muritzi Perez, Sandra Benitez, and Lorna De Cervantes, Frances Negron-Muntaner, Luisa Elzabe, and Hector Tobar.

**LSP 246 Contemporary Narratives by Latina Writers (also SPANL 246)**
Fall. 3 credits. T TH 1:25-2:40. L. Carrillo.
This course offers a survey of narratives by representative Latina writers of various Latino ethnic groups in the United States including Chicana, Chilena, Cuban, Dominican, and Puerto Rican. We will investigate the parallel development of a Latina perspective on personal, social, and cultural issues alongside that of the U.S. ethnic liberation/revitalization movements of the 1960s through to contemporary feminist activism and women of color movements. We will investigate these works as artistic attempts to deal with such issues as culture, language and bilingualism, family, gender, sexuality, and domesticity. We will account for regional distinctions and contributions. Readings will include works by Julia Alvarez, Gloria Anzaldúa, Elena Castedo, Ana Castillo, Denise Chávez, Sandra Cisneros, Judith Ortiz Cofer, Cristina García, Nora Glickman, Nicholas Mohr, Cherríe Moraga, Achy Obejas, Esmeralda Santiago, Ana Luisa Vega, and Helena Maria Viramontes.

**LSP 260 Introduction to U.S. Latino History, Part I (also HIST 260, AM ST 259)**
Spring. 4 credits. T TH 1:25-2:40. C. Garcia.
This course introduces students to the history of Latinos in the United States. We will focus specifically on the history of Chicano (Mexican Americans) and Central Americans. Part II of this course LSP/HIST/AM ST 261 focuses on the history of Puerto Ricans, Cubans, and Dominicans in the U.S. Among the topics that will be covered are: historical immigration patterns and the “push/pull” factors that compelled migration to the United States.
United States, the social and political events that shaped the evolution of these Latino communities, the role of cultural identity, race, class, and gender in shaping experience; the role of foreign policy in formulating immigration policy.

**LSP 261 Introduction to U.S. Latino History, Part II (also HIST/AM ST 261)**
Fall. 4 credits. T-TH 2:55-4:10.
M. C. Garcia.
This course, part II of a two-semester sequence, introduces students to the history of Latinos in the U.S. In LSP/HIST/AM ST 261 we will focus on Puerto Ricans, Cubans, and the Dominicans in the United States. (LSP/HIST 260; AM ST 259 focuses on Mexican Americans/Chicanos and Central Americans.) Among the topics to be addressed are: historical immigration patterns and reasons for migration, the social and political events that shaped the evolution of these communities; the role of cultural identity, race, class and gender in shaping experience; the intersection of U.S. policy and immigration policy.

**LSP 280 Intercultural Ethnoscapes: Spain and America (also ANTHRO 280)**
Fall. 3 credits. M W F 1:25-2:15. One-time course offered by visiting professor. Visiting Professor M. Buxo I Rey.
At the end of each century, the West has reflexively considered its cultural achievements. The nineteenth century ended with the utopian illusion that knowledge was being transformed into industrial, scientific and social progress. The twentieth ends with the illusion of a breakthrough to a knowledge-based society that is globally and locally interconnected. Yet to be categorized is a fundamental cultural change, global ubiquity, immediacy, and virtuality that have to build on new meanings, designs, and actions. This course uses the past and the present link between Spain and America as an ethnographic laboratory to explore the agency and the intercultural translation of meanings, sentiments and identities through the selection and hybridization of cultural objects and visual and textual expressions, including iconography and ritual, gardens, literature, mass media and the Internet.

**LSP 306 Latino Politics in the United States (also GOVT 306)**
P. Cabin.
The opening section examines the evolution of Latino/a political identity and the ongoing debate on whether Latinos constitute a homogeneous ethnic/racial population with common political interests, values and aspirations. We examine the immigration experience and the socioeconomic and demographic characteristics of different Latino/a populations. The next section focuses on the changing structure of U.S. politics, at the national, state and local levels. We examine the histories of Latinos' organizing and electoral struggles to gain access to the political system, their patterns of political socialization, and the possibilities of and obstacles for coalition building with other racial/ethnic populations. Finally, the course will examine a number of case studies on Latinos' struggle for inclusion in the U.S. body politic, and look at ways in which they have challenged efforts to exclude them. We will be concerned with four recent policy issues: welfare and immigration reforms, affirmative action, bilingual education and civil rights legislation. Understanding how the decisions and actions of the legal system and courts have altered the opportunities for Latino economic advancement, and the campaigns organized by these affected communities to reverse injurious legislation, will be the central themes here.

**LSP 366 Spanish in the United States (also LING 366)**
M. Santiago-Irizarry.
Examination of major Spanish dialects in the United States from a linguistic perspective. Contrast with the standard language. Borrowing, interference, and code switching. Syntactic, morphological, and phonological characteristics.

**LSP 377 The United States (also ANTHRO/AM ST 377)**
Fall. 4 credits. T-TH 11:40-12:55.
V. Santiago-Irizarry.
The anthropological inquiry into one's culture is never a neutral exercise. This course will explore issues raised in the cultural construction of the United States as a "pluralistic" society. We will look at the ideological context for the production of a cultural profile predicated upon ideas that are intrinsic to American images of identity such as individualism, freedom, and equality and the way these are applied in practice. The course readings will include historic documents and accounts, popular writings, and recent ethnographies on the United States.

**LSP 396 Modern Latino Prose Fiction (also SPANL 396)**
D. Castillo.
A detailed examination of representative twentieth-century fictional works (novels, short stories, plays) by Hispanic American authors. Discussion will be centered on such issues as the social and political concerns raised by the fiction and the authors' needs to struggle with a double linguistic and cultural tradition. Authors include Nicholasa Mohr, Pat Mora, Zitkala'ah, Sandra Cisneros, Alejandro Morales, Tomás Rivera, Ron Arias, Raymond Barrio, and Luis Valdez.

**LSP 420/421 Independent Study**
Fall and spring. 2-4 credits. Permission of instructor.
Guided independent study.

**LSP 660 Latino Languages, Ideology, and Practice (also ANTHRO 660)**
Spring. 4 credits. T 4:30-6:30.
V. Santiago-Irizarry.
Cultural identity and citizenship in the United States have often been organized around linguistic difference and the issues this raises in an English-dominant society. Drawing from anthropological theories on language, this course will look at the place of language as a signifying practice in the U.S. by focusing on the experience of Latino communities. Topics to be explored include linguistic diversity and change, acculturation and resistance, language maintenance and shift, linguistic ideologies, the production of language hierarchies, and institutional applications of language.

**Law and Society**
D. A. Dunning, director, 280 Uris Hall, 255-6391, dad6@cornell.edu, R. Breiger (sociology), C. Carmichael (comparative literature), D. A. Dunning (psychology), G. Hay (economics), P. Hyams (history), M. Katzenstein (government), R. Miller (philosophy), M. B. Norton (history), R. Polenberg (history), D. Powers (Near Eastern studies), J. Rabin (government), A. Rutten (government), H. Shue (Ethics and Public Life).
The Law and Society Program offers an interdisciplinary concentration for undergraduates who are interested in the law from the perspectives of the social sciences and the humanities: anthropology, comparative literature, economics, government, history, philosophy, psychology, science and technology studies, and sociology. Students who wish to graduate with a concentration in law and society should consult the director of the program or one of the advisors listed above to plan a coherent program of study. Admission to the concentration has to be approved by the director of the program. Such a program should ordinarily include at least four courses from the following list. At least two of the courses should fall outside the student's major. Particular attention is drawn to GOVT 313 and PSYC 265, which past students have often taken. Other courses may be substituted with the approval of the advisor. The Law and Society Program is an activity of the Program on Ethics and Public Life. Inquiries can be directed to: Mary Newhart, Administrative Assistant, 119 Stimson Hall, 255-8515, mjn3@cornell.edu.

Lesbian, Bisexual and Gay Studies

The field of Lesbian, Bisexual and Gay Studies is devoted to the interdisciplinary study of the social construction of sexuality. LBG Studies is founded on the premise that the social organization of sexuality is best studied from the perspectives offered by those positions that have been excluded from established cultural norms. In addition to offering a graduate minor, the field of LBG Studies now offers an undergraduate concentration, which is administered under the auspices of the Women’s Studies Program and which consists of four courses from the list below. Although most of the courses in LBG Studies (including those on men) will probably fall under the aegis of the Women’s Studies Program and hence be crosslisted with it, not all of the courses in Women’s Studies are sufficiently focused enough on the social construction of sexuality per se to be part of the LBG Studies concentration. In order to qualify for the concentration, courses must devote a significant portion of their time to sexuality and to questioning the cultural and historical institution of exclusive heterosexuality. Students selecting their four courses from the LBG Studies subset must identify their concentration as either LBG Studies or Women’s Studies; they cannot double-count their credits and thereby use the same courses for both concentrations.

Students interested in the LBG Studies concentration should contact the Lesbian, Bisexual and Gay Studies Office in 379 Uris Hall.

Courses

ANTHR 200 Cultural Diversity and Contemporary Issues

Fall. 3 credits. Staff.

For description, see ANTHRO 200.

ANTHR 321 Sex and Gender in Cross-Cultural Perspective (also WOMNS 321)

Fall. 4 credits. K. March.

For description, see WOMNS 321.

ENGL 355 Decadence (also WOMNS 355)

Spring. 4 credits. E. Hanson.

For description, see ENGL 355.

[ENGL 377 Gay Fiction (also WOMNS 376)

Not offered 1999-2000. E. Hanson.]

[ENGL 395 Video: Art, Theory, Politics (also THET 395)

[ENGL 424 Studies in Renaissance Lyric

Not offered 1999-2000. B. Correll.]

ENGL 427 Shakespeare: Gender, Sexuality, Cultural Politics (also WOMNS 427)

Spring. 4 credits. B. Correll.

For description, see ENGL 427.

ENGL 608 Seminar in Cultural Studies: Race, Drugs and Gender

Spring. 4 credits. M. P. Brady.

For description, see ENGL 608.

[ENGL 654 Queer Theory (also WOMNS 654)

Not offered 1999-2000. E. Hanson.]

[ENGL 655 Decadence (also WOMNS 655/COM L 655)

Not offered 1999-2000. E. Hanson.]

ENGL 660 Cinematic Desire (also COM L 662 and WOMNS 661)

Fall. 4 credits. E. Hanson.

For description, see ENGL 660.

[ENGL 703 Theorizing Film: Race, Nation and Psychoanalysis (also FRLIT 695)

FRLIT 493 French Feminisms (also WOMNS 493)

Fall. 4 credits. N. Furman.

For description, see FRLIT 493.

[GERST 413 The Women Around Freud (also WOMNS 413)

Not offered 1999-2000. B. Martin.]

SPECIAL PROGRAMS AND INTERDISCIPLINARY STUDIES 593
GOVT 353 Feminist Movements and the State (also WOMNS 353)
Fall. 4 credits. M. Katzenstein.
For description, see GOVT 353.

[GOVT 352 Politics of Sexuality (also WOMNS 262)]

[GOVT 415 Race, Gender, and Organization (also WOMNS 415)]

GOVT 467 Radical Democratic Feminisms (also WOMNS 468)
Fall. 4 credits. A. M. Smith.
For description, see GOVT 467.

HD 284 Introduction to Sexual Minorities (also WOMNS 285)
Fall. 3 credits. R. Savin-Williams.
For description, see HD 284.

[HD 464 Sexual Minorities and Human Development (also WOMNS 467)]

[HIST 377 Gender in Early Modern Europe (also WOMNS 377)]

HIST 378 Topics in U.S. Women's History (also WOMNS 378)
Fall. 4 credits. M. B. Norton.
For description, see HIST 378.

[HIST 626 American Women's History (also WOMNS 626)]

LING 244 Language and Gender (also WOMNS 244)
Spring. 4 credits. S. McConnell-Ginet.
For description, see LING 244.

[PSYCH 277 Social Construction of Gender (also WOMNS 277)]

[PSYCH 450/650 Lenses of Gender (also WOMNS 450/650)]

[SPAN L 384 Literature and Revolution]

[SPAN L 400 Maricottea/Queer Theory]

THETR 320 Queer Theatre
Spring. 4 credits. J. E. Gainor and D. Matson.
For description, see THETR 320.

[THETR 336 American Drama and Theatre (also ENGL 336)]

[THETR 339 Theories and Techniques of 20th-Century Western Theatre]

[THETR 430 The Female Dramatic Tradition (also WOMNS 433)]
Next offered in 2–3 years. J. E. Gainor.

THETR 637 Seminar in Dramatic Theory
Fall. 4 credits. R. Schneider.
For description, see THETR 637.

WOMNS 211 Introduction to Feminist Theory
Fall. 4 credits. K. McCullough.
For description, see WOMNS 210.

WOMNS 405/605 Domestic Television
Spring. 4 credits. A. Villarejo.
For description, see WOMNS 405/605.

[WOMNS 441/641 Theater of Commodities: Feminism, Advertising, TV, and Performance (also THETR 439)]

WOMNS 465 Feminist Theory/Lesbian Theory (also GERST 465 and COM L 465)
Fall. 4 credits. A. Villarejo.
For description, see WOMNS 465.

[WOMNS 621 Lesbian, Gay, Bisexual Studies (also GERST 621)]

Medieval Studies

Undergraduate Study in Medieval Studies

The "middle" in "Middle Ages" comes from its position between late antiquity and the early modern period, a conception created for European and Western conditions. Our concentration, however, is more properly inclusive and treats a time span from roughly the 5th century into the 16th and ranges from Western Europe and the Mediterranean to China and Japan. To discover the vibrant state of medieval studies today, one need only look at the extraordinary range of scholarship, but accessible, Web sites that have sprung up all over the Internet. Cornell possesses a wealth of faculty and library resources to introduce students to every corner of the field.

While this concentration provides strong interdisciplinary breadth to majors in classics, any of the modern languages, history, medieval philosophy, etc., and is excellent preparation for graduate study in a medieval field, it could complement a science major as well. Many students feel bound to choose their majors with an eye to future careers and earning potential. The program provides encouragement, guidance, and an avenue for intelligent enjoyment of an important part of all our pasts. This concentration offers something different and extra. Coursework in Medieval Studies enhances the student's enjoyment and understanding of the artistic and material relics of the Middle Ages: Gregorian chant, manuscripts and stained glass windows, Gothic cathedrals, Crusader castles, and pictures of women trapped within ancient walls. The student will discover the serious realities involved in, and shaped by, Arthurian tales of brave knights and fair ladies, dragons, dragons, and other marvels. Students can analyze and appreciate the horrors of the Black Death, triumphs in courtly love and pitched battle, swords and scimitars, caliphs and popes, fear of demons and djinns, and the reassuring presence of angels.

The period saw many of the foundational choices that have, for good and ill, made the world what it is today. Many of our current challenges in the fields of law, human rights, attitudes toward power, authority, gender relations and sexual mores are derived from the ways in which society was formulated a millennium ago. The Medieval Studies Program houses a vital undergraduate association, Quodlibet, that arranges frequent lectures on medieval topics and an annual Medieval Reading of prose and poetry in many medieval languages.

Undergraduates who wish to undertake an independent major or concentration in Medieval Studies should consult the director of the program, 259 Goldwin Smith Hall, 255-8545, <medieval@cornell.edu>.

The Undergraduate Concentration in Medieval Studies shall consist of five medieval courses (at the 200-level or above) in at least two different disciplines, of which up to two may also count towards the major, and one must come from our list of approved "core courses."

Medieval Languages

Medieval texts (like all others) become most lively and informative when read in the original, and Cornell fortunately offers many courses for students interested in acquiring the relevant skills: Classical Arabic, Medieval Hebrew, Medieval Latin, Classical Chinese, Historical Sino-Japanese (Kambun) 700–1300 and Historical Sino-Japanese 1300–1600, Old English, Middle English, Gothic, Old Saxon, Old High German, Middle High German, Old Norse-Icelandic, Old Irish, Middle Welsh, Old Occitan (Provençal), Old French, Medieval Spanish, Medieval Italian, Old Russian, and Old Church Slavonic.

Some medieval languages require study of a modern language (e.g., French for Old Occitan and Old French) or a classical language (Classical Latin for Medieval Latin) as background. Students interested in a concentration in Medieval Studies should begin the study of a medieval language as early as possible, so that they may be able to study texts in the original before they graduate. Students are advised to consult the sponsoring departments for information about the prerequisites for various medieval languages.

Graduate Study

The Medieval Studies Program offers both an interdisciplinary and a literary comparative Ph.D. in Medieval Studies. Disciplinary fields of concentration offered within the Field of Medieval Studies are: Medieval Archaeology, Medieval History, Medieval History of Art, Medieval Literature, Medieval Philology and Linguistics, Medieval Music, and Medieval Philosophy. Information about the graduate program in Medieval Studies is contained in the catalog of the Graduate School, in a brochure on Medieval Studies available from the field coordinator, and at "Cornuopia," the program's Web site, <http://<www.arts.cornell.edu/medieval>.

and
Medieval Studies Courses: Graduate and Undergraduate

Courses in various aspects of Medieval Studies are offered every year in several cooperating departments, including Asian Studies, Classics, Comparative Literature, English, German Studies, History, History of Art, Linguistics, Music, Near Eastern Studies, Philosophy, Romance Studies, Russian Literature, and by the Society for the Humanities. The current year’s offerings are:

*ART H 230  Monuments of Medieval Art (also RELST 230) #
  Spring. 4 credits. R. G. Calkins.

ART H 336  Prelude to the Italian Renaissance (also RELST 336) #
  Fall. 4 credits. R. G. Calkins.

ART H 341  15th Century Flemish Painting (also RELST 342) #
  Spring. 4 credits. R. G. Calkins.

ART H 481  The Arts of China: Art of the T’ang Dynasty (618-907) @
  Fall. 4 credits. A. Pan.

*ART H 531  Problems in Medieval Art and Architecture: The Archaeology of the Book (also RELST 531)
  Fall. 4 credits. R. G. Calkins.

ASIANT 348  Indian Devotional Poetry (also RELST 348)
  Fall. 4 credits. D. Gold.

CHLIT 213-214  Introduction to Classical Chinese
  213, fall; 214, spring. 3 credits each term.
  S. Tian; T. L. Mei.

CHLIT 420  T’ang and Sung Poetry
  Spring. 4 credits. T. L. Mei.

CHLIT 607  Early Medieval Poetry
  Spring. 4 credits. S. Tian.

CLASS 369  Intensive Medieval Latin
  Summer. 4 credits. D. Shanzer.

ENGL 201  The English Literary Tradition #
  Fall. 4 credits. A. Galloway.

ENGL 212  Introduction to the Medieval Epic
  Spring. 4 credits. T. Hill.

ENGL 274  Scottish Literature #
  Fall. 3-4 credits. T. Hill and H. Shaw.

ENGL 310  Old English in Translation
  Spring. 4 credits. T. Hill.

ENGL 311/611  Old English
  Fall. 4 credits. T. Hill.

ENGL 312/612  Beowulf #
  Spring. 4 credits. R. Farrell.

ENGL 319  Chaucer
  Spring. 4 credits. R. Farrell.

ENGL 321  Spenser and Malory #
  Fall. 4 credits. C. Kaske.

ENGL 413/614  Middle English
  Fall. 4 credits. A. Galloway.

ENGL 710  Advanced Reading in Old English
  Fall. 4 credits. T. Hill.

FRLIT 448  Medieval Literature #
  Spring. 4 credits. A. Colby-Hall.

*HIST 263  The Earlier Middle Ages (also RELST 263) #
  Fall. 4 credits. J. J. John.

HIST 275  Authority and Resistance in Europe, 1400-1600 #
  Spring. 4 credits. S. Pohl.

HIST 326  History of the Samurai II @
  Fall. 4 credits. J. Piggott.

*HIST 366  Medieval Culture, 1100-1300 (also RELST 366) #
  Fall. 4 credits. J. J. John.

*HIST 368  Marriage and Sexuality in Medieval Europe (also RELST 368, WOMNS 368) @
  Spring. 4 credits. P. Hyams.

HIST 436  Conflict Resolution in Medieval Europe #
  Spring. 4 credits. P. Hyams.

HIST 490  Tales of the Heike (also ASIAN 490, S HUM 489) @
  Fall. 4 credits. J. Piggott and K. Brazell.

HIST 492  Undergraduate Seminar: Medieval Chinese History #
  Fall. 4 credits. C. A. Peterson.

ITAL 220  Medieval Italy
  Spring. 4 credits. W. J. Kennedy.

ITAL 323/623  Encounters with the Dead (also COM L 323/623, JWST 323)
  Fall. 4 credits. M. Migiel.

LING 315-316  Old Norse
  315, fall; 316, spring. 4 credits each term.
  E. Johannsson.

LING 441  Introduction to Germanic Linguistics
  Fall. 4 credits. W. Harbert.

MUSIC 494  Love, Sex, and Song in Medieval France
  Spring. 4 credits. J. Peraino.

NE 133-134  Qur’anic and Classical Arabic
  133, fall; 134, spring. 4 credits each term.
  M. Younes.

*NE 255  Introduction to Islamic Civilization (also HIST 255, RELST 255) @
  Spring. 3 credits. D. Powers.

NE 339/639  Islamic Spain: Culture and Society (also COM L 334, SPANL 339/699) @
  Fall. 4 credits. R. Brann.

*PHIL 315  Medieval Philosophy #
  Fall. 4 credits. S. MacDonald.

PHIL 410  Latin Philosophical Texts #
  Fall and spring. Variable credit.
  S. MacDonald.

RUSSA 601  Old Church Slavonic
  Fall. 4 credits. E. W. Browne.

RUSSA 602  Old Russian Texts
  Spring. 4 credits. E. W. Browne.

SANSK 131-132  Elementary Sanskrit (also CLASS 131-132, LING 131-132)
  131, fall; 132, spring. 4 credits each term.
  C. Minkowski; staff.

S HUM 403  Augustine’s Confessions: Memory and the Self (also CLASS 405, COM L 400, PHIL 413)
  Fall. 4 credits. C. Brittain.

S HUM 405  Augustine’s Dialogues on the Soul (also CLASS 406, COM L 424, PHIL 413)
  Spring. 4 credits. C. Britain.

Approved "core courses" for the undergraduate concentration are marked with an asterisk (*). Fuller descriptions of all courses are available in this catalog under the listings for the relevant departments. Even more detailed information can be found on the Web at <http://www.arts.cornell.edu/medieval/coursedesc.html>.

Modern European Studies Concentration

Susan Tarrow, coordinator

Students from any college may choose an undergraduate concentration in Modern European Studies to complement any major in any college. The purpose of the concentration is to provide a coherent structure for students with an interest in interdisciplinary study in the field of European studies.

The concentration has three tracks: European politics, economics and society; modern European history, and European culture. The requirements for the concentration are:

1) Competence in at least one modern European language, Romance, Germanic or Slavic (i.e., completion of a 300-level course or equivalent with a grade of at least B-, or demonstration of an advanced level of competence in an oral proficiency interview test where available).

2) Completion of two interdisciplinary core courses:

Government 341/Sociology 341: Modern European Society and Politics

Comparative Literature 311/Russian Literature 311/French Literature 315: Modern European Literature and Culture
  Fall 1999. 4 credits. G. Gibian.

Under certain conditions, students may be permitted to substitute other courses for those listed above.

3) Completion of one course in modern (post-1789) European history.

4) Two additional courses in any of the three areas, which may include a senior seminar (400 level).

a) Courses in European and comparative politics, anthropology, sociology, women’s studies, and related courses in the School of Hotel Administration, the College of Agriculture and Life Sciences, and the School of Industrial and Labor Relations.

b) Courses in modern European history (post-1789).

c) Courses in (post-1789) English and European literatures, comparative literature, semiotics, fine arts, architecture, music, philosophy, film and theatre arts, and women’s studies.

Only two courses may be used to satisfy requirements for both the major and the concentration. Courses satisfying the breadth and distribution requirements in the College of
J. Fajans, D. Fredericksen, J. W. Gair, D. Gold, T. D. Hill, D. Holmberg, P. R. Hyams, S. MacDonald, D. Mankin, K. S. March, S. Greene, K. Haines-Eitzen, J. S. Henderson, R. G. Calkins, C. M. Carmichael, K. Clinton, G. Gibian (Russian Literature); S. G. Tarrow (Music); S. Tarrow (Romance Studies); C. Rosen (Modern Languages); N. Zaslaw (Architecture); L. Abel (Anthropology); J. Bomeman (Archaeology); C. Otto (Architecture); L. Abel (College Scholars, Independent Majors); S. Christopherson (CPR); G. Fields (Economics); D. Schwarz (English); I. Ezerigaills (German Studies); J. Pontusson (Government); J. Weiss (History); M. Surer (Linguistics); C. Rosen (Modern Languages); N. Zaslaw (Music); S. Tarrow (Romance Studies); G. Gibian (Russian Literature); S. G. Tarrow (Sociology); D. Bathrick (Theatre Arts)

For a list of relevant courses and seminars, and any further information, contact Susan Tarrow, coordinator of the Modern European Studies Concentration, at the Institute for European Studies, 120 Uris Hall (telephone 255-7592, e-mail SRT2@cornell.edu).

Religious Studies

The Religious Studies Program, an academic unit offering a major in the scholarly study of religion through the College of Arts and Sciences, offers a wide variety of courses. In addition to dealing with various approaches to and topics in the study of religion, we have integrated curricula within our program for in-depth studies of Judaism, Christianity, the Hindu tradition and Buddhism. We also offer an increasing number of courses on Islam.

The Religious Studies Program is designed to meet the needs of three classes of students: 1) students planning to pursue advanced degrees in the academic study of religion or allied disciplines or subdisciplines (history of religions, religions in cultural context, intellectual movements in religion, etc.); 2) students seeking courses on topics relating to religion to fulfill distribution requirements; and 3) those students desiring a more general approach to the academic study of religion as a significant component of their liberal arts experience. To all students, our program offers an excellent opportunity to develop a deeper understanding and appreciation of the complex ways in which religious traditions, with their individual, communal, and doctrinal dimensions inform human thought and behavior. The courses offered through our program are informed by the established scholarly tradition of the study of religion as an academic, as opposed to confessional, pursuit. Religious traditions are explored in all of their complexity through comparative, contextual (in specific historical or cultural contexts) and thematic studies.

The program also hosts lecture series, conferences, symposia, and periodic social gatherings for faculty and students throughout the academic year to foster a sense of intellectual community among our students and faculty.

The Major in Religious Studies

Sign into the major: To sign into the major in Religious Studies, a student must have completed at least one course in Religious Studies prior to scheduling an appointment with the program director. Here is the process:

1) Schedule an appointment with Professor Jane-Marie Law, Director of Religious Studies; please contact her by e-mail: <jml16@cornell.edu>.

2) In addition to a copy of your current Cornell transcript (the informal one you regularly receive is acceptable), please bring to your meeting with Professor Law all of these forms, which are available in the Religious Studies office:
   a) a completed Religious Studies Major Application Form (available in Rockefeller 182)
   b) a proposed "Course of Study," which will be used as a guide in your conversation with the director and revised formal submission to the program upon your entrance as a major
   c) a College of Arts & Sciences Advisor/Major form which will be signed by your advisor.

Advising in the Religious Studies Program:

Upon entering the major in Religious Studies, a student is assigned a faculty advisor whose area of expertise most closely matches the proposed interest of the student. Students may propose a faculty member on their own, provided he or she is a current regular faculty member of the Religious Studies Program. An up-to-date advisor list is available in the Religious Studies office. Working closely with one's advisor when selecting courses is an important component of this program, enabling students to fulfill the requirements for the major while creating an integrated and coherent course of study out of our large number of multidisciplinary course offerings.

To graduate as a major in Religious Studies, a student must 1) complete with letter grades the program's two core courses, Religious Studies 101 "Understanding the Religions of the World" and "Religious Studies 449: History and Methods of the Academic Study of Religion" (these two core courses can not be waived); and 2) complete with letter grades eight additional courses approved for the major, at least four of them at the 300 level or above. The following specifications of this second requirement are designed to promote breadth (2a) and depth (2b) of study.

(2a) At least four of a major's eight additional courses are to be selected to ensure some familiarity with two (or more in special cases) different religious traditions or phenomena.

These courses may be at the introductory or advanced levels, though depth work at the 300 level or above is advised. For example, "Introduction to Asian Religions" (Religious Studies 250) might lead a student to take "The Religious Traditions of India" (Religious Studies 351), and then combine these with two courses on Judaism, "Introduction to Ancient Judaism" (Religious Studies 244) and "Cultural History of Jews of Spain" (Religious Studies 239).

(2b) At least two of these eight additional courses are to be selected to ensure depth of coverage in one religion or one group of closely related religious traditions or phenomena. In the first illustrative case described above, the student may combine "Introduction to Asian Religions" with one or more courses dealing with Buddhism, such as "Chinese Buddhism" (Religious Studies 357) or "Japanese Buddhism" (Religious Studies 348) to acquire a measure of specialist strength in the religious traditions of India with "Tantric Traditions" (Religious Studies 347) or "Indian Devotional Poetry" (Religious Studies 348) to develop an appropriate depth along a different dimension.

No more than one of the courses chosen to meet requirement 2a may be used to satisfy requirement 2b. Routinely, survey courses (which are offered at the 100 and 200 levels) should be combined with tradition on a geographically specific offerings at the 300 and 400 level to satisfy this aspect of the requirements.

To engage in the kind of focused study envisioned under 2b, a student will be expected to attain proficiency in a language other than English to access to relevant sources, primary or secondary. For example, a knowledge of Greek or Latin might be required for the study of Christianity (as well as Greek or Roman religions); of Hebrew or Aramaic for Judaism; of Arabic or , of Sanskrit or Hindi for Hinduism; of Pali, Chinese or Japanese for Buddhism. Religious phenomena like shamanism or totemism, though less firmly rooted in literary traditions, have generated substantial bodies of important scholarship in French and German, and an undergraduate major concentrating in this area of Religious Studies should be equipped to make independent use of such materials. Courses taken abroad or in special language proficiency requirement may not be applied to the course requirements described under 2a and 2b. Choice of language to fulfill this requirement is determined by the student in consultation with her or his advisor and is decided at the time the student enters the major.

Most courses approved for the major are offered by cooperating departments within the College of Arts and Sciences; a comprehensive up-to-date list of these courses is maintained at the office of the Religious Studies Program, 182 Rockefeller Hall.

Graduating with Honors in Religious Studies:

GENERAL INFORMATION

1. Eligibility. 3.0 cumulative average and 3.5 average inside the major with no grade in the major below B-. Program Director notifies eligible candidates over the summer between the junior and senior years of eligibility.
2. **Honors Courses.** Candidates must sign into RELST 495 (Senior Honors Essay) for up to eight credits (two courses) for two semesters. This two-semester sequence is required. After the first term, an R in the transcript indicates that this course (usually for 8 credits) is a yearlong course. When the project is completed at the end of the second semester, the grade recorded counts for all eight credits. (The eight-credit limit is the result of the conviction/belief that earning more than eight credits for a single "piece" of your undergraduate education is unwise.)

You submit your honors proposal (with and according to the program's instruction/cover sheet) to the Religious Studies administrator before the end of the spring term of your junior year. She/he then approves your signing into the honors courses.

3. **Honors Committee—3 faculty members.** While you are required to have three faculty members on your committee at the time of the submission of the final draft, we only require that two of them be identified when you submit your proposal. The three members should be:

   a. The professor who has agreed to work closely with you over the year and to be the supervisor/gradr of your project is chair of the committee.

   b. Another knowledgeable faculty member

   c. Religious Studies major advisor

   Sometimes your advisor is the supervisor/chair. If that is the case, you need two additional knowledgeable professors for your committee of three.

   You may have faculty outside the College of Arts and Sciences on your committee or as the supervisor, but non-A&S faculty have no obligation to supervise projects for students not in their own colleges, so be properly grateful.

**Courses Approved for the Major Sponsored by Religious Studies**

**RELST 101 Understanding the Religions of the World**

Fall. 3 credits. Required of Religious Studies majors. J. M. Law.

This course provides a dynamic introduction to the academic study of religion as an intellectual discipline through an overview of the world's major religious traditions including Hinduism, Buddhism, Taoism, Confucianism, Shinto (in Japan), Judaism, Christianity, and Islam. The focus for the fall of 1999 will be on religion and human rights (themes change annually). For each religious system, we will focus on 1) the dynamics of founding and promulgation; 2) core rituals, myths, doctrines, and texts; 3) changing understandings of community and identity; and 4) conceptions of the human-divine relationship, and its implications for peaceful interaction within and beyond the tradition's borders. To highlight our studies throughout the semester, we will explore how these themes of religious tradition get expressed through vibrant personal narratives—both oral and written. Representatives of many of the religions will address the class to discuss their lives in relationship to their religious tradition. Course work will include readings in primary source materials in translation and hands-on ethnographic work with local religious communities.

**RELST 123-124 Elementary Biblical Hebrew I and II**

Fall; 123, fall; 124, spring. 3 credits. Enrollment limited to 17 students. Y. Chen.
For description, see NES 123–124.

RELST 531 Problems in Medieval Art and Architecture (also ART H 531) # Fall. 4 credits. R. G. Calkins. For description, see ART H 531.

Additional courses offered by cooperating departments may also be approved through petition for the major in Religious Studies. For details see the program director, Jane Marie Law, 125 Rockefeller Hall or e-mail her at jml10@cornell.edu.

Russian and East European Studies Major

J. Borneman (Anthropology); G. J. Staller (Economics); S. Beck (Field and International Studies Program); I. Ezergailis, D. Bathrick (German Studies); V. Bunce, M. Evangelista, S. Tarrow (Government); P. Holquist, W. M. Pintner (History); U. Bronfenbrenner (emeritus, Human Development and Family Studies); P. Carden, G. Gibian, N. Pollak, S. Senderovich, G. Shapiro (Russian Literature); W. Browne, S. Paperno (Slavic linguistics); S. Szelenyi (Sociology)

The major in Russian and East European studies has the following requirements:

1) Proficiency in Russian or an East European language with one additional advanced (300-level) language or literature course. OR qualification in an East European language and qualification in another language useful for research in the area.*

2) At least one course relating to Russia or Eastern Europe, at the 200 level or above, in four of the following five departments: Government, Economics, History, Russian Literature and Sociology. Appropriate courses offered in other departments may be substituted for one of the above courses with the consent of the major adviser.

3) At least three additional courses at the 300 level or above, all from one of the following three departments: Government, History (within the History Department courses may be at the 250 level or above), or Russian Literature. One of the three courses must be at the 400 level or above. The three courses must be approved by the major adviser in the department of concentration.

To apply for the major, students are directed to the Institute for European Studies (Slavic and East European Studies Program), 120 Uris Hall. Students should designate an adviser in the department where his or her work will be concentrated. Students are encouraged to study abroad and should discuss their plans with their adviser. For questions concerning the major or the honors program, students should consult with their major adviser or inquire at the Institute for European Studies.

Honors Program in Russian and East European Studies

I. Students entering the Russian and East European Studies Major Honors Program must have a cumulative average of at least 3.0, no grade below a B in courses connected with the major, and a cumulative average inside the major of at least 3.5. Students will form a special honors committee consisting of their major adviser and two other faculty members not necessarily from the Russian and East European area.

II. Honors candidates must complete an honors thesis project during the senior year. The topic should be developed and approved in consultation with their major adviser. Part of the research should include sources in Russian or an Eastern European language.

III. Students may earn a total of eight credits for the courses in the honors program and should register for the appropriate number on the department of their major adviser.

IV. Ordinarily, in the first term of the senior year, students who meet the prerequisites will do independent research and reading in a particular area under supervision of their major adviser.

V. In the second term of the senior year, students will complete the honors project by a date set by the Slavic and East European Studies Program. Students should keep their committee members informed as their work progresses.

The committee will also assign a grade for the honors research course.

Courses

COM L 311 Modern European Literature and Culture (also RUSS L 311 and FRLIT 315) Spring. 4 credits.

COM L 367 The Russian Novel (also Russian Literature 367) # Fall. 4 credits.

Science of Earth Systems

The Science of Earth Systems (SES) is the study of the interactions between the atmosphere, oceans, biosphere, and solid Earth; these dynamic interactions control the global environment. The interdisciplinary approach of SES incorporates major components of geology, ocean and atmospheric sciences, terrestrial hydrology, biogeochemistry, and ecology into an integrated study of Earth as a complex system. Earth system science presents one of the outstanding intellectual challenges in modern science and is the primary foundation for the future management of our home planet.

The Major

The major in Science of Earth Systems emphasizes a rigorous, objective study of the Earth and its systems with broad preparation in basic sciences and mathematics, followed by the choice of an area of concentration for study in greater depth. The Science of Earth Systems program seeks to train students in a strong set of fundamental skills that will allow them to approach with quantitative rigor a wide range of questions about the Earth and its environment, and to adapt those skills rapidly to new areas of inquiry as they arise. The major in Science of Earth Systems is by nature interdisciplinary, and involves faculty from the College of Arts and Sciences, the College of Engineering, and the College of Agriculture and Life Sciences. In the College of Arts and Sciences the program is administered by the Department of Geological Sciences in collaboration with the Departments of Astronomy, Ecology and Evolutionary Biology.

The SES curriculum begins with a series of courses designed to provide preparation in fundamental science and mathematics necessary for a rigorous study of Earth Systems. This preparation is followed by three core courses providing breadth and integration. An additional set of four intermediate to advanced courses are selected to provide depth and a degree of specialization.

Students in the College of Arts and Sciences choosing to pursue the Science of Earth Systems major are required to take the following courses: PHYS 207-208 (or 112-213), CHEM 207-208, BIOSCI 101-103/102-104 (or 109-110), and MATH 111-112 (or 121-122, or 191-192). Three additional 3-4 credit hour courses in mathematics, physics, chemistry, or biology are required; these additional courses must require one or more of the basic courses listed above as a prerequisite. One of the courses must be either GEOL 201 or BIOS 261. Both GEOL 201 and BIOS 261 can be chosen. Mathematics at the level of MATH 221 or 293 is strongly recommended for all SES students, and those choosing areas of concentration in Atmospheric Sciences, Environmental Geophysics, or Hydrology should take MATH 222 or 294.

The four required SES core courses include the following:

- SES 301 (ASTRON 331, SCAS 331) Climate Dynamics
- SES 302 (GEOL 302, SCAS 352) Evolution of the Earth System
- SES 321 (GEOL 321, NATRES 321) Biogeochemistry

These courses are described in the section entitled "Interdisciplinary Centers, Programs, and Studies" at the beginning of the catalog. Twelve additional credit hours selected from 300- and 400-level courses approved by the SES Committee are required. These courses will ordinarily be organized around one of the SES areas of specialization. The areas of specialization currently include the following:

- Climate Dynamics, the study of physical and chemical processes producing Earth's weather and climate,
- Ocean Sciences, the study of the biological, chemical, and physical processes at work in the ocean (see "Courses in Marine Sciences" on p. 163),
- Hydrological Sciences, the study of the interactions of rock, water, snow, and ice on Earth's land surfaces,
- Biogeochemistry, study of element cycling near Earth's surface and how organisms both mediate and benefit from these fluxes,
- Environmental Geology and Geophysics, remote sensing, field and laboratory measurements of Earth's surface and subsurface applied to the study of the environment, global change, and natural hazards,
- Earth in Space, Earth's ionosphere and exosphere, solar-terrestrial interactions, and Earth as a planet.

Further information and applications contact B. Isacks, 255-2307, blil@cornell.edu or R. Kay, 255-3461, rwk6@cornell.edu. Also see the SES website at http://www.geo.cornell.edu/geology/SES_Arts.html for up-to-date information. Administrative offices are located at 2120 Snee Hall.

Society for the Humanities

Dominick LaCapra, Director

Fellows for 1999-2000

Charles Brittain (Cornell University)
Laura Brown (Cornell University)
Shai Burstyn (Tel-Aviv University)
Eric Cheffitz (University of Pennsylvania)
Sandra Greene (Cornell University)
Arthur Groos (Cornell University)
Jason Hill (Southern Illinois University)
Kobena Mercer (New York University)
Frederick Neuhouser (Cornell University)
Norie Neumark (University of Technology, Sydney)
John Ricco (Texas Tech University)
Mark Sanders (Barnard College)
Daniel Usner (Cornell University)
Priscilla Wald (University of Washington)
Janet Wolff (The University of Rochester)

The Society annually awards fellowships for research in the Humanities. The Fellowships offer, in line with much recent, informal seminars intended to be exploratory or interdisciplinary. These seminars are open to graduate students, suitably qualified undergraduates, and interested auditors. Students who want credit for a seminar should formally register in their own college. Persons other than those officially enrolled may attend as visitors with permission of the Fellow. The theme for 1999–2000 is: Points of Contact.

SHUM 301 Mind and Memory (also English 301, Music 372, and Theatre, Film, and Dance 301)
Creativity is the attribute of the mind that enables us to make new combinations from often unfamiliar information, to perceive analogies and other linkages in seemingly unlike elements, to seek for syntheses. As is true of all learning, creativity is dependent upon memory—a memory that is genetic and social as well as personal and experiential. This course will explore the nature of creativity in science and art, indicating the differing requirements for discovery in the disparate disciplines while demonstrating the commonality that underlies the creative process and binds physicist and mathematician to poet and visual artist.
The opening sessions will be concerned with the crucial role of memory in learning, discovery, and spiritual insight for all humans, and will make reference to recent scientific research into the complex nature of the human brain, including the intimate connections with the rest of the body. Following the introduction, the course will rely on weekly guest speakers from as many disciplines in the arts and sciences as possible, faculty members who will discuss the process underlying their research, or their work as creative or performing artists.
Members of this course are encouraged to enroll in another course or be engaged in an activity, in which the insights gained in this class can be applied or tested. For further abet to the active participation so necessary to learning, students will be asked to keep a journal, one that summarizes their understanding of, and response to, each presentation by a guest lecturer. This journal will serve as a continuing record of their experiences as members of the course and will become the basic resource for an essay, to be submitted at the semester's end. It will give them carefully considered assessment of the applicability of the what they have learned in this course to a second course or activity, to their own mental processes, and to the future they propose for themselves.

S HUM 403 Augustine's Dialogues on the Soul (also Classics 406, Comparative Literature 424)
Spring. 4 credits. Limited to 15 students. Permission of instructor. T 2:30–4:25. C. Britain.
Augustine's first works after his conversion were a series of Christian philosophical dialogues, modeled on the exemplary works of Plato. These dialogues exploit the Platonic conception of the soul Augustine found in the works of Platonism: its immateriality (On the quantity of the soul), its intellectual capacities (Against the Academics), its immortality (On the immortality of the soul), and its relation to God (The Soliloquies). But these texts are not simple translations of Greek philosophy into the pre-existing mold of the Latin dialogue; they represent Augustine's appropriation of the ' pagan' cultures of Greece and Rome for a new intellectual vision of Christianity. This course will examine Augustine's fusion and transformation of both the philosophical sources and the literary forms which provoked these powerful and conceptually rich dialogues.

S HUM 404 The European as Other (History 443)
Fall. 4 credits. Limited to 15 students. Permission of instructor. W 2:30–4:25. S. Greene.
Much has been written about European images of African men, African women and African cultural practices during the 18th, 19th and 20th century, but how did Africans view Europeans during these periods? How did these images influence the ways Africans saw themselves and each other and how did these change over time? These questions and others will be explored in this course by examining a variety of historical, literary and anthropological texts.

S HUM 405 Operatic Contacts (also Theatre, Film, and Dance 405, Music 405, Comparative Literature 406, German Studies 404)
Fall. 4 credits. Limited to 15 students. Permission of instructor. T 10:10–12:05. A. Groos.
This seminar begins with representative contacts involving other nations, races, and cultures in operas such as Verdi's Aida, Bizet's Carmen, and Puccini's Madama Butterfly. It then explores their post-colonial transformations, ranging from cinematic appropriations (Carmen), shifts from colonizer to colonized (Sessions, Montezuma), the repatriation and decolonization of Madama Butterfly in Japanese theatre, or the mapping of sexual politics onto race (M. Butterfly). Discussions involve text (in English translation) and music. Ability to read music will be helpful but is not required.

S HUM 406 Augustine's Confessions: Memory and the Self (also Classics 405, Comparative Literature 400, Religious Studies 402)
Fall. 4 credits. Limited to 15 students. Permission of instructor. T 2:30–4:25. C. Britain.
Augustine's Confessions record the strange story of his conversion or rediscovery of God under the stimulus of the letters of Paul and the pagan philosophy of Plutinus. The Confessions interpret his conversion as an act of memory or self-investigation which culminates in a Platonic philosophical vision of the divine at the limit of the self; the work itself is written as a self-conscious act of memory (or self-investigation); it also contains a theoretical analysis of memory (Book X). This course will study Augustine's conception of memory, its role in distinguishing the bridge from the self to the divine, and its origins in Greek philosophy, Latin rhetorical theory, and individual experience.

S HUM 407 Subjectivity and the Other I (also Philosophy 415)
Fall. 4 credits. Limited to 15 students. Permission of instructor. M 12:20–2:15. F. Neuhouser.
This seminar examines various forms of the idea that interactions with ' the other' (i.e., with other subjects) are essentially involved in the constitution of subjectivity. It will focus on the ways in which contact with the other is essential to reason, morality, freedom, and personal identity, as well as to alienation and self-taughtness. Readings will include: Rousseau on self-love and its connection to autonomy; Hegel's account of the master-slave relation and the unhappy consciousness; Sartre's view of the other as a threat to subjectivity; and de Beauvoir's portrayal of woman as the other and her attempt to unite autonomous subjectivity with being an object for others.

S HUM 408 Contemporary Native American Literature (also English 410)
This course will explore themes of Native American writing in the genres of fiction, poetry and non-fiction from the 1960s to the present with a particular emphasis on the social, political, and historical contexts that have influenced it. Students will be read from a list that, among others, includes M. Scott Momaday, Vine Deloria Jr., J. J. Charley, Elizabeth Cook-Lynn, James Welch, Gerald Vizcarraroz, Leslie Marmon Silko, Linda Hogan, Simon Ortiz, Luci Tapahonso, Louise Erdrich, Diane Glancy, Adrian Louis, Wendy Rose, Joy Harjo, Paula Gunn Alten, and Sherman Alexie.

S HUM 409 Cosmopolitanism and The Self (also Philosophy 442)
Fall. 4 credits. Limited to 15 students. Permission of instructor. T 12:20–2:15. J. Hill.
This seminar philosophically examines the racial and ethnic tribal identities on which contemporary selves are predicated. As a plausible antidote to problems spawned by tribalism, we will examine the possibility of a moral cosmopolitan identity. Readings will be taken from the Ancient and Enlightenment cosmopolitans as well as contemporary texts which aim to deconstruct the concept of race.

S HUM 410 Visual Studies in the Diaspora (also Comparative Literature 43, History of Art 410)
This course examines the formative role of visual representation in modern conceptions of 'race' and investigates diaspora-based art practices shaped by these social conditions. From 19th century colonialism through 20th century modernism, we consider the gaze, the stereotype, cultural hybridity and institutional policy in relation to the Harlem Renaissance, the Caribbean Artists Movement and contemporary debates on New Internationalism.
S HUM 415 Slavery and the Idea of Race in Early Modern England (also English 440, English 640)
Spring. 4 credits. Limited to 15 students. Permission of instructor. T 10:30–12:05
L. Brown.
This course considers the relation between the development of the modern idea of race and the economic exploitation of slavery in the first era of English imperial expansion. As an introduction to the topic, we will canvass important modern statements on the subject, including those of David Brion Davis, Ivan Hannaford, and Robin Blackburn. The readings will center on literary texts about slaves and slavery, including writings by ex-slaves in the Afro-British tradition of the late eighteenth century. But we will also explore materials from narratives of Caribbean travel and slave rebellion, anecdotes about freed slaves and slave punishments from contemporary magazines, and biological works on the classification of humans and other animals. Texts will include: Aphra Behn, Oroonoko; John Stedman, Narrative of a Five Years Expedition Against the Redced Negroes of Surinam; Janet Schaw, Journal of a Lady of Quality; Olaudah Equiano, Narratives of the Life; Ignatius Sancho, Letters of the Late Ignatius Sancho; Ossiah Cugoano, Thoughts and Sentiments on the Evil of Slavery; Edward Long, The History of Jamaica; Charlotte Dacre, Zofloya or the Moor.

S HUM 416 Subjectivity and the Other II (also Philosophy 415)
Spring. 4 credits. Limited to 15 students. Permission of instructor. M 12:20–2:15
F. Neuhouser.
This seminar continues and expands the themes of its predecessor with special attention to the role played by the other in certain (loosely speaking) psychological theories of selfhood. Topics will include: G. H. Mead on the importance of social roles to selfhood; Nietzsche on guilt, enslavement, and resentment; Freud's theory of neuroses, narcissism, and the therapeutic relation between analyst and analysand; and Kristeva's view of the other as internal to each of us.

S HUM 417 Spanish Borderlands and French Frontiers in American History (also History 487)
Spring. 4 credits. Limited to 15 students. Permission of instructor. R 10:10–12:05
D. Usner.
This seminar will explore how non-English colonial regions of North America—places like Florida, Louisiana, and California—have been represented in American history and culture. Through a critical examination of historical and popular texts, literature, folklife studies, and films, students will trace the role played by imagery of French and Spanish provinces in the production of nationalist, regionalist, and ethnic narratives.

S HUM 418 Exploring the Israeli Folksong (Music 418)
Spring. 4 credits. Limited to 15 students. Permission of instructor. T 2:30–4:25
S. Burstin.
The rich song repertory composed, sung and danced in Palestine/Israel between roughly 1930 and 1960 will be approached in this seminar as a cultural phenomenon. Through listening, reading and analysis we shall explore the eclectic nature of the Israeli folksong, its canon formation, dissemination, and complex oral and printed traditions. Course requirements: one research paper.

S HUM 419 Noisy Hybrids
Spring. 4 credits. Limited to 15 students. Permission of instructor. T 2:30–4:25
N. Neumark.
This seminar explores points of contact between theory and art practice, through theoretical and historical texts and new media and sound art works. Sound Studies is introduced as a hybrid discipline: what analyses of 'noise' does it offer and how do they intersect/distort debates on corporeality, subjectivity and translation? Questions of cultural diversity and alterity reverberate through the seminar.

S HUM 420 Testimony, Law, Literature (also English 442)
Spring. 4 credits. Limited to 15 students. Permission of instructor. M. Sanders.
In this seminar we will explore ways in which testimony hinges literature and law, and how the study of testimony makes sense of the origins of literatures, and brings to light the cultural and aesthetic roots and boundaries of legal systems and procedures. Using slave narrative, Holocaust survivor narrative, testimonio, and other collaborative testimonial literature, as well as the public hearings of South Africa's Truth and Reconciliation Commission as our primary source material, we will consider such issues as: truthfulness in testimony and confession; mourning, trauma and witnessing; the ethics of testimonial collaboration and advocacy. Requirements: one research paper, one presentation, and regular attendance.

S HUM 421 Contagion, Americanism, and Social Control
Spring. 4 credits. Limited to 15 students. Permission of instructor. P. Wald.
This course will explore the language of contagion as it surfaced in fiction, journalism, medicine and sociology at the turn of the twentieth century. We will attend both to its central role in defining "Americanism" and in negotiating the changing demographics brought about by immigration, urbanization and imperialism and to the differences among the genres and disciplines in that negotiation. We will study both a cultural phenomenon (and moment) and a variety of methodologies and lines of inquiry. The object of the course is to track a set of assumptions from their origin in scientific discovery (bacteriology) through their development in changing ideas about culture and contact to their consequences for historical and contemporary understanding of and attempts to regulate social interactions. There will be a required seminar paper.

S HUM 423 Modernism and the Sociology of Art
Spring. 4 credits. Limited to 15 students. Permission of Instructor. Time TBA
J. Wolff.
The seminar will focus on art in Britain and the US in the period 1900 to 1930. The principal objective will be to address the meaning of the term "the painting of modern life" (Baudelaire and T. J. Clark)—that is, what it might mean to claim that a certain style of painting is representative of a particular social and historical moment. The assumption that modernism is the art of modernity will be challenged, or at least explored critically. At stake is the question of the possibility of a sociology of art. A major theoretical project for the seminar, therefore, will be to address the development in the past two decades of three separate but necessarily related fields: cultural studies, the sociology of art and culture, and the "new art history." The opposition of two aesthetic regimes—modernism and realism—will be examined in terms of institutions and social relations, as well as artistic and aesthetic discourses. For example, the case of the Whitney Studio Club, and its predecessor, the Armory Show, will be considered in relation to the simultaneous rise of European-influenced avant-garde art in New York, and its institutional and social supports. In the case of England, the engagement of art practice in the "golden age" of Cubism and Futurism will be discussed in relation to intellectual and cultural life more generally in the 1910s and 1920s, and also in connection with the particular location and cultural production of immigrant and Jewish artists. As a conceptual and theoretical preparation for this discussion, the seminar will read texts on the "stranger"—in general, in modern society, and in relation to ethnicity, gender, and nation-building. The seminar will also take up two later sessions, focusing particularly on the case of the artist R.B. Kitaj and the meaning of the hostile response to his 1994 retrospective at the Tate Gallery.

S HUM 425 Unbecoming Community
Spring. 4 credits. Time TBA. Limited to 15 students. Permission of instructor. J. Ricco.
This seminar will examine the work of a number of contemporary philosophers and social theorists whose work might be understood as necessarily irresolvable, incomplete, and perhaps even impossible, and who locate its criticality in this very "failure" (Nancy, Blanchot, Agamben, Golding, Bersani, and Haver, et. al.) Unbecoming community might be what Georges Bataille meant when he spoke of "the community of those who do not have a community." Rather than force a negative or possible evaluation of this condition, we too shall treat community as an ethico-political question in its own right, and one that requires new ways of thinking about collective forms of sociality. We will consider anonymity, illegality, imperceptibility, itinerancy, proximity, and incommensurability, as some of the forces that make community unbecoming.

S HUM 489 Tales of the Heike (also Asian Studies 490 and History 490)
Fall. 4 credits. Permission of instructor. T 2:30–4:25
K. Brazzell and J. Piggott.

S HUM 495 Opera, History, Politics, Gender (also History 456)
Spring. 4 credits. W 2:30–4:25
M. Steinberg and S. Stewart.
The South Asia Program coordinates research, teaching, and special campus events relating to Bangladesh, India, Pakistan, Nepal, and Sri Lanka. The program faculty includes members from a variety of disciplines, including agricultural economics, agricultural engineering, anthropology, architecture, art, city and regional planning, communication, comparative religion, ecology and systematics, economics, English, government, history, history of art, human ecology, industrial and labor relations, international agriculture, linguistics, literature, rural sociology, and science, technology, and society. Undergraduates with a special interest in the region may major in Asian studies with a South Asia concentration, or complete a South Asia concentration with any other major. Graduate students may pursue the M.A. degree in Asian Studies with a concentration in South Asia. Languages offered are Bengali, Hindi, Nepali, Sinhala, Urdu, Sanskrit, and Pali. Foreign Language Area Language Studies Fellowships are available to Cornell graduate students who are U.S. citizens. Cornell is a class A member of the American Institute of Indian Studies (AIIIS), and undergraduates as well as graduate students are eligible for AIIIS intensive language program fellowships in India. For courses available in South Asian studies and details on the major, see the Department of Asian Studies listing in this volume. Students who want further information on courses and research opportunities should direct questions to the program office, 170 Uris Hall.

South Asia Program

Southeast Asia studies at Cornell is included within the framework of the Department of Asian Studies. Seventeen core faculty members in the colleges of Arts and Sciences, Business and the Johnson Graduate School of Management, the School of Industrial and Labor Relations, and Agriculture and Life Sciences participate in an interdisciplinary program of teaching and research on the history, culture, and societies of the region stretching from Burma through the Philippines. In addition, lecturers and other faculty provide language and area instruction on Southeast Asia. Courses are offered in such fields as anthropology, Asian studies, economics, finance, government, history, history of art, labor relations, linguistics, music, and rural sociology. Instruction is also offered in a wide variety of Southeast Asian languages: Burmese, Cambodian (Khmer), Cebuano (Bisayan), Indonesian, Javanese, Tagalog, Thai, and Vietnamese, for which Foreign Language Fellowships are available to U.S. citizens. The formal program of study at Cornell is enriched by a diverse range of extracurricular activities, including an informal weekly brown bag seminar and concerts of the Gamelan Ensemble. The George M. KC1inh Center for Advanced Research on Southeast Asia is also the site for public lectures as well as publication and outreach activities related to this area. The John M. Richards Collection on Southeast Asia, in Kroch Library, is the most comprehensive collection on this region in America.

Undergraduates may major in Asian studies with a focus on Southeast Asia and its languages, or they may elect to take a concentration in Southeast Asia studies by completing 18 credits of course work. Graduate students may work toward an M.A. degree in Southeast Asian studies or pursue a Master of Professional Studies in another school with a concentration in Southeast Asian studies. Ph.D. students in Southeast Asia receive a doctorate in a discipline such as history, art history, anthropology, government, music, economics, or city and regional planning.

Additional information is available on the Internet at: http://www.einaudi.comell.edu/advancedresearch/advresearch.html. Inquiries for further information should be directed to the program office, 180 Uris Hall.

Statistical Science Department

The university-wide Department of Statistical Science coordinates undergraduate and graduate study in statistics and probability. A list of suitable courses can be found in the section, "Interdisciplinary Centers, Programs, and Studies," in the front of this catalog.

Women's Studies Program

Introduction to the Program

Women's Studies is an interdisciplinary program that seeks to deepen understanding of women's lives, culture, and history, in all their complex multiplicities. Transformative as well as additive, women's studies challenges us to re-examine much of what we think we already know by providing an intellectual—and critical—framework through which to view the many interconnections among gender, knowledge, and power. Thus, central to the curriculum in women's studies is the overarching notion that:

(a) that definitions of gender—including those that privilege exclusive heterosexuality—are natural or universal but are instead social constructions that vary across time and place, serve political ends, and have ideological underpinnings;

(b) that systems of gender inequality interact with other social inequalities, including those of class, race, ethnicity, sexual preference, and Western vs. non-Western cultures; and

(c) that even the most current knowledge derived from the humanities, social sciences, and natural sciences is not as impartial, objective, or neutral as has traditionally been thought but instead emerges out of particular historical and political contexts.

Although all Women's Studies courses except writing seminars count toward the major, they do not all satisfy distribution requirements or count toward the total hours required in Arts and Sciences; if a course is not cross-listed with another Arts and Sciences department, be sure to check with college offices about whether it will satisfy distribution or our requirements for Arts and Sciences.

Program Offerings

The Women's Studies Program offers an undergraduate major, an undergraduate concentration, and a graduate minor. Undergraduate students in the College of Arts and Sciences who want to major in women's studies can apply directly to the program. Undergraduate students in other colleges at Cornell will need to work out special arrangements and should speak to the Director of Undergraduate Studies (DUS) in Women's Studies.

The Undergraduate Major

The questions posed by feminist inquiry cannot be answered from within any single discipline or even from a simple combination of two or more disciplines. For that reason, the women's studies major provides students with a basic grounding in the interdisciplinary field of women's studies and then requires each student to construct an advanced and individually tailored program of study on a topic, in a discipline, or in a combination of disciplines of special interest to the student alone. Rather than specifying a particular sequence of required courses for each and every student, the women's studies major gives students a starting point in women's studies, an active advisory structure to help them shape a curriculum, and an ongoing impetus to reflection about their entire program of undergraduate study.

In designing their major, students should keep in mind that there are not many graduate programs offering a degree in women's studies itself. Accordingly, undergraduates
wishing to major in women’s studies should talk at length with a faculty member about how to design a program of study that will best qualify them for entry into either a job or a postgraduate degree program when they leave Cornell. To give one example of what needs to be considered in designing a major: Undergraduates who might want to do graduate study within a discipline will need to develop a certain level of disciplinary specialization at the undergraduate level. This can be done either by supplementing the women’s studies major with a carefully selected cluster of courses in that discipline or by pursuing a double major.

Requirements for a Women’s Studies Major

1. Prerequisite courses: before applying to the major, the student must complete any two Women’s Studies courses with a grade of B- or better. Some suggested entry-level courses for 1999–2000 include: WOMNS 206, 210, 211, 294, 244, 209, 273, 277, and 285. Women’s Studies courses are prerequisites and as part of the women’s studies major. First-Year writing seminars, in contrast, would count as prerequisite courses but not as part of the major.

2. Required course work:
   a. A minimum of 36 credits in women’s studies is required for the major. No course in which the student has earned less than a C- can count toward these 36 credits. Although there is no single women’s studies course that is required of all students, every major must complete a program of study that is both graduated in difficulty and interdisciplinary in scope—a program, in other words, that reflects both the breadth and the depth of women’s studies scholarship. This program of study must be developed in consultation with the director of undergraduate studies and must include advanced seminars at the 300 level or above.
   b. Students may count up to three courses outside women’s studies toward the major if those courses are approved by the director of undergraduate studies as constituting a meaningful component of the student’s women’s studies curriculum. To facilitate the coordination of a women’s studies major with other majors in the college, students may also count toward the major up to three women’s studies courses that are simultaneously being counted toward a second major.

3. The Honors Program: to graduate with honors, the major in women’s studies must complete a senior thesis under the supervision of a women’s studies faculty member and defend that thesis orally before an honors committee. To be eligible for honors, students must have at least a cumulative grade point average of 3.0 in all coursework and a 3.3 average in all courses applying to their women’s studies major. Students interested in the Honors Program should consult the director of undergraduate studies (DUS) late in the spring semester of their junior year or very early in the fall semester of their senior year. For more information about the Honors Program, see WOMNS 400 and the “Guidelines For a Senior Honors Thesis” available in the Women’s Studies Program office.

The Women’s Studies Concentration

Undergraduate students in any college at Cornell can concentrate in Women’s Studies in conjunction with a major defined elsewhere in the university. The concentration consists of four courses in Women’s Studies completed with grades of C- or above, no more than two of which can come from a single discipline and none of which should overlap with the major. In rare cases, the DUS may allow one class from within a student’s major to count toward the requirements for the concentration. Students should not assume the waiver will be granted, and they must petition the DUS with this request before the beginning of their final semester of study. Freshman writing seminars cannot be included within the four required courses. Students wishing to concentrate in Women’s Studies should see the DUS.

The LBG Concentration

Women’s Studies serves as home to the Lesbian, Bisexual, and Gay Studies Program, which offers an undergraduate concentration as well as a graduate minor. The LBG undergraduate concentration consists of four courses. The Women’s Studies courses that may be used to fulfill the LBG concentration are 210, 244, 262, 277, 321, 355, 357, 376, 377, 413, 415, 427, 433, 450/650, 441/641, 465, 467, 468, 493, 621, 626, 654, 656 and 661. For a complete listing of all courses that will fulfill this concentration please see the LBG Studies portion of this catalog.

I. First-Year Writing Seminars

[WOMNS 100.95 FWS: A Matter of Fact? History, Gender & Difference (also History 100.95)]
T. Looes.

[WOMNS 104 FWS: Whose Families? Whose Values? (also History 105)]
M. B. Norton.

WOMNS 106 FWS: Women and Writing (also English 105)
Fall and spring. 3 credits. Staff. For description, see ENGL 105.

[WOMNS 109 FWS: Gendered Imaginations in African History and Literature (also History 109)]
S. Greene.

[WOMNS 113 Nudity/Nakedness: The Sexed Body in Western Art (also History 112.03)]
K. Barzman.

[WOMNS 155 FWS: Fiddler on the Roof in Anthropological Guise: Tradition, Gender, and the Politics of Culture (also Anthropology 155)]
S. Friedman.

[WOMNS 157 FWS: Close Encounters: Race and Sex in Anthropology and Science Fiction (also Anthropology 157)]
T. Fishel.

II. Courses

[WOMNS 203 Work and Family (also Sociology 206)]
Spring. 3 credits. W. Burkard.
For description, see SOC 203.

WOMNS 206 Gender and Society (also Rural Sociology 206)
Spring. 3 credits. B. Weinert.
For description, see R SOC 206.

[WOMNS 210 Introduction to Feminist Theory]
A. Villarejo.
This course introduces students to critical approaches in feminist scholarship to the cultural, socioeconomic, and political situation(s) of women. Particular attention will be paid to the conceptual challenges and dangers posed by attempts to study women without taking account of relations between race, class, and gender in ideological and social formations. Readings will draw on work in various disciplines and will include literary texts and visual images.

WOMNS 211 Introduction to Women’s Studies
Fall. 3 credits. K. McCollough.
Introduction to Women’s Studies is a multidisciplinary approach to understanding the experiences, historical conditions, and concerns of women, both in the present and the past. As the academic manifestation of feminism, women’s studies offers a range of perspectives (from liberal to radical) but focuses, in general, on understanding the sources of women’s oppression in order to eliminate these sources.

[WOMNS 214 Biological Basis of Sex Differences (also Biological Sciences 214 and Biology and Society 214)]
J. Fortune.

[WOMNS 234/434 Gender in Early Modern Europe (also History 234/434)]
R. Weil.

J. Brumberg.

[WOMNS 243 Inside-Out: The American Everyday Interior (also Design and Environmental Analysis 243)]
J. Jennings.

[WOMNS 244 Language and Gender Relations (also Linguistics 244)]
Spring. 4 credits. S. McConnell-Ginet.
For description, see LING 244.

[WOMNS 249 Feminism and Philosophy (also Philosophy 249)]
Fall. 4 credits. J. Whiting.
For description, see PHIL 249.
S. Samuels.

WOMNS 252 Women and the Holocaust (also English 252 and Jewish Studies 255) Fall. 4 credits. M. Jacobus.
For description, see ENGL 252.

WOMNS 263 Interpreting Melodrama and the Woman's Film (also English 263) 4 credits. Not offered 1999-2000.
L. Bogel.

WOMNS 269 Introduction to Feminist Political Thought (also Government 360) Fall. 4 credits. N. Hirschmann.
For description, see GOVT 369.

For description, see HIST 273.

WOMNS 285 Introduction to Sexual Minorities (also Human Development 284) Fall. 3 credits. R. Savin-Williams.
For description, see HD 284.

WOMNS 305 Emotion, Gender, and Culture (also Anthropology 305) @ 4 credits. Not offered 1999-2000.
B. J. Isenb.

M. Washington.

WOMNS 309/509 The Sociology of Marriage (also Sociology 309/509) @ 3 credits. Not offered 1999-2000.
M. Clarkberg.

WOMNS 320 Queer Theater (also Theatre Arts 320) Spring. 4 credits. J. E. Gainor.
For description, see THEATR 320.

WOMNS 321/631 Sex and Gender in Cross-Cultural Perspective (also Anthropology 321/621) @ Fall. 4 credits. K. March.
For description, see ANTHRO 321/621.

WOMNS 348 Studies in Women's Fiction (also English 348) Fall. 4 credits. L. Brown.
For description, see ENGL 348.

WOMNS 349 Readings in Feminist Literary Theory (also English 349) 4 credits. Not offered 1999-2000.
M. Hite.

D. Ruggles.

WOMNS 353 Feminism: State and Public Policy (also Government 353) Fall. 4 credits. M. Katzenstein.
For description, see GOVT 353.

WOMNS 355 Decadence (also English 355 and Comparative Literature 355) Spring. 4 credits. E. Hanson.
For description, see ENGL 355.

M. Hite.

WOMNS 362 Global Perspectives on Gender (also Africana 362) @ 4 credits. Not offered 1999-2000; next offered spring 2000-01.
N. Assie-Lumumba.

The course will examine how forms of gender inequality have been shaped by international forces and structured by differences in national histories. The class will be taught by a rotating set of two faculty members from different departments. Contingent on the particular faculty directing the course, the class will consider such issues as cross-cultural perspectives on gender; the history of work and family life in different societies; the gendered division of labor in local, national, and international economies; the impact of colonialism; the organized efforts of women to define gender relations; the role of the state in constructing an engendered economy and polity.

WOMNS 363 Representations of Women in Ancient Greece and Rome (also Classics 363 and History 367) @ 4 credits. Not offered 1999-2000.
J. Ginsburg, L. Abel.

WOMNS 365 Topics in Social and Personality Development: The Psychological Development of Women (also Human Development 368) Fall. 3 credits. C. Raver.
For description, see HD 365.

WOMNS 366 Women at Work (also Industrial and Labor Relations: Human Resources 366) Spring. 3 or 4 credits. J. Farley.
For description, see ILRHR 366.

WOMNS 368 Marriage and Sexuality in Medieval Europe (also History 368 and Religous Studies) Spring. 4 credits. P. Hyams.
For description, see HIST 368.

E. Hanson.

WOMNS 378 Topics in U.S. Women's History (also History 378 and American Studies 378) Fall. 4 credits. M. B. Norton.
For description, see HIST 378.

P. Becker.

WOMNS 381 19th Century French Women Writers (also French Literature 381) @ 4 credits. Not offered 1999-2000.
A. Berger.

WOMNS 400 Senior Honors Thesis Fall and spring. 2-8 credits. For Women's Studies seniors only. Permission of Women's Studies faculty member required. Student must carry a GPA of 3.0 in all subjects and a 3.3 in Women's Studies.
Staff.

Both the form of theses, and the nature and extent of contact between student and adviser, will depend on mutual agreement between the two. In one common scenario, the student will write an essay of approximately 50 pages in length, drafted and revised in a series of carefully planned stages over the course of two semesters, with an outline expected on approximately Sept. 15th and a draft of the first chapter on approximately November 15th. An "R" grade will be assigned at the end of the fall semester and a letter grade on completion of the project at the end of the spring semester.

WOMNS 403 Love, Sex, and Song in the Middle Ages (also Music 403) Spring. 4 credits. J. Peraino.
For description, see MUSIC 403.

WOMNS 404 Women Artists (also History of Art 466) # 4 credits. Not offered 1999-2000.
J. Bernstein.

WOMNS 405/605 Domestic Television Spring. 4 credits. A. Villa-ajo. This course is a seminar on television as technology and cultural form, focusing on the "domestic" as a synonym for gendered value-coding, an axis of the international division of labor (and questions of television's dissemination and circulation), and a site for historical exploration. The course balances readings in television and cultural theory (Spigel, Dienst, Merck, Williams, Peuser, Modleski, Mellencamp, Shattuck, Spivak and others) with close analysis of television as information, entertainment, furniture, technology, text, genre, flow, channel, and circuit of production of the commodity audience. Students may enroll in either undergraduate or graduate level with graduate students submitting a longer paper and doing supplementary readings.

WOMNS 406 The Culture of Lives (also Anthropology 406) @ 4 credits. Not offered 1999-2000.
K. March.

<td>The purpose of this course is to expose graduate students to interdisciplinary approaches in Women's Studies and feminist theory to a variety of topics or questions. While many of our graduate courses train students in highly specialized areas of feminist theory, this course aims to teach students how to find common intellectual ground around a single topic from interdisciplinary perspectives without sacrificing the complexity of any disciplinary approach. The course is designed for graduate minors in Women's Studies and students with a specialized interest in feminist theory. Although it is not required, the course is strongly recommended for students obtaining a graduate minor in Women's Studies.</td>

Hanson, Ellis, Ph.D., Princeton U. Asst. Prof., English

Harbert, Wayne E., Ph.D., U. of Illinois. Prof., Linguistics

Harris, Robert L., Ph.D., Northwestern U. Assoc. Prof., Africana Studies and Research Center

Harris-Warrick, Rebecca, D.M.A., Stanford U. Assoc. Prof., Music

Hartill, Donald L., Ph.D., California Inst. of Technology. Prof., Physics/LNSSG.

Hartman, Paul L., Ph.D., Cornell U. Prof., Emeritus, Physics/Engineering and Computer Physics/LASSP*

Hartmanis, Juris, Ph.D., California Inst. of Technology. Prof., Emeritus, Computer Science

Hartwit, Martin O., Ph.D., Massachusetts Inst. of Technology. Prof., Emeritus, Astronomy/CRSRF

Hassan, Salah, Ph.D., U. of Pennsylvania. Asst. Prof., Africana Studies and Research Center

Hatch, Martin, Ph.D., Cornell U. Assoc. Prof., Music

Hatcher, Allen, Ph.D., Stanford U. Prof., Mathematics

Hay, George A., Ph.D., Northwestern U. Prof., Economics/Edward Cornell Prof. of Law

Hayes, Donald P., Ph.D., U. of Washington. Prof., Emeritus, Sociology

Haynes, Martha P., Ph.D., Indiana U. Prof., Astronomy/NAICF

Heckathorn, Douglas D., Ph.D., U. of Kansas. Prof., Sociology

Henderson, David W., Ph.D., U. of Wisconsin. Prof., Economics

Henderson, John S., Ph.D., Yale U. Prof., Anthropology

Henley, Christopher L., Ph.D., Harvard U. Assoc. Prof., Physics/LASSP*

Herrin, W. Lamar, Ph.D., U. of Cincinnati. Prof., English

Herring, Ronald, Ph.D., U. of Wisconsin at Madison. Prof., Government

Herter, Terry L., Ph.D., U. of Rochester. Prof., Comparative Literature/CISR

Hester, Karlton, Ph.D., City U. of New York. Asst. Prof., Music

Hildebrand, George H., Ph.D., Cornell U. Maxwell M. Upson Professor of Economics and Industrial Relations Emeritus, Economics/Industrial and Labor Relations

Hilgarter, Stephen, Ph.D., Cornell U. Assoc. Prof., Science and Technology Studies

Hill, Theodore J., Ph.D., Cornell U. Prof., English/Medieval Studies

Hines, Melissa A., Ph.D., Stanford U. Asst. Prof., Chemistry and Chemical Biology

Hirschmann, Nancy, Ph.D., Johns Hopkins U. Assoc. Prof., Government

Hite, Molly, Ph.D., U. of Washington. Prof., English

Ho, Wai, Ph.D., U. of Pennsylvania. Prof., Physics/LASSP*

Hockett, Charles F., Ph.D., Yale U. Prof., Emeritus, Modern Languages and Linguistics

Hofstadter, David, Ph.D., Stanford U. Prof., Physics/LNSF

Hodes, Harold, Ph.D., Harvard U. Assoc. Prof., Philosophy

Hoffmann, Roald, Ph.D., Harvard U. Prof. Emeritus, Professor of Humane Letters, Chemistry and Chemical Biology

Hohendahl, Peter U., Ph.D., Hamburt (Germany). Jacob Gould Schurman Professor of German Literature, German Studies/Comparative Literature

Holcomb, Donald F., Ph.D., U. of Illinois. Prof., Emeritus, Physics/LASSP*

Holden, W. Wolfgang, Ph.D., Yale U. Emeritus, Modern Languages and Linguistics

Holloway, Thomas H., Ph.D., U. of Wisconsin. Prof., History

Holmberg, David H., Ph.D., Cornell U. Prof., Anthropology/Women's Studies

Hollquist, Peter, Ph.D., Columbia U. Asst. Prof., Linguistics

Hong, Yongmiao, Ph.D., U. of California at San Diego. Assoc. Prof., Economics

Hopcroft, John E., Ph.D., Stanford U. Joseph C. Ford Professor of Computer Science

Houck, James R., Ph.D., Cornell U. Kenneth A. Wallace Professor of Astronomy/CRSRF

Houston, Paul L., Ph.D., Massachusetts Inst. of Technology. Peter J. W. Debye Professor of Chemistry and Chemical Biology

Hsu, John T. H., D. Music. New England Conservatory of Music, Old Dominion Foundation Professor of Humanities and Music

Hubbard, John H., Doctorat d'Etat, U. de Paris (France). Prof., Mathematics

Hughes, Robert E., Ph.D., Cornell U. Prof., Emeritus, Chemistry and Chemical Biology

Hull, Isabel V., Ph.D., Yale U. Prof., History

Husa, Karel, Diploma, Paris Conservatory (France). Kappa Alpha Professor of Music, Emeritus

Huttenlocher, Daniel P., Ph.D., Massachusetts Inst. of Technology. Assoc. Prof., Computer Science

Hwang, J. T. Gene, Ph.D., Purdue U. Prof., Mathematics
